**To:** Graduate Programs Committee University

**From:** Dr. Khi Thai, Director, School of Criminology and Criminal Justice  
Contact Person: Dr. Rachel Santos, Graduate Coordinator

**RE:** Proposal for Revisions to Master of Science in Criminology and Criminal Justice

**Date:** March 14, 2012

The School of Criminology and Criminal Justice is very excited to announce a revised Masters of Science degree in Criminology and Criminal Justice (MSCCJ) for our students. The product of this effort is a result of much collaboration, feedback, planning, and months of discussion. Our hope with this revised program is multifold. First, we hope to improve the structure and academic rigor of our master's degree to better prepare our students for the complexities of today's workforce as either criminal justice practitioners or researchers. Second, we hope to attract more students into our program from both the criminal justice profession as well as from our strong undergraduate base. Our goal is to ensure that students receive education in the most important discipline-specific concepts and become producers and consumers of research and best practices.

It is important to note that there are NO changes to the program's relationship to the overall mission/goal of the university, the total number of credits required (33), the impact to other colleges schools or departments, or to the name of the program. The revisions that have been approved by the School of Criminology and Criminal Justice Faculty in October 2011 primarily address the following:

- 1) Admission requirements;
- 2) Core requirements;
- 3) Elective requirements,
- 4) Exit requirements, and
- 5) Specializations certifications.

Those places where a specific form is required have been marked with an asterisk (\*) and accompany this document. In memos, have been provided that account for the language changes in the university catalog. The following pages contain a summary of the program revisions by contrasting the components of the old program to those that are new. Note components that have not been changed are not presented in this document.
