Online Program Commitment Form

This form is intended to be completed by the department chair, curriculum chair, or program director.

To facilitate SACSCOC documentation, all FAU programs are required to request approval for the addition of an online modality, and to document the courses that will be developed in a fully online format in the online program. The program commits to offer all courses necessary for program completion in a sequence and frequency such that students can graduate within the appropriate timeframe, i.e., 2-year, 4-year, accelerated. The commitment is to a sustained offering of the program in a fully online format where a student does not have any on campus requirements to complete the degree. In the event a program is inactivated as an online program, a teach out plan with fully online course options will be implemented.

Online programs and online courses are subject to the policies of Florida Atlantic University and the Florida Board of Governors 2025 SUS Strategic Plan for Online Education [pages 9-16].

In completing this form, the department/program is committing to:

-Developing the core courses and required electives in a fully online format, along with additional elective courses sufficient to allow students to graduate in a timely manner with no on-campus requirement.
-Developing courses for an online audience according to FL Board of Governor's quality guidelines.
-Documenting the sequence and frequency of courses that will be developed for delivery in the online program.
-Developing a timeline for development of online courses and ongoing course development updates on a 3-year cycle.
