1. The student has met the minimum 120 credits for the bachelor's degree; and
2. The student has taken a minimum of 30 credits in 5000 level or higher courses for the master's program.

With an approximate duration of five years, these combined programs provide attractive ways for students to continue their graduate work. Students complete the undergraduate program first.

Prerequisite coursework for transfer students and admission requirements for these combined programs are the same as for the [B.S.C.E or B.S.C.S. to M.S. degree programs](#) noted above.

## **ELECTRICAL ENGINEERING TO ARTIFICIAL INTELLIGENCE BACHELOR OF SCIENCE IN ELECTRICAL ENGINEERING (B.S.E.E.) TO MASTER OF SCIENCE (M.S.) COMBINED PROGRAM**

## **ELECTRICAL ENGINEERING TO COMPUTER ENGINEERING BACHELOR OF SCIENCE IN ELECTRICAL ENGINEERING (B.S.E.E.) TO MASTER OF SCIENCE (M.S.) COMBINED PROGRAM**

The department offers a Bachelor of Science in Electrical Engineering/Master of Science in Artificial Intelligence degree program and a Bachelor of Science in Electrical Engineering/Master of Science in Computer Engineering degree program. [Program details](#) are listed in the Electrical Engineering section under Combined Programs.

## **BIOLOGICAL AND PHYSICAL SCIENCES TO ANY OF THE MASTER'S PROGRAMS IN ELECTRICAL ENGINEERING AND COMPUTER SCIENCE BACHELOR OF ARTS (B.A.) OR BACHELOR OF SCIENCE (B.S.) TO MASTER OF SCIENCE (M.S.) COMBINED PROGRAMS**

The B.A. or B.S. degree is completed at the [Wilkes Honors College](#) (WHC), and students then receive their bachelor's degree from WHC. Students complete their master's degree work in one of seven majors in the Department of Electrical Engineering and Computer Science in the College of Engineering and Computer Science (COECS) and receive their master's degree from COECS.

These combined programs are offered in partnership with the Wilkes Honors College:

B.A. or B.S. with Major in Biological and Physical Sciences to M.S. with Major in [Artificial Intelligence](#)

B.A. or B.S. with Major in Biological and Physical Sciences to M.S. with Major in [Biomedical Engineering](#)

B.A. or B.S. with Major in Biological and Physical Sciences to M.S. with Major in [Computer Engineering](#)

B.A. or B.S. with Major in Biological and Physical Sciences to M.S. with Major in [Computer Science](#)

B.A. or B.S. with Major in Biological and Physical Sciences to M.S. with Major in [Electrical Engineering](#)

B.A. or B.S. with Major in Biological and Physical Sciences to M.S. with Major in [Information Technology and Management with Advanced Information Technology Concentration](#)

B.A. or B.S. with Major in Biological and Physical Sciences to M.S. with Major in [Information Technology and Management with Computer Science Data Analytics Concentration](#)

Details for each combined program are listed in the [Wilkes Honors College](#) section.

## **COMPUTER ENGINEERING TO INFORMATION TECHNOLOGY AND MANAGEMENT**

### **BACHELOR OF SCIENCE IN COMPUTER ENGINEERING (B.S.C.E.) TO MASTER OF SCIENCE (M.S.) COMBINED PROGRAM**

**Advanced Information Technology Concentration (M.S.)**

**Computer Science Data Analytics Concentration (M.S.)**

**COMPUTER SCIENCE TO INFORMATION TECHNOLOGY AND MANAGEMENT  
BACHELOR OF ARTS IN COMPUTER SCIENCE (B.A.C.S.) OR BACHELOR OF  
SCIENCE  
IN COMPUTER SCIENCE (B.S.C.S.) TO MASTER OF SCIENCE (M.S.)  
COMBINED PROGRAM**

**ELECTRICAL ENGINEERING TO INFORMATION TECHNOLOGY AND  
MANAGEMENT**

**BACHELOR OF SCIENCE IN ELECTRICAL ENGINEERING (B.S.E.E.) TO  
MASTER OF SCIENCE (M.S.)  
COMBINED PROGRAM**

**Advanced Information Technology Concentration (M.S.)**

**Computer Science Data Analytics Concentration (M.S.)**

The department of Electrical Engineering and Computer Science offers a combined B.A.C.S. or B.S.C.S. in Computer Science or B.S.C.E. in Computer Engineering or B.S.E.E. in Electrical Engineering to M.S. in Information Technology and Management: Advanced Information Technology or Computer Science Data Analytics concentrations degree program.

Students may count up to 12 credits of approved graduate coursework (5000 level or higher) toward both their bachelor's and master's degrees, see Table below. These graduate courses replace the technical elective courses in the bachelor's program. The proposed combined program does not increase the number of credits in the undergraduate degree.

All combined programs total a minimum of 150 credits as detailed:

1. The student has met the minimum 120 credits for the bachelor's degree; and
2. The student has taken a minimum of 30 credits in 5000 level or higher courses for the master's program.

---

**Graduate courses to be counted toward both the bachelor's and master's degree programs.  
Alternative courses may be used with prior approval of the graduate advisor.**

---

***Computer Science Data Analytics concentrations***

Introduction to Data Science	CAP 5768	3
Information Retrieval	CAP 6776	3
Software Engineering	CEN 5035	3
Theory and Implementation of Database Systems	COP 6731	3

These combined programs provides an attractive way for students to continue their graduate work. Students complete the undergraduate program first. The combined program can be completed in approximately five years.

**Admission Requirements**

The GRE is not required for this combined program. To be eligible for the combined program, baccalaureate students should:

1. Have a cumulative FAU GPA of 3.25 or better at the end of their junior year. Note that the cumulative FAU GPA of at least 3.25 must be maintained until the completion of the bachelor's degree.
2. Formally apply to the combined program, completing the admissions process at least one semester prior to the beginning of the master's portion of their program.

Students in the combined program must maintain continuous enrollment to remain in good standing.

**Degree Requirements**

To be eligible for the combined bachelor to master program, students must fulfill the following requirements:

1. Complete all of the requirements for the B.A.C.S. or B.S.C.S. in Computer Science or the B.S.C.E. in Computer Engineering or the B.S.E.E. in Electrical Engineering and other requirements stipulated by the University and College
2. Complete all of the requirements for the M.S. in Information Technology and Management: Advanced Information Technology or Computer Science Data Analytics concentrations, with either the thesis or non-thesis option.

**DATA SCIENCE AND ANALYTICS**  
**BACHELOR OF SCIENCE (B.S.) TO MASTER OF SCIENCE (M.S.)**

## COMBINED PROGRAM

### Data Science and Engineering Concentration (B.S.)

## DATA SCIENCE AND ANALYTICS TO ARTIFICIAL INTELLIGENCE BACHELOR OF SCIENCE (B.S.) TO MASTER OF SCIENCE (M.S.) COMBINED PROGRAM

These combined programs provide an attractive way for students to continue their graduate work. Students complete the undergraduate program first. The combined program can be completed in approximately five years.

**Admission Requirements**

The GRE is not required for this combined program. To be eligible for the combined program, baccalaureate students should:

1. Have a cumulative FAU GPA of 3.25 or better at the end of their junior year. Note that the cumulative FAU GPA of at least 3.25 must be maintained until the completion of the bachelor's degree.

2. Formally apply to the combined program, completing the admissions process at least one semester prior to the beginning of the master's portion of their program.

Students in the combined program must maintain continuous enrollment to remain in good standing.

## **Degree Requirements**

To be eligible for the combined bachelor to master program, students must fulfill the following requirements:

1. Complete all of the requirements for the B.S. in Data Science and Analytics: Data Science and Engineering concentration program and other requirements stipulated by the University and College
2. Complete all of the requirements for the M.S. in Artificial Intelligence program, on either the thesis or non-thesis option, or complete requirements for the M.S. in Data Science and Analytics: Data Science and Engineering concentration or complete requirements for the M.S. in Information Technology and Management: Advanced Information Technology or Computer Science Data Analytics concentrations.

## **NURSING TO ARTIFICIAL INTELLIGENCE**

### **BACHELOR OF SCIENCE IN NURSING (B.S.N.) TO MASTER OF SCIENCE (M.S.) COMBINED PROGRAM**

## **NURSING TO BIOMEDICAL ENGINEERING**

### **BACHELOR OF SCIENCE IN NURSING (B.S.N.) TO MASTER OF SCIENCE (M.S.) COMBINED PROGRAM**

The Christine E. Lynn College of Nursing and the College of Engineering and Computer Science (COECS) offer a combined Bachelor of Science in Nursing (B.S.N.) and Master of Science (M.S.) with Major in [Artificial Intelligence](#) or [Biomedical Engineering](#) degree program.

The B.S.N. degree program is completed and received from the Christine E. Lynn College of Nursing. Students then complete the M.S. in Artificial Intelligence or Biomedical Engineering in the Department of Electrical Engineering and Computer Science and receive the M.S. degree from the COECS. Details can be found in the [Christine E. Lynn College of Nursing](#) section of this catalog.

## **COMPUTER ENGINEERING**

### **BACHELOR OF SCIENCE IN COMPUTER ENGINEERING (B.S.C.E.) TO DOCTOR OF PHILOSOPHY (PH.D.)**

## COMBINED PROGRAM

The Department of Electrical Engineering and Computer Science offers a combined Bachelor of Science in Computer Engineering (B.S.C.E.) to Ph.D. with major in Computer Engineering degree program.

Students may count up to 12 credits of graduate coursework (5000 level or higher) offered by the EECS Department toward both their B.S.C.E. and Ph.D. degrees. These graduate courses will replace elective and semi-core courses in the bachelor's program. The program does not increase the number of credits in the undergraduate degree.

The combined program totals a minimum of 195 credits, provided that :

1. The student has met the minimum 123 credits for the bachelor's degree; and
2. The student has taken a minimum of 72 credits in 5000 level or higher courses for the Ph.D. program.

This combined program provides an attractive way for students to continue their graduate work. Students complete the undergraduate program first.

### Admission Requirements

The GRE requirement is waived for this combined program.

1. To be eligible to apply for the combined program, students must have a cumulative FAU GPA of 3.5 or better at the end of their junior year. Note that the cumulative FAU GPA of at least 3.5 must be maintained until the completion of the bachelor's degree.
2. Formally apply to the combined program after the junior year (90 credits or more of coursework completed). The application must include one reference letter.
3. Must be admitted into the combined program at least one semester prior to the beginning of the Ph.D. portion of the program.

Students in the combined program must maintain continuous enrollment to remain in good standing.

### Degree Requirements

To be eligible for the combined bachelor to Ph.D. program, students must fulfill the following requirements:

1. Completion of the requirements for the B.S.C.E. program and other requirements stipulated by the University and College.
2. Completion of all requirements for the Ph.D. in with major in Computer Engineering degree

program.

## COMPUTER SCIENCE

### BACHELOR OF SCIENCE IN COMPUTER SCIENCE (B.S.C.S.) TO DOCTOR OF PHILOSOPHY (PH.D.) COMBINED PROGRAM

The Department of Electrical Engineering and Computer Science offers a combined Bachelor of Science in Computer Science (B.S.C.S.) to Ph.D. with major in Computer Science degree program.

Students may count up to 12 credits of graduate coursework (5000 level or higher) offered by the EECS Department toward both their B.S.C.S. and Ph.D. degrees. These graduate courses will replace elective courses in the bachelor's program. The program does not increase the number of credits in the undergraduate degree.

The combined program totals a minimum of 192 credits, provided that:

1. The student has met the minimum 120 credits for the bachelor's degree; and
2. The student has taken a minimum of 72 credits in 5000 level or higher courses for the Ph.D. program.

This combined program provides an attractive way for students to continue their graduate work. Students complete the undergraduate program first.

#### Admission Requirements

The GRE requirement is waived for this combined program.

1. To be eligible to apply for the combined program, students must have a cumulative FAU GPA of 3.5 or better at the end of their junior year. Note that the cumulative FAU GPA of at least 3.5 must be maintained until the completion of the bachelor's degree.
2. Formally apply to the combined program after the junior year (90 credits or more of coursework completed). The application must include one reference letter.
3. Must be admitted into the combined program at least one semester prior to the beginning of the Ph.D. portion of the program.

Students in the combined program must maintain continuous enrollment to remain in good standing.

#### Degree Requirements

To be eligible for the combined bachelor to Ph.D. program, students must fulfill the following

requirements:

1. Completion of the requirements for the B.S.C.S. program and other requirements stipulated by the University and College.
2. Completion of all requirements for the Ph.D. with major in Computer Science degree program.

## **ARTIFICIAL INTELLIGENCE MASTER OF SCIENCE (M.S.)**

The Master of Science (M.S.) with Major in Artificial Intelligence provides a comprehensive curriculum, consisting of foundation and theory of artificial intelligence and elements of computer vision, data analytics and algorithms, knowledge management and reasoning, machine learning and applications. Both thesis and non-thesis options of the M.S. in Artificial Intelligence require a minimum of 30 credits. The thesis option consists of a minimum of 24 coursework credits and 6 thesis credits.

With approval of the advisor, substitution can sometimes be made among similar courses. See the Department of Electrical and Computer Science [website](#) for updates.

### **Admission Requirements**

Applicants for admission to the master's program are approved by the University upon the recommendation of the department. All applicants must submit with their applications the official transcripts from previous institutions attended. Applications for admission are evaluated on an individual basis. At a minimum, applicants are expected to meet the following requirements.

1. Have obtained a bachelor's degree from an accredited institution. Students are expected to have taken Calculus 1 or Methods of Calculus and a statistics course, to be proficient in programming, and to be knowledgeable in data structures and algorithm analysis. Students can gain this knowledge through undergraduate classes or learn it through work experience. The admissions committee will evaluate the application holistically to determine applicant suitability using several factors, such as academic performance, GPA, background and experience. The admission committee may assign remedial courses on a case-by-case basis. In some cases, prerequisite courses may be taken after admission to the graduate program.
2. At least a 3.0 (of a 4.0 maximum) GPA in the last 60 credits attempted prior to graduation; and
3. International students from non-English-speaking countries must be proficient in written and spoken English as evidenced by a score of at least 500 (paper-based test) or 213 (computer-based test) or 79 (Internet-based test) on the Test of English as a Foreign Language (TOEFL) or a score of at least 6.0 on the International English Language Testing System (IELTS).

### **Submission of Plan of Study**

Students are required to submit a Plan of Study when they have completed between 9 and 15 credits of

coursework with a minimum cumulative GPA of 3.0. All courses must be approved by the student's advisor. A student may not register for thesis credits prior to submitting a Plan of Study.

## Degree Requirements

The M.S. in Artificial Intelligence program offers both thesis and non-thesis options. Both options require a minimum of 30 credits, as specified in the table.

Students must satisfy all of the University graduate requirements. In addition, the following requirements must be met. The coursework credits must satisfy the following constraints:

1. No more than 3 credits of directed independent study may be taken.
2. No course can be counted toward the degree that is more than 10 years old at the time the degree is awarded.
3. At least one-half of the credits must be at the 6000 level or above.
4. The student must have a GPA of 3.0 (out of 4.0) or better.
5. All courses in the degree program must be completed with a grade of "C" or better.

## Transfer Credits

Any transfer credits toward the requirements for an M.S. in Artificial Intelligence must be approved by the department, the College and the University. The transfer credits must correspond to equivalent requirements and performance levels expected for the degree. Normally no more than 6 credits of coursework (that have not been applied to a degree) can be transferred from another institution.

---

### Core Courses (6 credits)

Students in both thesis and non-thesis options complete the Core Courses. Select two courses from the following three courses.

---

Computational Foundations of Artificial Intelligence	CAP 5625
--	----------

---

Artificial Intelligence	CAP 6635
-------------------------	----------

---

Data Mining and Machine Learning	CAP 6673
----------------------------------	----------

---

### Thesis Option (30 credits)

---

Master's Thesis - Artificial Intelligence (may be taken over multiple terms)	CAP 6974	6
--	----------	---

---

In addition to the Core Courses and the Thesis credits, students complete six elective courses

(18 credits) with the following constraints: Two AI electives. Minimum of 3 credits of 6000-level courses and maximum of 3 credits of Directed Independent Study, COT 6900 or COT 6905.

---

### **Non-Thesis Option (30 credits)**

In addition to the Core Courses, students complete eight elective courses (24 credits) with the following constraints: Four AI electives. Minimum of 9 credits of 6000-level courses and maximum of 3 credits of Directed Independent Study, COT 6900 or COT 6905.

#### **AI Electives**

Select 12 credits for Non-Thesis option and 6 credits for Thesis option.

***EECS Electives:*** *Select four courses from the graduate courses offered by the EECS department. Course substitution is allowed with the prior approval of the advisor.*

## **ARTIFICIAL INTELLIGENCE MASTER OF SCIENCE (M.S.) PROFESSIONAL PROGRAM**

(For this degree program, the GRE admission requirement is waived through and including fall 2023.)

The Professional Master of Science with major in Artificial Intelligence is a new self-supporting program designed for working professionals. It allows professionals to advance their careers with an accelerated graduate program and obtain an advanced degree while continuing to work. The course offering format includes evenings, weekends and online material. The program requires 30 credits.

Admissions requirements are the same as specified above for the M.S. in Artificial Intelligence, and degree requirements are the same as noted above for the non-thesis option. To apply or for more information, visit the [Electrical Engineering and Computer Science website](#) or call 561-297-3855.

## **ARTIFICIAL INTELLIGENCE GRADUATE MINOR**

*(Minimum of 12 credits required)*

The minor in Artificial Intelligence (AI) is open to all graduate students at Florida Atlantic University (FAU) who are not majoring in AI. The minor is awarded upon graduation from a graduate program at FAU; it is awarded in conjunction with graduate degrees.

Requirements for the minor include completion of four graduate-level courses with a minimum grade of "B." These four courses cannot be counted toward any other minor or certificate.

The minor has two tracks: Development and Applications. The Development track is intended for students proficient in programming and who will develop new algorithms and mechanisms in AI. The Applications track is open to students who have introductory programming skills and are interested in learning how to use the tools and algorithms of AI. Students in both tracks should have completed a statistics course.

Students must ensure that they have the necessary prerequisites for the selected courses. Students cannot apply for both the minor in AI and the certificate in AI.

## **COMPUTER ENGINEERING MASTER OF SCIENCE (M.S.)**

The non-thesis option for this degree requires a minimum of 30 credits. The thesis option requires a minimum of 30 credits, including 6 credits of thesis.

### **Admission Requirements**

Applications for admission to the master's program are approved by the University upon the recommendation of the department. All applicants must submit with their applications the official transcripts from previous institutions attended. Applications for admission are evaluated on an

individual basis. As a minimum, applicants are expected to meet the following requirements.

1. Students are expected to have a bachelor's degree in engineering or a related field. Applicants with different backgrounds are expected to have taken Calculus 2 and a statistics course, to be proficient in programming, and to be knowledgeable in the topics of microprocessor systems, computer architecture or CAD-based computer design, electronics or VLSI, data structures and algorithm analysis. The admission committee will evaluate the application holistically to determine the applicant's suitability using several factors, such as academic performance, GPA, background and experience. The admission committee may assign remedial courses on a case-by-case basis. In some cases, prerequisite courses may be taken after admission to the graduate program;
2. At least a 3.0 (of a 4.0 maximum) GPA in the last 60 credits attempted prior to graduation; and
3. International students from non-English-speaking countries must be proficient in written and spoken English as evidenced by a score of at least 500 (paper-based test) or 213 (computer-based test) or 79 (Internet-based test) on the Test of English as a Foreign Language (TOEFL) or a score of at least 6.0 on the International English Language Testing System (IELTS).

### **Submission of Plan of Study**

Students are required to submit a Plan of Study when they have completed between 9 and 15 credits of coursework with a minimum cumulative GPA of 3.0. All courses must be approved by the student's advisor. A student may not register for thesis credits prior to submitting a Plan of Study.

### **Degree Requirements**

Students must satisfy all of the University graduate requirements. In addition, the following specific degree requirements apply, depending on the choice of degree programs.

### **Thesis Option (30 credits)**

1. Requires 6 credits of orally defended written thesis. The M.S. committee is chaired by the student's thesis advisor. The chair of the committee must be a graduate faculty member from the Department of Electrical Engineering and Computer Science.
2. Requires 24 credits of approved coursework with the following constraints:
  - a. A minimum of 3 credits from computer architecture and design (graduate course prefix CDA), a minimum of 3 credits from software and programming (graduate course prefix COP or CEN) and a minimum of 3 credits from systems and applications (graduate course prefix CAP, CIS, CNT or EEL).
  - b. A minimum of 12 credits in Computer Engineering, Computer Science and Electrical Engineering courses.

- c. No more than 3 credits of directed independent study may be taken
  - d. No course can be counted toward the degree that is more than 10 years old at the time the degree is awarded.
  - e. No 4000-level course is allowed toward the degree. Courses taken to make up for the deficiencies will not be counted toward the degree.
3. At least one-half of the credits must be at the 6000 level or above.
  4. Must have a GPA of 3.0 (out of 4.0) or better.
  5. All courses in the degree program must be completed with a grade of "C" or better.
  6. Must complete one semester of CGS 5937, Graduate Seminar (0 credits) with grade of Satisfactory ("S").

### **Non-Thesis Option (30 credits)**

1. Requires 30 credits of approved coursework with the following constraints:
  - a. A minimum of 3 credits from computer architecture and design (graduate course prefix CDA), a minimum of 3 credits from software and programming (graduate course prefix COP or CEN) and a minimum of 3 credits from systems and applications (graduate course prefix CAP, CIS, CNT or EEL).
  - b. A minimum of 18 credits in Computer Engineering, Computer Science and Electrical Engineering courses.
  - c. No more than 3 credits of directed independent study may be taken.
  - d. No course can be counted toward the degree that is more than 10 years old at the time the degree is awarded.
  - e. No 4000-level course is allowed toward the degree. Courses taken to make up for the deficiencies will not be counted toward the degree.
2. At least one-half of the credits must be at the 6000 level or above.
3. Must have a GPA of 3.0 (out of 4.0) or better.
4. All courses in the degree program must be completed with a grade of "C" or better.
5. Must complete one semester of CGS 5937, Graduate Seminar (0 credits) with grade of Satisfactory ("S").

### **Transfer Credits**

Any transfer credits toward the requirements for a master's degree in Computer Engineering must be approved by the department, the College and the University. The transfer credits must correspond to equivalent requirements and performance levels expected for the degree. Normally, no more than 6 credits of coursework (that have not been applied to a degree) can be transferred from another institution.

## COMPUTER SCIENCE

### MASTER OF SCIENCE (M.S.)

The non-thesis option for this degree requires a minimum of 30 credits. The thesis option requires a minimum of 30 credits, including 6 credits of thesis.

#### Admission Requirements

Applicants for admission to the master's program are approved by the University upon the recommendation of the department. All applicants must submit with their applications the official transcripts from previous institutions attended. Applications for admission are evaluated on an individual basis. As a minimum, applicants are expected to meet the following requirements. Students with non-engineering bachelor's degrees, click [here](#) for additional requirements.

1. Students are expected to have a bachelor's degree in computer science or a related field. Applicants with different backgrounds are encouraged to apply. Students are expected to have taken Calculus 2 and a statistics course, to be proficient in programming, and to be knowledgeable in the topics of data structures and algorithm design and analysis, operating systems and computer architecture. The admission committee will evaluate the application holistically to determine the applicant's suitability using several factors, such as academic performance, GPA, background and experience. The admission committee may assign remedial courses on a case-by-case basis. In some cases, prerequisite courses may be taken after admission to the graduate program;
2. At least a 3.0 (of a 4.0 minimum) GPA in the last 60 credits attempted prior to graduation; and
3. International students from non-English-speaking countries must be proficient in written and spoken English as evidenced by a score of at least 500 (paper-based test) or 213 (computer-based test) or 79 (Internet-based test) on the Test of English as a Foreign Language (TOEFL) or a score of at least 6.0 on the International English Language Testing System (IELTS).

#### Submission of Plan of Study

Students are required to submit a Plan of Study when they have completed between 9 and 15 credits of coursework with a minimum cumulative GPA of 3.0. All courses must be approved by the student's advisor. A student may not register for thesis credits prior to submitting a Plan of Study.

#### Degree Requirements

Students must satisfy all of the University graduate requirements. In addition, the following specific degree requirements apply, depending on the choice of degree programs.

**Thesis Option (30 credits)**

1. Requires 6 credits of orally defended written thesis. The M.S. committee is chaired by the student's thesis advisor. The chair of the committee must be a graduate faculty member from the Department of Electrical Engineering and Computer Science.
2. Requires 24 credits of approved coursework with the following constraints:
  - a. A minimum of 3 credits from theory and algorithm (graduate course prefix COT), a minimum of 3 credits from software and programming (graduate course prefix COP or CEN) and a minimum of 3 credits from systems and applications (graduate course prefix CAP, CIS, CNT or CDA). Special Topics courses (COT 5930, COT 6930, CEN 5931, CEN 6930) and directed independent study courses (COT 6900, COT 6905) may be counted only with prior approval of the advisor.
  - b. A minimum of 12 credits in Computer Science and Engineering courses.
  - c. No more than 3 credits of directed independent study may be taken.
  - d. No course can be counted toward the degree that is more than 10 years old at the time the degree is awarded.
  - e. No 4000-level course is allowed toward the degree. Courses taken to make up for the deficiencies will not be counted toward the degree.
3. At least one-half of the credits must be at the 6000 level or above.
4. Must have a GPA of 3.0 (out of 4.0) or better.
5. All courses in the degree program must be completed with a grade of "C" or better.
6. Must complete one semester of CGS 5937, Graduate Seminar (0 credits) with grade of Satisfactory ("S").

**Non-Thesis Option (30 credits)**

1. Requires 30 credits of approved coursework with the following constraints:
  - a. A minimum of 3 credits from theory and algorithm (graduate course prefix COT), a minimum of 3 credits from software and programming (graduate course prefix COP or CEN) and a minimum of 3 credits from systems and applications (graduate course prefix CAP, CIS, CNT or CDA). Special Topics courses (COT 5930, COT 6930, CEN 5931, CEN 6930) and directed independent study courses (COT 6900, COT 6905) may be counted only with prior approval of the advisor.
  - b. A minimum of 18 credits in Computer Science and Engineering courses.
  - c. No more than 3 credits of directed independent study may be taken.
  - d. No course can be counted toward the degree that is more than 10 years old at the time the degree is awarded.

- e. No 4000-level course is allowed toward the degree. Courses taken to make up for the deficiencies will not be counted toward the degree.
2. At least one-half of the credits must be at the 6000 level or above.
3. Must have a GPA of 3.0 (out of 4.0) or better.
4. All courses in the degree program must be completed with a grade of "C" or better.
5. Must complete one semester of CGS 5937, Graduate Seminar (0 credits) with grade of Satisfactory ("S").

### **Transfer Credits**

Any transfer credits toward the requirements for a master's degree in Computer Science must be approved by the department, the College and the University. The transfer credits must correspond to equivalent requirements and performance levels expected for the degree. Normally no more than 6 credits of coursework (that have not been applied to a degree) can be transferred from another institution.

## **COMPUTER SCIENCE MASTER OF SCIENCE (M.S.) PROFESSIONAL PROGRAM**

The M.S. in Computer Science Professional Program is designed specifically for working professionals. Professionals will be able to advance their careers with an accelerated graduate program and obtain an advanced degree while continuing to work in their professional careers. The course offering format includes evenings, weekends and online material using Canvas. This degree requires 30 graduate credits. The duration of each course is four weeks. Students will be able to complete the program in one year. Only the non-thesis option is available.

### **Admission Requirements**

To qualify for unconditional or full acceptance into the M.S. in Computer Science Professional Program, applicants are required to meet all the admission requirements for the M.S. with major in Computer Science program.

Conditional admission may be available under extraordinary circumstances for applicants who show high promise to successfully complete the program and who have received a master's degree from a regionally accredited institution, but who fall short of the GPA and/or the GRE requirement. In these cases, the admissions committee for the Professional M.S. in Computer Science will review the application carefully and consider all aspects including, but not limited to, grade trends, mature work experience, work accomplishment and promotion, type and rigor of undergraduate and master's degree

programs, references and letters of recommendation.

## **Degree Requirements**

Degree requirements are the same as specified for the non-thesis option for the M.S. degree in Computer Science noted above. Students in the Professional M.S. degree in Computer Science program are exempt from the requirement to complete one semester of CGS 5937, Graduate Seminar (0 credits).

## **Program Fees**

The M.S. in Computer Science Professional Program is a full-service, all-inclusive program. The fees cover all program costs including tuition, course materials and graduation activities. To view our full cost of attendance information page, visit <https://www.fau.edu/finaid/other/cost-of-attendance/>.

## **Application Process and More Information**

To apply or receive more information about this program, visit the Electrical Engineering and Computer Science [website](#) or call 561-297-3855.

## **Internet Engineering Graduate Specialty**

### **An Option in Computer Science or Computer Engineering**

## **Prerequisites**

Same as for master's degree in Computer Science or master's degree in Computer Engineering.

## **Degree Requirements for Non-Thesis Option**

Requires a minimum of 30 credits as follows:

1. Same requirements as specified in degree requirements for non-thesis option for master's degree with major in Computer Engineering or master's degree with major in Computer Science;
2. At least four elective courses (12 credits) selected from a group of Internet-based courses that include (a) Internet software, (b) Internet networking and (c) Internet technologies, as specified by academic advisor.

## **Degree Requirements for Thesis Option**

Requires a minimum of 30 credits as follows:

1. Same requirements as specified in degree requirements for non-thesis option for master's degree with major in Computer Engineering or master's degree with major in Computer Science;
2. At least three elective courses (9 credits) selected from a group of Internet-based courses that

include (a) Internet software, (b) Internet networking and (c) Internet technologies, as specified by academic advisor;

3. A minimum of 6 credits of thesis work.

## **Software Engineering Graduate Specialty An Option in Computer Science**

### **Prerequisites**

Same as non-thesis programs plus:

Principles of Software Engineering (CEN 4010)

Introduction to Object-Oriented Design and Programming (COP 4331)

Students who have not had COP 4331 may take COP 5339 to satisfy this requirement.

### **Group 1 Fundamentals**

Courses in this group emphasize general fundamentals of software engineering. Included in this group are courses in object-oriented methods, software testing and requirements engineering.

### **Group 2 Development**

Courses in this group address specific issues and techniques more closely related to actual software development. Included in this group are courses in user-interface design, CASE, formal methods and advanced object-oriented topics.

### **Group 3 Quantitative and Experimental**

Courses in this group deal with quantitative and experimental approaches. Included in this group are courses in the areas of reliability, metrics and modeling.

For specific course numbers that belong to the above three groups, consult an advisor in the department.

Thesis option students must take at least six of the above software engineering courses, two from each group.

Non-thesis-option students must take at least eight of the above software engineering courses, at least two from each group. Appropriate special topics courses may also be used to meet these requirements

with approval of the student's advisor.

### Other Electives

Thesis option students: Two other 5000-level or 6000-level Computer Science and Computer Engineering courses and 6 credits of COT 6970 (Thesis). No 4000-level course is counted toward the degree.

Non-thesis-option students: Three other 5000-level or 6000-level Computer Science and Computer Engineering courses.

All students must complete at least one-half of their credits at the 6000 level.

### Internet and Web Technologies Focus An Option in Computer Science

This M.S. program is designed specifically for working professionals. Students attend formal classes for two Saturdays per month for 11 months. The remaining instruction is delivered through the latest distance-learning technologies, including FAU's Canvas system.

The program requires the 11 FAU courses below, totaling 33 credits categorized as software, networking and applications. Special review modules can be arranged for students who lack the required prerequisites. Admission requirements and prerequisites are the same as for the master's degree with major in Computer Science.

Multimedia Systems	CAP 6010
Data Mining and Machine Learning	CAP 6673
Computer Networks	CNT 5008
Mobile Computing	CNT 6517
Computer Data Security	CIS 6370
Theory and Implementation of Database Systems	COP 6731
Wireless Networks	EEL 6591
Social Networks and Big Data Analytics	CAP 6315

---

Queueing Theory	MAP 6264
-----------------	----------

---

Topics in Computer Science (Topics include Web Services, Web Project Development, Network Programming)	COT 5930
--	----------

---

Topics in Computer Science (Topics include Advanced Internet Engineering, Ad Hoc Networks, Video Communications)	COT 6930
---	----------

For fees and other details, contact the department at 561-297-3855 or visit the Electrical Engineering and Computer Science [website](#).

## **COMPUTER SCIENCE OR COMPUTER ENGINEERING MASTER OF SCIENCE (M.S.) WITH A BUSINESS MINOR**

Those students electing to receive a minor in Business must complete 36 credits, of which 21 are to be from the Computer Science and Engineering courses described in this section of the catalog and 15 are to be from the courses approved by the College of Business for the [Business minor](#). Such students will have to satisfy the prerequisite and core requirements of the appropriate degree program of the department. In addition, students should also satisfy the University requirements for graduate programs. For more information, students should consult their faculty advisor.

## **ARTIFICIAL INTELLIGENCE MASTER OF SCIENCE (M.S.) WITH A BUSINESS MINOR**

Those students electing to receive a minor in Business must complete 36 credits, of which 21 are to be from the Artificial Intelligence courses described in this section of the catalog and 15 are to be from the courses approved by the College of Business for the [Business minor](#). Such students will have to satisfy the prerequisite and core requirements of the appropriate degree program of the department. In addition, students should also satisfy the University requirements for graduate programs. For more information, students should consult their faculty advisor.

## **BIOMEDICAL ENGINEERING**

### **MASTER OF SCIENCE (M.S.) WITH A BUSINESS MINOR**

Those students electing to receive a minor in Business must complete 36 credits, of which 21 are to be from the Biomedical Engineering courses described in this section of the catalog and 15 are to be from the courses approved by the College of Business for the [Business minor](#). Such students will have to satisfy the prerequisite and core requirements of the appropriate degree program of the department. In addition, students should also satisfy the University requirements for graduate programs. For more information, students should consult their faculty advisor.

## **DATA SCIENCE AND ANALYTICS**

### **MASTER OF SCIENCE (M.S.)**

**Data Science via Scientific Inquiry Concentration**

**Data Science and Engineering Concentration**

**Data Science in Business Concentration**

**Data Science in Society Concentration**

(For this degree program, the GRE admission requirement is waived through and including fall 2023.)

The [Master of Science with Major in Data Science and Analytics](#) (MSDSA) is a multi-college interdisciplinary program jointly administered by the Department of Mathematics and Statistics in the Charles E. Schmidt College of Science, the Department of Electrical Engineering and Computer Science in the College of Engineering and Computer Science, the Department of Information Technology and Operations Management (ITOM) in the College of Business and the Department of Political Science in the Dorothy F. Schmidt College of Arts and Letters. The program aims to prepare students with essential skill sets needed to analyze small, fast, big, massive and complex data. To allow for maximum flexibility in career aspirations, students may select from four concentrations:

- Data Science via Scientific Inquiry Concentration, Department of Mathematics and Statistics.
- Data Science and Engineering Concentration, Department of Electrical Engineering and Computer Science.
- Data Science in Business Concentration, Department of Information Technology and Operations Management.
- Data Science in Society Concentration, Department of Political Science.

For more information about the Master of Science with Major in Data Science and Analytics degree

program, see the [Interdisciplinary Programs](#) section of this catalog.

## INFORMATION TECHNOLOGY AND MANAGEMENT MASTER OF SCIENCE (M.S.)

The [Master of Science with Major in Information Technology and Management \(MSITM\)](#) is jointly offered by the Department of Electrical Engineering and Computer Science in the College of Engineering and Computer Science and the Department of Information Technology and Operations Management (ITOM) in the College of Business. Designed for highly motivated individuals with computing and/or managerial backgrounds, the program aims to prepare students for a management career in the area of information technology in organizations. To allow for maximum flexibility in career aspirations, students can select from **five** concentrations: Advanced Information Technology, emphasizing the technical aspect of organizational IT systems; Information Technology Management, focusing on the management issues of IT in organizations; Computer Science Data Analytics; Cybersecurity; and Business Analytics. Details of this program can be found in the [Interdisciplinary Programs](#) section of this catalog.

## INFORMATION TECHNOLOGY AND MANAGEMENT MASTER OF SCIENCE (M.S.) PROFESSIONAL PROGRAM

Details for the [Professional Master of Science with Major in Information Technology and Management](#) are also described in the [Interdisciplinary Programs](#) section of the catalog.

The Electrical Engineering and Computer Science department offers several certificate programs. Each certificate requires at least four courses (12 credits), which cannot be counted in any other certificate program in the College of Engineering and Computer Science.

## ARTIFICIAL INTELLIGENCE GRADUATE CERTIFICATE

*(Minimum of 12 credits required)*

Over the past years, there has been dramatic progress in the rise of artificial intelligence (AI) and its use in the development of systems that can reason and respond to increasingly complex situations. AI is everywhere and the changes enabled by this technology have just begun. AI is transforming every

segment of American industry. It is making agriculture more precise and efficient, revealing new medical technologies and bringing the prospect of autonomous transportation and advanced manufacturing closer to reality. To become competitive, companies and corporations will have to embrace AI to some extent. These technological innovations are made possible by engineers and scientists with knowledge and expertise in the latest advancements in the field of AI. This 12-credit certificate provides graduate students with knowledge and skills in the concepts, technologies and applications of artificial intelligence.

### Admissions

This certificate program is open to students with a bachelor's degree in any academic area and who are not majoring in Artificial Intelligence. Students must satisfy the prerequisites for each course in the program. The average GPA of all four courses counted in the program must be 3.0 or better. This certificate requires four courses that have not been counted in any other minor or certificate program within the College of Engineering and Computer Science.

### Curriculum

The certificate has two tracks: a Development track and an Applications track. The Development track is intended for students proficient in programming who will develop new algorithms and mechanisms in artificial intelligence. The Applications track is open to students who have introductory programming skills and are interested in learning how to use the tools and algorithms of artificial intelligence. Students in both tracks are expected to have completed a statistics course.

---

#### Development Track (12 credits)

##### *Required courses (6 credits); select two courses from the following*

Computational Foundations of Artificial Intelligence	CAP 5625	3
Artificial Intelligence	CAP 6635	3
Data Mining and Machine Learning	CAP 6673	3

##### *Elective courses (6 credits); select two courses from the Elective Table*

#### Applications Track (12 credits)

(Not open to graduate students in the Department of Electrical Engineering and Computer Science, except for students in the M.S. with Major in Information Technology and Management (MSITM))

---

##### *Required courses (6 credits); select two courses from the following*

Computational Foundations of Artificial Intelligence	CAP 5625	3
Applied Machine Learning	CAP 6610	3
Data Mining and Machine Learning	CAP 6673	3

*Elective courses (6 credits); select two courses from the Elective Table*

### Elective Table

Select two courses from the list below. Additional courses may be used as electives with prior approval of the advisor.

Introduction to Neural Networks	CAP 5615	3
Introduction to Data Science	CAP 5768	3
Data Mining for Bioinformatics	CAP 6546	3
Sparse Learning	CAP 6617	3
Machine Learning for Computer Vision	CAP 6618	3
Deep Learning	CAP 6619	3
Natural Language Processing	CAP 6640	
Reinforcement Learning	CAP 6629	3
Artificial Intelligence in Medicine and Healthcare	CAP 6683	3
Advanced Data Mining and Machine Learning	CAP 6778	3
Computer Performance Modeling	CEN 6405	3
Robotic Applications	EEL 5661	3
Industrial Automation	EIN 5603C	3
Intelligent Underwater Vehicles	EOC 6663	3
Design and Analysis for Engineering Data	CGN 5716	3
Intelligent Transportation Systems	TTE 6272	3

## **ARTIFICIAL INTELLIGENCE GRADUATE CERTIFICATE PROFESSIONAL PROGRAM**

*(Minimum of 12 credits required)*

The Professional Artificial Intelligence certificate is designed for working professionals to advance their careers with an accelerated graduate program. This is a stand-alone certificate tailored for working professionals and alumni with graduate degrees who are looking for specialized knowledge in Artificial Intelligence. The course offering format includes evenings, weekends and online material. The 12-credit certificate has two tracks: a Development track and an Applications track. Admission details and details for the two tracks are shown above. To apply or for more information, visit the [Electrical Engineering and Computer Science website](#) or call 561-297-3855.

## **BIG DATA ANALYTICS GRADUATE CERTIFICATE**

*(Minimum of 12 credits required)*

The digital age is here to stay. Organizations now own and have access to unfathomable amounts of data. New technologies and efforts are needed to move on to the next phase of the digital revolution - the data revolution. To provide students with the knowledge necessary in this age of Big Data, the Department of Electrical Engineering and Computer Science and the Department of Information Technology and Operations Management (ITOM) have jointly designed the Big Data Analytics graduate certificate. This 12-credit certificate allows graduate students to expand their knowledge and skills in the concepts, technologies, and tools of business intelligence, data analytics and business analytics and be recognized for their achievement. The certificate program has two tracks: Computer Science (CS) and Business (BU). Details for both tracks can be found in the [Interdisciplinary Programs](#) section of this catalog.

## **BIG DATA ANALYTICS GRADUATE CERTIFICATE PROFESSIONAL PROGRAM**

*(Minimum of 12 credits required)*

Details for the [Professional Big Data Analytics Graduate Certificate](#) are also described in the [Interdisciplinary Programs](#) section of the catalog.

## **CYBER SECURITY GRADUATE CERTIFICATE**

*(Minimum of 12 credits required)*

Cybercrime-related issues especially impact the State of Florida because a significant part of the state's economic development comes from tourism, international banking and high-tech industries. The number of scientists, engineers and experts needed with special skills in cyber security exceeds the number available. The Cyber Security certificate provides opportunities for graduate students to expand their knowledge and skills to meet the needs of the cyber security field. Due to their extensive expertise and facilities, the departments of Electrical Engineering and Computer Science and Mathematics and Statistics have jointly designed the certificate. This 12-credit certificate program has two tracks: Computer Science (CS) and Mathematics (Math). Details for both tracks can be found in the [Interdisciplinary Programs](#) section of this catalog.

## **DOCTORAL PROGRAMS**

### **COMPUTER ENGINEERING OR COMPUTER SCIENCE DOCTOR OF PHILOSOPHY (PH.D.)**

The department offers a program of advanced graduate study leading to a Doctor of Philosophy degree in Computer Engineering and a Doctor of Philosophy degree in Computer Science. The graduate of this program will be able to meet the highest standards of preparation for leadership in the computer science or engineering profession, including research, teaching and leadership in high-technology industry and governmental agencies. A Ph.D. Applicant's Guide is available from the department. These degree programs as well as the concentration below are available in person and fully online.

The Ph.D. in Computer Science program also offers a concentration in [Data Science and Analytics](#). Students in this concentration gain expertise through both coursework and research activity in theoretical and applied data science and analytics. Admission and Degree Requirements are detailed below. Also offered is a concentration in [Cybersecurity](#). Both concentrations are available in person and fully online.

For working professionals seeking to advance their careers, the department offers a [Professional Doctor of Philosophy with Major in Computer Science](#).

### Admission Requirements

Application for admission to doctoral study will be evaluated on an individual basis by the department's graduate programs committee. Usually, the following four criteria must be met:

1. The applicant must submit the Graduate Record Examination (GRE) score and must have a GPA of at least 3.3 (out of 4.0 maximum) in previous graduate work. GRE scores more than five years old are normally not acceptable. The GRE requirement is waived for any student who has an M.S. degree from FAU's Department of Electrical Engineering and Computer Science.
2. The applicant must have a master's degree in Engineering, Computer Science or a related discipline awarded by a recognized institution. Thesis option is preferred. This requirement may be waived under exceptional circumstances (see B.S. to Ph.D. programs earlier in the College of Engineering and Computer Science section of the catalog).
  - a. Applicants to the Ph.D. with Major in Computer Science program are expected to have taken Calculus 2 and a statistics course, to be proficient in programming, and to be knowledgeable in the topics of data structures, algorithm design and analysis, operating systems and computer architecture. The admission committee will evaluate the application holistically to determine applicant suitability using several factors such as academic performance, GPA, GRE scores, background and experience. The admission committee may assign remedial courses on a case-by-case basis. In some cases, prerequisite requirements may be satisfied after admission to the Ph.D. program. In such a case, proficiency in the prerequisite courses must be shown before the student takes dissertation credits.
  - b. Applicants to the Ph.D. with Major in Computer Engineering program are expected to have taken Calculus 2 and a statistics course, to be proficient in programming, and to be knowledgeable in the topics of microprocessor systems, computer architecture or CAD-based computer design, electronics or VLSI, data structures and algorithm analysis. The admission committee will evaluate the application holistically to determine applicant suitability using several factors such as academic performance, GPA, GRE scores, background and experience. The admission committee may assign remedial courses on a case-by-case basis. In some cases, prerequisite requirements may be satisfied after admission to the Ph.D. program. In such a case, proficiency in the prerequisite courses must be shown before the student takes dissertation credits.
3. The applicant must provide two reference letters that address the student's research potential, motivation, relative academic achievement and personality.
4. International students from non-English-speaking countries must be proficient in written and

spoken English as evidenced by a score of at least 500 (paper-based test) or 213 (computer-based test) or 79 (Internet-based test) on the Test of English as a Foreign Language (TOEFL) or a score of at least 6.0 on the International English Language Testing System (IELTS).

## Candidacy

The candidacy exam is an exam intended to assess whether or not a student is ready to conduct research at the doctoral level and is able to publish in international conferences and journals. The exam must be passed for formal admission into the doctoral program. Students seeking the Ph.D. degree are expected to take the exam after completing 9 credits of their doctoral studies. A student failing the candidacy exam may, upon re-application, take it a second time. Two failures will normally result in the student's dismissal from the Ph.D. program. Specific instructions for applying and taking the Candidacy Examination are detailed on the [EECS website](#).

## Admission to Candidacy

Students should apply for candidacy as soon as they become eligible. To be eligible, a student must:

1. Have passed the Candidacy Exam, and
2. Have maintained a minimum of 3.0 GPA in all courses attempted as a doctoral student.

Students may not register for dissertation credits until their admission to candidacy.

## Degree Requirements

A minimum of 72 graduate credits is required beyond a bachelor's degree. A master's degree in a related field is considered equivalent to 30 credits. A minimum of 18 credits of coursework is required beyond a master's degree. All courses must be approved by the student's advisor. Students lacking proper background may have to take additional courses to make up for the deficiencies. In addition to meeting the course requirement, a doctoral student must pass the Candidacy Examination, complete the dissertation under the supervision of the student's advisor and dissertation committee and pass the oral dissertation examination. Also a written dissertation proposal must be accepted by the dissertation committee at least six months prior to the oral dissertation examination. A doctoral candidate is expected to have at least one research paper published or accepted for publication in a fully refereed conference or journal prior to graduation. The following rules apply to the courses taken (beyond the master's degree):

1. Of the 18 credit minimum of coursework, a minimum of 12 credits must be in Computer Science and Engineering courses (excluding directed independent study credits) and a minimum of 9 credits of 6000-level courses must be completed.

2. No more than 3 credits of directed independent study or advanced research may be used to satisfy the minimum of 18 credits. In that case, the subject matter may not overlap the student's dissertation.
3. A course that is more than 10 years old at the time the degree is awarded cannot be counted toward the degree. This rule does not apply to the courses transferred from the master's degree.
4. No 4000-level course may be counted toward the degree. Courses taken to make up for deficiencies will not be counted toward the degree.
5. Students must register for a minimum of 24 credits of dissertation.
6. Students must have a GPA of 3.0 (out of 4.0 maximum) or better.
7. All courses in the degree programs must be completed with a grade of "C" or better.
8. Must complete two semesters of CGS 5937, Graduate Seminar (0 credits) with grades of Satisfactory ("S").

---

### **Graduate Coursework - 18 credits** (for students entering with a master's degree)

---

*Minimum of 12 credits from Computer Science and Computer Engineering courses at the 5000, 6000 or 7000 levels (excluding DIS). Minimum of 9 credits at the 6000 level. Maximum of 3 credits of Directed Independent Study or Advanced Research.*

Directed Independent Study-Computer Science	COT 6900 <b>or</b>
Directed Independent Study-Computer Engineering	COT 6905 <b>or</b>
Advanced Research	EGN 69 18

### **Dissertation - 24 credits**

Dissertation - Computer Science (taken over multiple terms)	COT 7980 <b>or</b>
Dissertation - Computer Engineering (taken over multiple terms)	ECM 7980

For students entering with a bachelor's degree, see B.S. to Ph.D. programs earlier in this College of Engineering and Computer Science section.

## **COMPUTER SCIENCE** **DOCTOR OF PHILOSOPHY (PH.D.)**

### **Cybersecurity**

### **Data Science and Analytics Concentration**

Students in the Ph.D. with Major in Computer Science have the option of pursuing a concentration in Cybersecurity.

This major and concentration are available in person and fully online.

### Admission Requirements

Applicants should meet all the admission requirements for the Ph.D. with Major in Computer Science program.

### Degree Requirements

Applicants should meet all the degree requirements for the Ph.D. with Major in Computer Science program. In

addition, the following requirements should be met.

1. Graduate coursework counted for the Ph.D. program must contain at least three graduate courses from the table below. These courses focus on theoretical and/or applied cybersecurity. Additional courses may be approved by the dissertation advisor. Graduate courses completed during the master's degree program may also be used to meet this requirement.
2. The student's Ph.D. dissertation research and scholarship must have a strong emphasis on one or more areas of cybersecurity, including but not limited to, applied and/or theoretical areas.

Cryptographic Engineering	CDA 5326	3
Practical Aspects of Modern Cryptography	CIS 5371	3
Computer Data Security	CIS 6370	3
Distributed Systems Security	CIS 6375	3
Cryptocurrencies and Blockchain Technologies	CIS 6730	3
Secret Sharing Protocols	COT 6427	3
Data Analysis and Modeling for Cybersecurity	CAI 6803	3
Introduction to Cryptology and Information Security	MAD 5474	

### Data Science and Analytics Concentration

Students in the Ph.D. with Major in Computer Science have the option of pursuing a concentration in

Data Science and Analytics. See below for details. This major and concentration are available in person and fully online.

### Admission Requirements

Applicants should meet all the admission requirements for the Ph.D. with Major in Computer Science program.

### Degree Requirements

Applicants should meet all the degree requirements for the Ph.D. with Major in Computer Science program. In addition, the following requirements should be met.

1. Graduate coursework counted for the Ph.D. program must contain at least four graduate courses from the table below. These courses focus on theoretical and/or applied data science and analytics. Additional courses may be approved by the dissertation advisor. Graduate courses completed during the master's degree program may also be used to meet this requirement.
2. The student's Ph.D. dissertation research and scholarship must have a strong emphasis on one or more areas of data science and analytics or, including but not limited to, applied and/or theoretical areas.

Introduction to Neural Networks	CAP 5615	3
Introduction to Data Science	CAP 5768	3
Social Networks and Big Data Analytics	CAP 6315	3
Data Mining for Bioinformatics	CAP 6546	3
Sparse Learning	CAP 6617	3
Machine Learning for Computer Vision	CAP 6618	3
Deep Learning	CAP 6619	3
Artificial Intelligence	CAP 6635	3
Natural Language Processing	CAP 6640	3
Data Mining and Machine Learning	CAP 6673	3
Information Retrieval	CAP 6776	3

Web Mining	CAP 6777	3
Advanced Data Mining and Machine Learning	CAP 6778	3
Computer Performance Modeling	CEN 6405	3

### **Transfer Credits**

Any transfer credits (from other institutions) toward the requirements for the Ph.D. degree must be approved by the department, the College and the University. The transfer credits must correspond to equivalent requirements and performance levels expected for the degree. A maximum of 30 credits can be transferred from a master's degree. In addition to the credits for a master's degree, no more than 6 credits of coursework can be transferred from another institution.

### **Time Limitation**

A Ph.D. student who enters the program with a master's degree has no more than 10 years to complete all requirements for the Ph.D. degree.

### **Dissertation Committee**

Students are encouraged to interact with faculty members of the department to select a dissertation advisor and research area/topic for their dissertation. After a student has passed the Candidacy Examination, a dissertation committee shall be formed to supervise the student's research work. The committee will consist of at least four faculty members who are familiar with the research area, at least three of whom are regular faculty members of the department. At least one member of the committee is recommended to be from outside the department (could also be from another institution or industry), and this member should have an academic or professional level compatible with the rest of the committee. The committee is chaired by the student's dissertation advisor. The chair of the committee must be a faculty member from the Department of Electrical Engineering and Computer Science. Students are expected to work in close cooperation with their dissertation committee and to keep the committee members informed about their progress on a regular basis. The dissertation committee should meet with the student at least once a semester to review the progress of the research work.

### **Dissertation and Oral Defense**

The dissertation must be written in the format specified by the Graduate College. A copy of the dissertation must be submitted to the Graduate College for approval of the dissertation format. Dissertations must be defended orally. A dissertation should be submitted to the members of the dissertation committee for their review at least two weeks before the oral defense. After an oral defense, the members of the dissertation committee vote on acceptance or rejection of the dissertation.

The committee may also suggest that the student do some additional work so as to make the dissertation acceptable. The decision of the dissertation committee will be reported in the form of a satisfactory/unsatisfactory grade for dissertation credits.

## COMPUTER SCIENCE DOCTOR OF PHILOSOPHY (PH.D.) PROFESSIONAL PROGRAM

The Ph.D. in Computer Science Professional Program is designed specifically for working professionals. Professionals will be able to advance their careers with an accelerated graduate program and obtain an advanced degree while continuing to work. The Professional program is available only for students who have a master's degree in Engineering, Computer Science or a related discipline awarded by a regionally accredited institution. A minimum of 72 graduate credits is required beyond a bachelor's degree. Since a master's degree in a related field is considered equivalent to 30 credits, students in this program must complete at least 42 credits distributed as follows: 18 credits of graduate coursework and 24 credits of dissertation work.

Students must select one of the following options:

1. Professional Ph.D. in Computer Science, or
2. Professional Ph.D. in Computer Science, Data Science and Analytics Concentration

The course offering format includes evenings, weekends and online material using Canvas. Each course duration is four weeks or one of the FAU mini semesters. Students are expected to complete the program in three years.

### Admission Requirements

To qualify for unconditional or full acceptance into the Ph.D. in Computer Science Professional Program, applicants are required to meet all the admission requirements for the Ph.D. with major in Computer Science program.

Conditional admission may be available under extraordinary circumstances for applicants who show high promise to successfully complete the program and who have received a master's degree from a regionally accredited institution, but who fall short of the GPA and/or the GRE requirement. In these cases, the admissions committee for the Professional Ph.D. in Computer Science will review the application carefully and consider all aspects including, but not limited to, grade trends, mature work experience, work accomplishment and promotion, type and rigor of undergraduate and master's degree programs, references and letters of recommendation.

## Degree Requirements

Degree requirements are the same as those specified in the degree requirements for the Doctor of Philosophy in Computer Science, the option where students have already completed the master's degree.

Students pursuing the Data Science and Analytics concentration must complete the same concentration requirements as in the traditional program.

Students in the Professional Ph.D. degree in Computer Science program are exempt from the requirement to complete two semesters of CGS 5937, Graduate Seminar (0 credits).

## Program Fees

The Ph.D. in Computer Science Professional Program is a full-service, all-inclusive program. The fees cover all program costs including tuition, text books, course materials and graduation activities. To view our full cost of attendance information page, visit <https://www.fau.edu/finaid/other/cost-of-attendance/>.

## Application Process and More Information

To apply or receive more information about this program, visit the Computer & Electrical Engineering and Computer Science [website](#) or call 561-297-3855.

## NEUROSCIENCE

### DOCTOR OF PHILOSOPHY (PH.D.)

This doctoral program in Neuroscience is a multi-college, multi-institute interdisciplinary degree program organized in partnership with the FAU Brain Institute. Graduate-level instruction is provided by faculty in multiple departments located in the Charles E. Schmidt College of Science, the Charles Schmidt College of Medicine, the College of Engineering and Computer Science, the College of Education and the Harriet L. Wilkes Honors College. Affiliated faculty from the Max Planck Florida Institute for Neuroscience and Scripps Research Florida also participate in the program. The program aims to equip students with the advanced conceptual and technical skills needed to forge productive, neuroscience-oriented careers in industry, academia and government. Specific details for this doctoral program appear in the [Interdisciplinary Programs](#) section of this catalog.

## ELECTRICAL ENGINEERING

[Link to Combined Programs](#)

[Link to Master's Programs](#)

[Link to Doctoral Program](#)

## BACHELOR'S PROGRAM

### **Mission Statement**

The mission of the undergraduate program in Electrical Engineering is to offer an E.E. program of study that augments the liberal education expected of all FAU undergraduates and imparts a basic understanding of electrical engineering built on a foundation of physical science, mathematics, computing and technology.

### **Educational Objectives and Outcomes**

The educational objectives of the Electrical Engineering undergraduate program are to enable graduates who, within a few years after graduation, will:

- A. Be successful in understanding, formulating, analyzing and solving a variety of electrical engineering problems;
- B. Be successful in designing a variety of engineering systems, products or experiments;
- C. Be successful in careers and/or graduate study in engineering or other areas such as business, medicine and law;
- D. Have the ability to assume leadership and entrepreneurial positions;
- E. Successfully function and communicate effectively, both individually and in multidisciplinary teams;
- F. Understand the importance of lifelong learning, ethics and professional accountability.

The Bachelor of Science degree program in Electrical Engineering is accredited by the Engineering Accreditation Commission of ABET.

The educational objectives of the Electrical Engineering program are achieved by ensuring that graduates have the following characteristics or student outcomes:

1. An ability to identify, formulate and solve complex engineering problems by applying principles

of engineering, science and mathematics.

2. An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety and welfare, as well as global, cultural, social, environmental and economic factors.
3. An ability to communicate effectively with a range of audiences.
4. An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental and societal contexts.
5. An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks and meet objectives.
6. An ability to develop and conduct appropriate experimentation, analyze and interpret data and use engineering judgment to draw conclusions.
7. An ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

## **ELECTRICAL ENGINEERING**

### **BACHELOR OF SCIENCE IN ELECTRICAL ENGINEERING (B.S.E.E.)**

*(Minimum of 123 credits required)*

#### **Admission Requirements**

All students must meet the minimum admission requirements of the University. Please refer to the [Admissions section](#) of this catalog.

All students must meet the preprofessional requirements listed [above](#) in order to be accepted into the Electrical Engineering program.

#### **Prerequisite Coursework for Transfer Students**

Students transferring to Florida Atlantic University must complete both lower-division requirements (including the requirements of the General Education Program) and requirements for the college and major. Lower-division requirements may be completed through the A.A. degree from any Florida public college, university or community college or through equivalent coursework at another regionally accredited institution. Before transferring and to ensure timely progress toward the baccalaureate degree, students must also complete the prerequisite courses for their major as outlined in the [Transition Guides](#) .

All courses not approved by the Florida Statewide Course Numbering System that will be used to satisfy requirements will be evaluated individually on the basis of content and will require a catalog

course description and a copy of the syllabus for assessment.

## General Degree Requirements

The minimum number of credits required for the Bachelor of Science in Electrical Engineering (B.S.E.E.) degree is 123 credits. All courses that count toward the degree must be completed with grades of "C" or better. The Bachelor of Science in Electrical Engineering degree will be awarded to students who meet all admission and degree requirements of the department and the University. Notes below are referenced in the tables following the list.

### Notes:

Students entering FAU with less than 30 credits must satisfy the course requirements specified in the catalog section, [Degree Requirements](#). Students entering FAU with more than 30 credits (transfer students) must see the undergraduate advisor for an evaluation of courses taken at another school. The general education requirements are normally satisfied if a student has an Associate in Arts (A.A.) degree from a Florida community or state college. Once students earn beyond 30 credits, they must substitute EGN 1002, Fundamentals of Engineering, with an electrical engineering elective.

---

### Program Summary

General Education	24
Mathematics	15
Science	9
Common Core	27
Computer Engineering - Electrical Engineering Core	18
Electrical Engineering Core	9
Semi-Core Group 1	3
Semi-Core Group 2	6
Electives	12
<b>Total</b>	<b>123</b>

### *General Education*

Foundations of Written Communication	6
Foundations of Society and Human Behavior	6
Foundations of Global Citizenship	6
Foundations of Humanities	6
<b>Subtotal</b>	<b>24</b>

### *Mathematics*

Calculus with Analytic Geometry 1	MAC 2311	4
Calculus with Analytic Geometry 2	MAC 2312	4
Calculus with Analytic Geometry 3	MAC 2313	4
Engineering Mathematics 1	MAP 3305	3
<b>Subtotal</b>		<b>15</b>

### *Science*

Physics for Engineers 2	PHY 2044	3
General Physics for Engineers 1	PHY 2048	4
General Physics Lab 1	PHY 2048L	1
General Physics Lab 2	PHY 2049L	1
<b>Subtotal</b>		<b>9</b>

### **Core Courses**

All students must take the following core courses, which total 51 credits.

### *Common Core*

Introduction to Data Science and Analytics	CAP 4773	3
Computer Logic Design	CDA 3203	3
Computer Architecture	CDA 4102	3
Systems Programming with C++***	COP 3275C	3
Introduction to Programming in Python	COP 3035C	3
Foundations of Computing*	COT 2000C	3
Stochastic Processes and Random Signals**	EEE 4541	3
RI: Engineering Design 1	EGN 4950C	3
RI: Engineering Design 2	EGN 4952C	3
<b>Subtotal</b>		<b>27</b>

\* MAD 2104 may be substituted for COT 2000C.

\*\* STA 4821 may be substituted for EEE 4541.

\*\*\*May be used as an elective for a minor in Computer Science.

### ***Computer Engineering - Electrical Engineering Core***

Design of Digital Systems and Lab	CDA 4240C	3
Electronics 1	EEE 3300	3
Circuits 1	EEL 3111	3
Electronics Laboratory 1	EEL 3118L	3
Signals and Digital Filter Design	EEL 3502	3
Fundamentals of Engineering	EGN 1002	3
<b>Subtotal</b>		<b>18</b>

### ***Electrical Engineering Core***

Electronics 2 and Lab	EEE 4361C	3
Principles of Communication Systems	EEL 4512C	3
Control Systems 1	EEL 4652C	3
<b>Subtotal</b>		<b>9</b>

### Semi-Core Courses

All students must take 3 credits from Semi-Core Group 1 and 9 credits from Semi-Core Group 2.

#### *Electrical Engineering Semi-Core Group 1 (Select one course)*

Electric Power Systems	EEL 4216	3
Electrical Machines	EEL 4220	3
<b>Subtotal</b>		<b>3</b>

#### *Electrical Engineering Semi-Core Group 2 (Select two courses)*

Electronics 3 and Lab	EEE 4362C	3
Introduction to Digital Signal Processing	EEE 4510	3
Electromagnetic Fields and Waves	EEL 3470	3
Photovoltaic Power Systems	EEL 4281	3
Digital Communication Systems	EEL 4522	3
Introduction to Wireless Communication Systems	EEL 4580	3
<b>Subtotal</b>		<b>6</b>

### Electives

All students must take 6 credits of technical electives and 6 credits of Electrical Engineering electives. Certain 3000- and 4000-level courses offered by the Electrical Engineering and Computer Science Department may be used as a technical or Electrical Engineering elective. In addition, any two

Computer Science courses listed in the Computer Science minor program may be used as technical electives. Certain 5000- or 6000-level courses offered by the Electrical Engineering and Computer Science Department may be taken as technical electives or Electrical Engineering electives. Students must see an advisor for a current list of approved elective courses.

---

<b>Electrical Engineering Electives</b>	<b>6</b>
---	----------

---

<b>Technical Electives</b>	<b>6</b>
----------------------------	----------

---

Students are permitted to take no more than the equivalent of one course (3 credits) of the following three courses as an Electrical Engineering elective.

---

Professional Internship	IDS 3949	0-4
-------------------------	----------	-----

---

Directed Independent Study	EEL 4905	1-3
----------------------------	----------	-----

---

Directed Independent Research in Engineering and Computer Science	EGN 4915	1-3
---	----------	-----

---

### **Professional Internship**

Students must have completed EEE 3300, Electronics 1 and EEL 3118L, Electronics 1 Lab with a minimum grade of "C" before becoming eligible to register for a professional internship. Approval through the Career Center is required prior to enrollment.

### **Directed Independent Study**

Students must have completed EEE 4361C, Electronics 2 and Lab, with a minimum grade of "C" before being eligible to register for directed independent study or directed independent research.

### **Sample Four-Year Program of Study**

For the sample four-year program of study for the Bachelor of Science in Electrical Engineering, refer to the [Curriculum Sheets and Flight Plans](#) by major.

### **Second Bachelor's Degree**

This program is for those individuals with a degree in another discipline who are seeking a Bachelor of Science in Electrical Engineering degree at FAU.

### **Admission Requirements**

Students seeking a bachelor's degree or graduate degree in another discipline must satisfy all admission requirements of the first bachelor's degree in Electrical Engineering at FAU.

## Degree Requirements

1. Earn a minimum of 30 credits in residence at FAU, at the 3000 level or higher, beyond those required for the first degree. Students earning two degrees simultaneously (a dual degree) must earn at least 150 credits.
2. Earn at least 75 percent of all upper-division credits required for the major from FAU.
3. Students must have completed 15 credits in mathematics, 9 credits in science and **54** credits in core courses listed in the Electrical Engineering degree program. Each course must be completed with a minimum grade of "C."

## Undergraduate Transfer Students

Prior to the academic advising session, course syllabi need to be submitted to the Undergraduate Academic Advisor for evaluation of possible transfer credits. Course descriptions can be provided by submitting an undergraduate catalog from the post-secondary institution attended, submitting course descriptions from an online catalog (requires that the post-secondary institution web address be at the bottom of each page) or by providing course syllabi. The Academic Advisor evaluation needs to be performed even if a student has an evaluation by an approved agency.

# COMBINED PROGRAMS

## ELECTRICAL ENGINEERING

### BACHELOR OF SCIENCE IN ELECTRICAL ENGINEERING (B.S.E.E.) TO MASTER OF SCIENCE (M.S.) COMBINED PROGRAM

This program enables qualified FAU undergraduate EE students to obtain both their B.S.E.E. and M.S. degrees in approximately five years by allowing up to 12 credits of approved graduate coursework (5000 level or higher) to apply toward both degrees as long as the combined program totals a minimum of 150 credits:

1. The student has met the minimum 120 credits for the bachelor's degree; and
2. The student has taken a minimum of 30 credits in 5000 level or higher courses for the master's program.

This essentially takes away approximately one semester of coursework and offers an attractive option

for enthusiastic students planning for their graduate education. Students who have a cumulative GPA of 3.25 or better after completing 96 credits toward the B.S.E.E. are eligible for admission to the program. Students complete the undergraduate degree first.

### **Prerequisite Coursework for Transfer Students**

Students transferring to Florida Atlantic University must complete both lower-division requirements (including the requirements of the General Education Program) and requirements for the college and major. Lower-division requirements may be completed through the A.A. degree from any Florida public college, university or community college or through equivalent coursework at another regionally accredited institution. Before transferring and to ensure timely progress toward the baccalaureate degree, students must also complete the prerequisite courses for their major as outlined in the *Transition Guides*.

All courses not approved by the Florida Statewide Course Numbering System that will be used to satisfy requirements will be evaluated individually on the basis of content and will require a catalog course description and a copy of the syllabus for assessment.

### **Program Process**

1. Eligible students apply to the department for acceptance into the program during the term in which they will complete 96 credits toward their B.S.E.E. degree.
2. Eligible students take courses in their senior year that will apply to both their B.S.E.E. and M.S. degrees.
3. Students participating in this program may opt for the thesis or non-thesis option in their M.S. degree.
4. Students planning for the thesis option need a letter of recommendation from their potential thesis advisor.
5. Students must be admitted to the joint B.S.E.E./M.S. program at least one semester prior to the start of their M.S. degree program.
6. Students who are successful in completing their M.S. degree within one year will be presented a certificate of recognition.

### **Degree Requirements**

Students participating in this program must satisfy the degree requirements for a B.S.E.E. and M.S. as outlined in this catalog.

## **ELECTRICAL ENGINEERING TO ARTIFICIAL INTELLIGENCE**

## BACHELOR OF SCIENCE IN ELECTRICAL ENGINEERING (B.S.E.E.) TO MASTER OF SCIENCE (M.S.) COMBINED PROGRAM

The department offers a combined Bachelor of Science in Electrical Engineering (B.S.E.E.) to Master of Science in Artificial Intelligence (M.S.) program. Students in this combined program may count up to 12 credits of approved graduate coursework (5000 level or higher) toward both their bachelor's and master's degrees as long as the combined program totals a minimum of 150 credits:

1. The student has met the minimum 120 credits for the bachelor's degree; and
2. The student has taken a minimum of 30 credits in 5000 level or higher courses for the master's program.

With an approximate duration of five years, these combined programs provide attractive ways for students to continue their graduate work. Students complete the undergraduate program first.

Prerequisite coursework for transfer students and admission requirements for this combined programs are the same as for the [B.S.C.E or B.S.C.S. to M.S. degree programs](#) noted above.

### Degree Requirements

The following specific technical elective courses must be taken as part of the requirements for the B.S.E.E. degree.

---

#### Technical Electives (6 credits required)

---

Programming 2	COP 3014	3
Data Structures and Algorithm Analysis	COP 3530	3

## ELECTRICAL ENGINEERING TO COMPUTER ENGINEERING BACHELOR OF SCIENCE IN ELECTRICAL ENGINEERING (B.S.E.E.) TO MASTER OF SCIENCE (M.S.) COMBINED PROGRAM

The B.S.E.E./M.S.Cp.E. program is intended for students who wish to take advantage of the broader systems orientation of the B.S.E.E. degree and then specialize in Computer Engineering. Selection of specific technical elective courses in the B.S.E.E. program qualifies the graduate to enter the M.S.Cp.E. program with no deficiencies, provided that the GPA and other computer engineering admission

requirements are met. Up to 12 credits of approved graduate coursework (5000 level or higher) can apply toward both degrees as long as the combined program totals a minimum of 150 credits:

1. The student has met the minimum 120 credits for the bachelor's degree; and
2. The student has taken a minimum of 30 credits in 5000-level of higher courses for the master's program.

### **Prerequisite Coursework for Transfer Students**

Students transferring to Florida Atlantic University must complete both lower-division requirements (including the requirements of the General Education Program) and requirements for the college and major. Lower-division requirements may be completed through the A.A. degree from any Florida public college university, or community college or through equivalent coursework at another regionally accredited institution. Before transferring and to ensure timely progress toward the baccalaureate degree, students must also complete the prerequisite courses for their major as outlined in the [Transition Guides](#).

All courses not approved by the Florida Statewide Course Numbering System that will be used to satisfy requirements will be evaluated individually on the basis of content and will require a catalog course description and a copy of the syllabus for assessment.

### **Degree Requirements**

The following specific technical elective and semi-core courses must be taken as part of the requirements for the B.S.E.E. degree in order to enter the B.S.E.E. to M.S. with Major in Computer Engineering Degree Program.

---

#### **Technical Electives (6 credits required)**

Programming 2	COP 3014	3

Data Structures and Algorithm Analysis	COP 3530	3
--	----------	---

---

#### **Electrical Engineering Semi-Core (6 credits required)**

Introduction to Embedded System Design	CDA 4630	3
--	----------	---

Communication Networks	CNT 4007	3
------------------------	----------	---

## **ELECTRICAL ENGINEERING TO INFORMATION TECHNOLOGY AND MANAGEMENT**

## BACHELOR OF SCIENCE IN ELECTRICAL ENGINEERING (B.S.E.E.) TO MASTER OF SCIENCE (M.S.) COMBINED PROGRAM

**Advanced Information Technology Concentration (M.S.)**

**Computer Science Data Analytics Concentration (M.S.)**

For details about this combined program, click [here](#).

## ELECTRICAL ENGINEERING

## BACHELOR OF SCIENCE IN ELECTRICAL ENGINEERING (B.S.E.E.) TO DOCTOR OF PHILOSOPHY (PH.D.) COMBINED PROGRAM

The Department of Electrical Engineering and Computer Science offers a combined Bachelor of Science in Electrical Engineering (B.S.E.E.) to Ph.D. with major in Electrical Engineering degree program.

Students may count up to 12 credits of graduate coursework (5000 level or higher) offered by the EECS Department toward both their B.S.E.E. and Ph.D. degrees. These graduate courses will replace elective courses in the bachelor's program. The program does not increase the number of credits in the undergraduate degree.

The combined program totals a minimum of 195 credits, provided that:

1. The student has met the minimum 123 credits for the bachelor's degree; and
2. The student has taken a minimum of 72 credits in 5000 level or higher courses for the Ph.D. program.

This combined program provides an attractive way for students to continue their graduate work. Students complete the undergraduate program first.

### Admission Requirements

The GRE requirement is waived for this combined program.

1. To be eligible to apply for the combined program, students must have a cumulative FAU GPA of 3.5 or better at the end of their junior year. Note that the cumulative FAU GPA of at least 3.5 must be maintained until the completion of the bachelor's degree.
2. Formally apply to the combined program after the junior year (90 credits or more of coursework

completed). The application must include one reference letter.

3. Must be admitted into the combined program at least one semester prior to the beginning of the Ph.D. portion of the program.

Students in the combined program must maintain continuous enrollment to remain in good standing.

## Degree Requirements

To be eligible for the combined bachelor to Ph.D. program, students must fulfill the following requirements:

1. Completion of the requirements for the B.S.E.E. program and other requirements stipulated by the University and College.
2. Completion of all requirements for the Ph.D. with major in Electrical Engineering degree program.

## MASTER'S PROGRAMS

### ELECTRICAL ENGINEERING MASTER OF SCIENCE (M.S.)

The department offers thesis and non-thesis options at the master's level. Students may specialize in several areas: telecommunications; digital signal processing; systems and robotics, including control systems and machine vision; electromagnetics and RF, antennas, microwave systems, EMC/EMI and HF RF circuit design; alternative energy systems, including photovoltaic and fuel cell systems; bioengineering; neural networks; and optics and photonics. The Master of Science with major in Electrical Engineering is available in person and fully online.

### Admission Requirements

All applicants must submit official transcripts from all previous postsecondary institutions attended. Applicants for admission will be evaluated on an individual basis and must satisfy the following requirements. Students with non-engineering bachelor's degrees, click [here](#) for additional requirements.

1. International students from non-English-speaking countries must be proficient in written and spoken English as evidenced by a score of at least 500 (paper-based test) or 213 (computer-based test) or 79 (Internet-based test) on the Test of English as a Foreign Language (TOEFL) or a score of at least 6.0 on the International English Language Testing System (IELTS).
2. A baccalaureate degree in Engineering, Natural Science or Mathematics;\*
3. A minimum GPA of 3.0 (of a possible 4.0 maximum) in the last 60 credits of undergraduate work.

\* Students whose backgrounds are not in electrical or computer engineering should expect to take additional coursework to satisfy deficiencies.

### **Admission to Candidacy**

Graduate students are required to submit a Plan of Study when they have completed between 9 and 15 credits of coursework with a minimum cumulative GPA of 3.0. A student may not register for thesis credits prior to approval of a submitted Plan of Study.

### **Degree Requirements**

Students must satisfy all of the University graduate requirements. In addition, the following specific degree requirements apply, depending on the choice of degree program:

#### **Thesis Option (30 credits)**

1. Requires 6 credits of orally defended written thesis. The M.S. committee is chaired by the student's thesis advisor. The chair of the committee must be a graduate faculty member from the Department of Electrical Engineering and Computer Science.
2. Requires 24 credits of approved coursework with the following constraints:
  - a. Minimum of 12 credits in EE courses;
  - b. No 4000-level course may be counted toward the degree;
  - c. A 3-credit course with math prefix or one of the following courses: EEL 5613, Modern Control; EEE 5502, Digital Processing of Signals; EEL 6482, Electromagnetic Theory 1; EOC 5172, Mathematical Methods in Ocean Engineering 1.
3. At least one-half of the credits must be at the 6000 level or above.
4. Must complete one semester of CGS 5937, Graduate Seminar (0 credits) with grade of Satisfactory ("S").

**Note:** No more than 3 credits of directed independent study may be applied toward the master's degree.

#### **Non-Thesis Option (30 credits)**

1. Requires 30 credits of approved coursework with the following constraints:
  - a. No 4000-level course is allowed toward the degree. Courses taken to make up for the deficiencies will not be counted toward the degree;
  - b. A 3-credit course with math prefix or one of the following courses: EEL 5613, Modern Control; EEE 5502, Digital Processing of Signals; EEL 6482, Electromagnetic Theory 1; EOC 5172, Mathematical Methods in Ocean Engineering 1;
  - c. A minimum of 18 credits must be completed in EE.

2. At least one-half of the credits must be at the 6000 level or above.
3. Must complete one semester of CGS 5937, Graduate Seminar (0 credits) with grade of Satisfactory ("S").

**Note:** No more than 3 credits of directed independent study may be applied toward the master's degree.

### Deficiency Requirements

From the following list of deficiency EE courses, students must take two mandatory courses and at least two courses from the list following the mandatory courses.

---

#### Mandatory courses

Electronics Laboratory 1	EEL 3118L
--------------------------	-----------

Signals and Digital Filter Design	EEL 3502
-----------------------------------	----------

---

#### Choose at least two courses from the list

Introduction to Embedded Systems Design	CDA 4630
---	----------

Electronics 2 and Lab	EEE 4361C
-----------------------	-----------

Stochastic Processes and Random Signals	EEE 4541
---	----------

Electromagnetic Fields and Waves	EEL 3470
----------------------------------	----------

Electric Power Systems	EEL 4216
------------------------	----------

Electrical Machines	EEL 4220
---------------------	----------

Principles of Communication Systems	EEL 4512C
-------------------------------------	-----------

Control Systems 1	EEL 4652C
-------------------	-----------

An insufficient number of the above courses will be considered a deficiency. Students are expected to take the necessary deficient courses during their course program as an extra load beyond the regular graduate coursework.

Students with engineering technology degrees are expected to first satisfy the FAU EE undergraduate graduation requirements before being admitted to the graduate program.

## ELECTRICAL ENGINEERING MASTER OF SCIENCE (M.S.) WITH A BUSINESS MINOR

Those students electing to receive a minor in Business must complete 36 credits, of which 21 are to be from the Electrical Engineering courses described in this section of the catalog and 15 are to be from the courses approved by the College of Business for the [Business minor](#). Such students will have to satisfy the prerequisite and core requirements of the appropriate degree program of the department. In addition, students should also satisfy the University requirements for graduate programs. For more information, students should consult their faculty advisor.

## DOCTORAL PROGRAMS

### ELECTRICAL ENGINEERING DOCTOR OF PHILOSOPHY (PH.D.)

The department offers a program of advanced graduate study leading to a Doctor of Philosophy degree in Electrical Engineering. This degree program is available in person and fully online. Students in the Ph.D. with Major in Electrical Engineering program have the option of pursuing a concentration in [Neuroengineering](#).

#### **Admission Requirements**

Applicants for admission to doctoral study will be evaluated on an individual basis by the departmental graduate admissions committee. As a rule, the applicant must have:

1. At least a 3.3 (of a possible 4.0 maximum) grade point average in the last 60 credits attempted in the relevant field;
2. Submission of the Graduate Record Examination (GRE) score is required. GRE scores more than five years old are normally not acceptable. The GRE requirement is waived for any student who has an M.S. degree without thesis from FAU's Department of Electrical Engineering and Computer Science;-
3. A master's degree in Engineering or a related discipline awarded by a recognized institution (thesis options are preferred);
4. Two reference forms that document the applicant's research potential, motivation, relative academic achievement and personality;
5. International students from non-English-speaking countries must be proficient in written and spoken English as evidenced by a score of at least 500 (paper-based test) or 213 (computer-based

test) or 79 (Internet-based test) on the Test of English as a Foreign Language (TOEFL) or a score of at least 6.0 on the International English Language Testing System (IELTS).

Applicants are expected to have taken the following prerequisite courses (or equivalents) before pursuing the Ph.D. degree. In some cases, prerequisite requirements may be satisfied after admission to the Ph.D. program. In such a case, proficiency in the prerequisite courses must be shown before the student takes dissertation credits.

From the following list of deficiency EE courses, students must take two mandatory courses and at least two courses from the list following the mandatory courses.

---

### **Mandatory courses**

Electronics Laboratory 1	EEL 3118L
Signals and Digital Filter Design	EEL 3502

### **Choose at least two courses from the list**

Introduction to Embedded Systems Design	CDA 4630
Electronics 2 and Lab	EEE 4361C
Stochastic Processes and Random Signals	EEE 4541
Electromagnetic Fields and Waves	EEL 3470
Electric Power Systems	EEL 4216
Electrical Machines	EEL 4220
Principles of Communication Systems	EEL 4512C
Controls Systems 1	EEL 4652C

### **Candidacy Exam**

The candidacy exam is an exam intended to assess whether or not a student is ready to conduct research at the doctoral level and is able to publish in international conferences and journals. The exam must be passed for formal admission into the doctoral program. Students seeking the Ph.D. degree are expected to take the exam after completing 9 credits of their doctoral studies. A student failing the candidacy

exam may, upon re-application, take it a second time. Two failures will normally result in the student's dismissal from the Ph.D. program. Specific instructions for applying and taking the Candidacy Examination are detailed on the EECS [website](#).

### **Admission to Candidacy**

To be considered for the doctoral candidacy:

1. The student must pass the Candidacy Examination (CE) administered by the department.
2. Following successful completion of the CE, the student must find a qualified faculty member in the department willing to chair the doctoral (dissertation) committee. The dissertation committee chair will then consult with the student to form the complete committee. Working with this dissertation committee chair, the student must complete the official Admission to Candidacy application along with the approved Plan of Study.

Candidacy approval will be based on:

1. The academic record of the student;
2. An approved (tentative) dissertation topic.

A student may not register for dissertation credit until the application for candidacy has been approved.

### **Degree Requirements**

1. A minimum total of 72 credits is required beyond the bachelor's degree level. A master's degree in a related field is considered equivalent to 30 credits. Students must take a minimum of 18 credits of graduate coursework beyond the master's degree and a minimum of 24 dissertation credits.
2. Of the 18-credit minimum of coursework, a minimum of 12 credits must be Electrical Engineering courses (excluding directed independent study credits) and a minimum of 9 credits of 6000-level must be completed.
3. No more than 3 credits of directed independent study or advanced research may be used to satisfy the minimum of 18 credits. In that case, the subject matter may not overlap the student's dissertation.
4. No 4000-level course may be counted toward the degree. Courses taken to make up for deficiencies will not be counted toward the degree.
5. Specific Focus Area coursework will be required.
6. At least 6 credits in courses with math prefix are required as part of coursework beyond the bachelor's degree. These may include EEL 5613, Modern Control; EEE 5502, Digital Processing of Signals; EEL 6482, Electromagnetic Theory 1; EOC 5172, Mathematical Methods in Ocean

## Engineering 1.

7. Must complete two semesters of CGS 5937, Graduate Seminar (0 credits) with grades of Satisfactory ("S").
8. A written dissertation proposal must be accepted by the dissertation committee, at least six months prior to defending the dissertation.
9. When the candidate submits the Application for Graduation, he/she must indicate the following as a check list: (a) Date of QE taken and candidacy filed; (b) Date of dissertation proposal presented and approved by the Ph.D. Committee and (c) Status of the Plan of Study.
10. Draft copy of the dissertation must be submitted for review by the Ph.D. Committee at least 15 days prior to the date of defending the dissertation. And the dissertation must be completed and orally defended.

It is expected that all doctoral candidates have at least one research paper published or accepted for publication in a fully refereed conference or journal prior to graduation. A patent relevant to the Ph.D. research topic/dissertation as approved by the U.S. Patent Office with an assigned number can substitute for the journal or conference publication requirement.

### **Transfer Credits**

Any transfer credit toward requirements for the Ph.D. program must be approved by the department and the University. A maximum of 30 credits (which may include credits taken toward the master's degree with no more than 6 credits for the M.S. thesis) can be transferred into the student's program of study.

### **Time Limitation**

A Ph.D. student who enters the program with a master's degree has no more than 10 years to complete all requirements for the Ph.D. degree.

### **Dissertation Committee**

Students are encouraged to interact with faculty members of the department to select a dissertation advisor and research area/topic for their dissertation. After a student has passed the candidacy exam, a dissertation committee shall be formed to supervise the student's research work. The committee should consist of at least four faculty members who are familiar with the research area, three of whom are regular faculty members of the department. At least one member of the committee is recommended to be from outside the department (could be from another institution or industry), and this member should have an academic or professional level compatible with the rest of the committee. The committee is chaired by the student's dissertation advisor. The chair of the committee must be a faculty

member from the Department of Electrical Engineering and Computer Science. Students are expected to work in close cooperation with their dissertation committee and keep the committee members informed about their progress on a regular basis. The dissertation committee should meet with the student at least once a semester to review the progress of the research work.

### **Dissertation and Oral Defense**

The dissertation must be written in the format specified by the Graduate College. A copy of the dissertation must be submitted to the Graduate College for approval of the dissertation format. Dissertations must be defended orally. A dissertation should be submitted to the members of the dissertation committee for their review at least two weeks before the oral defense. After an oral defense, the members of the committee vote on acceptance or rejection of the dissertation. The committee may also suggest that the student do additional work to make the dissertation acceptable. The decision of the dissertation committee is reported in the form of a satisfactory/unsatisfactory grade for dissertation credits.

---

### **Graduate Coursework - 18 credits** (for students entering with a master's degree)

---

Select 18 credits at the 5000, 6000 or 7000 levels. Minimum of 12 credits in Electrical Engineering (excluding DIS). Maximum of 3 credits of Directed Independent Study or Advanced Research.

Directed Independent Study	EEL 6905 <b>or</b>
----------------------------	--------------------

Advanced Research	EGN 6918
-------------------	----------

---

### **Dissertation - 24 credits**

Dissertation (taken over multiple terms)	EEL 7980
--	----------

---

For students entering with a bachelor's degree, see B.S. to Ph.D. programs earlier in this College of Engineering and Computer Science section.

### **Math Requirement - 6 credits**

Select one course from the following

Digital Processing of Signals	EEE 5502	3
-------------------------------	----------	---

Modern Control	EEL 5613	3
----------------	----------	---

Control Systems 2	EEL 5654	3
-------------------	----------	---

Electromagnetic Theory 1	EEL 6482	3
--------------------------	----------	---

Detection Theory	EEL 6537	3
Special Topics in Electrical Engineering	EEL 6935	1-4
Mathematical Methods in Ocean Engineering 1	EOC 5172	3
Queueing Theory	MAP 6264	3

## **ELECTRICAL ENGINEERING**

### **DOCTOR OF PHILOSOPHY (PH.D.)**

#### **Neuroengineering Concentration**

##### **Admission Requirements**

Applicants should meet all the admission requirements for the Ph.D. with Major in Electrical Engineering program.

##### **Degree Requirements**

Applicants should meet all the degree requirements for the Ph.D. with Major in Electrical Engineering program. In addition, the following requirements should be met.

1. Graduate coursework counted for the Ph.D. program must contain at least three graduate courses from the table below. These courses focus on theoretical and/or applied neuroengineering. Additional courses may be approved by the dissertation advisor. Graduate courses completed during the master's degree program may also be used to meet this requirement.
2. The student's Ph.D. dissertation research and scholarship must have a strong emphasis on one or more areas of neuroengineering, including but not limited to applied and/or theoretical areas.

## BIOMEDICAL ENGINEERING

### Faculty:

Agaarwal, A.; Asghar, W.; Assis, R.; DeGiorgio, M.; Du, S.; Engeberg, E.; Ghoraani, B.; Hashemi, J.; Kang, Y.; Pavlovic, M.; Ranji, M.; Pashaie, R.; Shankar, R.; Yi., P.; Zhi, H.

Biomedical Engineering stands at the intersection of the revolution taking place in advanced medical treatments as a result of applying the principles and practice of the engineering and computer science disciplines to the biological, biomedical and medical sciences. Biomedical Engineering is a broad and emerging field that impacts drug delivery, surgery, diagnosis, prevention and treatment. Students successfully completing the Master of Science with major in Biomedical engineering program will be prepared for professional careers in businesses related to medical diagnostics, prosthetic devices and neural and other implants; the pharmaceutical and biotechnology industries; and consulting in health-related fields, as well as other positions in industry, commerce, education and government. Students will also be prepared to continue their formal education at the Ph.D. level in a variety of science and engineering disciplines and at the M.D. level in certain cases. The Master of Science with major in Biomedical Engineering is available in person and fully online.

[Link to Combined Bachelor of Science in Biomedical Engineering \(B.S.B.M.E.\)](#)

[Link to Master of Science in Biomedical Engineering](#)

## **BIOMEDICAL ENGINEERING BACHELOR OF SCIENCE**

*(Minimum of 120 credits required)*

The program of study leading to the Bachelor of Science in Biomedical Engineering (B.S.B.M.E.) reflects the breadth of the profession. Students complete coursework in basic science and mathematics, engineering sciences and engineering systems and materials. The major includes five areas of focus: 1. Biomaterials and Tissue Engineering; 2. Smart Health Systems; 3. Biorobotics; 4. Bioinformatics; and 5. Nursing Technologist. The Biomedical Engineering program is the first to offer the Nursing Technologist track and an interface with the artificial intelligence center that will add benefits to the Biorobotics and Smart Health Systems focus areas.

### **Biomedical Engineering Educational Objectives and Student Outcomes**

The Biomedical Engineering program strongly supports the educational objectives and learning outcomes of the College of Engineering and Computer Science (see the [Educational Objectives](#) and [Expected Student Learning Outcomes](#) subsections previously listed in this section).

Program Educational Objectives are broad statements that describe the expected accomplishments and professional status of Biomedical Engineering graduates a few years beyond the baccalaureate degree.

The Biomedical Engineering program at Florida Atlantic University is dedicated to graduating

engineers who, within a few years after graduation will:

1. **Practice biomedical engineering** within the general areas of biomaterials and tissue engineering, bio-robotics, bioinformatics, nursing technology and smart health systems in the organizations that employ them;
2. **Advance their knowledge of biomedical engineering**, both formally and informally, by engaging in lifelong learning experiences including attainment of professional licensure and/or graduate studies;
3. **Serve as effective professionals** based on strong interpersonal and teamwork skills, an understanding of professional and ethical responsibility and a willingness to take the initiative and seek progressive responsibilities; and
4. **Participate as leaders** in activities that support service to, and/or economic development of, the community, the region, the state and the nation.

The educational objectives of the Bachelor of Science in Biomedical Engineering program are achieved by ensuring that graduates have the following characteristics or student outcomes:

1. An ability to identify, formulate and solve complex engineering problems by applying principles of engineering, science and mathematics;
2. An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety and welfare, as well as global, cultural, social, environmental and economic factors;
3. An ability to communicate effectively with a range of audiences;
4. An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental and societal contexts;
5. An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks and meet objectives;
6. An ability to develop and conduct appropriate experimentation, analyze and interpret data and use engineering judgment to draw conclusions; and
7. An ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

### Admission Requirements

All students must meet the minimum admission requirements of the University. Please refer to the [Admissions](#)

section of this catalog. All students must meet the preprofessional requirements listed above to be accepted in the B.S.B.M.E. program.

## Prerequisite Coursework for Transfer Students

Students transferring to Florida Atlantic University must complete both lower-division requirements (including the requirements of the General Education Program) and requirements for the college and major. Lower-division requirements may be completed through the A.A. degree from any Florida public college, university or community college or through equivalent coursework at another regionally accredited institution. Before transferring and to ensure timely progress toward the baccalaureate degree, students must also complete the prerequisite courses for their major as outlined in the Transition Guides and below.

All courses not approved by the Florida Statewide Course Numbering System that will be used to satisfy requirements will be evaluated individually on the basis of content and will require a catalog course description and a copy of the syllabus for assessment.

## Degree Requirements

The Bachelor of Science in Biomedical Engineering degree will be awarded to students who:

1. Meet all general degree requirements of the University.
2. Complete the curriculum for the B.S. in Biomedical Engineering degree (see below).

## Curriculum

The Bachelor of Science in Biomedical Engineering degree requires 120 credits. For credit toward the degree, a grade of "C" or better must be received in each course listed. In addition, all prerequisites for each mathematics, science or engineering course must be completed with a grade of "C" or better before enrollment is permitted. The degree components are listed below.

#### *Bioinformatics Focus Area - Take the following two courses*

Computational Genomics	CAP 4511	3
------------------------	----------	---

Algorithms for Bioinformatics	CAP 4543	3
<b>Total</b>		<b>6</b>
<i>Smart Health Systems Focus Area - Choose two courses from the list</i>		
Introduction to Deep Learning	CAP 4613	3
Introduction to Artificial Intelligence	CAP 4630	3
Introduction to Data Mining and Machine Learning	CAP 4770	3
<b>Total</b>		<b>6</b>
<i>Technical Electives - Choose 3 credits from the list</i>		
Professional Internship	IDS 3949	0-4 <b>or</b>
Engineering Professional Internship	EGN 3941	0-4
Directed Independent Research in Engineering and Computer Science (6)	EGN 4915	1-3
For pre-med students, choose biology lab and organic chemistry lab for 3 credits		
<b>Total</b>		<b>3</b>
<b>Total Program</b>		<b>120</b>

**Notes:**

1. Contributes to University Core Curriculum.
2. Contributes to Writing Across Curriculum (Gordon Rule) writing.
3. General Education Program courses, totaling 6 credits, must be selected to satisfy Writing Across Curriculum (Gordon Rule) writing requirements.
4. Contributes to Gordon Rule mathematics.
5. Includes a 1-credit laboratory.
6. Grading: S/U.
7. PHY 2048, General Physics for Engineers 1 (4 credits) is an acceptable substitute, but only 3 credits will apply toward the degree.

**Internships**

Biomedical Engineering students are strongly encouraged to gain practical experience through

participation in internship opportunities. However, internships require prior approval from the department and coordinated with the Career Center (EGN 3941, Engineering Professional Internship). For more information, contact the FAU Career Center at 561-297-3533 or visit [www.fau.edu/cdc](http://www.fau.edu/cdc).

## **ANY MAJOR IN THE COLLEGE (B.S.) TO BIOMEDICAL ENGINEERING BACHELOR OF SCIENCE (B.S.) TO MASTER OF SCIENCE (M.S.) COMBINED PROGRAM**

Bachelor of Science candidates in any College of Engineering and Computer Science program with a cumulative GPA of at least 3.25 at the end of their junior year are eligible to apply to the combined program, which allows students to complete their bachelor's, as well as a master's in Biomedical Engineering, within approximately five years. After application and admittance to the graduate program at the beginning of their senior year, up to 12 credits of approved graduate-level courses (5000 level or higher) may be taken and counted toward both the B.S. and M.S. degrees as long as the combined program totals a minimum of 150 credits:

1. The student has met the minimum 120 credits for the bachelor's degree; and
2. The student has taken a minimum of 30 credits in 5000 level or higher courses for the master's program.

Students must retain a cumulative GPA of 3.25 by the time of graduation. Thesis and Non-Thesis options are available. See below for master's program admission and degree requirements.

## **BIOMEDICAL ENGINEERING MASTER OF SCIENCE (M.S.)**

### **Admission Requirements**

All applicants must submit official transcripts from all previous postsecondary institutions attended. Applicants for admission will be evaluated on an individual basis and must satisfy the following requirements. Students with non-engineering bachelor's degrees, click [here](#) for additional requirements.

1. International students from non-English-speaking countries must be proficient in written and spoken English as evidenced by a score of at least 500 (paper-based test) or 213 (computer-based test) or 79 (Internet-based test) on the Test of English as a Foreign Language (TOEFL) or a score of at least 6.0 on the International English Language Testing System (IELTS);
2. A baccalaureate degree in Biology, Chemistry, Physics, Computer Science or Engineering with a mathematics background through Calculus 2 or calculus with basic differential equations.\*

3. A minimum GPA of 3.0 (of a possible 4.0 maximum) in Science, Mathematics and Engineering courses;

\* Students whose backgrounds are not in the disciplines noted should expect to take additional coursework.

### **Submission of Plan of Study**

Graduate students are required to submit a Plan of Study when they have completed between 9 and 15 credits of coursework with a minimum cumulative GPA of 3.0. A student may not register for thesis credits prior to submitting a Plan of Study.

### **Degree Requirements**

Students must satisfy all of the University graduate requirements. In addition, the following specific degree requirements apply, depending on the choice of degree program:

#### **Thesis Option (30 credits)**

1. Requires 6 credits of orally defended thesis. The M.S. committee is chaired by the student's thesis advisor. The chair of the committee must be a graduate faculty member from any department within the College of Engineering and Computer Science.
2. Requires 24 credits of approved graduate coursework (5000 level or higher) of which 12 credits are program core courses and the remaining 12 credits are approved elective courses offered by the College of Engineering and Computer Science and the Charles E. Schmidt College of Science.
3. No 4000-level course is allowed toward the degree. Courses taken to make up for deficiencies will not be counted toward the degree.
4. Must complete one semester of CGS 5937, Graduate Seminar (0 credits) with grade of Satisfactory ("S").

**Note:** No more than 3 credits of directed independent study may be applied toward the master's degree with thesis option.

#### **Non-Thesis Option (30 credits )**

1. Requires 30 credits of approved coursework of which 12 credits are program core courses and the remaining 18 credits are approved elective courses offered by the College of Engineering and Computer Science and the Charles E. Schmidt College of Science.
2. No 4000-level course is allowed toward the degree. Courses taken to make up for deficiencies will not be counted toward the degree.
3. Must complete one semester of CGS 5937, Graduate Seminar (0 credits) with grade of

Satisfactory ("S").

**Note:** No more than 3 credits of directed independent study may be applied toward the master's degree non-thesis option.

### Deficiency Requirements in the M.S. in Biomedical Engineering Program

It is expected that students successfully complete a course in Genetics or Molecular Genetics (PCB 4522 or PCB 3063 at FAU or equivalent) at any time during their MSBE studies. The lack of this course will be considered a deficiency. Students are expected to take the necessary course during their course program as an extra load beyond the regular graduate coursework. A genetics course must be completed prior to enrollment into the Special Topics (Advanced Biotechnology Lab) core course.

Students who have had no computer programming coursework during their B.S. studies are required to take any undergraduate programming course (such as COP 2220, Programming 1, to satisfy this deficiency. The requirement must be satisfied prior to taking any of the following core courses: BME 5742, Biosystems Modeling and Control or BME 6762, Bioinformatics: Biomedical Engineering Perspectives.

Furthermore, an advisor's approval is required for students not having the required mathematics background.

### Program Core Courses (12 credits)

Introduction to Biomedical Engineering	BME 5000
Biosystems Modeling and Control	BME 5742
Bioinformatics: Biomedical Perspectives	BME 6762 <b>or</b>
Data Mining and Machine Learning	CAP 6673
Laboratory Methods in Biotechnology	BSC 6408L

### Deficiency Requirements (not counted in the total program credits)

Genetics	PCB 3063
Introduction to Programming in Python	COP 3035

### Bioinformatics Concentration

As part of the Biomedical Engineering master's program, students may pursue the Bioinformatics concentration option. To accomplish this, the following two courses must be taken to count as Biomedical Engineering, Computer Science and Engineering electives.

---

### **Bioinformatics Concentration Core Courses - 6 credits**

---

Data Structures and Algorithms for Bioinformatics	CAP 5548
Introduction to Data Science	CAP 5768

---

Students in the Bioinformatics concentration must also take at least three courses from the following table to count as Biomedical Engineering, Computer Science and Engineering electives. Additional courses may be used as replacements to the listed courses with prior approval of the department.

---

### **Bioinformatics Concentration Semi-Core Courses - 9 credits**

---

Algorithms in Bioinformatics	BME 6765
Computational Genomics	CAP 6517
Databases for Bioinformatics	CAP 6547
Artificial Intelligence in Medicine and Healthcare	CAP 6683
Data-Driven Engineering	CAP 6805

---

Bioinformatics concentration students take either an additional Biomedical Engineering, Computer Science or Engineering course or a free elective to fulfill the requirements of the Biomedical Engineering master's program.

### **Electives**

**Thesis Option** (12 credits of elective courses as follows):

At least 9 credits from the Advising Sheet list of Engineering and Computer Science or Science Biomedical Engineering courses (such as Tissue Engineering, Stem Cell Engineering, Biomaterials, Introduction to Microfluidics and BioMEMS, Introduction to Robotics, NanoBiotechnology, Robotic Applications and Orthopedic Biomechanics, Medical Imaging, Bio-Signal Processing and Bioinformatics).

Up to 3 elective credits of approved Engineering and Computer Science or Science coursework may be added (courses such as Digital Signal Processing, Digital Image Processing, Machine Learning and Artificial Intelligence, Modern Control, Advanced Database Systems, Nanotechnology, Cellular and Molecular Neuroscience, Systems and Integrative Neuroscience or a directed independent study course).

**Non-Thesis Option** (18 credits of elective courses as follows):

At least 9 credits from the Advising Sheet of Engineering and Computer Science or Science Biomedical Engineering courses (such as Tissue Engineering, Stem Cell Engineering, Biomaterials, Introduction to Microfluidics and BioMEMS, Introduction to Robotics, NanoBiotechnology, Robotic Applications and Orthopedic Biomechanics, Medical Imaging, Bio-Signal Processing and Bioinformatics).

Up to 9 elective credits of approved Engineering and Computer Science or Science coursework may be added (courses such as Digital Signal Processing, Digital Image Processing, Machine Learning and Artificial Intelligence, Modern Control, Advanced Database Systems, Nanotechnology, Cellular and Molecular Neuroscience, Systems and Integrative Neuroscience, Immunology, Biology of Cancer, or an additional directed independent study course).

Up to 6 elective credits may be free elective courses (not included on the Biomedical Engineering Advising Sheet) subject to approval of the Biomedical Engineering Program Advisor.

## **BIOMEDICAL ENGINEERING GRADUATE CERTIFICATE**

*(Minimum of 15 credits required)*

The College offers a graduate non-degree-seeking certificate in Biomedical Engineering. This certificate program is a practice-oriented, part-time graduate program designed to assist engineers, scientists, technical professionals and qualified senior undergraduates in the launch and/or development of their careers and to provide the technical expertise needed in the rapidly changing business, government and industrial environments.

### **Program Highlights**

This is a 15-credit graduate non-degree-seeking certificate program focused on the application of engineering and computer science principles to biotechnology, bioinformatics and biosystems. It is designed for engineers and scientists working in the biotechnology, pharmaceutical, health care, drug

discovery, biomedical, medical instrumentation and allied sectors.

### **Admission Requirements**

The applicant must satisfy the following criteria:

1. A bachelor's degree in biology, chemistry, physics or engineering with a mathematics background through Calculus 2 or calculus with basic differential equations. Qualified senior undergraduates may be accepted into the graduate certificate program with appropriate committee recommendation;
2. GPA of 3.0 in science, mathematics and engineering courses;
3. No GRE scores are necessary. Student transcripts should demonstrate competency in science, mathematics and engineering coursework.

### **Certificate Requirements**

1. PCB 3063, Genetics, (or an equivalent course) as a deficiency requirement with a minimum grade of "C";
2. Biomedical Engineering courses (9 credits) such as Introduction to Biomedical Engineering, Biosystems Modeling and Control, Bioinformatics: Biomedical Engineering Perspectives, Tissue Engineering, Stem Cell Engineering, Biomaterials, Introduction to Microfluidics and BioMEMS, Introduction to Robotics, NanoBiotechnology, Robotic Applications and Orthopedic Biomechanics, Medical Imaging and Bio-Signal Processing;
3. Science courses (6 credits) relevant to Biomedical Engineering such as Special Topics (Advanced Biotechnology Lab), Bioinformatics, Cellular and Molecular Neuroscience, and Systems and Integrative Neuroscience;
4. The grade point average of the above 15 credits must be 3.0 or better;
5. All courses must be at the 5000 and 6000 levels.

## **OCEAN AND MECHANICAL ENGINEERING**

### **Faculty:**

Beaujean, P. P. J.; Chair; Abtahi, H.; An, P.; Cai, G. Q.; Carlsson, L. A.; Curet, O.; Davidson, J. B., Emeritus; Dhanak, M.; Du, S. E.; Elishakoff, I.; Engeberg, E. D.; Hartley, C. S., Emeritus; Hartt, W. H., Emeritus; Hashemi, J.; Jurewicz, J. T., Emeritus; Kang, Y.; Kim, M.; LeBlanc, L. L., Emeritus; Lin, Y. K., Emeritus; Mahfuz, H.; Masory, O.; Merk, V.; Moslemian, D.; Nayak, A.; Presuel-Moreno, F.; Salivar, G. C.; Schock, S.; Stevens, K. K., Emeritus; Su, T. C.; Tennant, J. S., Emeritus; Tsai, C. T.; VanZwieten, J.; Verma, S.

The Department of Ocean and Mechanical Engineering offers programs of study leading to the following degrees:

**Ocean Engineering:** Bachelor of Science in Ocean Engineering (B.S.O.E.), Master of Science (M.S.) with major in Ocean Engineering (thesis and non-thesis options), Master of Science (M.S.) with major in Ocean Engineering and minor in Business, and Doctor of Philosophy (Ph.D.) with major in Ocean Engineering.

**Mechanical Engineering:** Bachelor of Science in Mechanical Engineering (B.S.M.E.), Master of Science (M.S.) with major in Mechanical Engineering (thesis and non-thesis options), Master of Science (M.S.) with major in Mechanical Engineering and minor in Business, Master of Science (M.S.) with major in Mechanical Engineering and minor in Engineering Management, and Doctor of Philosophy (Ph.D.) with major in Mechanical Engineering.

To encourage undergraduates to pursue a graduate education, the department also offers [joint B.S.O.E. to M.S.](#) and [joint B.S.M.E. to M.S.](#) degree programs that permit students to complete both a bachelor's and a master's degree within five years. A [B.S.M.E. to M.S. in Artificial Intelligence](#) combined program is also available. Two additional combined degree programs, [B.A. or B.S. in Biological and Physical Sciences to M.S. in Ocean or Mechanical Engineering](#), are offered in partnership with the [Wilkes Honors College](#).

## BACHELOR'S PROGRAM

### **OCEAN ENGINEERING** **BACHELOR OF SCIENCE (B.S.)**

*(Minimum of 127 credits required)*

The Ocean Engineering program provides a comprehensive, practical curriculum in science and engineering that prepares the student to perform engineering tasks in the ocean environment. Graduates of this program are prepared for professional positions in industry and government or for graduate studies in engineering. At the lower-division level, the program requires a firm foundation in English composition and grammar, mathematics and chemistry, plus courses in the social sciences and arts and humanities to give the student a balanced educational background for the engineering profession. This coursework is provided in the pre-engineering or pre-ocean engineering (university parallel) programs of community or state colleges and the lower-division pre-engineering programs of most universities.

The Ocean Engineering program includes integrated courses encompassing the basic engineering sciences and mathematics, study of the ocean environment and its relationship to other sciences and engineering, processing of ocean engineering data, the engineering design of components and systems for use in the ocean and the application of these elements to the solution of engineering problems connected with work in or on the ocean and in developing the resources of the oceans.

Emphasis is placed on the solution of engineering problems related to the ocean in such areas as underwater acoustics, marine vehicles, environmental engineering, fluid mechanics, structures and materials. An optional Cooperative Work Study program that provides practical experience in industry or government laboratories is available to students who qualify.

Engineering design is an important part of the program, including a significant design experience. Seniors complete the final year of their program in an oceanside environment at SeaTech, the department's Institute for Ocean and Systems Engineering on the Dania Beach campus.

The Ocean Engineering program at FAU was designated a "State University System Program of Distinction" by the Board of Regents in October 1974. The designation was one of the five originally made throughout the entire state system. Founded in 1965 as the first such undergraduate program in

the nation, the Ocean Engineering program at FAU is still one of the largest in the country.

### **Mission Statement and Program Goal**

The Ocean Engineering program's mission is to provide an outstanding ocean engineering program for learning and research and to prepare individuals to meet national and international engineering challenges in the ocean environment.

The goal of the program is to develop and offer a comprehensive and broad curriculum in science and engineering that prepares a student to, upon graduation, effectively perform engineering tasks in the ocean environment or to successfully pursue higher studies and research in engineering.

### **Ocean Engineering Program Educational Objectives**

Graduates of the Ocean Engineering baccalaureate program at the Florida Atlantic University, within a few years after graduation, will:

1. Demonstrate the ability to carry out engineering tasks in the multidisciplinary field of ocean engineering;
2. Make meaningful contributions in terms of design, development and integration of engineering systems, particularly for applications in the ocean environment;
3. Pursue further study for the graduate degree and/or participate in professional societies;
4. Develop and exhibit leadership qualities in their engineering work;
5. Understand various complexities and issues of the contemporary society and make professional contributions in the larger and long-term interest of the society.

### **Educational Outcomes for Student Performance**

The program will meet the above objectives by establishing the following educational outcomes for student performance. At the time of graduation, the students will attain the following:

1. An ability to identify, formulate and solve complex engineering problems by applying principles of engineering, science and mathematics;
2. An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety and welfare, as well as global, cultural, social, environmental and economic factors;
3. An ability to communicate effectively with a range of audiences;
4. An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental and societal contexts;
5. An ability to function effectively on a team whose members together provide leadership, create a

collaborative and inclusive environment, establish goals, plan tasks and meet objectives;

6. An ability to develop and conduct appropriate experimentation, analyze and interpret data and use engineering judgment to draw conclusions;
7. An ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

### **Academic Advising**

It is an Ocean Engineering program requirement that all students, including incoming freshmen, meet with their Ocean Engineering academic advisor every semester prior to registering for classes.

### **Admission and Degree Requirements**

All students must meet the minimum admission requirements of the University. Please refer to the [Admissions section](#) of this catalog.

All students must meet the preprofessional requirements listed [above](#) in order to be accepted into the Ocean Engineering program.

Transfer students who have an A.A. degree are expected to have completed the following course requirements (deficiencies may be taken at FAU); see the [Degree Requirements](#) section of this catalog for the required minimum grades.

### **Prerequisite Coursework for Transfer Students**

Students transferring to Florida Atlantic University must complete both lower-division requirements (including the requirements of the General Education Program) and requirements for the college and major. Lower-division requirements may be completed through the A.A. degree from any Florida public college, university or community college or through equivalent coursework at another regionally accredited institution. Before transferring and to ensure timely progress toward the baccalaureate degree, students must also complete the prerequisite courses for their major as outlined in the [Transition Guides](#) .

All courses not approved by the Florida Statewide Course Numbering System that will be used to satisfy requirements will be evaluated individually on the basis of content and will require a catalog course description and a copy of the syllabus for assessment.

### **Graduation Requirements**

1. Students who enter Florida Atlantic University as freshmen must meet all baccalaureate degree requirements of the University, including the [General Education Program requirements](#). Students who transfer to FAU with 30 or more accepted credits must meet all baccalaureate degree

requirements of the University, including the [General Education](#) and [Gordon Rule requirements](#).

- Students must maintain an overall 2.0 grade point average in all courses. A grade of "C" or better must be received in all engineering, mathematics, chemistry and physics courses required for the degree. A grade of "C" or better means a grade of "C" or "C+" and excludes a grade of "C-." Courses taken as pass/fail will not be accepted for any required Ocean Engineering courses.

A subsequent course may not be taken if a required grade of "C" or better is not earned in the prerequisite course. With appropriate justification, a prerequisite waiver may be granted by the Ocean Engineering petitions committee. Prerequisite and corequisite courses must be taken in the proper sequence.

- Students must satisfy the following curriculum requirements; however, since the curriculum is subject to revision, students should check with the Ocean Engineering program for the latest requirements.

RI: Ocean Engineering Systems Control and Design	EOC 4804	3
RI: Ocean Engineering Systems Control and Design Laboratory	EOC 4804L	4

***Choose one of the following four junior elective courses:***

Innovative Sensing and Actuation Technology	EGN 4670C	3
Directed Independent Research in Engineering and Computer Science	EGN 4915	3
Finite Element Analysis for Engineering Design	EGM 4350	3
Professional Internship	IDS 3949	3

***Choose two of the following four courses:***

Ocean Structures	EOC 4412	3
Ship Hydrodynamics	EOC 4124	3
Underwater Acoustics	EOC 4307C	3
Marine Materials and Corrosion	EOC 4201C	3

**Non-Engineering Core**

*(grade of "C" or higher required)*

Engineering Graphics	EGN 1111C	3
Oceanography	OCE 3008	3

The courses during the last year of study are taught at the SeaTech campus in Dania Beach. Students may not deviate from either the courses defined or the sequence of courses defined for the Ocean Engineering curriculum. In exceptional cases, deviations may be approved in advance by petition to the Ocean Engineering petitions committee. Courses taken in violation of this policy cannot be counted toward the Bachelor of Science in Ocean Engineering degree.

### Internship Programs

Internships are available at marine industries and naval research laboratories. Although an internship is not a requirement of the Bachelor of Science in Ocean Engineering degree program, students are strongly encouraged to make use of this opportunity and complete an internship prior to their senior year. For information, students should contact their Ocean Engineering academic advisor.

## CERTIFICATE PROGRAMS

### AEROSPACE ENGINEERING UNDERGRADUATE CERTIFICATE

*(Minimum of 15 credits required)*

The undergraduate certificate in Aerospace Engineering, offered by the Ocean and Mechanical Engineering Department, is designed to combine broad engineering disciplines with knowledge of engineering principles specific to aerospace engineering. This 15-credit program supports students wishing to work in aerospace companies and government agencies, such as the National Aeronautics and Space Administration.

## Curriculum

To earn this certificate, a student must successfully complete the following 15 credits:

**1. Three courses (9 credits) in the field of aerospace engineering:**

Aerodynamics	EAS 4101	3
Flight Dynamics	EAS 4105	3
Principles of Turbomachinery	EML 4401	3 <b>or</b>
Turbomachinery	EML 6402	3

**2. A faculty-mentored design/research project with elements of aerospace engineering (3 credits), carried out either as part of:**

RI: Design Project	EML 4551	3 <b>or</b>
Directed Independent Research in Engineering and Computer Science	EGN 4915	3

**3. One course (3 credits) from the following:**

Finite Element Analysis for Engineering Design	EGM 4350	3
Engineering Materials 1	EGN 3365	3
Dynamic Systems	EGN 4432	3
Fluid Mechanics	EML 3701	3
Applied Thermal-Fluid Systems	EML 4127	3
Machine Design	EML 4500	3

## BIOMEDICAL ENGINEERING UNDERGRADUATE CERTIFICATE

*(Minimum of 15 credits required)*

The undergraduate certificate in Biomedical Engineering, offered by the Ocean and Mechanical Engineering Department, is designed to integrate broad engineering disciplines with interdisciplinary knowledge of science and healthcare specific to biomedical engineering. The main mission of this 15-credit program is to educate and prepare students in the fields of biomedical engineering, science and healthcare such that they can be placed in the best medical, graduate and industry positions across the globe.

## Curriculum

To earn this certificate, a student must successfully complete the following 15 credits:

1. **Three courses (9 credits) in the field of biomedical engineering:**

Biomaterials	BME 4100	3 <b>or</b>
Biomaterials	BME 6105	3
Introduction to Microfluidics and BioMEMS	BME 4581	3 <b>or</b>
Advanced Topics in Microfluidics and BioMEMS	BME 6585	3
Neural Engineering	BME 4361	3

2. **A faculty-mentored design/research project with elements of biomedical engineering (3 credits), carried out either as part of:**

RI: Design Project	EML 4551	3 <b>or</b>
Directed Independent Research in Engineering and Computer Science	EGN 4915	3

3. **One course (3 credits) from the following:**

Intermediate Strength of Materials	EGM 4523C	3
Engineering Materials 1	EGN 3365	3
Fluid Mechanics	EML 3701	3

## MARINE MATERIALS AND OFFSHORE ENGINEERING UNDERGRADUATE CERTIFICATE

*(Minimum of 15 credits required)*

The undergraduate certificate in Marine Materials and Offshore Engineering, offered by the Ocean and Mechanical Engineering Department, is designed to combine broad engineering disciplines with knowledge of engineering principles specific to materials and structures. This 15-credit program supports the preparation of students to work at ocean engineering/maritime companies and governmental agencies that specialize in marine materials and offshore structures.

To earn this certificate, a student must successfully complete the following:

Strength of Materials	EGN 3331	3
<b>Two courses (6 credits) in the field of engineering materials and structures</b>		
Marine Materials and Corrosion	EOC 4201C	3
Ocean Structures	EOC 4412	3
<b>One course (3 credits) from the following list</b>		
Professional Internship (in a related area)	IDS 3949	3
Finite Element Analysis for Engineering Design	EGM 4350	3
Directed Independent Research in Engineering and Computer Science	EGN 4915	3
Introduction to Ocean Instrumentation	EOC 4620	3 or
Ocean Instrumentation	EOC 6625	3
<b>A faculty-mentored design/research project with elements of marine materials and offshore engineering (3 credits)</b>		
RI: Ocean Engineering Systems Control and Design	EOC 4804	3

## NAVAL ARCHITECTURE UNDERGRADUATE CERTIFICATE

*(Minimum of 15 credits required)*

This undergraduate certificate in Naval Architecture, offered by the Ocean and Mechanical Engineering Department, is designed to combine broad engineering disciplines with knowledge of engineering principles specific to naval architecture. This 15-credit program supports the preparation of students to work at ocean engineering/maritime companies and governmental agencies that specialize in ship design and naval architecture.

To earn this certificate, a student must successfully complete the following 15 credits:

Ocean Wave Mechanics	EOC 4422	3
<b>Two courses (6 credits) in the field of naval architecture from the following list</b>		
Ship Hydrodynamics	EOC 4124	3 <b>or</b>
Hydrodynamic Aspects of Ship Design	EOC 6515	3
Ocean Structures	EOC 4412	3 <b>or</b>
Offshore Structures	EOC 6431	3
Introduction to Ship Structural Design	EOC 4510	3 <b>or</b>
Ship Structural Design	EOC 6516	3
<b>One course (3 credits) from the following list</b>		
Professional Internship (in a related area)	IDS 3949	3
Finite Element Analysis in Engineering Design	EGM 4350	3
Directed Independent Research in Engineering and Computer Science	EGN 4915	3
Introduction to Ocean Instrumentation	EOC 4620	3 <b>or</b>
Ocean Instrumentation	EOC 6625	3
<b>A faculty-mentored design/research project with elements of naval architecture (3 credits)</b>		
RI: Ocean Engineering Systems Control and Design	EOC 4804	3

## ROBOTICS ENGINEERING

## UNDERGRADUATE CERTIFICATE

*(Minimum of 15 credits required)*

The undergraduate certificate in Robotics Engineering, offered by the Ocean and Mechanical Engineering Department, is designed to combine broad engineering disciplines with knowledge of engineering principles specific to robotics engineering. This 15-credit program supports the preparation of students to work at a broad range of engineering companies.

### Curriculum

To earn this certificate, a student must successfully complete the following 15 credits:

**1. Three courses (9 credits) in the field of robotics engineering:**

Innovative Sensing and Actuation Technologies	EGN 4670C	3
Industrial Automation	EIN 5603C	3
Introduction to Robotics	EML 4800	3
Mechatronics	EML 4804C	3

**2. A faculty-mentored design/research project with elements of robotics engineering (3 credits), carried out either as part of:**

RI: Design Project	EML 4551	3 or
Directed Independent Research in Engineering and Computer Science	EGN 4915	3

**3. One course (3 credits) from the following:**

Engineering Materials 1	EGN 3365	3
Mechanical Control System	EML 4312	3
Machine Design	EML 4500	3

## UNDERWATER ACOUSTICS UNDERGRADUATE CERTIFICATE

*(Minimum of 15 credits required)*

The undergraduate certificate in Underwater Acoustics, offered by the Ocean and Mechanical Engineering Department, is designed to combine broad engineering disciplines with knowledge of engineering principles specific to underwater acoustics. The program supports the preparation of students to work at companies and governmental agencies that specialize in underwater acoustics.

To earn this certificate, a student must successfully complete the following 15 credits:

---

**Two courses (6 credits) in the field of underwater acoustics from the following list**

Acoustics for Ocean Engineers	EOC 3306	3
-------------------------------	----------	---

Underwater Acoustics	EOC 4307C	3 or
----------------------	-----------	------

Ocean and Seabed Acoustics	EOC 6312	3
----------------------------	----------	---

---

**One course (3 credits) from the following list**

Ship Hydrodynamics	EOC 4124	3 or
--------------------	----------	------

Hydrodynamic Aspects of Ship Design	EOC 6515	3
-------------------------------------	----------	---

Ocean Structures	EOC 4412	3 or
------------------	----------	------

Offshore Structures	EOC 6431	3
---------------------	----------	---

---

**One course (3 credits) from the following list**

Professional Internshp	IDS 3949	3
------------------------	----------	---

Finite Element Analysis in Engineering Design	EGM 4350	3
---	----------	---

Directed Independent Research in Engineering and Computer Science	EGN 4915	3
---	----------	---

Introduction to Ocean Instrumentation	EOC 4620	3 or
---------------------------------------	----------	------

Ocean Instrumentation	EOC 6625	3
-----------------------	----------	---

---

**A faculty-mentored design/research project with elements of underwater acoustics (3 credits)**

RI: Ocean Engineering Systems Control and Design	EOC 4804	3
--	----------	---

## COMBINED PROGRAMS

**BIOLOGICAL AND PHYSICAL SCIENCES TO MECHANICAL ENGINEERING**  
**BACHELOR OF ARTS (B.A.) OR BACHELOR OF SCIENCE (B.S.) TO MASTER**  
**OF SCIENCE (M.S.)**  
**COMBINED PROGRAM**

**BIOLOGICAL AND PHYSICAL SCIENCES TO OCEAN ENGINEERING**  
**BACHELOR OF ARTS (B.A.) OR BACHELOR OF SCIENCE (B.S.) TO MASTER**  
**OF SCIENCE (M.S.)**  
**COMBINED PROGRAM**

The B.A. or B.S. degree is completed at the [Wilkes Honors College](#) (WHC), and students then receive their bachelor's degree from WHC. Students complete their master's degree work in one of two majors in the Department of Ocean and Mechanical Engineering in the College of Engineering and Computer Science (COECS) and receive their master's degree from COECS.

These combined programs are offered in partnership with the Wilkes Honors College:

B.A. or B.S. with Major in Biological and Physical Sciences to M.S. with Major in [Mechanical Engineering](#)

B.A. or B.S. with Major in Biological and Physical Sciences to M.S. with Major in [Ocean Engineering](#)

Details for each combined program are listed in the [Wilkes Honors College](#) section.

**OCEAN ENGINEERING**  
**BACHELOR OF SCIENCE IN OCEAN ENGINEERING (B.S.O.E.) TO MASTER**  
**OF SCIENCE (M.S.)**  
**COMBINED PROGRAM**

The Department of Ocean and Mechanical Engineering offers a combined Bachelor of Science in Ocean Engineering to Master of Science degree program. For students taking the thesis or non-thesis option, up to 12 credits of graduate coursework (5000 level or higher) in the B.S.O.E. program may be counted for both the B.S.O.E. and M.S. degrees. With an approximate duration of five years, this combined program provides an attractive way for students to continue their graduate work.

### Prerequisite Coursework for Transfer Students

Students transferring to Florida Atlantic University must complete both lower-division requirements (including the requirements of the General Education Program) and requirements for the college and major. Lower-division requirements may be completed through the A.A. degree from any Florida public college, university or community college or through equivalent coursework at another regionally accredited institution. Before transferring and to ensure timely progress toward the baccalaureate degree, students must also complete the prerequisite courses for their major as outlined in the *Transition Guides*.

All courses not approved by the Florida Statewide Course Numbering System that will be used to satisfy requirements will be evaluated individually on the basis of content and will require a catalog course description and a copy of the syllabus for assessment.

### **Admission Requirements**

To be eligible for the joint B.S.O.E./M.S. program, students should:

1. Have an overall GPA of above 3.0 and a GPA of above 3.25 in the last 60 credits of coursework completed at the time of admission. The GPA must be maintained until graduation from the B.S. degree;
2. Formally apply to the joint program, completing the admissions process at least one semester prior to the beginning of the M.S. portion of their program;
3. Choose either the thesis or non-thesis option for the M.S. part of the program.

Once admitted to the program, students begin taking graduate courses in their senior year that would apply to both the bachelor's and master's degree programs. A maximum of 12 credits of elective courses can be applied to both programs. Students in the joint program must maintain enrollment to remain in good standing. Students must also meet all the degree requirements of the graduate program, including core courses and prerequisites. Those students who complete the M.S. degree program within one year after the completion of their B.S.O.E. degree program will be presented with a certificate of recognition.

## **MASTER'S PROGRAM**

[Link to graduate certificates](#)

The graduate program is structured around a core of courses central to ocean engineering and encompassing the subjects of acoustics, corrosion, physical oceanography, hydrodynamics, advanced mechanics of materials, marine systems and advanced mathematics. This core provides, at an advanced

level, the fundamentals required for engineering work in the ocean environment. Additional courses in the fields of acoustics, hydrodynamics, marine materials, offshore structures, coastal engineering and marine vehicles are offered to enable students to pursue areas of interest. A summer program is offered by the department for graduate students attending on a year-round basis.

### **Financial Aid**

Most full-time graduate students in the department receive financial support, usually in the form of graduate assistantships. Graduate assistants normally work on research projects conducted in the department, and their project work usually serves as a basis for their thesis/dissertation. Teaching Assistantships also may be available.

From time to time, graduate assistants are assigned to help a faculty member conduct a course, but direct teaching assignments are not permitted and regular lecture assignments should not be anticipated. Departures from this rule may be considered only for exceptional students with demonstrated teaching abilities.

Several graduate assistantships are available each year and are awarded on the basis of the technical area of interest, the applicant's experience, overall academic record and letters of recommendation. The current stipends for assistantships are \$17,000 for master's students and \$22,000 for Ph.D. students, after admittance to candidacy, for 12 months of service on a half-time basis, plus tuition costs.

### **Application for Admission**

Students are encouraged to begin their graduate studies in the fall semester. Applications for admission should be initiated about one year in advance of the desired starting date and should be filed as early as possible, preferably in the early fall. Normally notification of admission is given several weeks after receipt of the completed application. Depending upon the student's background, certain preparatory courses may be required to make up for deficiencies before full admission to the program is granted. These courses may be taken at FAU.

Application material for admission to the degree programs in Ocean Engineering can be obtained by:

1. Accessing [www.fau.edu/graduate/](http://www.fau.edu/graduate/)

2. Sending a request to:

Florida Atlantic University

Graduate College, SU 80, Room 101

777 Glades Road, P.O. Box 3091

Boca Raton, Florida 33431-0991

3. Sending a request to:

Graduate Program Administrative Assistant

Department of Ocean and Mechanical Engineering, Bldg. 36, Rm. 182

777 Glades Road, P.O. Box 3091

Boca Raton, Florida 33431-0991

## **OCEAN ENGINEERING MASTER OF SCIENCE (M.S.)**

Three paths to the Master of Science with major in Ocean Engineering are available to graduate students. Students with non-engineering bachelor's degrees, click [here](#) for additional requirements. The Master of Science with major in Ocean Engineering is available in person and fully online.

### **Thesis Option**

The thesis option requires a minimum of 30 credits, including a minimum of 6 thesis credits. At least 15 of the credits must be taken from the Ocean Engineering core course list (see core course requirements section). In addition, 9 credits will be selected in consultation with the student's advisor. At least 15 of the 30 credits must be at the 6000 level. Students electing the thesis option will be required to complete the thesis program, which includes successful defense and completion of the thesis.

### **Non-Thesis Option**

This option requires a minimum of 30 credits. At least 15 of the credits must be taken from the Ocean Engineering core course list (see core course requirements section). In addition, 15 credits will be selected in consultation with the student's advisor. No thesis credits may be counted toward this degree. All 30 credits must be at or above the 5000 level.

### **Master of Science with a Business Minor Option**

A non-thesis option, this program leads to a master's degree along with a minor in Business Administration. It requires a total of 36 credits. At least 15 of the credits must be taken from the Ocean Engineering core course list (see core course requirements section). In addition, 6 credits relating to the student's area of focus in ocean engineering must be selected and 15 credits must be selected from the College of Business approved course list outlined under the [Business Minor](#) heading at the beginning of this College section.

The [Admissions](#) and [Degree Requirements](#) sections of this catalog contain statements of regulations that apply to all graduate students. Of particular interest is the information under the headings Graduate

Admission Regulations and Graduate Degree Requirements. Statements referring to foreign language requirements do not apply to Ocean Engineering students; neither the Master of Science nor the Ph.D. degree requires foreign language proficiency.

## Admission Requirements

Specific admission requirements for Ocean Engineering are more stringent than the general FAU graduate admissions requirements.

A candidate for the master's program in Ocean Engineering must satisfy the following entry requirements:

1. A baccalaureate or equivalent degree in Engineering, Science or Mathematics;
2. A 3.0 (on a 4.0 scale) GPA or better in the last 60 credits of undergraduate work;
3. Must demonstrate proficiency in both written and spoken English. Students from non-English-speaking countries are required to take the Test of English as a Foreign Language (TOEFL) and achieve a score of at least 550 (paper-based) or 213 (computer-based) or 79 (iBT);
4. All students will have a thesis or advisory committee during their studies. For thesis students, their advisor is the chair of the advisory committee. A thesis or advisory committee must be formed before a plan of study can be filed;
5. Students who enter the program without an assistantship will be assigned a mentor by the chair of the graduate committee. Students without an advisor are required to visit at least three faculty members during their first semester requesting to form an advisory committee. A report on the outcome of the faculty visits must be filed with the campus graduate coordinator;
6. Adherence to the policies and regulations and the graduate admission requirements of the University as outlined in this University catalog;
7. Conditional admission may be permitted if the above requirements are not met.

## Degree Requirements

The degree of Master of Science with major in Ocean Engineering will be awarded to candidates who have:

1. Complied with University graduate policies and regulations;
2. Satisfied the University's graduate degree requirements;
3. Satisfactorily completed the appropriate courses of study;
4. Must complete one semester of EML 5937, Graduate Seminar (0 credits) with grade of Satisfactory ("S");

***And for the thesis option:***

- Submitted and defended a thesis based on the student's original work in an area of focus.

***And for the non-thesis or minor in business options:***

- At the time of application for degree, students must submit a portfolio to their advisor consisting of four graduate projects from courses in their program of study. The portfolio will be reviewed by the student's supervisory committee.

**Program Options and Core Course Requirements**

Four program options are available to graduate students in Ocean Engineering with either the thesis or non-thesis option. These are shown in a subsequent section.

All graduate students, regardless of option or specialty, must complete the following core courses or must take a satisfactory substitute course of similar content from another university or offer an appropriate substitute consistent with the student's specialty for approval by the supervisory committee by departmental petition.

**Core - 15 credits**

Mathematical Methods in Ocean Engineering 1*	EOC 5172
--	----------

Engineering Data Analysis	EOC 6635
---------------------------	----------

Physical Aspects of Oceanography	OCP 6050
----------------------------------	----------

***In addition, two of the following five courses must be taken:***

Advanced Strength of Materials**	EGM 6533
----------------------------------	----------

Special Topics	EOC 6934
----------------	----------

Advanced Hydrodynamics 1	EOC 6185
--------------------------	----------

Corrosion 1	EOC 6216C
-------------	-----------

Engineering Principles of Acoustics	EOC 6317C
-------------------------------------	-----------

**Thesis Option - 15 credits*****Thesis - 6 credits***

Master's Thesis (may be taken over multiple terms)	EOC 6971
--	----------

---

***Electives - 9 credits***

---

Select 9 credits at the 5000 or 6000 level from the College of Engineering and Computer Science or the College of Science

---

**Non-Thesis Option - 15 credits**

---

***Electives - 15 credits***

---

Select 15 credits at the 5000 or 6000 level from the College of Engineering and Computer Science or the College of Science

\* Students with an advanced mathematics competency may obtain exemption upon entrance to the program for Mathematical Methods in Ocean Engineering 1 (EOC 5172) and/or Mathematical Methods in Ocean Engineering 2 (EOC 6174). These students must demonstrate to their advisor, using course descriptions, that the equivalent of five to six courses beyond calculus, including areas such as differential equations, advanced calculus, matrix theory, complex analysis and probability and statistics have been taken. Approval by the graduate programs committee is also required.

\*\* May be substituted with EOC 6934, Special Topics (Theory of Elasticity)

**Transfer Credits**

A maximum of 9 credits of graduate-level work earned at FAU as an undergraduate or while in non-degree status at FAU and a maximum of 6 credits earned at another recognized institution prior to admission to the Ocean Engineering graduate program may be transferred to a student's degree program subject to the following restrictions:

1. The student must present a transcript identifying the course, in which the student has earned a grade of "B" or better, along with a catalog/course description.
2. The course must not have been counted toward any other graduate or undergraduate degree awarded or to be awarded to the student. An exception exists in the B.S.O.E. to M.S. program where up to 9 credits (5000 level or higher) may be counted for both degrees.
3. The student's advisor and the Ocean and Mechanical Engineering graduate program coordinator, who may seek the advice of other faculty if needed, will decide whether to accept or reject the course credit.

**Recency of Credits**

No credit earned ten or more years before the degree is awarded may be counted toward a graduate degree.

### **Course Load**

All students choosing the thesis option and receiving financial assistance must be full-time students. This requires that they are registered for a minimum of 9 credits in the fall semester, 9 credits in the spring semester and 6 credits in the summer semester. All international students must be registered as full-time students. A maximum of 12 credits may be taken in a semester. In the graduation semester, the student may be allowed to take 1 credit.

### **Supervisory Committee**

All graduate students will be assigned an academic advisor who will assist the student in planning a course schedule for the program and will also approve all course selections, schedules and schedule changes.

By the end of the first semester or at the completion of 9 credits, the student, in consultation with the academic advisor, should make the following selections:

1. A particular program option. If selecting a thesis program, then:
  - a. Chair of the supervisory committee.
  - b. At least two other members for the supervisory committee.

The chair of the supervisory committee, who is normally the student's advisor, and at least two of the other members must be chosen from the Ocean and Mechanical Engineering faculty. Members from outside the department may be chosen for the supervisory committee with the permission of the department chair. The student should obtain the consent of other members to serve on the supervisory committee. Having obtained this permission, the names of the committee members should be submitted to the department chair. The committee acts as a unit to guide the student's degree program.

### **Plan of Study**

Students choosing the thesis option as part of the M.S. program should, as soon as practical after the selection of a supervisory committee, must complete a formal Plan of Study, which will include all course and thesis work that the student expects to complete for the M.S. degree. Students submit their Plans of Study electronically for approval using the MyPOS system.

The Plan of Study must be submitted no later than the end of the second semester. Upon approval of the plan, the student will be admitted to candidacy for the M.S. Degree. The student is required to defend his/her thesis proposal before the end of the third semester.

For students electing the non-thesis option, the Plan of Study must still be completed and submitted to the Graduate College. For both the thesis and non-thesis options, it is required that the admission to candidacy form be completed and submitted at least one semester prior to the semester in which the student expects to graduate.

### **Fast Track Program**

The Department of Ocean and Mechanical Engineering offers an accelerated program option for the Master of Science with major in Ocean Engineering (with thesis) for qualified students who will be supported under research assistantships. The accelerated program allows a student to complete an M.S. degree in 12 months.

The objective of this option is to provide an opportunity for the student to earn a master's degree in one year, which translates into significant reductions in both time and expense, thus allowing the student to enter the workforce sooner, minimizing the financial impact of pursuing an M.S. degree. In order to achieve this goal, the program of study and thesis work must be well defined prior to the student starting the program of study. In addition to the normal requirements, students with an engineering core GPA of 3.5 or better, in conjunction with their prospective graduate studies academic advisor, are invited to submit a letter of intent to the graduate committee for consideration to be admitted into this program. The letter of intent should include an outline of the project and milestones to be reached by the end of each semester. Students admitted into the accelerated option are allowed to take a maximum of 12 credits per semester.

### **Thesis Work and Progress Reviews**

For those students who elect the thesis option, the first step, to be completed by the end of the third semester of full-time enrollment, is the submission of a written thesis proposal to the supervisory committee. This proposal must be approved by the supervisory committee before the student begins extensive work in the selected research area. In the proposal defense, the student presents and defends, as required, the planned research. Each semester after the proposal defense the committee will review the student's progress.

If at any time the progress in the student's research is found to be unsatisfactory, the supervisory committee will report to the department chair, inform the student in writing as to the nature of the difficulties and record the committee's opinion in the student's file. The student will then be given ample opportunity to improve performance and defend the student's position at a further review meeting held at the end of the semester. If no improvement has been demonstrated, the student's future program, including the continuation of stipend and tuition waiver, will be re-evaluated.

A minimum of two weeks prior to the anticipated thesis defense, the written thesis must be delivered to the department in the format described in the Graduate Thesis and Dissertation Guidelines. The guidelines may be obtained from the Graduate College or from the Ocean Engineering program. An announcement stating the thesis topic and time and location of the defense will be provided to all department faculty and to the supervisory committee members one week prior to the scheduled defense. The announcement will also be posted in the department and/or mailed to all Ocean and Mechanical Engineering faculty, staff and students.

### **Unsatisfactory Performance**

A graduate student whose academic performance is deemed unsatisfactory will be denied further registration in the department programs. Unsatisfactory academic performance is defined as failure to maintain a minimum 3.0 GPA in all FAU graduate program courses at the end of the second semester in the program (this would normally be 15 to 18 credits) or after any subsequent semester. Please note that this is more strict than the University requirement. A student who exhibits unsatisfactory performance in the Ocean Engineering graduate program is not precluded from applying to another program in the University. No graduate credit may be earned for courses completed with a "C-," "D+," "D," "D-," "F" or "U" (refer to the [Academic Policies and Regulations section](#) of this catalog), even if grades in other courses bring the average up to a satisfactory level. A student who withdraws from a course after the Drop/Add period may be required to repay any tuition benefits received.

### **Master of Science Course Options**

The following are suggested course sequences for the four Master of Science (M.S.) thesis options. When suggested course(s) are not offered, equivalent course(s) as determined by the student's advisor may be taken. Although some of these program options recommend more than eight courses, students are required to take only eight courses (24 credits) to meet the minimum requirements.

## **Marine Materials and Offshore Structures**

**CERTIFICATE PROGRAMS****AEROSPACE ENGINEERING  
GRADUATE CERTIFICATE***(Minimum of 12 credits required)*

The State of Florida, because of its geographic location, NASA and a large number of aerospace engineering companies in the area will benefit from graduates of this certificate program. The 12-credit program can be completed on campus or online. The certificate requires satisfactory completion of four, 3-credit courses.

**Admission**

The Aerospace Engineering certificate program is open to students who have a B.S. degree in a related field of engineering, a GPA of at least 3.0 or equivalent and have satisfied all the prerequisites for each course in the program. All courses must be completed with a GPA of 3.0 or better. Certificate courses are listed in the table below; additional courses may be approved by the advisor.

**Required Courses (12 credits)*****Core Courses***

Advanced Fluid Dynamics	EML 6716	3
-------------------------	----------	---

Special Topics (Principles of Aerodynamics)	EML 6930	3
---	----------	---

***Elective Courses (Select two of the courses below)***

Introduction to Finite Element Methods	EGM 5351	3
--	----------	---

Advanced Strength of Materials	EGM 6533	3
--------------------------------	----------	---

Mechanics of Composite Materials	EGM 6562	3
----------------------------------	----------	---

Fracture Mechanics	EML 6239	3
--------------------	----------	---

Advanced Engineering Dynamics	EML 6271	3
-------------------------------	----------	---

Turbomachinery	EML 6402	3
----------------	----------	---

Computational Fluid Dynamics	EOC 6189	3
------------------------------	----------	---

## **CORROSION GRADUATE CERTIFICATE**

*(Minimum of 12 credits required)*

The State of Florida, because of its geographic location on the Atlantic Ocean and Gulf of Mexico, is especially impacted by corrosion-related issues. However, the number of engineers with special expertise in corrosion or with an advanced degree in corrosion is not on track to satisfy the need for such experts. This online certificate program requires satisfactory completion of four of five 3-credit courses, all of which are already offered online and through the Division of Engineering Distance Education and Career Services (DEDECS).

**Admission**

The Corrosion certificate is open to students who have a B.S. degree in a related field of Engineering, have a GPA of at least 3.0 or equivalent (to ensure equivalency to graduate standing) and have satisfied all the prerequisites required for each course in the program. Four of the five courses listed, including Corrosion 1 and 2, are required for the certificate and must be completed with a GPA of 3.0 or better. All course materials are in English; all international students must demonstrate proficiency in English

to enter the program.

---

### Certificate Courses

*(Choose four of the five courses below, including 6216C and 6218C)*

Advanced Fracture and Failure Processes 1	EOC 6157	3
Corrosion 1	EOC 6216C	3
Corrosion 2	EOC 6218C	3
Physical Metallurgy	EOC 6230	3
Offshore Structures	EOC 6431	3

## OFFSHORE ENGINEERING GRADUATE CERTIFICATE

*(Minimum of 12 credits required)*

In the United States, there are fewer than ten programs that offer graduate degrees in Ocean Engineering. Recent trends and future needs point to increased demand for Ocean Engineers, particularly in the oil and gas industries, offshore industry and clean energy sectors. This online certificate program fulfills the need for Ocean Engineers with an easily accessible curriculum through the Division of Engineering Distance Education and Career Services (DEDECS).

### Admission

The Offshore Engineering certificate is open to students who have a B.S. degree in a related field of Engineering, have a GPA of at least 3.0 or equivalent (to ensure equivalency to graduate standing) and have satisfied all the prerequisites required for each course in the program. Four of the six courses listed below must be completed with a GPA of 3.0 or better. All course materials are in English; all international students must demonstrate proficiency in English to enter the program.

---

### Certificate Courses

*(Choose four of the six courses below)*

Advanced Strength of Materials	EGM 6533	3
Advanced Hydrodynamics 1	EOC 6185	3

Corrosion 1	EOC 6216C	3
Engineering Principles of Acoustics	EOC 6317C	3
Offshore Structures	EOC 6431	3
Hydrodynamic Aspects of Ship Design	EOC 6515	3

## DOCTORAL PROGRAM

### OCEAN ENGINEERING DOCTOR OF PHILOSOPHY (PH.D.)

The degree of Doctor of Philosophy with major in Ocean Engineering is conferred on a candidate by the University upon completion of comprehensive training and in recognition of the candidate's ability to independently and efficiently pursue research in ocean engineering.

The requirements for the degree include performing original research, preparing a dissertation describing this research and systematic advanced studies in engineering and the underlying sciences. This section discusses the details of the degree regulations.

#### Admission Requirements

Applicants must have a master's degree in Engineering, Science or Mathematics from an accredited college or university. A student with outstanding scholastic achievement who holds only a baccalaureate degree may be admitted directly to the Ph.D. program. See later section for requirements.

1. Applicants must have a 3.0 GPA (on a 4.0 scale) or better in the last 60 credits of work attempted and must have an official transcript forwarded directly to the FAU Graduate College from each college-level institution attended;
2. Applicants must submit the Graduate Record Examination (GRE) score. GRE scores more than five years old will not be accepted. The GRE requirement is waived for applicants who have a master of science degree from FAU's Ocean and Mechanical Engineering Department;
3. Applicants must demonstrate proficiency in both written and spoken English. A student from a non-English-speaking country is required to take the Test of English as a Foreign Language (TOEFL) and achieve a score of at least 550 (paper-based) or 213 (computer-based) or 79 (iBT);
4. Applicants must submit to the Graduate College at least two letters of recommendation attesting to the student's ability to pursue with distinction a curriculum of advanced study and research in a

chosen area;

5. Applicants should abide by the policies and regulations and the graduate admission requirements of the University as outlined in this University Catalog;
6. Conditional admission may be permitted if the above conditions are not met.

## Degree Requirements

The degree of Doctor of Philosophy in Ocean Engineering will be conferred on candidates who have fulfilled the following requirements:

1. Completed a minimum of 42 credits of course and dissertation work after the M.S. degree for students transferring 30 credits (72 credits for those admitted to the Ph.D. directly after the B.S. degree). Of the 42 credits, 18 credits must be coursework;
2. Of the 18-credit minimum of coursework, at least 12 credits must be from the Ocean, Mechanical\*, Civil\* or Geomatics\* Engineering programs. No more than 3 credits of directed independent study or Ocean or Mechanical Engineering Research may be used to satisfy the 18-credit minimum;
3. A minimum of 24 dissertation credits. No more than 30 dissertation credits may be counted toward the total credit requirement for the Ph.D. degree. Students admitted to the Ph.D. degree program directly after the B.S. degree program must take a minimum of 30 dissertation credits;
4. Must complete two semesters of EML 5937, Graduate Seminar (0 credits) with grade of Satisfactory ("S");
5. A major program of research and advanced studies in ocean engineering;
6. Unless otherwise stated, a minimum of 9 credits in advanced mathematics or equivalent beyond the B.S. degree;
7. Successful completion of General Examination 1, a written comprehensive examination of coursework;
8. Successful completion of General Examination 2, a dissertation proposal defense;
9. Prior to the defense, the student is required to have published or have accepted for publication a refereed research paper in a field of study deemed acceptable by the dissertation committee. A journal article is preferred, but a peer-reviewed conference paper is also acceptable;
10. Submitted and defended a dissertation based on original research in the student's area of specialization. The supervisory committee, the department chair and the Graduate College must have approved the dissertation;
11. Complied with the University's Graduate Policies and Regulations and satisfied the University's Graduate Degree Requirements.

\* Only available for the Sustainable Infrastructure Engineering option.

## Core Course Requirements

All graduate students, regardless of option or specialty, must complete the following core courses or must offer a satisfactory substitute course of similar content from another university or an appropriate substitute consistent with the student's specialty preference for approval by the supervisory committee.

### Core Courses - 15 credits

*Select 9 credits from the following:*

Mathematical Methods in Ocean Engineering 1	EOC 5172
Engineering Data Analysis	EOC 6635
Physical Aspects of Oceanography*	OCP 6050 <b>or</b>
Offshore Structures	EOC 6431

*In addition, two of the following courses must be taken:*

Advanced Hydrodynamics 1	EOC 6185
Corrosion 1	EOC 6216C
Engineering Principles of Acoustics	EOC 6317C
Special Topics	EOC 6934
Advanced Strength of Materials*	EGM 6533 <b>or</b>
Introduction to Finite Element Methods*	EGM 5351 <b>or</b>
Finite Element Methods in Civil Engineering*	CES 6119
Infrastructure Maintenance and Management*	CGN 6616
Special Topics	CGN 6930

### Electives - 3 credits *(for students entering with a master's degree)*

Select 3 credits at the 5000 or 6000 level from the College of Engineering and Computer Science or the College of Science

### Dissertation - 24 credits (minimum) For students entering with a master's degree.

Dissertation <i>(may be taken over multiple terms)</i>	EOC 7980
--	----------

\* Only available for the Sustainable Infrastructure Engineering option.

## **Transfer Credits**

The doctoral program may accept for transfer 6 credits beyond the baccalaureate degree from other institutions to the student's degree program upon approval by the department and subject to the following restrictions:

1. The student must present a transcript identifying the course in which the student has earned a grade of "B" or better, along with a catalog/course description;
2. The course must not have been counted toward any other graduate or undergraduate degree awarded or to be awarded to the student;
3. The student's advisor and the Ocean Engineering graduate program committee, who may seek the advice of other faculty if needed, will decide whether to accept or reject the course credit;
4. Obtaining credit for a non-FAU course does not alter the total number of credits required for graduation;

Additional credits consistent with University policy may be considered for transfer subject to the restrictions above, if approved by the student's advisor.

## **Recency of Credits**

No credit earned ten or more years before the degree is awarded may be counted toward a graduate degree.

## **Course Load**

Full-time graduate students are those who register for 9 or more credits during the fall and spring semesters and 6 credits during the summer. Students who wish to register for more than 15 credits for any semester must obtain approval in advance from the Graduate College. All students receiving financial assistance must satisfy these requirements, and all international students must be full-time students. In the graduating semester, the student may be allowed to take 1 credit.

## **Residency Requirements**

Candidates must satisfy the minimum residency requirement for the Ph.D. by completing beyond the master's degree either (1) 18 credits in one calendar year, or (2) 24 credits in no more than two calendar years on the SeaTech or Boca Raton campus of FAU. To satisfy University requirements, two semesters must be full-time, consisting of 9 credits in the spring or fall term and 6 credits in the summer term.

Candidates may be permitted to conduct all or part of their research in the field, in government or industrial laboratories or elsewhere off campus only if adequate staff, dissertation research supervision and facilities, as determined by the department, are available.

### Program Options

Students who wish to specialize in specific Ocean Engineering programs may pursue in-depth studies in the areas of marine materials, offshore structures and corrosion; hydrodynamics and physical oceanography; marine vehicles; acoustics and vibrations, and sustainable infrastructure engineering. Unless otherwise stated, the Ocean Engineering program graduate courses are 3 credits each, and all programs require a minimum of 9 credits in graduate-level mathematics or equivalent.

When suggested elective courses as listed in the following sections are not offered, equivalent courses as determined by the student's supervisory committee may be taken.

### Marine Materials, Offshore Structures and Corrosion An Option in Ocean Engineering

It is suggested that students in the Marine Materials and Corrosion Option take the following courses in addition to the core courses required for all Ocean Engineering Ph.D. students.

Advanced Fracture and Failure Processes 1	EOC 6157
Corrosion 1	EOC 6216C
Corrosion 2	EOC 6218C
Physical Metallurgy	EOC 6230
Special Topics (Theory of Elasticity)	EOC 6934

*Depending on a student's area of thesis research, elective courses may be chosen from, but are not necessarily limited to, the following:*

Advanced Topics in Physical and Theoretical Chemistry	CHM 6581
Introduction to Finite Element Methods	EGM 5351

Advanced Strength of Materials	EGM 6533
Mechanics of Composite Materials	EGM 6562
Fracture Mechanics	EML 6239
Signal Processing	EOC 6630
Special Topics (Nanostructured Materials)	EOC 6934

### **Hydrodynamics and Physical Oceanography An Option in Ocean Engineering**

It is suggested that students in the Hydrodynamics and Physical Oceanography Option take the following courses in addition to the core courses required for all Ocean Engineering Ph.D. students.

Advanced Hydrodynamics 1	EOC 6185
Turbulent Flow	EOC 6190

*Depending on a student's area of focus, the elective courses may be chosen from the following list together with other courses offered by the Ocean Engineering Department:*

Mathematical Methods in Ocean Engineering 2	EOC 6174
Hydrodynamic Aspects of Ship Design	EOC 6515
Special Topics (Ship Structural Design; Flow Control)	EOC 6934

### **Marine Vehicles An Option in Ocean Engineering**

In addition to the core requirements, recommended courses include those below.

Intelligent Underwater Vehicles 1	EOC 6663
Special Topics (Elements of High Speed Marine Vehicles)	EOC 6934

Other courses that may be taken will be determined by the student's area of study.

## Acoustics and Vibrations

### An Option in Ocean Engineering

It is recommended that students in the Acoustics and Vibrations Option take the following courses in addition to the core courses required for all Ocean Engineering Ph.D. students.

Mechanical Vibrations	EML 6223
Advanced Hydrodynamics 1	EOC 6185
Ocean and Seabed Acoustics	EOC 6312
Signal Processing	EOC 6630
Special Topics	EOC 6934

Depending on the student's area of focus, elective courses may be chosen from the courses offered by the department as well as from supporting departments such as Civil Engineering, Computer Engineering, Electrical Engineering, Mathematics, Mechanical Engineering and Physics.

## Sustainable Infrastructure Engineering

### An Option in Ocean Engineering

It is recommended that students in the Sustainable Infrastructure Engineering Option take two more elective courses, as approved by the dissertation advisor, in addition to the [core courses required for all Ocean Engineering Ph.D. students](#). This program requires a minimum of 3 credits in graduate-level mathematics or equivalent.

Depending on the student's area of focus, elective courses may be chosen from the courses offered by the Ocean Engineering as well as from supporting departments such as Civil Engineering, Computer Engineering, Electrical Engineering, Mathematics and Statistics, Mechanical Engineering and Physics.

## Supervisory Committee

In consultation with the student and the advisor, a supervisory committee will be nominated by the department chair, approved by the dean of the College of Engineering and Computer Science and appointed by the Graduate College.

The supervisory committee shall consist of no fewer than four members selected from the Ocean and Mechanical Engineering faculty. Additional members can be from the Ocean and Mechanical

Engineering Department, other departments, other universities or from industry.

The committee will include at least one person selected from the faculty from outside the discipline of the student's major. If the student elects or is required to select a minor, this member of the supervisory committee shall represent the discipline selected as the minor.

The supervisory committee should be appointed as soon as possible after the student has passed General Examination 1 and, in general, no later than the end of the second year of equivalent full-time study. Duties of the supervisory committee include:

1. To ensure that the student is aware of all regulations governing the degree. It should be noted, however, that this does not absolve the student of the responsibility of making inquiries regarding the regulations and procedures;
2. To discuss and approve the proposed course of study, dissertation research project and the student's plans for its execution;
3. To conduct and take part in the General Examination 2. No fewer than four faculty members shall be present for the General Examination 2, which must be given on campus;
4. To meet following General Examination 2 to review the research progress, the expected results and make suggestions for completion of the program;
5. To meet on campus when the dissertation is completed and conduct the final oral examination to assure that the dissertation is original research and a contribution to knowledge. No fewer than four faculty members shall be present with the candidate for this examination, but only members of the official supervisory committee are required to sign the dissertation. The supervisory committee must approve the dissertation;
6. To review the student's dissertation carefully. Before signing, each committee member must be sure that it is free of grammatical, editorial or technical errors.

### **Plan of Study and Admission to Candidacy**

Admission to the doctoral program at FAU does not automatically constitute admission to candidacy for the degree. A Plan of Study for the Ph.D. degree must be submitted to the Graduate College before the end of the second semester of enrollment. Students submit their Plans of Study electronically for approval using the MyPOS system.

The Graduate College will admit a student to candidacy for the Doctor of Philosophy degree after the following conditions have been met:

1. Admission to graduate school to work toward the doctoral degree;

2. Successful completion of the General Examination 1 (Ph.D. Qualifying Exam);
3. Selection of a dissertation faculty advisor and the formation of a supervisory committee;
4. Formulation and submission of a program of study that is approved by the department;
5. Recommendation of the supervisory committee and department chair.

**Note:** Students may not enroll for Ph.D. dissertation credits (EOC 7980) until they have been admitted to candidacy.

Following the successful completion of General Examination 1, the student must complete and submit the form "Admission to Candidacy for the Doctoral Degree (Form 8)." General Examination 1 and submission of admission to candidacy form should be completed at least two semesters before the beginning of the semester in which the degree is to be conferred. A student not admitted to candidacy before the beginning of the fourth academic year of graduate work at the University must petition through the College to the Graduate College for permission to register for additional work.

### **Coursework and Research**

The work for the Ph.D. degree must consist of research and advanced studies in ocean engineering. The student who previously obtained a master's degree will be required to complete a total of 42 credits of course and dissertation work for the Ph.D. At least 12 of the credits must be taken from the Ocean Engineering list of courses and all core course requirements must be satisfied. A minimum of 24 credits of doctoral dissertation research will be required. No more than 30 dissertation credits may be counted toward the 42-credit requirement. The remaining credits may be selected from the listing of OE courses, advanced mathematics courses, elective courses, directed independent study (DIS) or dissertation. A minimum of 9 credits of graduate-level mathematics must be satisfied.

### **B.S. to Ph.D. Program**

A student with outstanding scholastic achievement who holds only a baccalaureate degree (B.S.) may be admitted directly to the Ph.D. program in Ocean Engineering. The student with a B.S. will be required to complete a total of 72 credits of course and dissertation work for the Ph.D. Out of the minimum of 42 credits of graduate coursework, at least 27 of the credits must be taken from the Ocean Engineering list of courses, and all core course requirements must be satisfied. A minimum of 30 credits of doctoral dissertation research will be required. No more than 39 dissertation credits may be counted toward the 72-credit requirement. The remaining credits may be selected from the listing of OE courses, advanced mathematics courses, elective courses, directed independent study (DIS) or EML 6918, Advanced Research. A minimum of 9 credits of graduate-level mathematics must be satisfied.

## General Examination 1

Students entering the Ph.D. program with a master's degree are expected to take the General Examination 1 (Ph.D. Qualifying Examination) after completing their second semester. The primary purpose of General Examination 1 is to evaluate the student's ability, not only to demonstrate a thorough knowledge of Ocean Engineering course material but also to evaluate original thinking. General Examination 1 will be in three parts: Part 1 covers the core courses, Part 2 covers the elective subjects and Part 3 is a pre-proposal that consists of a written paper and an oral examination.

Students with a GPA more than or equal to 3.5 on all courses selected for the General Exam 1 (with a GPA more than or equal to 3.3 [B+] in each class) are exempt from Part 1 and Part 2. (These students will be required to take a written examination only for those topics with a GPA of 3.0 [B grade] or below.) For non-exempt students (i.e., GPA less than 3.5), Part 1 will consist of an exam on the three core courses, which will be four hours in duration and will require four problems to be answered. Part 2 (electives exam) will be a three-hour exam and will require one problem from each elective to be answered. A new set of examinations will be prepared and questions and problems from previous examinations are not available to students. It is expected that the examination on the elective courses will focus on the student's area of specialization.

All Ph.D. graduate students need to prepare a pre-proposal (Part 3). The pre-proposal (or different name) will consist of an oral presentation and a written paper based on several articles selected by a committee (including the advisor). The student will identify knowledge gap(s) and complete a literature review (with guidance from the advisor). During the presentation, questions will be limited to those that help demonstrate knowledge important to the research topic/area.

An overall grade of 70 percent on Part 1 and Part 2 of General Examination 1 and a passing grade in the pre-proposal constitutes successfully completing General Examination 1. If the student fails any of the parts, the student will have one more opportunity to successfully pass the exam. The student must score 70 percent in each subject that is retaken. Alternatively the student may retake the entire exam when it is next offered. General Examination 1 is scheduled immediately after the last day of the final examination period in the fall semester and in the spring semester each year. The pre-proposal can be defended during the last two months of the semester, including the week after the final exam period, if the advisor indicates the student is ready.

Students who have obtained the M.S. in Ocean Engineering at FAU will be allowed to take General Examination 1 at the end of the first semester, if the student has completed the pre-proposal. Otherwise, General Examination 1 must be taken no later than at the end of the second semester of Ph.D. study. Those admitted to the Ph.D. program directly after the B.S. degree in Ocean Engineering at FAU may

take the examination after completing 24 credits of graduate coursework.

## **General Examination 2**

At an appropriate point in the student's graduate studies, normally within 12 months of passing General Examination 1, the student must complete General Examination 2. This is the dissertation proposal defense, in which students defend the choice of a dissertation topic and answer questions on fundamental issues related to their research. The student must have passed General Examination 1, selected the dissertation topic, formed a supervisory committee and completed a literature survey prior to the dissertation proposal defense.

In General Examination 2, the student should be prepared to demonstrate the ability to perform research on a topic approved by the supervisory committee by presenting a comprehensive literature survey combined with a critical analysis of the state of the art in the particular field. While this examination will be centered around the particular research area, it will not necessarily be limited to that subject. If unsuccessful in the examination, the student may, at the discretion of the department, either remain in the doctoral program and retake the examination at a later date or withdraw from the program. No more than two attempts will be permitted.

## **Dissertation and Progress Reviews**

Following successful completion of the dissertation proposal defense (General Examination 2), the student is expected to engage in an intensive program of coursework and doctoral dissertation based on a major, original research project. During each subsequent semester, the student's supervisory committee will review the progress. If at any time the student's progress in the research is found to be unsatisfactory, the supervisory committee will report to the department chair, inform the student in writing as to the nature of the difficulties and record the committee's opinion in the student's file. The student will then be given ample opportunity to improve performance and defend the student's position at a further review meeting held at the end of the semester. If no improvement has been demonstrated, the student's future program, including the continuation of stipend and tuition waiver, may be reconsidered.

By the beginning of the semester in which the degree is to be conferred, a candidate for the Doctor of Philosophy degree must deliver a draft of the dissertation to the supervisory committee. Not less than two weeks after the submission of the first draft of the dissertation, the candidate is expected to give a seminar covering the results of the research; this seminar will be followed by a dissertation examination by the supervisory committee. The seminar should be given as early as possible, but not later than two months before the degree is to be conferred.

The Ph.D. dissertation final version must be approved by the supervisory committee and department chair and submitted to the dean of the College of Engineering and Computer Science at least one week prior to the due date for submission to the Graduate College. The candidate is responsible for allowing sufficient time for members of the supervisory committee to examine the dissertation. The dissertation must be delivered to the department in the format described in the Graduate Thesis and Dissertation Guidelines. The guidelines may be obtained at the Graduate College or from the Ocean Engineering program.

Upon receiving approval of the Graduate College and following completion of all other University requirements, the degree will be recommended. Application for the degree must be made one semester before the semester of graduation.

### **Unsatisfactory Performance**

A graduate student whose performance is deemed unsatisfactory will be denied further registration in the department programs.

Unsatisfactory performance is defined as failure to maintain a minimum 3.0 GPA in all FAU graduate program courses at the end of the second semester in the program (this should normally constitute 15 to 18 credits) or after any subsequent semester.

Please note that this is more strict than the University requirement. A student who exhibits unsatisfactory scholarship in the Ocean Engineering graduate program is not precluded from applying to another program in the University. No graduate credit may be earned for courses completed with a "C-" or lower even if grades in other courses bring the average to a satisfactory level. A student who withdraws from a course after the Drop/Add period may be required to repay any tuition benefits received.

## **MECHANICAL ENGINEERING**

Mechanical Engineering is the branch of engineering that is most directly and broadly concerned with mechanical systems and their use to control and transform energy for the benefit of humankind.

Mechanical engineering embraces the science and art of the generation, transmission and utilization of thermal and mechanical energy and the design, production and application of devices and systems.

The Department of Ocean and Mechanical Engineering offers programs of study leading to the degrees

of Bachelor of Science in Mechanical Engineering (B.S.M.E.), Master of Science (M.S.) with major in Mechanical Engineering (thesis and non-thesis options), Master of Science (M.S.) with major in Mechanical Engineering and minor in Business, Master of Science (M.S.) with major in Mechanical Engineering and minor in Engineering Management, and Doctor of Philosophy (Ph.D.) with major in Mechanical Engineering.

To encourage undergraduates to pursue a graduate education, the department also offers a [combined B.S.M.E. in Mechanical Engineering to M.S. in Artificial Intelligence](#) degree program and [combined B.S.M.E. to M.S. degree programs](#) that permit a student to complete both a bachelor's and a master's degree within five years. Two combined degree programs, [B.A. or B.S. in Biological and Physical Sciences to M.S. in Ocean or Mechanical Engineering](#), are offered in partnership with the [Wilkes Honors College](#).

### **Mission Statement**

The mission of the Mechanical Engineering program is to provide undergraduate students with the fundamental background necessary for a career in mechanical engineering and for the continuation of their education through postgraduate studies. For graduate students, the department strives to provide the in-depth background necessary for advanced work in mechanical engineering and to continue their education at the doctoral level. All students are prepared to conduct basic and applied research and to provide service to the engineering profession and the community.

### **Educational Objectives**

The faculty has established three educational objectives for graduates as they progress through their careers:

- A. **Career Contribution and Advancement:** Through their ability to solve engineering problems, meaningful design and hands-on experiences, critical thinking skills, and training in teamwork and communication, graduates will make significant contributions to their chosen field and advance professionally in mechanical engineering or allied disciplines.
- B. **Professionalism:** Graduates will act with both professional and social responsibility in their career field, including a commitment to protect both occupational and public health and safety, and apply ethical standards related to the practice of engineering.
- C. **Life-Long Learning:** Graduates will understand that their undergraduate education was just the beginning of their training and will continue to develop their knowledge and skills through progress toward or completion of graduate education, and/or professional development through short courses or seminars, and/or professional certification and/or participation in professional societies.

