Hi Robin and Kevin,

The members of the undergraduate committee have voted unanimously in support of the new course proposal from the Honors College for the Honors Advanced Seminar in Psychology. It was noted that the proposed course resembles our Honors Critical Questions in Psychology course. HC students have not been invited to attend this Psychology course, however, and College of Science students cannot register for HC courses without special permission, so overlap in these course offerings is not a concern. I hope you will enjoy teaching this new course. -Alan
