--

CGN4803C – RI Civil, Environmental & 3 credit hours
Geomatics Engineering Design 1

2. Course prerequisites, corequisites, and where the course fits in the program of study

This is a Writing Across the Curriculum (WAC) course

For Civil Engineering Majors: Section 001

Prerequisites: CEG 3011C, CES 3102C, CGN 3501C, CWR 3201C, ENV3001C, TTE 3004C, AND SUR 4463

with minimum grades of "C," GPA greater than 2.0, and permission of department.

Corequisite: Registration with NCEES for the Fundamentals of Engineering (FE) or Fundamentals of Surveying (FS)

Exam

Note that registration occurs one year in advance of the date the FE exam is to be taken.

For Environmental Engineering Majors: Section 002

Prerequisites: ENV4514 AND SUR 4463 with minimum grade of "C", GPA greater than 2.0, and permission of

Department

Corequisite: Registration with NCEES for the Fundamentals of Engineering (F.E.) Exam

For Geomatics Engineering Majors: Section 003

Prerequisites: SUR 4463 with minimum grade of "C", GPA greater than 2.0, and permission of Department

Corequisite: None

NOTE: Prerequisites for Civil Engineers in Capstone Engineering Design II are: CEG 4012, CES 4605, CES 4702, and CGN 4803C with minimum grades of "C"; GPA greater than 2.0; permission of Department Co-requisites: TTE4005, CWR4202

This is a senior level course in which multidisciplinary design teams are formed and projects selected for the senior capstone design project with multiple realistic constraints, which teaches students the principles of civil engineering and prepares them to join the workforce.

This is a writing intensive course, research intensive course, and an academic service learning course

The class generally meets once per week (for 180 minutes) for lectures and professional practice. The lectures focus on key aspects of the engineering profession relevant to the assignments. Professional practice focuses on the development of a capstone design project and specific engineering skills. The work involves engineering due diligence, basis of design, site reconnaissance, and site planning.

This is a writing intensive course and will fulfill the writing across the curriculum (WAC) requirements for 2000-4000 level courses. Writing assignments promote critical thinking, reading of sustained and challenging texts, and analytical writing. Writing assignments during the semester include formal technical reports. These assignments are evaluated not only for technical content but also for clarity, composition, and organization of writing. A final examination is given on lecture materials. Students are also required to attend at least one (1) professional meeting during the semester. If this class is selected to participate in the university-wide WAC assessment program, you will be required to access the online assessment server, complete the consent form and survey, and submit electronically a first and final draft of a near-end-of-term-paper.

3. Course logistics

Term: Spring 2019

This is a classroom lecture course (lectures will be recorded, if possible)

Class location and time: IS103, Wed. / Thurs. 4:00 pm – 6:50 pm

		C	ourse Syllabus

Attendance to class is required. You are expected to participate in all class sessions and keep up with the material. Three (3) unexcused absences (as determined by the instructor) will reduce your grade by one full letter. Participation in University-approved activities or religious observances, with prior notice, will not be penalized.

9. Course grading scale

There are no fixed criteria for the grading scale. The overall performance as related to course objectives and outcomes is evaluated and considered during grading.

10. Policy on makeup tests, late work, and incompletes

Exams will be given only at the scheduled times and places. No one is exempt from the final examination. Makeup tests are given only if there is solid evidence of a medical or otherwise serious emergency that prevented the student of participating in the exam. Makeup exams will be administered and proctored by department personnel unless there are other pre-approved arrangements.

Late work is not acceptable.

Incomplete grades are against the policy of the department. Unless there is solid evidence of medical or otherwise serious emergency situation, incomplete grades will not be given.

Attendance to class is required. You are expected to attend and participate in all class sessions. Final grades will be reduced by one letter for every three (3) unexcused absences (as determined by the instructor).

11. Special course requirements

Writing Across the Curriculum Designated Course

This is a writing intensive course and will fulfill the writing across the curriculum (WAC) requirements for 2000-4000 level courses. The goal of integrating writing in this course is to improve students' ability to produce professional quality engineering reports. For more information, contact the University Center for Excellence in Writing at 561-297-3498 or www.fau.edu/UCEW. Report all technical problems to the IRM helpdesk (https://www.fau.edu/helpdesk)

Research-Intensive (RI) Designated Course

This course contains multiple assignments designed to help students conduct research and inquiry at an intensive level. If this class is selected to participate in the university-wide assessment program, students will be asked to complete a consent form and submit electronically some of their research assignments for review. Visit the Office of Undergraduate Research and Inquiry (OURI) for additional opportunities and information at http://www.fau.edu/ouri.