## **Educational Outcomes for Student Performance**

The program will meet the above objectives by establishing the following educational outcomes for student performance.

At the time of graduation, the students will attain the following:

1. An ability to identify, formulate and solve complex engineering problems by applying principles of engineering, science and mathematics;
2. An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety and welfare, as well as global, cultural, social, environmental and economic factors;
3. An ability to communicate effectively with a range of audiences;
4. An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental and societal contexts;
5. An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks and meet objectives;
6. An ability to develop and conduct appropriate experimentation, analyze and interpret data and use engineering judgment to draw conclusions;
7. An ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

### ***Upon graduation, graduate students will be able to:***

1. Demonstrate an ability to perform research and/or perform advanced engineering analysis in their area of specialty;
2. Formulate and analyze engineering problems and synthesize and develop appropriate solutions based on fundamental and advanced principles;
3. Design mechanical systems to meet desired specifications using advanced engineering tools and techniques.

### ***Upon graduation, doctoral students will be able to:***

1. Perform original research in their area of specialty;
2. Demonstrate an advanced level of knowledge in mathematics and engineering fundamentals relevant to their discipline;
3. Effectively communicate an advanced technical concept to their peers.

[Link to Doctoral Program](#)

## BACHELOR'S PROGRAM

### **MECHANICAL ENGINEERING BACHELOR OF SCIENCE (B.S.)**

*(Minimum of 128 credits required)*

Mechanical engineering is an extensive field, and it is necessary for every student to attain considerable knowledge in the mechanical, thermal and material sciences. The program allows for special areas of interest through a sufficient number of technical electives in areas such as mechanical design, energy conservation, controls, environmental control, materials science, computer-aided design and others.

To make a significant contribution to society, both as mechanical engineers and as individuals, students must pursue studies in the humanities and social sciences to better understand their relationship and responsibility to society. The student must develop the ability to apply knowledge to the analysis and solution of significant engineering problems through courses in engineering design.

Because mechanical engineering is such a broad field, the program of study forms an excellent background for professional careers in many fields.

#### **Admission Requirements**

All students must meet the minimum admission requirements of the University. Please refer to the [Admissions section](#) of this catalog.

All students must meet the preprofessional requirements listed [above](#) in order to be accepted into the Mechanical Engineering program.

#### **Prerequisite Coursework for Transfer Students**

Students transferring to Florida Atlantic University must complete both lower-division requirements (including the requirements of the General Education Program) and requirements for the college and major. Lower-division requirements may be completed through the A.A. degree from any Florida

public college, university or community college or through equivalent coursework at another regionally accredited institution. Before transferring and to ensure timely progress toward the baccalaureate degree, students must also complete the prerequisite courses for their major as outlined in the [Transition Guides](#) and below.

All courses not approved by the Florida Statewide Course Numbering System that will be used to satisfy requirements will be evaluated individually on the basis of content and will require a catalog course description and a copy of the syllabus for assessment.

Transfer students who have an A.A. degree are expected to have completed the following course requirements (deficiencies may be taken at FAU); see the [Degree Requirements section](#) of this catalog for the required minimum grades.

	<b>Minimum No. of Subject Credits</b>
English Composition	6
Social Science	6
Humanities	6
Calculus (complete sequence)	12
General Physics with Calculus (complete sequence with Lab)	8
Differential Equations	3
Computer Programming	3
General Chemistry (with Lab)	4
Fundamentals of Engineering	3
Graphics	3
Electives	6
<b>Total</b>	<b>60</b>

Electives may include a course in health, speech, additional humanities or additional social science.

Consult an advisor for assistance in selecting the appropriate course(s).

## General Degree Requirements

The Bachelor of Science in Mechanical Engineering degree will be awarded to students who meet the following requirements:

1. Meet all general degree requirements of the University;
2. Attain a grade of "C" or better in each mathematics, science and computers course listed below, in each mechanical engineering core course listed below, in the electrical engineering course listed below, in each Writing Across Curriculum (Gordon Rule) and Gordon Rule computational course and in each of the departmentally approved technical electives below;
3. Satisfy the following specific degree requirements, which total 128 credits.

## Specific Degree Requirements

### *General Education Program\**

Foundations of Written Communication	6
Foundations of Society and Human Behavior	6
Foundations of Global Citizenship	6
Foundations of Humanities	6

\* Four-year students must meet specific course requirements as outlined in the Baccalaureate Degree Requirements subsection in the [Degree Requirements section](#) of this catalog.

### Electives

9 credits (minimum) of departmentally approved technical electives. Students are required to have one design credit in the technical electives as identified in the approved list in the advising manual.

Directed independent study (DIS) may be used as credit toward one technical elective in the student's program with approval of the faculty advisor and the department chair.

### Sample Four-Year Program of Study for Bachelor of Science in Mechanical Engineering

#### First Year, Fall (14 credits)

College Writing 1*	ENC 1101	3
Calculus with Analytic Geometry 1	MAC 2311	4
General Chemistry 1	CHM 2045	3
General Chemistry 1 Lab	CHM 2045L	1
Fundamentals of Engineering	EGN 1002	3

<b>Total</b>		<b>128</b>

\* Course meets Writing Across Curriculum (Gordon Rule) requirements.

\*\* Courses may be selected from the appropriate portion of the [General Education Program](#).

### Cooperative Education

Students in the Mechanical Engineering program are encouraged to consider gaining practical experience through participation in Cooperative Education. Three, one-semester periods of Cooperative Education (EML 4949) may be substituted for one program technical elective. For information, contact the FAU Career Center, 561-297-3533 or visit its website at [www.fau.edu/cdc](http://www.fau.edu/cdc).

## COMBINED PROGRAMS

### **BIOLOGICAL AND PHYSICAL SCIENCES TO MECHANICAL ENGINEERING BACHELOR OF ARTS (B.A.) OR BACHELOR OF SCIENCE (B.S.) TO MASTER OF SCIENCE (M.S.) COMBINED PROGRAM**

The B.A. or B.S. degree is completed at the [Wilkes Honors College](#) (WHC), and students then receive their bachelor's degree from WHC. Students complete their master's degree work in one of two majors in the Department of Ocean and Mechanical Engineering in the College of Engineering and Computer Science (COECS) and receive their master's degree from COECS.

These combined programs are offered in partnership with the Wilkes Honors College:

B.A. or B.S. with Major in Biological and Physical Sciences to M.S. with Major in [Mechanical Engineering](#)

B.A. or B.S. with Major in Biological and Physical Sciences to M.S. with Major in [Ocean Engineering](#)

Details for each combined program are listed in the [Wilkes Honors College](#) section.

### **MECHANICAL ENGINEERING TO ARTIFICIAL INTELLIGENCE BACHELOR OF SCIENCE IN MECHANICAL ENGINEERING (B.S.M.E.) TO MASTER OF SCIENCE (M.S.) COMBINED PROGRAM**

The College of Engineering and Computer Science (COECS) offers a combined Bachelor of Science in

Mechanical Engineering to Master of Science in Artificial Intelligence degree program. The [Bachelor of Science in Mechanical Engineering](#) degree is completed and received from the Ocean and Mechanical Engineering (OME) department. Students complete the [Master of Science in Artificial Intelligence](#) in the Department of Electrical Engineering and Computer Science.

The bachelor's degree with major in Mechanical Engineering requires a minimum of 128 credits. This combined program requires two extra leveling courses for the M.S. in Artificial Intelligence: COP 3035, Introduction to Programming in Python, and COP 3410, Data Structures and Algorithm Analysis with Python. Students must take the leveling courses at the beginning of the graduate program. The two leveling courses do not qualify for financial aid. The graduate degree requires a minimum of 30 credits at the graduate level. This program does not increase the number of credits in the undergraduate degree.

Students may count up to 12 credits of approved graduate coursework (5000 level or higher) toward both their bachelor's and master's degrees. These graduate courses will replace the technical elective courses in the bachelor's program.

This combined program provides an attractive way for students to continue their graduate work. Students complete the undergraduate program first. The combined program can be completed in approximately five years.

### **Admission Requirements**

The GRE is not required for this combined program. To be eligible for the combined program, baccalaureate students should:

1. Have a cumulative FAU GPA of 3.25 or better at the end of their junior year. Note that the cumulative FAU GPA of at least 3.25 must be maintained until the completion of the bachelor's degree.
2. Formally apply to the combined program, completing the admissions process at least one semester prior to the beginning of the M.S. portion of their program.

Students in the combined program must maintain continuous enrollment to remain in good standing. Students must also meet all the degree requirements of the graduate program they have chosen, including prerequisite courses.

### **Degree Requirements**

To be eligible for the combined B.S.M.E. in Mechanical Engineering to M.S. in Artificial Intelligence, students must fulfill the following requirements:

1. Completion of the requirements for the [B.S. in Mechanical Engineering](#) program and other

requirements stipulated by the University and College

2. Completion of all requirements for the [M.S. in Artificial Intelligence](#) program, using either the thesis or non- thesis option.

## **MECHANICAL ENGINEERING**

### **BACHELOR OF SCIENCE IN MECHANICAL ENGINEERING (B.S.M.E.) TO MASTER OF SCIENCE (M.S.) COMBINED PROGRAM**

#### **Thesis Option**

Candidates seeking a combined program leading to both Bachelor of Science in Mechanical Engineering and Master of Science degrees with the thesis option must complete an approved program of at least 30 credits. Out of those 30, 12 credits of graduate coursework (5000 level or higher) will count toward both the bachelor's and master's degrees, as long as the following criteria are met:

1. The student has met the minimum 120 credits for the bachelor's degree; and
2. The student has taken a minimum of 30 credits in 5000 level or higher courses for the master's program.

A maximum of 12 credits may then be counted for both the bachelor's and master's programs if the total number of credits exceeds 150.

#### **Prerequisite Coursework for Transfer Students**

Students transferring to Florida Atlantic University must complete both lower-division requirements (including the requirements of the General Education Program) and requirements for the college and major. Lower-division requirements may be completed through the A.A. degree from any Florida public college, university or community college or through equivalent coursework at another regionally accredited institution. Before transferring and to ensure timely progress toward the baccalaureate degree, students must also complete the prerequisite courses for their major as outlined in the [Transition Guides](#) .

All courses not approved by the Florida Statewide Course Numbering System that will be used to satisfy requirements will be evaluated individually on the basis of content and will require a catalog course description and a copy of the syllabus for assessment.

#### **Degree Requirements**

Candidates must complete the following:

1. Three core courses (9 credits): EGM 6533, Advanced Strength of Materials; EML 6223, Mechanical Vibrations or EML 6317, Advanced Control Systems; and EML 6716 , Advanced Fluid Dynamics;
2. A math course (3 credits): EOC 5172, Mathematical Methods in Ocean Engineering 1;
3. Four technical electives (12 credits at the 5000 level or higher);
4. Must complete one semester of EML 5937, Graduate Seminar (0 credits) with grade of Satisfactory ("S");
5. Up to four courses may be taken while the student is an undergraduate;
6. Before the end of the student's third semester of full-time enrollment, a written thesis proposal must be submitted to the supervisory committee and defended in an oral examination;
7. A master's thesis (6 credits), which must be defended at an oral examination;
8. At least one-half of the credits must be at the 6000 level or above;
9. At least one-half of the credits must be from the list of Mechanical Engineering courses shown in the Engineering and Computer Science Course Descriptions section.

## MECHANICAL ENGINEERING

### BACHELOR OF SCIENCE IN MECHANICAL ENGINEERING (B.S.M.E.) TO MASTER OF SCIENCE (M.S.) COMBINED PROGRAM

#### Non-Thesis Option

Candidates seeking a combined program leading to both Bachelor of Science in Mechanical Engineering and Master of Science degrees with the non-thesis option must complete an approved program of at least 30 credits. Out of those 30, 12 credits of coursework (5000 level or higher) will count toward both the bachelor's and master's degrees.

#### Prerequisite Coursework for Transfer Students

Students transferring to Florida Atlantic University must complete both lower-division requirements (including the requirements of the General Education Program) and requirements for the college and major. Lower-division requirements may be completed through the A.A. degree from any Florida public college, university or community college or through equivalent coursework at another regionally accredited institution. Before transferring and to ensure timely progress toward the baccalaureate degree, students must also complete the prerequisite courses for their major as outlined in the [Transition Guides](#) .

All courses not approved by the Florida Statewide Course Numbering System that will be used to satisfy requirements will be evaluated individually on the basis of content and will require a catalog course description and a copy of the syllabus for assessment.

## Degree Requirements

Candidates must complete the following:

1. Three core courses (9 credits): EGM 6533, Advanced Strength of Materials; EML 6223, Mechanical Vibrations or EML 6317, Advanced Control Systems; and EML 6716, Advanced Fluid Dynamics;
2. A math course (3 credits): EOC 5172, Mathematical Methods in Ocean Engineering 1;
3. Six technical electives (18 credits);
4. Up to four courses, at the 5000 level or higher, may be taken while the student is an undergraduate;
5. Must complete one semester of EML 5937, Graduate Seminar (0 credits) with grade of Satisfactory ("S");
6. At the time of application for degree, students must submit a portfolio to their advisor consisting of four graduate projects from 10 courses in their program of study. The portfolio will be reviewed by the student's supervisory committee;
7. At least one-half of the credits must be at the 6000 level or above;
8. At least one-half of the credits must be from the list of Mechanical Engineering courses shown in the Engineering and Computer Science Course Descriptions section.

## **MECHANICAL ENGINEERING**

### **BACHELOR OF SCIENCE IN MECHANICAL ENGINEERING (B.S.M.E.) TO MASTER OF SCIENCE (M.S.) COMBINED PROGRAM**

#### **Non-Thesis Option/Business Minor**

Candidates seeking a combined program leading to both Bachelor of Science in Mechanical Engineering and Master of Science degrees with the non-thesis option and with a minor in Business must complete an approved program of at least 36 credits. Out of those 36, 12 credits of coursework (5000 level or higher) will count toward both the bachelor's and master's degrees.

#### **Prerequisite Coursework for Transfer Students**

Students transferring to Florida Atlantic University must complete both lower-division requirements

(including the requirements of the General Education Program) and requirements for the college and major. Lower-division requirements may be completed through the A.A. degree from any Florida public college, university or community college or through equivalent coursework at another regionally accredited institution. Before transferring and to ensure timely progress toward the baccalaureate degree, students must also complete the prerequisite courses for their major as outlined in the *Transition Guides*.

All courses not approved by the Florida Statewide Course Numbering System that will be used to satisfy requirements will be evaluated individually on the basis of content and will require a catalog course description and a copy of the syllabus for assessment.

## Degree Requirements

Candidates must complete the following:

1. Three core courses (9 credits): EGM 6533, Advanced Strength of Materials; EML 6223, Mechanical Vibrations or EML 6317, Advanced Control Systems and EML 6716, Advanced Fluid Dynamics;
2. A math course (3 credits), Mathematical Methods in Ocean Engineering 1;
3. Three technical electives (9 credits) at the 5000 or 6000 level from the list of Mechanical Engineering courses shown in the Engineering and Computer Science Course Descriptions section;
4. Up to four courses at the 5000 level or higher, may be taken while the student is an undergraduate;
5. Must complete one semester of EML 5937, Graduate Seminar (0 credits) with grade of Satisfactory ("S");
6. **Five business courses** (15 credits) as described at the beginning of this College of Engineering and Computer Science section;
7. At the time of application for degree, students must submit a portfolio to their advisor consisting of four graduate projects from 12 courses in their program of study. The portfolio will be reviewed by the student's supervisory committee;
8. At least one-half of the credits must be at the 6000 level or above;
9. At least one-half of the credits must be from the list of Mechanical Engineering courses shown in the Engineering and Computer Science Course Descriptions section.

## MASTER'S PROGRAMS

The Master of Science with major in Mechanical Engineering has both thesis and non-thesis options. The thesis option requires a minimum of 24 credits of coursework and a thesis (6 additional credits). The non-thesis option requires a minimum of 33 credits of coursework. The Master of Science program is available in person and fully online. Requirements for the Ph.D. program are described later in this section.

Each student must complete a comprehensive and coordinated Plan of Study requiring depth in one or more of the following areas: mechanical systems, solid body mechanics, fluid mechanics, heat transfer, thermal/fluid systems, helicopter dynamics, materials, manufacturing, controls, robotics and CAD/CAM. The Plan of Study includes all course and thesis work (if the thesis option is chosen) that the student expects to complete for the M.S. degree. Students submit their Plans of Study electronically for approval using the MyPOS system.

### **Admission Requirements**

Usual admission requirements are as follows. Students with non-engineering bachelor's degrees, click [here](#) for additional requirements.

1. A baccalaureate degree in Engineering, Natural Science or Mathematics, but preferably in Mechanical Engineering and from a regionally accredited institution. A student who does not have a background in mechanical engineering should expect to take additional undergraduate mechanical engineering coursework.
2. Demonstrated proficiency in both written and spoken English. A student from a non-English-speaking country is required to take the Test of English as a Foreign Language (TOEFL) exam and achieve a score of at least 550 (CBT-213, iBT-79).
3. At least a 3.0 (of a 4.0 maximum) GPA in the last 60 credits attempted prior to graduation.
4. Petitions for admittance to the program will not be accepted when a student wishes to include more than five courses taken as a non-degree-seeking student.

### **Admission to Candidacy**

A student is eligible to apply for candidacy when:

1. The student has completed a minimum of 9 credits as a graduate student.
2. The student has maintained a minimum GPA of 3.0 in all courses attempted as a graduate student.
3. The student has filed an approved Plan of Study for the degree program.

Students should file for candidacy as soon as they are eligible. Usually, no more than 20 credits of completed work before admission to candidacy will be accepted toward a degree program. A student

should be admitted to candidacy prior to beginning work on thesis.

## **Degree Requirements**

Students must satisfy all of the University graduate requirements.

[Link to Master of Science with Major in Mechanical Engineering Non-thesis Option and Non-thesis Option with a Business Minor](#)

[Link to Master of Science with Major in Mechanical Engineering and Engineering Management Minor](#)

[Link to Master of Science with Major in Mechanical Engineering: Aerospace Engineering Concentration](#)

## **MECHANICAL ENGINEERING MASTER OF SCIENCE (M.S.)**

### **Thesis Option**

*Candidates for the Master of Science degree with the thesis option must complete an approved program of at least 30 credits including:*

1. Three core courses (9 credits): EGM 6533, Advanced Strength of Materials; EML 6223, Mechanical Vibrations or EML 6317, Advanced Control Systems; and EML 6716, Advanced Fluid Dynamics;
2. A math course (3 credits): EOC 5172, Mathematical Methods in Ocean Engineering 1;
3. Four technical electives (12 credits) at the 5000 level or higher;
4. Must complete one semester of EML 5937, Graduate Seminar (0 credits) with grade of Satisfactory ("S");
5. Before the end of the student's third semester of full-time enrollment, a written thesis proposal must be submitted to the supervisory committee and defended in an oral examination;
6. A Master's thesis (6 credits), which must be defended at an oral examination;
7. At least one-half of the credits must be at the 6000 level or above;
8. At least one-half of the credits must be from the list of Mechanical Engineering courses shown in the Engineering and Computer Science Course Descriptions section.

## **MECHANICAL ENGINEERING MASTER OF SCIENCE (M.S.)**

## Thesis Option with Aerospace Engineering Concentration

Students in the Master of Science with Major in Mechanical Engineering, thesis option, have the additional option of pursuing a concentration in Aerospace Engineering.

### Admission Requirements

Applicants should meet all the admission requirements for the M.S. with Major in Mechanical Engineering program, thesis option.

### Degree Requirements

Applicants should meet all the degree requirements for the M.S. with Major in Mechanical Engineering program, thesis option. In addition, the following requirements should be met:

1. Graduate coursework counted for the master's degree should include at least three graduate courses with content on theoretical and/or Aerospace Engineering (see table below). Additional courses may be approved by the thesis advisor. Students in this program should choose Advance Controls as a core course.
2. The student's thesis research and scholarship must have a strong emphasis on one or more areas of Aerospace Engineering.

---

### Graduate Coursework (9 credits)

---

## MASTER OF SCIENCE (M.S.)

### Non-Thesis Option and Non-Thesis Option with a Business Minor

*Candidates for the Master of Science degree with the non-thesis option must complete an approved program of at least 30 credits including:*

1. Three core courses (9 credits): EGM 6533, Advanced Strength of Materials; EML 6223, Mechanical Vibrations or EML 6317, Advanced Control Systems; and EML 6716, Advanced Fluid Dynamics;
2. A math course (3 credits): EOC 5172, Mathematical Methods in Ocean Engineering 1;
3. Six technical electives (18 credits) at the 5000 or 6000 level;
4. Must complete one semester of EML 5937, Graduate Seminar (0 credits) with grade of Satisfactory ("S");
5. At the time of application for degree, students must submit a portfolio to their advisor consisting of four graduate projects from 10 courses in their program of study. The portfolio will be reviewed by the student's supervisory committee;
6. At least one-half of the credits must be at the 6000 level or above;
7. At least one-half of the credits must be from the list of Mechanical Engineering courses shown in the Engineering and Computer Science Course Descriptions section.

*Candidates for the Master of Science degree with the non-thesis option and a Business minor must complete an approved program of at least 36 credits including:*

1. Three core courses (9 credits): EGM 6533, Advanced Strength of Materials; EML 6223, Mechanical Vibrations or EML 6317, Advanced Control Systems; and EML 6716, Advanced Fluid Dynamics;
2. A math course (3 credits): EOC 5172, Mathematical Methods in Ocean Engineering 1;
3. Three technical elective courses (9 credits) at the 5000 or 6000 level from the list of Mechanical Engineering courses shown in the Engineering and Computer Science Course Descriptions section;-
4. **Five business courses** (15 credits) as described at the beginning of this College of Engineering and Computer Science section under the Business Minor heading;
5. Must complete one semester of EML 5937, Graduate Seminar (0 credits) with grade of Satisfactory ("S");
6. At the time of application for degree, students must submit a portfolio to their advisor consisting of four graduate projects from 12 courses in their program of study. The portfolio will be reviewed by the student's supervisory committee;

7. At least one-half of the credits must be at the 6000 level or above;
8. At least one-half of the credits must be from the list of Mechanical Engineering courses shown in the Engineering and Computer Science Course Descriptions section.

## MECHANICAL ENGINEERING

### MASTER OF SCIENCE (M.S.) WITH AN ENGINEERING MANAGEMENT MINOR

This Master of Science degree program with a minor in Engineering Management is a 36-credit program consisting of advanced courses in mechanical engineering as well as courses in the College of Business. Candidates for this program should have an undergraduate degree in Mechanical Engineering with a minimum GPA of 3.0. Submission of the Graduate Record Examination (GRE) is required. GRE scores more than five years old will not be accepted. The GRE requirement is waived for applicants who have a bachelor's degree from FAU's Ocean and Mechanical Engineering Department with a GPA of at least 3.25 over the last 60 credits. Non-English-speaking candidates must have a minimum score of 550 on the TOFEL. Two reference letters and at least two years of professional experience are also required.

***Candidates for the Master of Science degree with Major in Mechanical Engineering and Engineering Management minor must complete an approved program of at least 36 credits including:***

1. Three core courses (9 credits): EGM 6533, Advanced Strength of Materials; EML 6223, Mechanical Vibrations or EML 6317, Advanced Control Systems; and EML 6716, Advanced Fluid Dynamics;
2. A math course (3 credits): EOC 5172, Mathematical Methods in Ocean Engineering 1;
3. Three elective courses (9 credits) from the list of Mechanical Engineering courses shown in the Engineering and Computer Science Course Descriptions section;
4. Must complete one semester of EML 5937, Graduate Seminar (0 credits) with grade of Satisfactory ("S");
5. Three required management courses (9 credits) listed in the table below;
6. Two management elective courses (6 credits) from the table below;
7. At the time of application for degree, students must submit a portfolio to their advisor consisting of four graduate projects from 12 courses in their program of study. The portfolio will be reviewed by the student's supervisory committee;
8. At least one-half of the credits must be at the 6000 level or above;
9. At least one-half of the credits must be from the list of Mechanical Engineering courses shown in

the Engineering and Computer Science Course Descriptions section.

### Required Management Courses (9 credits)

Organizational Behavior	MAN 6245	3
Operations Management	MAN 6501	3
Project Management	MAN 6526	3

### Management Elective Courses (6 credits)

Select two courses from the list:

Entrepreneurship, Creativity and Innovation	MAN 6299	3
Project Management	MAN 6526	3
Cross-Cultural Management and Human Resources	MAN 6609	3
International Business Operations	MAN 6614	3
Entrepreneurial Consulting Project	MAN 6806	1-4
Seminar in Entrepreneurship/Venture Management	MAN 6875	3
Global Environment of Management	MAN 6937	3

## DOCTORAL PROGRAM

### MECHANICAL ENGINEERING DOCTOR OF PHILOSOPHY (PH.D.)

The degree of Doctor of Philosophy with major in Mechanical Engineering is conferred by the University primarily in recognition of a demonstrated ability for independent and original research in the discipline. This ability must be supported by a comprehensive and coordinated plan of advanced study designed to provide a strong background in the fundamentals of mechanical engineering and related areas. Students in the Ph.D. with Major in Mechanical Engineering have the option of pursuing a concentration in [Aerospace Engineering](#) or [Neuroengineering](#).

## Admission Requirements

Minimum requirements for admission to doctoral studies in mechanical engineering are as follows:

1. A master's degree in engineering or a related field from a recognized institution;
2. A GPA of 3.0 or better in the last 60 credits of work attempted;
3. Submission of the Graduate Record Examination (GRE) score is required. GRE scores more than five years old will not be accepted. The GRE requirement is waived for applicants who have a master of science degree from FAU's Ocean and Mechanical Engineering Department;
4. Demonstrated proficiency in both written and spoken English. A student from a non-English-speaking country is required to take the test of English as a Foreign Language (TOEFL) and achieve a score of at least 550 (CBT-213, iBT-79);
5. Three letters of reference attesting to the student's potential for graduate studies in mechanical engineering;
6. Approval for admission by the Department of Ocean and Mechanical Engineering. Usually, an applicant admitted will have a strong record of achievement that exceeds the minimum requirements. Approval for admission by the department will be based on an evaluation of the student's record in terms of likelihood of success in the Ph.D. program.

Admission to doctoral studies does not constitute admission to candidacy for the degree.

## Admission to Doctoral Status

Admission to doctoral status is granted after students have:

1. Successfully completed General Examination 1;
2. Been accepted by a department faculty member willing to serve as their dissertation advisor;
3. Had their Plan of Study approved by their advisor, by the department graduate coordinator and by the Graduate College.

A Plan of Study for the Ph.D. degree must be submitted to the Graduate College before the end of the second semester of enrollment. Students submit their Plans of Study electronically for approval using the MyPOSsystem.

## Admission to Candidacy

Admission to candidacy requires formulation of a supervisory committee approved by the department graduate coordinator as well as successful completion of General Examination 1.

## Degree Requirements

A central requirement for the Ph.D. degree in Mechanical Engineering is submission and defense of a

dissertation based upon original research in an area of focus acceptable to the student's supervisory committee. The completed dissertation must be approved by the committee, the department chair and the Graduate College. A minimum of 72 graduate credits is required beyond a bachelor's degree. A master's degree in a related field is considered equivalent to 30 credits. Additional requirements are:

1. A minimum of 42 credits of coursework beyond the baccalaureate degree, or a minimum of 18 credits beyond the master of science degree;
2. No more than 3 credits of directed independent study or EML 6918, Advanced Research may be used to satisfy the minimum 18 credits of coursework;
3. A minimum of 12 credits must be in Mechanical Engineering courses, including **at least** two of the following three core courses. In addition a graduate-level Engineering Mathematics course is required, which may include, but not limited to, EOC 5172, Mathematical Methods in Ocean Engineering 1 or PHZ 5115, Mathematical Physics.

---

**Core Courses (select two of the following three courses)**

---

Advanced Strength of Materials	EGM 6533	3
Advanced Fluid Dynamics	EML 6716	3
Mechanical Vibrations	EML 6223 <b>or</b>	3
Advanced Control Systems	EML 6317	3

---

**Mathematics**

---

One Engineering Mathematics course, graduate level

4. Must complete two semesters of EML 37, Graduate Seminar (0 credits) with grade of Satisfactory ("S");
5. Doctoral thesis research of at least 24 credits for students entering with a master's degree and at least 30 credits for students entering with a bachelor's degree;
6. Successful completion of General Examination 1;
7. Successful completion of General Examination 2;
8. Prior to the defense, the student is required to have published or have accepted for publication a refereed research paper in a field of study deemed acceptable by the dissertation committee. A journal article is preferred, but a peer-reviewed conference paper is also acceptable;
9. Submitted and defended a dissertation based on original research in the student's area of

specialization. The supervisory committee, the department chair and the Graduate College must have approved the dissertation;

10. Satisfaction of all University regulations and requirements for the Ph.D. degree;
11. **General Examination 1:** Students entering the Ph.D. program with an M.S. degree are expected to take the General Examination 1 (Ph.D. Qualifying Examination) after completing their second semester. The primary purpose of General Examination 1 is to evaluate the student's ability, not only to demonstrate a thorough knowledge of Mechanical Engineering course material but also to evaluate original thinking. The General Examination 1 will be in four parts: Part 1 covers the three core courses (note that an elective course can be treated as a core course), Part 2 covers two other elective course subjects, Part 3 covers Mathematics, and Part 4 is a pre-proposal that consists of a written paper and an oral examination. Students with a GPA more than or equal to 3.5 on all courses selected for General Exam 1 (with all classes more than or equal to 3.3 [B+]) are exempt from Part 1, Part 2 and Part 3. (These students will need to take a written examination only for topics with a 3.0 GPA [B grade] or below.) For non-exempt students (i.e., GPA less than 3.5): Part 1, the exam on the core courses, will be three hours in duration and will require three problems to be answered. Part 2, the electives exam, will be a one-hour exam and will require one problem from two elective courses to be answered. Part 3, the exam on Engineering Mathematics, will be a two-hour exam and the student must answer two problems. A new set of examinations will be prepared and questions and problems from previous examinations are not available to students. It is expected that the examination on the elective courses will focus on the student's area of specialization;

All Ph.D. graduate students need to prepare a pre-proposal (Part 4). The pre-proposal will consist of an oral presentation and written paper based on several articles selected by a committee (including the advisor). The student will identify knowledge gap(s) and complete a literature review (with guidance of the advisor). During the presentation, questions will be limited to those that help demonstrate knowledge important to the research topic/area;

An overall grade of 70 percent on Part 1, Part 2 and Part 3 of the General Examination 1 and a passing grade in the pre-proposal constitutes successfully completing General Examination 1. If the student fails any of the parts, the student will have one more opportunity to successfully pass the exam. The student must score 70 percent in each subject that is retaken. Alternatively, the student may retake the entire exam when it is next offered. General Examination 1 is scheduled immediately after the last day of the final examination period in the fall semester and in the spring semester each year. The pre-proposal can be defended during the last two months of the semester, including the week after the final exams period, if the advisor indicates that the student is ready;

12. Students who have obtained the M.S. in Mechanical Engineering at FAU will be allowed to take General Examination 1 at the end of the first semester, if the student has completed the pre-proposal. Otherwise, General Examination 1 must be taken no later than the end of the second semester of Ph.D. study. Those admitted to the Ph.D. program directly after the B.S. degree may take the examination after completing 24 credits of graduate coursework;
13. **General Examination 2:** At an appropriate point in the student's graduate studies, normally within 12 months of passing General Exam 1, the student must complete General Examination 2. This is the dissertation proposal defense, in which students defend the choice of a dissertation topic and answer a series of questions on fundamental issues related to their research topic. Students must have passed General Examination 1, selected the dissertation topic, formed a supervisory committee and completed a literature survey prior to the dissertation proposal defense;

In General Examination 2, students should be prepared to demonstrate the ability to perform research on a topic approved by the supervisory committee by presenting a comprehensive literature survey combined with a critical analysis of the state of the art in the particular field. While this examination will be centered around the particular research area, it will not necessarily be limited to that subject. If unsuccessful in the examination, the student may, at the discretion of the department, either remain in the doctoral program and retake the examination at a later date or withdraw from the program. No more than two attempts will be permitted.

### **Transfer Credits**

A maximum of 6 credits beyond the master's degree can be transferred into the student's program of study.

### **Time Limits**

No credit that is more than 10 years old at the time a graduate degree is awarded may be counted toward that degree at Florida Atlantic University. In addition, the final examination must be completed within five calendar years of the admission to candidacy, otherwise the Qualifying Examination must be repeated.

### **Residency Requirement**

Students are required to spend two semesters of full-time study beyond the master's degree in residence at Florida Atlantic University.

## **MECHANICAL ENGINEERING DOCTOR OF PHILOSOPHY (PH.D.)**

## Aerospace Engineering Concentration

Students in the Doctor of Philosophy with Major in Mechanical Engineering program have the option of pursuing a concentration in Aerospace Engineering.

### Admission Requirements

Applicants should meet all the admission requirements for the Ph.D. with Major in Mechanical Engineering program.

### Degree Requirements

Applicants should meet all the degree requirements for the Ph.D. with Major in Mechanical Engineering program. In addition, the following requirements should be met:

1. Graduate coursework counted for the doctor of philosophy degree should include three core courses (EGM 6533, Advanced Strength of Materials, EML 6317, Advanced Control Systems, EML 6716, Advanced Fluid Dynamics) and at least three graduate courses with content on theoretical and/or Aerospace Engineering. Graduate courses completed during the master's degree program may also be counted toward this requirement. The three Aerospace Engineering courses are listed in the table. Additional courses may be approved by the thesis advisor.
2. The student's dissertation research and scholarship must have a strong emphasis on one or more areas of Aerospace Engineering.

# MECHANICAL ENGINEERING

## DOCTOR OF PHILOSOPHY (PH.D.)

### Neuroengineering Concentration

#### Admission Requirements

Applicants should meet all the admission requirements for the Ph.D. with Major in Mechanical Engineering program.

#### Degree Requirements

Applicants should meet all the degree requirements for the Ph.D. with Major in Mechanical Engineering program. In addition, the following requirements should be met.

1. Graduate coursework counted for the Ph.D. program must contain at least three graduate courses that include content on theoretical and/or applied neuroengineering graduate courses completed during the master's degree program may also be used to meet this requirement. The three courses required consist of the required course, EML 6317, Advanced Control Systems, and two additional graduate courses from the table below. Additional courses may be approved by the dissertation advisor.
2. The student's Ph.D. dissertation research and scholarship must have a strong emphasis in one or more areas of neuroengineering including but not limited to applied and/or theoretical areas.

[Link to Course Descriptions for the Harriet L. Wilkes Honors College](#)

## Faculty:

Perry, J., Dean; Hill, T., Associate Dean; Baima, N.; Cañete Quesada, C.; Carvelli, L.; Chandrasekhar,

C.; Chaves Fonnegra, A.; Corr, R.; Duboué, E.; Dragojlovic, V.; Earles, J.; Ely, C.; Fewkes, J.; Fily, Y.; Harrawood, M.; Jakee, K.; Kennedy, A.; Kowalko, J.; Lanning, K.; Lemeh, D.; Luria, R.; Macleod, G.; McGovern, W.; Mincer, T.; Moore, J.; Njambi, W. N.; Nur-tegin, K.; O'Brien, W.; Ruest, A.; Smith, E.; Steigenga, T.; Strain, C.; Tille-Victorica, N.; Trivigno, C.; Tunick, M.; Vázquez, M.; Vernon, L.; Wetterer, J.; White, D. R., Emeritus.

The Harriet L. Wilkes Honors College offers Bachelor of Arts and Bachelor of Science degrees in Liberal Arts and Sciences and Bachelor of Arts and Bachelor of Science degrees in Biological and Physical Sciences. The B.A. and B.S. programs are designed to develop the qualities of a free and responsible citizen, one who can reason clearly, read critically and analytically, argue persuasively in speech and in writing and contribute to society in fundamental and innovative ways. In addition, the B.S. programs provide students a deep understanding of the natural sciences and mathematics. By providing intellectual training in the liberal arts and sciences and biological and physical sciences and specialized study in an area of concentration, the College prepares its students for graduate and professional schools, such as law and medicine, as well as for careers in business, science, education and government. The College offers a number of minors as well and students may pursue a [certificate in Undergraduate Research](#) presented by the Office of Undergraduate Research and Inquiry (OURI).

The Harriet L. Wilkes Honors College also offers combined degree programs (B.A. or B.S./M.S.) in partnership with the College of Engineering and Computer Science and with the Department of History (B.A./M.A.) in the Dorothy F. Schmidt College of Arts and Letters. Details of all [combined degree programs](#) are shown below.

## WILKES HONORS COLLEGE CURRICULUM

The College's curriculum has two primary components, the [honors core](#) and the [concentration](#). For the honors core, students take distribution courses in the liberal arts and sciences aimed at sharpening written and oral communication and enhancing problem-solving skills. In addition, all students develop competency in a foreign language by taking a series of interdisciplinary seminars and team-taught courses, as well as distribution electives in the humanities and social sciences. The students also experience non-classroom learning in the form of either an internship or study abroad.

In addition to completing the honors core, students choose a concentration. Concentrations may be traditional choices, such as biology, English, mathematics, philosophy, political science and psychology or interdisciplinary programs, such as environmental studies, international studies, medical humanities or law and society. In addition, students are able to design their own individual concentration in consultation with faculty. The concentration may have a specialized focus, such as

Bioinformatics, or it may combine related disciplines, such as philosophy, politics and economics. As part of the concentration, students synthesize their skills and knowledge into senior projects or theses. Students may concentrate in more than one area by fulfilling the requirements of each concentration. Depending on the area of concentration, students will receive either a Bachelor of Arts or Bachelor of Science degree in Liberal Arts and Sciences or a Bachelor of Arts or Bachelor of Science degree in Biological and Physical Sciences. It is possible to minor in some areas. Refer to the Minors heading appearing later in this Honors College section.

### **Prerequisite Coursework for Transfer Students**

Students who transfer to Florida Atlantic University must complete both the Honors College core/graduation requirements and requirements for their concentration(s) (see links above). Lower-division requirements may be completed through the A.A. degree from any Florida public college, university or community college or through equivalent coursework at another regionally accredited institution. Before transferring and to ensure timely progress toward the baccalaureate degree, students must also complete the prerequisite courses for their major as outlined in the [Transition Guides](#).

All courses not approved by the Florida Statewide Course Numbering System that will be used to satisfy requirements will be evaluated individually on the basis of content and will require a catalog course description and a copy of the syllabus for assessment.

## THE HONORS CORE

**Note:** Students who entered FAU prior to fall 2015 are subject to a different set of core requirements, which are listed [online](#).

All students must successfully complete 120 credits to graduate. Of these, at least 36 credits are in the Honors Core. The Honors Core provides a broad-based education in the liberal arts and sciences through courses that emphasize critical thinking and writing skills. These courses introduce students to ways of thinking analytically about science, politics, history, ethics, culture, visual images and literature. Some courses serve as introductions to a specific discipline. Others approach problems and themes in ways that cross traditional disciplinary boundaries. In addition, students fulfill other graduation requirements: they write an honors thesis, develop competency in a foreign language, study abroad or complete an internship and finish coursework in their concentration.

### **Core Requirements**

Writing ( ENC 1101, three additional WAC-designated courses and submission of a writing

portfolio)

One of the most important skills a student acquires is the ability to communicate effectively. Clear writing is inseparable from clear and coherent thinking. Honors College courses are writing intensive and provide guidance in researching, composing, editing and revising papers. Students do substantial writing in different disciplines and in formats as diverse as essays, research papers, lab reports and debate briefs. A senior Honors thesis or the written component of a senior Honors project interweaves the research, analytical and writing skills acquired in the first three years.

As part of the Honors College's writing-intensive curriculum, students must take four Writing Across the Curriculum (WAC) courses. WAC courses are discipline-based courses students may use to satisfy other core or concentration requirements. They are designated as WAC because they provide special attention to the writing and revision process. In most cases the Honors Thesis will count as two WAC courses. WAC courses satisfy the State's Gordon Rule requirement. ENC 1101 is taken as one of the four WAC courses.

Students also submit a writing portfolio, which is a mid-career assessment of their writing at the end of their sophomore year, conducted by a committee of faculty. The writing portfolio consists of the student's Forum paper (which the Dean's office keeps on file) and at least one essay submitted to the Dean's office. This essay must meet the following four requirements:

1. It was written in the first or second year at the Honors College;
2. It should be a scholarly essay that demonstrates the student's ability to incorporate evidence from secondary sources and/or analyze a primary text;
3. It should include the professor's comments, if possible; and
4. It should be at least five pages in length.

### **Mathematics and Quantitative Reasoning (6-8 credits, two courses)**

One goal of the honors core is to help foster mathematical literacy. Mathematics is the language of science and technology and, increasingly, of the social sciences. By virtue of its precision, mathematics allows a clear understanding of the world and our place within it. Indeed, important health and environmental issues (acid rain, water management, global warming) cannot be understood without mathematical literacy. By taking two courses in mathematics, students sharpen their critical thinking skills, learning to distinguish evidence from anecdote and causality from correlation. At least one course must be from the [list of core courses](#) designated Group A and the second course may be from Group A or Group B. Math courses also satisfy the State's Gordon Rule computational requirement.

### **Natural Sciences (6-8 credits, two courses)**

By taking two courses in two distinct disciplines within the natural sciences, students will gain an

appreciation and understanding of the natural world as well as our place in it. At least one of these courses will include a laboratory section that will give students hands-on experience and allow them to understand the meaning of science in both theory and practice. At least one course must be from the [list of core courses](#) designated Group A.

### **Social and Behavioral Analysis (6 credits, two courses)**

The courses in social and behavioral analysis familiarize students with different approaches to the study of individual behavior and social institutions and introduce them to some of the concepts and methods of the social sciences. The courses aim at an understanding of the reciprocal relations among people, societies, and institutions and encourage students to think critically and systematically about how these societies and institutions can best be arranged. At least one course must be from the list of core courses designated Group A and the second course must be from Group B in the [list of core courses](#).

### **Humanities (6 credits, two courses)**

Courses in the humanities serve several purposes. Some courses explore questions such as, “what is the life worth living?” or “what is the basis for distinguishing knowledge from belief?” Some courses emphasize how these questions have been approached throughout history, others focus on how different cultures have addressed these questions and some grapple with these questions without regard to their historical or cultural context. Courses in literature are intended to develop students’ ability to appreciate and understand literature by looking at texts in their historical and cultural contexts or examining themes, approaches and generic conventions across time. Courses in the arts are intended to develop students’ ability to create and appreciate the arts in all of their forms, to enhance sensitivity to artistic expression and to increase familiarity with theories central to these forms. Courses may be structured historically, culturally or thematically. At least one course must be from the [list of core courses](#) designated Group A and at least one must be from Group B (online).

### **Global Citizenship (6-7 credits, two courses)**

Societies are increasingly diverse and interconnected with other societies around the world and impacted by technological advances. To be responsible and effective citizens in this world, we must understand the forces that shape our society and our environment and be equipped to think critically about the consequences of these forces in our lives. To this end, students take two courses from two distinct groups from among the three groups of "Environmental Studies," "International Studies" and "Ethics and Global Values." These courses may not be double-counted with other core or graduation requirements. Approved courses in the three categories are identified in the [list of core courses](#) .

### **Additional Humanities or Social and Behavior Analysis Course (3 credits)**

Students take an additional course in the humanities or social sciences in a different discipline than the

discipline of courses used to satisfy the Core Humanities and Social and Behavior Analysis requirements. A list of distinct disciplinary prefixes is available at the end of the [list of core courses](#) .

## **Other Graduation Requirements**

### ***Foreign Language (8 credits, two courses)***

By learning a foreign language, a student gains access to other cultures and worlds and to other ways of thinking. As this is an important objective of the Honors College, students are expected to take two sequential courses in a single language or demonstrate proficiency equivalent to two basic courses. Students are encouraged to incorporate the study of language in a study abroad experience.

### ***Honors College Forum (1 credit, one course)***

Students meet the faculty and other leading scholars and artists who present their work and introduce the leading ideas and controversies in their areas of expertise. Students take this weekly 1-credit seminar in the fall semester.

### ***Interdisciplinary Critical Inquiry Seminars (5-9 credits, three courses)***

The architecture of a traditional college curriculum, in which knowledge is broken into highly specific fields, disciplines and departments, gives the misleading impression that human experience and human problems are neatly compartmentalized and that there is a clear division of labor, each discipline being assigned its own subset of problems and experiences. To help convey to students that knowledge and experience are not so easily partitioned and that many problems benefit from multiple perspectives, the Honors College curriculum includes a unique offering of 1- and 3-credit, team-taught seminars devoted to interdisciplinary critical inquiry. Students must take three of these courses, at least one of which should be 3 credits. Team-taught courses may not be used to satisfy other core requirements, but may satisfy concentration requirements.

### ***Experiential Learning Requirement (Internship, minimum 3 credits; OR Study Abroad, minimum five weeks and 3 credits)***

Life in the world beyond the campus provides students with invaluable experiences that complement their programs of study. The experiential learning requirement applies to all Honors College students (including transfer and international students). Students may fulfill the requirement through participation in a study abroad program (minimum of 3 credits and five-week stay) or through an internship (minimum of 3 credits, which requires 120 hours of unpaid or 180 hours of paid internship experience). All internships must be approved prior to student registration. Internship coursework is graded S/U.

### ***Distribution Electives (6 credits, two courses)***

Many students arrive at college unfamiliar with the specialized areas of study within the social sciences

and humanities. Students have the opportunity to discover and explore these by taking two additional distribution electives. While these may not be courses that satisfy the Social and Behavioral Analysis and Humanities Core requirements, they may be courses from any two distinct disciplines, one within the social sciences and one within the humanities. These courses must be Wilkes Honors College courses taken at the Wilkes Honors College. They may not be courses taken to satisfy other core or graduation requirements or counted for a concentration, but they may be courses used to satisfy minor concentration requirements.

Consult the University Catalog for other graduation requirements. Note that Honors College students do not need to fulfill the General Education Program requirement because they fulfill the Honors College Core requirement instead.

### **The Concentrations**

In addition to obtaining a breadth of knowledge in the liberal arts and sciences or biological and physical sciences through courses in the honors core, each student chooses an area of concentration. The purpose of the concentration is to allow students to obtain deep knowledge of a focused area of interest. Students may have more than one major concentration or a major concentration and one or more minors. In addition to fulfilling the requirements for the concentration, each student will complete a thesis or senior project. Students in the Wilkes Honors College have the opportunity to concentrate in most of the traditional disciplines and to design their own interdisciplinary course of study in consultation with the faculty. The Honors College offers different sets of concentrations based on the major and degree chosen. Details about concentration requirements and listings of course offerings and concentrations can be found [here](#).

## **LIBERAL ARTS AND SCIENCES BACHELOR OF ARTS (B.A.)**

### **Concentrations:**

**American Studies**

**Anthropology**

**Art (Transdisciplinary Visual Arts)**

**Biological Anthropology**

**Business**

**Economics**

**English Literature**

**Environmental Studies**

**History (Interdisciplinary)**

**Interdisciplinary Critical Theory**

**International Studies**

**Latin American Studies**

**Law and Society**

**Mathematical Sciences (Interdisciplinary)**

**Medical Humanities**

**Philosophy**

**Political Science**

**Psychology**

**Spanish**

**Women's Studies**

**Writing**

## **LIBERAL ARTS AND SCIENCES**

### **BACHELOR OF SCIENCE (B.S.)**

**Biological Anthropology Concentration**

**Psychology Concentration**

## **BIOLOGICAL AND PHYSICAL SCIENCES**

### **BACHELOR OF ARTS (B.A.)**

#### **Concentrations:**

**Biological Chemistry**

**Biology**

**Chemistry**

**Data Analytics**

**Environmental Science**

**Marine Biology**

**Mathematics**

**Neuroscience**

**Physics**

## **BIOLOGICAL AND PHYSICAL SCIENCES**

### **BACHELOR OF SCIENCE (B.S.)**

#### **Concentrations:**

## **Biological Chemistry**

**Biology**

**Chemistry**

**Data Analytics**

**Environmental Science**

**Marine Biology**

**Mathematics**

**Neuroscience**

**Physics**

## **Minors**

Undergraduate Minors

The Honors College offers numerous minor concentrations. These require a minimum of 15 credits, including at least 9 credits at the upper level. Of the 15 credits, at least 12 must be earned from FAU. Students must maintain a 2.0 GPA in courses taken for the minor concentration. Minor concentrations are available in:

### **Concentrations:**

**Anthropology**

**Art**

**Chemistry**

**Data Science**

**Digital Game Development**

**Economics**

**English Literature**

**Environmental Studies**

**Ethics (Interdisciplinary)**

**French and Francophone Studies**

**History**

**Interdisciplinary Theory of Knowledge**

**Law and Society**

**Mathematics**

**Philosophy**

**Physics**

**Psychology**

## Spanish Literature

## Visual Arts and Creative Writing

## Women's Studies

Students may also minor in Business through coursework at the Honors College and the College of Business. Further information can be found [here](#).

## UNDERGRADUATE RESEARCH

### UNDERGRADUATE CERTIFICATE

*(Minimum of 12 credits required)*

To recognize undergraduate students' excellence in undergraduate research, the Office of Undergraduate Research and Inquiry (OURI) has established the [Undergraduate Research Certificate](#). Requirements for the Research Certificate include completion of 12 credits of research exposure, skill-building and intensive courses as well as dissemination of the outcomes of students' research and inquiry through a research presentation or exhibition.

## ACADEMIC PATHWAYS

### The FAU Max Planck Honors Program (MPHP)

Established by the Jupiter Life Science Initiative, the Charles E. Schmidt College of Science and the Wilkes Honors College, working in partnership with the Max Planck Florida Institute for Neuroscience, the MPHP is a Jupiter-specific honors program for undergraduates. The program provides participants with exclusive enrichment opportunities. Students who maintain all standards and fulfill all requirements of the MPHP receive a designation of "FAU Max Planck Honors" on their final transcript. For students pursuing the MPHP, 2 to 3 of the elective credits in their concentration are required MPHP courses: Introduction to Neuroscience Research (PSB 4003, 1 credit) and two distinct MPHP Enrichment courses (1 credit each) from the list in the [Interdisciplinary Programs](#) section of this catalog. A minimum grade of "B" in graded and "S" in non-graded courses must be achieved in these exclusive MPHP course options for the credits to count toward the requirements of the MPHP. Visit the [MPHP website](#) to apply.

### Business Pathway/M.B.A. Program

In addition to its concentration in Business, the Wilkes Honors College has an arrangement with the College of Business at FAU whereby students who have met all Honors College graduation requirements, maintained at least a 3.0 GPA in the last 60 hours of coursework and achieved a score of

500 or above on the GMAT (Graduate Management Admission Test) are guaranteed admission into FAU's M.B.A. program. This guarantee is given only to students who have been full-time Wilkes Honors College students for a minimum of six semesters and who have completed the core and concentration in the Wilkes Honors College.

### **Education Pathway/M.Ed. Program**

The Wilkes Honors College has an arrangement with the College of Education at FAU whereby students who have met all Honors College graduation requirements, maintained at least a 3.0 GPA in the last 60 hours of coursework and achieved a score of 800 or above on the GRE (Graduate Record Examination) are guaranteed admission into FAU's M.Ed. Program in Curriculum and Instruction Plus Secondary Education Certification. This guarantee is given only to students who have been full-time Honors College students for a minimum of six semesters and who have completed the core and concentration in the Honors College.

### **Engineering Pathway**

Students may take coursework at the Honors College for their first two years and then transfer seamlessly into the College of Engineering and Computer Science. Students are thus able to take advantage of the Honors College's rich offerings and small class sizes in mathematics and the sciences, social sciences, and humanities during their first two years to satisfy core requirements before focusing on their upper-level engineering coursework in the College of Engineering and Computer Science. Students from the Honors College who meet the admission requirements of the College of Engineering and Computer Science are permitted to transfer automatically to that College. Honors Calculus, Honors General Chemistry and Honors Physics or their equivalents satisfy the Engineering requirements of Calculus, Chemistry and Physics for Engineers. The Wilkes Honors College, in partnership with the College of Engineering and Computer Science, also offers B.A. or B.S. degrees combined with M.S. degrees. For [details](#) see below under Combined Programs.

### **Law School**

Students considering careers in law will receive excellent preparation in the Honors College. Admission to law school requires strong analytical and writing skills, an outstanding academic record and a competitive LSAT (Law School Admission Test) score. The Honors College's emphasis on writing and critical thinking will provide students with the skills law school admissions committees seek. In addition, advisors will provide law school information and assist with the application process.

### **Medical Scholars Program**

The Wilkes Medical Scholars Program is a highly selective, early admission program into the Charles E. Schmidt College of Medicine for students who have a strong desire to pursue a career in

medicine. Students receive a B.A. or B.S. degree from the Wilkes Honors College in Jupiter and the M.D. degree from FAU's College of Medicine in Boca Raton in seven or eight years.

Admission is open to highly qualified incoming Wilkes Honors College freshman students. Those accepted into the Wilkes Medical Scholars Program are offered conditional admission to the College of Medicine. Students must successfully complete the program requirements and achieve a minimum qualifying MCAT score. Further details are available [online](#).

Minimum requirements for entrance:

1. Old SAT minimum score of 1450 (Critical Reading and Math combined) or a New SAT score of 1490 or a minimum ACT composite of 33;
2. Weighted high school GPA of at least 4.30;
3. Medical Pipelines Online Application, deadline January 15;
4. Résumé and letter of recommendation from a counselor or high school teacher emailed to [Medical Scholars Program](#);
5. Recommended but not required—one or more of the following SAT Subject tests: Math Level 2, Biology, Chemistry, Literature;
6. Highly recommended but not required—experience with patient interaction;
7. U.S. citizen or permanent resident status; and
8. Admitted to FAU and the Wilkes Honors College before January 15.

## Medical School

Admission to medical school requires a strong academic record, a competitive MCAT (Medical College Admission Test) score and the completion of certain prerequisite courses. The Honors College offers all of these courses as well as assistance with MCAT preparation and with the application process.

## Nursing Pathway

Honors College students interested in a fast track to a professional nursing career can take advantage of the Nursing Pathway . Successful students receive their Honors College B.A. or B.S. degree, and with an additional 12 months of study at FAU's nationally acclaimed College of Nursing, receive a B.S.N. as a second degree. Up to three Honors College students who meet all College of Nursing requirements are guaranteed an interview for this accelerated B.S.N. program each year. Students must be full-time Honors College students for at least six semesters to be eligible and must have their degree in hand prior to beginning the B.S.N. program.

Further information about pathways can be found [here](#).

## COMBINED PROGRAMS

The Wilkes Honors College (WHC) offers the following combined programs in partnership with the Dorothy F. Schmidt College of Arts and Letters, the College of Engineering and Computer Science and the Charles E. Schmidt College of Science.

The first ten are offered in partnership with the College of Engineering and Computer Science. The 11th program is offered in partnership with the Dorothy. F. Schmidt College of Arts and Letters. Following that combined program is a program offered jointly with the Charles E. Schmidt College of Science: The [B.A. with Concentration in Mathematical Sciences](#) or [B.A./B.S. with Concentration in Mathematics to M.S. with Major in Mathematics](#).

**BIOLOGICAL AND PHYSICAL SCIENCES TO ARTIFICIAL INTELLIGENCE**  
BACHELOR OF ARTS (B.A.) OR BACHELOR OF SCIENCE (B.S.) TO  
MASTER OF SCIENCE (M.S.)  
COMBINED PROGRAM

**BIOLOGICAL AND PHYSICAL SCIENCES TO BIOMEDICAL ENGINEERING**  
BACHELOR OF ARTS (B.A.) OR BACHELOR OF SCIENCE (B.S.) TO  
MASTER OF SCIENCE (M.S.)  
COMBINED PROGRAM

### Concentrations:

**Biology**

**Biological Chemistry**

**Chemistry**

**Marine Biology**

**Neuroscience**

**Physics**

**BIOLOGICAL AND PHYSICAL SCIENCES TO COMPUTER ENGINEERING**  
BACHELOR OF ARTS (B.A.) OR BACHELOR OF SCIENCE (B.S.) TO  
MASTER OF SCIENCE (M.S.)  
COMBINED PROGRAM

**BIOLOGICAL AND PHYSICAL SCIENCES TO COMPUTER SCIENCE**

**BACHELOR OF ARTS (B.A.) OR BACHELOR OF SCIENCE (B.S.) TO  
MASTER OF SCIENCE (M.S.)  
COMBINED PROGRAM**

**BIOLOGICAL AND PHYSICAL SCIENCES TO ELECTRICAL ENGINEERING  
BACHELOR OF ARTS (B.A.) OR BACHELOR OF SCIENCE (B.S.) TO  
MASTER OF SCIENCE (M.S.)  
COMBINED PROGRAM**

**BIOLOGICAL AND PHYSICAL SCIENCES TO INFORMATION TECHNOLOGY  
AND MANAGEMENT  
BACHELOR OF ARTS (B.A.) OR BACHELOR OF SCIENCE (B.S.) TO  
MASTER OF SCIENCE (M.S.)  
COMBINED PROGRAM**

**Advanced Information Technology Concentration  
Computer Science Data Analytics Concentration**

**BIOLOGICAL AND PHYSICAL SCIENCES TO MECHANICAL ENGINEERING  
BACHELOR OF ARTS (B.A.) OR BACHELOR OF SCIENCE (B.S.) TO  
MASTER OF SCIENCE (M.S.)  
COMBINED PROGRAM**

**BIOLOGICAL AND PHYSICAL SCIENCES TO OCEAN ENGINEERING  
BACHELOR OF ARTS (B.A.) OR BACHELOR OF SCIENCE (B.S.) TO  
MASTER OF SCIENCE (M.S.)  
COMBINED PROGRAM**

**BIOLOGICAL AND PHYSICAL SCIENCES TO CIVIL, ENVIRONMENTAL  
OR GEOMATICS ENGINEERING TO CIVIL ENGINEERING  
BACHELOR OF ARTS (B.A.) OR BACHELOR OF SCIENCE (B.S.) TO  
MASTER OF SCIENCE (M.S.)  
COMBINED PROGRAM**

**LIBERAL ARTS AND SCIENCES TO HISTORY  
BACHELOR OF ARTS (B.A.) TO  
MASTER OF ARTS (M.A.)  
COMBINED PROGRAM**

## History Concentration

Details for each combined program are listed below.

### **BIOLOGICAL AND PHYSICAL SCIENCES TO ARTIFICIAL INTELLIGENCE BACHELOR OF ARTS (B.A.) OR BACHELOR OF SCIENCE (B.S.) TO MASTER OF SCIENCE (M.S.) COMBINED PROGRAM**

The B.A. or B.S. degree is completed at the WHC, and students then receive their bachelor's degree from WHC. Students complete their master's degree work in [Artificial Intelligence](#) in the Department of Electrical Engineering and Computer Science in the College of Engineering and Computer Science and receive their master's degree from that college.

Students may count up to 12 credits of approved graduate coursework (5000 level or higher) toward both their bachelor's and master's degrees as long as the combined program totals a minimum of 150 credits and:

1. The student has met the minimum 120 credits for the bachelor's degree; and
2. The student has taken a minimum of 30 credits in 5000 level or higher courses for the master's program.

Students must complete the prerequisite coursework for the master's degree while pursuing the bachelor's degree at the WHC. This combined program provides an attractive way for students to continue their graduate work. Students complete the undergraduate program first. The combined program can be completed in approximately five years.

### **Admission Requirements**

The GRE is not required for this combined program. To be eligible for the combined program, bachelor's students in the WHC should:

1. Have a cumulative FAU GPA of 3.25 or better at the end of their junior year. Note that the cumulative FAU GPA of at least 3.25 must be maintained until the completion of the bachelor's degree at the WHC.
2. Formally apply to the combined program, completing the admissions process at least one semester prior to the beginning of the M.S. portion of the program.

Students in the combined program must maintain continuous enrollment to remain in good standing.

Students must also meet all the degree requirements of the graduate program they have chosen, including prerequisite courses.

## **Degree Requirements**

To be eligible for this combined, students must fulfill the following requirements:

1. Completion of the requirements for the B.A. or B.S. in Biological and Physical Sciences at the WHC (in the concentrations listed above) and any other requirements stipulated by the College and University; and
2. Completion of all requirements in the M.S. in Artificial Intelligence program in the Electrical Engineering and Computer Science Department with either the thesis or non-thesis option.

## **BIOLOGICAL AND PHYSICAL SCIENCES TO BIOMEDICAL ENGINEERING BACHELOR OF ARTS (B.A.) OR BACHLOR OF SCIENCE (B.S.) TO MASTER OF SCIENCE (M.S.) COMBINED PROGRAM**

The B.A. or B.S. degree is completed at the WHC, and students then receive their bachelor's degree from WHC. Students complete their master's degree work in [Biomedical Engineering](#) in the Department of Electrical Engineering and Computer Science in the College of Engineering and Computer Science and receive their master's degree from that college. This combined degree program for WHC students is open to those in the following concentrations:

**Biology**

**Biological Chemistry**

**Chemistry**

**Marine Biology**

**Neuroscience**

**Physics**

Students must complete the prerequisite coursework for the master's degree while pursuing the bachelor's degree at WHC. In addition to the prerequisite coursework listed with the [M.S. in Biomedical Engineering](#), the following deficiency courses must be taken:

1. Students in the Chemistry concentration must take BCH 3033/L, Honors Biochemistry/Lab, BSC 1010/L, Honors Biological Principles/Lab.
2. Students in the Marine Biology, Neuroscience and Physics concentrations must take CHM 2210, CHM 2211, Honors Organic Chemistry 1 and 2 with labs and BCH 3033/L, Honors

## Biochemistry/Lab.

### **Undergraduate/Graduate Coursework**

Students may count up to 12 credits of approved graduate coursework (5000 level or higher) toward both their bachelor's and master's degrees as long as the combined program totals a minimum of 150 credits and:

1. The student has met the minimum 120 credits for the bachelor's degree; and
2. The student has taken a minimum of 30 credits in 5000 level or higher courses for the master's degree.

This combined program provides an attractive way for students to continue their graduate work. The undergraduate program is completed first, and the entire combined program can be completed in approximately five years.

### **Admission Requirements**

The GRE is not required for this combined program. To be eligible for the combined program, WHC bachelor's students should:

1. Have a cumulative FAU GPA of 3.25 or better at the end of their junior year. Note that the cumulative FAU GPA of at least 3.25 must be maintained until the completion of the bachelor's degree at the WHC.
2. Formally apply to the combined program, completing the admissions process at least one semester prior to the beginning of the M.S. portion of the program.

Students in the combined program must maintain continuous enrollment to remain in good standing. Students must also meet all the degree requirements of the graduate program they have chosen, including prerequisite courses.

### **Degree Requirements**

To be eligible for this combined, students must fulfill the following requirements:

1. Completion of the requirements for the B.A. or B.S. in Biological and Physical Sciences at the WHC (in the concentrations listed above) and any other requirements stipulated by the College and University; and
2. Completion of all requirements in the M.S. in Biomedical Engineering program in the Electrical Engineering and Computer Science Department with either the thesis or non-thesis option.

## **BIOLOGICAL AND PHYSICAL SCIENCES TO COMPUTER ENGINEERING**

## BACHELOR OF ARTS (B.A.) OR BACHELOR OF SCIENCE (B.S.) TO MASTER OF SCIENCE (M.S.) COMBINED PROGRAM

The B.A. or B.S. degree is completed at the Wilkes Honors College (WHC), and students then receive their bachelor's degree from WHC. Students complete their master's degree work in [Computer Engineering](#) in the Department of Electrical Engineering and Computer Science in the College of Engineering and Computer Science and receive their master's degree from that college.

The Undergraduate/Graduate Coursework and Admissions requirements [detailed above](#) must be satisfied by students interested in this combined program. Students must also complete the prerequisite coursework for the master's degree while pursuing the bachelor's degree at WHC as listed with the [M.S. in Computer Engineering](#). This combined program provides an attractive way for students to continue their graduate work. The undergraduate program is completed first, and the entire combined program can be completed in approximately five years.

### **Degree Requirements**

To be eligible for the combined B.A. or B.S. in Biological and Physical Sciences to M.S. in Computer Engineering degree program, students must fulfill the following requirements:

1. Completion of the requirements for the B.A. or B.S. in Biological and Physical Sciences at the WHC and any other requirements stipulated by the College and University; and
2. Completion of all requirements for the M.S. in Computer Engineering program in the Engineering and Computer Science Department with either the thesis or non-thesis option.

## **BIOLOGICAL AND PHYSICAL SCIENCES TO COMPUTER SCIENCE** BACHELOR OF ARTS (B.A.) OR BACHELOR OF SCIENCE (B.S.) TO MASTER OF SCIENCE (M.S.) COMBINED PROGRAM

The B.A. or B.S. degree is completed at the Wilkes Honors College (WHC), and students then receive their bachelor's degree from WHC. Students complete their master's degree work in [Computer Science](#) in the Department of Electrical Engineering and Computer Science in the College of Engineering and Computer Science and receive their master's degree from that college.

The Undergraduate/Graduate Coursework and Admissions requirements [detailed above](#) must be satisfied by students interested in this combined program. Students must also complete the prerequisite coursework for the master's degree while pursuing the bachelor's degree at WHC as listed with the [M.S.](#)

in [Computer Science](#). This combined program provides an attractive way for students to continue their graduate work. The undergraduate program is completed first, and the entire combined program can be completed in approximately five years.

### **Degree Requirements**

To be eligible for the combined B.A. or B.S. in Biological and Physical Sciences to M.S. in Computer Science degree program, students must fulfill the following requirements:

1. Completion of the requirements for the B.A. or B.S. in Biological and Physical Sciences at the WHC, and any other requirements stipulated by the College and University; and
2. Completion of all requirements for the M.S. in Computer Science program in the Engineering and Computer Science Department with either the thesis or non-thesis option.

## **BIOLOGICAL AND PHYSICAL SCIENCES TO ELECTRICAL ENGINEERING BACHELOR OF ARTS (B.A.) OR BACHELOR OF SCIENCE (B.S.) TO MASTER OF SCIENCE (M.S.) COMBINED PROGRAM**

The B.A. or B.S. degree is completed at the Wilkes Honors College (WHC), and students then receive their bachelor's degree from WHC. Students complete their master's degree work in [Electrical Engineering](#) in the Department of Electrical Engineering and Computer Science in the College of Engineering and Computer Science and receive their master's degree from that college.

The Undergraduate/Graduate Coursework and Admissions requirements [detailed above](#) must be satisfied by students interested in this combined program. Students must also complete the prerequisite coursework for the master's degree while pursuing the bachelor's degree at WHC as listed with the [M.S. in Electrical Engineering](#). This combined program provides an attractive way for students to continue their graduate work. The undergraduate program is completed first, and the entire combined program can be completed in approximately five years.

### **Degree Requirements**

To be eligible for the combined B.A. or B.S. in Biological and Physical Sciences to M.S. in Electrical Engineering degree program, students must fulfill the following requirements:

1. Completion of the requirements for the B.A. or B.S. in Biological and Physical Sciences at the WHC, and any other requirements stipulated by the College and University; and
2. Completion of all requirements for the M.S. in Electrical Engineering program in the Electrical Engineering and Computer Science Department with either the thesis or non-thesis option.

**BIOLOGICAL AND PHYSICAL SCIENCES TO INFORMATION TECHNOLOGY  
AND MANAGEMENT**  
**BACHELOR OF ARTS (B.A.) OR BACHELOR OF SCIENCE (B.S.) TO  
MASTER OF SCIENCE (M.S.)  
COMBINED PROGRAM**

**Advanced Information Technology Concentration**

The B.A. or B.S. degree is completed at the Wilkes Honors College (WHC), and students then receive their bachelor's degree from WHC. Students complete their master's degree work in [Information Technology and Management with Advanced Information Technology Concentration](#) in the Department of Electrical Engineering and Computer Science in the College of Engineering and Computer Science and receive their master's degree from that college.

The Undergraduate/Graduate Coursework and Admissions requirements [detailed above](#) must be satisfied by students interested in this combined program. Students must also complete the prerequisite coursework for the master's degree while pursuing the bachelor's degree at WHC as listed with the [M.S. in Information Technology and Management, Advanced Information Technology Concentration](#). This combined program provides an attractive way for students to continue their graduate work. The undergraduate program is completed first, and the entire combined program can be completed in approximately five years.

**Degree Requirements**

To be eligible for the combined B.A. or B.S. in Biological and Physical Sciences to M.S. in Information Technology and Management with Advanced Information Technology Concentration degree program, students must fulfill the following requirements:

1. Completion of the requirements for the B.A. or B.S. in Biological and Physical Sciences at the WHC, and any other requirements stipulated by the College and University; and
2. Completion of all requirements for the M.S. in Information Technology and Management with Advanced Information Technology Concentration program in the Engineering and Computer Science Department with either the thesis or non-thesis option.

**BIOLOGICAL AND PHYSICAL SCIENCES TO INFORMATION TECHNOLOGY  
AND MANAGEMENT**  
**BACHELOR OF ARTS (B.A.) OR BACHELOR OF SCIENCE (B.S.) TO**

## MASTER OF SCIENCE (M.S.) COMBINED PROGRAM

### Computer Science Data Analytics Concentration

The B.A. or B.S. degree is completed at the Wilkes Honors College (WHC), and students then receive their bachelor's degree from WHC. Students complete their master's degree work in [Information Technology and Management with Computer Science Data Analytics Concentration](#) in the Department of Electrical Engineering and Computer Science in the College of Engineering and Computer Science and receive their master's degree from that college.

The Undergraduate/Graduate Coursework and Admissions requirements [detailed above](#) must be satisfied by students interested in this combined program. Students must also complete the prerequisite coursework for the master's degree while pursuing the bachelor's degree at WHC as listed with the [M.S. in Information Technology and Management, Computer Science Data Analytics Concentration](#). This combined program provides an attractive way for students to continue their graduate work. The undergraduate program is completed first, and the entire combined program can be completed in approximately five years.

### Degree Requirements

To be eligible for the combined B.A. or B.S. in Biological and Physical Sciences to M.S. in Information Technology and Management with Computer Science Data Analytics Concentration degree program, students must fulfill the following requirements:

1. Completion of the requirements for the B.A. or B.S. in Biological and Physical Sciences at the WHC, and any other requirements stipulated by the College and University; and
2. Completion of all requirements for the M.S. in Information Technology and Management with Computer Science Data Analytics Concentration program in the Engineering and Computer Science Department with either the thesis or non-thesis option.

## BIOLOGICAL AND PHYSICAL SCIENCES TO MECHANICAL ENGINEERING BACHELOR OF ARTS (B.A.) OR BACHELOR OF SCIENCE (B.S.) TO MASTER OF SCIENCE (M.S.) COMBINED PROGRAM

The Wilkes Honors College (WHC) and the College of Engineering and Computer Science offer a combined Bachelor of Arts or Bachelor of Science in Biological and Physical Sciences to Master of

Science in Mechanical Engineering degree program. The Bachelor of Arts or Bachelor of Science degree will be completed and received from the WHC. Students complete the Master of Science in Mechanical Engineering in the Department of Ocean and Mechanical Engineering at FAU and will receive the master's degree from that college.

Students may count up to 12 credits of approved graduate coursework (5000 level or higher) toward both their bachelor's and master's degrees. These graduate courses will replace the upper-level elective courses in the bachelor's program. The combined program totals a minimum of 150 credits:

1. The student must take a minimum 120 credits for the bachelor's degree; and
2. The student must take a minimum of 30 credits in 5000 level or higher courses for the master's program.

Students must complete the prerequisite coursework for the master's degree while pursuing the bachelor's degree at the WHC. This combined program provides an attractive way for students to continue their graduate work. Students complete the undergraduate program first. The combined program can be completed in approximately five years.

### **Admission Requirements**

The GRE is not required for this combined program. To be eligible for the combined program, the bachelor's students in the WHC should:

1. Have a cumulative FAU GPA of 3.25 or better at the end of their junior year. Note that the cumulative FAU GPA of at least 3.25 must be maintained until the completion of the bachelor's degree in the WHC.
2. Formally apply to the combined program, completing the admissions process at least one semester prior to the beginning of the M.S. portion of their program.

Students in the combined program must maintain continuous enrollment to remain in good standing. Students must also meet all the degree requirements of the graduate program they have chosen, including prerequisite courses.

### **Degree Requirements**

To be eligible for the combined B.A or B.S. in Biological and Physical Sciences to M.S. in Mechanical Engineering Degree Program, students must fulfill the following requirements:

1. Completion of all requirements for the M.S. in Mechanical Engineering program in the OME department, using either the thesis or non-thesis option.
2. Completion of the requirements for the B.A or B.S. in Biological and Physical Sciences in the

WHC and other requirements stipulated by the University and College

## **BIOLOGICAL AND PHYSICAL SCIENCES TO OCEAN ENGINEERING BACHELOR OF ARTS (B.A.) OR BACHELOR OF SCIENCE (B.S.) TO MASTER OF SCIENCE (M.S.) COMBINED PROGRAM**

The Wilkes Honors College (WHC) and the College of Engineering and Computer Science offer a combined Bachelor of Arts or Bachelor of Science in Biological and Physical Sciences to Master of Science in Ocean Engineering degree program. The Bachelor of Arts or Bachelor of Science degree will be completed and received from the WHC. Students complete the Master of Science in Ocean Engineering in the Department of Ocean and Mechanical Engineering (OME) at FAU and will receive the master's degree from that college.

Students may count up to 12 credits of approved graduate coursework (5000 level or higher) toward both their bachelor's and master's degrees. These graduate courses will replace the upper-level elective courses in the bachelor's program. The combined program totals a minimum of 150 credits:

1. The student must take a minimum 120 credits for the bachelor's degree; and
2. The student must take a minimum of 30 credits in 5000 level or higher courses for the master's program.

Students must complete the prerequisite coursework for the master's degree while pursuing the bachelor's degree at the WHC. This combined program provides an attractive way for students to continue their graduate work. Students complete the undergraduate program first. The combined program can be completed in approximately five years.

### **Admission Requirements**

The GRE is not required for this combined program. To be eligible for the combined program, the bachelor's students in the WHC should:

1. Have a cumulative FAU GPA of 3.25 or better at the end of their junior year. Note that the cumulative FAU GPA of at least 3.25 must be maintained until the completion of the bachelor's degree in the WHC.
2. Formally apply to the combined program, completing the admissions process at least one semester prior to the beginning of the M.S. portion of their program.

Students in the combined program must maintain continuous enrollment to remain in good standing. Students must also meet all the degree requirements of the graduate program they have chosen,

including prerequisite courses.

## **Degree Requirements**

To be eligible for the combined B.A or B.S. in Biological and Physical Sciences to M.S. in Ocean Engineering

Degree Program, students must fulfill the following requirements:

1. Completion of the requirements for the B.A or B.S. in Biological and Physical Sciences in the WHC and other requirements stipulated by the University and College.
2. Completion of all requirements for the M.S. in Ocean Engineering program in the OME department, using either the thesis or non-thesis option.

## **BIOLOGICAL AND PHYSICAL SCIENCES TO CIVIL, ENVIRONMENTAL OR GEOMATICS ENGINEERING TO CIVIL ENGINEERING BACHELOR OF ARTS (B.A.) OR BACHELOR OF SCIENCE (B.S.) TO SECOND BACHELOR OF SCIENCE (B.S.) TO MASTER OF SCIENCE (M.S.) COMBINED PROGRAM**

The Wilkes Honors College (WHC) and the College of Engineering and Computer Science (CoE&CS) offer a combined Bachelor of Arts or Bachelor of Science in Biological and Physical Sciences to a Second Bachelor of Science in Civil, Environmental or Geomatics Engineering to a Master of Science in Civil Engineering degree program. The B.A. or B.S. degree is completed and received from the WHC. The second bachelor's degree and master's degree are completed in the College of Engineering and Computer Science's Civil, Environmental and Geomatics Engineering Department and received from the CoE&CS. Students may count up to 12 credits of approved graduate coursework (5000 level or higher) toward both their second bachelor's and master's degrees. These graduate courses replace the upper-level elective courses in the bachelor's program. The combined program totals a minimum of 150 credits:

1. The student must take a minimum 120 credits for the first bachelor's degree;
2. The student must take a minimum of 30 credits for the second bachelor's degree; and
3. The student must take a minimum of 30 credits in 5000-level or higher courses for the master's program.

Students must complete the prerequisite coursework for the master's degree while pursuing the second bachelor's degree. This combined program provides an attractive way for students to continue their graduate work. Students complete the B.A. or B.S. undergraduate program first. The combined

program can be completed in approximately five years.

### **Admission Requirements**

The GRE is not required for this combined program. To be eligible for the combined program, bachelor's students in the WHC should:

1. Have a cumulative FAU GPA of 3.25 or better in their last 60 credits. Note that the cumulative FAU GPA of at least 3.25 must be maintained until the completion of the bachelor's degree in the WHC.
2. Formally apply to the combined program, completing the admissions process at least one semester prior to the beginning of the M.S. portion of their program.

Students must meet all the degree requirements of the graduate program they have chosen, including prerequisite courses.

### **Degree Requirements**

To be eligible for this combined program, students must fulfill the following requirements:

1. Completion of the requirements for the B.A or B.S. in Biological and Physical Sciences in the WHC, and other requirements stipulated by the University and College.
2. Completion of all requirements for the second B.S. in Civil Engineering, Environmental Engineering or Geomatics Engineering from the Civil, Environmental and Geomatics Engineering Department.
3. Completion of all requirements for the M.S. in Civil Engineering degree program in the Civil, Environmental and Geomatics Department, with either the thesis or the non-thesis (courses only) option.

## **LIBERAL ARTS AND SCIENCES TO HISTORY BACHELOR OF ARTS (B.A.) TO MASTER OF ARTS (M.A.) COMBINED PROGRAM**

### **History Concentration**

This combined degree program enables outstanding students to graduate with both a Bachelor of Arts with Major in Liberal Arts and Sciences with Concentration in History degree and a Master of Arts with a Major in History degree (B.A./M.A.) in as little as five years. The program is 150 credits (with thesis option) or 156 credits (without thesis option). Students complete 120 credits for the

undergraduate degree and 30 credits (thesis option) or 36 credits (non-thesis option) for the graduate degree. Students complete the undergraduate degree first, taking no more than 12 credits of graduate coursework in their senior year, which can be used to satisfy requirements for both degrees.

## Admission Requirements

1. Each applicant must be a declared History concentrator at Florida Atlantic University's Wilkes Honors College, with 60-90 credits completed toward the B.A. degree, including HIS 4971, RI: Honors Thesis in History or AMH 4970, RI: Honors Thesis in American History.
2. Applicants must have a minimum 3.25 GPA for the last 60 undergraduate credits attempted.
3. Applicants should have a minimum score of 155 on the verbal and a 4.0 on the analytical sections of the GRE. If the applicant has a GPA well over the 3.25 minimum, the department may consider the quantitative section for purposes of meeting the GRE criterion.
4. Applicants must demonstrate competency in at least one foreign language. To do so, applicants must complete one of the following two options:
  - a. Passing one semester at the intermediate level (2220) of a foreign language at FAU or the equivalent at another university as determined by the History Department's Graduate Committee.
  - b. Passing an equivalency exam at the 2220 level.
5. Applicants must submit two letters of recommendation, written by tenured or tenure-earning members of the Department of History or History professors at the Honors College.
6. Applicants must provide a writing sample as part of their application. This should be a term paper or lengthy essay.
7. Applicants must provide a two-to-three-page typed, double-spaced autobiographical statement indicating the nature of their preparation for graduate work and the reasons for seeking the combined B.A./M.A. degree in History.
8. Prospective applicants for the combined B.A./M.A. degree in History are encouraged to schedule an interview with the department's Director of Graduate Studies.
9. The application deadline is October 15 for Spring admission, and June 1 for Fall admission.

## Undergraduate Course Replacements

In their senior year, students admitted to the combined degree program may take up to 12 credits of graduate coursework, which are then used to satisfy requirements for both degrees. This will be accomplished by substituting 12 credits of free elective credit at the upper division (3000- 4000- level) with HIS 5060: The Historical Experience, and 9 credits of additional graduate coursework with course prefixes of AMH, EUH, HIS, LAH, or WOH at the 5000- or 6000-level.

## Degree Requirements

To be eligible for the combined B.A./M.A. degree in History, students must fulfill the following requirements:

1. Completion of all requirements for the B.A. in Liberal Arts and Science with Concentration in History in the Wilkes Honors College, in addition to other requirements as stipulated by the University and the College.
2. Completion of all requirements for the [M.A. in History major](#) with either the thesis or non-thesis option.

## LIBERAL ARTS AND SCIENCES TO MATHEMATICS

BACHELOR OF ARTS (B.A) TO  
MASTER OF SCIENCE (M.S.)  
COMBINED PROGRAM

### Mathematical Sciences Concentration

## BIOLOGICAL AND PHYSICAL SCIENCES TO MATHEMATICS

BACHELOR OF ARTS (B.A.) OR BACHELOR OF SCIENCE (B.S.) TO  
MASTER OF SCIENCE (M.S.)  
COMBINED PROGRAM

### Mathematics Concentration

This is an accelerated five-year program where students complete the Bachelor of Arts (B.A.) or Bachelor of Science (B.S.) degree with a Math concentration in the Wilkes Honors College and then continue on with the [Master of Science \(M.S.\) degree in Mathematics](#) in the Charles E. Schmidt College of Science.

The combined degree program is 150 credits: 120 credits for the undergraduate degree and 30 for the master's degree, with a maximum of 12 credits of graduate coursework used to satisfy both degrees. Once admitted into the program, students follow the suggested course sequences within a single concentration. The baccalaureate degree will be conferred before the master's degree.

Students must maintain a GPA of 3.0 in upper-division and graduate courses. Students interested in this program should consult with the undergraduate and graduate advisors before taking upper-division mathematics coursework to ensure that their coursework will apply toward the combined degree.

Students apply for admission to candidacy by the end of their junior year.

### **The Bachelor's Curriculum**

Students must complete the requirements of the B.A. with concentration in Mathematical Sciences or the B.A./B.S. degree with concentration in Mathematics from the Wilkes Honors College. In addition, students must complete MAS 4107 Linear Algebra 2 and STA 4442 Probability and Statistics 1.

Twelve graduate credits from the Department of Mathematics and Statistics can be counted toward both the bachelor's degree and the master's degree. The 12 graduate credits should be chosen within a single concentration of the master's program. These 12 credits may be counted as the upper-division math electives or substituted as follows:

- MAA 5228 can be used to substitute for MAA 4200
- MAS 5311 can be used to substitute for MAS 4301
- MAS 5145 can be used to substitute for MAS 4107

### **The Master's Curriculum**

Students complete all requirements for the [M.S. degree in Mathematics](#).

The Charles E. Schmidt College of Medicine's mission as a community-based medical school is to advance the health and well-being of our community by training future generations of humanistic clinicians and scientists and translating discovery into patient-centered care. In addition to its M.D. program, the College of Medicine offers the [Master of Science \(M.S.\) in Biomedical Science](#) (with or without thesis), the [Ph.D. in Integrative Biology](#) and the [Ph.D. in Neuroscience](#). A [Biomedical Science certificate](#) and a [Genomics and Predictive Health certificate](#) are also offered. These programs are detailed below.

### **Faculty:**

Abruna Miranda, J. A.; Alter, S.; Averkiou, P.; Benjamin, L.; Berkowitz, L.; Bertollo, S.; Billington, M. E.; Blakely, R.; Bommareddy, A.; Brennan, L.; Brickman, L.; Bubna, N.; Buteau, S.; Caceres, J. W.; Caputi, M.; Casey, R.; Cippitelli, A.; Clayton, L.; Collins, B.; Cornelia, C.; Darling, A.; Demner, A.; Di Corcia, M.; Drowos, J.; Edison, N.; Eisenberg, E.; Ferris, A.; Foster, J.; Fraser-Damas, S.; Freeman-Costin, K.; Freire Machi, J.; Gleiber, M.; Gografe, S.; Goldman, S.; Grant, P. A.; Gundersen, E. C.; Guthrie, K. M.; Gutman, D.; Hahn, M.; Haire, H.; Hanafy, K.; Hennekens, C. Y.; Wyatt, A.; Zahra, T.; Zhang, Q.

## DOCTORAL PROGRAMS

### **MEDICINE**

#### **DOCTORATE OF MEDICINE (M.D.)**

The College of Medicine developed an innovative curriculum for the Doctorate of Medicine that features early community-based clinical experiences, integrated basic science courses with an emphasis on small-group and self-directed learning, longitudinal integrated clerkships at seven affiliated hospitals

in Palm Beach and Broward counties, continuity faculty advising and a small class size that fosters a collegial and supportive learning environment. The College provides a student-centered and patient-focused approach that includes regular experiences in its Clinical Skills Simulation Center and interprofessional education with FAU's Nursing and Social Work students. A key component is a curriculum in geriatric medicine that spans the four years of the curriculum. For more information about the medical program, click [here](#).

FAU has also partnered with Scripps Florida to offer a dual Doctorate of Medicine/Doctorate of Philosophy (M.D./Ph.D.) degree, with the medical degree conferred by FAU and the Doctorate of Philosophy conferred by The Scripps Research Institute's Kellogg School of Science and Technology. The College sponsors three Bachelor's/M.D. programs within the University that are completed in seven to eight years. The first program, MedDirect, is offered at the University's Boca Raton campus. The second program is offered through the Harriet L. Wilkes Honors College on the Jupiter campus and is referred to as the Wilkes Medical Scholars program. Both of these Bachelor's/M.D. programs are for academically talented high school students who wish to study medicine based on their knowledge of the profession and first-hand medical experiences. For admission requirements and descriptions of these programs, visit the [Bachelor's/M.D. site](#). The third program is the [FAU High School M.D. Direct Program](#). This program is a highly selective, collaborative program with the FAU Charles E. Schmidt College of Medicine for students (only FAU High School students are eligible to apply) who are exceptional academically and have a strong desire to pursue a career in medicine. Admitted students earn a B.A. or B.S. degree from FAU, an approved two-year M.S. degree from FAU and the M.D. degree from the FAU College of Medicine in seven or eight years.

### **Admission Requirements**

Applicants for the Doctorate of Medicine degree must begin the process by completing an American Medical College Application Service (AMCAS) application online. All applicants must be U.S. citizens or unconditional permanent residents of the United States with an alien registration receipt card in their possession at the time they complete the AMCAS application. Applicants must take the MCAT exam (and release their scores) no later than the fall preceding the year in which they hope to enroll. Applicants who have their verified AMCAS application forwarded to the College of Medicine will be offered an opportunity to complete a secondary application. Completed applications (AMCAS application, letters of recommendation, MCAT score and secondary application) are reviewed by an appraisal committee, which selects those applicants who will be invited for an on-campus interview. Only applicants who complete the on-campus interview with a member of the interview committee will be considered by the admissions committee for admission to the College of Medicine.

Although preference is given to Florida residents, residents of any state may apply, and up to 15 percent of each entering class may come from states other than Florida. To receive consideration as a Florida resident, applicants must list Florida as their state of legal residence on their AMCAS application. The College of Medicine's goal is to create an enriched learning environment for medical students by admitting applicants from a wide variety of backgrounds. Therefore, qualified students from groups currently underrepresented in medicine—women, students from socioeconomically disadvantaged backgrounds, students from rural or underserved areas and those from non-traditional educational backgrounds—are especially encouraged to apply.

***Courses required for admission are:***

1. English (2 semesters or 3 quarters);
2. Inorganic Chemistry with labs (2 semesters or 3 quarters);
3. Organic Chemistry with labs (2 semesters or 3 quarters);
4. Physics with labs (2 semesters or 3 quarters);
5. Biology/Zoology with labs (2 semesters or 3 quarters);
6. Mathematics (2 semesters or 3 quarters);
7. Additional science (2 semesters or 3 quarters)

Courses in the sciences and mathematics that are *recommended but not required* include biochemistry, cell and molecular biology, genetics and statistics. The College of Medicine strongly encourages all applicants to broaden their education and supplement required coursework in math and science by pursuing their own individual academic interests. Applicants who major in the sciences do not have an advantage over those majoring in the social sciences or humanities.

The deadline for completing all prerequisite coursework is the end of the spring semester or quarter prior to matriculation. Since some required courses may be taken or completed after the submission of the AMCAS application, all accepted students will be required to submit final official transcripts from all colleges and universities attended in the United States and Canada to the Office of Admissions before matriculation. These transcripts will be used to confirm that the accepted applicant has satisfactorily completed all required courses and received a bachelor's degree or qualified for the granting of the degree. Any deficiencies may be cause for revocation of the acceptance or for deferment to the next entering class.

The admissions committee utilizes a holistic review process that allows for balanced consideration of the multiple ways in which an applicant may demonstrate his or her capacity as a future medical student and physician and ability to contribute to the diversity of the College of Medicine. Among the factors considered in all admissions decisions are:

1. GPAs and MCAT scores;
2. Rigor of the educational program(s) undertaken;
3. Breadth of life experiences;
4. Ability to contribute to an enriched learning environment for all students;
5. Meaningfulness of direct patient contact experiences;
6. Research experiences;
7. Quality of letters of recommendation;
8. Interpersonal skills;
9. Personal qualities and background;
10. Source and degree of motivation to study and practice medicine.

### **Degree Requirements**

Prior to graduation and receipt of the Doctorate of Medicine degree from the Florida Atlantic University Charles E. Schmidt College of Medicine, students must demonstrate proficiency and compliance in, and satisfy the requirements of, each of the following six areas:

1. **Courses and Clerkships:** Students must complete the required core courses and clerkships and the designated minimum number of elective and selective courses with Satisfactory (passing level) performance.
2. **Licensing Exams:**
  - a. Students must pass the USMLE Step I examination before beginning the third academic year.
  - b. Students must pass the USMLE Step II Clinical Knowledge and Clinical Skills examinations by the deadlines listed in the USMLE policy in the College of Medicine Handbook..
3. **Competency Assessments:**
  - a. Students must pass all FAU College of Medicine Institutional Competency Assessments.
  - b. Students must earn certification for Advanced Cardiac Life Support (ACLS) and Basic Life Support (BLS).
4. **Professional Performance:** Students must demonstrate consistent evidence of professionalism as assessed by the Medical Students Promotions and Professional Standards Committee (MSPPSC) per the competency-based grading system and the Physicianship and Professionalism Advocacy Program (PPAP).
5. **Review and Approval of Academic and Professional Record:** Students must receive the MSPPSC's recommendation for graduation and receipt of the Doctorate of Medicine degree. The MSPPSC's recommendation for graduation and receipt of the M.D. degree must be approved by

the Dean of the FAU College of Medicine.

## Required Courses

The following table lists required courses for the medical program.

<b>Year 1 Courses</b>		
Foundations of Medicine 1	BMS 6015	10
Foundations of Medicine 2	BMS 6016	13
Neuroscience and Behavior	BMS 6020	9
Fundamentals of Biomedical Science-	BMS 6031	21
Pathophysiology and Therapeutics 1	BMS 6541	8
<b>Year 2 Courses</b>		
Foundations of Medicine 3	BMS 6017	13
Foundations of Medicine 4	BMS 6022	4
Pathophysiology and Therapeutics 2	BMS 6542	11
Pathophysiology and Therapeutics 3	BMS 6543	9
USMLE Step 1 Review	BMS 6960	6
Pathophysiology and Therapeutics 4	BMS 6544	6
<b>Year 3 Courses</b>		
Synthesis and Transition	BMS 6405	4
Medical and Surgical Sciences LIC	MDC 7012	10
Family and Community Health Sciences LIC	MDC 7011	10
Internal Medicine Clerkship	MDC 7200	25
Obstetrics and Gynecology Clerkship	MDC 7180	20
Pediatrics Clerkship	MDC 7400	20

Psychiatry Clerkship	MDC 7830	20
Surgery Clerkship	MDC 7600	25
Community and Preventative Medicine Clerkship	MDC 7120	14
Elective Rotation	MDE 8011	6-12
<b>Year 4 Courses</b>		
Elective Rotation (if not taken in Year 3)	MDE 8011	6-12
Transition to Residency	MDE 8067	18 <del>6</del>
Acting Internship Rotation	MDI 8010	12
Selective Rotation	MDS 8011	12

## **INTEGRATIVE BIOLOGY**

### **DOCTOR OF PHILOSOPHY (PH.D.)**

**Biomedical Science Concentration**  
**Environmental Science Concentration**  
**Marine Science and Oceanography Concentration**  
**Neuroscience Concentration**

*(Minimum of 80 credits required)*

The Charles E. Schmidt College of Medicine offers a doctoral program leading to the Doctor of Philosophy (Ph.D.) degree in Integrative Biology. This is a joint program with the Department of Biological Sciences of the Charles E. Schmidt College of Science in which students can pursue interests across a number of fields, including marine science, biomedical science, biotechnology and biology. For complete program details, [click here](#).

## **NEUROSCIENCE**

### **DOCTOR OF PHILOSOPHY (PH.D.)**

*(Minimum of 72 credits required)*

This doctoral program in Neuroscience is a multi-college, multi-institute interdisciplinary degree program organized in partnership with the FAU Brain Institute. Graduate-level instruction is provided by faculty in multiple departments located in the Charles E. Schmidt College of Science, the Charles Schmidt College of Medicine, the College of Engineering and Computer Science, the College of Education and the Harriet L. Wilkes Honors College. Affiliated faculty from the Max Planck Florida Institute for Neuroscience and Scripps Research Florida also participate in the program. The program aims to equip students with the advanced conceptual and technical skills needed to forge productive, neuroscience-oriented careers in industry, academia and government. Specific details for this doctoral program appear in the [Interdisciplinary Programs](#) section of this catalog.

## MASTER'S PROGRAM

### BIOMEDICAL SCIENCE

#### MASTER OF SCIENCE (M.S.)

*(Minimum of 30 credits required)*

Students interested in pursuing advanced studies in biomedical science may obtain a degree of Master of Science (M.S.) with Major in Biomedical Science, taking either the thesis or non-thesis option. The thesis option is oriented toward those students interested in pursuing biomedical research or careers in academia. The non-thesis program is an option for students seeking to solidify their knowledge base in order to apply to appropriate professional schools or pursue careers in the biomedical sciences industry.

#### **Admission Requirements**

All program applicants must have an undergraduate grade point average of 3.0 in the last 60 credits and competitive Graduate Record Exam (GRE) scores (scores are valid for five years). These are minimum requirements that are necessary for consideration for admission to the program. Higher scores will increase applicants' chances for admission. Prerequisites of the master's degree program include one year each of biology, chemistry and physics; one semester each of biochemistry and organic chemistry; and at least two upper-division biology classes. A personal statement explaining career goals is required as well as three letters of recommendation, at least two of which must be from former professors.

#### **Recency of Credits**

No credit that is more than seven years old at the time the M.S. in Biomedical Science degree is

awarded may be counted toward the degree.

## Degree Requirements

### *Non-Thesis Option*

This option requires a minimum of 30 graduate-level credits. With their advisor's approval, students design a course of study courses offered in the Charles E. Schmidt College of Medicine as well as courses in related departments and colleges chosen from the following list.

### *Thesis Option*

This option requires a minimum of 30 credits consisting of coursework chosen from the list below, a minimum of 6 thesis credits, 3 thesis-related research credits. Students design a course of study and research with the guidance and approval of the advisors and thesis committees. Thesis students are required to make a formal research proposal to their committees within their first year prior to enrollment in thesis credits. In addition, upon completion of their research, they must make a formal thesis presentation and defense in the semester they plan to graduate. All thesis students must also receive certification of completion of the Responsible Conduct of Research program. The RCR program, which is offered jointly through the Graduate College and Division of Research, covers the nine instructional areas of RCR. All four components are mandatory in order to receive certification of completion.

Students wishing to change their admission from the thesis option to the non-thesis option must submit to the Graduate Program Committee a letter of request that states the justification for the change and a letter from the thesis advisor in support of the request. An interview with the Graduate Program Committee may be required. A maximum of 6 credits from the thesis career can be applied toward the non-thesis career upon approval by the Graduate Program Committee. PCB 6974 and PCB 6971 credits are non-transferable.

## CERTIFICATE PROGRAMS

### BIOMEDICAL SCIENCE GRADUATE CERTIFICATE

*(Minimum of 12 credits required)*

Biomedical Science is a broad and interdisciplinary field focused on understanding and improving human health. It incorporates diverse areas of specialized investigation that share this common goal, including anatomy, biochemistry, genetics, immunology, microbiology, pharmacology and others. The Biomedical Science certificate is offered to provide master's and Ph.D. students an integrated background in the biomedical sciences. To achieve this, the 12-credit program is designed with flexibility. Although the program is centered on the Charles E. Schmidt College of Medicine, faculty from other colleges and institutions contribute to the program's success, and students are welcomed from many departments, centers and colleges throughout the University.

### Admission Requirements

Admission to and completion of this program is organized by the Graduate Program Office in the College of Medicine. For admission, the applicant must satisfy the following criteria:

1. Enrollment in an FAU master's or Ph.D. training program in any of the following: Biomedical Science, Biological Sciences, Chemistry and Biochemistry, Complex Systems and Brain Sciences, Integrative Biology and Psychology. Students must have approval of their graduate program to enroll and must remain in good standing with their graduate program to continue in this certificate.
2. Demonstrate competency in life science, mathematics and other courses related to the certificate program, such as by achieving at least a "B" in these courses.
3. Interview with the certificate director or graduate committee chair to discuss program goals and requirements and obtain permission to enroll.

### Program Requirements

The certificate curriculum provides students opportunities to survey different areas of the biomedical sciences and to focus on areas of particular interest. Program requirements are designed to be tailored to the individual student with previous coursework and future goals in mind.

1. **Students must achieve a minimum grade of "B" in four of the courses below for a total of 12 credits:**

---

Choose four courses from the list below (12 credits)

---

Integrated Morphology 1	BMS 6102C	4
Integrated Morphology 2	BMS 6104C	4
Clinical Microbiology	BMS 6303	3
Autonomic Function and Diseases	BMS 6523	3

Fundamentals of General Pathology	BMS 6601	3
Brain Diseases: Mechanism and Therapy	BMS 6736	3
Macromolecular Therapy for Human Diseases	GMS 6301	3
Molecular Basis of Disease and Therapy	GMS 6302	3
Data Interpretation and Analysis in the Age of Precision Medicine	GMS 6860	3
Host Defense and Inflammation	MCB 6208	3
Advanced Molecular and Cellular Biology	PCB 5532	3
Neurobiology of Addiction	PCB 5844	3
Advanced Cell Physiology	PCB 6207	3
Molecular Basis of Human Cancer	PCB 6235	3
Problem-Based Immunology	PCB 6238	3
Tumor Immunology	PCB 6239	3
Human Genetics	PCB 6665	3
Molecular Biology of the Cardiovascular System and Cardiac Disease	PCB 6705	3
Adult Neurogenesis	PCB 6848	3
Physiology of the Heart	PCB 6885	3
Special Topics	PCB 6933	3
Developmental Neurobiology	PSB 6515	3

**2. Students must participate in the College of Medicine Research Day each year showcasing graduate student research in the College.**

**Note:** No credit that is more than seven years old at the time the graduate certificate in Biomedical Science is awarded may be counted toward the certificate.

## GENOMICS AND PREDICTIVE HEALTH GRADUATE CERTIFICATE

*(Minimum of 12 credits required)*

The Genomics and Predictive Health certificate is offered to provide master's and Ph.D. students an integrated background in the field of genomics and predictive health. The certificate program covers advancements in the field of personalized medicine, DNA sequencing technologies and commercial applications of genetic research. A minimum of 12 graduate credits of coursework is required to provide core experiences in the various predictive health domains (disease discovery, customized therapies and prevention). Although the program is centered within the Charles E. Schmidt College of Medicine, faculty from other FAU colleges and institutions contribute to the program's success, and students from many departments and colleges throughout the University are welcomed.

Genomics and predictive health is a broad, interdisciplinary field focused on understanding and improving human health. It incorporates diverse areas of specialized investigation that share this common goal including anatomy, biochemistry, cell biology, clinical sciences, cognitive sciences, development, genetics, immunology, medical sciences, microbiology, molecular biology, pathology, pharmacology, psychology and others.

### **Admission Requirements**

Admission to and completion of this program is overseen by the Graduate Program Office in the Charles E. Schmidt College of Medicine. For admission, the applicant must satisfy the following criteria:

1. Must be enrolled in an FAU master's or Ph.D. program including, but not limited to, Biomedical Science, Biology, Biochemistry, Complex Systems and Brain Sciences, Integrative Biology, Psychology and Bioengineering. Students must have approval of their graduate program to enroll and must remain in good standing with their graduate program to continue in the certificate program;
2. Must meet with the Office of Graduate Programs' advisor to discuss program goals and requirements and obtain permission to enroll.

### **Program Requirements**

The certificate program requires 12 credits that are designed to be tailored to the individual student with previous coursework and future goals in mind.

**Required Courses (9 credits)**

Human Genetics	PCB 6665	3
Integrating Genomics into Predictive Health	PCB 6667	3
Graduate Seminars (1 credit per semester on a continuous basis for total of 3 credits)	PCB 6934	3

**Complete one of the following elective courses (3 credits)**

Emerging Applications in Oncology and Pharmacogenomics	PCB 6230	3
Special Topics (Communicating in the Age of Predictive Health)	PCB 6933	3
Special Topics (Implementing Learning Health Systems)	PCB 6933	3

A., Emeritus; Wiese, L.; Williams, C., Emeritus; Wilson, C.; Winland-Brown, J., Emeritus; Wisdom-Chambers, K.

**Accreditation:** The baccalaureate, master's and doctor of nursing practice degree programs in nursing are fully accredited by the Commission on Collegiate Nursing Education. The baccalaureate program is approved by the Florida State Board of Nursing. All programs are approved as part of the University's accreditation process by the Southern Association of Colleges and Schools.

### **Overview of the College of Nursing**

The Christine E. Lynn College of Nursing is dedicated to caring: advancing the science, studying its meaning, practicing the art and living it day to day.

Through its excellent faculty and programs on the Boca Raton, Davie and Harbor Branch campuses, the College offers Bachelor of Science in Nursing, Honors in Nursing, Master of Science in Nursing, Doctor of Nursing Practice, Doctor of Philosophy and certificate programs to prepare nurses for practice, leadership, research and community service.

The College offers the following programs:

1. Bachelor of Science in Nursing (B.S.N.) degree for graduating high school students in the

Freshman Direct Admit Track and an Honors in Nursing Program for Freshman Direct Admit students.

2. Bachelor of Science in Nursing (B.S.N.) degree for registered nurses with an associate degree or diploma from an ACEN- or CNEA-accredited nursing program. (ACEN-Accreditation Commission for Education in Nursing; CNEA-Commission for Nursing Education Accreditation.)
3. Bachelor of Science in Nursing (B.S.N.) degree in an accelerated format to individuals with a baccalaureate degree in a discipline other than nursing.
4. Bachelor of Science in Nursing (B.S.N.) degree in a part-time format for individuals with a baccalaureate degree in a discipline other than nursing (also referred to as Working Professional B.S.N.). **(Not accepting students at this time.)**
5. Two combined degree programs: Bachelor of Science in Nursing (B.S.N) to either a master's degree with major in [Artificial Intelligence](#) or a master's degree with major in [Biomedical Engineering](#).
6. Master of Science in Nursing (M.S.N.) degree with concentrations in Adult/Gerontological Nurse Practitioner, Advanced Holistic Nursing, Family Nurse Practitioner, Nurse Educator and Nursing Administration and Financial Leadership.
7. Post Graduate Certificates in Adult/Gerontological Nurse Practitioner, Family Nurse Practitioner, Psychiatric Mental Health Nurse Practitioner, Clinical Nurse Leader, Advanced Holistic Nursing, Nursing Administration and Financial Leadership, and Nurse Educator.
8. Doctor of Nursing Practice (D.N.P.) for students with master's degrees in an area of advanced nursing practice or nursing administration, or for highly qualified Bachelor of Science in Nursing graduates through the B.S.N. to D.N.P. program with concentrations in Adult/Gerontological Nurse Practitioner, Family Nurse Practitioner and Psychiatric Mental Health Nurse Practitioner. Highly qualified D.N.P. graduates may also pursue the D.N.P. to Ph.D. program.
9. Doctor of Philosophy with a Major in Nursing (Ph.D.) degree with admission to students with B.S.N. or M.S.N. preparation. The major area of focus is research and theory development related to the phenomenon of caring.

## **Vision**

The Florida Atlantic University Christine E. Lynn College of Nursing will be the international preeminent leader in advancing caring science through its dynamic, innovative caring-based education, research, scholarship and practices.

## **Mission**

The Christine E. Lynn College of Nursing, as an integral part of Florida Atlantic University, is committed to the pursuit of higher education grounded in the arts, sciences and humanities. Faculty of the College support the University mission of teaching, research/scholarship and service within an

environment that fosters inclusiveness. The College is dedicated to caring: advancing the science, studying the meaning, practicing the art and living caring day to day.

## **Philosophy**

Nursing is a discipline of knowledge and professional practice grounded in caring. Nursing makes a unique contribution to society by nurturing the wholeness of persons and environment in caring. Caring in nursing is an intentional, mutual human process in which the nurse artistically responds with authentic presence to calls from persons to enhance well-being. Nursing occurs in nursing situations: co-created lived experiences in which the caring between nurses and persons enhances well-being. Nursing is both science and art. Nursing science is the evolving body of distinctive nursing knowledge developed through systematic inquiry and research. The art of nursing is the creative use of nursing knowledge in practice. Knowledge development and practice in nursing require the complex integration of multiple patterns of knowing. Nurses collaborate and lead interprofessional research and practice to support the health and well-being of persons inextricably connected within a diverse global society.

Persons as participants in the co-created nursing situation refers to individuals, families or communities. Persons are unique and irreducible, dynamically interconnected with others and the environment in caring relationships. The nature of being human is to be caring. Humans choose values that give meaning to living and enhance well-being. Well-being is creating and living the meaning of life. Persons are nurtured in their wholeness and well-being through caring relationships.

Beliefs about learning and environments that foster learning are grounded in our view of person, the nature of nursing and nursing knowledge and the mission of the University. Learning involves the lifelong creation of understanding through the integration of knowledge within a context of value and meaning. A supportive environment for learning is a caring environment. A caring environment is one in which all aspects of the person are respected, nurtured and celebrated. The learning environment supports faculty-student relationships that honor and value the contributions of all, and shared learning and growth.

The above fundamental beliefs concerning nursing, person and learning express our values and guide the actions of faculty as they pursue the missions of teaching, research/scholarship and service shared by the Christine E. Lynn College of Nursing and Florida Atlantic University.

## **Christine E. Lynn College of Nursing Professional Statement**

When students of nursing begin their course of study, they enter into an implied professional agreement agreeing to abide by the American Nurses Association (ANA) Code of Nursing Ethics and to conduct themselves in all aspects of their lives in a manner becoming a professional nurse.

The College of Nursing faculty holds a professional ethic of caring and healing, recognizing that each person's environment includes everything that surrounds an individual. Similarly, the College creates an environment that preserves the wholeness and dignity of self and others. The faculty requires self and socially responsible behavior and will not accept actions that can be perceived as hostile, threatening or unsafe to others. It is the College's expectation that students promote a positive public image of nursing. It is the College's goal, as a professional college, to build an expanding community of nursing scholars and leaders within the context of its caring-based philosophy. Safety of the person being nursed and accountability for individual actions are priorities and/or critical components/elements of a professional nursing education.

Students who do not abide by this policy will be subject to appropriate academic sanctions, which may include disciplinary action, dismissal from the College of Nursing and/or suspension or expulsion from the University.

Legislation aimed at protecting the public has made it necessary to require a Level 2 criminal background check for admission into the Christine E. Lynn College of Nursing.

If upon application the background check reveals violations, students may be denied admission. If the background check reveals violations and the student is admitted, however, the student may still be denied licensure or admission to a clinical agency. Please carefully read the Clinical/Practicum Hours Requirements Clarification found [here](#).

Enrolled students may be required to repeat one or more components of the background check process during the program, dependent upon agency regulations. Results of all components of the background check process must be on file with the College of Nursing for review before students may participate or enroll in any courses or activities that involve or require patient contact.

Random or routine drug screens may be required during the program of study by facilities where patient contact occurs or by the College if reasonable suspicion of substance use exists. Results of drug screens indicating violations of substance use may be basis for dismissal from the program. All costs related to background checks and drug screens are the responsibility of the student or applicant. It is also the student's responsibility to make sure an oath and affirmation is completed yearly from the date of the initial background check.

# BACHELOR'S PROGRAMS

## [Link to Graduate Programs](#)

The Bachelor of Science in Nursing (B.S.N.) program leads to a B.S.N. degree, the foundation of professional nursing practice. The B.S.N. program includes three tracks:

1. Freshman Direct Admit Track for graduating high school students (Honors in Nursing available in this track);
2. Accelerated Track for individuals with a baccalaureate degree in another discipline;
3. Part-Time Track for individuals with a baccalaureate degree in another discipline (**not accepting students at this time**);
4. RN-B.S.N. Track for Registered Nurses with an associate degree or diploma in Nursing from an ACEN- or CNEA-accredited nursing program. (ACEN-Accreditation Commission for Education in Nursing; CNEA-Commission for Nursing Education Accreditation.)

Policies for all bachelor's degree programs at FAU are available [here](#).

## **Bachelor of Science in Nursing Program Objectives**

The purpose of the undergraduate program is to advance the study, understanding and professional practice of the discipline of nursing.

The overall goal of the undergraduate curriculum is to prepare graduates whose practice of nursing nurtures the wholeness of persons through caring in nursing situations in a variety of settings.

The outcome objectives of the undergraduate program are that the graduate will be able to:

1. Unfold a personal journey of coming to know and care for self as person and nurse.
2. Synthesize knowledge from the sciences, arts and humanities as a foundation for generalist practice in nursing. Use nursing theories and research to guide caring-based, reflective nursing practice.
3. Integrate multiple, complex patterns of knowing in coming to know persons and responding critically and reflectively to calls within nursing situations in generalist nursing practice.
4. Practice ethical, safe nursing practice guided by professional standards.
5. Demonstrate cultural humility within nursing situations.
6. Use systematic inquiry to inform decision making, create nursing responses and evaluate outcomes.
7. Demonstrate competence in using technology and information systems to promote well-being,

facilitate decision making and enhance collaboration.

8. Promote well-being for persons and populations across the life span in a variety of settings.
9. Participate in creating caring environments that nurture wholeness.
10. Participate in social and political activities that honor human dignity and advocate for equity in healthcare outcomes, local and global health policy and healthcare delivery.
11. Collaborate with others as a caring leader to transform care in complex healthcare systems.
12. Practice responsible stewardship of the discipline and profession, resources and environment.

### **Undergraduate Research Certificate**

To recognize undergraduate students' excellence in undergraduate research, the Office of Undergraduate Research and Inquiry (OURI) has established the [Undergraduate Research Certificate](#). Requirements for the Research Certificate include completion of 12 credits of research exposure, skill-building and intensive courses as well as dissemination of the outcomes of students' research and inquiry through a research presentation or exhibition.

### **Admission Deadlines**

All required admission materials must be received by the deadlines posted for each B.S.N. track on the College of Nursing [website](#). Freshman Direct Admit and Accelerated tracks enroll once per year. The RN-B.S.N. Track admits each semester (fall, spring and summer); therefore, RN-B.S.N. students may enter the program in any semester.

## **HEALTH HUMANITIES UNDERGRADUATE MINOR**

*(Minimum of 15 credits)*

The minor in Health Humanities is open to all undergraduate students at FAU. The minor is awarded upon graduation from an undergraduate program at FAU; it is not awarded independently of an undergraduate degree. For minor details click [here](#).

## **NURSING BACHELOR OF SCIENCE IN NURSING (B.S.N.)**

*(Minimum of 120 credits required)*

### **Pre-Licensure B.S.N. Program Tracks**

The Pre-Licensure B.S.N. tracks lead to a baccalaureate degree in Nursing for the non-RN student. Graduates of these programs are qualified to be candidates for the NCLEX and, if successful, achieve

RN licensure. The Pre-Licensure tracks are limited access. Individuals must be admitted to FAU as undecided or health students prior to being considered for admission to the Freshman Direct Admit and Accelerated tracks of the B.S.N. program. Qualified applicants will be admitted into Nursing on a space-available basis. Admission as an undecided or health student does not guarantee admission to any track in the B.S.N. program. The Christine E. Lynn College of Nursing supports the University's policy of non-discrimination.

[Link to Honors in Nursing Program](#)

[Link to Accelerated Track](#)

[Link to Second Degree Part-Time Track](#)

[Link to RN-B.S.N. Track](#)

[Link to Combined Programs](#)

### **Application Process for Freshman Direct Admit B.S.N. Track**

The Freshman Direct Admit Track is designed for currently enrolled high school seniors who are preparing to enter FAU the fall semester immediately following their May/June high school graduation of the same year. This track is available on the Boca Raton campus only. The Freshman Direct Admit Track is a four-year limited access program.

The Bachelor of Science in Nursing Freshmen Direct Admit Track is a full-time, four-year program (beginning in the fall semester) with Nursing courses in each of the eight semesters. This means that students take Nursing courses each semester along with the other science and general education requirements, which further means that first semester freshmen are already Nursing students. This result is in synchrony with the College of Nursing philosophy, vision and mission in that students are fully interconnected with the College from the beginning of their Nursing education through graduation.

Application to this track is a four-step process and can be found on this [website](#). Application Review Criteria include:

1. High school re-calculated GPA 3.50 on a 4.0 scale;
2. ACT 25 (preferred) or SAT 1210;
3. Cleared Level 2 background check and fingerprinting.

**HONORS IN NURSING PROGRAM***(Minimum of 120 credits required)*

The Honors in Nursing Program provides a highly select group of students with an enriched learning

experience for high-performing students. The program focuses on the enhancement of research and communication skills required for nursing students. Nursing is now recognized as a STEM program, so students need to seek opportunities in consultation with their faculty mentors to conduct or participate in original research. The Honors in Nursing Program culminates in a completed thesis and dissemination of the student's work.

### **Admission Requirements**

Eligible students in the Freshman Direct Admit Track apply during their sophomore spring semester. Applicants must have a 3.5 cumulative GPA; must successfully complete NUR 4165, Nursing Research, with an "A-" or better; and submit a competitive onsite essay.

### **Standards for Maintaining Active Status**

Students admitted to the Honors in Nursing Program must maintain high academic and ethical standards. Students may be dismissed from the program if they fail to maintain a cumulative GPA of 3.5 throughout the program. Students who do not maintain a GPA of 3.5 may still be able to complete the Freshman Direct Admit B.S.N. degree track. Violation of any of the following three components may be grounds for dismissal:

1. The Christine E. Lynn College of Nursing Professional Statement;
2. American Nurses Association's Code of Ethics; and
3. FAU's Code of Academic Integrity.

If a student withdraws due to extenuating medical circumstances, he or she may be permitted to progress upon a space available basis either in the Honors in Nursing Program or the Freshman Direct Admit B.S.N. track.

### **Honors-Level Enrichment**

Honors-level enrichment is manifested in two challenging courses that provide meaningful, rich academic experiences: Honors Seminar in Nursing 1 (NUR 4934) and Honors Seminar in Nursing 2 (NUR 4935). During both courses students are expected to attend or participate in events offered by the College such as dissertation defenses, Sigma Theta Tau or Iota Xi presentations, doctoral capstone presentations and Office of Undergraduate Research and Inquiry events.

### **Capstone Requirement**

The thesis meets the capstone requirement. RI: Honors Seminar in Nursing 3 (NUR 4936) replaces RI: Scholarship for Evidence-Based Nursing Practice (NUR 4937) with 3 variable credits. The variable credits are to be distributed over at least two semesters.

1. Summer, 1 credit; fall, 1 credit; spring, 1 credit of senior year, or
2. Fall, 2 credits; and spring, 1 credit of senior year.

One credit must be earned in the graduating spring semester. The student will defend both the research proposal and the final thesis. One faculty mentor (chair) and one faculty committee member will assist the student.

## Application Process for the Accelerated B.S.N. Track

The Accelerated Track is available only on the Boca Raton campus. Students who have been unsuccessful in another nursing program will not be considered for admission into the program at Florida Atlantic University.

1. Apply to Florida Atlantic University [here](#). Applicants must have a minimum 3.0 GPA in their bachelor's degree as calculated by the awarding institution. Post-baccalaureate classes are not included in this calculation.
2. Apply to the College of Nursing by completing an application on the Nursing CAS (Centralized Application Service) [website](#). The applicant is cautioned to note the application deadline published on the website. There are no deadline exceptions.
3. Minimum requirements for review of application; **applications not meeting these criteria will not be reviewed**. The following courses must be completed with a grade of "C" or better by the application deadline. Successful completion of all prerequisites must have been achieved at the time of application.

Anatomy & Physiology I with Lab

Anatomy & Physiology II with Lab

Microbiology with Lab

College Algebra or equivalent

Statistics

English Composition 1

English Composition 2

Introduction to Sociology

Introduction to Psychology

Human Growth and Development through the Lifespan

Chemistry with Lab

Nutrition

Grades in the above courses constitute the prerequisite science GPA used for admission decisions. A minimum grade of "C" is required in these courses.

### Admission Decision Criteria

This is a limited-access program, and the program receives many more qualified applications than available spaces. Admission decisions are based on the following:

1. Cumulative undergraduate GP
2. Prerequisite science GPA
3. Other nursing common prerequisites GPA
4. Personal interview

Other factors relevant to professional nursing may be considered. For example: graduation from an undergraduate program at FAU and prerequisite courses completed at an SUS university or equivalent university in the United States.

5. All applicants will be notified of the admission decision via FAU email.
6. By the date posted in the offer letter, applicants must confirm via email to the program advisor their intention to either accept or reject the preliminary admission offer, or their seat will be given to the next eligible applicant.
7. Cleared Level 2 background check and fingerprinting.

### **Accelerated Track Degree Requirements**

The Accelerated Track in the B.S.N. program is specifically designed for the student with a bachelor's degree in another field who wants to earn a bachelor's degree in nursing. A fast track to a professional nursing career, this accelerated B.S.N. is an intense four semester (15-month) program for motivated individuals looking for a challenging and stimulating career in nursing. Students in the program are required to be engaged in coursework or nursing practice experiences for a minimum of 40 hours per week. This is a limited access program. Students must complete all program prerequisites prior to beginning the accelerated program coursework. Accelerated Track requirements: 60 credits.

### **Prerequisite Coursework**

All courses not approved by the Florida Statewide Course Numbering System that will be used to satisfy requirements will be evaluated individually by the FAU Registrar's Office on the basis of content and will require a catalog course description and a copy of the syllabus for assessment.

## Second Degree B.S.N. Part-Time Track

**(This program is on hiatus and not accepting students.)**

This track is for those individuals with a degree in another discipline who are seeking a Bachelor of Science in Nursing degree. Using a concierge model, it serves working adults who are not able to enroll in an accelerated, full-time program. Classes and clinical experiences are designed for evenings and weekends with some online classes. Face-to-face classes and laboratory learning are offered on FAU's Davie campus with clinical practicums offered in partner hospitals in the surrounding area. For information on this concierge model, including information on student support and tuition, click [here](#).

### Application Process for the RN-B.S.N. Track

The RN-B.S.N. Track is designed for registered nurses aspiring to a Bachelor of Science in Nursing degree. Candidates must have 60 completed lower-division college credits from an accredited institution and an associate degree-accredited program in nursing (ACEN or CNEA). The RN-B.S.N. Track is offered in a distance learning format only.

### Prerequisite Coursework for RN-B.S.N. Students

Students transferring to Florida Atlantic University must complete both lower-division requirements (including the requirements of the General Education Program) and requirements for the college and major. Lower-division requirements may be completed through the A.A. degree from any Florida public college, university or state college or through equivalent coursework at another regionally accredited institution. Students can apply for admission to the RN-B.S.N. Track before or after completion of all prerequisites as outlined in the *Transition Guides*.

All courses not approved by the Florida Statewide Course Numbering System that will be used to satisfy requirements will be evaluated individually on the basis of content and will require a catalog

course description and a copy of the syllabus for assessment.

## Admission Requirements for the RN-B.S.N. Track

1. Minimum GPA of 2.5 on 4.0 scale.
2. Graduated from an ACEN- or CNEA-accredited nursing program.
3. Current unencumbered RN license in state of residency.
4. Grade of "C" or better in all required prerequisite courses.
5. After preliminary acceptance, a cleared Level 2 background check and fingerprinting is required for full admission.

## RN-B.S.N. Track Degree Requirements

Required lower-division prerequisite courses will be reviewed with an academic advisor. A variety of study plans are available, including three-, four-, five- and six-semester study plans. Students will choose a study plan with an advisor after admission to the B.S.N. program. The RN-B.S.N. Track is offered in a distance learning format only.

### **Policies for Bachelor's Degree Program**

#### **Health and Other Requirements for Nursing Practice**

***The student who is admitted to the Pre-Licensure tracks (Freshman Direct Admit or Accelerated) must meet the following requirements annually:***

1. Complete the following:
  - a. A complete background check through [www.castlebranch.com](http://www.castlebranch.com) is required as a condition of admission. By submitting to the background check requirement, students agree to have this

information shared with all clinical agencies. Adverse findings may prevent a student from completing the required clinical experiences and graduating from the program. Students with adverse findings may contact the Florida Board of Nursing for clarification regarding the effect of the adverse events on their individual eligibility for licensure.

- b. FDLE and FBI Background fingerprinting.
2. Submit each of the following:
    - a. Annually submit the Oath and Affirmation waiver by one year by date of order. If this waiver expires after the due date, the student will be required at his/her expense to redo the Level 2 background check process to include the drug test and fingerprinting.
    - b. Annually submit evidence of ongoing personal health insurance coverage for the academic year. If a student is found to have lapsed coverage, the student will be dismissed from the clinical practicum, which may jeopardize progression in their program of study.
    - c. Proof of completion of any required immunization series must be provided to the College of Nursing by the date specified by the nursing program in which the student is enrolled.
    - d. TB testing is done annually. Additional health requirements may be necessary for students practicing in specific clinical agencies. Affected students will be notified.
    - e. Proof of current BLS Healthcare Provider CPR certification (CPR for Healthcare Providers must be from the American Heart Association).
  3. Purchase basic supplies and equipment for nursing practice experiences.
  4. Assume responsibility for transportation to and from all off-campus course clinical experiences.
  5. Assume responsibility for basic computer knowledge (Microsoft Office, FAU e-mail, email and Internet).
  6. Purchase learning materials required for courses. Purchase NCLEX preparation and basic tools and equipment for nursing practice experiences.

In the last semester of the curriculum, pre-license students will be required to take a comprehensive exit exam and earn a satisfactory score on the exam prior to graduation.

Failure to provide the above documentation or falsification of the same is grounds for dismissal from the College of Nursing.

7. Student documents must be current and complete in order to participate in any clinical practice learning experience that involves persons receiving care of any kind. Students who do not have the FBI/FDLE and Drug Screening clearance may not be able to complete the program and graduate. Students may also be asked to successfully complete clinical agency-mandated educational programs to participate in clinical learning experiences.
8. Additional health requirements may be necessary for students practicing in specific clinical

agencies. Affected students will be notified.

9. Laptop computers are expected of students in the Nursing program.

***The student who is admitted to the RN-B.S.N. Track must meet the following requirements annually:***

1. Submit a copy of current unencumbered RN license.
2. Complete the following:
  - a. A complete background check through [www.castlebranch.com](http://www.castlebranch.com) is required as a condition of admission. By submitting to the background check requirement, students agree to have this information shared with all clinical agencies. Adverse findings may prevent a student from completing the required clinical experiences and graduating from the program. Students with adverse findings may contact the Florida Board of Nursing for clarification regarding the effect of the adverse events on their individual eligibility for licensure.
  - b. FDLE and FBI background fingerprinting.
3. Submit each of the following:
  - a. Annually submit the Oath and Affirmation waiver by one year by date of order. If this waiver expires after the due date, the student will be required at his/her expense to redo the Level 2 background check process to include the drug test and fingerprinting.
  - b. Annually submit evidence of ongoing personal health insurance coverage for the academic year. If a student is found to have lapsed coverage, the student will be dismissed from the clinical practicum, which may jeopardize progression in their program of study.
  - c. Proof of completion of any required immunization series must be provided to the College of Nursing by the date specified by the nursing program in which the student is enrolled.
  - d. TB testing is done annually. Additional health requirements may be necessary for students practicing in specific clinical agencies. Affected students will be notified.
  - e. Proof of current BLS Healthcare Provider CPR certification (CPR for Healthcare Providers must be from the American Heart Association).
4. Purchase basic supplies and equipment for nursing practice experiences.
5. Assume responsibility for transportation to and from all off-campus course clinical experiences.
6. Assume responsibility for basic computer knowledge (Microsoft Office, FAU e-mail, email and Internet).
7. Purchase learning materials, basic tools and equipment required for courses/requirements.
8. Student documents must be current and complete in order to participate in any clinical practice learning experience that involves persons receiving care of any kind. Students who do not have the FBI/FDLE and Drug Screening clearance may not be able to complete the program and graduate. Students may also be asked to successfully complete clinical agency-mandated educational programs to participate in clinical learning experiences.

9. Laptop computers are expected of students in the Nursing program.

### **Progression and Retention Policy**

Progression and retention in the College of Nursing baccalaureate degree courses are dependent upon the student's ability to meet established academic standards and to comply with student health, security and CPR requirements. The following requirements are necessary for progression in the Nursing program:

1. Successful completion of all nursing courses and required courses in the B.S.N. curriculum is defined as a "C" or better or a grade of satisfactory, "S."
2. Freshman Direct Admit students who cannot progress following the first summer (third semester of first year) will be dismissed from the B.S.N. program.
3. At any time, students not making satisfactory progress toward course objectives will be notified in writing and offered counseling to develop a plan for remediation. Failure to comply with the recommendations on this plan will result in failure of the course.
4. Students may repeat only one nursing course.
5. Students earning a grade of "C-" or below or an unsatisfactory, "U," in any nursing course may repeat that course only once, on a space available basis.
6. A student who earns a grade of "C-" or below or an unsatisfactory, "U," in any nursing course for a second time will be dismissed from the Nursing major. Counseling relative to other majors/options will be provided.
7. A student who earns a grade of "C-" or below or an unsatisfactory, "U," in any two nursing courses will be dismissed from the Nursing major. Counseling relative to other majors/options will be provided.
8. Any fully admitted pre-license B.S.N. student who withdraws from a nursing course, with the exception of a filed exceptional circumstances withdrawal, is considered to be out of sequence with their cohort and must reapply to the program.
9. Students who wish to return to the University after a leave of absence or re-enroll after withdrawing and have been admitted to the B.S.N. program will re-enter under the current curricular requirements. Based on demonstration of clinical skill competencies, an independent study course may be required. In addition, scheduling in clinical courses will depend on availability of clinical space.
10. Students must adhere to the standards of conduct outlined in the ANA Code of Ethics, the Florida Nurse Practice Act (Statute 464.018) and FAU Regulation 4.001 Code of Academic Integrity. Students are expected to demonstrate comportsment and professional behavior consistent with the College's philosophy and conceptual framework as expressed in the College of Nursing

Professional Statement. Failure to do so may result in dismissal from the program.

11. Students must demonstrate safe practice in the care of clients and exercise appropriate judgment as beginning-level practitioners. Students who demonstrate unsafe behaviors in the practice setting may be removed at any time a faculty member determines the student is clinically unsafe and poses a significant risk to patients. Students removed from a clinical course for patient safety reasons will receive a grade of "F" in the course.
12. Students must have on file evidence of compliance to include, but not limited to, Student Health Policy, security requirements and CPR certification prior to beginning any clinical experiences.

## **Dismissal Policy**

A student enrolled in the Bachelor of Science in Nursing Program who fails to exhibit professional and caring behaviors as stated in the Christine E. Lynn College of Nursing Professional Statement, fails to meet academic standards as defined in the Progression and Retention Policy, or violates a University policy may be dismissed from the Nursing program. The faculty member responsible for the nursing course in which the failure is noted or who notes unprofessional behavior will refer the student to the assistant dean. Students recommended for dismissal have the right to utilize the Student's Appeal Procedure as outlined in the Student Handbook.

A student who is dismissed from the Nursing program may petition only one time for readmission/continuation in the Nursing program through the Admission, Progression and Retention Subcommittee of the Christine E. Lynn College of Nursing. Readmission decisions by the subcommittee will be based on the reason for dismissal, strength of the student's record, length of time since dismissal, space availability and the student's plan to prevent recurrence of the problem that led to the dismissal.

## **Procedure**

Students who do not meet the progression and retention requirements will be notified in writing via FAU email of the facts and circumstances, including the availability of an appeal process. Students will be notified by a program official who will offer to meet with the student (in person or via phone call). Students have 10 academic days from the date of the written notification to respond to the program official. After meeting with the program official, the student may be:

1. Placed on academic probation with a written Plan of Improvement (POI). The POI will include specific conditions designed to support individual student success. Students who do not meet conditions indicated in the POI will be recommended for dismissal.
2. Recommended for dismissal. Undergraduate student recommendations for dismissal follow the

University's [Suspension and Dismissal Policy](#).

## COMBINED PROGRAMS

### **NURSING TO ARTIFICIAL INTELLIGENCE**

### **BACHELOR OF SCIENCE IN NURSING (B.S.N.) TO MASTER OF SCIENCE (M.S.) COMBINED PROGRAM**

*(Minimum of 150 credits required)*

The Christine E. Lynn College of Nursing and the College of Engineering and Computer Science (COECS) offer a combined Bachelor of Science in Nursing (B.S.N.) and Master of Science (M.S.) with Major in Artificial Intelligence degree program. The B.S.N. degree program is completed and received from the Christine E. Lynn College of Nursing. Students then complete the M.S. in Artificial Intelligence in the Department of Electrical Engineering and Computer Science (EECS) and receive the M.S. degree from the COECS.

Students may count up to 9 credits of approved graduate coursework (5000-level or higher) toward both their B.S.N. and M.S. degrees as long as the combined program totals a minimum of 150 credits. Other requirements follow.

1. The student has met the minimum of 120 credits for the bachelor's degree;
2. The student has taken a minimum of 30 credits in 5000-level or higher courses for the master's degree.

Students must complete the prerequisite coursework for the master's degree while pursuing the bachelor's degree at the College of Nursing. This combined program provides an attractive way for students to continue their graduate coursework; the undergraduate program is completed first. The combined program can be completed in approximately five years.

### **Admission Requirements**

The GRE requirement is waived for this combined program. To be eligible for the program, baccalaureate students in the College of Nursing should:

1. Have a cumulative FAU GPA of 3.25 or better at the end of their junior year. Note that the cumulative FAU GPA of at least 3.25 must be maintained until the completion of the bachelor's degree in the College of Nursing.
2. Formally apply to the combined program, completing the admissions process at least one semester

prior to the beginning of the master's portion of their program.

Students in the combined program must maintain continuous enrollment to remain in good standing. Students must also meet all degree requirements of the graduate program they have chosen, including prerequisite courses.

### Degree Requirements

To be eligible for the combined B.S.N. in Nursing to M.S. in Artificial Intelligence program, students must fulfill the following requirements.

1. Completion of the requirements for the B.S.N. in Nursing in the College of Nursing and other requirements stipulated by the University and College.
2. Completion of all requirements for the M.S. in Artificial Intelligence in the EECS Department with either the thesis or non-thesis option.
3. The following courses are taken during the B.S.N. in Nursing program.

Introduction to Programming in Python	COP 2034	3
Data Structures and Algorithm Analysis with Python	COP 3410	3
Methods of Calculus	MAC 2233	3

## NURSING TO BIOMEDICAL ENGINEERING

### BACHELOR OF SCIENCE IN NURSING (B.S.N.) TO MASTER OF SCIENCE (M.S.) COMBINED PROGRAM

*(Minimum of 150 credits required)*

The Christine E. Lynn College of Nursing and the College of Engineering and Computer Science (COECS) offer a combined Bachelor of Science in Nursing (B.S.N.) and Master of Science (M.S.) with Major in Biomedical Engineering degree program. The B.S.N. degree program is completed and received from the Christine E. Lynn College of Nursing. Students then complete the M.S. in Biomedical Engineering in the Department of Electrical Engineering and Computer Science (EECS) and receive the M.S. degree from the COECS.

Students may count up to 9 credits of approved graduate coursework (5000-level or higher) toward both their B.S.N. and M.S. degrees as long as the combined program totals a minimum of 150 credits. Other requirements follow.

1. The student has met the minimum of 120 credits for the bachelor's degree;
2. The student has taken a minimum of 30 credits in 5000-level or higher courses for the master's degree.

Students must complete the prerequisite coursework for the master's degree while pursuing the bachelor's degree at the College of Nursing. This combined program provides an attractive way for students to continue their graduate coursework; the undergraduate program is completed first. The combined program can be completed in approximately five years.

## Admission Requirements

The GRE requirement is waived for this combined program. To be eligible for the program, baccalaureate students in the College of Nursing should:

1. Have a cumulative FAU GPA of 3.25 or better at the end of their junior year. Note that the cumulative FAU GPA of at least 3.25 must be maintained until the completion of the bachelor's degree in the College of Nursing.
2. Formally apply to the combined program, completing the admissions process at least one semester prior to the beginning of the master's portion of their program.

Students in the combined program must maintain continuous enrollment to remain in good standing. Students must also meet all degree requirements of the graduate program they have chosen, including prerequisite courses.

## Degree Requirements

To be eligible for the combined B.S.N. in Nursing to M.S. in Biomedical Engineering program, students must fulfill the following requirements.

1. Completion of the requirements for the B.S.N. in Nursing in the College of Nursing and other requirements stipulated by the University and College.
2. Completion of all requirements for the M.S. in Biomedical Engineering in the EECS Department with either the thesis or non-thesis option.
3. The following courses are taken during the B.S.N. in Nursing program.

Introduction to Programming in Python	COP 2034	3 or
Introduction to Programming in C	COP 2220	3
Methods of Calculus	MAC 2233	3

## MASTER'S AND POST GRADUATE PROGRAMS

The Christine E. Lynn College of Nursing offers the Master of Science in Nursing (M.S.N.) and Post Graduate Certificate Programs.

Those applicants seeking a Master of Science in Nursing choose from one of the following concentrations for a program of study: Adult/Gerontological Nurse Practitioner, Advanced Holistic Nursing, Family Nurse Practitioner, Nurse Educator, and Nursing Administration and Financial Leadership.

Completion of one of the Nurse Practitioner concentrations prepares the graduate nurse to seek

certification as a nurse practitioner in the area of concentration. Upon graduation, national certification is required for authorization to practice in the advanced practice role in Florida.

Completion of the Nursing Administration and Financial Leadership concentration prepares the nurse graduate to seek advanced certification in administration.

Completion of the Nurse Educator concentration prepares the graduate to teach in a variety of educational settings and seek certification as a nurse educator.

Completion of the Advanced Holistic Nursing concentration prepares the graduate to seek advanced certification in Holistic Nursing (AHN-BC) and Health and Wellness Nursing Coaching (HWNC-BC).

All required supplementary admission materials for the Family Nurse Practitioner and the Adult/Gerontological Nurse Practitioner concentrations must be submitted through [GradCAS](#) and received by the deadline posted on the College of Nursing [website](#). For all other M.S.N. concentrations, all required supplementary documents must be submitted through the University application system and received by the deadline posted on the College of Nursing website.

Decisions are made only on complete application packets. Refer to the section on [Admissions](#) in this University Catalog or [www.fau.edu/graduate/](http://www.fau.edu/graduate/) for complete University admissions information. Graduate admissions are competitive. Admissions decisions are made based upon the quality of the application and the number of available slots in the desired program concentration. Meeting minimum admission requirements does not guarantee admission.

The number of credits allowed as a non-degree-seeking student are limited and must meet graduate program requirements of the University.

In keeping with Florida Atlantic University's philosophy as a distributed university, courses may be held on various campuses. Modes of delivery include live classes, video conference, web-assisted courses and online offerings and vary by concentration.

Depending on the concentration, full-time or part-time study may be pursued in the graduate program. Once the student is admitted to the program, an advisor is assigned to assist with planning the sequence of courses.

International students should contact the director or assistant dean at least one year prior to intended

enrollment to plan the program of study.

### **Master's Program Outcomes**

The purpose of the graduate program is to advance the study, understanding and practice of the discipline of nursing. The goal of this curriculum is to prepare graduates whose practice of nursing nurtures the wholeness of persons through caring in advanced practice nursing situations in a variety of settings. The graduate of the program will:

1. Develop self in caring-based advanced nursing practice.
2. Integrate a broad base of knowledge grounded in caring that includes theory and best evidence for advanced nursing practice.
3. Integrate multiple, complex patterns of knowing in coming to know persons and creatively responding to calls within nursing situations in advanced nursing practice.
4. Demonstrate accountability for ethical, safe practice and inquiry in advanced nursing practice.
5. Demonstrate cultural humility within nursing situations in advanced nursing practice.
6. Engage in systematic inquiry as a foundation for advanced nursing practice, healthcare delivery and the evolution of nursing as a caring science.
7. Participate in the implementation of technology and information systems to promote well-being, facilitate decision making and enhance collaboration in advanced nursing practice.
8. Promote well-being for persons and populations across the lifespan in advanced nursing practice.
9. Promote caring environments that nurture wholeness in advanced nursing practice.
10. Honor human dignity and advocate for equity in healthcare outcomes, local and global health policy and healthcare delivery in advanced nursing practice.
11. Participate in the transformation of complex healthcare systems through caring leadership that facilitates intra- and interprofessional collaboration to achieve quality outcomes in advanced nursing practice.
12. Promote responsible stewardship to advance the discipline and profession, preserve resources and respect the environment in advanced nursing practice.

### **Practicum Requirements**

Prior to entering any practicum course for graduate study, students are required to submit the following documentation in the College clinical tracking system:

1. Annual student health form (current within the last year);

2. Proof of personal medical insurance;
3. Current CPR certification (BLS);
4. Signed statement to the effect that OSHA/ HIPAA/Safety requirements have been read;
5. Copy of current license as a registered nurse in the state in which practicum course will be completed. All Nurse Practitioner students must be licensed in Florida.

All aforementioned data must be current throughout the program of study.

### **Academic Standing**

Continuation in the graduate program requires a grade of "C" or above in all required nursing graduate courses and a minimum overall GPA of 3.0. For further clarification, see the Progression and Retention Policy in the [Graduate Student Handbook](#).

## **NURSING**

### **MASTER OF SCIENCE IN NURSING (M.S.N.)**

#### **Adult/Gerontological Nurse Practitioner Concentration**

#### **Advanced Holistic Nursing Concentration (Program suspended effective fall 2024.)**

#### **Family Nurse Practitioner Concentration**

#### **Nurse Educator Concentration**

#### **Nursing Administration and Financial Leadership Concentration**

### **Admission Deadlines**

Adult/Gerontological Nurse Practitioner and Family Nurse Practitioner concentration applicants: The nurse practitioner concentrations are limited access; therefore, admission is competitive and allowed only for the fall term.

Advanced Holistic Nursing, Nurse Educator, and Nursing Administration and Financial Leadership concentration applicants: Admission deadlines for fall and spring are posted on the [College of Nursing website](#).

### **Admission Requirements**

1. Earned B.S.N. from an accredited bachelor's program in nursing.
2. Minimum grade point average of 3.0 on a 4.0 scale for the final 60 baccalaureate-level course credits in the B.S.N. program. Applicants with a GPA less than a 3.0 may be eligible to petition for admission into an M.S.N. program under certain circumstances.

3. Basic undergraduate statistics course.
  4. Baccalaureate-level, upper-division nursing research course.
  5. Résumé or curriculum vitae (CV) presented in specified format located on the [website](#).\*
  6. A written essay describing the student's philosophy of nursing (275 words/one page).
  7. One electronic letter of recommendation requested through the [GradCAS](#) System.
  8. Current RN licensure to practice nursing.\*
  9. A Level 2 (state/federal) criminal background check. (Costs are the responsibility of the applicant/student). Annual renewal by an Oath and Affirmation Statement is required.
  10. An interview and on-site writing sample may be required.
  11. Practice experience is not required but may be considered as part of the overall quality of the application.
- \* Submitted via [GradCAS](#) (Use 3.0 application portal.)

## **Guidelines for Philosophy of Nursing Statement and Reference Letter**

### ***Philosophy of Nursing***

Please provide a typed, double-spaced, one-page statement of your nursing philosophy, specifically addressing:

1. Your beliefs/philosophy of nursing;
2. Why you are interested in pursuing a master's degree in the specific concentration you have chosen; and

### ***Letter of Reference***

The purpose of the letter of reference is to provide the graduate program with information about how colleagues and associates perceive the applicants to the Master of Science in Nursing Program. For the Family Nurse Practitioner and Adult/Gerontological Nurse Practitioner concentrations, the letter is requested electronically through GradCAS. For the other M.S.N. concentrations, the letter is requested electronically through the FAU application portal. The letter must be from a recent place of employment. Reference letters from current students, relatives or peers will not be accepted.

## **CURRICULUM PLANS FOR MASTER OF SCIENCE IN NURSING CONCENTRATIONS**

### **Adult/Gerontological Nurse Practitioner - 52 credits**

Provides graduates with the advanced skills and knowledge to assume the role of Adult/Gerontological Primary Care Nurse Practitioner with an emphasis on responding to calls from adolescents, adults and

older adults. The unique features of this program are that it is inclusive of care to culturally diverse adolescents, adults and older adults.

The Adult/Gerontological Nurse Practitioner curriculum requires a total of 52 credits. The program generally follows a part-time format of study. The curriculum contains a minimum of 780 hours of required clinical practice. Attainment of competencies may require more than 780 hours. Placements may occur in health department clinics, private practice offices, home-health agencies, community-based health centers, hospitals, long-term care institutions and other settings providing health care to adolescents, adults and older adults.

Graduates of the Adult/Gerontological Primary Care Nurse Practitioner program are eligible to sit for the Certification Examination offered by the American Nurses Credentialing Center (ANCC) or the American Academy of Nurse Practitioners (AANP).

Comprehensive Care of Adolescents through Older Adults	NGR 6607	3
Comprehensive Care of Adolescents through Older Adults Practicum**	NGR 6607L	4
<b>Total credits</b>		<b>52</b>

\* Requires 180 hours (3 credits) of supervised clinical practical experience in the spring semester and requires 120 hours (2 credits) of supervised clinical practical experience in the summer semester.

\*\* Requires 240 hours of supervised clinical practical experience.

**Note:** Baccalaureate-level pharmacology, pathophysiology and health assessment courses are recommended if taken more than five years from program enrollment.

### Fee for Lab/Practicum Courses

All lab and nurse practitioner practicum courses incur a \$150 per credit fee. The fee covers the higher cost of instruction for these courses due to lower faculty/student ratios, travel for site visits and increasing use of simulation and standardized patients. To view our full cost of attendance information page, visit <https://www.fau.edu/finaid/other/cost-of-attendance/>.

The following courses carry this fee:

NGR 6002L, 1 credit, \$150 fee

NGR 6200L (Spring), 3 credits, \$450 fee

NGR 6200L (Summer), 2 credits, \$300 fee

NGR 6605L, 4 credits, \$600 fee

NGR 6607L, 4 credits, \$600 fee

## **Advanced Holistic Nursing - 33 credits (Program suspended effective fall 2024.)**

This 33-credit concentration advances knowledge of contemporary views of healing and holistic nursing practice grounded in caring. The Advanced Holistic Nursing (AHN) concentration courses offer content and practice in the integration of mind-body practices, manipulative body practices and energy-based healing modalities to promote health and well-being.

Students will earn an M.S.N. degree and are eligible to sit for Board Certification in Advanced Holistic Nursing (AHN-BC). The Advanced Holistic Nursing Concentration does not prepare students to enter a Nurse Practitioner role.

Applicants with a master's degree in Nursing may earn a Post Graduate Certificate (PGC) in Advanced Holistic Nursing. A gap analysis is conducted to identify required courses and practicum hours. All PGC students must complete NGR 6110, Advanced Nursing Practice Grounded in Caring. Nurse Practitioners may be particularly interested in a PGC in Advanced Holistic Nursing.

Completely online, full- and part-time study are available. Every effort is made to accommodate the practicum needs of students in various geographic areas.

Preceptor and practicum site decisions are determined in collaboration with faculty. The practicum hours may be completed at the student's place of employment, if appropriate, with an approved preceptor.

NGR 6002L, 1 credit, \$150 fee

### Family Nurse Practitioner - 52 credits

Provides graduates with advanced practice role preparation, knowledge and skills in the care of children and adults across all ages within a family framework. Health promotion, disease prevention and management of common acute and chronic long-term health alterations in primary care settings are

the foci of this concentration.

The Family Nurse Practitioner curriculum requires 52 credits. The program generally follows a part-time format of study. The curriculum contains a minimum of 780 hours of required clinical practice, most of which may be arranged by the student in her or his own community. Attainment of competencies may require more than 780 hours. Practicum experiences occur in health department clinics, private practice offices, HMO clinics, community-based health centers, hospital clinics and other settings providing primary health care.

Graduates of the Family Nurse Practitioner program are eligible to sit for the Family Nurse Practitioner Certification Examination offered by the American Nurses Credentialing Center (ANCC) or the American Academy of Nurse Practitioners (AANP).

### **Nurse Educator - 39 credits minimum**

Completion of this concentration prepares students to function in new and innovative ways as nurse educators. Students choosing the Nurse Educator concentration will be able to design methods of teaching, learning and evaluation for nursing education in the classroom, online and in nursing practice/clinical settings; analyze and develop plans of study in nursing based on appropriate curricular principles; integrate caring as a theoretical model into an educational framework; apply the role of nurse educator, demonstrating successful instructional methods in the classroom, online and in nursing practice/clinical settings.

The Nurse Educator concentration requires a minimum of 39 credits. Full and part-time programs of study are available. At the completion of the program, graduates are eligible to sit for the National League for Nursing Nurse Educator Certification.

### Nursing Administration and Financial Leadership - 37-39 credits

This concentration Integrates the caring philosophy into organizational management. Its core and cognate courses provide study central to advanced nursing management and financial practice. Its

concentration courses offer content and practice in nursing and healthcare administration and finance, relevant to primary, secondary and/or tertiary settings in rapidly changing times.

The Nursing Administration and Financial Leadership curriculum can be taken completely online, and the needs of students in other geographic areas can be accommodated for the practicum. The program requires a minimum of 37-39 credits for completion. Full- and part-time program of study options are available. The curriculum contains a minimum of 180-270 hours of required practica related to administrative and financial management in health care organizations. Students find a preceptor who mentors them throughout this portion of the curriculum. Decisions about preceptors are made with the advisor.

\* Offered in the College of Business.

\*\* May not be required for all students.

## ADVANCED HOLISTIC PRACTICE AND NURSE COACHING GRADUATE CERTIFICATE

*(Minimum of 12 credits required)*

The Advanced Holistic Practice and Nurse Coaching certificate, grounded in caring, is a 12-credit graduate certificate that advances knowledge of the contemporary views of healing and holistic nursing practice. The certificate is available for non-degree-seeking students. The course content places emphasis on developing a reflective holistic practice that integrates the principles of nurse coaching and an awareness of holistic healing modalities that promote health and well-being of persons, such as mind-body practices, manipulative body practices and energy-based healing. The practicum experience requires students to evaluate holistic healthcare practices in a selected clinical setting, to identify and evaluate the patient population, their health needs and recommend holistic interventions that are meaningful to the population served. The nurse coaching content emphasizes the holistic process, self development, the nurse coaching core values, skills and competencies. Students using the holistic and caring principles demonstrate coaching competencies and skills to promote a process of change that helps clients reach their full potential. Application for the certificate may be made upon the satisfactory completion of the four courses with a minimum grade of "C."

On completion of the Advanced Holistic Practice and Nurse Coaching Certification program students

are eligible to sit for the Board Certification Holistic and Nurse Coaching examination.

## Admission Requirements

Students must possess these requirements:

1. Earned a B.S.N. from an accredited nursing program.
2. Minimum postsecondary GPA of 3.0 on a 4.0 scale.
3. Official transcripts from all prior institutions attended. Submit one set of official transcripts to FAU Graduate Admissions in the [GradCAS application system](#).
4. CV/Résumé Required [Format](#) for Résumé.
5. [Current RN licensure](#) (submit copy of license or online license verification from the department of health acceptable). Students must be licensed in the state in which they will complete practicum courses.
6. A state/federal criminal background check is required for all admitted If admitted to the AHN graduate certificate program. The student MUST initiate the background check process as required before enrolling in courses. Costs are the responsibility of the applicant/student. All admissions are conditional based on the outcome of the admission background check. Background checks must be updated.

---

## Required Courses

Advanced Nursing Practice Grounded in Caring	NGR 6110	3
Foundations of Holistic Nursing 1: Advanced Nursing Situations	NGR 6168	3
Foundations of Holistic Nursing 2: Advanced Nursing Situations	NGR 6169	3
Integrated Holistic Health, Wellness and Nursing Coaching Practicum*	NGE 6292L	3

\* This course includes 180 clinical hours. Students complete all clinical requirements before enrolling in the practicum and would be covered under the FAU SIP program.

## NURSING POST GRADUATE CERTIFICATES (PGC)

### Adult/Gerontological Nurse Practitioner

## **Advanced Holistic Nursing (Program suspended effective fall 2024.)**

**Family Nurse Practitioner**

**Nurse Educator**

**Nursing Administration and Financial Leadership**

**Psychiatric Mental Health Nurse Practitioner**

Applicants holding an earned Master of Science degree in Nursing from an accredited nursing program and who meet all M.S.N. admission requirements may choose from the following Post Graduate Certificate (PGC) Programs: Adult/Gerontological Nurse Practitioner (AGNP), Advanced Holistic Nursing (AHN), Family Nurse Practitioner (FNP), Nurse Educator (NGRE), Nursing Administration and Financial Leadership, and Psychiatric Mental Health Nurse Practitioner (PMHNP).

PGC programs require a minimum of 10 credits for FAU MSN graduates; a minimum of 13 credits is required for applicants from other institutions. Consideration is given to the student's former master's in Nursing program when creating the specific plan of study for the PGC. Programs may vary according to the courses the applicant has taken in the first master's program. This is not a degree-granting option. A Post Graduate Certificate is awarded upon program completion.

Advanced Nursing Practice Grounded in Caring, NGR 6110, is required of all Post Graduate Certificate students regardless of the concentration.

Any applicant for a Post Graduate Certificate must meet with the assistant dean for graduate practice programs or the concentration coordinator for initial advisement, gap analysis and program planning. Post Graduate Certificate students are admitted on a space available basis. Applicants whose gap analysis indicates 30 or more credits are needed will be advised to complete a second master's degree.

### **Admission Requirements for Post Graduate Certificate Programs**

1. Earned M.S. or M.S.N. from an accredited nursing program.
2. Minimum graduate program GPA of 3.0 on a 4.0 scale.
3. Résumé or CV.
4. A written essay describing the student's philosophy of nursing.
5. One letter of recommendation.
6. Current RN licensure to practice nursing.
7. Complete Level 2 background check.
8. An interview and on-site writing sample may be required.

9. Practice experience is not required but may be considered as part of the overall quality of the application.

**Note:** Admissions decisions are made based upon the quality of the application and the number of available slots in the desired program. Meeting the minimal admission requirements does not guarantee admission. PGC applicants submit a preliminary application along with a copy of all official academic transcripts, a current RN license, one letter of recommendation, a statement of philosophy, and a current CV or résumé to the College of Nursing. Once the College of Nursing reviews the preliminary application, applicants will be notified to complete the online non-degree FAU application.

## DOCTORAL PROGRAMS

The Christine E. Lynn College of Nursing offers a Doctor of Philosophy with Major in Nursing (Ph.D.) degree program and a Doctor of Nursing Practice (D.N.P.) degree program. The doctoral programs are grounded in the philosophy of caring and focus on the integration and application of advanced nursing research for improved nursing practice and betterment of humankind.

The Ph.D. graduate is expected to expand application of clinical nursing knowledge and theory, enhancing the practice of the profession and directly impacting the health of clients and communities. The focus of the Ph.D. program is to prepare nurses as scholars in conducting nursing research about practice problems and creating innovative responses to practice issues.

The D.N.P. graduate is prepared for the highest level of professional practice in the discipline. The focus of the D.N.P. program is to provide innovative leadership in the nursing practice arena and to develop innovative practice models for populations in need of advanced nursing.

Alternative pathways to the doctoral degrees are available for highly qualified Bachelor of Science in Nursing graduates through the B.S.N. to Ph.D. and B.S.N. to D.N.P. programs and to highly qualified Doctor of Nursing Practice graduates through the D.N.P. to Ph.D. program.

### **Transfer Credits**

Acceptance of transfer credits from accredited institutions is dependent on the relevance of the work to the doctoral program. Transfer of credits should occur at the time of admission. The doctoral program committee will determine acceptance of transfer credits. Grades on all transfer credits must be a minimum of "B" or better (3.0 in a 4.0 grading system).

## **Credit Duplication**

Credits used for another degree or preparatory/deficiency course credits generally may not be counted toward the credits in the doctoral program.

## **Time Limitations**

Candidates for the doctoral degree must complete all work within a 10-consecutive-year period after initial admission to the program.

## **Academic Standing**

Continuation in the program requires satisfactory progress toward the doctoral degree. Evidence of such progress includes maintenance of a 3.25 cumulative average throughout the course of academic study. In addition, only grades of "A," "A-," "B+," "B," "B-" and "C" are acceptable in fulfilling graduate school requirements in the doctoral plan of study. Students in the doctoral program must achieve a "C" or better in each nursing course and maintain an overall GPA of 3.0 to continue in the program.

Students who do not maintain the required cumulative GPA will be placed on academic probation in the semester immediately following the semester in which the cumulative GPA drops below 3.25. Failure to regain a 3.25 cumulative average within two successive semesters following the semester in which the deficiency first occurred can result in dismissal. The faculty of the Christine E. Lynn College of Nursing reserves the right to dismiss any student at any time when in its judgment the student is not making satisfactory progress toward completion of the degree.

## **Financial Assistance**

A limited number of assistantships, stipends and tuition waivers are available for full-time students. In addition, limited financial assistance is available for students who meet the criteria. Interested students should obtain information on financial assistance from the director or program assistant of doctoral programs.

For more information regarding admissions, degree requirements and financial aid, contact the Ph.D. coordinator or D.N.P. program assistant for the Christine E. Lynn College of Nursing, Florida Atlantic University, 777 Glades Road, Boca Raton, FL 33431.

## **NURSING**

### **DOCTOR OF PHILOSOPHY (PH.D.)**

*(Minimum of 60 credits required)*

#### **Admission Requirements**

Admission to the Ph.D. program will be for the fall semester each year. Applications must be submitted to the University's Graduate College before completing the application to the College of Nursing.

Evidence of the following information is required in the admissions process:

1. Master's degree with a Major in Nursing from a university or college of nursing program accredited by the National League for Nursing or the Commission on Collegiate Nursing Education. Official copies of transcripts from all post-secondary institutions of education should be sent directly to the University's Graduate College. The University will not be able to accept applications without an official unopened transcript from each institution attended since high school.
2. Minimum cumulative 3.5 GPA in a nursing master's program.
3. Curriculum vitae; required format available on the [website](#).
4. Two letters of recommendation from academic and professional references, one from a master's program professor holding a doctorate (see "[Guidelines Regarding Letters of Reference](#)" on the College of Nursing's website).
5. An example of work that depicts a culminating scholarly product from the master's program. Examples: thesis, project, manuscript for evidenced-based research course, paper/manuscript for inquiry practicum.
6. A typed statement of the applicant's goals for the doctoral degree (12-point font, double-spaced, no more than 500 words).
7. Evidence of grade of "B" or better in a graduate statistics course that provides the student with a broad knowledge of statistical concepts and techniques necessary for critical consumption of research. A copy of the syllabus or official catalog course description will be required if the course was not taken at FAU.
8. Satisfactory background check (a background check is required after conditional acceptance to the

program).

Applicants will be required to have an interview with members of the doctoral admissions committee. Upon review of all the information about the applicant by the doctoral program committee, a decision for admission will be made and the applicant will be notified. Part-time study for the Ph.D. may be an option at the faculty's discretion.

### **Degree Requirements**

The faculty in the College may recommend the Doctor of Philosophy with Major in Nursing degree when the student has met the following requirements:

1. The candidate must complete 60 credits beyond the master's degree, to include at least 45 credits in required and approved coursework and at least 15 credits of dissertation work.
2. The 45 credits of required and approved coursework prior to dissertation include 9 credits of theory core, 15 credits of research core, 6 credits of advanced statistics beyond the required prerequisite course, 9 credits in the nursing concentration core and doctoral seminars, 3 credits in cognate courses that complement the student's research focus area and 3 credits of doctoral pre-candidacy study.
3. The 3 credits of cognate coursework must be approved by an advisor. These credits must be taken in another discipline focusing on dissertation-related content.
4. The candidate must successfully complete the qualifying comprehensive examination at the end of all coursework during the doctoral pre-candidacy study course period. This examination will offer the student the opportunity to show synthesis of knowledge and understanding of theory, research and nursing concentration components from coursework.
5. The dissertation committee for each student will oversee the development and completion of the student's dissertation. Upon successful defense and completion of the dissertation, the candidate will be awarded the degree of Doctor of Philosophy at the next graduation ceremony.

### **Program Outcomes**

By the completion of the Ph.D. program, graduates will be able to:

1. Develop self as a researcher with a foundation in caring science.
2. Evaluate theory-guided approaches to synthesize an evidence base that informs the development of caring knowledge and practice.
3. Create research designs that honor the calls in nursing situations and integrate understanding gleaned from complex patterns of knowing.
4. Demonstrate accountability as an ethical nurse researcher.
5. Integrate cultural humility into research methods, including study design, sample selection and

data collection plans.

6. Lead systematic inquiry that enhances nursing practice, improves healthcare delivery and contributes to nursing science.
7. Analyze available technology and information systems for use in collaborative research.
8. Construct the foundation for a research program intended to promote well-being for a particular population within the context of lifespan development.
9. Engage with colleagues living values expressive of caring in all endeavors, including ones where communities or research scholars convene.
10. Design research that reflects value for human dignity and understanding of complex local, national and global policies that affect the lives of populations of interest.
11. Establish a foundation for transforming complex healthcare systems through intra- and interdisciplinary research informed by caring science.
12. Become an example of responsible stewardship by advancing the discipline through well-designed research, honoring the profession through engagement in meaningful nursing leadership activities, preserving resources and respecting the environment through everyday actions.

### **Ph.D. Program Curriculum Plan - 60 credits**

The following courses are required for the Ph.D. program.

---

#### **Doctoral Core Courses - 39 credits**

Evolution of Nursing as a Discipline and Practice	NGR 7111	3
Philosophies of Science Grounding Nursing	NGR 7115	3
Caring Science 1: An Essential Domain of Nursing Knowledge	NGR 7116	3
Caring Science 2: Developing Phenomena of Interest Within Research Focus Areas	NGR 7118	3
Caring Science 3: Innovative Methodologies to Student Caring Science	NGR 7119	3
Theory Development and Application in Nursing	NGR 7121	3
Qualitative Research Methods 1	NGR 7815	3
Advanced Nursing Research: Applied Quantitative Design and Methods	NGR 7818	3

Essential Statistical Methods for Nursing Science	NGR 7846	3
Innovations in Inquiry	NGR 7853	3
Mixed Methods in Practice-Based Research	NGR 7816	3
Applied Advanced Statistics	NGR 7845	3
Scholarship Practicum	NGR 7946	3

**Doctoral Cognate Courses (Choose 3 credits with advisor; see #3 under Degree Requirements)  
OR**

*Students may choose one of the following two nursing electives*

Perspectives of Aging	NGR 6251	3
Crafting the Life of Scholarship	NGR 7709	3

**Doctoral Research Courses - 18 credits; students may repeat any of these three courses**

Doctoral Synthesis (Comps)	NGR 7978	1-3
Advanced Research	NGR 7979*	1-3
Dissertation	NGR 7980*	1-15

\* **Note:** NGR 7979 and two NGR 7980 credits must total 15.

## **NURSING**

### **BACHELOR OF SCIENCE IN NURSING (B.S.N.) TO DOCTOR OF PHILOSOPHY (PH.D.)**

*(Minimum of 72 credits required)*

*(Maximum of 85 credits)*

The B.S.N. to Ph.D. program is an alternative pathway to the Doctor of Philosophy with Major in Nursing available for highly qualified Bachelor of Science in Nursing graduates. The program is streamlined, allowing students to proceed to doctoral-level courses in theory research without taking the traditional master's-level courses in these areas.

## Admission Requirements

All Ph.D. program admission requirements outlined previously are necessary with the exception of a master's degree with major in Nursing. A bachelor's degree in Nursing from a program accredited by the National League for Nursing or the Commission on Collegiate Nursing Education is required. Transcripts must be sent to the University's Graduate College as described in the Ph.D. program's admission section.

The following are also required for admission to the B.S.N. to Ph.D. program:

1. GPA of 3.5 for the B.S.N. degree.
2. One reference letter from the baccalaureate program is required in addition to the others described in the Ph.D. program's admission section.
3. Scholarly product from coursework completed at the B.S.N. level.
4. All other Ph.D. admission requirements must be met.

## Degree Requirements

The B.S.N. to Ph.D. program requires a minimum of 87 credits following the B.S.N. degree. One plan of study prepares students for an educator role. Other role preparation, such as a holistic focus, is possible but may require additional credits. The Nurse Practitioner concentration is not available to B.S.N. to Ph.D. students. Study plans will be developed with direction from the student's faculty mentor and the Ph.D. coordinator.

## **NURSING**

### **DOCTOR OF NURSING PRACTICE (D.N.P.)**

*(Minimum of 72 credits required)*

*(Maximum of 85 credits)*

The Doctor of Nursing Practice program focuses on practice leadership. This program's emphasis is the delivery of advanced practice nursing (APN) to culturally diverse populations. Graduate education in nursing occurs within the context of societal demands and needs as well as the interprofessional work environment. The Institute of Medicine (IOM, 2003) and the National Research Council of the National Academies (2005) have called for nursing education that prepares individuals for practice with interdisciplinary, information systems, quality improvement and patient safety expertise.

This program is designed for nursing leaders to develop skills in shaping and evaluating practice models in their own practice settings. The program will accept a limited number of applicants. Meeting minimum admission requirements does not guarantee admission. In order to meet the need of practicing professionals, the program is designed to be a part-time program with classes offered on weekends. All classes are Web-assisted.

The American Association of Colleges of Nursing recommends that students complete 1000 hours of clinical practicum hours. Clinical practice hours in the second year of study are designed to develop new practice skills and test new models of care.

#### **Admission Requirements**

D.N.P. applicants are admitted once a year in the summer. See the College of Nursing [website](#) for application deadlines. Evidence of the following information is required in the admissions process:

1. Master's degree with a Major in Nursing from a university or college of nursing program accredited by the National League for Nursing or the Commission on Collegiate Nursing

## Education.

2. A minimum cumulative 3.0 GPA in the nursing master's program.
3. Curriculum vitae or résumé; required format available on the [website](#).
4. Two letters of recommendation from academic and professional references, one from a master's program professor holding a doctorate (see guidelines on [website](#)).
5. A typed statement of the applicant's goals for the doctoral degree of no more than 500 words.
6. Satisfactory oral interview by members of the graduate admissions committee may be required.
7. A Level 2 (state/federal) criminal background check.
8. National certification in Advanced Practice Nursing Administration or as a Clinical Nurse Leader.
9. Copy of current licensure in the State of Florida as a Registered Nurse.
10. Complete Verification of Post-Baccalaureate Clinical and Practice Hours form.
11. Basic undergraduate research and statistics course.

**Note:** The D.N.P. program is designed for part-time study.

## Degree Requirements

The faculty in the College may recommend the Doctor of Nursing Practice when the student has met the following requirements:

1. The candidate must complete 72 graduate credits beyond the bachelor's degree. A maximum of 36 graduate credits can be transferred from another accredited college or university.
2. The candidate must complete a minimum of 1000 clinical hours in graduate courses beyond the bachelor's degree.
3. The candidate must complete a D.N.P. project that evaluates an innovation related to advanced practice nursing and/or administration of nursing care.
4. The D.N.P. project committee for each student will oversee the development and completion of the student's project. Upon successful completion of the project, the candidate will be awarded the degree of Doctor of Nursing Practice at the next graduation ceremony.

