

FAR – how to enter varied funding sources between semesters

For cases that a sponsored award only supports salary in certain semester, typically summer term, cloning this activity in FAR is a method to make sure the correct funding sources are recorded. Here is an example of how to enter a 50% FTE grant activity that supported salary in summer but not fall and spring.

Summer 2022 - Grants activity started in summer 2022, supported by a C&G fund