OURI Student Learning Outcomes

Capstone projects are expected to achieve all six of the following Student Learning Outcomes (SLOs):

- SLO 1: Knowledge. Students are expected to demonstrate content knowledge, and knowledge of core principles and skills.
- SLO 2: Formulate Questions. Students are required to formulate research questions, scholarly or creative problems in a manner appropriate to the planning discipline.
- SLO 3: Plan of Action. Students are expected to develop and implement a plan of action to address research and inquiry questions or scholarly problems.
- SLO 4: Critical Thinking. Students are expected to apply critical thinking skills to evaluate information, their own work, and the work of others.
- SLO 5: Ethical Conduct. Students are expected to identify significant ethical issues in research and inquiry and/or address them in practice.
- SLO 6: Communication. Students will convey all aspects of their research and inquiry (processes and/or products) in appropriate formats, venues, and delivery modes.

Academic Service Learning (AS-L) Designated Course

This course is designated as an "academic service-learning" course. The assistance you provide to the agency/organization during your academic service-learning (AS-L) experience is a service to the community and will allow you to apply knowledge from the course to local, national, and/or global social issues. Throughout this course you will be participating in AS-L activities while demonstrating civic engagement at campus, local, national, and/or global community levels. You will also reflect on your AS-L experience and the impact on the community as well as your professional development. Academic service-learning notation of hours will post to your transcript with submission of hours to your faculty instructor. An Academic Service-Learning Student Survey is required to be taken at the end of your AS-L project. Please visit the Weppner Center for LEAD & Service-Learning website, www.fau.edu/leadandserve, for the survey link and more information on FAU's Academic Service-Learning program.

Minimum project hours: 10

Assumption of Risk Statement for Student* I understand that there are certain physical risks inherent in every form of service-learning. I understand the risks associated with this Academic Service-Learning assignment. I nonetheless agree to assume those risks so as to gain the benefits from participation in this valuable learning experience. I hereby release the State of Florida, the Board of Trustees, Florida Atlantic University and its agents and employees from any and all liability associated with my participation in this assignment at Florida Atlantic University.

Assessment of your performance in this aspect of the course is accomplished using your Professional Practice Assignments/Presentations/Reports, the Final Report, and Class Assignments, as evaluated using the rubrics at the end of this syllabus and also found in course LMS.

If you are selected to participate in the university-wide Academic Service-Learning program, you will be required to document a minimum of 10 hours of student service to the community agency.

12. Classroom etiquette policy

University policy requires that in order to enhance and maintain a productive atmosphere for education, personal communication devices, such as cellular phones and laptops, are to be disabled in class sessions.

13. Attendance Policy

Students are expected to attend all of their scheduled University classes and to satisfy all academic objectives as outlined by the instructor. The effect of absences upon grades is determined by the instructor, and the University reserves the right to deal at any time with individual cases of non-attendance.

Students are responsible for arranging to make up work missed because of legitimate class absence, such as illness, family emergencies, military obligation, court-imposed legal obligations or participation in University-approved activities. Examples of University-approved reasons for absences include participating on an athletic or scholastic team, musical and theatrical performances and debate activities. It is the student's responsibility to give the instructor notice prior to any anticipated absences and within a reasonable amount of time after an unanticipated absence, ordinarily by the next scheduled class meeting. Instructors must allow each student who is absent for a University-approved reason the opportunity to make up work missed without any reduction in the student's final course grade as a direct result of such absence.

14. Disability policy statement

In compliance with the Americans with Disabilities Act Amendments Act (ADAAA), students who require reasonable accommodations due to a disability to properly execute coursework must register with Student Accessibility Services (SAS) and follow all SAS procedures. SAS has offices across three of FAU's campuses – Boca Raton, Davie and Jupiter – however disability services are available for students on all campuses. For more information, please visit the SAS website at www.fau.edu/sas/.

15. Counseling and Psychological Services (CAPS) Center

Life as a university student can be challenging physically, mentally and emotionally. Students who find stress negatively affecting their ability to achieve academic or personal goals may wish to consider utilizing FAU's Counseling and Psychological Services (CAPS) Center. CAPS provides FAU students a range of services – individual counseling, support meetings, and psychiatric services, to name a few – offered to help improve and maintain emotional well-being. For more information, go to http://www.fau.edu/counseling/

