Undergraduate Research Opportunity in Renewable Energy

NSF REU Site in Marine Renewable Energy

The Southeast National Marine Renewable Energy Center at FAU is hosting an intensive summer research program focused on science and engineering challenges related to the environmentally friendly creation of electricity from ocean currents.

Research will focus on: resource assessment, system design, and environmental impacts.

This ten-week program emphasizes training, mentoring and research, preparing students for graduate studies or careers in science, technology, engineering or math disciplines.

Work days will typically run from 8 a.m. to 5 p.m., including student development and training events held 2 to 3 times weekly.

Housing will likely be provided on FAU’s beautiful Boca Raton or Harbor Branch Oceanographic Institute campuses (Covid permitting), or equivalent housing stipends ($40/day) will be provided. Participant stipends of $600/week will be also provided, along with a food allowance of $150/week.

A remote version of this program will be held if needed due to COVID-19 (see website).

Apply at: bit.ly/FAUREU

Registration opens: Dec. 15, 2022

Registration deadline: Feb. 23, 2023

*Applicants will be notified on or before March 2, 2023 regarding acceptance to this program.

This program is funded through the National Science Foundation’s Research Experiences for Undergraduates program (EEC-1659468).
