**Subject:** FIN 3403 as a corequisite for ACG 3131

Dear Professor Zarruk,

The School of Accounting is considering adding FIN 3403 as a prerequisite or corequisite for ACG 3131 (Intermediate Accounting Theory 1), which would help with some of the topics we cover in the course that rely on a basic understanding of the time value of money and other concepts that are probably covered in FIN 3403. Students are already advised to take the two courses together and this change will simply formalize this recommendation and therefore, should not negatively affect students. Relevant documents are attached to this email. Do you have any objection or do you foresee any problems with this proposed change? The change has been approved by the School of Accounting faculty and our Director, George Young.

Thank you for your consideration and I will look forward to your response.

Kindest regards,

Maya Thevenot, Ph.D.
