Office Hours:

Telephone: Email:

Course Description

Introduction to programming with Python for students with no prior programming experience. Course introduces programming fundamentals, algorithm development, debugging, testing and visualization with applications.

Instructional Method

In-Person

This course may be offered in in-person, hybrid, or fully online modes

Required Texts/Materials

Think Python

ISBN: 9781449332037

Publisher: OREILLY MEDIA INC.

Edition: 1st

Course Objectives/Student Learning Outcomes

By the end of the course, students will be able to:

1. Install, setup, and efficiently navigate the Python environment using the command line.
2. Understand and differentiate between various Python data structures such as lists, dictionaries, tuples, and sets, and demonstrate proficiency in data manipulation using these structures.
3. Employ Python's string operations and methods to effectively manage and format textual data.
4. Demonstrate understanding of Python's number types, variables, and fundamental I/O operations with basic files.
5. Interpret and construct conditional statements using Python's comparison operators and chaining techniques, combined with logical operators.
6. Construct, modify, and debug Python programs using conditional statements, loops, and list comprehensions.
7. Identify and utilize Python's built-in methods, create custom functions, and comprehend function concepts such as lambda expressions, tuple unpacking, and scope.
8. Design and implement basic Object-Oriented Programming (OOP) concepts including class creation, attribute management, and method definition.
9. Utilize external Python modules and packages and demonstrate understanding of Python's package management using Pip and PyPi.
10. Detect, handle, and troubleshoot errors and exceptions within Python code, and explore advanced concepts such as decorators, generators, and file management techniques for various file types including images and CSVs.

Faculty Rights and Responsibilities

Florida Atlantic University respects the rights of instructors to teach and students to learn. Maintenance of these rights requires classroom conditions that do not impede their exercise. To ensure these rights, faculty members have the prerogative to:

- Establish and implement academic standards.
- Establish and enforce reasonable behavior standards in each class.
- Recommend disciplinary action for students whose behavior may be judged as disruptive under the Student Code of Conduct [University Regulation 4.007](#).

Disability Policy

In compliance with the Americans with Disabilities Act Amendments Act (ADAAA), students who require reasonable accommodations due to a disability to properly execute coursework must register with Student Accessibility Services (SAS) and follow all SAS procedures. SAS has offices across three of FAU's campuses – Boca Raton, Davie and Jupiter – however disability services are available for students on all campuses. For more information, please visit the SAS website at www.fau.edu/sas/.

Course Evaluation Method

Homework.....	40 % (One every week, include Quizzes)
Lab sessions participation	5 % (2 hrs. sessions per week)
Class Attendance participation.....	5 %
Exams (4 in total).....	50 %

Code of Academic Integrity

Students at Florida Atlantic University are expected to maintain the highest ethical standards. Academic dishonesty is considered a serious breach of these ethical standards, because it interferes with the university mission to provide a high quality education in which no student enjoys an unfair advantage over any other. Academic dishonesty is also destructive of the university community, which is grounded in a system of mutual trust and places high value on personal integrity and individual responsibility. Harsh penalties are associated with academic dishonesty. For more information, see [University Regulation 4.001](#).

Attendance Policy Statement

Students are expected to attend all their scheduled University classes and to satisfy all academic objectives as outlined by the instructor. The effect of absences upon grades is determined by the instructor, and the University reserves the right to deal at any time with individual cases of non-attendance. Students are responsible for arranging to make up work missed because of legitimate class absence, such as illness, family emergencies, military obligation, court-imposed legal obligations, or participation in University-approved activities. Examples of University-approved reasons for absences include participating on an athletic or scholastic team, musical and theatrical performances, and debate activities. It is the student's responsibility to give the instructor notice prior to any anticipated absences and within a reasonable amount of time after an unanticipated absence, ordinarily by the next scheduled class meeting. Instructors must allow each student who is absent for a University-approved reason the opportunity to make up work missed without any reduction in the student's final course grade as a direct result of such absence.

Religious Accommodation Policy Statement

In accordance with the rules of the Florida Board of Education and Florida law, students have the right to reasonable accommodations from the University in order to observe religious practices and beliefs regarding admissions, registration, class attendance, and the scheduling of examinations and work assignments. University Regulation 2.007, Religious Observances, sets forth this policy for FAU and may be accessed on the FAU website at www.fau.edu/regulations.

