Subject: New courses proposed for WHC

Good afternoon Dr. Milton,

I am proposing two "new" courses in the honors college and wanted to seek your approval on these.

Honors Introduction to Neuroscience and **Hon Neurobiology Imaging** are two courses I have taught in the past as specials topics (BSC 4930), but I am attempting to make them permanent offerings and add them to the Honors Neuro, Biology, Psych, and Biomedical Science concentrations at either required (Neuro) and/or electives (the rest). I have attached the current syllabi for these courses as well as the course proposals.

Also attached is Rodrigo Pena's course proposal for **Hon AI Applications in Biology**, which we wish to add as an elective for some of these concentrations.

Please let me know if you approve of these changes, or if you have any questions/concerns.

Cheers,
Casey
