Dear Gregory,

The College of Science sees no conflicts with this course. It looks like a great opportunity for students.

Best regards,

Valery

Valery E. Forbes, Ph.D.  
Dean, Charles E. Schmidt College of Science  
Florida Atlantic University

**Subject:** NEW COURSE PROPOSAL - South Florida Hydrological Systems  
**Importance:** High

Dr. Forbes,

Greetings! I am reaching out to obtain a no-conflict statement to go with our New Course Proposal form in the College of Education. This form and syllabus for Summer 2024 are attached for your review. For this course, we have used the special topics course number (EDG 4930) for several years in the past, but we are now applying to get the course approved with the new course number, SCE 4841, that has just been assigned to us. As in years' past, we are planning on offering three sections to dual enrollment high school students only. The first two sections are offered only to FAU HS students and the third section is offered to any high school student that meets FAU's dual enrollment requirements. Each section revolves around a different in-person week-long residential institute that we administer out of the Jupiter campus. There are both pre- and post-institute assignments as outlined in the syllabus.

Kindly let me know if/when you think you can provide me with the no-conflict statement from the College of Science this week. If you do see any conflicts, please advise. Thank you for your assistance in this matter.

Have a great week!

Hi Gregory,

After consultation with our faculty, it appears that currently we have no conflict of teaching this course. Please go ahead.

All best,  
Stella
