Undergraduate Research Grant Package Guidelines

The following materials are required for your grant package to be complete. Each page must be typed, in 12-point Times New Roman font, single-spaced, with 1-inch margins. The timeline can be double-spaced. **The entire grant package must be combined into a single pdf and uploaded into Survey Monkey Apply as one file, titled “Last Name of applicant First Name initial SemesterYear.”** The Faculty Mentor Letter of Support may be uploaded into Survey Monkey Apply or emailed separately from the grant package and is not included in the maximum number of pages. Grant packages that do not adhere to this format or are incomplete will not be reviewed.

1. **Undergraduate Research Grant Online Application** (submitted through Survey Monkey Apply)

2. **Grant Package Proposal (try to keep to 6 pages maximum):**
   Includes Project Description, Timeline, Budget, Justification, and References

   a) **Project Description (2 pages):** Describe the project for which you are requesting funds. The project description must be clear and concise and include the following:
   - **Purpose/Project Summary:** Clearly state the research focus or question and the importance and value of the research project.
   - **Background:** Some brief background information on the research study, including a relevant literature review (e.g., what has already been done in the field related to your research topic/question).
   - **Methodology:** A brief overview of the methods or approach that will be used to complete the study.
   - **Anticipated outcome(s):** Provide expected results/outcomes and identify how they make an original intellectual or creative contribution to the discipline or practice.

   b) **Timeline (1 page):** Please include a detailed timeline for completing most of the project successfully during the grant funding cycle. Include the expected start date, specific steps involved to conduct the study, completion date, presentation at an FAU Research Symposium, and anticipated graduation date. Your timeline must be both systematic and realistic. Please note that the timeline may not exceed 12 months from the start date and must be completed prior to your graduation as an undergraduate student.

   c) **Budget and Budget Justification (1 page)** – please see sample budgets provided *(Appendix C)*: Prepare a line-item budget for all funds being requested. **For each item,** indicate details of the specific item requested, quantity needed (consistent with methodology), cost, and where the items will be purchased (supplier) with a website link if appropriate to the item itself. For the budget justification, provide a narrative explanation of each budget item, which "justifies" the cost in terms of the proposed work. The explanations should focus on how each budget item is required for the completion of the project. If the budget exceeds the allowable grant amount, please explain how the overage is to be funded.

   Examples of allowable expenses include, but are not limited to:
   - costs for laboratory, artistic supplies, software and databases, and small equipment that are not readily available in your area/department/college.
   - travel to offsite locations to conduct research, such as archives, libraries, companies, museums, or collections containing materials relating to the research topic. Make sure to
use the Florida Statutory mileage rate (not gas costs) for trips involving the use of a personal vehicle.

- photocopying of research-related materials or purchase of books not otherwise available at or through the University Library.
- program fee costs associated with a research-intensive study abroad program to include materials and supplies needed to conduct the research abroad.
- **NEW: publication costs if the undergraduate is listed as an author or co-author.**

Examples of non-allowable expenses include, but are not limited to:

- costs associated with attendance or presentations at professional meetings.
- stipends, living expenses, tuition or laboratory fees of the grant recipient.
- research costs normally associated with department/college budgets (e.g., computers or laptops for use at FAU).
- costs associated with the external funding of the student’s faculty advisor for research in the same general area.
- the hiring of assistants or other external services.
- lessons or costs associated with professional development.

**Budget Notes:**

i. Funds associated with the Undergraduate Research Grant must be spent by the end of the fiscal year (June 30th) in which the funds were transferred, subjected to the University’s year-end policies/deadlines. Please consult with your department or college business manager for more information. The project, however, can continue past this date. Awarded Summer/Fall grant funds (the Spring call) will be transferred after July 1st (the start date of the next fiscal year).

ii. **NEW: Student stipend allocation:** Faculty are now allowed to allocate a maximum of 50% of the awarded OURI Undergraduate grant (cannot be included as a budget item in the application process) to a student(s) that has been involved in the grant, to be disbursed after the student(s) has successfully presented at the OURI spring symposium, and before the end of the fiscal year.

