**Subject:** Fw: Planned MAP 3305 Catalog Update

Fred,

Could you send me your MAP 3305 okay as reply to my Oct 8 email (not the Oct 6 one)? I think this updated version is the one Edgar gave to your UG committee...

Thanks,  
Rainer

**Subject:** Planned MAP 3305 Catalog Update

Dear Edgar,

Following up on the meeting we had some time ago with Yuandan on MAP 3305 Engineering Mathematics 1. We are trying to update the catalog description, so that in your program reviews it is easy to check that the course meets your needs. In particular we now explicitly list Laplace transforms. Would the attached catalog description work for you?

If yes, an email approval from your College's side would be good. I also include a current syllabus for the course. (If something looks off, please let me know which changes you'd like to see.)

Best,  
Rainer