## Program Outcomes

By the completion of the D.N.P. program, graduates will be able to:

1. Develop self as a caring-based leader in advanced nursing practice.
2. Create innovative models for advanced nursing practice that are grounded in caring, best evidence and knowledge from nursing and other disciplines.
3. Integrate multiple, complex patterns of knowing in coming to know populations of persons and creatively responding to calls for leadership within nursing situations in advanced nursing practice.

4. Demonstrate leadership for developing and implementing ethical, safe practice and inquiry in advanced nursing practice.
5. Lead and mentor others in approaching populations within nursing situations with cultural humility in advanced nursing practice.
6. Use methods of systematic inquiry to evaluate programs, processes and outcomes of advanced nursing
7. Evaluate design and lead in the implementation of technology and information systems to promote well-being, facilitate decision making and enhance collaboration in advanced nursing practice.
8. Create programs and health policy to promote well-being for persons and populations across the lifespan in advanced nursing practice.
9. Design and advocate for caring environments that nurture wholeness in advanced nursing practice.
10. Create personal and professional involvement in local and global health policymakers to honor human dignity and advocate for equity in healthcare outcomes, local and global health policy and healthcare delivery in advanced nursing practice.
11. Lead the transformation of complex healthcare systems through caring leadership that facilitates intra- and interprofessional collaboration to achieve quality outcomes.
12. Assume leadership to promote responsible stewardship to advance the discipline and profession, preserve resources and respect the environment.

### **D.N.P. Program Curriculum Plan**

The following courses are required for the D.N.P. program.

---

#### **Doctoral Core Courses - 32-39 credits**

Epidemiology for Advanced Nursing Practice	NGR 6673	3
Theoretical Grounding for Caring-Based Practice	NGR 7124	3
Ethics and Public Policy for Promoting Health	NGR 7738	3
Population-Based Healthcare and Health Equity	NGR 7662C	3
Introduction to Practice Management: Advanced Nursing Practice	NGR 7767	3
The Role of the Doctor of Nursing Practice as Scholar	NGR 7768	3
Interprofessional Leadership in Healthcare	NGR 7795	3

Translation of Evidence for Advanced Practice Nursing	NGR 7855	3
Caring, Informatics and Technology in Advanced Nursing Practice	NGR 7876	3
Healthcare System Analysis and Quality Improvement	NGR 7895	3
Practicum for the Doctor of Nursing Practice*	NGR 7947L	1-3
Doctor of Nursing Practice Proposal Development	NGR 7974	3
Project Implementation, Evaluation and Dissemination*	NGR 7975C	1-3

\* Student must register for this course twice.

## **NURSING**

### **DOCTOR OF NURSING PRACTICE (D.N.P.) TO DOCTOR OF PHILOSOPHY (PH.D.)**

*(Minimum of 60 credits required)*

The D.N.P. to Ph.D. program is an alternative pathway to the Doctor of Philosophy with Major in Nursing available for highly qualified Doctor of Nursing Practice graduates.

#### **Admission Requirements**

All Ph.D. program admission requirements outlined previously are necessary. Additionally, a Doctor in Nursing Practice degree with a Major in Nursing from a university or college of nursing program accredited by the National League for Nursing or the Commission on Collegiate Nursing Education is required. Transcripts must be sent to the University's Graduate College as described in the Ph.D. program's admission section.

The following are also required for admission to the D.N.P. to Ph.D. program:

1. GPA of 3.5 for the D.N.P. degree.
2. One reference letter from the D.N.P. program is required in addition to others described in the Ph.D. program's admission section.
3. Scholarly product from coursework completed at the D.N.P. level.

4. All other Ph.D. admission requirements must be met.

## Degree Requirements

The D.N.P. to Ph.D. program requires a minimum of 60 credits following the D.N.P. degree. One plan of study prepares students for an educator role. Other role preparation, such as a holistic focus, is possible but may require additional credits. The Nurse Practitioner concentration is not available to D.N.P. to Ph.D. students. Study plans are developed with direction from the student's faculty mentor and the Ph.D. coordinator.

The faculty in the College may recommend the Doctor of Philosophy with Major in Nursing degree when the student has met the following requirements:

1. The candidate must complete 60 credits beyond the Doctor in Nursing Practice, to include at least 45 credits in required and approved coursework and at least 15 credits of dissertation work.
2. The 45 credits of required and approved coursework prior to dissertation include 9 credits of theory core, 15 credits of research core, 6 credits of advanced statistics beyond the required prerequisite course, 6 credits in the nursing concentration core and doctoral seminars, 3 credits in cognate courses that complement the student's research focus area, at least 90 research practicum hours, and 3 credits of doctoral pre-candidacy study.
3. D.N.P. candidates have the option to transfer in 3 credits of coursework outside the discipline of nursing in substitution for the required cognate course. A course transcript must be submitted to the Ph.D. program department for approval and an official transcript must be submitted to the Graduate College after obtaining departmental approval for the transfer credits.
4. D.N.P. candidates have the option to challenge 6 credits for the courses identified in the curriculum plan below. D.N.P. candidates will register for the course to be challenged, and they will take an examination or write a paper (the challenge requirements are up to the discretion of the faculty member teaching the course). D.N.P. candidates who receive a "B" or better on the paper or in the examination will successfully complete the course challenge. The grade that candidates receive on the paper or written examination will be the grade they receive in the course.
5. The 3 credits of cognate coursework must be approved by an advisor. These credits must be taken in another discipline focusing on dissertation-related content.
6. The candidate must successfully complete the qualifying comprehensive examination at the end of all coursework during the doctoral pre-candidacy study course period. This examination offers the student the opportunity to show synthesis of knowledge and understanding of theory, research and nursing concentration components from coursework.
7. The dissertation committee for each student will oversee the development and completion of the

student's dissertation. Upon successful defense and completion of the dissertation, the candidate will be awarded the degree of Doctor of Philosophy at the next graduation ceremony.

### **D.N.P. to Ph.D. Program Curriculum Plan**

The following courses are required for the D.N.P. to Ph.D. program.

---

#### **Doctoral Core Courses - 33 credits**

Philosophies of Science Grounding Nursing	NGR 7115	3
---	----------	---

Caring Science 1: An Essential Domain of Nursing Knowledge	NGR 7116	3
--	----------	---

Caring Science 2: Developing Phenomena of Interest within Research Focus Areas	NGR 7118	3
--	----------	---

Caring Science 3: Innovative Methodologies to Study Caring Science	NGR 7119	3
--	----------	---

Theory Development and Application in Nursing	NGR 7121	3
---	----------	---

Ethics and Public Policy for Promoting Health	NGR 7738	3
---	----------	---

Qualitative Research Methods 1	NGR 7815	3
--------------------------------	----------	---

Mixed Methods in Practice-Based Research	NGR 7816	3
--	----------	---

Advanced Nursing Research: Applied Quantitative Design and Methods	NGR 7818	3
--	----------	---

Advance Applied Statistics	NGR 7845	3
----------------------------	----------	---

Essential Statistical Methods for Nursing Science	NGR 7846	3
---	----------	---

Innovations in Inquiry	NGR 7853	3
------------------------	----------	---

Scholarship Practicum	NGR 7946	3
-----------------------	----------	---

---

#### **Doctoral Cognate Courses - Choose 3 credits with advisor; see #5 under Degree Requirements**

Doctoral Research Courses (18 credits; students may repeat any of these three courses)

Doctoral Synthesis (Comps)	NGR 7978	1-3
----------------------------	----------	-----

---

Advanced Research	NGR 7979*	1-3
Dissertation (taken multiple times)	NGR 7980*	1-15

\* NGR 7979 and NGR 7980 credits must total 15.

**Note:** Students pay a fee to challenge select courses by taking an examination or by writing a paper.

**Note:** Transfer students submit a transcript for evaluation and plan of study will be individualized.

## **NURSING**

### **BACHELOR OF SCIENCE IN NURSING (B.S.N.) TO DOCTOR OF NURSING PRACTICE (D.N.P.)**

*(Minimum of 72 credits required)*

*(Maximum of 85 credits)*

The B.S.N. to D.N.P. program prepares graduates for advanced practice roles as Adult/Gerontological Nurse Practitioners, Family Nurse Practitioners or Psychiatric Mental Health Nurse Practitioners with a doctoral degree focusing on practice leadership. The emphasis of the program is the delivery of advanced practice nursing (APN) to culturally diverse populations, especially the burgeoning group of persons over 65 years old. Graduate education in nursing occurs within the context of societal demands and needs as well as the interprofessional work environment. The Institute of Medicine (IOM, 2003) and the National Research Council of the National Academies (2005) have called for nursing education that prepares individuals for practice with interdisciplinary, information systems, quality improvement and patient safety expertise.

The program is designed for nursing leaders to develop skills in shaping and evaluating practice models in their own practice settings. The program will accept a limited number of applicants. Meeting minimum admission requirements does not guarantee admission. The program is designed to be completed in a full-time plan of study. Classes are offered in various formats, including online, live weekly sessions and intensive weekends.

The American Association of Colleges of Nursing recommends that students complete 1000 hours of clinical practicum hours. Clinical practice hours in the second year of study are designed to develop new practice skills and test new models of care.

## Admission Requirements

B.S.N. to D.N.P. applicants are admitted once a year in the summer. See the College of Nursing [website](#) for application deadlines. Evidence of the following information is required in the admissions process:

1. A baccalaureate degree in Nursing from an approved nursing program. B.S.N. programs will be evaluated by the Ph.D. program department on a case-by-case basis. International B.S.N. programs are not accredited by U.S. accrediting bodies.
2. A minimum cumulative 3.0 GPA in the baccalaureate program is required.
3. Curriculum vitae or résumé presented in specified format located on the College of Nursing [website](#).
4. Two letters of recommendation from academic and professional references, in which one is from a baccalaureate program professor holding a doctorate (guidelines located on the College of Nursing [website](#) ).
5. A typed statement of the applicant's goals for the D.N.P. degree of no more than 500 words.
6. Satisfactory oral interview by members of the graduate admissions committee.
7. A Level 2 (state/federal) criminal background check.
8. Basic undergraduate research and statistics course.
9. Current or eligible for Florida RN license.

**Note:** The B.S.N. to D.N.P. program is designed for full-time study.

## Degree Requirements

The faculty in the College may recommend the Doctor of Nursing Practice when the student has met the following requirements:

1. The candidate must complete 72 graduate credits beyond the bachelor's degree.
2. The candidate must complete a minimum of 1000 clinical hours in graduate courses beyond the bachelor's degree.
3. The candidate must complete a D.N.P. project that evaluates an innovation related to advanced practice nursing and/or administration of nursing care.
4. The D.N.P. project committee for each student will oversee the development and completion of the student's project. Upon successful completion of the project, the candidate will be awarded the degree of Doctor of Nursing Practice.

## Program Outcomes

See D.N.P. [Program Outcomes](#) listed above.

## Master of Science in Nursing Option

Completion of the Master of Science in Nursing (M.S.N.) degree is an option for all B.S.N. to D.N.P. degree-seeking students. This Master's Along the Way option allows D.N.P. students to be eligible to take the national certification exams for the advanced practice specialty area and to become licensed as advanced practice nurses prior to completing the D.N.P. degree.

Upon completion of all master's-level coursework (which occurs during semester IX of the D.N.P. curriculum), D.N.P. students are eligible for a Master of Science in Nursing degree. Students desiring the M.S.N. degree must apply for the degree during semester VIII of the D.N.P. curriculum. After the M.S.N. degree has been awarded, the D.N.P. student may then move directly into the final doctoral-level courses (semesters X and XI) to complete the D.N.P. degree.

## B.S.N. to D.N.P. Program Curriculum Plan

---

### Doctoral Core Courses - 49 or 52 credits

Advanced Health Assessment	NGR 6002	2
Advanced Health Assessment Lab	NGR 6002L	1
Advanced Nursing Practice Grounded in Caring	NGR 6110	3
Advanced Pathophysiology	NGR 6141	3
Advanced Pharmacotherapeutics	NGR 6172	3
Epidemiology for Advanced Nursing Practice	NGR 6673	3
Theoretical Grounding for Caring-Based Practice	NGR 7124	3
Ethics and Public Policy for Promoting Health	NGR 7738	3
Population-Based Healthcare and Health Equity	NGR 7662C	3
Introduction to Practice Management: Advanced Nursing Practice	NGR 7767	3
The Role of the Doctor of Nursing Practice as Scholar	NGR 7768	3
Interprofessional Leadership in Healthcare	NGR 7795	3
Translation of Evidence for Advanced Practice Nursing	NGR 7855	3

Caring, Informatics and Technology in Advanced Nursing Practice	NGR 7876	3
Healthcare System Analysis and Quality Improvement	NGR 7895	3
Practicum for the Doctor of Nursing Practice*	NGR 7947L	1-3
Doctor of Nursing Practice Proposal Development	NGR 7974	3
Project Implementation, Evaluation and Dissemination*	NGR 7975C	1-3

\*Student must register for this course twice.

***Concentration: Adult/Gero Nurse Practitioner - 31 credits***

Advanced Pharmacotherapeutics 2	NGR 6176	3
Primary Care 1: Foundations of Advanced Nursing Practice	NGR 6200	3
Primary Care 1 Practicum: Foundations of Advanced Nursing Practice	NGR 6200L	5 –
Perspectives of Aging	NGR 6251	3
Women's Health: Nursing Situations in Advanced Practice	NGR 6342	3
Primary Care 2: Foundations of Advanced Nursing Practice	NGR 6605	3
Primary Care 2 Practicum: Foundations of Advanced Nursing Practice	NGR 6605L	4 –
Comprehensive Care of Adolescents through Older Adults	NGR 6607	3
Comprehensive Care of Adolescents through Older Adults Practicum	NGR 6607L	4

***Concentration: Family Nurse Practitioner - 31 credits***

Advanced Pharmacotherapeutics 2	NGR 6176	3
Primary Care 1: Foundations of Advanced Nursing Practice	NGR 6200	3
Primary Care 1 Practicum: Foundations of Advanced Nursing Practice	NGR 6200L	5 –

Care of Children: Nursing Situations in Advanced Practice	NGR 6301	3
Women's Health: Nursing Situations in Advanced Practice	NGR 6342	3
Primary Care 2: Foundations of Advanced Nursing Practice	NGR 6605	3
Primary Care 2 Practicum: Foundations of Advanced Nursing Practice	NGR 6605L	4 –
Primary Care of Families: Comprehensive Advanced Nursing Practice	NGR 6619	3
Primary Care of Families Practicum	NGR 6619L	4
<b><i>Concentration: Psychiatric Mental Health Nurse Practitioner - 25 credits</i></b>		
Psychopathological Disorders Across the Lifespan: Advanced Nursing Situations	NGR 6503	3
Psychiatric Mental Health Nursing Across the Lifespan: Role Synthesis in Advanced Nursing Practice	NGR 6505L	4
Psychiatric Mental Health Nursing Across the Lifespan: Diagnosis and Medication Management in Advanced Nursing Practice	NGR 6507L	2
Psychiatric Mental Health Nursing Across the Lifespan: Group Therapy in Advanced Nursing Situations	NGR 6508	3
Psychiatric Mental Health Nursing Across the Lifespan Practicum 2: Group Therapy in Advanced Nursing Practice	NGR 6508L	3
Psychiatric Mental Health Nursing Across the Lifespan: Individual and Family Therapy in Advanced Nursing Situations	NGR 6509	3
Psychiatric Mental Health Nursing Across the Lifespan Practicum 1: Individual and Family Therapy in Advanced Nursing Practice	NGR 6509L	4 –
Psychopharmacology Across the Lifespan for Advanced Nursing Practice	NGR 6538	3

## INFORMATION

For questions/clarification/information regarding specific programs in the College of Nursing, contact the following:

**Undergraduate and Accelerated B.S.N. Programs:** Nerla Moise ([nursing@fau.edu](mailto:nursing@fau.edu)) at 561-297-6261 (Accelerated Pre-Licensure Program). Javaris Hammond ([nursing@fau.edu](mailto:nursing@fau.edu)) at 561-297- 6261 (Freshmen Direct Admit). Latchmin Harrilal ([nursing@fau.edu](mailto:nursing@fau.edu)) at 561-297- 6261 (RN- B.S.N. Program). Kyndall Mammah ([kpritcha@health.fau.edu](mailto:kpritcha@health.fau.edu)) at 561-297-6261 (Second Degree Part-Time B.S.N. -Working Professional Program).

**Master of Science in Nursing (M.S.N.) Program and Post Graduate Certificates:** Dr. Katherine Chadwell ([kchadwel@health.fau.edu](mailto:kchadwel@health.fau.edu)) or Amanda Beasley ([beasleya@health.fau.edu](mailto:beasleya@health.fau.edu)) at 561-235-1503.

**Doctor of Nursing Practice Program:** Dr. Debra Hain([dhain@health.fau.edu](mailto:dhain@health.fau.edu))or Joseph Lotito([lotitoj@health.fau.edu](mailto:lotitoj@health.fau.edu)) at 561-297-1109.

**Doctor of Philosophy Program:** Dr. Howard Butcher ([hbutcher@health.fau.edu](mailto:hbutcher@health.fau.edu)) or Gerardo Guzman ([gguzman3@health.fau.edu](mailto:gguzman3@health.fau.edu)) at 561-297-0006.

### Disclaimer

More credits may be required to accomplish nursing practice competencies, to meet changes related to curriculum or to meet required nursing practice hours for state licensure and/or national certifications.

### [Link to Course Descriptions for the Charles E. Schmidt College of Science](#)

The Charles E. Schmidt College of Science offers baccalaureate programs in Biological Sciences, Chemistry, Exercise Science and Health Promotion, Geosciences, Health Science, Mathematics, Neuroscience and Behavior, Physics, Psychology, Urban Design, and Urban and Regional Planning. The degrees awarded are Bachelor of Arts (B.A.), Bachelor of Science (B.S), Bachelor of Urban Design (B.U.D.) and Bachelor of Urban and Regional Planning (B.U.R.P.). Refer to the department sections for which degrees are awarded in each major.

The Bachelor of Arts programs are offered in the liberal arts tradition. They permit greater elective breadth with less specialization than the Bachelor of Science programs. B.A. programs are available for the preparation of secondary school science and mathematics teachers, for preprofessional programs such as dentistry and medicine and for graduate school preparation in certain interdisciplinary fields.

The Bachelor of Science programs meet the requirements of professional associations and provide the more intensive training required for admission to graduate work. They are normally elected by students intending to pursue careers in these fields.

Honors programs for undergraduates are available through most College of Science departments. Additionally, eligible College of Science majors in Biology, Psychology, and Neuroscience and Behavior bachelor's programs may apply to participate in the [FAU Max Planck Honors Program \(MPHP\)](#). Established by the Jupiter Life Science Initiative, the College of Science and the Wilkes Honors College, working in partnership with the Max Planck Florida Institute for Neuroscience, the

MPHP is a Jupiter-specific honors program for undergraduates. The program provides participants with exclusive enrichment opportunities. Students who maintain all standards and fulfill all requirements of the MPHP receive a designation of “FAU Max Planck Honors” on their final transcript. Details of the MPHP are listed [here](#). Visit the [MPHP website](#) to apply.

Programs leading to the master's degree are available in Biological Sciences, Chemistry, Environmental Science, Exercise Science and Health Promotion, Geosciences, Mathematics, Physics, Psychology and Urban and Regional Planning. Degrees awarded are Professional Science Master (P.S.M.), Master of Science (M.S.), Master of Science in Teaching (M.S.T.), Master of Arts (M.A.) and Master of Urban and Regional Planning (M.U.R.P.). Refer to the department sections for which degrees are awarded in each major.

Doctoral programs (Ph.D.) are offered in Integrative Biology, Chemistry, Geosciences, Mathematics, Neuroscience, Physics and Psychology. Complex Systems and Brain Sciences is being phased out and is no longer accepting students.

## BACHELOR'S DEGREE PROGRAM INFORMATION

### **General Studies Degree Program**

The University offers a Bachelor of General Studies (B.G.S.) degree program that allows students to design a plan of study to meet their personal interests and career goals. The 120-credit program includes 15 credits of upper-division coursework in one discipline, which students select in consultation with an advisor. For more B.G.S. details and degree requirements, please refer to the [Degree Programs section](#) of this catalog.

### **Admission Requirements and Recommendations**

The undergraduate applicant for admission to the Charles E. Schmidt College of Science must meet the general freshman or transfer admission requirements of the University. In addition, the student should consider the list of science and mathematics courses required and recommended by the major department of choice in planning the lower-division program. In general, transfer students should not take more work in their proposed major field than is recommended in the [Degree Requirements section](#) of this catalog under Lower-Division College and Department Requirements and Recommended Courses. Freshmen should review the core curriculum also in the Degree Requirements section.

### **Degree Requirements**

All candidates for a baccalaureate degree from the Charles E. Schmidt College of Science must satisfy:

1. All of the general baccalaureate degree requirements of the University (see the Degree Requirements section).
2. The foreign language requirement as outlined in the Degree Requirements section of this catalog.
3. All of the special requirements for the degree as specified by the department in which the program is offered; these requirements are listed in this section.
4. All the requirements of the Charles E. Schmidt College of Science.

### **Charles E. Schmidt College of Science Requirements**

1. Department major: Credits in the major field as designated for each student by the major department. In order to graduate, a student must maintain a "C" average in departmental major courses unless otherwise specified by the department. Any coursework in the major field transferred from another institution must be approved by the major department.
2. Cognate work: Supporting work in departments related to the major as specified by the student's advisor.
3. Transient Work policy: After matriculation into the Charles E. Schmidt College of Science, transient work is not permitted except in unusual circumstances. In these cases, an academic petition showing justification is required.

### **Cooperative Education Program**

The College's Cooperative Education Program enables interested students from all departments in the College to take advantage of the opportunity to alternate periods of academic study with periods of paid work experience. The program is available on an optional basis to all students in accordance with the description shown in the [Student Services and Activities section](#) of this catalog. In addition, students in the Charles E. Schmidt College of Science must meet the following requirements:

1. Students wishing to participate in the co-op plan in the College of Science should contact their major department to determine which of the co-op plans is available to them.
2. The maximum amount of credit that may be earned is 10 credits, a portion of which may be part of the degree program (non-additive) and a portion of which may be in addition to the requirements of the degree program (additive) as outlined below:

<b>Subject</b>	<b>Non-additive</b>	<b>Additive</b>
Biological Sciences	4	6
Chemistry	10	0
Geology	4	6

Mathematics	4	6
Physics	3	7
Psychology	8	2

3. The following reflects the minimum credits per work period that may be allowed. Students should contact their major department to determine which plan is available to them:

Alternating Plan (40 hr./wk.) 2-4 credits

Parallel Plan (20 hr./wk.) 1-2 credits

Special Plan (40 hr./wk.) 2-4 credits

4. The student will be evaluated as follows:
- Technical report
  - Employer's evaluation
  - Final co-op report
5. Student will be graded as satisfactory/ unsatisfactory.
6. A student's participation in the program must be approved by all of the following:
- The department;
  - The Charles E. Schmidt College of Science;
  - The director of Cooperative Education.
7. A job related to the student's major must be available.
8. The student must accept the job.
9. The employer must accept the student.

### **Pre-Health Professional Programs**

The University provides curricular sequences that satisfy the requirements for preprofessional students aspiring to the practice of medicine, dentistry, optometry, pharmacy, veterinary medicine, etc.

New students in this category are urged to seek advisement from the Pre-Health Professions Office prior to registration and to start a special file at this time. The office may be reached at 561-297-3307.

The Pre-Health Professions Office provides continual guidance and helps students realize their maximum potential for success in applying for admission to professional schools. The office serves the Pre-Health Professions Committee of the Charles E. Schmidt College of Science, which has functioned for many years with ever-increasing success in helping qualified applicants enter the professional

school of their choice. The office maintains a preprofessional discussion group, Premed-L.

## COMBINED DEGREE PROGRAM INFORMATION

The College of Science offers four combined B.S./M.S. programs in the following areas: Biological Sciences, [Exercise Science and Health Promotion](#), [Geosciences](#), Mathematics and Statistics, and Biological Sciences/Environmental Science. A [B.A. in Heath Science combined with an M.S. in Exercise Science and Health Promotion](#), a [B.A./M.A. in Psychology](#), and a [B.S. in Neuroscience and Behavior with an M.A. in Psychology](#) are other offerings. The College also offers a combined B.S. in Physics with a Professional Science Master (P.S.M) in Medical Physics.

For the Biological Sciences B.S./M.S. program, a Molecular Biology and Biotechnology path of study prepares students to enter the interdisciplinary Ph.D. program in Integrative Biology. Both B.S. and M.S. degrees can be completed in five years. The B.S. in Biological Sciences/M.S. in Environmental Science provides hands-on training for a career in environmental science and also prepares students for the Integrative Biology Ph.D. and the Geosciences Ph.D. For detailed information about both combined programs, see the Biological Sciences section of the catalog.

The accelerated tracks, [B.A. to M.S.](#) and [B.S. to M.S.](#), in Exercise Science and Health Promotion assist students in obtaining a master's degree, which may be a requirement in their chosen career paths.

In the Mathematics discipline, students may also complete a Bachelor of Science degree and a Master of Science degree in five years. The program is designed to prepare students for the pursuit of a Ph.D. in Mathematics. See the Mathematics and Statistics section of this catalog for admission and degree requirements.

A combined program in Mathematics is offered jointly by the Wilkes Honors College and the Charles E. Schmidt College of Science. This five-year program leads to bachelor's and master's degrees in Mathematics. Details of the undergraduate portion of the program can be found [here](#).

The combined Bachelor of Science (B.S.) in Physics and Professional Science Master (P.S.M.) in Medical Physics is an accelerated, five-year program. Students apply to the B.S./P.S.M. program in the first semester of their junior year and begin taking graduate courses after completion of their junior year (summer prior to senior year); those courses would apply to both the B.S. and P.S.M. degrees. For details, see the Physics section of the catalog.

## MASTER'S DEGREE PROGRAM INFORMATION

The Master of Science and Master of Arts will be conferred on Charles E. Schmidt College of Science students who satisfy the general University requirements for this degree, and in addition, meet the following College requirements:

1. **Residence Requirements:** Each student must be enrolled for two semesters in courses offered on campus.
2. **Admission to Candidacy:** Admission to candidacy for the master's degree in the College is usually granted after the applicant has completed a minimum of 8 graduate credits, with a 3.0 grade point average, in the major department and has satisfied requirements set by the University as well as by the applicant's major department. The major department may require satisfactory performance in a qualifying examination, demonstration of capability in a foreign language and/or selection of a thesis advisor and topic as prerequisites for candidacy.
3. If a thesis is required, students must pass a final oral defense of their thesis and be examined on such other material as may be indicated by the faculty.

Students who do not meet the standards established by their department may be subject to dismissal.

### **Master of Science in Teaching**

Several departments in the Charles E. Schmidt College of Science that have approved master's programs also have programs leading to the Master of Science in Teaching. These programs are designed to prepare science teachers for secondary schools and junior colleges.

The curriculum for an M.S.T. from the College of Science consists of a minimum of 30 credits (excluding internship) beyond the baccalaureate, of which up to 6 credits may be allowed for a suitable thesis project at the discretion of the department. The same conditions of departmental standards pertain as above.

Students who wish to obtain an M.S.T. degree but who have deficiencies in their undergraduate background, as determined by the department, will register as non-degree students. Upon admission to graduate status, up to 9 credits taken under the non-degree-seeking student category can be transferred to the graduate program at the discretion of the major department. Students must take the remainder of the program while in graduate status. Students will be advised by their departments which undergraduate courses from their projected curricula will be acceptable for the M.S.T. degree. A master's committee will be constituted to supervise and advise students at the time they transfer to graduate status.

## DOCTORAL DEGREE PROGRAM INFORMATION

The Charles E. Schmidt College of Science offers programs of study leading to the Doctor of Philosophy (Ph.D.) degree in Integrative Biology, Chemistry, Geosciences, Mathematics, Neuroscience, Physics and Psychology. Information for the Integrative Biology and the Neuroscience programs is found under the Interdisciplinary Programs heading below. For specifications for the other doctoral programs, see the appropriate departmental section of this catalog. Complex Systems and Brain Sciences is being phased out and is no longer accepting students.

## CERTIFICATE PROGRAMS

Several certificate programs are offered in the Charles E. Schmidt College of Science. The Biological Sciences Department offers an undergraduate [Biotechnology certificate](#) program. In Chemistry and Biochemistry, students may choose from the undergraduate [Pharmaceutical Technology certificate](#) and the graduate [Post-Baccalaureate Research Education Program in Chemistry \(PREPChem\) certificate](#). The Department of Geosciences offers an undergraduate certificate in Geographic Information Systems, an undergraduate Advanced Geographic Information Systems certificate, and two graduate certificates, one in Remote Sensing and the other in [Geographic Information Systems](#). In Mathematics and Statistics, students may choose from undergraduate certificates in Statistics, Actuarial Science, Cybersecurity and [Data Science](#), and the graduate certificate in [Cyber Security](#). An undergraduate minor in Cybersecurity is also available. In Psychology, students may choose the undergraduate certificate in [Applied Mental Health Services](#). Requirements for these certificate programs are listed within their specific departments. The Department of Physics offers a graduate certificate in Medical Physics that appears below in Interdisciplinary Programs.

Five certificate programs—Environmental Science, Environmental Restoration, Medical Physics, Neuroscience and Post-Baccalaureate Pre-Health Professions—are interdisciplinary in nature, crossing several Charles E. Schmidt College of Science departments. Details of these certificate programs are listed below under Interdisciplinary Programs.

### **Undergraduate Research Certificate**

To recognize undergraduate students' excellence in undergraduate research, the Office of Undergraduate Research and Inquiry (OURI) has established the [Undergraduate Research Certificate](#). Requirements for the Research Certificate include completion of 12 credits of research exposure, skill-

building and intensive courses as well as dissemination of the outcomes of students' research and inquiry through a research presentation or exhibition.

## INTERDISCIPLINARY PROGRAMS

The Charles E. Schmidt College of Science offers several interdisciplinary programs: a bachelor's degree program in [Health Science](#); the [FAU Max Planck Honors Program](#); a graduate certificate/preparatory program in Post-Baccalaureate Pre-Health Professions; undergraduate certificates in [Applied Mental Health Services](#) and [Environmental Science](#); graduate certificates in [Environmental Restoration](#), [Medical Physics](#), [Neuroeconomics](#), and [Neuroscience](#); a master's degree program in [Environmental Science](#); a master's degree program in Marine Science and Oceanography; a [professional science master in Medical Physics](#), and doctoral degree programs in [Integrative Biology](#) and [Neuroscience](#). These programs draw on a variety of disciplines and diverse faculty to present students with programs of study especially designed for their individual interests. Admission and degree requirements for the interdisciplinary programs follow.

### HEALTH SCIENCE

#### BACHELOR OF ARTS (B.A.)

**Behavioral and Mental Health Concentration**

**Public/Global/Environmental Health Concentration**

**Science Concentration**

**Women's Health Concentration**

*(Minimum of 120 credits required)*

The Bachelor of Arts with major in Health Science degree is designed for students interested in

pursuing careers in healthcare-related professions. This degree provides broad-based interdisciplinary training with a core in the basic sciences and requires a concentration in one of the following areas: Women's Health, Public/Global/Environmental Health, Science, and Behavioral and Mental Health.

The program structure enables students to take relevant coursework in various colleges and departments across FAU to broaden their understanding of factors that both positively and negatively impact the healthcare system, patients and practitioners. In addition, through the *Health Science* course sequence, students learn how professionals from various fields of practice (medicine, pharmacy, social work, nursing, etc.) interact in a collaborative manner. Students also have access to clinical *observation* opportunities and other extracurricular activities (lab experiences, internships, research).

### Prerequisite Coursework for Transfer Students

Students transferring to Florida Atlantic University must complete both lower-division requirements (including the requirements of the General Education Program) and requirements for the college and major. Lower-division requirements may be completed through the A.A. degree from any Florida public college, university or community college or through equivalent coursework at another regionally accredited institution. Before transferring and to ensure timely progress toward the baccalaureate degree, students must also complete the prerequisite courses for their major as outlined in the [Transition Guides](#).

All courses not approved by the Florida Statewide Course Numbering System that will be used to satisfy requirements will be evaluated individually on the basis of content and will require a catalog course description and a copy of the syllabus for assessment.

---

### Core Requirements

Health Science 1: Foundations of Health and Illness	IDS 2122	3
Health Science 2: Evaluating the Evidence	IDS 3184	1

## HEALTH HUMANITIES UNDERGRADUATE MINOR

*(Minimum of 15 credits)*

The minor in Health Humanities is open to all undergraduate students at FAU. The minor is awarded upon graduation from an undergraduate program at FAU; it is not awarded independently of an undergraduate degree. For minor details click [here](#).

## **POST-BACCALAUREATE PRE-HEALTH PROFESSIONS UNDERGRADUATE CERTIFICATE**

*(Minimum of 52 credits required)*

The Charles E. Schmidt College of Science offers a Post-Baccalaureate Pre-Health Professions certificate for students interested in pursuing medical, dental, veterinary or other health-related professions and who have not completed prerequisite courses as undergraduates. This certificate program is designed to assist students academically, build their research portfolios and help them obtain healthcare shadowing and volunteering experiences. The requirements for students pursuing this certificate are:

1. Students must be degree-seeking at Florida Atlantic University;
2. Students must have an undergraduate GPA of 3.0 or higher in the last 60 credits of their first baccalaureate degree;
3. Students should complete 100 hours of approved community or volunteer service and shadowing while completing this certificate;
4. Students should maintain a 3.0 GPA in order to earn this certificate; and
5. Students must complete at least 52 credits with 75 percent of the credits listed below (for the certificate) in residence at FAU.

In addition, students who wish to qualify for an interview with Florida Atlantic University's Pre-Health Professions Committee need to:

1. Open a Pre-Health Professions file with the Charles E. Schmidt College of Science Pre-Health Professions Office;
2. Have a GPA of 3.2, and a GRE, or MCAT scores of 500 or higher (or equivalent DAT or PCAT scores for those professions); and
3. Have a minimum of three letters of recommendation, two of which must be from science faculty.

For further details, please contact the Charles E Schmidt College of Science Pre-Health Professions Office: [preprof@fau.edu](mailto:preprof@fau.edu).

**ENVIRONMENTAL SCIENCE**

The Environmental Science Program at Florida Atlantic University is developing educational options that will produce environmental scientists, educators, professionals, managers and citizens with the ability to understand and provide technically sound and visionary solutions to environmental problems. The Environmental Science Program recommends that every FAU student attain some awareness and

sensitivity to environmental issues. In order to understand the complex and diverse nature of local and global issues, the curriculum incorporates new courses, graduate and undergraduate certificates, thesis and non-thesis options and a focus on experiential learning. Environmental Science is designed to emphasize a holistic view of the relationship between humans and the environment, incorporating both an interdisciplinary and multidisciplinary focus, with a focus on wetland and coastal systems. Programs of study include the undergraduate Environmental Science certificate, [the graduate Environmental Restoration certificate](#), [the Master of Science with Major in Environmental Science](#) and a combined, accelerated program with Biological Sciences in which students may earn the B.S. in Biological Sciences and the M.S. in Environmental Science in five years. [This program appears in the Biological Sciences Department section.](#)

## **ENVIRONMENTAL SCIENCE** **UNDERGRADUATE CERTIFICATE**

*(Minimum of 18 credits required)*

The Environmental Science certificate program is administered by the Environmental Science Program. Participating faculty have appointments in all departments in the Charles E. Schmidt College of Science, as well as departments in participating colleges. The program allows undergraduate students to explore environmental issues through a broadly based interdisciplinary program. Program objectives are:

1. Introduce students to the major environmental issues facing our rapidly changing society.
2. Provide in-depth analysis in several areas of study, including vital concerns such as wetland and coastal ecosystem management, environmental restoration, environmental ethics, natural resource management, environmental planning and policies, environmental economics and geographical analysis.

The certificate program is designed to enhance an undergraduate student's major program of study. This option does not qualify as a major in Environmental Science. The certificate in Environmental Science is awarded in conjunction with an academic major and consists of 18 credits of environmentally focused courses. Students who already hold a baccalaureate degree may pursue the certificate as a non-degree-seeking student or in conjunction with a second bachelor's degree. All courses taken in the curriculum may be applied toward other general and specific graduation requirements and courses taken to fulfill other requirements may be applied to the certificate curriculum. All courses must be successfully completed with a grade of "C" or better to be counted toward the certificate.

## Certificate Curriculum and Requirements

The certificate consists of 18 credits. All students must complete the following requirements:

1. All students must take one course from each of the **three core areas** below.

---

### Human-Environmental Interactions Core

*Choose one of the following*

Environment and Society	EVR 2017	3
Issues in Human Ecology	PCB 3352	3

---

### Statistics Core

*Choose one of the following*

Introductory Statistics	STA 2023	3
Introduction to Biostatistics	STA 3173	3
Experimental Design and Statistical Inference	PSY 3234	3
Quantitative Methods	GEO 4022	3

---

### Environmental Science Core

*Choose one of the following*

Critical Thinking in Environmental Science	EVS 4021	3
--	----------	---

2. Students must **take one course from three of the five focus areas listed below**. These include Biology, Earth Science, Human-Environmental Interactions, Geographic Information Science and Chemistry.

---

## **ENVIRONMENTAL RESTORATION GRADUATE CERTIFICATE**

*(Minimum of 18 credits required)*

The Environmental Science Program offers the Environmental Restoration certificate for graduate students who wish to pursue an environmental restoration position upon graduation, professionals looking to increase their knowledge base and/or advance professionally and anyone considering becoming a Certified Ecological Restoration Practitioner (CERP). The Society for Ecological Restoration (SER) administers the CERP program, which covers a rigorous assessment of academic credentials, including courses in ecological restoration, biological science, physical science, resource management and conservation, and quantitative science. FAU's Environmental Restoration certificate can help students fulfill those requirements by bolstering their credentials in the assessed disciplines by drawing upon courses from environmental science, geosciences, biology, chemistry, urban and regional planning, and civil engineering.

Students interested in SER's professional certification should consult with an Environmental Science program advisor to review their academic credentials and tailor their Environmental Restoration certificate plan of study to maximize the certificate's benefits to their academic credentials.

The certificate consists of a minimum of 18 credits, including two core courses, and four electives chosen from a minimum of three of the four elective focal areas. All courses must be completed with a grade of "C" or better to be counted toward the certificate.

---

### **Environmental Restoration Core Courses**

Environmental Restoration	EVR 6334	3
Restoration Implementation and Management	EVR 6358	3

## **MEDICAL PHYSICS**

### **GRADUATE CERTIFICATE**

*(Minimum of 18 credits required)*

The Medical Physics certificate is an 18-credit interdisciplinary graduate program. Students are required to take a 3-credit prerequisite course, followed by 15 credits of program courses.

Medical Physics is an applied branch of physics devoted to the application of concepts and methods from physics to the diagnosis and treatment of human disease. This program prepares students who are interested in health-related careers and/or seeking an advanced degree in Medical Physics. Career paths for medical physicists include radiation therapy physicist, diagnostic medical physicist, nuclear medical physicist and health physicist. Companies that produce treatment equipment, treatment planning systems, support materials and software and hardware development; and research and academia are also suitable career paths.

This certificate program is designed to provide the essential didactic elements of Medical Physics to Ph.D. holders seeking to pursue an alternative pathway to Medical Physics residency. It is intended to enable individuals with a doctoral degree in physics or a related discipline to meet the didactic requirements needed to enter a CAMPEP-accredited residency program (Commission on Accreditation of Medical Physics Education Programs). Students enrolled in the certificate program may also register for Part 1 of the American Board of Radiology board exam in Medical Physics.

Students with a Ph.D. in physics, physical sciences, mathematics or engineering who are interested in this program may apply for admission to the regular graduate program of the Physics Department. Also, students who are officially admitted as doctoral students in the above-mentioned fields may apply.

## NEUROECONOMICS GRADUATE CERTIFICATE

*(Minimum of 12 credits required)*

Neuroeconomics is a field of study investigating the processes underlying choice behavior by applying formal mathematical and computational models of decision making to the analysis and interpretation of neuroimaging data. The Neuroeconomics certificate program is suitable either 1) for students who have some knowledge of statistics and programming but who do not necessarily use this knowledge on a day-to-day basis or 2) for students with advanced quantitative skills who aim to learn how those skills can be applied to neuroscience research. Available to master's and doctoral students, the program is administered through the College of Science's Dean's Office.

### Admission Requirements

1. Students must satisfy the prerequisites for enrolling in courses in the certificate program.
2. Approval of the certificate program coordinator prior to taking courses to fulfill the 12-credit certificate requirement.

### Degree Requirements

The Neuroeconomics certificate consists of 12 credits. All four courses must be successfully completed (a minimum of B+ average). Students must satisfy the prerequisites for each course in the program.

---

#### Required Courses - 12 credits

Cognitive Neuroscience	ISC 5456	3
Special Topics (such as Neuroscience of Decision Making)	ISC 6930	3

#### One of the following

## **NEUROSCIENCE**

### **GRADUATE CERTIFICATE**

*(Minimum of 14 credits required)*

The Neuroscience certificate program provides students with an understanding of the essential principles of neuroscience and elective concentrated study in theoretical and dynamical, molecular and cellular, cognitive and behavioral neuroscience. Available to master's and doctoral students, the program is administered through the College of Science's Dean's Office and consists of a multidisciplinary curriculum comprised of courses from the College of Medicine, College of Science and the College of Engineering and Computer Science.

#### **Admission Requirements**

1. Acceptance into a master's or doctoral training program in any of the following departments or programs: Biological Sciences, Biomedical Sciences, Chemistry and Biochemistry, Complex Systems and Brain Sciences, Electrical Engineering, Integrative Biology, Mathematics and Statistics, Physics or Psychology.
2. Approval from the certificate program coordinator prior to taking courses to satisfy the 14-credit certificate requirement.

#### **Degree Requirements**

The Neuroscience certificate consists of 14 credits. It requires the successful completion (at least a B+ average) of four courses from the tables below plus satisfactory achievement in two semesters of the 1-credit Neuroscience Colloquium. Students are also expected to participate in the FAU Neuroscience Research Day held each spring semester.

---

#### **Required Courses - 6 credits**

---

Cellular and Molecular Neuroscience	PSB 6345	3
Systems and Integrative Neuroscience	PSB 6346	3

#### **Elective Courses**

Choose one course from any two of the four areas listed below for a minimum of 6 credits: Theoretical and Dynamical Neuroscience, Cognitive Neuroscience, Molecular and Cellular Neuroscience and Behavioral Neuroscience. Note that one of the elective courses is required to be from outside the student's "home" program area. This requirement ensures that the student gains an interdisciplinary exposure to the neurosciences.

---

***Theoretical and Dynamical Neuroscience***

---

Introduction to Neural Networks	CAP 5615	3

Special Topics in Behavioral Neuroscience	PSB 6930	3

---

### ***Neuroscience Colloquium***

---

Special Topics (Students must enroll in two semesters of the 1-credit Neuroscience Colloquium.)	ISC 6930	1
---	----------	---

The Neuroscience Colloquium is a public seminar series with distinguished speakers from outside and inside of FAU. Students also present their own research in the form of a seminar to the other students in the program and faculty. Students in the certificate program are required to present at least one seminar during the two semesters that they are enrolled. Attendance is mandatory for all students.

## **ENVIRONMENTAL SCIENCE MASTER OF SCIENCE (M.S.)**

*(Minimum of 36 credits required)*

This interdisciplinary environmental program is administered in the Charles E. Schmidt College of Science. Participating faculty have appointments in all departments in the College of Science, as well as departments in the Dorothy F. Schmidt College of Arts and Letters, Harbor Branch Oceanographic Institute, the Harriet L. Wilkes Honors College, the College of Engineering and Computer Science and the College of Business. The M.S. in Environmental Science is also available as a combined, accelerated program with the B.S. in Biological Sciences. Complete details about this combined program appear in the [Biological Sciences Department section](#).

Students are required to take most of the coursework spread across the four core subject areas listed below. The exact courses taken are to be determined by students and their advisory committees. A grade of "C" or better (unless otherwise noted in the course description) is required in all courses taken

as part of the requirements for a Master of Science degree in Environmental Science. However, the minimum University-wide, cumulative GPA requirement for degree-seeking graduate students is a 3.0 ("B" grade average). For more information about this program, visit [here](#).

## Admission Requirements

In addition to meeting all of the University and College admission requirements for graduate study, each applicant for the M.S. with Major in Environmental Science must have a:

1. Minimum 3.0 average for the last 60 credits of undergraduate work.
2. Letter of support from a prospective primary advisor who is a member of the Environmental Science Program faculty.

## Thesis Option

A student curriculum consists of a minimum of 36 graduate credits taken in the following six categories:

*Environmental Science Colloquium Series (EVS 6920)*: 2 credits. This course is currently only offered in the fall semester. Students must take EVS 6920 during their first fall semester.

*Fundamentals of Environmental Research (EVS 6917)*: 1 credit. This course is currently only offered in the spring semester. Students must take EVS 6917 during their first spring semester.

*Data Science*: 3 credits. Students must take either GIS 6306, PCB 6456 or URP 6211.

*Electives*: 21-24 graduate credits with no more than 12 credits per course prefix and no more than 15 credits per department. Required courses do not count toward department credit limit.

*Environmental Science Directed Independent Study (EVS 6905) or Directed Independent Research in Environmental Science (EVS 6916)*: Up to 3 graduate credits combined may be counted toward this degree.

*Thesis*: 6-9 credits (EVS 6971).

Degree requirements may change. Students must either: 1) fulfill the requirements in effect during the first semester they are enrolled in the program, or 2) they may choose to fulfill the requirements in effect during the semester they graduate. The [FAU University Catalog](#) is the only official source for determining degree requirements.

## Non-Thesis Option

A student curriculum consists of a minimum of 36 graduate credits taken in the following five categories:

*Environmental Science Colloquium Series (EVS 6920): 2 credits.*

*Fundamentals of Environmental Research (EVS 6917): 1 credit.*

*Data Science: 3 credits.* Students must take either GIS 6306, PCB 6456 or URP 6211.

*Electives: 27 graduate credits with no more than 12 credits per course prefix and no more than 15 credits per department.* Required courses do not count toward department credit limit.

*Environmental Science Directed Independent Study (EVS 6905) or Directed Independent Research in Environmental Science (EVS 6916):* Up to 3 graduate credits combined may be counted toward this degree.

Degree requirements may change. Students must either: 1) fulfill the requirements in effect during the first semester they are enrolled in the program, or 2) they may choose to fulfill the requirements in effect during the semester they graduate. The [FAU University Catalog](#) is the only official source for determining degree requirements.

---

**Departmental Courses: No more than 15 total credits from any one department, and no more than 12 credits from any one prefix.**

---

## **MARINE SCIENCE AND OCEANOGRAPHY MASTER OF SCIENCE (M.S.)**

*(Minimum of 37 credits required)*

This is an interdisciplinary program designed to provide students with specialized training in Marine Science and Oceanography. It is jointly administered by the Charles E. Schmidt College of Science (CESCS) and the Harbor Branch Oceanographic Institute (HBOI). Participating faculty have appointments at CESCS and HBOI.

Students are required to take most of the coursework spread across the core subject areas listed below. The exact courses taken are to be determined by students and their advisory committees. Application deadline is January 15 for the fall semester and October 15 for the spring semester.

### **Admission Requirements**

In addition to meeting all of the University and College admission requirements for graduate study, each applicant for the M.S. with Major in Marine Science and Oceanography must:

1. Have a minimum 3.0 GPA for the last 60 credits of undergraduate work.
2. Provide two letters of recommendation.
3. Obtain a "sponsor" from within the faculty of this master's program who will then act as the student's advisor until a thesis topic has been chosen.

For sponsor selection suggestions, students should go to the departmental webpages to examine the fields and interests of individual faculty members. Once students find a faculty member in their field of interest, they should contact the faculty member directly. The student's application package must contain a signed sponsor form from the selected faculty member.

### **Degree Requirements**

Students may graduate with a thesis or non-thesis master's degree; both require the successful completion of 37 credits as described below.

### **Thesis Option**

A student curriculum consists of a minimum of 37 graduate credits taken in the following three categories:

**Required Courses:** Six courses (12 credits) are required for all students in the master's degree program in Marine Science and Oceanography.

Marine Science Seminar	BSC 6938	1
Marine Science and Oceanography Thesis Proposal	OCE 6970	1
Marine Science and Oceanography Thesis Defense	OCE 6975	1
<b>Total Research Core</b>		<b>12</b>

**Electives:** 15 to 21 credits from the approved course list. Up to 6 credits designated as "Special Topics" courses may be taken with the approval of the thesis advisor. No more than 6 credits of electives taken outside the approved course list will be counted toward the degree. No courses under the 5000 level may be taken. No more than 3 credits of Marine Science and Oceanography Directed Independent Research (OCE 6908) may be counted toward this degree.

**Thesis:** 6 to 12 credits (OCE 6972).

- For Master's Thesis Proposal Seminar requirements, see [MSO regulations](#).
- For Master's Thesis Defense Requirements, see [MSO regulations](#) and the Graduate College for current [University thesis requirements](#).

**Proposal and Defense:** OCE 6970 will be taken for 1 credit during the semester in which students intend to propose their research plan. Upon successful completion of their proposal and approval from their committee, students will earn a satisfactory grade. OCE 6975 will be taken for 1 credit during the semester in which students intend to defend their research. Upon successful defense of the student's research via a public presentation and thesis document, the student will earn a satisfactory grade.

### Non-Thesis Option

A student curriculum consists of a minimum of 37 credits taken in the following three categories:

**Required Courses:** Five courses (11 credits) are required for all students in the master's degree program in Marine Science and Oceanography.

---

### Required Courses

Physical and Geological Oceanography	OCE 6097	3
Biological Oceanography	OCB 6066	3
Chemical Oceanography	OCC 6050	3
Marine Science and Oceanography Comprehensive Exam	OCE 6964	1
Marine Science and Oceanography Colloquium	OCE 6922	1 <b>or</b>
Marine Science Seminar	BSC 6938	1
<b>Total Research Core</b>		<b>11</b>

**Electives:** A minimum of 26 credits from the approved course list. Up to 6 credits designated as "Special Topics" courses may be taken with the approval of the student's advisor.

No more than 6 credits of electives taken outside the approved course list will be counted toward the degree. No courses under the 5000 level may be taken. No more than 3 credits of Marine Science and Oceanography Directed Independent Research (OCE 6908) may be counted toward this degree.

Students taking the non-thesis option must take and pass a minimum of three written comprehensive exams given by a committee in designated areas within Marine Science and Oceanography specialties during the semester they are signed up for 1 credit of OCE 6964 (Marine Science and Oceanography Comprehensive Exam). Questions require written essay responses. See the [MSO regulations](#) for complete requirements to complete the master's comprehensive exams.

Integrative Biology PH.D. students choosing MSO for a Master's Along the Way degree will be verified for completion of degree requirements by the Biology Department during the Graduation Audit Check. Consult with the IB Ph.D. advisor early in matriculation to ensure the curriculum followed would satisfy the requirements for the MSO master of science non-thesis option.

### Approved Course List

Advances in Finfish Aquaculture	BSC 6342	3
Scientific Communication	BSC 6846	3
Special Topics (such as Marine Conservation)	BSC 6936	1-4
Seminar	BSC 6938	1

Chemistry for Environmental Scientists	CHS 6611	3
Ocean Optics and Remote Sensing	EOC 6267	3
Restoration Implementation and Management	EVR 6358	3
Biogeography	GEO 5305	3
Digital Image Analysis	GIS 5033C	3
Remote Sensing of the Environment	GIS 5038C	3
Principles of Geographic Information Systems	GIS 5051C	3
Applications in Geographic Information Systems	GIS 5100C	3
Programming in Geographic Information Systems	GIS 5103C	3
Topics in Geoinformation Science	GIS 6120	3
Hyperspectral Remote Sensing	GIS 6127	3
Environmental Geochemistry	GLY 5243	3
Shore Erosion and Protection	GLY 5575C	3
Marine Geology	GLY 5736C	3
Comparative Carbonate Sedimentology	GLY 6352	3
Beach Morphodynamics of Southeast Florida	GLY 6708C	3
Coastal Environments	GLY 6737	3
Global Environmental Change	GLY 6746	3
Methods in Hydrogeology	GLY 6838	3
Coastal Hazards	GLY 6888	3
Special Topics in Applied Geology	GLY 6934	3
Coral Reef Ecosystems	OCB 6266	3
Coral Reef Ecosystems Lab	OCB 6266L	1

Data Processing and Modeling of Marine Systems	OCB 6673	3
Marine Fisheries Ecology and Management	OCB 6715C	4
Natural History of the Indian River Lagoon	OCB 6810	3
Image and Video Processing and Vision in Marine Environment	OCE 5266	3
Marine Global Change	OCE 6019	3
Dynamics of Marine Biogeochemical Processes	OCE 6096	3
Underwater Optical Imaging for Marine Scientists	OCE 6267	3
Ocean Monitoring Systems	OCE 6268	3
Marine Optics	OCE 6269	3

Marine Invertebrate Zoology	ZOO 6256	3
Marine Invertebrate Zoology Lab	ZOO 6256L	2
The Biology of Sea Turtles	ZOO 6406	3
Biology of Sharks and Their Relatives	ZOO 6409	3

Natural History of Fishes	ZOO 6456	3
Natural History of Fishes Lab	ZOO 6456L	2
Seminar in Ichthyology	ZOO 6459	3

## **MEDICAL PHYSICS**

### **PROFESSIONAL SCIENCE MASTER (P.S.M.)**

*(Minimum of 41 credits required)*

The Professional Science Master (P.S.M.) with major in Medical Physics degree is an interdisciplinary program that develops advanced scientific knowledge and professional skills. The program provides hands-on learning through on-site training. It aims to engage students with professional goals and help them become scientists uniquely suited to the 21st-century workplace.

Medical physics is an applied branch of physics devoted to the application of concepts and methods from physics to the diagnosis and treatment of human disease. A qualified medical physicist is competent to practice independently in one or more of the subfields (tracks) of medical physics.

The program requires 41 credits. It provides professional training in partnership with area hospitals and concentrates on the medical physics radiation therapy track, which employs approximately 75 percent of the medical physicists.

#### **Admission Requirements**

In addition to meeting all of the University and College admission requirements for graduate study, applicants for the Medical Physics program must meet all of the following departmental requirements:

1. A B.S. or B.A. in Physics. Candidates with a B.S. in Biology, Chemistry, Computer Science or Engineering with a minor in Physics are considered;
2. At least a 3.0 (of a 4.0 maximum) GPA in science and mathematics courses;
3. Have taken the general GRE. No minimum score is required. (GRE scores more than five years old will not be accepted);
4. Approval from the Department of Physics.

#### **Degree Requirements**

## **INTEGRATIVE BIOLOGY** **DOCTOR OF PHILOSOPHY (PH.D.)**

### **Biomedical Science Concentration**

### **Environmental Science Concentration**

### **Marine Science and Oceanography Concentration**

### **Neuroscience Concentration**

*(Minimum of 72 credits required)*

Integrative biology refers to interdisciplinary, multilevel approaches to education and research in the biological sciences. The Integrative Biology program focuses on the relationship between cell/molecular functions and experimental biology in the broad sense, with a view to connectivity between levels of biological organization and biological processes. Core courses and research elements will emphasize this theme. The curriculum is individually tailored to each student's research interests and built around a set of core courses that emphasize 1) the theme of integrative biology, 2) scientific communication, 3) statistics, 4) elective courses chosen by the student and an supervisory committee, 5) seminar courses and 6) dissertation research.

Faculty from the Department of Biological Sciences, the Charles E. Schmidt College of Medicine, the Harriet L. Wilkes Honors College, the Center for Molecular Biology and Biotechnology, the Brain Institute and Harbor Branch Oceanographic Institute participate in this doctoral program. FAU's Partner Institution, the Max Planck Florida Institute for Neuroscience, also contributes expertise to this program.

Those applicants seeking a doctorate in Integrative Biology may choose to pursue the Integrative Biology core program (IBIO) or pursue one of the program's four concentrations: Neuroscience (IBNS), Environmental Science (IBES), Biomedical Science (IBBS) or Marine Science and Oceanography (IBMO). These concentrations fall under the umbrella of the Integrative Biology major

and all students accepted to the concentrations are subject to all Integrative Biology policies and regulations as well as additional regulations specific to each concentration.

### **Biomedical Science Concentration (IBBS)**

Completion of the Biomedical Science concentration provides students with advanced knowledge and research experience in the biomedical science field. The IBBS curriculum focuses strongly on both knowledge-based and experimental-based biomedical science courses and teaches students appropriate scientific methodology. Students who complete the IBBS concentration develop the skills and expertise they need to succeed both within and outside academia. IBBS faculty are active experts in their respective biomedical science fields and provide students with research opportunities in a wide variety of emerging biomedical science areas including: Human Genetics and Genomics; Precision Medicine; Cancer Biology and Prevention; Microbiology, Immunology and Infectious Disease; HIV/AIDS Mechanisms and Treatments; Respiratory Physiology and Biophysics; Visual Biology and Diseases; Breast Cancer Mechanisms and Therapy; Huntington's Disease Mechanisms; Alzheimer's Disease Mechanisms and Therapy; Vaccine Development; Osteoarthritis Prevention and Treatment; Prostate Cancer Mechanisms; Cardiac Physiology and Disease; Childhood Malaria Mechanisms and more.

### **Environmental Science Concentration (IBES)**

Completion of the Environmental Science concentration provides students with advanced research and technical training that prepares them to find solutions to some of the world's most difficult environmental problems. Habitat degradation, invasive species, contaminants and climate change challenge land and water managers in South Florida and indeed the world. IBES faculty have considerable experience conducting research to address these difficult conservation problems, particularly in South Florida's extensive freshwater and marine ecosystems. The IBES curriculum emphasizes experiential learning through dissertation research, combined with innovative courses in the fields of ecology, conservation biology, environmental chemistry, geographic information systems, statistics, and modeling.

### **Marine Science and Oceanography Concentration (IBMO)**

Completion of the Marine Science and Oceanography concentration provides students with a broad understanding of oceanographic science along with the inquiry skills necessary to conduct research independently within their area of specialization. The IBMO curriculum focuses on both knowledge-based and laboratory- and field-based courses that promote the cross-disciplinary training students need to face the complex challenges of 21st century science. IBMO faculty have expertise in diverse ocean ecosystems, including developed and undeveloped coastlines, large estuaries and both deep sea and

coastal waters, and provide students with research opportunities in areas of water quality, hydrology, coastal ecology, biogeochemical cycling, endangered and invasive species, ocean megafauna fisheries and aquaculture, harmful algal blooms, urbanization and underwater optical imaging and ocean monitoring systems.

### **Neuroscience Concentration (IBNS)**

Completion of the Neuroscience concentration provides students with both knowledge and practical experience in the neuroscience field at an advanced level. In the evolving and growing field of neuroscience, students who complete the IBNS concentration will have the appropriate training to succeed both within and outside of academia. The Neuroscience curriculum focuses strongly on knowledge-based and experimental-based neuroscience courses and includes training in scientific methodologies. IBNS faculty are active experts in their respective neuroscience fields and provide students with research opportunities in a broad range of areas including neuronal circuitry, synaptic plasticity, learning and memory, cognitive and behavioral neuroscience, neurodegeneration, neuroimmunology, drug discovery, stress neurobiology, neurogenetics and neurodevelopment.

### **Admission Requirements**

The decision to consider an applicant acceptable for admission to the Integrative Biology program includes the following criteria:

1. Applicants must have a baccalaureate degree biological science or a related field.
2. Applicants who meet the minimum University standard for grade point average of 3.0 (on a 4.0 scale).
3. A minimum of three letters of recommendation and a personal statement. Successful applicants will have strong personal statements and recommendation letters from advisors who are familiar with their recent academic and research experiences.
4. International applicants whose native language is not English must score at least 550 (paper-based test), 213 (computer-based test) or 79-80 (Internet-based test) on the Test of English as a Foreign Language (TOEFL). Additionally, international applicants whose transcripts are from non-U.S. institutions must have their credentials evaluated course-by-course with a grade point average (GPA) calculation on a 4.0 scale. International applicants must also demonstrate competency in spoken English.
5. Applicants applying to the IBES or IBMO concentration must have a confirmed Ph.D. supervisor from within FAU prior to applying and submit the supervisor verification form with their application. The Ph.D. supervisor must be a member of the program's graduate faculty and will chair the supervisory and dissertation research committees (see program faculty lists on respective program webpages).

Applicants applying to the IBIO core program or IBNS or IBBS concentration may enter the program with a confirmed Ph.D. supervisor from within FAU or participate in laboratory rotations within the first two semesters in the program. Applicants applying to the IBIO, IBNS or IBBS concentration who would like to participate in laboratory rotations are strongly encouraged to directly contact potential Ph.D. supervisor(s) from within FAU and secure their sponsorship or mentoring interest prior to applying. Applicants eligible to participate in laboratory rotations must identify which program faculty they have contacted on their application (see program faculty lists on respective program webpages).

## Degree Requirements

The Integrative Biology program is research-intensive and requires at least 72 credits beyond the baccalaureate degree. The following are specific requirements for this degree:

1. Students must earn a grade of “B” or higher in all graduate coursework and maintain a cumulative grade point average of 3.0 or higher.
2. Students must have a confirmed Ph.D. supervisor by the end of their second semester in the program (Year 1, Semester 2).
3. Completion of 9 core credits listed in Integrative Biology Core Courses.
4. Completion of at least 9 elective credits (three courses) up to 21 elective credits (seven courses) of graded coursework that support the student’s research plan:
  - a. The student's Ph.D. supervisor and/or supervisory committee must approve all elective courses.
  - b. Elective courses must be 5000-, 6000- or 7000-level courses in biology, biomedical science, chemistry and biochemistry, complex systems and brain sciences, engineering and computer science, environmental science, ecology, exercise science and health promotion, geosciences, marine science and oceanography, mathematics, neuroscience, physics, psychology, urban and regional planning, special topics or approved cognates.
  - c. Students may elect to complete up to 6 credits designated Special Topics with the approval of their Ph.D. supervisor and/or supervisory committee.
  - d. Courses designated as proficiency or remedial (4000-level and below) may not be used to satisfy the elective course requirement.
  - e. Students participating in an Integrative Biology concentration must select from graduate-level elective courses related to the specific concentration (see the elective lists below for IBNS, IBES, IBBS, and IBMO). The lists of track-specific elective courses below are not exclusive and the selection of elective courses to meet degree requirements will be determined by consultation between the student and the Ph.D. supervisor and/or supervisory committee.

5. Completion of at least 3 credits of seminar/journal club courses taken as individual credits in three separate semesters. A seminar/journal club course is based on student participation in activities, such as student presentations or student/faculty-led discussions of relevant topics.
6. Completion of at least 25 dissertation credits conducting dissertation research under the direction of the student's dissertation research committee.
7. Remaining credits may include elective coursework, seminar/journal club courses, Integrative Biology lab rotation (BSC 6913), advanced research (BSC 7978) or dissertation (BSC 7980) credits that support the student's research plan with approval from the student's Ph.D. supervisor and/or supervisory committee.
8. Admission to candidacy requires both the successful writing and public presentation of an original dissertation research proposal. The defense of the dissertation proposal will be held with the student's dissertation research committee following the public dissemination.
9. Degree completion requires both the successful writing and public presentation of original dissertation research. The defense of the dissertation research will be held with the student's dissertation research committee following the public dissemination.

Hyperspectral Remote Sensing	GIS 6127	3
Topics in Geoinformation Science	GIS 6120	3

## Marine Science and Oceanography (IBMO) Core Courses and Elective Courses

### *IBMO Core Courses*

Students who enter the IBMO concentration without these two courses or equivalent must complete the core courses listed below. Completion of these courses may be used toward fulfillment of the Integrative Biology elective requirement.

Biological Oceanography	OCB 6066	3
<b><i>Choose one of the following courses</i></b>		
Chemical Oceanography	OCC 6050	3
Physical and Geological Oceanography	OCE 6097	3

### *IBMO Electives*

Students may choose from the following IBMO electives for fulfillment of the Integrative Biology elective requirement. Students may elect to complete up to 6 credits designated Special Topics with the approval of their Ph.D. supervisor and/or supervisory committee.

***Marine Biology***

Advances in Finfish Aquaculture	BSC 6342	3
Special Topics	BSC 6936	3
Aquatic Animal Health	PCB 6772	3
Physiology of Marine Animals	PCB 6775	3
Sensory Biology and Behavior of Fishes	PCB 6871	3
Marine Invertebrate Zoology	ZOO 6256	3
Marine Invertebrate Zoology Lab	ZOO 6256L	2
The Biology of Sea Turtles	ZOO 6406	3
Biology of Sharks and Their Relatives	ZOO 6409	3
Natural History of Fishes	ZOO 6456	3
Natural History of Fishes Lab	ZOO 6456L	2
<b><i>Conservation and Ecology</i></b>		
Marine Conservation Biology	BSC 6316	3

## **Neuroscience Concentration (IBNS) Core Courses and Electives**

### ***IBNS Core Courses***

Students who enter the IBNS concentration with no prior neuroscience coursework must take two of the following five courses. Completion of these courses may be used toward fulfillment of the Integrative Biology elective requirement.

Cellular and Molecular Neuroscience	PSB 6345	3
Systems and Integrative Neuroscience	PSB 6346	3
Practical Cell Neuroscience	BSC 6417C	3

Neurophysiology	PCB 6835C	3
Advanced Neurophysiology Lab	PCB 6837L	3

***IBNS Electives***

Students enrolled in the IBNS concentration must select graduate-level elective courses relevant to the field of neuroscience. Students may choose from the following approved IBNS electives toward fulfillment of the Integrative Biology requirement. Students may elect to complete up to 6 credits of designated Special Topics courses with the approval of their Ph.D. supervisor and/or supervisory committee.

***General Neuroscience***

Special Topics	BSC 6936	3
Cellular and Molecular Neuroscience	PSB 6345	3
Systems and Integrative Neuroscience	PSB 6346	3

## NEUROSCIENCE

### DOCTOR OF PHILOSOPHY (PH.D.)

This doctoral program in Neuroscience is a multi-college, multi-institute interdisciplinary degree program organized in partnership with the FAU Brain Institute. Graduate-level instruction is provided by faculty in multiple departments located in the Charles E. Schmidt College of Science, the Charles Schmidt College of Medicine, the College of Engineering and Computer Science, the College of Education and the Harriet L. Wilkes Honors College. Affiliated faculty from the Max Planck Florida Institute for Neuroscience and Scripps Research Florida also participate in the program. The program aims to equip students with the advanced conceptual and technical skills needed to forge productive,

neuroscience-oriented careers in industry, academia and government. Specific details for this doctoral program appear in the [Interdisciplinary Programs](#) section of this catalog.

## BIOLOGICAL SCIENCES

### Faculty:

Milton, S., Chair; Anderson, R.; Baronas-Lowell, D.; Baldwin, J.; Binninger, D.; Brooks, W. R.; Esiobu, N.; Frazier, E.; Godenschwege, T.; Hartmann, J. X.; Hughes, C.; Jia, K.; Kajiura, S.; Koch-Rose, M.; Kumi-Diaka, J.; Lovelace, M.; Lyons, H. J.; Macleod, G.; McCoy, M.; Murphey, R.; Narayanan, R.; Noonburg, E.; Owen, D.; Salmon, M.; Theisen, T.; Weissbach, H., Emeritus; Wyneken, J.; Zhang, X-H.

The Department of Biological Sciences offers undergraduate degree programs leading to the Bachelor of Arts (B.A.) degree and Bachelor of Science (B.S.) degree. A grade of "C-" or better (unless otherwise noted in the course description) is required in all biology AND cognate courses taken as part of the requirements for an undergraduate degree in Biological Sciences. However, students must maintain a "C" average in departmental major courses.

The department also offers a Bachelor of Science in Medical Biology, an Honors Program, the [FAU Max Planck Honors Program](#), a minor in Biological Sciences, and an undergraduate certificate program in Biotechnology. A Bachelor of Science (B.S.) in Neuroscience and Behavior is offered jointly with the Department of Psychology. This major is detailed under the [Psychology Department section](#).

Master's-level degree programs include the Master of Science (M.S.), the Master of Science in Teaching (M.S.T.), and a [Professional Science Master \(P.S.M.\) in Business Biotechnology](#).

Two combined programs are also available. In one, students earn a B.S./M.S. in Biological Sciences and in the other, a [B.S. in Biological Sciences and an M.S. in Environmental Science](#).

### Recency of Undergraduate Credits Transfer Policy

No credits more than 10 years old may be transferred into or applied to an FAU Biology undergraduate program. Any credits that are transferred in are considered earned in the first semester of enrollment at FAU.

## BIOLOGICAL SCIENCES

### BACHELOR OF ARTS (B.A.)

*(Minimum of 120 credits required)*

The Bachelor of Arts (B.A.) degree is intended to provide maximum flexibility for students pursuing study in interdisciplinary areas such as environmental science or secondary school teaching. In addition to the University and College degree requirements, students seeking a Bachelor of Arts degree in Biological Sciences must complete the following core requirements. All degree programs require a total of 120 credits, 45 of which must be upper-division credits.

#### **Prerequisite Coursework for Transfer Students**

Students transferring to Florida Atlantic University must complete both lower-division requirements (including the requirements of the General Education Program) and requirements for the college and major. Lower-division requirements may be completed through the A.A. degree from any Florida public college, university or community college or through equivalent coursework at another regionally accredited institution. Before transferring and to ensure timely progress toward the baccalaureate degree, students must also complete the prerequisite courses for their major as outlined in the [Transition Guides](#).

All courses not approved by the Florida Statewide Course Numbering System that will be used to satisfy requirements will be evaluated individually on the basis of content and will require a catalog course description and a copy of the syllabus for assessment.

Environmental Ethics	PHI 3640	3

## BIOLOGICAL SCIENCES BACHELOR OF SCIENCE (B.S.)

*(Minimum of 120 credits required)*

The Bachelor of Science (B.S.) degree is recommended for students planning to be professional biologists in industry or governmental service, for graduate work in the biological sciences and for students planning careers in medicine, dentistry or veterinary medicine. In addition to the University and College degree requirements, students seeking a Bachelor of Science degree in Biological Sciences must complete the following degree requirements.

### Prerequisite Coursework for Transfer Students

Students transferring to Florida Atlantic University must complete both lower-division requirements (including the requirements of the General Education Program) and requirements for the college and major. Lower-division requirements may be completed through the A.A. degree from any Florida public college, university or community college or through equivalent coursework at another regionally accredited institution. Before transferring and to ensure timely progress toward the baccalaureate degree, students must also complete the prerequisite courses for their major as outlined in the [Transition Guides](#).

All courses not approved by the Florida Statewide Course Numbering System that will be used to satisfy requirements will be evaluated individually on the basis of content and will require a catalog course description and a copy of the syllabus for assessment.

Science Internship	IDS 3941	1-3

**Note:** No more than 2 credits of a seminar course (BSC 4932) may be used to fulfill biology degree program requirements.

**Note:** Biology department approval is required for students wishing to complete the Science Internship for credit. After a student's Science Internship registration request has been processed by the FAU Career Center, the Career Center will communicate directly with the department to request approval on the student's behalf.

**Note:** Students wishing to participate in Medical Shadowing Internship should not enroll in the

Science Internship. They should instead enroll in Medical Shadowing Internship (IDS 3940). The Medical Shadowing Internship course cannot be used to fulfill biology degree program requirements.

Students can find detailed flight plan information and General Education Program checklists for biology majors through [University Advising Services](#).

## **HONORS IN THE MAJOR—BIOLOGICAL SCIENCES**

Eligible undergraduate students may apply to participate in the Department of Biological Sciences' Honors in the Major program. There are two paths to attaining Honors in the Major. Students who fulfill all requirements associated with one of the biology honors pathways successfully and have an overall GPA of 3.2 or greater at the time of degree conferral will receive a designation of Honors in the Major on their transcripts. The transcript designations, "Honors in Biological Sciences—Research Thesis" or "Honors in Biological Sciences—Research," will mark participation in the one of the two paths.

### **Honors in Biological Sciences—Research Thesis**

The Department of Biological Sciences offers an Honors Thesis Program that recognizes research accomplishments of talented undergraduates. Eligible students must have a minimum of 20 credits in biology and an overall GPA of 3.2. Students usually begin the program in their junior year and conduct independent, supervised research during their junior and senior years. A written paper and a seminar describing the results of their research are required in the senior year. Interested students should contact the faculty member whose research interests are closest to those the student wishes to pursue.

### **Honors in Biological Sciences—Research**

The Department of Biological Sciences offers an Honors Research Program that recognizes research accomplishments of talented undergraduates. Eligible students must have a minimum of 20 credits in biology and an overall GPA of 3.2. Students usually begin the program in their junior year and conduct independent, supervised research during their junior and senior years. Submission of a grant proposal is required no later than the second semester of the junior year. Presentation of a poster or seminar at a local, regional, national or international research conference/symposium describing the results of the research is required in the senior year. Interested students should contact a faculty member whose research interests are closest to those the student wishes to pursue. Visit the [website](#) for more information.

## **THE FAU MAX PLANCK HONORS PROGRAM (MPHP)**

Eligible College of Science majors in Biology, Psychology, Neuroscience and Behavior and Medical

Biology may apply to participate in this Jupiter-specific honors program for undergraduates. For students pursuing the MPHP, 3 to 6 of the elective credits in their individual program must be applied toward the requirements of the MPHP. These include successful completion of a Capstone experience (1 to 3 credits) and three different MPHP Enrichment courses (1 credit each) from those listed below. A minimum grade of "B" must be achieved in graded courses ("S" in non-graded courses) among these exclusive MPHP course options for the credits to count toward the requirements of the MPHP. Visit the [MPHP website](#) to apply.

## **BIOLOGICAL SCIENCES** UNDERGRADUATE MINOR

*(Minimum of 19 credits required)*

A minor in Biological Sciences consists of a minimum of 19 credits in biology courses, to include Biodiversity with Lab (BSC 1011, 1011L), Biological Principles with Lab (BSC 1010, 1010L), Principles of Ecology (PCB 4043) and additional courses at the 3000 level or above, at least one of which must be a lab course. Of the 19 credits, at least 15 must be earned from FAU. All courses must be completed with a grade of "C-" or better.

## **BIOTECHNOLOGY** UNDERGRADUATE CERTIFICATE

*(Minimum of 15 credits required)*

The certificate program in Biotechnology is designed to provide undergraduate students with the necessary foundations for a career in biotechnology in conjunction with their academic major. Particular emphasis is placed on application of biotechnology to studies in botany, biochemistry, environmental sciences, marine biology, microbiology, medicine or pharmacology.

To enter the program, a student must have 15 credits of work at a senior institution with a minimum GPA of 2.5 and a year each of general biology, general chemistry, general physics and mathematics through one semester of calculus. A grade of "C-" or better must be attained in each course in biology, chemistry and biotechnology, and an overall and upper-division GPA of at least 2.5 is required at graduation. Students must also earn a "B-" or better in the following laboratory courses: BCH 3103L, BSC 4403L and MCB 3020L.

Students receiving a bachelor's degree in the Department of Biological Sciences or the Department of

Chemistry and Biochemistry will meet the requirements for certification by completing the courses listed below, as well as their prerequisites. Students in other departments should meet with a biotechnology advisor to determine eligibility and requirements for this certification program.

Biochemistry Lab	BCH 3103L	3
Laboratory Methods in Biotechnology	BSC 4403L	3
General Microbiology	MCB 3020	3
General Microbiology Lab	MCB 3020L	1
Genetics	PCB 3063	4
<b>Total Credits</b>		<b>14</b>

### Secondary Education Program

A program leading to teacher certification in biology is available through the Department of [Curriculum and Instruction](#) in the College of Education.

## MEDICAL BIOLOGY BACHELOR OF SCIENCE (B.S.)

*(Minimum of 120 credits required)*

The Bachelor of Science (B.S.) with Major in Medical Biology program provides undergraduate preparation for students interested in pursuing professional degrees in medicine, dentistry, pharmacy, veterinary medicine or graduate degrees in the biomedical sciences. In addition to University and college degree requirements, students seeking a B.S. with Major in Medical Biology must complete the following requirements.

### Prerequisite Coursework for Transfer Students

Students transferring to Florida Atlantic University must complete lower-division requirements (including the requirements of the [General Education Program](#)) and requirements for the college and major. Lower-division requirements may be completed through the A.A. degree from any Florida public college, university or state college or through equivalent coursework at another regionally accredited institution. Before transferring and to ensure timely progress toward the baccalaureate degree, students must also complete the prerequisite courses for their major as outlined in the [Transition Guides](#).

All courses not approved by the Florida Statewide Course Numbering System that will be used to satisfy requirements will be evaluated individually on the basis of content and will require a catalog course description and a copy of the syllabus for assessment.

Students can find detailed flight plan information and General Education Program checklists for biology majors through [University Advising Services](#).

## **BIOLOGICAL SCIENCES**

### **BACHELOR OF SCIENCE (B.S.) TO MASTER OF SCIENCE (M.S.) COMBINED PROGRAM**

*(Minimum of 153-156 credits required)*

This combined degree program leads to both bachelor's (B.S.) and master's (M.S.) degrees in Biological Sciences with an emphasis in molecular biology and biotechnology. It is a laboratory-intensive curriculum that provides hands-on training for students who are interested in a career in the rapidly expanding field of biotechnology. This program will also provide excellent preparation for pursuing advanced degree studies.

The combined degree program is 153-156 credits, 120 for the undergraduate degree and 33-36 for the master's degree. Students complete the undergraduate degree first, taking no more than 12 credits of graduate coursework in their senior year, which will then be used to satisfy both degrees. See specific program requirements below.

#### **Prerequisite Coursework for Transfer Students**

Students transferring to Florida Atlantic University must complete both lower-division requirements (including the requirements of the General Education Program) and requirements for the college and major. Lower-division requirements may be completed through the A.A. degree from any Florida public college, university or community college or through equivalent coursework at another regionally accredited institution. Before transferring and to ensure timely progress toward the baccalaureate degree, students must also complete the prerequisite courses for their major as outlined in the [Transition Guides](#).

All courses not approved by the Florida Statewide Course Numbering System that will be used to satisfy requirements will be evaluated individually on the basis of content and will require a catalog

course description and a copy of the syllabus for assessment.

### Requirements and Eligibility

Students would typically begin taking graduate courses in their senior year that would apply to both their B.S. and M.S. degrees. The program can be completed in five years by allowing 12 credits of graduate-level courses to fulfill course requirements for both the B.S. and M.S. degrees. Students must maintain a minimum GPA of 3.0 to remain in the program.

The program requires completion of a research project (6 credits). While there is no formal requirement for a thesis, the research must be described in both a written report and an oral presentation to an advisory committee.

Students are expected to work in a research lab during their last two years of the program completing Directed Independent Study and Thesis credits. The research may be completed in the laboratory of any member of the Center for Molecular Biology and Biotechnology (CMBB). Additionally, the research may be done under the direction of a faculty member in Biological Sciences if the project is appropriate to molecular biology and biotechnology. Faculty in other departments may mentor students with approval of the director or the chair.

Prospective students must formally apply to this graduate program and meet all admission requirements: a minimum undergraduate science GPA of 3.0 and GRE scores of at least 151 (verbal) and 148 (quantitative). Students should take the GRE before the end of their junior year.

### Curriculum

The core curriculum for students in the combined B.S./M.S. degree program is the same as for all Biological Sciences students in a Bachelor of Science (B.S.) program. The difference in this combined program is the emphasis on Molecular Biology and Biotechnology.

General Microbiology Lab	MCB 3020L	1

Genetics	PCB 3063	4
Practical Cell Neuroscience	PCB 4843C	3
Molecular Genetics	PCB 4522	3
Genetics Lab	PCB 4067L	3
Molecular Genetics of Aging	BSC 4022	3
Immunology	PCB 4233	3
Cellular Neuroscience and Disease	PCB 4842	3
Plant Biotechnology	BOT 4734C	3

Completion of the courses listed above as well general education courses required of all students will fulfill the requirements for the B.S. in Biological Sciences with emphasis on Molecular Biology and Biotechnology in addition to the 15 credits identified in the [Biotechnology certificate program](#). Those six courses must also be taken to fulfill the B.S./M.S. program.

### **Graduate courses that may count toward both B.S. and M.S. requirements -12 credits**

Students may choose 12 credits from the graduate courses listed below:

Advanced Biochemistry	BCH 6740	3
Bioinformatics	BSC 6458C	4
Directed Independent Study	BSC 6905	1-3
Instrumentation	CHM 6157	3
Advanced Molecular Genetics of Aging	PCB 5246	3
Advanced Immunology	PCB 6236	3
Cellular and Molecular Neuroscience	PSB 6345	3
Systems and Integrative Neuroscience	PSB 6346	3 <b>or</b>
Neurophysiology	PCB 6835C	3
Advanced Neurophysiology Lab	PCB 6837L	3

Cellular Neuroscience and Disease	PCB 6849	3
Principles of Neuroscience	PSB 6037	3
Practical Cell Neuroscience	BSC 6417C	3
Human Neuroanatomy	ZOO 6748	3

Students who complete these courses but decide not to pursue the M.S. degree would be required to take one additional 3-credit elective (approved by their faculty advisor) to fulfill the B.S. requirements.

### **Additional graduate-level courses - 15 credits**

In addition to the 12 credits of graduate courses that fulfill requirements for the B.S. degree, the student must take an additional 15 credits of graduate courses from the list shown above or other graduate courses approved by their advisory committee.

### **Research - 6 credits**

An important element of this program is the hands-on laboratory experience. This requirement is met by the formal laboratory courses as well as individual training in a research laboratory, an experience that cannot be duplicated in laboratory courses. Six credits of Master's Thesis (BSC 6971) must be completed. A formal thesis is not required, but the research must be presented as both a written report and oral presentation to an advisory committee.

### **Comments on Total Credits**

A student could complete the requirements of this program and earn both the B.S. and M.S. degree with a minimum of 153-156 credits. Many students will likely finish with more credits.

## **BIOLOGICAL SCIENCES TO ENVIRONMENTAL SCIENCE BACHELOR OF SCIENCE (B.S.) TO MASTER OF SCIENCE (M.S.) COMBINED PROGRAM**

*(Minimum of 156 credits required)*

This combined degree program leads to both a bachelor's (B.S.) in Biological Sciences degree and a master's (M.S.) in Environmental Science degree. It is a laboratory and field intensive curriculum that provides hands-on training for students who are interested in a career in the rapidly expanding field of environmental science. This program also provides excellent preparation for the Integrative Biology Ph.D. and the Geosciences Ph.D. The combined degree program is 156 credits, 120 for the undergraduate degree and 36 for the master's degree. Students complete the undergraduate degree first, taking no more than 12 credits of graduate coursework in their senior year, which will then be used to

satisfy both degrees. See specific program requirements below.

### **Prerequisite Coursework for Transfer Students**

Students transferring to Florida Atlantic University must complete both lower-division requirements (including the requirements of the General Education Program) and requirements for the college and major. Lower-division requirements may be completed through the A.A. degree from any Florida public college, university or community college or through equivalent coursework at another regionally accredited institution. Before transferring and to ensure timely progress toward the baccalaureate degree, students must also complete the prerequisite courses for their major as outlined in the *Transition Guides*.

All courses not approved by the Florida Statewide Course Numbering System that will be used to satisfy requirements will be evaluated individually on the basis of content and will require a catalog course description and a copy of the syllabus for assessment.

### **Admission Requirements and Eligibility**

Students would take the Graduate Record Exam (GRE) and apply to the B.S./M.S. in their junior year.

In addition to meeting all of the University and College admissions requirements for graduate study, each applicant for the M.S. with Major in Environmental Science must:

1. Have a minimum GRE score of 151 on the verbal section and 151 on the quantitative section. GRE scores more than five years old will not be accepted.
2. Have a minimum 3.0 average for the last 60 credits of undergraduate work.
3. Obtain approval from the Environmental Science Program.

Students would typically begin taking graduate courses in their senior year that would apply to both their B.S. and M.S. degrees. The program can be completed in five years by allowing 12 credits of graduate-level courses to fulfill course requirements for both the B.S. and M.S. degrees. Students must maintain a minimum GPA of 3.0 to remain in the program.

### **Curriculum**

The core curriculum for students in the combined B.S./M.S. degree program satisfies the requirements for the Bachelor of Science (B.S.) in Biological Sciences. The difference in this combined program is the emphasis on environmental science and the 12 credits in graduate courses that count toward the M.S. program taken during the senior year.

**Core Requirements - 47-49 credits**

Biological Principles and Lab	BSC 1010, 1010L	4

## **Thesis Option**

A student curriculum consists of a minimum of 36 credits taken in the following four categories:

*Core Subject Areas:* 22-28 credits from the core subject areas with at least one course from four different core subject areas.

*Electives:* No more than 6 credits of electives taken outside the core areas will be counted toward the degree, and no more than 6 credits may be 4000-level courses. No more than 3 credits of Directed Independent Study may be counted toward this degree.

*Thesis:* 6-12 credits (EVS 6971).

*Colloquium:* 2 credits or more.

## **Non-Thesis Option**

A student curriculum consists of a minimum of 36 credits taken in the following four categories:

*Core Subject Areas:* 25-31 credits from the core subject areas with at least one course from four different core subject areas.

*Directed Independent Study:* 3 credits (EVS 6905) required. Up to 3 additional credits may be taken as electives.

*Electives:* No more than 6 credits of electives taken outside the core areas will be counted toward the degree.

*Colloquium:* 2 credits or more.

## **MASTER'S PROGRAMS**

### **BIOLOGICAL SCIENCES**

### **MASTER OF SCIENCE (M.S.) OR MASTER OF SCIENCE IN TEACHING (M.S.T.)**

*Application Deadline: Spring term - October 1; Fall term - January 15*

### **Departmental Admission Requirements**

In addition to meeting all of the University and College admission requirements for graduate study,

each applicant for the Master of Science or Master of Science in Teaching degree must have:

1. A minimum 3.0 average for the last 60 credits of undergraduate work;
2. Letters of recommendation: Three are required (letters by previous professors are preferable);
3. Statement of goals and interests;
4. [Graduate Student Biology Faculty Advisor Verification](#) form\*;
5. Approval of the Department of Biological Sciences.

\*For Biology Faculty Advisor selection suggestions, students should go to the Biology departmental webpages to examine the fields and interests of individual faculty members. Once students find a Biology faculty member in their field of interest, they should contact the faculty member directly.

## **Degree Requirements**

There are three degree programs available: thesis option, non-thesis option 1 and non-thesis option 2. Specific requirements for each degree are described below.

## **BIOLOGICAL SCIENCES**

### **MASTER OF SCIENCE (M.S.)**

*(Minimum of 36 credits)*

#### **Thesis Option**

This degree program is designed for students whose career goals include a research emphasis. This option is tailored for students doing research or contemplating graduate work for a Ph.D. degree.

This M.S. degree requires a minimum of 36 total credits. Degree requirements include:

1. At least half or 18 credits must be Biology Department courses;
2. 12 credits of graded coursework at the 6000 level (exclusive of any research credits);
3. Before students can register for Master's Proposal Seminar (BSC 6963) (i.e., students formally presenting their research proposal to their committee and subsequent approval by committee), students conducting exploratory research can take up to 6 credits, which can include:
  - a. Up to 3 credits of Directed Independent Research in Biological Sciences (BSC 6917) or up to 3 credits of Directed Independent Study (DIS/DIR), either one taken outside of Biology. Any combination of DIS/DIR credits regardless of source cannot total more than 3 credits that will count toward the degree.
  - b. Up to 3 credits of Master's Thesis (BSC 6971).
4. Master's Thesis Proposal (BSC 6963), 1 credit maximum\*;
5. Master's Thesis Defense Seminar (BSC 6975), 1 credit maximum\*\*;

6. Minimum of 6 credits of Master's Thesis (BSC 6971) is required. Note: No more than 12 credits of Master's Thesis can count toward the degree;
7. Maximum of 3 credits in Directed Independent Research in Biological Sciences (BSC 6917) will count toward the degree, or up to 3 credits of Directed Independent Study (DIS/DIR), either one taken outside of Biology. Any combination of DIS/DIR credits regardless of source cannot total more than 3 credits that will count toward the degree;
8. Remaining courses must be 5000 or 6000 level.

\* For Master's thesis Proposal Seminar requirements, see [Biology Regulations and Procedures](#).

\*\* For Master's Thesis Defense requirement, see [Biology Regulations and Procedures](#) and the Graduate College for current [University thesis requirements](#).

### **Non-Thesis Option 1**

This degree program is designed for students who wish to improve their knowledge in the biological sciences through a rigorous series of courses and exams or for Integrative Biology Ph.D. students choosing Biology for a [Master's Along the Way](#) degree.

This M.S. degree requires a minimum of 36 credits. Degree requirements include:

1. At least half or 18 credits must be Biology Department courses;
2. Eighteen (18) of the 36 credits must be at the 6000 level or higher; the remaining 18 credits must be at the 5000 or 6000 level;
3. Two (2) of the 36 credits must involve courses in which the student presented a formal seminar;
4. Maximum of 3 credits in Directed Independent Research in Biological Sciences Study (BSC 6917) will count toward the degree, or up to 3 credits of Directed Independent Study (DIS/DIR), either one taken outside of Biology. Any combination of DIS/DIR credits regardless of source cannot total more than 3 credits that will count toward the degree;
5. One of the 36 credits must be the Master's Comprehensive Exam (BSC 6962). Students must take and pass a minimum of three written comprehensive exams given by a committee in designated areas within the microbiology and organismal specialties. Question types require written responses in essay and definition formats. See [FAU Regulations for Biology Master's Degrees](#) for complete requirements to complete the Master's Comprehensive Exam course.

**Note:** Master's Thesis (BSC 6971), Master's Thesis Proposal (BSC 6963) and Master's Thesis Defense (BSC 6975) do not count toward the M.S. Non-Thesis Option 1 degree.

Integrative Biology PH.D. students choosing Biology for a Master's Along the Way degree will be

verified for completion of degree requirements by the Biology Department during the Graduation Audit Check. Consult with the IB Ph.D. advisor early in matriculation to ensure the curriculum followed would satisfy the requirements for the M.S./Non-Thesis Option 1.

## **BIOLOGICAL SCIENCES**

### **MASTER OF SCIENCE IN TEACHING (M.S.T.)**

*(Minimum of 30 credits)*

#### **Non-Thesis Option 2**

This degree program is designed for students who wish to satisfy requirements for teaching in high school or junior college. In addition to regular coursework, students in this option may also elect to complete a Research Report, a short paper describing the results and significance of a circumscribed research project. Depending on background, students may also be required to take 6 credits of an Educational Internship.

The M.S.T. degree requires a minimum of 30 credits, if the student has two years of teaching experience at a secondary or junior college level. The M.S.T. degree requires 36 credits if the student has not completed the student teaching requirement. Degree requirements include:

1. At least half or 15 credits must be Biology Department courses;
2. Fifteen (15) of the 30 credits must be at the 6000 level or higher; the remaining 15 credits must be at the 5000 or 6000 level;
3. Two (2) of the 30 credits must involve courses in which the student presented a formal seminar;
4. Maximum of 3 credits in Directed Independent Research in Biological Sciences Study (BSC 6917) will count toward the degree, or up to 3 credits of Directed Independent Study (DIS/DIR), either one taken outside of Biology. Any combination of DIS/DIR credits regardless of source cannot total more than 3 credits that will count toward the degree;
5. One of the 30 credits (or 36 credits for students without two years prior teaching experience) must be the Master's Comprehensive Exam (BSC 6962). Students must take and pass a minimum of three written comprehensive exams given by a committee in designated areas within the microbiology and organismal specialties. Question types require written responses in essay and definition formats. See [FAU Regulations for Biology Master's Degrees](#) for complete requirements to complete the Master's Comprehensive Exam course;

**Note:** Master's Thesis (BSC 6971), Master's Thesis Proposal (BSC 6963) and Master's Thesis Defense (BSC 6975) do not count toward the M.S. Non-Thesis Option 1 degree.

6. Students must take 6 credits of approved graduate courses in education or another cognate field if they plan to teach in high school and hold a Rank III secondary certificate (obtained independently from this M.S.T. degree), or if the student intends to teach at the college level;
7. Six (6) additional credits of Internship (EDG 6940) are required, except for those with two years of teaching experience at a secondary school or junior college level. Such internships can be completed in the following manner. Students enrolled in EDG 6940 (6 credits) may choose one of the following to fulfill the course requirements:
  - a. Do an internship with one of the local public schools (verified by local school contacts). There is no form to be completed, but rather the student independently lines up an internship opportunity. Once confirmed, the Biology Department will contact the FAU Education Department requesting permission for the student to register for the Internship, EDG 6940. At the end of the term in which the student registers for the internship, the FAU Education Department will contact the Biology Department to verify the student has completed the internship successfully so that a satisfactory grade can be applied. This latter confirmation is done based on the teacher/school in which the student does the internship and who verifies in writing that the internship was completed;
  - b. Teach a laboratory course in the Biology Department (verified by the lab coordinator for time, effort and teaching responsibilities).

## **BUSINESS BIOTECHNOLOGY PROFESSIONAL SCIENCE MASTER (P.S.M.)**

*(Minimum of 34 credits required)*

***Application Deadline: Spring term - October 1; Fall term - January 15***

The Professional Science Master (P.S.M.) with major in Business Biotechnology is a terminal degree for students interested in entering the workforce directly following completion of the degree. The 34-credit program is tailored for the student with undergraduate training in biology or chemistry who is primarily interested in working in the business side of the emerging biotechnology and pharmaceutical industries. This interdisciplinary program, provided in conjunction with the College of Business, includes traditional classroom courses in both business and science, culminating in two internship experiences. One internship provides experience working side-by-side with a research scientist. The second internship exposes the student to the business side of the biotechnology industry.

### **Departmental Admission Requirements**

1. Baccalaureate degree in biology or chemistry. Degrees in other scientific areas can be considered on an individual basis;
2. Graduating undergraduate science GPA of 3.0 or higher;
3. Personal statement of career goals and how the applicant feels this training will help achieve those goals;
4. Three letters of recommendation with at least one from a former professor;
5. [Graduate Student Biology Faculty Advisor Verification](#) form;
6. Approval of the Department of Biological Sciences.

## Degree Requirements

The program requires a total of 34 credits. Student curriculum degree requirements include:

### Core Courses - 10 credits required

Venture Creation	ENT 6016	3
Biotechnology Business Development	ENT 6196	3
Professional Science Master's (P.S.M.) in Business Biotechnology - Scientific Internship	BSC 6946	2
Professional Science Master's (P.S.M.) in Business Biotechnology - Business Internship	MAN 6946	2

\* Each internship will last one semester. One internship will be science oriented with the student working directly with research scientists. The second will involve working on the business and administrative side of the company or institute, including technology transfer and business development offices. The goal is to place students in one of the biomedical institutes (e.g., Scripps Florida and the Max Planck Institute) or an emerging biotechnology business.

### Science Courses

**Choose 15 credits from the list below. May require instructor permission or prerequisites. \*\***

Biochemistry of the Gene	BCH 5415	3
Advanced Biochemistry	BCH 6740	3
Laboratory Methods in Biotechnology	BSC 6408L	3
Practical Cell Neuroscience	BSC 6417C	3

Computer Graphics for Biologists	BSC 6455	3

Cross-Cultural Management and Human Resources	MAN 6609	3

**Important comment about courses.** The list of business courses shown above reflect those currently listed in the University Catalog. Availability will vary depending on the offerings in each department. New courses may have been added since this information was published. Appropriate business courses can be taken as business electives with the approval of the student's graduate program advisor.

For additional information about this degree program, contact David Binninger, [binninge@fau.edu](mailto:binninge@fau.edu).

## CHEMISTRY AND BIOCHEMISTRY

### **Faculty:**

Cudic, P., Chair; Allani, S. K.; Ande, P.; Chamely-Wiik, D. M.; Cudic, M.; Du, D.; Fields, G. B.; Haces, A. M.; Haky, J. E., Emeritus; Huchital, D. H.; Lepore, S.; Louda, J. W.; Merk, V.; Rezler, E. M.; Roche, S. P.; Sempertegui, T.; Snyder, P. A.; Stawikowski, M.; Terentis, A. C.; Weissbach, H., Emeritus; West, L.; Wiesenfeld, J. R., Emeritus; Yildirim, I.

*Accreditation: The Department of Chemistry and Biochemistry offers a Bachelor of Science program with a curriculum that is approved by the Committee on Professional Training of the American Chemical Society.*

Chemistry is the central science encompassing elements of physics, biology and mathematics as well as unique elements of its own. The Chemistry and Biochemistry Department offers three undergraduate degree programs in Chemistry (one B.A. and two B.S.), which are designed to focus on individual student interests, and an [Honors Program in Chemistry](#). A certificate program in [Pharmaceutical Technology](#) is designed for students who plan to pursue a career in the biopharmaceutical industry. A [Post-Baccalaureate Research Education Program in Chemistry \(PREPChem\)](#) certificate program is also offered. At the master's level, the department offers a Master of Science in Chemistry (M.S.) and a Master of Science in Teaching (M.S.T.). A doctoral degree program in Chemistry (Ph.D.) is also available.

[Link to Combined Program](#)

[Link to Master's Programs](#)

[Link to Doctoral Program](#)

The Bachelor of Arts (B.A.) is a liberal arts degree intended for students planning professional careers in chemistry-related professions. These include health professions (medicine, dentistry, pharmacy), environmental consulting, technical sales and secondary school teaching. This degree is often pursued by students studying in related disciplines (e.g., biological sciences, geology, neuroscience and behavior) who wish to obtain a second major or a second degree.

The Bachelor of Science (B.S.) degrees are designed for students preparing for professional careers as chemists in industry, government or academic research. Students interested in pursuing advanced graduate studies in chemistry, biochemistry or related fields should also follow one of the B.S. degree programs.

Two B.S. degree programs in Chemistry are offered:

1. The **ACS-Approved B.S. Program** offers a rigorous program of study in all aspects of inorganic, organic, analytical, biochemical and physical chemistry. Its curriculum corresponds to certification guidelines of the Committee on Professional Training of the American Chemical Society (ACS). An ACS-certified degree can offer advantages in job placement and graduate

school admission.

- The **B.S. Program with a Concentration in Biochemistry** is designed for students pursuing careers in biochemistry and related disciplines, such as molecular biology, biophysics and pharmacology. Additionally, premedical students who wish to pursue a research-oriented curriculum might be interested in this program.

### Prerequisite Coursework for Transfer Students

Students transferring to Florida Atlantic University must complete both lower-division requirements (including the requirements of the General Education Program) and requirements for the college and major. Lower-division requirements may be completed through the A.A. degree from any Florida public college, university or community college or through equivalent coursework at another regionally accredited institution. Before transferring and to ensure timely progress toward the baccalaureate degree, students must also complete the prerequisite courses for their major as outlined in the [Transition Guides](#).

All courses not approved by the Florida Statewide Course Numbering System that will be used to satisfy requirements will be evaluated individually on the basis of content and will require a catalog course description and a copy of the syllabus for assessment.

### Core Curriculum

All Chemistry majors must take a minimum of 16 credits of chemistry at Florida Atlantic University. The following courses are required for all Chemistry majors:

Biochemistry 1	BCH 3033	3
General Chemistry 1	CHM 2045	3
General Chemistry 1 Lab	CHM 2045L	1
General Chemistry 2	CHM 2046	3
General Chemistry 2 Lab	CHM 2046L	1
Organic Chemistry 1	CHM 2210	3
Organic Chemistry 2	CHM 2211	3
Organic Chemistry Lab	CHM 2211L	2
Quantitative Analysis	CHM 3120	2

Quantitative Analysis Lab	CHM 3120L	2
General Physics 1 Lab	PHY 2048L	1
General Physics 2 Lab	PHY 2049L	1

## CHEMISTRY

### BACHELOR OF ARTS (B.A.)

In addition to the core curriculum, the B.A. degree program requires the following courses:

Biochemistry Lab	BCH 3103L	3
Introduction to Physical Chemistry	CHM 3400	3 <b>or</b>
Physical Chemistry 1	CHM 3410	3
Inorganic Chemistry	CHM 3609	3
Inorganic Chemistry Lab	CHM 3609L	1
College Algebra	MAC 1105	3
Methods of Calculus	MAC 2233	3
College Physics 1	PHY 2053	4 <b>or</b>
General Physics 1	PHY 2048	3
College Physics 2	PHY 2054	4 <b>or</b>
General Physics 2	PHY 2049	3

## CHEMISTRY

### BACHELOR OF SCIENCE (B.S.)

ACS-Approved Program

In addition to the core curriculum, the ACS-Approved B.S. degree program requires the following courses.

Chemical Literature	CHM 3060	1
Physical Chemistry 1	CHM 3410	3
Physical Chemistry 1 Lab	CHM 3410L	2
Physical Chemistry 2	CHM 3411	3
Physical Chemistry 2 Lab	CHM 3411L	2
Inorganic Chemistry	CHM 3609	3
Inorganic Chemistry Lab	CHM 3609L	1
Bioanalytical Instrumentation	CHM 4139	2
Bioanalytical Instrumentation Lab	CHM 4139L	2
Calculus with Analytic Geometry 1	MAC 2311	4
Calculus with Analytic Geometry 2	MAC 2312	4
General Physics 1	PHY 2048	4
General Physics 2	PHY 2049	4
<b><i>Choose one of the following.</i></b>		
Calculus with Analytic Geometry 3	MAC 2313	3
Differential Equations 1	MAP 2302	3
<b><i>Choose three of the following.</i></b>		
Biochemistry 2	BCH 3034	3
RI: Advanced Biochemistry	BCH 4035	3
Environmental Chemistry	CHM 3080	3
Organic Chemistry 3	CHM 4220	3

RI: Introduction to Drug Design	CHM 4273	3
Introduction to Drug Development	CHM 4274C	3
RI: Structural Biochemistry	CHM 4350	3
Materials Chemistry	CHM 4714	3
Directed Independent Study	CHM 4905	3
Directed Independent Research in Chemistry	CHM 4915	1-3
Directed Independent Research in Chemistry	CHM 4916	0-3

## **CHEMISTRY**

### **BACHELOR OF SCIENCE (B.S.)**

#### **Biochemistry Concentration**

In addition to the core curriculum, the B.S. in Chemistry (Biochemistry concentration) program requires the following courses.

Biochemistry 2	BCH 3034	3
Biochemistry Lab	BCH 3103L	3
RI: Advanced Biochemistry	BCH 4035	3
Biological Principles	BSC 1010	3
Biological Principles Lab	BSC 1010L	1
Chemical Literature	CHM 3060	1
Physical Chemistry 1	CHM 3410	3
Physical Chemistry 1 Lab	CHM 3410L	2
Calculus with Analytic Geometry 1	MAC 2311	4
Experimental Design and Statistical Inference	PSY 3234	3

General Physics 1	PHY 2048	4 <b>or</b>
College Physics 1	PHY 2053	4
General Physics 2	PHY 2049	4 <b>or</b>
College Physics 2	PHY 2054	4

***Choose a minimum of one of the following.***

Environmental Chemistry	CHM 3080	3
Inorganic Chemistry	CHM 3609	3
Inorganic Chemistry Lab	CHM 3609L	1
Bioanalytical Instrumentation	CHM 4139	2
Bioanalytical Instrumentation Lab	CHM 4139L	2
Organic Chemistry 3	CHM 4220	2
RI: Introduction to Drug Design	CHM 4273	3
Introduction to Drug Development	CHM 4274C	3
RI: Structural Biochemistry	CHM 4350	3
Materials Chemistry	CHM 4714	3

***Choose a minimum of one of the following.***

General Microbiology	MCB 3020	3
General Microbiology Lab	MCB 3020L	1
Genetics	PCB 3063	3
Cell Biology	PCB 3023	3
Biological Bases of Behavior	PSB 3002	3

*Choose a minimum of one of the following.*

Seminar	BSC 4932	1
Directed Independent Study	CHM 4905	1-3
Science Internship	IDS 3941	1-3
Directed Independent Research in Chemistry	CHM 4915	1-3
Directed Independent Research in Chemistry	CHM 4916	0-3

Additional courses for Pre-Professional majors:

*Required*

Biodiversity	BSC 1011	3
Biodiversity Lab	BSC 1011L	1

*Suggested Electives*

Comparative Animal Behavior	CBH 4024	3
Medical Shadowing Internship	IDS 3940	1
Human Morphology and Function 1	PCB 3703	3
Human Morphology and Function 1 Lab	PCB 3703L	1 <b>or</b>
Comparative Vertebrate Morphology	ZOO 4690	3
Comparative Vertebrate Morphology Lab	ZOO 4690L	1
Human Morphology and Function 2	PCB 3704	3
Human Morphology and Function 2 Lab	PCB 3704L	1 <b>or</b>
Comparative Animal Physiology	PCB 4723	3
Comparative Animal Physiology Lab	PCB 4723L	1

## Secondary Education Program

A program leading to teacher certification in chemistry is available. For information, contact the Department of [Curriculum and Instruction](#) in the College of Education.

## Honors Program in Chemistry

The Honors Program in Chemistry provides an enriched learning experience for high-performing students. The program focuses on the enhancement of research and communication skills required for scientists. Students gain a positive perspective on working in the interdisciplinary research field becoming prepared to continue their education in a graduate program or within the highly competitive STEM job market.

### Admission Requirements

Students enter the Honors Program in Chemistry in one of two ways:

1. Students who have not completed any upper-level courses are eligible to enter the program if they have an overall GPA of 3.5 or higher.
2. Students who have completed upper-level chemistry courses are eligible to enter the program if they have an overall GPA of 3.3 or higher and are nominated by a faculty member.

Students must download and submit a completed application, along with all supporting documents on the checklist, in a single email to [honorschemistry@fau.edu](mailto:honorschemistry@fau.edu).

### Standards for Maintaining Active Status

Students admitted to the Honors Program in Chemistry must maintain high academic and ethical standards. Students may be dismissed from the program if they fail to maintain an overall GPA of 3.0, fail to maintain a GPA of 3.3 in their major or violate the code of academic integrity. In the event of withdrawal or dismissal from the Honors Program, credits earned will be applied to a traditional bachelor's degree in chemistry with no penalty.

### Honors-Level Enrichment

Honors compacts apply to a total of at least three upper-level chemistry and biochemistry courses. Each of the honors compacts has established criteria including written assignments and an oral presentation. Honors compacts also require individual or group assignments. Chemical Literature, CHM 3060, for 1 credit with a supplemental honors component, is a required course for students in the program.

### Capstone Experience

1. The capstone experience consists of at least two semesters of Honors Directed Independent Research in Chemistry, CHM 4915, for a minimum of 2 credits; and
2. A senior-level thesis must be produced by students taking CHM 4915 with an honors designation and they must register for Honors Thesis in Chemistry, CHM 4972, for credits. The thesis has additional criteria for which students should consult qualified research faculty members.

## Graduation Requirements

To be eligible for Honors in Chemistry at graduation, students must have:

1. Achieved an overall 3.0 GPA or higher;
2. A Chemistry GPA of 3.3 or higher;
3. Completed a minimum of three (7 credits) upper-level honors compacts; and
4. Completed the Honors Thesis in Chemistry, CHM 4972 for 2 credits, obtaining a grade of “B+” or higher.

## PHARMACEUTICAL TECHNOLOGY UNDERGRADUATE CERTIFICATE

*(Minimum of 14 credits required)*

The Pharmaceutical Technology certificate program provides students with a unique opportunity to understand the drug development process, emphasizing the roles that biology, chemistry, biochemical, analytical, formulation and regulatory issues play in the process of drug discovery.

This 14-credit certificate program is designed for individuals who have completed higher undergraduate level courses including Organic Chemistry 2 and Biochemistry 1. This certificate is also intended for individuals who plan to pursue a career in the biopharmaceutical industry.

---

### Required Courses - 10 credits

Bioanalytical Instrumentation	CHM 4139	2
Bioanalytical Instrumentation Lab	CHM 4139L	2
RI: Introduction to Drug Design	CHM 4273	3
Introduction to Drug Development	CHM 4274C	3

---

### Elective Courses - 4 credits

Biochemistry Laboratory	BCH 3103L	3
-------------------------	-----------	---

RI: Advanced Biochemistry	BCH 4035	3
Seminar	BSC 4932	1
Organic Chemistry 3	CHM 4220	3
Introduction to Drug Formulation	CHM 4276C	3
RI: Structural Biochemistry	CHM 4350	3
Special Topics (i.e., Organic Spectroscopy)	CHM 4933	3
Special Topics (i.e., Chemical Biology)	CHM 4933	3
Science Internship	IDS 3941	1-3

## **POST-BACCALAUREATE RESEARCH EDUCATION PROGRAM IN CHEMISTRY (PREPCHEM)**

### GRADUATE CERTIFICATE

*(Minimum of 15 credits required)*

The PREPCHEM certificate is intended for undergraduates who hold a recent bachelor's degree and who have the desire to further build their knowledge and research skills to become more competitive candidates for admission to graduate school.

The program requires students to take traditional graduate courses in chemistry (9 credits) and undergraduate/graduate courses in the field of artificial intelligence (AI) (6 credits). AI is being used more frequently by chemists to perform various tasks and is becoming an integral part of modern drug discovery processes.

All required graduate courses, including Graduate Research, are offered through the department of Chemistry and Biochemistry. Data Science and AI courses are offered in the College of Science or the College of Engineering and Computer Science.

Upon completion of 15 credits, students receive a post-baccalaureate certificate. When admitted to the M.S. or Ph.D. program in Chemistry at FAU, up to 12 graduate credits from this certificate program may be applied to the degree program. For questions concerning the transfer of credits to a degree program, contact the department of Chemistry and Biochemistry.

## Required Coursework

### *Chemistry - 9 credits*

Introduction to Chemical Research	CHM 5944	1
-----------------------------------	----------	---

Instrumentation	CHM 6157	3
-----------------	----------	---

Graduate Research	CHM 6918	4
-------------------	----------	---

Graduate Seminar	CHM 6935	1
------------------	----------	---

### Artificial Intelligence (6 credits)

Applications of Artificial Intelligence	CAP 2603	3
---	----------	---

Computational Foundations of Artificial Intelligence	CAP 5625	3 or
--	----------	------

Introduction to Data Science	CAP 5768	3
------------------------------	----------	---

## COMBINED PROGRAM

### CHEMISTRY

### BACHELOR OF SCIENCE (B.S.) TO MASTER OF SCIENCE (M.S.)

### COMBINED PROGRAM

*(Minimum of 150 credits required)*

The joint B.S./M.S. degree program allows students to complete both a B.S. degree and a non-thesis M.S. degree in Chemistry within five years. The combined degree program includes a minimum of 150 credits, where the undergraduate degree program requires 120 credits, and the graduate program requires 30 credits at graduate level. Students may count 12 credits of graduate coursework (5000 level or higher) taken as an undergraduate to satisfy both degrees. Students apply to the program during their junior year or upon completion of 60 credits in the B.S. in Chemistry program at FAU.

### Admission Requirements

Students must have completed 60 credits in the B.S. in Chemistry program at FAU and have a minimum undergraduate science GPA of 3.25. The GRE exam is not required.

**Graduate Courses to Be Shared (12 credits)**

Graduate courses that will count toward both the B.S. and M.S. degrees must be at the 5000 level or higher. The application of 12 graduate credits to both the undergraduate and graduate degrees is justified because of the academic continuity of the two programs.

**Graduate Core Courses Required for the M.S. Degree (10 credits)**

All students must register for Introduction to Chemical Research (CHM 5944) once admitted into the program. To fulfill requirements for the M.S., students must also take the required core courses.

**Required Core Courses - 10 credits**

Introduction to Chemical Research	CHM 5944	1
Bioanalytical Methods and Applications	CHM 6137	2
Kinetics and Energetics of Reactions	CHM 6720	3
Synthesis and Characterization	CHM 6730	3
Current Topics in Bioanalysis	CHM 6937	1

**Graduate Elective Courses Required for the MS Degree (20 credits)**

Students must take 20 credits of elective courses in Chemistry (5000 or 6000-level) to complete requirements for the MS degree Non-Thesis option.

**Degree Requirements**

Students admitted to the program will fulfill all the requirements for both the BS and MS degree.

**Funding Opportunities**

Students admitted to the program are eligible for financial support in the form of [Pathways Scholarships](#) offered through the Graduate College.

**MASTER'S PROGRAMS****CHEMISTRY****MASTER OF SCIENCE (M.S.)**

[Link to Doctoral Program](#)

**Admission Requirements**

In addition to the University's general graduate admission requirements, the typical prerequisite for admission to the Master of Science in the Department of Chemistry and Biochemistry is the Bachelor of Science degree in Chemistry or its equivalent. Students must have achieved a minimum 3.0 GPA in the last 60 credits of undergraduate work, a "B" average in chemistry courses taken at the junior and senior undergraduate levels, or scores of at least 150 (verbal) and 152 (quantitative) on the Graduate Record Exam.

### **Degree Program**

Master of Science (M.S.) students will be required to complete the five core courses as well as three electives. These electives may be selected from graduate-level courses offered in the Department of Chemistry and Biochemistry or other departments in the University. Elective courses must be approved by the student's research advisory committee. Students must also write a thesis describing their research, which must be approved by the research advisory committee. The thesis must be defended successfully by the student in an oral exam with the research advisory committee. The student's research advisory committee must consist of at least three members, two of whom are members of the Chemistry and Biochemistry graduate faculty. One committee member must be from outside the Department of Chemistry and Biochemistry and must also hold an appointment to the graduate faculty. The minimum degree requirements are listed below. Students taking the non-thesis option may take a maximum of 3 credits of Graduate Research under the direction of a chemistry faculty member and are not required to have a research advisory committee.

---

#### **Core Courses - 10 credits**

Introduction to Chemical Research	CHM 5944	1
Bioanalytical Methods and Applications	CHM 6137	2
Synthesis and Characterization	CHM 6730	3
Kinetics and Energetics of Reactions	CHM 6720	3
Current Topics in Bioanalysis	CHM 6937	1

#### **Elective courses - 9 credits**

*Select three courses at the 5000, 6000 or 7000 level from the Chemistry Department*

---

#### ***Thesis Option - 11 credits***

Graduate Seminar	CHM 6935	1
------------------	----------	---

Master's Thesis	CHM 6971	10
<b><i>Non-Thesis Option - 11 credits</i></b>		
Graduate Seminar	CHM 6935	1
<i>The remaining 10 credits will be taken from the following courses</i>		
Advanced Biochemistry	BCH 6740	3
Advanced Topics in Biochemistry	BCH 6930	3
Organic Chemistry 3	CHM 5224	3
Materials Chemistry	CHM 5716	3
Advanced Drug Development	CHM 6277C	3
Drug Design	CHM 6278	3
Advanced Drug Formulation	CHM 6279C	3
Structural Biochemistry	CHM 6351	3
Advanced Topics in Organic Chemistry	CHM 6380	3
Medicinal Chemistry	CHM 6428	3
Graduate Research	CHM 6918	1-3
Chemistry for Environmental Scientists	CHS 6611	3
<b>Minimum Degree Total</b>		<b>30</b>

## CHEMISTRY

### MASTER OF SCIENCE (M.S.) ALONG THE WAY TO THE DOCTOR OF PHILOSOPHY (PH.D.)

#### *Master's en Passant*

Ph.D. students wishing to earn the non-thesis master's degree along the way are required to have passed the Ph.D. candidacy exam and have completed the following courses:

Introduction to Chemical Research	CHM 5944	1
-----------------------------------	----------	---

Bioanalytical Methods and Applications	CHM 6137	2
Current Topics in Bioanalysis	CHM 6937	1
Synthesis and Characterization	CHM 6730	3
Kinetics and Energetics of Reactions	CHM 6720	3
Graduate elective courses		9
Graduate seminar (non-thesis)	CHM 6935	1
Advanced Research in Chemistry (1 - 9 cr.)	CHM 7978	10
<b>Minimum Degree Total</b>		<b>30</b>

## CHEMISTRY

### MASTER OF SCIENCE IN TEACHING (M.S.T.)

In addition to the University's general graduate admission requirements, the typical prerequisite for admission to the Master of Science in Teaching degree program in the Department of Chemistry and Biochemistry is the Bachelor of Arts degree in chemistry or its equivalent. Students must have achieved a minimum 3.0 GPA in the last 60 credits of undergraduate work or scores of at least 148 (verbal) and 147 (quantitative) on the Graduate Record Exam.

#### Degree Program

The M.S.T. in Chemistry program provides post-baccalaureate education for secondary teachers, community college instructors and other individuals who wish to pursue these careers. The degree program requires a minimum of 30 credits of graduate coursework. Students also perform independent study (graduate research) under the supervision of a Department of Chemistry and Biochemistry faculty member, typically with a chemical education theme, and culminating in the presentation of a graduate seminar. The minimum degree requirements are listed below.

#### Core Courses - 10 credits

Introduction to Chemical Research	CHM 5944	1
Bioanalytical Methods and Applications	CHM 6137	2
Current Topics in Bioanalysis	CHM 6937	1

Synthesis and Characterization	CHM 6730	3
Kinetics and Energetics of Reactions	CHM 6720	3
<b>Electives - 9 credits</b>		
<i>Choose three courses from the following, maximum of 3 credits at the 5000 level</i>		
Advanced Biochemistry	BCH 6740	3
Advanced Topics in Biochemistry	BCH 6930	3
Organic Chemistry 3	CHM 5224	3
Materials Chemistry	CHM 5716	3
Advanced Organic Chemistry	CHM 6225	3
Advanced Drug Development	CHM 6277C	3
Drug Design	CHM 6278	3
Advanced Drug Formulation	CHM 6279C	3
Structural Biochemistry	CHM 6351	3
Advanced Topics in Organic Chemistry	CHM 6380	3
Medicinal Chemistry	CHM 6428	3
Chemistry for Environmental Scientists	CHS 6611	3
<b>Other Requirements - 5 credits</b>		
Graduate Research (may be taken over multiple terms)	CHM 6918	4
Graduate seminar (non-thesis)	CHM 6935	1
<b>Education Requirements - 6 credits</b>		
<i>Choose two courses from the College of Education.</i>		
<b>Minimum Degree Total</b>		<b>30</b>

## DOCTORAL PROGRAM

# CHEMISTRY

## DOCTOR OF PHILOSOPHY (PH.D.)

### Admission Requirements

The minimum admission requirements for the Ph.D. program in the Department of Chemistry and Biochemistry are a minimum 3.0 GPA in the last 60 credits of undergraduate work, a "B" average in chemistry courses taken at the junior and senior undergraduate levels or scores of at least 150 (verbal) and 152 (quantitative) on the Graduate Record Exam. **The Ph.D. program in Chemistry requires 80 credits, minimum.**

### Degree Program

Students will be required to complete five core courses as well as three electives. If students have completed graduate-level courses previously, they may be substituted for one or more electives at the discretion of the Department of Chemistry and Biochemistry Graduate Programs Committee. Elective courses must be approved by the student's research advisory committee. Students must also complete Introduction to Chemical Research and present a seminar to the department (1 credit each). In addition to the courses listed below, Ph.D. students are required to earn Advanced Research in Chemistry (CHM 7978) credits until they are admitted to candidacy.

---

### Core Courses - 10 credits

Introduction to Chemical Research	CHM 5944	1
Bioanalytical Methods and Applications	CHM 6137	2
Synthesis and Characterization	CHM 6730	3
Kinetics and Energetics of Reactions	CHM 6720	3
Current Topics in Bioanalysis	CHM 6937	1

**Electives - 9 credits** - *Select three courses at the 5000, 6000 or 7000 level from the Chemistry Department. May not select Graduate Research, CHM 6918, as an elective.*

---

### Other Requirements - 36 credits

Graduate Seminar (non-thesis)	CHM 6935	1
-------------------------------	----------	---

**Research - up to 35 credits** - *Advanced Research in Chemistry credits are taken to fulfill full-time enrollment requirements while advancing toward candidacy*

Advanced Research in Chemistry	CHM 7978	1-9
--------------------------------	----------	-----

---

**Dissertation - 25 credits (minimum) - taken after admission to candidacy**

---

Dissertation (minimum)	CHM 7980	25
------------------------	----------	----

<b>Minimum Degree Total</b>		<b>80</b>
-----------------------------	--	-----------

Each student's research advisory committee must have at least four members, three of whom are members of the Chemistry and Biochemistry Ph.D. program's graduate faculty. One committee member must be from outside the Department of Chemistry and Biochemistry and have graduate faculty status.

### **Admission to Candidacy**

The Candidacy Exam must be attempted within three months of finishing all coursework and successfully completed within five months. This exam will be specifically designed for each student by the student's research advisory committee according to department guidelines and will focus on the student's selected area of research. Students will be admitted to candidacy upon successful completion of the Candidacy Exam and thereafter must enroll in CHM 7980, Dissertation.

### **Research Proposal**

In addition to presenting a proposed plan for thesis research activities to the advisory committee, students must also complete an independent research proposal in a field distinct from their thesis research. This proposal is to be completed within three months of completing the Candidacy Exam. The goal of this exercise is for the student to prepare an original written research proposal and successfully defend this orally to his/her committee. This is designed to test the student's ability to identify and design a research project, which will test problem-solving skills and ability to distill relevant literature and design appropriate experiments to address specific research questions.

### **Dissertation**

Students must also write a dissertation describing their research, which must be approved by the research advisory committee. The dissertation must be successfully defended by the student in an oral exam with the research advisory committee.

## **COMPLEX SYSTEMS AND BRAIN SCIENCES**

**(This program is being phased out and no longer accepting students.)**

### **Faculty:**

Perry, G. W., Interim Director; Kelso, J. A. S., Eminent Scholar in Science; Alexander, W.; Anzures,

G.; Barenholtz, E.; Blanks, J.; Bressler, S.; Engeberg, E.; Ester, E.; Fuchs, A.; Hock, H.; Hong, S.; Pandya, A. S.; Prentice, H. M.; Shen, W.; Sheremata, S.; Stackman, R.; Vertes, R. P.; Wu, J. Y.

## **COMPLEX SYSTEMS AND BRAIN SCIENCES**

### **DOCTOR OF PHILOSOPHY (PH.D.)**

*(Minimum of 80 credits required)*

The Center for Complex Systems and Brain Sciences offers a Ph.D. degree that encompasses diverse areas of study. These areas are organized around a unifying conceptual framework that is both timely and exciting since the mathematical and computational tools of non-linear dynamics will provide major breakthroughs in the understanding of mind, brain and behavior. Students will acquire research skills in specific experimental systems in the brain and behavioral sciences while developing theoretical concepts and tools within a specially tailored graduate program.

#### **Admission to Doctoral Study**

In addition to meeting all of the University and College requirements for admission to graduate study, applicants for the Doctor of Philosophy (Ph.D.) degree must meet each of the following criteria:

1. The student must have a baccalaureate degree from an accredited college or university;
2. The student must have a quantitative score of 155 or higher on the Graduate Record Examination;
3. The student must have a minimum 3.0 average in the last 60 credits of undergraduate work; and
4. The student must be approved for admission to the program by the faculty of the Center for Complex Systems and Brain Sciences.

#### **Degree Requirements**

Students must complete, with grades of "B" or better, a minimum of 80 graduate credits. This must include the following six core courses: Cognitive Neuroscience, Nonlinear Dynamic Systems, Methods in Complex Systems, Cellular and Molecular Neuroscience and Systems and Integrative Neuroscience and Proseminar on Research in Complex Systems. Students must also participate in a weekly journal club. The remaining credits may be completed through additional courses, directed research and dissertation credits at the discretion of the student and advisor. A minimum of 12 dissertation credits is required. In addition, the student must complete a research paper, directed by program faculty, by the end of the second year.

A central requirement for the Ph.D. degree program is submission and defense of a dissertation based on original work in an area of specialization acceptable to the student's doctoral committee. Approval of a dissertation proposal by the doctoral committee must precede the experimental and/or theoretical

work required.

### Admission to Candidacy

Admission to doctoral candidacy depends on the student's successful completion of the core coursework, successful completion of the qualifying research paper, satisfactory annual reviews of the student's progress by program faculty and selection of a program faculty member who is willing to chair the student's doctoral dissertation.

### Transfer Credits

Any transfer credits toward requirements for the Ph.D. degree program must be approved by the program faculty as well as by the University. A maximum of 30 credits may be transferred.

---

#### Core Courses - 18 credits

Nonlinear Dynamic Systems	ISC 5453	3
Cognitive Neuroscience	ISC 5465	3
Methods in Complex Systems	ISC 6450	3
Proseminar in Research in Complex Systems	ISC 6937	3
Cellular and Molecular Neuroscience	PSB 6345	3
Systems and Integrative Neuroscience	PSB 6346	3

**Electives - 9 credits** 9

*Choose 9 credits from the following prefixes: EXP, ISC, PSB, and PSY*

**Other Requirements - 41 credits** 41

*Choose 41 credits from additional graduate courses, directed independent study (ISC 6908) and dissertation credits (ISC 7980) as approved by the advisor*

---

#### Dissertation - 12 credits

Dissertation (taken over multiple terms)	ISC 7980	12
--	----------	----

**Minimum Degree Total** **80**

## ENVIRONMENTAL SCIENCE

(See [Interdisciplinary Programs](#) at the beginning of this Charles E. Schmidt College of Science section for the undergraduate Environmental Science certificate, the graduate Environmental Restoration certificate and the Master of Science with Major in Environmental Science.)

## EXERCISE SCIENCE AND HEALTH PROMOTION

### Faculty:

Zourdos, M., Chair; Boerum, C.; Canteri, L.; Graves, B. S.; Hall, M.; Huang, C-J.; Khamoui, A.; Papania, M.; Penhollow, T.; Pyka, I.; Visavadiya, N.; Whitehurst, M.; Zoeller, R.

### Purpose/Mission Statement

The Department of Exercise Science Health Promotion (ESHP) offers interdisciplinary undergraduate and graduate degrees designed to prepare students for careers in clinical, corporate and community/nonprofit-based physical fitness and health promotion, postgraduate study in applied health sciences (e.g., physical therapy physician assistant) as well as advanced study in human biology/physiology. Whether in the role of practitioner or scientist, the ESHP graduate is uniquely prepared to influence the health and well-being of their fellow citizens. Importantly, the impact of ESHP graduates includes the potential to reduce healthcare costs when those they touch adopt a healthy lifestyle and dramatically reduce the occurrence and severity of diseases (obesity, heart disease, hypertension, diabetes, cancer) associated with sedentary living.

[Link to Master's Program](#)

## **EXERCISE SCIENCE AND HEALTH PROMOTION** BACHELOR OF SCIENCE (B.S.)

### Exercise Physiology Concentration

### Pre-Physical Therapy and Occupational Therapy Concentration

To be eligible for the B.S., all Exercise Science and Health Promotion majors must complete all ESHP upper division and prerequisite courses with a grade of "C" or better. Upon completion of the Exercise Science and Health Promotion baccalaureate program, students will be prepared to take the American

College of Sports Medicine examination for the Certified Exercise Physiologist (EP) and the National Strength and Conditioning Association examination for Certified Strength and Conditioning Specialist (CSCS) and Certified Personal Trainer (CPT).

### **General Admission Requirements**

1. Satisfy all University and program entrance requirements;
2. Satisfy the General Education Program requirements;
3. Meet with your assigned ESHP advisor each semester.

### **Prerequisite Coursework for Transfer Students**

Students transferring to Florida Atlantic University must complete both lower-division requirements (including the requirements of the General Education Program) and requirements for the college and major. Lower-division requirements may be completed through the A.A. degree from any Florida public college, university or community college or through equivalent coursework at another regionally accredited institution. Before transferring and to ensure timely progress toward the baccalaureate degree, students must also complete the prerequisite courses for their major as outlined in the [Transition Guides](#).

All courses not approved by the Florida Statewide Course Numbering System that will be used to satisfy requirements will be evaluated individually on the basis of content and will require a catalog course description and a copy of the syllabus for assessment.

### **Concentrations**

The B.S. degree in Exercise Science and Health Promotion offers two concentrations:

1. Exercise Physiology
2. Pre-Physical Therapy and Occupational Therapy (Pre-PT/OT)

### **Undergraduate Program Lower-Division Requirements for Exercise Physiology Concentration**

The Exercise Physiology concentration is available in person or fully online. Students planning on majoring in Exercise Science and Health Promotion can satisfy some University and general education requirements while simultaneously satisfying ESHP program requirements. All prerequisite courses require a grade of "C" or better. The following prerequisites or their equivalents are required for all ESHP majors in the Exercise Physiology concentration:

**Required Prerequisite Courses**

Health, Fitness for Life	HSC 2100	2
--------------------------	----------	---

First Aid and CPR	HSC 2400	2
-------------------	----------	---

***Mathematics***

College Algebra	MAC 1105	3
-----------------	----------	---

College Physics 1	PHY 2053	3
College Physics 2	PHY 2054	3
Sociological Perspectives	SYG 1000	3

### **Undergraduate Program Lower-Division Requirements for Pre-Physical Therapy and Occupational Therapy Concentration**

Students planning on majoring in Exercise Science and Health Promotion can satisfy some University

and general education requirements while simultaneously satisfying ESHP program requirements. All prerequisite courses require a grade of "C" or better. The following prerequisites or their equivalents are required for all ESHP majors in the Pre-PT/OT concentration. This concentration is available in person only with some online course options.

**Note:** All students are advised to take Methods of Calculus (MAC 2233) instead of Information Systems Fundamentals (ISM 2000) because MAC 2233 is a prerequisite for the required course, College Physics 1 (PHY 2053).

---

### Required Prerequisite Courses

Health, Fitness for Life	HSC 2100	2
--------------------------	----------	---

First Aid and CPR	HSC 2400	2
-------------------	----------	---

### *Mathematics*

College Algebra	MAC 1105	3
-----------------	----------	---

Information Systems Fundamentals	ISM 2000	3 or
----------------------------------	----------	------

Methods of Calculus	MAC 2233	3
---------------------	----------	---

Introductory Statistics	STA 2023	3
-------------------------	----------	---

### *Social Sciences*

Anatomy/Physiology 1 and 2 (including labs)	BSC 2085, 2085L and BSC 2086, 2086L	8
---	--	---

General Chemistry 1 (including lab)	CHM 2045, 2045L	4
-------------------------------------	-----------------	---

General Psychology	PSY 1012	3
--------------------	----------	---

PEM/PEN courses (2 separate) 1 to 2 credits each		2-4
--	--	-----

Sciences (Natural)		3
--------------------	--	---

**Note:** Students must have at least 45 credits of 3000 level or higher courses. Students are advised to be cognizant of the courses required for their potential PT or OT program. College Physics 2 is often

required. In this case, the remaining 11 electives after College Physics 2 should be taken at the 3000 level or higher to meet the 45\-credit rule.

---

### General Advice

1. Meet with an ESHP-assigned advisor at least once each semester.
2. Work with your ESHP advisor to complete and sign an official plan of study, "the contract" after meeting foreign language and Writing Across Curriculum (Gordon Rule) requirements; after receiving the College of Education welcome letter; and after attaining a "C" or better in all prerequisite courses for the ESHP program.
3. Student must have current student professional liability insurance during the internship. See internship coordinator for specific information.

### Program Completion Criteria

Students who elect to fulfill the University foreign language requirement in addition to the ESHP requirements will receive a Bachelor of Science (B.S.) degree. To be eligible for graduation, the student must satisfy all University, College, department and program requirements and complete the ESHP

upper-division requirements and prerequisite courses with a grade of "C" or better in each course.

## COMBINED PROGRAMS

### **HEALTH SCIENCE TO EXERCISE SCIENCE AND HEALTH PROMOTION BACHELOR OF ARTS (B.A.) TO MASTER OF SCIENCE (M.S.) COMBINED PROGRAM**

This accelerated program leads to both a Bachelor of Arts (B.A.) and a Master of Science (M.S.) degree. Students enrolled in the B.A. with Major in Health Science may only enter the combined program through the Health Promotion concentration. Students apply to the B.A./M.S. program in the first semester of their senior year and begin taking graduate courses during the last semester of their senior year; those courses would apply to both the B.A. and M.S. degrees. The combined degree program is 138 credits, regardless of thesis option. That is, 120 for the undergraduate degree and 18 for the additional credits in the health promotion graduate area within Exercise Science and Health Promotion (ESHP).

Students complete the undergraduate degree first. Up to 12 credits of graduate work taken in the senior year can be counted toward both the undergraduate and graduate degrees. Students wishing to apply to the accelerated M.S. program may do so in semester 10 of their undergraduate program. Students must achieve a "B" or higher in the three core courses (listed below) and have a 3.25 cumulative GPA in their academic work. This program may be useful for students wishing to enter a profession that requires a master's degree; however, the department generally does not advise obtaining a B.A., if the goal is to obtain a Ph.D. eventually.

#### **Prerequisite Coursework for Transfer Students**

Students transferring to Florida Atlantic University must complete both lower-division requirements (including the requirements of the General Education Program) and requirements for the college and major. Lower-division requirements may be completed through the A.A. degree program from any Florida public college, university or community college or through equivalent coursework at another regionally accredited institution. Before transferring and to ensure timely progress toward the baccalaureate degree, students must also complete the prerequisite courses for their major as outlined in the [Transition Guides](#).

All courses not approved by the Florida Statewide Course Numbering System that will be used to satisfy requirements will be evaluated individually on the basis of content and will require a catalog course description and a copy of the syllabus for assessment.

## Requirements and Eligibility

In addition to the University and Charles E. Schmidt College of Science requirements, students seeking a B.A. in Health Science and M.S. in Exercise Science and Health Promotion (Health Promotion Track) must complete the following courses.

## Undergraduate Health Science Core Curriculum

To meet University degree requirements, students in ESHP must also have completed required credits in courses outside the Charles E. Schmidt College of Science.

B.A./M.S. candidates must complete all core courses listed in the [Bachelor of Science with Major in Health Science](#) section of this catalog, along with the requirements for their specific track within Health Science.

Substitutions for required courses within the B.A. in Health Science program are allowed with prior approval from the department's undergraduate advising committee. Graduate courses are listed below.

---

### Required Courses - 18 credits

Personal and Community Health	HSC 5203	3
Evaluation of Health Promotion and Health Education Programs	HSC 6115	3
Needs Assessment and Program Planning in Health Promotion	HSC 6248	3
Epidemiological Basis of Health	HSC 6505	3
Health Behavior, Health Education and Health Promotion	HSC 6585	3
Research and Evaluation	PET 6505C	3

### Electives - 12 credits

*Required courses for other tracks may be used for electives and/or students may choose from the following.*

Advanced Exercise Physiology 1	APK 6111	3
Advanced Exercise Physiology 2	APK 6116	3

Advanced Sports Nutrition	HUN 6247	3
Drug Abuse Behavior	HSC 5156	3
Chronic Stress and Population Health	HSC 5177	3
Human Obesity	HSC 5178	3
Advanced Concepts in Health Promotion	HSC 5587	3
Exercise Neuroscience	PET 5077	3
Strength and Conditioning Program Design	PET 5391	3
Advanced Exercise Testing and Prescription	PET 5521	3
Special Topics	PET 5930	1-4
Practical Applications in Exercise Science and Health Promotion	PET 5947	1-3
Skeletal Muscle Physiology	PET 6382	3
Directed Independent Study	PET 6905	1-5
Thesis option		6
<b>Total</b>		<b>30 credits</b>

**Read the following information thoroughly.**

1. A master's degree is a minimum of 30 credits.
2. If choosing the thesis option, there could be a maximum of 6 additional credits.
3. Up to 3 credits of Directed Independent Study (PET 6905) may be counted toward this degree.
4. FAU students who applied through the accelerated B.S./M.S. program may count 12 credits for both degrees.
5. Thesis students must adhere to thesis deadlines. See the ESHP graduate coordinator and thesis chair.
6. All students must turn in a graduate application according to the FAU academic calendar.

**EXERCISE SCIENCE AND HEALTH PROMOTION  
BACHELOR OF SCIENCE (B.S.) TO MASTER OF SCIENCE (M.S.)**

## COMBINED PROGRAM

This accelerated program leads to both a Bachelor of Science (B.S.) and a Master of Science (M.S.) degree. Students apply to the B.S./M.S. program during their senior year and begin taking graduate courses during the first semester of their senior year. Those courses would apply to both the B.S. and M.S. degrees. The combined degree program is either 138 or 144 credits depending on the graduate track or thesis versus non-thesis options. That is, 120 for the undergraduate degree and 18 (non-thesis), or 24 (thesis) additional credits for the graduate degree.

Students complete the undergraduate degree first. Up to 12 credits of graduate work taken in the senior year can be counted toward both the undergraduate and graduate degrees. Students wishing to apply to the accelerated M.S. program may do so in semester 10 of their undergraduate program. Students must have a 3.25 cumulative GPA in their academic work.

### **Prerequisite Coursework for Transfer Students**

Students transferring to Florida Atlantic University must complete both lower-division requirements (including the requirements of the General Education Program) and requirements for the college and major. Lower-division requirements may be completed through the A.A. degree program from any Florida public college, university or community college or through equivalent coursework at another regionally accredited institution. Before transferring and to ensure timely progress toward the baccalaureate degree, students must also complete the prerequisite courses for their major as outlined in the [Transition Guides](#).

All courses not approved by the Florida Statewide Course Numbering System that will be used to satisfy requirements will be evaluated individually on the basis of content and will require a catalog course description and a copy of the syllabus for assessment.

### **Requirements and Eligibility**

In addition to the University and Charles E. Schmidt College of Science requirements, students seeking a B.S. in Exercise Science and Health Promotion and M.S. in Exercise Science and Health Promotion (Health Promotion Track) must complete the following courses.

### **Undergraduate Health Science Core Curriculum**

To meet University degree requirements, students in ESHP must also have completed required credits in courses outside the Charles E. Schmidt College of Science.

Substitutions for required courses are allowed with prior approval from the department's undergraduate advising committee. Graduate courses are listed below.

## **EXERCISE SCIENCE AND HEALTH PROMOTION**

### MASTER OF SCIENCE (M.S.)

#### **Exercise Physiology Concentration**

#### **Health Promotion Concentration**

The master's degree with major in Exercise Science and Health Promotion may be structured with a concentration in Exercise Physiology or Health Promotion. Both concentrations are offered online only.

#### **Admission Requirements**

1. The student must meet College and University requirements.
2. Any applicant seeking admission into the M.S. program with a major in Exercise Science and Health Promotion must have a minimum grade point average of 3.0 in the last 60 credits of undergraduate work attempted prior to receiving the bachelor's degree.
3. Graduate students are required to have CITI certification

#### **Exercise Physiology - 18 credits**

### Read the following information thoroughly:

1. A master's degree is a minimum of 30 credits.
2. If choosing the thesis option, there could be a maximum of 6 additional credits.
3. Up to 3 credits of Directed Independent Study (PET 6905) may be counted toward this degree.
4. FAU students who applied through the accelerated B.S./M.S. program may count 12 credits for both degrees.
5. Thesis students must adhere to thesis deadlines. See the ESHP graduate coordinator and thesis chair.
6. All students must turn in a graduate application according to the FAU academic calendar.
7. Advanced Exercise Physiology courses are not sequential.

## GEOSCIENCES

### Faculty:

Briggs, T. R., Chair; Berry, L., Emeritus; Comas, X.; Fadiman, M.; Gammack-Clark, J.; Hindle, T.; Ivy, R. L.; Johanson, E.; Liu, W.; Markwith, S.; Oleinik, A.; Petuch, E. J., Emeritus; Polsky, C.; Prokocki, E.; Restrepo, J. I., Emeritus; Roberts, C. E., Emeritus; Xie, Z.; Zhang, C.; Zhang, X.; Zhu, Y.

The Department of Geosciences offers undergraduate degree programs leading to a Bachelor of Arts (B.A.) or a Bachelor of Science (B.S.) with a major in Geosciences. Minors in Geography, Geographic Information Science and Geology are also available as well as two certificate programs in Geographic Information Systems. Descriptions and requirements for all these programs follow.

A grade of "C" or better is required in all courses taken in the department that are part of the minimum degree requirements.

Students who enter FAU as freshmen and major in Geosciences must meet the University's General Education Program requirements as listed in the [Degree Requirements section](#) of this catalog. All Geosciences students seeking the B.A. or B.S. degree must also meet the University's foreign language requirement as listed in the Degree Requirements section.

In the graduate area, Geosciences offers a Master of Science (M.S.) with major in Geosciences. This program offers a thesis and non-thesis option. The department also offers a Doctor of Philosophy (Ph.D.) in Geosciences and two graduate certificates, one in Geographic Information Systems and the other in Remote Sensing. Descriptions of all these programs are provided below.

[Link to Bachelor of Arts in Geosciences](#)

[Link to Bachelor of Science in Geosciences](#)

[Link to Honors Programs](#)

[Link to Minors and Undergraduate Certificates](#)

[Link to Combined B.S./M.S. in Geosciences](#)

## **GEOSCIENCES**

### **BACHELOR OF ARTS (B.A.)**

#### **Geography Concentration**

#### **Geology Concentration**

*(Minimum of 120 credits required)*

The Geosciences core courses below (10 credits) are required of all students for the B.A. in Geosciences. Students then choose between a concentration in either Geography or Geology. The Geography concentration is available in person or fully online. The Geology concentration is available in person only.

#### **Prerequisite Coursework for Transfer Students**

Students transferring to Florida Atlantic University must complete both lower-division requirements (including the requirements of the General Education Program) and requirements for the college and major. Lower-division requirements may be completed through the A.A. degree from any Florida

public college, university or community college or through equivalent coursework at another regionally accredited institution. Before transferring and to ensure timely progress toward the baccalaureate degree, students must also complete the prerequisite courses for their major as outlined in the *Transition Guides*.

All courses not approved by the Florida Statewide Course Numbering System that will be used to satisfy requirements will be evaluated individually on the basis of content and will require a catalog course description and a copy of the syllabus for assessment.

<b>Geosciences Electives Total</b>		<b>18-21</b>

## **GEOSCIENCES**

### **BACHELOR OF SCIENCE (B.S.)**

**Climate Change Concentration**

**Geography Concentration**

**Geology Concentration**

*(Minimum of 120 credits required)*

The Geosciences core courses below (11 credits) are required of all students for the B.S. in Geosciences. Students then choose one of three concentrations: Climate Change, Geography or Geology. The Geography concentration is available in person or fully online. The other concentrations are available in person only.

### **Prerequisite Coursework for Transfer Students**

Students transferring to Florida Atlantic University must complete both lower-division requirements (including the requirements of the General Education Program) and requirements for the college and major. Lower-division requirements may be completed through the A.A. degree from any Florida public college, university or community college or through equivalent coursework at another regionally accredited institution. Before transferring and to ensure timely progress toward the baccalaureate degree, students must also complete the prerequisite courses for their major as outlined in the [Transition Guides](#).

All courses not approved by the Florida Statewide Course Numbering System that will be used to satisfy requirements will be evaluated individually on the basis of content and will require a catalog course description and a copy of the syllabus for assessment.

**Geosciences Core Courses (required of all students)**

Introductory Statistics	STA 2023	3
General Chemistry 1 and Lab	CHM 2045, 2045L	4
Introduction to Mapping and GIS	GIS 3015C	3
Geosciences Honors Colloquium	GEO 4920	1
<b>Core Total</b>		<b>11</b>

**Climate Change Concentration**

In addition to the Geosciences core courses noted above (11 credits), students selecting the Climate Change Concentration are required to complete a Science core (9-11 credits), the Climate Change Concentration core (30 credits), and Geosciences and Interdisciplinary electives (21 credits) as noted below. Total credits for the B.S. in Geosciences with a Climate Change Concentration are 71-73 credits.

**Science Core Courses**

Biological Principles and Lab	BSC 1010/1010L	4 <b>or</b>
Biodiversity and Lab	BSC 1011/1011L	4 <b>or</b>
Life Science and Life Science Lab or RI: Life Science Lab	BSC 1005/1005L	3
The Blue Planet	ESC 2000	3 <b>or</b>
Introduction to Physical Geography	GEO 2200C	3 <b>or</b>
Physical Geology / Evolution of the Earth	GLY 2010C	4
Methods of Calculus	MAC 2233	3
<b>Science Core Total</b>		<b>9-11</b>

**Climate Change Concentration Core Courses**

Environmental Issues in Atmospheric and Earth Science	ESC 3704	3
Climate Change: The Human Dimensions	EVR 1110	3
Climate Change: Myths, Realities and Solutions	EVR 3114	3
Hazards, Climate and People	EVR 4112	3
Quantitative Methods	GEO 4022	3
Remote Sensing of the Environment	GIS 4035C	3
Principles of Geographic Information Systems	GIS 4043C	3
Weather, Climate and Climate Change	MET 2010	3
Atmospheric Hazards	MET 3052	3
Tropical Climatology	MET 3112	3
<b>Core Total</b>		<b>30</b>

### **Geosciences and Interdisciplinary Electives**

*Choose 21 credits from the courses below.*

Conservation Biology	BSC 3052	3
Climate Change Biology: Ecosystems to Human Health	BSC 4307	3
Microeconomic Principles	ECO 2023	3 <del>or</del>
Environmental Economics	ECP 4302	3
Environmental Science and Engineering	ENV 3001C	3
RI: Human-Environmental Interactions in South Florida	GEA 4275	3
Sea-Level Rise: Impacts and Responses	GEO 3342	3

Climate Data Applications	MET 4142	3
<b>Geosciences Electives Total</b>		<b>30-31</b>

### Geology Concentration

In addition to the Geosciences core courses noted above (11 credits), students selecting the Geology

Concentration are required to complete a Science core (15-16 credits), the Geology Concentration core (38 credits), and Geosciences electives (9 credits) as noted below. Total credits for the B.S. in Geosciences with a Geology Concentration are 73-74 credits.

---

### Science Core Courses

General Physics 1	PHY 2048	4
General Physics 1 Lab	PHY 2048L	1
General Physics 2	PHY 2049	4 <del>or</del>
Calculus with Analytic Geometry 1	MAC 2311	4
Calculus with Analytic Geometry 2	MAC 2312	4
<b>Science Core Total</b>		<b>17</b>

---

### Geology Concentration Core Course

Physical Geology/Evolution of the Earth	GLY 2010C	4
History of the Earth and Life	GLY 2100	3
Mineralogy and Petrology	GLY 4310C	4
Structural Geology	GLY 4400C	4
Solid Earth Geophysics	GLY 4451	3
Stratigraphy and Sedimentation	GLY 4500C	4
Geology Field Methods	GLY 4750C	3
Field Camp	GLY 4790	6
Hydrogeology	GLY 4822	3
<b>Core Total</b>		<b>34</b>

---

### Geosciences Electives

*Choose four courses from the list below, only one of which may have a GIS prefix.*

Introduction to Coastal Freshwater Resources	EVR 4453	3
Geology of Florida	GLY 4155C	4
Paleontology	GLY 3603C	3
Coastal and Marine Science	GLY 3730	3
Remote Sensing of the Environment	GIS 4035C	3
Principles of GIS	GIS 4043C	3
Environmental Geochemistry	GLY 4241	3
Geomorphology	GLY 4700C	3
Groundwater Numerical Modeling	GLY 4832C	3
<b>Geosciences Electives Total</b>		<b>12-13</b>

## HONORS PROGRAMS

### HONORS PROGRAM IN GEOGRAPHY

Qualified students may apply to participate in the upper-division Honors Program in the Geography concentration for both the B.A. and B.S. degrees. The Honors Program recognizes research accomplishments of talented undergraduates. Students normally begin the program in their sophomore or junior year and conduct independent research with mentor supervision during their junior and senior years.

To enter the program, students must have:

1. A minimum of 9 credits in geography courses with GEA, GEO, GIS, EVR, ESC prefixes;
2. A cumulative GPA of at least 3.3, and must maintain a 3.3 to remain in the program;
3. The support of a faculty mentor. Interested students should contact the faculty member whose research interests are closest to those the student wishes to pursue.

To be awarded the Honors undergraduate degree, students must:

1. Complete all requirements for the B.A. or B.S. Geosciences, Geography concentration;
2. Complete 6 credits of: GEO 4920, Geosciences Honors Colloquium (1 credit, repeated twice); GEO 4948C, Field Experience (1 credit); GEO 4915, 4916, Directed Independent Research in Geosciences (3 credits);
3. Meet the capstone requirement, which entails presenting research findings from the Field Experience and the Directed Independent Research in Geosciences in both a written thesis format as well as an oral presentation at the Geosciences Colloquium Series or an appropriate academic conference, including FAU undergraduate research symposium, approved by both the faculty mentor and the department chair;
4. Complete an [honors compact](#) with their faculty mentor, which is an agreement that the projects will be conducted at the honors level.

In the Honors Colloquium course, students are exposed to talks from prominent researchers and professionals in the various subfields of the geosciences, introducing them to current important research themes in the geosciences, as well as reinforcing the scientific method and appropriate methodologies for problem solving in the geosciences. Speakers change every semester. Students enroll in the Field Experience course while doing the field work, lab work and/or data collection for their research project and in the Directed Independent Research in Geosciences course while working in the analysis and write-up phases of their research.

## **HONORS PROGRAM IN GEOLOGY**

Qualified students may apply to participate in the upper-division Honors Program in **the** Geology concentration for both the B.A. and B.S. degrees. The Honors Program recognizes research accomplishments of talented undergraduates. Students normally begin the program in their sophomore or junior year and conduct independent research with mentor supervision during their junior and senior years.

To enter the program, students must:

1. Have a minimum of 9 credits in geology courses with GLY prefix;
2. Have completed the Geology core courses and a cumulative GPA of at least 3.3, which must be maintained to remain in the program. The GPA will be monitored throughout student's study in the Honors Program;
3. Formally apply for the Honors Program with a letter addressed to the honors committee. The application and overall GPA will be assessed by an appointed faculty committee;

4. Have the support of a faculty mentor. Interested students should contact the faculty member whose research interests are closest to those the student wishes to pursue;
5. Complete an [honors contract](#) with their faculty mentor, which is a joint commitment between the student and mentor that the projects will be conducted at the honors level.

To be awarded the Honors in Geology designation, students must:

1. Complete all requirements for the B.A. or B.S. in Geosciences, Geology concentration;
2. Complete 2 credits of GEO 4920, Geosciences Honors Colloquium (1 credit, repeated twice), which is an honors-specific course;

In the Honors Colloquium course, students are exposed to talks from prominent researchers and professionals in the various subfields of the geosciences, introducing them to current important research themes in the geosciences, as well as reinforcing the scientific method and appropriate methodologies for problem solving in the geosciences. Speakers change every semester.

3. Complete 4 credits selected from GEO 4948C, Field Experience (1-4 credit total) and GLY 4915, 4916, Directed Independent Research in Geosciences (1-4 credits total);

Students should consult with their faculty mentor to determine whether they should enroll in Field Experience or Directed Independent Research in Geosciences credits for the preliminary portions of their research projects (data collection, model development, method development, etc.). While working in the analysis and write-up portions of their research projects, students should enroll in Directed Independent Research in Geosciences credits.

4. Meet the capstone requirement, which entails presenting research findings from the independent research in both a written thesis format, as well as an oral presentation at the Geosciences Colloquium Series or an appropriate academic conference, including FAU undergraduate research symposium, approved by both the faculty mentor and the department chair.

## HONORS PROGRAM IN CLIMATE CHANGE

Qualified students may apply to participate in the upper-division Honors Program in the B.S. Geosciences, Climate Change concentration. The Honors Program recognizes research accomplishments of talented undergraduates. Students normally begin the program in their sophomore or junior year and conduct independent research with mentor supervision during their junior and senior years.

To enter the program, students must have:

1. A minimum of 9 credits in geoscience courses with EVR, ESC, GEA, GEO, GIS, GLY, MET prefixes;
2. A cumulative GPA of at least 3.0, and must maintain a 3.3 to remain in the program;
3. The support of a faculty member. Interested students should contact the faculty member whose research interests are closest to those the student wishes to pursue.

To be awarded the Honors undergraduate degree, students must:

1. Complete all requirements for the B.S. Geosciences, Climate Change concentration;
2. Complete 6 credits of: GEO 4920, Geosciences Honors Colloquium (1 credit, repeated twice); GEO 4948C, Field Experience (1 credit); GEO 4915, 4916, Directed Independent Research in Geosciences (3 credits);
3. Meet the capstone requirement, which entails presenting research findings from the Field Experience and the Directed Independent Research in Geosciences in both a written thesis format as well as an oral presentation at the Geosciences Colloquium Series or an appropriate academic conference, including FAU undergraduate research symposium, approved by both the faculty mentor and the department chair;
4. Complete an [honors compact](#) with their faculty mentor, which is an agreement that the projects will be conducted at the honors level.

In the Honors Colloquium course, students are exposed to talks from prominent researchers and professionals in the various subfields of the geosciences, introducing them to current important research themes in the geosciences, as well as reinforcing the scientific method and appropriate methodologies for problem solving in the geosciences. Speakers change every semester. Students enroll in the Field Experience course while doing the field work, lab work and/or data collection for their research project and in the Directed Independent Research in Geosciences course while working in the analysis and write-up phases of their research.

## **GEOGRAPHY**

### **UNDERGRADUATE MINOR**

*(Minimum of 15 credits required)*

Students minoring in Geography will earn a "C" or better in a minimum of 15 credits. Note: Courses used to fulfill requirements for a major may not be used for the minor. Requirements include:

1. GIS 3015C and 12 additional credits in geography beyond the minimum requirements for the major;
2. Within the 12 credits, a minimum of 6 credits with a GEA or GEO prefix at the 4000 level;
3. The remaining 6 credits from all department course listings with ESC, EVR, MET, GEA or GEO prefixes.
4. Of the 15 credits, a minimum of 12 earned at FAU.

## GEOGRAPHIC INFORMATION SCIENCE

### UNDERGRADUATE MINOR

*(Minimum of 15 credits required)*

Students minoring in Geographic Information Science will complete a minimum of 15 credits with a grade of "C" or better in each course. Of the 15 credits, a minimum of 12 must be earned at FAU.

Note: Courses used to fulfill requirements for a major may not be used for the minor. Required courses are:

---

#### Required Courses

Introduction to Mapping and GIS	GIS 3015C	3
---------------------------------	-----------	---

Principles of GIS	GIS 4043C	3
-------------------	-----------	---

---

#### *Choose 9 credits from the list below:*

Spatial Data Analysis	GIS 4115C	3
-----------------------	-----------	---

Photogrammetry and Aerial Photograph Interpretation	GIS 4021C	3
---	-----------	---

Remote Sensing of the Environment	GIS 4035C	3
-----------------------------------	-----------	---

Digital Image Analysis	GIS 4037C	3
------------------------	-----------	---

Applications in GIS	GIS 4048C	3
---------------------	-----------	---

Web GIS	GIS 4054C	3
---------	-----------	---

Programming in GIS	GIS 4102C	3
--------------------	-----------	---

Geovisualization and GIS	GIS 4138C	3
--------------------------	-----------	---

---

## **GEOLOGY**

### UNDERGRADUATE MINOR

*(Minimum of 15 credits required)*

Students minoring in Geology will earn a "C" or better in a minimum of 15 credits. **Note:** Courses used to fulfill requirements for a major may not be used for the minor. Requirements include:

1. GLY 2010C and 12 additional credits in geology beyond the minimum requirements for the major;
2. Within the 12 credits, a minimum of 6 credits with a GLY prefix at the 4000 level;
3. The remaining 6 credits from all department course offerings with ESC, EVR or GLY prefixes.
4. Of the 15 credits, a minimum of 12 earned at FAU.

## **GEOGRAPHIC INFORMATION SYSTEMS**

### UNDERGRADUATE CERTIFICATE

*(Minimum of 12 credits required)*

The Department of Geosciences offers undergraduates a certificate in Geographic Information Systems. Departmental majors or other students who complete the four required courses (12 credits) below with a grade of "C" or better in each course are entitled to the GIS certificate. Students should consult their departmental advisor or another faculty member about registration for this program. Students may use these courses in the completion of a major. The certificate is available in person or fully online.

---

#### **Required Courses**

Introduction to Mapping and GIS	GIS 3015C	3
Principles of Geographic Information Systems	GIS 4043C	3
Remote Sensing of the Environment	GIS 4035C	3

#### ***Choose one of the following elective courses***

Digital Image Analysis	GIS 4037C	3
------------------------	-----------	---

---

Applications of GIS	GIS 4048C	3
Web GIS	GIS 4054C	3
Geospatial Databases	GIS 4118	3
Geovisualization and GIS	GIS 4138C	3
Mobile GIS and Drone Technology	GIS 4140C	3

## **ADVANCED GEOGRAPHIC INFORMATION SYSTEMS UNDERGRADUATE CERTIFICATE**

*(Minimum of 9 credits required)*

The Department of Geosciences offers an advanced certificate in Geographic Information Systems that permits students to develop an in-depth understanding of programming and spatial data analysis beyond the basic GIS certificate. Two required courses and one additional course in an applied area of geographic information science complete the advanced GIS certificate. The certificate is available in person or fully online.

### **Required Courses**

Programming in GIS	GIS 4102C	3
Spatial Data Analysis	GIS 4115C	3

### ***Choose one of the following applied courses***

Applications of GIS	GIS 4048C	3
Web GIS	GIS 4054C	3
Geospatial Databases	GIS 4118	3
Geovisualization and GIS	GIS 4138C	3
Photogrammetry and Aerial Photograph Interpretation	GIS 4021C*	3
Mobile GIS and Drone Technology	GIS 4140C	3
Introduction to Laser Mapping Technology	CCE 4514C	3

\*SUR 4331C - Digital Photogrammetry Principles and Applications is an approved substitute for Geomatics Engineering students.

## COMBINED PROGRAM

### GEOSCIENCES

### BACHELOR OF SCIENCE (B.S.) TO MASTER OF SCIENCE (M.S.) COMBINED PROGRAM

*(Minimum of 154 credits required)*

This accelerated, five-year program leads to both a Bachelor of Science (B.S.) in Geosciences with Geography Concentration and a Master of Science with a focus on Human Environment and Sustainable Science or Geographic Information Science. Students apply to the B.S./M.S. program in the second semester of their junior year and begin taking graduate courses in their senior year that would apply to both the B.S. and M.S. degrees. The combined program is 154 credits, 120 for the undergraduate degree and 34 for the master's degree. Students complete the undergraduate degree first, taking no more than 12 credits of graduate coursework in their senior year, which will then be used to satisfy both degrees. Students must maintain a GPA of 3.0 in upper-division and graduate courses. Due to the accelerated nature of the program, students should take the GRE by the end of the first semester in their junior year.

#### **Prerequisite Coursework for Transfer Students**

Students transferring to Florida Atlantic University must complete both lower-division requirements (including the requirements of the General Education Program) and requirements for the college and major. Lower-division requirements may be completed through the A.A. degree from any Florida public college, university or community college or through equivalent coursework at another regionally accredited institution. Before transferring and to ensure timely progress toward the baccalaureate degree, students must also complete the prerequisite courses for their major as outlined in the [Transition Guides](#).

All courses not approved by the Florida Statewide Course Numbering System that will be used to satisfy requirements will be evaluated individually on the basis of content and will require a catalog course description and a copy of the syllabus for assessment.

## Requirements and Eligibility

In addition to the University and Charles E. Schmidt College of Science requirements, students seeking a combined degree in Geosciences with Geography Concentration must complete the following courses. The Geosciences core courses (11 credits) are required for all students in the Bachelor of Science program in Geosciences. Students selecting the Geography Concentration then complete a Science core (7 credits), the Geography Concentration core (24 credits) and Geosciences electives (30-31 credits) as noted below.

The graduate courses that would apply to both the B.S. and M.S. degrees must be 5000 level or higher. Some courses, denoted with asterisks, have a 5000--level version that can be counted toward the graduate degree.

### Geosciences Core Courses (required of all students)

Introductory Statistics	STA 2023	3
General Chemistry 1 and Lab	CHM 2045, 2045L	4
Introduction to Mapping and GIS	GIS 3015C	3
Geosciences Honors Colloquium	GEO 4920	1
<b>Core Total</b>		<b>11</b>

### Science Core Courses

Biological Principles and Lab	BSC 1010, 1010L	4 <b>or</b>
Biodiversity and Lab	BSC 1011, 1011L	4
Methods of Calculus	MAC 2233	3
<b>Core Total</b>		<b>7</b>

### Geography Concentration Core Courses

World Geography	GEA 2000	3
RI: Human-Environmental Interactions in South Florida	GEA 4275	3

Introduction to Physical Geography	GEO 2200C	3
Quantitative Methods	GEO 4022	3
Biogeography*	GEO 4300	3
Remote Sensing of the Environment*	GIS 4035C	3
Principles of Geographic Information Systems*	GIS 4043C	3
Weather, Climate and Climate Change	MET 2010	3
<b>Core Total</b>		<b>24</b>

### Geosciences Electives

*Choose 30-31 credits from the courses below.*

The Blue Planet	ESC 2000	3
Physical Geology/Evolution of the Earth	GLY 2010C	4
History of the Earth and Life	GLY 2100	3
Climate Change: Myths, Realities and Solutions	EVR 3114	3
Environmental Issues in Atmospheric and Earth Science	ESC 3704	3
Coastal and Marine Science	GLY 3730	3
Applications in GIS*	GIS 4048C	3
Photogrammetry and Aerial Photograph Interpretation	GIS 4021C	3
Digital Image Analysis*	GIS 4037C	3
Web GIS	GIS 4054C	3
Programming in GIS*	GIS 4102C	3
Hazards, Climate and People	EVR 4112	3
Geospatial Databases	GIS 4118	3

Geovisualization and GIS*	GIS 4138C	3
Mobile GIS and Drone Technology*	GIS 4140C	3
Spatial Data Analysis (	GIS 4115C	3
Water Resources	GEO 4280C	3
Tourism and Commercial Recreation	GEO 4542	3
Urban Geography	GEO 4602	3
Transportation and Spatial Organization	GEO 4700	3
Geomorphology	GLY 4700C	3
Hydrogeology	GLY 4822	3
<b>Geosciences Electives Total</b>		<b>30-31</b>

### **Additional Graduate-Level Courses for the Master's Degree**

*Up to 12 credits can be taken as a senior. All courses must be at the 5000 or 6000 level.*

Human-Environmental Interactions	GEA 6277	3
Research in the Geosciences	GEO 6118	3
Geosciences Colloquium Series	GEO 6920	1

### ***Geosciences Focus - 12 credits***

*Choose 12 credits from one of the following areas of focus.*

<b>Focus</b>	<b>Focus Courses</b>
Geographic Information Science	course prefix GIS
Human Environment and Sustainable Science	course prefixes EVR, GEA or GEO

### **Electives - 15 credits**

*Choose five courses (total of 15 credits) from the following course prefixes: EVR, GEA, GEO, GIS, GLY and no more than 3 credits of independent study (GEO 6908 or GLY 6908). Students may*

*choose up to 6 credits from cognate areas (any 5000 or 6000 level course within the College of Science) approved by their advisors.*

## MASTER'S PROGRAM

[Link to Graduate Geographic Information Systems Certificate](#)

[Link to Graduate Remote Sensing Certificate](#)

[Link to Doctoral Program in Geosciences](#)

## GEOSCIENCES

### MASTER OF SCIENCE (M.S.)

The department offers a thesis (31 credits) and non-thesis option (34 credits) for the Master of Science (M.S.) in Geosciences. The requirements for both options are outlined below. Students must choose between the thesis and non-thesis options and a focus area by the end of their second semester of study when the plan of study is filed. The non-thesis option with the Geosciences focus is available in person or fully online. All other options and areas of focus are available in person only.

Thesis students are required to form a committee (advisor and two additional committee members) during the second semester of study. Students who do not have a thesis committee formed by the end of the second semester are automatically transferred to the non-thesis option.

