To:Yuan Wang <YWANG@fau.edu>

Hi Yuan, courses look good and some of our students may take such courses. EECS has no objection to these new courses.

Subject: new courses from Math

Dear Hari,

I hope all is going well with you. I'm sending you three new courses from Math: Post-quantum Cryptography, Cryptography of Blockchain, and Discrete Mathematical Structures. The first two will be electives for our Cryptology concentration (to be proposed soon), the third one will be an elective for students in (applied) math.

Please provide us with your feedback. Thank you very much.

Best regards,

Yuan
