Sure, how about this

The experience gained by students in the FAU Max Planck Honors Program will be of tremendous value as they pursue research with FAU Brain Institute faculty.

Subject: Establishment of a joint, upper division FAU Max Planck Honors Program

Dear Randy,

The Jupiter Life Science Initiative, the College of Science, and the Wilkes Honors College, working in partnership with the Max Planck Institute for Neuroscience, propose an undergraduate level, Jupiter-specific honors program, to be titled the FAU Max Planck Honors Program (MPHP). The program will provide undergraduate honors students (Honors College and COS) with exclusive enrichment opportunities. Students who maintain all standards and fulfill all requirements of the MPHP, described herein, will receive a designation of "FAU Max Planck Honors" on their final transcript.

Could you provide us with a short statement of support from the brain institute for the establishment of this program?

All the best,

Michelle