### Admission Requirements

In addition to meeting the University and College admission requirements for graduate study, applicants for the master's degree in the Department of Geosciences must meet the following requirements:

1. Hold a bachelor's degree in an appropriate discipline from an accredited college or university;
2. Have earned a minimum grade point average of 3.0 (on a 4.0 scale) in the last 60 credits of undergraduate work attempted;
3. A minimum of one letter of recommendation from a reference familiar with the applicant's recent academic and/or professional experiences;
4. Applicants applying to the thesis option must provide a written letter of support from a Geosciences faculty member with graduate faculty status at FAU or an approved cognate faculty

member with graduate faculty status at FAU indicating a willingness to supervise the applicant's thesis research;

- International students whose native language is not English must score at least 550 on the paper-based TOEFL, at least 61 on the computer-based test or an IELTS band score of at least 6.0.

## General Degree Requirements

- Students must maintain a GPA of 3.0 or higher throughout their graduate program. Failure to do so will subject the student to dismissal from the program.
- Students must achieve a grade of at least "C+" in order for a course to be counted as part of the minimum credits toward the degree.

## Course Requirements

All courses must be taken at the 5000 level or higher. No more than 3 credits of directed independent study (such as GEO 6908 or GLY 6908) may be used to fulfill the minimum credits for either degree option. A minimum of 24 credits should be taken from the Geosciences curriculum.

---

### Thesis Option - 31 credits

---

#### *Core Courses - 7 credits*

---

Research in the Geosciences	GEO 6118
-----------------------------	----------

---

Thesis Seminar	GLY 6931
----------------	----------

---

Geosciences Colloquium Series	GEO 6920
-------------------------------	----------

---

#### *Geosciences Focus - 12 credits*

---

*Choose 12 credits from one of the following areas of focus:*

---

#### *Geology: course prefix GLY*

---

Human Environment and Sustainable Science: course prefixes EVR, GEA or GEO

---

Geographic Information Science: course prefix GIS

---

#### *Thesis - 6 credits*

---

Complete a minimum of 6 credits from one of the following two options

---

Master's Thesis (may be taken over multiple terms)	GEO 6971
--	----------

---

Master's Thesis (may be taken over multiple terms)

GLY 6971

***Electives - 6 credits***

***Choose two courses (total of 6 credits) at the 5000 or 6000 level from the following course prefixes: EVR, GEA, GEO, GLY, GIS and no more than 3 credits of independent study (GEO 6908 or GLY 6908). May choose up to 6 credits from cognate areas approved by the student's advisor. Any 5000 or 6000 level course within the College of Science or any 5000 or 6000 level course with the prefix of URP.***

**Non-Thesis Option - 34 credits*****Core Courses - 7 credits***

Human-Environmental Interactions

GEA 6277

Research in the Geosciences

GEO 6118

Geosciences Colloquium Series

GEO 6920

***Geosciences Focus - 12 credits***

***Choose 12 credits from one of the following areas of focus.***

***Geology: course prefix GLY***

Human Environment and Sustainable Science: course prefixes EVR, GEA or GEO

Geographic Information Science: course prefix GIS

***Electives - 15 credits***

***Choose five courses (total of 15 credits) at the 5000 or 6000 level from the following course prefixes: EVR, GEA, GEO, GLY, GIS and no more than 3 credits of independent study (GEO 6908 or GLY 6908). May choose up to 6 credits from cognate areas approved by the student's advisor. Any 5000 or 6000 level course within the College of Science or any 5000 or 6000 level course with the prefix of URP.***

**Other Requirements**

Students enrolled in the thesis option must defend their thesis proposal successfully no later than the beginning of the third semester for full-time students or the beginning of the fourth semester for part-time students.

## GEOGRAPHIC INFORMATION SYSTEMS

### GRADUATE CERTIFICATE

*(Minimum of 15 credits required)*

The Geographic Information Systems (GIS) certificate for graduate students is offered jointly by the Department of Geosciences and the Department of Urban and Regional Planning in the Charles E. Schmidt College Science. Graduate students who complete the program below with a grade of "B" or better in each course are entitled to receive the certificate. Students should consult with the director of the GIS Center or their graduate advisor about registration for this program. Students shall use the courses below to complete the certificate. The certificate is available in person or fully online.

---

#### **Required Courses - 9 credits**

Principles of Geographic Information Systems*	GIS 5051C	3
---	-----------	---

**OR**

Introduction to GIS in Planning	URP 6270	3
---------------------------------	----------	---

**AND**

Applications in Geographic Information Systems	GIS 5100C	3
--	-----------	---

Spatial Data Analysis	GIS 6306	3
-----------------------	----------	---

---

#### **Choose two of the following courses (6 credits)**

Programming in Geographic Information Systems	GIS 5103C	3
---	-----------	---

Web GIS	GIS 6061C	3
---------	-----------	---

Geospatial Databases	GIS 6112C	3
----------------------	-----------	---

Environmental Analysis in Planning	URP 6425	3
------------------------------------	----------	---

Managing GIS Projects	URP 6272	3
-----------------------	----------	---

\* If the undergraduate version of this course was already counted for the undergraduate GIS certificate, this graduate version cannot be counted toward the graduate GIS certificate.

## REMOTE SENSING GRADUATE CERTIFICATE

*(Minimum of 12 credits required)*

The Department of Geosciences offers graduate students a certificate in Remote Sensing. Graduate students who complete the required courses with a grade of "B" or better in each course will earn the certificate program. Students should consult with the director of the GIS Center or their graduate advisor about registration for this program. Students shall use the courses below to complete the certificate. The certificate is available in person or fully online.

---

### Choose four of the following courses.

Remote Sensing of the Environment*	GIS 5038C	3
Digital Image Analysis*	GIS 5033C	3
Hyperspectral Remote Sensing	GIS 6127	3
LiDAR Remote Sensing and Applications	GIS 6032C	3
Photogrammetry and Aerial Photograph Interpretation	GIS 6028C	3

## DOCTORAL PROGRAM

### GEOSCIENCES DOCTOR OF PHILOSOPHY (PH.D.)

The Department of Geosciences at Florida Atlantic University offers advanced graduate training leading to the degree of Doctor of Philosophy (Ph.D.) in Geosciences. This professionally oriented program combines department specialties in geography and geology with other cognate areas in the College and the University through an innovative curriculum that includes ecology and conservation biology, chemistry, anthropology, civil engineering, ocean engineering and urban and regional planning. The program provides advanced research and technical training to allow its graduates to find solutions to problems. While the main focus of the degree is on traditional, full-time students, the degree program also welcomes part-time students who wish to maintain their professional employment while earning their doctoral degree.

## Admission Requirements

Individuals will be admitted to the doctoral program in Geosciences based on the following requirements:

1. Minimum of a bachelor's degree in a field of geosciences or related area. Students who have already earned a master's degree or equivalent in geography, geology or related field may be admitted to the doctoral program and may be awarded up to 30 credits toward the Ph.D. in Geosciences. Geosciences-related areas include anthropology, biology, chemistry, civil engineering, environmental science, public administration and urban and regional planning.
2. International students whose native language is not English must score at least 550 on the paper-based TOEFL or at least 79-80 on the computer-based test or a score of 6 or higher on the IELTS.
3. A minimum of three letters of recommendation from references familiar with the applicant's recent academic and/or professional experiences.
4. A written letter of support from a Geosciences faculty member with graduate faculty status at FAU or an approved cognate faculty member with graduate faculty status at FAU indicating a willingness to supervise the applicant's doctoral research.

## Degree Requirements

A total of 90 credits beyond the bachelor's degree or 60 credits beyond an earned master's degree in a related field (as defined under Admission Requirements), admission to candidacy and successful defense of a research dissertation in an approved area within the geosciences will earn students the Ph.D. in Geosciences. Students must maintain a cumulative GPA of 3.0 or higher and a grade of "B" or higher in any course applied to the degree program.

A minimum of 54 credits out of the 90 credits presented for the degree must be earned from the Geosciences Department (courses with EVR, ESC, GEA, GEO, GIS and GLY prefixes). Therefore, no more than 36 credits for those admitted with a bachelor's degree or 6 credits for those entering with a master's degree may come from outside the Geosciences Department.

All students are required to complete a core of 9 credits in the Geosciences as listed below. All must be completed prior to applying for candidacy.

---

### Geosciences Core - 9 credits required

---

Research in the Geosciences	GEO 6118	3
Thesis Seminar	GLY 6931	3
Geosciences Colloquium Series*	GEO 6920	3

\* This is a 1-credit course with content that varies each semester. Students are required to take this course for three semesters for a total of 3 credits. Students may not apply for candidacy until all colloquium requirements have been completed.

### **Additional Courses**

For students entering directly from a bachelor's degree program, 57 additional course credits are required. For students entering with a master's degree in geography, geology or a related field, 27 additional course credits are required. All coursework must be at the 5000 or 6000 level in geography, geology and interdisciplinary cognates as appropriate to the student's research plan. These courses must be approved by the student's dissertation advisor and the director of the Ph.D. program. No more than 18 credits beyond the bachelor's degree and 9 credits beyond the master's degree of 5000-level work may be applied to the degree without approval from the student's dissertation advisor and the director of the Ph.D. program.

No more than 3 credits of Directed Independent Study (GEO 6908 or GLY 6908) may be used to meet course requirements without approval from the student's dissertation advisor and the director of the Ph.D. program.

No more than 15 credits beyond the bachelor's degree and 9 credits beyond the master's degree of GEO 6918, Graduate Research, may be used to meet the course requirement without approval from the student's dissertation advisor and the director of the Ph.D. program.

**Note:** Courses designated as undergraduate deficiency courses, generally for students coming into the program with a non-related undergraduate degree, may not be used to satisfy course requirements for the degree. Undergraduate deficiency courses will be outlined in the admissions notification.

### **Admission to Candidacy**

1. Formation of a dissertation committee. This committee includes a minimum of the advisor plus three other members. All members must have graduate faculty status in the FAU Graduate College. The majority of the committee members must be from the FAU Geosciences Department. The remaining committee members may include affiliate graduate faculty from another department at FAU, another university or doctoral holding professionals with expertise pertinent to the research program designed. Affiliate graduate faculty members may not serve as the sole committee chair but may co-chair a committee with a FAU Geosciences graduate faculty member.
2. Satisfactory completion of written and oral examinations covering graduate-level material in the

field of geosciences. The material for the exams will be determined by the student's committee as appropriate to the student's research plan. The exam should be taken during the academic term immediately following the completion of the coursework outlined in section 1 of the degree requirements. Two attempts at the examinations are permitted. A second failure on the qualifying exams will result in dismissal from the program. Full-time students should become candidates by the end of their fifth semester in the program. Part-time students should become candidates by the end of semester seven.

3. Submission, public presentation and successful defense of an original research proposal.

## Doctoral Research

1. Dissertation research must be conducted under the direction of a graduate faculty member in the Geosciences Department serving as chair or co-chair of the student's dissertation committee. While conducting the doctoral research, a minimum of 24 credits must be included comprised of any combination of credits from GEO 7978, Advanced Research, and GEO 7980, Dissertation, including at least 6 credits of GEO 7980. A student may not enroll in GEO 7978, Advanced Research credits, until the semester the student plans to take the candidacy exams and may not enroll in GEO 7980, Dissertation credits, until the student has reached candidacy.
2. Written submission, public presentation and defense of a satisfactory research dissertation. The defense will include an oral examination of the research presented by the student's dissertation committee.

## MATHEMATICS AND STATISTICS

### Faculty:

Wang, Y., Chair; Abraha, Y.; Bai, S.; Bhattacharjee, P.; Booton, B. O.; Chang, L-C.; Drees, K.; Edwards, P. B.; Escuder, A. T.; Ford, T. J.; Greenberg, A.; Hahn, W.; Hoffman, F.; Ito, K.; Kalies, W. D.; Klingler, L. C., Emeritus; Kuchta, V.; Li, Y.; Lin, Y.; Locke, S. C.; Long, H.; Lubarsky, R.; Lundberg, E.; Magliveras, S. S., Emeritus; Meyerowitz, A. D.; Milman, M. M., Emeritus; Mireles-James, J.; Moosai, S.; Motta, F.; Mullin, R. C., Emeritus; Murray, M.; Naudot, V.; Nawarathna, R. H. H.; Niederhausen, H., Emeritus; Nikolova, D. B.; Peitgen, H. O., Emeritus; Persichetti, E.; Pina, P. A.; Radulovic, A. B. S.; Radulovic, D.; Richman, F., Emeritus; Rosen, Z.; Sagher, Y.; Schmidmeier, M.; Schonbek, T. P.; Schroeck, F. E., Emeritus; Sica, F.; Stadnik, M.; Tuncer, N.; Voss, R.; Winkowska-Nowak, K.; Yin, Z.; Yiu, P., Emeritus; Zhang, X. D.

The Department of Mathematics and Statistics offers undergraduate programs leading to the Bachelor

of Arts (B.A.) degree and to the Bachelor of Science (B.S.) degree. Either of these two programs, with suitably chosen electives, constitutes an excellent background for a wide range of careers, in particular as a systems analyst, mathematics teacher, actuary and statistician. Students interested in advanced or professional degrees, for example in the medical sciences, benefit from rigorous training in mathematics. Furthermore, the Bachelor of Science degree program is designed to prepare students for graduate work in mathematics and related areas. Two certificate programs, one in Statistics and one in Actuarial Science, are also available for undergraduates, as well as an Honors Program in Mathematics and two minors, one in Mathematics and one in Statistics.

The department offers an accelerated five-year program leading to both the Bachelor of Science (B.S.) and Master of Science (M.S.) degrees. Students in this combined program take graduate credits in their senior year that count toward both degrees. An additional combined programs is offered in conjunction with the Wilkes Honors College.

A [Data Science certificate](#) program, designed jointly by the departments of Electrical Engineering and Computer Science and Mathematics and Statistics, provides an in-depth study of the methods to manage, analyze and extract knowledge from data.

For graduate students, the Department of Mathematics and Statistics offers programs leading to the Master of Science (M.S.), Master of Science in Teaching (M.S.T.) and Doctor of Philosophy (Ph.D.) degrees.

Outstanding scholarship in the mathematics program is recognized by membership in the Florida Zeta Chapter of Pi Mu Epsilon, the national mathematics honorary society for university students, and by the annual Pi Mu Epsilon award at the Honors Convocation. Students in the Department of Mathematics and Statistics have performed well on the William Lowell Putnam Mathematical Examination, the annual North American mathematical competition for undergraduates.

The Department of Mathematics and Statistics works in close cooperation with the Career Planning and Placement Office and the Cooperative Education Office in counseling and assisting mathematics students seeking permanent, part-time or vacation employment.

Students are strongly urged to meet with an advisor so that their programs can be tailored to individual needs and interests. Students in the major programs in mathematics are required to consult with a faculty advisor each year.

## BACCALAUREATE DEGREE REQUIREMENTS

*(Minimum of 120 credits required)*

In addition to the University and Charles E. Schmidt College of Science requirements, students seeking a Bachelor of Arts or a Bachelor of Science degree in Mathematics must satisfy the following requirements.

### **Prerequisite Coursework for Transfer Students**

Students transferring to Florida Atlantic University must complete both lower-division requirements (including the requirements of the General Education Program) and requirements for the college and major. Lower-division requirements may be completed through the A.A. degree from any Florida public college, university or community college or through equivalent coursework at another regionally accredited institution. Before transferring and to ensure timely progress toward the baccalaureate degree, students must also complete the prerequisite courses for their major as outlined in the [Transition Guides](#) .

All courses not approved by the Florida Statewide Course Numbering System that will be used to satisfy requirements will be evaluated individually on the basis of content and will require a catalog course description and a copy of the syllabus for assessment.

### **Required Minimum GPA 2.5**

#### **Notes:**

1. Upper-division mathematics electives: These electives must be chosen from courses offered by the Department of Mathematics and Statistics and numbered 3000 or higher. The following

courses may not be used as upper-division mathematics electives: STA 3163, ~~STA 3173~~, STA 3949, MAT 3949, MAP 4945, or STA 4821.

2. In calculation of the departmental GPA, where relevant, the highest grade in the course will be used.
3. Because of overlap in course content, Mathematics majors may receive credit for at most one course in each of the following pairs: (MAP 2302, MAP 3305), (MAP 4303, ~~MAP 4306~~ [**Discontinued summer 2024.**]), (STA 4443, STA 4032).
4. The upper-division mathematics courses required for these programs that are completed at FAU must be completed with at least a 2.2 GPA (B.A. program) or 2.5 GPA (B.S. program).
5. Any mathematics course taken at another institution must be completed with a grade of at least "C" "C-" to be considered part of either baccalaureate program.
6. Mathematics majors are required to consult with their advisors at least once a year.

## **DATA SCIENCE AND ANALYTICS** **BACHELOR OF SCIENCE (B.S.)**

### **Data Science in the Natural Sciences Concentration**

### **Data Science and Engineering Concentration**

### **Data Science in Business Concentration**

The Bachelor of Science with Major in Data Science and Analytics (BSDSA) program is a multi-college, interdisciplinary program administered jointly by the Department of Mathematics and Statistics in the Charles E. Schmidt College of Science, the Department of Electrical Engineering and Computer Science in the College of Engineering and Computer Science, the Department of Information Technology and Operations Management (ITOM) in the College of Business, the Department of Political Science in the Dorothy F. Schmidt College of Arts and Letters and the School of Criminology and Criminal Justice in the College of Social Work and Criminal Justice. For details about this program, see the [Interdisciplinary Programs](#) section of this catalog.

## **HONORS PROGRAM IN MATHEMATICS**

Qualified students are invited to participate in the undergraduate Mathematics Honors Program. This program encourages students to participate in mathematics more deeply while increasing student participation in research and inquiry.

### **Entry Requirements**

The following requirements must be met before applying to the Honors Program in Mathematics:

1. Written support from a faculty member willing to serve as a mentor for the capstone experience.
2. Written commitment from at least one additional faculty member willing to review the capstone experience.
3. Completion of Calculus, 1, 2 and 3 and at least 12 additional credits in mathematics at the 2000 level or higher with at least half of these credits taken at FAU.
4. A GPA of at least a 3.3 in mathematics courses at FAU at the 2000 level or higher and an overall FAU GPA of 3.3.

Students should complete the application form and submit it to the honors coordinator. The department honors committee will decide on acceptance into the program.

### **Standards to Maintain Status**

A student must maintain a 3.3 GPA in mathematics courses at FAU at the 2000 level or higher and an FAU overall GPA of 3.3 while in the Honors Program in Mathematics. If a student in the program subsequently drops below a 3.3 GPA, the honors coordinator will inform the student that the honors designation will not be received unless the student's GPA is 3.3 or greater at the time of graduation. Students must adhere to the FAU Code of Academic Integrity, which may be found [here](#).

### **Honors-Level Enrichment**

Complete at least two of the following activities, which may be repeated:

1. Complete a graduate course in mathematics at FAU at the 5000 level or higher (MST and DIS courses are excluded) with a grade of "B+" or higher.
2. Complete an honors course or a course with an honors compact in mathematics at FAU at the 3000 level or 4000 level (DIS courses are excluded) with a grade of "B+" or higher.
3. Submit a mathematics paper to a student journal (or research journal) or the FAU Undergraduate Research Journal. Submission must be pre-approved by the faculty mentor.
4. Submit a solution to a mathematics problem posed in a student journal. Submission must be pre-approved by the faculty mentor.
5. Give an hour presentation at the Mathematics and Statistics Colloquium or the Math Club explaining a research article that the student has read or an original result the student has obtained.
6. Give a presentation or poster in mathematics at a conference or the FAU Undergraduate Research Symposium.
7. Pass one actuarial exam.

## Capstone Requirement

Complete one of the following capstone experiences:

1. Write an honors thesis and achieve a grade of "B+" or better in MAT 4970, Honor Thesis in Mathematics. At least one published research article must be read and related published papers must be appropriately referenced in the thesis. The thesis must be reviewed and accepted by the faculty mentor and reviewer(s). The student must give a presentation, separate from item 5 above, at the Mathematics and Statistics Colloquium or the Math Club explaining the thesis.
2. Complete a semester-long internship and write a report, which must be reviewed and accepted by the faculty mentor and reviewer(s). The student must give a presentation at the Mathematics and Statistics Colloquium or the Math Club describing the internship activities.
3. Complete a Research Experience for Undergraduates program and write a report, which must be reviewed and accepted by the faculty mentor and reviewer(s). The student must give a presentation, separate from item 5 above, at the Mathematics and Statistics Colloquium or the Math Club explaining the program activities and results.

Honors theses and capstone reports will be stored by the department and will be available to department members.

Upon completion of the program, students will receive the designation "Honors in Mathematics" on their transcripts.

## MATHEMATICS UNDERGRADUATE MINOR

*(Minimum of 12 or 13 credits required)*

Students are expected to complete MAC 2311 (Calculus 1) and MAC 2312 (Calculus 2) or their equivalents as prerequisites for the Minor in Mathematics (8 credits). The minor requires four Mathematics courses, 12 or 13 credits, with minimum grades of "C" in each course, with at least 9 of these credits completed at Florida Atlantic University.

---

### Choose three courses from the list

Calculus 3	MAC 2313	4
Discrete Mathematics	MAD 2104	3

---

Introduction to Computational Mathematics	MAD 2502	3
Differential Equations 1	MAP 2302	3 <b>or</b>
Engineering Mathematics 1	MAP 3305	3
Matrix Theory	MAS 2103	3

The remaining course must be an upper-division mathematics course (3000 level or above), excluding MAP 3305. The total number of credits, including the MAC 2311 and MAC 2312 prerequisites, is 20 or 21.

## **STATISTICS** UNDERGRADUATE MINOR

*(Minimum of 26 credits required)*

The minor in Statistics enables students to gain knowledge in the field while pursuing a major in other disciplines, including mathematics. The required curriculum provides the necessary statistical foundations of the field and practical applications relevant to the student's area of specialization.

Each course must be completed with a minimum grade of "C." The total number of credits required for this minor is 26. To obtain the minor in Statistics, the student must complete the following required/elective courses:

### **Prerequisites**

Calculus 1	MAC 2311	4
Calculus 2	MAC 2312	4
Matrix Theory	MAS 2103	3

### **Core Required Courses**

Applied Statistics Lab	STA 4202L	1
Applied Statistics 1	STA 4234	2
Probability and Statistics 1	STA 4442	3
Probability and Statistics 2 or	STA 4443	3

Probability and Statistics for Engineers

or STA 4032

***Choose two electives from the following list***

Intermediate Econometrics	ECO 4422	3
Introduction to Queueing Theory	MAP 4260	3
Statistical Physics	PHY 4523	3
RI: Introduction to Data Science or SAS for Data and Statistical Analyses	CAP 3786 or STA 3024	3
Computational Statistics	STA 3100	3
RI: Statistical Learning	STA 4241	3
Statistical Designs	STA 4222	3
Applied Statistics 2	STA 4702	3
Applied Time Series and Forecasting	STA 4853	3
<b>Mathematics and Statistics Total</b>		<b>26</b>

As with all degree programs, the authoritative source for the degree requirements is the University Catalog that was in effect for the academic year in which the student entered the University.

## UNDERGRADUATE CERTIFICATES

### ARTIFICIAL INTELLIGENCE (AI) FOR CYBERSECURITY UNDERGRADUATE CERTIFICATE

*(Minimum of 12 credits required)*

#### Introduction

Cybersecurity involves studying methods, tools, mathematical principles and operational practices to safeguard the integrity of information, systems, and networks. Artificial Intelligence, leveraging its capacity to process extensive datasets, detect patterns, and dynamically respond to emerging threats in real-time, emerges as an indispensable tool for enhancing the security of information infrastructures, system functionalities, network architectures and cryptographic protocols.

This program aims to equip students with knowledge and tools that leverage AI technologies to develop more robust and efficient cybersecurity solutions, allowing for proactive identification and response to cyber threats.

For track details, see [College of Engineering and Computer Science](#).

## **ACTUARIAL SCIENCE**

### UNDERGRADUATE CERTIFICATE

*(Minimum of 24 credits required)*

Actuarial Sciences is a career that is in high demand. Actuaries are professionals who use their mathematical training to solve problems in insurance and finances. The certificate requires 15 credits of prerequisite courses and 24 credits of required courses, with at least 18 of these credits taken at FAU.

---

#### **Prerequisites**

Calculus 1, 2 and 3	MAC 2311, 2312, 2313	12
Macroeconomic Principles	ECO 2013	3

---

#### **Requirements**

Microeconomic Principles	ECO 2023	3
Principles of Financial Management	FIN 3403	3
Actuarial Mathematics 1	MAP 4172	3
Actuarial Mathematics 2	MAP 4173	3
Internship-Actuarial Science	MAP 4945	6
Probability and Statistics 1, 2	STA 4442, 4443	6

It is recommended that students also complete STA 4234, STA 4202L and STA 4702. These courses will prepare students for the third actuarial exam.

## **CYBERSECURITY**

## UNDERGRADUATE MINOR AND UNDERGRADUATE CERTIFICATE

*(Minimum of 12 credits required)*

Cybersecurity is the study of methods to ensure information and system security. Industry and government need an educated workforce to serve as information and systems security analysts, security and network administrators and more. Due their extensive expertise and facilities, the departments of Information Technology and Operations Management (in the College of Business), Electrical Engineering and Computer Science (In the College of Engineering and Computer Science) and Mathematics and Statistics (in the College of Science) have jointly designed the Cybersecurity Minor and Certificate. Three tracks, each requiring 12 credits, constitute the minor and certificate: Information Technology (IT), Computer Science (CS) and Mathematical Sciences (MS). Details for this certificate program can be found in the [Interdisciplinary Programs](#) section of this catalog.

### **DATA SCIENCE**

## UNDERGRADUATE CERTIFICATE

*(Minimum of 15 credits required)*

A [Data Science certificate](#) program, designed jointly by the departments of Electrical Engineering and Computer Science and Mathematics and Statistics, provides an in-depth study of the methods to manage, analyze and extract knowledge from data. Admission and course requirements are detailed [here](#).

### **STATISTICS**

## UNDERGRADUATE CERTIFICATE

*(Minimum of 23 credits required)*

The certificate program in Statistics enables students to pursue an interdisciplinary course of study in statistics. The required curriculum provides students with necessary statistical foundations of the field and exposes them to practical applications relevant to their chosen areas of specialization.

Each of the following courses must be completed with a minimum grade of "C-." The total number of credits required for this certificate is 23. To obtain the certificate in Statistics, the student must

complete the following required/elective courses:

---

### Required Courses

Calculus 1	MAC 2311	4
Calculus 2	MAC 2312	4
Applied Statistics Lab	STA 4202L	1
Applied Statistics 1	STA 4234	2
Probability and Statistics 1	STA 4442	3

### Choose one from this list

Probability and Statistics 2	STA 4443	3
Probability and Statistics for Engineers	STA 4032	3
Stochastic Models for Computer Science	STA 4821	3
Stochastic Processes and Random Signals	EEL 4541	3

### Recommended mathematics courses

Calculus 3	MAC 2313	4
Matrix Theory	MAS 2103	3

### Choose two elective courses

Intermediate Econometrics	ECO 4422	3
Introduction to Queueing Theory	MAP 4260	3
Statistical Physics	PHY 4523	3
RI: Introduction to Data Science* or SAS for Data and Statistical Analyses*	CAP 3786 <b>or</b> STA 3024	3
Computational Statistics*	STA 3100	3
Statistical Designs*	STA 4222	3

RI: Statistical Learning*	STA 4241	3
Applied Statistics 2*	STA 4702	3
Applied Time Series and Forecasting*	STA 4853	3
<b>Total</b>		<b>23</b>

\*Recommended elective courses

As with all degree programs, the authoritative source for the degree requirements is the University Catalog that was in effect for the academic year in which the student entered the University.

### Secondary Education Program

A program leading to teacher certification in mathematics is available through the Department of [Curriculum and Instruction](#) in the College of Education.

## COMBINED PROGRAMS

### MATHEMATICS

#### BACHELOR OF SCIENCE (B.S.) TO MASTER OF SCIENCE (M.S.) COMBINED PROGRAM

*(Minimum of 150 credits required)*

This accelerated, five-year program leads to both Bachelor of Science (B.S.) and a Master of Science (M.S.) degrees. The combined degree program is 150 credits: 120 credits for the undergraduate degree and 30 for the master's degree, with a maximum of 12 credits of graduate coursework used to satisfy both degrees. Once admitted into the program, students shall follow the suggested course sequence. To allow for maximum flexibility in career aspirations, students may select from five concentrations.

- Pure Mathematics
- Applied Analysis
- Biostatistics
- Cryptology and Information Security
- Financial Mathematics

Once admitted into the program, students shall follow the suggested course sequence within a single concentration. The baccalaureate degree will be conferred before the master's degree.

Students must maintain a GPA of 3.0 in upper-division and graduate courses. Students interested in the combined B.S./M.S. should consult with the graduate advisor before taking upper-division mathematics coursework to ensure that their coursework will apply toward the combined degree. Students must apply for admission to candidacy by the end of their junior year.

### **Prerequisite Coursework for Transfer Students**

Students transferring to Florida Atlantic University must complete both lower-division requirements (including the requirements of the General Education Program) and requirements for the college and major. Lower-division requirements may be completed through the A.A. degree from any Florida public college, university or community college or through equivalent coursework at another regionally accredited institution. Before transferring and to ensure timely progress toward the baccalaureate degree, students must also complete the prerequisite courses for their major as outlined in the [Transition Guides](#).

All courses not approved by the Florida Statewide Course Numbering System that will be used to satisfy requirements will be evaluated individually on the basis of content and will require a catalog course description and a copy of the syllabus for assessment.

### **B.S. Curriculum**

Students must complete the requirements of the B.S. degree in Mathematics. Twelve graduate credits will count toward both B.S. and M.S. degree requirements. Students must select 12 credits from the graduate courses within a single concentration.

---

#### **Pure Mathematics Concentration**

*Choose four courses from the following list.*

Introductory Analysis 1	MAA 5228	3
Introductory Analysis 2	MAA 5229	3
Linear Algebra	MAS 5145	3
Introductory Abstract Algebra 1	MAS 5311	3
Introductory Abstract Algebra 2	MAS 5312	3

---

#### **Applied Analysis Concentration**

***Choose four courses from Lists A and B, with at least one from List A.***

**List A**

Topics in Probability and Statistics	STA 6446	3
Applied Time Series Analysis	STA 6857	3
Directed Independent Study	STA 6907	3

The 12 graduate credits may be counted as upper-division math electives or as a substitute for a required course as follows:

MAA 5228 may be substituted for MAS 3156

MAA 6406 may be substituted for MAA 4402

MAS 5145 may be substituted for MAS 4107

MAS 5311 may be substituted for MAS 4301

**M.S. Curriculum**

Students complete all requirements for the M.S. degree with major in Mathematics.

**LIBERAL ARTS AND SCIENCES TO MATHEMATICS****BACHELOR OF ARTS (B.A.) TO MASTER OF SCIENCE (M.S.)  
COMBINED PROGRAM****Mathematical Sciences Concentration****BIOLOGICAL AND PHYSICAL SCIENCES TO MATHEMATICS****BACHELOR OF ARTS (B.A.) OR  
BACHELOR OF SCIENCE (B.S.) TO MASTER OF SCIENCE (M.S.)  
COMBINED PROGRAM**

## Mathematics Concentration

The Department of Mathematics and Statistics offers a combined program with the Wilkes Honors College: the [B.A. with Major in Liberal Arts and Sciences, with Concentration in Mathematical Sciences](#), or [B.A./B.S. with Major in Biological and Physical Sciences, with Concentration in Mathematics](#), to [M.S. with Major in Mathematics](#). Details for the undergraduate portions of the program can be found [here](#).

## MASTER'S PROGRAMS

### DATA SCIENCE AND ANALYTICS

#### MASTER OF SCIENCE (M.S.)

##### Data Science via Scientific Inquiry Concentration

##### Data Science and Engineering Concentration

##### Data Science and Business Concentration

##### Data Science in Society Concentration

The [Master of Science with Major in Data Science and Analytics](#) (MSDSA) is a multi-college interdisciplinary program jointly administered by the Department of Mathematics and Statistics in the Charles E. Schmidt College of Science, the Department of Electrical Engineering and Computer Science in the College of Engineering and Computer Science, the Department of Information Technology and Operations Management (ITOM) in the College of Business and the Department of Political Science in the Dorothy F. Schmidt College of Arts and Letters. The program aims to prepare students with essential skill sets needed to analyze small, fast, big, massive and complex data. To allow for maximum flexibility in career aspirations, students may select from four concentrations:

- Data Science via Scientific Inquiry Concentration, Department of Mathematics and Statistics.
- Data Science and Engineering Concentration, Department of Electrical Engineering and Computer Science.
- Data Science in Business Concentration, Department of Information Technology and Operations Management.
- Data Science in Society Concentration, Department of Political Science.

For more information about the Master of Science with Major in Data Science and Analytics degree program, see the [Interdisciplinary Program](#) section of this catalog.

## **MATHEMATICS**

### **MASTER OF SCIENCE (M.S.)**

#### **Pure Mathematics Concentration**

#### **Applied Analysis Concentration**

#### **Biostatistics Concentration**

#### **Cryptology and Information Security Concentration**

#### **Financial Mathematics Concentration**

This program is designed to provide a foundation for mathematical work and application of mathematics in scientific or technical fields and industry. It should normally take a full-time student two years to complete. Five concentrations are offered: Pure Mathematics, Applied Analysis, Biostatistics, Cryptology and Information Security, and Financial Mathematics.

#### **Admission Requirements**

In addition to meeting the University graduate admission requirements, applicants must have a bachelor's degree in mathematics or coursework that includes the equivalent of Introduction to Advanced Mathematics, Modern Algebra, and Probability and Statistics 1, as well as computer competency. Applicants who do not meet all of the requirements will still be considered for conditional admission.

#### **Degree Requirements**

To complete the M.S. degree in Mathematics the candidate must complete at least 30 credits of graduate coursework and satisfy the following criteria in addition to University requirements:

1. Earn at least 24 credits in courses specified in a degree concentration, pre-approved by the graduate advisor in mathematics; at least 15 credits of all credits applied to the degree must be at the 6000 level;
2. If pre-approved by the department graduate committee, up to 12 credits of FAU coursework from outside of the Department of Mathematics and Statistics may count toward the degree.
3. Complete one of the following three capstone options:
  - a. Successfully complete and defend a master's thesis, earning at least 6 credits of MAT 6971, Master's Thesis;
  - b. Successfully complete and report on an industrial internship, earning at least 6 credits; or
  - c. Successfully complete a master's examination. The exam should be scheduled during the semester before the anticipated completion of coursework for the degree. Students should contact the departmental graduate director to schedule the exam.

---

## Capstone Options

---

### *Thesis - 6 credits*

---

Master's Thesis (may be taken over multiple terms)	MAT 6971	1-6
--	----------	-----

---

### *Internship - 6 credits*

---

Internship in Applied Mathematics	MAP 6941	1-6
-----------------------------------	----------	-----

---

### *Non-Thesis, Non-Internship - 6 credits*

---

*Choose 6 credits of graduate courses approved by the department and complete M.S. exam.*

---

## Concentration Options

---

### *Pure Mathematics - 24 credits*

---

#### Common Core Course

---

Linear Algebra	MAS 5145	3
----------------	----------	---

---

#### **Additional Core Courses - 9 credits, choose three of the following four courses.**

## MATHEMATICS

### MASTER OF SCIENCE IN TEACHING (M.S.T.)

This degree program, with emphasis on issues of teaching, provides post-baccalaureate education for any students seeking a deeper understanding of and appreciation for mathematics. This M.S.T. degree program does not provide teaching certification; students interested in teaching at the state college level should consult with an advisor in the Department of Mathematics and Statistics. This program is available fully online.

#### Admission Requirements

Admission requirements for the M.S.T. program are the same as for the M.S. in Mathematics.

#### Degree Requirements

This program requires 24 credits of mathematics courses and 6 credits of education courses at or above the 5000 level, and at least half of all credits applied to the degree must be in 6000-level courses.

(Candidates without a valid secondary certificate or with fewer than two years of teaching experience might be required to complete a 6-credit internship.) The Mathematics and Statistics Department offers one or two 6000-level classes specifically designed for the M.S.T. program each semester (including summers), see the table below; but other 5000- or 6000-level Math courses may be applied toward this degree for students wishing to complete the program more quickly. Candidates may complete 6 of the 24 credits in mathematics by writing a master's thesis.

### Online courses designed for the M.S.T. Program

Advanced Euclidean Geometry	MTG 6226	3
Advanced Algebra and Geometry	MAS 6318	3
Mathematics and Technology	MAT 6715	3
Number Theory of Cryptography	MAS 6217	3
Dynamical Systems, Chaos, and Computing	MTG 6418	3
Problem Solving and Recreational Mathematics	MAT 6516	3
Calculus from a Historical Perspective	MHF 6410	3
Fractal Geometry	MTG 6415	3
Introductory Discrete Mathematics	MAD 6108	3
Survey of Statistics and Probability	STA 6116	3

## **CYBER SECURITY** GRADUATE CERTIFICATE

*(Minimum of 12 credits required)*

Cybercrime-related issues especially impact the State of Florida because a significant part of the state's economic development comes from tourism, international banking and high-tech industries. The number of scientists, engineers and experts needed with special skills in cyber security exceeds the number available. The Cyber Security certificate provides opportunities for graduate students to expand

their knowledge and skills to meet the needs of the cyber security field. Due to their extensive expertise and facilities, the departments of Electrical Engineering and Computer Science and Mathematics and Statistics have jointly designed the certificate. This 12-credit certificate program has two tracks: Computer Science (CS) and Mathematics (Math). Details for both tracks can be found in the [Interdisciplinary Programs](#) section of this catalog.

## DOCTORAL PROGRAM

### MATHEMATICS

#### DOCTOR OF PHILOSOPHY (PH.D.)

The degree of Doctor of Philosophy (Ph.D.) is conferred upon those candidates who have demonstrated the ability to make original and independent contributions in mathematics. This quality is evaluated through a dissertation that the candidate must submit to a supervisory committee and defend in an open presentation.

#### Admission to Doctoral Study

Although each candidate will be considered individually, the admission requirements include:

1. A baccalaureate in Mathematics or a related field completed with an average of "B" or better;
2. A TOEFL score, if applicable;
3. Three letters of recommendation and a statement of personal objectives; and
4. Approval of the FAU Mathematics and Statistics Department graduate committee.

#### Requirements to be admitted to candidacy

1. The student must complete the following courses: Introductory Analysis 1 and 2 (MAA 5228 and 5229), Introductory Abstract Algebra 1 and 2 (MAS 5311 and 5312), Linear Algebra (MAS 5145) and Multivariable Analysis (MAA 5105).
2. Satisfy one of the following:

**Option A.** Pass two of the three exams (Algebra, Analysis, Probability and Statistics) within five semesters (not counting the summer terms) of admission to doctoral study. Then form a supervisory committee as outlined in Item 3.

**Option B.** Complete the following steps within six semesters (not counting the summer terms) of admission to doctoral study.

- a. Earn a pass on one exam and a constructive attempt on a different exam within four semesters (not counting the summer terms) of admission to doctoral study.
  - b. Select a prospective research advisor, and complete two courses at the 6000 level, selected by the prospective research advisor and approved by the departmental graduate committee. These courses will need to be passed with a combined GPA of at least 3.5. They will count toward Degree Requirement 1a below, but not 1b or 1c. The prospective research advisor may propose additional requirements.
  - c. Receive a positive recommendation by the prospective research advisor and the graduate committee. Then form a supervisory committee as outlined in Item 3 with the prospective research advisor serving as research advisor.
3. Form a supervisory committee of at least four members including the research advisor and at least two other members of the graduate faculty of the Department of Mathematics and Statistics.

## Degree Requirements

1. Credits and course requirements:
  - a. Earn a minimum of 72 credits;
  - b. Complete 6000-level or higher courses with at least four of these prefixes: MAA, MAD, MAP, MAS, MHF, MTG and STA;
  - c. For at least two of the prefixes in Item 1b, complete at least two 6000-level or higher courses.
2. Successful completion of a preliminary examination covering specific areas of study and set by the student's supervisory committee.
3. Presentation and oral defense of a dissertation.
4. Completion of all University requirements, including at least 18 credits at FAU beyond the master's level.

## PHYSICS

**Faculty:**

Wille, L. T., Chair; Beetle, C.; Engle, J. S.; Gross, R.; Han, M.; Hotiu, A.; Kreymerman, G.; Lau, A. W. C.; Leventouri, T.; Miller, W. A.; Muhammad, W.; Sarajedini, A.; Sarajedini, V.; Sorge, K. D.; Starling, E.; Tichy, W.;

**Faculty Emeritus:**

Bruenn, S. W.; Dean, N.; Jordan, R. G.; Medina, F.

The Department of Physics offers undergraduate programs leading to the Bachelor of Arts (B.A.) and Bachelor of Science (B.S.) degrees. It also offers an Honors program and a Minor in Physics at the undergraduate level. The department offers graduate programs leading to Master of Science (M.S.), Professional Science Master (P.S.M.) in Medical Physics, Master of Science in Teaching (M.S.T.) and Doctor of Philosophy (Ph.D.) degrees. It also offers a dual-degree program leading to both the B.S. and P.S.M. in Medical Physics on an accelerated schedule requiring only one year of additional study beyond the B.S.

The Department of Curriculum and Instruction in the College of Education also offers specialized programs leading to the Bachelor of Arts (B.A.) or Bachelor of Arts in Education (B.A.E.) degrees in Secondary Education with a focus on Physics (6-12) Education. The physics content-area courses required for these degrees are offered through the Department of Physics, and the content-area requirements in both physics and mathematics are outlined below. Contact the [Department of Curriculum and Instruction](#) with questions or to enroll in these degree programs.

[Link to Combined Program](#)

[Link to Master's Programs](#)

[Link to Doctoral Program](#)

## **Undergraduate Information**

Students considering a major or minor degree in physics should schedule a meeting with a member of the department's undergraduate advising committee to discuss their personal objectives and suitable degree options. A list of current committee members and contact information is available from the department office in SE 108 on the Boca Raton campus.

The department is committed to allowing undergraduate majors maximum flexibility in designing curricula tailored to their specific educational and career objectives. The undergraduate advising committee has been charged to consider student requests for waivers from otherwise required physics courses in favor of specific courses from outside the department that may be more directly suited to an individual student's needs. Such waivers must be obtained in advance and must be based on a clear educational objective set forth by the student. Ideally, students should plan and agree with the committee on any deviations from the standard curriculum for their degree at or near the time they declare a major in physics.

In addition to meeting University and College standards, students in any physics degree program must receive a grade of "C" or better in every required course offered within the Charles E. Schmidt College of Science.

Scholarship funds are available through the physics scholarship fund to outstanding graduates of the State of Florida's community (or state) college system. For more details, contact the Department of Physics.

## **Undergraduate Physics Core**

All students seeking a major or minor degree in physics are required to complete the same introductory physics and mathematics sequences as well as an introductory natural science sequence outside the department. Students may opt for introductory sequences in either biology or chemistry. The undergraduate advising committee may approve alternative sequences, even retroactively, on a case-by-case basis.

**Introductory Physics Courses**

General Physics 1	PHY 2048	4
General Physics 1 Lab	PHY 2048L	1
General Physics 2	PHY 2049	4

<b>Total</b>		<b>8</b>

To meet University degree requirements, students in any physics program must also complete 32 additional lower-division general education credits in courses outside the Charles E. Schmidt College of Science.

## PHYSICS BACHELOR OF ARTS (B.A.)

*(Minimum of 120 credits required)*

The Bachelor of Arts (B.A.) degree program is offered for students seeking exposure to analytical methods in contemporary physics within a broader, liberal arts-style curriculum. Course requirements are significantly reduced compared with the department's flagship B.S. program described later in this section. The department does not recommend its B.A. degree for students planning graduate or professional work in physics. However, this program may be well suited to students planning work in related fields. Potential candidates should consult with the departmental undergraduate advisor to ensure this program will help meet their personal educational objectives before enrolling.

### Prerequisite Coursework for Transfer Students

Students transferring to Florida Atlantic University must complete both lower-division requirements (including the requirements of the General Education Program) and requirements for the college and major. Lower-division requirements may be completed through the A.A. degree from any Florida public college, university or community college or through equivalent coursework at another regionally accredited institution. Before transferring and to ensure timely progress toward the baccalaureate degree, students must also complete the prerequisite courses for their major as outlined in the [Transition Guides](#).

All courses not approved by the Florida Statewide Course Numbering System that will be used to satisfy requirements will be evaluated individually on the basis of content and will require a catalog course description and a copy of the syllabus for assessment.

In addition to the Undergraduate Physics Core described above, B.A. candidates must complete the following required courses:

---

### Intermediate Physics Courses

---

Survey of Modern Physics	PHY 3101C	3
Classical Mechanics	PHY 3221	3
Electromagnetism 1	PHY 3323	3
Quantum Mechanics 1	PHY 4604	3
Third-Year Physics Seminar	PHY 3932	1

*Choose at least one course from the following list.*

Statistical Physics	PHY 4523	3
Physical Electronics	PHY 3722C	3
Computational Physics	PHZ 3151C	3
<b>Total</b>		<b>16</b>

Overall, this degree program requires 34 credits of lower-division mathematics and science courses and 16 credits of upper-division physics courses. Substitutions for required courses are allowed with prior approval from the department's undergraduate advising committee.

## SCIENCE EDUCATION

BACHELOR OF ARTS (B.A.) OR BACHELOR OF SCIENCE (B.S.) OR  
BACHELOR OF SCIENCE IN EDUCATION (B.S.E.)

### Physics Education Concentration

*(Minimum of 120 credits required)*

The Bachelor of Arts (B.A.) in Science Education with concentration in Physics Education is offered through the Department of [Curriculum and Instruction](#) in the College of Education. It is intended for students interested in teaching physics professionally at the secondary level. Students may also earn this program with a Bachelor of Science (B.S.) or Bachelor of Science in Education (B.S.E.) degree. Students in this program will be advised through the Department of Curriculum and Instruction. However, content-course requirements are listed here for students interested in this program.

### Prerequisite Coursework for Transfer Students

Students transferring to Florida Atlantic University must complete both lower-division requirements (including the requirements of the General Education Program) and requirements for the college and major. Lower-division requirements may be completed through the A.A. degree from any Florida public college, university or community college or through equivalent coursework at another regionally accredited institution. Before transferring and to ensure timely progress toward the baccalaureate degree, students must also complete the prerequisite courses for their major as outlined in the [Transition Guides](#).

All courses not approved by the Florida Statewide Course Numbering System that will be used to satisfy requirements will be evaluated individually on the basis of content and will require a catalog course description and a copy of the syllabus for assessment.

In addition to the Undergraduate Physics Core courses described above, candidates must complete the following required courses:

---

#### Intermediate Physics Courses

Survey of Modern Physics	PHY 3101C	3
Electromagnetism 1	PHY 3323	3
Physical Electronics	PHY 3722C	3

***Choose at least 8 credits from the following list.***

Classical Mechanics	PHY 3221	3
Statistical Physics	PHY 4523	3
Quantum Mechanics 1	PHY 4604	3

---

Computational Physics

PHZ 3151C

3

**Total****20**

Overall, this degree program requires 73 lower-division credits, including general education requirements for the B.A., B.S. or B.S.E. degree, as well as math, science and education courses. It also requires 20 credits of upper-division physics courses and 24 credits of upper-division education courses. See the Department of [Curriculum and Instruction](#) in the College of Education for details.

## PHYSICS

### BACHELOR OF SCIENCE (B.S.)

*(Minimum of 120 credits required)*

The Bachelor of Science (B.S.) degree program is the flagship of the department's undergraduate curriculum. It is designed to help students prepare for careers in physics, related sciences or closely related fields such as engineering. The emphasis is on analytical methods in contemporary theoretical and experimental physics. Students considering graduate work in physics or related areas are strongly encouraged to complete this program.

#### Prerequisite Coursework for Transfer Students

Students transferring to Florida Atlantic University must complete both lower-division requirements (including the requirements of the General Education Program) and requirements for the college and major. Lower-division requirements may be completed through the A.A. degree from any Florida public college, university or community college or through equivalent coursework at another regionally accredited institution. Before transferring and to ensure timely progress toward the baccalaureate degree, students must also complete the prerequisite courses for their major as outlined in the [Transition Guides](#).

All courses not approved by the Florida Statewide Course Numbering System that will be used to satisfy requirements will be evaluated individually on the basis of content and will require a catalog course description and a copy of the syllabus for assessment.

In addition to the undergraduate physics core described above, B.S. candidates must complete the following required courses:

---

#### Intermediate Physics Courses

Survey of Modern Physics	PHY 3101C	3
Classical Mechanics	PHY 3221	3
Electromagnetism 1	PHY 3323	3
Electromagnetism 2	PHY 3324	3
Statistical Physics	PHY 4523	3
Quantum Mechanics 1	PHY 4604	3
Physical Electronics	PHY 3722C	3
Undergraduate Laboratory 1	PHY 3802L	1
Undergraduate Laboratory 2	PHY 4803L	1
Third-Year Physics Seminar	PHY 3932	1
Computational Physics	PHZ 3151C	3
Mathematical Methods for Physics	PHZ 4113	3
Approved Electives		6
<b>Total</b>		<b>36</b>

Overall, this degree program requires 34 credits of lower-division mathematics and science courses and 36 credits of upper-division physics courses. Substitutions for required courses are allowed with prior approval from the department's undergraduate advising committee.

## **HONORS PROGRAM IN PHYSICS**

Qualified physics majors may elect to complete an Honors Program (thesis) prior to graduation. The thesis will describe participation in current research under the supervision of a member of the department faculty. A student completing a satisfactory thesis will receive the distinction "honors in physics" upon graduation.

To qualify for the program, students must maintain a GPA of at least 3.0 in required courses within the

College of Science and complete a minimum of 30 credits of physics courses by the end of their junior year. Candidates should apply for this program through the undergraduate advising committee roughly one year prior to graduation.

## **ASTRONOMY**

### **UNDERGRADUATE MINOR**

*(Minimum of 12 credits required)*

The primary goal of this minor is to prepare undergraduate B.S. Physics majors at FAU to attend graduate school intending to earn a master's or doctorate in Astronomy and Astrophysics. The minor builds on the existing Physics major and provides students the background needed in astronomy and astrophysics to succeed in graduate school. In addition, students in other majors, such as Engineering, Journalism and Communications, Marketing, History and Philosophy may also want to have a minor in Astronomy to enhance their career potential.

In addition to courses listed below, this program will require a "C" or better in (MAC 1105 or MAC 2311) and (PHY 2053 or PHY 2048) in fulfillment of prerequisites for the upper-division coursework.

Students are required to earn at least 12 credits (9 of which must be upper division) with a minimum grade of C from among the required courses listed below. At least 9 of these credits must be completed at Florida Atlantic University.

---

#### **Required Courses**

Introduction to Astronomy	AST 2002	3
Astronomy and Astrophysics	AST 3018	3

---

#### **Select at least two courses from the following list**

Solar System Astronomy	AST 3110	3
Techniques of Observational Astronomy	AST 3722	3
Stars and the Galaxy	AST 4300	3
Galaxies and Cosmology	AST 4402	3

Overall, this degree program requires 10-11 lower-division credits and 9 upper- division credits,

including prerequisites.

## PHYSICS UNDERGRADUATE MINOR

*(Minimum of 36 credits required)*

The department offers a minor in Physics to interested students seeking bachelor's degrees in other fields. It is expected that most students interested in this program will major in fields sufficiently closely related that most of the undergraduate physics core will also fulfill major requirements. Students interested in this program should consult with the department's undergraduate advising committee prior to enrolling.

In addition to the undergraduate physics core described above, candidates for a minor in Physics must complete the following required courses:

---

### Intermediate Physics Course

---

Survey of Modern Physics	PHY 3101C	3
--------------------------	-----------	---

---

*Choose at least one course from the following list.*

Classical Mechanics	PHY 3221	3
---------------------	----------	---

---

Electromagnetism 1	PHY 3323	3
--------------------	----------	---

---

Physical Electronics	PHY 3722C	3
----------------------	-----------	---

---

Statistical Physics	PHY 4523	3
---------------------	----------	---

---

Quantum Mechanics 1	PHY 4604	3
---------------------	----------	---

---

Computational Physics	PHZ 3151C	3
-----------------------	-----------	---

---

<b>Total</b>		<b>6</b>
--------------	--	----------

Overall, this degree program requires 30 lower-division credits in physics and mathematics and 6 credits of upper-division physics. Some of the lower-division credits may also satisfy candidates' major requirements. At least 75 percent of all credits required for the minor must be earned from FAU.

## COMBINED PROGRAM

## **PHYSICS TO MEDICAL PHYSICS**

### **BACHELOR OF SCIENCE (B.S.) TO PROFESSIONAL SCIENCE MASTER (P.S.M.) COMBINED PROGRAM**

*(Minimum of 161 credits required)*

This accelerated, five-year program leads to both a Bachelor of Science (B.S.) and a Professional Science Master (P.S.M.) degree. Students apply to the B.S./P.S.M. program in the first semester of their junior year and begin taking graduate courses after completion of their junior year (summer prior to senior year); those courses would apply to both the B.S. and P.S.M. degrees. The combined degree program is 161 credits, 120 for the undergraduate degree and 41 for the graduate degree. Students complete the undergraduate degree first. Up to 12 credits of graduate work taken in the senior year can be counted toward both the undergraduate and graduate degrees. Students must maintain a minimum GPA of 3.0 in upper-division and graduate courses. Because of the accelerated nature of the program, students should take the GRE by the end of their first year junior semester.

#### **Prerequisite Coursework for Transfer Students**

Students transferring to Florida Atlantic University must complete both lower-division requirements (including the requirements of the General Education Program) and requirements for the college and major. Lower-division requirements may be completed through the A.A. degree from any Florida public college, university or community college or through equivalent coursework at another regionally accredited institution. Before transferring and to ensure timely progress toward the baccalaureate degree, students must also complete the prerequisite courses for their major as outlined in the [Transition Guides](#).

All courses not approved by the Florida Statewide Course Numbering System that will be used to satisfy requirements will be evaluated individually on the basis of content and will require a catalog course description and a copy of the syllabus for assessment.

#### **Requirements and Eligibility**

In addition to the University and Charles E. Schmidt College of Science requirements, students seeking a B.S. in Physics/P.S.M. in Medical Physics must complete the following courses.

#### **Undergraduate Physics Core**

Students are required to complete the introductory physics and mathematics sequences as well as an introductory natural science sequence outside the department as noted in the [Undergraduate Physics Core](#). Students may opt for introductory sequences in either biology or chemistry. The undergraduate

advising committee may approve alternative sequences, even retroactively, on a case-by-case basis.

To meet University degree requirements, students in any physics program must also complete 32 additional lower-division general education credits in courses outside the Charles E. Schmidt College of Science.

## Curriculum

In addition to the Undergraduate Physics Core, B.S./P.S.M. candidates must complete the following required courses.

### Upper Division Physics Courses

Survey of Modern Physics	PHY 3101C	3
Classical Mechanics	PHY 3221	3
Electromagnetism 1	PHY 3323	3
Electromagnetism 2	PHY 3324	3
Statistical Physics	PHY 4523	3
Quantum Mechanics 1	PHY 4604	3
Physical Electronics	PHY 3722C	3
Undergraduate Laboratory 1	PHY 3802L	1
Undergraduate Laboratory 2	PHY 4803L	1
Third-Year Physics Seminar	PHY 3932	1
Computational Physics	PHZ 3151C	3
Mathematical Methods for Physics	PHZ 4113	3
Approved Electives		6
<b>Total</b>		<b>44</b>

Substitutions for required courses are allowed with prior approval from the department's undergraduate advising committee. Graduate courses are listed below.

Beginning in the first semester of their junior year, students may take Radiation Biology (RAT 6204, 3

credits). Then in the summer, they may take Seminar in Medical Physics (RAT 6932, 1 credit), Radiation Protection and Safety (RAT 6310, 3 credits) and Shielding and Commissioning (RAT 6376, 3 credits). In their senior year, they may take Radiation Physics (RAT 6686, 3 credits), Medical Imaging Physics (RAT 6616, 3 credit), Nuclear Medical Physics (RAT 6687, 3 credits) and one 5000-level elective (3 credits). This plan gives a total of 22 credits out of the 41 needed for the P.S.M. in Medical Physics program.

---

## MASTER'S PROGRAMS

### PHYSICS

#### MASTER OF SCIENCE (M.S.)

The Department of Physics offers the Master of Science (M.S.) degree with major in Physics. The degree should be particularly attractive to those intending to seek jobs in industry or in teaching at the secondary or community college levels. The coursework and research experience provided by the M.S. program will also be of value to students whose eventual goal is a Ph.D., although those students are strongly encouraged to enroll directly into the Ph.D. program if possible. The M.S. in Physics normally requires four semesters beyond the B.S. in Physics, or equivalent. The Department also offers a Professional Science Master (P.S.M.) with Major in Medical Physics, an interdisciplinary program, which is described in the [Interdisciplinary Programs section](#).

#### Admission Requirements

In addition to meeting all of the University and College admission requirements for graduate study, applicants for the M.S. in Physics must meet all of the following the departmental requirements:

1. Hold a B.S. degree, or equivalent, in Physics or a closely related field;
2. Earn a cumulative GPA of 3.0 or higher, or equivalent, in the last 60 credits of undergraduate work;
3. Be approved by the Department of Physics; and
4. Pass a recent TOEFL exam with a minimum score of 550 (PBT), 213 (CBT) or 79 (IBT). This requirement is waived for students from countries whose official languages include English.

### Degree Requirements

This M.S. degree has two variants, one requiring a thesis, and the other requiring a passing grade in a Comprehensive Exam administered by the department. Both require 30 credits.

---

#### Graduate Core Courses - 12 credits required

Mechanics	PHY 6247	3
Electromagnetism	PHY 6346	3
Statistical Mechanics	PHY 6536	3
Quantum Mechanics 1	PHY 6645	3

#### Mathematical Physics Course - 3 credits required

Mathematical Physics 1	PHZ 5115	3 <b>or</b>
Mathematical Physics 2	PHZ 5116	3

Approved Electives*, **		12
-------------------------	--	----

*Non-Thesis M.S. candidates must pass a written or oral Comprehensive Exam administered by the department.*

**Total****30**

\* All electives must be approved the department's graduate advisor.

\*\* Only 3 credits of Graduate Research (PHY 6918) may be counted toward this degree.

## PHYSICS

### MASTER OF SCIENCE IN TEACHING (M.S.T.)

The Master of Science in Teaching (M.S.T.) is designed for physics teachers in secondary schools and community colleges. The cognate area will usually be Mathematics.

#### Admission Requirements

In addition to meeting all University and College admission requirements for graduate study, applicants for the M.S.T. degree must satisfy the following departmental requirements:

1. A B.A. or B.S. degree, or equivalent, in physics or a closely related subject;
2. A GPA of 3.0 or higher in the last 60 credits of undergraduate coursework; and
3. Approval from the Department of Physics.

#### Degree Requirements

---

##### *Two courses from the following list - 6 credits*

Mechanics	PHY 6247	3
Electromagnetism	PHY 6346	3
Statistical Mechanics	PHY 6536	3
Quantum Mechanics 1	PHY 6645	3
Mathematical Physics 1	PHZ 5115	3
Mathematical Physics 2	PHZ 5116	3

Topics in Physics	PHY 5935	6
Master's Thesis*	PHY 6971	6

---

Physics Electives approved by the department**	6
Education Electives approved by the department**	6
<b>Total</b>	<b>30</b>

\* Credits in Master's Thesis may be replaced with additional electives with department approval.

\*\* All electives must be graduate courses and must be approved by the department's graduate advisor prior to enrollment.

## DOCTORAL PROGRAM

### PHYSICS

#### DOCTOR OF PHILOSOPHY (PH.D.)

*(Minimum of 72 credits required)*

The Department of Physics offers graduate study leading to a Doctor of Philosophy (Ph.D.) degree. The department is active in research in experimental, theoretical and computational physics as well as astronomy. The Ph.D. will be conferred only for work of distinction in which the student displays original scholarship, achievement and ability.

#### Admission Requirements

In addition to meeting all of the University and College admission requirements for graduate study, applicants for the Ph.D. in Physics must meet all of the following the departmental requirements:

1. Hold a B.S. degree, or equivalent, in Physics or a closely related field;
2. Earn a GPA of 3.0 or higher, or equivalent, in the last 60 credits of undergraduate work;
3. Be approved by the Department of Physics; and
4. Pass a recent TOEFL exam with a minimum score of 550 (PBT), 213 (CBT) or 79 (IBT). This requirement is waived for students from countries whose official languages include English.

In addition, the Department strongly encourages applicants to secure two or more letters of support from faculty familiar with their past work and to provide a report of a recent score on the GRE Physics subject exam. Although not required, these items will be considered in the admissions process if available.

#### Degree Requirements *(minimum of 72 credits)*

1. Students in the Physics Ph.D. program must satisfy the following course requirements.

---

### **Graduate Core Courses - 12 credits required**

Mechanics	PHY 6247	3
Electromagnetism	PHY 6346	3
Statistical Mechanics	PHY 6536	3
Quantum Mechanics 1	PHY 6645	3

---

### **Mathematical Physics Course - 3 credits required**

Mathematical Physics 1	PHZ 5115	3 or
Mathematical Physics 2	PHZ 5116	3

---

### **Computational Physics Course - 3 credits required**

Computational Physics	PHZ 5156	3
-----------------------	----------	---

---

### **Ph.D. Elective and Research Courses - 54 credits required**

Approved Electives *, **		24
Dissertation**	PHY 7980	30

\* All electives must be approved by the department's graduate advisor. At most, 6 elective credits may be earned in Directed Independent Study (AST/PHY/RAT 6907) courses offered the department faculty.

\*\* Up to 6 credits of other graduate-level research courses offered by the department may be counted toward the dissertation requirement.

2. The department may apply up to 24 transfer credits from another institution toward this degree. Approval of transfer credits is at the discretion of the department faculty. However, all students in the Ph.D. program must complete the Ph.D. core courses listed above at FAU.

### **Admission to Candidacy**

To be admitted to candidacy, students must satisfy the following requirements within five semesters (excluding summers) of beginning the Ph.D. program:

1. Complete the four Graduate Core Courses listed above with a grade of "B" or higher in each.

2. Complete at least 36 credits of graduate-level courses (including the Graduate Core Courses and approved transfer credits from other institutions, but excluding research or dissertation credits) with a cumulative GPA of at least 3.0.
3. Form a Supervisory Committee:
  - a. Identify a member of the department faculty who agrees to serve as Ph.D. supervisor and chair (or co-chair) of the Supervisory Committee overseeing a dissertation project on a specific topic selected by the student in consultation with the supervisor.
  - b. Identify at least three additional members of the FAU graduate faculty who agree to serve as members of the Supervisory Committee. At least one member of the Supervisory Committee must be from outside the FAU Department of Physics, but a (simple) majority of Committee members must be graduate faculty from within the department.
  - c. Submit all required paperwork to FAU's Graduate College to form the Supervisory Committee and finalize the student's Plan of Study.
  - d. Membership of the Supervisory Committee and the revised Plan of Study (if any) must be approved by the department's graduate advisor.
4. Present a general outline of the proposed dissertation project at a Physics Colloquium.
5. Pass a Comprehensive Oral Exam administered by the Supervisory Committee. The exam will cover topics from graduate-level coursework that the Committee considers relevant to the student's proposed research.

### **Doctoral Research**

Ph.D. candidates in Physics are expected to demonstrate consistent progress toward timely graduation, typically within six years of entering the Ph.D. program. Accordingly, candidates shall organize a meeting at least once per year with their Supervisory Committee. Candidates shall prepare a one-page, written report describing progress in their dissertation research project since the Supervisory Committee last met, which shall be sent to the Committee members and the department's graduate advisor at least one week prior to the Committee meeting.

Candidates must complete a significant program of original research, participate in advanced seminars in their area of specialization and defend completed dissertations in the Physics Department Colloquium Series. Each dissertation must be clearly written, complete and demonstrate an original contribution to the sum of existing knowledge. Each completed dissertation must be approved by the candidate's Supervisory Committee, the department chair and the deans of the Charles E. Schmidt College of Science and of the Graduate College.

## **PSYCHOLOGY**

## Faculty:

Vallacher, R. R., Interim Chair.; Bjorklund, D. F., Associate Chair; Rosselli, M., Associate Chair; Alexander, W.; Anzures, G.; Barenholtz, E.; Barnhardt, T.; Darby, K.; Forbes, C; Gerstein, E.; Hoff, E.; Hong, S. W.; Hughes, K. M.; Jakubow, J.; Jones, L.; Jones, N.; Kelso, J. A. S.; Kersten, A.; Laursen, B.; Maniaci, M.; Marion, D.; Mavica, L. W.; Nowak, A.; Perry, G. W.; Sheremata, S.; Stackman, R.; Varela Castro, M.; Vertes, R.; Wetherell, G.; Wilcox, T., Wolgin, D. L.

Psychology in the Charles E. Schmidt College of Science defines itself as a science that focuses on mental processes and cognition, social influences on the individual and the biological and neural bases of human and animal behavior. The main mission of the faculty in psychology is to prepare students for graduate training and professional work in psychology as well as to provide a sound undergraduate education for students wishing to work in areas outside of psychology, such as business, law or education.

The department offers the Bachelor of Arts (B.A.) degree in Psychology and the [Bachelor of Science \(B.S.\) degree in Neuroscience and Behavior](#), as well as an upper-division [Honors Program in Psychology](#), the [FAU Max Planck Honors Program](#), a [minor in Psychology](#) and a certificate in [Applied Mental Health Services](#).

In the graduate area, the Department of Psychology offers the Master of Arts (M.A.) degree in Psychology and the Doctor of Philosophy (Ph.D.) degree in Experimental Psychology.

Two [combined programs](#) - a Bachelor of Arts (B.A.) in Psychology to a Master of Arts (M.A.) in Psychology and a Bachelor of Science (B.S.) in Neuroscience and Behavior to a Master of Arts (M.A.) in Psychology - offer ways in which interested students may earn both a bachelor's and master's degree within five years.

**Note:** The Department of Psychology considers scientific misconduct, including such activities as inventing or intentionally misrepresenting data, as interfering with its educational mission and subject to the same penalties and procedures as other Honor Code violations and academic irregularities

[Link to Combined Programs](#)

[Link to Master's Program](#)

[Link to Doctoral Program](#)

## **PSYCHOLOGY**

### **BACHELOR OF ARTS (B.A.)**

*(Minimum of 120 credits required)*

The B.A. degree in Psychology is intended for students interested in pursuing graduate study in psychology (experimental psychology, clinical or counseling psychology, applied psychology). The departmental program offers a focus in psychology and maximum flexibility in choice of electives. Thus, it may be tailored to the interests of the individual student and to further professional plans. A grade of "C-" or better (unless otherwise noted in the course description) is required in all psychology and cognate courses taken as part of the requirements for a B.A. with major in Psychology. However, students must maintain a "C" average in departmental major courses. Facilities are available for experimental research in cognitive psychology, neuroscience and behavior, social/personality psychology and developmental psychology. Qualified students are strongly encouraged to become involved in such research (normally via a Directed Independent Research or a special research course).

#### **Prerequisite Coursework for Transfer Students**

Students transferring to Florida Atlantic University must complete both lower-division requirements (including the requirements of the General Education Program) and requirements for the college and major. Lower-division requirements may be completed through the A.A. degree from any Florida public college, university or community college or through equivalent coursework at another regionally accredited institution. Before transferring and to ensure timely progress toward the baccalaureate degree, students must also complete the prerequisite courses for their major as outlined in the [Transition Guides](#).

All courses not approved by the Florida Statewide Course Numbering System that will be used to satisfy requirements will be evaluated individually on the basis of content and will require a catalog course description and a copy of the syllabus for assessment.

In addition to the University and College requirements, all students are required to complete at least 40 credits in college-level psychology coursework, and a minimum of 31 credits of the 40 credits must be upper-division (3000/4000) level. A minimum of 28 of the upper-division credits must be taken at Florida Atlantic University. Up to 12 credits of transfer psychology coursework may be applied to the psychology major, upon approval of the department. Please note that no more than 9 credits of the

transfer coursework applied to the major can be at the lower-division level.

---

## General Psychology Requirements

---

*Nine core courses are required of all majors.*

Psychology of Human Development	DEP 3053*	3
Cognition	EXP 3505*	3
Biological Bases of Behavior	PSB 3002*	3
General Psychology	PSY 1012	3
Research Methods in Psychology	PSY 3213*	3
Experimental Design and Statistical Inference	PSY 3234*	3
Social Psychology	SOP 3004*	3
Intermediate Statistics Lab	STA 3163L*	1
Laboratory in Psychology (see below)**		3

\* For transfer students: If a lower-division course has been taken in any of the core areas that have an upper-division course requirement, the student may, with the approval of a psychology advisor, substitute a different upper-division course in the same content area for the original course.

### \*\*Laboratory Requirement

The laboratory requirement may be met with any of the following:

- Existing laboratory courses: DEP 4797C, Human Development Lab; EXP 4934C, Cognition Laboratory; PSB 3002L, Computer Lab in Psychobiology; SOP 4230C, Social Behavior Laboratory; OR
- Special topics laboratory courses with the words “Research in…” or “Laboratory in…” in the title, e.g., PSY 4930, Research in (Varied Topics); OR
- Upper-division, Directed Independent Research lab courses taken for 3 credits (PSY 4915 or PSY 4916); OR
- An Honors Thesis, PSY 4970.

---

## Psychology Elective Requirements

---

*A minimum of 15 additional credits are to be chosen from the following.*

Comparative Animal Behavior	CBH 4024	3
Psychopathology	CLP 4144	3
Clinical Psychology	CLP 4343	3
Forensic Psychology	CLP 4390	3
Personality and Social Development	DEP 4095	3
Infant Development	DEP 4115	3
Language Acquisition	DEP 4130	3
Cognitive Development	DEP 4163	3
Psychology of Adolescence	DEP 4305	3
Human Development Laboratory	DEP 4797C	3
Human Perception	EXP 4204	3
Psychology of Motivation	EXP 4304	3
Psychology of Learning	EXP 4404	3
Human Memory	EXP 4525	3
Cognition Laboratory	EXP 4934C	3
Industrial Organizational Psychology	INP 4003	3
Interpersonal Processes	PCO 4734	3
Personality Theories	PPE 4003	3
Experimental Studies of Personality	PPE 4700	3
Computer Lab in Psychobiology	PSB 3002L	3
Biological Bases of Behavior 2	PSB 4006	3
Neuropsychology	PSB 4240	3
Human Psychophysiology	PSB 4323	3

Psychopharmacology	PSB 4444	3
Developmental Psychobiology	PSB 4504	3
RI: Neurobiology of Learning and Memory	PSB 4810	3
Neuroscience of Sleep	PSB 4842	3
University Honors Seminar in Psychology	PSY 1930	3
Special Topics	PSY 2930	1-3
Careers in Psychology	PSY 3070	3
Cooperative Education	PSY 3949	1-3
Psychometrics and Psychological Testing	PSY 4302	3
History and Systems of Psychology	PSY 4604	3
Evolutionary Psychology	PSY 4810	3
Directed Independent Study*	PSY 4906	1-3
Directed Independent Research in Psychology**	PSY 4915	1-3
Directed Independent Research in Psychology**	PSY 4916	0-3
Special Topics in Psychology	PSY 4930	1-3
Honors Seminar***	PSY 4932	3
Honors Critical Questions in Psychology***	PSY 4935	3
Psychology Study Abroad	PSY 4957	1-6
Honors Thesis***	PSY 4970	1-3
Psychology of Women	SOP 3742	3
Social Behavior Laboratory	SOP 4230C	3
Police Psychology	SOP 4750	3

Psychology and the Law	SOP 4751	3
Current Issues in Social Psychology	SYP 4002	3

\* Maximum of 3 credits of Directed Independent Study may be counted as a psychology elective for the major.

\*\* Maximum of 3 credits of Directed Independent Research may be counted as a psychology elective for the major.

\*\*\* Enrollment is limited to students in the Honors Program.

The same course section cannot be used to satisfy two different requirements for the major at the same time. A course counted as a Psychology laboratory cannot be counted as a Psychology elective simultaneously.

### Cognate Area Requirements

All students must have 6 credits of biological science (to be chosen from BSC 1010, BSC 1011 , BSC 2085, BSC 2086 or equivalents) and 6 credits of mathematics at the level of college algebra or higher (in addition to statistics). The following math courses are accepted as meeting the math graduation requirement for the B.A. in psychology:

College Algebra	MAC 1105	3
Trigonometry	MAC 1114	3
Precalculus Algebra	MAC 1140	3
Precalculus Algebra and Trigonometry	MAC 1147	4 or 5
Methods of Calculus	MAC 2233	3
Calculus with Analytic Geometry 1	MAC 2311	4
Calculus with Analytic Geometry 2	MAC 2312	4
Calculus with Analytic Geometry 3	MAC 2313	4

Laboratories for the cognate courses are NOT required for the major, but students should check with their academic advisors and the controlling departments to determine whether laboratories are needed in order to satisfy (other) departments' requirements or general graduation requirements.

## UPPER-DIVISION HONORS PROGRAM IN PSYCHOLOGY

Qualified students are invited to participate in an Honors Program within the undergraduate Psychology major programs. Students may be admitted to the Honors Program after completion of 45 credits and prior to the completion of 105 hours. Students must have a grade point average of 3.2 overall and in the major for all college-level coursework to be admitted to and to be retained in the Honors Program. Both B.A. Psychology and B.S. Neuroscience and Behavior students are eligible to participate in the Honors Program.

Students in the Honors Program must complete Honors Seminar (PSY 4932, 3 credits), Honors Critical Questions in Psychology (PSY 4935, 3 credits) and Honors Thesis (PSY 4970, normally 1 credit taken one semester and 2 credits the other semester). The Honors Seminar and Honors Critical Questions in Psychology courses may be taken in a student's junior or senior year, either before, after or simultaneously with completion of the Honors Thesis.

Students in the Honors Program are also strongly encouraged to enroll for a Directed Independent Research (PSY 4915 or PSY 4916 for Psychology majors and PSB 4915 or PSB 4917 for Neuroscience and Behavior majors) as soon as they have identified a faculty member to work with to develop their thesis ideas. This should be done as early as possible, but no later than the start of the senior year.

Students must find a faculty member who agrees to supervise them in conducting an honors thesis. An honors thesis is typically an empirical project in which the student participates in all aspects of the research and prepares a written, APA-style report of the project. Alternative options may be approved by the student's faculty advisor.

## THE FAU MAX PLANCK HONORS PROGRAM (MPHP)

Eligible College of Science majors in Biology, Psychology, and Neuroscience and Behavior may apply to participate in this Jupiter-specific honors program for undergraduates. For students pursuing the MPHP, 3 to 6 of the elective credits in their individual program must be applied toward the requirements of the MPHP. These include successful completion of a Capstone experience (1 to 3 credits) and three different MPHP Enrichment courses (1 credit each) from those listed below. A minimum grade of "B" must be achieved in graded courses ("S" in non-graded courses) among these exclusive MPHP course options for the credits to count toward the requirements of the MPHP. Visit the [MPHP website](#) to apply.

## **PSYCHOLOGY**

### UNDERGRADUATE MINOR

*(Minimum of 18 credits required)*

A minor in Psychology is available for students who complete a minimum of 18 credits in psychology, including the following required courses. Of the 18 credits, at least 15 must be earned from FAU. A grade of "C-" or better (unless otherwise noted in the course description) is required in all courses taken as part of the requirements for a minor in Psychology.

Psychology of Human Development	DEP 3053	3
Cognition	EXP 3505	3
Biological Bases of Behavior 1	PSB 3002	3
General Psychology	PSY 1012	3
Experimental Design and Statistical Inference	PSY 3234	3
Social Psychology	SOP 3004	3

## **NEUROSCIENCE AND BEHAVIOR**

### BACHELOR OF SCIENCE (B.S.)

*(Minimum of 120 credits required)*

The B.S. degree in Neuroscience and Behavior is administered jointly by the Department of Psychology and the Department of Biological Sciences. The Neuroscience and Behavior program provides undergraduate preparation for students interested in pursuing graduate degrees in behavioral neuroscience, neurobiology and/or behavioral biology, or in pursuing professional degrees in medicine or veterinary medicine. Qualified students are strongly encouraged to become involved in neuroscience and behavior research projects (normally via a Directed Independent Study, Directed Independent Research or special research course). An optional Honors Thesis, PSY 4970, is available to those students who meet the academic requirements. A grade of "C-" or better (unless otherwise noted in the course description) is required in all psychology, biology and cognate courses taken as part of the requirements for a B.S. with major in Neuroscience and Behavior. However, students must maintain a "C" average in departmental major courses.

## Prerequisite Coursework for Transfer Students

Students transferring to Florida Atlantic University must complete both lower-division requirements (including the requirements of the General Education Program) and requirements for the college and major. Lower-division requirements may be completed through the A.A. degree from any Florida public college, university or community college or through equivalent coursework at another regionally accredited institution. Before transferring and to ensure timely progress toward the baccalaureate degree, students must also complete the prerequisite courses for their major as outlined in the [Transition Guides](#) .

All courses not approved by the Florida Statewide Course Numbering System that will be used to satisfy requirements will be evaluated individually on the basis of content and will require a catalog course description and a copy of the syllabus for assessment.

In addition to the University and College requirements, students are expected to complete all of the following courses. A minimum of 24 of the upper-division credits in the B.S. Neuroscience and Behavior program must be taken at Florida Atlantic University.

## Core Requirements

Biological Principles	BSC 1010	3
Biological Principles Lab	BSC 1010L	1
Biodiversity	BSC 1011	3
Biodiversity Lab	BSC 1011L	1
Comparative Animal Behavior	CBH 4024	3
General Chemistry 1	CHM 2045	3
General Chemistry 1 Lab	CHM 2045L	1
General Chemistry 2	CHM 2046	3
General Chemistry 2 Lab	CHM 2046L	1
Math through Calculus	MAC 2233, 2311, 2312 or 2313	3

Genetics	PCB 3063	4
Organic Chemistry 1 and 2	CHM 2210 and CHM 2211	6
General Physics 1 and 2* or College Physics 1 and 2*	PHY 2048 and PHY 2049 or PHY 2053 and PHY 2054	8
Organic Chemistry Lab	CHM 2211L	2
Biochemistry	BCH 3033	3
Biological Bases of Behavior	PSB 3002	3
General Psychology	PSY 1012	3
Research Methods in Psychology	PSY 3213	3
Experimental Design and Statistical Inference	PSY 3234	3
Intermediate Statistics Lab	STA 3163L	1

\* This degree program does not require that students take Physics lab courses. However, students considering medical school should take the lab sequences. The Physics Department may require labs as corequisites for lecture courses.

### Elective Requirements

Students are expected to complete a minimum of 12 credits of elective courses. Students are free to choose their elective courses from those listed below.

#### *Behavioral Neuroscience*

Cognition	EXP 3505	3
Human Perception	EXP 4204	3
Practical Cell Neuroscience	PCB 4843C	3

***Upper-Division Honors Program in Psychology Sequence \*\*\****

Honors Seminar	PSY 4932	3
Honors Critical Questions in Psychology	PSY 4935	3
Honors Thesis	PSY 4970	1-3

\* Applies to Special Topics courses that are relevant to the neurosciences. Interested students should confirm with the B.S. degree program faculty advisors.

\*\* Maximum of 3 credits of Directed Independent Research may be counted as an elective for the major.

\*\*\* Enrollment is limited to students in the Psychology Honors Program.

**APPLIED MENTAL HEALTH SERVICES  
UNDERGRADUATE CERTIFICATE**

*(Minimum of 17 credits required)*

The undergraduate certificate in Applied Mental Health Services, offered jointly by the Department of Psychology and by the Department of Counselor Education in the College of Education, provides a curricular experience for students who wish to pursue careers in clinical psychology, mental health counseling and allied human services that enhances the student's chosen major. This program is also specialized training for students who wish to pursue graduate degrees in these critical-need careers. For details, see the [Interdisciplinary](#) section of this catalog.

## COMBINED PROGRAMS

### PSYCHOLOGY

#### BACHELOR OF ARTS (B.A.) TO MASTER OF ARTS (M.A.) COMBINED PROGRAM

*(Minimum of 156 credits required)*

### NEUROSCIENCE AND BEHAVIOR TO PSYCHOLOGY

#### BACHELOR OF SCIENCE (B.S.) TO MASTER OF ARTS (M.A.) COMBINED PROGRAM

*(Minimum of 156 credits required)*

The combined bachelor's/master's programs in Psychology will allow highly qualified students to complete the requirements for both a B.A. degree in Psychology or a B.S. degree in Neuroscience and Behavior and an M.A. degree in Psychology in five years. The programs require 156 credits, of which 120 are for the bachelor's degree and 36 credits are for the master's degree. Students apply to the programs in the second semester of their junior year or upon completion of 60 credits in the bachelor's program at FAU. Once admitted, students may take up to 12 credits of graduate coursework in their senior year, which may be used to satisfy the requirements of both the undergraduate and graduate degrees.

### Admissions Requirements

To be eligible for the programs, students must have a minimum GPA of 3.6 in upper division coursework. In addition, they must have research experience either through Directed Independent Research (PSB 4917, PSB 4915, PSY 4915, PSY 4916) or an equivalent research venue (e.g., as a grant-funded research assistant). Finally, students must have secured the agreement of a faculty

member to serve as their graduate mentor prior to applying to the program. The Graduate Record Exam (GRE) is not required.

### Shared Graduate Courses

All graduate courses must be at the 5000 level or higher. Students may enroll in graduate courses from any of the core areas of the program (Behavioral Neuroscience, Cognition, Developmental or Social) only after completing the corresponding undergraduate core course in that area (PSB 3002, Biological Bases of Behavior; EXP 3505, Cognition; DEP 3053, Psychology of Human Development; SOP 3004, Social Psychology, respectively). Similarly, students may enroll in graduate statistics courses (e.g., PSY 6206) only after completing PSY 3234, Experimental Design and Statistical Inference, and STA 3163L, Intermediate Statistics Laboratory.

### Degree Requirements

Students admitted to the programs will fulfill all of the requirements for both the bachelor's and master's degrees, including a master's thesis.

### Funding Opportunities

Students admitted to the programs are eligible for financial support in the form of *Pathways Scholarships* offered through the Graduate College.

## **MASTER'S PROGRAM**

### **PSYCHOLOGY**

#### **MASTER OF ARTS (M.A.)**

*(Minimum of 36 credits required)*

#### **Admission Requirements**

In addition to meeting all of the University and College admission requirements for graduate study, applicants for the Master of Arts (M.A.) degree must meet each of the following criteria:

1. The student must have a baccalaureate degree from an accredited college or university. It is not essential for this to be a degree in psychology.
2. The student must have a score of at least 150 on the verbal component and 150 on the quantitative component of the Graduate Record Examination.
3. The student must have a minimum 3.0 GPA in the last 60 credits of undergraduate work.
4. The student must attain approval for graduate admission from the Department of Psychology.

### **Degree Requirements**

A minimum of 30 credits of coursework and 6 M.A. thesis credits are required to complete the M.A. program.

Three quantitative courses (7 credits) are required, including the 3-credit Experimental Design I course (PSY 6206), the 1-credit Experimental Design 1 Lab course (PSY 6206L) and an additional 3-credit quantitative course approved by the Department of Psychology graduate committee chair. Only courses offered by the Department of Psychology (or other units in the College of Science) can be used to satisfy this additional 3-credit quantitative course requirement.

An additional seven courses (21 credits) are required. Of this total, at least 6 courses must consist of approved Department of Psychology graduate seminars, including a minimum of one regularly offered seminar in each of the following areas: behavioral neuroscience, cognition, developmental and social/personality. Any single course will satisfy the requirement of only one area (e.g., Seminar in Personality and Social Development can fulfill the developmental or social/personality area requirement, but not both). With the approval of the Department of Psychology graduate committee chair, one course taken outside the department may be included in this seven-course requirement.

A total of 6 M.A. thesis credits (PSY 6971) is required. Students must register for M.A. thesis credits the semester after the M.A. thesis proposal is approved by the supervisory committee and during each subsequent regular academic (fall and spring) semester.

An additional 2 credits are required, which may be filled with electives and/or Directed Independent Study (EXP 6908). Students are encouraged (but not required) to take at least 1 credit of Directed Independent Study.

Students are required to maintain a grade point average of "B" (3.0) or better. Courses with grades of

"C+" or lower will not satisfy program requirements.

---

### Quantitative Requirements - 7 credits

Experimental Design 1	PSY 6206	3
Experimental Design 1 Lab	PSY 6206L	1
Third quantitative course approved by advisor		3

### Thesis - 6 credits

Master's Thesis ( <i>may be taken over multiple terms</i> )	PSY 6971	1-6
---	----------	-----

---

### Psychology Graduate Seminars and Electives - 23 credits

*Choose seven courses (21 credits) from the following four areas. At least one seminar course must come from each of the four areas. An additional 2 credits of electives must be taken, which can include EXP 6908, Directed Independent Study.*

#### Cognition

Seminar in Cognitive Development	DEP 6067	3

Special Topics in Behavioral Neuroscience	PSB 6930	3

### **Transfer Students**

Students may transfer up to 6 credits of graduate coursework completed at other institutions toward their M.A. degree. Approval for such transfer is made by the Department of Psychology graduate committee chair.

### **Thesis Advisor and Thesis Committee**

By the end of the first semester of enrollment in the program, students must identify an M.A. thesis advisor. Students are responsible for securing their own advisors. By the second semester, all students

must have an advisor to continue in the program. Students without an advisor will be subject to dismissal.

Students are encouraged to file an M.A. plan of study during the second semester of enrollment in the program. Students pursuing an M.A. along the way to a Ph.D. should also file a Ph.D. plan of study at the same time.

By the end of the second semester of enrollment, students must hold a meeting of their supervisory committee for the purpose of approving the M.A. thesis prospectus. There must be a minimum of three faculty members on the supervisory committee, and at least half of the supervisory committee must be graduate faculty in the Department of Psychology, including the committee chair. Committee composition must be approved by the Department of Psychology graduate committee.

Approval of a written thesis proposal by the supervisory committee must precede the experimental work required for thesis. Approval of the thesis proposal must be obtained during a meeting of the full committee. Additional meetings of the thesis supervisory committee should be held at least once a year to review the student's progress toward the degree. Approval of a written thesis during a full meeting of the supervisory committee is required.

### **Annual Review**

All M.A. students will be evaluated by the entire graduate faculty during an annual meeting. Students who receive two consecutive unsatisfactory evaluations will be subject to dismissal.

## **DOCTORAL PROGRAM**

### **EXPERIMENTAL PSYCHOLOGY DOCTOR OF PHILOSOPHY (PH.D.)**

*(Minimum of 81 credits required)*

The Department of Psychology offers graduate study leading to a Doctor of Philosophy in Experimental Psychology. Students may select major and minor areas of study from four areas of psychology: behavioral neuroscience, cognition, developmental psychology and social/personality.

### **Admission to Doctoral Study**

In addition to meeting all of the University and College admission requirements for graduate study, applicants for the Doctor of Philosophy (Ph.D.) degree must meet each of the following criteria:

1. The student must have a baccalaureate degree from an accredited college or university. It is not essential for this to be a degree in psychology.
2. The student must have a score of at least 153 on the verbal component and 152 on the quantitative component of the Graduate Record Examination.
3. The student must have a minimum 3.0 GPA in the last 60 credits of undergraduate work.
4. The student must attain approval for graduate admission from the Department of Psychology.

An admitted applicant will usually have a strong record of achievement that is higher than the minimum requirements. In considering applications for admission to the Ph.D. program, the decision of the graduate admissions committee will be based on an evaluation of a student's record and the likelihood of success in the program. The committee will consider a number of factors that include, but are not limited to:

1. The applicant's record of achievement based on GPA, GRE scores and letters of recommendation;
2. The applicant's promise for research productivity while in graduate school; and
3. The availability and willingness of a faculty member to serve as a mentor for the student.

Students admitted to the Ph.D. program will be assigned an advisor by the Department of Psychology graduate committee who will supervise their research and chair their M.A. thesis and Ph.D. dissertation committees. Considerable effort is devoted to matching students with advisors. As a consequence, few students change advisors. Changing advisors is not generally recommended because it slows progress toward graduation. The best time to change advisors is after completion of the M.A. degree but before admission to doctoral status. Students who change advisors must do so in consultation with the Department of Psychology graduate committee chair. Students without an advisor cannot continue in the program.

## **Course Requirements**

Ph.D. students will complete the M.A. degree requirements as described above.

A total of 81 credits is required to complete the Ph.D. program. Up to 36 credits (30 credits of coursework and 6 thesis credits) that were used to satisfy the M.A. degree requirements are typically counted toward the Ph.D. degree requirements. No more than 6 M.A. thesis credits may be transferred to satisfy the doctoral degree requirements.

---

## **Quantitative Requirements - 10 credits**

---

Experimental Design 1	PSY 6206	3 <b>or</b>
Experimental Design 2	PSY 6207	3
Experimental Design 1 Lab	PSY 6206L	1
Additional 6 credits at the 6000 level from the College of Science		6

**OR**

Experimental Design 1	PSY 6206	3
Experimental Design 2	PSY 6207	3
Experimental Design 1 Lab	PSY 6206L	1
Additional 3 credits at the 6000 level from the College of Science		3

**Thesis - 6 credits**

Master's Thesis ( <i>may be taken over multiple terms</i> )	PSY 6971	1-6
---	----------	-----

**Major Requirements - 15 credits**

*Choose five courses (21 credits) from the following four areas. Must choose at least one course from each of the four areas. Fifth course can be from any area.*

**Cognition**

Seminar in Cognitive Development	DEP 6067	3
Seminar in Individual Differences in Children's Thinking	DEP 6932	3
Seminar in Human Perception	EXP 6208	3
Seminar in Cognition	EXP 6609	3
Special Topics in Cognition	EXP 6930	3
Cognitive Neuroscience	ISC 5465	3
Special Topics (Cognition)	PSY 5930	3

**Developmental**

Seminar in Cognitive Development	DEP 6067	3
Parent-Child Relationships	DEP 6609	3
Evolutionary Developmental Psychology	DEP 6610	3
Special Topics in Developmental Psychology	DEP 6930*	3
Seminar in Development of Social Cognition	DEP 6931	3
Seminar in Individual Differences in Children's Thinking	DEP 6932	3

\* Special Topics courses (DEP 6930) must be reviewed and approved by the Developmental area coordinator and the student's faculty advisor.

**Developmental Psychology Doctoral Students Only:** Psychology graduate courses not listed above may count toward one of the developmental psychology graduate courses required to complete the area requirements in the major field of study, with the permission of the student's faculty advisor.

### **Social/Personality**

Special Topics in Personality/Social Psychology	PPE 6930	3
Advanced Social Behavior	SOP 6079	3

### **Behavioral Neuroscience**

Principles of Neuroscience	PSB 6037	3
Seminar in Behavioral Neuroscience	PSB 6058	3
Cellular and Molecular Neuroscience	PSB 6345	3
Systems and Integrative Neuroscience	PSB 6346	3
Developmental Neuropsychology	PSB 6516	3
Special Topics in Behavioral Neuroscience	PSB 6930	3

### **Electives - 9 credits**

*Select three courses (9 credits), one from each of the areas not in the student's major area.*

---

**Dissertation - 9 credits (minimum)**

Dissertation	PSY 7980	1-9
--------------	----------	-----

---

**Additional Electives and Dissertation - 32 credits**

*Choose 32 credits of electives (from areas above), dissertation credits (PSY 7980), Advanced Research in Psychology, (PSY 7978), or Directed Independent Study (EXP 6908).*

A total of four quantitative courses (10 credits) is required. All doctoral students must take the 3-credit Experimental Design I course (PSY 6206) or the 3-credit Experimental Design 2 course (PSY 6207), but they need not take both. The 1-credit Experimental Design 1 Lab course (PSY 6206L) is required, but this requirement may be waived with the written approval of the advisor. All quantitative courses outside of the Experimental Design sequence must be approved by the Department of Psychology graduate committee chair. For students who take both Experimental Design I and Experimental Design 2, the third 3-credit quantitative course must be a course offered by the Department of Psychology (or another unit in the College of Science).

Students must take five courses (15 credits) in their major area.

An additional three courses (9 credits) are required, consisting of one regularly offered Department of Psychology seminar in each the following areas of study (excluding the student's major area): behavioral neuroscience, cognition, developmental and social/personality. Any single course will satisfy the requirement of only one area (e.g., Seminar in Personality and Social Development can fulfill the developmental or social/personality area requirement, but not both).

A minimum of 9 Ph.D. dissertation credits (PSY 7980) are required. Students must register for dissertation credits starting the semester after they are admitted to candidacy and during each subsequent regular academic (fall and spring) semester.

An additional 32 credits are required, which may be filled with electives, dissertation credits, Advanced Research in Psychology (PSY 7978) and Directed Independent Study (EXP 6908).

Taken together, doctoral students must complete a minimum of 10 graduate courses (30 credits) in the Department of Psychology (excluding thesis and dissertation credits, advanced research in psychology

and directed independent study).

Students are required to maintain a grade point average of "B" (3.0) or better. Courses with grades of "C+" or lower will not satisfy program requirements.

### **Transfer Students**

Students admitted to the Ph.D. program may transfer up to 30 graduate credits taken at other institutions. Transfer courses must be relevant to the student's program of study and must be approved by the student's advisor and the Department of Psychology graduate studies director. Requests to transfer credits into the student's area of study are not typically approved.

Doctoral students who have completed an M.A. thesis at another university or in another department at FAU may substitute this thesis for the M.A. thesis as part of the requirement for admission to doctoral candidacy if it is approved by the student's advisor and the Department of Psychology graduate committee chair.

### **Admission to Doctoral Status**

Admission to doctoral status requires successful completion of Ph.D. coursework, successful completion and approval of a written M.A. thesis, the formation of a doctoral dissertation supervisory committee and approval of a written dissertation proposal by the doctoral dissertation committee.

In addition, comprehensive exams must be completed before a doctoral student is admitted to candidacy. Comprehensive exams are designed to demonstrate a breadth of knowledge in the student's area. A student's comprehensive exam committee must include at least three members of the graduate faculty in the FAU Department of Psychology. The comprehensive exam committee is chaired by the student's advisor. The minimum comprehensive exam includes an eight-hour, closed-book essay exam, which may be spread across two separate, preferably consecutive, days. Exams may be separated by no more than 72 hours. The student must complete at least two written essays for each member of the committee. Additional evaluation material (e.g., more essays, short answer questions, oral questions) may be requested by the comprehensive exam committee. Exams are graded as follows: pass, fail or conditional pass (a pass grade contingent on successful demonstration of competence not evident in the initial exam). A unanimous pass vote from the committee is required to complete the comprehensive exam degree requirement. Conditional pass results must be satisfactorily addressed within one month of receipt of written feedback or they will be treated as a fail.

### **Dissertation Advisor and Dissertation Committee**

The doctoral dissertation committee must consist of at least five members. At least half of the

committee must be graduate faculty in the Department of Psychology, including the committee chair. At least one member of the doctoral committee must be a faculty member from outside of the Department of Psychology. Committee composition must be approved by the Department of Psychology graduate committee chair. As per University policy, outside committee members must be appointed affiliate members of the graduate faculty. Candidates and advisors must work with the department chair and the director of graduate studies to ensure that the appointment is made in a timely manner.

A central requirement for the Ph.D. degree is submission and defense of a dissertation based on original work in an area of specialization acceptable to the student's doctoral dissertation supervisory committee. The dissertation must be approved by the doctoral dissertation supervisory committee, the department chair and the Graduate College.

Doctoral dissertation supervisory committee approval of a written dissertation proposal must precede the experimental work required for the dissertation. Approval of the dissertation proposal must be obtained during a meeting of the full doctoral dissertation supervisory committee. Additional meetings of the doctoral dissertation supervisory committee should be held at least once a year to review the student's progress toward the degree.

Students who change supervisory committee members after a dissertation proposal has been approved must obtain permission to change the committee from the Graduate College and the Department of Psychology graduate committee chair. A meeting of the new dissertation committee is required to review and approve of the dissertation proposal.

Approval of a written dissertation during a full meeting of the doctoral dissertation supervisory committee is required. A publicly announced departmental lecture summarizing the Ph.D. dissertation research is expected upon successful defense of the dissertation.

### **Annual Review**

All Ph.D. students will be evaluated by the entire graduate faculty during an annual meeting. Students who receive two consecutive unsatisfactory evaluations will be subject to dismissal.

## **URBAN AND REGIONAL PLANNING**

### **Faculty:**

Bourassa, S., Director; Besser, L.; Dumbaugh, E.; Henn, P.; Li, Y.; Merlin, L.; Mitsova, D.; Renne, J.;

Saginer, J.

### **Mission**

The Department of Urban and Regional Planning is a locus of scholars, teachers, practitioners, agents and students committed to the continuous improvement of urban regions and the planning enterprise through research, teaching and service.

The Department provides an environment to discuss, develop and disseminate new ideas and concepts and contribute to the practice of planning directed toward a future that is environmentally, economically and humanly beneficial. The focus of work relies on the recognition and use of multi-scalar connections and interactions of systems and planning activities. The Department encourages involvement in a range of governance activities, including policy framework development, participatory decision-making and community stewardship. It also seeks to exploit the potential of emerging technologies and collaborative engagement in creative and innovative ways.

Current initiatives include global urban networks, climate change, metropolitan form, disaster management, place making, healthy cities and housing market issues.

### **Information**

Students who seek additional information should contact the Department of Urban and Regional Planning at 954-762-5652.

## **URBAN AND REGIONAL PLANNING** **BACHELOR OF URBAN AND REGIONAL PLANNING (B.U.R.P.)**

*(Minimum of 120 credits required)*

The Bachelor Urban and Regional Planning (B.U.R.P.) is a professional program that provides students with the knowledge base and analytical and design skills to address issues that affect the quality of life in neighborhoods, suburbs, cities and regions. The curriculum consists of planning lecture courses, design courses and professional practice courses that give students real-world planning experience. Students select courses from a wide variety of electives that allow them to focus on topics of particular interest. Graduates of the program qualify for positions in a variety of public and private organizations, including local and state planning departments, nonprofit organizations and private-sector planning and development firms.

### **Admission Requirements**

All students must meet minimum admission requirements of the University. Please refer to the [Admissions section](#) of this catalog for a more detailed discussion.

### **Prerequisite Coursework for Transfer Students**

Students transferring to Florida Atlantic University must complete both lower-division requirements (including the requirements of the General Education Program) and requirements for the college and major. Lower-division requirements may be completed through the A.A. degree from any Florida public college, university or state college or through equivalent coursework at another regionally accredited institution.

Before transferring and to ensure timely progress toward the baccalaureate degree, students must also complete the prerequisite courses for their major as outlined in the [Transition Guides](#) . All prerequisite courses must be completed by the Department's designated date or within the first year after transferring to FAU and before reaching senior status (90 total credits).

All courses not approved by the Florida Statewide Course Numbering System that will be used to satisfy requirements will be evaluated individually on the basis of content and will require a catalog course description and a copy of the syllabus for assessment.

### **Degree Requirements**

All students in the Bachelor of Urban and Regional Planning program must complete a minimum of 120 credits, including the following:

1. Satisfaction of all University requirements for baccalaureate degrees;
2. The last 30 upper-division credits (3000/4000-level courses) must be earned in residence at FAU;
3. At least 39 credits of Planning Core courses;

4. At least 9 credits of approved upper-division Elective courses from specific departments, see list below;
5. At least 12 credits of Free Electives;
6. A minimum grade of "C" is required for each core course.

## Urban and Regional Planning Program

---

### Planning Core Courses - 39 credits

Introduction to Urban Planning and Design	URP 3000	3
Planning Methods	URP 4011	3
City Structure and Change	URP 4055	3
Planning Implementation Strategies	URP 4120	3
Public Budgeting and Finance	PAD 4223	3
Introduction to Mapping and GIS	GIS 3015C	3
Introduction to Visual Planning Technology	URP 4254	3
Plan Making and Zoning (1)	URP 4343	3
Sustainable Cities	URP 4403	3
Capital Facilities Planning	URP 4730	3
Site Planning	URP 4870	3
RI: Planning Capstone (3)	URP 4979	3
Advanced Visual Planning Technologies (2)	URP 4255	3

### Notes:

1. URP 3000 is a prerequisite or must be taken at the same time.
2. URP 4254 is a prerequisite.
3. URP 4570 is a prerequisite.

---

### Elective Courses - 9 credits

Students must choose two upper-division electives appropriate to their field of study; these may be

any 3000/4000-level course from the following departments/schools: Architecture, Civil Engineering, Criminal Justice, Communications, Economics, Finance, Geosciences, History, Public Administration, Political Science, Sociology, Urban and Regional Planning or other departments with approval. Below is a list of suggested electives.

American Environmental History	AMH 3630	3
Economics of the Public Sector	ECO 4504	3
Urban and Regional Economics	ECP 3603	3
Environmental Economics	ECP 4302	3
Environmental Issues in Atmospheric and Earth Science	EVR 3019	3
Tourism and Commercial Recreation	GEO 4542	3
Introduction to Mapping and GIS	GIS 3015C	3
Remote Sensing of Environment	GIS 4035C	3
Coastal and Marine Sciences	GLY 3731	3
Earth Systems and Resources	GLY 4012C	3
Public Management and Administration	PAD 3003	3
Managing for Excellence in the Public and Nonprofit Sectors	PAD 4332	3
Administrative Process and Ethics	PAD 4604	3
State and Local Government Administration	PAD 4806	3
Environmental Ethics	PHI 3640	3
Law and American Society	POS 3691	3
Politics of Community Development	PUP 4623	3
Principles of Real Estate	REE 3043	3
The Urban Community	SYD 4602	3

Environmental Planning Methods	URP 4420	3
Planning for Hazards/Disasters	URP 4430	3
Urban Development Planning Methods	URP 4546	3
Housing Policy and Planning	URP 4741	3
Urban Design: Theories and Methods	URP 4883	3
Urban Design Studio 1	URP 4920	3
Planning Internship	URP 4945	3
Planning Abroad	URP 4955	3

### **Free Electives - 12 credits**

### **Second Bachelor's in Urban and Regional Planning**

A second bachelor's in Urban and Regional Planning requires 39 credits of urban and regional planning core courses.

## **URBAN DESIGN**

### **BACHELOR OF URBAN DESIGN (B.U.D.)**

*(Minimum of 120 credits required)*

The Bachelor of Urban Design (B.U.D.) program provides a broad knowledge of the principles and practices of urban design. It is ideal for students who are interested in design of the built environment at the neighborhood, community and city scale, with an emphasis on sustainable development. The program offers an interdisciplinary approach for students who plan to pursue a professional career in an urban discipline, such as urban and regional planning, urban development policy, real estate development, municipal and planning law, as well as design disciplines, including architecture and landscape architecture at the graduate level.

The program utilizes the South Florida metropolitan region as an "urban living laboratory" for the students to exercise their urban design creativity, but also covers national and global context. Students' experience will also benefit from partnerships forged between the B.U.D. program and practitioners from private design and consulting firms in the South Florida metropolitan area, with both local and international experience.

## Admission Requirements

All students must meet minimum admission requirements of the University. Please refer to the [Admissions section](#) of this catalog for a more detailed discussion.

## Prerequisite Coursework for Transfer Students

Students transferring to Florida Atlantic University must complete both lower-division requirements (including the requirements of the General Education Program) and requirements for the college and major. Lower-division requirements may be completed through the A.A. degree from any Florida public college, university or state college or through equivalent coursework at another regionally accredited institution.

Before transferring and to ensure timely progress toward the baccalaureate degree, students must also complete the prerequisite courses for their major as outlined in the [Transition Guides](#). All prerequisite courses must be completed by the Department's designated date or within the first year after transferring to FAU and before reaching senior status (90 total credits).

All courses not approved by the Florida Statewide Course Numbering System that will be used to satisfy requirements will be evaluated individually on the basis of content and will require a catalog course description and a copy of the syllabus for assessment.

## Degree Requirements

The interdisciplinary nature of the program allows students the option to take electives from a variety of different departments and schools. The core courses are offered in the Department of Urban and Regional Planning and the School of Architecture. There are three types of core courses: lectures, studio/lab and participation in professional seminars. All students in the Bachelor of Urban Design program must complete a minimum of 120 credits, including the following:

1. Satisfaction of all University requirements for baccalaureate degrees;
2. The last 30 upper-division credits (3000/4000-level courses) must be earned in residence at FAU;
3. At least 36 credits of Urban Design Core courses;
4. At least 12 credits of upper-division-approved Elective courses from specific departments, see list below;
5. At least 12 credits of Free Elective courses; and
6. A minimum grade of "C" is required for each core course.

The course materials taught in the core courses build upon each other. Therefore, students are highly

recommended to follow the term schedules identified below. Following the term schedule is also very important in order to ensure the timely graduation of the students.

---

### **Urban Design Core Courses - 36 credits**

Introduction to Mapping and GIS	GIS 3015C	3
Introduction to Urban Planning and Design	URP 3000	3
City Structure and Change	URP 4055	3
Introduction to Visual Planning Technology	URP 4254	3
Advanced Visual Planning Technologies (1)	URP 4255	3
Plan Making and Zoning (2)	URP 4343	3
Sustainable Cities	URP 4403	3
Site Planning	URP 4870	3
Urban Design: Theories and Methods	URP 4883	3
Urban Design Studio 1 (2)	URP 4920	3
RI: Urban Design Studio 2 (3)	URP 4922	3
RI: Urban Design Capstone (4)	URP 4923	3

### **Notes:**

1. URP 4254 is a prerequisite.
2. URP 3000 is a prerequisite or must be taken at the same time.
3. URP 4920 is a prerequisite.
4. URP 4922 is a prerequisite.

---

### **Elective Courses - 12 credits**

Students must select at least 12 credits of upper-division electives appropriate to their field of study; these may be any 3000/4000-level course from the following departments/schools: Architecture, Civil Engineering, Criminal Justice, Communications, Economics, Finance, Geosciences, History, Public Administration, Political Science, Sociology, Urban and Regional Planning or other departments with

approval. Below is a list of suggested electives.

Planning Methods	URP 4011	3
Planning Implementation Strategies	URP 4120	3
Environmental Planning Methods	URP 4420	3
Capital Facilities Planning	URP 4730	3
Directed Independent Study	URP 4905	3
Planning for Hazards/Disasters	URP 4430	3
Urban Development Planning Methods	URP 4546	3
Housing Policy and Planning	URP 4741	3
Planning Internship	URP 4945	3
Planning Abroad	URP 4955	3
Dynamic Design Methods 1	ARC 4057	3
Ethics and Architecture	ARC 4202	3
Contemporary Design Theories	ARC 4220	3
Designing Safer Communities with CPTED	ARC 4384	3
Architecture and Urbanism Study Abroad	ARC 4950	3
American Cultural Landscape	GEO 4422	3
Tourism and Commercial Recreation	GEO 4542	3
Urban Geography	GEO 4602	3
Transportation and Spatial Organization	GEO 4700	3
Introduction to Mapping and GIS	GIS 3015C	3
Environmental Ethics	PHI 3640	3
The Urban Community	SYD 4602	3

Introduction to the Nonprofit Sector	PAD 4144	3
Principles of Real Estate	REE 3043	3
Law and American Society	POS 3691	3
Politics of Community Development	PUP 4623	3

Note.

1. URP 3000 is a prerequisite or must be taken at the same time.

### **Free Electives Course - 12 credits**

Free electives are taken in other FAU Colleges. Students are advised to consider additional courses listed under "Suggested Elective Courses," although other choices are permitted.

## **HONORS PROGRAM**

The Honors Program provides FAU students the opportunity to achieve academic excellence beyond the level of standard coursework by completing honors-level enrichment in Urban and Regional Planning or Urban Design.

Students interested in pursuing honors designation in Urban and Regional Planning or Urban Design are required to meet the eligibility and admission requirements noted below. Each student's honors program of study will include at least six credits in honors coursework in upper-level planning/urban design courses.

There are two pathways to attaining Honors in the Major in Urban and Regional Planning or Urban Design. Undergraduate students who successfully fulfill all requirements associated with one of the pathways noted below and have a final cumulative GPA of 3.0 or greater at the time of degree conferral will receive a designation of Honors in the Major on their transcripts. The transcript notations are:

Honors in the Major in Urban and Regional Planning or Urban Design: Honors Capstone Thesis  
or

Honors in the Major in Urban and Regional Planning or Urban Design: Honors Capstone Research

### **Requirements for Eligibility and Admission to the Honors Program in Urban and Regional Planning or Urban Design:**

(Program entry is limited to 20 percent of students within the Urban and Regional Planning or Urban Design major.)

1. Completed at least five upper-level (4000) courses in B.U.R.P. or B.U.D.;
2. Cumulative undergraduate GPA of at least 3.3 in core courses;
3. Cumulative undergraduate GPA of at least 3.0 overall;
4. Formal application form, [which may be found here](#), must be submitted after completion of 90 credits no later than three weeks prior to the beginning of the semester for which the student seeks to enroll in the Honors Program.

***The application package should include:***

1. Application form to be signed by the mentoring faculty;
2. Unofficial transcript;
3. Résumé;
4. Personal statement;
5. A letter of support by the mentoring faculty.

**Requirements to Maintain Eligibility in the Honors Program in Urban and Regional Planning or Urban Design:**

1. Maintain good academic and ethical standing;
2. Maintain cumulative undergraduate GPA of at least 3.3 in core courses;
3. Maintain cumulative undergraduate GPA of at least 3.0 overall;
4. In the beginning semester, complete at least one **Honors Compact** in upper-level planning/urban design courses with a grade of “B” or higher to prepare for independent research and honors-level enrichment;
5. For the thesis option, B.U.R.P. students must complete URP 4978, RI: Honors Planning Capstone (3 credits), in lieu of URP 4979, RI: Planning Capstone, with a grade of "B" or higher. B.U.D. students must complete URP 4924, RI: Honors Urban Design Capstone (3 credits), in lieu of URP 4923, RI: Urban Design Capstone, with a grade of "B" or higher.

If any of the above standards for maintaining eligibility in the program are not met, the student will be advised accordingly on how to undertake remedial actions.

Students will not be allowed to continue in the Honors Program for:

1. Violation of the Code of Academic Integrity;
2. Any grade of less than “C” in core courses and less than “B” in the honors course and/or Honors

Compact.

## **Honors in the Major in Urban and Regional Planning or Urban Design: Honors Capstone Thesis**

### ***Honors Level Enrichment***

Honors level enrichment is provided in the form of extensive mentoring in practical research by departmental faculty or approved departmental-affiliated faculty culminating in production of a thesis.

Three credits are achieved through an Honors Compact with the mentoring faculty in a regularly taught course where the student will have the opportunity to participate in honors-level enrichment activities, prepare for individual research and demonstrate academic excellence. Students must complete the Honors Compact Proposal and Approval Form and submit it to the department chair (or the director of the honors program to which the course will be applied) no later than the "last day to drop/add courses without consequences," according to FAU's Academic Calendar, for the term in which the Honors Compact will be completed. Guidelines for completing an Honors Compact and the form may be found [here](#).

A student who successfully completes an Honors Capstone Thesis in the B.U.R.P. or B.U.D. program will receive the degree with departmental honors, to be noted on the student's transcript, along with the title of the Honors Capstone Thesis. The Honors Capstone Thesis will be preserved in a separate collection in the FAU Wimberly Library.

### ***Honors Capstone Thesis Experience***

B.U.R.P. students must complete URP 4978, RI: Honors Planning Capstone (3 credits), in lieu of URP 4979, RI: Planning Capstone, with a grade of "B" or higher. B.U.D. students must complete URP 4924, RI: Honors Urban Design Capstone (3 credits), in lieu of URP 4923, RI: Urban Design Capstone, with a grade of "B" or higher. In case students fail to complete URP 4978 or URP 4924 with a grade of "B" or higher, the credits earned may count toward their bachelor's degree without the honors designation, as long as the student meets the requirements for successful completion of the capstone course in the B.U.R.P. or B.U.D. program.

The honors thesis will be supervised by a thesis committee of at least two faculty with a terminal degree in the discipline and affiliation with the Department of Urban and Regional Planning. The committee will review the thesis and if the student's work is judged to meet the standards for an honors thesis, the student will be allowed to proceed with the oral defense.

If the committee determines that the student's work on the thesis does not meet the minimal standard

required for successful completion of an honors-level course, the following steps will be undertaken: The faculty supervisor will discuss with the student the specific nature of the issues that need to be addressed AND the committee will request that the student make substantive changes to the thesis within a specified period of time (typically prior to the graduation date).

If the requirements are still not met, students will receive a grade for the course that will count toward their degree in Urban and Regional Planning or Urban Design, but will not receive the honors designation, as long as they meet the requirements for a successful completion of the capstone course in B.U.R.P. or B.U.D.

Students will be encouraged to seek topics that can be incorporated in service learning, interdisciplinary research and inquiry, creativity, civic engagement and collaboration with South Florida communities.

Students will be encouraged to seek opportunities for publication/presentation such as participation in the *Undergraduate Research Symposium*, *Distinction through Discovery* competitions, *FAU Undergraduate Research Journal*, and National Collegiate Honors Society conference, among others.

### **Honors in the Major in Urban and Regional Planning or Urban Design: Honors Capstone Research**

The Department of Urban and Regional Planning offers an Honors Research program that recognizes outstanding research accomplishments of undergraduate students. Eligible students must meet the requirements for eligibility, admission and the maintenance of eligibility as noted above. Students usually begin, then conduct independent supervised research in their junior and senior years. Presentation of a poster session or seminar at a local, regional, national or international research conference/symposium describing the results of students' research is required.

#### ***Honors Level Enrichment***

Honors level enrichment is provided in the form of extensive mentoring in practical research by departmental faculty or approved departmental-affiliated faculty culminating in one or more of the following: production of a report for an external agency or internal use, a journal article, or a grant application. The research results will be disseminated via a research poster session or a conference/symposium presentation.

#### ***Honors Capstone Research Experience***

The Honors Capstone Research Experience consists of two options:

Option 1: At least two semesters of URP 4910, Directed Independent Research, with a confirmed faculty mentor in the junior or senior year.

Option 2: At least one semester of a designated research-intensive (RI) course with a grade of “B” or higher and at least one semester of URP 4910, Directed Independent Research, with a confirmed faculty mentor in the junior or senior year.

In order to qualify for Honors Designation, the credits mentioned in Options 1 and 2 must be achieved through an Honors Compact with the mentoring faculty as explained above. Note that students choosing the Honors Capstone Research option must complete either URP 4979, RI: Planning Capstone, or URP 4923, RI: Urban Design Capstone, with an Honors Compact.

### ***Honors Capstone Research Outcomes***

1. Production of a high-quality report for an external agency or internal use, a research grant application, conference paper or journal article
2. Dissemination of research results via a presentation or poster session at a local, regional, national or international research conference/symposium.

If the requirements are not met, the student will receive a grade for the course that will count toward her/his degree in Urban and Regional Planning or Urban Design, but will not receive the honors designation, as long as the student meets the requirements for a successful completion of the capstone course in B.U.R.P. or B.U.D.

Students will be encouraged to seek topics that can be incorporated in service learning, interdisciplinary research and inquiry, creativity, civic engagement and collaboration with South Florida communities.

Students will be encouraged to seek opportunities for publication/presentation such as participation in the *Undergraduate Research Symposium*, *Distinction through Discovery* competitions, *FAU Undergraduate Research Journal*, and National Collegiate Honors Society conference, among others.

## **ADVANCED STANDING PROGRAMS**

### **ARCHITECTURE TO URBAN AND REGIONAL PLANNING**

#### **BACHELOR OF ARCHITECTURE (B.ARCH.) TO**

#### **MASTER OF URBAN AND REGIONAL PLANNING (M.U.R.P.)**

#### **ADVANCED STANDING PROGRAM**

This program offers FAU Bachelor of Architecture students the opportunity to complete the M.U.R.P. degree program in less time than would be required normally after graduating with the B.Arch. B.Arch. students complete up to 12 credits of M.U.R. P. core courses during their senior and thesis (fourth and fifth) years. These courses count as electives toward the the B.Arch. The remaining 36 credits required for the M.U.R.P. may be completed in as few as 15 months following graduation with the B.Arch.

### Admission Requirements and Academic Standing

1. Applications to the advanced standing program may be submitted by B.Arch. students during their senior or thesis (fourth or fifth) year of study. Applicants must have no academic deficiencies a the time of application.
2. Applicants must have a minimum undergraduate FAU GPA of 3.25 in order to be admitted to the program. The GRE will be waived for these students. Students who meet the GPA requirement, provide a positive letter of support from a full-time School of Architecture faculty member and provide a strong letter of intent will be eligible for admission. Other students will follow graduate application procedures as well as departmental requirements for admission to this program.
3. Students must graduate with the B.Arch. as soon as all of the requirements for that degree have been met. Students must maintain a minimum GPA of 3.0 across all courses applied to the M.U.R. P., including the credits that apply to both the B.Arch. (as electives) and the M.U.R.P. Both degrees require a total of 207 credits: 159 for the undergraduate degree and 48 for the master's degree, with a maximum of 12 graduate, URP credits used to satisfy requirements for both degrees.

### Degree Requirements

The following course schedule gives an example of how B.Arch. students who enroll in the advanced standing M.U.R.P. program could complete the requirements for that program.

---

#### Required M.U.R.P. courses

---

##### *B.Arch. Senior Year - Fall - 3 credits*

---

History and Theory of Planning	URP 6101*	3
--------------------------------	-----------	---

---

##### *B.Arch. Senior Year - Spring - 3 credits*

---

Sustainable Cities	URP 6406*	3
--------------------	-----------	---

---

##### *B.Arch. Thesis Year - Spring - 3 credits*

Planning Methods	URP 6200*	3
<b><i>B.Arch. Thesis Year - Fall - 3 credits</i></b>		
Legal Aspects of Planning	URP 6873*	3
<b><i>Receive B.Arch. degree</i></b>		
<b><i>Master Year - First Summer - 6 credits</i></b>

<b>Receive M.U.R.P. degree</b>		

\* Graduate courses used as electives toward the bachelor's degree.

\*\* B.Arch. students with a grade of "B" or better in ARC 3374 may substitute a graduate elective for URP 6873.

**URBAN DESIGN TO URBAN AND REGIONAL PLANNING  
BACHELOR OF URBAN DESIGN (B.U.D.) TO  
MASTER OF URBAN AND REGIONAL PLANNING (M.U.R.P.)  
ADVANCED STANDING PROGRAM**

**URBAN AND REGIONAL PLANNING  
BACHELOR OF URBAN AND REGIONAL PLANNING (B.U.R.P.) TO  
MASTER OF URBAN AND REGIONAL PLANNING (M.U.R.P.)  
ADVANCED STANDING PROGRAM**

This program allows FAU Bachelor of Urban Design and Bachelor of Urban and Regional Planning students the opportunity to complete the M.U.R.P. in less time than would be required normally after completing the B.U.D. or B.U.R.P. B.U.D. and B.U.R.P. students may complete up to 12 credits of M.U.R.P. core courses during their senior year. These courses count as electives toward the B.U.D. or B.U.R.P. The remaining 36 credits required for the M.U.R.P. may be completed in as few as 15 months following graduation with the B.U.D. or B.U.R.P.

**Admission Requirements and Academic Standing**

1. Applications to the advanced standing program may be submitted by B.U.D. or B.U.R.P. students during their senior year of study. Applicants must have no academic deficiencies at the time of application.
2. Applicants must have a minimum undergraduate FAU GPA of 3.25 in order to be admitted to the program. The GRE will be waived for these students. Students who meet the GPA requirement, provide a positive letter of support from a full-time Department of Urban and Regional Planning faculty member and provide a strong letter of intent will be eligible for admission. Other students will follow graduate application procedures as well as departmental requirements for admission to this program.
3. Students must graduate with the B.U.D. or B.U.R.P. as soon as all of the requirements for those degrees have been met. Students must maintain a minimum GPA of 3.0 across all courses applied to the M.U.R.P., including the credits that apply to both the B.U.D. or B.U.R.P. (as electives) and the M.U.R.P. Both degrees require a total of 168 credits: 120 for the undergraduate degree and 48 for the master's degree, with a maximum of 12 graduate, URP credits used to satisfy requirements for both degrees.

**Degree Requirements**

The following course schedule gives an example of how B.U.D. and B.U.R.P. students who enroll in the advanced standing M.U.R. P. program could complete the requirements for that program.

**Receive M.U.R.P. degree**

\* Graduate courses used as electives toward the bachelor's degree.

\*\* B.U.R.P. students who have completed URP 4945 with a grade of "S" may substitute a graduate elective for URP 6945. B.U.R.P. students with a grade of "B" or better in both URP 4254 and URP 4870 may substitute a graduate elective for URP 6873. B.U.D. students with a grade of "B" or better in both ARC 3374 and URP 4254 may substitute a graduate elective for URP 6873. B.U.D. and B.U.R.P. students with a grade of "B" or better in URP 4403 may substitute a graduate elective for URP 6406.

## MASTER'S PROGRAM

### URBAN AND REGIONAL PLANNING

### MASTER OF URBAN AND REGIONAL PLANNING (M.U.R.P.)

*(Minimum of 48 credits required)*

The Master of Urban and Regional Planning (M.U.R.P.) is a fully accredited professional degree designed for individuals interested in careers as urban and/or regional planners. Individuals from a wide variety of undergraduate backgrounds, including architecture, design, applied arts, engineering, humanities, social sciences, geography and urban and environmental studies, are encouraged to apply.

#### **Admission Requirements**

Applicants for admission must hold a bachelor's degree from an accredited school. Each applicant should have a grade point average (GPA) of 3.0 or higher in the last 60 credits. A personal statement of no more than 1,000 words is also required. A Graduate Record Examination (GRE) is not required but may be submitted as additional evidence of an applicant's readiness for the program.

An international student for whom English is a second language is required to achieve a minimum score of 550 (IBT of 61 or higher) on the Test of English as a Foreign Language (TOEFL). A graduate of a college or university outside of the United States who has completed an academic program equivalent to an American bachelor's degree may apply for admission. All international applicants

whose transcripts are from non-U.S. institutions must have their credentials evaluated course by course, including the GPA, by a professional evaluation service. A service may be found at [www.NACES.org](http://www.NACES.org).

## Degree Requirements

The M.U.R.P. curriculum is a two-year, 48-credit program. It is designed and structured to allow timely completion for both full-time (9-12 credits per semester) and part-time (6 credits per semester) students.

The M.U.R.P. curriculum is structured into three components: core courses (27 credits), electives (15 credits) and synthesis (6 credits).

---

### Core Courses - 27 credits

History and Theory of Planning	URP 6101	3
Urban Governance	URP 6115	3
Legal Aspects of Planning	URP 6131	3
Planning Methods 1	URP 6200	3
Statistics for Urban Planning	URP 6211	3
Introduction to GIS in Planning	URP 6270	3
Urban Spatial Structure	URP 6840	3
Site Planning	URP 6873	3
Sustainable Cities	URP 6406	3

### Synthesis - 6 credits

#### *Thesis Option* (two semesters of 3 credits each)

Master's Thesis	URP 6971	3
-----------------	----------	---

#### *Non-Thesis Option*

Planning Workshop	URP 6920	3
Planning Project	URP 6979	3

---

## **Electives - 15 credits**

*Choose five courses in consultation with advisor.*

**The core component** provides planning knowledge, skills and values. Planning knowledge includes: the structure and functions of urban settlements, history and theory of planning processes and practices, and administrative, legal and political aspects of plan-making and policy implementation. Planning skills focus on: problem formulation, research skills and data gathering; quantitative analysis and computers; written, oral and graphic communications; collaborative problem solving, plan-making and program design; and the synthesis and application of knowledge to practice. Discussion of planning values provides students with the basis for becoming ethical practitioners who are aware of, and responsible for, the ways their activities affect and promote societal and individual concerns.

**Electives** permit advanced study in planning subfields. Elective courses are offered in such areas as:

- Environmental Planning
- Housing, Community and Economic Development
- Urban Design
- Transportation and Land Use Planning

## **Academic Standing**

Students are considered to be in good academic standing if they are making satisfactory progress toward the M.U.R.P. degree. Students are expected to maintain a minimum 3.0 cumulative average throughout the course of study; failure to maintain this average for two successive semesters will result in recommended dismissal. Students admitted conditionally shall satisfy all the conditions prior to earning 18 M.U.R.P. credits to avoid recommended dismissal. Only grades of "C" or higher are acceptable ("C-" is not acceptable) in fulfilling the requirements for the M.U.R.P. degree. Students may not graduate with more than one grade below a "B-" in core courses (in such cases, these courses must be repeated for a grade of "B-" or higher).

Acceptance of transfer credits from approved institutions is dependent upon the pertinence of the work to the M.U.R.P. degree requirements. Transfer of credit should normally occur at the time of admission and is limited to 6 credits. Transfer credit can be given only for courses that have not been applied to another degree or preparatory work.

Waivers from specific course (but not the associated credit) requirements may be granted upon approval of the Department Director.

## CERTIFICATE PROGRAMS

Urban and Regional Planning participates in interdisciplinary certificate programs in conjunction with the College of Science, including the graduate [Geographic Information Systems](#) certificate and the graduate [Environmental Restoration](#) certificate. The Department also offers two certificate programs described below; however, these are currently on hiatus.

### **ECONOMIC DEVELOPMENT AND TOURISM** GRADUATE CERTIFICATE

*(Minimum of 12 credits required)*

**This program is on hiatus and currently not accepting students.**

This certificate provides students with the knowledge and skills needed to help cities with their built and natural attractions to enhance their revenue base and improve their citizens' quality of life. The role of the economic development planner today is frequently directed at tourism in the form of urban entertainment centers, reinvigorated downtowns and waterfronts or assessing the potential value to the cost of a convention center or stadium. Urban physical attributes like greenways, urban river trails and parks also provide a base for enhancing economic development while contributing to the area's quality of life.

Students pursuing this program are required to maintain a 3.0 cumulative grade point average throughout the completion of the certificate. Students cannot complete a certificate program with more than one grade below a "B-."

The Economic Development and Tourism certificate program requires three courses that emphasize the varied inputs to a good economic development plan and an approved elective. The courses are:

Urban Revitalization Strategies	URP 6545
Economic Development Planning	URP 6549
Elective	URP

## **SUSTAINABLE COMMUNITY PLANNING** **GRADUATE CERTIFICATE**

*(Minimum of 12 credits required)*

**This program is on hiatus and currently not accepting students.**

This certificate is directed at practicing planners, public administrators, civic leaders and neighborhood activists with social science backgrounds who wish to improve existing skills or gain new skills in reviving urban core areas, encouraging economic development and creating sustainable communities. Community revitalization is a critical element that will ultimately determine how our cities cope with increasing challenges associated with growth and change.

Students pursuing this program are required to maintain a 3.0 cumulative grade point average throughout the completion of the certificate. Students cannot complete a certificate program with more than one grade below a "B-."

The certificate program consists of three required courses covering economic development, environmental planning and site planning, and one elective course. They are:

---

Environmental Analysis in Planning	URP 6425
------------------------------------	----------

---

Urban Revitalization Strategies	URP 6545
---------------------------------	----------

---

Site Planning	URP 6873
---------------	----------

---

## **Academic Mission**

At our core, we are change-makers driven to transform and empower individuals, families and communities by advocating for justice, mobilizing resiliency and promoting equality across our one human race. This is the mission that propels us forward as we inspire and prepare tomorrow's social work and criminal justice leaders, scholars, practitioners and policymakers to effect positive change in the world.

The immense faculty expertise and strong community partnerships within our two schools – the Phyllis and Harvey Sandler School of Social Work and the School of Criminology and Criminal Justice – produce graduates who are prepared to make a difference. Our alumni enter the fields of social work and criminal justice fully trained to analyze, implement and evaluate criminal justice and social welfare policies and practices; address discriminatory systems and processes; provide direct services to vulnerable populations; restore justice and promote equal access to care.

## **Degree Programs**

- Bachelor of Arts in Criminal Justice (B.A.)
- Bachelor of Social Work (B.S.W.)
- Bachelor of General Studies (B.G.S.)
- Master of Science in Criminology and Criminal Justice (M.S.)
- Master of Social Work (M.S.W.)
- Doctor of Social Work (D.S.W.)

## **General Studies Degree Program**

The Bachelor of General Studies (B.G.S.) degree program enables students to design a plan of study tailored to their personal interests and specific career goals. The 120-credit program includes 15 credits of upper-division coursework in one discipline, which students select in consultation with an advisor. For more B.G.S. details and degree requirements, refer to the [Degree Programs section](#) of this catalog.

Details for all other degree programs are included beneath their respective school headings below.

## **Specialization Certificates**

- Graduate Certificate in Addictions
- Graduate and Undergraduate Child Welfare Certificates
- Graduate and Undergraduate Healthy Aging Certificates
- Graduate Sexuality and Gender Education Certificate
- Graduate and Undergraduate Social Justice Certificates

Details for all certificate programs are included beneath their respective school headings below.

## BACHELOR'S DEGREE PROGRAM INFORMATION

### **Admission Requirements and Recommendations**

Applicants for admission to the College of Social Work and Criminal Justice must meet the general freshman or transfer admission requirements of the University. Consult the [Admissions section](#) of this catalog for specific requirements.

Students applying to the College of Social Work and Criminal Justice must have a minimum cumulative grade point average of 2.0 and have completed the necessary prerequisite coursework associated with the particular prospective degree program. For additional admission requirements for each school, consult the appropriate sections below.

Should there be any outstanding requirements at the time of application to the College, attempts should be made to complete these deficiencies early in the junior year.

Successful achievement of the educational objectives of degree programs is based upon the assumption that students have attained general education competencies. Excessive enrollments in lower-level (1000/2000) courses should be avoided, unless these credits are to fulfill prerequisites. In addition, transfer students should have fulfilled the University's writing requirement (WAC) and math requirement (Gordon Rule); see the [Degree Requirements section](#) of this catalog for details.

### **Degree Requirements**

All candidates for a baccalaureate degree from the College of Social Work and Criminal Justice must satisfy all:

1. General baccalaureate degree requirements of the University, with a minimum of 120 approved credits in academic courses.

2. Requirements for the degree as specified by the school in which the program is offered. These requirements are listed in the sections describing the various degree programs below.
3. Requirements of the College of Social Work and Criminal Justice outlined below.

## Requirements of the College of Social Work and Criminal Justice

1. Students must declare a major as early as possible.
2. Students must complete each course and the number of credits required in the major as prescribed by the particular degree program. Courses in the major must be completed with a grade of "C" or better. A grade of "C-" does not satisfy any graduation requirement and does not count toward the 120 credits required for a degree. Any coursework in the major's field transferred from another institution must be approved by the major's school.
3. Outstanding prerequisites should be satisfied early in the junior year.
4. Third attempts in core courses require completion of the College of Social Work and Criminal Justice Undergraduate Petition. The petition is reviewed by the program coordinator for the student's major in consultation with advising personnel. Denial of the third attempt for a course requires the student to meet with Academic Advising to discuss changing the student's major.
5. A minimum FAU grade point average of 2.0 in all coursework attempted is required, except in the Bachelor of Social Work, which requires a minimum FAU GPA of 2.5 to begin the practice class sequence and to be eligible for field education.
6. Students in the Sandler School of Social Work must complete required field internship hours as outlined in the school's graduation requirements. Internship credits earned by students in the School of Criminology and Criminal Justice can be counted as elective hours, but they are not required to graduate. Consult with the appropriate faculty internship coordinator for more information and internship planning.
7. **Students seeking waivers from any given requirement must still fulfill the credit requirement.** For example, students waived from a required SOW course must take a SOW course in its place that is offered for the same amount of credits as the waived course. Waivers must be approved according to school procedures. **Students should consult with their faculty program coordinator.**
8. A minimum of 45 credits toward the degree must be at the upper-division (3000/4000-level courses), and the final 30 upper-division credits must be earned in residence at FAU.
9. Students should be aware of curriculum changes pertinent to their academic year but subsequent to the publishing of this catalog.
10. As students prepare for program completion and graduation from the University, they must consult with an academic advisor to review their degree audit during the semester prior to intended graduation.

## **Curriculum Progression and Advisement**

The College of Social Work and Criminal Justice seriously regards its responsibility and partnership with its students to ensure efficient and effective progression through the various curricula. Appropriate academic advising is one means by which such progression occurs. Upon entry into the College, students must consult with an academic advisor for initial program review and planning. During the course of the student's tenure in the College, each student must seek academic advisement in the respective major. Faculty and professional advisors are available to assist students in appropriate curriculum progression, which includes ensuring the fulfillment of state and program requirements.

## **Foreign Language Requirements**

All students must satisfy the foreign language requirement for admission to the University. Students in the baccalaureate Criminal Justice degree program need to satisfy the University's foreign language graduation requirement (see the [Degree Requirements section](#)).

## **Graduation Requirements**

Students in the College of Social Work and Criminal Justice may not cross-enroll at another institution during their graduation semester. Students should make advising appointments in a timely manner to ensure requirements are complete for graduation.

Students may not graduate with incomplete ("I") grades. Please note the Incomplete Grades policy listed under The Grading System link in the [Academic Policies and Regulations section](#) of this catalog.

## **Student Responsibility**

1. Students are responsible for reading this University Catalog and the Academic Calendar and registering, adding, dropping and/or withdrawing from courses in a timely manner. Students must meet all course prerequisites and corequisites.
2. Students who are enrolled at another institution are responsible for having their grades transferred to FAU at the end of each semester.
3. All social work students are required to meet with their advisor prior to registration each semester.
4. An Application for Degree must be submitted to the academic advisor within the first two weeks of the intended semester of graduation. See the University's [Academic Calendar](#) for important dates. Faculty and staff are not responsible for reminding students of deadlines.

## **Students Targeted for Academic Retention (STAR) Program**

Students Targeted for Academic Retention (STAR) is a program for students who have a low FAU

GPA or otherwise fall under an academic standing category that is less than satisfactory. These categories include: placed on probation, continued on probation, suspension and dismissal. Within the program, students with a low GPA or unsatisfactory academic standing receive a registration hold on their account and are contacted to fulfill the required criteria in order to have the hold removed. A combination of the following need to be met before a student is cleared to register: 1) workshop targeting academic deficits and student support; 2) advising appointment for a strategic academic plan; and 3) additional requirements (ad-hoc basis) will be required. The Advisor for Student Engagement for the College is the point person for the STAR program.

### **Disruptive Student Behavior**

The College of Social Work and Criminal Justice honors the individual and collective pursuits and outcomes that are facilitated by its faculty and engaged in by its students. A positive learning environment is essential for the provision of a quality education. The classroom must be respected as a place of individual dignity and educational growth and development. Consequently, any interference with or obstruction of the educational process is considered disruptive and will not be tolerated. Disruptive conduct is a violation of the Florida Atlantic University Student Code of Conduct and will be treated as such.

### **Student Services**

The College of Social Work and Criminal Justice encourages student success and excellence and strives to make the University experience all that it can be. [The College's advising center](#) provides professional staff to assist students throughout their academic experience at FAU. Staff members are located at four campuses for easy access; appointments and walk-in days are available.

### **Student Success Conference**

The Sandler School of Social Work is committed to ensuring the integrity of its degree program and the certifiability of its majors as future social workers. To this end, the School has established a Student Success Conference to address difficulties by which a student's academic progression in the field may be hindered. Complete information regarding the Student Success Conference is found [online](#). Refusal to attend the Student Success Conference will result in the student's automatic dismissal from the Sandler School of Social Work.

## **COMBINED DEGREE PROGRAM INFORMATION**

The School of Criminology and Criminal Justice offers a [combined degree program](#) where students receive a Bachelor of Arts with Major in Criminal Justice and a Master of Science with Major in

Criminology and Criminal Justice in as little as five years. See the program's full description under the [School of Criminology and Criminal Justice](#) heading.

An Advanced Standing program is also available for a limited number of Master of Social Work (M.S.W.) students who have completed their Bachelor of Social Work (B.S.W.) degree within the last five years. See the program's full description under the [School of Social Work](#) heading later in this section.

## MASTER'S DEGREE PROGRAM INFORMATION

Specific requirements for master's degree programs in the College of Social Work and Criminal Justice are detailed within each school's description in this College section.

## DOCTORAL DEGREE PROGRAM INFORMATION

The Sandler School of Social Work offers a Doctor of Social Work (D.S.W.). Specific program requirements are detailed within the School's description later in this section.

## CERTIFICATE PROGRAMS

The Sandler School of Social Work offers [undergraduate](#) and [graduate](#) certificates in Child Welfare, [undergraduate](#) and [graduate](#) certificates in Healthy Aging, and [undergraduate](#) and [graduate](#) certificates in Social Justice. Additional graduate certificates include the [Addictions](#) certificate and the [Sexuality and Gender Education \(SAGE\)](#) certificate. The SAGE certificate is a collaborative program between the Sandler School of Social Work and the Center for Women, Gender and Sexuality Studies that provides a flexible curricular framework for a focus on Sexuality and Gender Studies within social work and related professions. Requirements for all certificate programs are listed later in this section (the SAGE certificate is detailed in the [Dorothy F. Schmidt College of Arts and Letters](#) catalog section). Students must apply for the certificate through their advisors upon completion of the coursework.

### **Undergraduate Research Certificate**

To recognize undergraduate students' excellence in undergraduate research, the Office of Undergraduate Research and Inquiry (OURI) has established the [Undergraduate Research Certificate](#). Requirements for the Research Certificate include completion of 12 credits of research exposure, skill-

building and intensive courses as well as dissemination of the outcomes of students' research and inquiry through a research presentation or exhibition.

## SCHOOL OF CRIMINOLOGY AND CRIMINAL JUSTICE

### **Faculty and Instructors:**

Guastafarro, W., Interim Director; Arneklev, B. J.; Atkin-Plunk, C.; Cain, C.; Cesar, G.; Crichlow, V.; Dario, L.; Deuchar, R.; Dobrin, A.; Fallik, S.; Hinduja, S.; Kalinich, D., Emeritus; Langlois, R.; Rothe, D.; Rubin, S.; Schiff, M.; Sloas, L.; Stinchcomb, J., Emeritus.

### **CRIMINAL JUSTICE BACHELOR OF ARTS (B.A.)**

*(Minimum of 120 credits required)*

The Bachelor of Arts degree (B.A.) with a major in Criminal Justice provides students with knowledge about the nature and causes of crime and delinquency, law and the legal system for juveniles and adults in American society, and the decision processes of criminal justice agencies. A Criminal Justice major is broadly educated within a general education framework in the liberal arts and also provided with courses that directly apply to careers within the criminal and juvenile justice systems and the study of law. The baccalaureate degree in Criminal Justice provides the student with a suitable foundation for graduate study in criminal justice, criminology and other graduate school programs. The program is offered in person or fully online. The School also offers a Criminal Justice minor.

### **Admission Requirements**

For admission to this program, the student must meet the general admission requirements of the

University as described in the [Admissions section](#) of this catalog.

In some instances, students may be admitted without having completed general education requirements. In such cases, those courses must be completed early in the junior year. The student may be required to complete additional courses to satisfy degree requirements.

### **Prerequisite Coursework for Transfer Students**

Students transferring to Florida Atlantic University must complete both lower-division requirements (including the requirements of the General Education Program) and requirements for the college and major. Lower-division requirements may be completed through the A.A. degree from any Florida public college, university or state college or through equivalent coursework at another regionally accredited institution.

Before transferring and to ensure timely progress toward the baccalaureate degree, students must also complete the prerequisite courses for their major as outlined in the [Transition Guides](#) . All prerequisite courses must be completed by the School's designated date or within the first year after transferring to FAU and before reaching senior status (90 total credits).

All courses not approved by the Florida Statewide Course Numbering System that will be used to satisfy requirements will be evaluated individually on the basis of content and will require a catalog course description and a copy of the syllabus for assessment.

### **Degree Requirements**

The Criminal Justice curriculum requires a minimum of 120 credits. To earn the degree, students must complete all of the University degree requirements in the [Degree Requirements section](#) of this catalog.

The program for Criminal Justice consists of 27-30 credits of 3000- and 4000-level coursework. Students may apply CCJ 2002 (Law, Crime and the Criminal Justice System) toward their 30 degree credits. Furthermore, students must complete successfully the statistics prerequisite (STA 2023, Introductory Statistics) to be certified as completing the requirements for the Criminal Justice major.

Additionally, major core courses must be completed with a grade of “C” or better. A grade of “C-“ or lower in major core courses does not satisfy any major requirement and does not count toward the 120 credits required for the degree. Elective courses in the major must be completed with a grade of “C-“ or better. A grade of “D+” or lower in general elective courses does not satisfy any graduation requirement and will not count toward the 120 credits required for a degree. Finally, students must

maintain a “C” average in all courses applied to the major.

To earn a bachelor of arts degree from a state university in Florida, students must demonstrate proficiency in a foreign language at the college level. Earning college credit at the Language 2 level (courses such as FRE 1121 or SPN 1121) satisfies this mandate. Students meeting the FAU foreign language admission requirement with two years of high school language have not satisfied the graduation requirement. Students must demonstrate additional proficiency either by earning Language 2-level college credit or by satisfying the requirement through other means, such as the College Level Examination Program (CLEP) exam.

**NOTE:** All undergraduate Criminology and Criminal Justice courses are **also available online**, with the exception of CCJ 4905 and CCJ 4940.

---

### **Criminal Justice Core Courses - 9 credits**

Criminology	CCJ 3014* <sup>^</sup>	3
Ethics and the Justice System	CCJ 4054 <sup>^</sup>	3
Methods of Research in Criminal Justice	CCJ 4700**	3

\* Requires CCJ 4700 as a prerequisite.

\*\* Requires STA 2023 as a prerequisite.

---

### **CJ Required Electives - 21 credits**

*Choose seven of the following elective courses.*

Law, Crime and the Criminal Justice System	CCJ 2002 <sup>^</sup>	3
Crime in the Schools	CCJ 3660	3
Victimology	CCJ 3666	3
Restorative Community Justice	CCJ 4141	3
Drug Courts	CCJ 4293	3
Death Penalty	CCJ 4361	3
Criminal Justice Management	CCJ 4450 <sup>^</sup>	3
Gangs, Groups and Justice	CCJ 4508	3

Teen Technology Misuse	CCJ 4554	3
Studying Violence	CCJ 4623^	3
Serial Homicide	CCJ 4627	3
Media and Crime	CCJ 4631	3
Drugs and Crime	CCJ 4642	3
White Collar Crime	CCJ 4644^	3
Race, Ethnicity and Criminal Justice	CCJ 4662^	3
Women and Criminal Justice	CCJ 4670^	3
Violence in Relationships	CCJ 4679^	3
Human Trafficking: A Global Social Justice Issue	CCJ 4694	3
Issues in Criminal Law	CCJ 4931	3
Special Topics	CCJ 4934^	3
Corrections	CJC 4310^	3
Introduction to Forensic Science	CJE 3674	3
Criminal Justice Technology	CJE 3692C^	3
International Criminal Justice Systems	CJE 4174^	3
Policing in America	CJE 4352^	3
Problem Solving in Crime Situations	CJE 4412	3
Crime Prevention	CJE 4444^	3
Fundamentals of Criminal Investigation	CJE 4610	3
Crime Analysis	CJE 4663	3
Computer Crime	CJE 4668	3
Juvenile Justice Administration	CJJ 4010^	3

Judicial Administration and the Criminal Courts	CJL 4510 <sup>^</sup>	3
Criminal Law and the Constitution	CJL 4064	3
Terrorism	DSC 4012 <sup>^</sup>	3

### Additional Choices

*Students may also complete an internship or directed independent study; certain restrictions would apply.*

Directed Independent Study	CCJ 4905	1-3
Criminal Justice Field Experience 1	CCJ 4940 <sup>++</sup>	0-4

<sup>++</sup> Grading: S/U

<sup>^</sup> The online version of this course has received [QM designation](#).

## DATA SCIENCE AND ANALYTICS BACHELOR OF SCIENCE (B.S.)

### Data Science in the Natural Sciences Concentration

### Data Science and Engineering Concentration

### Data Science in Business Concentration

*(Minimum of 120 credits required)*

The Bachelor of Science with Major in Data Science and Analytics (BSDSA) program is a multi-college, interdisciplinary program administered jointly by the Department of Mathematics and Statistics in the Charles E. Schmidt College of Science, the Department of Electrical Engineering and Computer Science in the College of Engineering and Computer Science, the Department of Information Technology and Operations Management (ITOM) in the College of Business, the Department of Political Science in the Dorothy F. Schmidt College of Arts and Letters and the School of Criminology and Criminal Justice in the College of Social Work and Criminal Justice. For details about this program, see the [Interdisciplinary Programs](#) section of this catalog.

## HONORS IN CRIMINAL JUSTICE RESEARCH

To recognize the research accomplishments of undergraduate scholars in the School of Criminology

and Criminal Justice (SCCJ), the School provides an opportunity to demonstrate academic excellence in research for students who complete honors research enriched experiences beyond their standard coursework. The mission of this program is to:

1. Promote honors research opportunities and experiences;
2. Provide enriching honors research-related experiences to undergraduate students;
3. Create a pathway for students to received recognition for their specialized research;
4. Allow undergraduate students to apply classroom knowledge in research-rich environments; and
5. Distinguish honors research achievements beyond the standard coursework.

In doing so, this program offers mentorship to students in developing their knowledge, skills and abilities in honors research that are fitting for graduate school and careers in evidence-based practices. To achieve the Honors in Criminal Justice Research designation on their transcripts, students need to meet the eligibility standards, satisfy the program requirements and complete the deliverables specified below.

### **Eligibility Requirements**

To be eligible for the Honors in Criminal Justice Research designation, undergraduate students shall demonstrate:

1. Progress toward satisfying the criminal justice major (9 credits completed at the time of application, with 6 of these credits from courses listed in #2);
2. A 3.5 GPA in completed CCJ core courses; students must have completed two of the following at the time of application: CCJ 3014, Criminology; CCJ 4054, Ethics and the Justice System; CCJ 4700, Methods of Research in Criminal Justice; and
3. A GPA of 3.2 or higher in their coursework at the time of application and maintained through degree conferral.

### **Getting Started**

Upon satisfying the eligibility requirements, interested students should contact the [SCCJ faculty member](#) whose research interests are closest to those the student wishes to pursue in an intensive Directed Independent Study or Directed Independent Research (DIS or DIR) experience.

Students are responsible for reviewing the Department's DIS and DIR guidelines and encouraged to think about research topics that are creative, collaborative, interdisciplinary and civically engaging. Students usually begin the program in their sophomore or junior year and conduct independent but supervised research during their junior and senior year.

## Application Requirements

These materials should be submitted no later than three weeks prior to the beginning of the semester in which students seek to be enrolled in the program:

1. An unofficial transcript;
2. Curriculum Vitae or résumé; and
3. An Honors in Criminal Justice Research program application form signed by a full-time faculty member.

## Program Requirements

To maintain compliance with the Honors in Criminal Justice Research program, students should:

1. Maintain good academic and ethical standing;
2. Complete Collaborative Institutional Training Initiative certificates in
  - a. Social and Behavioral Research Investigations;
  - b. Responsible Conduct of Research; and
  - c. Conflicts of Interest.

The modules for these courses can be completed online in a few hours.

3. Must complete one set of course options in Directed Independent Study (DIS), Directed Independent Research (DIR) and Research Intensive (RI) courses:
  - a. 6 DIS credits with a 3.5 GPA,
  - b. 6 DIR credits with a 3.5 GPA,
  - c. 3 DIS and 3 DIR credits with a 3.5 GPA,
  - d. 3 DIS and a 3-credit RI CCJ eligible course with a 3.5 GPA,
  - e. 3 DIR and a 3-credit RI CCJ eligible course with a 3.5 GPA,
  - f. Two RI courses, 3 credits minimum each.

**Students will receive the designation “Honors in Criminal Justice Research” at the time of graduation upon satisfactory completion of two of the following three requirements:**

1. Internal or external grant/fellowship application submission with input from a CCJ professor;
2. Faculty advisor approved submission for an oral presentation at University, regional, national or international symposium, consortium or conference; or
3. Significant contribution, as determined by a CCJ faculty co-author, to a publishable manuscript in peer-review outlet.

For more information, contact [Shawn Backer](#), Instructor.

## CRIMINAL JUSTICE UNDERGRADUATE MINOR

*(Minimum of 15 credits required)*

A minor in Criminal Justice consists of a minimum of 15 credits in criminal justice courses. Of the 15 credits, at least 12 must be earned from FAU.

The core course must be completed with a minimum grade of "C." Elective courses in the minor may be completed with a minimum grade of "C-." Students must maintain a "C" average in all Criminal Justice minor courses.

For the minor in Criminal Justice, students must take five criminal justice courses in the following manner.

---

### Required Core Course - 3 credits

Ethics and the Justice System	CCJ 4054 <sup>^</sup>	3
-------------------------------	-----------------------	---

---

### CJ Required Electives - 12 credits

*Students choose four courses from the CJ Required Electives category listed above.*

<sup>^</sup> The online version of this course has received [QM designation](#).

## UNDERGRADUATE RESEARCH UNDERGRADUATE CERTIFICATE

*(Minimum of 12 credits required)*

To recognize undergraduate students' excellence in undergraduate research, the Office of Undergraduate Research and Inquiry (OURI) has established the [Undergraduate Research Certificate](#). Requirements for the Research Certificate include completion of 12 credits of research exposure, skill-building and intensive courses as well as dissemination of the outcomes of students' research and inquiry through a research presentation or exhibition.

## **CRIMINAL JUSTICE TO CRIMINOLOGY AND CRIMINAL JUSTICE BACHELOR OF ARTS (B.A.) TO MASTER OF SCIENCE (M.S.) COMBINED PROGRAM**

The B.A./M.S. combined degree program enables outstanding students to graduate with both a Bachelor of Arts with Major in Criminal Justice and a Master of Science with Major in Criminology and Criminal Justice in as little as five years. The program is 153 credits (B.A./M.S. with thesis or non-thesis options). Students complete 120 credits for the undergraduate degree and 33 credits for the graduate degree. Students complete the undergraduate degree first, taking no more than 12 credits of graduate coursework in their senior year, which may be used to satisfy requirements for both degrees. Prospective students must formally apply to this program and meet all admission requirements.

### **Admission Requirements and Academic Standing**

1. Applications to the combined degree program may be submitted by students at the end of their junior year of study and no later than July 1.
2. Applicants must have no academic deficiencies at the time of application.
3. Applicants must have a minimum undergraduate FAU GPA of 3.5 in the most recent 60 credits of undergraduate coursework, as well as a grade of "B" or better in both undergraduate research methods and the statistics course, STA 2023, in order to be admitted to the program.
4. Students must provide a letter of intent, a letter of recommendation from a professor and a strong academic writing sample.
5. It is strongly recommended that Criminology (CCJ 3014) and Methods of Research (CCJ 4700) be completed prior to beginning the B.A./M.S. combined degree program. At a minimum, Methods of Research should be in progress by the time the student applies to the program. Criminology and Ethics and the Justice System (CCJ 4054) must be completed before spring of a student's senior year.
6. Continued involvement in the B.A./M.S. combined degree program is contingent upon good academic standing in both programs. This includes maintenance of an overall 3.0 cumulative GPA in the master's program. Student progress is evaluated every semester. Students who do not maintain good academic standing in both programs and/or who drop below the required 3.0 overall GPA in the master's program may be placed on academic probation during the semester immediately following the one in which their cumulative GPA dropped below 3.0. Failure to regain a 3.0 cumulative GPA within two successive semesters thereafter, results in dismissal from the program. Students may also be dismissed at any time they are not making satisfactory progress toward completion of the combined degrees or for serious violations of academic integrity.

## Degree Requirements

The following course schedule gives an example of how B.A. students who enroll in the combined degree program could complete the requirements for both degrees.

---

### Required Graduate Courses

---

#### *B.A. Senior Year - Fall - 3 credits*

Criminal Justice Research and Policy Foundations	CCJ 6902*	3
--	-----------	---

---

#### *B.A. Senior Year - Spring - 6 credits*

Understanding Criminal Behavior	CCJ 6056*	3
---------------------------------	-----------	---

---

#### **Graduate Elective**

3

Receive B.A. Degree

\*\*Indicates required graduate course for non-thesis option.

Note. With permission from the graduate coordinator, a student may start in the summer prior to their senior year by taking a graduate course.

# MASTER'S PROGRAM

## CRIMINOLOGY AND CRIMINAL JUSTICE MASTER OF SCIENCE (M.S.)

*(Minimum of 33 credits required)*

This graduate master's degree program is designed for students who are:

1. Seeking intermediate-level administrative or research positions;
2. Employed in the criminal justice system and wish to broaden their perspectives and advance within the system;
3. Pursuing a teaching career at a community or state college;
4. Planning to continue in a doctoral program;
5. Preparing to enter law school.

The purpose of the program is to provide graduate-level learning opportunities to students interested in advancing their knowledge in the areas of criminological theory and administrative theory as applied to the criminal justice system. Students may advance their skills and knowledge in research in applied aspects of criminology and criminal justice. This program allows students to develop a personal curriculum consistent with their academic and career goals. Students focus on the theoretical or administrative aspects of the criminal justice system or create a more research-oriented program geared toward future doctoral study.

### **Admission Requirements**

Admission to the Master of Science (M.S.) with major in Criminology and Criminal Justice program requires:

1. A baccalaureate degree from an regionally accredited institution;
2. A GPA of 3.0 or higher in the last 60 credits of undergraduate coursework;
3. A grade of "B" or better in both an undergraduate research methods and a statistics course;
4. A letter of application explaining the student's interest in the program and reasons for applying;
5. An example of the student's written work (e.g., a literature review or research paper with at least five references);
6. A letter of recommendation from a professor. Alternatives to this requirement may be granted by the graduate coordinator. Application materials 4, 5, and 6 above must be uploaded together with the online application. Meeting minimal standards does not guarantee admission as all

requirements will be considered cumulatively by the School's admission committee.

### **Transfer Credit**

Acceptance of transfer credits from regionally accredited institutions is dependent upon relevance of the coursework to the Master of Science with a major in Criminology and Criminal Justice Program. Transfer of credits should occur at the time of admission and is limited to 9 credits with a minimum grade of "B" in each course (3.0 in a 4.0 grading system). A review of the course syllabi must be done for approval of transfer. Credits applied toward other degrees and/or those older than seven years may not be transferred to the graduate program. No graduate credit is granted for correspondence, life experience or extension work.

### **Admission Requirements for International Students**

Graduates of colleges or universities outside of the United States who have completed an academic program equivalent to an American regionally accredited bachelor's degree may apply for admission. International applicants for whom English is a second language are required to submit a score of 550 or higher (IBT of 61 or higher) on the Test of English as a Foreign Language (TOEFL) or a score of 6.0 or higher on the International English Testing System (IELTS) as part of the application process.

All international applicants whose transcripts are from non-U.S. institutions must have their credentials evaluated course by course, including the GPA, by a professional foreign credentials evaluation service. A service may be found at [www.NACES.org](http://www.NACES.org). Additionally, applicants have the option to have their transcripts evaluated by FAU.

### **Time Limitations**

Candidates for the Master of Science in Criminology and Criminal Justice must complete all degree requirements within a seven-consecutive-year period after initial enrollment in the program.

### **Academic Standing**

Continuation in the program requires satisfactory progress toward degree completion. Evidence of such progress includes maintenance of an overall 3.0 program GPA. For each course, no grade lower than "C" is acceptable to fulfill program requirements. That is, a "C-" would not be acceptable.

Students who do not maintain the required 3.0 program GPA are placed on academic probation during the semester immediately following the one in which their program GPA dropped below 3.0. Failure to regain a 3.0 cumulative GPA within two consecutive semesters thereafter can result in dismissal from the program. Students may also be dismissed at any time that they are not making satisfactory progress toward completion of the degree or for serious violations of academic integrity.

## Prerequisites

Students lacking any upper-division undergraduate criminal justice courses are strongly advised to take CCJ 3014, Criminology, or a substitute approved by a faculty advisor. Students are required to take an undergraduate statistics course, such as STA 2023, and an undergraduate research methods course, such as CCJ 4700, for admission. Prerequisite coursework is not applied toward degree requirements.

## Degree Requirements

The program consists of a total of 33 credits: 12 required course credits, 15 elective credits, and 6 exit requirement credits (thesis or non-thesis options). Some courses are delivered onsite, others are completely online and still others are a hybrid combination.

---

### Core Requirements - 12 credits

Understanding Criminal Behavior	CCJ 6056	3
Research Methods	CCJ 6704	3
Class, Race and Gender in Criminal Justice	CCJ 6669	3
Criminal Justice Research and Policy Foundations	CCJ 6902	3

### Electives - 15 credits

*Choose five of the following electives.*

Corrections Research, Policy and Practice	CJC 6021	3
Juvenile Justice Research, Policy and Practice	CJJ 6046	3
Social Disorganization and Crime Prevention	CCJ 6063	3
Crime Analysis in Policing	CCJ 6079	3
Restorative Justice Research, Policy and Practice	CCJ 6142	3
Courts, Sentencing and the Judicial Process	CCJ 6295	3
Prisoner Re-entry Policy and Practice	CCJ 6335	3
Police Research, Policy and Practice	CJE 6426	3

Applying Criminal Justice Theory, Research and Policy	CCJ 6485	3
Serial Homicide	CCJ 6608	3
Crime in Everyday Life	CCJ 6619	3
Violence Research and Policy	CCJ 6624	3
Victims and the Justice Process	CCJ 6675	3
Computer Crime Research and Policy	CJE 6688	3
Sex Offender Research and Policy	CCJ 6699	3
Advanced Research and Evaluation for Criminal Justice	CCJ 6712	3
Directed Independent Study	CCJ 6905	3
Special Topics	CCJ 6934	3

With approval of the program coordinator, students may take one to three graduate courses (3-9 credits) from outside the MSCCJ program that are relevant to their path of study and/or career plans. To apply toward graduation, any outside courses must be approved by the program coordinator *before registering for these courses*.

### Exit Requirements

(6 credits required; two options are available)

### Non-Thesis Option

This option is for students who do not wish to continue with their graduate education or research-related employment. In addition to fulfilling core and elective requirements (27 credits), students in the non-thesis option are required to take CCJ 6485 (3 credits) and one additional elective (3 credits). CCJ 6485 guides students through a project that comprehensively applies the theoretical concepts learned throughout the program. This course will be taken in either the last or next-to-last semester before graduation, provided that all required core courses have been completed.

### Thesis Option

This option is for students who anticipate continuing on to doctoral-level studies and/or who seek research positions within the criminal justice system. Thesis students will take the three core courses (9 credits), six electives of their choice (18 credits), and CCJ 6971, Master's Thesis, (6 credits) to

complete a thesis according to policies of the University's Graduate College and School of Criminology and Criminal Justice. Thesis credits will be taken in either the last or next-to-last semester before graduation, provided that all required core courses have been completed. Note: Students opting to complete a thesis may take CCJ 6485, Applying Criminal Justice Theory, Research and Policy, as one of their electives.

Students considering the thesis option should recruit a faculty member early in the program to be their advisor and chair of their thesis committee. The program coordinator can advise on specific Departmental policies and procedures regarding thesis requirements.

## PHYLLIS AND HARVEY SANDLER SCHOOL OF SOCIAL WORK

### **Faculty:**

Thompson, H., Interim Director; Alperin, D., Emeritus; Ambris, E.; Barsky, A.; Brown, G.; Cooley, M.; DeRigne, L.; Dochterman, S.; Drucker, D.; Gonzalez, M.; Greenfield, W., Emeritus; Groton, D.; Gustafsson, P.; Hamlin, E., Emeritus; Hawkins, M.; Hawkins, W.; Horton, G.; Howard, H.; Kane, M.; Kaplan, A.; Landsman-Wohlsifer, D.; Luna, N.; Martinez, P.; McClellan, J.; McCormic, K.; Park, J.; Platt, K.; Rubin, R.; Ryan, E.; Sherman, D.; Skinner-Osei, P.; Spadola, C.; Suttentberg, L.

[Link to Certificates \(Undergraduate\)](#)

[Link to Certificates \(Graduate\)](#)

## **SOCIAL WORK** **BACHELOR OF SOCIAL WORK (B.S.W.)**

*(Minimum of 120 credits required)*

**Mission**

The mission for the Sandler School of Social Work's B.S.W. program is to provide an undergraduate education that contributes to the well-being of the communities of Florida.

The B.S.W. program's mission to educate competent and compassionate social workers for entry-level practice and as a foundation for further professional development and growth. Graduates will possess critical thinking skills and engage in evidence-based practice, with a deep respect for human diversity and strengths, and with a desire to continue lifelong learning and professional development.

The B.S.W. program's four primary goals are as follows:

**Goal 1 (evidence-based, generalist social work practice):**

To prepare competent and compassionate B.S.W. graduates for evidence-based generalist social work practice, based on the integration of self-awareness, knowledge, professional values and ethics, critical thinking and interpersonal skills.

**Goal 2 (community-engaged/located):**

To prepare B.S.W. graduates to become community-engaged practitioners who understand and can work effectively with diverse populations and contemporary societal issues in South Florida.

**Goal 3 (ongoing learning):**

To provide B.S.W. graduates with an appreciation for how knowledge is discovered, challenged and transformed, including a desire to pursue continued professional development through lifelong learning.

**Goal 4 (preparation for graduate education):**

To prepare B.S.W. graduates who wish to pursue an M.S.W. with the foundational knowledge, skills and experiences that they will need to pursue graduate education.

**Admission Requirements**

Admission requirements for the Social Work program include completion of the general education requirements and fulfillment of the following prerequisites (required by all social work programs statewide):

---

Human Biology	(BSC 1005, BSC 1010, BSC 1085, BSC 2010, BSC 2085, BSC 2086	3
---------------	---	---

	or PCB 2099)	
General Psychology	(PSY 1012 , PSY 2012 or PSY 2020)	3
Introductory Sociology	(SYG 1000, SYG 2000 or SYG 2010)	3
United States Government	(POS 1041 or POS 2041)	3
Introduction to Micro or Macroeconomics	(ECO 1000, ECO 2000, ECO 2013, ECO 2023 or ECO 3040)	3
Statistics	PSY 3234 or STA 2023	3

If students are admitted without these courses, they must be completed by the end of their junior year or two semesters before entering SOW 4510.-

### **Prerequisite Coursework for Transfer Students**

Students transferring to Florida Atlantic University must complete both lower-division requirements (including the requirements of the General Education Program) and requirements for the college and major. Lower-division requirements may be completed through the A.A. degree from any Florida public college, university or state college or through equivalent coursework at another regionally accredited institution.

Before transferring and to ensure timely progress toward the baccalaureate degree, students must also complete the prerequisite courses for their major as outlined in the *Transition Guides* . All prerequisite courses must be completed by the School's designated date or within the first year after transferring to FAU and before reaching senior status (90 total credits).

All courses not approved by the Florida Statewide Course Numbering System that will be used to satisfy requirements will be evaluated individually on the basis of content and will require a catalog course description and a copy of the syllabus for assessment.

Students who are dismissed from the Social Work program may not return to take any Social Work classes.

## **Degree Requirements**

The Social Work program consists of 39 credits of required social work courses, including Field Education, and 21 credits of electives for a total of 60 credits. Ample opportunity exists for each student to select those courses that support their field of practice interests.

## ***Class Requirements***

1. Students are required to meet with an academic advisor every semester prior to registering for courses.
2. Students are required to attend the first day of any SOW-prefixed course. If a student misses the first day of classes for any reason, he or she may be administratively withdrawn from the course.
3. A 2.5 FAU GPA is required for enrollment in SOW 4300, Social Work Practice with Individuals; SOW 4304, Social Work Practice with Families; SOW 4322, Social Work Practice with Groups; SOW 4343, Social Work Practice with Communities and Organizations; and SOW 4510, Field Education in Social Work.