iii. FAU's Student Government Association (SGA) has funds available for conference travel and for presentations at professional meetings. See their website [click here](#) for more information.

iv. Any purchases, such as equipment, books, and remaining supplies, must remain at FAU after the project is completed as property of the mentor’s department.

d) **References (1 page):** At the end of your project description, please include a comprehensive list of references related to the research topic. Make sure to include primary references.

e) **For Group Proposals:** One member of the group must complete all the above-listed components of the grant package. In addition, a justification of what each group member will contribute to the project must be made in the form of a one-page (maximum) supplemental document. Each group member must have a clear role/task supporting the overall research question(s).

3. **Faculty Mentor’s letter of recommendation:** The faculty mentor’s letter can be uploaded into Survey Monkey Apply or emailed separately (from the grant package). An FAU Faculty Mentor’s guideline has been developed to facilitate the completion of this recommendation letter. Please see Appendix D for letter format and requirements.

*Updated 8/31/2023*
4. **Judging criteria**: All grants will be peer-reviewed by faculty, staff, and graduate students who will evaluate the merit of the proposal based on an evaluation rubric (see Appendix E):

   a) **Strength of Proposal** - Proposals must be clear, concise, and understandable for reviewers from varying disciplines (broad backgrounds). Strong proposals should also meet the following criteria:
      - Clear focus on a research question or scholarly problem addressed in this study: The grant explicitly states what the project will accomplish. There is a clear central idea, hypothesis, or objective.
      - If a group project is selected, each group member must have a clear role/task supporting the overall research question(s).
      - Background theory: provides an evaluation of previous work conducted in the area related to the question or the problem.
      - Sound methodology: Methodology clearly conveys the steps that will achieve the purpose of this project and how data/information will be obtained.
      - Contribution to the field or discussion of potential impact: There is an explanation of
        - the importance of the proposed project, “in the big scheme of things”
        - the value of the project’s impact
        - the project’s contribution of an original, intellectual, or creative work to the discipline

   b) **Timeline/Plan of Work** - The student outlines the time necessary to complete most of the project successfully during the grant funding cycle. It is justified that the project can be reasonably completed in that time (including allocating time for research compliance requirements) and that the student will present at an FAU Research Symposium.

   c) **Appropriateness of Budget** - The requested budget is justified and necessary for the completion of the project. The budget provides detail associated with what will be purchased (item and quantity) and an explanation of the needs evidenced by the methodology section, as well as detail on where and how the funds will be spent (see Appendix C for samples).

   d) **Faculty Mentor’s Letter** - The mentor endorses the project and the merit of the student(s) conducting the project and assures the reviewers that no other funds exist for parts/all of the project. The mentor provides appropriate research compliance information as it applies to this project (see Appendix D for more information).

5. **Research Ethics**: We highly recommend students conducting any research or scholarly activities participate in the CITI (Collaborative Inter-Institutional Training Initiative). This provides access to courses that are designed to be used by institutions and organizations to provide comprehensive training in a variety of areas.

6. **Examples Of Previously Funded Grants**:
   
   a. Example 1
   b. Example 2
   c. Example 3
   d. Example 4
   e. Example 5
   f. Example 6

*Grant package guidelines have been adapted with permission from UCF’s Undergraduate Research Grant 2013 application.*
APPENDIX A: Grant Maturity

**Exploratory** - Beginning or Exploring a new research idea, NOT expanding an ongoing project in a new direction (see below for that)

**Developing** - Further Developing or Expanding the scope of a project, where the project has likely been ongoing for less than one calendar year (at the time of submission of this grant package)

**Advanced** - Research projects that have likely been ongoing for more than one year (at the time of submission of this grant package)
APPENDIX B: Research Compliance Information

About IACUC

Florida Atlantic University’s Institutional Animal Care and Use Committee (IACUC) has been established in accordance with the Animal Welfare Act and Public Health Service Policy on the Humane Care and Use of Animals. The committee is composed of individuals dedicated to the humane care of animals used in research and teaching and provides oversight and assistance in ensuring compliance to all laws, regulations, and policies governing the care and use of research and teaching animals. FAU’s IACUC is composed of scientists, non-scientists, veterinarians and community members who are appointed by the Vice President for Research, the Institutional Official responsible for the animal care and use program. FAU’s animal care and use program is regulated by both the U.S. Department of Agriculture and the U.S. Public Health Service. University faculty, staff, and students using animals in research, teaching or display must have IACUC approval to do so.

