Subject: Re: URGENT: Neuroscience minor

Biology has no objection to this minor in the Honors College. Have you asked Psych? They share our Neuroscience and Behavior major.

Dr. Sarah L. Milton
Professor and Chair
Department of Biological Sciences
FAU

Subject: FW: URGENT: Neuroscience minor

Dear Dr. Milton,

Could you provide a brief email in support of the Neuroscience minor that we are planning to propose to the faculty meeting this Friday?

We already have your support email for the courses but not for the new minor.

If you could send us an email in support of the minor before Friday that would be terrific!

Thanks for your support!

Sincerely,

-Tracy

Psychology Support

On Oct 22, 2025, at 14:32, Alan Kersten <akersten@fau.edu> wrote:

Hi Tracy,

I am happy to support the proposal of the Honors College to offer a Neuroscience Minor for students in the Honors College. This will not conflict with any of our existing programs in the Department of Psychology.

Sincerely,

Alan

Dear Dr. Kersten,

I was just made aware from Dr. Milton that Biology and Psychology share the Neuroscience and Behavior major.

Could you provide an email letter of support, before Friday, for the Neuroscience Minor proposed here at the Honors College?

Please let me know if you have any questions-

Thanks!

-Tracy