Any student who feels aggrieved regarding religious accommodations may present a grievance to the executive director of The Office of Civil Rights and Title IX. Any such grievances will follow Florida Atlantic University's established grievance procedure regarding alleged discrimination.

Time Commitment Per Credit Hour

For traditionally delivered courses, not less than one (1) hour of classroom or direct faculty instruction each week for fifteen (15) weeks per Fall or Spring semester, and a minimum of two (2) hours of out-of-class student work for each credit hour. Equivalent time and effort are required for Summer Semesters, which usually have a shortened timeframe. Fully Online courses, hybrid, shortened, intensive format courses, and other non-traditional modes of delivery will demonstrate equivalent time and effort.

Course Grading Scale

Letter Grade	Letter Grade
A	94 - 100%
A-	90 - 93%
B+	87 - 89%
B	83 - 86%
B-	80 - 82%
C+	77 - 79%
C	73 - 76%
C-	70 - 72%
D+	67 - 69%
D	63 - 66%
D-	60 - 62%

Letter Grade	Letter Grade
F	Below 60

Grade Appeal Process

You may request a review of the final course grade when you believe that one of the following conditions apply:

- There was a computational or recording error in the grading.
- The grading process used non-academic criteria.
- There was a gross violation of the instructor's own grading system.

[University Regulation 4.002](#) of the University Regulations contains information on the grade appeals process

Policy on Make-up Tests, Late work, and Incompletes

Late submissions will not be accepted or graded.

No makeup exams will be offered.

Throughout the semester, multiple homework assignments will be posted via Canvas. For each homework assignment, you will have about a week to complete and submit your solution via Canvas. Allow enough time to submit your work since once the system is closed there will not be other possibilities to submit (don't send your work via email). Please note that the due date for homework assignments will not be updated after the assignment is posted.

Policy on the Recording of Lectures

Students enrolled in this course may record video or audio of class lectures for their own personal educational use. A class lecture is defined as a formal or methodical oral presentation as part of a university course intended to present information or teach students about a particular subject. Recording class activities other than class lectures, including but not limited to student presentations (whether individually or as part of a group), class discussion (except when incidental to and incorporated within a class lecture), labs, clinical presentations such as patient history, academic exercises involving student participation, test or examination administrations, field trips, and private conversations between students in the class or between a student and the lecturer, is prohibited. Recordings may not be used as a substitute for class participation or class attendance and may not be published or shared without the written consent of the faculty member. Failure to adhere to these requirements may constitute a violation of the University's Student Code of Conduct and/or the Code of Academic Integrity.

Counseling and Psychological Services (CAPS) Center

Life as a university student can be challenging physically, mentally and emotionally. Students who find stress negatively affecting their ability to achieve academic or personal goals may wish to consider utilizing FAU's Counseling and Psychological Services (CAPS) Center. CAPS provides FAU students a range of services – individual counseling, support meetings, and psychiatric services, to name a few – offered to help improve and maintain emotional well-being. For more information, go to <http://www.fau.edu/counseling/>

Course Topical Outline

Topics

Python Setup

Command Line Basics

Installing Python

Running Python Code

Jupyter Notebooks

Python Object and Data Structure Basics

Introduction to Python Data Types

Python Numbers

Variable Assignments

Introduction to Strings

Indexing and Slicing with Strings

String Properties and Methods

Print Formatting with Strings

Lists in Python

Dictionaries in Python

Tuples with Python

Sets in Python

Booleans in Python

I/O with Basic Files in Python

Python Objects and Data Structures

Python Comparison Operators

Comparison Operators in Python

Chaining Comparison Operators in Python with Logical Operators

Python Statements

If and Else Statements in Python

For Loops in Python

While Loops in Python

Useful Operators in Python

List Comprehensions in Python

Methods and Functions

Methods and the Python Documentation

Introduction to Functions

Def Keyword

Basics of Python Functions

Logic with Python Functions

Tuple Unpacking with Python

Interactions between Python Functions

Lambda Expressions, Map and Filter Functions

Nested Statements and Scope

Object Oriented Programming

Object Oriented Programming Introduction

OOP Attributes and Class Keyword

OOP Class Object Attributes and Methods