About IRB

Florida Atlantic University’s Institutional Review Board (IRB) is a federally mandated committee that oversees the ethical conduct of human subjects’ research at an institution. Florida Atlantic University’s IRB serves an important role in the protection of the rights and welfare of human subjects involved in research. The IRB reviews and approves protocols for research involving humans and ensures that appropriate steps are taken to protect their rights and welfare. FAU’s IRB is comprised of faculty members representing a variety of backgrounds, training and experience, as well as community members who are appointed by the Vice President for Research, the Institutional Official.

If your research meets the following two definitions, then you are involved in research with human subjects: "Research" means a systematic investigation designed to develop or contribute to generalizable knowledge. "Human subject" means a living individual about whom an investigator conducting research obtains: 1.) data through intervention or interaction with the individual, or 2.) identifiable private information.

For more information visit FAU’s Research Integrity website at the following link:
https://www.fau.edu/research/research-integrity/
About EHS

The goal of Florida Atlantic University’s Environmental Health and Safety is to provide and ensure a safe and healthy environment for students, faculty, staff and visitors through comprehensive service oriented programs. EH&S is also the primary contact for federal, state, and local regulatory agencies regarding matters of health, safety and the environment.

With regard to Undergraduate Research, undergraduate research compliance checks will be limited to training requirements, and any occupational health program requirements, i.e. bloodborne pathogens (HBV vaccination), respiratory protection (doctor’s clearance), etc. related to the research to be completed. Additionally, during compliance checks of research laboratories EH&S will ask for a list of all personnel in the lab so that training status can be verified.

Many safety training courses are available online through EH&S to assist in developing safety skills that will help when conducting research when using animals, chemicals, biological materials and much more. For more information on which training classes are required, please review the EH&S Course Matrix by Work Type found here. The descriptions of the training programs are available on the website.

Questions to ask about your research project to determine if you may need EH&S review/certification/trainings:

1. Does your research involve radioactive materials, X-rays or lasers?
2. Does the project involve Diving, Snorkeling or the use of Boats?
3. Does the project involve the use of Hazardous Chemicals or Nanomaterials?
4. Does the project involve the production of flame, smoke or heat or any combination of the three?
5. Does the project involve field work (contact ehs@fau.edu)?
6. Does the project involve the use of chartered Helicopters or Airplanes (contact ehs@fau.edu)?

*NOTE: FAU students conducting research projects at external institutions (i.e., Scripps, MPFI, etc.) are required to complete FAU’s EH&S trainings even if they have completed them elsewhere.

About IBC

The Institutional Biosafety Committee (IBC) has been delegated the authority to set University policy with regard to biological and recombinant DNA safety. The IBC must comply with the National Institutes of Health (NIH) Guidelines for Research Involving Recombinant or Synthetic Nucleic Acid Molecules. The IBC is responsible for overseeing the use of all biological agents and recombinant DNA methods employed in research and teaching projects on Florida Atlantic University's campuses. If your research involves the use of Recombinant DNA, Biological Materials/Agents/Toxins, or Select Agents, please contact ehs@fau.edu for further assistance. About IBC

</tbody>
</table>

### Budget justification:

1. **PAMPA Plate System**: My research pertains to the findings of peptides that permeate through a cell membrane. Therefore, I require a parallel artificial membrane permeability assay “PAMPA”, to test the penetrating capabilities of the peptides separated by high performance liquid chromatography “HPLC”. After I separated the conotoxins, we established approximately 2000 samples. Approximately half of these samples registered were hydrophobic. These hydrophobic peptides are what I am interested in testing through Pampa. I have identified approximately 900 peptides as being hydrophobic, and I already have one PAMPA package which contains 5 plates that have 96 wells per plate. This gives me 460 wells that I can place samples into for testing. But this would only be enough to test half of my hydrophobic samples. It is imperative that I have another PAMPA package so I can test all of the samples identified as hydrophobic. I need so many wells because every sample has to be separated and tested individually in order to specifically see which sample has the potential to penetrate a cell membrane.