## **Prerequisite Coursework**

Students are required to satisfy prerequisite coursework either prior to or during their junior year in the B.S.W. program. Guidelines for the prerequisites are as follows:

1. American National Government: This requirement may be satisfied with a course that focuses on government such as POS 1041, POS 2041 or POS 2112.
2. Economics: This requirement may be satisfied with an introductory course in Macro or Micro Economics such as ECO 2013 or ECO 2023.
3. Biology: This requirement may be satisfied with an introductory class in Biology. The recommended class is Life Science, BSC1000 or BSC1005. BSC 2085, Anatomy and Physiology 1, BSC 2086, Anatomy and Physiology 2, are acceptable, as well as a Human Biology course.
4. General Psychology: This requirement is satisfied with an introductory class in Psychology. At FAU, the course is PSY 1012.
5. Introduction to Sociology: This requirement is satisfied with an introductory class in Sociology. At FAU, the courses are SYG 1000 or SYG 2010.
6. Statistics: This requirement is satisfied with an introduction to statistics course. At FAU, the courses are STA 2023 or PSY 3234.

## **Required Social Work Core Coursework**

1. The student is advised to speak to an academic advisor about specific courses and the order in which to take them.
2. By the time a student has completed SOW 4300, the student must have completed all prerequisites and general education requirements.
3. Students must complete each SOW-prefixed course with a grade of "C" or better. A grade of "C-" will not be counted as credit toward the Social Work degree. Any core course with a grade of "C-" or lower must be retaken.
4. All degree requirements must be completed before a student is eligible for SOW 4510, Field Education in Social Work. This means that the student must have completed the Foreign Language Admission requirement, Gordon Rule requirements, all General Education requirements as well as all Social Work courses. The student must also have an FAU GPA of 2.5 in order to enter Field Education. A satisfactory grade in Field Education is required to receive the Social Work degree.

### **Approved Elective Coursework**

1. Students are advised to select approved elective coursework from the pre-approved set of electives listed in this catalog. Any SOW course that is not counted as part of the SOW Core or SOW Elective sections may count as approved elective credit with a grade of "C" or better. Any deviation from the courses listed requires approval from the Sandler School of Social Work.
2. Students who have met the College admissions criteria and SOW prerequisites transferring from another degree program into the B.S.W. with upper-division credits may transfer up to 21 credits of 3000- and 4000-level credits, 6 credits of these must be pre-approved. This provision ensures that every SOW graduate will have obtained a minimum of 39 credits of either SOW-prefixed or faculty pre-approved elective coursework.
3. Students must complete each upper-division elective with a grade of "C" or better. A grade of "C-" will not be counted as credit toward the Social Work degree.

### **Free Elective Coursework**

1. This section is satisfied with 1000- to 4000-level College or University coursework not previously counted as credit toward the 120-hour SOW degree.
2. Students must complete 15 credits of free electives.
3. Free electives may be used to fulfill FAU Admissions, Foreign Language, Gordon Rule and/or SOW prerequisite deficiencies.

### **SOW Field Experience**

1. All prerequisite coursework and general education requirements must be completed two semesters

prior to beginning field internship.

2. All SOW majors must satisfy the Field Education requirement, SOW 4510. Students must meet certain requirements to be eligible to enroll in Field Education. Students must complete all admission, general education and Gordon Rule requirements prior to eligibility. Field Education may only be taken at the end of the student's coursework. No other courses can be taken while a student is enrolled in SOW 4510.
3. Students should consult with an academic coordinator or the Director of Field Education Program to discuss eligibility for entrance to Field Education. Students must attend an orientation session regarding Field Education and complete appropriate paperwork.
4. Students are required to graduate after completing SOW 4510, Field Education.

### **Field Education Requirements**

The Social Work student is assigned to a community-based social service agency during the last semester of the B.S.W. program to fulfill Field Education requirements. To be eligible for Field Education, a student must have completed all other degree requirements including fulfilling all of the social work courses' prerequisites, having a minimum FAU GPA of 2.5, having a "C" or better in all required social work courses and having no "I" (incomplete) grades.

Academic credit for previous work experience will not be given in lieu of the Field Education internship. Students found to be out of compliance with the NASW Code of Ethics will not be permitted to enter the field. Prior to applying to Field Education, students must exhibit appropriate professional behavior in the academic setting.

Students must apply for Field Education online by the 4th Friday of the semester prior to when they want to enter the field. They must also attend a field orientation on campus the semester prior to entering the field and meet individually with field faculty. See Sandler School of Social Work [website](#) for complete eligibility criteria.

Field Education involves a minimum of 26 hours per week of generalist practice under the direction of an agency-based field instructor and attendance at a three-hour-per-week integrative seminar. Due to the limited number of agencies that can provide evening and weekend hours for internships, the School of Social Work cannot guarantee that an appropriate internship can be found unless students can devote weekday daytime hours (Monday through Friday, 8 a.m. to 5 p.m.) to their internships. Students who do not have weekday hours may be required to complete their internship over two semesters. However, all students must complete at least 8 hours per week during daytime hours in their internships.

Criminal background checks and/or substance abuse testing may be required by the field agency prior to or during Field Education. Prior criminal history, limited daytime hours and/or positive substance abuse test results can jeopardize placement in a field internship, and the student may be unable to obtain a Social Work degree. Students who receive a positive substance abuse test result may face disciplinary action or action in accordance with the CSWE Core Competencies and Practice Behaviors.

Students who abandon or leave their internship without permission from the field educator or faculty may be asked to leave the Social Work program.

### **Students Transferring with Upper-Division Credits**

1. Students may transfer up to 21 credits of upper-division elective credits into the approved elective section and free elective section. However, 6 credits must come from a pre-approved list of electives.
2. Students who have completed SOW credits at another institution may bring these credits into their program at the discretion of the SOW faculty. FAU requires that the last 30 credits of upper-division courses be completed at FAU to receive a degree from FAU.

### **Double Major and Dual Degree**

1. Students pursuing a double major must satisfy the SOW prerequisites and complete 39 credits of SOW coursework.
2. Students pursuing a Dual or Second Bachelor degree must meet the University requirement of an additional 30 credits beyond a 120-credit degree program. For a Second Bachelor in SOW, the student must satisfy the program prerequisites and 39 credits of SOW coursework.
3. During the first week of the last semester of the program, students are required to submit an application for graduation, which notifies FAU of their intent to graduate and begins the process of degree approval. It also enables the graduating student to receive commencement ticket information. If a student is attempting to use any courses from their previous degree toward the Second Bachelor's degree in Social Work, all Social Work courses must have been completed within a five-year period prior to receiving the Second Bachelor's degree.

A minimum grade of "C" is required for all SOW-prefixed courses. If a grade below "C" (such as "C-") is earned in a SOW-prefixed course, the course will not count toward any portion of the minimum 120-credit degree program.

All social work courses must be completed within the five-year period prior to graduation. (For example, students enrolled in Field in fall 2011 must have begun core social work coursework no

earlier than fall 2006.)

Social Work and Positive Well-Being	SOW 4802	3
Spiritual Dimensions of Social Work Practice	SOW 4844	3
Special Topics	SOW 4930	3

The above electives are strongly recommended. Students are strongly encouraged to select Social Work electives to fulfill these requirements. Any deviation should be made in consultation with an advisor.

### **Free Electives - 15 credits**

Students are strongly encouraged to take SOW electives as their free electives. Free electives may be chosen from other disciplines of study in consultation with an advisor.

### **Student Success Conference**

The Sandler School of Social Work is committed to ensuring the integrity of its degree program and the certifiability of its majors as future social workers. To this end, the School has established a Student Success Conference to address difficulties by which a student's academic progression in the field may be hindered. Complete information regarding the Student Success Conference is found [online](#). Refusal to attend the Student Success Conference will result in the student's automatic dismissal from the Sandler School of Social Work.

### **Second Bachelor's in Social Work**

A second bachelor's in Social Work requires 39 core Social Work credits. All prerequisites must be met two semesters prior to entering the field. All Social Work courses must be completed within a five-year period prior to obtaining a Second Bachelor's degree.

## **SOCIAL WORK UNDERGRADUATE MINOR**

*(Minimum of 15 credits required)*

The minor is open to all undergraduate students at FAU and awarded upon graduation from an FAU undergraduate program. It is not awarded independently of these degrees.

Requirements for the minor include completion of five courses (15 credits) with a grade "C" or better and a 2.5 GPA. Students must also complete 12 of the 15 credits at FAU. Students will be required to complete SOW 3232, Social Welfare Policy and Provisions, and four Social Work electives chosen from the table below (SOW 1005, an [General Education Program](#) course, may be used as one of the elective courses).

In addition to the University minimum requirements for a minor:

1. Students will not be allowed to enroll in Social Work core courses due to enrollment caps and reservations for majors;
2. Students will not be allowed to complete an internship through the School of Social Work Field Education department;
3. Students will not qualify for the Child Welfare or Healthy Aging certificates; and
4. Students will not qualify for advanced standing placement in the M.S.W. graduate program.

[Link to Graduate Certificates](#)

## **CHILD WELFARE** UNDERGRADUATE CERTIFICATE

*(Minimum of 18 credits required)*

The Sandler School of Social Work offers an undergraduate certificate in Child Welfare, limited to Social Work majors. The certificate provides a foundation of knowledge in practice, policy and programs that impact the lives of vulnerable children. Students develop skills in areas relevant to children's services, including substance abuse and family violence. To apply for this program, call 561-297-3234. Students may also refer to the certificate description [online](#).

### **Program Requirements**

A student may earn the Child Welfare certificate by completing:

1. Child Welfare (SOW 4650), 3 credits, with a minimum grade of "B."
2. Social Work Practice with Vulnerable Children and Families (SOW 4654), 3 credits, with a minimum grade of "B."
3. One bachelor-level field education internship (SOW 4510) with the Department of Children and Families (DCF) or a private agency approved by the Sandler School of Social Work that has contracted with DCF to provide the same child protection services as the public agency;
4. Be currently enrolled in the Bachelor of Social Work degree at FAU.

## **HEALTHY AGING** UNDERGRADUATE CERTIFICATE

*(Minimum of 21 credits required)*

Undergraduate Social Work majors interested in working with elders may do so through the Sandler School of Social Work's Healthy Aging certificate. Completion of this program will provide students with a specific knowledge and skill base for a range of job opportunities with a diverse elder

population. To apply for this program, call 561-297-3234. Students may also refer to the certificate description [online](#).

### Program Requirements

A student may earn the Healthy Aging certificate upon completion of the following:

1. Be currently enrolled in the Bachelor of Social Work degree at FAU;
2. The 3-credit course Social Work with Aging Populations (SOW 4643);
3. Two additional, approved 3-credit courses in the Healthy Aging certificate program;
4. One B.S.W. field internship, approved by the Sandler School of Social Work, with specialized service outreach to diverse elders.

## **SOCIAL JUSTICE** UNDERGRADUATE CERTIFICATE

*(Minimum of 12 credits required)*

An undergraduate certificate in Social Justice prepares students to address current issues of social justice through inclusive practice and policy advocacy within the larger societal systems. The certificate:

1. Prepares students for evidence-based practice in assessing and addressing issues related to social justice through community development, advocacy, policy formation and other social work strategies.
2. Provides students with community-engaged learning and reflective practice with regard to social justice and inclusive-practice methods.

### Program Requirements

Students enrolled in the Bachelor of Social Work degree program at FAU may earn the undergraduate certificate by completing the following courses.

Social Welfare Policy and Provisions	SOW 3232	3
Social Justice and Social Work: Issues and Responses	SOW 4212	3
Social Work Practice with Communities and Organizations	SOW 4343	3
Inclusive Social Work Practice	SOW 4346	3

# MASTER'S PROGRAM

## SOCIAL WORK

### MASTER OF SOCIAL WORK (M.S.W.)

*(Requires 60 credits, Regular Program; 30 credits, Advanced Standing Program)*

#### **Mission and Goals**

The mission of the M.S.W. program is to educate competent and compassionate social workers for advanced clinical social work practice with children, adolescents, adults, elders, couples, families and groups. M.S.W. graduates possess critical thinking skills and engage in evidence-based clinical practice, with a deep respect for human diversity and strengths and with a desire to continue lifelong learning and professional development.

#### **The M.S.W. program has five goals:**

##### **Goal 1 (evidence-based, clinical social work practice):**

To prepare competent and compassionate M.S.W. graduates for evidence-based clinical social work practice for clients across the lifespan, based on the integration of self-awareness, knowledge, professional values and ethics, critical thinking and interpersonal skills.

##### **Goal 2 (community-engaged/located):**

To prepare M.S.W. graduates to become community-engaged practitioners and leaders who understand and can work effectively with diverse populations and contemporary societal issues in South Florida.

##### **Goal 3 (state licensure):**

To prepare M.S.W. graduates with the academic foundation for obtaining state licensure for clinical social work practice.

##### **Goal 4 (lifelong learning):**

To provide M.S.W. graduates with an appreciation for how knowledge is discovered, Challenged and transformed, including a desire to pursue continued professional development through lifelong learning.

##### **Goal 5 (post-M.S.W. studies):**

To provide M.S.W. graduates with the intellectual and practical foundation that they will need if they choose to pursue post-M.S.W. studies, such as a Ph.D., D.S.W. or other advanced social work

education and training.

The student will acquire a foundation of theoretical knowledge, practice skills and professional values necessary for delivering quality social work services. Additionally, the student will acquire an advanced level of knowledge and skill in clinical-community practice. Clinical-community practice refers to an integrated approach to social work assessment and intervention in which practitioners use a variety of advanced theories for understanding and practice at the macro, mezzo and micro levels. Within the clinical-community area of study, students will take advanced clinical courses in serving children, adolescents, adults, elders and families. Coursework focuses on practice, social welfare history and policy, human behavior and the social environment, research, advanced practice and field education. The M.S.W. curriculum provides the opportunity to meet the educational requirements for licensure in the State of Florida as a Licensed Clinical Social Worker.

### **Admission Requirements**

An undergraduate degree from an accredited institution is required for admission. No particular undergraduate major is required, but a broad liberal arts preparation is essential. While a major in Social Work is seen as desirable, other undergraduate majors are given equal consideration for the two-year program. A grade point average (GPA) of 3.0 or higher in the last 60 credits of undergraduate coursework is required. In addition to the University application, M.S.W. applicants must also submit the M.S.W. application, including a personal statement and three recommendations (on School of Sandler Social Work forms). The supplemental M.S.W. application will be completed online. Meeting minimal standards does not guarantee admission. The total application packet will be considered in making admission decisions.

Students are admitted for the fall, spring and summer semester each academic year. The application deadline for fall is May 1, for spring is October 1 and for summer is February 1 of each year. For international students, it is six weeks earlier. Selection for admission to FAU's M.S.W. program is a highly competitive process. Contingent upon the admission committee's holistic assessment of each individual application packet, offers of admission may be awarded on a full-time or part-time basis. If accepted for admission into the M.S.W. program, all incoming students are required to attend an M.S.W. orientation conducted during the week prior to the beginning of their admission term.

All students applying for spring admission to the M.S.W. program apply to the part-time program, whether traditional or advanced standing. They are eligible to apply for the relevant field placement, generalist or specialist, that fall or the following fall.

Students not admitted to the M.S.W. program will not be permitted to take SOW courses. Exceptions

may be made for individuals with L.C.S.W. from out of state who need to satisfy Florida licensing requirements. Permission must be granted by M.S.W. program coordinator.

Students who are dismissed from the Social Work program may not return to take any Social Work classes.

### **Admission Requirements for Advanced Standing Students**

The Advanced Standing Program is available to applicants who have completed their Bachelor of Social Work (B.S.W.) degree within the last five years. The B.S.W. must have been earned from a Council on Social Work Education (CSWE)-accredited program or an equivalent program recognized through CSWE's international Social Work Degree Recognition and Evaluation Service, or must be covered under a memorandum of understanding with international social work accreditors.

Applicants must meet previously stated admission requirements and have a GPA of 3.5 or better in the last 60 credits of undergraduate coursework. Also, one of the letters of recommendation must be an outstanding recommendation from the student's program director of field education. Students admitted to this program will follow the Advanced Year Curriculum, which consists of 30 credits.-

Undergraduate coursework will be examined by the admissions committee. Meeting minimal standards does not guarantee admission. The total application packet will be considered in making admissions decisions. Highly promising applicants who do not precisely meet the GPA admission requirements may petition the Sandler School of Social Work graduate admissions committee for exceptional consideration.

### **Admission Requirements for International Students**

Graduates of colleges or universities outside of the United States who have completed an academic program equivalent to a regionally accredited American bachelor's degree may apply for admission. All international applicants whose transcripts are from non-U.S. institutions must have their credentials evaluated course by course, including the GPA, by a professional evaluation service. A service may be found at [www.NACES.org](http://www.NACES.org) or applicants may request to have their credentials evaluated by FAU. Click [here](#) for more information.

Non-native speakers of English must provide evidence of proficiency in English from: Test of English as a Foreign Language (TOEFL) or International English Language Testing System (IELTS). The minimum University requirement for TOEFL is 500 (paper-based test) and 61 (Internet-based test). The minimum University requirement for IELTS is a band score of 6.0. Please note: Applicants are

responsible for making arrangements to schedule the test(s).

In addition, international applicants must have had previous experience in the social welfare field in their own countries prior to application to the M.S.W. program.

Lastly, international applicants must also possess and provide a sound financial plan to cover the costs of tuition, living expenses and round-trip transportation, as determined by the FAU Graduate College.

### **Transfer Credit**

Students transferring from another CSWE-accredited M.S.W. program may transfer a maximum of 30 graduate credits for the 60-credit program. No transfer credits are accepted for the Advanced Standing Program. M.S.W. courses completed at other universities must be evaluated as to their relevance and similarity to FAU courses prior to review of the student's application. All courses that are applied to the degree must have been successfully completed within five years of entrance into the FAU program, and the student must have earned a grade of "B" or above. A grade of "B-" or below does not meet this requirement and is not accepted. No graduate credit is granted for life experience or work experience.

### **Course Scheduling**

The Sandler School of Social Work endeavors to schedule classes to accommodate full-time and part-time students. Note that the School makes no guarantees regarding class meeting times or days.

### **Enrollment in M.S.W. Courses**

M.S.W. courses are limited to those students who have been fully admitted to the M.S.W. program. The School of Social Work closely manages its accredited, licensed graduate program to ensure that its students are functioning within cohorts based upon admission year and program type. Non-matriculated students who register for an M.S.W. course will be instructed to withdraw from the course. It is the student's responsibility to seek any associated fee refunds through other University channels.

### **Attendance on First Day of Class**

All students enrolled in the M.S.W. program are required to attend the first class in all M.S.W. courses.

### **Time Limitation**

Candidates for the Master of Social Work degree must complete all degree requirements within five consecutive years after initial registration.

### **Academic and Professional Standards**

Continuation in the M.S.W. program requires satisfactory progress toward degree completion. This

includes registering for courses from the approved curriculum, following the proper program structure, earning grades of at least "B-" or above in all courses, maintaining a 3.0 cumulative GPA and adhering at all times to the National Association of Social Workers (NASW) Code of Ethics.

Students who receive one grade of "C-" or below may be recommended for dismissal regardless of their cumulative GPA. Students who receive a grade of "C+" or below are not automatically permitted to re-take the course. Under exceptional circumstances, and only with prior permission from the M.S.W. program coordinator, are students permitted to re-take the course.

Students who fail to meet the academic standards of the program or violate the NASW Code of Ethics may be recommended for dismissal.

### **Additional Academic Standard for 60-Credit Program**

Students admitted to the regular 60-credit program are allowed a maximum of two "C+" or "C" grades, and with faculty permission, may retake the course and continue in the program. Students who receive more than two "C+" or "C" grades may be recommended for dismissal regardless of their cumulative GPA.

### **Additional Academic Standard for Advanced Standing Program**

Students admitted with advanced standing are allowed a maximum of one "C+" or "C" grade, and with permission, may retake the course and continue in the program. Students who receive more than one "C+" or "C" grade may be recommended for dismissal regardless of their cumulative GPA.

### **Grades below "C"**

Grades below "C" (e.g., "C-" to "F") reflect unsatisfactory progress toward the degree. Students earning such grades are therefore recommended for dismissal from the Master of Social Work degree program. Students dismissed from the M.S.W. program subject to University Regulation 4.001 for academic and/or behavioral reasons shall not be permitted to enroll in the Bachelor of Social Work program.

### **Degree Requirements**

The Master of Social Work degree is a two-year, 60-credit program. It is designed for full-time or planned part-time students. Full-time students take 15 credits each semester, which includes coursework within the classroom and a field practicum.

The M.S.W. contains two program options: the regular 60-credit program and the Advanced Standing Program. The regular 60-credit program consists of the Generalist Year Curriculum (30 credits) and the Specialist Year Curriculum (30 credits). The Advanced Standing Program consists of the Advanced

Year Curriculum (30 credits). In addition to these program options, students may enroll either full-time or part-time. Students designate the program for which they are applying. Requests for changes after being admitted must be made in writing and approved by the M.S.W. coordinator. Program options and associated academic progression are configured as follows:

**The Regular M.S.W. Program (60 credits).** Students may enroll and progress as either:

Full-time — graduate within two years of initial program registration; or

Part-time — graduate within four years of initial program registration.

**The Advanced Standing Program (30 credits).** Students may enroll and progress as either:

Full-time — graduate within two semesters of initial program registration; or

Part-time — graduate within two years of initial program registration.

The full- and part-time Master of Social Work degree is designed as follows:

---

### Field Education Requirements

Prior to applying to Field Education, students must exhibit appropriate professional behavior in the academic setting. Students found to be out of compliance with the NASW Code of Ethics will not be permitted to enter the field. Academic credit for previous work experience will not be given in lieu of the Field Education internship.

Students will review a mandatory field orientation the spring/summer semester prior to entering the field and meet individually with field faculty. See [www.fau.edu/ssw](http://www.fau.edu/ssw) for complete eligibility criteria.

The internship for Generalist students involves 16 hours per week of generalist practice under the direction of an agency-based field instructor and attendance at a three-hour-per-week integrative seminar. The Generalist student participates at the foundational level in the [Office of Interprofessional Education and Practice](#) in the fall and spring semesters. The internship for Specialist and Advanced Standing students consists of approximately 20 hours per week of advanced clinical practice under the direction of an agency-based field instructor and attendance at a three-hour-per-week integrative seminar. The Specialist and Advanced Standing student participates in two interprofessional activities: One in the fall and one in the spring. Dates are shared in advance for all interprofessional activities. Students are expected to make arrangements to be in attendance. Part-time Specialist and Advanced Standing students have the option to extend their internship beginning in the fall of Year 3 and completing 16 hours per week through the following summer semester, graduating in August.

Due to the limited number of agencies that can provide evening and weekend hours for internships, as well as appropriate social work activities and supervision after hours, the Sandler School of Social Work requires that students set aside a minimum of eight weekday/daytime hours (Monday through Friday, 8 a.m. to 5 p.m.) for their internships each week. Generalist M.S.W. students (part-time and full-time) participate in an interprofessional program with the colleges of Medicine and Nursing that requires daytime hours.

Criminal background checks and/or substance abuse testing may be required by the field agency and the Sandler School of Social Work prior to or during Field Education. Prior criminal conviction may negatively impact the ability of the Sandler School of Social Work Field Education to place the student with an agency for the purpose of completing a field education and thus the student may be unable to obtain a Social Work degree. Within the State of Florida, a felony history may make an individual ineligible to become a licensed social worker.

Students who receive a positive substance abuse test result may face disciplinary action or action in accordance with the [CSWE Core Competencies and Practice Behaviors](#).

Students who abandon or leave their internship without permission from the field educator or faculty may be asked to leave the Social Work program.

## **ADDICTIONS**

### **GRADUATE CERTIFICATE**

*(Minimum of 27 credits required)*

In an effort to combat the growing crisis of addiction in our country, the Sandler School of Social Work has collaborated with the Florida Certification Board (FEC) to offer the Addictions certificate. Through this 27-credit certificate, students interested in specializing in this field may have a jump start on earning their credential as either a Certified Addiction Professional (CAP) or a Master's Level Addiction Professional (MCAP). An MCAP credential identifies a practitioner as a specialist in the field of addiction and meets the requirements for a qualified professional under Chapter 397, Florida Statutes, allowing practitioners to make substance use disorder diagnoses and bill under Florida's State Medicaid.

### **Admission Requirements**

The certificate is offered to second year (Specialist) or Advanced Standing M.S.W. students only.

### **Curriculum**

The MCAP designated competency has been obtained through content-specific training in the domains of Clinical Evaluation; Treatment Planning; Counseling; Case Management and Referral; Client, Family and Community Education; Documentation; Clinical Supervision; and Professional Responsibility.

The FCB approved the following courses to meet the 350 hours of content-specific training required for certification. All courses must be completed with a grade of "B."

---

	16 hours of training in supervision

(FIST – 12 hours plus 4 hours  
approved through SOW 6535)

## **CHILD WELFARE** **GRADUATE CERTIFICATE**

*(Minimum of 12 credits required)*

The graduate-level Child Welfare certificate program, open only to students enrolled in the Sandler School of Social Work, prepares students for a career in working with abused or neglected children and their families. The 12-credit certificate, available in person or fully online, provides a foundation of knowledge in practice, policy and programs that impact vulnerable children's lives. Students develop practice skills in areas relevant to children's services, including substance abuse and family violence. Depending on funding, internships may be available. Call 561-297-3234 for information.

### **Program Requirements**

1. Six credits of SOW courses that focus on child welfare;
2. Six credits of master's level Field Education placements (SOW 6535 and SOW 6536) with the Department of Children and Families (DCF) or a private agency approved by the Sandler School of Social Work that has contracted with the DCF to provide the same child protection services as the public agency;
3. Completion of a Master of Social Work degree.

## **HEALTHY AGING** **GRADUATE CERTIFICATE**

*(Minimum of 15 credits required)*

With the continuing increase in aging populations in Florida and throughout the United States, the delivery of social work services for diverse groups of elders will become increasingly critical. Service needs currently exist and will continue to develop along a continuum of care in public, private-not-for-profit and private-for-profit settings. In response to these evolving needs, the Sandler School of Social Work developed a certificate program to ensure that there are competently prepared, master's-level social workers to meet the biopsychosocial and spiritual needs of South Florida's diverse elder

populations. This certificate program is open only to M.S.W. students.

### **Program Requirements**

1. SOW 6646, Advanced Theory and Social Work Practice with Elders and Families;
2. Two approved SOW graduate-level courses related to practice with elders;
3. One master's-level Field Education placement (6 credits) specializing in service outreach to diverse elders;
4. A Master of Social Work degree.

## **SEXUALITY AND GENDER EDUCATION GRADUATE CERTIFICATE**

*(Minimum of 12 credits required)*

This collaborative certificate program between the Sandler School of Social Work and the Center for Women, Gender, and Sexuality Studies is available for master's and doctoral students. It provides a flexible curricular framework for a focus on Sexuality and Gender Studies within social work and related professions. More information can be found [here](#).

## **SOCIAL JUSTICE GRADUATE CERTIFICATE**

*(Minimum of 12 credits required)*

A graduate certificate in Social Justice prepares students to address current issues of social justice through inclusive practice and policy advocacy change within the larger societal systems. This 12-credit certificate:

1. Prepares students for evidence-based practice in assessing and addressing issues related to social justice through community development, advocacy, policy formation and other social work strategies.
2. Provides students with community-engaged learning and reflective practice with regard to social justice and inclusive practice methods.

### **Program Requirements**

Students enrolled in the Master of Social Work degree program at FAU may earn the graduate

certificate by completing the following courses.

Social Welfare Policy and Provisions	SOW 3232	3 <b>or</b>
Social Welfare History and Policy	SOW 6235	3
Social Welfare Practice with Communities and Organizations	SOW 4343	3 <b>or</b>
Generalist Social Work Practice with Organizations and Communities	SOW 6306	3
Social Justice and Social Work: Issues and Responses	SOW 6214	3
Inclusive Social Work Practice	SOW 6671	3

## DOCTORAL PROGRAM

### SOCIAL WORK

#### DOCTOR OF SOCIAL WORK (D.S.W.)

*(Minimum of 50 credits required)*

#### Mission and Goals

The mission of the D.S.W. program is to provide doctoral-level practitioners with educational experiences that will allow them to engage in advanced clinical social work practice, conduct advanced clinical research, teach evidence-based social work clinical practice courses and assume social work leadership roles in the social work profession.

#### The D.S.W. program has six goals:

##### Goal 1

Integrate social work, social and behavioral sciences with other disciplines as the basis for the highest level of evidence-based social work practice.

##### Goal 2

Demonstrate professionalism, leadership, ethical principles and scientific integrity in advanced social work practice, education, and research.

### **Goal 3**

Provide collaborative leadership in the development of social work evidence-based practice models and standards of care for diverse populations.

### **Goal 4**

Generate client, systems, practice and outcomes research.

### **Goal 5**

Analyze theory, empirical research and other evidence to guide improvements in social work practice.

### **Goal 6**

Utilize information systems and technology to enhance social work education and practice.

### **Admission Criteria**

1. An M.S.W. degree from a Council on Social Work Education (CSWE) accredited institution.
2. A minimum of three years post-M.S.W. experience is required.
3. Copy of current license (LCSW), license eligibility or registration as a Florida social work intern.
4. A grade point average (GPA) of 3.5 or higher in their M.S.W. is required. In addition to the University application, D.S.W. applicants must also submit the Social Work supplemental materials that include the personal statement describing the applicant's goals for the doctorate in Social work (no more than 500 words), submission of the names and contact information of three references (doctoral-level practitioners or educators) and a current résumé. Meeting minimal standards does not guarantee admission. The total application packet will be considered in making admission decisions.
5. Background check, completed upon admission.
6. Satisfactory oral interview as requested by members of the D.S.W. Admissions Committee.

If accepted for admission into the D.S.W. program, all incoming students are required to attend a D.S.W. orientation conducted during the week prior to the beginning of the fall term. Failure to attend this orientation session will result in admission deferment to the following year.

Students not admitted to the D.S.W. program will not be permitted to take doctoral-level SOW courses. Exceptions may be made for individuals with an out-of-state L.C.S.W. who need to satisfy Florida licensing requirements. Permission must be granted by D.S.W. program coordinator.

Students who are dismissed from the Social Work program may not return to take any Social Work classes.

## **Admission Requirements for International Students**

Graduates of colleges or universities outside of the United States who have completed an academic program equivalent to an American M.S.W. degree may apply for admission. All international applicants whose transcripts are from non-U.S. institutions must have their credentials evaluated course by course, including the GPA, by a professional evaluation service. A service may be found at [www.NACES.org](http://www.NACES.org).

International applicants for whom English is a second language are required to submit a score of 600 or higher (IBT of 92-93) on the Test of English as a Foreign Language (TOEFL) before enrolling in coursework. Applicants must write to Test of English as a Foreign Language, Educational Testing Service, Princeton, New Jersey, U.S.A. 08540, or visit [www.ets.org/toefl](http://www.ets.org/toefl) for assistance.

In addition, international applicants must have had previous experience in the social welfare field in their own countries prior to application to the D.S.W. program.

Lastly, international applicants must also possess and provide a sound financial plan to cover the costs of tuition, living expenses and round-trip transportation, as determined by the FAU Graduate College.

## **Transfer Credit**

Students transferring from another D.S.W. program may transfer a maximum of 12 graduate credits for the 50- credit program. No transfer credits are accepted for courses taken at the M.S.W. level. All courses that are applied to the degree must have been successfully completed within three years of entrance into the FAU program, and the student must have earned a grade of "B" or above. A grade of "B-" or below does not meet this requirement and is not accepted. No graduate credit is granted for life experience or work experience.

## **Doctoral Degree Requirements**

The D.S.W. degree requires at least 80 credits beyond the baccalaureate degree.

## **D.S.W. Capstone Committee**

The D.S.W. Capstone Committee is a standing school committee responsible for curriculum changes and supporting each student's capstone progress. While instructors of each of the three capstone courses are responsible for evaluating students' capstones, the D.S.W. Capstone Committee supports the process by providing feedback to students in their proposal, implementation and defense stages of the capstone.

The D.S.W. Capstone Committee comprises graduate faculty in the Sandler School of Social Work.

## **Plan of Study for Doctoral Degrees**

1. All degree-seeking graduate students should have an approved Plan of Study on file with the FAU Graduate College no later than halfway through their required coursework and before enrolling in the capstone courses of the D.S.W. program. Students must have an approved Plan of Study on file with the Graduate College prior to the term in which they intend to graduate. All students receive written confirmation when their Plan of Study is approved by the dean of the Graduate College.
2. Changes to an approved Plan of Study require the online submission of a revision to the existing Plan of Study. . Revisions need only be filed once and may be submitted during the final term in which the student plans to graduate.
3. A completed Form 12-Research Compliance and Safety must be attached to the Plan of Study form. Any federally mandated research compliance issues must be approved by the appropriate University committee prior to the collection of data.

## **Admission to Candidacy for Doctoral Degrees**

1. Graduate students become candidates for the doctoral degree once they are granted formal admission to candidacy. Such admission requires the successful completion of the Capstone Proposal course, as well as the approval of the student's D.S.W. Curriculum committee, the department chair, the college dean and the dean of the FAU Graduate College. The approval must be based on (a) the academic record of the student, (b) the opinion of the D.S.W. Curriculum committee concerning overall fitness for candidacy, and (c) an approved research topic.
2. Application for admission to candidacy should be made as soon as the Capstone Proposal course has been passed. By completing Form 8-Admission to Candidacy for the Doctoral Degree, applicants are formally admitted to candidacy. Students must be admitted to candidacy at least one semester before applying for graduation.

## **Course Scheduling**

The Sandler School of Social Work endeavors to schedule classes to accommodate students. Note that the School of Social Work makes no guarantees regarding class meeting times or days.

## **Enrollment in D.S.W. Courses**

D.S.W. courses are limited to those students who have been fully admitted to the D.S.W. program. Non-matriculated students who register for a D.S.W. course will be administratively withdrawn from the course by the Sandler School of Social Work. If withdrawn, it is the student's

responsibility to seek any associated fee refunds through other University channels.

### **Attendance on First Day of Class**

All students enrolled in the D.S.W. program are required to attend the first class in all D.S.W. courses.

### **Time Limitation**

Candidates for the D.S.W. degree must complete all degree requirements within six consecutive years after initial registration.

### **Academic and Professional Standards**

Continuation in the D.S.W. program requires satisfactory progress toward degree completion. This includes registering for courses from the approved curriculum, following the proper program structure, earning grades of at least "B" or above in all courses (except as noted below), maintaining a 3.0 cumulative GPA and adhering at all times to the National Association of Social Workers (NASW) Code of Ethics.

Students who fail to meet the academic standards of the program or violate the NASW Code of Ethics may be recommended for dismissal.

### **Additional Academic Standards**

Grades below "B" (e.g., "B-" to "F") reflect unsatisfactory progress toward the degree. Students earning such grades are therefore subject to dismissal from the D.S.W. degree program. Students dismissed from the D.S.W. program are subject to University Regulation 4.001 for academic and/or behavioral reasons and shall not be permitted to enroll in another FAU Social Work program. Students may also be dismissed at any time if they are not making satisfactory progress toward completion of the degree.

### **Overview of the D.S.W. Curriculum**

In addition to the core curriculum, D.S.W. students take two electives at the University to supplement their studies. At least one elective must be doctoral level (7000 level). Students may take a master's level course for their second elective, if (a) the content is clearly linked to their capstone topic or their capstone methods, (b) it is a course the student has not previously taken, and (c) the course is not duplicative of previous MSW courses (i.e., the course is not the equivalent of a completed M.S.W. course in a different department). Electives must be approved as part of a student's Plan of Study

## ANTHROPOLOGY

**Undergraduate Courses/ [link to graduate courses](#)**

### **University Honors Seminar in Anthropology (ANT 1930) 3 credits**

*Writing Across Curriculum (Gordon Rule)*

A seminar in the University Honors Program on topics in anthropology.

### **Introduction to Anthropology (ANT 2000) 3 credits**

*Writing Across Curriculum (Gordon Rule)*

In this course, students learn the foundations of anthropology as the study of human variation in its

biological, social and cultural dimensions. Students learn about anthropological concepts, principles and methodologies to understand and explore past and present human behavior. They will apply the anthropological approach to analyze issues pertaining to past and contemporary cultures, and develop intellectual skills and habits to understand behavioral, social and cultural issues from multiple disciplinary perspectives. This is a General Education course.

### **Culture and Society (ANT 2410) 3 credits**

Perspective on the human condition by examining some of the principal cultural differences between traditional and modern societies. Using ethnographic materials, examination of how people formulate their world views (cosmology) and live by the social logics of reciprocity and kinship. These are compared with world views and social logics of markets and bureaucracy in industrial societies. This is a General Education course.

### **Introduction to Biological Anthropology (ANT 2511) 3 credits**

*Corequisite: ANT 2511L*

Students learn about the general topics in biological anthropology, including genetics, primatology, comparative anatomy and paleoanthropology. This is a General Education course.

### **Introduction to Biological Anthropology Lab (ANT 2511L) 1 credit**

*Corequisite: ANT 2511*

Students perform procedures similar to those used by professional anthropological researchers and engage in hands-on activities designed to reinforce the material presented in the lecture section. This is a General Education course.

### **Directed Independent Research (ANT 2912) 1-3 credits**

*Prerequisites: ANT 2000 or ANT 2410 or ANT 2511, 2511L with a minimum grade of "C" or permission of instructor*

Students work closely with faculty members on a specific research project. Course requirements and evaluation are determined by the supervising faculty member for each student project.

### **Directed Independent Research (ANT 2913) 0-3 credits**

*Prerequisites: ANT 2000 or ANT 2410 or ANT 2511, 2511L with a minimum grade of "C" or permission of instructor*

Students work closely with faculty members on a specific research project. Course requirements and evaluation are determined by the supervising faculty member for each student project. Grading: S/U

### **Anthropology Study Abroad (ANT 2952) 1-6 credits**

*Prerequisite: Freshman or sophomore standing*

Credit for enrollment in approved study abroad programs.

**Note:** The courses above (ANT 1930, 2000, 2410, 2511, 2952) may not be counted for credit in minimum major.

**Frauds, Myths and Mysteries: Science and Pseudoscience in Archaeology (ANT 3016) 3 credits**

This course is a critical examination of why people make off-the-wall claims about the human past and how professional archaeologists go about addressing them. The course assesses the flaws in such claims by applying scientific reasoning.

**Stones and Bones: Unearthing the Past (ANT 3114) 3 credits**

Archaeology, the study of the material culture of past peoples, is packed with (literally) groundbreaking research. In this course, students explore archaeology's greatest discoveries and most famous sites and learn about the cutting-edge science behind the study of the ancient world.

**Archaeology of Europe (ANT 3143) 3 credits**

This course presents a broad overview of the archaeology of Europe from the continent's earliest settlement to the post-Medieval period. Students examine aspects of past lifeways, including economics, trade, social stratification, conflict and human-environment interactions through analyses of material culture.

**The Maya and Their Neighbors (ANT 3163) 3 credits**

Investigates the ancient cultures of Mexico and northern Central America with an emphasis on the ancient Maya, their calendar and hieroglyphic writing. Also studies their Olmec predecessors and contemporary civilizations in central Mexico, such as Teotihuacan, the Toltecs and Aztecs.

**South America Before Columbus (ANT 3165) 3 credits**

An introduction to the archaeology and people of ancient South America. Early hunters/gatherers, origins of agriculture and complex societies to the rise and fall of the great Inca civilization.

**Real Archaeology (ANT 3190) 3 credits**

Course contributes to professional development of archaeology students by teaching them the theory, methods and techniques of public archaeology and cultural resources management. Course includes a review of health, safety and ethics issues in archaeology; international, federal, state and local statutes affecting public archaeology; and hands-on instruction in practical methods.

**Peoples Around the World (ANT 3212) 3 credits**

A course in world ethnography involving an inspection of cultural developments, in all their variety, throughout the world. The indigenous culture areas of each continent will be considered, with a focus

on livelihood, the social order, religion, music and art.

### **Anthropology of Religion (ANT 3241) 3 credits**

A cross-cultural study of magic and religion with emphasis on belief systems and rituals and their practitioners.

### **Native-American Culture and Society (ANT 3312) 3 credits**

A description and analysis of aboriginal and contemporary North-American-Indian cultures in their historical and ecological contexts.

### **Cultures of South Asia (ANT 3361) 3 credits**

*Writing Across Curriculum (Gordon Rule)*

The cultural variation in South Asia, comprising the nations of India, Pakistan, Bangladesh, Sri Lanka, Nepal, Bhutan and the Maldives. Religion (Hinduism, Islam and Buddhism), caste and social structure, village dynamics, tribal groups, colonialism and culture change.

### **Anthropology of Film: An Introduction to Visual Anthropology (ANT 3391) 3 credits**

A history and analysis of selected ethnographic films and film makers that give valuable insights into culture and human behavior.

### **Human Variation (ANT 3516) 3 credits**

An examination of the biological and sociological meaning of race in its application to humans. Processes affecting biological variation in human populations: the mechanisms of biological evolution and the interaction of human genetic factors with culture and the natural environment.

### **Human Evolution (ANT 3586) 3 credits**

An investigation of the biological evolution of the human species. The hominid fossil record is surveyed in conjunction with explanation in terms of the principles of evolution and genetics.

### **Human and Cultural Rights (ANT 4006) 3 credits**

The course focuses on the definition of human and cultural rights by international bodies and cultural organizations. The starting point for the discussion is the UN Universal Declaration of Human Rights. The course explores how the declaration has been received, implemented, debated or ignored in cultures around the world.

### **The Anthropology of Death (ANT 4025) 3 credits**

This course takes an anthropological perspective on how humans understand death. The course explores examples from various time periods and locations through ethnography, archaeology,

bioarchaeology and social theory perspectives.

### **Anthropological Analysis (ANT 4090) 3 credits**

Introduction to the process of conducting quantitative research in anthropology. The course considers the types of questions anthropologists ask, the kinds of data they collect and the kinds of analyses they carry out.

### **Archaeological Research Methods (ANT 4116) 3 credits**

This course focuses on what archaeologists actually do in the field and laboratory to learn about ancient societies. Methods are placed in context through discussion of scientific research design in archaeology, which determines what methods are chosen, including field methods, analytical methods and laboratory methods.

### **Development of Ancient Civilization (ANT 4141) 3 credits**

An analysis of human cultures from the emergence of humanity through the rise of civilization. An ecological orientation will focus on the close interplay among early humans, their paleoenvironments and the dynamics of culture change. Relevance for modern times in understanding the past and projecting the future. Examination of major archaeological concepts.

### **Florida Archaeology (ANT 4158) 3 credits**

Native-American peoples and cultures of Florida in pre-Columbian times as revealed by the archaeological record. The development of Florida's indigenous cultures is traced from earliest known human occupancy to their disappearance after the European conquest.

### **Research Methods in Bioarchaeology (ANT 4192) 3 credits**

*Prerequisite: ANT 2511 or ANT 3516 or ANT 3586 or ANT 4520*

Training in the research methodology of biological anthropology and archaeology. Application to an original research project and the presentation of a written research report.

### **Economic Anthropology (ANT 4266) 3 credits**

The exploration and application of economic anthropology as a subfield of anthropology. The course employs a comparative methodology to cultures as well as the study of economic theory as it applies to the analysis of culture.

### **The Anthropology of Politics (ANT 4274) 3 credits**

This course examines how anthropology has used the concept of politics and applied it to its studies and fieldwork. Focus is on how power and politics have been organized in cultures and examining the contours of an emergent and dynamic global politics.

### **Gender and Culture (ANT 4302) 3 credits**

An examination of the variation of gender roles in non-Western societies across different levels of social organization. Femininity, masculinity and additional genders are examined within the context of anthropological theory.

### **African-American Anthropology (ANT 4315) 3 credits**

A review of the most important theoretical issues in African-American anthropology, including Africanisms, the family, matrifocality and religion, with the reading of ethnographic studies of African Americans in the United States.

### **Asian Medical Systems (ANT 4365) 3 credits**

Asia is home to some of the world's oldest continuing medical systems that serve the health care needs of hundreds of millions of people. Students will better understand the peoples and cultures of Asia from the perspective of health, illness and healing by focusing primarily on the theories, nosologies, diagnostic principles and therapies of three medical systems. These include Ayurvedic medicine, Tibetan medicine and Chinese medicine and subfields of practice like yoga and meditation. Students are introduced to the main theories, diagnostic techniques and therapies for each system.

### **Anthropology of Peace and Violence (ANT 4409) 3 credits**

Explores the meaning and forms of peace and violence that are a part of our daily lives, in cultures and globally. These are subjects that have engendered many debates about human behavior. The course also explores some general and directed questions about peace and violence.

### **The Anthropology of Sex and Gender (ANT 4413) 3 credits**

This course explores the cultural construction of sex and gender. It focuses on the United States as a central geographic site to explore these constructions, although examples from other parts of the world are used as comparisons to our own experience and beliefs.

### **Cultural Anthropology (ANT 4414) 3 credits**

Culture: its nature, structure and dynamics; its relation to society and the individual. Tribal cultures as contrasted with state formations, exemplified by several widely varied case studies.

### **Anthropology of Nature (ANT 4419) 3 credits**

Using theory from cultural anthropology, this course examines the relationship between culture and the physical environment or "nature," focusing on political, medical, religious, linguistic/discursive, ecological, development and gender issues in a variety of communities and countries around the world.

### **Systems, Institutions in Anthropological Perspective (ANT 4425) 3 credits**

This course investigates the social institutions that serve to organize our lives – schools, hospitals, workplaces and others. Systems and institutions are shaped by norms, rules and regulations, and people create and recreate their spaces within the institutions. Utilizing ethnography as a method of closely studying everyday interactions, students explore the theoretical and empirical avenues of their lives within systems and institutions.

### **Psychological Anthropology (ANT 4433) 3 credits**

A study of culture and personality with emphasis on anthropological approaches to childhood development, Oedipus complex, consciousness, rationality and other topics across world cultures.

### **Environment and Disease (ANT 4463) 3 credits**

A study of the evolution of human diseases from ancient times to the present. The influence of culture, society and personal behavior will be explored, along with the relationship between the environment and human genetics.

### **Culture, Gender and Health (ANT 4469) 3 credits**

The course examines in a variety of cultures how sex differences and gender inequalities impact the health status of women and men, their access to health care resources and their roles as health care providers. Focused attention is paid to culturally constructed knowledge of the body, gender-based political economy of health care in developing countries, reproductive health, indigenous medical systems and children's health.

### **Global Health and Culture (ANT 4480) 3 credits**

This course examines the historical interdependencies of, and the current issues related to, medical anthropology and global health. The objective of the course is to provide students an in-depth examination of the relationships of culture, health and illness from a global perspective. The course features perspectives from anthropologists as well as others working in the fields of global health and medicine.

### **Research Methods in Cultural Anthropology (ANT 4495) 3 credits**

Training in the research methodology of cultural/social anthropology. Application to an original research project and the presentation of a written research report.

### **Biological Anthropology (ANT 4514) 3 credits**

Biological (physical) anthropology as the study of human biology: human genetics and genetic variation, human anatomy and physiology, human growth and adaptation, and the biological evolution of the human species, together with primatology.

### **Forensic Anthropology (ANT 4520) 3 credits**

Course covers the application of scientific and anthropological techniques to criminal investigations in support of law enforcement, focusing on the skills necessary to carry out a basic analysis of human skeletal remains to determine identity of the decedent and the manner and cause of death.

### **Epidemics: Culture, Science and Policy (ANT 4532) 3 credits**

This course explores the evolving relationship between humans and non-human microbiota. Beginning with the modern era, we will study infectious disease epidemics and the critical contexts in which they occur (e.g., ecological, political, social, and cultural).

### **Primate Behavior (ANT 4552) 3 credits**

*Prerequisite: ANT 2511*

Examination of the types of living primates, their distribution and ecology. Students study general primate behavior as well as behaviors specific to particular groups of living primates.

### **Ethnographic Fieldwork (ANT 4802) 3-6 credits**

Prerequisites: Anthropology major, junior or senior standing and permission of instructor  
Supervised fieldwork includes construction of research design, data gathering, interviewing techniques and development of other research skills in a field situation.

### **Fieldwork in Archaeology (ANT 4824) 3-6 credits**

*Prerequisites: ANT 2000 and permission of instructor*

On-site field experience in methods of archaeological fieldwork, recovery techniques, recording, sampling strategy and survey. The course may include attendance at field schools directed by qualified faculty outside the University, with permission of the department.

### **Directed Independent Study (ANT 4905) 1-3 credits**

*Prerequisite: For Anthropology majors only or by permission of instructor*

### **Directed Independent Research (ANT 4917) 1-3 credits**

*Prerequisites: ANT 2000 or ANT 2410 or ANT 2511, 2511L or permission of instructor*

Students work closely with faculty members on a specific research project. Course requirements and evaluation are determined by the supervising faculty member for each student project.

### **Directed Independent Research (ANT 4918) 0-3 credits**

*Prerequisites: ANT 2000 or ANT 2410 or ANT 2511, 2511L or permission of instructor*

Students work closely with faculty members on a specific research project. Course requirements and evaluation are determined by the supervising faculty member for each student project. *Grading: S/U*

### **Special Topics (ANT 4930) 1-3 credits**

Selected topics in Anthropology. Special topics will be categorized by subfield. May be repeated as topics vary.

### **Internship in Anthropology (ANT 4940) 1-3 credits**

*Prerequisite: Permission of department*

This internship provides an opportunity for students to participate in a hands-on experience, one in which they are exposed to working environments where they can put anthropological knowledge and technical skills into effect.

### **Anthropology Study Abroad (ANT 4957) 1-6 credits**

*Prerequisite: Junior or senior standing*

Credit for enrollment in approved study abroad programs.

### **Honors Thesis in Anthropology (ANT 4972) 3 credits**

*Prerequisite: Permission of instructor*

Includes studies of research design, the conduct of field laboratory and library research and the writing of an honors thesis in anthropology.

### **Introduction to Asian Studies (ASN 3006) 3 credits**

This course introduces students to some of the major issues and themes in Asian regional studies. The course combines humanities and social science approaches to the study of Asia to enable students to explore the variety of Asian culture/societies.

## **Anthropology Graduate Courses**

### **Special Topics (ANG 5930) 1-3 credits**

Selected topics in anthropology.

### **Internship in Anthropology (ANG 5940) 2-4 credits**

Apprenticeship experience in museums, nonprofit institutions, governmental agencies or business settings, supervised by an on-site supervisor and Anthropology Department faculty sponsor.

### **Seminar in Anthropological Theory (ANG 6034) 3 credits**

This course examines in depth the development of anthropological theory from the establishment of anthropology as a discipline in the mid-20th century. The course focuses on major schools of thought that crosscut the four subfields of anthropology and covers important theoretical works written by prominent figures of those schools. Introduction to the history and development of anthropological

theory and the interrelationships of theory across the four disciplines of anthropology.

### **Advanced Anthropological Research 1 (ANG 6090) 3 credits**

Advanced application of anthropological methods through active application in both field- and lab-based settings.

### **Advanced Anthropological Research 2 (ANG 6092) 3 credits**

*Prerequisite: ANG 6090*

Course focuses on active student participation in the application of subdiscipline-based research methodologies

### **Proposal Development and Writing (ANG 6095) 3 credits**

This course provides the student with knowledge about, and skills in, the construction of research proposals in the fields of biological anthropology, archaeology and cultural anthropology.

**Note:** The prerequisite to each graduate-level seminar below is the completion of the corresponding 4000-level course or its equivalent. (This prerequisite does not apply to ANG 6486.)

### **Seminar in Archaeology (ANG 6115) 3 credits**

Archaeological method and theory as well as reconstruction and description of prehistoric cultures.

### **Research Methods in Archaeology (ANG 6199) 3 credits**

This course provides graduate students with a review of archaeological methods to assist them in conceiving and planning research projects. Methods are placed in context through discussion of scientific research design and theory in archaeology.

### **Ethnographic Perspectives on Health (ANG 6390) 3 credits**

*Prerequisite: Graduate standing*

Culture's role in shaping health and medicine across a range of societies and institutions is critically assessed through in-depth ethnographic examination of the impact ethnicity, gender, politics, technology, religion and class have on people's health status, their access to health care resources and their roles as health care providers.

### **Quantitative Reasoning in Anthropological Research (ANG 6486) 3 credits**

Introduction to the process of conducting quantitative research in anthropology and developing an anthropological database suitable for statistical application.

### **Seminar in Cultural Anthropology (ANG 6490) 3 credits**

Cultural theory is historical perspective. This seminar is organized as a foray into contemporary social

and cultural anthropology, with an emphasis on journal literature of the recent past. The readings chosen from major anthropological journals reflect the currents present in the state of the discipline and cover the following major topical areas as well as others: political economy (globalization, human rights), ecology/political ecology (environmentalism), humanistic approaches, medical anthropology, feminist approaches and ritual and religion.

### **Research Methods in Cultural Anthropology (ANG 6496) 3 credits**

This course is designed as a graduate level introduction to research methodologies in sociocultural anthropology. It focuses on hypothesis and research question development, adapting research methods to goals and using interpretive/analytic frameworks.

### **Research Methods in Bioarchaeology (ANG 6535) 3 credits**

Training in the research methodology of biological anthropology and archaeology. Application to an original research project and the presentation of a written research report.

### **Seminar in Biological Anthropology (ANG 6587) 3 credits**

Biology and environment in human existence: theoretical considerations. This course provides master's students with a foundation in the core principles of biological anthropology, which involves the synthesis of research from the subfields of evolutionary theory, genetics, primate behavior and ecology, and paleontology.

### **Advanced Global Health and Culture (ANG 6732) 3 credits**

This course examines the historical interdependencies of, and the current issues related to, medical anthropology and global health. The objective of the course is to provide students an in-depth examination of the relationships of culture, health and illness from a global perspective. The course features perspectives from anthropologists as well as others working in the fields of global health and medicine.

### **Directed Independent Study (ANG 6905) 1-4 credits**

### **Special Topics (ANG 6930) 1-3 credits**

Selected topics in anthropology.

### **Master's Thesis (ANG 6971) 1-6 credits**

*Grading: S/U*

# ARCHITECTURE

**Undergraduate Courses/ [link to graduate courses](#)**

**A minimum grade of "C" is required for each architecture (ARC-prefixed) course.**

All studios (Architectural Design 5 through Comprehensive Design Project) apply the pedagogical benefits of individual tutoring ("desk crits") and group dynamics. On several occasions, with participation of internal and/or external critics, pinups or juries are conducted to evaluate the products of the studio. Students are required to participate in the entire jury process for their own studio. Observation of other studios' juries is highly recommended.

## **Architectural Design 1 (ARC 1301) 4 credits**

Introduction to methods of architectural design and representation.

## **Architectural Design 2 (ARC 1302) 4 credits**

*Prerequisites: ARC 1301 and 2208; Corequisite: ARC 2461*

Study of proportions—both natural and derived—and the relationships between the human body and the physical parameters of the built environment.

## **Architectural Theory 1 (ARC 2201) 3 credits**

*Prerequisites: ARC 1302, ARC 2208; Corequisite: ARC 2303*

Students explore how ideas and knowledge are related to form and space by developing an understanding of the elements and principles of architecture used in the manifestation of the built environment. Course work emphasizes the methods and strategies used in the research and analysis of architecture.

## **Culture and Architecture: The Master Builder (ARC 2208) 3 credits**

Holistic approach to the evolution of architecture as an empirical element of culture from prehistoric humankind to the present. Course is based on the interaction between the principles and concepts of architectural design and technology and the world cultures that produced and utilized them in their built environments. This is a General Education course.

## **Architectural Design 3 (ARC 2303) 4 credits**

*Prerequisites: ARC 1302, ARC 2461; Corequisite: ARC 2201*

Emphasizes graphic presentation, descriptive communication, and analysis pertaining to architectural design. Students develop strategies for the manifestation of form and space by building upon the material previously encountered in earlier design studios. Projects place special emphasis on the

interpretation and analysis of local and regional conditions.

### **Architectural Design 4 (ARC 2304) 4 credits**

*Prerequisites:* ARC 2201, ARC 2303, ENC 1101, and *ENC 1102 or substitute*; *Corequisite:* ARC 2580

Through a series of analytical and architectural design exercises, this course focuses on interpretation and analysis of structural systems and their application in various design exercises and on the relationship between the human body/site/climate and architectural form.

### **Materials and Methods 1 (ARC 2461) 3 credits**

*Prerequisite:* ARC 1301; *Corequisite:* ARC 1302

Introduction to the relationship between architecture and construction, emphasizing the basic principles of how buildings are built.

### **Architectural Structures 1 (ARC 2580) 3 credits**

*Prerequisites:* MAC 2233 with minimum grade of "C"; PHY 2053 with minimum grade of "D-"

*Corequisite:* ARC 2304

This course is an introduction to structural design and statics. Course work examines design issues relating to various structural systems and materials. Student work is assessed through written exercises, case studies, exams, and structural design models.

### **Special Topics (ARC 2930) 1-4 credits**

Special topics taught during the first two years of the architecture degree program.

### **Architectural Research Methods and Analysis (ARC 3091) 3 credits**

*Writing Across Curriculum (Gordon Rule)*

*Prerequisite:* Acceptance into the upper-division architecture program; Junior standing

*Corequisite:* ARC 3320

Students in this WAC course are introduced to various types of research relevant to the discipline, as well as university resources relevant to research and writing activities. Students perform a major case study of a building in order to develop abilities to perform research and analysis (both written and graphic) that are important to the discipline.

### **Architectural Visualization Methods 1 (ARC 3133) 3 credits**

*Prerequisites:* ARC 1301, 1302, 2303, 2304, with minimum grades of "C"

This course explores computational design thinking including algorithmic methods and parametric principles for architectural design. Analog and digital methods are examined with an emphasis on logical underpinnings, their processes and visual communication of design intentions.

### **Architectural Visualization Methods 2 (ARC 3185C) 3 credits**

*Prerequisites: ARC 1301, 1302, 2303, 2304 and 3133, with minimum grades of "C"*

A continuation of ARC 3133, this course explores advanced generative design strategies that leverage the importance of data in design decision making. The impact of the current state-of-the-art methods on architectural production are examined relative to their theory and application.

### **Architectural Design 5 (ARC 3320) 4 credits**

*Prerequisites: Minimum grade of "C" in all preprofessional design studio courses. Completion of all required lower-division preprofessional and general education course work, and approved portfolio.*

*Corequisite: ARC 3133*

This course focuses on the use of basic principles of design that reflect meaningful concepts related to use, materials, structure, experience and surrounding physical and social context. This includes developing environmentally responsive solutions to regional climatic conditions, working at architectural scales from the detail to the landscape.

### **Architectural Design 6 (ARC 3321) 4 credits**

*Prerequisites: ARC 3091 and ARC 3320 and ARC 3133, or permission of department*

This course focuses on the integration of structural expression and principles of architectural ordering and composition of space. Student projects develop a critical approach to the program and physical, social and historical context through research in order to develop a meaningful rationale for their design process.

### **Site Planning and Engineering (ARC 3374) 3 credits**

Site planning and construction engineering considerations in architectural decision-making.

### **Materials and Methods of Construction (ARC 3463) 3 credits**

Building materials, their manufacture and assemblies, with emphasis on investigating the theories and practical applications of materials in both contemporary and historical precedents.

### **Architectural Structures 2 (ARC 3503) 3 credits**

Structural analysis and design in wood, masonry, and steel with reference to integration of technical systems and architectural design decisions. Through studio consultation, theories are applied to studio projects.

### **Environmental Technology 1 (ARC 3610) 3 credits**

Develops an understanding of fundamental building physics. Investigates technologies and design strategies to control heat, air, light and sound.

### **Pre-Modern Architectural History and Theory (ARC 3710) 3 credits**

Survey of the development of architectural and urban form from the Renaissance period through the Industrial Revolution. Particular emphasis is placed on the theoretical aspects of the interrelationships among culture, architecture, urban form and technology throughout the world.

### **Digital Fabrication (ARC 4181) 3 credits**

This course helps students develop an understanding of the issues pertinent to the growing digital design culture in relation to its potential manifestation into building and making. This understanding is developed through discussion of selected theoretical writings and their application into architectural design using CNC manufacturing technologies.

### **Ethics and Architecture (ARC 4202) 3 credits**

*Prerequisites: Senior standing or higher*

Course addresses the main notions and issues in ethics so as to situate and capture the particular nature of architecture as a discipline in regards to its intentional and engaged character. The course aims to provide a range of means for developing awareness and understanding of the ethical dimension of architectural design leading to reflective and conscious moral responsibility in architecture praxis.

### **Architectural Theory (ARC 4219) 3 credits**

Basic philosophical considerations in architecture as manifested in the works and writings of recognized authorities in the field.

### **Vertical Studio (ARC 4322) 4 credits**

*Prerequisite: Preceding design studio (e.g., ARC 3320 or 3321 or 4326)*

Holistic architectural responses to different human activities in a given context interspersed with existing and planned buildings and green areas.

### **Architectural Design 7 (ARC 4326) 4 credits**

*Prerequisites: ARC 3321 and ARC 3133 and ARC 3185C, all with a minimum grade of "C"*

This course focuses on systems of structure, circulation, enclosure and programmatic organization within a specific context. Each system acts as a generative tool responsive to the context and the sequencing of design processes. Such processes, manifested through the appropriate means of architectural representation, act as modes for identifying and understanding the possible correlations and oppositions among the above systems and context. Coursework introduces advanced design research, building analysis and study of the social and physical attributes of an architectural project.

### **Architectural Design 8 (ARC 4327) 4 credits**

*Prerequisites: ARC 4326, ARC 3374, ARC 4620, with a minimum grades of "C"*

This course focuses on architecture in the urban context. A continuation of Architectural Design 7 and its emphasis on design processes, this course investigates the relationship of buildings and spaces to the public realm through the development of an urban design plan and a complex building intervention. Coursework includes advanced design research, urban analysis and study of the social and physical attributes of public space.

### **Designing Safer Communities with CPTED (ARC 4384) 3 credits**

The course teaches the methodology of designing for security using Crime Prevention Through Environmental Design (CPTED). The premise is that proper design and effective use of the built environment can lead to reduction in the opportunity of predatory stranger-to-stranger crime, with the result of improving quality of life and reducing fear.

### **Architectural Detail Generation (ARC 4482) 3 credits**

*Prerequisite: ARC 3463*

Research, analysis and interpretation of selected case studies documenting a specified range of construction types explore how the architectural detail is developed in the praxis of building design as a connection between utility and art.

### **Architectural Structures 3 (ARC 4504) 3 credits**

Structural analysis and design in concrete and composite materials with reference to integration of technical systems and architectural design decisions in small, medium, and large buildings. Theories applied, through consultation, to studio projects.

### **Environmental Technology 2 (ARC 4620) 3 credits**

Introduces students to building services systems. Theoretical and practical applications of the building services systems will be investigated.

### **Modern Architectural History and Theory (ARC 4712) 3 credits**

Continuation of the study of the development of architecture and urban form from the Industrial Revolution to the present. Particular emphasis is placed on the theoretical aspects of design as revealed in the interrelationships among cultures, architecture, urban development and technology throughout the world.

### **Architects and Engineers: Histories of a Relationship (ARC 4742) 3 credits**

Course examines the ever-changing relationship between architecture and engineering. It discusses both the scientific/technological and artistic/expressive aspects of architectural engineering, focusing on major points of technological innovation.

### **Historic Preservation (ARC 4801) 3 credits**

An introduction to historic preservation, including the language, concept, history, and other aspects of historic preservation that have made it an economical and political force in today's society at the local, state, national, and international levels.

### **Directed Independent Study (ARC 4907) 1-6 credits**

Independent study, research, or other project to extend and integrate the student's knowledge, directed and approved by faculty.

### **Directed Independent Research (ARC 4915) 3 credits**

*Prerequisite: Permission of instructor*

Students work closely with research mentors to conduct research and inquiry in Architecture. Requirements for the course and the criteria for evaluation are agreed upon by the research mentor and the student.

### **Special Topics (ARC 4930) 1-6 credits**

Study relating to special topics in Architecture, directed and approved by faculty.

### **Architecture and Urbanism Study Abroad (ARC 4950) 3 credits**

*Prerequisite: Approval from the International Programs Office*

This course surveys the history of architecture and urban development in Venice. The recognition and urban characteristic will be emphasized, and in particular, the symbols and meanings distinct to historical periods, including the Byzantine, Medieval, Gothic, Renaissance, High Renaissance, and Baroque. Other cities in the Veneto and other regions of Italy, such as Florence, Siena, Milan, and/or Rome are studied.

### **Architecture Study Abroad (ARC 4955) 1-6 credits**

*Prerequisites: Minimum GPA of 2.0; Architecture majors only*

Students study abroad in order to gain greater insight into the architecture of various world cultures, studying historical and modern examples of architecture.

### **Introduction to Interior Design (IND 2022) 3 credits**

Rooms and interiors of buildings defining our well being, serving our convenience, and providing the stage for our activities from leisure to work. Different categories of interiors (residential, commercial, office, resort, etc.) are presented and discussed.

## **Architecture Graduate Courses**

**A minimum grade of "C" is required for each architecture (ARC-prefixed) course.**

**Literature and Criticism in Architecture (ARC 5221) 3 credits**

Investigations into the ways architecture is encompassed in other art fields and humanities. A critical analysis of the major theoretical positions influencing contemporary architectural thought.

***Professional Practice: Project Versus Practice (ARC 5271) 1 credit***

*Prerequisite: ARC 3321*

One of a family of six one-credit courses focused upon the professional practice of architecture. This module introduces principles of project management and its role within the practice of architecture.

**Professional Practice: Craft and Collaboration in Design and Making (ARC 5272) 1 credit**

*Prerequisite: ARC 3321*

One of a family of six one-credit courses focused upon the professional practice of architecture. This module introduces principles focused on the craft of making, collaboration with design team members and stakeholders, delivering design intent within a project as well as the respective role of each in the discipline of architecture.

**Professional Practice:**

**Financial and Business Management for the Practice of Architecture (ARC 5275) 1 credit**

*Prerequisite: ARC 3321*

One of a family of six one-credit courses focused upon the professional practice of architecture. Various practice management strategies are examined including strategic actions of founding a new firm along with a thorough analysis of practice management and financial analysis.

**Professional Practice: Principles of Practice (ARC 5280) 1 credit**

*Prerequisite: ARC 3321*

One of a family of six one-credit courses focused upon the professional practice of architecture. This module examines the development of sound principles with which to conduct an ethical, moral, professional, reflective and innovative architectural practice.

**Professional Practice: Communication Methods for Design and Construction (ARC 5283) 1 credit**

*Prerequisite: ARC 3321*

One of a family of six one-credit courses focused upon the professional practice of architecture. This module introduces various types of communication methods for design and construction, focusing upon the appropriate application of analysis and method to achieve clear communication.

### **Professional Practice: Contractual Relationships and Risk Management (ARC 5287) 1 credit**

*Prerequisite: ARC 3321*

One of a family of six one-credit courses focused upon the professional practice of architecture. This module introduces various types of design and construction contracts, conditions of the contract for construction dependent upon project delivery method, dispute resolution, risk management, insurance and indemnification.

### **Advanced Architectural Design 1 (ARC 5328) 6 credits**

*Prerequisites: ARC 3463, ARC 4327 and ARC 4504*

*Corequisite: ARC 6305*

This advanced level studio focuses on the integration of the creative and technical design of a building. Coursework includes advanced design research within a complex architectural project. Projects require broad integration and consideration of environmental stewardship, technical documentation, accessibility, site conditions, life safety, environmental systems, structural systems and building envelope systems and assemblies. Clear communication through drawing, writing and speaking is practiced through public presentations and workshops.

### **Topical Design Studio (ARC 5352) 6 credits**

*Prerequisite: ARC 5328*

This topical research studio focuses on a project for a complex urban and/or building design and site location. Projects must demonstrate competent design research, a balance of convention and invention and a high level of knowledge of building technology, site development and graphic and linguistic modes of communicating a design solution.

### **Directed Independent Study (ARC 5907) 1-6 credits**

Independent study, research, or other project to extend and integrate the student's knowledge, directed and approved by faculty.

### **Project Research Methods (ARC 5910) 3 credits**

Research and data gathering, analysis, organization, and evaluation of information and observation of the design process, in preparation for the Thesis Phase design project.

### **Special Topics (ARC 5930) 1-6 credits**

Study relating to special topics in Architecture, directed and approved by faculty.

### **Ethics in Architecture (ARC 6203) 3 credits**

*Prerequisite: Graduate standing*

Using the AIA Code of Ethics as a guide, course examines standards of ethical conduct in a variety of

situations such as those found in a contemporary architectural practice. Studying a variety of case studies concerning topics such as conflicts of interest, safety, and confidentiality conveys an understanding of the profession's standards of conduct and ethics so that students are prepared to uphold those standards.

### **Introduction to Urban Design (ARC 6305) 3 credits**

This course examines various urban theories and architectural conceptualizations, and their relationship to the spatial structure of the urban environment. Lectures and seminar presentations will permit investigation and critical evaluation of urbanism as seen through various professional contexts and philosophies. By situating the analyses in the wider domain of culture, architecture, planning and governance, discussions will range from personal to institutional.

### **Sustainability and Tropical Architecture (ARC 6598) 3 credits**

*Prerequisite: Graduate standing*

Introduction to sustainable design concepts related to the climactic conditions of the local region. Topics cover old/new technologies, protection of the environment, health and safety of occupants, and durability of materials that are affected by the tropical climate. Students develop a set of design guidelines incorporating these concepts in response to a location in the south Florida/Caribbean region.

### **Design Research Studio (ARC 6970) 6 credits**

Advanced design research is conducted through independent student projects leading to a concise design hypothesis and an approved research plan in preparation for the design thesis.

### **Design Thesis Studio (ARC 6972) 6-12 credits**

Advanced design research is conducted through independent student projects leading to an original and distinctive design research project and thesis.

### **Art Courses**

(Listed following the **Women, Gender and Sexuality Studies** courses, under **School of the Arts** , Visual Arts and Art History)

## CARIBBEAN AND LATIN AMERICAN STUDIES

### **Undergraduate Courses**

#### **The Maya and Their Neighbors (ANT 3163) 3 credits**

South America Before Columbus (ANT 3165) 3 credits

[\(See Anthropology courses, this section\)](#)

**Latin American Politics (CPO 4303) 3 credits**

[\(See Political Science courses, this section\)](#)

**Geography of Latin America and the Caribbean (GEA 4405) 3 credits**

[\(See Geosciences courses, College of Science section\)](#)

**Colonial Latin American History (LAH 3100) 3 credits**

**Latin American Independence (LAH 3133) 3 credits**

**Modern Latin American History (LAH 3200) 3 credits**

**History of Mexico (LAH 4430) 3 credits**

**History of the Caribbean (LAH 4470) 3 credits**

**History of Cuba (LAH 4480) 3 credits**

**Special Topics in Latin American History (LAH 4930) 3 credits**

[\(See History courses, this section\)](#)

**Introduction to Latin American Studies (LAS 2000) 3 credits**

This course is a required introductory course for the Caribbean and Latin American Studies Certificate and is designed to provide students with an understanding of the history, literature and culture of the Latin American region. While drawing on examples from specific Latin American nations, the course is broadly comparative, considering a number of substantive themes as they apply to the entire region and as they are related to world powers, multinational actors and global economic structures. This is a General Education course.

**Honors Introduction to Caribbean and Latin American Studies (LAS 2000) 3 credits**

*Writing Across Curriculum (Gordon Rule)*

*Prerequisites: ENC 1101 and ENC 1102 with minimum grades of "C" or permission of instructor*

This course is a required introductory course for the Caribbean and Latin American Studies Certificate and is designed to provide students with an understanding of the history, literature and culture of the Latin American region. While drawing on examples from specific Latin American nations, the course is broadly comparative, considering a number of substantive themes as they apply to the entire region and as they are related to world powers, multinational actors and global economic structures. This is a General Education course.

**Caribbean Literatures in English (LIT 4192) 3 credits**

[\(See English courses, this section\)](#)

**Latin American Culture and Civilization (SPN 3501) 3 credits**

**Latin American Literature in Translation (SPT 4130) 3 credits**

**Introduction to Hispanic Literature (SPW 3030) 3 credits**

*Prerequisite: SPN 2220 or permission of instructor*

**Special Topics in Spanish or Latin American Literature (SPW 4930) 1-3 credits**

(See [Languages, Linguistics, Comparative Lit. courses, this section](#))

## COMMUNICATION AND MULTIMEDIA STUDIES

**Undergraduate Courses/ [link to graduate courses](#)**

**University Honors Seminar in Communication (COM 1930) 3 credits**

*Writing Across Curriculum (Gordon Rule)*

A seminar in the University Honors Program on topics in communication.

**Introduction to Communication and Civic Life (COM 2053) 3 credits**

An overview of major approaches to the analysis and criticism of contemporary cultural concerns, situating these within the broader historical contexts of communication and cultural theory.

**Communication Study Abroad (COM 2952) 1-6 credits**

*Prerequisite: Sophomore standing*

Credit for enrollment in approved study abroad programs.

**Communication, Gender and Language (COM 3014) 3 credits**

Investigation of the role of language in communication by and about women from linguistic, rhetorical and literary perspectives as they relate to differences in female/male communication styles and their implications for female/male gender roles and relationships.

**Organizational Communication (COM 3120) 3 credits**

Microlevel, institutional and macrolevel analysis of the communication process in organizations. Organizational communication theories, including political economy, critical and poststructuralist approaches.

**Human Communication Theory (COM 3405) 3 credits**

*Prerequisite: COM 2053*

An examination of communication theory from interpersonal, small group, intercultural and organizational viewpoints.

### **Conflict and Communication (COM 3462) 3 credits**

A study of theories and research in interpersonal conflict. Conflict management within personal relationships and in the workplace. The nature of conflict, assumptions arising from conflict, power, styles and tactics, negotiation and transformation.

### **Political Communication (COM 3500) 3 credits**

The role of ideology, language, symbolism and mediation in the practice of American political communication.

### **Communication Internship (COM 3945) 3 credits**

*Prerequisites: 18 credits in Communication; 3.0 GPA in Communication courses and overall; permission of department*

Practical experience working 12-16 hours per week in a communication-related business or industry. Course culminates in a research paper or project in which student evaluates the experience by methodologies learned in other communication classes. May be repeated for a free elective credit.

### **Women and Storytelling (COM 4031) 3 credits**

*Prerequisite: Junior or senior standing*

Explores how women tell stories and the ways in which women have been controlled through narrative and have themselves controlled narratives about themselves and others, particularly, but not only, with respect to Western history and culture. Through texts, film and in-class activities, we observe the power of master and counter narratives.

### **Media and Sexual Identities (COM 4094) 3 credits**

Examines the media representations of the modern America lesbian/gay/bisexual/transgender community and movement in the context of both its own development and the changing American social/sexual/political environment.

### **Strategic Communication (COM 4150) 3 credits**

The course addresses strategic interpersonal, group and public communication within an organizational format. In addition to learning and practicing basic workplace communication skills, students conduct an interview, write a résumé and develop an individual strategic plan and presentation that can be used in professional portfolios.

### **Corporate Communication (COM 4201) 3 credits**

Instruction and practice in the planning and production of selected modes of oral and written communication common within large corporations, with emphasis on employee newsletters and

personal presentations.

### **Studies in New Media (COM 4332) 3 credits**

This course examines the key theoretical works and arguments in the field of new media and considers moments of collision and convergence between media forms.

### **Rhetoric and Aesthetics of Contemporary Culture (COM 4411) 3 credits**

Analyzes ways our world is informed by rhetorical discourses as they are informed and shaped by contemporary aesthetics and the production, management and distribution of style, particularly as it is portrayed in popular culture. Considers the relationship between rhetoric and aesthetics and arenas of life undergoing renewed stylization.

### **Non-Verbal Communication in a Diverse Society (COM 4461) 3 credits**

Course focuses on the significance of non-verbal behavior when communicating across cultures. Non-verbal messages from a variety of cultures are examined. These cultures include, but are not limited to, age, race, gender, ethnicity, religion, sexual orientation, the physically and mentally challenged or any groups that have not received peripheral attention in discussions of non-verbal communication.

### **New Media and Civic Discourse (COM 4603) 3 credits**

*Prerequisite: COM 2053*

Explores how new media technologies change what communities we can be members of and how we perform our roles in those communities. Also explores the potential of new media to affect citizenship and alter what it means to be a member of a democratic society and electorate.

### **News Media Ethics (COM 4621) 3 credits**

A critical examination of news media ethical issues and dilemmas through the use of case studies and current news reports. Course also includes critique of print, broadcast and online news coverage using ethical theory and standard journalistic ethical principles.

### **Storytelling in Popular Culture (COM 4703) 3 credits**

This course examines the ways in which storytelling is woven into the fabric of popular culture. From poems to films/movies, to commercials, to songs, to books, storytelling is all around us and shapes how we see ourselves and the world. Ultimately, this course challenges the notion that storytelling is simply the act of individuals using flowery language to create narratives solely to entertain people. Conversely, it invites students to examine the various ways storytelling is a communicative practice and mode of embodied inquiry that enables individuals to craft narratives as a way to understand, cope with, communicate and critically analyze social experiences and the world.

**Peace, Conflict and Oral Narrative (COM 4707) 3 credits**

Theory and methodology behind conflict resolution and peace-building techniques that employ storytelling, with a strong emphasis on learning and creating stories.

**Directed Individual Project (COM 4903) 1-2 credits**

An individual communication project, approved in advance by the directing faculty member. Grading: S/U

**Directed Independent Study (COM 4905) 1-3 credits**

*Prerequisites: Permission of instructor and 16 credits in Communication*

Opportunity for extensive library study in a specific area of communication. Research paper required.

**Directed Independent Honors Study (COM 4907) 3 credits**

Reading and research in selected areas of communication done in context of individualized Honors Program of study.

**Special Topics (COM 4930) 1-3 credits**

*Prerequisite: Some Special Topics courses may require permission of instructor*

The study of a special area in communication. Topics will vary. May be repeated for credit.

**Communication Study Abroad (COM 4957) 1-6 credits**

*Prerequisite: Sophomore standing*

Credit for enrollment in approved study abroad programs.

**Senior Honors Thesis in Communication (COM 4970) 3 credits**

Completion of an honors thesis under faculty supervision. Permission of instructor required.

**Digital Culture (DIG 2202) 3 credits**

This course introduces key concepts and practices related to studies of digital culture and technologies. It examines the origins of "the digital" in early computing practices, infrastructures and ecologies of digital systems. It also examines how digital technology shapes personal and collective identities and practices. Students interrogate their own relationships to the digital environment. This is a General Education course.

**Fundamentals of Digital Media Practice (DIG 3110) 4 credits**

This production course explores a range of ideas and processes incorporated in multimedia projects. Class assignments introduce elements of image making, multipage sequencing and interface design. The class develops a combination of critical, technical and design skills.

### **Digital Film Editing (DIG 3207) 4 credits**

*Prerequisite: RTV 3531 or DIG 3110 or DIG 3305C with minimum grades of "C"*

An intensive study of the technical and aesthetic elements of non-linear digital video editing. Students learn strategies for media management, image capture, sequence creation, title creation, working with audio, video effects and compositing.

### **Digital Audio Recording and Editing (DIG 3253C) 4 credits**

*Prerequisites: DIG 3110 or DIG 3305C or RTV 3531 with minimum grades of "C"*

Comprehensive overview of the basics of using digital audio equipment in a studio environment to record and edit audio. Students are introduced to audio systems, audio/video post-production, audio editing and surround sound mixing using software packages. Sound design theory is covered.

### **Fundamentals of 3D Computer Animation (DIG 3305C) 4 credits**

An exploration of the basic creative principles and techniques of 3D computer character modeling and animation.

### **Advanced 3D Computer Animation (DIG 3306C) 4 credits**

*Prerequisite: DIG 3305C*

Teaches the fundamental principles of animation, both computer and classical, including advanced techniques in character animation and dynamic scene design using advanced software. Emphasis on techniques such as keyframes, motion paths, inverse kinematics, procedural animation and scripting. Includes storyboarding for animation.

### **Advanced 3D Computer Modeling for Animation (DIG 3323C) 4 credits**

*Prerequisite: DIG 3305C*

Provides a thorough foundation of 3D modeling, texturing and rendering techniques for computer animation using advanced software. Emphasis placed on such techniques as 3D curves, patches, meshes, surfaces, B-splines, polygonal tools, digital scene development, computer sculpture, texture mapping, shading and rendering.

### **3D Video Game Design (DIG 3725C) 4 credits**

*Prerequisite: DIG 3110 or DIG 3305C with minimum grade of "C"*

Comprehensive introduction to working in a 3D game engine to design an engaging interactive experience. Production techniques include 3D terrain building, media asset creation, graphical user interface design and coding dynamic events.

### **Immersive Media for Games and Virtual Reality (DIG 3773C) 4 credits**

*Prerequisite: DIG 3725C with minimum grade of "C"*

Explores the use of a 3D game engine to design immersive experiences for virtual reality, augmented reality and mixed reality devices. Project work includes 360 cinematic environments, educational games and spatial computing.

### **History and Theory of Computer Arts and Animation (DIG 4026) 4 credits**

A detailed overview of history, development and theories behind the medium of animation from the beginning of the 20th century, with cel animations to the latest advances in computer graphics. Each student writes a critical essay concerning the importance of a specific animation to the development of computer art.

### **Visual Design for Film, and Animation and Games (DIG 4122C) 4 credits**

*Prerequisite: DIG 3305C, DIG 3110 or RTV 3531 with minimum grade of "C;" admission to Film, Video and New Media concentration*

Students learn to apply visual design principles and techniques to create concept art, storyboards, character design and animated prototypes to visualize a narrative concept for production.

### **Advanced Digital Compositing for Animation (DIG 4394C) 4 credits**

*Prerequisite: DIG 3305C*

Trends and techniques in digital compositing to combine photographic video imagery with computer-generated animation. Students gain a thorough understanding of matting, keying, transitions, timing, color manipulation, compression and special effects. Advanced animation and related compositing software are used.

### **Producing and Directing Fiction Film (DIG 4412) 4 credits**

*Prerequisites: RTV 3531 with minimum grade of "C;" Multimedia Studies majors only*

Explores the methods of narrative film and video production and facilitates the development of personal voice and point of view. Students will develop their communicative skills and their unique visual styles through film and video, exploring and transmitting their raw, personal experience and utilizing the medium in a manner that effectively communicates their original ideas as filmmakers and media artists.

### **Video Game Studies (DIG 4713) 3 credits**

An overview of the interdisciplinary academic study of video games, analyzing games as interactive media, rule-based systems, cultural and social texts, designed learning spaces, arenas of play and products of industrial discourse and design.

### **Web Research for Journalists (DIG 4820) 3 credits**

The course offers students the opportunity to explore the vast amount of information available on the

Internet and immerse themselves in online research. This enables students to evaluate web sites to determine which sites are trustworthy and have reliable sources of data that could add depth and context to news stories.

### **Special Topics (DIG 4930) 3 credits**

This special topics course is reserved for new subjects in the area of digital media.

### **Senior Seminar: Portfolio in Computer Arts in Animation (DIG 4950C) 4 credits**

*Prerequisite: Senior standing in studio art*

Prepares students for a career in computer arts or to seek graduate admission. Expands skills in 3D modeling, animation, and digital compositing. Students interview industry professionals on-site, present a class seminar, and organize a video/multimedia exhibit. Guest lecturers review student work and advise on career opportunities.

### **Film Appreciation (FIL 2000) 3 credits**

Introduction to film as an art form, cultural product and social artifact. Basic analytical and technical terms, concepts and issues. Development of critical skills. This is a General Education course.

### **Honors Film Appreciation (FIL 2000) 3 credits**

*Writing Across Curriculum (Gordon Rule)*

*Prerequisites: ENC 1101 and ENC 1102 with minimum grades of "C" or permission of instructor; for students in the University Honors Program only*

This foundational course in film studies introduces students to elements of film form and how they create meaning. In doing so, the course also studies major stylistic movements in film history. Students learn basic vocabulary and concepts necessary for analyzing individual films and groups of films. They are expected to use these terms to describe films critically. Based on those observations, students develop detailed analytical and expositional arguments in essays about films. This is a General Education course.

### **New Hollywood (FIL 3674) 3 credits**

Examines Hollywood as an industry, its structures and policies in the production, distribution and exhibition sectors. Global expansion of Hollywood and its power relations between the U. S. government, Canada and other governments are considered.

### **Film Theory (FIL 3803) 4 credits**

*Prerequisite: FIL 2000*

Examination of the major topics in film theory, including structuralism, psychoanalysis, feminism and Marxism, as well as debates about realism. Historical perspective on film theory and insight into its

intersection with other disciplines.

### **Film to the 1940s (FIL 4036) 4 credits**

*Prerequisite: FIL 2000*

History of film, 1890s to 1940s. Theoretical, industrial and social aspects of film in a variety of national and cultural contexts. Emphasis on narrative and avant-garde styles and traditions.

### **Film since the 1940s (FIL 4037) 4 credits**

*Prerequisite: FIL 2000*

May be taken before FIL 4036. History of film, 1940s to the present. Theoretical, industrial and social aspects of film in a variety of national and cultural contexts. Emphasis on the dominant tradition of narrative realism and various modernist alternatives.

### **Women and Film (FIL 4056) 3 credits**

Examination and history of film representations of and by women as they relate to issues of feminism, psychoanalysis, ideology and film style. Narrative, documentary and avant-garde forms in historical context. Feminist film theory. May be taken for credit in Women's Studies Program.

### **Radical Film, New Media and Social Movements (FIL 4058) 4 credits**

Explores political activism and the socioaesthetic media processes and products of various activist media groups. Interrogates the pitfalls and promises that accompany such radical media movements and analyzes the ways in which they employ film and new media as more than simple commodities.

### **Scriptwriting (FIL 4106) 4 credits**

Formal elements of writing for film and television; preparation of proposals and scripts with emphasis on conception, structure, characterization and format.

### **Traditions of Documentary Film (FIL 4364) 4 credits**

Survey of the diverse forms and historical functions of non-fiction films and video throughout the world, Analysis of representative and significant texts; discussion of issues of style, ideology, technology, determination.

### **Digital Documentary (FIL 4378) 3 credits**

Examination of how digital technologies and platforms have impacted non-fiction filmmaking and media production. Analysis of examples from around the world; includes discussion of topics such as ideology, technology, forms, surveillance, crowdsourcing, immersion, interactivity and seriality.

### **Exhibition Practices in Film, Video and Media (FIL 4613) 4 credits**

*Prerequisite: RTV 3531 or DIG 3110 or DIG 3305C with a minimum grade of "C"*

This class introduces students to a number of exhibition techniques and practices for film, video, media, sound and installation art. It explores the fundamental forms, structures, and ideas behind film and video exhibition. Students are exposed to the processes involved in curatorial duties, administrative responsibilities and programming detail for screenings. This is an Academic Service Learning (ASL) course.

**Production Management for Film and TV (FIL 4647) 3 credits**

*Prerequisite: FIL 4106 or TPP 4600 with a minimum grade of "C"*

Course examines the role of the production manager in traditional film and television productions, explores production management theories and tools, and applies these lessons to examples of multimedia production in the digital age.

**RI: Hollywood, Censorship, and Regulation (FIL 4672) 4 credits**

*Prerequisite: FIL 2000*

A research-intensive (RI) course that embeds U.S practices of film production, distribution and exhibition within a wider sociocultural framework of censorship and regulation to reveal the domestic and international pressures that affect not only what U.S. audiences see but also how they will see it.

**Studies in Asian Cinema (FIL 4843) 3-4 credits**

Intensive introduction to a style, director, genre, national tradition or other aspect of Asian cinema. Topics will vary. May be repeated for credit.

**Film Criticism (FIL 4851) 3 credits**

*Prerequisite: FIL 2000*

An overview of major approaches to film criticism such as filmmaker, genre, national cinema, political criticism and cultural studies. Students will apply critical models to analysis of films.

**Sound in the Cinema (FIL 4866) 3 credits**

*Prerequisites: FIL 2000 or introductory FAU music or visual arts courses; open to Film, Video and New Media Concentration students*

This course trains students in qualitative analysis and forms of critical thinking in the use of sound in the cinema, a major, often overlooked aspect of film production and an emerging field of research methodology. Students' research will contribute to an ongoing, periodically updated database that will eventually provide increasingly complex patterns of audio visual techniques.

**Special Topics (FIL 4930) 3 credits**

This special topics course is reserved for new subjects in the discipline of film studies.

### **News and News Reporting (JOU 3101) 3 credits**

*Prerequisites: ENC 1101, ENC 1102*

Advanced practice in news gathering and reporting. Readings in journalism.

### **Sports Journalism (JOU 3313) 3 credits**

This course introduces students to the fundamentals of sports journalism. Emphasis is on the broadcaster's simultaneous responsibilities to report, to inform and to entertain with a focus on preparation and the development of a comfortable and conversational on-air style. In addition to the principles of play-by-play, topics of discussion include the many hats a sports broadcaster must wear in the modern multimedia world, the rapidly evolving business of sports broadcasting.

### **U.S. Journalism (JOU 4004) 3 credits**

How news is defined and managed in the United States. Close analysis of newspapers, television news and magazines. Historical development of journalistic practices within cultural formations.

### **Coverage of Public Affairs (JOU 4181) 3 credits**

*Prerequisite: JOU 3101, Multimedia Journalism majors only and passing score on Journalism Skills Test*

Instruction and experience covering government, school, the courts and other major institutions. Critical analysis of examples of public affairs reporting. Projects in investigative reporting.

### **Feature and Freelance Writing (JOU 4308 ) 3 credits**

The writing of newspaper features and magazine articles of professional quality. Analysis of conventional and alternative journalistic forms.

### **Environmental Journalism (JOU 4314) 3 credits**

This course introduces environmental reporting, with emphasis on the Everglades and the rest of South Florida's ecosystem. Topics include writing about nature, dealing with public agencies and private activist groups and obtaining and using government data.

### **International Reporting (JOU 4316) 3 credits**

This course is designed to give students an in-depth look at the challenges and realities faced by foreign correspondents, journalists who cover international affairs and reporters who focus on foreign policy or other areas of global interest.

### **Multimedia Journalism (JOU 4342) 3 credits**

*Prerequisites: JOU 3101 and JOU 4181 with grades of "C" or better; Multimedia Journalism majors only*

Teaches the skills and understanding necessary to produce news stories across media platforms—print, broadcast and online. As the technical boundaries among media become less distinct, students must be prepared to enter the rapidly changing media environment.

**Photojournalism (JOU 4601) 4 credits**

A practical and critical overview of photojournalism through exploratory photo essays, with an emphasis on multimedia applications. Training in still camera and digital media, with a consideration of the basic principles and ethics of visual journalism and its role in social and political change.

**Special Topics (JOU 4930) 3 credits**

This special topics course is reserved for new subjects in the area of journalism.

**Introduction to Media Studies (MMC 1540) 3 credits**

An introduction to the transformation of newspapers, magazines, film and video to digital multimedia platforms - based on technological innovations and internet advertising strategies.

**Writing for Mass Media (MMC 2121C) 3 credits**

This course is designed to introduce students to the mechanics of writing for various professional communication genres and to provide them with a foundation on which to build in more advanced classes. This course provides students with an introduction to professional mass communication. It begins with the basics and gradually combines those elements into more advanced projects as the semester progresses.

**Introduction to Media Production (MMC 2130) 3 credits**

An introduction to media production for filmmakers, journalists and digital content creators, covering fiction and nonfiction storytelling, image creation, sound, editing, writing, research and more. Includes practice-based assignments that prepare students for more advanced production classes.

**Mass Communication Theory (MMC 3403) 3 credits**

*Prerequisite: MMC 1540*

A study of the research and various theories dealing with the structure of media and its social impact.

**Minorities and the Media (MMC 3601) 3 credits**

A historical analysis of images of minorities in television programming and in motion pictures; the origin of social stereotypes, their relationship to societal development and an examination of other alternatives.

**Interactive Digital Media (MMC 3711) 4 credits**

An introduction to the basics of interactive multimedia production. Class projects explore the potential

of interactive media to communicate, express and challenge cultural ideas. The course seeks to develop a combination of critical, technical and design skills.

### **Political Podcasting (MMC 4127C) 3 credits**

*Prerequisite: For Communication and Multimedia Studies majors and Political Science majors or permission of instructor*

Systematic analysis of and instruction in the essential elements of political podcasting. Includes assessment of competition; development of concept and format; execution of concept and format through effective vocal delivery; interviewing, writing and technical production; and strategic distribution.

### **Mass Communication Law and Regulation (MMC 4200) 3 credits**

A study of the relationship of the mass media to contemporary law. Topics covered include the First Amendment, libel, privacy, reporters' rights and broadcast and advertising regulation.

### **Media, Culture and Technology (MMC 4263) 3 credits**

An examination of the historical relationship between technology, society and the development of the mass media. An examination of the social, technological, economic and cultural factors shaping the development of media technology with particular emphasis on current new media.

### **International Communication (MMC 4301) 3 credits**

An examination of current issues in international communication with particular emphasis on political, communication and media relations.

### **Media Criticism (MMC 4501) 3 credits**

*Prerequisite: MMC 1540 or FIL 2000*

Introduction to social and critical cultural analysis of visual media culture.

### **Public Opinion (MMC 4640) 3 credits**

*Prerequisite: MMC 3403 with a grade of "C" or better*

Conceptual and historical study and analysis of the construction and representation of public opinion as idea and sociopolitical formation in the West from the 1800s to the present.

### **Media, Representation and Diversity (MMC 4704) 3 credits**

A theoretical and critical exploration of representation in or related to media institutions, texts, technologies and users, exploring race/ethnicity, nationality, gender, class, age, sexuality and ability.

### **New Media Narrative (MMC 4713) 4 credits**

Explores traditional and alternative storytelling using new media tools and paradigms. Encourages experimentation while developing critical, technical and design skills. Taking inspiration from film, video, animation, comics, art and literature, the class creates collaged, multiperspective, modular and multiparticipant narratives.

### **Special Topics (MMC 4930) 3 credits**

This special topics course is reserved for new subjects in the discipline of multimedia communication.

### **Public Relations and the Press (PUR 3009) 3 credits**

This course examines the current and historical interaction of journalism and public relations (PR), primarily in the United States. It takes a critical and balanced look at these two collaborative and conflicting professions.

### **Sports Communication (PUR 3463) 3 credits**

This course covers fundamentals of communicating in a sports environment. It includes the basics of communicating for print and broadcast news, as well as communicating in teams, small groups and organizations and for public relations and sports information. The course also covers ethical considerations and the role of sports in American culture.

### **Public and Community Relations (PUR 4411) 3 credits**

Public relations writing and campaign planning, including audience analysis, persuasive strategies, campaign management, media relations, evaluation of outcomes.

### **Experimental Cinema (RTV 3229) 4 credits**

*Prerequisite: RTV 3531 with minimum grade of "C"*

Investigation of video as an experimental art form through exploratory production exercises. A guide through the fundamental issues in the theory and practice of video art, with an introduction to the history of the medium.

### **Producing and Directing Documentary Film (RTV 3332C) 4 credits**

*Prerequisite: RTV 3531 with minimum grade of "C"*

Research, writing and production challenges of non-fiction video. Organizing and writing proposals, treatments and scripts, with basic training in equipment and techniques of video production.

### **Digital Film Production (RTV 3531) 4 credits**

Basic principles of visual and audio communication with an introduction to field production techniques and equipment. Hands-on projects facilitate the development of personal voice and point of view.

### **Television Production (RTV 3543C) 4 credits**

A lecture-laboratory course with active participation in the planning and production of broadcast programming. An introduction to studio equipment and operations with an emphasis on the aesthetics and politics of both network and non-commercial TV.

### **Broadcast Journalism (RTV 4301) 4 credits**

*Prerequisites: JOU 3101 and JOU 4181 with grades of "C" or better; Multimedia Journalism majors only*

Instruction in gathering, writing, editing and delivering of broadcast news. Analysis of broadcast journalism as organizational activity.

### **Advanced Broadcast Journalism (RTV 4304) 4 credits**

*Prerequisite: RTV 4301 with a grade of "C" or better*

Advanced instruction in gathering, writing, editing and delivery of broadcast news. Advanced analysis of broadcast journalism as organizational activity.

### **Gender and Television (RTV 4412) 3 credits**

Historical, theoretical and analytical exploration of gender and television in terms of the structures, preferences and commercial imperatives of media institutions, representational dimensions of texts, producers and creators, and viewer readings and uses in everyday life.

### **Interpersonal Communication (SPC 2300) 3 credits**

Readings, exercises and projects in dyadic communication. Analysis of interpersonal interaction with focus on message variables.

### **Public Speaking (SPC 2608) 3 credits**

Introduction to the theory and practice of public speaking. Students develop practical skills in preparing, presenting and critiquing various forms of public discourse. This is a General Education course.

### **Classical Rhetoric (SPC 3233) 3 credits**

*Prerequisite: COM 2053*

A historical and theoretical survey of rhetoric in Western civilization from Homer to the Renaissance.

### **Contemporary Rhetoric (SPC 3235) 3 credits**

*Prerequisite: COM 2053*

A historical and theoretical survey of rhetoric from the Enlightenment through the 21st century.

### **Rhetorical Foundations of Publics and Counterpublics (SPC 3272) 3 credits**

*Prerequisite: COM 2053 with minimum grade of "C"*

Introduces students to the broad range of theoretical perspectives on publics and counterpublics. Topics include the public sphere, identity, social advocacy and public judgment.

### **Small Group Processes (SPC 3425) 3 credits**

Readings, exercises and projects in dyadic and small group analysis involving interpersonal attraction, message variables, personal perception, leadership and problem-solving techniques.

### **Rhetorical Theories of Persuasion (SPC 3542) 3 credits**

*Prerequisite: COM 2053 with minimum grade of "C"*

Introduces students to the broad range of theoretical perspectives on persuasion as it operates to structure human relationships, shape attitudes and perceptions and constitute various cultural formations.

### **Communication and Social Change (SPC 3632) 3 credits**

*Prerequisite: Acceptance into the Barb Schmidt Fellowship and permission of department*

This course serves as the first semester of the Barb Schmidt Fellowship: Cultivating Community Involvement, Advocacy and Social Change. Faculty and peer-to-peer interactive workshops present the theory and practice of effective communication strategies for social movement work.

### **American Multicultural Discourse (SPC 3704) 3 credits**

An exploration of the rhetorical practices of multicultural Americans utilizing rhetorical criticism as a tool to study the persuasive efforts of multicultural discourse in the United States.

### **Intercultural Communication (SPC 3710) 3 credits**

Examination of the intracultural and intercultural communication differences within and between culturally diverse groups in the United States.

### **Intercultural Theory (SPC 3717) 3 credits**

*Prerequisite: COM 2053*

Students observe the nature of intercultural theory, review various dialogues and theories among scholars of differing perspectives on this topic and explore the knowledge, motivation and skills needed for developing and/or enhancing intercultural competence.

### **Studies in Rhetoric (SPC 4232) 3 credits**

A sustained critical treatment of select rhetorical practices. Topics will vary. May be repeated for credit.

### **Capstone in Communication and Civic Life (SPC 4271) 3 credits**

*Prerequisites: COM 2053 and 18 credits in the major; Communication Studies majors only, Senior level*

Provides the experienced student of communication with an opportunity to reflect on disciplinary concepts and examine the influential role communication plays in nurturing democratic practices, recognizing and valuing diversity and training active, responsible citizens. Includes a semester-long civic engagement project.

### **Rhetorical Analysis of Democracy (SPC 4273) 3 credits**

*Writing Across Curriculum (Gordon Rule)*

*Prerequisite: COM 2053 with minimum grade of "C"*

Surveys major methodological perspectives that consider the constitutive relationship between rhetorical practice and democratic politics, political culture, rhetorical citizenship and civic engagement.

### **Leadership and Communication (SPC 4443) 3 credits**

This course is an analysis of the function of communication and its influence on leadership from a global perspective. Students are exposed to leadership as a product of symbolic communication by using both theories and practice to demonstrate that leadership competence results from communication competence.

### **Argumentation and Debate (SPC 4513) 3 credits**

A preliminary survey/review of principles of argument followed by an in-depth study of and practice in oral argument and formal debate.

### **Rhetoric of Argument (SPC 4517) 3 credits**

*Writing Across Curriculum (Gordon Rule)*

Study of selected classical and contemporary theories of argument and style as a means of improving student's ability to understand, analyze and create argumentative discourse.

### **Propaganda (SPC 4540) 3 credits**

The theories and dynamics of persuasion and the history and techniques of propaganda in democratic societies.

### **Rhetoric of Social Protest (SPC ) 3 credits**

An examination of the various approaches—psychological, sociological, historical—to the study of social and political movements with special emphasis on rhetorical criticism of movements. In-depth

analysis of protest in the United States and its effect on politics and culture.

### **Rhetorical Criticism (SPC 4680) 3 credits**

*Writing Across Curriculum (Gordon Rule)*

*Prerequisite: COM 2053*

An overview of major contemporary approaches to the analysis and criticism of public discourse. Students apply the methods by writing critiques of contemporary oral and written discourse.

### **Gender, Race and Communication (SPC 4712) 3 credits**

An investigation of the relationships between discursive practices and cultural concepts of gender and race. Theories of gender and race differences as well as cultural myths, hegemony and personal, political and religious power are examined.

### **Ethnicity and Communication (SPC 4718) 3 credits**

A comparative analysis focusing on communication patterns among different cultural groups living within the United States.

### **Special Topics (SPC 4930) 3 credits**

This special topics course is reserved for new subjects in the discipline of speech communication.

### **Multimedia Practicum (VIC 4943) 4 credits**

*Prerequisite: Permission of instructor*

This interactive multimedia practicum brings video, audio, text, animation and new media to a multifunction, Department-hosted website. As part of this capstone experience, students create cross-media content, producing works engaged with art, culture and cross-disciplinary critical inquiry.

## **Communication and Multimedia Studies Graduate Courses**

### **Exhibition Practices in Film, Video and New Media (ART 6684) 4 credits**

*Prerequisite: M.F.A. graduate standing in Media, Technology and Entertainment*

Introduces students to a number of exhibition techniques and practices for film, video, media, sound and installation art. Course explores the fundamental forms, structures and ideas behind film and video exhibition. It exposes students to the process involved in curatorial duties, administrative responsibilities and programming detail for screenings.

### **The Dark Side of Communication at Work (COM 5725) 3 credits**

*Prerequisites: Graduate standing; Admission to M.A. program in Communication*

This course explores destructive relationships and processes in organizations. Topics include emotional

labor, bullying. Sexual harassment, discrimination, microaggressions, stress, burnout and more.

### **Quantitative Communication Research (COM 6316) 3 credits**

Quantitative research in communication, emphasizing experimental design and statistical methods in content analysis and survey study.

### **Communication Research and Design (COM 6318) 3 credits**

This course presents foundational concepts and research strategies in communication studies, those which transcend the boundaries of communication, rhetoric and media studies. These basic concepts include crafting and narrowing one's research questions, the collection of data and objects of analysis, their interpretation, and statement of conclusions. The course engages current theoretical perspectives as applied to communication research practices.

### **Qualitative Communication Research (COM 6340) 3 credits**

Qualitative research in communication, with emphasis on ethnographic, focus group, interview and semiotic methods.

### **Introduction to Graduate Study in Communication (COM 6400) 3 credits**

An examination of the nature of human communication through analysis of major areas of advanced study, theories of the field and forms of research utilized in communication study.

### **Intercultural Communication Theory (COM 6415) 3 credits**

An overview of the theories about intercultural communication between people of different cultures. Theories will be generated to describe or explain how communication varies across cultures.

### **Communication Theory (COM 6424) 3 credits**

*Prerequisite: Graduate standing or permission of instructor*

Broadly surveys theoretical traditions in film studies, intercultural studies, media studies and rhetorical studies. Topics include communication traditions, texts, audiences, practices and contributions to social change.

### **Political Communication (COM 6511) 3 credits**

Analysis of communicative factors in the facilitation, manipulation and discouragement of public political involvement.

### **Directed Independent Study (COM 6906) 1-3 credits**

*Prerequisites: Graduate standing and permission of department*

(FIL 6906) (RTV 6906) (MMC 6906) (JOU 6906) (SPC 6906)

Intensive studies in areas of Communication mutually agreed upon by student and instructor.

### **Special Topics (COM 6931) 3 credits**

*Prerequisite: Graduate standing or permission of department*

(FIL 6931) (MMC 6931) (SPC 6931) (JOU 6931) (RTV 6931)

Theory and Practice of Teaching Communication (COM 6944) 3 credits

Required of and restricted to Graduate Assistants. Helps teaching assistants develop skills in introductory courses taught or assisted by teaching assistants under faculty supervision.

### **Master's Thesis (COM 6971) 1-6 credits**

*Prerequisite: Admission to degree candidacy*

(FIL 6971) (MMC 6971) (SPC 6971) (JOU 6971) (RTV 6971)

### **Digital Media Storytelling (DIG 5027) 3 credits**

*Prerequisites: Graduate standing; Admission to M.A. program in Communication*

Students examine the history and current uses of digital media storytelling, as well as how stories fit into broader social narratives. Through experimentation with a range of creative tools and publishing platforms, students design and produce their own digital storytelling projects to achieve a personal or professional aim.

### **Survey in Digital Media Techniques (DIG 6436) 4 credits**

*Prerequisite: Admission to M.F.A. in Media, Technology and Entertainment*

This production class explores ideas of visual storytelling in space and time, taking inspiration from personal history, games, scientific theories and the cultural shifts of digital technology. The class encourages the development of a personal voice and artistic experimentation. The technical and aesthetic elements using composition/visual effects software are explored.

### **Preproduction, Prototyping and Previsualization (DIG 6546) 4 credits**

*Prerequisite: Admission to M.F.A. in Media, Technology and Entertainment*

Explores preproduction techniques in the production of large-scale creative projects. Students visualize a concept through illustrations, storyboards, animatics and interactive prototypes.

### **3D Production for Interactivity (DIG 6547) 4 credits**

*Prerequisite: Admission to M.F.A. in Media, Technology and Entertainment*

This course provides a broad overview of the 3D modeling, texturing, rigging and animation pipeline for use in most interactive 3D environments. Specifically, students adapt these 3D production techniques to the creation of game assets to be implemented in a visual demo of their game concept, assets, animation tests and other artwork for interactive applications.

### **Graduate Media Technology Studio (DIG 6575L) 4 credits**

*Prerequisite: Open to students enrolled the M.F.A. in Media, Technology and Entertainment*

Students complete practical research in digital media and interactive techniques using the MTEN lecture-laboratory resources. With faculty guidance and supervision, they prepare creative works and submit them for consideration in an M.F.A. exhibition. All students prepare a written synopsis of creative goals and research.

### **Portfolio Workshop (DIG 6589) 4 credits**

*Prerequisite: Admission to M.F.A. in Media, Technology and Entertainment*

Students develop projects ranging from creative coding to narrative-based 3D animation that will be completed by the end of the semester. Student works-in-progress are presented each week for critical evaluation and analysis.

### **Immersive XR Design (DIG 6605) 4 credits**

Creative exploration of immersive design frameworks in a game engine for extended reality (XR) and interfaces such as the latest mobile devices and headsets. Projects bridge the gap between design, technology, engineering and art.

### **Film History and Historiography (FIL 6026) 3 credits**

*Prerequisites: A study of film at the undergraduate level and the completion of an undergraduate degree with at least the equivalent of a minor in film or media studies*

Seminar where students present talks on selected topics and write papers of publishable length on issues in film history and historiography. This is a core requirement in most university-level graduate film programs in the US.

### **Video Production Workshop (FIL 6365) 4 credits**

*Prerequisite: Graduate students in M.F.A. in Media, Technology and Entertainment*

Explores the basics of film and video production in its most fundamental form. Gives participants a general introduction to film and video production, providing historical, technical, conceptual, artistic, aesthetic and theoretical insight into the medium. A number of video projects will be produced throughout the term.

### **Producing and Directing Documentary Film (FIL 6366C) 4 credits**

*Prerequisite: Graduate standing or permission of instructor*

This course gives graduate students insight into documentary film, providing historical, conceptual, technical, artistic, aesthetic and theoretical insight into the genre. Students are required to produce and direct short, non-fiction documentary films.

### **Experimental Cinema (FIL 6409) 4 credits**

*Prerequisite: Graduate students in M.F.A. in Media, Technology and Entertainment*

Introduces students to nonfiction experimental and abstract film and video. Explores the fundamental forums, structures and ideas behind experimental film and video. Students are exposed to the processes involved in experimental production and develop the skills involved in the research and planning of nonfiction, abstract film and video.

### **Film Theory and Criticism (FIL 6807) 3 credits**

Advanced introduction to the field of film studies surveying various approaches, including neoformalism, feminism, poststructuralism, neo-Marxism and cultural studies. Dominant and oppositional modes.

### **Studies in Film and Television (FIL 6935) 3 credits**

An examination of current issues in film and television studies, to include new approaches in theory, history and criticism. Topics will vary. May be repeated for credit.

### **Programming for Interactivity (IDC 6506) 4 credits**

Covers the creation of new media artwork and the use of creative coding. Explores the artists that utilize code, the significance of this work and how their work has been created. Also explores designing hardware and software with the goal of exhibiting this work as interactive art.

### **Mass Media Theory (MMC 6408) 3 credits**

Study of theories of mass media and their application and development through research.

### **Public Opinion and Modernity (MMC 6645) 3 credits**

Discussion of conceptual and historical construction and representation of public opinion and the public sphere and their relationships to modern mass media and popular democracy from the 18th century to the present, particularly the 20th century.

### **Creating Interactive Culture (MMC 6707) 4 credits**

*Prerequisite: Graduate standing*

Course explores the intersection of expressive and communicative media with technology, as well as the new aesthetics and practices that are emerging around user interaction. Through collaboration and experimental production, candidates examine interactive media and culture from the perspective of hybrid processes and structures, often expanding the notions of performance, installation, intervention and presentation.

### **Studies in New Media (MMC 6715) 3 credits**

A critical examination of key theoretical works and arguments in the field of new media and an investigation of the cultural implications of new technologies.

**Gender and Screen Cultures (RTV 6417) 3 credits**

Exploration of intersections between and among cultures of film, television, video, computer-mediated communication and everyday life as they manifest, maintain and/or challenge power relations of gender.

**Classical Rhetorical Theory (SPC 6234) 3 credits**

An in-depth examination of primary texts and central issues in rhetorical theory in Western civilization from Homer through St. Augustine.

**Contemporary Rhetorical Theory (SPC 6236) 3 credits**

An in-depth examination of primary texts and central issues in the development of rhetorical theory in the 19th and 20th centuries.

**Seminar on Kenneth Burke (SPC 6239) 3 credits**

Examines the life and work of American rhetorical theorist and critic Kenneth Burke (1897-1993). It takes a developmental approach to studying Burke, with emphasis on his understanding of rhetoric and symbolic actions as they are reflected in his theories of “Dramatism” and “Logology” as well as his approaches to critical practice.

**Feminist Rhetorical Theory (SPC 6639) 3 credits**

A study of feminist rhetorical history, theory and expression. Readings and discussion will (a) reveal the absence of women's voices in rhetorical history and theory; (b) investigate contextual factors that created this absence; and (c) introduce feminist constructs of rhetorical theory that reclaim women's place in the rhetorical tradition.

**Rhetoric and Democracy in Societies in Transition (SPC 6648) 3 credits**

A study of the relationship of rhetoric and democracy in communist and post-communist countries in eastern and central Europe. Readings and discussion examine dissent and democratic discourse as part of the contemporary rhetorical tradition.

**Rhetorical Criticism (SPC 6682) 3 credits**

An overview and analysis of contemporary methods of rhetorical criticism. Presentation and critique of student work.

### **Intercultural Communication (SPC 6715) 3 credits**

An examination of intracultural and intercultural similarities and differences in communication patterns of various specified groups.

### **Studies in Rhetoric (SPC 6934) 3 credits**

An examination of current issues in the field of rhetorical studies. Topics will vary. May be repeated for credit.

### **Topics in Intercultural Communication Studies (SPC 6935) 3 credits**

An examination of current issues in the field of intercultural communication. Topics will vary. May be repeated for credit.

## COMPARATIVE STUDIES

### **Graduate Courses**

*Prerequisites for all courses in this program: Admission to Ph.D. program in Comparative Studies or permission of instructor.*

### **Theory and Criticism (CST 7309) 3 credits**

Examines critical and theoretical perspectives relevant to various analyses of texts of different types from an historical and comparative point of view. "Texts" may include literary or philosophical texts, architectural structures, works of art, musical compositions, theatrical or musical performances, design elements, political or social discourse, political or sociological structures and others, depending on the concentration served by the course. Topics may include, but are not limited to (post)structuralism, semiotics, Marxism, political theory or philosophy, gender, race and ethnicity, (post)colonialism, design, aesthetics, music, film and picture theory. Variable subtitle. May be repeated up to four times.

### **Directed Independent Study (CST 7905) 1-3 credits**

Directed doctoral-level study in an area of comparative studies.

### **Advanced Research and Study (CST 7910) 1-9 credits**

Course for Ph.D. students who have completed all required courses but have not been admitted to candidacy. Intended for preparation of dissertation topic. May be repeated, and may be taken for variable credit. *Grading: S/U*

### **Research Design in Social Science (CST 7912) 3 credits**

*Prerequisite: Admittance to Ph.D. program in Comparative Studies*

The goal of this course is to introduce graduate students to the basics of social science research, including the logics of inquiry, core methodological assumptions and strengths and limitations of various research designs typically used for such research.

### **Special Topics (CST 7931) 1-3 credits**

Doctoral-level study in a selected area of comparative studies. May be repeated for credit under variable titles and content.

### **Seminar in Aesthetics (CST 7935) 3 credits**

*Prerequisite: Permission of department*

This seminar focuses on two key topics in philosophical aesthetics: The definition of art and the concept of aesthetics. Treating the topic historically, philosophically and through interdisciplinary perspectives, it focuses on key approaches and theorists, including but not limited to, the traditional canon of Plato, Aristotle, Hume, Kant, Hegel and Nietzsche, but also contemporary thinkers such as Adorno, Danto and Arendt, as well as non-western thinkers like Confucius, Xunzi, Zhuangzi and Zeami.

### **Interdisciplinary Perspectives (CST 7936) 3 credits**

*Prerequisite: Graduate standing in the College of Arts and Letters or permission of instructor*

Variable topic course emphasizing the interdisciplinary focus that is at the foundation of the concentrations in the the Ph.D. in Comparative Studies. Content varies from semester to semester but invariably serves to guide students in approaching cultural texts and formations from a multidisciplinary perspective. May be repeated up to four times.

### **Practicum (CST 7940) 3-9 credits**

Engagement and collaboration with agencies and organizations in the public arena, as defined by the student's research interests. Projects initiated by the student may also be considered. *Grading: S/U*

### **Dissertation (CST 7980) 1-12 credits**

## ENGLISH

**Undergraduate Courses/ [link to graduate courses](#)**

### **American Literature to 1865 (AML 2010) 3 credits**

An overview of American literature, including representative writers of the Colonial, Enlightenment

and Romantic periods.

**American Literature from 1865 (AML 2020) 3 credits**

An overview of American literature including representative writers of the Realist, Naturalist, Modernist and Postmodernist movements.

**American Novel: 19th Century (AML 3111) 3 credits**

Major novels by such writers as Hawthorne, Melville, Twain, Crane and James.

**American Novel: 20th Century (AML 3121) 3 credits**

Major novelists selected to reflect a wide range of 20th-century experience; typically: Faulkner, Hemingway, Steinbeck, Singer, Hurston and Erdrich.

**Literature of the South (AML 3263) 3 credits**

Course covers writers of the U.S. South from pre-Civil War plantation cultures (and their hemispherical reach) through the Southern Literary Renaissance, Grit Lit and the contemporary: Douglass, Poe, Cable, Murfree, Caldwell, Hurston, Faulkner, O'Connor, Welty, Williams, Crews, Allison, Vernon, Howe and Tretheway.

**Florida Women Writers (AML 3264) 3 credits**

Course explores 19th- and 20th-century women writers in Florida, including Douglas, Rawlings, Hurston, Smith and others.

**Florida Writers (AML 3265) 3 credits**

An exploration of authors associated with and/or writing about Florida, such as John James Audubon, William Bartram, Harry Crews, Ernest Hemingway, James Weldon Johnson and Wallace Stevens. Topics and approaches vary. The course may draw upon FAU's Bessie DuBois Floridiana Collection.

**Colonial and Early American Literature (AML 4213) 3 credits**

*Prerequisite: [ENC 1102](#) or substitute with a grade of "C" or better*

A study of colonial and early American literature from 1600 to 1800.

**American Literature: 19th-Century Traditions (AML 4223) 3 credits**

Close reading of representative works exemplifying the major traditions in American literature, including naturalism, romanticism, realism and others.

**American Literature: 20th-Century Movements (AML 4242) 3 credits**

Overview of selected texts relevant to the emergence and definition of 20th-century American literary movements, such as modernism and postmodernism. Writers will be studied in social and historical

contexts and may include James, Cather, Eliot, Faulkner, O'Connor, Bellow, Morrison and Nabokov.

**Major American Writers: 19th Century (AML 4311) 3 credits**

Significant works of poetry, long and short fiction and non-fiction prose from 1800-1900, by significant American writers.

**Major American Writers: 20th Century (AML 4321) 3 credits**

Works representing main currents of modern American thought and literature.

**African-American Literature to 1895 (AML 4604) 3 credits**

An introduction to African-American literature and culture through prose and poetry from 1746-1895.

**African-American Literature 1895 to Present (AML 4607) 3 credits**

An introduction to African-American literature from the late 19th century to contemporary times.

**U.S. Latino/a Literatures (AML 4630) 3 credits**

An introduction to U.S. Latino/a literatures, with emphasis on Cuban-American, Puerto Rican and Mexican-American traditions.

**American-Indian Literature (AML 4640) 3 credits**

Interpretation of traditional oral narratives, songs and oratory as well as contemporary fiction and poetry. Emphasizes both cultural continuity and creative adaption of Euro-American presence.

**Jewish-American Literature (AML 4663) 3 credits**

An introduction to Jewish-American literature and culture through the work of several major and emergent 20th-century Jewish-American writers.

**Asian-American Literatures (AML 4673) 3 credits**

An introduction to Asian-American literary traditions and histories.

**Directed Independent Research (AML 4915) 1-3 credits**

*Prerequisites: ENG 3822, LIT 3213, for English majors and permission of instructor*

Students work closely with research mentors to conduct research and inquiry in American Literature. Requirements for the course and the criteria for evaluation are agreed upon by the research mentor and the student.

**Directed Independent Research (AML 4916) 0-3 credits**

*Prerequisites: ENG 3822, LIT 3213, for English majors and permission of instructor*

Students work closely with research mentors to conduct research and inquiry in American Literature.

Requirements for the course and the criteria for evaluation are agreed upon by the research mentor and the student. *Grading: S/U*

### **Special Topics (AML 4930) 3 credits**

Special topics in North American literature in English. May be repeated for credit.

### **Creative Writing (CRW 3010) 3 credits**

Guidance and criticism for beginners in writing prose fiction and poetry.

### **Fiction Workshop 1 (CRW 4120) 3 credits**

*Prerequisite: CRW 3010*

Concentrates on essentials of the short story form through emulations of varied modern authorial styles. Point of view, narrative form, voice, creating characters, tone and atmosphere are some of the topics covered. Students write several stories, revise and critique. Reading consists of single-author collections and anthology selections. Course may be repeated for credit once.

### **Fiction Workshop 2 (CRW 4121) 3 credits**

*Prerequisite: CRW 3010*

Workshop for advanced students. Reading consists of single-author works and anthology selections. Students may be asked to write in a variety of forms and will critique peer work. Course may be repeated for credit once.

### **Creative Writing: Non-Fiction (CRW 4211) 3 credits**

*Prerequisite: CRW 3010*

Application of creative techniques to non-fiction subjects in essay and autobiographical writing. Includes study of works by master non-fiction writers and themes in non-fiction literature. Course may be repeated for credit once.

### **Poetry Workshop 1 (CRW 4310) 3 credits**

*Prerequisite: CRW 3010*

Offers a thorough grounding in the fundamentals of writing poetry. By the end of the semester the student will have been introduced to such tools of poetic language as diction, connotation and word music; such techniques of poetic form as meter, stanza, enjambment and free-verse lineation; and such tools of poetic vision as image, metaphor and analogy. Course may be repeated for credit once.

### **Poetic Forms (CRW 4311) 3 credits**

*Prerequisite: CRW 3010*

Students develop appreciation for poetic forms by writing sestinas, sonnets, villanelles, blank verse and

a variety of other forms. Emphasis on contemporary poets experimenting in medieval, Renaissance, 17th-century forms and romantic forms such as the ode.

### **Poetry Workshop 2 (CRW 4321) 3 credits**

*Prerequisite: CRW 3010*

Workshop for advanced students. Individual projects critiqued in workshop sessions and in conference with the instructor. Visiting writers may participate in workshop sessions. To stimulate the student's development, other arts, especially music and the visual arts, may be explored. Course may be repeated for credit once.

### **Literary Editing and Publishing (CRW 4723) 3 credits**

*Prerequisite: CRW 3010 with minimum grade of "C" or permission of instructor*

This course offers a combination of theoretical background and practical, hands-on experience in the field of literary magazine editing and publishing. Students produce Coastlines, FAU's undergraduate literary journal. Duties include evaluating submissions, editing, publicity, research, budget proposals and more.

### **Special Topics: Creative Writing (CRW 4930) 3 credits**

*Prerequisite: CRW 3010*

Selected special topics, e.g., visions of nature or special readings and techniques. May be repeated for credit.

### **Honors Creative Writing Seminar (CRW 4932) 3 credits**

*Prerequisites: CRW 3010 and two 4000-level workshops with minimum grades of "B+" and permission of instructor*

Provides a structured framework for students in the Creative Writing Honors track to complete their honors thesis (either a work of fiction, nonfiction or a collection of poetry). Provides information about post-graduate opportunities for creative writers. Examines works of fiction, poetry and creative nonfiction in more depth and with more of an eye toward craft than may have been possible in previous coursework.

### **College Writing 1 (ENC 1101) 3 credits**

*Writing Across Curriculum (Gordon Rule)*

This course introduces students to rhetorical concepts and audience-centered approaches to writing including composing processes, language conventions and style, and critical analysis and engagement with written texts and other forms of communication. This is a General Education course.

### **College Writing 2 (ENC 1102) 3 credits**

*Writing Across Curriculum (Gordon Rule)*

*Prerequisite: ENC 1101 with a grade of "C" or better*

A continuation of College Writing 1. This is a General Education course.

**Honors College Writing 2 (ENC 1102) 3 credits**

*Writing Across Curriculum (Gordon Rule)*

*Prerequisite: Permission of department*

This is a Writing Across Curriculum (WAC) course where students explore examples of academic expository prose and write essays practicing forms of rhetoric. The course expands beyond ENC 1102 by exposing students to a range of writings found across the discipline, to basic competence in information literacy and research and to oral and visual as well as written communication. The goal is to prepare students for the types of critical reading and writing tasks they will need to master as emerging scholars in their individual disciplines. This is a General Education course.

**University Honors Seminar in Writing (ENC 1930) 3 credits**

*Writing Across Curriculum (Gordon Rule)*

*Prerequisite: ENC 1101 with a grade of "C" or better*

A seminar in the University Honors Program on topics in writing. This is a General Education course.

**Special Topics: College Writing 2 (ENC 1939) 3 credits**

*Writing Across Curriculum (Gordon Rule)*

*Prerequisite: ENC 1101 with grade of "C" or above*

Selected special topics for College Writing 2, e.g. Southern Cultures or Contemporary Creative Non-Fiction. This is a General Education course.

**Professional Writing (ENC 3213) 3 credits**

*Writing Across Curriculum (Gordon Rule)*

*Prerequisite: [ENC 1102 or substitute](#) with a grade of "C" or better*

Prepares the student to write professionally for audiences within and outside a corporation or nonprofit enterprise. Proofreading skills stressed.

**Advanced Exposition (ENC 3310) 3 credits**

*Writing Across Curriculum (Gordon Rule)*

*Prerequisite: [ENC 1102 or substitute](#) with a grade of "C" or better*

A study of rhetorical techniques, including principles of classical rhetoric.

**Principles of Research Writing (ENC 4138) 3 credits**

*Writing Across Curriculum (Gordon Rule)*

*Prerequisite: ENC 1102 or substitute with a grade of "C" or better*

Provides an introduction to communicating research through writing.

### **Writing for Nonprofits (ENC 4354) 3 credits**

*Writing Across Curriculum (Gordon Rule)*

*Prerequisites: ENC 1101 and ENC 1102 or substitute with a grades of "C" or better*

Engages students in the study and practice of professional writing activities with local nonprofit organizations. Students receive Academic Service-Learning credit by working with a local nonprofit organization for at least two hours each week. They become familiar with the kinds of writing necessary to support nonprofit organizations and the various rhetorical circumstances that shape organizations working and writing for social change. Students also research a specific community issue or problem related to their partnering organization.

### **Directed Independent Research (ENC 4915) 1-3 credits**

*Prerequisites: ENG 3822, LIT 3213, for English majors and permission of instructor*

Students work closely with research mentors to conduct research and inquiry in Writing and Rhetoric. Requirements for the course and the criteria for evaluation are agreed upon by the research mentor and the student.

### **Directed Independent Research (ENC 4916) 0-3 credits**

*Prerequisites: ENG 3822, LIT 3213, for English majors and permission of instructor*

Students work closely with research mentors to conduct research and inquiry in Writing and Rhetoric. Requirements for the course and the criteria for evaluation are agreed upon by the research mentor and the student. Grading: S/U

### **Special Topics: Composition (ENC 4930) 3 credits**

Special topics in composition studies. May be repeated for credit.

### **Introduction to Literary Studies (ENG 3822) 3 credits**

A prerequisite for English majors that must be taken before or concurrently with any 4000-level course. Prepares students to enter the field of literary studies by introducing three genres and key literary concepts. Course emphasizes close textual analysis and basic research skills. Topics vary depending on instructors.

### **Studies in Writing and Rhetoric (ENG 4020) 3 credits**

*Writing Across Curriculum (Gordon Rule)*

*Prerequisites: ENC 1101, ENC 1102 or substitute with grades of "C" or better*

Examines the theory and practice of rhetoric with special attention to contemporary developments in

rhetoric and their applicability to writing.

### **Literature and Film (ENG 4114) 3 credits**

The study of film representations of British and American literary works. Emphasizes narrative techniques and strategies for adapting literary works for the cinema.

### **Directed Independent Study (ENG 4904) 1-4 credits**

This course allows students to conduct specialized research under the supervision of a faculty member.

### **RI: Honors Research (ENG 4910) 3 credits**

*Prerequisites: ENG 4932, Honors in English students only and department permission required*

The course facilitates the completion of a 20-40 page honors thesis that makes an original contribution to the discipline through a series of assignments designed to enable research in literary studies. This course is research intensive (RI).

### **Honors Seminar (ENG 4932) 3 credits**

*Prerequisites or Corequisites: ENG 3822 and LIT 3213*

Required for honors students but open to those interested in more advanced literary study. Allows students to synthesize literary knowledge and critical skills gained in the English major. More intensive and interactive than the Department's other courses and organized in ways that anticipate graduate-level courses. Topics of the seminar change from year to year. Offered once a year in the fall.

### **English Internship (ENG 4940) 1-6 credits**

*Prerequisites: 18 credits in the major; 3.0 GPA overall and in English; permission of instructor*

Practical experience working 10-15 hours per week in a writing and/or reading oriented position relevant to the English major. Possible internship sites include publishing houses, government agencies, public relations firms, museums, libraries, computer information systems, advertising agencies, and law firms.

### **British Literature to 1798 (ENL 2012) 3 credits**

Major works, writers and movements of early British literature.

### **British Literature since 1798 (ENL 2022) 3 credits**

Major works, writers and movements of modern British literature.

### **English Study Abroad (ENL 2952) 1-6 credits**

**Prerequisite: Sophomore standing**

Credit for enrollment in approved study abroad programs.

**British Novel: 18th Century (ENL 3112) 3 credits**

Selected novelists from Daniel Defoe to Ann Radcliffe.

**British Novel: 19th Century (ENL 3122) 3 credits**

Selected novelists from Jane Austen to Thomas Hardy.

**British Novel: 20th Century (ENL 3132) 3 credits**

Major British and Irish novelists from Conrad to the present; emphasis on innovations in technique.

**Backgrounds for British and American Literature (ENL 3425) 3 credits**

Provides crucial backgrounds, allusions, themes, "histories" and other elements that are contexts for British and American literary works. Topics include the Bible as literature, Greek and Roman classics, epic, mythology, diaspora, ancient literary criticism, ancient non-Western literature, science and literature and metamorphosis.

**Medieval Literature (ENL 4210) 3 credits**

From Old English epic (Beowulf) to Middle English courtly romance (Sir Gawain).

**Renaissance Literature (ENL 4220) 3 credits**

Selected readings that may be organized by genre (drama, poetry, epic, romance), theme (the lover as hero, the rise of humanism, classical revisions) or as a broad-based historical overview of the period and concept of the Renaissance. Writers may include Spenser, Marlowe, Sidney, Jonson.

**17th-Century Literature (ENL 4221) 3 credits**

Representative writers from Donne through Dryden.

**18th-Century Literature (ENL 4230) 3 credits**

Major prose, poetry, drama and satire of the 18th century.

**British Romanticism (ENL 4243) 3 credits**

A study of major poets of the Romantic period, including prose writing, theory and fiction.

**Victorian Literature (ENL 4251) 3 credits**

A study of Victorian literature and culture from Dickens to Kipling. Major works of poetry and prose of the Victorian period are studied in their historical and cultural contexts.

**Victorian Genres and Themes (ENL 4264) 3 credits**

A study of major literary genres and themes of the Victorian period. Content varies by semester.

### **20th-Century British Literature (ENL 4273) 3 credits**

Focuses on British literature from World War I to the end of the 20th century, concentrating on the major movements of modernism and postmodernism. Literary works by Lawrence, Woolf, Eliot, Pinter, Lessing and others will be studied in social and historical contexts, such as the women's and working-class movements, race and immigration and the end of empire.

### **Chaucer (ENL 4311) 3 credits**

The Canterbury Tales, Troilus and Criseyde, the dream allegories.

### **Shakespeare (ENL 4333) 3 credits**

Representative plays.

### **Milton (ENL 4341) 3 credits**

Paradise Lost, Paradise Regained, and Samson Agonistes and other works, including the prose.

### **Directed Independent Research (ENL 4915) 1-3 credits**

*Prerequisites: ENG 3822, LIT 3213, for English majors and permission of instructor*

Students work closely with research mentors to conduct research and inquiry in British Literature.

Requirements for the course and the criteria for evaluation are agreed upon by the research mentor and the student.

### **Directed Independent Research (ENL 4916) 0-3 credits**

*Prerequisites: ENG 3822, LIT 3213, for English majors and permission of instructor*

Students work closely with research mentors to conduct research and inquiry in British Literature.

Requirements for the course and the criteria for evaluation are agreed upon by the research mentor and the student. *Grading: S/U*

### **Special Topics: British Literature (ENL 4930) 3 credits**

Special aspects of British Literature. May be repeated for credit.

### **English Study Abroad (ENL 4957) 1-6 credits**

*Prerequisite: Sophomore standing*

Credit for enrollment in approved study abroad programs.

### **Structure of Modern English (LIN 4680) 3 credits**

Comparative grammatical analysis of the structure of English prose styles of major writers; traditional, structuralist and transformational approaches critically examined.

### **University Honors Seminar in Literature (LIT 1930) 3 credits**

*Writing Across Curriculum (Gordon Rule)*

A seminar in the University Honors Program on topics in literature.

### **Interpretation of Fiction (LIT 2010) 3 credit**

*Writing Across Curriculum (Gordon Rule)*

*Prerequisite: ENC 1102 or substitute with grade of "C" or above*

An introduction to close reading of fiction. This is a General Education course.

### **Interpretation of Poetry (LIT 2030) 3 credits**

*Writing Across Curriculum (Gordon Rule)*

*Prerequisite: ENC 1102 or substitute with grade of "C" or above*

An introduction to close reading of poetry. This is a General Education course.

### **Interpretation of Drama (LIT 2040) 3 credits**

*Writing Across Curriculum (Gordon Rule)*

*Prerequisite: ENC 1102 or substitute with grade of "C" or above*

An introduction to close reading of drama. This is a General Education course.

### **Interpretation of Creative Nonfiction (LIT 2070) 3 credits**

*Writing Across Curriculum (Gordon Rule)*

*Prerequisite: ENC 1102 or substitute with minimum grade of "C"*

An introduction to the history and interpretation of nonfiction. Focuses on a variety of sub-genres of creative nonfiction, such as autobiography and memoir and literary journalism and the essay (including non-traditional forms like the lyric or graphic essay). Provides students with the tools to read, analyze, think critically and write about creative nonfiction and to communicate their insights in oral and written forms. This is a General Education course.

### **Introduction to World Literature (LIT 2100) 3 credits**

A variable topics course focusing on perennial aspects of human experience through the comparative study of world literature. This is a General Education course.

### **Special Topics in Literature (LIT 2931) 3 credits**

*Writing Across Curriculum (Gordon Rule)*

*Prerequisites: ENC 1101 and ENC 1102 with minimum grades of "C"*

This course is focused specifically on teaching students to better understand literature as a written art form. Students also learn to employ academic writing to critically analyze the formal qualities that give

meaning to literature. This class focuses on a special topic or theme. This is a General Education course.

### **Literature Study Abroad (LIT 2952) 1-6 credits**

*Prerequisite: Sophomore standing*

Credit for enrollment in approved study abroad programs.

### **Modern Drama (LIT 3043) 3 credits**

Traditions in dramatic literature: Realist, Naturalist, poetic, experimental (absurdist, etc.).

### **Irish Literature (LIT 3184) 3 credits**

An exploration of the developments of the Irish literary tradition. Selections may include Irish language literature in translation, folklore, fiction, poetry and drama from writers such as Merriman, Swift, Joyce, Yeats, Bowen, Beckett, Heaney, Boland and Ni Dhomhnaill.

### **Literary Theory (LIT 3213) 3 credits**

Introduces various schools of critical and literary theory to bear upon the interpretation of literary texts, such as new criticism, psychoanalysis, myth studies, poststructuralism, phenomenology, feminism, postcolonialism, Marxism and more.

### **Fantasy Literature (LIT 3312) 3 credits**

Selected readings in 19th- and 20th-century fantasy, drawn from Lord Dunsany, George MacDonald, Charles Williams, C.S. Lewis, J.R.R. Tolkien, Lewis Carroll, E.R. Eddison, L. Frank Baum, Fritz Leiber, Ursula K. Le Guin, Jane Yolen.

### **Science Fiction (LIT 3313) 3 credits**

Selected readings in 19th- and 20th-century science fiction, drawn from Mary Shelley, Jules Verne, H.G. Wells, Arthur C. Clarke, Robert Heinlein, Isaac Asimov, Ray Bradbury, Theodore Sturgeon, Samuel Delany, Ursula K. Le Guin, Orson Scott Card.

### **Literature of Adolescence (LIT 3333) 3 credits**

A survey and selection of literature representing genres and themes appropriate for the adolescent reader. Issues and research chosen from available scholarship. Intended to assist meeting teacher certification requirements.

### **Detective Fiction (LIT 3344) 3 credits**

Analysis of short stories and novels from Edgar Allan Poe to modern times; division into classical, hard-boiled and contemporary forms.

**Literary Genres (LIT 4001) 3 credits**

Analysis of a literary genre in historical context. May be repeated for credit.

**Modern Poetry (LIT 4032) 3 credits**

Formal and semantic aspects of 20th-century poetry in English.

**Comparative Literature (LIT 4061) 3 credits**

Selected topics requiring investigation of related literary and intellectual movements across national boundaries, with particular attention to writers of international significance.

**Contemporary Drama (LIT 4094) 3 credits**

Dramatic literature of the 20th and 21st centuries; playwrights may include Churchill, Mamet, Parks, Pinter, Ruhl, Shepard, Stoppard, A. Wilson.

**Caribbean Literatures in English (LIT 4192) 3 credits**

Focuses on the critical and analytical study of representative Caribbean authors writing in English.

**World Literature: Critical Approaches (LIT 4225) 3 credits**

Critical approaches to selected works in major world literatures, Eastern and Western, including, e.g., archetypal, traditional or contemporary interpretations.

**Postcolonial Literature (LIT 4233) 3 credits**

An introduction to the field of postcolonial studies, especially the historical development and major debates surrounding the genre.

**Major Writers of World Literature in English (LIT 4244) 3 credits**

Course allows an in-depth exploration of particular major English-language writers from Africa, Asia, Canada, the Caribbean, Ireland and/or Oceania.

**Black Literatures (LIT 4355) 3 credits**

*Prerequisite: ENC 1102 or substitute with grade of "C" or better*

Introduces students to literature of the African Diaspora and seeks to make connections between diverse works from various countries that speak to issues such as identity, blackness, ancestry and the relationship between nation and diaspora. Also focuses on debates in African Diasporic studies, including how scholars should define and think about the African Diaspora.

**Women and Literature (LIT 4383) 3 credits**

An examination of literary representations of and/or literature and criticism by women and cultural

events/movements/histories that have informed the emergence of a women's literary tradition. Topics, national traditions and period may vary. May fulfill pre-1800 requirements depending on the course focus.

### **Literature and Environment (LIT 4434) 3 credits**

An exploration of literary engagements with the natural and/or constructed environment, which may include, but is not limited to, the Ancient, Medieval, Early Modern, Romantic, Victorian, Modern, Postmodern and Colonial traditions.

### **Literature and Social Movements (LIT 4484) 3 credits**

Considers how literature has influenced and been influenced by social movements. Topics may include literature in relation to such movements as abolition, the British labour movement, women's suffrage, the Civil Rights movement, anticolonialism and decolonization, the gay rights movement, Third Wave feminism, the anti-globalization movement or the rise of the New Left.

### **LGBTQ+ Literature (LIT 4523) 3 credits**

An introduction to literature by and/or about LGBTQ people as well as cultural events/movements/histories that have informed the emergence and establishment of a queer literary tradition. Topics, national traditions and/or chronological period may vary.

### **Comparative European Romanticism (LIT 4604) 3 credits**

*Prerequisite: Reading knowledge of French, German, Spanish or Italian*

Romanticism as a European movement. Study of representative poetry and prose in French, German and English literatures with emphasis on literary and intellectual relations. Readings in Rousseau, Goethe, Novalis, Chateaubriand, Coleridge, Wordsworth, Keats, Mary Shelley, Eichendorff, Lamartine, Hugo.

### **Literature of War (LIT 4605) 3 credits**

Examines major themes, genres and stylistic modes in war writing. Considers works from American, British and other literatures. Topics may include the history of war literature, war poetry, propaganda and reportage, black humor and literature and culture of the World Wars, the Vietnam War and other wars.

### **Asian Literature in English (LIT 4832) 3 credits**

Focuses on the critical and analytical study of representative Asian authors writing in English.

### **Directed Independent Research (LIT 4915) 1-3 credits**

*Prerequisites: ENG 3822, LIT 3213, for English and Languages, Linguistics and Comparative*

*Literature majors and permission of instructor*

Students work closely with research mentors to conduct research and inquiry in Genre Studies or Non-British and American Literature. Requirements for the course and the criteria for evaluation are agreed upon by the research mentor and the student.

**Directed Independent Research (LIT 4916) 0-3 credits**

*Prerequisites: ENG 3822, LIT 3213, for English and Languages, Linguistics and Comparative Literature majors and permission of instructor*

Students work closely with research mentors to conduct research and inquiry in Genre Studies or Non-British and American Literature. Requirements for the course and the criteria for evaluation are agreed upon by the research mentor and the student. *Grading: S/U*

**Special Topics (LIT 4930) 3 credits**

Special topics in comparative literature. May be repeated for credit.

**Literature Study Abroad (LIT 4957) 1-6 credits**

*Prerequisite: Sophomore standing*

Credit for enrollment in approved study abroad programs.

**English Graduate Courses**

All graduate courses in the Department of English have the following prerequisite: Admission to a graduate program in Arts and Letters or permission of instructor. This prerequisite is in addition to any prerequisite listed with the courses below.

**\* With different content may be repeated for credit.**

**\* Literary Genres and Themes (AML 5937) 3 credits**

*Prerequisites: Admission to graduate program in Arts and Letters or permission of instructor*

(U.S.) Might include, e.g., U.S. Hard-boiled Detective Fiction, The American Novel, American Drama, U.S. Utopian/Dystopian Fiction.

**\* Individual Author (AML 6305) 3 credits**

Intensive study of one American writer, e.g., Faulkner, Dickinson, Twain, James, O'Connor, Morrison.

**\* Directed Independent Study (AML 6905) 1-3 credits**

**\* Special Topics (AML 6934) 3 credits**

Special topics in American literature.

**\* Seminar: American Literature (AML 6938) 3 credits**

More than one author is considered, but the focus is intensive, often concentrating on literature of one region and/or ethnic group, e.g., Southern, Wharton and Chopin, Jewish American, African American, Native American. With different content, may be repeated for credit.

**Master's Thesis (AML 6971) 1-6 credits**

*Grading: S/U*

**\* Creative Writing Workshop (CRW 5025) 3 credits**

Concentration on a mode of writing fiction, poetry or drama.

**\* Creative Writing: Genre and Form (CRW 6024) 3 credits**

Literary theory, criticism, literature and creative writing considering forms, genres and styles not covered in the genre workshops, e.g., writing the poetic sequence, libretti, novella, novel in verse, translation, dramatic monologue.

**\* Fiction Writing Workshop (CRW 6130) 3 credits**

Advanced composition in fiction writing, consideration of significant examples of novel and story forms. Aims at perfecting a series of short stories or novel chapters, improving critical abilities.

**\* Creative Non-Fiction Workshop (CRW 6236) 3 credits**

Advanced composition in creative non-fiction writing, consideration of significant examples of memoir, essay and literary journalism forms. Course aims at perfecting a series of personal essays or chapters in a book-length non-fiction narrative, improving critical abilities.

**\* With different content may be repeated for credit.**

**\* Poetry Writing Workshop (CRW 6331) 3 credits**

Advanced composition in poetry writing, consideration of significant examples of poetic forms. Aims at perfecting a series of poems, improving critical abilities.

**Literary Publishing and Editing (CRW 6726) 3 credits**

*Prerequisite: Permission of instructor*

This course provides a combination of theoretical background and practical, hands-on experience in the field of literary magazine editing and publishing. Graduate students mentor undergraduates in the production of Coastlines literary magazine as well as work on Swamp Ape Review, FAU's online national literary magazine.

### **Creative Writing Symposium (CRW 6920) 1 credit**

A creative writing workshop focusing on areas relevant to the M.F.A. curriculum. Course topics vary by semester and instructor and are offered in fiction, poetry and creative non-fiction.

### **Master's Thesis (CRW 6971) 1-6 credits**

*Grading: S/U*

### **Studies in Composition Methodology and Theory (ENC 6700) 3 credits**

Review and discussion of recent scholarship in the teaching of composition, with an emphasis on practical applications in the classroom. Required for and restricted to graduate assistants teaching composition for the first time. May count toward the 24 credits of coursework required for the MA degree.

### **\* Topics in Rhetoric and Composition (ENC 6930) 3 credits**

Composition theory and practice across a range of topics, such as reading/writing connections, sites or praxis, computers and composition, research in composition studies, literary theory and social consequences, writing in the disciplines, assessment and evaluation, history of composition studies and survey of composition theories.

### **Master's Thesis (ENC 6971) 1-6 credits**

*Grading: S/U*

### **Literary Criticism 1 (ENG 5018) 3 credits**

Literary critical theory from Plato to the 18th century.

### **Literary Criticism 2 (ENG 5019) 3 credits**

Major themes and theoretical statements of the 19th and 20th centuries.

### **Research Methods for Advanced Literary Study (ENG 6009) 3 credits**

*Prerequisite: Required before enrollment in thesis or exam courses*

Research, presentation, publication and professional practices of the discipline of literary studies.

### **\* Seminar: Theory and Criticism (ENG 6049) 3 credits**

Focuses on theoretical approaches to literature, e.g., structuralism, deconstruction, formalism, gender studies, Marxism, New Historicism, postcolonialism, speech acts; or critical themes such as Mimesis or the Sublime.

### **\* Directed Independent Study (ENG 6906) 1-3 credits**

**English Symposium (ENG 6920) 1 credit**

Focuses on a specific topic in areas relevant to the English master's program.

**\* Research Colloquium (ENG 6924) 3 credits**

For increasing research skills and developing methodological approaches, anticipating formal work in master's thesis. May count as an elective beyond the 24 credits of coursework specified in the catalog.

*Grading: S/U*

**\* Colloquium in English (ENG 6925) 3-6 credits**

For English Department teaching assistants, discussion and evaluation of materials and methods of undergraduate English instruction; participation in appropriate Departmental workshops and colloquia.

May count as an elective beyond the 24 credits of coursework specified in the catalog. *Grading: S/U*

**\* Seminar: Writing, Rhetoric and Literacy (ENG 6933) 3 credits**

Focuses on the theory and practice of written composition as it affects issues such as the teaching of writing, the relationship of rhetoric and poetics and the development of cultural literacies. Variable content.

**Master's Thesis (ENG 6971) 1-6 credits**

*Grading: S/U*

**\* Literary Genres and Themes (ENL 5937) 3 credits**

*Prerequisites: Admission to graduate program in Arts and Letters or permission of instructor*

(British) Might include, e.g., Rise of the Novel, Renaissance Lyric, Renaissance Drama, Gothic Literature.

**\* Individual Author (ENL 6305) 3 credits**

Intensive study of one British writer, e.g., Chaucer, Jane Austen, George Eliot, William Blake, Virginia Woolf.

**\* Seminar: British Literature (ENL 6455) 3 credits**

More than one author is considered, but the focus is intensive, often concentrating on literature of one region and/or ethnic group, e.g., Scottish Literature, Sidney and Spenser, Celtic Literary Culture.

**\* Directed Independent Study (ENL 6905) 1-3 credits**

**\* Special Topics (ENL 6934) 3 credits**

Special topics in British literature.

**Master's Thesis (ENL 6971) 1-6 credits**

*Grading: S/U*

**History of the English Language (LIN 6107) 3 credits**

Development of the language from Old English to the present, utilizing modern linguistics.

**Structure of Modern English (LIN 6676) 3 credits**

Comparative grammatical analysis of the structure of English prose styles of major writers; traditional, structuralist and transformational approaches are critically examined.

**\* Special Topics (LIN 6934) 3 credits**

**Master's Thesis (LIN 6971) 1-6 credits**

*Grading: S/U*

**\* With different content may be repeated for credit.**

**\* Seminar: World Literature in English (LIT 6105) 3 credits**

More than one Anglophone author is considered, but the focus is intensive, often concentrating on literature of one region and/or ethnic group, e.g., Caribbean, Canadian, Irish, Asian.

**Comparative Caribbean Idea(s) (LIT 6198) 3 credits**

Prerequisite: For master's students in English and Languages, Linguistics and Comparative Literature  
This course explores recurring themes and ideological debates regarding identity formation (creolization, hybridity, sexuality, beliefs and gender), and the commodification of island culture in Caribbean literature.

**\* Individual Author (LIT 6246) 3 credits**

Intensive study of one Anglophone writer, not U.S. or British, e.g., Yeats, Walcott, Atwood.

**Theorizing Science Fiction/Fantasy (LIT 6318) 3 credits**

The use of science fiction metaphors by contemporary theorists as informed by contemporary science fiction texts.

**Reading for Comprehensive Exams (LIT 6900) 1-6 credits**

*Prerequisite: Permission of department*

Course provides graduate students who have elected to pursue the comprehensive exam option in the English M.A. program rigorous guidance in preparing for that exam. In close consultation with their exam committee chair, students work through at least half of their reading list during each semester

taking this course. May be repeated for credit.

**\* Directed Independent Study (LIT 6905) 1-3 credits**

**Capstone Project in Literary Translation (LIT 6914) 0-3 credits**

*Prerequisite: Permission of instructor*

The final translation project is typically a continuation of a project the student has already begun in the translation workshop. The project results in a document of 20 to 30 pages of either poetry or prose. *Grading: S/U*

**\* Special Topics in Science Fiction and Fantasy (LIT 6932) 3 credits**

*Prerequisite: Admission to graduate program in Arts and Letters or permission of instructor*

A selection of science fiction/fantasy exploring a theme or motif, such as cyborg culture, utopia/dystopia, urban fantasy/mythology, etc.

**\* Seminar: Special Topics (LIT 6934) 3 credits**

Specialized aspects of literature, including non-British or non-American Anglophone literature and world literature in English translation.

**\* Seminar: Literature and Other Fields (LIT 6936) 3 credits**

Literature and, e.g., film, visual art, history, philosophy, psychology, linguistics.

**Master's Thesis (LIT 6971) 1-6 credits**

*Grading: S/U*

**\* With different content may be repeated for credit.**

## ETHNIC STUDIES

### **Undergraduate Courses**

**History of American Immigration and Ethnicity (AMH 3530) 3 credits**

**African-American History to 1877 (AMH 3571) 3 credits**

**African-American History since 1877 (AMH 3572) 3 credits**

**The Civil Rights Movement (AMH 4575) 3 credits**

[\(See History courses, this section\)](#)

**African-American Literature to 1895 (AML 4604) 3 credits**

**African-American Literature 1895-Present (AML 4607) 3 credits**

**U.S. Latino/a Literatures (AML 4630) 3 credits**

**American-Indian Literature (AML 4640) 3 credits**

**Jewish-American Literature (AML 4663) 3 credits**

**Asian-American Literatures (AML 4673) 3 credits**

[\(See English courses, this section\)](#)

**Native-American Culture and Society (ANT 3312) 3 credits**

**Cultures of South Asia (ANT 3361) 3 credits**

**Gender and Culture (ANT 4302) 3 credits**

**African-American Anthropology (ANT 4315) 3 credits**

**Cultural Anthropology (ANT 4414) 3 credits**

## **Film and Video Graduate Courses**

**Film Theory and Criticism (FIL 6807) 3 credits**

**Studies in Film and Television (FIL 6935) 3 credits**

**Mass Media Theory (MMC 6408) 3 credits**

(See [School of Communication and Multimedia Studies courses](#), this section)

**Sex, Violence in Hollywood (WST 6339) 3 credits**

(See [Women, Gender and Sexuality Studies courses](#), this section)

## **HISTORY**

### **Undergraduate Courses/ [link to graduate courses](#)**

**History of the African Diaspora (AFH 3512) 3 credits**

This course explores the emergence of the Africa Diaspora and its political, racial and cultural significance. Beginning with the Middle Passage and the Atlantic Slave Trade, students learn how the institution of New World slavery constituted not only the making of the African Diaspora, but the modern world itself.

**Special Topics in African History (AFH 4930) 3 credits**

The study of a special area in African History. Topics will vary. May be repeated for credit.

**U.S. History to 1877 (AMH 2010) 3 credits**

In this course students examine United States history from before European contact to 1877. Topics include, but are not limited to Indigenous peoples, the European background, the Colonial Period, the American Revolution, the Articles of Confederation, the Constitution, issues within the new republic, sectionalism, manifest destiny, slavery, the American Civil War and Reconstruction. This is a General Education course.

**U.S. History since 1877 (AMH 2020) 3 credits**

In this course, students trace the history of the United States from the end of the Reconstruction Era to the contemporary era. Topics include, but are not limited to, the rise of industrialization, the United States' emergence as an actor on the world stage, constitutional amendments and their impact, the

Progressive Era, World War I, the Great Depression and New Deal, World War II, issues of civil and minority rights, the Cold War and the United States since 1989. This is a General Education course.

### **American Capitalism since 1890 (AMH 3371) 3 credits**

The course addresses the changing nature of U.S. capitalism and how it was conceived during the 20th century. Business history and case studies illustrate consumerism and its relationship to popular culture and highlight various views of capitalism in modern U.S. history.

### **History of American Technology (AMH 3372) 3 credits**

Introductory survey of American technological history. Chronological and topical in scope, including the Industrial Revolution, computer revolution and technology of the home.

### **The American South (AMH 3400) 3 credits**

A survey of the region from the colonial period through the modern era emphasizing the interaction between the South as a distinct region and the South as an inescapable part of the United States. The focus of the course is on the economic, political and social changes that shaped Southern culture.

### **History of Florida (AMH 3420) 3 credits**

A study of the history of the state from the time of the Spanish conquest to the present day.

### **Work and Workers in U.S. History (AMH 3500) 3 credits**

Work is fundamental to the experiences of most people. However, the nature of the work, the arrangement of labor and the experiences of those who do the work have all been historically contingent. This course explores work as a historical development in American history, from the earliest days to the present.

### **History of American Immigration and Ethnicity (AMH 3530) 3 credits**

An overview of the history of immigration to the United States and of the immigrant and ethnic experience in American society from colonial times to the present.

### **U.S. Constitutional History (AMH 3550) 3 credits**

Course examines U.S. constitutional and legal system history from the colonial period through the Civil Rights era. Ideological theories from Federalist era, Civil War/Reconstruction to Civil Rights are addressed. Course concludes by examining how the passage of the Democratic Republic from an agrarian society to an industrial state shaped the Constitution.

### **History of U.S. Women (AMH 3560) 3 credits**

The changing roles of U.S. women from colonial days to the present. Topics include work patterns, family life, education, the abolitionist and suffrage movements and feminism.

### **African-American History to 1877 (AMH 3571) 3 credits**

A survey of the African-American experience from West Africa through Reconstruction. Emphasis placed on African origins, the slave trade, colonial and antebellum slavery, origins of African-American culture, abolitionist movement, the Civil War and Reconstruction.

### **African-American History since 1877 (AMH 3572) 3 credits**

A survey of the African-American experience from Reconstruction to the present. Emphasis placed on the goals of Reconstruction, segregation and Jim Crow, the development of Black organizations, Black Nationalism, the Civil Rights and Black Power Movements, and contemporary issues facing the African-American community.

### **American Environmental History (AMH 3630) 3 credits**

History of the American Environment and the ways in which different cultural groups have perceived, used, managed, and conserved it, from colonial times to present.

### **Colonial North America (AMH 4110) 3 credits**

Old Worlds collided and a New World began when European explorers and Native Americans came face-to-face. This course explains how colonists settled and missionaries advanced, how some Indians welcomed them and others pushed back, and how fortunes grew and empires went to war. Prologue to the United States.

### **The American Revolution (AMH 4133) 3 credits**

This course investigates the history of the revolution from the colonial struggles of the Seven Years' War to the organization of the Early Republic, including not only the acts of generals and politicians but also the experiences and decisions of common people as they shaped the United States.

### **The Age of Jefferson and Jackson (AMH 4150) 3 credits**

A study of the early national period emphasizing the relationship between the economy and the political culture and how that relationship served to shape early 19th-century society and culture.

### **Civil War and Reconstruction (AMH 4170) 3 credits**

A study of the American Civil War and Reconstruction period assessing the causes of the war, the military aspects and the reconstruction following the war.

### **The US in the Era of World War I and World War II (AMH 4231) 3 credits**

Explores the history of the United States from 1900 to 1945. Surveys the transformation of American politics, economics, society and culture in this era of immense change. Charts the rise of the United

States as a world power.

### **U.S. since 1945 (AMH 4270) 3 credits**

An analysis of U.S. social, political, economic and diplomatic development since the end of the Second World War.

### **America in the 1960s (AMH 4273) 3 credits**

This course examines the economic, political, social, and cultural transformation of America in the 1960s.

### **American Material Culture to 1860 (AMH 4302) 3 credits**

A study of the physical aspects of American life: architecture, ceramics, clothing, art, etc., that provide insight into everyday life in early America.

### **American Material Culture from 1860 (AMH 4303) 3 credits**

A study of the physical aspects of American life: lighting, domestic appliances, clothing, television, etc., that provide a unique insight into everyday life of America since 1860.

### **History of U.S. Drug and Alcohol Use (AMH 4315) 3 credits**

Course follows patterns of the use of both alcohol and drugs from the 19th through 21st century and the problems and issues they have raised. Topics covered include the origin of the Temperance movement; the role of tobacco in the economic growth of the U.S.; revolutions in medicine and pharmacology that have made different drugs available; and changing ideas about alcoholism and drug addiction.

### **American Politics since 1750 (AMH 4350) 3 credits**

The origin and growth of national parties and the history of party struggles with emphasis upon presidential elections.

### **Shopping, Travel, and Leisure in 20th-Century America (AMH 4377) 3 credits**

Course covers the development of a republic of consumers by the U.S. government during the 20th century at the national level where political leaders enacted full employment and other growth policies. At the household level, ordinary residents then sought to improve their standard of living through shopping, travel, and leisure.

### **Urban History of the United State (AMH 4460) 3 credits**

The rise of urban culture from the colonial village to the present-day metropolis.

### **Diplomatic History of the U.S. (AMH 4512) 3 credits**

Emphasis on how America's development influences its world outlook.

### **Law in U.S. History (AMH 4558) 3 credits**

Course addresses major themes in the history of law in the area that became the United States from the foundations of English common law to the legal shifts of the period after the Civil War. Course considers the relationship between law and culture.

### **History of African-American Women (AMH 4574) 3 credits**

Traces the experiences, worldview and accounts of African-American women from slavery to freedom and examines black women's lives and labor within the context of major historical themes and periods in American history, such as slavery, the American Civil War, Reconstruction and the Civil Rights Movement.

### **The Civil Rights Movement (AMH 4575) 3 credits**

A survey of the African-American struggle for full citizenship and human rights. Students will study black leaders; their organizations; and the legal strategies, mainstream protest movements, and alternative (or radical) approaches they applied to solving the dilemmas of chronic discrimination and racism in 20th-century America.

### **American Sports History (AMH 4611) 3 credits**

Examines the history of American sports, connecting the development of sports to larger themes in U.S. History. The class shows how sports are a microcosm of American society and reflects the positives and negatives of America's legacy.

### **Religion in America (AMH 4620) 3 credits**

A history of American religious thought from the colonial period to the present, focusing on religious diversity, liberty, identity and politics.

### **America and the Sea (AMH 4694) 3 credits**

This course explores the maritime history of the United States from precolonial times to the present. Topics include the history of seafaring, maritime commerce, coastal history, and the environmental, social and cultural histories of America's relationship with the sea.

### **Special Topics in American History (AMH 4930) 3 credits**

The study of a special area of American history. Topics will vary. May be repeated for credit.

### **Islamic History (ASH 3222) 3 credits**

This course introduces students to both the history of the Islamic world from the seventh century to the rise of the Mongol Empire as well as to the nature of the modern study of this history. Topics addressed

include debates over origins, Islamic "sciences" and the nature of Islamic rule.

### **The Modern Middle East (ASH 3223) 3 credits**

The emphasis in this course is on the creation of the modern Middle East and addresses Arab nationalism, Arab/Palestinian-Israeli conflict, Islamist movements and Western involvement in the region.

### **The Ottoman Empire (ASH 3233) 3 credits**

Survey of the Ottoman Empire. Topics include Turkish origins in the region, the rise of the Ottomans, Ottoman society and culture, methods of succession, relations with external powers, decline factors and the "dissolution of empire." Historiographical issues are addressed throughout the course.

### **History of East Asia (ASH 3300) 3 credits**

An introduction to the culture and civilization of East Asia.

### **Women in Asian History (ASH 3384) 3 credits**

This course examines the social, political, economic, and cultural roles played by women in South Asia, Southeast Asia, and East Asia. Selective topics will include religious beliefs, political systems, women's work, ideologies shaping popular notions about women, sexuality, the roles of women in the family, feminism, patriarchy, imperialism, revolution, and nationalism.

### **The Crusades (ASH 4210) 3 credits**

Studies the Crusades from both Muslim and non-Muslim perspectives/sources. Focus is on the concepts surrounding the holy war, the events of the 11th- to 13th-century Crusades, Muslim society and the reaction at the time as well as the effects of the Crusades on Europe and the Islamic lands.

### **Modern Iran (ASH 4242) 3 credits**

History of Iran from Safavid period to the post-Khomeini period Although the survey nature of the course includes a chronological path, it moves beyond the political narrative to address cultural, social and religious developments (Constitutional Revolution, 1970s revolution, post-Khomeini Iran).

### **History of Modern China (ASH 4404) 3 credits**

A detailed study of the nature and development of modern Chinese History.

### **History of Modern Japan (ASH 4442) 3 credits**

An introduction to modern Japan.

### **History of Modern India (ASH 4550) 3 credits**

Consideration of the Indian Mutiny; British institutions in India; Nationalism; Hindu-Muslim

communalism; partition; government and politics; economic and cultural development; and foreign policy since independence.

### **Indian Civilization (ASH 4560) 3 credits**

Introduction to the civilization, culture, states, societies and religions of the South Asian subcontinent from 2500 BCE through the arrival of European trade companies. Areas covered include the Vedas, Buddhism, Hinduism, the caste system, the Kama Sutra and Mughal Islam.

### **History of Eastern Ideas (ASH 4600) 3 credits**

Eastern thought from Confucianism-Buddhism to Communism.

### **History of Chinese Thought (ASH 4602) 3 credits**

Introduces students to the history of Chinese thought. Covers the main three schools of thought in China, namely Confucianism, Daoism and Buddhism. These three schools are critical for understanding East Asia both as a historical phenomenon and as a part of our modern world.

### **Zen and Buddhism (ASH 4603) 3 credits**

Course provides a thorough introduction to Buddhism, one of the major religions of the world. There are 400 billion Buddhists in the world today, mostly in Asia, but they do have a significant presence on every continent. The course covers the origin and development of Buddhism as well as the current state of the religion.

### **Islamic Intellectual History (ASH 4624) 3 credits**

Development of Muslim thought from the pre-modern to the modern period (e.g., the tenets of faith, law, theology, philosophy, historiography and Islamic mysticism). The second half of the course addresses developments and changes in Muslim thought during the modern era.

### **Asia and the West (ASH 4630) 3 credits**

Course focuses on the cultural, religious, political, demographic, economic, and other exchanges between Europe/North America and Asia (including Southwest, South, Southeast, and Far East) from the 16th century to the present. Primary emphasis is on examples of interaction from multiple perspectives to understand modes of interaction and historical patterns of globalization.

### **Introduction to Asian Studies (ASN 2005) 3 credits**

Designed to provide an in-depth introduction to one area of Asia: East Asia, South Asia or West Asia. Because the Asian Studies Certificate is interdisciplinary, the course can be taught in any of the following Departments: Anthropology, English, History, Political Science, Sociology or Languages, Linguistics, and Comparative Literature.

### **Special Topics in Asian History (ASH 4930) 3 credits**

The study of a special area of Asian history. Topics will vary. May be repeated for credit.

### **European History Study Abroad (EUH 2952) 1-6 credits**

*Prerequisite: Sophomore standing*

Credit for enrollment in approved study abroad programs.

### **20th-Century Europe since World War II (EUH 3206) 3 credits**

An investigation of some of the problems confronting Europeans from the pre-World War II period to the present. Emphasis will be placed on the conflict of ideologies.

### **Modern Eastern Europe (EUH 3320) 3 credits**

This course addresses the methods for special educators to use data and knowledge of general and specialized curricula to improve special education programs for students with exceptionalities using evidence-based practices and effective teaching strategies.

### **20th-Century Europe to World War II (EUH 3343) 3 credits**

An investigation of the problems facing Europeans from the turn of the century to World War II. Emphasis will be placed on the conflict of ideologies.

### **History of Modern France (EUH 3451) 3 credits**

French history and its impact since 1789. Economic trends, social and cultural movements and religious issues will complement a study of major political developments. Underlying themes and their impact across time are stressed.

### **History of Modern Germany (EUH 3462) 3 credits**

A history of Germany. Emphasis will be placed on the period beginning with the close of the Napoleonic Wars to the present.

### **History of Modern Russia (EUH 3570) 3 credits**

Rise of radical movements under the tsars, the Bolshevik Revolution, the rise of Stalin and Stalinism, the Cold War and the reconstitution of Russian government and society in the post-Soviet era.