16. Code of Academic Integrity policy statement

Students at Florida Atlantic University are expected to maintain the highest ethical standards. Academic dishonesty is considered a serious breach of these ethical standards, because it interferes with the university mission to provide a high quality education in which no student enjoys unfair advantage over any other. Academic dishonesty is also destructive of the university community, which is grounded in a system of mutual trust and place high value on personal integrity and individual responsibility. Harsh penalties are associated with academic dishonesty. See University Regulation 4.001 at http://www.fau.edu/regulations/chapter4/4.001_Code_of_Academic_Integrity.pdf

17. Required texts/reading

- 1. Canvas registration
- 2. Materials as needed for the design project development
- 3. Handouts provided by instructor

18. Supplementary/recommended readings

First textbook highly recommended for both semesters of CEGE Design 1 and 2:

1. Bloetscher, F. & Meeroff, D.E. (2015). Practical Concepts for Capstone Design Engineering, J Ross Publishing. ISBN-10: 1604271140; ISBN-13: 978-1604271140

Upon completing this WAC-designated course, students will be able to:

- Produce both finished writing and preparatory writing (e.g., multiple drafts of formal writing);
- Use writing to engage actively with course material;
- Employ critical thinking based on well-reasoned assumptions;
- Demonstrate the distinction between learning-to-write activities from writing-to-learn activities;
- Recognize and practice writing as a recursive process that demands substantial reworking of drafts (global revision) to revise content, organization, clarity, argument structures, etc., as distinct from editing and correction of surface error (local revision);
- Demonstrate enhanced learning through global and local revision that is based on "learning-centered" grading criteria;
- Demonstrate the ability to respond to readings, including student texts, during class-wide or small-group discussions and/or in informal writings;
- Demonstrate disciplinary forms and styles of writing that include proper citation format;
- Demonstrate the abilities to identify, understand, and edit for global organization, style, and the patterns of error recurrent in their own writing.

Students will receive substantive feedback on graded assignments and drafts from the instructors, in a timely fashion. You will be required to incorporate the feedback into assigned revisions (or supply a written response if not in agreement with a specific or contradictory comment).

nmary of Professional Practice Sessional Practice S	This piece requires you to brainstorm ideas and concepts that you would lik
1. Response to an Kr Q	to incorporate in your proposed design. It also requires the team to detail it
	project management plan, come up with a realistic schedule for
	accomplishing the work, refine consultant's resumes, and use your persuas
	communication skills to win the job. This piece also answers the question,
	"What is a high performance building?" and also details the team's
	interpretation of the capstone project scope, design goals and objectives.
	You should describe high performance buildings as well as agencies and
	checklists (ISO14001, FGBC, LEED certification, etc.) that can be used to
	dictate design. You should also investigate green building elements,
	strategies, and precedents that are relevant to your capstone project. You
	should be able to make a case to convince the client that high performance
	buildings are worth the investment.
2. Alternative Analysis	This is a group assignment, written submittal only. This piece will analyze the
Assignment	options for developing a site. The goals and perspective of the analysis will
	clearly defined. Then selection criteria will be defined with weighting factor
	and each alternative will be analyzed for advantages and disadvantages with
	respect to the selection criteria. A selection matrix will be constructed and
	evaluated. A sensitivity analysis will be performed, and a final
	recommendation will be made.
3. Phase 1 Environmental Site	This piece requires the students to investigate the existing site for recogniz
Assessment	environmental conditions (RECs), past activities, impacts of development,
	construction safety concerns, long-term sustainability issues, and due
	diligence. During this exploration, the teams will conduct site reconnaissan
	interviews, and record reviews with Federal, State, and local regulatory
	agencies. This work allows the students to interact with regulatory and work on their interpersonal communication skills.

4. Site Plan and Draft Pre-Design Report	This piece focuses on developing a preliminary site plan and floor plan for the project. Once again, the scope of work is restated in relation to the design goals, site constraints, and opportunities for innovation. Using this framework, the existing site conditions are presented and a set of viable alternatives are analyzed. The proposed site plan is then presented along with solutions for stormwater, drainage, parking, accessibility, utilities, preliminary cost estimates, and "green" features. Final floor plans are also presented for approval.
5. Final Pre-Design Report	This piece is an integrated final design report that provides an introduction and justification for building green, a scope of the project, a summary of the group member's qualifications and design approach, a summary of existing site conditions that will influence the design, and a basis of design for stormwater, drainage, parking, accessibility, and utilities solutions as well as floor plans, site plans, and elevations of the proposed building and site-civil considerations. The report will also include appendices for resumes, timecards, peer evaluation of performance, supporting documentation, preliminary cost estimates, checklists, credit templates, and green features/specifications. This final notebook will also include the second draft revisions of writing assignments 1, 2, 3, 4, and 6.
Codes Presentation	This individual assignment is an oral presentation only. Each student will select one code section and provide a brief summary of the code requirements along with a brief explanation of how it applies to the project. Each student will then answer questions about how to implement the code in design applications.
Reflection piece	The reflection paper is for you to write what you learned in this class, what were your personal contributions to the project, what was your perception of your teammates' contributions, how the experience can be improved, and the impact on the community as well as your professional development. This assignment goes as an appendix to the final report and is required for the Academic Service Learning and Writing Across the Curriculum portions of the course.

