**Subject:** Re: New Honors Neuroscience of Addiction course

Hi Lucia - there is no significant overlap of this course with one of our Biology courses, so we are happy to support its development as a new course. I hope that it will be available for Biology and Neuroscience majors to take as well!

Regards,  
Sarah

Dr. Sarah L. Milton  
Professor and Chair  
Department of Biological Sciences

**Subject:** New Honors Neuroscience of Addiction course

Hello Sarah,  
I am in the process of consolidating my course Science of Addiction as a permanent course of the Honors College. To do so, the UUPC committee requires an approval from the Biology and Psychology Departments. They said that an email to me saying you have no objection is sufficient. I have included the course syllabus in the attachment for you to review. Can you please replay to this email and let me know whether you approve my course?

Thank you for your time  
Lucia