2. **Lucifer Yellow**: I need the chemical compound Lucifer yellow to act as one of my controls. This compound is used specifically as a non-permeable control group.

3. **Propranolol hydrochloride**: Contrary to the Lucifer Yellow I have Propranolol Hydrochloride as our other control due to its ability to penetrate cell membranes because of its lipophilic characteristics. These two controls are needed so I know that the pampa's artificial membrane is working properly and allowing only compounds that are permeable to pass through the membrane and inhibiting all non-permeable compounds from passing through the membrane.

### Overage:

Since the total request goes over the allocated $500 budget, my research advisor has committed to providing the additional $53.21 in materials as evidenced by his letter of recommendation.
Budget Sample 2:

<table>

<td>15.00</td>
</tr>
</tbody>
</table>

**Total amount requested:** 429.90

Budget Justification

1. GPS-Garmin ETrex 20: The GPS Garmin ETrex will be purchased and used for collecting spatial data for mapping research sites.
2. Suunto KB-14 Azimuth Compass Zone 1. Since much of the research will involve navigating through research sites and will be used for orienteering & walking survey transects.
3. Millimeter graph paper: will be purchased for data collection and for drawing maps.
4. ArcGIS annual license: This individual student license will be purchased as software used in the discipline for making project maps.
5. Field notebook: I will purchase a field notebook for data collection on-site of field notes.

Generic Budget Sample 3: for travel to research site.

**Total amount requested:** 385.00

Updated 8/31/2023
Dear Faculty,

Your undergraduate student is applying for an Undergraduate Research Grant program to support their project. We need your assistance in writing a letter of recommendation so that the selection committee is better able to judge the grant package guidelines received. Please ensure that your letter addresses the following:

1. The importance of the research and how it contributes to the student’s development and to the discipline or practice
2. The feasibility of the proposed project and timeline presented (evaluation of the project)
3. The maturity of the research project (Exploratory, Developing, or Advanced – Appendix A)
4. The capability of the student in pursuing and completing the research in the time frame identified (evaluation of the student)
5. Your willingness to provide oversight of the project including meeting with the student regularly during the course of the research project and reviewing their work in preparation for presentation at the Annual Undergraduate Research Symposium
6. The justification of funding as it applies to its impact on this specific project and assurance that no other funding is available or an explanation of current funding for the project. For example, how will the grant support parts/all of the project not covered by any grants available to the faculty mentor?

7. Requirement – Certification of Research Compliance is required if the intended research includes methodology involving an area regulated by Federal, State or University laws and policy (including the use of human or animal subjects, diving and boating safety, work carried out in a wet-lab involving the use of chemicals and/or potential blood-borne pathogens).  
   **Note:** If this project includes methodology involving an area of compliance listed above, the faculty member must certify in the letter that:
   a. Their area(s) of content expertise related to this undergraduate student research project or identify and include a third-party faculty to provide the expertise necessary to mentor this student. Please include the name and email address of this faculty expert in your letter.
   b. The student(s) is included in all appropriate compliance protocols and provide the protocol number in your letter; and
   c. The student(s) has been properly certified through appropriate EHS training and provide certificates, if applicable.

Once you have completed your letter, please provide it to your student to include with their online grant application or send it directly to ouri@fau.edu by October 15th for Spring/Summer proposals or March 15th for Summer/Fall proposals. Should these dates fall on a weekend day or holiday, the deadline will become the next business day.

Thanks so much for your mentorship of this student(s) and your efforts towards growing a culture of undergraduate research and inquiry at FAU.

Sincerely,
The OURO Team
