

Notifications

You can select to receive notifications when customers successfully complete purchases and/or have failed transactions.

These notifications may not be desired due to the **potentially large volume of messages** that could be generated.

Notifications

FIELD NAME	DATA ENTRY INSTRUCTIONS
Do you want to receive notification of successful and/or failed transactions via email, https get or post messages?	To indicate that you would like to receive notifications, select Yes and then click on the CONTINUE button.

If **Yes**, complete the fields in the table on the next page following.

Notifications

FIELD NAME	DATA ENTRY INSTRUCTIONS
Skip notifications for pending transactions	By checking this box, any notifications for transactions in a Pending state will not be sent. Pending transactions are created in International Funds Transfer (IFT) payments.
Include transaction status	Indicates whether or not the transaction status should be included in the notification, typically only relevant to International Funds Transfer (IFT) payments. We recommend checking this box if you are using Flywire.
Email Notifications	<p>If you would like email notifications, enter the email addresses next to each category. Email addresses listed here will receive an email whenever a transaction is successful or fails, and using reports is advised over this option.</p> <p>Separate multiple email addresses by commas. If you leave the field blank, you will not receive notifications for that category.</p> <ul style="list-style-type: none">• for failed transactions:• for successful transactions: <p>Select format for email content:</p> <ul style="list-style-type: none">• Standard Format• XML Format
HTTP Notifications	<p>If you would like HTTP notifications, enter the URL next to each category. If you leave the field blank, you will not receive notifications for that category.</p> <ul style="list-style-type: none">• for failed transactions:• for successful transactions: <p>Select format:</p> <ul style="list-style-type: none">• Name Value Format (GET)• XML Format (GET)• Name Value Format (POST)
