

DIVISION OF RESEARCH
FLORIDA ATLANTIC UNIVERSITY

VIRTUAL RESEARCH IN ACTION

Did you know stereotypes (like boys are better at math than girls) have the power to negatively impact our lives?

Join Chad Forbes, Ph.D., the new associate director of the FAU Stiles-Nicholson Brain Institute, as he discusses his interdisciplinary research explaining:

- ways biases influence how the brain processes information about oneself
- consequences of such biased information processing
- how combining psychology methods with neuroscience tools, like examining the brain's electrical activity, can combat the negative impact stereotypes have on our lives

Why Are Stereotypes Bad for Your Health?

Presented by Chad Forbes Ph.D.,
associate professor, psychology
and associate director, FAU's
Stiles-Nicholson Brain Institute

1 – 2 P.M. EST
THURSDAY, MAY 5
