Course Description

The course provides a broad overview of blockchain and crypto assets and their main characteristics. The course covers the business fundamentals of cryptocurrency, Non-Fungible Token (NFT), and similar crypto products. Analysis of business models and strategies are discussed in the context of blockchain and crypto innovations. Appropriate for all business disciplines.

Instructional Method

The instructor will teach course in the assigned classroom and on the scheduled day and time. Live remote option is available for students who are asked to isolate or quarantine or cannot attend a class in-person for other reason.

Prerequisites/Corequisites

This course is 3-credit and serves as an elective course for the BBA programs.

Students are expected to be familiar with the following:

- Using Windows—to create and navigate through directories; copy files with drives, directories, and file names specified; understand the purpose of directories; and understand the distinction between drives, directories, and files.
- Working knowledge of a text processing program.
- Working knowledge of a presentation software.

Course Objectives (CO)

By the end of the course, students will be able to:

- apply knowledge of digital business strategies, innovations, and blockchain technology appropriate to the discipline (CO#1)
- think about problem that may require a blockchain technology (CO#2)
- analyze the local and global impact of blockchain technology on individuals, organizations, and society (CO#3)
- design, implement, and evaluate blockchain process, component, or program to meet desired needs (CO#4)
- communicate effectively in a variety of professional context (CO#5)
- function effectively as a member or leader of a team to accomplish a common goal (CO#6)
- support the delivery, use, and management of blockchain-based project (CO#7)
- recognize professional responsibilities and make informed judgments in blockchain project based on legal and ethical principles (CO#8)
- recognize of the need for and an ability to engage in continuing professional development (CO#9)

Supplemental Course Description

This course consists of two (2) subject matters:

- Concepts component examines blockchain innovations from technological and economic perspective, provides a foundational overview of how it works to recognize its possibilities and limitations; it also covers overarching concepts associated with digital business strategies and innovations in general. This part of the course follows the textbooks [Concepts 1] and [Concepts 2] chapters, and lecture notes. There are eleven (11) quizzes for this part of the course; they are designed to test students' understanding of the material in the lecture. Students are expected to attend scheduled lectures and read the recommended material before taking the quiz. Students are given two attempts, but they may see different questions each time they take the quiz. The highest score out of two (2) attempts is used to calculate the final grade. The instructor drops the result of one (1) quiz with a lower score. All quizzes are hosted and accessible on Canvas. In addition, students are given the opportunity to present a special topic (relevant to the course) of their choice for extra credits; more details on grading criteria and topics will be provided in class. See Course Outline for the detailed lesson and quiz coverage and dates. (The classes on Concepts have a yellow background.)
- **Skills** component teaches students to size up business problems quickly, builds confidence and critical thinking skills to take a position and persuasively express their ideas. The main learning media are the eleven (11) Harvard Business Cases. Each student must participate in all case discussions (oral and inclass group write-ups). All write-ups should be finished in class during lecture time. Submission guideline will be provided in class. Students are strongly recommended to read a case study before the class discussion is planned to participate in the discussion effectively. There is also one (1) final graded project. Detailed project description and grading criteria, as well as instructions on incremental submission, will be available on the course Canvas page. See Course Outline for detailed discussions and project dates. (The classes on Skills have a purple background for discussion related topics and pink background for project related topics.)

Required Material

Harvard Business School Coursepack:

• **[Cases]** Students are recommended to purchase the following Coursepack: https://hbsp.harvard.edu/import/896378. More information will be provided in class.

Course textbooks:

Reference books:

- **[Concepts 1]** Jai Arun, Jerry Cuomo, Nitin Gaur, Blockchain for Business 1st Edition, Addison-Wesley Professional; 1st edition, 2020, ISBN-13: 978-0135581353
- [Concepts 2] Schilling, Strategic Management of Technological Innovation, 6e, 2020, McGraw Hill, ISBN: 978-1260565799

Lecture notes, reading assignments and resources will be posted on Canvas.

Course Resources

Students are expected and required to have dependable computer, Internet access, Microsoft Office (or compatible products), <u>Adobe Reader</u>, and email account for this course. Zoom, computer speaker, and webcam are required for remote live class. This course is Canvas-based. All required materials, including link to Harvard business cases, are accessible from Canvas. In addition, all course communications and announcements will be posted on Canvas; make sure to *set up the Canvas notification profile properly to receive class emails and announcements*.

Course Evaluation Method

Concepts	
Quizzes	30% (300 points)

Special topic presentation/write-up reflections (Optional, extra credits)	up to 5% (50 points)
Skills	
Case discussion participation	30% (300 points)
Term project	40% (400 points)

All graded components are explained in the Supplemental Course Description section above.

Course Grading Scale

This course uses a point system for grading. The total available points are **1050**, including **50 extra points**. The grades are completely transparent on Canvas. To be fair to all students, *there will be no individual adjustment of any tests or assignment*; grades are assigned based on actual performance only.

