

Rsch-L Update

News

Sept. 17, 2014

Events

GrantsERA Training

Tomorrow-September 18, 10 am-Noon

(Medicine, Nursing, Science, Engineering, HBOI)

October 16, 1-3 pm

(CDSI, Education, Arts, Business, Honors)

November 13, 10 am-Noon (all disciplines)

FAU Instructional Services Lab, Bldg. 4, Room 208

FAU faculty and staff who are new to processing, submitting and managing grants and contracts are encouraged to attend this training. Click on the Sponsored Programs' [calendar](#) for details and to register. Stay tuned for details on refresher training this Spring.

FAU Responsible Conduct of Research - Protection of Human Subjects and Welfare of Research Animals

Oct. 3 and 7, Noon-1:50 pm, SU-80, Room 132

Graduate students are strongly encouraged to register for free

JAMA Psychiatry Publishes FAU Researcher's Groundbreaking Nicotine-Addiction Study

Michele Pergadia, Associate Professor of Clinical Biomedical Science in the Charles E. Schmidt College of Medicine at FAU, is one of the study's lead authors that JAMA Psychiatry published online Sept. 10. She and her collaborators from Harvard University and the University of California San Diego found that nicotine withdrawal similarly reduced

reward responsiveness in human smokers - particularly those with a history of depression - as well as in nicotine-treated rats.

Replication of experimental results across species is a major step forward because it allows for a more reliable means of identifying behavioral and neurobiological mechanisms that explain the complicated behavior of nicotine withdrawal in humans addicted to tobacco, Pergadia said. [READ MORE](#). Find the study [HERE](#).

FAU Professor Posthumously Inducted Into Florida Inventors Hall of Fame

workshops on the professional standards of ethical research. Each of four modules is offered twice this semester. Undergraduate students and faculty are welcome to attend. Click [here](#) for the fall schedule and to register. Lunch will be provided to those who register more than a week in advance.

What's Patentable?

October 10, Noon-1:30

College of Medicine, Room 130

Join a discussion on what's patentable and trending. Lunch will be provided to those who RSVP by Oct. 1. Download a flyer [here](#).

BioFlorida Conference

Oct. 12-14, Ft. Lauderdale

Join conference chair, Andrew Duffell, President and CEO of Research Park at FAU at BioFlorida's annual conference. Click [here](#) for details.

Funding Opportunities

NIH Clinical and Translational Science Awards

Letter of intent due: Nov. 16; application by Dec. 16

This announcement calls for applications from medical research institutions. The program funds a national network of medical research institutions working to transform clinical and translational science. Download the request for proposal [here](#).

NSF Documenting Endangered Languages

Due: Oct. 6; Sept. 15, 2015

He's mentioned in the same vein as iconic figures such as Thomas Edison and John Gorrie, the air conditioning innovator. His work is credited with saving thousands of lives and pioneering an age of high-definition televisions, while his legacy continues to be felt at FAU, in the medical field and in homes across the globe.

For all of his innovations and achievements in the fields of high-resolution imaging, electronic and optical physics and electrical engineering, William Glenn, Ph.D., who served as a professor in FAU's Department of Computer and Electrical Engineering and Computer Science, was posthumously inducted into the Florida Inventors Hall of Fame on Sept. 10 in Tampa, represented by his widow Jeanne Glenn. Glenn died on July 13, 2013 in Fort Lauderdale at the age of 87.

"If I had a chance to sit with Dr. Glenn, I would ask him how he did what he did. How did he come up with one creative solution after another after another," said FAU President John Kelly. "Most people may have a good idea once in a while. He seemed to have good ideas constantly. And anybody who can do that could be a great teacher for the rest of us. I'd like to keep his story alive at FAU and really celebrate him and his career as a role model for all the rest of us." [READ MORE.](#)

Supervisors' Personality Can Have Outsized Influence on Job Performance Appraisal

NSF and the National Endowment for the Humanities jointly are supporting projects emphasizing language description, infrastructure and/or computational methods. Download the solicitation [here](#).

U.S. Dept. of Energy Novel In Situ Imaging and Measurement Technologies for Biological Systems Science

Pre-application due: Oct. 15; application due: Dec. 18

The anticipated outcome of this FOA is the development of in situ imaging and measurement technologies that can (1) resolve multiple key metabolic processes over time within or among cells and (2) bridge the critical gap in linking molecular-scale information to whole-cell, systems-level understanding. Click [here](#) for details.

NSF Paleo Perspectives on Climate Change

Due: Oct. 15; Oct. 15, 2015

This project supports the scientific objects of the U.S. Global Change Research Program by fostering interdisciplinary research and synthesis of climate data. Download RFP [here](#).

American Heart Association Strategically Focused Disparities in Cardiovascular Disease Research Network

Letter of intent requested by Oct. 30; center and center projects due: Jan. 30, 2015

The association is supporting collaboration across the disciplines to fund four centers to accelerate the development of important, novel ideas and increase knowledge and research capacity. Download letter of intent instructions [here](#) and a request for application [here](#).

For employees across the country, their managers' personality traits may influence job performance reviews, which are often tied to raises and promotions. A new study by Michael B. Harari, an assistant professor at Florida Atlantic University's College of Business, found that supervisors with agreeable personalities rate

employees higher on job reviews. While employees may like the higher ratings, they would not reflect an accurate picture of employees' performance, which can skew an organization's or business' assessment of its overall performance.

The Journal of Occupational and Organizational Psychology yesterday published the study, "Does Rater Personality Matter? A Meta-Analysis of Rater Big Five-Performance Rating Relationships." [LEARN MORE](#)

Responsible Conduct of Research: CITI Basic Course Change

The Collaborative Institutional Training Initiative (CITI) is replacing its existing Responsible Conduct of Research basic courses with a new basic course to simplify and improve content.

Students who have started or plan to take the University of Miami web-based basic course before Nov. 25 should complete and pass their entire course by that date. If not, students will be unable to finish the partially completed course and will need to restart with the new basic course.

Click [here](#) to register for the RCR CITI class; be sure to select FAU for organizational affiliation. [LEARN MORE](#)