Presentation Rubric

		Excellent	Good	Fair	Poor	Unacceptable
	Content	All team members display professional level of knowledge of subject material with no important content left out and no incorrect material presented.	All team members display professional level of knowledge of subject material with minor amount of subject material left out or minor amount of incorrect materials presented.	Majority of team members display professional level of knowledge of subject material with minor amount of subject material left out or minor amount of incorrect materials presented.	Some team members display professional level of knowledge of subject material with minor amount of subject material left out or minor amount of incorrect materials presented.	No team members display professional level of knowledge of subject material with minor amount of subject material left out or minor amount of incorrect materials presented.
•	Subject Matter	All important topics are co	vered during the presentat	tion with no essential eleme	ents missing or misreprese	nted.
•	Knowledge of Subject	Each member of the team of	demonstrates an understan	ding of the essential topics	presented.	
	Organization	Presentation has a strong introduction, an effective body of material that supports the conclusions, and a strong ending.	Presentation has deficiencies in only one of the following: introduction, body, or conclusion.	Presentation has deficiencies in two of the following: introduction, body, or conclusion.	Presentation has deficiencies in all of the following: introduction, body, or conclusion.	Presentation is missing introduction, body, or conclusion.
•	Introduction	Presentation starts strong v	with scope and objectives o	learly presented.		
•	Continuity	Facts are presented in a log	gical sequence and transition	ons effectively between spe	akers.	
•	Conclusion	Finishes strong with reason	nable summary and/or reco	ommendations presented,	as justified from the body o	of the presentation.
V	Delivery	Presentation is effective in terms of rhythm, visuals, and presenters' body language.	Presentation has deficiencies in only one of the following: rhythm, visuals, and presenters' body language.	Presentation has deficiencies in two of the following: rhythm, visuals, and presenters' body language.	Presentation has deficiencies in all of the following: rhythm, visuals, and presenters' body language.	Presentation is clearly not rehearsed, visuals are unprofessional, and/or presenters' body language is unprofessional.
•	Rhythm	Presentation demonstrates	effective use of time, prese	enters seem well-prepared,	and appears rehearsed.	
•	Visuals	Visuals are effective, free o	of clutter, related to the disc	cussion, and meaningful.		
•	Body Language	Presenters maintain eye co	ntact with the audience an	d are free of any distracting	g or annoying mannerisms	•

•	Organizational	Presents a clear stateme	ent located in the beginn	ing of paper that demons	strates how the argumen	t will track the	
	Structure	fundamental, secondar	y, and implied problems	, questions, issues.			
•	Rhetorical	The argument's focus is	s clear to the reader and	paragraphs logically and	l coherently build upon e	each other through the	
	Structure	complete and fluent us	e of transitions and/or he	eadings towards a logical	l conclusion supported b	y data. Facts are	
		presented in a logical se	equence and transition e	ffectively between topics	and authors.	-	
•	Reasoning	Exhibits substantial dep	oth and complexity of th	ought supported by sopl	nisticated ideas/analysis/	evidence that support	
	Ü	the report's argument. Builds towards an effective conclusion. Considers context, assumptions, data, and evidence.					
•	Data Support	Seamlessly incorporate	s and explains the accura	acy and relevance of data	a/evidence/ quotations/pa	araphrase/visuals;	
	• •	offers evidence from a variety of sources, including counterarguments, contrary evidence, and quantitative analysis.					
		Presents data in graphical, tabular, or sketch format, follows all rules for tables/figures format, includes proper units					
		and labels, tables/figures are numbered independently, all mentioned in the text.					
•	Conclusion	Finishes strong with a r	reasonable summary and	l/or recommendations pr	resented, as justified fron	n the body of the report	
		using primacy and rece	•	•	,	, 1	
		. 01	•				