### **Women in European History (EUH 3619) 3 credits**

Course looks at reasons why women were written out of history and examines the social, political and economic roles played by women in Europe from the beginning of known civilization to the present.

### **Medieval History (EUH 4120) 3 credits**

The decline of the Roman Empire; the rise of Christianity; analysis of feudalism and manorialism; the

economic revival; and the origins of Western Society.

### **Renaissance Europe (1350–1500) (EUH 4140) 3 credits**

History of Europe between 1350 and 1500, including effects of the Black Death, growth of national monarchies, technological innovations, overseas expansion, Italian and northern humanist culture, popular culture, and gender roles.

### **Reformation Europe (1500–1650) (EUH 4144) 3 credits**

History of Europe between 1500 and 1650, including background and outbreak of Protestantism, Counter-reformation, religious wars, gender roles, witch hunts, economic and colonial expansion, political consolidations, and Baroque and popular cultures.

### **Early Modern Europe (EUH 4200) 3 credits**

History of Europe between 1648 and 1789, including creation of modern states system, rise and fall of absolutism in France, scientific and Enlightenment culture, constitutional conflict in England, and imperial rivalries and wars, focusing on the various perspectives of class and gender.

### **19th-Century Europe (EUH 4233) 3 credits**

History of Europe from the French Revolution to World War I. Themes will include the rise of liberalism, conservatism, nationalism, and socialism, the social and economic impact of the industrial revolution, the "new" imperialism, and developments in the arts and sciences.

### **History of Greek Civilization (EUH 4403) 3 credits**

From the 8th century B.C. to 400 A.D.

### **History of Roman Civilization (EUH 4411) 3 credits**

From the 8th century B.C. to 500 A.D.

### **Hitler and Nazi Germany (EUH 4465) 3 credits**

After a brief survey of German history from early times to 1933, course focuses on Hitler's rise to power, the politics and policies of the Nazi regime, the road to world war, the Holocaust and the Nazi legacy.

### **Medieval England (EUH 4500) 3 credits**

Consideration of the political, constitutional and institutional development of England from the 5th century to 1485.

### **Modern Britain (EUH 4502) 3 credits**

Industrialization: the English historical model; critiques of society; political reform; the emergence of

the welfare state; empire and commonwealth; the British and the origins of the two World Wars.

### **Tudor-Stuart England (EUH 4511) 3 credits**

England from 1485 to 1714 including constitutional development, popular and elite culture, religious change, civil wars, revolution, economic crisis, commercial expansion, and international relations.

### **British Empire (EUH 4530) 3 credits**

Great Britain's empire from acquisition to dissolution. Topics include motives for acquisition, theories of imperialism, transfer of ideas and institutions, histories of Australia, New Zealand, India, Canada and British Africa.

### **Modern Ireland (EUH 4538) 3 credits**

Provides students with a comprehensive survey of modern Irish history since 1692 with a focus on the period 1801-1923 and an emphasis on political and social developments. Topics include the Act of Union, the Great Famine, the Irish Diaspora and the Irish Revolution.

### **History of European Sexuality (EUH 4684) 3 credits**

Introduces students to the latest scholarship on the role of sexual desire in the cultural development of Europe and how associated ideas also impacted politics, society, economics and religion.

### **Special Topics in European History (EUH 4930) 3 credits**

The study of a special area of European history. Topics will vary. May be repeated for credit.

### **European History Study Abroad (EUH 4957) 1-6 credits**

*Prerequisite: Sophomore standing*

Credit for enrollment in approved study abroad programs.

### **University Honors Seminar in History (HIS 1930) 3 credits**

*Writing Across Curriculum (Gordon Rule)*

A seminar in the University Honors Program on topics in history.

### **Writing History (HIS 2050) 3 credits**

*Writing Across Curriculum (Gordon Rule)*

*Prerequisite: ENC 1101 with a grade of "C" or better*

Introduces students to the discipline of History by working with them on developing their skills in critical thinking, reading and writing. The focus is on historical inquiry and the production of clear, effective written prose. As such, it acts as an official substitute for ENC 1102. This is a General Education course.

### **Topics in Historical Investigation (HIS 2934) 3 credits**

In-depth study of a particular historical problem, period, or event through lectures, discussions of readings, and writing assignments. Topics will vary.

### **History Study Abroad (HIS 2952) 1-6 credits**

*Prerequisite: Sophomore standing*

Credit for enrollment in approved study abroad programs.

### **Introduction to Public History (HIS 3065) 3 credits**

Explores fields of endeavor outside of teaching. Includes museum work, preservation activities, public and private.

### **Introduction to Archives (HIS 3080) 3 credits**

This course introduces students to basic theoretical issues, archival principles and professional ethics. Students develop an understanding of archives and libraries by engaging with current issues, trends and theories that are shaping the field. The course attempts to create a balance between theory and practice. Students learn about archival responsibilities by working with materials, thereby gaining a deeper understanding of archival concepts.

### **Historic Preservation (HIS 3086) 3 credits**

This course helps foster the student's ability to think, read, write and talk about the American and world preservation movement from an informed and critical perspective. Students study site surveys, federal and local law, and the National Register as they relate to historic preservation.

### **RI: Historical Methods (HIS 3150) 3 credits**

*Writing Across Curriculum (Gordon Rule)*

*Prerequisite: Open to declared History majors only or with permission of instructor*

This course teaches students how to be historians. Students conduct original research of libraries and digital collections, survey major historiographical trends and write a lengthy final research paper based on primary sources. This is a research-intensive (RI) course.

### **History of Human Rights (HIS 3204) 3 credits**

This course explores how people have defined human rights and have sought to protect them in different historical periods and cultural contexts from the ancient period through to the present. Using historical documents from a variety of cultures and time periods, the question, "What are human rights?" is explored.

### **History of Christianity to 1500 (HIS 3432) 3 credits**

History of the Christian church from origins in the Roman Empire to the dawn of the Reformation, with emphasis on heresy, persecution, doctrinal development, missionary movements, popular piety, and sectarianism.

### **History of Christianity since 1500 (HIS 3434) 3 credits**

History of the Christian church from the Reformation to the present, with emphasis on Protestant and Catholic reform movements, religious strife and persecution, confessionalism, worldwide growth, secularization, theological developments, and responses to modernity.

### **History of Science (HIS 3462) 3 credits**

This course introduces students to the history of "Natural History," as the study of science was called before it was broken up into individual subjects. The course addresses the development of scientific thought from prehistoric times through to the development of university-based scientific study in the late 19th century.

### **Aerospace History (HIS 4322) 3 credits**

*Writing Across Curriculum (Gordon Rule)*

*Prerequisites: ENC 1101 and ENC 1102 or substitute*

The primary goal of this course is to learn about aviation history and its impact on the United States and the world. The course develops students' fundamental skills in critical and global thinking and in comparative analysis. It also develops their understanding of the interaction of race, ethnicity, gender, class, age, and technology.

### **History of Western Ideas HIS 4345) 3 credits**

Basic themes in Western philosophical, literary, scientific and artistic history since the 18th century are studied, together with their cultural background. The impact of ideas on each other and on human progress in the last two centuries is emphasized.

### **Magic and Superstition in the Atlantic World (HIS 4437) 3 credits**

This course traces the changing roles and understandings of magic in European culture, religion, politics and science from the late Middle Ages to the modern day.

### **Slavery and Abolition in the Americas (HIS 4451) 3 credits**

The rise and defeat of racial slavery in the Americas is a global story that is foundational to the American experience. Students explore connections between Africa, the United States, the Caribbean and Latin America, and study documents that illuminate lives of enslaved peoples.

### **Directed Independent Study (HIS 4906) 2-3 credits**

*Prerequisite: Permission of instructor*

Reading and research in a field of history, with program of study selected and reviewed in consultation with Department faculty members. Permission of instructor required.

**Special Topics (HIS 4930) 1-3 credits**

The study of a special area in history. Topics will vary. May be repeated for credit.

**RI: Senior Seminar (HIS 4935) 3 credits**

*Writing Across Curriculum (Gordon Rule)*

*Prerequisite: HIS 3150*

Advanced research on topics related to theme chosen by the course instructor. Students discuss in-depth readings on the historical theme, present their preliminary research findings to the class and produce a lengthy research paper. This is a research-intensive (RI) course.

**Internship in Public History (HIS 4944) 1-3 credits**

*Prerequisite: HIS 3065 or permission of instructor*

Practicum in public history involving service at local museums, historical societies, and preservation agencies.

**History Study Abroad (HIS 4957) 1-6 credits**

*Prerequisite: Sophomore standing*

Credit for enrollment in approved study abroad programs.

**Senior Thesis in History (HIS 4970) 3 credits**

*Prerequisite: HIS 3150 and permission of instructor*

Completion of a substantial thesis under faculty supervision.

**Colonial Latin American History (LAH 3100) 3 credits**

Traces the development of society in Latin America from pre-Columbian and Iberian experiences until the Wars of Independence, and covers political, social, and economic topics.

**Latin American Independence (LAH 3133) 3 credits**

The history of Latin America from 1750 until 1850, including the causes of the independence movements, the wars for independence, and the ensuing political conflicts.

**Modern Latin American History (LAH 3200) 3 credits**

Studies the Latin American republics from the wars of independence to the present. Major problems facing the region are studied in their historical context.

### **Women in Latin American History (LAH 3721) 3 credits**

This course examines the changing roles and images of women in Latin American history from pre-Columbian times to the present.

### **Indians in Latin American History (LAH 4131) 3 credits**

Explores the complex processes by which Europeans came to dominate the indigenous peoples in the New World with emphasis on Latin America. Course also analyzes how Indians and Africans shaped the formation of New World religions and cultural traditions since 1492.

### **History of Mexico (LAH 4430) 3 credits**

The study of Mexican history from earliest times to the present. Focuses on the political, economic, and social history of the country.

### **History of the Caribbean (LAH 4470) 3 credits**

The study of the historical development of the Caribbean-Gulf of Mexico cultural area from earliest times to the present. Emphasis is on Hispanic legacy and the region's strategic importance since the 18th century.

### **History of Cuba (LAH 4480) 3 credits**

Studies in the development of the Cuban nation from Pre-Columbian times to the present.

### **Special Topics in Latin American History (LAH 4930) 3 credits**

The study of a special area in Latin American history. Topics will vary. May be repeated for credit.

### **History of Civilization 1 (WOH 2012) 3 credits**

*Writing Across Curriculum (Gordon Rule)*

*Prerequisite: ENC 1101 with grade of "C" or better*

Survey of world societies from Paleolithic era to 1600. Lectures elucidate major events/traditions. Students discuss and write about first-hand accounts of events/topics. This is a General Education course.

### **History of Civilization 2 (WOH 2022) 3 credits**

Survey of world history from 1600 to the present. Focus on increasing world interconnections and interdependency. Themes include world wars, decolonization and globalization. This is a General Education course.

### **World War II (WOH 4244) 3 credits**

An examination of the background and waging of World War Two. Aspects explored will include the military, diplomatic, social, and economic dimensions.

### **Gandhi and Hitler (WOH 4405) 3 credits**

This course analyzes the approaches of Mohandas K. "Mahatma" Gandhi and Adolf Hitler in their political activities, contrasting their uses of nonviolence and violence. It explores biographical details, historical contexts, challenges, writings, approaches to problem-solving, leadership, goals, relations with their followers and opponents, and their legacies.

## **History Graduate Courses**

### **Readings in Florida History (AMH 5902) 3 credits**

*Prerequisite: Admission to graduate history program or permission of instructor*

Readings on selected topics in the field of Florida history. May be repeated for credit.

### **Readings in American History (AMH 5905) 3 credits**

*Prerequisite: Admission to graduate history program or permission of instructor*

Readings on selected topics and problems in United States history. May be repeated for credit.

### **Seminar in Florida History (AMH 6935) 3 credits**

*Prerequisite: Admission to graduate history program or permission of instructor*

Group discussion and individual research on selected topics. May be repeated for credit.

### **Seminar in United States History (AMH 6939) 3 credits**

*Prerequisite: Admission to graduate history program or permission of instructor*

Group discussion and individual research on selected topics. May be repeated for credit.

### **Readings in European History (EUH 5905) 3 credits**

*Prerequisite: Admission to graduate history program or permission of instructor*

Readings on selected topics in a field or fields of European history. May be repeated for credit.

### **Seminar in European History (EUH 6939) 3 credits**

*Prerequisite: Admission to graduate history program or permission of instructor*

Group discussion and individual research on selected topics. May be repeated for credit.

### **The Historical Experience (HIS 5060) 3 credits**

*Prerequisite: Admission to graduate history program or permission of instructor*

A seminar designed to introduce the beginning graduate student to the technical aspects of the study of history; it treats the problems involved in the preparation of the master's thesis.

### **Readings in Public History (HIS 5903) 3 credits**

*Prerequisite: Admission to graduate history program or permission of instructor*

Readings on selected topics in the field of public history. May be repeated for credit.

### **Readings in Comparative History (HIS 5904) 3 credits**

*Prerequisite: Admission to graduate history program or permission of instructor*

Readings in selected topics in comparative history. May be repeated for credit.

### **Directed Independent Study (HIS 5909) 3 credits**

*Prerequisite: Permission of instructor*

Readings and research in a field of history.

### **Internship in Public History (HIS 5942) 1-3 credits**

*Prerequisite: Permission of instructor*

Practicum in public history involving service at local museums, historical societies, and preservation agencies. May be repeated for credit.

### **Teaching Practicum (HIS 5944) 3 credits**

Required of all History graduate assistants. This course is designed to help graduate assistants develop their skills as discussion leaders in introductory courses in which a faculty member has responsibility for course organization and lectures.

### **Directed Independent Study (HIS 6908) 1-3 credits**

Reading and research in a field of history, with a program of study selected and reviewed in consultation with the Department faculty members. Permission of instructor is required.

### **Seminar in Comparative History (HIS 6939) 3 credits**

*Prerequisite: Admission to graduate history program or permission of instructor*

Group discussion and individual research on selected topics. May be repeated for credit.

### **Master's Thesis (HIS 6971) 1-6 credits**

*Grading: S/U*

### **Readings in Latin American History (LAH 5902) 3 credits**

*Prerequisite: Admission to graduate history program or permission of instructor*

Readings on selected topics in a field or fields of Latin American history. May be repeated for credit.

### **Seminar in Latin American History (LAH 6938) 3 credits**

*Prerequisite: Admission to graduate history program or permission of instructor*

Group discussion and individual research on selected topics. May be repeated for credit.

### **Readings in World History (WOH 5935) 3 credits**

*Prerequisite: Admission to graduate history program or permission of instructor*

Readings on selected topics in a field or fields of non-Western history. May be repeated for credit.

### **Seminar in World History (WOH 6937) 3 credits**

*Prerequisite: Admission to graduate history program or permission of instructor*

Selected topics and problems. May be repeated for credit.

## HONORS

### **Undergraduate Courses**

#### **Honors Credit (IDH 4905) 1 credit**

*Prerequisites: Permission of instructor and admission to the designated Honors Program*

Honors Credit for students enrolled in the Honors Program. May be taken for repeated credit.

#### **Honors Reading Seminar (IDH 4931) 1-3 credits**

*Writing Across Curriculum (Gordon Rule)*

*Prerequisite: Admission to the Honors Program*

Readings, discussions, projects, and field trips, culminating in an honors portfolio directed by Honors faculty.

#### **Honors Thesis (IDH 4970) 1-3 credits**

*Prerequisites: Permission of instructor and admission to the designated Honors Program*

Thesis hours for students enrolled in the Honors Program.

## HUMANITIES

### **Undergraduate Course**

#### **Cooperative Education - Humanities (HUM 3949) 1-4 credits**

Course may be taken up to four times for a maximum of 8 credits.

## INTERDISCIPLINARY STUDIES:

# ARTS AND HUMANITIES AND SOCIAL SCIENCE

Many courses for these majors are listed previously in this section; these courses draw from several departments in the Dorothy F. Schmidt College of Arts and Letters. Other interdisciplinary courses are listed below.

## **Undergraduate Courses**

### **Temporary Study Abroad (IDS 2957) 1-15 credits**

#### **Global Studies 1 (IDS 3313) 3 credits**

This course introduces students to interdisciplinary transnational methodologies in global studies. The course asks students to consider how global processes are implicated in our own lived experiences, and how our everyday practices are implicated in the social, cultural and political economies of the globe. Specifically, it considers how “the global” is narrated in ethnography and literature, favoring a critical engagement with how we study and consider the globe rather than an exhaustive catalogue of world issues in the era of globalization.

#### **Interdisciplinary Studies Seminar (IDS 3890) 3 credits**

*Prerequisite: For Interdisciplinary Studies majors only*

A capstone course for Interdisciplinary Studies majors with a focus on (1) reflection, (2) job market or further education preparation and (3) citizenship and civic mindedness.

#### **Professional Internship (IDS 3949) 0-4 credits**

*Prerequisites: Students must have completed one semester at FAU as evidenced by having an FAU GPA on record and permission of instructor*

This course offers students the opportunity to gain “real-world” exposure and supervised experience related to their major, specific field of study or career interests. Students integrate theories learned in the classroom with experiential activities acquired through direct involvement in on/off campus internship opportunities. Students develop marketable skills in preparation for future employment or graduate school studies. *Grading: S/U*

#### **Global Studies 2 (IDS 4314) 3 credits**

*Prerequisite: IDS 3313*

This advanced study of global connectedness builds from foundations toward refined analytical capabilities in understanding contemporary articulations of globality as they are experienced in and across human affairs, movement, trade, relationships and the environment. The course showcases ways to bring interdisciplinary insights and methods to bear on these and other concerns related to an

increasingly globalized world.

### **Cultural Study of Globality (IDS 4332) 3 credits**

This course offers students the basic tools that are needed to understand some of the core principles of cultural studies, which will assist students in negotiating, analyzing, and participating within the increasingly globalized cultures and practices of the twenty-first century. Cultural studies constitute an interdisciplinary endeavor that employs multiple methodological approaches and theoretical lenses in understanding the world.

### **Directed Independent Study (IDS 4905) 1-3 credits**

*Prerequisite: Permission of instructor*

This is an open-enrollment independent study to be used to cover subject matter suitable for independent study but not currently offered by the various colleges.

### **Directed Independent Study (IDS 4907) 1-4 credits**

### **Liberal Studies Colloquium (IDS 4920) 1-3 credits**

A colloquium discussing knowledge and methods in the Arts and Sciences with frequent guest lectures by colleagues from the various disciplines within the University and culminating in the essay or project on a Liberal Arts theme.

### **Directed Independent Research (IDS 4915) 3 credits**

*Prerequisite: Permission of instructor*

Independent research project following protocols outlined by the Office of Undergraduate Research and Inquiry (OURI) guidelines.

### **Special Topics (IDS 4930) 1-3 credits**

This is an open-enrollment special topics course used to cover special subject matters not presently offered by the various colleges.

### **General Study Abroad (IDS 4957) 1-15 credits**

*Prerequisite: Sophomore standing*

### **Introduction to Peace Studies (PAX 3001) 3 credits**

Provides an overview and in-depth analysis, from varying perspectives, of the conceptual and theoretical framework of modern peace.

### **Advanced Research Project in Peace Studies (PAX 4912) 1-3 credits**

*Prerequisite: PAX 3001*

This advanced research project provides students with an opportunity to explore, in depth, any aspect of peace studies while working with a faculty member.

### **Special Topics (PAX 4930) 3 credits**

The study of a special topic in Peace Studies. Topics will vary. May be repeated for credit.

### **Professional Development (SLS 4342) 3 credits**

This course focuses on career planning and management skills, including self-assessment, occupational exploration and decision making. Organizational changes affecting careers, employability skills and strategies for implementing academic/career development plans are also covered.

## **JEWISH STUDIES**

### **Undergraduate Courses/ [link to graduate courses](#)**

#### **History of American Immigration and Ethnicity (AMH 3530) 3 credits**

#### **Religion in America (AMH 4620) 3 credits**

(See [History courses](#), this section)

#### **Jewish-American Literature (AML 4663) 3 credits**

(See [English courses](#), this section)

#### **Religions and World Politics (CPO 3761) 3 credits**

(See [Political Science courses](#), this section)

#### **Hitler and Nazi Germany (EUH 4465) 3 credits**

(See [History courses](#), this section)

#### **Beginning Hebrew Language and Culture 1 (HBR 1120) 4 credits**

#### **Beginning Hebrew Language and Culture 2 (HBR 1121) 4 credits**

#### **Intermediate Hebrew Language and Culture 1 (HBR 2220) 4 credits**

#### **Readings in Intermediate Hebrew (HBR 2240) 4 credits**

#### **Directed Independent Study (HBR 4905) 1-4 credits**

#### **Special Topics (HBR 4930) 1-4 credits**

(See [Languages, Linguistics, Comparative Lit. courses](#), this section)

### **Global Jewish Communities (JST 2452) 3 credits**

This course surveys the global Jewish world, from the 19th century to the present, including diverse Jewish experiences in Europe before the Holocaust and now, in the State of Israel and the United States. It also covers past and present Jewish connections to Arabic-speaking lands and to Islam and draws on examples from different nations. This is a General Education course.

### **Jewish Literature Through the Centuries (JST 3102) 3 credits**

Surveys Jewish literature from the Bible to recent times, providing a sense of its range and richness in different centuries and cultures. Course reviews literary technique in prose and poetry as well as analyzes how texts express religious, cultural, and political meaning.

### **Classical Jewish Civilization (JST 3403) 3 credits**

A survey of Judaic studies from Biblical times to the beginning of Jewish Emancipation in the late 1700s. Topics include Jewish holy texts, Jewish history in Temple times, Judaism and the foundations of Christianity and Islam; Medieval Jewish history, the changing role of women in Jewish culture, Hasidism, and the Jews of Eastern Europe.

### **Modern Jewish Civilization (JST 3404) 3 credits**

A survey of Jewish history, religion, and culture from the beginning of Jewish Emancipation in the late 1700s to issues of the 21st century. Topics include the development of denominationalism, modern Antisemitism, Zionism and the state of Israel, the Holocaust, American Jewish life, and the rebirth of Jewish mysticism.

### **Jewish Wisdom: An Introduction to Classical Jewish Thought (JST 3513) 3 credits**

An introduction to traditional Jewish thought and civilization through the medium of Rabbinic texts. Areas of inquiry will include Jewish metaphysics, theology, ethics, mysticism, and gender politics.

### **American-Jewish History, 1492-1990 (JST 4415) 3 credits**

A survey of major issues and themes in American-Jewish history set within the context of North America, from the first Jewish settlers to the National Jewish Population survey of 1990.

### **The Jews of Spain and the Middle East (JST 4417) 3 credits**

The geography, history, culture, languages, literature, and emigration patterns of the Jews who originated in medieval Spain and spread throughout the Mediterranean Basin, including Greece, Turkey, and the Balkan peninsula, living under the religious and legal influences of Islam.

### **Ancient Israel (JST 4424) 3 credits**

The history of ancient Israel during the Old Testament period, including its culture and religion, in the

light of archaeological discoveries.

### **History of Zionism and the State of Israel, 1880-1990 (JST 4425) 3 credits**

An in-depth examination of the modern State of Israel and its development from the birth of modern Zionism to the end of the 20th century.

### **Women and Judaism (JST 4510) 3 credits**

The first part of this course surveys the history of women in Judaism from Biblical times, considering social and religious factors. The second part covers women in Judaism in the 20th and 21st centuries, including both feminist theory and the different perspectives of many individual women.

### **The Holocaust (JST 4701) 3 credits**

An in-depth study of the Holocaust from its political, religious, and ideological roots in Antisemitism through the Nazi Final Solution to post-Holocaust issues of ethics, theology, and moral choice.

### **Directed Independent Study (JST 4905) 1-4 credits**

*Prerequisite: Permission of instructor*

Directed independent study on approved topics in Holocaust and Judaic studies.

### **Special Topics (JST 4930) 3 credits**

### **Jewish Studies Senior Seminar (JST 4935) 3 credits**

*Prerequisite: Senior standing*

This seminar is devoted to scholarly study of aspects of Jewish civilization.

### **Old Testament (REL 3213) 3 credits**

An introduction to the contents of the Old Testament (Hebrew Bible) and the methods modern scholars use to understand it.

### **Image of Woman in the Bible (REL 4218) 3 credits**

The role and treatment of femininity in the Bible, with particular emphasis on the Old Testament (Hebrew Bible) including a variety of contemporary approaches and concerns.

## **Jewish Studies Graduate Courses**

### **Readings in American History (AMH 5905) 3 credits**

[\(See History courses, this section\)](#)

### **Readings in European History (EUH 5905) 3 credits**

(See [History courses](#), [this section](#))

**Seminar: Special Topics (LIT 6934) 3 credits**

**Seminar: Literature and Other Fields (LIT 6936) 3 credits**

(See [English courses](#), [this section](#))

## LANGUAGES, LINGUISTICS, AND COMPARATIVE LITERATURE

Students should direct questions concerning the University Foreign Language requirement and placement in language courses to the Chair of the Department of Languages, Linguistics, and Comparative Literature. The Department enforces a non-audit policy in its language courses.

**Undergraduate Courses/ [link to graduate courses](#)**

**Beginning Arabic Language and Culture 1 (ARA 1120) 4 credits**

Beginning study of Modern Standard Arabic language and Arabic culture. For students with little or no experience in the language. Not open to native speakers or the equivalent.

**Beginning Arabic Language and Culture 2 (ARA 1121) 4 credits**

*Prerequisite: ARA 1120 or permission of instructor*

Emphasis on speaking and aural comprehension. Practice in reading and writing. For students with some experience in the language. Not open to native speakers or the equivalent.

**Beginning Arabic Language and Culture for Heritage Learners 1 (ARA 1140) 4 credits**

For students who can understand and speak informal Arabic (Moroccan, Egyptian, Syrian, etc.), have no or very limited exposure to formal Arabic (known as Modern Standard Arabic or Fusha), and cannot read or write the Arabic alphabet. Emphasis is on (1) developing reading and writing skills through exposure to the vocabulary and grammar of formal Arabic, and (2) expanding knowledge of historical and contemporary Arabic culture through the study of written and oral media. The course is conducted in Arabic.

**Beginning Arabic Language and Culture for Heritage Learners 2 (ARA 1141) 4 credits**

*Prerequisite: ARA 1140 or placement by instructor*

For students who can understand and speak informal Arabic (Moroccan, Egyptian, Syrian, etc.) but have minimal exposure to formal Arabic (known as Modern Standard Arabic or Fusha). Emphasis is on

(1) developing reading and writing skills through exposure to the vocabulary and grammar of formal Arabic, and (2) expanding knowledge of historical and contemporary Arabic culture through the study of written and oral media. The course is conducted in Arabic. Completion of this course satisfies FLEX.

**Intermediate Arabic Language and Culture 1 (ARA 2220) 4 credits**

*Prerequisite: ARA 1121 or permission of instructor*

Emphasis on communication skills and grammar. Not open to native speakers or the equivalent.

**Intermediate Arabic Language and Culture 2 (ARA 2221) 4 credits**

*Prerequisite: ARA 2220 or permission of instructor*

Continuation of emphasis on communication skills with special attention to grammar review. Not open to native speakers or the equivalent.

**Beginning Chinese Language and Culture 1 (CHI 1120) 4 credits**

Beginning study of Chinese language and culture. Not open to native speakers or the equivalent.

**Beginning Chinese Language and Culture 2 (CHI 1121) 4 credits**

**Prerequisite: CHI 1120 or permission of instructor**

Emphasis on speaking and aural comprehension. Practice in reading and writing. Not open to native speakers or the equivalent.

**Beginning Foreign Language and Culture 1 (FOL 1120) 4 credits**

Greek, Hebrew, Latin, Russian, Yiddish and others to be offered according to the needs of students and availability of instructors.

**Beginning Foreign Language and Culture 2 (FOL 1121) 4 credits**

*Prerequisite: FOL 1120 or equivalent*

Greek, Hebrew, Latin, Russian, Yiddish and others to be offered according to the needs of students and availability of instructors.

**Intermediate Foreign Language (FOL 2203) 4 credits**

*Prerequisite: FOL 1121 or equivalent*

Classical and contemporary foreign languages to be offered according to the needs of students and availability of instructors. Continuation of emphasis on communication skills in a cultural context with special attention to grammar review. Not open to native speakers.

**Foreign Language Study Abroad (FOL 2952) 1-6 credits**

*Prerequisite: Sophomore standing*

Credit for enrollment in approved study abroad programs.

**Research and Bibliographic Methods (FOL 3880) 3 credits**

Teaches how to find and evaluate print, electronic and online scholarly sources and how to outline, write, edit, critique, revise and evaluate a research paper in literary studies or linguistics. Required of all undergraduate majors in the Department of Languages, Linguistics, and Comparative Literature, preferably during the student's first semester of study.

**Special Topics (FOL 4933) 3 credits**

Intensive study of variable special topics in the culture, civilization and language of Russia, Israel, Sweden and other countries. To be offered according to the needs of students and availability of instructors.

**Senior Honors Seminar in Languages and Linguistics (FOL 4935) 3 credits**

*Prerequisite: Senior standing in honors program*

A small seminar for students admitted to Honors in Languages and Linguistics, within 30 credits of graduation. Intensive study of theoretical issues and practical problems in critical reading and writing. Preparation of research papers.

**Foreign Language Study Abroad (FOL 4957) 1-6 credits**

*Prerequisite: Sophomore standing*

Credit for enrollment in approved study abroad programs.

**Senior Honors Thesis (FOL 4970) 3 credits**

*Prerequisite: FOL 4935*

Closely supervised research and writing of the Senior Honors Thesis.

**Beginning French Language and Culture 1 (FRE 1120) 4 credits**

Beginning study of French language and culture. For students with little or no experience in the language. Not open to native speakers or the equivalent.

**Beginning French Language and Culture 2 (FRE 1121) 4 credits**

Emphasis on speaking and aural comprehension. Practice in reading and writing. For students with little or no experience in the language. Not open to native speakers or the equivalent.

**Intermediate French Language and Culture 1 (FRE 2220) 4 credits**

*Prerequisite: FRE 1121 or equivalent*

Students continue to develop basic communicative skills in French and use those skills to expand their

knowledge of the cultures of the French-speaking peoples of the world. Not open to native speakers or equivalent.

### **Intermediate French Language and Culture 2 (FRE 2221) 4 credits**

*Prerequisite: FRE 2220 or equivalent*

Continuation of emphasis on communication skills, with special attention to grammar review. Not open to native speakers or equivalent.

### **French Language and Culture Study Abroad (FRE 2952) 1-6 credits**

*Prerequisite: Sophomore standing*

Credit for enrollment in approved study abroad programs.

### **Francais de Perfectionnement: French for Bilinguals (FRE 3340) 4 credits**

*Prerequisite: Permission of instructor*

Designed for native speakers of French whose knowledge of formal written French is lacking. Development of reading and writing skills, with special focus on the formal standard language for general and professional use.

### **Culture et Societe: Cinema (FRE 3393) 3 credits**

*Prerequisite: FRE 2221 or permission of instructor*

Course provides intensive practice in spoken and written French through an examination of selected cultural topics in contemporary French and francophone culture as highlighted in recent French-language films.

### **Advanced French Language and Culture 1 (FRE 3400) 4 credits**

Composition and conversation based on selected texts. Review of grammar. Not open to native speakers.

### **Advanced French Language and Culture 2 (FRE 3401) 4 credits**

*Prerequisite: FRE 2221 or permission of instructor*

Composition and conversation based on selected texts. Review of grammar. FRE 3401 may be taken before 3400. FRE 3400 is not open to native speakers (who should substitute FRE 3340).

### **Commercial French (FRE 3440) 3 credits**

*Prerequisite: FRE 2221 or permission of instructor*

Fundamentals of commercial and administrative French usage and correspondence. Introduction to relevant aspects of French commerce.

### **Advanced Commercial French (FRE 3442) 3 credits**

*Prerequisite: Permission of instructor*

A continuation of FRE 3440; advanced study of business French and preparation for the Chambre de Commerce et d' Industrie de Paris exam, leading to certificate in Commercial French.

**Prononciation et Phonetique (FRE 3780) 3 credits**

Targeted pronunciation practice using the phonetic alphabet with the objective of improving production of standard French pronunciation. Provides students with the tools to systematically improve French pronunciation and understand spoken French in various contexts.

**French Culture Study Abroad (FRE 3952) 1-6 credits**

*Prerequisite: Sophomore standing*

Credit for enrollment in approved study abroad programs.

**Structure of Modern French (FRE 4850) 3 credits**

*Prerequisite or Corequisite: LIN 3010 or permission of instructor*

Modern French from the point of view of descriptive linguistics. Structural analysis of the phonology, semantics, morphology, and syntax, with theoretical and practical applications.

**Special Topics in French Language Studies (FRE 4930) 1-3 credits**

*Prerequisite: FRE 3400 or equivalent*

Intensive study of aspects of the French language. Since content will vary, course may be repeated for credit.

**French Language and Culture Study Abroad (FRE 4957) 1-6 credits**

*Prerequisite: Sophomore standing*

Credit for enrollment in approved study abroad programs.

**Literature in Translation: The French Tradition (FRT 3140) 3 credits**

Reading and discussion in English of selected works from the full range of French literature, including major and minor traditions, genres and individual authors. Course content will vary from such genres as the novel and movements as Realism, to single authors such as Proust.

**French Culture Study Abroad (in Translation) (FRT 3956) 1-6 credits**

*Prerequisite: Sophomore standing*

Credit for enrollment in approved study abroad programs.

**Introduction to the Study of French-Language Literature (FRW 3001) 3 credits**

*Prerequisite: FRE 3400 or permission of instructor*

Introduction to a variety of approaches to understanding and analyzing French-Language literature: the major genre distinction, multiple types, analysis of prose, poetry, plays.

**French Civilization and Literature: Middle Ages to Revolution (FRW 3102) 3 credits**

Study of major literary, intellectual and cultural developments from the Middle Ages through 1789, including verse epic, the troubadours, Arthurian cycles, Renaissance poetics, Humanism, Neoclassicism, Jansenism, comedy, satire, Enlightenment, epistolary novel, Conte philosophique and political essay. Reading and discussion of representative texts.

**French Civilization and Literature: 19th and 20th Centuries (FRW 3122) 3 credits**

*Prerequisite: FRE 3400 or equivalent*

Study of major literary, intellectual, and cultural developments beginning in 1789 including Realism, Naturalism, Entre-Deux-Guerres, Existentialism, and the Theater of the Absurd. Reading and discussion of representative texts.

**Directed Independent Study (FRW 4905) 1-3 credits**

*Prerequisite: Permission of instructor*

Reading and research in advanced subjects in French. For third- and fourth-year students in good standing only, with program of study prearranged in consultation with instructor.

**Special Topics in French Literature (FRW 4930) 1-3 credits**

Intensive study of authors, genres or literary movements. Since content will vary, course may be repeated for credit.

**Senior Seminar (FRW 4933) 3 credits**

*Prerequisites: FOL 3880 and two 3000-level LIT courses*

This seminar for advanced French major focuses on French cultural history as refracted through one cultural object, such as the medieval cathedral or the Eiffel Tower. Alterations to the object itself, and variations in literary/artistic trends in representing the object, are highlighted as indicative of shifting cultural paradigms. Since subject of study will vary, course may be repeated for credit.

**French Literature Study Abroad (FRW 4957) 1-6 credits**

*Prerequisite: Sophomore standing*

Credit for enrollment in approved study abroad programs.

**Honors Thesis in French (FRW 4972) 1-3 credits**

*Prerequisite: Permission of instructor*

Intense reading and writing leading to completion of an honors thesis on a topic related to a theoretical

or critical aspect of French and/or Francophone literature and/or culture.

### **Beginning German Language and Culture 1 (GER 1120) 4 credits**

For students with no previous knowledge of German. First part of an introductory German course emphasizing communicative competence in German, while increasing an understanding of contemporary German culture.

### **Beginning German Language and Culture 2 (GER 1121) 4 credits**

Second part of an introductory German course emphasizing communicative competence in German, while increasing an understanding of contemporary German culture.

### **Intermediate German (GER 2201) 4 credits**

*Prerequisite: GER 1121 or permission of instructor*

Intended to help students develop their German skills and express themselves more idiomatically and accurately in speaking as well as in writing. Emphasizes the ethnic and cultural complexities of contemporary society in the German-speaking world.

### **Intermediate German: Culture and Society (GER 2220) 4 credits**

*Prerequisite: GER 1121 or equivalent*

Emphasizes the ethnic and cultural complexity of contemporary German society through a wide range of authentic texts. Accompanied by an intermediate grammar, this course is intended to help students learn to speak, read, and write German with more confidence.

### **Intermediate German 2 (GER 2221) 4 credits**

*Prerequisite: GER 2220 or equivalent*

Continuation of Intermediate German based on a variety of texts. Accompanied by an intermediate grammar, this course is intended to help students learn to speak, read and write German with more confidence.

### **Advanced Intermediate German (GER 2225) 4 credits**

*Prerequisite: GER 1121*

Employing a set of individualized web-based learning platforms, this course develops intermediate-level proficiency via the reinforcement of speaking and listening comprehension, reading and writing skills, and an exploration of selected cultural topics. Students also read a novel in German. Designed for students comfortable working individually in an online learning environment.

### **German Language and Culture Study Abroad (GER 2952) 1-8 credits**

*Prerequisite: Sophomore standing*

Credit for approved study abroad programs.

**Advanced German: Reading and Composition (GER 3400) 4 credits**

Practice of reading and composition based on literary and culturally relevant authentic texts. Review of grammar.

**Advanced German: Culture and Society (GER 3503) 3 credits**

*Prerequisite: Two semesters of intermediate German*

Emphasizes the complexity of contemporary German society through a wide range of authentic texts. The course is intended to help students perfect their spoken and written German, while developing a deeper understanding of German culture and society.

**German Culture Study Abroad (GER 3952) 1-8 credits**

*Prerequisites: Sophomore standing*

Credit for approved study abroad programs.

**Special Topics in German Language Studies (GER 4930) 1-3 credits**

*Prerequisite: GER 3400 or equivalent*

Intensive study of special topics in German language studies. Course may be repeated for credit.

**German Language and Culture Study Abroad (GER 4957) 1-6 credits**

*Prerequisite: Sophomore standing*

Credit for approved study abroad programs.

**German Literature in Translation (GET 3130) 3 credits**

Reading and discussion of German literature in English translation. Course content will vary. Course may be repeated for credit.

**German Culture Study Abroad (in Translation) (GET 3956) 1-6 credits**

*Prerequisite: Sophomore standing*

Credit for enrollment in approved study abroad programs.

**Seminar in German Literature (GEW 3934) 3 credits**

*Prerequisite: Two semesters of intermediate German*

Students explore special topics in German literature by concentrating on a particular author, theme, genre, or period. Course may be repeated for credit.

**Directed Independent Study (GEW 4905) 1-3 credits**

Independent study in German literature in consultation with the instructor.

### **Special Topics in German Literature (GEW 4930) 1-3 credits**

Advanced seminar on topics in German literature, concentrating on a particular author, theme, genre, or period. Course may be repeated for credit.

### **German Literature Study Abroad (GEW 4957) 1-6 credits**

*Prerequisite: Sophomore standing*

Credit for approved study abroad programs.

### **Beginning Classical Greek Language and Culture 1 (GRE 1120) 4 credits**

Beginning study of classical Greek. For students with little or no background in the study of the ancient Greek language.

### **Beginning Classical Greek Language and Culture 2 (GRE 1121) 4 credits**

*Prerequisite: GRE 1120 or equivalent*

Study of grammar and reading of classical Greek, primarily within the context of the ancient Greek civilization and culture. Acquisition of translation, reading, and writing skills. For students with little or no background in the study of the ancient Greek language.

### **Beginning Modern Greek Language and Culture 1 (GRK 1120) 4 credits**

The course teaches students how to communicate in Modern Greek, the language spoken in both Hellas and Cyprus, by placing equal emphasis on speaking, reading, listening, and writing. Students are also exposed to a variety of ideas pertaining Hellenic culture and society.

### **Beginning Modern Greek Language and Culture 2 (GRK 1121) 4 credits**

*Prerequisite: GRK 1120*

This course builds upon the knowledge of Modern Greek students acquire by taking GRK 1120. The course covers basic vocabulary and grammar by engaging students in virtual daily situations and by equally emphasizing speaking, listening, reading, and writing.

(The following four Hebrew courses are crosslisted with the Department of [Jewish Studies](#).)

### **Beginning Hebrew Language and Culture 1 (HBR 1120) 4 credits**

Beginning study of Hebrew language and culture. For students with little or no experience in the language. Not open to native speakers or the equivalent.

### **Beginning Hebrew Language and Culture 2 (HBR 1121) 4 credits**

*Prerequisite: HBR 1120 or equivalent*

Emphasis on speaking and aural comprehension. Practice in reading and writing. For students with little

or no experience in the language. Not open to native speakers or the equivalent.

### **Intermediate Hebrew Language and Culture 1 (HBR 2220) 4 credits**

*Prerequisite: HBR 1121 or equivalent*

Emphasis on communication skills and grammar. Not open to native speakers or equivalent.

### **Readings in Intermediate Hebrew (HBR 2240) 4 credits**

*Prerequisites: HBR 1121 or equivalent*

Course focuses on classic readings in intermediate Hebrew, helping students to read texts with particular emphasis on the Bible.

### **Directed Independent Study (HBR 4905) 1-4 credits**

*Prerequisites: Junior or senior level with program of study prearranged in consultation with instructor*

Reading and research in advanced subjects in Hebrew.

### **Special Topics (HBR 4930) 1-4 credits**

Intensive study of authors, genres, or literary movements. Content will vary; course may be repeated for credit.

### **Racism and Anti-Racism (HUM 2471) 3 credits**

This interdisciplinary course looks at the concepts of race, racism and anti-racism from a variety of disciplines and perspectives. It is designed as a series of units that each draw on the expertise of different faculty in the College of Arts and Letters. Students are invited to learn, examine and reflect on the complex relationships between race and racism and how they have shaped anti-racist movements from the 19th century until present.

### **Beginning Italian Language and Culture 1 (ITA 1120) 4 credits**

Beginning study of Italian language and culture. Not open to native speakers or the equivalent.

### **Beginning Italian Language and Culture 2 (ITA 1121) 4 credits**

*Prerequisite: ITA 1120 or equivalent*

Emphasis on speaking and aural comprehension. Practice in reading and writing. Not open to native speakers or the equivalent.

### **Intermediate Italian Language and Culture 1 (ITA 2220) 4 credits**

*Prerequisites: ITA 1121 or equivalent*

Emphasis on communication skills and grammar. Not open to native speakers or equivalent.

### **Intermediate Italian Language and Culture 2 (ITA 2221) 4 credits**

*Prerequisite: ITA 2220 or equivalent*

Continuation of emphasis on communication skills, with a special attention to grammar review. Not open to native speakers or equivalent.

### **Italian Language and Culture Study Abroad (ITA 2952) 1-6 credits**

Credit for enrollment in approved study abroad programs.

### **Italian Writing Workshop (ITA 3300) 3 credits**

*Prerequisite: ITA 2220 with minimum grade of "C"*

Learn to write Italian correctly and effectively. Written exercises and class discussions help students face several writing problems and train in the difficult art of writing. The objective is not only to write correctly but also to learn how to modulate the style of expression depending on the purpose of writing.

### **Reading the Italian Press (ITA 3412) 3 credits**

*Prerequisite: ITA 2220 with minimum grade of "C"*

A conversation-based intermediate-advanced Italian course. Uses original Italian material to spark a conversation that requires active participation. Taught in Italian and aims to develop vocabulary and Italian grammatical structures in both speaking and writing.

### **Advanced Italian 1 (ITA 3420) 4 credits**

*Prerequisite: ITA 2221 or equivalent*

This course further expands grammar and syntax through the reading and detailed analysis of a variety of texts targeting different registers of language. The texts are chosen in function of their Italian cultural or generally cross-cultural content, their relevance for practical use, and their ability to stimulate discussion. Ample opportunity to practice the Italian language both orally and in writing will be provided. Not open to native speakers.

### **Advanced Italian 2 (ITA 3421) 4 credits**

*Prerequisite: ITA 2221 or equivalent*

Composition and conversation based on selected texts. Review of grammar. ITA 3421 may be taken before ITA 3420. Not open to native speakers.

### **Readings in Intermediate-Advanced Italian Language and Culture (ITA 3430) 4 credits**

*Prerequisite: ITA 1121*

This gateway course to the upper division Italian language sequence emphasizes both written and spoken communication with special attention paid to contextual review of grammar. Course offers structured practice in reading and composition writing based on literary and culturally relevant authentic texts. Course may be repeated for credit.

### **Italian Culture Study Abroad (ITA 3952) 1-6 credits**

*Prerequisite: Permission of department*

Credit for enrollment in approved study abroad programs.

### **Tessere La Lingua/Weaving Language (ITA 4730) 3 credits**

*Prerequisite: ITA 2221 or permission of instructor*

Focuses on the morphology and syntax of the Italian language through the study of a variety of texts belonging to different linguistic registers, times and places.

### **Directed Independent Study (ITA 4905) 1-3 credits**

### **Special Topics (ITA 4930) 3 credits**

Intensive study of authors, genres, literary movements, or themes. May be repeated for credit.

### **Italian Language and Culture Study Abroad (ITA 4957) 1-6 credits**

*Prerequisite: Sophomore standing*

Credit for enrollment in approved study abroad programs.

### **Italian Culture and Society (ITT 2502) 3 credits**

Introduction to Italian culture, with study of intellectual, social, historical, and literary trends. Discussion of representative texts and visual material.

### **Italian Culture Through Food (ITT 3003) 3 credits**

The course is an Italian culture course in translation. It offers an in-depth study of the relationship between Italy's food culture and other areas of the humanities, especially literature and the arts, showing its richness far beyond the stereotypes.

### **Reflessioni/Reflections: Italian Translation (ITT 3100) 3 credits**

*Prerequisite: ITA 2221 with minimum grade of "C"*

In-depth study of and reflection on the nuances of the Italian language through its translation to English via the study of unique and culturally relevant texts in multiple registers of language.

### **Literature in Translation: The Italian Tradition (ITT 3110) 3 credits**

Reading and discussion in English of selected works from the full range of Italian literature, including major and minor traditions, genres and individual authors. Course content will vary from such genres as the novella and movements such as Romanticism, to single works or authors, such as the Decameron or Dacia Maraini.

### **Love and Lovers in Italian Literature (ITT 3111) 3 credits**

Analyzes the concept of love and the figure of the Italian lover from the origins of Italian literature to the present. Students read some of the most exciting pages of Italian writers presenting seductive Italian women and men. Taught in English.

### **Italian Cinema: from Text to Screen (ITT 3520) 3 credits**

A study of the cinema–literature relationship from neorealism to postmodernism. Authors range from Boccaccio to Bassani and directors from De Sica to Nichetti.

### **Italian Film Classics (ITT 3521) 3 credits**

*Writing Across Curriculum (Gordon Rule)*

Overview of Italy’s rich cinematic tradition starting from the groundbreaking years of Neorealism to the end of the past century. Taught in English.

### **Italian-American Cinema (ITT 3522) 3 credits**

*Writing Across Curriculum (Gordon Rule)*

This course offers an overview of the major filmmakers associated with the representation of Italian Americans in the United States film world. Students will view and discuss major filmmakers and their films, and will write critical essays on film topics. Conducted in English.

### **Italy in Lyrics (ITT 3600) 3 credits**

Uses songs and popular music to explore the last two hundred years of Italian history and its major cultural themes. Taught in English.

### **Italian Culture Study Abroad (in Translation) (ITT 3956) 1-6 credits**

Credit for enrollment in approved study abroad programs. This is an Academic Service Learning (ASL) course.

### **Dante: The Commedia in Translation (ITT 4440) 3 credits**

A close reading of a selection of canti from Dante's Divine Comedy with emphasis on the linguistic-philosophical and theological concerns of Dante Alighieri against the backdrop of the historical and political climate of his times.

### **Italian Literature and Civilization: Middle Ages and Renaissance (ITW 3100) 3 credits**

*Prerequisite: ITA 2221 or equivalent*

Study of major literary, intellectual, and cultural developments beginning in the Middle Ages and including readings from Dante, Boccaccio, the Neoplatonics, Machiavelli, Ariosto, and Tasso.

### **Italian Literature and Civilization: Baroque to Present (ITW 3101) 3 credits**

*Prerequisite: ITA 2221 or equivalent*

Study of major literary, intellectual, and cultural developments from 1700 to the present, with readings from Goldoni, Vico, Leopardi, D'Annunzio, Pirandello, and including Futurism, Existentialism, Postmodernism.

**Directed Independent Study (ITW 4905) 1-3 credits**

Reading and research in advanced subjects in Italian. For third- and fourth-year students in good standing only, with the program of study prearranged in consultation with instructor.

**Italian Literature Study Abroad (ITW 4957) 1-6 credits**

*Prerequisite: Sophomore standing*

Credit for enrollment in approved study abroad programs.

**Honors Thesis in Italian (ITW 4972) 1-3 credits**

*Prerequisite: Permission of instructor*

Intense reading and writing leading to completion of an honors thesis on a topic related to a theoretical or critical aspect of Italian literature and/or culture.

**Beginning Japanese Language and Culture 1 (JPN 1120) 4 credits**

Beginning study of Japanese language and culture. For students with little or no experience in the language. Not open to native speakers or the equivalent.

**Beginning Japanese Language and Culture 2 (JPN 1121) 4 credits**

*Prerequisite: JPN 1120 or equivalent*

Emphasis on speaking and aural comprehension in the cultural context. Practice in reading and writing. For students with little or no experience in the language. Not open to native speakers or equivalent.

**Intermediate Japanese Language and Culture 1 (JPN 2220) 4 credits**

*Prerequisite: JPN 1121 or equivalent*

Emphasis on communication skills in the cultural context and grammar. Not open to native speakers or the equivalent.

**Intermediate Japanese Language and Culture 2 (JPN 2221) 4 credits**

*Prerequisite: JPN 2220 or equivalent*

Continuation of emphasis on communication skills in the cultural context, with special attention to grammar review. Not open to native speakers or the equivalent.

**Japanese Language and Culture Study Abroad (JPN 2952) 1-6 credits**

*Prerequisite: Sophomore standing*

Credit for enrollment in approved study abroad programs.

**Directed Independent Study (JPN 4905) 1-4 credits**

*Prerequisite: Permission of instructor*

Reading and research in advanced subjects in Japanese. For third- and fourth-year students only, with a program of study prearranged in consultation with instructor.

**Special Topics (JPN 4930) 1-3 credits**

*Prerequisite: Permission of instructor*

Intensive study of various aspects of Japanese literature or language. Occasionally available in English for non-majors. May be repeated for credit.

**Japanese Language and Culture Study Abroad (JPN 4957) 1-6 credits**

*Prerequisite: Sophomore standing*

Credit for enrollment in approved study abroad programs.

**Japanese Culture Study Abroad (in Translation) (JPT 3956) 1-6 credits**

*Prerequisite: Sophomore standing*

Credit for enrollment in approved study abroad programs.

**Japanese Literature Study Abroad (JPW 4957) 1-6 credits**

*Prerequisite: Sophomore standing*

Credit for enrollment in approved study abroad programs.

**Introduction to Latin American Studies (LAS 2000) 3 credits**

This course is a required introductory course for the Caribbean and Latin American Studies Certificate and is designed to provide students with an understanding of the history, literature and culture of the Latin American region. While drawing on examples from specific Latin American nations, the course is broadly comparative, considering a number of substantive themes as they apply to the entire region and as they are related to world powers, multinational actors and global economic structures. This is a General Education course.

**Honors Introduction to Caribbean and Latin American Studies (LAS 2000) 3 credits**

*Writing Across Curriculum (Gordon Rule)*

*Prerequisites: ENC 1101 and ENC 1102 with minimum grades of "C" or permission of instructor; for students in the University Honors Program*

This course is a required introductory course for the Caribbean and Latin American Studies Certificate

and is designed to provide students with an understanding of the history, literature and culture of the Latin American region. While drawing on examples from specific Latin American nations, the course is broadly comparative, considering a number of substantive themes as they apply to the entire region and as they are related to world powers, multinational actors and global economic structures. This is a General Education course.

### **Beginning Latin 1 (LAT 1120) 4 credits**

Intensive introductory study of the Latin language with emphasis on reading, translation, grammatical analysis, and vocabulary. The translation of passages adapted from the ancient authors also provides an incidental acquaintance with Roman values, life, and culture.

### **Beginning Latin 2 (LAT 1121) 4 credits**

*Prerequisite: LAT 1120*

Intensive introductory study of the Latin language with emphasis on reading, translation, grammatical analysis, and vocabulary. Builds on knowledge and skills acquired in Latin 1. The translation of passages adapted from the ancient authors also provides an incidental acquaintance with Roman values, life, and culture.

### **Intermediate Latin 1 (LAT 2220) 4 credits**

*Prerequisite: LAT 1121 or equivalent*

For students who have successfully taken one year of college Latin, this course introduces advanced grammar, syntax, and stylistics of Latin prose. The focus is on translation with a parallel discussion of the texts in the historical frame of the late Republican and early Imperial periods.

### **Introduction to Language (LIN 2001) 3 credits**

This course explores fundamental questions about language such as: How do we acquire it? Can we think without it? Can computers learn it? Can language be used to profile and discriminate? Can language be used to manipulate how people think? Can offensive language be harmful? This is a General Education course.

### **Global Perspectives on Language (LIN 2607) 3 credits**

Course explores language from a global perspective. It addresses the complex relationship between language and culture, emphasizing the role of English as a global language, and also examines the U.S. as a multilingual society as this relates to race, ethnicity, the role of the media, and other issues. This is a General Education course.

### **Languages of the World (LIN 3006) 3 credits**

Introduction to the diversity of human languages around the world, which patterns and features exist in

different languages, how languages can be grouped together and what we can learn about the human past from linguistic data.

### **Introduction to Linguistics (LIN 3010) 3 credits**

The modern scientific study of pronunciation, word structure, syntax, semantics, language history, geographical and social dialects, first and second language acquisition, and writing systems. Open to non-majors.

### **Patterns of Language (LIN 3133) 3 credits**

Course offers insight into the basic theoretical principles and concepts of linguistic analysis, specifically phonology, morphology, syntax, and semantics as applied to written and oral texts.

### **Field Methods in Linguistics (LIN 4162) 3 credits**

*Prerequisite: LIN 3010 or permission of instructor*

Introduction to linguistic fieldwork. Collection and analysis of language data from speakers of under-described languages.

### **Phonetics and Phonology (LIN 4326) 3 credits**

*Prerequisite: LIN 3010 or permission of instructor*

Introduction to the physical properties of speech sounds and the patterning of sounds in the world's languages. Training in phonetic transcription and instrumental analysis of speech. Hypothesis testing in formal phonological frameworks.

### **Morphology and Syntax (LIN 4430) 3 credits**

*Prerequisite: LIN 3010*

Introduces students to basic concepts and issues in current morphological and syntactic theory. Focuses on knowledge of the structure of words, phrases and sentences, how such knowledge may be represented and what it reveals about the nature of human language.

### **Sociolinguistics (LIN 4600) 3 credits**

An introduction to the study of language and linguistic behavior as influenced by social and cultural factors.

### **Bilingualism (LIN 4620) 3 credits**

*Prerequisite: LIN 3010 or permission of instructor*

Language and cognition, language acquisition in the bilingual child, bilingual influences upon learning, the psychological and sociocultural aspects of bilingualism, especially in Spanish-English speaking communities.

### **Research Methods in Linguistics (LIN 4630) 3 credits**

*Prerequisite: LIN 3010 or permission of instructor*

Introduction to conducting, writing and presenting linguistic research.

### **Psycholinguistics (LIN 4701) 3 credits**

*Prerequisite: LIN 3010 or permission of instructor*

Psychology of language and communication; mechanics of language learning in relation to behavior and thinking.

### **Semantics and Pragmatics (LIN 4802) 3 credits**

*Prerequisite: LIN 3010 or permission of instructor*

An introduction to the basic approaches to the study of semantics and pragmatics. Includes fundamental notions of word meanings (lexical semantics), sentence meaning, logic and pragmatics.

### **Introduction to Semiotics (LIN 4810) 3 credits**

Why do people smoke? Why do women wear high heels? This course is intended to introduce students of all backgrounds to basic semiotic concepts and techniques of semiotic analysis.

### **Directed Independent Study (LIN 4905) 1-3 credits**

*Prerequisite: LIN 3010 or permission of instructor*

Reading and research in advanced subjects in Linguistics. For third- and fourth-year students in good standing only, with the program of study prearranged in consultation with instructor.

### **Special Topics (LIN 4930) 1-3 credits**

*Prerequisite: LIN 3010 or permission of instructor*

Intensive study of special topics in linguistics, such as the history and dialectology of a language, experimental phonetics, and trends in morphology and syntax. Since content will vary, course may be repeated for credit.

### **Honors Thesis in Linguistics (LIN 4972) 1-3 credits**

*Prerequisite: Permission of instructor*

Intense reading and writing leading to completion of an honors thesis on a topic related to linguistics.

### **University Honors Seminar in Literature (LIT 1930) 3 credits**

*Writing Across Curriculum (Gordon Rule)*

A seminar in the University Honors Program on topics in literature.

### **Introduction to World Literature (LIT 2100) 3 credits**

1930

A variable topics course focusing on perennial aspects of human experience through the comparative study of world literature. This is a General Education course.

### **Introduction to Comparative Literature (LIT 3060) 3 credits**

*Prerequisite: LIT 2100 or permission of instructor*

This course lays the foundation for the study of comparative approaches to literature and culture.

### **New Testament (LIT 3374) 3 credits**

An historical and literary approach to the Bible text and the methods modern scholars use to understand it. Covers the content and historical setting of the New Testament in Jewish and Greco-Roman culture, as well as the style and genre of different books.

### **Comparative Literature (LIT 4061) 3 credits**

*Prerequisite: Reading knowledge of French, German, Italian, or Spanish*

Selected topics requiring investigation of related literary and intellectual movements across national boundaries, with particular attention to writers of international significance.

### **Comparative Renaissance Studies (LIT 4250) 3 credits**

*Prerequisite: Reading knowledge of French, German, Italian, or Spanish*

Comparative Renaissance literature from Italian beginnings through Montaigne, with special attention to the role of humanism and to new narrative genres.

### **Comparative European Romanticism (LIT 4604) 3 credits**

*Prerequisite: Reading knowledge of French, German, Italian, or Spanish*

Romanticism as a European movement. Study of representative poetry and prose in French, German, and English literatures with emphasis on literary and intellectual relations. Readings in Rousseau, Goethe, Novalis, Chateaubriand, Coleridge, Wordsworth, Keats, Mary Shelley, Eichendorff, Lamartine, Hugo.

### **Special Topics (LIT 4930) 3 credits**

Specialized aspects of literature. May be repeated for credit.

### **Beginning Spanish Language and Culture 1 (SPN 1120) 4 credits**

Beginning study of Spanish language and culture. For students with little or no experience in the language. Not open to native speakers or the equivalent, who may substitute it with SPN 1340. Credit may not be awarded for SPN 1120 and SPN 1340.

### **Beginning Spanish Language and Culture 2 (SPN 1121) 4 credits**

Emphasis on speaking and aural comprehension. Practice in reading and writing. For students with some experience in the language. Not open to native speakers or equivalent, who may substitute it with SPN 1340. Credit may not be awarded for SPN 1121 and SPN 1340.

### **Beginning Spanish for Heritage Learners (SPN 1340) 4 credits**

For students who can understand casual spoken Spanish and have very limited speaking ability. Emphasis is placed on practicing basic grammatical structures, building vocabulary and developing or recovering initial oral, reading and writing skills while increasing awareness of Hispanic cultures and their diversity. Fulfills foreign language requirement.

### **Spanish for Careers (SPN 2161) 3 credits**

*Prerequisite: Placement test with a passing score (The test needs to be taken only once at FAU.)*

A variable topic course focusing on vocabulary and grammar to complete the basic and task-based practical skills for different careers. Knowledge of basic Spanish is a prerequisite. May be repeated for a maximum of 6 credits.

### **Spanish for Healthcare Professions (SPN 2162) 3 credits**

*Prerequisite: SPN 1121 or permission of instructor*

This course is for healthcare profession students with knowledge of basic Spanish. Emphasis is placed on the vocabulary needed for the workplace, the grammar to complete the basic skills sequence and task-based practical skills while fortifying critical awareness of Hispanic historical and cultural contexts.

### **Intermediate Spanish Language and Culture 1 (SPN 2220) 4 credits**

*Prerequisite: Placement test with a passing score (The test needs to be taken only once at FAU.)*

Emphasis on communication skills and grammar. Not open to native speakers or equivalent, who may substitute it with SPN 2341. Credit may not be awarded for SPN 2220 and SPN 2341.

### **Intermediate Spanish Language and Culture 2 (SPN 2221) 4 credits**

*Prerequisite: Placement test with a passing score (The test needs to be taken only once at FAU.)*

Continuation of emphasis on communication skills, with special attention to grammar review. Not open to native speakers or equivalent, who may substitute it with SPN 2341. Credit may not be awarded for SPN 2221 and SPN 2341. This is an Academic Service Learning (ASL) course.

### **Intermediate Spanish Conversation (SPN 2240) 3 credits**

*Prerequisite: Placement test with a passing score (The test needs to be taken only once at FAU.)*

Emphasis on aural comprehension and speaking facility, practice using topical materials. Not open to

students who have completed SPN 2221 or native speakers or equivalent.

### **Intermediate Spanish for Heritage Learners (SPN 2341) 4 credits**

*Prerequisite: Placement test with a passing score (The test needs to be taken only once at FAU.)*

For students who can understand casual spoken Spanish and have somewhat limited ability in speaking. Emphasis is placed on intermediate-level grammatical structures, building vocabulary, developing intermediate-level oral, reading and writing skills while increasing awareness of Hispanic cultures and their diversity. Fulfills foreign language requirement.

### **Spanish Language and Culture Study Abroad (SPN 2952) 1-6 credits**

*Prerequisite: Sophomore standing*

Credit for enrollment in approved study abroad programs.

### **Advanced Spanish for Heritage Learners (SPN 3343) 4 credits**

*Prerequisite: Placement test with a passing score (The test needs to be taken only once at FAU.)*

For students who have already taken SPN 2341 or who have studied Spanish at an intermediate level and have functional abilities in understanding and speaking Spanish. Emphasis is placed on consolidating grammatical structures, vocabulary, oral reading and writing skills while increasing awareness of Hispanic cultures and their diversity. Fulfills foreign language requirement.

### **Advanced Spanish: Conversation (SPN 3400) 4 credits**

*Prerequisite: Placement test with a passing score (The test needs to be taken only once at FAU.)*

Intensive review of advanced grammar through written work and conversation. Students learn how to express themselves in writing and orally, using literary texts. SPN 3400 is not open to native speakers or heritage speakers (who may substitute SPN 2341 or SPN 3343, depending on ability). Credit may not be awarded for SPN 3400 and SPN 3343.

### **Advanced Spanish: Conversation (SPN 3410) 3 credits**

*Prerequisite: Placement test with a passing score (The test needs to be taken only once at FAU.)*

An advanced conversation class designed to develop students' ability to communicate more fluently in Spanish and discuss a wide variety of cultural topics relating to Spain and Latin America.

### **Introduction to Creative Writing in Spanish (SPN 3435) 3 credits**

*Prerequisites: SPN 3343 and SPN 3400, or permission of instructor*

This course provides a general overview of prominent ideas about the creative process in the Hispanic world and, through workshops, ample guided opportunities for the development of students' command of effective written expression in Spanish, with emphasis on prose (non/fiction) and poetry.

### **Commercial Spanish 1 (SPN 3440) 3 credits**

*Prerequisites: Placement test with a passing score (The test needs to be taken only once at FAU.)*

Fundamentals of commercial and administrative Spanish usage and correspondence. Introduction to relevant aspects of Spanish and Latin American commerce.

### **Commercial Spanish 2 (SPN 3441) 3 credits**

*Prerequisites: SPN 2221 or SPN 2341 or SPN 3343 or permission of instructor*

Fundamentals of commercial and administrative Spanish usage and correspondence. Introduction to relevant aspects of Spanish and Latin American commerce.

### **Spanish Peninsular Culture and Civilization (SPN 3500) 3 credits**

*Prerequisite: SPN 2161 or SPN 2221 or or SPN 2341 or equivalent or permission of instructor*

The aim of this course is to promote the knowledge and understanding of Spanish culture and civilization by presenting and investigating the origin and development of the ideas, behavior, and customs of the Iberian peninsula.

### **Latin American Culture and Civilization (SPN 3501) 3 credits**

*Prerequisite: SPN 2161 or SPN 2221 or SPN 2341 or equivalent or permission of instructor*

The aim of this course is to promote the knowledge and understanding of Latin American culture and civilization by presenting and investigating the origin and development of Latin American ideas, behavior, and customs.

### **Spanish Culture Study Abroad (SPN 3952) 1-6 credits**

*Prerequisite: Sophomore standing*

Credit for enrollment in approved study abroad programs.

### **Spanish Sociolinguistics (SPN 4740) 3 credits**

*Prerequisites: SPN 3400 or SPN 3343 or permission of instructor*

This course is an introduction to the field of Spanish sociolinguistics. It covers such topics as social stratification in language, social and dialectal variants, language and gender, diglossia, code-switching, Spanish in the U.S., and bilingualism in Spanish-speaking countries.

### **Spanish Phonetics and Phonology (SPN 4790) 3 credits**

*Prerequisites: SPN 3400 or SPN 3343 or permission of instructor*

An introduction to the study of Spanish phonology and dialectology. Detailed analysis of the sound system and the phonological processes of Spanish with a dialectology component.

### **Structure of Modern Spanish (SPN 4850) 3 credits**

*Prerequisites: SPN 3400 or SPN 3343 or permission of instructor*

Analysis of the structure of Spanish including phonology, morphology, syntax, and semantics.  
Systematic comparison with English.

### **Special Topics in Spanish Language Studies (SPN 4930) 1-3 credits**

*Prerequisite: SPN 3400 or equivalent or SPN 3343*

Intensive study of aspects of the Spanish language. Since content will vary, course may be repeated for credit.

### **Internship in Applied Spanish (SPN 4942) 1-6 credits**

*Prerequisites: SPN 3400 or SPN 3343, and permission of Spanish advisor*

Interns work in a University-approved international or national organization related to the Spanish-speaking community and a chosen academic field, gaining critical experience in community organization, local politics, social services, translation, education, or journalism. This internship is unique because students work in the target language.

### **Spanish Language and Culture Study Abroad (SPN 4957) 1-6 credits**

*Prerequisite: Sophomore standing*

Credit for enrollment in approved study abroad programs. Since the content may vary, the course may be repeated for credit.

### **Spanish Culture Study Abroad (in Translation) (SPT 3956) 1-6 credits**

*Prerequisite: Sophomore standing*

Credit for enrollment in approved study abroad programs.

### **Latin American Literature in Translation (SPT 4130) 3 credits**

The whole range of Latin American literature, from the conquest to the present. Emphasis will be placed on the role of literature in the culture. Course and readings are in English.

### **Spanish Literature and Film (SPT 4720) 3 credits**

Study of literary and cinematographic technique in Spanish films from the 1920s to the present.

### **Spanish Translation (SPT 4800) 3 credits**

*Prerequisites: SPN 3400 or SPN 3343, or permission of instructor*

Development of specialized translation skills, with work on literary, scientific, commercial, legal and general topics. Open to native and non-native speakers of Spanish in all majors who already possess a high degree of fluency in both English and Spanish.

### **Spanish Language and Culture Study Abroad (SPT 4957) 1-6 credits**

*Prerequisite: Sophomore standing*

Credit for enrollment in approved study abroad programs.

**Introduction to Peninsular Spanish Literature (SPW 3012) 3 credits**

*Prerequisite: SPN 3400 or SPN 3343 with minimum grades of "C" or permission of instructor*

Course assists students in developing critical reading, writing and thinking skills through close reading and analysis of prose, poetry, essay and drama selected from Peninsular Spanish literary texts.

**Introduction to Spanish American Literature (SPW 3021 ) 3 credits**

*Prerequisite: SPN 3400 or SPN 3343 with minimum grades of "C" or permission of instructor*

Course assists students in developing critical reading, writing and thinking skills through close reading and analysis of prose, poetry, essay and drama selected from Spanish American literary texts.

**Introduction to Hispanic Literature (SPW 3030) 3 credits**

*Prerequisite: SPN 3400 or SPN 3343 or permission of instructor*

A preparatory course for students intending to pursue studies in Hispanic literature. Selected readings will provide the basis for stylistic and textural analysis and understanding of the structure of literary works. The historical development of genre and the technical vocabulary necessary for critical analysis will also be included.

**Género Policiaco (SPW 4583) 3 credits**

*Prerequisites: SPN 3400 and SPN 3343 or permission of instructor*

Introduces the genre of crime fiction in the Hispanic world through a series of theoretical articles and films establishing a correlation between the genre's development in the respective countries and other literary manifestations worldwide.

**Directed Independent Study (SPW 4905) 1-3 credits**

*Prerequisite: Permission of instructor*

Reading and research in advanced subjects in Spanish. For third- and fourth-year students in good standing only, with the program of study arranged in consultation with instructor.

**Special Topics in Spanish or Latin American Literature (SPW 4930) 1-3 credits**

Intensive study of Spanish or Latin American authors, genres, or literary movements. Occasionally available in English for non-majors. Since content will vary each term, course may be repeated for credit.

**Spanish Literature Study Abroad (SPW 4957) 1-6 credits**

*Prerequisite: Sophomore standing*

Credit for enrollment in approved study abroad programs.

### **Honors Thesis in Spanish (SPW 4972) 1-3 credits**

*Prerequisite: Permission of instructor*

Intense reading and writing leading to completion of an honors thesis on a topic related to a theoretical or critical aspect of Peninsular or Latin American literature and/or culture.

### **Applied Linguistics and TESOL (TSL 4251) 3 credits**

Applying linguistics, psycholinguistics, and sociolinguistics to teaching English as a second language with emphasis on pronunciation, intonation, structural analysis, morphophonemics and decoding from print to sound.

## **Languages, Linguistics and Comparative Literature Graduate Courses**

Students should direct questions concerning the Advanced Competency Examination in the major language and placement in language courses to the Chair of the Department of Languages, Linguistics, and Comparative Literature.

### **Special Topics (FLE 5930) 3 credits**

Reading and research in advanced topics in foreign language teaching. Topics will vary. May be repeated for credit.

### **Research in Foreign Language Learning Theories (FLE 6892 ) 3 credits**

Overview of current research on second-language acquisition. Introduction to current language teaching methodologies and assessment of their practical relevance for the foreign-language classroom.

### **Foundations of Languages, Linguistics and Comparative Literature (FOL 6731C)**

*Prerequisite: Graduate standing in Languages, Linguistics and Comparative Literature or related fields*

Introduces students to major historical moments and current trends in language theory through examination of disciplinary traditions. Readings are seminal texts of recurrent interdisciplinary significance that characterize and compare major theoretical frameworks.

### **Advanced Research Methods in Languages, Linguistics and Comparative Literature (FOL 6885) 3 credits**

*Prerequisite: Graduate standing in Languages, Linguistics and Comparative Literature or related field*  
This topic-based advanced research methods course trains students in the use of a wide range of research tools in preparation for conceptualizing, conducting and analyzing a research project in the

chosen field of language study.

### **Readings in Languages and Linguistics (FOL 6900) 1-3 credits**

The course is designed to give graduate students a structured preparation of the reading list for their comprehensive written or oral examinations. May be repeated for credit. *Grading: S/U*

### **History and Theory of Translation (FOT 6807) 3 credits**

*Prerequisites: B.A. in literary or linguistic field or equivalent*

History and theory of translation in Europe and in the Americas beginning with the early Roman translators and continuing through Medieval, Renaissance, Neoclassical, Modernist, and Post-colonial theory and practice. The course poses questions about language and meaning, canon and culture, and cross-cultural communication.

### **Topics in Translation Studies (FOT 6930C) 3 credits**

One of the foundational courses in the translation track, this course covers a specific aspect of translation studies. The focus and content are variable. Potential topics include, but are not limited to, Post-colonial Theories of Translation, the Multilingual City, Self-Translation, Four Classics and Their Versions. May be repeated for credit once.

### **Reading for Research in French (FRE 5060) 3 credits**

Study of grammar and vocabulary needed to do basic research in French. Some previous study recommended but not required. Not open to majors. *Grading: S/U*

### **Structure of Modern French (FRE 6855) 3 credits**

*Prerequisite: For students enrolled in the master's program*

This course is devoted to the analysis of the linguistic structure of modern French, focusing on its main phonological, morphological, syntactic and semantic features.

### **Internship in French (FRE 6946) 3 credits**

*Prerequisite: Permission of instructor*

For the MAT in French, students are required to do an internship with a faculty member who is teaching FRW 3001, FRE 3400, FRE 3401 or FRE 3393. Students attend each class session and prepare/teach several classes over the course of the semester. Students also participate in the design, grading and evaluation of exams, term papers and other semestrial projects.

### **Master's Thesis (FRE 6971) 1-6 credits**

*Grading: S/U*

### **Histoire Littéraire (FRW 6105) 3 credits**

Course examines the French literary tradition as a whole, focusing on problems of interpretation and definition. Students read a wide variety of foundational texts from different time periods in conjunction with secondary critical studies to understand and call into question such long-established literary concepts such as period, genre, history, representation, and mode.

### **L'Auteur Médiéval (FRW 6418) 3 credits**

*Prerequisite: FOL 3880 or equivalent*

In-depth study of seminal medieval texts key to the formulation of medieval authorship. In addition to primary readings, students also read contemporary critical theory on authorship to gain a deeper understanding of how postmodern and medieval conceptions of authorship might converge or diverge.

### **French Caribbean Idea(l)s (FRW 6775) 3 credits**

*Prerequisite: For students enrolled in master's program*

This course explores recurring themes and ideological debates regarding identity formation (creolization, hybridity, sexuality, beliefs and gender) and the commodification of island culture in French Caribbean literature.

### **France in/and Algeria: (Contested) History, Conflictive Memor(y/ies), Literature and Culture (FRW 6776) 3 credits**

*Prerequisite: For Languages, Linguistics and Comparative Literature majors only*

This course is designed to explore the history of France and Algeria and France in Algeria as represented in literary and cinematic production. Through novels, memoirs, essays, graphic novels and films, the course examines the evolution of the French representations of Algeria. It also explores the reasons that led to the suppression of this chapter of history for almost three decades in France. Course conducted in French.

### **Master's Thesis (FRW 6971) 1-6 credits**

*Prerequisite: Permission of instructor*

Independent reading and research in preparation of a master's thesis. *Grading: S/U*

### **Directed Independent Study (FRW 6908) 1-3 credits**

Independent reading and research in advanced topics and by permission of the instructor only. The program of study is arranged in consultation with instructor during the term prior to the student's taking the course.

### **Seminar in French and Francophone Literature (FRW 6938) 3 credits**

Topics will vary. May be repeated for credit.

### **Reading for Research in German (GER 5060) 3 credits**

Study of grammar and vocabulary needed to do basic research in German. Some previous study recommended but not required. Not open to majors. *Grading: S/U*

### **Master's Thesis (GER 6971) 1-6 credits**

### **Directed Independent Study (GEW 6908) 1-3 credits**

Independent reading and research in advanced topics and by permission of the instructor only. The program of study is arranged in consultation with the instructor during the term prior to the student taking the course.

### **Seminar in German Literature (GEW 6938) 3 credits**

Topics will vary. May be repeated for credit.

### **Italian America: Translating Identities (ITT 6508) 3 credits**

This course delves into the complexities of the Italian-American world. Perhaps one of the most discussed hyphenated identities in the American melting pot, Italian-American culture presents an incredibly rich production in literature and film. This course takes advantage of multiple perspectives, starting from a historical and documentary background, passing through the imaginary and the literary world, and ending with indications of contemporary social and political activism. Knowledge of Italian is valued but not required.

### **Italian Culture through Film (ITT 6524) 3 credits**

*Prerequisite: Graduate standing or permission of instructor*

Course studies selected key events in recent Italian history through their reflections in film. Students “read” movies treating them as “history texts” and examples of historical emplotment, while furthering their knowledge of Italy’s recent past, between the nation’s unification and the “years of lead.”

### **Dante in the West (ITT 6601) 3 credits**

*Prerequisite: Graduate standing*

This course proposes a critical approach to the reception of Dante's works in general and the Divine Comedy in particular from the early 14th century until today and on both sides of the Atlantic. This course, taught in English, is aimed at shedding light on Dante scholarship in and outside of Italy by considering the reception of Dante in his own times and through the ages and by questioning the extent to which fictional representations and theoretical considerations of Dante's opus, especially but not only the Divine Comedy, have shaped Dante studies today.

### **Modern and Contemporary Italian Fiction (ITW 6485) 3 credits**

1940

*Prerequisite: Graduate standing*

This seminar provides readings and discussions of major Italian prose writers such as Calvino, Deluca, Eco, Levi, Maraini, Palazzeschi, Pasolini, Pirandello, Sciascia, and Vittorini. Topics will vary. May be repeated for credit.

**Directed Independent Study (ITW 6908) 1-3 credits**

Independent reading and research in advanced topics in Italian studies, arranged in consultation with and with permission of the instructor during the term prior to the student's taking the course.

**Seminar in Italian Literature (ITW 6938) 3 credits**

*Prerequisite: Graduate standing*

This is a special topics seminar in which specific themes are studied. Topics will vary. May be repeated for credit.

**Master's Thesis (ITW 6971) 1-6 credits**

*Prerequisite: Permission of Instructor*

Independent reading and research in advanced topics for the research and writing of a master's thesis in Comparative Literature with an emphasis in Italian. The program of study is arranged in consultation with the instructor during the term prior to the student taking the course.

**Endangered Languages (LIN 6086) 3 credits**

Course focuses on relevant topics in the study of endangered languages, including loss of biolinguistic diversity, language shift and decline, and language death, as well as language documentation and the efforts to maintain and revitalize these languages.

**Historical Linguistics (LIN 6128) 3 credits**

*Prerequisite: Graduate standing*

The different ways in which languages change and the insights, both linguistic and historical, that can be gained from understanding these processes. Examples will be drawn from a broad spectrum of languages.

**Principles of Linguistic Analysis (LIN 6135) 3 credits**

Course is an introduction to the core basics of linguistics and an apprenticeship to linguistic analysis for graduate students in their first semester of master's programs of study.

**Foundations of Linguistic Theory (LIN 6150) 3 credits**

This course is intended to introduce students of linguistics and neighboring disciplines to the major currents in linguistic theory. Beginning with a brief overview of the history of linguistics, the course

concentrates on seminal texts of recurrent interdisciplinary significance that characterize major theoretical frameworks.

### **Cognitive Linguistics (LIN 6156) 3 credits**

*Prerequisite: Graduate standing*

This course is a graduate introduction to the fundamental concepts and theories of cognitive linguistics. Students learn key notions in the field, while at the same time gain an awareness of how these conceptual tools are employed in the analysis of a wide range of linguistic phenomena.

### **Field Methods (LIN 6165) 3 credits**

Graduate introduction to linguistic fieldwork. Collection and analysis of language data from speakers of under-described languages.

### **Phonetics (LIN 6225) 3 credits**

Graduate introduction to phonetics. Articulation and transmission of speech sounds, connected speech processes, transcription and acoustic measurements. Collection and analysis of phonetic data.

### **Phonology (LIN 6323) 3 credits**

Graduate introduction to phonology. Fundamental phonological concepts and theories. Analysis of phonological data.

### **Morphology (LIN 6402) 3 credits**

Graduate introduction to morphology. Word structure, data analysis, typology and the role of morphology in the mental grammar.

### **Syntax (LIN 6513) 3 credits**

Graduate introduction to syntax. Sentence structure, typology, syntactic theory and the application of theory to data analysis.

### **Sociolinguistics (LIN 6601) 3 credits**

A seminar on sociolinguistics with particular emphasis on an examination of the history, structure (sounds, grammar, and vocabulary), and educational implications of Black English, also known as African American Vernacular English (AAVE).

### **Bilingualism (LIN 6622) 3 credits**

*Prerequisite: LIN 3010 or permission of instructor*

Course constitutes a graduate introduction to the field of bilingualism. Topics such as language and cognition, language acquisition in the bilingual child, and bilingual education will be covered. A range of other issues that relate to bilingual/multilingual contexts provides a multifaceted background for the

course.

### **Grammaticalization (LIN 6674) 3 credits**

*Prerequisite: Graduate standing or permission of instructor*

Course constitutes a graduate introduction to the fundamental concepts of grammaticalization. Students learn the key notions in the field while gaining an overall understanding of the nature of grammatical change, in particular, and language change, in general.

### **Psycholinguistics (LIN 6707) 3 credits**

*Prerequisite: LIN 6135 or permission of instructor*

Graduate introduction to how the mind and the brain process language, including production and perception of spoken and written language, lexical access, sentence processing and language acquisition. Design and implementation of a pilot experiment.

### **Second Language Acquisition (LIN 6720) 3 credits**

*Prerequisite: LIN 3010 or permission of instructor*

A survey of theoretical models of communicative competence and second-language acquisition and a discussion of the practical implications of these models for instruction and assessment, including the application of course concepts to authentic second/foreign language data.

### **Directed Independent Study (LIN 6908) 1-4 credits**

Independent reading and research in advanced topics and by permission of the instructor only. The program of study is arranged in consultation with the instructor during the term prior to the student taking the course.

### **Seminar in Linguistics (LIN 6938) 2-4 credits**

Topics will vary. May be repeated for credit.

### **Master's Thesis (LIN 6971) 1-6 credits**

*Grading: S/U*

### **Seminar in Literature (LIT 5937) 3 credits**

*Prerequisite: Permission of instructor*

Intensive study of a period, movement, or major literary figures. Research paper is required. The course may be repeated for credit.

### **Introduction to the Comparative Study of Literature (LIT 6066) 3 credits**

*Prerequisites: B.A. degree and reading-level second language*

An introduction to the comparative study of literary phenomena (genres, themes, movements, and periods) from the perspective of Continental, English, and American literatures, including translation theory and analysis.

**Special Topics (LIT 6934) 3 credits**

Specialized aspects of literature. May be repeated for credit.

**Master's Thesis (LIT 6971) 1-6 credits**

**Reading for Research in Spanish (SPN 5060) 3 credits**

Study of grammar and vocabulary needed to do basic research in Spanish. Some previous study recommended but not required. Not open to majors. *Grading: S/U*

**Structure of Modern Spanish (SPN 6655) 3 credits**

*Prerequisites: Graduate standing; SPN 3343 or SPN 3400 or permission of instructor*

Course is devoted to the analysis of the linguistic structure of modern Spanish, focusing on its main phonological, morphological, syntactic and semantic features.

**Spanish Phonetics and Phonology (SPN 6795) 3 credits**

*Prerequisites: Graduate standing or permission of instructor; SPN 3400 and LIN 3010*

A graduate introduction to the study of Spanish phonology and dialectology. Detailed analysis of the sound system and the phonological processes of Spanish with a dialectology component.

**History and Dialectology of Spanish (SPN 6835) 3 credits**

*Prerequisite: SPN 3400 or equivalent; LIN 3010 strongly recommended*

Linguistic development of Spanish from Latin to the present. Attention to changes taking place in present-day language.

**Directed Independent Study (SPN 6908) 1-3 credits**

*Prerequisite: Permission of instructor*

Independent reading and research in advanced topics related to teaching the Spanish language. The program of study is arranged in consultation with the instructor during the term prior to the student taking the course.

**Internship in Spanish (SPN 6946) 3 credits**

*Prerequisite: Permission of Instructor*

For the M.A.T. in Spanish, students are required to do an internship with a faculty member who is teaching any of the 3000-level courses on language and culture or introduction to literature. Students attend the class every day and prepare for and teach several classes during the semester. In addition,

students participate in the design and grading of exams, evaluations of term papers and other projects.

**Master's Thesis (SPN 6971) 1-6 credits**

*Grading: S/U*

**Mexican Literature and Film (SPT 6545) 3 credits**

*Prerequisite: For Languages, Linguistics and Comparative Literature students only*

This seminar explores the ways in which authors and film makers depict Mexican culture and history from the 1950s to the present. The course focuses on Mexican fiction and films that reflect the impact of contemporary Mexican events. It also investigates how a new generation of artists has created new approaches and techniques to interpret their present reality.

**Seminar in Colonial Spanish-American Literature (SPW 6135) 3 credits**

*Prerequisite: Graduate standing in Department of Languages, Linguistics, and Comparative Literature*

An introduction to colonial Spanish-American literature from the initial encounter through the independence period. A selection of representative texts from multiple genres and perspectives will be read and discussed.

**Latin American Women Writers (SPW 6206) 3 credits**

Study and discussion of representative works by Latin American women writers of the 20th century, with emphasis upon Rosario Castellanos, Isabel Allende, Rosario Ferré, Elena Garro, Elena Poniatowska.

**20th-Century Latin American Theatre (SPW 6306) 3 credits**

The study and analysis of representative plays by contemporary 20th-century Latin American writers.

**Latin American Poetry (SPW 6356) 3 credits**

The analysis and criticism of Spanish-American poetry. The topic of the course will vary, dealing usually with one author or period.

**The Latin American Short Story (SPW 6375) 3 credits**

Reading and discussion of representative short stories by Latin American writers from 1839 to the present, with analysis of Romanticist, Indianist, and Modernist writings including texts by Ruben Darío, Jorge Luis Borges, Rosario Castellanos, Alejo Carpentier, Luisa Valenzuela, and several others.

**Building a National Literature from the Middle Ages (SPW 6405) 3 credits**

*Prerequisite: Permission of instructor*

A study of the historical events, culture and representative literary works from the Middle Ages from

the perspective of a national literature and nation building and the birth of literary genres. The selection of works may vary. It may include Jewish and Muslim texts, extend to the Renaissance and Baroque or involve a comparison with works from another period.

### **Spanish Golden Age Literature (SPW 6427) 3 credits**

*Prerequisites: SPW 3012 or SPW 3021*

Analysis of the culture and literary trends during the Renaissance and the Baroque through reading of prose, poetry and drama.

### **Cultural Objects in the Golden Age (SPW 6429) 3 credits**

*Prerequisite: Graduate standing*

This course is an exploration of early modernity and its changes through the lenses of its writers. It is approached through the perspective of New Historicism and Material Culture and focuses on cultural objects in literary texts and daily life (i.e., chocolate, clothing, architecture).

### **Spanish Caribbean Idea(s) (SPW 6775) 3 credits**

*Prerequisite: For students enrolled in the master's program*

This course explores recurring themes and ideological debates regarding identity formation (creolization, hybridity, sexuality, beliefs and gender) and the commodification of island culture in Spanish Caribbean literature.

### **African Diaspora in Latin America: Literature and Culture (SPW 6777) 3 credits**

*Prerequisite: Graduate standing*

This course provides a study of cultural and historical experiences of Afro-descendants from the period of the transatlantic slave trade to contemporary political movements in Latin America and the Caribbean. It emphasizes their contributions to the development of their countries and to the configuration of a transnational diasporic identity. The course is taught in Spanish.

### **Introduction of Literary Theory and the Hispanic Tradition (SPW 6826) 3 credits**

*Prerequisite: Graduate standing in Department of Languages, Linguistics, and Comparative Literature*

Introductory seminar on general literary theory as well as specific theoretical texts from Latin America and Spain. Taught in Spanish, the course surveys the most important critical theories of the 20th century, with emphasis on Hispanic contributions.

### **Directed Independent Study (SPW 6908) 1-3 credits**

Independent reading and research in advanced topics and by permission of the instructor only. The program of study is arranged in consultation with the instructor during the term prior to the student taking the course.

### **Seminar in Spanish Literature (SPW 6938) 3 credits**

Topics will vary. May be repeated for credit.

### **Special Topics in Spanish-American Literature (SPW 6939) 3 credits**

Topics will vary. May be repeated for credit.

### **Master's Thesis (SPW 6971) 1-6 credits**

*Prerequisite: Permission of Instructor*

Independent reading and research in preparation for a master's thesis.

### **Applied Linguistics and TESOL (TSL 6253) 3 credits**

This course is designed to provide an overview of the field for applied linguistics, psycholinguistics and sociolinguistics to teaching English as a second language. Emphasis is on pronunciation, intonation, structural analysis, morphophonemics and decoding from print to sound.

### **Music Courses**

(Listed following the **Women, Gender and Sexuality Studies** courses, under **School of the Arts, Music** )

## PHILOSOPHY

### **Undergraduate Courses/ [link to graduate courses](#)**

#### **Ancient Philosophy (PHH 3100) 3 credits**

Major philosophers and movements from the pre-Socratics to Augustine, with primary attention to Plato, Aristotle and Augustine.

#### **Medieval and Renaissance Philosophy (PHH 3280) 3 credits**

A careful and in-depth examination of the philosophers of the medieval period and of the 14th to 16th centuries. The course may include the reading of original texts, secondary sources, or both. Special attention is paid to metaphysics, logic, ethics, and political philosophy.

#### **Early Modern Philosophy (PHH 3420) 3 credits**

An in-depth study of major European philosophers of the 17th and 18th centuries, with emphasis on the Rationalists and the Empiricists. The course focuses on contributions to metaphysics and epistemology.

### **Pragmatism (PHH 3703) 3 credits**

A careful, in-depth inquiry into the American philosophical movement known as pragmatism. Special emphasis is placed on the contributions of Charles Sanders Peirce, William James and John Dewey, on the world-wide impact of their ideas and their influence on contemporary philosophy.

### **Late Modern Philosophy (PHH 4440) 3 credits**

*Prerequisite: PHH 3420 or permission of instructor*

An in-depth study of major 18th and 19th century European philosophers, with an emphasis on Kant and Hegel, though other philosophers may also be covered. The course focuses on contributions to metaphysics, epistemology, ethics and social and political philosophy.

### **University Honors Seminar in Philosophy (PHI 1930) 3 credits**

*Writing Across Curriculum (Gordon Rule)*

A seminar in the University Honors Program on topics in philosophy.

### **Introduction to Philosophy (PHI 2010) 3 credits**

*Writing Across Curriculum (Gordon Rule)*

*Prerequisites: ENC 1101 and [ENC 1102](#) or *substitute* with grades of "C" or better*

In this course, students will be introduced to the nature of philosophy, philosophical thinking, major intellectual movements in the history of philosophy, including topics from the western philosophical tradition, and various problems in philosophy. Students will strengthen their intellectual skills, become more effective learners, and develop broad foundational knowledge. This is a General Education course.

### **Critical Thinking (PHI 2100) 3 credits**

This course is designed to strengthen students' critical thinking skills by teaching them to distinguish between well-supported and poorly supported arguments, to understand the nature of assumptions and the importance of providing evidence to support one's conclusions, and to recognize and avoid reasoning errors and argumentative fallacies.

### **Logic (PHI 2102) 3 credits**

*Gordon Rule, computational*

This course is an in-depth study of deductive syllogistic logic and of the symbolization techniques of propositional logic, which capture the formal features of simple declarative propositions and of arguments constructed from such propositions. The course also examines the principles of truth-functional logic and applies these principles to the construction of truth-tables for propositions and arguments. This is a General Education course.

### **Artificial Intelligence and Ethics (PHI 2680) 3 credits**

This course surveys the ethical entailments of artificial intelligence (AI), including the moral status of intelligent machines, the impact of AI on employment, autonomous warfare, and biases in design and application of these emerging technologies.

### **Philosophy Study Abroad (PHI 2952) 1-6 credits**

*Prerequisite: Sophomore standing*

Credit for enrollment in approved study abroad programs.

### **Philosophy of Mind (PHI 3320) 3 credits**

This course engages in a careful and in-depth study of some of the major issues and problems in the philosophy of mind, through the reading of original texts and/or secondary sources. The topics examined include, but are not limited to, the mind/body problem, the nature of consciousness, and the problem of personal identity.

### **Philosophy of Psychiatry (PHI 3453) 3 credits**

This course offers an overview of the central issues in the philosophy of psychiatry, such as the notion of the unconscious, responsibility for actions, the concept of the self presupposed by different psychotherapeutic models, and the relation between psychiatric diagnosis and culture, and will consider whether society creates, constructs, or encourages certain pathologies of the soul.

### **Philosophy of Medicine (PHI 3456) 3 credits**

Examines problems in the philosophy of medicine, an interdisciplinary area that includes such issues as the logic of diagnosis, the nature of sound clinical judgment, the reality of disease entities, culture and medical practices, alternative versus traditional medicine, the concept of health and selected bioethical issues.

### **Moral Problems (PHI 3638) 3 credits**

Examines moral problems of contemporary importance, such as animal rights, censorship, a patient's right to die, physician-assisted suicide, morality in war and human enhancement. Introduces students to the standard ethical theories that form the foundation of moral deliberation about these issues.

### **Environmental Ethics (PHI 3640) 3 credits**

Study of contemporary environmental philosophy and ethical principles and practical issues related to the natural environment.

### **Philosophy of Literature (PHI 3882) 3 credits**

A systematic introduction to the philosophy of literature through a study of both philosophical and

literary texts. Students will read authors such as Aristotle, Kafka, Freud, Wittgenstein, and Shakespeare.

### **Symbolic Logic (PHI 4134) 3 credits**

*Prerequisites: PHI 2102 with grade of "B" or higher or permission of instructor*

This course begins by studying the principles of symbolization and natural deduction for formal proofs in propositional logic. The course then advances to quantification theory and to the symbolization techniques of the monadic and the polyadic predicate calculi. The principles of natural deduction are then applied in the construction of formal proofs in first-order and second-order predicate logic.

### **Philosophy of Science (PHI 4400) 3 credits**

An examination of the central concepts of the theory of knowledge within the context of scientific investigation; the nature and structure of scientific knowledge, the nature of formal reasoning, the role of observation, the function of models, the nature of perception, scientific explanation, scientific truth, probabilistic and inductive inference and the nature of causal laws.

### **Philosophy of the Human and Social Science (PHI 4420) 3 credits**

The course introduces students to the philosophical foundations (epistemology) of the human and social sciences and explores many of the methodological issues and problems resulting therefrom.

### **Biomedical Ethics (PHI 4633) 3 credits**

An in-depth philosophical study of the ethical issues arising from the practice of medicine, emphasizing the four principles of medical ethics (autonomy, nonmaleficence, beneficence and justice) and how to apply these principles to standard case studies in the field. This is an Academic Service Learning (ASL) course.

### **RI: Biomedical Ethics (PHI 4633) 3 credits**

A careful and in-depth philosophical study of the ethical issues arising from the practice of medicine. The course emphasizes the four principles of medical ethics and how these principles can be applied to resolve standard case studies in the field of biomedical ethics. This is a Research-Intensive (RI) course and an Academic Service Learning (ASL) course.

### **Ethical Theory (PHI 4661) 3 credits**

Analysis of moral judgment and moral reasoning. Evaluation of ethical theories, with particular attention to utilitarian, Kantian and 20th-century theories. Study of the application of various ethical approaches to contemporary social problems.

### **Philosophy of Religion (PHI 4700) 3 credits**

Inquiry into classical and contemporary questions regarding the nature and existence of God, religious knowledge and experience, and the language and symbolism of religion.

### **Aesthetics and Art Theory (PHI 4800) 3 credits**

Provides the student with a greater understanding of the arts in personal life and society through knowledge of critical theory and philosophical views of the arts. The main topics discussed will be the nature of art; form, representation, and expression in art; criticism of the arts; and aesthetic experience and value.

### **Directed Independent Study (PHI 4905) 1-4 credits**

*Prerequisites: Permission of instructor and Department Chair*

Readings and research in selected issues of philosophy, with a program of study selected in consultation with Departmental faculty.

### **Special Topics (PHI 4930) 1-4 credits**

The study of a special area in philosophy. Topics will vary. May be repeated for credit.

### **Senior Seminar in Philosophy (PHI 4938) 3 credits**

*Prerequisite: Senior standing or permission of Department Chair*

A writing-intensive, variable topic philosophy course requiring students to write between one and three substantial paper and to read these papers in class. The course is required of all Philosophy majors and must be taken during the fall semester of the senior year. The course is open to Philosophy minors in their senior year by permission of Department Chair.

### **Philosophy Study Abroad (PHI 4957) 1-6 credits**

*Prerequisite: Sophomore standing*

Credit for enrollment in approved study abroad programs.

### **Honors Thesis in Philosophy (PHI 4972) 3 credits**

*Prerequisites: PHI 4938 with a minimum grade of "B," 3.5 GPA in major and 3.5 GPA overall; permission of department*

Capstone requirement for the Honors Program in Philosophy. Research and completion of a substantial honors thesis, under the supervision of a faculty advisor. The honors thesis will focus on a subject area of philosophy (epistemology, ethics, aesthetics, logic, etc.) or a particular philosopher. Upon completion, the honors thesis must be defended in front of a department faculty committee.

### **Philosophy of Sexuality (PHM 3020) 3 credits**

The course explores questions in the philosophy of sexuality that include, but are not limited to, the

relation between sex and love, the question of human agency and identity and social policies regarding intimate relations. Among the many timely issues addressed are questions regarding the nature of censorship, what constitutes pornography and the moral dimension of internet and other unconventional sexual relationships.

### **Feminist Philosophy (PHM 3123) 3 credits**

This course critically examines philosophy itself, its history, methods and categories of thought from a liberationist perspective. The course will introduce students to selected critical works by feminist philosophers and will study core conceptual constellations, such as reason-objectivity-impartiality and sexism-oppression-exclusion. May be taken for credit toward the Women's Studies Program.

### **Social and Political Philosophy (PHM 3200) 3 credits**

An examination of major social and political theorists since the 17th century. Approximately ten thinkers are studied. Problems such as authority and legitimacy, freedom and control, sources of political obedience, and the ideal commonwealth are taken up.

### **Philosophy of Law (PHM 3400) 3 credits**

Provides an introduction to the kinds of theories that have dominated Anglo-American thinking about the nature, function, and point of law, while demonstrating the essential connections between jurisprudence and other areas of general philosophy, e.g., moral philosophy, philosophy of language, philosophy of mind, etc.

### **Philosophy of Technology (PHM 4223) 3 credits**

Examination of the nature of technology that reflects philosophically upon its impacts on the individual, and the social, cultural, work, and physical environments. Also examines the relationship between technology, human values and sociopolitical change and control.

### **Africana Philosophy (PHP 3781) 3 credits**

An examination of the concerns and aspirations of certain major philosophical thinkers in the African, African-American, and Afro-Caribbean traditions.

### **Post-Structuralism (PHP 3792) 3 credits**

Introduces students to the structuralist account of language and examines Hegel's holistic, Nietzsche's perspectivist, and Derrida's deconstructivist accounts. The course concludes with an examination of Foucault's application of poststructuralist accounts to an understanding of epistemology, power relations, and sexuality.

### **Phenomenology (PHP 4782) 3 credits**

A careful and in-depth examination of 20th-century phenomenology. The course may include the reading of original texts, secondary sources, or both. Special emphasis is placed on the study of Husserl, Heidegger, Merleau-Ponty, Sartre, and Beauvoir. Contemporary developments in phenomenology will also be examined.

### **Analytical Philosophy (PHP 4784) 3 credits**

A critical examination of 20th-century analytical philosophy. Analysis of logical atomism, logical positivism and ordinary language analysis is provided. Emphasis is placed on original writings of Frege, Peirce, Moore, Russell, Carnap, Ryle, Ayer, Strawson and Quine.

### **Existentialism (PHP 4786) 3 credits**

A careful and in-depth study of the 19th- and 20th-century existentialism. The course may include the reading of original texts, secondary sources, or both. Emphasis is placed on the varieties of existentialism represented by Kierkegaard, Nietzsche, Heidegger, Sartre, Camus, Fanon, and Beauvoir.

## **Philosophy Graduate Courses**

### **The Phenomenon of the Black Public Intellectual (PHI 6127) 3 credits**

Course focuses on several dominant themes constituting the Black intellectual tradition such as the nature and different styles of Black leadership, the role of Black creative intellectuals, the dialectics of race and gender regarding Black leadership, race and conservative Black intellectuals, scholarship and the politics of Black life.

### **Directed Independent Study (PHI 6905) 1-4 credits**

*Prerequisites: Permission of instructor and chair*

Readings and research on selected issues in philosophy, with a program of study selected in consultation with Departmental faculty.

### **Special Topics (PHI 6930) 1-3 credits**

*Prerequisite: Graduate standing in an M.A. or Ph.D. program*

The intensive study of a special area, problem, or figure in philosophy. Topics will vary. The course itself may be repeated for credit, but specific topics may not be repeated.

## **POLITICAL SCIENCE**

**Undergraduate Courses/ [link to graduate courses](#)**

### **Political Science Study Abroad (CPO 2952) 1-6 credits**

*Prerequisite: Sophomore standing*

Credit for enrollment in approved study abroad programs.

### **Comparative Politics (CPO 3003) 3 credits**

Examination of the methods of comparative political analysis, exploration of institutions and processes in cross-national perspective, and study of selected countries and regions.

### **Religions and World Politics (CPO 3761) 3 credits**

This course will discuss the rise of religious movements worldwide and the impact of religious conflicts on world politics.

### **Global Development and Inequality of Nations (CPO 4033) 3 credits**

Cross-cultural examination of political and economic development in the Third World. Students examine comparatively the evolution of state-society relations, with attention to gender relations, market forces, and public action in promoting or inhibiting development.

### **Comparative European Politics (CPO 4042) 3 credits**

*Prerequisite or Corequisite: CPO 3003*

The comparative study of political culture, institutions, political processes and change in major West European political systems and the European Union.

### **Political Violence and Revolutions (CPO 4057) 3 credits**

This course gives students an understanding of the forms, causes and consequences of revolution, ethnic conflict, terrorism and other types of civil violence in the third world. The course begins with a brief overview of the patterns of civil conflict over the last several decades followed by the major theoretical schools that have emerged to explain the phenomenon of civil war. The course concludes by exploring how civil wars end and analyzing the post-civil war era to understand the factors that influence the prospects for a sustainable peace.

### **Politics of the European Union (CPO 4101) 3 credits**

*Prerequisite or Corequisite: CPO 3003*

A comprehensive exploration of the politics of the European Union (EU), the main focus of this course is political institutions, issues, and processes of the EU, and how they have evolved since the end of the World War II. Students analyze treaties, policy-making and decision-making, enlargements, and institutions with particular attention to governance, legitimacy, and democracy.

### **African Politics (CPO 4204) 3 credits**

This course explores the interaction of local and global factors that have influenced the politics of communities, nation-states and regional organizations in Africa. The course balances the study of continent-wide trends and case study analysis of specific countries on the continent. Students study the politics of the precolonial, colonial and postcolonial era. The course probes the nature of political authority and citizen-states' relations in African countries. The course also covers the international dimensions of politics on the continent, including questions of development and western interventions.

### **Latin American Politics (CPO 4303) 3 credits**

The comparative study of politics in the Latin American region. Problems of democracy, military politics, and revolution and their relation to political development. May be used for credit in the Latin American certificate program.

### **Comparative Politics: Middle East (CPO 4403) 3 credits**

The course will explain the complex political process in the Middle East. Students will explore the historical background and current developments of the major sociopolitical trends.

### **Religion and Politics in the Middle East (CPO 4409) 3 credits**

What role does religion play in national identity formation, democratization or lack of it in the Middle East? Can religion serve as a source of conflict or can it be a positive force for political development? What explains different situations in Turkey, Iran, Egypt and Saudi Arabia, four key Muslim majority countries? Can Israel, as the only non-Muslim democracy in the region, serve as a role model for reconciling religion with democracy? What are the prospects for a religious reformation within Islam?

### **Comparative Islamist Movements (CPO 4424) 3 credits**

Examines the rise of the Islamist movements in Muslim countries with divergent historical, social and economic trajectories. Covers the origins and the rise of Islamist movements in Turkey, Jordan, Pakistan and Indonesia.

### **Comparative Politics: Russia and Eastern Europe (CPO 4633) 3 credits**

The comparative study of communist and post-communist regimes in countries of Eastern Europe and the former Soviet Union for advanced undergraduate students. Topics include the collapse of communism, the politics of transition and prospects for stability and democracy. Research project included.

### **The Comparative Politics of Ethnic Conflict (CPO 4724) 3 credits**

The objective of the course is to study the development of ethnic conflict, separatism, and identity issues, and their impact on world politics.

### **Special Topics (CPO 4932) 3 credits**

Selected topics in political science.

### **Political Science Study Abroad (CPO 4957) 1-6 credits**

*Prerequisite: Sophomore standing*

Credit for enrollment in approved study abroad programs.

### **Introduction to World Politics (INR 2002) 3 credits**

Introduces language and forms of politics in a variety of social, economic and national contexts and provides the foundation for understanding the structure and dynamics of the international political system. This is a General Education course.

### **American Foreign Policy (INR 3102) 3 credits**

An investigation of American foreign policy. The course is divided into three sections: 1) institutional framework; 2) post-WWII foreign policy; 3) post-cold war foreign policy.

### **International Law: Foundations and Institutions (INR 3403) 3 credits**

Provides an in-depth review and analysis of the major jurisprudence and institutional features of modern international law and explores the relationship between the principal actors in world politics (nation-states, international organizations, substate actors) and prevailing international law. The manner by which international law is created, modified and applied is examined, along with the violation of international law and its consequences.

### **International Law of Peace and Diplomacy (INR 3413) 3 credits**

Provides a general overview and detailed assessment of the laws that govern diplomatic relations among states and promote peace among nations. Students are introduced to the fields of human rights, diplomatic immunity, asylum, extradition, the law of the sea, air space law, outer space law, economic and environmental law.

### **International Law of Armed Conflict (INR 3433) 3 credits**

Covers legal avenues for the avoidance of armed conflict, the laws that regulate the right to go to war and the laws that regulate soldiers in the field. Additionally, the history of efforts to hold individuals accountable for violating the laws of armed conflict is examined and analyzed.

### **International Organization (INR 3502) 3 credits**

The course provides an overview of international organization in contemporary times with an emphasis on the United Nations system and its role in international affairs.

### **International Political Economy (INR 3702) 3 credits**

Examination of the modern international political economy. The course addresses various theories that explain the relationship between politics and economics.

### **War and Peace (INR 4006) 3 credits**

An examination of the causes of international behavior with special emphasis on conflict and cooperation.

### **Comparative Environmental Politics (INR 4054) 3 credits**

This course provides an overview of the key concepts and philosophical underpinnings grounded in political ecology, debates and issues in environmental politics. It examines structures, agents and processes affecting environmental politics at the local, national and international levels. This course does so by analyzing multilateral governance approaches, which largely rely on the authority of nation-states, as well as alternative arrangements that increasingly are initiated and led by non-state actors such as NGOs, corporations, local governments and communities. Case studies are utilized throughout.

### **The Politics of Human Rights (INR 4075) 3 credits**

This course provides an understanding of how and why human rights violations occur, and why attempts to protect human rights succeed or fail. The course introduces students to the historical foundations and practices of human rights.

### **The International System (INR 4081) 3 credits**

An examination of trends and transformations in world politics including great-power politics, foreign policy decision-making, democratization, economic globalization, global inequalities, ethnonationalistic groups and terrorism, population dynamics, the ecology of world politics and sustainable development, international law, international organizations, international diplomacy, and the global predicament at the dawn of the new millennium.

### **U.S. Politics of War (INR 4114) 3 credits**

This course acquaints students with the domestic, regional and international backgrounds against which the United States decides to pursue military power against other nations. It examines the reasons for going to war, public debates preceding and accompanying war, and the strategies and conduct of the U.S. military with the aim of provoking reflection on the U.S. politics of war. Cases studied vary by semester and instructor.

### **Global Environmental Politics and Policies (INR 4350) 3 credits**

The study of global environmental politics includes a variety of issues, problems, politics and policies relevant to population growth, resource degradation and the impacts of human economic development. Examines the development of environmental governance, environmental justice movements and efforts

to control consumption to enhance sustainability.

### **Advanced Diplomacy (INR 4503) 3 credits**

*Prerequisite: Permission of instructor*

Provides students with essential skills, techniques and strategies to compete in national and international diplomatic competitions. FAU delegations are assigned countries; student delegates are assigned to committees with specific topics. After completing rigorous diplomatic training through simulations and compiling an extensive portfolio that includes country data and topic information, students travel to compete in either the National Model United Nations simulation in New York or the Midwest Model European Union in Indianapolis. Course may be repeated up to three times.

### **Special Topics (INR 4932) 3 credits**

Selected topics in political theory.

### **University Honors Seminar in Political Science (POS 1930) 3 credits**

*Writing Across Curriculum (Gordon Rule)*

A seminar in the University Honors Program on topics in political science.

### **Government of the United States (POS 2041) 3 credits**

In this course, students will investigate how the national government is structured and how the American constitutional republic operates. It covers the philosophical and historical foundations of American government, including but not limited to the Declaration of Independence, the United States constitution and all its amendments, and The Federalist Papers. The course examines the branches of government and the government's laws, policies, and programs. It also examines the ways in which citizens participate in their government and ways their government responds to citizens. This is a General Education course that meets the state-mandated Civic Literacy requirement.

### **Introductory Topics in Political Science (POS 2934) 1-3 credits**

In-depth analysis of current and emergent issues in government and politics. Topics vary from semester to semester.

### **Issues in American Politics (POS 3033) 3 credits**

This course examines the critical issues facing the American political system and the ability of the system to resolve them.

### **Political Film and Fiction (POS 3258) 3 credits**

An exploration of important political concepts, themes, and questions through the study of film and fiction.

### **Political Marketing (POS 3270) 3 credits**

This course explores the approaches and techniques used by individuals and groups involved in American politics to win elections, "sell" policies and sway public opinion in their favor. Students learn the basic concepts of political marketing and understand how those concepts affect modern American politics in relation to candidates, campaigns and political parties.

### **Exploring Political Science (POS 3330) 3 credits**

*Prerequisite: For Political Science majors*

This course is designed to familiarize political science students with political science research. It introduces students to the various subfields of political science. Approaches to scientific inquiry within the field, as well as the fundamentals necessary to conduct initial research in the discipline are also covered. This course is required of all political science majors and must be completed within two semesters of declaring political science as their major.

### **Law and American Society (POS 3691) 3 credits**

An introductory course examining the cultural foundations of law in American society, including historical and contemporary uses of law, violence, and the conflict between individual freedom and government power.

### **RI: Research Methods in Political Science (POS 3703) 3 credits**

Introduction to the scope and methodology of political analysis. Includes introductory examinations of research design, survey research, computer applications, data analysis, and library research. (Course should be completed by the end of second semester of junior year.) This is a research-intensive (RI) course.

### **Community Activism in Practice (POS 3950) 3 credits**

*Prerequisite:* Acceptance into the Barb Schmidt Fellowship and permission of department  
Serves as the second semester of a two-semester sequence associated with the Barb Schmidt Fellowship: Cultivating Community Involvement, Advocacy and Social Change. Students explore the dynamics of creating, developing and sustaining social movements through peer-to-peer and faculty-led interactive workshops. Students work on specific projects throughout the semester. These projects are presented in a public forum at the end of the semester.

### **U.S. Immigration Policy (POS 4024) 3 credits**

*Prerequisite or Corequisite:* POS 2041 with minimum grade of "C"

Examines issues related to immigration and American national identity, including immigration policy and politics.

### **Race and Ethnic Politics (POS 4070) 3 credits**

*Prerequisite or Corequisite: POS 2041*

Understanding the role of race and ethnicity in American politics.

### **Public Opinion and American Politics (POS 4204) 3 credits**

*Prerequisite: POS 2041 with minimum grade of "C"*

Political beliefs, values and attitudes of the American public; mass participation in public affairs; voting behavior; compliance and support for public policies. Linkages between the mass public and government in the United States.

### **Media in Politics (POS 4235) 3 credits**

*Prerequisite or Corequisite: POS 2041*

An examination of the relationship between politics and the media and the effect of this relationship in limiting, creating, and shaping political power.

### **The Politics of Music (POS 4257) 3 credits**

An examination of the political aspects of music from both a theoretical perspective and in practice. Topics studied may include the influence of music on civic ideals and citizen behavior, the use of music as a form of political control and the role of music in political resistance movements.

### **Advanced Campaigning (POS 4271) 3 credits**

This course is an intensive program that teaches students how to run a political campaign. It covers campaign techniques, strategy and tactics with an emphasis on recent technological developments.

### **Campaigns/Elections (POS 4275) 3 credits**

*Prerequisite or Corequisite: POS 2041*

This course focuses on how candidates for office conceive and implement their campaign strategies and what determines a campaign's success or failure.

### **Religion and American Politics (POS 4291) 3 credits**

*Prerequisite or Corequisite: POS 2041 with minimum grade of "C"*

Examines the role of religion in American government and politics.

### **The U.S. Presidency (POS 4413) 3 credits**

*Prerequisite or Corequisite: POS 2041*

Examination of historical and contemporary role of the presidency, including the presidential selection process and the office's evolution in status, powers, administrative responsibilities, leadership, and decision-making.

### **The U.S. Congress (POS 4424) 3 credits**

*Prerequisite or Corequisite: POS 2041*

Study of Congress and the behavior of its members. Emphasis upon the recruitment and election of legislators, institutional and informal rules, the committee system, and legislative procedures.

### **Political Parties and Interest Groups (POS 4453) 3 credits**

*Prerequisite or Corequisite: POS 2041*

The nature of political parties and interest groups and their impact on elections, public policy and political change.

### **Constitutional Law: Government Powers and Limits (POS 4603) 3 credits**

*Prerequisite or Corequisite: POS 2041*

This course examines the constitutional structure of U.S. government. It describes the separation of powers (the legal foundations and modern powers of the legislature, executive, judiciary and bureaucracy) and federalism (the powers of the national and state governments).

### **Constitutional Law: Civil Rights and Liberties (POS 4604) 3 credits**

*Prerequisite or Corequisite: POS 2041*

This course examines American Civil Liberties and civil rights. It focuses upon Bill of Rights freedoms and the 14th Amendment.

### **The U.S. Supreme Court (POS 4606) 3 credits**

Examination of the Supreme Court and its role in the American political system. Students learn about the selection of Supreme Court justices and, in turn, the selection of cases that the Supreme Court chooses to hear, as well as analyze and evaluate political scientists' theories on Supreme Court behaviors.

### **The Judicial Process (POS 4609) 3 credits**

*Prerequisite or Corequisite: POS 2041*

The examination of the structural and behavioral components of justice in America. Topics to be covered include the role of law in society, the history and structure of American courts, and the processes of civil and criminal litigation.

### **U.S. Environmental Law and Policy (POS 4697) 3 credits**

*Prerequisite or Corequisite: POS 2041*

This course examines U.S. environmental politics, law and policy.

### **Directed Independent Study (POS 4905) 1-3 credits**

*Prerequisite: Permission of department*

Reading and research in a field of political science; a program to be approved in consultation with staff members.

### **Senior Research Project (POS 4910) 3 credits**

*Prerequisite: Permission of instructor*

Completion of research project in the field of political science.

### **Special Topics (POS 4931) 1-3 credits**

Selected topics in political science.

### **Internship (POS 4941) 1-3 credits**

*Prerequisite: permission of department*

Student will work in a government office, agency or legislative office under supervision of a professor in the Political Science Department. Written paper required.

### **Global Political Theory (POT 2000) 3 credits**

An exploration of core questions in political theory from a global perspective. Examines texts from a variety of cultural traditions, using the methods of comparative political theory to study universal problems relating to justice, governance and political identity. This is a General Education course.

### **Ancient Political Thought (POT 4013) 3 credits**

An examination of some of the central questions and concerns of ancient political thinkers, with an emphasis on the Greek experience. The course focuses on the methods that philosophers such as Plato and Aristotle used to study politics and on the enduring influence of their insights into the nature of justice, the best form of government and the duties of citizenship, among other subjects.

### **Modern Political Thought (POT 4054) 3 credits**

An examination of some of the central questions and concerns of modern political thinkers, beginning with Machiavelli. The course emphasizes the rejection in modern political thought of the ancient concern with morality in politics, as well as the development of new, more scientific methods for studying fundamental political questions relating to human nature, the purpose of government and the proper scope of power.

### **American Political Thought (POT 4204) 3 credits**

A review of major themes in American political thought from the colonial period to the present and the effects of political ideas on political institutions and behavior.

### **Special Topics (POT 4932) 3 credits**

Selected topics in political theory.

### **Women and Politics (PUP 3323) 3 credits**

This course focuses on the role of women in politics and the effects of women's political involvement. Also considered are historical and contemporary barriers to women's political participation.

### **Policy Making and Administration (PUP 4004) 3 credits**

*Prerequisite or Corequisite: POS 2041*

Policy making activities of public administrators, and intergovernmental cooperation and conflict in development and implementation of policies in the United States.

### **Government and the Economy (PUP 4710) 3 credits**

Analyzes the relationship between the political and economic systems in the United States: the impact of politics on economics and the impact of economics on politics.

## **Political Science Graduate Courses**

### **Seminar in Comparative Political Processes (CPO 6007) 3 credits**

*Prerequisite: Admission to graduate study*

A study of political processes in modern states from a comparative perspective. Major literature in comparative method, systems analysis, political culture and personality, parties, elections, elites, and public policy will be covered.

### **Latin American Politics (CPO 6307) 3 credits**

Designed to comprehensively explore and understand the politics of Latin America in the 20th and 21st centuries. The main topics addressed during the course are conquest, colonization and independence; debt and development; democratization and democracy; U.S.-Latin American relations; revolution and revolutionaries and the current political state of Latin America.

### **Jihadism and Transnational Islamism (CPO 6405) 3 credits**

Examination of the evolution of political Islam as a set of ideas. Investigation of Islamist movements and different models of Islamic states. Course also explores the phenomenon of transnational Islamism and international jihadism against the backdrop of East-West relations and sociopolitical conditions in the Muslim world.

### **Middle East Politics (CPO 6407) 3 credits**

*Prerequisite: Admission to graduate study*

This course will survey the main crises of the 20th century and will analyze current tensions. Special topics: Islam, Arab-Israeli peace, minorities, human rights, democratization.

**Comparative Ethnic Conflict (CPO 6723) 3 credits**

*Prerequisite: Admission to graduate study*

The objective of this graduate seminar is to study the concept of ethnic conflict and its effects on world politics. The seminar will discuss theories of nationalism and a comprehensive number of case studies: Bosnia, Kosovo, Sudan, Lebanon, Nigeria, Chiappas, Arabs and Jews, the Kurds, etc.

**Politics and Government of Post Communist States (CPO 6736)**

*Prerequisite: Admission to graduate study*

Introduces students to the political, economic and social transformation of the post-communist Central and Eastern Europe and ex-USSR. Factors contributing to the relative success and failure of these developments are examined and placed in the comparative perspective.

**Seminar in International Relations Theory (INR 6607) 3 credits**

*Prerequisite: Admission to graduate study*

The purpose of this course is to survey the principal theoretical developments in international relations and develop an ability to deal critically with such developments.

**Seminar in Administrative Policy Making (PAD 6035) 3 credits**

Study of administrative discretion in the policy process with an emphasis on regulation and distribution.

**Seminar in Policy Implementation (PAD 6365) 3 credits**

*Prerequisite: Admission to graduate study*

An examination of the political and bureaucratic setting in which public policies are implemented. There is an emphasis on political constraints on administrative agencies.

**Seminar in American National Government (POS 6045) 3 credits**

*Prerequisite: Admission to graduate study*

A description and analyses of American governmental institutions, policy-making processes, and contemporary policies within the context of political participation and power.

**Seminar in Political Behavior (POS 6208) 3 credits**

*Prerequisite: Admission to graduate study*

A study in recent theory and research on mass political attitudes, participation and voting behavior, and

the influence of the latter on political processes with a major emphasis on the United States.

### **Seminar in the Legislative Process (POS 6427) 3 credits**

*Prerequisite: Admission to graduate study*

Study of legislative bodies: recruitment, composition, leadership, procedures, party and group roles, and theories of representation.

### **Seminar in Political Parties (POS 6447) 3 credits**

*Prerequisite: Admission to graduate study*

A study of the composition, organization, structure, and functions of political parties and their roles in the political process. It discusses the relationship of parties to pressure groups.

### **Seminar in the Judicial Process (POS 6607) 3 credits**

*Prerequisite: Admission to graduate study*

Examines and evaluates various elements of the American legal system, including the role of the law and courts in the political system, judicial behavior, and judicial policymaking.

### **Research Design in Political Science (POS 6736) 3 credits**

Familiarizes students with the appropriate techniques and methods of research, inference and statistics in political science.

### **Quantitative Methods in Political Science (POS 6746) 3 credits**

*Corequisite: POS 6736*

Examines and evaluates research methods and their application for political science students. Course aims to ensure that graduate students in political science are able to conduct a research project and interpret, implement and employ basic research tools and methods.

### **Readings in Political Science (POS 6904) 1-6 credits**

*Prerequisite: permission of department*

Selected readings in political science as preparation for taking the written comprehensive exam.

### **Directed Independent Study (POS 6909) 1-3 credits**

*Prerequisite: Permission of department*

Involves reading and research in a field of political science. It is a program to be selected and approved in consultation with staff members.

### **Graduate Research Project (POS 6919) 3 credits**

*Grading: S/U*

### **Special Topics (POS 6934) 1-3 credits**

*Prerequisite: Admission to graduate study*

Graduate-level study of a selected area in political science. Topics will vary.

### **Graduate Internship (POS 6942) 3-6 credits**

*Prerequisite: Permission of department*

Internship for graduate students in political science. Each student will work in a public sector agency or community college under supervision of a professor in the Political Science Department. *Grading: S/U*

### **Master's Thesis (POS 6971) 1-6 credits**

*Prerequisite: Permission of department*

*Grading: S/U*

## **PUBLIC ADMINISTRATION**

### **Undergraduate Courses/ [link to graduate courses](#)**

#### **Multiagency Incident Command (FES 3803) 3 credits**

Course examines the framework for multiagency coordination in the response to and mitigation of large-scale events, both man-made and natural. Focuses on command and control of law enforcement, fire and emergency service organizations in the response to large-scale incidents. Emphasis is placed on the vertical coordination among federal, state, and local resources.

#### **Risk, Resilience and Rising Seas (R3) (PAD 2081) 3 credits**

This course introduces students to how the rising seas may impact the risks that individuals and communities face. Emphasis is on societal responses to climate change (i.e., government-sponsored retreat, relocation) and on individual responses (i.e., changes in consumption habits, real estate decisions and community organization). The course emphasizes issues of social vulnerability, diversity, equity, environmental justice and societal resilience in Florida and other coastal communities This is a General Education course.

#### **Changing Environment of Society, Business, and Government (PAD 2258) 3 credits**

An examination of the historical, economic, legal, political and social environments of the public and private sectors, emphasizing policy analysis of current issues such as productivity, ethics, energy, regulation, growth management, and future forecasting. This is a General Education course.

#### **Public Management and Administration (PAD 3003) 3 credits**

This is the introductory course for the B.P.M. major offering a survey and discussion of the emerging management problems of the various levels of government, and of the application of management principles and practices in public administration.

**Organizational Behavior and Administrative Communication (PAD 3104) 3 credits**

Analysis of the elements that make up complex organizations and the factors that affect human behavior within them, with emphasis on the processes of interpersonal and group communication.

**Communication Skills for Public Managers (PAD 3438) 3 credits**

This course surveys the themes, skills, and issues in communication for public administration. Its purpose is to provide a broad, collaborative introduction to: 1) describing, explaining, interpreting, critiquing, and improving communication in pursuit of the public's business; 2) refining professional writing and speaking skills, including formatting, organizing, and composing internal and external public documents; and 3) exploring interesting issues about public speech, public documents, and communication in the public forum.

**Information Technology in Public Administration (PAD 3712) 3 credits**

Provides a basic introduction to public sector information technology and e-governance. Topics include: computer software and network basics, information infrastructures (their structures, characteristics, applications and policy aspects), implications for government functioning and interactions with the public.

**Introduction to Public Safety Administration (PAD 3820) 3 credits**

Provides a common foundation to students from various disciplines for understanding issues related to risk, safety and emergency management in the public sector. To understand these issues and themes, students explore the political system, the role of federalism and local government, bureaucratic politics and power, administrative law, ethics and the various theories of administration that guide public managers in the provision and administration of public safety.

**Public Safety Systems (PAD 3893) 3 credits**

Introduces students to the role of the various public safety systems in local, state and federal government. It covers the functions of public safety in law enforcement, corrections, the courts and juvenile justice.

**Introduction to the Nonprofit Sector (PAD 4144) 3 credits**

This is a multidisciplinary course examining the historical, political, legal, ethical and societal environments in which nonprofit organizations operate. This primarily includes institutions involved with education, social services, health care, and the arts. The course is intended for students who are

seeking to enter the nonprofit field and those who have considerable experience working in nonprofits.

### **Introduction to Volunteer Management (PAD 4148) 3 credits**

The course covers the history and purpose of volunteer usage in nonprofit organizations, how to recruit, retain and motivate volunteers, as well as application review, screening procedures, ethical issues and potential legal liabilities.

### **Managing Change in Nonprofit Organizations (PAD 4151) 3 credits**

The course is designed to provide students with theoretical constructs that are useful for analyzing the behavior of nonprofit organizations, for setting strategic direction and problem solving and for implementing change. The course relies heavily on Gareth Morgan's metaphors as a means of explaining and understanding nonprofit organizations.

### **Funding for Nonprofit Organizations (PAD 4202) 3 credits**

The course is designed to provide a broad-based understanding of the various vehicles used to fund nonprofit organizations. It also provides hands-on, practical instruction in researching funding sources and developing funding requests and grant applications.

### **Financial Management of Nonprofit Organizations (PAD 4203) 3 credits**

Course introduces students to the theory and practice of financial management within nonprofit organizations, including churches, charities, hospitals, and human service organizations. This course provides an introduction to management issues faced by leaders in nonprofit organizations.

### **Public Budgeting and Finance (PAD 4223) 3 credits**

The theory and practice of various approaches to financial management in government including budgeting techniques. Special emphasis on the role of budgeting in shaping public policy.

### **Public Budgeting Techniques and Processes (PAD 4228) 3 credits**

An exploration and analysis of the budgetary processes typically employed at the federal, state, and local levels of government. Practical as well as theoretical exposure to the techniques and various formats of public budgeting.

### **Program Evaluation in Public Management (PAD 4320) 3 credits**

Explores the organizational, social, and political contexts of program evaluation to gain understanding of evaluation, program research design, and methodologies needed for systematic program evaluation.

### **Managing for Excellence in the Public and Nonprofit Sectors (PAD 4332) 3 credits**

Surveys current management and leadership tools and processes used in both private and public

organizations. Provides a conceptual understanding of strategies to improve public and nonprofit organizational performance such as measurement, strategic planning, employee motivation, and organizational development and change.

### **Disaster and Emergency Management (PAD 4393) 3 credits**

Focuses on the emergency management and administrative framework to manage disasters, intergovernmental relations, incident command systems, organizational and operational planning, budgeting and disaster management, land-use planning and hazards, disaster recovery, legal issues, technological issues, the management of large-scale disasters, recent disaster legislation, policy issues and the implementation of emergency management policies.

### **Managing People in the Public Sector (PAD 4414) 3 credits**

Focuses on how employees are managed in the public sector. Topics include: Employment law, job design and analysis, performance management, planning, staffing, training and development, compensation and incentive systems, merit and civil service, employee and labor relations and supervisory practices.

### **Public Sector Labor Relations (PAD 4426) 3 credits**

An examination of the historical development of labor relations and collective bargaining in the public sector and the impact of public employees unions on public personnel administration.

### **Administrative Process and Ethics (PAD 4604) 3 credits**

*Prerequisite: Permission of instructor*

Surveys the principles of administrative procedure, procedural due process, and regulatory procedures and considers administrative ethics in process.

### **Quantitative Inquiry for Public Managers (PAD 4702) 3 credits**

*Prerequisite: STA 2023*

This course introduces students to basic statistical concepts and quantitative methods of inquiry in public management using relevant examples and applications. Successful students should be able to apply statistical concepts and techniques toward effective decision making and evaluation of a wide variety of information.

### **Research Methods for Public Management (PAD 4704) 3 credits**

The course describes research practices used in the public sector by introducing methodologies, techniques, and decision tools. Areas of study include the research process, sampling procedures, research design, measurement, primary and secondary data, and the collection and analysis of data. In addition, computer applications and presentation of research reports (oral and written) are covered.

### **State and Local Government Administration (PAD 4806) 3 credits**

A study of the structure, functions, policy processes, and administration of state and local governments.

### **Stand Your Ground (PAD 4814) 3 credits**

Designed to present a current, comprehensive overview of Florida's Stand Your Ground Law. The course will ask the question: "Do we need the Stand Your Ground Statute?"

### **Introduction to Public Sector Procurement (PAD 4852) 3 credits**

This course examines the technical and fundamental procedures basic to public sector procurement, including the solicitation process, types of contracts, pricing policies and techniques, contracting by negotiation, contract administration, contract performance, government contract quality assurance, termination of government contracts, protest, disputes, appeals, and contract closeout.

### **Public Sector Contract Management (PAD 4854) 3 credits**

This course is a study of government contract administration, including contract administration process and techniques.

### **Administrative Process and Ethics of Public Sector Procurement (PAD 4880) 3 credits**

This course provides an overview of public procurement processes, paying particular attention to administrative procedures, law, and ethics.

### **Public Sector Project Management Techniques (PAD 4881) 3 credits**

This course provides an overview of essential elements for each phase of the project life cycle, knowledge, tools, and techniques to manage a project from its initiation to final closeout.

### **Capstone in Public Safety Administration (PAD 4892) 3 credits**

*Prerequisite: Restricted to B.P.S.A. majors in their final two semesters who have taken four of the following five courses: PAD 3104, PAD 3820, PAD 3893, PAD 4894, PAD 4604*

This capstone seminar is designed to integrate and synthesize the student's entire course of study in the Bachelor of Public Safety program. Students demonstrate knowledge of theory and practice and general terminology of public safety administration.

### **Diversity and Social Vulnerability in Public Safety Administration (PAD 4894) 3 credits**

*Prerequisites: All lower-division coursework with grades of "C" or better*

Focuses on issues related to social class, race, gender, diversity and multiculturalism in public safety administration. Understanding the social, cultural, historical, geographical and physiological factors that put people differentially at risk before, during and after disasters is important in effective

management of public safety and to enhance community resilience.

### **Directed Independent Study (PAD 4905) 1-3 credits**

*Prerequisite: Permission of instructor and Director of School prior to registration and prior completion of 12 public management credits*

Independent study, research, or other project to extend and integrate the student's knowledge of issues and approaches in the field.

### **Directed Independent Research (PAD 4915) 3 credits**

*Prerequisite: Permission of instructor*

Independent research to extend and integrate the student's knowledge of issues and approaches in the field.

### **Special Topics (PAD 4931) 1-3 credits**

*Prerequisite: Permission of instructor*

Study relating to special problems in public administration.

### **Senior Seminar in Public Management (PAD 4935) 3 credits**

*Writing Across Curriculum (Gordon Rule)*

*Prerequisites: Senior standing and Public Administration majors only*

This elective course is writing centered and writing intensive, serving as an integrative senior seminar for undergraduate Public Administration majors.

### **Public Safety Administration Internship (PAD 4940) 3 credits**

*Prerequisites: Juniors/seniors in B.P.S.A. program, minimum 2.0 GPA, and permission of instructor*

The internship experience provides a mutually beneficial relationship between the student and the internship provider/organization. FAU ensures that the internship is begun with a solid academic foundation for public-safety work, and in turn, the provider offers a worthwhile and meaningful internship experience. The internship is an Academic Service Learning-based course (ASL), which means the work the student does for the organization during the ASL internship is a service to the public sector, and it will allow the student to apply knowledge from the program to local, state and national issues. Throughout the internship, the student participates in ASL activities while demonstrating civic engagement. The student also reflects on their ASL experience and the impact the work had on the public-sector organization and their own professional and personal development.

### **Government Internship (PAD 4941) 3 credits**

*Prerequisite: Completion of 12 management credits*

An elective course offering public sector working-world experience that allows the acquisition of

career-relevant expertise and networks.

### **Nonprofit Internship (PAD 4942) 3 credits**

Offers nonprofit working-world experience that allows the acquisition of career-relevant expertise and networks.

## **Public Administration Graduate Courses**

### **Seminar in Administrative Policy Making (PAD 6035) 3 credits**

Study of administrative discretion in the policy process with an emphasis on regulation and distribution.

### **Public Administration and Public Policy (PAD 6036) 3 credits**

A critical examination of the role of public administrators in setting the public agenda, formation of action strategies, execution of preferred action strategy, and evaluation of the impacts of the preferred strategy. M.P.A. core course.

### **Democratic Values and Public Administration (PAD 6042) 3 credits**

An inquiry into the administrative state and its implications for democracy.

### **Introduction to Public Service and Administration (PAD 6053) 3 credits**

An analysis of the contemporary political, economic, and social institutions and processes in which the profession of public administration is practiced. M.P.A. core course.

### **Public Leadership (PAD 6063) 3 credits**

Covers fundamental managerial and leadership aspects of public service. Explores personal, ethical, organizational, political, and legal dimensions of governance in the public interest. M.P.A. core course.

### **Images of Public Administration in Literature, Popular Culture, and Film (PAD 6065) 3 credits**

Introduction to theory in public administration through the use of film, popular culture images, literature, and other media.

### **Organization and Administrative Behavior (PAD 6106) 3 credits**

Analysis of the formal, informal, and societal characteristics of complex human organizations. Use is made of standard theories of organizations as well as of their more contemporary variations. M.P.A. core course.

### **Public Service Capstone-(PAD 6139) 3 credits**

Combines administrative history with analysis of concrete situations in public administration. Portrays clash of forces, personalities, and issues in attempting solution to administrative problems. Typically taken in last or next-to-last semester. M.P.A. core course.

### **Introduction to Nonprofit Management (PAD 6142) 3 credits**

The role of the nonprofit sector in a democracy and market economy; examination of historical, political, legal, ethical, and social environments in which nonprofit organizations operate; analysis of both theoretical and practical issues and problems faced by managers of nonprofit organizations.

### **Public Policy and Nonprofit Organizations (PAD 6143) 3 credits**

*Prerequisite: PAD 6142 or permission of instructor*

This course seeks to acquaint students with the theoretical and practical issues confronting nonprofit organizations. The course systematically examines the ways in which the public policy process both supports and regulates the activities of nonprofits and the ways in which nonprofits seek to affect public policy governing their behavior. This is an Academic Service Learning (ASL) course.

### **Volunteer Management in Nonprofit Organizations (PAD 6145) 3 credits**

*Prerequisite: PAD 6142*

This course reviews volunteer management as an essential element in the nonprofit field. It covers the history and purpose of volunteer usage in nonprofit organizations and how to recruit, retain and motivate volunteers, as well as ethical issues and potential legal liabilities.

### **Governance in Nonprofit Organizations (PAD 6149) 3 credits**

*Prerequisite: PAD 6142 or permission of instructor*

Nonprofits are controlled by boards of directors. This course discusses the legal foundations for boards, their conventional roles and responsibilities, and the strategic planning processes to strengthen board leadership. This is an Academic Service Learning (ASL) course.

### **Organizational Change and Public Management (PAD 6154) 3 credits**

Seminar focuses on several levels of change, their sources or causes, consequences, and implications for public management.

### **Legal and Ethical Issues in Nonprofit Organizations (PAD 6165) 3 credits**

Course is designed to examine in detail the legal issues confronting nonprofit corporations. Emphasis is on a review of the laws pertaining to nonprofits, focusing on structure, management, behavior, and accountability.

### **Human Resource Management for Nonprofits (PAD 6166) 3 credits**

The course examines both theoretical and practical issues and problems faced by managers of nonprofit human resource managers. It provides an overview of the strategies, approaches and practices that best address the complex legal and management challenges common in a nonprofit environment. Theories of staff and volunteer recruitment, retention, motivation, performance evaluation, team building, compliance, risk management, compensation, equity and workplace-learning are explored. The course is designed to provide for maximum interaction between the students and instructor.

### **Management in Nonprofit Organizations (PAD 6168) 3 credits**

Course covers managing change in individual lives and in nonprofit organizations. This course deepens students' understanding of the challenges, techniques and problems associated with implementing major change in nonprofit organizations.

### **Public Finance and Policy Analysis (PAD 6205) 3 credits**

This course uses the theoretical and empirical tools of public finance to analyze public policy. The course is designed to show the strengths and weaknesses of government in the financing and operation of programs in major public policy areas.

### **Fundraising for Nonprofits (PAD 6206) 3 credits**

Examines the history, principles and practical applications and aspects of financial resource development and the ethical responsibilities among individuals, corporations, government funders and public donors that are involved. Exploration of types of nonprofits, revenue streams, constituency composition and generational giving.

### **Seminar in Public Financial Administration (PAD 6207) 3 credits**

Examination of the budgetary process. Analysis and application of theories and techniques of public financial administration, including budgetary approaches, cash management, debt management, risk management, procurement, and tax administration.

### **Public Budgeting and Finance (PAD 6227) 3 credits**

Examines the theory and practice of public budgeting and finance as it relates to the administrative processes of control, management and planning. Special emphasis is placed on policy development and decision making relating to fiscal decisions that help shape the policy direction of public organizations. M.P.A. core course.

### **Grantwriting and Project Management (PAD 6233) 3 credits**

This course provides an opportunity to explore various approaches to grantwriting and resource development in public and nonprofit organizations as well as evolving trends, such as sustainable practices, dissemination strategies, data management and analysis.

### **Financial Management for Nonprofit Managers (PAD 6260) 3 credits**

This course covers accounting standards and principles for state and local governments and nonprofit organizations, including fund structure and accounting process. This is an Academic Service Learning (ASL) course.

### **Program Review and Analysis (PAD 6327) 3 credits**

*Prerequisite: PAD 6701*

Analysis of systematic methods for evaluating the efficiency and effectiveness of public programs; means for determining the extent to which program administration promotes achievement of program objectives.

### **Strategic Planning in the Public Sector (PAD 6333) 3 credits**

Study of strategic planning and how to apply that knowledge to real world organizations.

### **Seminar in Policy Implementation (PAD 6365) 3 credits**

This course examines the political and bureaucratic setting in which public policies are implemented and the political problems in implementation. Emphasis on political constraints of administrative agencies.

### **Public Policy Process (PAD 6385) 3 credits**

*Prerequisite: PAD 6036*

This course covers the public policy process, including policy formation and adoption, policy implementation, and evaluation. The course aims to add to the student's knowledge and understanding of policy theory, substantive policy areas, and the role of administrators in the policy process.

### **Human Resource Management in the Public Sector (PAD 6417) 3 credits**

Review of development of public personnel policies and programs with emphasis on changes resulting from new approaches and employee organization. Studies personnel responsibilities of all public managers and employees. M.P.A. core course.

### **Labor Relations in Government (PAD 6427) 3 credits**

Studies the growth of employee organization in the public sector, with particular emphasis on the state and local level. Reviews special problems facing government administration and the effects of employee organization in government administration.

### **Ethical and Legal Foundations in the Public Sector (PAD 6436) 3 credits**

Ethical considerations for professional public administrators operating in the ethos of a republic; situational analysis of conflicts with elected legislative, executive, and judicial officials; professional

policy and career goals; and issues of democracy, bureaucracy, and morality in public service. M.P.A. core course.

### **Administrative Law and Procedures (PAD 6605) 3 credits**

A survey and analysis of the law concerning the rule-making and adjudicatory powers and procedures of administrative agencies and the effect such rules have on the delivery of services by federal, state, and local government.

### **Regulation (PAD 6612) 3 credits**

The course analyzes how and why bureaucracies develop regulations and the role that regulations play in the policy process with a focus on the economic, political, administrative, and social factors that influence regulatory choices and the impacts of those regulations.

### **Statistical Analysis for Effective Decision Making (PAD 6701) 3 credits**

*Prerequisite: Undergraduate statistics or permission of instructor*

A study of the statistical methods, techniques, and procedures used in the analysis of public sector data, with emphasis on computer analysis. M.P.A. core course.

### **Survey Research in the Public Sector (PAD 6727) 3 credits**

Within the public and nonprofit sectors, survey research skills have become essential due to the necessity of gathering primary data. Course focus here is on students learning a set of skills to assist them in completing survey research in their professional fields.

### **Local Government Administration (PAD 6807) 3 credits**

Analysis of the performance of urban agencies, alternative strategies for improving service delivery and management, and strategies for effective change in the public sector.

### **Intergovernmental Administration (PAD 6826) 3 credits**

Studies both theoretical and practical aspects of administration of federalism, including distribution and use of shared revenue funds. Review practices as well as principles pursued in both competitive and cooperative interjurisdictional patterns.

### **Public Procurement Concepts and Practices (PAD 6855) 3 credits**

This course provides an overview of public procurement as a basic functional area of government. Specific focus on the scope of public procurement, including organizational structure, regulations, process and methods, and current issues in public procurement.

### **Public Procurement and Project Management (PAD 6856) 3 credits**

Course covers each phase of the public procurement project cycle, with an emphasis on tools and techniques to manage a public procurement project.

**Public Sector Procurement Law and Ethics (PAD 6857) 3 credits**

Course surveys the ethics and law pertaining to federal government procurement, including analysis of the unique features of government contracting.

**Public Sector Contract Formulation (PAD 6858) 3 credits**

Course covers all phases of the contract formulation process with a focus on the RFP and RFB procedure, documents, and other technical issues.

**Public Sector Contract Administration (PAD 6859) 3 credits**

Course provides an in-depth study of contract administration with a focus on all activities in the postaward phase of the contract process.

**Directed Independent Study (PAD 6907) 1-3 credits**

*Prerequisite: Permission of instructor*

Reading and research in a field of public administration; a course to be selected with the consultation of and approved by the M.P.A. Coordinator.

**Special Topics (PAD 6931) 3 credits**

Study relating to special issues in Public Administration.

**Government Internship (PAD 6941) 3 credits**

A diversified work experience in management or staff positions in federal, state, or local government or in a nonprofit organization providing public service.

**Internship-Nonprofit Organizations (PAD 6943) 3 credits**

Students without prior work experience in nonprofit organizations must complete an internship. The University will place the student in a nonprofit organization for 15 weeks.

**Scope and Theory of Public Administration (PAD 7050) 3 credits**

*Prerequisite: Permission of instructor*

A doctoral seminar focusing on the theories, concepts and models of public administration. The course content includes an assessment of historical, normative and descriptive approaches to public administration.

**Seminar in Organization Theory (PAD 7107) 3 credits**

*Prerequisite: PAD 6106 or equivalent*

Review and critique of both classical and contemporary organization theory literature in public administration; exploration of specific topics related to organization effectiveness and individual behavior. Ph.D. core course.

### **Norms of Inquiry in Public Administration and Public Policy (PAD 7138) 3 credits**

Logic of knowledge—its behavioral, explanatory, critical, and interpretive modes. Multiple paradigms of knowledge building and inquiry to assess their relevance to knowledge building in public affairs and governance.

### **Organizational Behavior and Development (PAD 7155) 3 credits**

*Prerequisite: PAD 7107 or permission of instructor*

A study of the individual behavior in the organization at the micro and macro levels and of the strategies and methods intended to change the attitudes, values, and structures or organizations so that they can better adapt to new technology, markets, and challenges.

### **Advanced Public Budgeting and Fiscal Management Techniques (PAD 7229) 3 credits**

*Prerequisite: PAD 6207 and PAD 6227 or equivalent*

The literature of public budgeting, contributions from political science, economics, accounting, public administration, and other relevant literature. Literature and standards of the Government Finance Officers Association (GFOA) and their contribution to public budgeting and public finance, models and theories of public budgeting, and empirical research are covered.

### **Public Expenditure Analysis (PAD 7240) 3 credits**

*Prerequisite: PAD 6227 or equivalent*

Review of fiscal policy theories, issues of taxation, expenditure, national debt, international public finance, and development finance are explored in the framework of economic growth/stabilization, distribution, and equity. Ph.D. core course.

### **Advanced Quantitative Analysis (PAD 7703) 3 credits**

*Prerequisite: PAF 7800 or equivalent*

Focuses on a number of advanced statistical, modeling, and operations research methods and their application in the field of public administration. Particular attention will be given to applications in the area of public budgeting, personnel administration, and public policy analysis. Ph.D. core course.

### **Advanced Research Seminar in Public Affairs (PAD 7707) 3 credits**

*Prerequisite: PAD 7703*

Analysis of public administration research methods, materials and techniques. Course provides graduate students with guidance in the preparation of data analysis strategies and alternative designs for

research questions and dissertation projects. This course also emphasizes both quantitative and qualitative approaches to problem solving. Ph.D. core course.

### **Directed Independent Study (PAD 7907) 1-3 credits**

*Prerequisite: Permission of instructor, approval of the Ph.D. Coordinator*

Reading and research in a selected field of Public Administration at the doctoral level.

### **Advanced Research and Study (PAD 7910) 3-9 credits**

Concentration course for students sitting for examinations, or preparing a dissertation proposal.

### **Special Topics (PAD 7931) 3 credits**

Study relating to special problems in Public Administration at the doctoral level.

### **Advanced Public Policy (PAD 7932) 3 credits**

This course is a doctoral seminar in public policy theory and practice. The focus of the seminar is on trends in policy inquiry, policy analysis and evaluation, and policy formation and implementation.

### **Practicum in Public Administration (PAD 7943) 1-3 credits**

Covers role and responsibilities of the public administration teacher and scholar at the university level.

*Grading: S/U*

### **Dissertation (PAD 7980) 1-15 credits**

*Prerequisite: Admission to candidacy and approval of the Ph.D. Coordinator*

### **Quantitative Methods in Public Affairs Research (PAF 7800) 3 credits**

Acquaints students with the fundamental concepts necessary for advanced statistical analysis of public affairs research. Emphasizes characteristics of distributions and random variables, diagnostic techniques, the tests of assumptions of each analysis and the consequences of violating them. Special attention is given to data analysis, decision-making and report writing in the public sector.

### **Qualitative Methods in Public Affairs Research (PAF 7820) 3 credits**

A seminar designed to acquaint students with the application of qualitative research protocols in public affairs research. Various research technologies are presented and critiqued, with particular emphasis on their applicability to public affairs research. Ph.D. core course.

## **SOCIOLOGY**

**Undergraduate Courses/ [link to graduate courses](#)**

### **Sociological Theory (SYA 3010) 3 credits**

*Prerequisite: SYD 3792 or SYG 1000*

This course provides an introduction and overview of some of the major theoretical traditions in sociology. Students learn about the development of sociology as a discipline, as well as how to use different sociological theories to make sense of social structures, social action and social change in the contemporary world.

### **Contemporary Social Theory (SYA 3120) 3 credits**

*Prerequisite: SYG 1000 or SYD 3792*

This course introduces students to the major contemporary theoretical traditions in sociology, ranging from symbolic interactionism to postmodernism. Students learn about the continued development of sociology after the classical period, as well as how to use different sociological theories to make sense of contemporary social life and current events.

### **Social Conflict (SYA 3150) 3 credits**

An analysis of conflict and conflict resolution and their sources in human society.

### **Sociological Analysis: A Survey of Methods (SYA 3300) 3 credits**

*Prerequisite: SYD 3792 or SYG 1000*

This course introduces students to social science research methods used to study and understand human societies. Students learn the fundamentals of research design, measurement, sampling, data collection, data analysis and presentation using both quantitative and qualitative methods. Students in this course gain hands-on research experience by designing, executing and presenting a pilot research project based on human subjects.

### **Special Topics (SYA 3930) 3 credits**

This course features an in-depth analysis of a current issue in society. Topics vary from semester to semester.

### **Qualitative Research Methods (SYA 4310) 3 credits**

*Prerequisites: SYA 3010 and SYA 3300*

This course focuses on qualitative and/or comparative-historical methods of social research. Specifically this course addresses issues involved in designing and conducting field and comparative-historical research, and explores techniques, including interviewing, participant observation, and archival research.

### **Sociological Analysis: Quantitative Methods (SYA 4400) 3 credits**

*Prerequisites: SYA 3010 and SYA 3300*

Design and execution of original research on social class, race, ethnicity, gender, and other issues central to contemporary sociology. Students explore various quantitative techniques using the Statistical Package for the Social Sciences (SPSS) and national survey and census data.

**Directed Independent Study (SYA 4905) 1-3 credits**

*Prerequisite: Permission of department*

**Special Topics (SYA 4930) 1-3 credits**

*Prerequisites: SYA 3010 and SYA 3300*

An in-depth analysis of current social problems. Topics vary from semester to semester.

**Environmental Sociology (SYD 3510) 3 credits**

This course exposes students to the sociological study of the relationship between society and the environment. Students gain an understanding of how global economic and political forces shape environmental change, how the environment is socially constructed, the connections between environment and social inequalities, and the emergence and effects of environmental movements.

**Cities and Society (SYD 3602) 3 credits**

This course explores core questions of urban sociology including, what makes a place “urban,” how urban space affects social relations among individuals, groups and institutions, and how social forces shape cities. It examines various cities and urban experiences, surveys major theories in urban sociology and provides tools for analyzing local urban spaces and for linking them to broader national and global forces.

**Race and Ethnic Relations (SYD 3700) 3 credits**

This course surveys sociological perspectives of intergroup relations. It examines the evolution of race, the construction of racial and ethnic distinctions and the roles and experiences of racial and ethnic groups in the United States from a historical perspective.

**Race, Class, Gender, and Sexuality (SYD 3792) 3 credits**

This course examines the roles played by race, class, gender and sexuality in identity and group formation as well as societal differentiation. It shows how inequalities along those lines shape and are shaped by social institutions including the media, education, the economy and family.

**Gender and Society (SYD 3800) 3 credits**

*Prerequisites: Nine credits of coursework in Sociology at the 1000, 2000 and/or 3000 levels*

This course surveys the subfield of the sociology of gender. It examines competing theoretical

explanations of gender from a sociological perspective. Topics include gender difference, socialization, stratification and gendered social institutions such as families, work and the media.

### **Sociology of the Body (SYD 3804) 3 credits**

This course examines social and cultural factors and processes connected to prejudice, discrimination, oppression, social stratification and social/cultural change in connection to bodies. An overview of the connection between the body and personal identity is presented with an emphasis on stigma management and how identity is enacted through body projects.

### **Sociology of Housing (SYD 4606) 3 credits**

*Prerequisites: SYA 3010 and SYA 3300 and SYD 3792 or SYG 1000*

This course explores the causes and consequences of affordable housing crises in the United States. Students learn about the relationship between housing and social inequalities, how government policies shape housing access and affordability, and the research methods sociologists employ to study housing conditions and outcomes. These themes are explored through historical and contemporary case studies, such as foreclosure and homelessness during the Great Depression, redlining and urban renewal in the post-WWII era, the 2008 Subprime Mortgage Crisis and widespread affordability crises following the COVID-19 pandemic.

### **Race in Global Context (SYD 4702) 3 credits**

*Prerequisites: SYA 3010 and SYA 3300, or permission of instructor*

This course presents an examination of race and ethnic relations from a contemporary global perspective. Three broad questions are explored: What does “race” mean? How do global processes and local contexts produce the meaning of race? In what ways has globalization changed the use of race classifications? This is a research-oriented course that requires students to complete an original research project on race/ethnicity and give a presentation of their work to the class.

### **Gender, Power and Relationships (SYD 4814) 3 credits**

*Prerequisites: Nine credits of coursework in Sociology at the 1000, 2000 and/or 3000 levels*

Analysis of the relationship between gender norms in American society and patterns of interaction in everyday settings and intimate relationships. Particular focus on hierarchical interpersonal dynamics.

### **Sociological Perspectives (SYG 1000) 3 credits**

In this course, students gain an understanding of the basic sociological concepts and vocabulary, including the methodological tools, sociological perspectives and scientific procedures used by social scientists to collect data and conduct research. Topics generally covered include society and culture, institutions, socialization, social control, social change, social groups, sex and gender, race and ethnicity, family, social class and social mobility, and population. This is a General Education course.

### **University Honors Seminar in Sociology (SYG 1930) 3 credits**

*Writing Across Curriculum (Gordon Rule)*

A seminar in the University Honors Program on topics in sociology.

### **Social Problems (SYG 2010) 3 credits**

This course focuses on the development, analysis and treatment of social problems: crime, poverty, prejudice and discrimination, pollution and environmental despoliation, and drug abuse and mental illness. Emphasizes factors in U.S. society that cause social problems. This is a General Education course.

### **Sociology Study Abroad (SYG 2952) 1-6 credits**

*Prerequisite: Sophomore standing*

Credit for enrollment in approved study abroad programs.

### **Career Paths in Sociology (SYG 3090) 3 credits**

*Prerequisite: For Sociology major or minor*

In this course, students are exposed to various marketable skills that will assist them in preparing for a career after graduation or for graduate school through “real-world” exposure using micro internships and supervised experience related to various career interests in Sociology. Like in any major, Sociology majors end up working in many different jobs. This course provides the most common career paths for Sociology majors. A portion of the course will be spent investigating what one can do with a Sociology degree. An introduction of possible levels of employment in the private or public sectors will be reviewed. Ultimately, this course begins to assist students in developing a plan for professional employment.

### **Sociology of Food (SYG 3244) 3 credits**

This course examines the relationship between our individual food choices and the larger social, cultural, economic and political forces that shape the global food system.

### **Directed Independent Research in Sociology (SYG 4915) 1-3 credits**

*Prerequisite: Permission of instructor*

Students work with research mentors to conduct research and inquiry in sociology. Requirements for the course and the criteria for evaluation are agreed upon by the mentor and student.

### **Sociology Internship (SYG 4941) 3 credits**

*Prerequisites: SYA 3010, SYA 3300, SYG 3090*

This internship opportunity allows sociology majors to gain community experience by working with a

local organization or agency in the tri-county region. Students gain firsthand experience and practical knowledge and will be able to apply their studies to real world situations. This internship may serve multiple purposes, including community-centered learning, networking, skills and interest development, and assistance in determining future careers or career opportunities.

### **Sociology Study Abroad (SYG 4957) 1-6 credits**

*Prerequisite: Sophomore standing*

Credit for enrollment in approved study abroad programs.

### **Honors Thesis in Sociology (SYG 4972) 3 credits**

*Prerequisite: Good standing in Sociology Honors Program*

The senior thesis is an independent study that leads to an original piece of research. The thesis should develop a theoretical argument, situate the research in contemporary sociological literature and provide empirical findings. Students work closely with two qualified faculty members to develop the project. Students must present their findings at a Sociology Department workshop. The senior thesis is available only to students accepted into the Sociology Honors Program.

### **Family and Society (SYO 3100 ) 3 credits**

This course examines the family as a socially constructed institution with deep importance for the structuring of society. Students explore how family forms and activities are shaped by broader social, cultural, political and economic forces. Focusing on marriage and family over the life course, course topics include dating and love, the formation of partnerships and marriages, parenting choices, divorce and remarriage, work-family balance and intergenerational relationships.

### **Sociology of Religion (SYO 3200) 3 credits**

For millennia, religion has remained a powerful force of social cohesion, meaning, order and disruption in society. This course examines how religious ideas and practices shape politics, social norms and social institutions, including schools and families. The course uses sociological tools to examine changing forms of American religious identity, analyze the difference between religious beliefs and religious practices, and show how religion is embedded in some of the most heated current debates in society.

### **Sociology of Education (SYO 3250) 3 credits**

This course examines our education system from a sociological perspective, with an emphasis on the causes and consequences of educational inequality. It explores the relationship between social characteristics such as residential location and socio-economic status and quality, content of schooling received, how long students stay in school and their later trajectories in adulthood.

### **Economy and Society (SYO 3353) 3 credits**

This course introduces students to the sociological study of the economy. It emphasizes the social, political and cultural dimensions of markets and economic actions. Specifically, it examines how markets and economic actions are socially constructed and how they are shaped by different historical and cultural contexts.

### **Gender and Work (SYO 3370) 3 credits**

This course examines how gender structures the division of labor, including labor markets and domestic labor. Students explore how gender shapes paid and unpaid work as well as how that work produces gender and related inequalities at the individual and social levels.

### **Sociology of Work (SYO 3372) 3 credits**

This course provides students with an introduction to the sociology of work. Topics include the role that workplaces and labor markets play in creating and reproducing social inequality; the social dynamics of labor unions, labor movements and class conflict in the workplace; the relationship between work and self-identity; how individuals select and are sorted into jobs; how recent changes in the workplace have impacted families, relationships and the process of becoming an adult; and how the cultural meaning and significance of work has changed over time.

### **Labor and Globalization (SYO 3377) 3 credits**

Exposes undergraduate students to the substantive debates in the sociological literature on globalization and the fate of labor movements, drawing from a world-historical approach that helps elucidate global as well as local patterns of labor movement activity.

### **Sociology of Health, Medicine and Illness (SYO 3400) 3 credits**

This course introduces students to the sociological perspective on the social determinants of health and illness. Students study how social factors like race, gender, and class shape individual health outcomes, and how patients and medical providers experience the healthcare system. This course examines the economic structures that distinguish American healthcare from other countries' healthcare systems.

### **Sociology of Mental Health (SYO 3410) 3 credits**

This course introduces students to the scientific study of mental health from an interdisciplinary perspective with an emphasis on the social, cultural and political meanings of mental health. Students examine contemporary and historical issues in the field of mental health including how to define and treat mental disorders, mental health stigma, the pharmaceutical industry, access to mental health services, social inequalities in mental health and stress.

### **Animals and Society (SYO 3448) 3 credits**

This course introduces students to the sociological study of the complex and changing relationship between animals and society. Topics include the human use of animals in science, entertainment and food; the role of animals in assisting humans; the experiences of humans who work with animals; the social dynamics of pet ownership; and the development and effects of the Animal Rights Movement.

### **Class, Status, and Power (SYO 3530 ) 3 credits**

A comparative analysis of the causes and consequences of social inequality. Concentration on the individual and societal effects of differential access to power and privilege in plural societies.

### **Poverty and Society (SYO 3534) 3 credits**

This course introduces students to the sociological study of poverty from a historical and global perspective, with a focus on structural sources of poverty. It explores how changes in the economy, public policies and social norms and practices affect the incidence and experience of poverty. Students also examine the link between globalization and poverty in the United States and beyond.

### **RI: Poverty and Society (SYO 3534) 3 credits**

This course introduces students to the sociological study of poverty. Students learn how social structural factors determine the extent of poverty in a society, the variation in the character of poverty across space and time, and the uneven extent to which specific social groups experience poverty (e.g., women, children, racial and ethnic minorities). This is a research-intensive (RI) course that requires students to complete an original research project on poverty and give a formal presentation of their work to the class.

### **Organizational Sociology (SYO 3570) 3 credits**

*Prerequisites: Nine credits of coursework in Sociology at the 1000, 2000 and/or 3000 levels*

Course explores one of the key social forms structuring modern life: the organization. Examining the origins, persistence and death of organizations, this course provides an overview of sociological approaches to understanding how social life shapes the forms organizations take and how organizations' actions impact social life. Topics covered include bureaucracy, inequality, social change and economic development.

### **Global Society (SYP 2450) 3 credits**

This course takes sociology beyond national boundaries and explores social, cultural, political and economic dimensions of globalization. Students examine how class, race and gender operate on a global scale and evaluate how global processes affect their daily lives. Topics explored include the social implications of a changing global economy, the global spread of infectious diseases, global poverty, climate change, global migration and development. This is a General Education course.

### **Sociology of Emotions (SYP 3011) 3 credits**

This course provides an overview of the subfield of sociology of emotions with a focus on the social construction of emotion. Students explore different sociological explanations for emotions and how they contrast with non-sociological theories of emotion as psychological or biological. Topics covered include emotion work, emotion management, feeling rules, emotions and inequality, and emotions at home, at work and in popular culture.

### **Sociology of Happiness (SYP 3014) 3 credits**

Addresses classical and contemporary sociologists' views of what happiness is, what promotes it and what limits it. Also considered are current national and cross-national social movements aiming to increase happiness.

### **Human Sexuality and Social Change (SYP 3060) 3 credits**

This course provides a sociological perspective on human sexuality, examining how sexual attitudes, identities and behaviors are shaped by broader cultural, social and historical contexts. Special attention is given to the causes and consequences of society's beliefs about and organization of human sexuality as well as how those beliefs and structures have changed over time.

### **Self and Society (SYP 3110) 3 credits**

This course provides an overview of sociological social psychology with a focus on the social construction of emotions, the self, and social interaction. In this course, students examine the social dimensions of the self and emotions including how they are socially learned, regulated and distributed in the population.

### **Sociology of Everyday Life (SYP 3112) 3 credits**

This course explores how everyday interactions produce social life as well as individual identities and selves; it also examines how everyday social life is shaped by broader societal patterns. Special attention is upon microsociological theories of categorical identities including race, gender and class.

### **Social Movements (SYP 3304) 3 credits**

This course explores how forms of social protest may create social change. Through careful analysis of major social movements such as civil rights, labor, feminist/women's, ecological/environmental movements, and others, the course explores why and how social movements emerge, decline, and change social institutions and relationships.

### **Social Change (SYP 3400 ) 3 credits**

This course exposes students to classical and contemporary sociological theories and their implication

for social change. By engaging with topics such as modernization, social movements, revolutions and post-industrial society, students learn how to identify historical and contemporary mechanisms of social change, evaluate theories of social change and use these to analyze current social trends.

### **Sociology of Consumption (SYP 3420) 3 credits**

This course introduces students to the sociological study of life in consumer society from the perspective of both labor and leisure. Students examine the making and consumption of diverse products and services, including clothes, toys, food and dining, music, tourism and weddings, as well as issues related to spectator sports, celebrities and influencer cultures.

### **Globalization and Cities (SYP 3451) 3 credits**

Course focuses on understanding the relationship of the city and urban phenomena to global economic processes. Students are introduced to several traditional sociological theories of urban development. Course also considers gender and race dynamics in urban and global contexts.

### **Globalization and Social Movements (SYP 3454) 3 credits**

This course explores the relationship between social movements and globalization and focuses on social movements in different national and historical contexts.

### **Adolescence and Delinquency (SYP 3530) 3 credits**

An analysis of sociological issues in defining delinquency in changing society; the nature of adolescence; current theories of delinquent behavior; modes of social control applied to juvenile delinquency.

### **Drugs and Society (SYP 3550) 3 credits**

This course explores issues of drug consumption, production and marketing from a sociological perspective. Students examine how drugs and drug use are socially defined, as well as how social contexts shape patterns of drug use. Students also learn about how legal drug use is shaped by the pharmaceutical industry, including the influence of companies on doctors, what drugs are sold in the market and how drugs are regulated by government agencies.

### **Social Control and Deviance (SYP 3570) 3 credits**

This course examines sociological theories of deviance (non-conformity to social norms) and social control, emphasizing types and causes of deviant behavior and the means of enforcing conformity.

### **Sociology of Popular Culture (SYP 3630) 3 credits**

This course examines different forms of popular culture, including art, music, literature, fashion and mass media from a sociological perspective. It also explores various meanings of popular culture and

its complex relations with folk culture, elite culture, subcultures, countercultures, mass media and social media.

### **The Sociology of Sport (SYP 3650 ) 3 credits**

This course is an introduction to the sociology of sports. It emphasizes the history and nature of sports, as well as the role that sports play in society, as well as interrelations between sports and other social institutions, including government, markets, the family, religion, education and the media.

### **Sociology of Youth (SYP 3714) 3 credits**

This course examines how young people's lives are shaped by social forces and how the youth, in turn, help to construct their social contexts. Topics include the social construction of childhood and youth as parts of the life course, the roles of media, schooling, family and peers in shaping youth identities, and the impact of the youth on their societies through music, subcultures and student movements.

### **Sociology of Aging and Dying (SYP 3740) 3 credits**

This course examines how aging and dying are defined, experienced and managed in contemporary society. Moving beyond purely biological understandings of aging and dying, this course explores how cultural values and norms, social psychological processes, demographic trends and social institutions shape these stages of the life course.

