

**Discussion Items**  
**UUPC Meeting of November 4, 2019**

**1. University-wide**

The discussion centered on a document outlining the criteria that would be used to assign various types of research space on FAU's six campuses. The UUPC's input was requested by the Faculty Senate. Discussion and questions led to a final decision to request more time for the collection of input. Engineering Representative Dan Meeroff offered to gather comments from committee members and prepare a document by November 21 so that a more focused discussion can take place at the UUPC's December meeting. **This decision was approved by the UUPC.**
