**Subject:** Re: New Honors College course

Dear Lucia,

The Department of Psychology has no objection to consolidating your course, Science of Addiction, as a permanent course of the Honors College. The course looks very interesting and important.

Best regards,

Robin R. Vallacher

**Subject:** New Honors College course

Hello Dr. Vallacher,

I am in the process of consolidating my course Science of Addiction as a permanent course of the Honors College. To do so, the UUPC committee requires an approval from the Psychology and Biology Departments. They said that an email to me saying you have no objection is sufficient. I have included the course syllabus in the attachment for you to review. Can you please replay to this email and let me know whether you approve my course?

Thank you for your time  
Lucia