### **Youth Subcultures (SYP 3774) 3 credits**

This course examines young people who use music, fashion, slang and unique lifestyles to differentiate themselves from mainstream society. Drawing from case studies of b-boys, punks, skinheads, satanists, incels, ravers and other historical and contemporary subcultures, the course examines the causes and consequences of youth deviance; how youth employ deviance to express unmet needs, construct new identities and critique deficiencies they perceive in mainstream society; and why authority figures sometimes employ social control to suppress youth subcultures.

### **Constructing Sexuality (SYP 4063) 3 credits**

*Prerequisites: SYA 3010 and SYA 3300*

This course explores how social, cultural and political forces shape human sexuality. Specifically, it examines how sexual identity, behavior and desire are shaped by larger social and historical forces. Students explore the social construction of sexuality, how sexuality is perceived, defined and experienced in society.

### **Technology and Society (SYP 4421) 3 credits**

Psychological, sociological and economic aspects of technological developments on social life, with a primary emphasis on the impact of computing.

### **Globalization and Inequality (SYP 4453) 3 credits**

*Prerequisites: SYA 3010 and SYA 3300*

This course examines how markets, politics, technology and culture shape both global social inequalities and efforts to reduce them. Students learn different approaches to the study of globalization and apply them to analyze connections between local social issues and broader global forces.

### **Sociology of Climate and Disaster (SYP 4464) 3 credits**

*Prerequisites: SYA 3010 and SYA 3300*

This course provides a critical examination of climate change and natural and technological disasters by exploring the social causes, impacts, perceptions and/or consequences of disaster and climate change from a sociological perspective.

### **Sociology of Culture (SYP 4610) 3 credits**

*Prerequisites: SYA 3010 and SYA 3300*

This course examines the influence of mass media and culture industry on society, assessing how popular culture serves as an arena for political struggle. It also explores the role cultural beliefs and practices play in perpetuating social inequalities. Topics include the shaping of public consciousness by advertising, mass media and social media; the use of popular culture and propaganda to consolidate political power; the significance of lifestyle choices in the acquisition of social status; and cultural conflicts surrounding religion, sexuality, collective memory and social change.

## **Sociology Graduate Courses**

### **Seminar: Critical Perspectives in Social Theory (SYA 6117) 3 credits**

*Prerequisite: Admission to graduate study or permission of instructor*

Through in-depth reading of original texts, social histories, and/or novels/literary works, this seminar critically evaluates the assumptions, concepts, methods and explanations in classical and/or contemporary social theory and examines their relevance for the present time.

### **Seminar in Contemporary Social Theory (SYA 6126) 3 credits**

*Prerequisite: Admission to graduate study or permission of instructor*

Study of selected works of significant contemporary social theorists and core issues in contemporary social thought.

### **Seminar in Advanced Research Methods (SYA 6305) 3 credits**

*Prerequisite: Admission to graduate study or permission of instructor*

An advanced overview of research methods in current use in sociology, with a strong emphasis on quantitative analysis of social survey data. Major topics include inferences of testable propositions from theory, operationalization of key theoretical concepts, model building and assessment, and communication of outcomes.

**Seminar in Advanced Qualitative Methods (SYA 6315) 3 credits**

*Prerequisite: Admission to graduate study or permission of instructor*

An advanced overview of the most common types of qualitative research methods in sociology, including both theoretical considerations and fieldwork. An independent research project will be required.

**Directed Independent Study (SYA 6909) 1-3 credits**

*Prerequisite: Permission of instructor*

Reading and research in a field of sociology, a program to be selected and approved in consultation with the instructor.

**Master's Thesis (SYA 6971) 1-6 credits**

*Prerequisite: Admission to candidacy*

*Grading: S/U*

**Seminar in Urbanization (SYD 6426) 3 credits**

*Prerequisite: Admission to graduate study or permission of instructor*

An analysis of historical and contemporary urbanization as related to the forms and functions of the city. Selected theories of social change are employed in examining this process.

**Seminar in Global Environmental Perspectives (SYD 6517) 3 credit s**

*Prerequisite: Admission to graduate study or permission of instructor*

Examines the connections between society and the environment and between local experiences and global dynamics. Global environmental perspectives, disputes, politics and movements will be analyzed.

**Seminar in Race and Ethnic Relations (SYD 6705) 3 credits**

*Prerequisite: Admission to graduate study or permission of instructor*

A historical and comparative examination of the origin and nature of racial and ethnic differences as they manifest themselves in human societies.

**Special Topics (SYD 6934) 1-3 credits**

*Prerequisite: Admission to graduate study or permission of instructor*

Study of a selected area in sociology. Topics will vary.

### **Seminar in the Sociology of Religion (SYO 6205) 3 credits**

*Prerequisite: Admission to graduate study or permission of instructor*

A seminar in the sociology of religion, including sociological theories of religion, sects, cults, parareligious groups, civil religion, secularization and fundamentalism, and the impact of race, class, and gender on religious practice.

### **Seminar: State, Economy and Society (SYO 6335) 3 credits**

*Prerequisite: Admission to graduate study or permission of instructor*

Course examines the limits of disciplinary approaches to the study of state/society/economy and analyzes the interweaving relations of state, economy, and society from comparative and historical perspectives. Readings include theoretical texts, analytical applications, social histories, and literary works.

### **Seminar in Class, Status, and Power (SYO 6535) 3 credits**

A critical analysis of theory and research pertaining to the causes and consequences of structured social inequality.

### **Seminar in Microsociology (SYP 6035) 3 credits**

Sociological study of self and identity, thoughts and emotions, social interaction, intimate relationships, micro-level dimensions of social control and social power, and other selected topics in sociological social psychology.

### **Theatre and Dance Courses**

(Listed following the **Women, Gender and Sexuality Studies** courses, under [School of the Arts](#) , Theatre and Dance)

## WOMEN, GENDER AND SEXUALITY STUDIES

### **Undergraduate Courses/ [link to graduate courses](#)**

#### **History of U.S. Women (AMH 3560) 3 credits**

(See [History courses](#), this section)

#### **Gender and Culture (ANT 4302) 3 credits**

(See [Anthropology courses](#), this section)

**Women and Criminal Justice (CCJ 4670) 3 credits**

(See Criminology and Criminal Justice courses, College of Social Work and Criminal Justice section )

**Communication, Gender, and Language (COM 3014) 3 credits**

(See School of Communication and Multimedia Studies courses, this section)

**Women and Film (FIL 4056) 3 credits**

(See School of Communication and Multimedia Studies courses, this section)

**Women in Literature (LIT 4383) 3 credits**

(See English courses, this section)

**Feminist Philosophy (PHM 3123) 3 credits**

(See Philosophy courses, this section)

**Women and Politics (PUP 3323) 3 credits**

(See Political Science courses, this section)

**Psychology of Women (SOP 3742) 3 credits**

(See Psychology courses, College of Science section)

**Issues in Counseling Women (SOW 4357) 3 credits**

(See Social Work courses, College of Social Work and Criminal Justice section)

**Gender, Race and Communication (SPC 4712) 3 credits**

(See School of Communication and Multimedia Studies courses, this section)

**Family and Society (SYO 3100) 3 credits**

**Gender and Work (SYO 3370) 3 credits**

**Poverty and Society (SYO 3534) 3 credits**

(See Sociology courses, this section)

**Introduction to Women's Studies (WST 2010) 3 credits**

Multidisciplinary study of the heritage of women and the nature of gender-related problems in contemporary societies, stressing cultural images of women, socialization by gender, women's history, feminist methods of analysis. May be considered either an Arts and Humanities or Social Science course.

**Women, Gender and Power in the Global South (WST 2101) 3 credits**

This course provides an in-depth introduction to women's and gender issues in the global South. It examines how particular historical, cultural, economic, political and social processes, such as colonialism and global capitalism, impact the lives of men and women in countries in Africa, Asia, Arab societies, Latin America and the Caribbean.

### **Gender and Climate Change (WST 2351) 3 credits**

This course explores historical, philosophical, sociological and humanistic perspectives on how gender inequality across the globe is related to environmental damage and climate change. It examines feminist, indigenous and LGBTQ climate justice movements alongside the gendered implications of global policy and practices related to the history and development of thought on the environment.

### **Introduction to Sexuality and Gender Studies (WST 2608) 3 credits**

Introduces scholarly theories and methods to consider gender and sexuality as frames of analysis for understanding society and culture.

### **Introduction to Lesbian, Gay, Bisexual, Transgender and Queer Studies (WST 2643) 3 credits**

Multidisciplinary study of lesbian, gay, bisexual, transgender and queer peoples in contemporary societies, stressing culture, history, politics and theory.

### **Women, Gender and Sexuality Studies Study Abroad (WST 2951) 1-4 credits**

This revolving topics course provides a mechanism by which coursework completed abroad as part of an approved student program can be recorded on the transcript and counted toward graduation.

### **Sex, Myth, Power, and Popular Culture (WST 3305) 3 credits**

Examines varying images of women of power in popular culture—film, television, song, ads—as mothers, monsters, femme fatales, amazons, witches, and goddesses. These stories and images are interpreted based on ancient myths and beliefs.

### **Gender-Based Violence and Social Movements (WST 3325) 3 credits**

This course provides students with an overview of gender-based violence in contemporary U.S. society by analyzing texts about such violence and artifacts from popular culture (e.g., novels, advertisements, etc.) with the goal of understanding the prevalence and pervasiveness of gender-based violence. Students learn to identify examples of violence in everyday media and locate how individuals and collectives respond through social movements.

### **Special Topics (WST 3930) 1-3 credits**

Study of a particular issue, theme, or aspect of interdisciplinary Women's Studies. Topics will vary. May be repeated for credit.

### **Gender and Human Rights (WST 4113) 3 credits**

This course explores the legal and normative frameworks on gender and human rights, examining international and regional human rights systems. Students are asked to think critically about women's human rights while thinking comparatively about the varying international settings and the way they interact with these rights.

### **Sex, Violence, and Hollywood (WST 4337) 3 credits**

The class examines why sex and violence are the two main ingredients of Hollywood cinema and how the two interact to create meanings.

### **Green Consciousness (WST 4349) 3 credits**

*Writing Across Curriculum (Gordon Rule)*

This class explores emerging green or environmental consciousness in various cultural venues (theory/activism, spirituality, philosophy, literature, art, and popular culture).

### **Intersectional Feminist Politics in the U.S. (WST 4404) 3 credits**

This class examines the intersectional experience of women of color in the U.S., using a decolonial feminist lens. The class focuses on strategies of liberation across race, class, gender and sexuality, including performance, music, dance and comedy.

### **Gender and Sport (WST 4614) 3 credits**

Gender and Sport offers an interdisciplinary examination of the relationship between gender and athletic activity. Through lecture and discussion, students study the meaning and practice of sport in relation to gender, sex and sexuality. Students critically examine organized physical play through feminist and intersectional analytical lenses.

### **Men and Masculinities (WST 4621) 3 credits**

The course explores the multiple meanings and intersectional significance of "manhood" and "masculinity." With a focus on men, the course aids students in exploring how gender, as an idea and social institution, functions to organize and shape lives in the United States and beyond. The class focuses on the relationship between conceptions of masculinity and popular culture, sports, work, politics, warfare, the family, health, violence and sexuality.

### **Special Topics (WST 4930) 1-3 credits**

Intensive study at an advanced level of a particular issue, theme, or aspect of interdisciplinary Women's Studies. Topics will vary. May be repeated for credit.

### **Directed Independent Study (WST 4905) 1-3 credits**

*Prerequisite: Permission of instructor and the Women, Gender and Sexuality Studies director*

Independent reading and research in interdisciplinary Women's Studies. Each program of study is arranged in consultation with a Women's Studies faculty member during the term prior to taking this course.

### *Elective Courses*

#### **Victimology (CCJ 3666) 3 credits**

(See [Criminology and Criminal Justice courses, College of Social Work and Criminal Justice section](#) )

#### **American Multicultural Discourse (SPC 3704) 3 credits**

#### **Intercultural Communication (SPC 3710) 3 credits**

#### **Rhetoric of Social Protest (SPC 4633) 3 credits**

(See [School of Communication and Multimedia Studies courses, this section](#))

#### **Human Sexuality and Social Change (SYP 3060) 3 credits**

(See [Sociology courses, this section](#))

### **Women, Gender and Sexuality Studies Graduate Courses**

#### **Feminist Pedagogy and Professionalization (WST 6007) 3 credits**

This course empowers students with an interest in women's studies, gender studies, LGBTQ studies, sexuality studies and/or feminist theory to develop their own unique plan for their careers as educators, scholars and professionals from a decolonial and feminist perspective.

#### **Gender, War and Peace Building (WST 6185) 3 credits**

*Prerequisite: B.A. degree or permission of instructor*

Examines the gendered nature of armed conflicts in civil and across international spaces with emphasis on distinctive ways in which women and girls are affected and respond. Attention is given to the role of states, civil society and historical processes, such as colonialism and globalization, in perpetuating conflict.

#### **Gender, Sexuality, Myth and Reality (WST 6306) 3 credits**

This course focuses on myths and beliefs about gender and sexuality associated with patriarchal consciousness and culture as these have been conveyed in religion, science, art, philosophy, literature and popular culture. In further looks at myths and beliefs, ancient and emergent, which challenge that consciousness and culture.

### **Gender-Based Violence and Social Movements (WST 6327) 3 credits**

*Prerequisite: B.A. degree or permission of instructor*

Examines violence based on gender, including violence against women and LGBTQ people, along with resistance to gender-based violence. This is an Academic Service Learning (ASL) course.

### **Sex, Violence and Hollywood (WST 6339) 3 credits**

This course examines why sex and violence are the two main ingredients of Hollywood cinema and how the two interact to create meanings.

### **Ecofeminism and Environmental Justice (WST 6348) 3 credits**

This course examines the history and evolution of ecofeminist and environmental justice, thought, and practice through its major womanist/feminist activists, theorists, and core issues.

### **Intersectional Feminist Politics in the U.S. (WST 6405) 3 credits**

Examines how issues of gender, race, ethnicity, and class shape the lives of women of color in the U.S., such as Native-American, African-American, Latin-American, and Asian-American women.

### **Feminist Theory and Praxis (WST 6564) 3 credits**

Survey of major statements in modern and contemporary feminist theory, with attention to their application in fields that may include the humanities, social sciences, and sciences, as well as national and global activism.

### **Sexuality and Gender Studies (WST 6604) 3 credits**

*Prerequisite: Graduate standing*

Introduces critical gender and sexuality studies, including Queer Theory, considering the relations between the history of sexuality and the politics of gender.

### **Gender, Health and Power (WST 6615) 3 credits**

This course assesses the role of power relations, particularly gender, ethnicity, social class, religion, and globalization in shaping the health status, the illness experiences and outcomes, and the form and substance of medical options available in local communities around the world. A focus on how health is differentially impacted for women and men will engender an examination of gender ideology in power relations.

### **Directed Independent Study (WST 6909) 1-3 credits**

*Prerequisite: Approval of Women, Gender and Sexuality Studies director*

Reading and research in Women's Studies interdisciplinary topics.

### **Graduate Research Seminar in Women's Studies (WST 6919) 3 credits**

*Prerequisite: Admission to candidacy*

Graduate project in research related to internship. Must be taken simultaneously with WST 6941.

*Grading: S/U*

### **Special Topics (WST 6934) 3 credits**

Reading and Research in interdisciplinary women's studies topics.

### **Seminar in Global Perspectives on Gender (WST 6936) 3 credits**

Interdisciplinary study of gender issues and the intersection with race and class in world regions.

### **Feminization of Poverty (WST 6938) 3 credits**

*Prerequisite: B.A. degree or permission of instructor*

Course examines issues pertaining to the feminization of poverty from a feminist and comparative perspective. Discussions will apply theoretical, historical, and empirical frameworks to analyze the gender dimensions of poverty and ways in which these frameworks structure our understanding of the feminization of poverty.

### **Graduate Internship in Women, Gender and Sexuality Studies (WST 6941) 3 credits**

*Prerequisite: Admission to candidacy*

Internship with agency or office pertaining to women, gender and sexuality studies. *Grading: S/U*

### **Master's Thesis (WST 6971) 1-6 credits**

*Prerequisite: Admission to candidacy*

*Grading: S/U*

## SCHOOL OF THE ARTS

The School of the Arts includes course offerings in Music, [Theatre and Dance](#), and [Visual Arts and Art History](#).

## MUSIC

**Undergraduate Courses/ [link to graduate courses](#)**

### **Music Composition Class (MUC 2211) 2 credits**

*Prerequisites: MUT 1111, permission of instructor*

Class instruction in music composition. Course may be repeated for credit for a maximum of 16 credits.

**Applied Music Composition (MUC 4231) 1-2 credits**

*Prerequisites: MUC 2211, MUT 4311 and/or permission of instructor*

Applied lessons in music composition. Students compose original works in a variety of media and styles. Course may be repeated for credit for a maximum of 4 credits.

**Composing and Arranging Music for Television and Radio Commercials (MUC 4600) 3 credits**

*Prerequisite: MUT 2117 with a grade of "C" or higher*

*Corequisite: MUS 4343*

This course is designed to teach the basic composing, arranging, and technical techniques required to score music for commercials and jingles.

**Music Composition for Film (MUC 4610) 3 credits**

*Prerequisite: MUT 2117, MUT 2341, permission of instructor*

Film composition is designed to teach the basic composing, arranging, and technical techniques required to score films and television.

**Introduction to Music Education (MUE 2040) 3 credits**

Designed as an introduction to MUE 4140, Choral Methods, and MUE 4330, Secondary Instrumental Methods, this course explores the field of music education. A 15-hour observation component is required.

**Vocal Pedagogy for the Music Classroom (MUE 2430) 1 credit**

This course is designed for music students who work with the singing voice. The course addresses basic vocal physiology, vocal health and preservation, vocal technique, voice classifications and common voice disorders (symptoms and treatments). It also provides an introduction to the International Phonetic Alphabet (IPA).

**Music Pedagogy and Methods Lab (MUE 2446L) 1-2 credits**

*Prerequisite: For students in the B.M.E. program*

*Corequisites: MUE 2450 and/or MUE 2460*

Intended for students in music education who are preparing to teach at the elementary or secondary level. This lab is directed toward applying competencies and understandings in a full instrumental setting that contributes to becoming a more effective instrumental music teacher. May be taken more than once.

**Woodwind Pedagogy and Methods (MUE 2450) 1 credit**

Methods and materials used in teaching woodwind instruments on the elementary and secondary school level.

**Brass Pedagogy and Methods (MUE 2460) 1 credit**

Methods and materials used in teaching brass instruments on the elementary and secondary school level.

**Percussion Pedagogy and Methods (MUE 2470) 1 credit**

Methods and materials used in teaching percussion instruments on the elementary and secondary school level.

**Music: Elementary School 1 (MUE 4013) 2 credits**

Not open to Music majors. See [Department of Teaching and Learning](#) for course description.

**Choral Methods (MUE 4140) 3 credits**

*Prerequisite: MUE 2040*

Methods and materials of teaching choral singing on the elementary and secondary school level.

**Elementary Music Methods 1 (MUE 4311) 2 credits**

This course is a state-mandated course prior to attaining certification, focusing on pedagogical content knowledge in music for music education majors. Students gain a working understanding of styles of learning; appropriate elementary general music scope and sequence; effective lesson planning and curricular design; implementation of musical skills and materials for the elementary music classroom; and impactful methodologies for teaching elementary music. Open to music majors only.

**Elementary Music Methods 2 (MUE 4313) 2 credits**

*Prerequisites: MUE 2040, MUE 4311*

This course focuses on pedagogical content knowledge in music for music education majors. Students gain a working understanding appropriate for elementary general music scope and sequence; effective lesson planning and curricular design; implementation of musical skills and materials for the elementary music classroom; and methodologies for teaching elementary music including Guitar, Orff, Kodaly and Dalcroze. Open to music majors only.

**Secondary Instrumental Methods (MUE 4330) 3 credits**

*Prerequisite: MUE 2040*

Practical experience in teaching singing, instrumental, rhythmic, listening, and creative activities in music to secondary school students. Study and evaluation of new materials and methods of teaching secondary school music.

### **String Pedagogy and Methods (MUE 4441) 1 credit**

Methods and materials used in teaching string instruments on the elementary and secondary school level.

### **Marching Band Pedagogy and Methods (MUE 4480) 1 credit**

*Prerequisite: MUE 2040 and MUT 2116 with grades of "C" or better*

Students learn to prepare for, administer and rehearse a comprehensive marching band program at the secondary school level.

### **Jazz Ensemble Pedagogy and Methods (MUE 4481) 1 credit**

*Prerequisite: MUT 2116 with grade of "C" or better*

Students learn to prepare for, administer and rehearse jazz bands at the secondary school level.

### **Field Experience Seminar (MUE 4946) 1 credit**

Course prepares students for participation in the academic year portion of the School of the Arts program funded through a grant from the Pew Educational Trust.

### **Choral Conducting 1 (MUG 3201) 1 credit**

*Prerequisites: MUH 4211 and MUT 4311 with grades of "C" or better*

*Corequisite: MUT 4311 with a grade of "C" or better*

The basic techniques of choral conducting and an introduction to choral literature.

### **Instrumental Conducting 1 (MUG 3301) 1 credit**

*Prerequisite: MUT 4311 with a grade of "C" or higher*

*Corequisite: MUT 4311 with a grade of "C" or higher*

Introduction to the basic techniques of instrumental conducting and to the appropriate literature.

### **Choral Conducting 2 (MUG 4202) 2 credits**

*Prerequisite: MUG 3201, MUH 4212, MUT 4311 with grades of "C" or better*

Theory and practice of choral conducting.

### **Advanced Choral Conducting (MUG 4203C) 2 credits**

*Prerequisite: MUG 4202 with minimum grade of "C"*

Continues the rigorous course of professional development for the future choral music educator/conductor. Students completing this course are prepared to conduct secondary school concert ensembles successfully.

### **Applied Orchestral Conducting (MUG 4303) 1-2 credits**

*Prerequisite: MUG 4304 with a grade of "C" or higher*

*Corequisite: Students must perform as a member of the FAU Orchestra or observe all rehearsals*

An advanced, in-depth study of standard orchestral repertoire in a wide variety of styles and periods as well as the study of the conducting and rehearsal techniques needed for the artistic realization of performance through applied lessons. This course may be repeated for credit.

### **Instrumental Conducting 2 (MUG 4304 ) 2 credits**

*Prerequisite: MUG 3301 with a grade of "C" or higher*

*Corequisite: 15 hours of observation or ensemble participation*

Theory and practice of conducting instrumental ensembles.

### **Instrumental Conducting 3 (MUG 4311) 2 credits**

*Prerequisite: MUG 4304 with minimum grade of "C"*

This course continues the rigorous course of professional development for the future instrumental music educator/conductor. Students completing this course are prepared to conduct secondary school concert ensembles successfully.

### **Music in Global Society (MUH 2121) 3 credits**

This course presents music as a vehicle for a culture-based understanding within and between individual, national and international identities. To that end, sociocultural themes including technology, politics, race and economics are presented from both internal and external perspectives in the context of select diverse global musical practices. Historical origins and consequences of those musical processes, such as the effects of the African diaspora on music of the Western Hemisphere, are examined in terms of historical, cultural and social interaction. This is a General Education course.

### **Rock & Roll in American Society (MUH 3023) 3 credits**

This survey course brings into focus the roots and historical perspective of Rock & Roll in American society. Musical and historical events and their effect on the development and evolution of Rock & Roll music from its inception to the present day are explored.

### **World Music Survey (MUH 3056) 3 credits**

An upper-division elective for non-majors, this course surveys and explores representative examples of non-Western music and culture from North and South America, Africa, Asia, and Oceania through lectures, listening, discussion, outside reading, and hands-on experience.

### **Ethnomusicology (MUH 3514) 3 credits**

A survey of the rich diversity of global traditions with an emphasis on the relationships between music and the people that participate in them. Music traditions from Africa, Asia, Europe, Oceania and North

and South America are explored through lectures, discussion, listening, assigned reading, participatory exercises, musical analysis and the study of music in its cultural context.

### **American Popular Music and Culture (MUH 3521) 3 credits**

The purpose of this course is to explore complex interrelations of American popular music styles utilizing four lines of inquiry: 1) those qualities that most clearly define a style; 2) the interaction among styles and the influence of one style on another; 3) the transformation of the commercially dominant style over the history of American popular music; 4) the stylistic evolution of genres within a specific time span. No prior musical training is required for the course.

### **Jazz in American Society (MUH 3801) 3 credits**

This survey course brings into focus the roots and historical perspective of Jazz in American society. Musical and historical events and their effect on the development and evolution of Jazz music from its inception to the present day are explored.

### **Musicology 1 (MUH 4211) 3 credits**

*Prerequisite: MUT 2116 with minimum grade of "C"*

This course is designed to develop familiarity with general musical concepts and styles from a broad spectrum of art, traditional, and popular musical perspectives, with a focus on fundamental knowledge for musicians including: 1) historical and cultural musical perspectives from European art and non-Western sources; 2) familiarity with musical terminology and analysis; 3) a broad understanding of European and non-Western musical instruments and vocal styles; 4) development of active listening and music-specific writing skills specifically aimed at music majors.

### **Musicology 2 (MUH 4212) 3 credits**

*Prerequisite: MUT 2117 with minimum grade of "C"*

A study of European Art music from antiquity to the modern era with a concentration on the musics from the High Baroque through the Romantic Eras. Develops familiarity with specific works while providing a holistic understanding of compositional and theoretical innovations through musical analysis, with an emphasis on interrelations between composers and compositions within and between historical epochs.

### **Musicology 3 (MUH 4213) 2 credits**

*Prerequisites: MUH 4212 and MUT 2117 with grades of "C" or better; Music and Music Education majors only*

A survey of American musical contributions of the 20th and 21st centuries. Emphasis is placed on American compositions that cross over and/or navigate the complex interrelationships between art and popular music genres.

### **Special Topics in Music History (MUH 4930) 3 credits**

*Corequisite or prerequisite: MUH 4211 or 4212*

In-depth study of selected aspects of music history and literature. Specific topic to be announced in advance of each semester.

### **History and Appreciation of Music (MUL 2010) 3 credits**

In this course, students survey the history of classical music from antiquity to the modern period, focusing on Western music. The curriculum may also integrate a variety of popular and global styles where appropriate. This is a General Education course.

### **History and Literature of Musical Theatre (MUL 3015) 3 credits**

Students study the development of the musical theatre genre from the beginnings as a uniquely American genre through the modern day. Study includes the history, development, and significant works in and of the genre.

### **Classical Guitar Literature (MUL 3430) 2 credits**

Survey of classical guitar concert and solo literature, chamber music, works for voice and guitar, and concertos.

### **Piano Literature 1 (MUL 4400) 3 credits**

*Prerequisite: MUH 4212 or permission of instructor*

This course is an in-depth study of solo keyboard literature from the Renaissance period to the Romantic era. Special emphasis is placed on exploring period instruments musical styles repertoire and performance practice.

### **Piano Literature 2 (MUL 4401) 3 credits**

*Prerequisite: MUH 4212 or permission of instructor*

A study of music literature for the piano from the Romantic through the 20th century. Required of all Classical Piano Performance majors.

### **Solo String Literature (MUL 4433) 2 credits**

A survey of major solo literature for bowed string instruments.

### **Survey of Wind and Percussion Solo Literature (MUL 4450) 2 credits**

Course includes listening, analysis, and grading of wind and percussion solo literature from the Baroque period to the present.

### **Survey of Wind and Percussion Chamber Literature (MUL 4451) 2 credits**

Course includes listening, analysis, and grading of wind and percussion chamber literature from the Baroque period to the present.

### **Survey of Orchestra Literature (MUL 4500) 3 credits**

This course provides a survey of orchestral literature from the Baroque through the 20th century, focusing on innovations, changing roles of orchestral instruments, performance style and techniques, and interpretative philosophies.

### **Wind Instrument Literature (MUL 4550) 3 credits**

*Prerequisites: MUG 3301*

A study of wind instrumental literature and history from the late Baroque through the 20th century.

### **Chamber Music Literature 1 (MUL 4561 ) 3 credits**

*Prerequisite: Successful completion of all requirements for MVK 2421, Applied Piano for Performance Majors, or permission of the instructor*

This course is an in-depth study of chamber music literature from the Renaissance period to the Romantic era. Special emphasis is placed on exploring period instruments, chamber music repertoire and performance practice.

### **Chamber Music Literature 2 (MUL 456 2 ) 3 credits**

*Prerequisite: MUL 4561 with a grade of "C" or higher*

A study of chamber music literature for piano with emphasis upon works for piano trio, quartet, and quintet from the 18th through the 20th century. Required for all Chamber Music/Accompanying majors.

### **Survey of Vocal Solo Literature (MUL 4602) 3 credits**

*Prerequisites: MUH 4211 and MUH 4212 with grades of "C" or higher*

A survey of vocal solo literature covering the art song, opera, oratorio, and cantata from the 1600 to the present.

### **Survey of Choral Music Literature (MUL 4643) 2 credits**

A survey of choral music history and literature from the Renaissance to the present.

### **Choral Literature and Techniques (MUL 4644) 3 credits**

*Prerequisite: MUG 4202 with minimum grade of "C"*

*Corequisite: MUG 4203C*

This course is designed for music education majors with emphasis in vocal/choral music. Topics covered involve score study/analysis, preparing the score for the education/rehearsal classroom and the

concert stage, and understanding the relationship between music and text. An overview of the history of choral music from the Renaissance era to living composers is incorporated in this course through selected repertoire.

### **Arts and Performance Entrepreneurship 1 (MUM 3052) 3 credits**

This course provides artistically inclined students with essential skills, knowledge and resources to thrive as successful creators. Students explore diverse income avenues, collaboration strategies and career development possibilities within the creative arts. Topics encompass business strategies, legal issues, communication skills, content creation and dissemination and entrepreneurship.

### **Introduction to the Music Business (MUM 3301) 3 credits**

An introduction to the history, principles, and practices of the music industry. Topics will include recording, publishing, copyrights, licensing, promotion and arts management, music and instrument merchandising, contracts, and music in mass communication.

### **Legal Issues for the Musician (MUM 3303) 3 credits**

*Prerequisite: Permission of instructor*

In-depth study of the legal aspects of the music business, including contract writing, copyright, royalties, performance rights organizations and licensing. Emphasis on practical experiences.

### **Sound Recording 1 (MUM 3663) 3 credits**

Course presents the basics of audio engineering and recording techniques in an interactive environment.

### **Sound Recording Lab 1 (MUM 3663L) 1 credit**

*Prerequisite: Permission of instructor*

*Corequisite: MUM 3663*

Students apply concepts from MUM 3663 Sound Recording 1 in groups to create projects to put into practical use with music engineering skills and processes. *Grading S/U*

### **Arts and Performance Entrepreneurship 2 (MUM 4053) 3 credits**

*Prerequisite: MUM 3052 or permission of instructor*

This course focuses on arts performance, creative entrepreneurship and monetization in the digital age. Students explore emerging technologies, the engagement of audiences in digital spaces and strategies for digital artistry through a mix of theoretical and practical experiences.

### **Music Publishing and Copyright (MUM 4304) 2 credits**

*Prerequisite: Permission of instructor*

Designed to teach students the basics of music copyright laws and the field of music publishing.

### **Live Sound Reinforcement (MUM 4628) 3 credits**

*Prerequisite: Permission of instructor*

To teach students the basics of audio engineering and live sound reinforcement in an interactive environment. Students work together in a collaborative effort to learn the processes and skills necessary to engineer live performances of music, theater, and public announcements.

### **Audio Post-Production for Picture (MUM 4642) 3 credits**

*Prerequisites: MUM 4664 with grade of "C" or better or permission of instructor; Commercial Music majors only*

An in-depth look at audio post-production for picture. Students learn about the various processes involved in recording, processing and mixing audio for use in TV and Film production as it applies to the sound recordist and mixer. Students focus on learning about the areas of Production, Audio, Foley, Sound Design and Mixing to spec for professional broadcast.

### **Sound Recording 2 (MUM 4664) 3 credits**

*Prerequisite: MUM 3663*

In-depth application of advanced principles of audio recording and mixing.

### **Sound Recording 3 (MUM 4665) 3 credits**

*Prerequisites: MUM 4664 with grade of "C" or better; for Majors in Commercial Music: Music Technology concentration*

An advanced look at genre-based recording aesthetics pertinent to the prominent styles of contemporary music production. Stylistically based technical and artistic choices for genres of popular music, rock, EDM, jazz and acoustic music are given a critical analysis from a theoretical and practical level. Students focus primarily on mixing and mastering aesthetics as well as in studio production techniques for project completion.

### **Music Production (MUM 4723) 3 credits**

*Prerequisite: MUT 2117, permission of instructor*

*Corequisite: MUS 4343*

The study of the artistic and technical skills necessary to be a music producer, with a focus on record production.

### **Artist Management (MUM 4724) 2 credits**

*Prerequisite: Permission of instructor*

Covers important aspects of the art and practice of touring, booking, management, promotion and marketing of creative artists. It involves managing the venues, contracts, multi-media promotions,

professional agents and attorneys.

### **Music Marketing and Public Relations (MUM 4732) 2 credits**

Students will explore marketing, promotion, and public relations techniques employed to promote sales of recorded music and other commercial development of musical artists.

### **Commercial Music Ensemble (MUN 1014) 0 credit**

*Prerequisite: Permission of instructor*

Group performance experience in a wide variety of popular music genres. Class may be repeated. *Grading: S/U*

### **Pep Band (MUN 1100) 0 credit**

The Pep Band is designed to promote the advancement of the University through entertainment, artistic performance and school spirit while enhancing the collegiate, life-building experience of the membership. Class may be repeated. *Grading: S/U*

### **University Marching Band (MUN 1110) 0-1 credit**

The Florida Atlantic University Marching Band is designed to promote the advancement of the University through entertainment, artistic performances, and school spirit, while enhancing the collegiate, life-building experience of FAU students. Class may be repeated. *Grading: S/U*

### **University Symphony Band (MUN 1130) 0 credit**

This course provides member musicians with an environment in which personal artistic growth may occur through the performance of quality music for winds. Members collaborate with other dedicated musicians in an effort to foster personal musicianship in an ensemble environment while producing performances that are both well prepared and presented in an artistic manner. Class may be repeated. *Grading: S/U*

### **University Wind Ensemble (MUN 1140) 0 credit**

*Prerequisite: Permission of instructor*

The Florida Atlantic University Wind Ensemble provides member musicians with a rich artistic experience through the performance of quality music for winds. As specific skills related to ensemble playing strengthen, the musicianship of the ensemble members flourishes and combines to create the incomparable experience of meaningful, artistic performance. Class may be repeated. *Grading: S/U*

### **University Symphony Orchestra (MUN 1210) 0 credit**

*Prerequisite: Permission of instructor*

The University Symphony Orchestra is dedicated to performing standard repertoire in a wide variety of

styles and periods at the highest level of musicianship. Class may be repeated. *Grading: S/U*

**Vocalis (MUN 1310) 0 credit**

*Prerequisite: Permission of instructor*

A choral ensemble performing a wide repertoire of choral literature. Class may be repeated. *Grading: S/U*

**Women's Chorus (MUN 1320) 0 credit**

*Prerequisite: Permission of instructor*

A choral ensemble comprising treble voices performing a wide repertoire of choral literature. Class may be repeated. *Grading: S/U*

**Chamber Singers (MUN 1340) 0 credit**

*Prerequisite: Permission of instructor*

A chamber ensemble performing a wide repertoire of chamber songs. Class may be repeated. *Grading: S/U*

**Concert Percussion Ensemble (MUN 1440) 0 credit**

*Prerequisite: Permission of instructor*

The Florida Atlantic University Concert Percussion Ensemble provides member musicians with a rich artistic experience through the performance of quality music for concert percussion. Class may be repeated. *Grading: S/U*

**Jazz Orchestra (MUN 1710) 0 credit**

An instrumental ensemble performing works from the jazz band repertoire. Performances are presented both on and off campus. Class may be repeated. *Grading: S/U*

**¡Cantemos!, Latin American Music Ensemble (MUN 1821) 0 credit**

*Prerequisite: Permission of instructor*

A choral ensemble performing a wide repertoire of Latin American choral literature. Class may be repeated. *Grading: S/U*

**Commercial Music Ensemble (MUN 4015) 1 credit**

*Prerequisite: Audition required*

This ensemble provides students with the tools and experience necessary to excel as studio and performing musicians in the commercial music world. Students analyze, study, arrange, and perform a variety of commercial music styles, including, but not limited to, rock, pop, jazz, funk, alternative, country, soul, R & B, Latin, and world music. May be repeated for credit for a maximum of 16 credits.

### **Pep Band (MUN 4103) 1 credit**

*Prerequisite: Audition required*

The Florida Atlantic University Pep Band is designed to promote the advancement of the University through entertainment, artistic performance, and school spirit while enhancing the collegiate, life-building experience of the membership. May be repeated for credit for a maximum of 16 credits.

### **University Marching Band (MUN 4113) 1-3 credits**

*Prerequisite: Audition required*

The FAU Marching Band is open to all regularly enrolled University students after clearing entry with the Director of Bands. The University Band will read and perform literature on the field and in the stands at home football games and selected away games and at pep rallies, ranging from arrangements of light classics to pop and rock. May be repeated for credit for a maximum of 24 credits.

### **University Symphony Band (MUN 4133) 1 credit**

*Prerequisite: Audition required*

The Florida Atlantic University Symphony Band provides member musicians with an environment in which personal artistic growth may occur through the performance of quality music for winds. Members collaborate with other dedicated musicians in an effort to foster personal musicianship in an ensemble environment while producing performances that are both well-prepared and presented in an artistic manner. May be repeated for credit for a maximum of 16 credits.

### **Chamber Winds (MUN 4144) 1 credit**

The performance of advanced chamber wind music from the 16th through the 20th centuries by a chamber ensemble of ten to 16 wind instrumentalists. Open by audition. May be repeated for credit for a maximum of 16 credits.

### **University Symphony Orchestra (MUN 4213) 1 credit**

*Prerequisite: Audition required*

The Florida Atlantic University Symphony Orchestra is dedicated to performing standard repertoire in a wide variety of styles and periods at the highest level of musicianship. May be repeated for credit for a maximum of 16 credits.

### **University Chorus (MUN 4313) 1 credit**

*Prerequisite: Previous experience or permission of instructor*

To experience a high level of choral music education and performance of standard choral literature 14th-20th centuries through the opportunities available in rehearsals, concerts, and all other choral-oriented activities. May be repeated for credit for a maximum of 16 credits.

### **Vocalis (MUN 4323) 1 credit**

*Prerequisite: Audition required*

A vocal ensemble comprised of female voices performing a wide repertoire of choral literature for the female voice. May be repeated for credit for a maximum of 16 credits.

### **Chamber Singers (MUN 4343) 1 credit**

*Prerequisite: Audition required*

A choral ensemble of mixed voices performing a wide repertoire of chamber choral literature. May be repeated for credit for a maximum of 16 credits.

### **University Wind Ensemble (MUN 4423) 1 credit**

*Prerequisite: Audition required*

The Florida Atlantic University Ensemble provides the member musicians with a rich musical experience through the performance of quality music for winds. Open to students by audition. May be repeated for credit for a maximum of 16 credits.

### **Concert Percussion Ensemble (MUN 4443) 1 credit**

*Prerequisite: Audition required*

The Florida Atlantic University Concert Percussion Ensemble provides members musicians with a rich artistic experience through the performance of quality music for concert percussion. May be repeated for credit for a maximum of 16 credits.

### **Instrumental Chamber Music (MUN 4463) 1 credit**

The study and performance of chamber music literature appropriate to the following instrumental areas, in any combination: piano (harpsichord, organ), strings, woodwinds, brass, percussion, guitar and harp. May be repeated for credit for a maximum of 16 credits.

### **Jazz Guitar Ensemble 1 (MUN 4486) 1 credit**

*Prerequisite: Audition required*

Course teaches the techniques and methodology of playing in a jazz guitar ensemble by performing arranged jazz charts, sight-reading and improvisation concepts. Class may be repeated.

### **Jazz Guitar Ensemble 2 (MUN 4488) 1 credit**

*Prerequisite: Audition or MUN 4486*

Based on techniques learned and used in Jazz Guitar Ensemble 1, this course explores more complex techniques and methodologies in improvisational concepts, sectional playing, performing challenging charts/arrangements and sight-reading. Class may be repeated.

### **Jazz Orchestra (MUN 4713) 1 credit**

*Prerequisite: Audition required*

An instrumental ensemble performing works from the jazz band repertoire. Performances are presented both on and off campus. May be repeated for credit for a maximum of 16 credits.

### **Chamber Jazz (MUN 4714) 1 credit**

The performance of standard and contemporary jazz works by jazz combos with emphasis on improvisation and group interaction. Open by audition. May be repeated for credit for a maximum of 16 credits.

### **¡Cantemos!, Latin American Choral Ensemble (MUN 4823) 1 credit**

A chamber choral ensemble performing a wide repertoire of choral literature from the Iberian Peninsula, the Caribbean and Latin America. Class may be repeated.

### **Opera Workshop (MUO 1501) 0 credit**

*Prerequisite: Permission of instructor*

Students have the opportunity to perform scenes from the opera repertoire and improve skills associated with performing, such as acting, movement, stylistic choices and working with the director. May be repeated for credit. *Grading: S/U*

### **Opera Workshop (MUO 4503) 2 credits**

*Prerequisites: MUS 2201 and approval of the area chair*

Students have the opportunity to perform scenes from the opera repertoire and improve skills associated with performing, such as acting, movement, stylistic choices and working with the director. May be repeated for credit.

### **Commercial Music Forum (MUS 1010) 1 credit**

*Prerequisite: Music majors only*

This course is designed as a forum with the overall goal of bringing together and stimulating interaction between students in the commercial music program. Weekly activities include, but are not limited to, committee heads' reports, film and/or video presentations, individual committee and heads' meetings, presentations by visiting music industry professionals, and general reports of Hoot/Wisdom label activities.

### **Concert Attendance (MUS 1011) 0 credit**

*Prerequisite: Music majors only*

Concert attendance enables students to experience a variety of student, faculty, and other professional-level performances. Music majors must register for Concert Attendance until they have received a

minimum of six satisfactory grades. Transfer students must consult the Music Department to determine the appropriate minimum requirements. *Grading: S/U*

**Alexander Technique for the Musician (MUS 1804) 0 credit**

Students learn to recognize and change habitual patterns of thought and movement that interfere with optimal performance in daily activities and in their performance discipline. *Grading: S/U*

**University Honors Seminar in Music (MUS 1930) 3 credits**

*Writing Across Curriculum (Gordon Rule)*

A seminar in the University Honors Program on topics in music.

**Diction for Singers 1: An Introduction (MUS 2201) 1 credit**

*Prerequisites: Must have two semesters of MVV Applied Voice at FAU and/or approval of the vocal area chair*

A vocal music course in lyric diction, meeting twice weekly, covering the basic concepts of the International Phonetic Alphabet and its application to English, Italian, German, French, Spanish and Latin song literature.

**Music Study Abroad (MUS 2952) 1-6 credits**

*Prerequisite: Sophomore standing*

Credit for enrollment in approved study abroad programs.

**Diction for Singers 3: French (MUS 3222) 1 credit**

*Prerequisite: MUS 2201 with a grade of "C" or higher*

A vocal music course consisting of in-depth study of French lyric diction.

**Diction for Singers 2: German (MUS 3232) 1 credit**

*Prerequisite: MUS 2201 with a grade of "C" or higher*

A vocal music course consisting of in-depth study of German lyric diction.

**Cooperative Education - Music (MUS 3949) 1-2 credits**

**Computer Music Sequencing (MUS 4343) 3 credits**

*Prerequisite: Read music, computer familiarity*

Course covers the basics of music MIDI programming and music audio recording techniques in an interactive environment.

**Alexander Technique for the Musician (MUS 4802) 1 credit**

*Prerequisite: For Music majors only*

Students learn to recognize and change habitual patterns of thought, posture and movement that can interfere with optimal performance within their specific music performance area.

### **Directed Independent Study (MUS 4905) 1-3 credits**

*Prerequisite: permission of department*

Total credit for independent study in any one semester is restricted. Intensive study of theoretical or historical topics and composition. Research paper or composition required. Consult Department advisor.

### **Topic Research (MUS 4910) 1 credit**

*Prerequisite: Permission of instructor*

This course for majors is to be taken the penultimate semester of the senior year as a preparation for the Research Project, MUS 4912, a requirement for the Bachelor of Arts Degree in Music. The purpose of this course is to facilitate approval of the research project topic and to begin the process of documentation of that project through gathering source material and construction of an outline.

*Grading: S/U*

### **RI: Commercial Music Topic Research (MUS 4911) 1 credit**

*Prerequisite: Commercial Music majors only by permission*

A research-intensive (RI) course taken by Commercial Music Composition and Business concentration students during the penultimate semester of their senior year as prerequisite for the Commercial Music Research Project, MUS 4913.

### **Research Project (MUS 4912) 3 credits**

*Prerequisite: MUS 4910*

This course is taken the final semester of the senior year in fulfillment of the Bachelor of Arts Degree in Music. The course requirements consist of an independent research project on an original topic in music history or theory and a formal paper at the advanced level with full supporting documentation.

### **RI: Commercial Music Research Project (MUS 4913) 3 credits**

*Prerequisite: Satisfactory completion of MUS 4911; Commercial Music majors only*

This is a research-intensive (RI) course taken the final semester of the senior year to fulfill the requirements for the Bachelor of Music with Major in Commercial Music degree, for the purpose of completing an original research project in keeping with the objectives of the student's degree concentration area.

### **Special Topics (MUS 4930) 1-3 credits**

*Prerequisite: Permission of instructor*

The study of a special area of music. Topics may vary. May be repeated for credit for a maximum of 9 credits.

**Commercial Music Internship (MUS 4940) 1-4 credits**

*Prerequisite: Permission of Commercial Music Department*

Internship that reflects the student's track within the Commercial Music Degree. Credits will vary depending upon content of internship, to be determined by the Commercial Music advisors. Grading: S/U

**Music Study Abroad (MUS 4957) 1-6 credits**

*Prerequisite: Sophomore standing*

Credit for enrollment in approved study abroad programs.

**Music Theory 1 (MUT 1111) 3 credits**

An integrated study of the rhythmic, melodic and harmonic elements of music. Topics include the study of pitches and pitch classes, simple and compound meters, scales, intervals, triads, seventh chords and basic counterpoint.

**Music Theory 2 (MUT 1112) 3 credits**

*Prerequisite: MUT 1111 with a grade of "C" or higher*

A continuation of MUT 1111 designed to provide an in-depth study of diatonic harmony and tonicization. Topics include four-part, chorale-style writing, dominant sevenths, embellishing tones, voice-leading chords, diatonic sequences and secondary dominants.

**Sight Singing and Ear Training 1 (MUT 1241) 1 credit**

Beginning course in the progressive study of sight singing and dictation. Designed to develop the aural skills necessary to recognize, write and reproduce music that students see or hear. Topics include solfege singing of major and minor scales and melodies, rhythmic reading and dictation series.

**Sight Singing and Ear Training 2 (MUT 1242) 1 credit**

*Prerequisite: MUT 1241 with a grade of "C" or higher*

A continuation of the aural skills learned in MUT 1241. Topics include solfege singing of the I and V7 tonalities in both major and minor modes in simple and compound meters, rhythmic reading with an emphasis on the subdivided beat and syncopations and dictation exercises.

**Music Theory 3 (MUT 2116) 3 credits**

*Prerequisite: MUT 1112 with a grade of "C" or higher*

A continuation of MUT 1112 designed to provide an in-depth study of chromatic harmony and form.

Topics include modulations, modal mixture, Neapolitan and augmented sixth chords and various tonal designs, such as counterpoint, invention, fugue, binary, ternary, sonata, sonatina, concerto, rondo, sonata-rondo and large ternary.

### **Music Theory 4 (MUT 2117) 3 credits**

*Prerequisite: MUT 2116 with a grade of "C" or higher*

A continuation of MUT 2116 designed to provide an in-depth study of 20th-century music and beyond. Topics include the construction and analysis of modes, scales, sets and set classes; the study of rhythm, meter and form in music after 1900; serialism; and recent trends.

### **Sight Singing and Ear Training 3 (MUT 2246) 1 credit**

*Prerequisite: MUT 1242 with a grade of "C" or higher*

A continuation of the aural skills learned in MUT 1242. Topics include solfege singing of the I, IV and V7 tonalities in both major and minor modes in simple and compound meters, movable clefs, seventh chords, rhythmic reading with an emphasis on irregular divisions and dictation exercises.

### **Sight Singing and Ear Training 4 (MUT 2247) 1 credit**

*Prerequisite: MUT 2246 with a grade of "C" or higher*

A continuation of the aural skills learned in MUT 2246. Topics include solfege singing of melodies with chromaticism, secondary dominants and borrowed chords, modulation, modes and modal mixture, rhythmic reading with an emphasis on asymmetrical and mixed meters and dictation exercises.

### **Introduction to Commercial Arranging (MUT 2341) 2 credits**

*Prerequisite: MUT 1112*

An introduction to harmony and arranging as used in commercial music. Course examines basic skills and techniques that translate to all commercial genres.

### **Music Theory: Orchestration (MUT 4311) 2 credits**

*Prerequisite: MUT 2117 with a grade of "C" or higher*

Scoring for small and large instrumental ensembles with emphasis on scoring for non-professional-level musicians.

### **Special Topics (MUT 4930) 1-3 credits**

#### ***Applied Music***

Because of the relatively complex nature of course numbering for all areas of applied music study, the student is advised to consult the Music Department office before registering for applied music. All applied music courses require permission of the instructor.

### **Beginning Didgeridoo Workshop (MVW 1020) 0 credit**

Course provides hands-on experience in learning and performing on the didgeridoo, an ancient Australian Aboriginal wind instrument capable of producing a wide range of timbres and rhythms. Course is designed to have positive benefits for non-musicians as well as vocalists and instrumentalists through focus on diaphragm breathing, instrument making and musical experimentation. May be repeated for credit. *Grading: S/U*

### **Class Piano 1 (MVK 1111) 1 credit**

*Prerequisite: Music majors only*

This course is designed to teach fundamental keyboard skills and competencies to non-piano Music majors.

### **Class Piano 2 (MVK 1112) 1 credit**

*Prerequisites: MVK 1111 with grade of "C" or higher; Music majors only*

A continuation of MVK 1111. This course is designed to teach fundamental keyboard skills and competencies to non-piano Music majors.

### **Applied Music Secondary MV (B,K,P,S,V,W 1210-1216) 1 credit**

Private instruction. For students whose curriculum requires study of a secondary instrument. Course may be repeated for a maximum of 2 credits. See Music Department for specific course requirements.

### **Applied Music Major, Harp (MVS 1215) 1-2 credits**

*Prerequisite: Audition required*

Freshman-level applied instruction in harp.

### **Applied Music Principal MV (B,K,P,S,V,W 1310-1316) 1 credit**

Freshman-level private instruction for non-performance majors studying their principal applied areas. May be repeated for a maximum of 2 credits. See Music Department for specific course requirements.

### **Applied Music Principal, Trumpet (MVB 1311)**

### **Applied Music Principal, French Horn (MVB 1312)**

### **Applied Music Principal, Trombone (MVB 1313)**

### **Applied Music Principal, Euphonium (MVB 1314)**

### **Applied Music Principal, Tuba (MVB 1315)**

### **Applied Music Principal, Piano (MVK 1311)**

### **Applied Music Principal, Harpsichord (MVK 1312)**

### **Applied Music Principal, Organ (MVK 1313)**

**Applied Music Principal, Percussion (MVP 1311)**

**Applied Music Principal, Violin (MVS 1311)**

**Applied Music Principal, Viola (MVS 1312)**

**Applied Music Principal, Violoncello (MVS 1313)**

**Applied Music Principal, Contrabass (MVS 1314)**

**Applied Music Principal, Guitar (MVS 1316)**

**Applied Music Principal, Voice (MVV 1311)**

**Applied Music Principal, Flute (MVW 1311)**

**Applied Music Principal, Oboe (MVW 1312)**

**Applied Music Principal, Clarinet (MVW 1313)**

**Applied Music Principal, Bassoon (MVW 1314)**

**Applied Music Principal, Saxophone (MVW 1315)**

**Applied Music Principal, Electric Guitar (MVJ 1313) 1-2 credits**

*Prerequisite: Audition required*

Freshman-level private instruction for non-performance majors studying their principal applied areas. May be repeated for credit. See Music Department for specific course requirements.

**Applied Music Principal, Electric Bass (MVJ 1314) 1-2 credits**

*Prerequisite: Audition required*

Freshman-level private instruction for non-performance majors studying their principal applied areas. May be repeated for credit. See Music Department for specific course requirements.

**Applied Music Major MV (B,K,P,S,V,W 1411-1416) 2 credits**

Freshman-level private instruction for performance majors studying their major applied area. May be repeated for a maximum of 4 credits. See Music Department for specific course requirements.

**Applied Music Major, Trumpet (MVB 1411)**

**Applied Music Major, French Horn (MVB 1412)**

**Applied Music Major, Trombone (MVB 1413)**

**Applied Music Major, Euphonium (MVB 1414)**

**Applied Music Major, Tuba (MVB 1415)**

**Applied Music Major, Piano (MVK 1411)**

**Applied Music Major, Harpsichord (MVK 1412)**

**Applied Music Major, Organ (MVK 1413)**

**Applied Music Major, Percussion (MVP 1411)**

**Applied Music Major, Violin (MVS 1411)**

**Applied Music Major, Viola (MVS 1412)**

**Applied Music Major, Violoncello (MVS 1413)**

**Applied Music Major, Contrabass (MVS 1414)**

**Applied Music Major, Guitar (MVS 1416)**

**Applied Music Major, Voice (MVV 1411)**

**Applied Music Major, Flute (MVW 1411)**

**Applied Music Major, Oboe (MVW 1412)**

**Applied Music Major, Clarinet (MVW 1413)**

**Applied Music Major, Bassoon (MVW 1414)**

**Applied Music Major, Saxophone (MVW 1415)**

**Class Piano 3 (MVK 2121) 1 credit**

*Prerequisites: MVK 1112 with grade of "C" or higher; Music majors only*

A continuation of MVK 1112. This course is designed to teach fundamental keyboard skills and competencies to non-piano Music majors.

**Class Piano 4 (MVK 2122) 1 credit**

*Prerequisites: MVK 2121 with grade of "C" or higher; Music majors only*

A continuation of MVK 2121. This course is designed to teach additional keyboard skills and competencies to non-piano Music majors.

**Applied Music Major, Harp (MVS 2225) 1-2 credits**

*Prerequisite: Audition required*

Sophomore-level applied instruction in harp.

**Applied Music Principal MV (B,K,P,S,V,W 2320-2326) 1 credit**

Sophomore-level private instruction for non-performance majors studying their principal applied area. May be repeated for a maximum of 2 credits. (See course description for MV(B,K,P,S,V,W) 1310-1316.) See Music Department for specific course requirements.

**Applied Music Principal, Electric Guitar (MVJ 2323) 1-2 credits**

*Prerequisite: Audition required*

Sophomore-level private instruction for non-performance majors studying their principal applied areas. May be repeated for credit. See Music Department for specific course requirements.

**Applied Music Principal, Electric Bass (MVJ 2324) 1-2 credits**

*Prerequisite: Audition required*

Sophomore-level private instruction for non-performance majors studying their principal applied areas.

May be repeated for credit. See Music Department for specific course requirements.

**Applied Music Major MV (B,K,P,S,V,W 2420-2426) 2 credits**

Sophomore-level private instruction for performance majors studying their major applied area. May be repeated for a maximum of 4 credits. (See course description for MV(B,K,P,S,V,W) 1411-1416.) See Music Department for specific course requirements.

**Introduction to Vocal Pedagogy (MVV 2601) 1 credit**

*Prerequisite: Open to Music majors only*

For students taking applied voice as an introduction to their instrument. The course addresses basic vocal psychology, vocal health and preservation, vocal techniques, an introduction to the International Phonetic Alphabet, voice classifications and common voice disorders (symptoms and treatments).

**RI: Beginning Didgeridoo Workshop (MVW 2920 ) 1 credit**

This one-credit research-intensive (RI) course utilizes the didgeridoo as a vehicle for the creation of individual musical expression via experimentation with Aboriginal and contemporary approaches to composition performance and improvisation.

**Commercial Class Piano (MVK 3173) 1 credit**

*Prerequisites: MVK 2121 with a grade of "C" or higher; Music majors only*

A continuation of MVK 2121. This course is designed to teach additional keyboard skills and competencies to non-piano commercial Music majors.

**Applied Music Principal MV (B,K,P,S,V,W 3330-3336) 1 credit**

Junior-level private instruction for non-performance majors studying their principal applied area. (See course description for MV(B,K,P,S,V,W) 1310-1316.) May be repeated for a maximum of 2 credits. See Music Department for specific course requirements.

**Junior Performance Recital (MVO 3330) 0 credit**

*Prerequisite: Must pass sophomore level of applied lesson and be recommended for recital by the applied area*

*Corequisite: Applied at the junior level (numbers will vary by instrument)*

This course is required of all Performance majors during the semester of their junior recital. The 30-minute Junior Performance Recital must include works from style periods as designated in the applied syllabus and as appropriate for the instrument. Junior Performance Recital must be taken in conjunction with an applied lesson 3000 level. *Grading: S/U*

**Applied Music Principal, Electric Guitar (MVJ 3333) 1-2 credits**

*Prerequisite: Audition required*

Junior-level private instruction for non-performance majors studying their principal applied areas. May be repeated for credit. See Music Department for specific course requirements.

**Applied Music Principal, Electric Bass (MVJ 3334) 1-2 credits**

*Prerequisite: Audition required*

Junior-level private instruction for non-performance majors studying their principal applied areas. May be repeated for credit. See Music Department for specific course requirements.

**Applied Music Major MV (B,K,P,S,V,W 3430-3436) 2 credits**

Junior-level private instruction for performance majors studying their major applied area. (See course description for MV(B,K,P,S,V,W) 1411-1416.) May be repeated for a maximum of 4 credits. See Music Department for specific course requirements.

**Classical Guitar Pedagogy (MVS 3606) 2 credits**

Survey of classical guitar pedagogical materials and techniques.

**RI: Advanced Didgeridoo Workshop (MVW 4040 ) 1 credit**

*Prerequisite: MVW 2920 with a grade of "C" or better or permission of instructor*

This research-intensive (RI) course builds upon skills achieved in the previous didgeridoo course and emphasizes more advanced application of creative approaches to composition and performance on the contemporary didgeridoo.

**Applied Music Principal MV (B,K,P,S,V,W 4340-4346) 1 credit**

Senior-level private instruction for non-performance majors studying their principal applied area. (See course description for MV(B,K,P,S,V,W) 1310-1316.) May be repeated for a maximum of 2 credits. See Music Department for specific course requirements.

**Senior Performance Recital (MVO 4340) 0 credit**

*Prerequisite: Must pass the Junior Performance Recital (MVO 3330) and be recommended for recital by the applied area*

*Corequisite: Applied at the senior level (numbers will vary by instrument)*

This course is required of all Performance majors during the semester of their senior recital. The 60-minute Senior Performance Recital must include works from style periods as designated in the applied syllabus and as appropriate for the instrument. Senior Performance Recital must be taken in conjunction with applied lesson 4000 level. *Grading: S/U*

**Senior Music Education Recital (MVO 4342) 0 credit**

*Prerequisite: Must pass junior level applied and be recommended for recital by the applied area*

*Corequisite: Applied at the senior level (numbers will vary by instrument)*

This course is required of all Senior Music Education majors during the semester of their recital. The 30-minute recital must include works from style periods as designated in the applied syllabus and as appropriate of the instrument. Senior Music Recital must be taken in conjunction with an applied lesson 4000 level. *Grading: S/U*

### **Applied Music Principal, Electric Guitar (MVJ 4343) 1-2 credits**

*Prerequisite: Audition required*

Senior-level private instruction for non-performance majors studying their principal applied areas. May be repeated for credit. See Music Department for specific course requirements.

### **Applied Music Principal, Electric Bass (MVJ 4344) 1-2 credits**

*Prerequisite: Audition required*

Senior-level private instruction for non-performance majors studying their principal applied areas. May be repeated for credit. See Music Department for specific course requirements.

### **Applied Music Major MV (B,K,P,S,V,W 4440-4446) 2 credits**

Senior-level private instruction for performance majors studying their major applied area. (See course description for MV(B,K,P,S,V,W) 1411-1416.) May be repeated for a maximum of 4 credits. See Music Department for specific course requirements.

### **Piano Pedagogy 1 (MVK 4631 ) 3 credits**

The course provides knowledge, skills and experience in teaching elementary-level piano students. It examines various teaching method books and techniques. Further, it delves into the business aspects of private teaching and offers a clear picture of the goals and objectives of professional teaching.

### **Piano Pedagogy 2 (MVK 4633C) 3 credits**

This course provides knowledge, skills and experience in teaching intermediate-level piano students. It examines a broad range of piano repertoire including concertos and piano ensembles. It focuses on the business aspects of private teaching and offers a clear picture of the goals and objectives of professional teaching.

### **Piano Pedagogy 3 (MVK 4641C) 3 credits**

This course provides knowledge, skills and experience in teaching advanced-level piano students. It examines a broad range of piano repertoire including concertos and piano ensembles. It focuses on the business aspects of private teaching and offers a clear picture of the goals and objectives of professional teaching.

### **Vocal Pedagogy (MVV 4640) 2 credits**

*Prerequisites: MUE 2430 and MUS 2201*

The anatomy and physiology of the breathing and vocal apparatus and other techniques as they apply to teaching voice in a one-on-one setting.

## **Music Graduate Courses**

### **Music Composition (MUC 6251) 2 credits**

*Prerequisite: Permission of instructor*

Applied lessons in composition. Students compose original works in a variety of media and styles. May be repeated for credit.

### **Advanced Composing and Arranging for TV/Radio Commercials (MUC 6605) 3 credits**

*Prerequisite: Permission of instructor*

Course teaches students the basic composing and arranging techniques required to score commercials and jingles.

### **Advanced Music Composition for Film (MUC 6615) 3 credits**

*Prerequisite: Permission of instructor*

Course is designed to teach the basic composing, arranging, and techniques required to score films and television.

### **Music Education Seminar (MUE 6938) 3 credits**

An overview of various aspects of music education, including discussion of historical background, problems, philosophy, and current trends. Required of all M.M. in Music candidates with graduate assistantships.

### **Graduate Choral Conducting (MUG 6205) 2 credits**

Study of representative examples of choral literature and the conducting and rehearsal techniques needed for artistic realization of their performance.

### **Applied Graduate Choral Conducting (MUG 6206) 1-2 credits**

*Prerequisite: MUG 6205*

This course is available to students who have passed the choral conducting audition and who have selected choral conducting as their principal instrument at the graduate level. May be repeated for credit.

### **Graduate Instrumental Conducting (MUG 6305) 2 credits**

Study of representative examples of band and/or orchestral literature and the conducting and rehearsal techniques needed for artistic realization of their performance.

### **Applied Graduate Instrumental Conducting (MUG 6309) 1-2 credits**

*Prerequisite: MUG 6305*

Advanced in-depth study of orchestral and wind ensemble conducting through applied private lessons. Score study including historical research and theoretical analysis are components of this course. May be repeated for credit.

### **20th-Century Music (MUH 6375) 3 credits**

A survey of the history, literature, and theoretical developments in the music of the 20th century.

### **World Music Seminar (MUH 6588) 3 credits**

A series of graduate seminars each focusing on a specific world musical tradition or area. May be repeated for credit.

### **Women Composers in the Western Tradition (MUH 6625) 3 credits**

A survey of the works and historical context of women composers from the Middle Ages through the present. Issues in feminist musicology will also be considered.

### **Music History Seminar (MUH 6935) 3 credits**

*Prerequisite: Must pass Music History Placement Exam*

An in-depth study of selected historically significant aspects of music history from the ancient Greeks to the present. Required of all M.M. candidates in Music.

### **Graduate Piano Literature (MUL 6410) 3 credits**

*Prerequisites: MUL 4400, 4401*

The study of advanced piano works will include those in large forms. Students will prepare parts of large works for class.

### **Graduate Classical Guitar Literature (MUL 6435) 2 credits**

*Prerequisite: Admitted to master's degree program in Music*

In-depth study of classical guitar solo literature, chamber music, works for voice and guitar and for guitar and orchestra.

### **Survey of Orchestra Literature (MUL 6505) 3 credits**

Course provides a survey of orchestra literature from the early classical period through the 20th century, focusing on innovations, the changing roles of orchestral instruments, performance style and techniques, and the interpretive and/or compositional philosophies of the composers studied.

### **Graduate Survey of the Concerto (MUL 6528) 3 credits**

*Prerequisite or Corequisite: MUS 6716*

This course surveys the major repertoire for solo instrument(s) and orchestra from the Baroque era through the present day. It offers the solo instrumentalist the opportunity to better analyze, interpret, and prepare for the performance of concertos with orchestra. Non-performers will also benefit from in-depth discussion of selected repertoire by major concerto composers.

### **Survey of Symphonic Wind Literature (MUL 6555) 3 credits**

Students completing this course will be able to aurally identify the pivotal, important, and major works of the symphonic wind repertoire.

### **Survey of Chamber Music Literature (MUL 6565) 3 credits**

Survey of chamber music repertoire for piano and one other instrument, piano four-hands, piano trio, quartet, and quintet.

### **Survey of Chamber Wind Literature (MUL 6567) 3 credits**

Students completing this course will be able to aurally identify the pivotal, important, and major works of the wind ensemble repertoire, including works for 8 to 24 winds and percussion.

### **Graduate Survey of Art Song (MUL 6606) 3 credits**

Course will survey the major repertoire for solo voice and piano from the Classical era through to the present day.

### **Advanced Studies in Choral Music: A Survey of Choral Literature (MUL 6648) 3 credits**

A survey of choral forms and their development: the madrigal, motet, mass, cantata oratorio, and secular choral settings of the 19th and 20th centuries as well as major works.

### **Survey of Opera Literature (MUL 6671)**

*Prerequisite:* Successful completion of the History entrance exam

A survey of opera literature in western history and culture, the course includes historical, musical and dramaturgical analysis of opera literature from its origins through the Modern Era.

### **Advanced Music Publishing and Copyright (MUM 6306) 2 credits**

*Prerequisite: Permission of instructor*

This course teaches students how to manage their intellectual property.

### **Advanced Legal Issues for the Musician (MUM 6307) 3 credits**

Course presents an in-depth study of the legal aspects of the music business with an emphasis on

recording contracts and music publishing issues.

### **Advanced Audio Engineering for the Musician (MUM 6627) 2 credits**

*Prerequisite: Permission of instructor*

Teaches students the basics of audio engineering and recording techniques in an interactive environment. Students use the FAU recording studio to create projects and work together in a collaborative effort. They learn the process and skills necessary to engineer their own recordings and work effectively in a professional recording studio.

### **TV and Film Audio Post-Production Methods (MUM 6647) 3 credits**

*Prerequisites: MUM 4664 or permission of instructor*

An in-depth look at the film and TV industry as it pertains to the field of audio engineering. Students engage in high-level content generation based on state-of-the-art practices used by professionals in the field.

### **Advanced Music Marketing and Public Relations (MUM 6726) 2 credits**

Course covers the marketing and publicizing of music. Targeting the proper demographics, pricing, packaging, alternative marketing, and public relations will all be discussed.

### **Advanced Music Production (MUM 6727) 3 credits**

*Prerequisite: Permission of instructor*

This course teaches the advanced study of the artistic and technical skills necessary to be a music producer with a focus on record production.

### **Advanced Commercial Music Ensemble (MUN 6018) 1 credit**

*Prerequisite: Audition required*

The ensemble provides students with the tools and experience necessary to excel as studio and performing musicians in the commercial music world. Students analyze, study, arrange and perform a variety of commercial music styles. May be repeated for credit.

### **Graduate Chamber Winds (MUN 6146) 1 credit**

*Prerequisite: Permission of Instructor*

A performing ensemble in the Department of Music, the Florida Atlantic University Chamber Winds course provides member musicians with a rich, artistic experience through the formal performance of quality music for chamber wind ensembles including works for 4 to 18 players. May be repeated for credit.

### **University Symphony Orchestra (MUN 6215) 1 credit**

*Prerequisite: Audition required*

The Florida Atlantic University Symphony Orchestra is dedicated to performing standard repertoire in a wide variety of styles and periods at the highest levels of musicianship. May be repeated for credit.

**Choral Ensembles: Graduate Level (MUN 6315) 1 credit**

*Prerequisite: Audition required*

The Florida Atlantic University Choral Ensembles are open to FAU students by audition only. Class activities include weekly rehearsals and a minimum of two performances per semester. Enrollment is not limited to music majors or minors. May be repeated for credit.

**University Wind Ensemble (MUN 6425) 1 credit**

*Prerequisite: Audition required*

The Florida Atlantic University Wind Ensemble performs major, important works in a wide variety of styles. Each semester there is at least one concert performance. May be repeated for credit.

**Graduate Concert Percussion Ensemble (MUN 6445) 1 credit**

The Florida Atlantic University Concert Percussion Ensemble is a performing ensemble within the Department of Music, providing member musicians with a rich artistic experience through the formal performance of quality music for concert percussion. May be repeated for credit.

**Graduate Collaborative Piano Performance (MUN 6458) 1 credit**

*Prerequisite: Audition demonstrating fluent sight-reading at Royal Conservatory of Music level five or above*

This course is designed to increase practical piano performing experience in the realm of collaborative arts through weekly work in small ensembles of two or more performers. May be repeated for credit.

**Graduate Instrumental Chamber Music (MUN 6465) 1 credit**

The study and performance of chamber music literature appropriate to the following instrumental areas in any combination: piano (harpsichord, organ), strings, woodwinds, brass, percussion, guitar and harp. May be repeated for credit.

**Graduate Vocal Chamber Music (MUN 6468) 1-2 credits**

*Prerequisite: Permission of instructor*

Study and performance of vocal chamber music from art song literature, operatic/oratorio small ensembles and vocal chamber works with keyboard and other instruments. May be repeated for credit.

**Graduate Chamber Jazz Ensemble (MUN 6715) 1 credit**

*Prerequisite: Entrance by audition*

The study, preparation, and performance of historic and contemporary works for small jazz ensembles. May be repeated for credit.

**Graduate Large Jazz Ensemble (MUN 6716) 1 credit**

*Prerequisite: Entrance by audition*

The study, preparation, and performance of historic and contemporary works for the large jazz ensembles. May be repeated for credit.

**World Music Ensemble (MUN 6806) 1 credit**

This variable topics course is performance-based learning of world music ensemble tradition(s). Each semester the class will explore the music and culture of select genres chosen from the traditions of Africa, the Americas, and Asia. May be repeated for credit.

**Opera Workshop 1 (MUO 6505) 1 credit**

*Prerequisite: Permission of instructor*

Provides students with a closer look at the skills and techniques needed to be successful on the operatic stage, including audition technique, scene and aria analysis, a basic craft for acting, improvisation, stage movement, language declamation and dramatic and musical preparation to culminate in a staged performance of opera scenes.

**Opera Workshop 2 (MUO 6507) 1 credit**

*Prerequisite: Permission of instructor*

Provides students with a closer look at the skills and techniques needed in improvisation, stage movement, language declamation and dramatic and musical preparation. The semester culminates in a staged performance of one or more scenes from the operatic literature.

**Advanced Studies in Choral Literature: Mass and Motet (MUR 6108) 3 credits**

An historical study of the development of the mass and motet as musical forms.

**Graduate Music Internship (MUS 5941) 1-3 credits**

*Prerequisite: Permission of instructor*

This course is designed for graduate students who want to experience a work environment in music. This internship may be obtained from outside venues by the student or by the music program at Florida Atlantic University. Internship must reflect the student's degree concentration. Credits will vary depending upon the content of Internship.

**Lyric Diction 1 (MUS 6205) 2 credits**

*Prerequisites: Previous study of lyric diction and International Phonetic Alphabet or permission of*

*instructor*

A course in diction reviewing concepts of International Phonetic Alphabet and covering aspects of lyric diction as it relates to the graduate art song and operatic repertoire, with particular emphasis on the English, Italian, German and French languages. The course is appropriate both for singers and collaborative pianists.

**Lyric Diction 2 (MUS 6206) 1 credit**

*Prerequisites: Previous study of lyric diction and International Phonetic Alphabet or permission of instructor*

Consists of in-class coaching in lyric diction reviewing concepts of International Phonetic Alphabet and covers aspects of lyric diction as it relates to the graduate art song and operatic repertoire, with particular emphasis on English, Italian, German and French languages. The course is appropriate for singers, choral conductors and collaborative pianists.

**Introduction to Graduate Research (MUS 6716) 2 credits**

A comprehensive review of library research facilities available for advanced study in all areas of music. Required of all M.M. candidates in Music.

**Alexander Technique for the Musician (MUS 6805) 1 credit**

*Prerequisite: Permission of instructor*

Students learn to recognize and change habitual patterns of thought and movement that interfere with optimal performance in daily activities and in their performance discipline.

**Directed Independent Study (MUS 6906) 1-4 credits**

*Prerequisite: Permission of instructor*

Total credit for independent study in any one semester is restricted. This is an intensive study of theoretical or historical topics and composition. A research paper or composition is required. Consult Department advisor. May be repeated for credit.

**Special Topics (MUS 6933) 1-5 credits**

*Prerequisite: Permission of instructor*

The study of a special area of music. Topic will vary. The course may be repeated for credit.

**Advanced Commercial Music Internship (MUS 6940) 1-3 credits**

*Prerequisites: Graduate standing, permission of instructor*

Designed for graduate students who want to experience a work environment in the music business. Assignments may include music licensing, copyright registration, audio engineering, concert promotion, royalty collection, public relations, music production, as well as other related music

industry activities. Credits vary depending upon the internship. *Grading: S/U*

### **Thesis/Recital/Lecture (MUS 6971) 1-6 credits**

Presentation of a project in the form of a thesis, performance recital, or a combined lecture/recital.

*Grading: S/U*

### **Graduate Project (MUS 6975) 4 credits**

*Prerequisite: Permission of instructor or project advisor*

This course is required as the final capstone course, in lieu of the thesis, for all students in the Commercial Music concentration or Composition option of the Master of Music degree. This course is taken during the semester of the student's final project or composition preparation and oral comprehensive exams based on the project prepared or the techniques and processes implemented in the composition. *Grading: S/U*

### **Graduate Recital (MUS 6976) 4 credits**

*Prerequisite: Permission of instructor*

This course is required as the final capstone course, in lieu of the thesis, for all Graduate Performance majors in the following concentrations: Applied instruments or Voice, Choral or Wind Conducting, during the semester of their recital. Includes a 60-minute performance and oral comprehensive exam based on the literature performed. *Grading: S/U*

### **Graduate Orchestration (MUT 6346) 2 credits**

*Prerequisite: Permission of instructor*

Scoring for a variety of instrumental ensembles, with a emphasis on concert, film and commercial music.

### **Music Seminar in Theoretical Styles (MUT 6935) 3 credits**

*Prerequisite: Must pass Graduate Music Theory Placement Exam or earn a grade of "B" or higher in MUT 6936*

Chronological study of harmonic, melodic, rhythmic, and formal features of traditional music by means of analysis along with the composition and performance of original works in specific forms and styles. Required of all M.M. in Music candidates.

### **Seminar in Music Theory Pedagogy (MUT 6936) 3 credits**

A survey of analytic and pedagogic problems in the field of music theory, including a study of materials and publications currently available. May not be taken for M.M. in Music degree credit.

### **Graduate Applied Music - Trumpet (MVB 6351) 1-2 credits**

May be repeated for credit.

**Graduate Applied Music - Horn (MVB 6352) 1-2 credits**

May be repeated for credit.

**Graduate Applied Music - Trombone (MVB 6353) 1-2 credits**

May be repeated for credit.

**Graduate Applied Music - Euphonium (MVB 6354) 1-2 credits**

May be repeated for credit.

**Graduate Applied Music - Tuba (MVB 6355) 1-2 credits**

May be repeated for credit.

**Graduate Applied Music - Piano (MVK 6351) 1-2 credits**

May be repeated for credit.

**Graduate Piano Pedagogy (MVK 6650) 3 credits**

Students will prepare teaching techniques on intermediate through advanced repertoire. Instructor will evaluate teaching techniques and suggestions. New concepts in teaching will be discussed.

**Graduate Piano Pedagogy 2 (MVK 6651) 3 credits**

*Prerequisite: MVK 6650*

Students will learn how to teach advanced piano works, including piano concerti, cyclic works, and longer piano sonatas.

**Graduate Applied Music - Percussion (MVP 6351) 1-2 credits**

May be repeated for credit.

**Graduate Applied Music - Violin (MVS 6351) 1-2 credits**

May be repeated for credit.

**Graduate Applied Music - Viola (MVS 6352) 1-2 credits**

May be repeated for credit.

**Graduate Applied Music - Violoncello (MVS 6353) 1-2 credits**

May be repeated for credit.

**Graduate Applied Music - String Bass (MVS 6354) 1-2 credits**

May be repeated for credit.

### **Graduate Applied Music - Guitar (MVS 6356) 1-2 credits**

May be repeated for credit.

### **Graduate Orchestral Repertoire (MVS 6550) 3 credits**

Applied course in orchestral excerpts for violin, viola, cello or double bass. Specific repertoire is determined by the applied lesson instructor. Students also attend weekly string studio class.

### **Graduate String Pedagogy (MVS 6650) 3 credits**

Concentrates on the pedagogy and technique of string performance.

### **Graduate Classical Guitar Pedagogy (MVS 6652) 2 credits**

*Prerequisite: Admitted to master's degree program in Music*

In-depth survey of classical pedagogical materials and techniques at beginning through advanced levels.

### **Graduate Applied Music - Voice (MVV 6351) 1-2 credits**

May be repeated for credit.

### **Vocal Pedagogy (MVV 6652) 2 credits**

Course provides students with resources and information regarding the anatomy and physiology of the vocal apparatus and practical methodology for the voice studio and the choral rehearsal.

### **Graduate Vocal Pedagogy 2 (MVV 6662) 1 credit**

*Prerequisite: MVV 6652*

Provides students with resources and information on practical methodology for voice studio. Students engage in supervised teaching.

### **Beginning Didgeridoo Workshop (MVW 6150) 1 credit**

The aim of this course is the development of basic didgeridoo techniques, such as circular breathing, tone production, and vocalization, through hands-on participation, group interaction, performance, and composition.

### **Advanced Didgeridoo Workshop (MVW 6160) 1 credit**

*Prerequisite: MVW 2920 or MVW 6150 with grade of "C" or higher or permission of instructor*

As a sequence to MVW 2920 or MVW 6150, this course will continue the development of playing techniques, with the goal of the development of a personal playing style through composition and performance.

### **Graduate Applied Music - Flute (MVW 6351) 1-2 credits**

May be repeated for credit.

### **Graduate Applied Music - Oboe (MVW 6352) 1-2 credits**

May be repeated for credit.

### **Graduate Applied Music - Clarinet (MVW 6353) 1-2 credits**

May be repeated for credit.

### **Graduate Applied Music - Bassoon (MVW 6354) 1-2 credits**

May be repeated for credit.

### **Graduate Applied Music - Saxophone (MVW 6355) 1-2 credits**

May be repeated for credit.

For all graduate-level applied music study:

*Prerequisites: Four years of undergraduate applied music and permission of instructor.*

Graduate applied music study may be repeated for credit.

## **THEATRE AND DANCE**

### **Undergraduate Courses/ [link to graduate courses](#)**

#### **Modern Dance 1 (DAA 2100) 3 credits**

A beginning course in the development of modern dance technique, composition and theory. May be repeated for credit.

#### **Ballet 1 (DAA 2200) 3 credits**

Beginning-level ballet technique course comprising terminology, anatomy, history, theory, and performance for students with little or no previous ballet experience. May be repeated for credit.

#### **Tap Dance 1 (DAA 2520) 3 credits**

A beginning course in the development of tap dance technique, composition and theory. May be repeated for credit.

#### **Modern Dance 2 (DAA 3109) 3 credits**

*Prerequisites: Permission of instructor; audition first day of class*

This course concentrates on various aspects of intermediate modern dance. These include rhythm, body

isolations, somatic practices, modern dance history and vocabulary. Anatomical and kinesiological principles that pertain to class content are also presented to encourage the student to perform the movement thoughtfully and correctly. Students master basic modern steps, gain a greater understanding of musicality, develop creative practices, create and perform self-choreography and analyze dance. May be repeated for credit.

### **Ballet 2 (DAA 3214) 3 credits**

*Prerequisites: Permission of instructor; audition first day of class*

This class is an intermediate/advanced level ballet course composed primarily of movement (performance as opposed to lecture) and includes movement projects, theory, observation, learning and performance of dance(s). Some dance history and anatomy for dancers are taught. Students are required to travel to and attend live professional dance performances and to perform. May be repeated for credit.

### **Jazz Dance (DAA 3508) 3 credits**

*Prerequisite: DAA 2100 or DAA 3214 or permission of instructor/audition*

A beginning course in the development of jazz dance technique, composition and theory. May be repeated for credit.

### **Dance for Musical Theatre (DAA 4583) 3 credits**

*Prerequisite: DAA 2200 or DAA 3508*

This course is composed primarily of movement and performance as opposed to lecture. There are movement projects, mock auditions, observation and performance of various musical theatre dance styles. Musical theatre dance history is taught and discussed through the art of dance. Students are required to travel to and attend live professional dance performances and to perform.

### **Appreciation of Dance (DAN 2100) 3 credits**

A study of the aesthetics, origins, and development of dance. Lecture, discussion, videos, and, when possible, live performances. This is a General Education course.

### **Directed Independent Study (DAN 4905) 1-4 credits**

### **Special Topics (DAN 4930) 1-3 credits**

*Prerequisite: Permission of instructor*

The study of a special area in dance. Topics will vary. May be repeated for credit.

### **Appreciation of Theatre (THE 2000) 3 credits**

In this course, students will explore dramatic structure, techniques and various organizational elements. The course provides an introduction to theatre as a collaborative art form through the critical analysis of

its historical context, production, theory and connections to theatrical literature, including the Western canon. This is a General Education course.

### **Script Analysis (THE 2305) 3 credits**

Lecture/discussion course designed to help the student learn how to read drama as a performance-based art form and imagine the transition from page to stage. A variety of classical and modern scripts are used.

### **History of Western Dress (THE 3262) 3 credits**

This course is a survey of the evolution of clothing styles and materials through history, from early Mid-Eastern ancient civilizations to the present day and includes identifying and examining movements and trends in clothing and fashion. Exploring how sociological, political, economic, artistic, geographic, technological and other factors have affected clothing through the ages illustrates the relationship between clothing and broad social, historical and artistic developments.

### **Production Hour (THE 3952) 1-2 credits**

*Prerequisite: TPA 2200 with a grade of "C" or better or permission of instructor*

Participation in the production program of the curriculum; work in preparation and performance. May be repeated.

### **Theatre History 1 (THE 4110) 3 credits**

History of theatre from the Greeks to the 17th century.

### **Theatre History 2 (THE 4111) 3 credits**

History of theatre from the 17th century to the present.

### **Classical World Drama (THE 4213) 3 credits**

This course offers a critical examination of selected classical dramatic works, from the Greek era through the Elizabethan, French Neoclassical, Restoration and Spanish Golden Age, with emphasis on their original staging and contemporary interpretations.

### **History of Design Styles for Theatrical Designers (THE 4282) 3 credits**

*Prerequisite: TPA 2000*

Students study decorative art and design from Classical Greece through the 20th century to help understand how design aesthetics change over time and to reinforce the relationships between design and the major historical events that shape each time period. Lectures focus on historical events and period aesthetics from the standpoint of how theatrical designers utilize the information to inform design choices.

### **History of Fashion and Decor 1 (THE 4284) 3 credits**

Survey of ancient through 14th century European historical detail in clothing, architecture and artifacts as a vocabulary used in theatrical design.

### **Shakespeare on Stage and Screen (THE 4335) 3 credits**

A seminar devoted to the study of selected plays by William Shakespeare, both comedies and tragedies, as they were performed from the Elizabethan era to the present day. Students learn to understand Shakespeare's texts as intended primarily for performance.

### **Drama on Stage and Screen (THE 4370) 3 credits**

Selected playscripts and screenplays are studied, with emphasis on analyzing how dramatic literature functions in the theatre and in motion pictures. Consideration is given to such matters as dramatic structure, genres, audience, and performance styles.

### **20th Century World Drama (THE 4371) 3 credits**

Critical examination of works by major dramatists of the 20th century from Chekhov and Synge through Samuel Beckett and Caryl Churchill, with emphasis on original staging, audience reaction and critical interpretations.

### **Directed Independent Study (THE 4905) 1-4 credits**

*Prerequisite: Permission of Department Chair*

May be repeated for credit.

### **Special Topics (THE 4930) 1-3 credits**

*Prerequisite: Permission of instructor*

The study of a special area in theatre. Topics will vary. May be repeated for credit.

### **Senior Capstone (THE 4950) 1-2 credits**

*Prerequisites: TPA 2200 with minimum grade of "C" or permission of instructor*

Students demonstrate what they have learned during their years as theatre design/tech majors as well as have a focused experience in their field in a supervisory position. Each student writes a paper reflecting on the knowledge gained and their experiences.

### **Production Capstone (THE 4954) 1-2 credits**

The capstone is a self-guided class required of all Theatre majors. It is designed to connect experiences and information gained during their research time at the University. Each student writes a paper reflecting on the knowledge gained and their experiences.

### **Summer Repertory Theatre Workshop (THE 4955) 1-18 credits**

The study and practical application of acting/directing and/or technical/design skills for repertory theatre performance. May be repeated for credit.

### **Visual Imagination (TPA 2000) 3 credits**

An introductory course dealing largely with the elements of design and the principles of composition as they apply to the various subdisciplines of theatre art.

### **Introduction to Production (TPA 2200) 3 credits**

Theory and stage practice in the planning, construction and operation of stage production elements and related equipment.

### **Theatrical Makeup (TPA 2248) 3 credits**

*Prerequisite: B.F.A. standing or by permission of instructor*

Actor training in the basic techniques of stage makeup application.

### **Sound Design (TPA 3262) 3 credits**

*Prerequisite: TPA 2200*

This is an introductory course to live and recorded sound use on the stage. This course introduces the process and skills necessary to analyze a script for sound needs, locate and capture the sounds, edit the sounds into a usable format and finally prepare the sounds for playback in a production.

### **Lighting Design 1 (TPA 3022) 3 credits**

*Prerequisites: TPA 2000 and TPA 2200*

This course enables students to develop an understanding of the equipment, process and paperwork involved in the creation of lighting for live theatre. Through this class, students explore what a lighting designer does, the processes a designer may use in the creation of a design and how the designer executes ideas.

### **Costume Design 1 (TPA 3045 ) 3 credits**

*Prerequisites: TPA 2000 and TPA 2200*

Course provides instruction in the basic techniques of theatrical costume design. Course includes figure drawing; how the elements and principles of design relate to and are utilized in costume design; collaboration; script analysis; research methods; costume design process; character analysis; the function and purpose of costumes in theatre; rendering techniques; and the use of various media.

### **Scene Design 1 (TPA 3064C ) 3 credits**

*Prerequisites: TPA 2000 and TPA 2200*

This course offers an introduction to the elements of design with a focus on conceptualization and problem solving. Students are also introduced to the professional design process used to create scenic designs for theatre productions. Students produce research and perspective and technical drawings used to communicate information to both the design team and the scene shop. Students also produce scale models of their designs.

### **Scenery Design Topics (TPA 3092) 3 credits**

*Prerequisites: TPA 2000 and TPA 2200*

Course covers special topics areas, such as scene painting, advanced rendering, and model construction. Course may be repeated for credit with new topic only.

### **Lighting Design Topics (TPA 3223C) 3 credits**

*Prerequisites: TPA 2000 and TPA 2200*

Course covers special topics areas, such as lens theory, electrical theory, automated luminaries, and paperwork. Course may be repeated for credit with new topic only.

### **Stage Costume Topics (TPA 3231) 3 credits**

*Prerequisites: TPA 2000 and TPA 2200*

Course covers special topics areas, such as dying and painting, costume crafts, patterning, construction, and millinery techniques. Course may be repeated for credit with new topic only.

### **Stage Technology Topics (TPA 3311C) 3 credits**

*Prerequisites: TPA 2000 and TPA 2200*

Course covers special topics areas, such as computer-aided design, welding, structural engineering, advanced carpentry skills, or scenic automation. Course may be repeated for credit with new topic only.

### **Drafting for the Theatre (TPA 3348C ) 3 credits**

*Prerequisites: TPA 2000 and TPA 2200*

Course focuses on drafting techniques, particularly on concepts and methods of using programs such as AutoCAD and Vectorworks for entertainment design and technology.

### **Costume Design 2 (TPA 4041) 3 credits**

*Prerequisite: Permission of instructor*

Advanced classroom and laboratory study of the principles of modern costume design for the theatre.

### **Stage Management (TPA 4601) 3 credits**

*Prerequisites: TPA 2000, TPA 2200, and TPP 2110*

Detailed study in stage management techniques and practical application during the preproduction,

rehearsal, and performance processes.

### **Senior Capstone (TPA 4950) 1-2 credits**

*Prerequisite: TPA 2200*

Students demonstrate what they have learned during their years as theatre design tech majors, while having a focused experience in their field in a supervisory position. Each student writes a paper reflecting on the knowledge gained and their experiences.

### **Acting 1 (TPP 2110) 3 credits**

A beginning-level acting class for theatre majors only. This course begins to define the highly disciplined process for the future professional actor. Explorations in three basic areas of human involvement; relationship to objects, environment, and people.

### **Voice for the Actor 1 (TPP 2710) 3 credits**

Study and practice in voice principles for the stage. Special emphasis on integrated use of voice and body, stage projection, and recognition of improper use of voice. Theatre majors only by permission of instructor.

### **Music Theatre Applied Studio/Voice 1 (TPP 2714C) 1-2 credits**

*Prerequisites: TPP 4721C with minimum grade of "C" or permission of instructor; for Music Theatre majors only*

Continuation of Music Theatre Voice Training with individualized instruction.

### **Music Theatre Craft (TPP 2740C) 1-2 credits**

*Prerequisite: For Music Theatre majors only or permission of instructor*

Introduction to the voice, diction and physiology of the voice of a Musical Theatre performer.

### **Music Theatre Applied Studio/Voice 2 (TPP 2741C) 1-2 credits**

*Prerequisites: TPP 2714C with minimum grade of "C" or permission of instructor; for Music Theatre majors only*

Continuation of Music Theatre Voice Training with individualized instruction.

### **Speech for the Actor 1 (TPP 2810 ) 3 credits**

*Prerequisite: TPP 2710*

Practice in skills of articulation and projection for the stage. Includes study of IPA "stage standard" speech and dialects.

### **Musical Theatre Technique (TPP 3251) 3 credits**

*Prerequisites: TPP 2110, permission of instructor*

Covers the techniques of acting for the musical theatre. Class work is largely performance-based, with an exploration of song scores as the actor's text. Explores characterization and issues of acting styles.

**Music Theatre Studio 1 (TPP 3257C) 0 credits**

*Prerequisite: Permission of instructor*

Introductory technical aspects of the voice as applied to Musical Theatre Singing through lyrics and script. *Grading: S/U*

**Movement for Actors (TPP 3510) 3 credits**

A course in developing awareness, freedom, and ease of movement. Students study a variety of movement disciplines and develop a movement vocabulary for use in warm-up, rehearsal, and performance.

**Stage Combat (TPP 3531) 3 credits**

*Prerequisites: TPP 2110 and TPP 4175*

A practical physical study for the intermediate to advanced actor, to safely create the illusion of stage violence. This course focuses on safe techniques, and the mental and physical discipline needed for unarmed as well as some armed combat within a scene study context.

**Voice for the Actor 2 (TPP 3711) 3 credits**

*Prerequisite: TPP 2710*

Continued study in voice production for the stage with emphasis placed on direct application of the principles to various forms of dramatic text and character development. Will focus on specific individual challenges in the voicing process. By permission of instructor.

**Speech for the Actor 2 (TPP 3730) 3 credits**

Advanced study of dialects and their application to the process of characterization.

**Music Theatre Applied Studio/Voice 3 (TPP 3745C) 1-2 credits**

*Prerequisites: TPP 2714C with minimum grade of "C" or permission of instructor; for Music Theatre majors only*

Continuation of Music Theatre Voice Training with individualized instruction.

**Music Theatre Applied Studio/Voice 4 (TPP 3747C) 1-2 credits**

*Prerequisites: TPP 3745C with minimum grade of "C" or permission of instructor; for Music Theatre majors only*

Continuation of Music Theatre Voice Training with individualized instruction.

### **Acting 4 (TPP 4140) 3 credits**

*Prerequisite: TPP 4176 or equivalent*

Advanced work in acting heightened language, specifically Shakespeare. This class is part technical and part practical. Technically, students learn iambic pentameter scansion, rhetoric, antithesis, imagery and scene scoring focusing on verse text. Practically, students learn how to apply the technical aspects to the imaginative, physical and vocal creative acting work.

### **Acting 2 (TPP 4175) 3 credits**

*Prerequisite: TPP 2110 or equivalent*

Studies and projects in the development of a variety of characters through a scene study approach, each assignment will have defined goals toward specific acting competencies.

### **Acting 3 (TPP 4176) 3 credits**

*Prerequisite: TPP 4175*

Projects in advanced characterization.

### **Audition and Career Forum (TPP 4224) 3 credits**

*Prerequisite: Theatre major or permission of instructor*

This course focuses on the transition from student to working actor. In addition to some practical mock audition work, lecture and discussion topics may include, but are not limited to: unions, agents, professionalism/attitude, résumés, headshots, casting procedures, auditions and the "day job."

### **Music Theatre Audition (TPP 4227C) 1-3 credits**

*Prerequisite: Music Theatre major or permission of instructor*

This course focuses primarily on the music theatre audition. Acting skills learned in previous classes are applied to the style of music theatre. Students learn a classical music theatre song and a contemporary music theatre song that are audition-ready by the end of the semester.

### **Music Theatre Scene Study (TPP 4252C) 1-3 credits**

*Prerequisite: Music Theatre major or permission of instructor*

This is an advanced scene study acting class for the B.F.A. Theatre major with a concentration in the style of music theatre. Preliminary work is in learning how to act heightened language, specifically music theatre. This class builds on actor training established in Acting 3 and Acting Shakespeare.

### **Music Theatre Studio 2 (TPP 4258C) 0 credits**

*Prerequisite: Permission of instructor*

Introductory technical aspects of the voice as applied to Musical Theatre Singing through lyrics and script. *Grading: S/U*

### **Acting 5 (TPP 4265) 3 credits**

*Prerequisites: TPP 2110, TPP 4175 and TPP 4176*

Advanced work in acting heightened language, specifically Moliere (heroic couplets), Restoration Comedy and Comedy of Manners (Wilde). This class is part technical and part practical. It covers scansion, inflection, rhetoric, antithesis, imagery and scene scoring, focusing on "heightened" texts.

### **Acting for the Camera 1 (TPP 4268C) 3 credits**

*Prerequisite: TPP 4175 or permission of instructor*

Course is focused on techniques to aid the actor in the transition from stage to film work. An examination of film acting and its unique challenges, this advanced acting course effectively examines many of the most common situations faced by the film actor and solutions to the problems they present.

### **Acting for the Camera 2 (TPP 4269) 3 credits**

*Prerequisite: TPP 4268C or permission of instructor*

This is an advanced acting class for the future acting professional, specifically advanced work in acting for the camera. Now that students are successfully getting "over the bar" in their camera work, this course begins a series of challenges to increase their acting for camera range. Through a series of in-class exercises, monologues and two-person scenes, students learn how to become versatile actors who can give the director what they need. Additionally, students learn how to adapt to various camera acting styles (superhero, classical acting, fight scenes, etc.). Finally, students continue to develop their audition/self-submit skills through in-class and at-home assignments.

### **Directing 1 (TPP 4310) 3 credits**

*Prerequisites: TPP 2110, TPP 4175 and permission of instructor*

Students gain practical experience in play direction through the study and application of script breakdown and analysis, basic staging techniques and basic directing theories. Students direct a scene or "10-minute" play.

### **Movement for the Actor 2 (TPP 4511) 3 credits**

*Prerequisite: TPP 3510 or permission of instructor*

Continued study in developing awareness, freedom and ease of movement for the stage with direct application of these principles to text and character study. Various theatre movement systems and luminaries are covered.

### **Stage Combat 2 (TPP 4532) 3 credits**

*Prerequisite: TPP 2110 or permission of instructor*

A practical study in blade play and violence for the stage. The focus is on safe technique, the physical

discipline of impulse response and moment-to-moment playing and reaction. 30 hours of a single Society of American Fight Director's recognized weapon (Unarmed/Hand to Hand, Rapier and Dagger, Knife, Single Sword/Swashbuckling, Broadsword, Sword and Shield, Smallsword, and Quarterstaff) is studied. A Skills Proficiency Test in the context of scene study will be given and adjudicated by an SAFD-recognized Fight Master.

### **Dramatic Writing for Stage and Screen 1 (TPP 4600) 3 credits**

*Prerequisite: Permission of instructor*

Study of the arts and craft of writing for the stage and film. Analysis of selected contemporary scripts. Students write a short play or film script.

### **Dramatic Writing for Stage and Screen 2 (TPP 4601) 3 credits**

*Prerequisite: TPP 4600*

Advanced work in writing for the stage and other media. Selected playscripts and screenplays will be examined. Students will write a full-length play or screenplay.

### **Music Theatre Performance (TPP 4721C) 1-2 credits**

*Prerequisites: TPP 2740C with minimum grade of "C" or permission of instructor; for Music Theatre majors only*

Technical aspects of the voice as applied to musical theatre singing through lyrics and script.

### **Music Theatre Applied/Studio Voice 5 (TPP 4748C) 1-2 credits**

*Prerequisites: TPP 3747C with minimum grade of "C" or permission of instructor; for Music Theatre majors only*

Continuation of Music Theatre Voice Training with individualized instruction.

### **Music Theatre Applied/Studio Voice 6 (TPP 4749C) 1-2 credits**

*Prerequisites: TPP 4748C with minimum grade of "C" or permission of instructor; for Music Theatre majors only*

Continuation of Music Theatre Voice Training with individualized instruction.

## **Theatre and Dance Graduate Courses**

### **Directed Independent Study (DAN 5905) 1-3 credits**

*Prerequisite: Permission of instructor*

Reading and research in an area of dance. The topic is to be approved by the instructor. The course may be repeated for credit.

### **Special Topics in Dance (DAN 5930) 1-3 credits**

*Prerequisite: Permission of instructor*

The study of the selected area in dance. Topics may vary. The course may be repeated for credit.

### **Special Topics (THE 5930) 1-3 credits**

The study of a special area in theatre. Topics will vary. May be repeated for credit.

### **Graduate Script Analysis (THE 6309) 3 credits**

*Prerequisite: M.F.A. Theatre majors only unless prior permission is received from the instructor*

Assists students in learning to read play scripts as the basis of a performance-based art form, to deconstruct and analyze scripts and understand their meaning and functionality and to image the script's transition from page to stage, allowing the student to apply those skills to their individual artistic process.

### **Seminar in Dramatic Theory and Genre (THE 6507) 3 credits**

*Prerequisite: Permission of instructor*

The study of selected theories of drama from Aristotle to the present.

### **Directed Independent Study (THE 6909) 1-4 credits**

Involves reading, research, and creative activities in theatre with a program of study selected and reviewed in consultation with Department faculty members. The course may be repeated for credit.

### **Special Topics (THE 6930) 1-3 credits**

The study of a special area in theatre. Topics will vary. May be repeated for credit.

### **Professional Internship (THE 6940) 1-9 credits**

Involves theatre internship residency in an accredited professional company in acting, directing, design, technical theatre, or theatre management. The course may be repeated for credit. *Grading: S/U*

### **Summer Repertory Theatre Workshop (THE 6955) 1-14 credits**

The advanced study and practical application of acting/directing and/or technical/design skills for repertory theatre performance. The course may be repeated for credit.

### **Graduate Production Project (THE 6972) 1-6 credits**

*Grading: S/U*

### **Advanced Scene Design (TPA 5062L) 3 credits**

*Prerequisite: TPA 3064C*

The solving of assigned problems and criticism in designing plays and musicals. Includes evaluation of

styles in settings.

### **Graduate Acting Studio 1 (TPP 5115) 3 credits**

Advanced methods of performance in realistic plays.

### **Graduate Acting Studio 2 (TPP 5116) 3 credits**

Advanced methods of performance in classical plays.

### **Acting for the Camera (TPP 5266) 3 credits**

*Prerequisites: TPP 2110, TPP 4175 and TPP 4176*

An acting course that identifies the special needs of the actor in front of the camera in either film or videotape. This course provides a basic working vocabulary and the techniques needed to confront the major issues of camera acting.

### **Graduate Acting for Film and Television (TPP 5267) 3 credits**

*Prerequisites: TPP 5115, 5116*

Studio class designed to give the graduate actor experience in the practical application of techniques utilized in commercial, film, and television acting.

### **Graduate Acting Studio 3 (TPP 6146) 3 credits**

*Prerequisites: TPP 5115, 5116*

A continuation of acting training with emphasis on Shakespeare.

### **Graduate Acting Studio 4: Special Challenges in Acting (TPP 6147) 3 credits**

*Prerequisites: TPP 5115, 5116, 6146*

Through consultation with the collected performance faculty, students will identify specific challenges in their individual acting process and, through targeted scene study, discover the means to overcome them.

### **Movement for the Graduate Actor 1 (TPP 6515) 2 credits**

*Prerequisite: M.F.A. in Theatre majors only*

Movement training for the graduate actor emphasizing ensemble building, body attunement and improved impulse response playing. Students study Viewpoints and Composition where creative scene work that is driven by physicality is explored, with a minimum use of text.

### **Movement for the Graduate Actor 3 (TPP 6517) 2 credits**

*Prerequisite: TPP 6535 with minimum grade of "B-"*

A practical study that trains the actor to create the illusion of physical violence. The focus is on safe technique, the physical discipline of impulse response and moment-to-moment playing and reacting.

Thirty hours of a single Society of American Fight Directors' weapon is studied.

### **Movement for the Graduate Actor 4 (TPP 6518) 2 credits**

*Prerequisite: TPP 6517 with minimum grade of "B-"*

Course continues Alexander Technique work with emphasis on self-assessment of awareness of physical habits, development of the ability to self-correct and awareness of inefficient physical patterning choices that are detrimental to the actor. Additional exploration of Feldenkrais, Grotowski, Laban, Suzuki, Neutral Mask and Mask may be utilized as a means of engaging in the graduate actor's full physical capacity as a storyteller.

### **Movement for the Graduate Actor 2 (TPP 6535) 2 credits**

*Prerequisite: TPP 6515 with minimum grade of "B-"*

The Alexander Technique is studied to address physical patterning and the graduate actor's habitual movement choices. The emphasis is on the release of physical tension in performance, a more aligned posture and more efficient use of the body as a storytelling instrument.

### **Voice for the Graduate Actor 1 (TPP 6715) 2 credits**

*Prerequisite: M.F.A. in Theatre majors only*

Vocal training for the graduate actor emphasizing release of physical tension as well as proper use of the vocal apparatus to enhance resonance, projection and the ability to work on impulse.

### **Voice for the Graduate Actor 2 (TPP 6716) 2 credits**

*Prerequisites: TPP 6715 with a grade of B- or higher and M.F.A. in Theatre majors only*

Continued voice work with emphasis on self-assessment of vocal habits and development of the ability to self-correct any that are detrimental to the actor. The use of the voice in classical texts is explored.

### **Voice and Speech for the Graduate Actor 3 (TPP 6717) 3 credits**

*Prerequisites: TPP 6716 with a grade of B- or higher and M.F.A. in Theatre majors only*

Graduate voice and speech work with emphasis on vocal variety, flexibility, accent acquisition and intelligibility utilizing the works of Shakespeare. Graduate voice work with emphasis on vocal variety and flexibility utilizing the works of Shakespeare.

### **Voice and Speech for the Graduate Actor 4 (TPP 6718) 3 credits**

*Prerequisites: TPP 6717 and TPP 6819 with a grades of B- or higher and M.F.A. in Theatre majors only*

Advanced accent work with a focus on researching, designing, articulating to others and performing with an accent while maintaining vocal power, flexibility, resonance and intelligibility.

### **Speech for the Graduate Actor 1 (TPP 6817) 2 credits**

*Prerequisite: M.F.A. in Theatre majors only*

Advanced speech course for the graduate actor focusing on articulation for intelligibility and familiarity with the International Phonetic Alphabet and its application in accent work.

### **Speech for the Graduate Actor 2 (TPP 6818) 2 credits**

*Prerequisites: TPP 6817 with a grade of B- or higher and M.F.A. in Theatre majors only*

Training for the graduate actor in accent acquisition and performance.

### **Speech for the Graduate Actor 3 (TPP 6819) 3 credits**

*Prerequisites: TPP 6818 with a grade of B- or higher and M.F.A. in Theatre majors only*

Advanced work on the articulation of sound in the works of William Shakespeare, as well as training in accent acquisition.

## VISUAL ARTS AND ART HISTORY

### **Undergraduate Courses/ [link to graduate courses](#)**

#### **Honors Art Appreciation (ARH 1930) 3 credits**

*Writing Across Curriculum (Gordon Rule)*

*Prerequisites: Approval from the University Honors Program; students must satisfy college prep requirements if not already enrolled in undergraduate study.*

Honors section of art appreciation. Introduction to the visual arts with slides and films.

#### **Art Appreciation (ARH 2000) 3 credits**

In this course, students will develop an appreciation of and the ability to think critically about culture and be provided with the tools to understand, analyze and discuss works of visual art and material culture. This is a General Education course.

#### **Art History Survey 1 (ARH 2050) 3 credits**

*Prerequisite: Students must satisfy college prep requirements if not already enrolled in undergraduate study*

The first half of a two-course sequence in the history of art with ARH 2051. Delineates the development of visual art media from their first appearance in the Paleolithic period through the floruit of Classical antiquity and the re-ordering of art in the Middle Ages. Architecture is treated as a form of art, as well as a venue for other art media, such as sculpture and painting.

### **Art History Survey 2 (ARH 2051) 3 credits**

*Prerequisite: Students must satisfy college prep requirements if not already enrolled in undergraduate study*

The second half of a two-course sequence in the history of art with ARH 2050. Delineates the development of visual art media from the European Renaissance through the present day. In addition to painting, sculpture, architecture and other art media, this course explores the often competing discourses surrounding them, such as art criticism, theory, philosophical debate and issues regarding patronage and reception.

### **Directed Independent Research in Art History (ARH 2915) 1-4 credits**

*Prerequisite: Permission of instructor*

Independent undergraduate research in areas of student interest.

### **Art History Study Abroad (ARH 2952) 1-6 credits**

*Prerequisite: Sophomore standing*

Credit for enrollment in approved study abroad programs.

### **History of Ceramics (ARH 4013) 3 credits**

*Prerequisite: ARH 2050 and ARH 2051 or permission of department*

Explores the many aspects of art in clay, from pottery to sculpture, on a global scale. While articulated in terms of chronology and geography, the course highlights common socioeconomic contexts of production, as well as issues regarding the role of the individual, gender, economic status and other factors that have influenced and conditioned ceramics as a craft and as an art medium.

### **Greek Art and Archaeology (ARH 4130) 3 credits**

*Prerequisites: ARH 2050 and ARH 2051 or permission of department*

A survey of art and archaeology of the Greeks and peoples related to their ancient civilization from prehistoric times through the advent of the Roman domination in the first century B.C.E. Special emphasis is given to the Bronze Age proto-civilizations that spawned Greek myths and legends (e.g. Minos of Crete and the Trojan War), as well as the achievements of the Archaic, Classical and Hellenistic periods in the first millennium B.C.E.

### **Rome Across the Centuries (ARH 4152) 3 credits**

*Prerequisites: ARH 2050 and ARH 2051 or permission of department*

A survey of archaeological, art historical and historical issues pertaining to the development of the city of Rome from its earliest prehistory through the 20th century. Focus on major monuments of the city and historical trends in art, as well as the ways in which Rome itself has been transformed into a theme in art and to some extent literature, including film.

### **The Impact of Pompeii: Pompeii, Herculaneum and the Origins of Art History (ARH 4153) 3 credits**

*Prerequisites: ARH 2050 and ARH 2051 or permission of department*

A survey of almost two centuries of archaeological exploration at Pompeii, Herculaneum and other key sites in the area of Mount Vesuvius (Naples, Italy) and the significance of these discoveries to knowledge of ancient history in the Mediterranean, Greek and Roman civilization, as well as the development of art and the discipline of art history in the 18th and 19th centuries.

### **Medieval Art and Archaeology (ARH 4200) 3 credits**

*Prerequisites: ARH 2050 and ARH 2051 or permission of department*

Art of the Christian world from the 1st to the 14th centuries.

### **Renaissance Art and Architecture (ARH 4305) 3 credits**

*Prerequisites: ARH 2050 and ARH 2051 or permission of department*

History of art and architecture in Italy and northern Europe from the 14th to the 16th centuries.

### **Baroque Art and Architecture (ARH 4350) 3 credits**

*Prerequisites: ARH 2050 and ARH 2051 or permission of department*

Art in Europe during the 17th and 18th centuries.

### **18th- and 19th-Century Art (ARH 4371) 3 credits**

*Prerequisite: ARH 2050, 2051 or permission of department*

Art from the Rococo period to postimpressionism.

### **Modern Art: 1863-1945 (ARH 4450) 3 credits**

*Prerequisites: ARH 2050 and ARH 2051 or permission of department*

Art movements in Western society from 1863 until 1945, including impressionism, expressionism, cubism, non-representational art, constructivism and surrealism.

### **Contemporary Art (ARH 4470) 3 credits**

*Prerequisites: ARH 2050 and ARH 2051 or permission of department*

New movements in Western art from 1945 to the present.

### **Art of China (ARH 4557) 3 credits**

*Prerequisites: ARH 2050 and ARH 2051 or permission of department*

This course is to introduce, from a comparative approach, an overall view of the Chinese arts since ancient time so that students will become aware of the Chinese aesthetic value and its historical

involvement.

### **The Art of Japan (ARH 4563) 3 credits**

*Prerequisites: ARH 2050 and ARH 2051 with minimum grades of C-*

A survey of Japanese art from prehistory to the present day.

### **American Painting and Sculpture (ARH 4610) 3 credits**

*Prerequisites: ARH 2050 and ARH 2051 or permission of department*

A study of American painting and sculpture from its colonial beginnings to the avant-garde movements of the present day.

### **History of Photography (ARH 4710) 3 credits**

*Prerequisites: ARH 2050 and ARH 2051 or permission of department*

Surveys the emergence of photographic processes beginning in 1839 and extends to present-day digital technology. Provides a coherent view of photographic practices, significant photographers, aesthetic movements and the impact of photography upon our understanding of images.

### **History of Graphic Design (ARH 4724) 3 credits**

*Prerequisites: ARH 2050 and ARH 2051 or permission of department*

An investigation of historical and contemporary visual communications, concepts, media, and images and their role in graphic design.

**\* Course may be repeated for credit.**

### **Museum Studies and Gallery Practices (ARH 4794) 3-6 credits**

*Prerequisite: One 4000-level Art History course*

Investigation of the many characteristics of museum and gallery management, including hands-on participation in University Galleries' ongoing productions. A mandatory lab hour requirement of four hours per week amounts to half of the student's grade.

### **Selected Readings in Art History (ARH 4900) 3 credits**

*Prerequisite: At least 8 credits of course work in the area of selection with a "B" average; ARH 2000 or both Art History Survey sections*

Selected readings in Art History.

### **Directed Independent Study: Art History (ARH 4905) 1-3 credits**

*Prerequisites: Three courses in the area of intended study and permission of instructor*

Independent study in area of interest specific to Art History.

### **Directed Independent Research in Art History (ARH 4915) 1-3 credits**

*Prerequisite: Permission of instructor*

Independent undergraduate research in areas of student interest.

### **\* Topics - Art History (ARH 4930) 3 credits**

*Prerequisites: ARH 2050 and ARH 2051 or permission of department*

Art of various cultural periods and/or thematic frameworks.

### **\* Art History Senior Seminar (ARH 4937) 3 credits**

*Prerequisites: 16 credits of course work in upper-division Art History and permission of department*

The historiography of art history, readings, and writings on art historical topics.

### **Art History Internship (ARH 4940) 1-4 credits**

*Prerequisite: Permission of department*

This internship provides an opportunity for students to apply their disciplinary knowledge in art history in a professional setting. Course requirements and credits vary depending on the specific content of the internship. Details are defined in consultation with the instructor.

### **Art History Study Abroad (ARH 4957) 1-6 credits**

*Prerequisite: Sophomore standing*

Credit for enrollment in approved study abroad programs.

### **2D Art Foundations (ART 1201C) 3 credits**

This introductory course is part of the foundation sequence in studio arts. The course focuses on the elements and principles of constructing two-dimensional visual compositions. Historical and contemporary practices in two-dimensional artmaking are explored. The relationship between studio practice and other scholarly disciplines is also investigated.

### **3D Art Foundations (ART 1203C) 3 credits**

This introductory course is part of the foundation sequence in studio arts. The course focuses on the elements and principles of constructing three-dimensional visual compositions. Historical and contemporary practices in three-dimensional artmaking are explored. The relationship between studio practice and other scholarly disciplines is also investigated.

### **Drawing Foundations (ART 1300C) 3 credits**

This introductory course is part of the foundation sequence in studio arts. The course focuses on perceptual drawing, primarily of objects and spaces. Historical and contemporary practices in drawing, including methods and materials, are explored. The relationship between drawing and other scholarly

disciplines is also investigated.

### **Special Topics in Art (ART 1933C) 3 credits**

Elective course for students to complete project work dealing with rotating topics in studio arts. The instructor provides oversight, feedback and criticism of the students' work. Projects may explore ceramics, drawing, painting, photography, printmaking, sculpture and/or intermedia and may vary each time the course is offered.

### **Drawing 2 - Figure Drawing (ART 2330C) 3 credits**

*Prerequisite: ART 1300C*

This course focuses on perceptual drawing, primarily of the human figure. References may include live figure models, photographic references and art historical references. Historical and contemporary practices in drawing, including methods and materials, are explored. The relationship between drawing and other scholarly disciplines is also investigated.

**\* Course may be repeated for credit.**

### **\* Printmaking: Color Printing and Layering (ART 2400C) 3 credits**

*Prerequisites: ART 1201C, ART 1300C, ART 2600C, all with minimum grade of "C"*

This course introduces the concepts of color printmaking using mono-type and relief processes through traditional and emerging methods. Students are taught the use of tools, materials, ideas and approaches to create color print media.

### **\* Printmaking: Surface and Substrates (ART 2401C) 3 credits**

*Prerequisites: ART 1201C, ART 1300C, and ART 2600C*

This course introduces methods of traditional surface printing. Students use hand methods, mordants, laser engraving and emerging technologies to make impressions upon a variety of surfaces and substrates.

### **Painting 1 (ART 2500C) 3 credits**

*Prerequisites: ART 1201C, ART 1300C, ART 2600C*

This course introduces students to the fundamental principles governing painting as a visual language used to investigate and convey information from the observable world onto a two-dimensional surface. Exploration is centered on the interpretation of life via direct observation. The main topics covered are color, shape, form, value, gesture, process and composition. The whole of this course is designed with the development of technical image-making as the core objective, thus non-objective and expressionistic abstraction will not be emphasized nor is it of primary concern.

### **Digital Art Foundations (ART 2600C) 3 credits**

*Prerequisites: ART 1201C; students must satisfy college prep requirements if not already enrolled in undergraduate study*

This introductory course is part of the foundation sequence in studio arts. The course focuses on the elements and principles of constructing visual compositions in digital space. Historical and contemporary practices in digital artmaking are explored. The relationship between studio practice and other scholarly disciplines is also investigated.

### **Sculpture 1 (ART 2701C) 3 credits**

*Prerequisites: ART 1201C, ART 1203C and ART 1300C*

Problems in sculptural form and composition with the exploration of materials, techniques, and conceptual approaches.

### **Ceramics - Wheel Throwing 1 (ART 2751C) 3 credits**

*Prerequisites: ART 1201C, ART 1300C, ART 1203C*

Basic wheel-throwing course. Technical skills of wheel work stressed with other aspects of clay work included, such as the aesthetics of form, glaze work, kiln loading, firing. Demonstration, critiques and slides.

### **Ceramics - Handbuilding 1 (ART 2754C) 3 credits**

*Prerequisites: ART 1201C, ART 1203C and ART 1300C, or permission of instructor*

Studio fine art course introducing fundamentals in handbuilding through various projects that emphasize technique, creativity and problem-solving methods, giving the student a working knowledge of clay. Includes demonstrations, lectures, critiques, slides, glaze work, kiln loading and firing.

### **Directed Independent Research in Art (ART 2915) 1-3 credits**

*Prerequisite: Permission of instructor*

Independent undergraduate research in areas of student interest.

### **Art Study Abroad (ART 2952) 1-6 credits**

*Prerequisite: Sophomore standing*

Credit for enrollment in approved study abroad programs.

### **Alternative Media (ART 3161C) 3 credits**

*Prerequisites: ART 1201C, ART 1300C and ART 2600C*

Introduces students to a variety of materials that can be used in the creation of artistic composition. Special emphasis is placed on the imaginative use of everyday objects as artistic devices. Some traditional media are used in conjunction with these non-traditional media.

### **Narrative Painting and Drawing (ART 3383C) 3 credits**

*Prerequisites: ART 1201C, ART 1300C, ART 2600C, ART 2330C*

This course focuses on developing narrative content and identifying research interests that will support the development of meaningful bodies of work. Students from across disciplines use drawing and painting to investigate a variety of topics touching on both historical and contemporary practices. The relationship between drawing and painting and other studio and scholarly disciplines are also investigated. This course may be repeated one time for credit.

### **Printmaking: Print Installation (ART 3402C) 3 credits**

*Prerequisites: ART 1201C, ART 1300C, ART 2600C and either ART 2400C or ART 2330C*

In this course, students create large-scale installations utilizing relief and screen printed multiples on paper, textiles and other surfaces. Students examine the interrelated nature of form, multiples, expression and meaning through process and scale. The course explores temporary, permanent and site-specific installation-based art using print media.

### **Topics in Intermediate Painting and Drawing (ART 3505C) 3 credits**

*Prerequisites: ART 1201C, ART 1300C, ART 2330C, ART 2500C or permission of instructor*

This topics course explores the intersection of traditional painting and drawing practices. This experimental course is designed for intermediate students interested in building on existing painting and drawing experience while exploring special topics in the context of contemporary practice in painting and drawing. Objectives include exploring connections among varied studio practices and research practices while developing original studio work. Maybe be repeated for credit one time.

**\* Course may be repeated for credit.**

### **Abstract Painting and Drawing (ART 3522C) 3 credits**

*Prerequisites: ART 2500C, 1201C and 1300C, or permission of instructor*

This course explores the varied and multifaceted world of contemporary two-dimensional abstraction through the practice of painting and drawing. Emphasis is placed on materiality, process, design and concept. Running parallel to studio production, students read and discuss foundational theories affecting contemporary practices, such as structuralism/formalism, poststructuralism and postmodernism. The primary course objective is to equip the student with the experiences and knowledge necessary to work within the contemporary art world. This course may be repeated one time for credit.

### **\* Sculpture 2 (ART 3710C) 3 credits**

*Prerequisites: ART 2701C, ART 1203C, ART 1300C, ART 2600C, ART 2330C*

Intermediate problems in sculpture with emphasis on the exploration of materials, media, and the development of individual concepts.

**Ceramics - Handbuilding 2 (ART 3761C) 3 credits**

*Prerequisites: ART 2754C, ART 2330C with minimum grades of "C"*

Sculptured approach to clay; emphasis on glaze techniques and firing.

**\* Ceramics - Wheel Throwing 2 (ART 3763C) 3 credits**

*Prerequisite: ART 2600C with minimum grade of "C"*

*Corequisite: ART 2751C with minimum grade of "C"*

Continued investigation into the understanding of techniques, directions, processes of clay through wheel throwing. Vessel approach emphasized as well as contemporary ceramic issues. Includes lectures, demonstrations, glaze experimentation, slides, kiln loading and firing.

**Handmade Books: Structure and Binding (ART 4173) 3 credits**

*Prerequisite: ART 1201C, ART 1300C or permission of instructor*

Art studio course that visually examines traditional and alternative book structures in relationship to narrative content. Lectures and demonstrations introduce students to creative processes involved in book making, including traditional and alternative book formats, adhesives and sewn binding structures, archival concerns, and methods for generating original images and text.

**\* RI: Advanced Drawing (ART 4311C) 3 credits**

*Prerequisites: ART 1201C, ART 1300C, ART 2600C and ART 2330C*

This research-intensive (RI) course is designed for students who have significant drawing experience, established critical thinking and writing skills and a strong interest in visual arts research. Historical and contemporary theory and practice in the discipline are the primary foci. Objectives include technical, conceptual and creative development in the context of original studio work. May be repeated for credit.

**\* Topics - Painting (ART 4506C) 3 credits**

*Prerequisite: ART 4531C or permission of department*

Topics in watercolor, figure painting, or materials and techniques.

**\* RI: Advanced Painting (ART 4531C) 3 credits**

*Prerequisites: ART 1201C, ART 1300C, ART 2500C and ART 3522C*

This research-intensive (RI) course is designed for students who have significant painting experience, established critical thinking and writing skills and a strong interest in visual arts research. Historical and contemporary theory and practice are the primary foci. Objectives include technical, conceptual

and creative development in the context of original studio work. May be repeated for credit once without departmental approval.

**Building a Web Portfolio (ART 4632C) 3 credits**

*Prerequisite: Senior standing*

This course is intended to aid students in all creative areas with developing an online, interactive portfolio to showcase their work. The course also asks students to consider the place of portfolios within the professional practices of their discipline. Websites are built in an easy code-free program for which no experience is necessary.

**\* RI: Advanced Sculpture (ART 4712C) 3 credits**

*Prerequisite: ART 3710C or permission of department*

Advanced problems in the various techniques of sculpture. Emphasis on individual creative expression. This is a research-intensive (RI) course.

**\* Topics - Sculpture (ART 4732C) 3 credits**

*Prerequisite: ART 4712C or permission of department*

Special topics in sculpture including various techniques and exploration of environmental, site-specific, performance, conceptual, and installation projects.

**\* RI: Advanced Ceramics (ART 4782C) 3 credits**

*Prerequisite: 12 credits of ceramics (ART 2751C, ART 2754C, and ART 3761C or ART 3763C) or permission of department*

Emphasis on the technical, creative and conceptual concerns of self-directed, advanced students. This is a research-intensive (RI) course.

**\* Course may be repeated for credit.**

**RI: Ceramics - Clay and Glazes (ART 4785C) 3 credits**

*Prerequisites: ART 2751C, ART 2754C, and ART 3761C or ART 3763C*

This research-intensive (RI) course offers an In-depth study of ceramic materials, focusing on the formulation of clay and glazes, testing, firing, lectures and introduction to computer programs.

**\* Directed Independent Study (ART 4906C) 1-3 credits**

*Prerequisites: Three courses in area of intended research and permission of instructor*

Independent undergraduate studies in areas of interest.

**\* Directed Independent Study (ART 4908C) 3 credits**

*Prerequisite: Senior standing*

Designed for seniors to produce a fully realized computer-video graphic project. Students work independently and periodically present projects-in-process to the class. Special areas of concentration such as 3D modeling, animation, storyboarding, or compositing are suggested by students with acceptance by the instructor.

**Directed Independent Research in Art (ART 4915) 1-3 credits**

*Prerequisite: Permission of instructor*

Independent undergraduate research in areas of student interest.

**\* Area Studies in Art (ART 4930C) 1-3 credits**

Concentration in the studio area of ceramics, drawing, painting, photography, printmaking, and/or sculpture, which vary depending upon special facilities or locations.

**\* Special Topics (ART 4932C) 3 credits**

*Prerequisite: Portfolio or equivalent or permission of department*

Elective course for students to complete project work dealing with computer arts in a specific field of their choosing. The instructor provides oversight, feedback, and criticism of the students' work. Projects of choice may include 2D and 3D, web design, games, interactive media, and other related topics.

**Studio Arts Internship (ART 4940C) 1-3 credits**

*Prerequisite: Permission of department*

This internship provides an opportunity for students to apply their disciplinary knowledge in studio arts in a professional setting. Course requirements and credits vary depending on the specific content of the internship. Details are defined in consultation with the instructor.

**\* Museum Internship (ART 4942C) 3-6 credits**

*Prerequisites: Completion of at least two courses in Art History with a grade of "B" or better, written proposal, permission of chair and approval the semester prior to taking this course*

Inservice training in art-related area.

**RI: Senior Seminar for B.A. Studio Arts (ART 4954) 3 credits**

*Prerequisite: Permission of department*

The primary intention of this research-intensive (RI) course is to showcase and situate the kind of original creative research that characterizes the production of art and design work. The course offers a publicly accessible exhibition venue for original student art and design work.

**RI: B.F.A. Senior Seminar (ART 4955C) 3 credits**

*Prerequisite: Permission of department*

The primary intention of this research-intensive (RI) course is to showcase and situate the kind or original creative research that characterizes the production of art and design work. The course culminates in a public exhibition of original student art and design.

**Art Study Abroad (ART 4957) 1-6 credits**

*Prerequisite: Sophomore standing*

Credit for enrollment in approved study abroad programs.

**\* Course may be repeated for credit.**

**Introduction to Multipage Document Software (GRA 2124L) 1 credit**

This introductory course focuses on the development of competency using multipage document programs such as or similar to Adobe InDesign and Quark. Students become familiar with the tools, including masterpages and stylesheets, and appropriate use of software to create multipage documents.

*Grading: S/U*

**Introduction to Interface Software (GRA 2134L) 1 credit**

This introductory course focuses on the development of competency in the use of User Interface (UI) prototyping programs such as or similar to Adobe XD. Students become familiar with the tools and appropriate use of software to create websites and mobile app interfaces. *Grading: S/U*

**Introduction to Illustration Software (GRA 2151L) 1 credit**

This introductory course focuses on the development of competency using vector-based drawing programs such as or similar to Adobe Illustrator. Students become familiar with the tools and appropriate use of software to create graphics. *Grading: S/U*

**Introduction to Image Editing Software (GRA 2152L) 1 credit**

This introductory course focuses on the development of competency using bitmap photo-editing programs such as or similar to Adobe Photoshop. Students become familiar with the tools and appropriate use of software to create and edit images. *Grading: S/U*

**Visual Design Lab 1 (GRA 2190C) 3 credits**

*Prerequisites: ART 1201C, ART 1300C, ART 2600C*

An introductory course in graphic design with emphasis on form, content, and principles of design and layout composition. Students will become familiar with tools, processes and the language of design as applied to visual communication. Projects, demonstrations, lab, lecture, and critiques.

**Typographic Design Lab 1 (GRA 2208C) 3 credits**

2058

*Prerequisites: ART 1201C, 1203C, 2600C, all with minimum grades of "C"*

*Corequisite: GRA 2190C*

An introduction to the fundamentals of typography exploring experimental approaches of letterform construction and terminology and developing a sound understanding of all components related to typographical composition and design practices. Projects, demonstrations, lab, lecture and critiques.

### **Directed Independent Research in Graphic Design (GRA 2915) 1-4 credits**

*Prerequisite: Permission of instructor*

Independent undergraduate research in areas of student interest.

### **Typographic Design Lab 2 (GRA 3112C) 3 credits**

*Prerequisite: GRA 2208C*

Typography is one of the few unchanging elements in graphic design. Whether a word is to be printed or part of a screen-based project, a working knowledge of type is essential for any graphic designer. This course develops choice-making skills with regard to context, content and audience, as well as explores the emotional, aesthetic and historical components of typographic communication.

### **Poster Design (GRA 3174C) 3 credits**

*Prerequisite: GRA 3193C*

Course focuses on the theoretical and practical aspects of poster design. Students learn how to design a poster, what information to include, and how to draw attention through the use of visual metaphors. Students are encouraged to take risks and learn how to effectively communicate complex concepts on a single page, integrating text and images for ultimate impact. Emphasis on expressive, creative communication through the graphic design medium and on high-quality portfolio development.

### **Visual Design Lab 2 (GRA 3193C) 3 credits**

*Prerequisite: GRA 2208C*

*Prerequisite or Corequisite: GRA 3112C*

Examines the design of systems including the development and application of symbols as communicative signifiers. Conceptual development, context, simplicity, unity and contrast are examined as the means for efficient application of systems across media.

### **RI: Eye-Tracking: Visual Analysis and Design (GRA 3594C) 3 credits**

This course introduces students to an eye-tracking system as a research tool to explore how subjects process visual information. Students explore the reciprocal relationships among art, science and technology across scales. Theory, research and interdisciplinary practices comprise a collaborative format. This is a research-intensive (RI) course.

### **Visual Design Lab 5 (GRA 4115C) 3 credits**

*Prerequisites: GRA 3112C, GRA 3193C, GRA 4183C, GRA 4194C and GRA 4521C; must be enrolled in B.F.A. Graphic Design*

Emphasis on the practical application of accumulated design skills and creative communication through the development of high quality graphic design portfolio works.

**\* Course may be repeated for credit.**

### **Visual Design Lab 4 (GRA 4183C) 3 credits**

*Prerequisites: GRA 3112C and GRA 3193C; must be enrolled in B.F.A. Graphic Design*

This course focuses on time-based composition and animation through the use of current software. Elements of motion design are introduced with the objective of enhancing visual form, meaning and communication, emphasizing the relationship between design principles and animation fundamentals.

### **RI: Visual Design Lab 3 (GRA 4194C) 3 credits**

*Prerequisites: GRA 3112C and GRA 3193C; must be enrolled in B.F.A. Graphic Design*

Focuses on theoretical principles and the practical application of graphic design to three-dimensional structures, which may include, but are not limited to, package, environmental and exhibition design. Practical and conceptual concerns, materials, context and brand application are addressed. Emphasis on appropriateness, creativity and portfolio-quality work. This is a research-intensive (RI) course.

### **Information Design (GRA 4198C) 3 credits**

*Prerequisite: B.F.A. Graphic Design major, GRA 3112C and GRA 3193C with minimum grades of "C-", or permission of department*

This course focuses on information design systems and data visualizations. The course considers the role of designers in shaping content for different audiences, encouraging students to develop analytical skills for data organization and visual display. Through research, projects, exercises, sketches and readings, students create visual narratives.

### **Interactive Design Lab 1 (GRA 4521C) 3 credits**

*Corequisite: GRA 3112C*

Focuses on the introduction of principles of interactivity related to user experience. Examines the design of user-interfaces and the development of advanced interactive visual strategies through the study of current or emerging techniques.

### **Interactive Design Lab 2 (GRA 4522C) 3 credits**

*Prerequisites: GRA 3112C and GRA 3193C; must be enrolled in B.F.A. Graphic Design*

This course addresses the prevalent design considerations in the development of online content.

Explores the relevant technologies and discusses the issues, opportunities and obligations of the designer in the development of interactive media.

### **Directed Independent Research in Graphic Design (GRA 4915) 1-4 credits**

*Prerequisite: Permission of instructor*

Independent undergraduate research in areas of student interest.

### **\* Topics - Graphic Design (GRA 4932C) 1-3 credits**

*Prerequisite: Permission of department*

The course will enable the Department to introduce areas of graphic design not covered in the established curriculum.

### **Graphic Design Internship (GRA 4940C) 1-4 credits**

*Prerequisite: Permission of department*

This internship provides an opportunity for students to apply their disciplinary knowledge in graphic design to a professional setting. Course requirements and credits will vary depending on the specific content of the internship. Details are defined in consultation with the instructor.

### **Professional Design Studio (GRA 4942C) 3 credits**

*Prerequisites: GRA 3112 and GRA 3193 with minimum grades of "C"*

Students in this course work with professional clients to gain practical working experience producing creative design solutions. Coursework covers practical skills of the profession including client relations, professional networking, ethics, presentations and proposals, pricing, work-for-hire, estimates and contracts, bids and production.

### **Digital Photography 1 (PGY 2109C) 3 credits**

*Prerequisites: ART 1201C, ART 1203C and ART 1300C, or permission of department*

This course is an introduction to the practice of digital photography. The emphasis is on the production of work and will initially focus on the acquisition of necessary technical skills, such as manual manipulation of camera controls and basic image editing work flow. The primary goals of the course are to begin to develop photographic literacy and an artistic practice. Access to a digital camera with manual exposure capabilities is required.

### **Digital Photography 2 (PGY 3157C ) 3 credits**

*Prerequisites: ART 2600C and PGY 2109C*

This intermediate course utilizes digital cameras, computer software, scanners and printers to articulate personal artistic vision. Visual literacy is expanded on through the study of historic and contemporary photographic images, critiques, projects, field trips and lectures. Access to a digital camera with manual

exposure capabilities is required.

### **Black and White Photography (PGY 3406C) 3 credits**

*Prerequisites: ART 2600C and PGY 2109C, or permission of department*

This course concentrates on analog black and white photography and utilizes pinhole and film cameras. Initially the focus is on the acquisition of necessary technical skills in printing, film processing and darkroom practices. Through projects, readings and critiques, students continue working on critical issues in photography as well as on composition and content. Analog/digital practices are explored. Access to a film camera with manual controls is required.

### **Applied Digital Photography (PGY 3821C) 3 credits**

*Prerequisites: ART 1201C; access to a digital camera (7 MP or more) is required*

This course exposes the student to professional practices in digital imaging. The student applies digital photography skills to solve specific problems relating to workflow, color management, data management, lighting, and image manipulation.

### **\* RI: Advanced Photography (PGY 4420C) 3 credits**

*Prerequisites: ART 1201C, PGY 2109C, PGY 3406C and PGY 3157C or permission of department*

This course is designed for students who have significant experience in camera usage and processing along with developed critical thinking and writing skills. The class explores increasingly demanding projects that lead to a self-directed cohesive, polished body of work. Photographic history, contemporary image making, photographic theory and professional practice issue are also addressed. Access to camera is required. This is a research-intensive (RI) course.

### **\* Topics - Photography (PGY 4440C) 3 credits**

*Prerequisites: ART 1201C and PGY 2109C*

This course concentrates on one topic, such as documentary photography, experimental photography, photo-based mixed media, alternative process, lighting, etc. Students explore personal image making through projects and discussion on content, technique and theory as it applies to their own work and the specific class topic. Access to a camera is required.

## **Visual Arts and Art History Graduate Courses**

### **Studio Arts Pedagogy in Higher Education (ARE 6276) 2 credits**

*Prerequisite: MFA in Visual Arts and Art History students only, or permission of instructor*

Prepares M.F.A. candidates in the studio arts for careers in the professoriate. Focuses on the dynamic and wide-ranging arena that is visual arts pedagogy in higher education today. Diverse approaches to

teaching will facilitate the development of each student's practical teaching strategies in the context of a larger scholarly study of issues in pedagogy. Repeatable for credit up to two times.

### **History of Ceramics (ARH 6015) 4 credits**

*Prerequisite: Admission to the M.F.A. program or permission of instructor*

Explores many aspects of art in clay, from pottery to sculpture, on a global scale. Articulated in terms of chronology and geography, the course highlights common socioeconomic contexts of production, as well as issues regarding the role of the individual, gender, economic status and other factors that have influenced ceramics as a craft and as an art medium.

### **Seminar in Contemporary Art (ARH 6481) 4 credits**

*Prerequisites: Contemporary Art, Modern Art*

A consideration of the multiple goals of art produced after 1945. Required of all M.F.A. students.

### **Seminar in Art History (ARH 6897) 4 credits**

*Prerequisite: Permission of instructor*

In-depth exploration of topics in the history of art from antiquity to the present using a narrative approach to issues of content and context regarding themes, periods and works of visual art and culture from Western and/or non-Western sources. Students use a variety of analytical frameworks and intellectual perspectives to engage in research, develop their own historical projects and deliver information in oral and written form both in individual and collaborative settings. Repeatable for credit.

### **Graduate Independent Study (ARH 6913) 1-4 credits**

*Prerequisite: Permission of instructor*

Directed independent study of Art History, criticism, and theory in areas not covered by present program and which the student wishes to study. May be repeated.

### **Computer Arts Seminar in Contemporary Art (ARH 6931) 4 credits**

*Prerequisites: Permission of instructor; bachelor's degree; portfolio*

Critique and theory in Contemporary Art as it relates to Computer Arts. Required for M.F.A. in Computer Arts.

### **Computer Arts Seminar in General Theory (ARH 6932) 4 credits**

*Prerequisites: Permission of instructor; bachelor's degree; portfolio*

Critique and theory in General Theory as it relates to Computer Arts. Required for M.F.A. in Computer Arts.

### **Advanced Ceramics (ART 5790C) 4 credits**

*Prerequisite: Permission of instructor*

Advanced study in ceramic techniques. May be repeated.

### **Directed Area Studies in Art (ART 5930C) 1-4 credits**

#### **Graduate Clay and Glaze Science (ART 6793C) 4 credits**

*Prerequisite: Permission of instructor*

Required for Ceramics majors. Exploration of clay and glaze, science, theory, formulation, and application. Required of all M.F.A. Ceramics students.

#### **Professional Practices (ART 6816) 2 credits**

*Prerequisite: Acceptance into the M.F.A. program in Visual Arts and Art History or permission of instructor*

Rotating professional development topics such as teaching pedagogy, professional documentation, digital tools for the studio artist, studio critique and art writing to support the professional practices needed by an emerging artist. Repeatable for credit up to four times.

#### **Graduate Studio (ART 6819) 4 credits**

*Prerequisite: Acceptance into the M.F.A. program in Visual Arts and Art History or permission of instructor*

Focuses on the development of a conceptual framework communicated through a developing visual language, with intensive and comprehensive examination and critique of resulting forms and skillful execution in area of concentration. Repeatable for credit up to five times.

#### **Directed Independent Study in Graphic Design (ART 6905) 1-4 credits**

Prerequisites: Written contract/proposal with objectives and written department/division permission  
Independent research, advanced experiences in various areas of design study.

#### **Graduate Directed Study (ART 6907C) 1-4 credits**

*Prerequisites: Permission of instructor*

Investigation into advanced creative aesthetic issues and technical problems inherent in a graduate-level studio concentration. Variable credit depending upon scope and magnitude of work agreed to by the student and the Faculty Director. May be repeated.

#### **Topics in Studio Art (ART 6930C) 1-4 credits**

*Prerequisite: Permission of instructor*

Students may study or research an individual art project with an art faculty member. Complexity and amount of work will determine the number of credits granted. May be repeated.

### **Design Studio (ART 6931) 4 credits**

*Prerequisite: B.F.A. in Graphic Design or permission of instructor*

Emphasis on beginning competent graduate body of work.

### **Special Topics in Computer Arts (ART 6931C) 4 credits**

*Prerequisites: Permission of instructor; bachelor's degree; portfolio*

Topics based upon important trends and developments in Computer Arts. May be repeated for credit.

Candidates, interns, auditors, and guests welcome.

### **Design Seminar (ART 6932) 4 credits**

*Prerequisite: Admission to M.F.A. program*

Review of design research, criticism, and evaluation.

### **Special Topics Graphic Design (ART 6932C) 4 credits**

*Prerequisites: Admission to M.F.A. program or permission of instructor*

Investigation of current topics in the field of study with an emphasis on the development of advanced conceptual and theoretical skills.

### **Graduate Documentation (ART 6956C) 4 credits**

Required for all M.F.A. candidates. Course designated to draft, revise, and refine a comprehensive written documentation supporting the cohesive body of work produced during the final year or semester by the M.F.A. candidate. Prepared concurrently with ART 6972C (Graduate Thesis Exhibition).

### **Design Thesis (ART 6971C) 4 credits**

*Prerequisites: 28 credits of M.F.A. course work; permission of graduate committee*

Preparation of thesis or visual project. Research based on independent research. May be repeated.

### **Graduate Thesis Exhibition (ART 6972C) 4 credits**

Required for all M.F.A. candidates in Visual Arts with concentrations in Painting and Ceramics as well as for M.A.T. candidates. An exhibition of approved body of work for completion of M.F.A. degree.

Prepared concurrently with ART 6956C (Graduate Documentation).

## ACCOUNTING

**Undergraduate Courses** / [link to graduate courses](#) / [link to business law courses](#)

Note: Unless otherwise indicated, a grade of "C" or better is required for any course designated as a prerequisite.

### **Principles of Accounting 1 (ACG 2021) 3 credits**

Have you ever wondered how businesses measure their results and communicate this information to stakeholders? Financial statements are the most common way of providing this information. Investors use these statements in deciding whether to buy or sell stock or bonds, banks use them in lending decisions and corporate boards use them to establish executive pay. This course introduces the basic concepts of how financial statements are prepared, read and interpreted to facilitate decision making across a variety of stakeholder groups, accounting, and reporting standards for profit-oriented companies.

### **Principles of Accounting 2 (ACG 2071) 3 credits**

*Prerequisite: ACG 2021 with a grade of "C" or better*

How much do I have to sell before I start making a profit? Should I make a product or buy it from someone else? How much did it cost to manufacture this item? How do I prepare a budget and determine if I stayed within the budget? How do I allocate shared costs across an organization so that the performance of individual managers is fairly measured? These are just a few of the questions accounting can help answer. This course explains how managers use accounting information to make

decisions internal to the organization.

Note: The following accounting and tax courses are open to College of Business majors only. Non-Business majors must have permission of the School of Accounting to enroll in these courses.

### **Intermediate Theory 1 (ACG 3131) 3 credits**

*Prerequisite: ACG 2071 with a grade of "C" or better*

*Prerequisite or Corequisite: FIN 3403 with a grade of "C" or better*

Do you want to be able to use financial statements to help make informed investing and lending decisions? This course provides valuable insight on the information included in companies' financial statements and how they are prepared. This course begins with a discussion on the main financial statements and then examines the specific rules, both domestic and international, that guide the creation of the financial statements. The emphasis in this course is on rules for revenue recognition and accounting rules for assets.

### **Intermediate Theory 2 (ACG 3141) 3 credits**

*Prerequisite: ACG 3131*

*Prerequisite or Corequisite: GEB 3213*

This course explores some of the advanced topics and skills used in creating a set of basic financial statements and is critical for anyone who desires an accounting or auditing career. This course is also useful for anyone who aspires to have a career that involves interpreting financial statements or overseeing the financial reporting function. Specifically, the course explores accounting rules for investments, leases, current liabilities, bonds, income taxes, earnings per share, equity and preparing the statement of cash flows.

### **Cost Accounting (ACG 3341) 3 credits**

*Prerequisite: ACG 2071 with a grade of "C" or better*

This course builds on ACG 2071 by helping students establish a working knowledge of cost accounting techniques such as job and process costing, cost analysis, cost volume profit analysis, cost allocation, budgeting and variance analysis. This course also helps students understand how these techniques apply to managerial decisions. Whereas financial accounting courses focus on how accounting information is used by external stakeholders, this course focuses on how that information is used internally to an organization.

### **Accounting Applications of Data Analytics (ACG 3842) 3 credits**

*Prerequisite: ACG 2071 with a grade of "C" or better*

The accounting profession is being revolutionized by data analytics, which continues to fundamentally change the way businesses use accounting data in decision making. Data are being used in new ways

such as making investment decisions, developing estimates for financial statements, detecting fraud, identifying accounting errors and internal control weaknesses and managing costs. This course develops data analytics skills in students using tools and techniques relevant to today's accounting professionals.

### **Cooperative Education - Accounting (ACG 3949) 1-3 credits**

No credit toward degree. *Grading: S/U*

**Note:** Unless otherwise indicated, a grade of "C" or better is required for any course designated as a prerequisite.

### **Accounting Information Systems 1 (ACG 4401) 3 credits**

*Prerequisite: ACG 3131*

*Prerequisite or Corequisite: GEB 3213*

Today's accounting systems run the gamut from desktop software to complex enterprise resource planning systems that companies use to track millions of transactions across hundreds of subsidiaries. Regardless of complexity, all accounting systems have basic commonalities. This course examines business process documentation, transaction cycles and applicable internal controls. Emphasis is placed on the use of technology in accounting decision making and understanding the conditions that enable accounting fraud to occur.

### **Government and Not-for-Profit Accounting (ACG 4501) 3 credits**

*Prerequisite: ACG 3141 with minimum grade of "C" or permission of instructor*

Have you considered that financial statements help ensure that governments are accountable to taxpayers? Accounting for governments and non-profits differs from for-profit businesses because stakeholders' interests vary (e.g., proper custodianship of tax dollars and donations versus maximizing shareholder wealth). This course covers budgeting, fund accounting and government-wide financial reporting for state and local governments as well as budgeting, accounting and reporting standards for non-profits.

### **Auditing and Assurance Services 1 (ACG 4651) 3 credits**

*Prerequisite: ACG 3141 and ACG 4401*

Why are audits provided by CPAs critical to the functioning of the markets? Audits provide accountability and assurance that managers fairly report in the financial statements the custodianship of resources entrusted to them. This course explains the role of audits in society, how audits are regulated and the process that auditors go through to evaluate and communicate whether the financial statements are fairly stated. Emphasis is placed on integrated audits of financial statements and internal controls

over financial reporting.

**Note:** Unless otherwise indicated, a grade of "C" or better is required for any course designated as a prerequisite.

### **Directed Independent Study (ACG 4901) 1-3 credits**

*Prerequisite: Permission of the School of Accounting*

Independent study, research or other project to extend and integrate the students' knowledge. This is not to be used as a substitute for an existing course.

### **Special Topics (ACG 4931) 1-3 credits**

*Prerequisites: Permission of instructor and junior standing*

The study of a special area of Accounting. Topics will vary. May be repeated for credit.

### **Special Topics (ACG 4932) 1-3 credits**

*Prerequisites: Permission of instructor and junior standing*

The study of a special area of Accounting. Topics will vary. May be repeated for credit. *Grading: S/U*

### **Accounting Study Abroad (ACG 4957) 1-3 credits**

*Prerequisite: Junior standing*

Credit for enrollment in approved study abroad programs.

### **Federal Taxation 1 (TAX 4001) 3 credits**

*Prerequisite: ACG 3131*

*Prerequisite or Corequisite: GEB 3213*

Do you want to understand the issues you may face in filing your own taxes? This course helps you better understand the laws and regulations that govern how individuals are taxed in the United States. This course also covers U.S. tax policies and the impact taxation has on different forms of business entities such as corporations and partnerships. Specific tax topics related to long-lived assets owned by business entities are also covered.

### **Federal Taxation 2 (TAX 4011) 3 credits**

*Prerequisites: TAX 4001*

This course builds on the material in Federal Taxation 1 and covers the tax issues of entities including corporations and their shareholders; partnerships and their partners; estates and trusts and their beneficiaries. The course also explores the rights and obligations of taxpayers in dealing with the Internal Revenue Service.

## **Accounting Graduate Courses**

**Note:** Unless otherwise indicated, a grade of "C" or better is required for any course designated as a prerequisite.

### **Financial Statement Analysis Concepts and Applications (ACG 5176) 3 credits**

*Prerequisite: ACG 3131 or FIN 3403 and enrolled in Professional Accounting Certificate Program or permission of instructor*

Have you ever pondered why there are disagreements over stock valuations? Yet, financial analysts all utilize the same financial statements when determining whether stock value is overpriced or underpriced. This course explores the various tools and techniques utilized by these professional analysts in determining not only “company value” but also its financial health, while recognizing its highly subjective nature. In particular, the course addresses ratio analysis, valuation techniques, financial statement interpretation, and forensic techniques.

### **Advanced Accounting 1 (ACG 5205) 3 credits**

*Prerequisite: ACG 3141 or ACG 6137 with minimum grade of "C"*

Have you ever wondered how an international business with production in Asia, a product sold globally and extensive use of tax shelters creates one set of financial statements? In Advanced Accounting, we learn how a global company with multiple subsidiaries and transactions between those subsidiaries consolidates their financial transactions into a single set of financial statements. In addition, we also learn the basics of the formation, operation, and termination of partnerships.

### **Accounting Applications in E-Commerce (ACG 5464) 3 credits**

*Prerequisites: 6 credits of upper-division undergraduate accounting 3000 level or higher and enrolled in Professional Accounting Certificate Program or permission of instructor*

Much of Accounting Education leans toward theory. But e-Commerce is where theory meets practice. Real-world accounting involves working with clients' diverse e-Commerce platforms. This course focuses on giving students the knowledge and tools needed for successful accounting work within the wide variety of e-Commerce platforms that accountants experience in practice.

### **Governmental and Not-for-Profit Accounting Theory (ACG 5505) 3 credits**

*Prerequisites: ACG 3141 or ACG 6137 or equivalent and ACG 3341 or ACG 6347 or equivalent*

Have you ever wondered how the decision was made to widen a certain road, if your local police department has the most up-to-date training and equipment, how schools will be funded or if the much-needed community park will be built? Have you ever wondered how your donation to a private not-for-profit organization was spent? In this course, you learn about the budgeting, accounting and financial reporting processes for state and local governments and not-for-profit entities and Governmental

Accounting Standards Board (GASB) pronouncements. Not available to students who have completed ACG 4501 or its equivalent.

### **IT Auditing Theory and Practice (ACG 5623) 3 credits**

*Prerequisites: ACG 4651 or ACG 6137 and enrolled in Professional Accounting Certificate Program or permission of instructor*

Theory and practice of auditing techniques employed in computer-based accounting systems.

### **Auditing and Assurance Services 2 (ACG 5647) 3 credits**

*Prerequisite: ACG 4651 or ACG 6635 with minimum grade of "C"*

Do you want to know more about auditing than you learned in ACG 4651? Increase your knowledge by learning about auditing the different transaction cycles and accounts of a business; delve into the AICPA attestation standards, the AICPA compilation and review standards and broaden your horizons by studying the global IFAC Code of Ethics for Professional Accountants and the IAASB International Standards on Auditing.

### **Forensic Accounting and Fraud Examination (ACG 5673 ) 3 credits**

*Prerequisites: ACG 4651 and enrolled in Professional Accounting Certificate Program or permission of instructor*

An introduction to the theory and practice of forensic accounting with an emphasis on fraud examination. Designed to develop analytical skills that can be utilized by professionals responsible for the prevention, detection and investigation of fraud.

### **Internal Auditing (ACG 5677) 3 credits**

*Prerequisites: ACG 3141 or ACG 6137 and ACG 4651 or ACG 6635 with minimum grades of "C"*

Would you like to know the difference between internal and external auditors? Internal auditors work within a company to review processes, evaluate internal controls and assess risks for a wide variety of business activities. This course covers internal audit from a broad perspective that includes information technology, business processes and accounting systems. Topics include internal auditing standards, risk assessment, governance, ethics, audit techniques and emerging issues.

### **Special Topics (ACG 5932) 3 credits**

*Prerequisites: Permission of instructor and junior standing*

The study of a special area of accounting. Topics will vary. May be repeated for credit.

### **Special Topics (ACG 5933) 1-3 credits**

*Prerequisites: Graduate standing and permission of instructor*

The study of a special area of accounting. Topics will vary. This course may be repeated for credit.

*Grading: S/U*

### **Financial Accounting Concepts (ACG 6027) 3 credits**

*Prerequisite: Graduate standing*

Do you want to feel confident discussing business opportunities within an organization? Learn why accounting is the “language of business.” This course not only acquaints you with the basic financial statements such as Balance Sheet, Income Statement, and Statement of Cash Flows but also elaborates upon the valuation methodologies for each financial account. Upon course completion, students have a solid accounting foundation. This course is only available to graduate students lacking an undergraduate course in accounting.

### **Advanced Accounting Theory (ACG 6135) 3 credits**

*Prerequisites: Admission to College of Business master's program and ACG 6137 or ACG 3141*

*Prerequisite or Corequisite: GEB 6215 with grade of "S"*

Analysis of trends in accounting through review of the major publications of the accounting profession. Emphasis on the structure of accounting theory underlying the concepts of assets and income determination.

### **Financial Reporting and Accounting Concepts (ACG 6137) 3 credits**

*Prerequisites: Admission to College of Business master's program and ACG 2021 or ACG 6027*

Course covers conceptual and applied issues in financial accounting. Students learn to apply basic research skills in financial accounting with authoritative accounting literature. This course is not available to students who have completed ACG 3131 and 3141.

**Note:** Unless otherwise indicated, a grade of "C" or better is required for any course designated as a prerequisite.

### **Advanced Financial Reporting and Accounting Concepts (ACG 6138) 3 credits**

*Prerequisite: Admission to College of Business master's program and ACG 3141 or ACG 6137*

*Prerequisite or Corequisite: GEB 6215 with grade of "S"*

This course is designed for students who desire to pass CPA exams and engage in the long-term career of professional accounting or high-level corporate accounting. Specifically, this course explores financial accounting rules in today’s volatile capital market environment pertaining to pensions and other post-retirement benefits, investments, fair value measurements and disclosures, equity compensation, accounting changes, earnings per share, foreign currency transactions and translation, and derivatives and hedging.

### **Financial Statement Analysis (ACG 6175) 3 credits**

*Prerequisites: Admission to College of Business master's program and ACG 3141 or ACG 6137 and FIN 6406*

Why do some stock analysts suggest that a particular company's stock is overvalued while others suggest otherwise? They all have the same data. In this course, you explore the world of financial analysis and learn why this discipline is part art/ part science. You learn about the various techniques governing financial analysis along with the valuation of businesses and financial instruments. Further, one learns how to interpret technical accounting financial statement presentations in areas such as pensions, deferred taxes and leases.

### **Foreign Study Tour in International Accounting (ACG 6258) 3 credits**

*Prerequisite: Graduate standing*

In this course, students are exposed to a different culture through a study tour that emphasizes the practices and risks faced by U.S. businesses that operate abroad with content on international accounting practices. Students will complete assignments on accounting, auditing, tax, and regulatory issues as these apply to the country visited.

### **Advanced Analysis and Application of Accounting Data (ACG 6315) 3 credits**

*Prerequisites: Admission to College of Business master's program and ACG 2021 or ACG 6027*

*Prerequisite or Corequisite: GEB 6215 with grade of "S"*

Analysis of financial and managerial accounting data for users of those data. Meant to provide broad exposure to accounting to graduate students who are not pursuing accounting degrees and who do not have accounting backgrounds. May not be taken for program credit by M.AC. students, MBA (Accounting) students, students with undergraduate degrees in accounting or students who include ACG 5205, 5215, 6138 or 6135) as part of their degrees.

### **Cost Accounting Theory and Practice (ACG 6347) 3 credits**

*Prerequisites: Admission to College of Business master's program and ACG 2021 or ACG 6027*

Accounting topics for managers, including budgeting, performance measurement, cost analysis, balance scorecards, activity-based costing, and cost functions. This course is not available to students who have completed ACG 3341.

**Note:** Unless otherwise indicated, a grade of "C" or better is required for any course designated as a prerequisite.

### **Business Valuation for Forensic Accountants (ACG 6375) 3 credits**

*Prerequisites: Admission to College of Business master's program and ACG 2021 or ACG 6027*

An introductory course designed to provide a solid foundation for students entering the business valuation profession. Course introduces business valuation theory, research methodology, economic

and industry analysis, the asset approach, and other introductory topics as well as valuation report writing.

### **Communication Strategies for Forensic Accountants (ACG 6376) 3 credits**

*Prerequisite: Admission to master's program in Accounting*

Course provides strategies for communicating effectively as a forensic accountant: (1) writing in discipline-specific language and formats; (2) delivering credible presentations; and (3) adapting messages for various stakeholders.

### **Business Valuation for Fair Value Accounting, Auditing and Financial Reporting (ACG 6377) 3 credits**

*Prerequisites: Enrollment in School of Accounting Executive Programs and ACG 6379*

Applies fair value measurement standards and concepts to auditing and financial reporting. Specific financial reporting areas covered include business combinations, intangible assets, alternative investments and contingent consideration. Applies fair value measurement in the context of the auditing standards.

### **Advanced Accounting Applications in Business Valuation (ACG 6378) 3 credits**

*Prerequisites: Enrollment in School of Accounting Executive Programs and ACG 6379*

Advanced applications in business valuation. The conceptual and practical framework for the determination of the value for specific securities and interests (e.g., stock options); for specific purposes (e.g., estate and gift taxation, buy-sell agreements, employee stock ownership plans and marital dissolutions); and intangible assets (e.g. patents and goodwill).

### **Business Valuation, Advanced Theory, Concepts and Methodologies (ACG 6379) 3 credits**

*Prerequisites: Enrollment in School of Accounting Executive Programs and ACG 6375*

A study of the advanced theory, concepts and methodologies applicable to business valuation. Applications include cost of capital, valuation report writing, advanced application of the major valuation approaches, valuation synthesis, discounts and premiums, pass-through tax entities and expert witnessing in valuation for litigation, financial reporting, taxation and transactions.

### **Communication Strategies for Professional Accountants (ACG 6396) 3 credits**

*Prerequisite: Admission to master's program in Accounting*

Beyond competency in accounting tasks, accountants also need to be skilled communicators to gain a competitive edge in the job market and continue career success. This course provides you with effective communication strategies for winning and retaining clients and expediting information exchange. You develop skills with immediate, real-world application: how to relay accounting information clearly and

concisely, use appropriate formats, adapt messages for various audiences and deliver credible and persuasive presentations.

### **Accounting for E-Commerce (ACG 6465) 3 credits**

*Prerequisite: Admission to College of Business master's program and ACG 2021 or ACG 6027*

As Accounting is the language of business, e-Commerce is the driver of business. Consequently, all accounting work involves e-Commerce in some way. So don't let e-Commerce be the missing ingredient in your accounting education. This course ties together accounting and its driving elements in the areas of technology, data analytics, artificial intelligence and information systems.

### **Advanced Accounting Information Systems (ACG 6475) 3 credits**

*Prerequisites: Admission to master's program in Accounting or permission of instructor and ACG 2021 or ACG 6027*

*Prerequisite or Corequisite: GEB 6215 with grade of "S"*

Is your personal data safe? Just as important, is your company's data secure, confidential and accurate? With technology advancing at a record pace, it is difficult for accountants to keep up. Where is our competitive advantage? This course takes a controls-based focus to answer these questions and more as it also goes down the path of implementing new technology according to the system's development life cycle.

### **Advanced Accounting Applications of Data Analytics (ACG 6496) 3 credits**

*Prerequisites: Admission to master's program; ACG 6686 or ACG 6635 or equivalent; and QMB 3600 or equivalent*

Data, data, data. It's everywhere! Have you ever wondered how data analytics could analyze REAL auditing, forensic accounting and financial statement issues? If so, this is the class for you. Hands-on exercises combine with fundamental data concepts to put you ahead of the game.

### **Advanced Digital Forensics in Forensic Accounting (ACG 6498) 3 credits**

*Prerequisites: ACG 6686 and enrollment in School of Accounting Executive Programs*

To meet the needs of employers and clients, today's accounting professionals must have technological and digital acumen. This course guides students through the process of using computer forensics software to obtain and analyze digital accounting data in a manner that sustains challenges of burden of proof or other challenges from third parties. Students are also guided on the process of using generalized audit software to analyze and interpret complex digital accounting data.

### **IT Auditing (ACG 6625) 3 credits**

*Prerequisite: Admission to College of Business master's program and ACG 4651 or ACG 6635*

A survey of control and auditing techniques employed in computer-based accounting systems.

### **Auditing Theory and Practice (ACG 6635) 3 credits**

*Prerequisites: Admission to College of Business master's program and ACG 4401 or ACG 6475 and ACG 3141 or ACG 6137*

A study of the role of audits in society, the regulations of the auditing profession, current issues in the profession, and the conduct of an attestation engagement. This course is not available to students who have completed ACG 4651.

### **Advanced Auditing Theory and Practice (ACG 6655) 3 credits**

*Prerequisites: Admission to College of Business master's program and ACG 4651 or ACG 6635*

A study of the concepts, assumptions, standards, and issues related to contemporary auditing theory and practice.

### **Internal Auditing Theory and Practice (ACG 6675) 3 credits**

*Prerequisites: (ACG 3141 or ACG 6137) and (ACG 4651 or ACG 6635)*

The theory and practice of internal auditing in the context of risk management governance, ethics and professional standards.

### **Internal Auditing Cases and Projects (ACG 6678) 3 credits**

*Prerequisite: ACG 6675*

A cases-and-projects approach that covers internal audit from a broad perspective that includes information technology, business processes and accounting systems; the design of business processes; and the implementation of key control concepts. The course uses a case study approach that addresses tactical, strategic, systems and operational areas.

### **Interviewing for Forensic Accountants and Auditors (ACG 6685) 3 credits**

*Prerequisites: Enrollment in School of Accounting Executive Programs and ACG 6635 or ACG 4651 or permission of academic director*

Learn to dissect fraud by means of the interview process. In this course, you learn to examine a person's body language and how to conduct interviews of knowledgeable persons to determine the fairness of financial information.

### **Accounting Fraud Examination Concepts (ACG 6686) 3 credits**

*Prerequisites: Admission to College of Business master's program and ACG 2021 or ACG 6027*

In the investigation of fraud, one plus one does not always equal two. In this course, you view fraud from the perspective of the fraudster. You learn that if you understand the person, you understand the fraud. We explore why and how frauds occur through the lens of occupational frauds by looking at proper investigation methods and procedures for both civil and criminal cases.

### **Accounting Fraud Examination Conduct and Procedures (ACG 6687) 3 credits**

*Prerequisites: Admission to College of Business master's program and ACG 2021 or ACG 6027 with minimum grade of "C"*

Detection, investigation and prevention of fraud committed against organizations and individuals rises every year. This course helps you learn how to identify the red flags that indicate there may be fraud and highlight what types of frauds may occur that need your forensic skills. This course introduces many different techniques for identification of fraud and provides you the basis for your future career in accounting forensics (white collar crimes).

**Note:** Unless otherwise indicated, a grade of "C" or better is required for any course designated as a prerequisite.

### **Forensic Accounting and the Legal Environment (ACG 6688) 3 credits**

*Prerequisites: Admission to College of Business master's program and ACG 2021 or ACG 6027 with minimum grade of "C"*

In this course, you learn about the role of federal legislation as it relates to fraud examinations, including laws that preserve the rights of individuals suspected of committing fraud and laws that govern civil and criminal prosecutions, the admittance of evidence and the use of expert witness testimony.

### **Forensic Accounting, Fraud and Taxation (ACG 6689) 3 credits**

*Prerequisites: Admission to College of Business master's program and ACG 2021 or ACG 6027 with minimum grade of "C"*

In this course, you learn about the role of federal legislation as it relates to fraud examinations, including laws that preserve the rights of individuals suspected of committing fraud and laws that govern civil and criminal prosecutions, the admittance of evidence and the use of expert witness testimony.

### **Directed Independent Study (ACG 6905) 1-3 credits**

*Prerequisite: Permission of the School of Accounting*

Independent study, research, or another project to extend and integrate the student's knowledge. This is not to be used as a substitute for an existing course.

### **Special Topics (ACG 6935) 1-3 credits**

*Prerequisites: Graduate standing and permission of instructor*

The study of a special area of accounting. Topics will vary. This course may be repeated for credit.

### **Special Topics (ACG 6936) 1-3 credits**

*Prerequisites: Graduate standing and permission of instructor*

The study of a special area of accounting. Topics vary. This course may be repeated for credit.

*Grading: S/U*

### **Internship (ACG 6941) 1-3 credits**

*Prerequisites: 12 completed ACG or TAX credits beyond ACG 2021, 2071 or 6027, and permission of the School of Accounting internship coordinator*

*Prerequisite or Corequisite: GEB 6215 with grade of "S"*

Internships represent full-time employment for a minimum of six consecutive weeks and should consist of professional work experiences in accounting, auditing or tax. A presentation and papers are required.

### **Seminar in Financial Accounting (ACG 7145) 3 credits**

*Prerequisite: Admission to a Ph.D. program*

Critical, in-depth consideration of selected financial accounting topics of particular relevance to current accounting practice.

