Subject: RE: Engineering combined program review and approval

Hi Debra, I am acknowledging that the integrity of the bachelor's degree is maintained in this combined pathway. Substituted courses have equivalent content.

Best Regards,
Hari

Subject: RE: Engineering combined program review and approval

Hi Maria:

I am not a content expert to determine whether these substitutions maintain the integrity of the Bachelor's degree. Could we get a statement from EG to attach, acknowledging that the integrity of the bachelor's degree is maintained? Meaning that they are equivalent in content for the substitutions?

Best,
Debra
