Subject: Health Science Major - Electives

Dr Zourdos,

Hope you are doing well. You reached out to Dr. Williams about the support for two electives. We welcome the addition of HSA 3111 and HSA 3191 as electives to the Department of Exercise Science and Health Promotion program sheet. The two selected courses are offered throughout the year. You have full support from our department in making those changes. I am happy to answer any additional questions.

Best
