Subject: Re: New Graduate and Undergraduate Courses in Drug Development

Hi Shailaja,

The biology department does not have any concerns or questions about having your drug development and formulation courses listed in the catalog under Chemistry & Biochemistry. I hope you will be able to offer the courses on a fairly regular basis since they are excellent for some of our students, especially the ones in the Professional Science Masters (PSM) in business biotechnology.

Let me know if you have questions or need any additional information.

Regards,
David

Dear Dr. Binninger,

As you know that I have been offering drug dev & formulation courses as special topics courses. I would like to add them to the catalog in the Chemistry department cross listed as both graduate and undergraduate courses.

I am writing to you to request support for adding these new courses to the catalog. I am attaching the syllabi and new course forms for your reference. Please let me know if you have any questions.

Thanks very much for all your support.

Regards,
Shailaja