Total: 105% (1050 points)

Grade	Α	A-	B+	В	B-	C+	С	C-	D+	D	D-	F
Cutoff	930	900	870	830	800	770	730	700	670	630	600	0

Projects and Lessons Submission Policy

All lesson assignments should be submitted before the specified deadline. Late assignment will NOT be accepted—no exception! All quizzes are located on Canvas. Please follow the instructions carefully in downloading, completing, and uploading your files; no email or hand submission is accepted. Quizzes will be auto graded by Canvas. Term project submissions and case discussions will be graded based on grading rubrics; it is student's responsibility to carefully read grading rubrics and follow the instructions of the assignment. No assignments will be regraded because of one's failure to follow instructions, including, but not limited to, not having everything required or submitting the wrong file. Although working and learning together is allowed and encouraged, assignments (quizzes, presentations, cases, and reflection write-ups) are all individual work, unless otherwise specified in the assignment description; any inclusion of other people's work (such as from classmates, previously submitted files, or answers found online) will be treated as academic integrity violation, resulting a zero (0) for that submission. Term project is a group assignment that consists of several milestones; to receive grade for the project, the students are expected to contribute equally to the project.

Classroom Etiquette Policy

Disruptive behavior is defined in the FAU Student Code of Conduct as "... activities which interfere with the educational mission within classroom." Students who disrupt the educational experiences of other students and/or the instructor's course objectives in a face-to-face or online course are subject to disciplinary action. Such behavior impedes students' ability to learn or an instructor's ability to teach. Disruptive behavior may include but is not limited to non-approved use of electronic devices (including cellular telephones); cursing or shouting at others in such a way as to be disruptive; or other violations of an instructor's expectations for classroom conduct.

For more information, please see the FAU Office of Student Conduct.

Attendance Policy

Students are expected to attend all their scheduled University classes and to satisfy all academic objectives as outlined by the instructor. Students are responsible for arranging to make up work missed because of legitimate class absence, such as illness, family emergencies, military obligation, court-imposed legal obligations, or participation in university-approved activities. Examples of University-approved reasons for absences include participating on an athletic or scholastic team, musical and theatrical performances, and debate activities. It is the student's responsibility to give the instructor notice 24 hours prior to any anticipated absences and within a reasonable amount of time after an unanticipated absence, ordinarily by the next scheduled class meeting. Instructors must allow each student who is absent for a university-approved reason the opportunity to make up work missed without any reduction in the student's final course grade as a direct result of such absence.

Counseling and Psychological Services (CAPS) Center

Life as a university student can be challenging physically, mentally, and emotionally. Students who find stress negatively affecting their ability to achieve academic or personal goals may wish to consider utilizing FAU's **Counseling and Psychological Services** (CAPS) Center. CAPS provides FAU students a range of services – individual counseling, support meetings, and psychiatric services, to name a few – offered to help improve and maintain emotional well-being. For more information, go to http://www.fau.edu/counseling/.

Accessibility Policy

In compliance with the Americans with Disabilities Act Amendments Act (ADAAA), students who require reasonable accommodations due to a disability to properly execute coursework must register with **Student Accessibility Services** (SAS) and follow all SAS procedures. SAS has offices across three of FAU's campuses – Boca Raton, Davie, and Jupiter – however disability services are available for students on all campuses. For more information, please visit the SAS website at www.fau.edu/sas/.

Code of Academic Integrity

Students at Florida Atlantic University are expected to maintain the highest ethical standards. Academic dishonesty is considered a serious breach of these ethical standards, because it interferes with the university mission to provide a high-quality education in which no student enjoys an unfair advantage over any other. Academic dishonesty is also destructive of the university community, which is grounded in a system of mutual trust and places high value on personal integrity and individual responsibility. Harsh penalties are associated with academic dishonesty. For more information, see University Regulation 4.001.

Incomplete Grade Policy Statement

A student who is passing a course but has not completed all work due to exceptional circumstances may, with consent of the instructor, temporarily receive a grade of incomplete ("I"). The assignment of the "I" grade is at the discretion of the instructor, but it is allowed only if the student is passing the course.

The specific time required to make up an incomplete grade is at the discretion of the instructor. However, the College of Business policy on the resolution of incomplete grades requires that all work required to satisfy an incomplete ("I") grade must be completed within a period not exceeding one calendar year from the assignment of the incomplete grade. After one calendar year, the incomplete grade automatically becomes a failing ("F") grade.

Withdrawals

Any student who decides to drop is responsible for completing the proper process required to withdraw from the course.

Grade Appeal Process

A student may request a review of the final course grade when s/he believes that one of the following conditions apply:

- There was a computational or recording error in the grading.
- Non-academic criteria were applied in the grading process.
- There was a gross violation of the instructor's own grading system.

The procedures for a grade appeal may be found in FAU Regulation 4.002.

Policy for Using Canvas Email or Other University Resources

<u>University Policy 12.2</u> explicitly states that "Personal/Financial Use: University technology resources may not be used for personal financial gain unless approved by the President or Provost. De minimis non-commercial personal use is permitted so long as such use does not violate any other provision of this policy or interfere with job responsibilities. Email blasts for personal purposes are not permitted." This includes, but is not limited to, use of Canvas account or university email for commercial gains. As stated in <u>University Policy 12.2</u>, violations are grounds for disciplinary action up to and including termination or expulsion.
