Subject: EEX 4763 Conflict Statement

Hi,

Please provide a no conflict statement for the change to the description for EEX 4763

Previous Title: Special Education Technology

New Title: Universal Design for Learning and Assistive Technology

New Course Description:

Students will examine the historical foundations, policies, and core principles of Universal Design for Learning (UDL) and Assistive Technology (AT), and explore their application across content areas. Emphasis is placed on designing accessible, technology-enhanced learning experiences for all learners, including students with disabilities and English Language Learners. Students will learn to evaluate, implement, and assess educational technologies aligned with instructional goals and individual student needs.

Cheers,
Joe

Subject: RE: EEX 4763 Conflict Statement

Hi Joe. No CSD conflict. While the proposed course includes content related to assistive technology, its focus differs from our Augmentative and Alternative Communication course. Our AAC course concentrates on the assessment and treatment of individuals with complex communication needs and the use of AAC systems. The proposed course appears to focus more broadly on Universal Design for Learning, accessibility in the classroom, and the selection and implementation of assistive technologies to support learning across academic settings, i.e., creating inclusive educational environments that meet a wide range of learning needs.

Hi Joe, there is no conflict with DCI as this seems to be an undergraduate course. We have a few courses that cover some of these topics at the graduate level.