	Excellent	Good	Fair	Poor	Unacceptable
☑ Overall Impression	Addresses all important subject matter; demonstrates conceptual understanding of the content, and responds to the purpose of the report; cohesive, clear, concise, and organized well; has many strengths; tone is professional	Addresses most of the important subject material; demonstrates conceptual understanding of the content, and responds to the purpose of the report; majority of the text is cohesive, clear, concise, and organized well; has some strengths; tone is professional and shows good engineering judgment	Addresses some of the important subject material; demonstrates conceptual understanding of the content, and responds to the purpose of the report; some of the text is cohesive, clear, concise, and organized well; has few strengths; tone is professional and shows some engineering judgment	Addresses little of the important subject material; demonstrates conceptual understanding of the content, and responds to the purpose of the report; some of the text is cohesive, clear, concise, and organized well; requires major revision; tone is professional, but shows lack of engineering judgment	Presentation is completely unprofessional.
☑ References Follow the format in http://pubs.asce.org	Cites and formats sources accurately and consistently and provides appropriate and complete references. No references are missing.	Cites and formats sources consistently and provides appropriate references. Some errors or flaws are present. Few references are missing.	Cites some sources but often inaccurately. May neglect to cite some sources altogether. References typically present, but inaccurate. Many references missing.	Little or no use of citation formats.	No references.
☑ Appendix	Raw data/photos correctly arranged and labeled.	Missing one item, except raw data, or unnecessary items in the appendix.	Missing two items, except raw data and unnecessary items in the appendix.	Missing more than two items and unnecessary items in the appendix.	No appendix.

	Excellent	Good	Fair	Poor	Unacceptable	
Writing Format	Follows all format requirements: 1-inch margins, 1.5-spaced 11 pt Times / Arial font Block justification.	Missing one of the format requirements.	Missing two of the format requirements.	Missing three of the format requirements.	Failed to respect any of the format requirements.	
Grammar and Syntax	Spelling and grammar checked; Sentences consistently communicate thoughts clearly, while relatively free of sentence level patterns of error; technically sound sentence structure that is varied, convincing, nuanced, eloquent with appropriate tone. Evidence of good editing.	Spelling and grammar checked, but minor sentence level patterns of error, improper sentence structure, or tone issues. Evidence of decent editing.	Minor spelling or grammar errors with sentence level patterns of error, improper sentence structure, or tone issues. Evidence of fair editing.	Spelling or grammar errors throughout, and major sentence level patterns of error, improper sentence structure, or tone issues. No evidence of editing.	Gross disregard for readability.	

OURI Student	Description of Assignment Requirements and Assessments
Learning	beschption of 7551gminette Requirements and 755e55ments
Outcomes (SLO)	
SLO 1:	Students will demonstrate a fundamental basis of discipline-specific knowledge required for
Knowledge	effective professional practice in the fields of civil, environmental, and/or geomatics
l	engineering. Students will also demonstrate working knowledge of tools and practical skills
	needed to analyze engineering design problems related to multiple realistic constraints, such
	as environmental issues, transportation, engineering economics, historic preservation,
	hurricane resiliency, design codes, ethics, land use, population change, climate change,
	and/or other contemporary design issues.
SLO 2:	Students will develop and refine a problem statement in which they specifically address their
Formulate	research questions. Students are expected to articulate the scope of the problem to be able
Questions	to address the research question with an engineering solution. When appropriate, students
	should be able to create additional (albeit related) questions for smaller subsections of the
	overall design project.
SLO 3:	Students will create a plan of action that will include the problem statement (or research
Plan of Action	question), scope of work, literature review and background context, methodology or
	approach to the solution, analysis plan (including sensitivity analysis), conclusion and design
	documents. Students will develop a hypothesis if needed, identify research methods and
	experimental designs, and select appropriate statistical techniques, if warranted.
SLO 4:	Students will demonstrate critical thinking skills by taking into consideration multiple
Critical Thinking	perspectives and examining implications and consequences of design decisions or
	engineering alternatives. Students will also demonstrate an ability to use evidence and
	reasoning to objectively justify decisions and an ability to apply codes and design standards
	to make reasonable engineering judgments. Students are asked to peer review student work
CLO -	and provide feedback during the juried presentations.
SLO 5: Ethical Conduct	Students will familiarize themselves with the Code of Ethics of their engineering discipline. All
Ethical Conduct	work is held to the standards established by the governing professional societies (FES, ASCE, FSMS, ASPRS, AWWA, WEF, AW&MA, SWANNA, etc.).
	Student projects involving primary data collection through surveys and interviews will be
	required to complete CITI training.
SLO 6:	Students will present and defend their work in written and oral formats, including a final
Communication	poster presented at the Engineering Design Showcase. All deliverables are expected to be of
	professional quality. Students are expected to demonstrate knowledge of technical report
	writing, visualization in 3D, and persuasive presentation skills.