**Note:** Unless otherwise indicated, a grade of "C" or better is required for any course designated as a prerequisite.

### **Seminar in Accounting Information Systems (ACG 7415) 3 credits**

*Prerequisites: Admission to a Ph.D. program and ACG 6475*

This course exposes students to critical areas related to accounting information systems research. Topical areas, for example, include information technology expertise and information technology governance.

### **Seminar in Auditing (ACG 7646) 3 credits**

*Prerequisite: Admission to a Ph.D. program*

Course covers research in auditing, seminal papers, and streams of research that underlie current topics. Students read and evaluate recent research published in top journals and develop skills to evaluate working papers.

### **Survey of Behavioral Accounting Research (ACG 7837) 3 credits**

*Prerequisite: Admission to Ph.D. program*

This course serves as a survey of behavioral accounting research for doctoral candidates in the business Ph.D., executive concentration, program. The course includes behavioral research methods that are applied to accounting topics that may be of interest to students seeking a business Ph.D. executive concentration. Methods include surveys, experiments and verbal protocols. Topics include accounting

education, corporate governance, taxpayer issues, investor judgments and auditor judgments.

### **Scientific Method in Business (ACG 7884) 3 credits**

*Prerequisite: College of Business doctoral students only*

Provides Business Ph.D. students with an exposure to the major issues and debates on the scientific method in business, including the use and applications of insights from philosophy of science as it pertains to the business disciplines and an introduction to research design.

### **Survey of Archival Accounting Research (ACG 7886) 3 credits**

*Prerequisite: Admission to Ph.D. program*

This course is a survey of archival accounting research for doctoral candidates in the business Ph.D., executive concentration, program. The course includes basic archival accounting research methods and topics that are of interest to students seeking a business Ph.D. executive concentration. Methods include simple regression and event studies. Topics include earnings quality, audit quality, audit fees and executive compensation.

### **Seminar on Accounting Research and Capital Markets (ACG 7896) 3 credits**

*Prerequisites: Admission to a Ph.D. program*

Critical, in-depth consideration of selected accounting research topics involving capital markets of particular relevance to current accounting practice. Students read and evaluate seminal and recent research published in top journals and develop skills to evaluate working papers and perform accounting research.

### **Qualifying Research Project (ACG 7916) 3 credits**

Accounting Ph.D. students are required during the second summer of the program to complete an independent research project under the supervision of their QRP advisor. The topic and research methodology are based on the student's interest in accounting research. The QRP results in a working paper that will also be presented to the faculty in a workshop.

### **Summer Paper (ACG 7917) 3 credits**

*Prerequisites: Admission to Ph.D. program*

During the first summer of the program, Accounting Ph.D. students are required to replicate/extend a published research paper under the supervision of the Accounting Ph.D. coordinator. The topic and research methodology are based on the student's interest in accounting research.

### **Seminar in Current Accounting Research Issues (ACG 7918) 3 credits**

*Prerequisite: Admission to Ph.D. program*

Critical, in-depth consideration of selected accounting topics of particular relevance to current

accounting practice and research.

### **Special Topics in Accounting (ACG 7935) 3 credits**

*Prerequisite: Admission to a Ph.D. program in the College of Business*

Special topics in accounting. Content will vary. May be repeated for credit.

### **Special Topics (ACG 7936) 1-3 credits**

*Prerequisite: Admission to a Ph.D. program in the College of Business*

Special topics in accounting. Content will vary. May be repeated for credit. *Grading: S/U*

### **Advanced Research in Accounting (ACG 7978) 1-9 credits**

*Prerequisite: Doctoral standing in the College of Business*

Supervised research for comprehensive exam preparation, dissertation proposal development and/or scholarly paper writing. *Grading: S/U*

### **Doctoral Dissertation in Accounting (ACG 7980) 1-12 credits**

*Prerequisite: Admission to doctoral candidacy*

### **Seminar in University Business Education (BTE 7175) 3 credits**

*Prerequisite: Doctoral standing*

Provides knowledge and skill development for doctoral-level business students to prepare them for the teaching component of an academic career.

### **Concepts of Federal Income Tax (TAX 6025) 3 credits**

*Prerequisites: Admission to College of Business master's program and ACG 2021 or ACG 6027*

This course give you the ability to understand the basic concepts of federal taxation by using court cases, the Internal Revenue Code, Regulations, and IRS Rulings so that you can analyze fundamental concepts of the federal income tax. You learn how to apply critical thinking skills in the area of federal income taxes.

**Note:** Unless otherwise indicated, a grade of "C" or better is required for any course designated as a prerequisite.

### **Tax Research (TAX 6065) 3 credits**

*Prerequisites: Graduate standing and TAX 6025 or TAX 4001*

*Prerequisites or Corequisites: GEB 6215 and TAX 6025*

In this course, you learn how to find the answers to tax issues and apply your knowledge of tax research tools to locate, understand and interpret source materials.

### **Corporate Taxation (TAX 6105) 3 credits**

*Prerequisites: Graduate standing and TAX 6025*

*Prerequisite or Corequisite: TAX 6065*

Concepts and principles governing the Federal income taxation of corporations and their shareholders. The source and application of U.S. tax authority as it relates to the formation, operation and liquidation of a corporation. The S Corporation is explored as an alternative to the regular corporation and other modes of operation.

### **Advanced Corporate Taxation (TAX 6115) 3 credits**

*Prerequisites: Graduate standing and TAX 6105*

Concepts and principles governing the Federal income taxation of corporations and their shareholders and the source and application of U.S. tax authority as it relates to complex corporate tax problems. Emphasis will be on the rules governing penalty taxes, tax-free divisions and reorganizations, affiliated corporations, consolidated returns, and multinational considerations.

### **Partnership Taxation (TAX 6205) 3 credits**

*Prerequisites: Graduate standing and TAX 6025*

*Prerequisite or Corequisite: TAX 6065*

An intensive study of partnership taxation covering such topics as the definition of a partnership, formation of a partnership, compensation of partners, taxing partnership income, and transactions between related parties.

### **Estates and Trusts: Planning and Taxation (TAX 6405) 3 credits**

*Prerequisites: Graduate standing and TAX 6025*

*Prerequisite or Corequisite: TAX 6065*

An examination of the principles of estate tax, gift tax, and income tax fiduciaries, beneficiaries, grantors, and other parties. Income with respect to decedents, grant or reversionary trusts, accumulation distributions, and other special problem areas are studied.

### **International Taxation (TAX 6525) 3 credits**

*Prerequisites: Graduate standing and TAX 6065 and (TAX 4011 or TAX 6105)*

This course examines the fundamental concepts of U.S. taxation of foreign income earned by U.S. taxpayers (outbound investment) and of U.S. income earned by foreign taxpayers (inbound investment). Topics covered include source of income, foreign tax credits, Subpart F, foreign currency translations, the newest tax provisions involving GILTI and FDII, income tax treaties, U.S. taxation of foreign persons and U.S. tax compliance issues.

### **State and Local Taxation ( TAX 6605 ) 3 credits**

*Prerequisite: TAX 4011*

An examination of the fundamental concepts of state and local income taxation. The application of the commerce clause and the tax advantages and disadvantages of different forms of business organizations in the context of state and local jurisdictions are studied.

**Contemporary Tax Topics (TAX 6875) 3 credits**

*Prerequisites: Graduate standing and TAX 6025*

*Prerequisite or Corequisite: TAX 6065*

Addresses recent or contemplated changes in tax law, including tax reform proposals and reviews and judicial developments in all areas of taxation. Topics will vary. May be repeated for credit.

**IRS Practice and Procedures (TAX 6877) 3 credits**

*Prerequisites: Graduate standing and TAX 6025*

*Prerequisite or Corequisite: TAX 6065*

Training in tax practice and procedures with an emphasis on IRS rules, procedures and techniques.

**Communication Strategies for Tax Accountants (TAX 6878) 3 credits**

*Prerequisite: Master of Taxation students only*

Tax accountants' success, along with their reputations and strong client-tax accountant relationships, often depend on communication. This course provides you with effective communication strategies you can immediately apply on the job. You gain real-world skills for gathering important financial data, delivering unfavorable or unexpected news, explaining technical jargon and changing tax laws, and presenting your clients' cases to the IRS.

**Special Topics of Taxation (TAX 6935) 1-3 credits**

*Prerequisite: Graduate standing and permission of the School of Accounting*

The study of a special area of taxation. Topics will vary. May be repeated for credit.

## BUSINESS LAW

**Undergraduate Courses** /[link to graduate courses](#)

**Business Law 1 (BUL 4421) 3 credits**

*Prerequisite: Junior standing*

Business leaders face a complex, litigious environment. How can the risk of criminal and civil liability be reduced? Whether related to defective products, unlawful behavior, compliance, contractual rights, and duties, intellectual property rights or debtor/creditor issues, the law widely impacts business. This

course covers contracts, intellectual property, the Constitution, ethics, torts, criminal law, alternative dispute resolution, the court system, insurance law, landlord-tenant agreements and debtor/creditor relationships.

### **Business Law 2 (BUL 4422) 3 credits**

*Prerequisite: Junior standing and BUL 4421*

If Business Law 1 sparked an interest to learn more about how law and business are intertwined, this course won't disappoint. Students explore other legal principles which apply to businesses. Topics include corporations, limited liability companies, partnerships, agency, franchises, real property, personal property, sales and secured transactions. Students learn how these principles apply to routine business activities and how to foresee and avoid legal difficulties in the business world and in their own personal dealings.

### **Ethics in Business (BUL 4443) 3 credits**

Are you interested in learning about the legal and ethical issues that arise in business settings? How do corporate and employment issues create ethical dilemmas? Using cases, students learn to develop critical thinking skills and tools to manage a business while creating an ethical environment. By examining theories of corporate management and through the application of decision-making frameworks. This course seeks to bridge the gap between personal moral choices of an individual and the challenges presented by corporate activity.

### **Law of International Trade (BUL 4461) 3 credits**

The study and interpretation of U.S. Customs regulations, classification of merchandise, application of tariff rules, duty free treatment, special classes of merchandise, importing and exporting, liquidation inspection, search and seizure, fines and penalties.

### **Intellectual Property Law (BUL 4514) 3 credits**

Do you know that intellectual property has been conservatively estimated to compose 42% of the GDP of the U.S. Economy? It is therefore essential that business leaders of today understand what these property rights are, as well as how to manage and commercialize them. This course explores the components of copyrights, patents, trademarks and trade secrets. It describes how and why they are of significant value to business. The course also examines how these rights are impacted by international treaties.

### **Employment Law (BUL 4540) 3 credits**

How do civil rights impact the workplace? This course covers legal issues impacting employees, employers and independent contractors. Topics include legal rights held by contract versus at-will

employees, how restrictive covenants impact employment relationships, what discrimination is and how employers can mitigate legal risk. The course covers laws regulating employee recruiting, interviewing, hiring and training; workplace drug testing, privacy, diversity, romance, violence and social-networking and social media policies.

### **Entertainment Law (BUL 4622) 3 credits**

*Prerequisites: Junior standing and completion of the Gordon Rule composition requirement*

Are you interested in a career focused on the business aspects of the entertainment industry? Since 2004, entertainment has been our country's greatest export encompassing sports, theater, film and music. Topics include entertainment contracts, sales and agents; intellectual property, music, privacy, and publicity rights; legal issues in sports; and First Amendment law. This course helps you decide if you want to apply your business skills to this exciting industry.

### **Directed Independent Study in Business Law (BUL 4905) 1-3 credits**

*Prerequisite: BUL 4421*

Independent reading and research in Business Law. Each program of study is arranged in consultation with a Business Law faculty member and with the permission of the Business Law Coordinator.

### **Special Topics in Business Law (BUL 4930) 1-3 credits**

The study of a special area of Business law. Topics will vary. May be repeated for credit.

## **Business Law Graduate Courses**

### **Business Law for Professional Accountants (BUL 6332) 3 credits**

*Prerequisites: Admission to a College of Business master's program and BUL 4421 or equivalent*

What legal factors must accountants consider to mitigate risk of professional and civil liability?

Whether related to the appropriate application of the Uniform Commercial Code, the correct business entity structure and formation, the interpretation of contractual benefits and duties or potential negligence liability, accountants must consider the various legal ramifications involved in commercial transactions. This course additionally examines the regulatory climate of business, professional responsibility, and potential tort liability.

### **Business Law and Applied Ethics (BUL 6455) 1.5 credits**

*Prerequisite: Graduate students only*

*Corequisites: BUL 4421 and BUL 4422, recommended*

This course presents legal and ethical issues that arise in employment settings and provides students with ethical decision-making tools to identify and manage ethical issues. The goal is that once students

become aware of the complexity of the various issues, they will have a greater tendency to be more deliberate in decision making. Working with cases, students articulate basic principles of ethics, develop the skills to think and write critically and clarify inconsistencies in their own ethics and value systems.

### **Advanced Entertainment Law (BUL 6628) 3 credits**

Apply your business degree to opportunities in one of the most dynamic industries in our country today. Since 2004, entertainment has replaced food as our country's greatest export. Entertainment includes a wide range of activities such as sports, theater, film, music, literary works, internet, videos games, gambling and more. Learn the rules of law that apply to these activities. Discover the great opportunities and careers that are available today in the entertainment industry.

### **Special Topics (BUL 6930) 3 credits**

*Prerequisite: Principles of Business Law, graduate standing*

Study of a special area in business law. The topics will vary, and the course may be repeated for credit.

## ECONOMICS

**Undergraduate Courses** /[link to graduate courses](#)

### **Macroeconomic Principles (ECO 2013) 3 credits**

In this course, students will learn the foundations of macroeconomics as the branch of economics concerned with how decision making, in an environment of scarcity, maps onto the aggregate economy. Students will examine theories and evidence related to the following core set of topics: national income determination, money, monetary and fiscal policy, macroeconomic conditions, international trade and the balance of payments, and economic growth and development. This is a General Education course.

### **Microeconomic Principles (ECO 2023) 3 credits**

We live in a world of limited resources. How are these resources allocated in a market economy? This course introduces students to the standard conceptual tools of microeconomic analysis and then applies these tools to consider how prices are determined; why exchanges tend to be mutually beneficial; who bears the burden of a tax; when businesses are likely to pollute the environment; whether firms benefit from monopoly power; and what policies might improve the efficiency or fairness of markets. This is a General Education course.

### **RI: Honors Microeconomic Principles (ECO 2023) 3 credits**

*Prerequisite: Sophomore standing or permission of department*

We live in a world of limited resources. How are these resources allocated in a market economy? This course introduces students to the standard conceptual tools of microeconomic analysis and then applies these tools to consider how prices are determined; why exchanges tend to be mutually beneficial; who bears the burden of a tax; when businesses are likely to pollute the environment; whether firms benefit from monopoly power; and what policies might improve the efficiency or fairness of markets. This is a General Education course. This is a research-intensive (RI) course.

### **Economics Study Abroad (ECO 2952) 1-4 credits**

*Prerequisite: Sophomore standing*

Credit for enrollment in approved study abroad programs.

### **Intermediate Microeconomics (ECO 3101) 3 credits**

*Prerequisites: ECO 2013 and ECO 2023, or equivalent*

How do individuals make decisions in a world of scarce resources? This course develops systematic models of constrained optimization for consumers and producers in order to consider the role of prices in resource allocation. Special attention is given to market structure, and its effect on profits, consumer welfare, producer welfare and social welfare. Upon completion of this course, students will be able to analyze market efficiency and assess the potential for policies to improve economic outcomes.

### **Intermediate Macroeconomics (ECO 3203) 3 credits**

*Prerequisites: ECO 2013 and ECO 2023, or equivalent*

Why are living standards so much higher today than they were in the past? Why do countries occasionally experience painful economic downturns? This course develops models of economic growth and macroeconomic fluctuation to explore these issues. It emphasizes the decisions made by businesses, workers, consumers and government that underlie macroeconomic outcomes. Students analyze macroeconomic performance over time and assess the potential for fiscal, monetary and regulatory policies to promote growth and smooth out macroeconomic fluctuation.

### **International Economics (ECO 3703) 3 credits**

*Prerequisites: ECO 2013 and ECO 2023, with minimum grades of "C;" course is not available for Economics majors*

Managers and owners must understand how their businesses operate in a global economy. This course provides a business-oriented view of international economics by exploring why nations trade and the effects of trade and capital flows on the balance of payments, exchange rates, incomes and welfare. The impact of policy issues such as tariffs, quotas and trade agreements are explored as well as current trade topics such as intellectual property, labor issues, immigration and the environment.

### **Microeconomics for the Secondary School Class (ECO 4077) 3 credits**

*Prerequisite: ECO 2013 and ECO 2023, or equivalent, or permission of instructor*

The course is designed for teachers interested in introducing microeconomic concepts into their secondary school classes (such as geography, civics, history, and mathematics courses). The goal of the course is for teachers to expand their knowledge of microeconomics and to be able to apply that knowledge by using economic materials and examples in the classroom. This course may not be used toward a business or economics major or minor.

### **Money and Financial Markets (ECO 4223) 3 credits**

*Prerequisites: ECO 2013 and ECO 2023, or equivalent*

Modern economies depend on a well-functioning monetary system to facilitate exchange and highly sophisticated financial markets to channel savings into valuable investments. This course employs the standard tools of economic analysis to consider these issues. Topics include cryptocurrencies, bond markets, stock markets, traditional banks, decentralized finance (DeFi), and monetary policy.

### **Mathematical Modeling in a Connected World (ECO 4401) 3 credits**

*Prerequisites: ECO 3101 and MAC 2233, or equivalent*

What do the problems of matching students to dorm rooms and medical interns to hospitals have in common? Does the introduction of a new road between two locations necessarily reduce traffic congestion? Do markets, where buy and sell orders are executed by an intermediary like the NY stock exchange, function differently from markets without an intermediary? Mathematical economics can provide insights to seemingly complex social situations. In this course, students learn the art of modeling human behavior in a connected world using techniques from mathematics and economics.

### **Game Theory (ECO 4402) 3 credits**

*Prerequisite: ECO 2023 or equivalent*

How does one outsmart their competitors? Game theory studies strategic decision making when multiple players each act in their own interests. This course introduces the core concepts of game theory including sequential-move and simultaneous-move games and Nash equilibrium. Real-life applications of game theory are found in business competition, politics, law, military strategy, sports and gaming. Students develop a new perspective on approaching strategic decisions encountered every day.

### **Introduction to Econometric Methods (ECO 4421) 3 credits**

*Prerequisites: ECO 2013 and ECO 2023 and STA 2023*

Decision making requires knowledge of real-world data and the interconnections among participants in different sectors of the economy. Economists use the core concepts and techniques developed in this course to analyze economic data and conduct empirical research in economics. Topics include

estimation of simple and multiple regression models, statistical inference, prediction and hypothesis testing. Learning how to use Stata, a modern econometrics software, is an integral component of the course.

### **Intermediate Econometrics (ECO 4422) 3 credits**

*Prerequisite: ECO 4421 or equivalent*

Advanced topics in the theory and application of econometric models.

### **Economic Analytics and Big Data (ECO 4441) 3 credits**

*Prerequisites: ECO 2013 and ECO 2023 and STA 2023*

By employing R and RStudio, students acquire the skills to analyze extensive datasets in the context of economic research. Students gain proficiency in uncovering hidden patterns, identifying subtle trends, establishing causal relationships and extracting valuable insights to enable predictive analysis in empirical economic scenarios. Additionally, students become familiar with the cutting-edge features of RStudio for their economic projects, such as generating reproducible reports, designing web applications and employing the ChatGPT coding assistant, among other capabilities.

### **Economics of the Public Sector (ECO 4504) 3 credits**

*Prerequisite: ECO 2013 and ECO 2023, or equivalent, or permission of instructor*

What is the role of the government in the economy? How does public policy influence our society? This course examines the nature of public goods and government expenditures. Also, it evaluates the fairness and economic effects of various taxes and explores public debt policies. Students learn to evaluate under which circumstances the government should participate in markets.

### **International Trade (ECO 4704) 3 credits**

*Prerequisite: ECO 3101 or equivalent*

Economists generally agree that countries benefit from trade in goods and services. Yet, countries routinely engage in trade disputes. The theory of international trade explores the causes of trade in goods and services between countries and the effect of trade on wages and income distribution. The effects of trade policy instruments such as tariffs, quotas, voluntary export restrictions and the creation of free trade agreements help explain why trade restrictions are still popular.

### **International Monetary Economics (ECO 4713) 3 credits**

*Prerequisite: ECO 3203 or equivalent*

Why do exchange rates matter and how are they determined under different exchange rate regimes? Why do countries borrow from and lend to each other? This course explores the international monetary system, with special emphasis on the determination of exchange rates, balance of payments and international monetary policies. Students will also learn different exchange rate regimes and

implications for financial stability, currency crises and monetary reform.

### **Directed Independent Study (ECO 4905) 1-3 credits**

*Prerequisite: Permission of department*

*Grading: S/U*

### **Directed Independent Study (ECO 4907) 1-4 credits**

*Prerequisites: ECO 2013 and ECO 2023, or equivalent, and permission of instructor and department*

Independent study, research or another project to extend and integrate the student's knowledge. Not to be used as a substitute for an existing course.

### **Senior Research in Economics (ECO 4914) 1-3 credits**

*Prerequisite: Permission of instructor*

The student is expected to demonstrate an ability to conceive and execute a meaningful research project on a topic in economics. *Grading: S/U*

### **Directed Independent Research in Economics (ECO 4915) 1-3 credits**

Students work closely with research mentors to conduct research and inquiry in Economics.

Requirements for the course and the criteria for evaluation are agreed upon by the research mentor and the student.

### **Directed Independent Research (ECO 4917) 0 credits**

Students work closely with research mentors to conduct research and inquiry in Economics. *Grading: S/U*

### **Economic Policy Analysis (ECO 4933) 3 credits**

*Prerequisites: ECO 3101 and ECO 3203*

This capstone course is designed for economics majors in their last year of study. Students explore and understand policies to address current economic issues. Through short analyses and longer written reports, the course helps students apply economic theory. The goal of the course is to improve students' ability to communicate their economic ideas through papers and presentations.

### **Special Topics (ECO 4934) 1-3 credits**

### **RI: Honors Senior Seminar in Economics (ECO 4935) 3 credits**

*Prerequisite: Permission of department*

This is the capstone course in the Honors Program. Students conduct an approved independent research project under the direction of a faculty mentor. At the completion of the project, the student submits a

written paper and presents the work in an oral format. This is a research-intensive (RI) course.

### **Field Study in International Economics (ECO 4955) 1-4 credits**

*Prerequisites: ECO 2013 and ECO 2023, or equivalent, or permission of instructor*

An instructional and tour program that studies production and the allocation of resources in foreign countries. The study tour also examines the organizational frameworks related to these processes and compares them with those found in the United States.

### **Economics Study Abroad (ECO 4957) 1-4 credits**

*Prerequisite: Junior standing or permission of instructor*

Credit for enrollment in approved study abroad programs.

### **Contemporary Economic Issues (ECP 2002) 3 credits**

Acquaints students with the economists' way of thinking about social issues. Each class will discuss the important aspects of a particular issue, develop the economic concepts and tools to study the issue, and finally apply these tools to figure out ways to resolve the issue. Cannot be used instead of ECO 2013 or ECO 2023. This is a General Education course.

### **Labor Economics (ECP 3203) 3 credits**

*Prerequisites: ECO 2013 and ECO 2023, or equivalent*

What determines how much a worker gets paid? Do firms discriminate? How do job seekers conduct an optimal job search? Do minimum wage laws make workers better off? Does immigration affect the wages of domestic workers? In this course, students employ economic models to examine these questions and gain a better understanding of the labor market.

### **Managerial Economics (ECP 3703) 3 credits**

*Prerequisites: ECO 2013 and ECO 2023, or equivalent*

In today's economy, successful managers must be able to navigate an increasingly competitive marketplace. This course presents analytical tools managers can use to solve complex business problems and take advantage of profitable opportunities. Topics covered include an examination of business strategy, risk analysis, demand estimation and forecasting, cost structure, incentives and the competitive behavior of firms.

### **Environmental Economics (ECP 4302) 3 credits**

*Prerequisites: ECO 2023, or equivalent*

The environment is one of our most important resources. However, pollution and climate change threaten the environment. Economic concepts such as externalities and public goods problems help explain why this occurs. This course explores whether market-based incentive systems such as

emissions taxes and cap and trade systems can effectively reduce pollution. Issues covered include climate change, air pollution, water pollution and solid waste disposal. Students can apply the knowledge learned in this course to better negotiate the evolving green economy.

### **Industrial Economics, Market Structure and Government Policy (ECP 4403) 3 credits**

*Prerequisites: ECO 2013 and ECO 2023, or equivalent*

Why do airplane ticket prices for adjacent aisle seats differ in price? How much should firms advertise to improve sales? Who really pays for the cost of celebrity product endorsements? Why does the Federal Trade Commission allow some mergers and disallow others? In this course, students analyze the structure of American industries and its impact on pricing, production decisions and innovation. Students evaluate various public policies regarding market structure and discuss conduct and performance of firms.

### **Economics of Entrepreneurship (ECP 4407) 3 credits**

*Prerequisites: ECO 2013 and ECO 2023, or equivalent*

This course is an introduction to the economics of entrepreneurship. Topics include the meaning and definitions of entrepreneurship and entrepreneurship theories and determinants. The course also covers public policy issues, financing-related issues and econometric methods used in entrepreneurship research.

### **Health Care Economics and Policy (ECP 4530) 3 credits**

*Prerequisite: ECO 2023*

Health care markets behave differently from other markets. They are characterized by asymmetric information, uncertainty, externalities, imperfect competition and government involvement. This course employs economic tools to examine medical care systems, health research and public policies in the health care sector. It also analyzes the interactions among patients, providers, insurers, employers and the government.

### **International Economic Development (ECS 3013) 3 credits**

*Prerequisites: ECO 2013 and ECO 2023, or equivalent*

Why are some countries rich and others poor? This course examines the economic characteristics of developing countries. Students study the causes of poverty and consider the prospects for economic growth in these countries. Topics include income growth, poverty and inequality, and the relationship between education, health, demographic change and economic development. Students examine the economic structure and way of life in these countries and study the interactions between rich and poor countries through trade, investment and global climate change.

## **Economics Graduate Courses**

### **Advanced Microeconomics (ECO 6115) 3 credits**

*Prerequisite: Graduate standing*

Discussion of selected topics in micro-economic analysis, including demand theory, production theory, microdynamics, and the theory of games.

### **Advanced Macroeconomics (ECO 6206) 3 credits**

*Prerequisite: Graduate standing*

The Keynesian model of national income determination and major sectors of the model as developed in the post-Keynesian literature as well as extensions into dynamics, cycles and growth.

### **Advanced Monetary Economics (ECO 6216) 3 credits**

*Prerequisite: Graduate standing*

Issues in monetary policy treated within the framework of theory of demands for and supply of money and other assets.

### **Advanced Mathematical Economics (ECO 6403) 3 credits**

*Prerequisites: MAC 2233 (or equivalent) or ECO 4401 or permission of instructor*

Advanced mathematical economics discusses matrix algebra differential and integral calculus, and difference equations that are useful for economic and business analysis. Emphasis on comparative statics, optimization, and dynamics in economic decision making.

### **Advanced Game Theory and Applications (ECO 6409) 3 credits**

*Prerequisite: Graduate standing*

This is a unique course that combines theory with practical applications to develop analytical astuteness in managerial decision making. A strong emphasis is placed on non-cooperative game theory and business applications.

### **Topics in Econometrics (ECO 6424) 3 credits**

*Prerequisite: ECO 6426*

Selected topics in Econometrics.

### **Advanced Econometrics (ECO 6426) 3 credits**

*Prerequisites: STA 3163 or equivalent or ECO 4421 or ECO 4422 or permission of instructor*

Course deals with modern econometric techniques such as the classical linear regression model and its extensions, non-linear regression, pooled regression, panel data methods, and qualitative response regression models. Emphasis on the application of econometric methods to real-world issues.

### **Panel Data (ECO 6427) 3 credits**

*Prerequisite: ECO 6426*

This is an introduction to the theory and application of panel data econometrics. Topics studied include the specification, estimation and inference of empirical models that include individual and/or time effects. The course begins with a review of the linear regression model, then incorporates the panel data settings of fixed, random and mixed effects. Programming skills using a modern statistical package are emphasized.

### **Advanced International Trade (ECO 6706) 3 credits**

*Prerequisite: Graduate standing*

Analysis of international trade from the perspective of globalization with focus on the traditional theories of trade, the normative aspects of international commerce, and latest developments in international trade characterized by imperfect competition.

### **Advanced International Development (ECO 6709) 3 credits**

*Prerequisite: Graduate standing*

Studies the fundamental causes of underdevelopment and development of countries while examining the factors that influence their standard of living and growth through a mix of theoretical and empirical analysis.

### **Advanced International Monetary Economics (ECO 6716) 3 credits**

*Prerequisite: Graduate standing*

In-depth discussion of the balance of payments, exchange rates and the international monetary system and stabilization policies in open economies. Emphasis on the integrated analysis of modern international finance and open-economy macroeconomics.

### **Directed Independent Study (ECO 6906) 1-3 credits**

*Prerequisite: Permission of department*

### **Special Topics (ECO 6930) 1-3 credits**

Study of a special area of economics. Topics will vary. May be repeated for credit.

### **Staff Seminar (ECO 6937) 1-3 credits**

*Prerequisite: Graduate standing and permission of instructor*

Special topics in micro, macro, and quantitative analysis.

### **International Economics Field Experience (ECO 6958) 3 credits**

An instructional and tour program that studies production and the allocation of resources in foreign

countries. The study tour also examines the organizational frameworks related to these processes and compares them with those found in the United States.

### **Master's Thesis (ECO 6971) 1-6 credits**

*Grading: S/U*

### **Microeconomic Foundations of Strategic Decision Making (ECO 7178) 3 credits**

*Prerequisite: Admission to Ph.D. program or permission of instructor*

This course teaches the analysis of strategic decisions. The primary emphasis is on decisions at the business level, although strategy at the corporate level is also considered. The primary analytical method is economics.

### **Contemporary Issues in Global Macroeconomics (ECO 7296) 3 credits**

*Prerequisites: Admission to Ph.D. program or permission of instructor*

Course covers analysis of macroeconomics and the global business environment, including an in-depth discussion of both long-run growth and short-run economic fluctuations. Emphasis is on the macroeconomic and financial connectedness of national economies and on business decision making in global markets characterized by random shocks, crises and economic policy uncertainty.

### **Advanced Research in Economics (ECO 7978 ) 1-9 credits**

*Prerequisite: Doctoral standing in the College of Business*

Supervised research for comprehensive exam preparation, dissertation proposal development and/or scholarly paper writing. *Grading: S/U*

### **Doctoral Dissertation: Economics (ECO 7980) 1-9 credits**

*Prerequisite: Admission to doctoral candidacy*

Doctoral dissertation research in the field of economics. *Grading: S/U*

### **Advanced Managerial Economics (ECP 6705) 1.5 credits**

*Prerequisite: Graduate standing*

Analysis of business decisions in the pursuit of the firm's goals constrained by scarce resources with emphasis on the applications of microeconomic theories combined with recent advances in information economics.

## FINANCE

**Undergraduate Courses** /[link to graduate courses](#)/ [link to Real Estate courses](#) /[link to Risk](#)

## Management and Insurance courses

### **Crowdfunding (ENT 4512) 3 credits**

*Prerequisite: FIN 3403*

This course covers the theory and practice of crowdfunding. Crowdfunding involves raising capital from many retail investors. The course covers equity crowdfunding, as well as peer-to-peer lending donations and rewards-based crowdfunding. In addition to studying the economics and finance of crowdfunding, the course covers crowdfunding regulation.

### **Personal Finance (FIN 3140) 3 credits**

*Prerequisite: Junior standing*

Personal financial planning for the non-major in finance. Practical applications in budgeting, use of credit, banking, insurance, real estate, investments, taxes, retirement planning, estates and wills, with emphasis on inflation planning. (Not available for credit toward major in Finance.)

### **Principles of Financial Management (FIN 3403) 3 credits**

*Prerequisites: ACG 2021, ACG 2071, and junior standing*

Survey of Financial Management, including capital budgeting, cost of capital and financial analysis.

### **Honors Seminar in Finance (FIN 3939) 3 credits**

*Prerequisites: Financial and Managerial Accounting Principles and permission of Director of Honors Program*

Honors survey course in business financial management. Analytical techniques in financial decision-making including financial analysis, asset evaluation, capital budgeting, and cost of capital. Honors course accepted in lieu of FIN 3403.

### **Cooperative Education - Finance (FIN 3949) 1-4 credits**

No credit toward degree. *Grading: S/U*

### **Financial Institutions (FIN 4303) 3 credits**

*Prerequisite: A grade of "C" or better in FIN 3403 or permission of instructor*

An examination of commercial banks and other financial intermediaries, in their relationship to the money and capital markets and to their interaction in the channeling of savings into investment.

### **Financial Management of Institutions (FIN 4313) 3 credits**

*Prerequisite: FIN 3403*

The asset and liability management of commercial banks and other important financial institutions. Includes commercial and consumer lending, managing bank securities portfolios and managing interest

rate risk.

### **Cases in Financial Management (FIN 4422) 3 credits**

*Prerequisite: FIN 4424*

Case analysis of problems in business, including cash flow projections, budgeting financial resources, capital structure, mergers, consolidations, liquidations, and risk analysis.

### **Advanced Managerial Finance (FIN 4424) 3 credits**

*Prerequisite: FIN 3403 and ISM 3011*

Financial modeling using spreadsheet and other applications to apply financial analysis and decision making.

### **Investment Analysis (FIN 4504) 3 credits**

*Prerequisite: A grade of "C" or better in FIN 3403 or permission of instructor*

Principles of investment management; investment media and instruments. Application of analytical techniques to securities; effective income/risk selection of securities and portfolios in theory and in practice.

### **Financial Derivatives (FIN 4533) 3 credits**

*Prerequisite: FIN 3403 with a grade of "C" or better or permission of instructor*

Options, futures, forwards and other derivatives contracts. Investments traded in these markets are examined; pricing and hedging are considered.

### **Student-Managed Investment Fund (FIN 4560) 3 credits**

*Prerequisite: FIN 3403 with minimum grade of "C"*

This course is designed to give students hands-on experience in performing investment research, investing capital and managing a portfolio prior to entering the workforce. Students are expected to analyze the existing portfolio composition, research investment opportunities, generate investment ideas and make recommendations based on their analysis. Some of the research is performed individually while most research is done as a team. It is the student's responsibility to initiate research ideas and recommend specific investment actions to fellow students and a governing board.

### **International Finance (FIN 4604) 3 credits**

*Prerequisite: FIN 3403*

Study of how multinational corporations make financial decisions, such as international cash management, hedging cash flows, international capital budgeting and international financing.

### **Global Capital Markets (FIN 4633) 3 credits**

*Prerequisite: FIN 3403 with minimum grade of "C"*

This course is designed to provide students with an understanding of the evolution of financial markets, how financial markets operate, different types of securities traded, how trades are conducted and the current issues in financial markets. Students master the language of international investing and identify and evaluate some of the issues within financial markets.

### **Directed Independent Study (FIN 4905) 1-4 credits**

*Prerequisites: Junior standing and permission of department chair prior to registration*

An independent study, research or other project to extend and integrate the students' knowledge. This is not to be used as a substitute for an existing course, or for credit in the Finance major.

### **Special Topics (FIN 4934) 1-4 credits**

*Prerequisites: Junior standing and permission of instructor*

The study of a special area of Finance. Topics will vary. May be repeated for credit.

### **Finance Internship (FIN 4940) 3 credits**

*Prerequisite: FIN 3403 with minimum grade of "C" and permission of instructor*

Provides insight into financial management and financial services allowing students to hone their skills in a real-world setting. Students gain valuable, practical experience under the combined direction of an industry professional in the work setting as well as a faculty member in the academic setting.

### **Finance Study Abroad (FIN 4957) 1-4 credits**

*Prerequisite: Junior standing*

Credit for enrollment in approved study abroad programs.

## **Finance Graduate Courses**

### **Advanced Financial Management for Financial Planners (FIN 6150) 3 credits**

*Prerequisites: TAX 6025, 6405 and RMI 6016 or permission of instructor*

A capstone course covering the practice and implementation of personal financial planning with emphasis on casework in budgeting and saving, risk management, retirement and estate planning, tax planning, and investment planning. In addition, the course will examine retirement and employee benefits plans.

### **Financial Markets (FIN 6246) 3 credits**

*Prerequisite: Graduate standing*

A study of factors affecting interest rates and prices in the money, savings, and capital markets. Attention is given to the institutions in these markets and interrelations between the institutions.

### **Financial Management of Financial Institutions (FIN 6314) 3 credits**

*Prerequisite: FIN 6806 or permission of instructor*

An in-depth analysis of commercial banks and other financial institutions from a managerial approach. Emphasis is placed upon asset, liability, and capital management within financial institutions. There will be discussion-oriented case analyses.

### **Financial Management (FIN 6406) 3 credits**

*Prerequisites: Graduate standing, financial accounting principles and principles of economics*

Tools and applications of financial analysis and forecasting, investment policy, financing policy, and working capital policy. Not available as a graduate elective. Open only to graduate students lacking an undergraduate course in Finance.

### **Financial Management: Investment Decisions and Policy (FIN 6436) 3 credits**

*Prerequisite: FIN 6406 and graduate standing*

Techniques and theory of making value-maximizing selections and terminations of both fixed and working capital assets. The course emphasizes how real options create opportunities for managers to augment the firm's value.

### **Financial Modeling (FIN 6455) 3 credits**

*Prerequisite: Successful completion of Market Rate M.S. in Finance "Bootcamp"*

Financial modeling using spreadsheets to conduct financial analysis for managerial decision making. Special attention is given to models in mergers and acquisitions, leveraged buyouts, venture capital, etc. This is a hands-on course that uses the FAU trading room and Bloomberg and other databases.

### **Quantitative Methods in Finance (FIN 6456) 3 credits**

*Prerequisite: Successful completion of Market Rate M.S. in Finance "Bootcamp"*

Introduces financial applications of quantitative techniques covered in areas such as probability, probability distributions and descriptive statistics, sampling and estimation, hypothesis testing, correlation analysis and regression, optimization time-series analysis and simulation analysis. The course requires a project using statistical software.

### **Investment Management (FIN 6515) 3 credits**

*Prerequisites: Graduate standing and permission of instructor*

Current problems in investments. It analyzes financial reports and movements of security prices and emphasizes quantitative methods of portfolio selection. It is also an introduction to investment model building.

### **Security Analysis (FIN 6517) 3 credits**

*Prerequisite: Successful completion of Market Rate M.S. in Finance “Bootcamp”*

Emphasis on the characteristics of financial assets and on major valuation models to determine intrinsic value. This course focuses on equity and fixed income instruments.

### **Portfolio Management (FIN 6525) 3 credits**

*Prerequisites: Principles of Accounting, Principles of Economics*

The course examines the current trends in investments by analyzing financial reports and the movements of security prices. Quantitative and qualitative approaches to investment management and portfolio selection are discussed.

### **Financial Risk Management and Derivatives (FIN 6537) 3 credits**

*Prerequisite: FIN 6406 and graduate standing*

This course focuses on financial risk. It deals with its measurement, the derivative instruments used to trade it and the techniques used to manage it.

### **Multinational Finance (FIN 6605) 3 credits**

*Prerequisite: FIN 6406 or its equivalent*

Financial management for international companies. Sources of funds, capital structure, investment strategies, monetary exchange problems and governmental constraints on firms operating in more than one nation are discussed.

### **Financial Ethics (FIN 6745) 2 credits**

*Prerequisite: Completion of Market Rate M.S. in Finance “Bootcamp”*

Overview of ethical issues and regulatory challenges faced by investment professionals and participants in financial markets.

### **Theory of Financial Management (FIN 6804) 3 credits**

*Prerequisite: FIN 6806 or permission of instructor*

An in-depth study of the theories of management of working capital, the marginal analysis principles underlying capital budgeting, and alternate theories of capital structure. This course may replace FIN 6806 for qualified students with permission from the Chair.

### **Advanced Financial Management (FIN 6806) 3 credits**

*Prerequisites: Graduate standing, FIN 6406 or equivalent*

*Prerequisite or Corequisite: GEB 6215*

Theory and practice of financial planning and management. It emphasizes the capital structure of business enterprise, its cost of capital, and its evaluation. Applications of quantitative methods to capital theory.

### **Directed Independent Study (FIN 6906) 1-3 credits**

*Prerequisite: Permission of department chair prior to registration*

An independent study research, or other project to extend and integrate the student's knowledge. It is not to be used as a substitute for an existing course.

### **Special Topics (FIN 6936) 1-3 credits**

*Prerequisite: Permission of instructor*

A study of a special area of Finance; topics will vary. The course may be repeated for credit.

### **Master's Thesis (FIN 6971) 1-6 credits**

*Prerequisite: Graduate standing*

An application of the professional and research methodology to a problem or project chosen between student and instructor.

### **Seminar in Capital Markets (FIN 7247) 3 credits**

*Prerequisites: Doctoral students in the College of Business and permission of instructor*

A theoretical study of financial intermediation, capital markets, and interest rates. Relevant issues include capital adequacy, regulation, credit rationing, deposit insurance, and international banking.

### **Seminar in Corporate Financial Theory (FIN 7449) 3 credits**

*Prerequisites: FIN 6806 and permission of instructor*

Readings, presentations, and papers of classical and current theoretical topics in financial management and corporate finance. Topics include theories of capital budgeting, capital structure, dividends, agency, signaling, etc.

### **Seminar in Investments (FIN 7527) 3 credits**

*Prerequisites: FIN 6806, FIN 6816, and Security Analysis and Portfolio Management*

An investigation of the theoretical foundation of investments, including portfolio theory, the CAPM, OPM, and APT, both theoretically and empirically. Investment decisions and portfolio management techniques are analyzed from those viewpoints.

### **Theory of Corporate Finance: Readings and Empirics (FIN 7808) 3 credits**

*Prerequisites: FIN 7895, Admission to Ph.D. program*

This doctoral seminar provides an in-depth analysis of theory and empirical research in capital markets and corporate finance. Corporate finance topics include theories of capital budgeting, capital structure, dividends, agency, signaling, corporate governance, financial distress and other areas of corporate finance.

**Seminar in Financial Institutions (FIN 7811) 3 credits**

*Prerequisite: Admission to Ph.D. program*

In-depth analysis of empirical research in financial institutions and markets.

**Empirical Methods in Finance (FIN 7817) 3 credits**

*Prerequisite: Admission to Ph.D. program*

Course covers empirical methods used in corporate finance and asset pricing research.

**State-of-the-Art Managerial Finance (FIN 7895) 3 credits**

*Prerequisite: Admission to the Ph.D. program*

The course covers the theory and practice of financial planning and management. It emphasizes the capital structure of business enterprise, its cost of capital and its evaluation. Discussion of applications of quantitative methods to capital theory is included.

**Summer Research Project - Finance (FIN 7915) 1-6 credits**

*Prerequisite: Permission of department*

A directed research project for Finance doctoral students tailored so that the student may demonstrate proficiency in application of tool courses to a Finance problem.

**Seminar in Current Financial Research (FIN 7932) 3 credits**

*Prerequisite: Permission of instructor*

Special topics and the treatment of an area of current research interest in the field of Finance.

**Seminar in International Finance (FIN 7938) 3 credits**

*Prerequisite: Admission to Ph.D. program*

Course covers international finance research on corporate finance and investments to include foreign direct investments, international portfolio investing and asset pricing.

**Advanced Research in Finance (FIN 7978) 1-9 credits**

*Prerequisite: Doctoral standing in the College of Business*

Supervised research for comprehensive exam preparation, dissertation proposal development and/or scholarly paper writing. *Grading: S/U*

**Doctoral Dissertation - Finance/Real Estate (FIN 7980) 1-15 credits**

*Prerequisites: Permission of department and admission to candidacy*

Doctoral dissertation research for the fields of Finance and Real Estate. *Grading: S/U*

# REAL ESTATE

**Undergraduate Courses** / [link to graduate courses](#)

## **Principles of Real Estate (REE 3043) 3 credits**

*Prerequisite: FIN 3403*

Survey introduction to real estate, the nature, principles and fundamental operation of the real estate industry. The completion of this course and REE 4433 may satisfy the FREC educational requirement for real estate licensing.

## **Cooperative Education - Real Estate (REE 3949) 1-4 credits**

No credit toward degree. *Grading: S/U*

## **Real Estate Appraisal (REE 4103) 3 credits**

*Prerequisites: REE 3043 and junior standing*

A study of socioeconomic factors influencing property value; analysis of principles necessary for effective value decisions. Students are exposed to the process of valuation via the cost, market and income approach to real estate value.

## **Real Estate Finance (REE 4204) 3 credits**

*Prerequisite: FIN 3403*

Real estate financing is analyzed in a decision-making context, and how that decision affects real estate investments. Includes methods of raising debt and equity funds, the underwriting process, traditional and creative concepts, and mechanisms for construction and permanent financing.

## **Real Estate Investment (REE 4303) 3 credits**

*Prerequisite: FIN 3403*

This course explores theories and techniques for analyzing real estate investment opportunities from the viewpoint of the equity investor. Topics addressed include market analysis, investment performance measurement methods, operating and reversion cash flow projections, discounted cash flow valuation procedures, capital structure considerations, and income tax considerations in real estate investing.

## **Real Estate Law (REE 4433) 3 credits**

*Prerequisites: BUL 4421, REE 3043, and junior standing*

Florida and federal statutes affecting real estate will be studied. The nature and acquisition of rights in real property will be examined, including the analysis of legal problems from land acquisition through inspection of completed building and mortgage closing. The completion of this course and REE 3043 may meet the FREC educational requirement for real estate licensing.

### **Real Estate Development (REE 4732) 3 credits**

*Prerequisites: REE 4303, REE 4433, and junior standing*

This course explores theories and techniques for evaluating and implementing real estate development projects with land-use planning, regulatory compliance, funding sources, cash flow management and project management.

### **Directed Independent Study (REE 4905) 1-4 credits**

*Prerequisites: REE 3043, junior standing, and permission of instructor*

An independent study, research or other project to extend and integrate the students' knowledge. This is not to be used as a substitute for an existing course.

### **Special Topics (REE 4934) 1-3 credits**

*Prerequisites: Junior standing and permission of instructor*

Advanced study and analysis of selected topics in Real Estate. Content will vary.

### **Real Estate Internship (REE 4940) 3 credits**

*Prerequisites: REE 3043 and junior standing*

Intended for students interested in careers in the real estate industry, this course provides a practical, experiential learning opportunity under the combined direction of an industry professional and a faculty member. Students work in an apprentice role during the semester while participating in academic exercises designed to reinforce the applied learning experience.

## **Real Estate Graduate Courses**

### **Real Estate Investment Analysis (REE 6305) 3 credits**

*Prerequisite: FIN 6806*

An advanced application of theory and techniques for analysis of the equity position in real estate ownership utilizing cases. Considers the impact of leverage, creative financing, and federal tax policy on real estate value.

### **Real Estate Strategy and Perspectives (REE 6309) 3 credits**

*Prerequisite: REE 6045*

This is the capstone course in the master's in real estate program. The course is designed to encourage the student toward applied decision making across real estate specialty areas. The intent of the course is to integrate skills and information gained in prior real estate courses and to independently apply them using the case study methodology.

# RISK MANAGEMENT AND INSURANCE

**Undergraduate Courses** /[link to graduate courses](#)

## **Risk Management and Insurance (RMI 3011) 3 credits**

Provides students with a solid background in risk management and insurance. Course discusses all the different types of risks, covers risk management techniques, including risk control and risk financing with a focus on insurance policies, and also presents other major topics in personal financial planning, social insurance and social security, insurance operations and regulations, reinsurance and innovative capital market financing plans. Consideration is given mostly to the personal line risk management and insurance, including personal property and liability insurance such as auto insurance, home insurance, life insurance and health insurance.

## **Insurance and Financial Planning (RMI 4116) 3 credits**

Discusses important personal financial planning components, including life insurance, health insurance (medical expense plans, Medicare and Medicaid, disability income insurance, long-term care insurance), retirement planning (employer-sponsored retirement plans, non-qualified plans, IRAs and annuities) and estate planning. Other important topics covered include life settlements, mortality bonds, employee benefits, insurance fraud, family trusts, QPRTs, private annuities and reverse mortgage. This course employs materials and techniques that are consistent with modern principles and best practices, providing knowledge and skills that students can use immediately.

## **Corporate Risk Management (RMI 4353) 3 credits**

This course discusses statistical approaches to evaluate risks, techniques for risk control, and methods to measure the effectiveness of risk strategies. Course also covers risk financing, including commercial insurance and alternative risk transfers.

## **Enterprise Risk Management and Corporate Governance: Qualitative Analysis (RMI 4423) 3 credits**

This course introduces students to enterprise risk management and principles of corporate governance, which are critical to publicly traded entities. The course focuses on the complexities faced by global companies in addressing these issues.

## **Insurance Accounting (RMI 4723) 3 credits**

*Prerequisites: ACG 2021 and RMI 3011*

Students study insurance accounting requirements in the country or state where an insurer is organized. The focus will be on United States and European Union regulatory reporting requirements.

### **Directed Independent Study (RMI 4905) 1-3 credits**

*Prerequisite: Junior or senior standing and permission of department chair prior to registration*

An independent study, research, or other project to extend and integrate the students' knowledge. This is not to be used as a substitute for an existing course.

### **Special Topics (RMI 4930) 1-3 credits**

*Prerequisite: Junior or senior standing and permission of instructor*

The study of a special area of insurance. Topics will vary. May be repeated for credit.

### **Risk Management and Insurance Internship (RMI 4940) 3 credits**

*Prerequisite: RMI 3011 with minimum grade of "C" and permission of instructor*

Provides insights into risk management and insurance allowing students to hone their skills in a real-world setting. Students gain valuable, practical experience under the combined direction of an industry professional in the work setting as well as a faculty member in the academic setting.

## **Risk Management and Insurance Graduate Courses**

### **Risk Management and Insurance (RMI 6016) 3 credits**

This course is designed to provide students with a solid background in risk management and insurance. It discusses all the different types of risks and covers risk management techniques, including risk control and risk financing with a focus on insurance policies. It also presents other major topics in personal financial planning, social insurance and social security, insurance operations and regulations, reinsurance and innovative capital market financing plans. Consideration is given mostly to the personal line risk management and insurance, including personal property and liability insurance such as auto insurance, home insurance, life insurance and health insurance.

### **Insurance and Financial Planning (RMI 6118) 3 credits**

*Prerequisite: Graduate standing*

This course discusses important personal financial planning components, including life insurance, health insurance (medical expense plans, Medicare and Medicaid, disability income insurance, long-term care insurance), retirement planning (employer-sponsored retirement plans, nonqualified plans, IRAs and annuities) and estate planning. Other important topics covered include life settlements, mortality bonds, employee benefits, insurance fraud, family trust, QPRTs, private annuities and reverse mortgage. This course employs materials and techniques that are consistent with modern principles and best practices, providing knowledge and skills that students can use immediately.

### **Principles and Practices of Enterprise Risk Management and Legal Compliance (RMI 6346) 1-3**

### **credits**

A study of business risk to gain a proper understanding of the impact on a company's business. A review of all activities, processes, techniques, and resources that interface with each other. Case studies to illustrate the need to provide unified solutions to stakeholders. Study the potentials of ERM to safeguard the interest of the company and help it grow.

### **Corporate Risk Management (RMI 6356) 3 credits**

*Prerequisite: Junior standing or higher*

This course discusses statistical approaches to evaluate risks, techniques for risk control, and methods to measure the effectiveness of risk strategies. This course also covers risk financing, including commercial insurance and alternative risk transfers.

### **Enterprise Risk Management and Corporate Governance: A Qualitative Analysis (RMI 6426) 3 credits**

This course introduces students to enterprise risk management and principles of corporate governance that are critical to publicly traded entities. The course focuses on the complexities faced by global companies in addressing these issues.

### **Insurance Accounting (RMI 6727) 3 credits**

*Prerequisites: ACG 2021 and RMI 3011 or RMI 6016*

Course covers insurance accounting requirements in the country or state where an insurer is organized with an emphasis on the U.S. and European Union regulatory reporting requirements.

### **Directed Independent Study (RMI 6905) 1-3 credits**

*Prerequisite: Permission of department*

Independent study research or other project to extend and integrate the student's knowledge.

### **Special Topics (RMI 6930) 1-3 credits**

Special topics in insurance. May be repeated for credit.

## **INFORMATION TECHNOLOGY AND OPERATIONS MANAGEMENT**

**Undergraduate Courses** /[link to graduate courses](#)

### **Special Topics in Business (GEB 2930) 3 credits**

*Prerequisite: Permission of advisor*

Study related to specialized topics in business.

### **Business Communication for Data Analysts (GEB 3231) 3 credits**

*Prerequisite or Corequisite: ISM 3116 with minimum grade of "C"*

This course introduces students to essential communication skills used by successful data analysts: interpersonal/team membership, concise business and technical writing, confident speaking, effective organizational strategies, critical thinking/analysis, appropriate technical language and formats and productive job-search approaches within the Management Information Systems (MIS) field. This course builds on analysis of data developed in ISM 3116 to show how it can be communicated effectively to audiences both within and outside the MIS field.

### **Information Systems Fundamentals (ISM 2000) 3 credits**

Course introduces students to the basic concepts in computer technology and highlights the relevance of computers and their applications to all aspects of life in the modern world. It covers the fundamentals of computer systems, computer networks, software applications, and the Internet as well as social issues related to the use of computer technology.

### **Social Media Innovation (ISM 3007) 3 credits**

Students learn how social media works, why social media matters to business and how to use it successfully.

### **Management Information Systems (ISM 3011) 3 credits**

*Prerequisite: ISM 2000*

Course examines management of information systems and resources in organizations and their social implications and develops proficient skills in key business information technologies such as Excel.

### **Introduction to Business Analytics and Big Data (ISM 3116) 3 credits**

*Prerequisite: ISM 3011 or ACG 4401*

Provides an understanding of the business intelligence processes and techniques used in transforming data to knowledge and value in organizations. Students also develop skills to analyze data using generally available tools (e.g., Excel).

### **Introduction to Computer Systems and Software Development (ISM 3230) 3 credits**

*Prerequisite: ISM 2000*

Offers an overall understanding of computer system components and software development using structured and object-oriented programming languages. Topics include computer hardware, operating systems, algorithms and new trends in programming. Hands-on approaches and real-world technology

solutions are used.

### **Intermediate Business Software Development (ISM 3232) 3 credits**

*Prerequisite: ISM 3230*

Introduction to object-oriented business software development using the object-oriented programming language C++. Additional topics include data file input/output, data structures (e.g., arrays, linked lists, stacks, and queues), and common algorithms (e.g., hashing, sorting).

### **Cooperative Education - Computer Information Systems (ISM 3949) 1-3 credits**

No credit toward degree. *Grading: S/U*

### **Contemporary Issues of Digital Data Management (ISM 4041) 3 credits**

Covers business processes and frameworks for data collection, storage, retrieval and transfer of digital data. Discusses the various ways through which industry and government compile data for purposes such as marketing, customer relationship management, fraud and crime prevention, e-government, etc. Considers also the business, legal, ethical and social context of data gathering and utilization.

### **Internet Application Programming (ISM 4052) 3 credits**

*Prerequisites: ISM 4212 and ISM 4220*

Internet-based systems architecture; client/server design methodology for distributed systems; user interface using HTML, DHTML, JavaScript, and VBScript; server side scripting using VBScript and Active Server Pages; online database accessing and data processing; techniques for e-commerce application development.

### **Mobile Apps for Business (ISM 4053) 3 credits**

*Prerequisite: Junior standing*

Provides study and practice of actual entrepreneurial situations by exploring the lifecycle of a mobile app development. Students prepare the business plans for a mobile application and work on a real assignment for what is meant to be a real business. Students learn to think like a business person, understand everyday issues, develop and challenge ideas and sharpen related entrepreneurial skills.

### **Social Media and Web Technologies (ISM 4054) 3 credits**

*Prerequisite: ISM 3011 or ACG 4401*

Introduces business students of all majors to various social media and web technologies relevant to modern organizations. Emphasis is on the business aspects of website design and the use of social media, such as how companies use social networks to earn revenue and build recognition among their desired market. The course progresses from introductory work on web design to a project in which students design and develop a website.

### **Data Mining and Predictive Analytics (ISM 4117) 3 credits**

Introduces the core concepts of data mining (DM), its techniques, implementation and benefits. Also identifies industry branches that most benefit from DM, such as retail, target marketing, fraud protection, health care and science and web and e-commerce. Detailed case studies and using leading mining tools on real data are presented.

### **Advanced Systems Analysis and Design (ISM 4133) 3 credits**

*Writing Across Curriculum (Gordon Rule)*

*Prerequisite: 9 credits completed in MIS major or minor*

Life cycle of information processing systems, planning and control of projects, documentation, formal techniques and use of generalized software packages.

### **Database Management Systems (ISM 4212) 3 credits**

*Prerequisite: ISM 3011 or ACG 4401*

Focuses on the development of well-formed databases for the purpose of data management from the initial design of the database to the implementation and query and to the application of database management tools and techniques such as data security for use in business and government organizations.

### **Business Data Communications (ISM 4220) 3 credits**

*Prerequisite: ISM 2000*

Fundamentals of communication technology including wide-area networks and organizational impacts of communication-based innovations.

### **Advanced Business Software Development (ISM 4234) 3 credits**

*Prerequisites: ISM 3232*

Advanced concepts and techniques for object-oriented business software development, using either C# or Java for developing business applications with an emphasis on building event-driven and GUI (Graphic User Interface) desktop applications with the capability of interaction with databases.

### **Business Software Systems Development Project (ISM 4243) 3 credits**

*Prerequisite: ISM 3230*

This is a course that integrates knowledge and skills for system analysis and design, database management, and object-oriented programming to develop realistic business software projects based on the Internet and web platforms. Teamwork, communications, project management and analytical skills are developed and enhanced.

### **Introduction to Cybersecurity (ISM 4320) 3 credits**

This course offers a balance of the managerial and technical aspects of information security and cybersecurity. A comprehensive overview is offered of cybersecurity issues related to operating systems, databases, networks, physical and infrastructural security, and cryptography.

### **Management of Information Assurance and Security (ISM 4323) 3 credits**

Emphasizes information security policy development, security management planning, risk assessment and risk management, disaster recovery and business continuity, and personnel issues related to security management.

### **Computer Forensics (ISM 4324) 3 credits**

This course introduces basic computer forensics tools, and then emphasizes digital evidence controls, data acquisition, computer forensic analysis, file recovery, and network and email forensics.

### **Healthcare Information Systems (ISM 4381) 3 credits**

Introduces the fundamentals of information systems used for managerial and clinical support in healthcare, including electronic health records. Covered are the concepts of healthcare delivery systems, their integration with workflow processes and employee and patient management, clinical data collection, storage management and data confidentiality and security.

### **Advanced Business Analytics (ISM 4403) 3 credits**

*Prerequisite: ISM 3116*

An in-depth examination of business analytics methods of visualization, data mining, text mining and web mining using various analytical tools. Applications to smaller firms are investigated in a laboratory setting.

### **Social Media and Web Analytics (ISM 4420) 3 credits**

Covers concepts and techniques for retrieving, exploring, visualizing and analyzing social network and social media data, website usage and clickstream data. Students learn to use key metrics to assess goals and return on investment, perform social network analysis to identify important social actors, subgroups and network properties in social media.

### **Artificial Intelligence and Digital Transformation for Business (ISM 4421) 3 credits**

Students gain a business perspective of artificial intelligence (AI) as a driver of innovation and digital transformation in a wide array of industries. They learn how to plan, manage and maintain AI projects and how to address the digital transformation challenges and implications for the organization and society.

### **Blockchain and Crypto Assets: Business Implications (ISM 4451) 3 credits**

The course provides a broad overview of blockchain and crypto assets and their main characteristics. The course covers the business fundamentals of cryptocurrency, Non-Fungible Token (NFT) and similar crypto products. Analysis of business models and strategies are discussed in the context of blockchain and crypto innovations. Appropriate for all business disciplines.

### **Directed Independent Study (ISM 4905) 1-3 credits**

*Prerequisite: Permission of instructor and department before registration.*

### **Special Topics (ISM 4930) 1-3 credits**

*Prerequisite: Permission of instructor*

Study relating to specialized topics.

### **Information Technology and Operations Management Internship (ISM 4940) 3 credits**

*Prerequisites: Senior standing and permission of instructor*

Students gain valuable practical experience under the guidance of a supervisor (mentor) in the work setting as well as a professor in the academic setting. Provides insights into the operations of businesses and organizations allowing students to hone their information technology and operations management skills in a real-world setting.

### **Operations Management (MAN 3506) 3 credits**

*Prerequisites: QMB 3600 and MAN 3025 with grades of "C" or better*

An introductory course in operations management. Covers basic operations concepts and techniques in services and manufacturing. Includes service and product design, process analysis, project management, quality, supply chain, capacity and inventory management. Ethics, international aspects and the interdisciplinary nature of operations management are highlighted where appropriate.

### **Service Operations (MAN 4029) 3 credits**

*Prerequisite: Junior standing*

Examines the nature and role of services, service strategies, new service development, service processes, service errors, technology and innovation, service facility location, layout and the management of service employees. Also focuses on globalization of services and the measurement and management of service quality.

### **Operations Management Applications (MAN 4504) 3 credits**

*Prerequisites: QMB 3600 and MAN 3506*

The application of management systems, quantitative principles and techniques to the effective planning and utilization of resources in the operations of manufacturing, research and services.

### **Concepts in Business Process Improvement Management (MAN 4520) 3 credits**

*Prerequisite: MAN 3506 or permission of instructor*

Covers leading concepts of business process improvement in manufacturing and services. Introduces the tools and techniques of process improvement management. Includes a focus on Six Sigma Quality, Process Capability, Process Control, Business Process Re-engineering and Service Quality. An emphasis on theory-led real-world solutions is provided.

### **Project Management (MAN 4583) 3 credits**

*Prerequisite: Junior standing in the College of Business*

An introductory course in the fundamentals of project management. Students are introduced to basic concepts and techniques, including management of the triple constraint of scope, time and cost that is critical to planning and executing successful projects.

### **Global Supply Chain Management (MAN 4597) 3 credits**

*Prerequisite: Junior standing*

Presents an overview of supply chain management: the management of sourcing, operations and distribution processes along a supply chain. Examines how firms may gain a competitive advantage through supply chain activities. Topics include supply chain network design, purchasing, forecasting, inventory management, globalization and outsourcing, transportation and information technology.

### **Data Management and Analysis with Excel (QMB 3302) 3 credits**

An introductory course covering basic Excel skills for managing information and data, analyzing data, visualizing data through charts and pivot tables, creating scenarios, using functions and automating tasks.

### **Quantitative Methods in Administration (QMB 3600) 3 credits**

*Prerequisites: MAC 2233, STA 2023*

Introduction to basic mathematical and statistical methods and models, as well as their software applications for solving business problems and/or making decisions. Includes such topics as probability and probability distributions, decision analysis, forecasting and linear regression, linear programming and waiting line models.

### **Honors Seminar in Quantitative Methods (QMB 3939) 3 credits**

*Prerequisites: MAC 2233, STA 2023 and permission of Director of Honors Program*

Fundamentals of analytical models for administrative problem-solving and decision-making. Includes such topics as decision theory, linear programming, goal programming, game theory, networks, and queuing. Honors course accepted in lieu of QMB 3600.

### **Directed Independent Study (QMB 4905) 1-4 credits**

*Prerequisite: A Directed Study form (available from the departmental secretary) must be signed by the professor concerned*

Individual research project or field investigation in the area of Management Science or Systems.

### **Decision and Information Systems Study Abroad (QMB 4957) 1-4 credits**

*Prerequisite: Sophomore standing*

Credit for enrollment in approved study abroad programs.

## **Information Technology and Operations Management Graduate Courses**

### **Master's Thesis (CIS 6970) 1-6 credits**

*Prerequisites: Completion of core requirements and permission of department chair*

### **Management of Information Systems and Technology (ISM 6026) 3 credits**

*Prerequisite or Corequisite: GEB 6215*

A study and evaluation of information systems: types, development and use. Emphasis is on understanding information systems in the context of managerial use, problems, and opportunities.

### **Mobile Apps for Business (ISM 6058) 3 credits**

*Prerequisite: Admission to an FAU graduate program*

Provides study and practice of actual entrepreneurial situations by exploring the lifecycle of a mobile app development. Students prepare business plans for a mobile application and work on real assignment of a real business. Students learn to think like a business person, understand everyday issues, develop and challenge ideas and sharpen related entrepreneurial skills.

### **Advanced Systems Analysis and Design (ISM 6123) 3 credits**

*Prerequisite: Graduate standing*

Examines the design and application of systems in business for routine data processing, management reporting and decision support at various levels within the organization. Available only to graduate students lacking an undergraduate course in advanced systems analysis and design.

### **Data Mining and Predictive Analytics (ISM 6136) 3 credits**

Introduces the core concepts of data mining (DM) and its techniques, implementation and benefits. Course also identifies industry branches that most benefit from DM, such as retail, target marketing, fraud protection, health care and science, and web and e-commerce. Detailed case studies and using leading mining tools on real data are presented.

### **Information Technology Fundamentals (ISM 6148) 3 credits**

*Prerequisite: Graduate standing*

Provides an examination of information technology concepts, such as computer architecture and hardware, programming logic, algorithms and databases, communications, web technologies and social media. Available only to graduate students lacking an undergraduate course in information technology fundamentals.

### **Database Management Systems (ISM 6217) 3 credits**

*Prerequisite: Graduate standing*

Development of well-formed databases to manage data from initial database design to implementation and query. Applies database management tools and techniques such as data security for use in businesses and government. Available only to graduate students lacking an undergraduate course in database management systems.

### **Business Data Communications (ISM 6225) 3 credits**

*Prerequisite: Graduate standing*

An introductory course in data communications and computer networking. Students are introduced to the fundamental network building blocks and the concepts behind their operations. Available only to graduate students lacking an undergraduate course in business data communications.

### **Information Technology Project and Change Management (ISM 6316) 3 credits**

Course addresses key issues in managing information technology projects through a study of the project life cycle. Topics include planning and control, risk management, change management, portfolio management, and the use of project management software.

### **Management of Information Assurance and Security (ISM 6328) 3 credits**

An introduction to the various technical and administrative aspects of information security. Emphasis is on the management of information security efforts.

### **Enterprise Information Technology Service Management (ISM 6368) 3 credits**

Course focuses on the information technology manager's role in coordinating with and providing service to other business functions. Discussion on internationally recognized best practices in delivering true value at the lowest total cost of ownership.

### **Digital Forensics Management (ISM 6376) 3 credits**

This course focuses on principles and techniques for digital forensics. It covers the major topics of digital forensic investigation including incident scene management, digital evidence acquisition and preservation, file systems, data recovery, examination with forensic software, network forensics and

mobile forensics.

### **Introduction to Business Analytics and Big Data (ISM 6404) 3 credits**

This course provides an understanding of the business intelligence and business analytics processes and techniques used in transforming data to knowledge and value in organizations. Students also develop skills in analyzing data using generally available tools, e.g., Excel.

### **Advanced Business Analytics (ISM 6405) 3 credits**

*Prerequisite: Graduate students only*

An in-depth examination of business analytics methods of visualization, data mining, text mining and web mining, using various analytical tools. In a laboratory setting, investigates applications for smaller firms.

### **Business Innovation with Artificial Intelligence (ISM 6427C) 3 credits**

Students gain a business perspective of artificial intelligence (AI) and other emerging technologies as drivers of innovation in businesses. They learn how AI is used in practice across organizations and industries, how to plan, manage and maintain AI projects, and how to address the AI challenges and implications for the organization and society.

### **Blockchain and Crypto Assets: Digital Business Transformation (ISM 6455) 3 credits**

*Prerequisite: Admission to an FAU graduate program*

Digital transformations encompass all organizations, business sectors and society. This course provides a critical understanding of transformative technological innovations such as blockchain, cryptocurrency, NFT and other crypto products, and how they evolve business and society. Business strategies are discussed in the context of these innovations. Appropriate for all business disciplines.

### **Web-Based Business Development (ISM 6508) 3 credits**

*Prerequisite: Graduate standing*

Develops skills for launching and managing web-based businesses. Students complete a business plan for starting an online business of their choice. Additional topics include evaluating current web-based business opportunities, online entrepreneurship, web-based venture financing and e-business operations.

### **Information Technology Sourcing Management (ISM 6509) 3 credits**

Course is designed to assist students in developing the knowledge and skills needed to work with IT service providers and processes. IT focuses on the concepts and methods associated with designing, planning, and contracting for IT infrastructure and applications.

### **Social Media and Web Analytics (ISM 6555) 3 credits**

*Prerequisite: Admission to an FAU graduate program*

Covers concepts and techniques for retrieving, exploring, visualizing and analyzing social network and social media data, website usage and clickstream data. Students learn to use key metrics to assess goals and return on investment and perform social network analysis to identify important social actors, subgroups and network properties in social media.

### **Directed Independent Study (ISM 6905) 3 credits**

*Prerequisite: Permission of instructor*

A study of advanced topics relating to the special needs and interests of individual students.

### **Special Topics (ISM 6930) 2-5 credits**

*Prerequisite: Permission of instructor*

Lectures on advanced and specialized topics.

### **Graduate Information Technology and Operations Management Internship (ISM 6942) 3 credits**

*Prerequisites: ISM 6026 and one other course in the M.S. with Major in Information Technology and Management program or in the M.B.A., Management Information Systems or Operations Management tracks*

Students gain valuable practical experience under the guidance of a supervisor in the work setting as well as a professor in the academic setting. Provides insights into the operations of businesses and organizations and allows students to hone their information technology and operations management skills in a real-world setting.

### **Business Transformation of Information Systems and Operations Management (ISM 7345) 3 credits**

*Prerequisite: Admission to an FAU Ph.D. program or permission of instructor*

Analysis of theory and research on the impacts of information systems and operations management on human behavior and upon organizational design.

### **Advanced Business Analytics Tools for Research (ISM 7406C) 3 credits**

*Prerequisite: Admission to an FAU Ph.D. program or permission of instructor*

This course covers applications of contemporary business analytics methods, such as web mining and text mining, for business research. In laboratory settings, students learn how to practically collect data and apply descriptive and predictive analytics to business problems using tools such as Python, R and others.

### **Big Data Research Methods (ISM 7888) 3 credits**

*Prerequisite: Admission to an FAU Ph.D. program or permission of instructor*

A discussion-driven seminar in big data research methods with advanced study of selected research topics. The course emphasizes academic journal articles on big data.

### **Special Topics in Information Systems (ISM 7930) 3 credits**

*Prerequisite: Admission to Ph.D. program or permission of instructor*

Lectures on advanced and special topics in information systems at a doctoral level.

### **Seminar in Information Systems (ISM 7935) 3 credits**

*Prerequisite: Admission to Ph.D. program*

Introduction to the conduct of research in IS: defining research questions, reviewing the literature, developing strategies for empirical investigation, and presenting research findings.

### **Advanced Research in Information Technology (ISM 7978) 1-9 credits**

*Prerequisite: Doctoral standing in the College of Business*

Supervised research for comprehensive exam preparation, dissertation proposal development and/or scholarly paper writing. *Grading: S/U*

### **Doctoral Dissertation Research (ISM 7980) 1-15 credits**

*Prerequisite: Admission to doctoral candidacy*

The writing of a dissertation.

### **Operations Management (MAN 6501) 3 credits**

*Prerequisites: Admission to an FAU graduate program, and QMB 6603 or QMB 3600 or equivalent*

An introduction to major managerial problems and decision processes of operations management. Includes design of operations; planning, scheduling, quality management, systems analysis and evaluation, resource allocation, and inventory management. Integration of operations management with other functional areas. Lecture and cases.

### **Business Process Improvement Management (MAN 6525) 3 credits**

*Prerequisites: Admission to an FAU graduate program and MAN 3506 or MAN 6501 or equivalent*

This course enables students to provide leadership in shaping a culture for business process improvement initiatives within an organization and determine the effectiveness of improvement initiatives such as Six Sigma Quality, Process Capability, Process Control, Business Process Re-engineering and Service Quality.

### **Project Management (MAN 6581) 3 credits**

*Prerequisite: Admission to an FAU graduate program and MAN 3506 or MAN 6501 or equivalent*

This course provides a strong foundation in the planning and control of projects. In addition, specific operational issues related to projects in areas such as process re-engineering, new product development, enterprise resource planning, and software development are addressed. Examples of other topics included are project risk management, critical chain project management, contingency planning, and the balanced scoreboard.

### **International Shipping, Trade and Port Management (MAN 6565) 3 credits**

*Prerequisite: MAN 3506 or MAN 6501*

The management of daily shipping operations is covered for both liner and bulk trades. Business strategy and development in shipping, considering shipping cycles and implications for chartering and brokering in the bulk trades, is included in discussions, as well as operations for liner shipping and containerization. The role of ports and container terminals in global supply chains is addressed.

### **Supply Chain Management (MAN 6596) 3 credits**

*Prerequisites: Admission to an FAU graduate program, and MAN 3506 or MAN 6501 or equivalent*

Course provides an understanding of key issues, mechanics, and developments in sourcing and supply chain management. The supply chain is the connected network of all of the value activities that plan, control, and supply interim and finished product services to customers.

### **Seminar in Operations and Supply Chain Management (MAN 7768) 3 credits**

*Prerequisite: Admission to an FAU Ph.D. program or permission of instructor*

This course covers seminal, contemporary and emerging research in operations and supply chain management to prepare students for academic research in this area.

### **Business Impact of Artificial Intelligence and Emerging Technologies (MAN 7926) 3 credits**

*Prerequisite: Admission to an FAU Ph.D. program or permission of instructor*

This course provides students with an exposure to the major issues of business impact of artificial intelligence and other emerging technologies, including the Internet of Things and Service 4.0 and prepares students for academic research in this area.

### **Data Management and Analysis with Excel (QMB 6303) 3 credits**

Graduate students from all disciplines solve research and business problems by leveraging the most powerful productivity tool, Excel. Curation, management, analysis and visualization of information and data are covered by using PowerView, Vlookup charts, pivot tables, scenarios, functions and macro programming.

### **Data Analysis for Managers (QMB 6603) 3 credits**

*Prerequisite: Admission to an FAU graduate program*

Introduction to statistical analysis of data using interactive computing, including topics such as randomness, cross-sectional regression, auto-regression, experiments versus observational studies, causal interference, and analysis of univariate and multiple time series.

### **Supply Chain Analytics (QMB 6616) 3 credits**

*Prerequisite: Admission to an FAU graduate program*

Students develop skills in modeling and optimization techniques for the analysis of strategic, tactical and operational supply chain problems. Problems range from inventory management, distribution planning and facility location to risk management and global sourcing.

### **Special Topics: OR, OM (QMB 6930) 3 credits**

*Prerequisite: Permission of instructor*

Lectures on advanced and special topics in operations research or operations management.

### **Research Methods 1 (QMB 7565) 3 credits**

*Prerequisite: Admission to Ph.D. Program*

Intermediate-level statistical methods with emphasis on applications and interactive computing. Basic principles of experimental and non-experimental research. Analysis and critique of journal articles from various business disciplines.

### **Research Methods 2 (QMB 7566) 3 credits**

*Prerequisite: QMB 7565*

Advanced statistical methods including multiple regression and associated diagnostics, non-linear models, log-linear and logit models, and logistic regression. Emphasis on published applications and interactive computing.

### **Special Topics (QMB 7930) 3 credits**

## MANAGEMENT PROGRAMS

[Link to Management, International Business and Entrepreneurship courses](#)

[Link to Motion Picture courses](#)

[Link to Sport Management courses](#)

## HEALTH ADMINISTRATION

## **Undergraduate Courses** /[link to graduate courses](#)

### **Introduction to Health Professions (HSA 3104) 3 credits**

Examinations of current and projected human resources needed for the health care system using ongoing trends and issues.

### **Health Delivery Systems (HSA 3111) 3 credits**

The healthcare industry is the largest source of jobs in the U.S. employing over 20 million people. This course introduces three of the most important industry goals: improving access, reducing costs and increasing the quality of care for patients. To understand where people are employed in this industry and how they work towards these goals, this course presents the fundamental pieces of the U.S Healthcare system and includes topics like healthcare professions, insurance industry, medical technology and inpatient and outpatient services that serve those three important goals.

### **Technology in Health Care Organizations (HSA 3191) 3 credits**

*Prerequisite: HSA 3111*

An introduction to the myriad uses of information technology and information systems in the health care industry. Main subtopics are history, basic technical aspects, patient information, organizational management systems, care delivery systems, technical challenges, confidentiality and other practical challenges, and evaluation strategies.

### **Health Care Medical Terminology (HSA 3534) 3 credits**

This course develops a comprehensive understanding of medical terminology, basic disease systems, pharmacology, and the mechanism of medical coding common to health administration activities. Students are also introduced to the basic tenets of biology and biochemistry as those disciplines relate to the provision of health care.

### **Managed Care (HSA 4109) 3 credits**

*Prerequisites: HSA 3111 and HSA 4110*

This course provides an introduction to the field of managed care. Topics include the history and structure of managed care, contracting, state and federal regulations, utilization review, and disease management.

### **Organizational Behavior in Health Care (HSA 4110) 3 credits**

*Prerequisite: HSA 3111 or concurrent*

This course examines organizational behavior and theory within the context of health care organizations. Health care organizations face numerous challenges in leadership, group dynamics,

conflict management and enacting change. This course begins to address these issues by providing a deeper understanding of human behavior in various health care organization settings. Health care organizations will be viewed from system, organizational, group and individual levels to understand their dynamics and how they can be successfully navigated and managed.

### **Issues and Trends in Health Care (HSA 4113) 3 credits**

*Prerequisite: HSA 3111*

This course presents significant healthcare issues and their developing trends. The course content will differ each time in order to be current with changing events of varying importance, such as inequity in healthcare, organ transplant decisions, women's and minorities' roles in health, human resource issues, etc.

### **International Healthcare Systems (HSA 4124) 3 credits**

*Prerequisite: HSA 3111*

This course focuses on the organization of health systems and the delivery of health services in numerous countries across a broad, social political and economic spectrum. Diverse types of systems shall be examined in terms of their social policy and the economic level of the country under review.

### **Strategic Management in Health Organizations (HSA 4140) 3 credits**

*Prerequisite: HSA 3111 and HSA 4110*

This course provides for a critical interpretation of various strategic management concepts in the health field, including the analysis of a healthcare organization's internal and external environments, using the case method.

### **Health Care Financial Management (HSA 4170) 3 credits**

*Prerequisite: ACG 2021*

Healthcare finance is (or should be) at the core of education if students are pursuing a career in healthcare. This class draws concepts from accounting, statistics and other management disciplines to develop the principles that guide decision making for managers to keep healthcare organizations profitable. The course covers various topics like analyzing financial statements, risk and return models and valuation in answering two important questions: how does one know if the healthcare organizations are profitable and how can managers raise money to build a healthcare organization?

### **Long-Term Care Administration (HSA 4222) 3 credits**

*Prerequisites: HSA 3111 and HSA 4110*

This course introduces the student to the changing structure of the long-term care system, the continuum of provider services, and the Balanced Budget Act and its consequences for reimbursement.

### **Management of Long-Term Care Facilities (HSA 4223) 3 credits**

Provides an in-depth study on how an effectively managed skilled-nursing facility should operate and how prospective, as well as currently employed, nursing home administrators can hone their skills to deliver quality services cost effectively.

### **Health Care Quality Management (HSA 4383) 3 credits**

*Prerequisites: HSA 3111 and HSA 4110*

This course examines the efforts being introduced to improve the quality and efficiency of the healthcare system. Topics covered range from medical error reduction, quality improvements in medical records, and utilization review.

### **Health Law (HSA 4423) 3 credits**

Basic knowledge and understanding of the law are essential to the success of any health care executive. Legal issues are a daily consideration in the management of health care operations. This course introduces and explains the most common legal and ethical issues facing health care business leaders, including negligence, intentional torts, contracts, business organizations, crime, compliance, advance directives and both state and federal health care specific statutes.

### **Practice Management (HSA 4511) 3 credits**

*Prerequisites: HSA 3111 and HSA 4110*

This course provides an in-depth consideration of the fundamentals of managing a physician or other form of ambulatory care office. Issues covered include medical coding, physician credentialing, reimbursement, staff supervision, and practice building.

### **Introduction to Health Research and Managerial Epidemiology (HSA 4700) 3 credits**

*Prerequisites: HSA 3111 and STA 2023*

This course focuses on epidemiologic and research methods for measuring the health of populations and understanding the relation to social determinants and healthcare business environments. Students are introduced to terms and concepts of epidemiology and other key health research tools. Students also learn the language of health research in order to interpret scientific literature. Skills acquired in this course are critical to provide public health and healthcare business leaders with the information needed to make evidence-based decisions.

### **RI: Health Practicum (HSA 4817) 6 credits**

*Prerequisites: Open only to Health Administration seniors with permission of instructor; Application must be made during previous semester and the following criteria must be met: 1) has successfully completed the other core courses in Health Administration, 2) has an overall grade point average of 2.5 or better in courses attempted at FAU, 3) has successfully completed at least 33 credits at the*

*upper-division level, 4) is a program major, and 5) is not on academic probation.*

A course that requires the senior student in Health Administration to function in a participant observer role in a health facility in order to develop a written management project that is an issue, problem or goal (of the facility). This is a research-intensive (RI) course.

### **Directed Independent Study (HSA 4905) 1-3 credits**

Individual concentrated study on one Health Administration topic relating to the special needs and interests of individual students under the direct supervision of a faculty member. This option in most instances will be limited to Health Administration majors because of the prerequisite that all required Health Administration courses, except the Practicum, be completed prior to this.

### **Directed Independent Research in Health Administration (HSA 4915) 1-3 credits**

*Prerequisite: Permission of instructor*

Students work closely with research mentors to conduct research and inquiry in the field of health and healthcare. Requirements for the course and the criteria for evaluation are agreed upon by the mentor and student with the approval of the department chair.

### **Special Topics (HSA 4930) 1-3 credits**

The study of a special area in Health Administration. Topics will vary. May be repeated for credit.

## **Health Administration Graduate Courses**

### **Introduction to Health Care Systems (HSA 6103) 3 credits**

*Prerequisite or Corequisite: GEB 6215*

Introduces students to the field of health services administration and to the responsibilities of managers of health care organizations. Includes the analysis of both the history and the structure of health delivery systems.

### **Planning and Marketing in Healthcare (HSA 6108) 3 credits**

*Prerequisite or Corequisite: HSA 6103*

Study of the rapidly evolving U.S. healthcare market and its impact on the structure and functions of healthcare organizations. Examines changing patient demographics such as population aging, technological developments in such areas as pharmaceuticals, and government regulation of patient care.

### **Organizational Behavior in Healthcare (HSA 6118) 3 credits**

*Prerequisite or Corequisite: HSA 6103*

Study of internal operations of healthcare organizations varying from hospitals to nursing homes,

outpatient clinics, and assisted living facilities. Examines issues such as physician credentialing, utilization review, quality of clinical care, and accreditation of services.

### **Global Issues in Health Care Delivery (HSA 6125) 3 credits**

Offers a comprehensive overview of current global and public health issues. Students explore healthcare systems and challenges to population health in selected countries worldwide and investigate and discuss the impact of emerging, re-emerging, communicable and non-communicable diseases.

### **Managed Health Care (HSA 6126) 3 credits**

Provides an introduction to the field of managed care. Topics include the history and structure of managed care, contracting, state and federal regulations, utilization review and disease management.

### **Health Policy (HSA 6152) 3 credits**

*Prerequisite or Corequisite: HSA 6103*

An examination of the process of formulating and implementing health policy. Emphasis is on the utilization of health services research in the policy formulation process at the federal level.

### **Healthcare Finance (HSA 6175) 3 credits**

*Prerequisite or Corequisite: HSA 6103*

Introduces health administration students to the public and private sources of payment for health care in the U.S. Includes Medicare, Medicaid, and managed care options.

### **Health Law (HSA 6425) 3 credits**

*Prerequisite or Corequisite: HSA 6103*

A comprehensive examination of health law issues affecting healthcare providers. Reviews case law decisions, statutes, and regulations involving such issues as patient care liability, malpractice, workmen's compensation, and legal responsibilities of health professionals.

### **Research Methods for Healthcare Management (HSA 6707) 3 credits**

*Prerequisite or Corequisite: HSA 6103*

Provides students with an appreciation of the function of research in the provision of healthcare services, a set of skills for conducting health sciences research, and an opportunity to practice applying those skills to a current issue in the healthcare field.

### **Health Administration Internship (HSA 6855) 1-3 credits**

*Prerequisite: HSA 6103*

Internship requirement for M.H.A. candidates. Work 15-20 hours per week in an organization that diagnoses, produces products for, treats, or cares for frail, sick, or injured people, or makes grants to or

pays for care in such organizations. During the internship, conduct a project on a subject of use to the organization.

### **Special Topics (HSA 6930) 3 credits**

*Prerequisite: Permission of department*

Graduate level study of a selected area of health care management. Topics will vary.

### **Current Topics in Health Care Management (HSA 6937) 3 credits**

*Prerequisite: HSA 6103*

Topics covered include utilization review, risk management in health care, quality management, the use of outcomes research in improving patient care efficacy and safety, an acquaintance with evidence-based medicine and its implications for management of health care organizations.

## **MANAGEMENT, INTERNATIONAL BUSINESS AND ENTREPRENEURSHIP**

### **Undergraduate Courses** /[link to graduate courses](#)

#### **Launching Your Business (ENT 4015) 3 credits**

*Prerequisite: ENT 4024 with minimum grade of "C" -*

Students should be prepared to launch a new business venture before enrolling in the course. Then, under the guidance of the instructor and entrepreneur mentors, they proceed to implement their business model. The course uses a contract-learning model of evaluation based on the developmental needs of the particular business ventures.

#### **Entrepreneurship (ENT 4024) 3 credits**

*Prerequisite: Junior standing*

Introduction to the major concepts and fundamental principles for starting a new business. Emphasis is on customer development, business model validation and problems during in the initiation stage.

#### **Entrepreneurial Finance (ENT 4412) 3 credits**

*Prerequisites: Junior standing and ENT 4024 with a minimum grade of "C" or permission of department*

Addresses challenging issues that new ventures face, such as how investors evaluate new business opportunities, how entrepreneurs manage to attract interest from investors, how investors pick winners and how startups are valued.

### **Directed Independent Research in Entrepreneurship (ENT 4900) 1-3 credits**

*Prerequisite: Permission of instructor*

Students work closely with research mentors to conduct research and inquiry in the field of entrepreneurship. Requirements for the course and the criteria for evaluation are agreed upon by the mentor and student with the approval of the department chair.

### **Directed Independent Study (ENT 4905) 3 credits**

*Prerequisite: ENT 4024 with a minimum grade of "C" and junior standing*

Directed study forms may be obtained from the departmental secretary. Individual student research project or field investigation.

### **Entrepreneurship Consulting Project (ENT 4934) 3 credits**

*Prerequisites: ENT 4024 or permission of instructor, junior standing, not open to Economics, International Economics, Health Administration or Pre-Business majors*

Advanced study and practice of actual entrepreneurial situations. Students will serve as a member of a management consulting team responsible for identification and solutions to problems facing a small local firm.

### **Special Topics (ENT 4935) 3 credits**

*Prerequisite: Junior standing*

Analysis of selected current problems in entrepreneurship. Content will vary.

### **Entrepreneurship Internship (ENT 4940) 1-4 credits**

*Prerequisites: ENT 4024 with a minimum grade of "C," senior standing and permission of instructor*

Students gain practical experience working in a startup firm. The focus is on the problem facing new and small firms and on the business skills needed to conduct operations and develop the business.

### **Introduction to Business (GEB 2011) 3 credits**

An interdisciplinary overview of business in the U.S. and global economies. Provides a general framework for understanding the essential elements of business disciplines, along with social/ethical responsibilities. Emphasis is placed on the roles of accounting, economics, finance, industry studies, information technology, management, operations management and marketing within the business professional environment.

### **Introduction to Business Communication (GEB 3213) 3 credits**

*Writing Across Curriculum (Gordon Rule)*

*Prerequisites: Junior standing and admission to College of Business*

This course introduces students to essential writing and speaking communication skills, organizational

strategies and formats used by successful business professionals. It provides opportunities for students to apply these skills in correspondence, research, reports and presentations that prepare them for effective job searches and productive careers.

### **Undergraduate Business Study Abroad (GEB 4956) 1-6 credits**

*Prerequisite: Sophomore standing or higher and minimum GPA of 2.5*

*Credit for enrollment in approved study abroad undergraduate programs.*

### **University Honors Seminar in Business (MAN 1930) 3 credits**

*Writing Across Curriculum (Gordon Rule)*

A seminar in the University Honors Program on topics in business.

### **Introduction to Management and Organizational Behavior (MAN 3025) 3 credits**

*Prerequisite: Junior standing*

An introduction to managerial principles including planning, organizing, staffing, leadership and control techniques. A behavioral science foundation of individual needs, motivation and group processes will be utilized.

### **Managing Workplace Diversity (MAN 3113) 3 credits**

*Prerequisite: Junior standing*

Course provides a foundation for understanding diversity and inclusion in organizations as well as the implications of working in a diverse organizational environment.

### **Negotiating in a Globalized World (MAN 3442) 3 credits**

*Prerequisites: Junior standing and one of the following courses: ANT 2000, HSA 4124, MAN 3025, PSY 1012, SYG 1000 or SYG 2010 with minimum grade of "C"*

This course is aimed at developing expertise in negotiations across cultural borders, working with various suppliers, developing multicultural project teams and sensitivity and developing counter proposals.

### **International Business (MAN 3600) 3 credits**

*Prerequisite: Junior standing*

Learn to navigate the rapidly globalizing business environment. Explore critical topics such as globalization, national differences, global trade and investment, the global monetary system and the strategy and structure of international business. Learn essential skills to excel in today's interconnected world, addressing international issues across various business areas, whether the business is operating domestically or internationally.

### **Cross-Cultural Human Relations and Negotiations (MAN 3611) 3 credits**

*Prerequisite: Junior standing and one of the following: MAN 3025, PSY 1012, ANT 2000, SYG 1000, SYG 2010 or HSA 4124*

A skill-based course which focuses on the impact of culture on business relationships, including negotiations.

### **Honors Seminar in Management (MAN 3939) 3 credits**

*Prerequisite: Permission of Director of Honors Program*

An introduction to management principles including planning, organizing, staffing, leadership, and control techniques. A behavioral focus will be utilized. Honors course accepted in lieu of MAN 3025.

### **Cooperative Education - Management (MAN 3949) 1-4 credits**

No credit toward degree. *Grading: S/U*

### **Leading People and Projects (MAN 4046) 3 credits**

*Prerequisites: Junior standing or higher and MAN 3025*

Course explains theories of leadership and key supervisory skills as well as team dynamics. Students learn the behaviors of successful leaders and team members and apply these skills in a course project.

### **Strategic Human Resource Management (MAN 4301) 3 credits**

*Prerequisite: MAN 3025*

Covers all aspects of modern personnel administration including selection, training, appraisal, compensation, incentives and discipline. Will be taught from the viewpoint of management generalists as well as those planning a career in personnel.

### **Human Resource Recruitment and Selection (MAN 4320) 3 credits**

*Prerequisites: MAN 3025 with grade of "C" or better; Junior standing*

This course is designed to provide an overview of the process by which organizations staff positions. Topics include job analysis and description, references and background checks, social networks and hiring, employment contracts and job offers, career planning and development, interview preparation, interviewing and legal considerations.

### **Leading Change and Development (MAN 4350) 3 credits**

*Prerequisites: MAN 3025, MAN 4301*

Methodologies for systematically bringing about organization change and improvement. Goals are to make an organization more effective and to enhance the opportunity for organization members to develop their personal potential.

### **International Business Operations (MAN 4602) 3 credits**

*Prerequisites: MAN 3600, FIN 3403, and MAR 3023*

The class builds on the concepts presented in MAN 3600, with a specific focus on management of the multinational enterprise's business operations and functional topics related to integrated global management.

### **Global Human Resource Management (MAN 4610) 3 credits**

*Prerequisite: MAN 3025*

The class builds on the concepts presented in MAN 3600, with a specific focus on human resource management in multinational enterprises. Students should be prepared to support the human resource activities including selection, training and development, and compensation of global assignees.

### **Directed Independent Study (MAN 4690) 1-4 credits**

*Prerequisite: Junior standing and a Directed Independent Study form must be signed by the professor concerned and department chair prior to registration*

Directed study forms may be obtained from the departmental secretary. Individual research project or field investigation.

### **Global Strategy and Policy (MAN 4720) 3 credits**

*Prerequisites: Senior standing and grade of "C" or better in FIN 3403, GEB 3213, MAN 3025, MAN 3506, MAR 3023, and QMB 3600*

This is the capstone course for all majors. In this class, students explore the competitive environment on a global basis, examine all external factors that affect the firm domestically and globally and provide solutions that include globalization as a strategic option.

### **Directed Independent Study (MAN 4905) 1-4 credits**

*Prerequisites: Junior standing and a Directed Independent Study form must be signed by the professor and department chair prior to registration*

Directed Study forms may be obtained from the departmental secretary. Individual student research project or field investigation.

### **Directed Independent Research in Management and/or International Business (MAN 4915) 1-3 credits**

*Prerequisite: Permission of instructor*

Students work closely with research mentors to conduct research and inquiry in the fields of management and/or international business. Requirements for the course and the criteria for evaluation are agreed upon by the mentor and student with the approval of the department chair.

### **Special Topics (MAN 4930) 1-4 credits**

*Prerequisites: Junior standing or higher, permission of department chair, not open to Economics, International Economics, Health Administration or Pre-Business majors*

Analysis of selected current problems in business. Content will vary.

### **Management Internship (MAN 4940) 1-4 credits**

*Prerequisites: MAN 3025 and (ENT 4024 or MAN 3611 or MAN 4046 or permission of instructor) and three additional hours in core courses, all with minimum grades of "C;" Business majors of senior standing only; overall FAU GPA of 2.5 or greater; instructor approval of intended internship; course must be applied for in the semester prior to the intended internship*

Internships provide students with an opportunity to gain valuable practical experience under the guidance of supervisor (mentor) in the work setting, as well as a professor in the academic setting. Goals are to give students insights into the operations of businesses and organizations and allow them to hone their managerial skills in a real-world setting.

### **Management Research Internship (MAN 4947) 3 credits**

*Prerequisites: MAN 3025 and (ENT 4024 or MAN 3611 or MAN 4046 or permission of instructor) and three additional hours of core courses, all with minimum grades of "C;" Business majors of senior standing only; overall FAU GPA of 2.5 or above; instructor approval of intended internship; course must be applied for in the semester prior to intended internship*

Students design and execute a research project in management or international business. The time commitment is 120 hours in a semester.

### **International Business Study Abroad (MAN 4956) 1-4 credits**

*Prerequisite: Sophomore standing*

Credit for enrollment in approved study abroad programs.

### **Management Study Abroad (MAN 4957) 1-4 credits**

*Prerequisites: Junior standing and College permission*

Credit for enrollment in approved study abroad programs.

## **Management, International Business and Entrepreneurship Graduate Courses**

### **Venture Creation (ENT 6016) 3 credits**

*Prerequisite: Graduate standing*

A comprehensive study of the elements of entrepreneurship, focusing on the critical factors involved in the initiation of a successful venture. Course provides an overview of the entrepreneurial process beginning with the initial idea through start-up, growth, and harvesting the business.

### **Advanced Business Plan Development (ENT 6116) 3 credits**

*Prerequisites: Graduate standing and ENT 6016*

Designed to help students develop effective written implementation plans for new business ventures. Deals with the critical decisions and actions that entrepreneurs must make in both planning and executing a new venture.

### **Biotechnology Business Development (ENT 6196) 3 credits**

*Prerequisite: Graduate standing*

Biotechnology is the application of basic science discoveries to medicine, agriculture, and the environment. Biotech companies are formed around biotechnology applications and these companies involve both science and business. The goal of this course is to teach students about the relationship between biotech business and biotech science.

### **Entrepreneurial Skills for Managers (ENT 6226) 3 credits**

The course explores issues and problems facing the entrepreneur or intrapreneur in daily business operations. The focus of this course is upon achieving greater entrepreneurial competencies with an emphasis on personalizing an empowerment plan and leadership model.

### **Entrepreneurship and Venture Capital (ENT 6428) 3 credits**

*Prerequisites: Graduate standing and ENT 6016*

Course provides an understanding of new venture finance and related issues including due diligence, valuation, financing, deal structuring, deal sourcing, all within an overall framework of strategic decision making for value creation.

### **Special Topics (ENT 6930) 1-4 credits**

An in-depth analysis of selected current problems in business. Content will vary. Variable title.

### **Entrepreneurial Consulting Project (ENT 6946) 1-4 credits**

Supervised study of a domestic or international business problem for an existing or emerging organization, including establishment of client-consultant relationships, identification of problem(s) or strategic questions, collection and analysis of data, development and reporting of implementable recommendations.

### **The Entrepreneurship Field (ENT 7168) 3 credits**

*Prerequisite: For doctoral students only*

Students are exposed to theoretical perspectives on entrepreneurship, with a focus on the main questions that define the field and the contributions of other disciplines to the study of

entrepreneurship.

### **Communication Strategies for Business Professionals and Core-Course Follow-Up (GEB 6215) 3 credits**

*Prerequisites: Admission to College of Business Master's Degree Programs - M.B.A., M.A.C., M.TX., M.H.A. or M.S. in Finance, Information Technology, Management, and M.S.B.A., M.S.S.C.M. and M.S.I.T.M.*

Course links writing and speaking strategies to (1) critical thinking for problem analysis/solution and persuasive proposals and (2) research for decision making. Students submit papers and presentations from core courses. *Grading: S/U*

### **Communication Strategies for Business Professionals (GEB 6217) 3 credits**

*Prerequisite: Admission to Weekend or Executive MBA program*

Course focuses on a semester-long project that links writing and speaking strategies to (1) critical thinking for problem analysis/solution and persuasive proposals and (2) research for decision making.

### **Directed Project in Business (GEB 6901) 1-6 credits**

Directed learning project that has business world application. Develop learning goals and a plan, locate resources, implement the project, evaluate the results.

### **Current Perspectives in Business (GEB 6905) 1-6 credits**

An overview of the functional areas of business: accounting, finance, marketing, organizational behavior, and the business environment. Team taught with CD-ROM materials.

### **Special Topics (GEB 6930) 3 credits**

An in-depth analysis of selected current problems and issues. Content will vary.

### **Contemporary Issues in Industry: The Executive Forum (GEB 6931) 1 credit**

This course is comprised of presentations by and seminar-like interaction with entrepreneurs and executives focusing on the practical nature of business development. Students and executives discuss current challenges facing business and industry today and consider alternative ways of meeting these challenges. *Grading: S/U*

### **Corporate Management and Environmental Policy (GEB 6944) 2 credits**

*Prerequisite: Graduate standing*

Focus on applied investment decisions integrating environmental standards (ISO 9000 and 14000). How environmental policy compliance can be turned into competitive advantage in business decisions.

### **Environmental Project Management (GEB 6945) 2 credits**

*Prerequisite: Graduate standing*

Apply effective management techniques and project management; how to scope project, hire/manage staff, data collection, analysis, reporting, implementation plan, impact assessment, and evaluation.

**International Business Field Experience (GEB 6957) 1-6 credits**

Directed field trip to one or more foreign countries. Research and write report on the area to be visited. Briefings by business firms, universities, government agencies.

**Graduate Business Study Abroad (GEB 6958) 1-6 credits**

*Prerequisite: Admission to graduate program*

Credit for enrollment in approved study abroad graduate programs.

**Doctoral Seminar in Business Administration (GEB 7936) 1-3 credits**

*Prerequisite: Doctoral standing*

Weekly, informal seminars for discussion of current issues, educational approaches, and career management for Ph.D. students in business administration.

**Human Resources Management (MAN 6156) 3 credits**

*Prerequisites: A graduate course in either Management or Organizational Behavior or permission of the instructor*

A graduate seminar integrating the entire human resources management field through a review of the key concepts of human resource development and personnel and labor relations with discussion of applications to specific problem areas.

**Leadership and Organizations (MAN 6296) 3 credits**

*Prerequisite: Graduate standing*

Provides the foundation for understanding leadership in organizations. Topics include leadership in relation to motivation, communication, performance, group dynamics and organizational change.

**Operations Management (MAN 6501) 3 credits**

Course description located under Information Technology and Operations Management.

**Cross-Cultural Management and Human Resources (MAN 6609) 3 credits**

*Prerequisite: Graduate standing*

The course covers national culture as it affects social processes and human resource practices in international businesses. It addresses international issues in overseas workforce management, expatriate management, and negotiation.

### **International Business Operations (MAN 6614) 3 credits**

An introduction to the institutions, activities, and problems involved in conducting international business. The course also addresses international issues in each of the functional areas.

### **Global Business Strategy (MAN 6721) 3 credits**

*Prerequisites: MAN 6937, MAR 6815, ACG 6315 and FIN 6806*

Strategy, its formulation, articulation, and implementation. Review of current theory and practices and case study as well as the role and responsibility of the general manager in managing the enterprise.

### **Managing Effectively in Emerging Market Economies (MAN 6728) 3 credits**

An examination of management issues and approaches to handling opportunities and risks in the major emerging markets.

### **Global Leadership Assessment and Career Development (MAN 6899) 3 credits**

Employs reviews of publications on leadership, self-leadership and career development to understand requirements for leadership and career planning that may be global in scope. Rigorous leadership, career assessment, coaching and mentoring opportunities are provided to help students understand and develop leadership potential and develop a five-year career plan.

### **Directed Independent Study (MAN 6905) 1-4 credits**

*Prerequisite: A directed study form signed, prior to registration, by the department chair and professor concerned*

Individual student research or study.

### **International Research Consultancy Project (MAN 6915) 4 credits**

*Prerequisites: Graduate standing and admission to MSIB program*

Examination of international activity issues faced by companies. Students conduct research and analysis leading to conclusions that are presented to the management of one or more companies.

### **Field Project (MAN 6926) 3 credits**

*Prerequisites: For students in MBA, MHA programs, concentration in Crisis and Disaster Management Certificate or permission of instructor*

The field project is an applied study conducted within or outside the U.S. using meta-data analysis and/or on-the-ground information from an actual event or simulation exercise. Students also learn to develop hands-on exercises.

### **Special Topics (MAN 6931) 1-4 credits**

*Prerequisite: Permission of department chair*

An in-depth analysis of selected current problems in business. Content will vary.

**Global Environment of Management (MAN 6937) 3 credits**

*Prerequisite or Corequisite: GEB 6215*

Topics include regulation and deregulation, technology, ecology, national industrial policy, social responsibility and ethical reasoning, human resource issues, the globalization of economic conditions, and environmentalism as they affect global managers.

**Graduate Management Internship (MAN 6943) 1-3 credits**

*Prerequisite: Graduate standing*

Internship provides students with practical applications of business under the supervision of both academic and organizational mentors. Industry research and practical experience combine to enhance career development.

**Master's Thesis (MAN 6971) 1-9 credits**

*Prerequisites: Completion of core courses and permission of department chair*

Application of professional and research methodology to a problem or project chosen between student and Thesis Committee.

**Organizational Theory (MAN 7207) 3 credits**

*Prerequisite: Completion of Ph.D. core*

Organization functioning from a macro perspective: emphasis on evolution, structure, design, and processes of complex systems. It will study communication/information networks, intergroup processes, and control strategies.

**Organizational Behavior (MAN 7275) 3 credits**

*Prerequisite: Admission to Ph.D. program or permission of department*

Addresses issues in the individual, interpersonal and group relationships as they apply to the work organization. Topics to be addressed include leadership, motivation, goal seeking and attainment, self-efficacy, and other characteristics of the individual or the work team.

**Scientific Method in Business (MAN 7640) 3 credits**

*Prerequisite: College of Business doctoral students only*

Provides Business Ph.D. students with an exposure to the major issues and debates on the scientific method in business, including the use and applications of insights from philosophy of science as it pertains to the business disciplines and an introduction to research design.

**Strategic Management Seminar (MAN 7729) 3 credits**

*Prerequisite: MAN 6721 or equivalent*

Top management tasks and responsibilities to ensure the creation of the long-term value of the firm. This includes maintaining the legitimacy of the firm in terms of stockholders, world events, and ethical behavior.

### **Advanced Management Theory (MAN 7779) 3 credits**

*Prerequisites: MAN 7729 and admission to a Ph.D. program*

Examines the major theoretical perspectives pertaining to both macro-level functioning of organizations and micro-level individual and group behaviors within organizations, with a special emphasis on the implications for managers.

### **Special Topics in Management (MAN 7931) 3 credits**

*Prerequisite: Permission of instructor*

An advanced study of selected topics in management such as small business entrepreneurship, comparative management, and productivity.

### **Advanced Research in Management (MAN 7978) 1-9 credits**

*Prerequisite: Doctoral standing in the College of Business*

Supervised research for comprehensive exam preparation, dissertation proposal development and/or scholarly paper writing. *Grading: S/U*

### **Doctoral Dissertation - Management (MAN 7980) 1-15 credits**

*Prerequisite: Admission to doctoral candidacy*

Doctoral dissertation research in management.

### **Measurement Design and Evaluation (QMB 7567) 3 credits**

*Prerequisite: Admission to Ph.D. program*

Critical review of the core constructs and processes in business and related literatures with emphasis on the construction and validation of survey scales. Discussion of important attributes of survey scales used in business.

## **MOTION PICTURES**

**Undergraduate Courses** /[link to graduate courses](#)

### **Introduction to the Business of Motion Pictures (GEB 3052) 3 credits**

*Prerequisites: Junior standing and completion of the Gordon Rule composition requirement*

A macro/institutional, descriptive overview covering the industry's business history, industrial and

market structure, economics, and macro statistics, and typical organizational structures and career rules.

### **Special Topics (GEB 4930) 1-3 credits**

The analysis of a selected area or set of issues in business or industry studies. Topics will vary and be reflected in the course title. May be repeated for credit.

### **Motion Picture Graduate Courses**

#### **The Business of Motion Pictures (GEB 6055) 3 credits**

A macro/institutional/descriptive overview of the motion picture business's history, macro statistics, economics, industrial, market, and organizational structures.

## **SPORT MANAGEMENT**

### **Undergraduate Courses** / [link to graduate courses](#)

#### **Introduction to Sport Administration (SPB 3003) 3 credits**

An introduction to all aspects of the sport industry. Areas studied include management, marketing, finance, and law as applied to the sport industry as well as sport industry support areas.

#### **The Management of Intercollegiate Athletics (SPB 3104) 3 credits**

*Prerequisite: SPB 3003*

A study of the principles and practices involved in the management, operation, and administration of an athletic department. Areas covered include marketing, promotion, accounting, finance, human resources management, and issues specific to intercollegiate athletics.

### **Sport Management Graduate Courses**

#### **Financial Aspects of Sport Management (SPB 5817) 2 credits**

*Prerequisite: FIN 6806, SPB 6815*

Course examines general concepts, theories, and principles of the discipline of financial management in sport organizations. Specific areas of discussion include tax, facility financing, valuation of professional franchises, contractually obligated income, sponsorships, leases, lease negotiations, and fundraising.

#### **Management of Intercollegiate Athletics (SPB 6106) 2 credits**

*Prerequisite: SPB 6815*

Course is designed to show the management, administration, and operation of an athletic department in a college or university. Focus is on marketing, promotion, finance/accounting, human resources,

production and operations of an athletic department.

### **Management of Sport, Entertainment and Convention Facilities (SPB 6306) 2 credits**

*Prerequisite: SPB 6815*

Course provides students with a comprehensive look into the management of sport, entertainment, and convention facilities. The entire spectrum of this industry will be covered from feasibility studies and design to the contracting, running, and selling of an event. Students will receive overviews of specific department and job tasks.

### **Sport Law (SPB 6406) 2 credits**

*Prerequisite: SPB 6815*

Course illustrates how general legal precepts and principles are applied to the sports industry. Industry specific topics include collective bargaining agreements, Title IX, franchise agreements, merchandising, television rights, endorsements, contractually obligated incomes, and stadium/arena issues.

### **Sport Marketing (SPB 6716) 2 credits**

*Prerequisite: MAR 6055, SPB 6815, or equivalent*

Students gain an understanding of the various aspects of sport marketing: market research, promotions, advertising, public relations, and sport marketing strategy.

### **Managing the Sport Enterprise (SPB 6815) 3 credits**

This course provides a broad overview of the various sport management industries and factors that impact long and short-term business operations in the sport industry.

### **Internship in Sport Management (SPB 6940) 1 credit**

*Prerequisite: Permission of Program Director and instructor*

Course is designed to provide a supervised exposure to a current and contemporary sports organization. Each field experience will have specific objectives and assignments that are adjusted to meet each student's specific internship setting. *Grading: S/U*

## MARKETING

**Undergraduate Courses** /[link to graduate courses](#)/ [link to hospitality management courses](#)

### **Culture, Consumers and the Global Marketplace (MAR 2142) 3 credits**

This course is an exploration of how cultural influences and marketplace social and economic

conditions can affect consumers and their behavior across national boundaries. It also examines how companies and organizations may design their strategies to meet culturally diverse consumers' needs in global marketplaces, including Non-WEIRD (Western, Educated, Industrialized, Rich and Democratic) countries. This is a General Education course.

### **Special Topics in Marketing (MAR 2930) 1-3 credits**

Specialized course presenting unique topics related to marketing. Content varies by instructor and term.

### **Principles of Marketing (MAR 3023) 3 credits**

*Prerequisites: Sophomore standing*

An introductory overview of how marketing creates, communicates and delivers value by identifying and satisfying customer needs. The course covers strategic planning, consumer behavior, market research, product development, promotion, digital marketing, channels of distribution, price policies, global marketing and analytics.

### **Principles of Advertising (MAR 3326) 3 credits**

*Prerequisite: Junior standing*

An overview of the concepts, strategies and tactics of modern advertising. Explores the role of advertising in society, culture and economics, as well as the advertising industry and its key organizations. Introduces specific practices used to understand account planning, market research, campaign creation, target audiences and integrated marketing communication strategies.

### **Honors Seminar in Marketing (MAR 3939) 3 credits**

*Prerequisites: Junior standing, ECO 2013, ECO 2023, and permission of Director of Honors Program*

The course focuses on the fundamental concepts of marketing management; particularly the selection of target markets and the choice of a marketing mix (products, services, pricing, promotion, distribution, and other ingredients) to satisfy customers and make a profit. Honors accepted in lieu of MAR 3023.

### **Cooperative Education - Marketing (MAR 3949) 1-3 credits**

No credit toward degree. *Grading: S/U*

### **International Marketing (MAR 4156) 3 credits**

*Prerequisite: MAR 3023*

An examination of the new developments in the ever-changing field of international marketing, including foreign marketing in the United States. A study of selected specified products, activities and market areas.

### **Retail Management (MAR 4231) 3 credits**

*Prerequisite: MAR 3023 or equivalent*

Involves the introduction and development of issues relating to: store location and layout decisions; merchandising and promotional practices; buying and control procedures; pricing decisions; and retail strategy formulation.

### **Merchandising Management (MAR 4232) 3 credits**

*Prerequisites: MAR 4231, MAR 3023*

An intensive study of the planning, coordinating and buying of assortments of merchandise and the handling, pricing, selling, and controlling of inventories by retailers.

### **Promotional Management (MAR 4323) 3 credits**

*Prerequisite: MAR 3023*

Fundamental principles and practices of marketing communications planning and management, with emphasis on advertising, publicity and sales promotion.

### **RI: Advanced Advertising: Research, Persuasion and Creativity (MAR 4334) 3 credits**

*Prerequisites: MAR 3326 and STA 2023*

Students learn how to conduct systematic advertising research and integrate research findings with persuasion concepts to set creative message strategy. Students apply creative thinking techniques, advanced copywriting skills and standard technical guidelines to create advertisements and promotional messages for advertising campaigns in the context of business. This course is research intensive (RI).

### **Personal Selling (MAR 4400) 3 credits**

*Prerequisite: Junior standing*

Persuasion and communication theory with specific emphasis on issues involving negotiations and relationship management, including application to sales in a cross-cultural environment.

### **Sales and Sales Management (MAR 4403) 3 credits**

*Prerequisite: MAR 3023*

Fundamental principles and practices of promotional planning and management with emphasis on personal selling and sales management.

### **Strategies in Business Markets (MAR 4453) 3 credits**

*Prerequisite: MAR 3023*

The marketing of goods and services to organizations such as manufacturing firms, government agencies and service institutions.

### **Consumer Behavior (MAR 4503) 3 credits**

*Prerequisite: MAR 3023*

An examination of cultural, social, and individual variables and how they are incorporated into buyer decision processes and marketing practices.

### **RI: Marketing Research and Information Systems (MAR 4613) 3 credits**

*Prerequisites: STA 2023 and MAR 3023, with minimum grade of "C"*

An introduction to procedures for defining marketing problems. Data gathering, analysis, and interpretation techniques and their integration into management decision processes are also discussed. This is a research-intensive course.

### **Business Analytics for Marketing and Customer Relationship Management (MAR 4615) 3 credits**

*Prerequisite: MAR 3023 with minimum grade of "C" or permission of instructor*

In this course, students learn about managing customer databases, statistical tools needed for customer data analysis, implementation of selective tools in spreadsheets and application of the generated knowledge for marketing decisions, especially in customer relationship management.

### **Sports Marketing (MAR 4711) 3 credits**

*Prerequisite: MAR 3023 or PET 4404 or PUR 3463 with minimum grade of "C"*

This course focuses on the marketing of sports and the role marketing plays in planning and decision making in attracting fans and sponsors. The course builds on basic marketing concepts and explores their application in various sports contexts. Topics covered may include sport sponsorships, “marketing of” versus “marketing through” sports, segmentation and targeting, the marketing mix, promotion, fan retention, merchandising, pricing and other contemporary issues that impact sports marketing.

### **Digital Marketing (MAR 4721) 3 credits**

*Prerequisites: MAR 3023, ISM 3011*

Applied digital marketing covering SEO, online advertising, Web analytics, email marketing, social media and reputation management. Lab time required.

### **Introduction to Social Media Marketing (MAR 4724) 3 credits**

Social Media Marketing (SMM) is the use of social media by marketers to increase brand awareness, identify key audiences, generate leads and build meaningful relationships with customers. Social media allows businesses to gain a competitive advantage through the creation and distribution of valuable, relevant and consistent content to attract and retain clearly defined audiences.

### **Introduction to Influencer Marketing (MAR 4725) 3 credits**

*Prerequisite: MAR 3023*

Influencer marketing is a type of social media marketing that uses endorsements and product mentions from influencers. An influencer is a person with sway over their audience. Influencers have specialized knowledge, authority or insight into a specific subject. They are also called content creators, Instagrammers, bloggers or vloggers.

### **Entrepreneurial Marketing (MAR 4765) 3 credits**

*Prerequisite: Senior standing*

Examination of emerging concepts, literature on entrepreneurship from academic and pragmatic perspectives.

### **Marketing Strategy (MAR 4803) 3 credits**

*Prerequisites: Senior standing and MAR 3023, FIN 3403, QMB 3600, MAN 3025*

The application of marketing concepts and analytic techniques to improve decision-making skills in solving strategic problems of selecting customer targets and making marketing mix decisions.

### **Problem-Based Marketing Planning (MAR 4824) 3 credits**

*Prerequisite: MAR 3023 or permission of instructor*

Team-oriented development of a strategic marketing plan integrating customer knowledge gathered by primary and secondary research. This is applied to key strategic decisions in managing the total marketing efforts of firms, focused on specific problems identified by client companies in a regional or national marketing case-based competition.

### **Services Marketing (MAR 4830) 3 credits**

*Prerequisite: MAR 3023*

The study of marketing strategies used in the service industries.

### **Marketing and Product/Service Innovation (MAR 4836) 3 credits**

*Prerequisites: MAR 3023 and junior standing*

The course introduces the fundamental processes, research and testing methods, planning aspects, and integrated promotional programs marketers use in designing and launching innovations, including e-business and marketing plans.

### **Directed Independent Study (MAR 4913) 1-3 credits**

*Prerequisites: Junior standing and a Directed Independent Study form must be signed by the professor and the department chair prior to registration*

Directed Study forms may be obtained from the departmental secretary. Individual research project or field investigation.

### **Directed Independent Research in Marketing (MAR 4915) 3 credits**

*Prerequisites: MAR 3023 and QMB 3600 with grades of "C" or better, junior or senior standing and permission of instructor or department chair*

An in-depth application, analysis and communication of professional and research methodology to a marketing research problem or project chosen between student and marketing faculty member with approval of department chair.

### **Special Topics (MAR 4933) 1-3 credits**

*Prerequisite: Junior standing and permission of department chair*

Analysis of selected current problems in business. Content will vary.

### **Advertising Internship (MAR 4940) 2-3 credits**

*Prerequisites: MAR 3326, MAR 4334, senior standing and permission of instructor*

The advertising internship offers the advanced undergraduate student who has selected a career in the field of advertising practical laboratory learning experiences under the direction of professional executives and educators while employed in the area of advertising.

### **Internship in Retailing (MAR 4945) 2 or 3 credits**

*Prerequisites: MAR 4231, senior marketing major, and permission of instructor*

Directed learning experience to develop skills and apply theories to practices in retail organizations. Following a training plan, the intern will research all major functional areas while employed in an approved retail firm.

### **Marketing Internship (MAR 4946) 3 credits**

*Prerequisites: Overall FAU GPA of 2.5; MAR 3023 and one Marketing elective related to the internship's focus, both with minimum grades of "C"; Marketing majors or minors only; instructor approval of intended internship; course must be applied for in the semester prior to the intended internship; minimum passing grade is a "C"*

Provides students insights into the marketing function of businesses and allows them to hone their marketing skills in a real-world setting.

### **Marketing Study Abroad (MAR 4957) 1-4 credits**

*Prerequisite: Junior standing*

Credit for enrollment in approved study abroad programs.

## **Marketing Graduate Courses**

### **Marketing Functions and Processes (MAR 6055) 3 credits**

*Prerequisite: Graduate standing*

A conceptual treatment of the basic processes influencing the design, implementation, and management of the marketing function. Open only to graduate students lacking an undergraduate course in marketing. Not available as a graduate elective.

**Global Marketing (MAR 6158) 3 credits**

*Prerequisites: ECO 6706 or ECO 6716 or FIN 6605 or MAR 6815*

Course emphasizes applied research and analysis, the Internet, and economic geography and addresses elements of global marketing strategy such as prices, distribution, and promotion and the implementation of such.

**Advanced Promotional Strategy (MAR 6336) 3 credits**

*Prerequisite: Graduate standing and MAR 6815*

Learn how to forecast sales and develop competitive promotional plans; select, understand, and persuade target markets and publics; manage advertising, sales promotion, marketing public relations, sales and sales management; conduct negotiations; and control promotion, especially its ethical aspects.

**B2B Marketing Strategy (MAR 6456) 3 credits**

*Prerequisite: Graduate standing and MAR 6815*

An examination of the marketing of goods and services to organizations. Course provides an in-depth understanding of issues such as product development, pricing, and buyer behavior.

**Marketing Research Methods (MAR 6616) 3 credits**

*Prerequisites: Graduate standing and MAR 6815*

A study of marketing information systems concepts, marketing research techniques, and decision theory applications to marketing problems.

**Digital Marketing (MAR 6735) 3 credits**

*Prerequisite: MAR 6815*

Applied exploration of digital marketing strategy and implementation, including website design, search engine optimization, online advertising, web analytics, email marketing, mobile marketing, social media marketing, content creation, and online reputation management.

**Strategic Marketing Planning (MAR 6807) 3 credits**

*Prerequisite: Graduate standing and MAR 6815*

This course focuses on decision making within a context of strategic marketing planning.

**Advanced Marketing Management (MAR 6815) 3 credits**

*Prerequisites: Graduate standing and MAR 6055 or equivalent*

How marketing managers research, communicate, price, and distribute product and service offerings to profitably satisfy targeted customer segments in a dynamically changing global environment.

### **Marketing Analysis and Executive Action (MAR 6816) 3 credits**

*Prerequisites: Graduate standing and MAR 6815*

Builds decision-making capabilities through readings and cases concerning current marketing challenges, such as managing environmental change; marketing in international, high technology, and service contexts; conducting market planning and developing a marketing plan, etc. Learn to imbue corporate culture and business practice with marketing, customer service, social responsibility, and ethics.

### **Developing and Marketing Innovations (MAR 6837) 3 credits**

*Prerequisite: Admission to an FAU graduate program and MAR 6815*

This course revolves around the key challenges encountered in developing an innovation and creating its marketing plan. The course prepares the student to undertake a leadership role as a manager or entrepreneur in the area of product/service innovation.

### **Advanced Social Media Marketing (MAR 6880) 3 credits**

*Prerequisite: MAR 6815, graduate standing and enrolled as a business degree program*

Social media marketing (SMM) is the use of social media by marketers to increase brand awareness, identify key audiences, generate leads and build meaningful relationships with customers. Social media allows businesses to gain a competitive advantage through the creation and distribution of valuable, relevant and consistent content to attract and retain clearly defined audiences.

### **Advanced Influencer Marketing (MAR 6881) 3 credits**

*Prerequisite: MAR 6815, graduate standing and enrolled as a business degree program*

Influencer marketing is a type of social media marketing that uses endorsements and product mentions from influencers. An influencer is a person with sway over their audience. Influencers have specialized knowledge, authority, or insight into a specific subject. They are also called content creators, Instagrammers, bloggers, vloggers.

### **Directed Independent Study (MAR 6916) 1-3 credits**

*Prerequisite: a Directed Independent Study form must be signed by the professor and the department chair prior to registration*

Individual student research or study.

### **Special Topics (MAR 6933) 1-3 credits**

*Prerequisite: Graduate standing and permission of the department chair*

An in-depth analysis of selected current problems in marketing. Content will vary.

### **Global Marketing Field Experience (MAR 6959) 1-6 credits**

Course is an advanced instruction and study tour program that mixes traditional (book), Internet, and experiential learning to develop first-hand knowledge and experience in marketing in and to foreign countries.

### **Master's Thesis (MAR 6971) 1-9 credits**

*Prerequisites: Completion of core courses and permission of department chair*

An application of professional and research methodology to a problem or project chosen between student and thesis committee.

### **Seminar in Consumer Behavior (MAR 7507) 3 credits**

*Prerequisite: Completion of Ph.D. core*

An interdisciplinary course exploring and critically examining the basic foundations, assumptions, and comprehensive models dealing with human behavior.

### **Seminar in Advertising Effectiveness (MAR 7652) 3 credits**

*Prerequisite: Completion of Ph.D. core*

Seminar examines a large variety of issues related to the understanding of advertising and its effectiveness.

### **Quantitative Methods and Models in Marketing (MAR 7670C) 3 credits**

*Prerequisite: Completion of Ph.D. core*

A seminar that develops an understanding of the role and use of statistical and mathematical models in marketing.

### **Interorganizational Relationships in Marketing (MAR 7459) 3 credits**

*Prerequisite: Completion of Ph.D. core*

Course equips doctoral students with the knowledge and skills required to conduct research in marketing channels, business-to-business marketing and supply chains. The course introduces students to the literature on interorganizational relationships and develops a critical understanding of markets, organizations, and value-adding chains.

### **Scientific Method in Business (MAR 7785) 3 credits**

*Prerequisite: College of Business doctoral students only*

Provides business Ph.D. students with an exposure to the major issues and debates on the scientific

method in business, including the use and applications of insights from philosophy of science as it pertains to the business disciplines and an introduction to research design.

### **The Development of Marketing Theory (MAR 7787) 3 credits**

*Prerequisite: Doctoral standing*

This seminar discusses the development of major approaches to understanding marketing from the evolution of the marketing discipline in the United States.

### **The History of Marketing Thought (MAR 7796) 3 credits**

*Prerequisite: Doctoral standing*

A survey of the literature on markets and marketing from early writers to the present. It includes the institutional framework in which markets and marketing activities evolve as well as the development of contemporary theory in marketing.

### **Special Topics in Marketing (MAR 7931) 3 credits**

*Prerequisite: Doctoral students in Marketing*

This Ph.D. Seminar course engages students in the exploration of contemporary and cutting edge topics in the field of marketing that are not covered by the established sequence of courses and before such topics become part of the regular curriculum.

### **Seminar in Marketing 1 and 2 (MAR 7936) 3 credits**

*Prerequisite: Completion of Ph.D. core*

A sequence of courses dealing with a range of significant topics and issues.

### **Advanced Research in Marketing (MAR 7978) 1-9 credits**

*Prerequisite: Doctoral standing in the College of Business*

Supervised research for comprehensive exam preparation, dissertation proposal development and/or scholarly paper writing. *Grading: S/U*

### **Supervised Research in Marketing (MAR 7979) 1-6 credits**

*Prerequisite: Permission of department*

A directed research experience for doctoral students.

### **Doctoral Dissertation in Marketing (MAR 7980) 1-15 credits**

*Prerequisite: Admission to doctoral candidacy*

Doctoral dissertation research.

## **HOSPITALITY AND TOURISM MANAGEMENT**

## **Undergraduate Courses** /[link to graduate courses](#)

### **An Introduction to the Tourism and Hospitality Industry (HFT 1000) 3 credits**

Course offers students an introduction to the tourism and hospitality industry. An overview of tourism terminology, tourism organizations, hospitality business, travel behavior, tourism planning, tourism research, tourism marketing, sustainable/eco-tourism and related areas are covered.

### **Global Tourism, Culture and Citizenship: A Sustainable Approach (HFT 2710) 3 credits**

This interdisciplinary course uncovers the dynamics of global tourism and cross-cultural encounters. The course introduces students to tourism's cultural, societal, environmental and economic significance, and to motivations and behaviors of travelers using real-world scenarios. By exposing students to the cultures and norms of foreign destinations, the course enhances their global citizenship. Students also learn ways to make tourism sustainable and develop transferable skills beyond the tourism field.

### **Introduction to Hospitality Management (HFT 3003) 3 credits**

*Prerequisite: A minimum of 30 credits earned*

Students in this course study the various segments of the hospitality and tourism industry from a career perspective interacting with business professionals currently holding senior managerial posts in these segments. Additionally, students study current issues, trends, and challenges facing the hospitality industry. In sum, this course provides an overview of the industry, its economic impact, its history, its current and future challenges, and some basic principles related to operating a business within a hospitality segment. Open to all FAU majors.

### **Human Resources Management for the Hospitality Industry (HFT 3221) 3 credits**

This course offers an overview of human resource management as it applies specifically to the hospitality management industry (staffing, appraisal, wage and hour administration, etc.) with an increased emphasis on recruiting, hiring, service, and quality. In comparison to peer service industries, the course has a unique hospitality management emphasis focused on the linkage to successful hospitality operations and, ultimately, profitability via talent recruitment, selection, orientation, and ongoing training.

### **Principles of Food and Beverage Management (HFT 3263) 3 credits**

A full overview of necessary managerial skills required for hospitality management minors and majors who choose to enter the food service portion of the Hospitality industry: catering, restaurant operations, non-commercial/institutional food service, and private restaurant ownership. The course teaches the basics of menu planning and pricing, food cost, nutrition concerns, restaurant marketing, and

production responsibilities.

### **Principles of Hospitality Law (HFT 3603) 3 credits**

This course focuses on the nature and function of the U.S. legal system as it applies to hospitality operations. The course includes cases on and discussion of owner/innkeeper–guest relationships, services contracts, torts (primarily negligence and attractive nuisance), civil rights as they apply to both employees and guests as well as insurable interests.

### **Events Management (HFT 3741) 3 credits**

This course explores the meetings and events industry, its economic impact, operational protocols and challenges, marketing techniques, budgeting and finance needs for successful meetings and events, and strategic planning for a major meeting or event.

### **Casinos and the Gaming Industry (HFT 3785) 3 credits**

This course provides an overview of the gaming industry as well as casino operations. Course content focuses on game selection, game mathematics, casino controls, casino operational structure, departmental procedures and policies, casino marketing and guest services as they relate to the gaming environment.

### **Excellence in Guest Service Management (HFT 4240) 3 credits**

This course offers an in-depth study of the provision and management of high quality service provided within a hospitality business venue. Issues of measurement, continuous service improvement, staff member orientating and training from a guest perspective, and the ability to benchmark among hospitality competitors are discussed. Other topics include the importance of moments of truth, creating and maintaining a service culture, and management of a professional service delivery system.

### **Hotel and Resort Management (HFT 4253) 3 credits**

Examines the operations of hotels and resorts with students gaining a basic understanding of the various departments within these lodging venues. Students are exposed to key abilities and skill sets necessary to manage such facilities through familiarization with the role of the general manager position. Students also study specific competitive benchmark tools used by general managers (i.e., Smith Travel Accommodations report).

### **Club Management (HFT 4277) 3 credits**

Focuses on the operations and management of private clubs including membership, golf, food and beverage, tennis, spa and club marketing. In addition, financial structure, equity/non-equity leadership, amenities management, committee formats and guest service strategies specific to private clubs are examined.

### **Financial Analytics for Hospitality Managers (HFT 4453) 3 credits**

*Prerequisite: HFT 4503, HFT 4253, FIN 3403 with minimum grades of "C" and a minimum of 90 earned credits; Hospitality Management majors only*

This course focuses on the analytical techniques to evaluate operating performance of hospitality businesses. Sources of reliable industry data are investigated, techniques of analysis are implemented and results are applied and discussed in a meaningful capacity.

### **Revenue Management and Predictive Analytics in the Hospitality and Tourism Industry (HFT 4481) 3 credits**

Exploration of revenue management, big data and predictive analytics within the hospitality and tourism industry. The course uses a viewpoint of firm value and overall contribution to financial performance. Students identify direct links between big data and firm performance while utilizing strategic management, prediction and forecasting. A variety of data sources are examined. Through analysis, students learn to manage firms using an analytic culture that turns information into insight.

### **Hospitality Marketing and Revenue Management Practices (HFT 4503) 3 credits**

Students in this course survey marketing practices and revenue management issues that are unique to the hospitality industry. These practices include sales procedures and practices, revenue management, the use of technology to maintain a leadership position compared to one's competitors, building a loyal customer base, a discussion of the relationship of marketing to overall organizational success, and an analysis of a hospitality operation's annual marketing plan.

### **Directed Independent Study (HFT 4905) 3 credits**

*Prerequisites: HFT 3003 with minimum grade of "C" and permission of department*

Independent study formulating a self-directed research project used to expand and integrate student's knowledge and professional expertise on a particular subject specific to hospitality management.

### **Special Topics (HFT 4930) 3 credits**

This course examines a current area of high/critical importance in hospitality management. Topics vary dependent upon current events taking place in the hospitality industry at the time of course offerings.

### **Internship in Hospitality and Tourism Management (HFT 4941) 0 credit**

*Prerequisites: HFT 3003, sufficient work experience and permission of department*

Students must complete 1,000 clock hours of satisfactory, verifiable work experience in the hospitality, retail, tourism or customer/guest-service industries as a major or 500 clock hours of satisfactory, verifiable work experience in the hospitality, retail, tourism or customer/guest-service industries as a minor. *Grading: S/U*

### **International Field Experience in Hospitality Management (HFT 4955) 3 credits**

*Prerequisite: HFT 3003 with minimum grade of "C"*

This course permits students to study the hospitality management industry outside of the United States through a personalized visit to a particular destination. The study tour focuses on general tourism promotional activities of the destination, analysis and personal visits of hospitality venues operating in the destination, and a thorough, written comparative analysis to hospitality operations found in the United States.

### **Hospitality and Tourism Management Graduate Courses**

#### **Hospitality Operations: A Case Approach (HMG 6299) 3 credits**

*Prerequisite: Graduate standing*

This course examines hospitality management using a critical case study approach. Hospitality businesses from the full range of industry segments, including hotels, resorts, casinos, airlines, travel agencies, cruise lines, restaurants, state parks, national parks, tour operators, destination management companies (DMCs), destination marketing organizations (DMOs), theme parks, and related businesses may all be examined using a critical case study method.

#### **Strategic Finance in Hospitality Management (HMG 6467) 3 credits**

*Prerequisite: Graduate standing*

This course focuses on the fundamental concepts of strategic financial management as applied specifically to the hospitality industry. Managerial techniques, analysis processes, tools and strategic frameworks for creating hospitality firm value are all examined.

#### **Contemporary Issues in Hospitality Marketing (HMG 6506) 3 credits**

*Prerequisite: Graduate standing*

This course offers an advanced examination of services marketing and management as applied to the hospitality industry. It includes marketing-management issues within hospitality and explores theories that draw on customer, competitor and core organizational capabilities.

#### **Strategies for Excellence in Guest Service Management (HMG 6546) 3 credits**

*Prerequisite: Graduate standing*

This course explores the provision and management of guest service in the hospitality industry from an advanced managerial perspective. Students investigate service operations management from an integrated viewpoint with a focus on the overarching goal of competitive excellence.

#### **Events Management (HMG 6756) 3 credits**

*Prerequisite: Graduate standing*

This course explores the events industry from an advanced managerial perspective. It examines the structure of the events industry, its global economic impact, the various protocols and procedures in event delivery and the challenges facing today's executives with strategies for operational excellence.

**Directed Independent Study in Hospitality Management (HMG 6901) 3 credits**

*Prerequisite: Graduate standing*

This course is a directed independent study project and includes the formulation and execution of a self-directed research project used to expand and integrate the student's knowledge and professional expertise on a topic specific to the hospitality and tourism industry.

# COMMUNICATION SCIENCES AND DISORDERS

## **Undergraduate Courses** /[link to graduate courses](#)

### **Normal Processes of Speech and Language Development (LIN 4710) 3 credits**

Phonological, semantic, syntactic and pragmatic sequence and processes in the normal development of speech and language.

### **Introduction to Communication Disorders (SPA 4002) 3 credits**

Survey course in communication disorders across the lifespan. Study of normal and disordered speech, language, and hearing.

### **Speech/Hearing Science (SPA 4011) 3 credits**

Study of the physiological, acoustical, and perceptual bases of speech and hearing; the mechanics of phonation, audition, vocal theory, consonant production; the acoustic and physiologic study of speech output and auditory reception.

### **Anatomy and Physiology of the Speech and Hearing Mechanisms (SPA 4101) 3 credits**

Study of the anatomy and physiology of the respiratory system, auditory system, and head and neck related to the production of speech and hearing.

### **Clinical Phonetics for Communication Disorders (SPA 4112) 3 credits**

This course is a prerequisite for the graduate speech-language pathology program. It provides instruction in the fundamentals of general American English speech production including phonetic representation of English, anatomy and physiology of the speech mechanism, vowel and consonant transcription, suprasegmentals and diacritic markers, transcription of connected speech, transcription of dialectal variation of speech and disordered speech, as well as acoustical analysis.

## **Communication Sciences and Disorders Graduate Courses**

### **Introduction to Audiological Sciences (SPA 5033) 3 credits**

This course examines a variety of techniques used for the evaluation of hearing. Additionally, a wide range of conditions resulting in hearing loss is explored. The use of rehabilitation strategies and electronic devices such as hearing aids and cochlear implants and the role of audiologists in the management of hearing loss are described.

### **Neural Bases of Human Communication (SPA 5107) 3 credits**

Study of the neuroanatomy and neurophysiology underlying normal speech, language and hearing.

Study of central and peripheral nervous systems related to human communication. Consideration of embryologic development.

### **Clinical Phonetics for Communication Disorders (SPA 5113) 3 credits**

Students learn how to identify the phonemes of Standard American English as well as dialectal differences and child developmental differences. In addition, students learn to transcribe connected speech and changes based on foreign accent influences in order to identify normal versus disordered speech.

### **Special Topics (SPA 5936) 1-3 credits**

*Prerequisite: Permission of instructor*

### **Professional Practice and Program Organization (SPA 6006) 3 credits**

*Prerequisite: Permission of instructor*

Practice of speech/language pathology in terms of nature, scope, ethics, and exploration of organizational structure of variety of programs with emphasis on settings in which the preschool and school age population are found.

### **Disorders of Articulation and Phonology (SPA 6204) 3 credits**

*Prerequisites: SPA 4002, SPA 4011, SPA 4101, and permission of instructor*

In-depth study of articulation and phonological disorders with varying etiologies. Study of evaluation and treatment procedures and instruments.

### **Voice and Velopharyngeal Disorders (SPA 6211) 3 credits**

*Prerequisites: SPA 4002, SPA 4011, SPA 4101, and permission of instructor*

The normal anatomy and physiology of the phonatory system will be used as a framework for discussing the development and perpetuation of voice disorders. Appropriate diagnosis and remediation will be emphasized, including the use of alternative/augmentative communication in the management of voice disorders to reflect the growing use of AAC in the field.

### **Disorders of Fluency (SPA 6225) 3 credits**

*Prerequisites: SPA 4002, SPA 4011, SPA 4101; and permission of instructor*

An in-depth investigation into the nature, diagnosis, and treatment of stuttering, cluttering, and other disturbances of speech fluency. Current and historical approaches to etiological theories, differential diagnosis of etiological components, and treatment strategies are presented.

### **Motor Speech Disorders and Augmentative Communication (SPA 6230) 3 credits**

*Prerequisites: SPA 4002, SPA 4011, SPA 4101, SPA 4104, and permission of instructor*

The etiology, diagnosis, and treatment of speech disorders resulting from neurological diseases and injuries, including TBI and cerebral palsy. Study of augmentative communication technology.

**Aural Habilitation/Rehabilitation (SPA 6322) 3 credits**

*Prerequisites: SPA 4030 and permission of instructor*

An examination of the traditional aural rehabilitation programs that are usually initiated following audiological evaluation and completion of medical care. Management programs such as speech reading, auditory training, speech pathology treatment programs, etc., will be presented.

**Language Disorders: Birth to Four (SPA 6401) 3 credits**

*Prerequisites: SPA 4002, SPA 4011, SPA 4101, SPA 4104, and permission of instructor*

The study of the nature, diagnosis, and treatment of language disorders in infants, toddlers, and preschoolers. The study of methods and tools for assessment. Clinical intervention techniques and programs.

**Language Disorders: School Age and Adolescent (SPA 6403) 3 credits**

*Prerequisites: SPA 4002, SPA 4011, SPA 4101 and permission of instructor*

The study of the nature, etiologies, evaluation, and treatment of language disorders in school-age children and adolescents.

**Adult Language Disorders (SPA 6410) 3 credits**

*Prerequisites: SPA 4002, SPA 4011, SPA 4101 and permission of instructor*

The study of language disorders in adulthood including aphasia, TBI, and senility. The normal changes in language and memory as a result of aging. The evaluation and treatment of adult language disorders.

**Genetics of Communication Disorders (SPA 6438) 3 credits**

Students study the basic concepts of genetics and its relation to communication sciences and disorders, including but not limited to, the disorders of speech and hearing. They also learn about the hereditary syndromes and birth defects associated with speech, language, cognition and hearing impairments. They gain knowledge about genetic counseling and interpretation of genetic data.

**Clinical Practicum in Speech/Language Pathology (SPA 6505) 1-4 credits**

*Prerequisite: Permission of instructor*

Supervised field experience and opportunity to demonstrate competencies in evaluation, diagnosis, and remediation of children and adults with varieties of communication disorders.

**Counseling and Supervision in Speech-Language Pathology (SPA 6513) 3 credits**

*Prerequisites: Communication Sciences and Disorders (CSD) students: Permission of department; Non-CSD students: Permission of instructor*

This course provides examination and discussion of counseling and supervision issues affecting speech-language pathologists and the discipline of communication disorders. Theories of supervision and counseling are explored, giving students the opportunity to discuss clinical experiences in each area.

**Diagnostic Principles and Procedures in Communication Disorders (SPA 6553) 3 credits**

*Prerequisites: SPA 4002, SPA 4011, SPA 4101 and permission of instructor*

The study of general techniques in the evaluation of communication disorders. Emphasis on diagnostic procedures, history-taking, and differential diagnosis.

**Evaluation and Treatment of Linguistically and Culturally Different Populations (SPA 6558) 3 credits**

*Prerequisites: SPA 4002, SPA 4011, SPA 4101 and permission of instructor*

The principles and procedures employed in the diagnosis and treatment of communication disorders in linguistically and culturally diverse populations. Patterns of speech and language differences.

**Augmentative and Alternative Communication (SPA 6559) 3 credits**

Provides information on augmentative and alternative (AAC) methods for persons with severe communication disorders. Assessment, intervention, and application of AAC systems are covered.

**Dysphagia (SPA 6565) 3 credits**

*Prerequisites: SPA 4002, SPA 4011, SPA 4101 and LIN 4710*

Course provides students with an understanding of anatomy and physiology of the oral and pharyngeal stages of deglutition and disorders of swallowing. Students develop skills in the evaluation and management of swallowing disorders in children and adults.

**Current Research in Communication Sciences and Disorders (SPA 6825) 3 credits**

*Prerequisites: SPA 4002, 4011, 4030, 4101, 4104, 6553*

An in-depth treatment of current theory and research within the field of communication sciences and disorders (CSD). Associations between empirical studies and effective clinical practice will be presented to teach students to properly analyze and utilize research.

**Directed Independent Study (SPA 6905) 1-3 credits**

*Prerequisite: Permission of instructor*

**Directed Research (SPA 6910) 3 credits**

*Prerequisite: Permission of instructor*

### **Master's Thesis (SPA 6971) 1-6 credits**

*Prerequisite: SPA 6825*

The expected outcome of this learning experience is the completion of a quality master's thesis, including an approved draft and a successful public defense.

## **COUNSELOR EDUCATION**

### **Undergraduate Courses** /[link to graduate courses](#)

#### **Career and Lifespan Development (SDS 3340) 3 credits**

This course addresses the history, trends and future direction of the world of work. It focuses on career development theories, searching and exploring job and career opportunities, self-assessment, and being successful in the job market. Attention is also given to issues in the workplace, such as diversity and strategies for advancement.

#### **University Student Mentoring and Peer Coaching (SDS 3483) 2 credits**

*Prerequisites: Permission of instructor; more than 60 undergraduate credits*

This course addresses the importance of mentoring and peer coaching skills and how these skills affect the individual's academic and personal/social development. The focus of the course is on developing mentoring and peer coaching skills to promote and reinforce strategies known for improving the fundamental learning, academic achievement and retention of undergraduate students.

#### **Interpersonal Communication Skills (SDS 4410) 3 credits**

This course addresses the nature and process of interpersonal communication. It focuses on perceptions, self-disclosure, stages of relationships, spoken and unspoken communication, listening and responding strategies and problem-solving skills. Attention is given to understanding cultural diversity, conflict management and communication via electronic means.

#### **High School to University Transition (SLS 1101) 3 credits**

*Prerequisite: Permission of instructor*

Course prepares students in grades 10 - 12 attending Florida Atlantic University High School for a successful transition from high school to university. Emphasis is on presenting a comprehensive set of skills and strategies aimed at student success.

### **Counselor Education Graduate Courses**

#### **Processes in Counseling (MHS 5005) 3 credits**

Examines the development and maintenance of effective counseling relationships and emphasizes the

corresponding competencies and skills in counseling clients.

### **Play Techniques for Counseling Children and Adolescents (MHS 5422) 3 credits**

*Prerequisites: Permission of instructor*

An experiential course designed to increase knowledge and skills in the use of play media and play process as a counselor intervention for working with children and adolescents. Course is designed for students and professionals in the helping professions.

### **Multicultural Counseling for Diverse Populations (MHS 5428) 3 credits**

Examines special issues and methods involved in counseling special populations, including minority, bilingual, low SES and those with disabilities. Emphasizes the competencies of cultural sensitivity and culturally sensitive interventions in counseling clients.

### **Special Topics (MHS 5930) 1-5 credits**

*Prerequisite: Permission of instructor*

Special topics in mental health counseling.

### **Psychopathology in Counseling (MHS 6070) 3 credits**

*Prerequisite: Permission of instructor*

Examines the theory and practice of diagnosis in the assessment and treatment of mental disorders and the use of the DSM-IV multi-axial system; emphasizes diagnostic and treatment competencies in professional counseling settings.

### **Appraisal and Evaluation in Counseling (MHS 6220) 3 credits**

*Prerequisite: Permission of instructor*

Examines the administration, interpretations and applications of tests and other appraisal devices in the competent assessment of clients.

### **Career Development (MHS 6340) 3 credits**

*Prerequisite: Permission of instructor*

Examines career development and emphasizes competency in the process of assisting clients in career planning and decision making.

### **Counseling Theories and Techniques (MHS 6401) 3 credits**

*Prerequisite: Permission of instructor*

Examines the cognitive-behavioral and other counseling theories with an emphasis on case conceptualization and other competencies, skills and techniques in counseling clients.

### **Counseling Children (MHS 6421) 3 credits**

*Prerequisite: Permission of instructor*

Course explores methods and special issues involved in counseling children.

### **Counseling Adolescents (MHS 6423) 3 credits**

*Prerequisite: Permission of instructor*

Course explores methods and special issues involved in counseling adolescents.

### **Family Counseling (MHS 6430) 3 credits**

Examines family systems and family counseling practice and emphasizes the family systems perspective. Includes competencies, skills, ethics, culture and the role of family counseling in various settings.

### **Substance Abuse Counseling (MHS 6450) 3 credits**

*Prerequisite: Permission of instructor*

Examines the history, etiology and maintenance factors and the diagnostic assessment and treatment competencies in counseling clients with substance abuse issues.

### **Traumatic Stress, Trauma and Crisis Counseling (MHS 6466) 3 credits**

This course is designed to help students understand the theory and practice of counseling individuals, groups and/or families in response to a crisis or traumatic event. Students will be able to understand the principles of intervention as well as the impact of crisis, traumatic stress, natural disasters and other trauma-causing events on people. Students will also be able to demonstrate the ability for assessing and managing suicide risk.

### **Counseling and Human Sexuality (MHS 6470) 3 credits**

*Prerequisite: Permission of instructor*

Examines human sexuality considerations in counseling clients with an emphasis on assessment and intervention competencies.

### **Life Span Development (MHS 6482) 3 credits**

Examines the major theories of human development across the lifespan and emphasizes the relationship of developmental stages and tasks to the process of normal development. Skills and competencies in fostering resilience in clients are addressed.

### **Group Counseling (MHS 6510) 3 credits**

*Prerequisite: Permission of instructor*

Examines effective group counseling practice, which emphasizes leadership skills, competencies and

knowledge of organizing, implementing and evaluating group counseling programs. Includes an experiential group component.

### **Consultation and Behavior Management (MHS 6600) 3 credits**

*Prerequisite: Permission of instructor*

A school-based model for school counselor consultation with parents, teachers, and other professionals is introduced and practiced. Emphasis on understanding and managing student behavior in large and small groups. A knowledge base is developed along with skills for creating and maintaining positive learning and social environments. Practice of counselor skills assists in managing groups of students and consulting with parents and teachers.

### **Legal, Ethical, and Professional Issues in Counseling (MHS 6700) 3 credits**

Legal, ethical and professional issues in competent counseling practice are viewed from national, state and local perspectives.

### **Issues in Mental Health Counseling Practice (MHS 6701) 3 credits**

Examines mental health counseling as a profession, including history, identity, roles and trends affecting the field and practice of mental health counseling, and overviews the essential skills and competencies of effective mental health counseling practice.

### **Counseling Research and Evidence-Based Practice (MHS 6710) 3 credits**

*Prerequisites: STA 6113, admission to Counselor Education degree program*

This course focuses on increasing the learner's capacity to critically appraise research to inform evidence-based practice (EBP) in counseling. This entails comprehending statistical methods used in conducting research and program evaluation; interpreting quantitative and qualitative research and applying this knowledge to furthering the use of EBP in counseling.

### **Practicum in Mental Health Counseling (MHS 6800) 3 credits**

*Prerequisite: Permission of instructor*

Supervised counseling practice at a beginning level involving individuals, families and groups in field-placement settings. Includes a University-based seminar in which skills and competencies are evaluated in case reports and session presentations.

### **Advanced Practicum in Counseling (MHS 6801) 3 credits**

*Prerequisites: MHS 6800 and permission of instructor*

Supervised counseling practice at an intermediate level involving individuals, families and groups in field- placement settings. Includes a University-based seminar in which skills and competencies are evaluated in case reports and session presentations.

### **Internship Mental Health Counseling (MHS 6830) 3-6 credits**

*Prerequisites: MHS 6801 and permission of instructor*

Supervised counseling practice at a more advanced level involving individuals, families and groups in field-placement settings. Includes a University-based seminar in which skills and competencies are evaluated in case reports and session presentations.

### **Directed Independent Study (MHS 6905) 1-5 credits**

*Prerequisite: Permission of instructor*

### **Professional Seminar (MHS 6930) 3 credits**

*Prerequisite: Permission of instructor*

Major issues and problems in relation to current research, trends, and developments in counseling.

### **Appraisal of Children, Adults, Couples, and Families (MHS 7222) 3 credits**

*Prerequisite: MHS 6220*

Course is designed to extend the student's knowledge and skills in the appraisal and evaluation of children, adolescents, adults, couples, and families.

### **Advanced Counseling Theories: Contemporary Therapies (MHS 7402) 3 credits**

*Prerequisite: MHS 6401*

Course introduces students to theoretical principles and applied skills in current counseling with an emphasis on contemporary therapy models.

### **Optimal Human Functioning and Development in Counseling (MHS 7406) 3 credits**

A critical review and application of theory and research on human strengths and positive psychology relating to developmental issues in counseling and psychotherapy, including physical and mental health, close intimate relationships, and career development.

### **Counseling Interventions with Children and Adolescents (MHS 7424) 3 credits**

*Prerequisites: MHS 6421, 6423*

Advanced verbal and action techniques and methods with children and young adolescents, with an emphasis on play therapy and action therapy methods.

### **Multicultural, Spiritual, and Professional Issues in Counseling (MHS 7429) 3 credits**

*Prerequisites: MHS 6700, 6701*

An advanced examination of multicultural, religion, spirituality, and professional issues, particularly involving advocacy for clients and the profession as they relate to counseling leadership and practice.

**Theory, Research, and Interventions with Couples, Families (MHS 7431) 3 credits**

An advanced course on contemporary theories and research as they impact interventions in couples and family counseling and therapy.

**Advanced Group Counseling (MHS 7512) 3 credits**

*Prerequisite: MHS 6510*

An examination of group theory and research-based best practices for the advanced group leader.

**Consultation and Leadership in Counseling (MHS 7606) 3 credits**

Course is designed to increase students' awareness of, and skills in, the roles of consultant, leader, and advocate in various clinical, community, and administrative roles.

**Consultation in School and Community (MHS 7608) 3 credits**

Designed to increase students' awareness of, and skills in, needs assessment and planning, implementation and evaluation of counseling services, and preventive programs for children in communities and schools.

**Advanced Instruction in Counselor Education (MHS 7611) 3 credits**

*Prerequisite: Permission of instructor*

The course is a beginning field experience designed to meet CACREP requirements for advanced training and experience in teaching.

**Outcomes Assessment and Evaluation in Counseling (MHS 7714) 3 credits**

*Prerequisite: MHS 6710*

Course critically reviews the literature on intervention outcomes in counseling and related fields.

**Advanced Research in Counseling (MHS 7730) 3 credits**

*Prerequisites: EDF 7482, STA 6113, STA 7114*

Course critically reviews the core constructs, process, and outcome variables in the counseling and psychotherapy research literature with emphasis on research design, measurement, and analysis considerations.

**Advanced Supervision in Counselor Education (MHS 7809) 3 credits**

*Prerequisite: Permission of instructor*

This course is a beginning field experience designed to meet CACREP requirements for advanced training and experience in supervision.

**Directed Independent Study (MHS 7905) 1-5 credits**

**Special Topics (MHS 7930) 3 credits**

*Prerequisite: Permission of instructor*

Topics related to the doctoral program in Counselor Education.

**Practicum in Supervision (MHS 7940) 3 credits**

*Prerequisite: MHS 7611*

This doctoral-level seminar and practicum is designed to provide students with the opportunity to enhance counseling supervision skills.

**Advanced Practicum in Counselor Education (MHS 7942) 3 credits**

*Prerequisite: Program of study approved by doctoral committee*

Course is composed of two parts: (a) a field experience designed to meet CACREP and program requirements for advanced training and experience in counseling practice, supervision, teaching, research, and publication, and/or leadership and professional service; and (b) guided development of a dissertation prospectus.

**Internship (MHS 7945) 3-6 credits**

*Prerequisite: MHS 6830*

An advanced internship designed to enhance the counselor's knowledge, skills, and abilities in assessment, case conceptualization, treatment planning, intervention, and the monitoring and evaluation of the counseling and psychotherapeutic process and outcome.

**Dissertation Seminar (MHS 7978) 3 credits**

*Prerequisite: MHS 7730*

Introduces and oversees dissertation research. Designed to facilitate the process of conceptualization, planning, implementing, and defending a quality doctoral dissertation.

**Dissertation (MHS 7980) 1-6 credits**

*Prerequisite: MHS 7978*

A minimum of 12 dissertation credits is required to complete the doctoral program. *Grading: S/U*

**Special Topics (RCS 5930) 3 credits**

*Prerequisite: Permission of department*

Special topics in rehabilitation counseling.

**Foundations of Rehabilitation Counseling (RCS 6031) 3 credits**

*Prerequisites: Graduate admission and permission of department*

A survey of the historical, sociological, legislative, and operational foundations of rehabilitation and service delivery.

**Medical and Psychosocial Aspects of Disability (RCS 6080) 3 credits**

*Prerequisite: Graduate admission and permission of department*

A survey of the medical, psychosocial, and social aspects of disability.

**Occupational Information and Job Placement (RCS 6320) 3 credits**

*Prerequisite: Graduate admission and permission of instructor*

A survey of the vocational aspects of disability, occupational classification, and career development of persons with disabilities.

**Case Management in Vocational Rehabilitation (RCS 6644) 3 credits**

A survey of the various case management models within a variety of rehabilitation settings: state VR, IL centers, community mental health centers/agencies, private rehabilitation companies, and disability management programs.

**Rehabilitation Counseling Practicum (RCS 6801) 3 credits**

*Prerequisite: Permission of department*

Supervised, highly structured clinical and practical experience in rehabilitation counseling.

**Advanced Practicum in Rehabilitation Counseling (RCS 6805) 3 credits**

*Prerequisite: RCS 6801*

Course provides supervised clinical and practical experience in rehabilitation counseling, rehabilitation case management, and related rehabilitation service provisions. The practicum requires 250 hours of approved clinical time both on campus and off campus at an approved agency setting.

**Rehabilitation Counseling Internship (RCS 6825) 3-6 credits**

*Prerequisites: Permission of department and RCS 6801*

Supervised, but more autonomous, clinical and practical experience in rehabilitation counseling.

**Fundamentals of School Guidance (SDS 5010) 3 credits**

A survey of guidance services available in a school setting including principles, procedures, and emerging trends in guidance services.

**Data Driven Practices in School Counseling (SDS 6316) 3 credits**

*Prerequisites: Counselor Education major and permission of instructor*

An experiential course designed to increase knowledge and skills for managing counselors' time

effectively and also to manage comprehensive school programs to assist students, families, and educators, including students with disabilities and students in diverse populations.

### **Counseling Interventions for College Readiness and Student Success (SDS 6344) 3 credits**

*Prerequisite: Permission of instructor*

Course examines counseling interventions that enhance academic performance, including meta-cognitive and psychosocial variables, learning styles and social-emotional issues. The course covers counseling strategies for enhancing student academic performance and personal/social development.

### **Guidance and Counseling of Gifted Students (SDS 6426) 3 credits**

Guidance and counseling needs of gifted and talented students will be explored. Strategies for use by counselors and teachers in guiding the gifted will be demonstrated.

### **Internship-Counselor Education (SDS 6820) 3-6 credits**

*Prerequisite: Approval of advisor*

This full-time field placement in a public school guidance program is required for all students in the school counseling track.

### **Master's Thesis (SDS 6970) 3 credits**

*Grading: S/U*

## **CURRICULUM AND INSTRUCTION**

### **Undergraduate Courses** /[link to graduate courses](#)

#### **Special Methods - Art (ARE 4240) 3 credits**

Students focus on practical experience in teaching visual art at the middle and secondary levels. Field experience in a visual art class setting at the middle and secondary levels is required.

#### **Art: Elementary School (ARE 4313) 3 credits**

Students focus on foundational methods for teaching visual art in the elementary classroom.

#### **Student Teaching-Art (ARE 4940) 6-12 credits**

#### **Yearlong Student Teaching-Art (ARE 4942) 9-12 credits**

#### **Student Teaching-Elementary ( EDE 4943) 3-9 credits**

*Prerequisite: Permission of instructor*

Course provides a one-semester clinical experience in an approved school setting. Emphasis is on the

Florida Educator Accomplished Practices and a state-approved assessment system. Five day/full day clinical experience required. *Grading: S/U*

### **Yearlong Elementary Student Teaching (EDE 4945) 3-6 credits**

*Prerequisite: Permission of instructor*

A yearlong clinical experience provided in an approved school setting. Emphasis is on the Florida Educator Accomplished Practices and a state-approved assessment system. Available fall/spring semester sequence only. Includes significant field work. *Grading: S/U*

### **Introduction to the Teaching Profession (EDF 2005) 3 credits**

An introduction to the historical, philosophical and sociological foundations of education. Also examined are the legal, social, financial and political environment of schools. A field experience component is required. Not offered in the summer.

### **Introduction to Diversity for Educators (EDF 2085) 3 credits**

*Writing Across Curriculum (Gordon Rule)*

Examines how various ethnic/cultural groups are served in U.S. schools. Multicultural content and materials incorporated into various disciplines are surveyed. A field experience component in a culturally diverse school/setting is required.

### **The Educated Citizen in a Global Context (EDF 2854) 3 credits**

A critical examination of education as a human right through investigation of educational purpose, policy, and practice in international contexts. The impact of colonization and modernization and their challenges will be examined. This is a General Education course.

### **Special Topics (EDF 2930) 1-3 credits**

This course offers introductory study of special topics in curriculum, culture and educational inquiry.

### **Equity Issues in Multicultural Education (EDF 3203) 3 credits**

*Prerequisite: EDF 2085 with minimum grade of "C"*

Based on the principles of culturally responsive pedagogy, this course explores contemporary educational issues, policies and teaching practices that support or hinder educational equity for diverse student populations.

### **Applied Learning Theory (EDF 3210) 3 credits**

Factors influencing the general and special learner and the learning process. Implications of learning theories for curriculum, instruction and classroom management. Recent research as reflected in the knowledge base and applied to the classroom.

### **Education in a Multicultural Society (EDF 3610) 3 credits**

Explores the historical perspectives on issues central to education in the context of diversity at the local, national and global levels. Students conduct research on topics in multicultural and global education that highlight the experience and perspectives of under-represented groups.

### **Special Topics (EDF 3930) 1-3 credits**

This course offers a study of special topics in curriculum, culture and educational inquiry. The number of credits varies according to the term and context in which the course is offered. All students receive the same number of credits in a given section/semester.

### **Community Engagement for Global Consciousness (EDF 4802) 3 credits**

*Prerequisite: EDF 2854 with minimum grade of "C"*

An Academic Service Learning (ASL) course in which students critically reflect on their roles as emergent professionals and decision makers in a changing world through the study of a range of global challenges and opportunities pertinent to democracy, sustainability and social justice. Students complete a community engagement project as part of the ASL requirement (15 hours).

### **Directed Independent Study (EDF 4905) 1-5 credits**

### **Special Topics (EDF 4930) 1-3 credits**

This course offers an advanced study of special topics in curriculum, culture and educational inquiry.

### **Special Topics (EDF 4935) 1-5 credits**

May be used with the approval of the department chair and dean. *Grading: S/U*

### **University Honors Seminar in Education (EDG 1930) 3 credits**

*Writing Across Curriculum (Gordon Rule)*

A seminar in the University Honors Program on topics in education.

### **Effective Teaching Practices 1 (EDG 3323) 2 credits**

*Prerequisites: LAE 4353, TSL 4080, admission to Elementary Education program or permission of instructor; Postrequisite: EDG 3324*

An introduction to research-based effective teaching practices, focusing on classroom management, organization and development of instruction and verbal and non-verbal communication. Emphasis is on the Florida Educator Accomplished Practices and state-approved assessment system. One day clinical experience per week.

### **Effective Teaching Practices (EDG 3324) 3 credits**

*Prerequisite: Admission to Elementary Education program or permission of instructor*

Preparation for and implementation of current research-supported, effective teaching practices, focusing on planning, presentation of subject matter and assessment. Emphasis is on the Florida Performance Measurement System and the Educator Accomplished Practices. One day clinical experience per week. Students are placed in schools according to the campus where the student has enrolled. Not offered in the summer. This is an Academic Service Learning (ASL) course.

**EDG 3323 and EDG 3324 Grading Policy:** If a student earns a "D" or an "F" in the field evaluation component or a "D" or an "F" in the course work component, then the highest grade the student can receive for the course is a "C-." A "C-" is not considered a passing grade, and the course must be retaken. Students may not take any ETP classes more than twice.

### **Survey of Current Environmental Issues through Service Learning (EDG 4044) 3 credits**

*Prerequisite: Admission to the Pine Jog Fellowship Program*

Emphasis is on knowledge and first-hand exploration of current environmental issues impacting the South Florida region. All issues are addressed by using service learning methodologies. Enrollment in this course is limited to dually enrolled high school and area college students admitted to the Pine Jog Fellowship Program. Course is taught at the Pine Jog Environmental Education Center.

### **Civic Engagement through Environmental Service Learning (EDG 4045) 3 credits**

*Prerequisite: EDG 4044*

Emphasis is on knowledge and practical application of key components required to achieve effective community-based social marketing, civic advocacy, and service learning action projects that address environmental issues. Enrollment is limited to dually enrolled high school and area college students admitted to the Pine Jog Fellowship Program. Course is taught at the Pine Jog Environmental Education Center.

### **The Role of Fine Arts in Education (EDG 4202) 3 credits**

Focuses on the impact that visual and performing arts should have on the K-12 classroom and the strategies for incorporating them into the TEA curriculum. For TEA students only.

### **Classroom Instructional and Assessment Strategies (EDG 4343) 3 credits**

*Prerequisites: Permission of department*

A professional preparation course using research-based strategies that focus on the organization and development of instruction, effective assessment strategies with emphasis on data-driven decision-making, and instructional strategies that include the needs of diverse learners. Course emphasizes the education competencies of the Florida Educator Accomplished Practices.

### **Directed Independent Study (EDG 4905) 1-5 credits**

### **Special Topics (EDG 4930) 1-5 credits**

Topics not covered by other courses. Topics will vary.

### **Special Topics (EDG 4932) 1-5 credits**

Topics not covered by other courses. Topics will vary. *Grading: S/U*

### **Environmental Education Internship (EDG 4940) 3 credits**

*Prerequisite: EDG 4044*

Emphasis is on application and implementation of environmental education curriculum in a variety of settings and with diverse populations. Supervision is provided by qualified personnel on both the local and university levels. Enrollment is limited to dual enrolled high school and area college students admitted to the Pine Jog Fellowship Program. Course is taught at the Pine Jog Environmental Education Center.

### **Designing and Implementing a Blended Curriculum: Birth to Age 8 (EEC 3214) 3 credits**

Course focuses on designing and implementing developmentally appropriate, blended curriculum and materials for young children, birth to age 8, both those developing typically and those with disabilities. Field experience required.

### **Foundations of Early Childhood Environmental Education (EEC 4020) 3 credits**

Focuses on issues as well as trends affecting children's development, health and learning from environmental education and sustainability perspectives. Study of recommended practices as well as programmatic and system requirements in enhancing access to nature, environmental literacy and healthy development of children. Field experience required.

### **Exploring Natural Habitats as a Curriculum for Young Learners (EEC 4237) 3 credits**

Studies of natural habitats as contexts for developing integrated environmental education curriculum appropriate for young children. Participation in field trips and on-site practice of effective teaching approaches are required.

### **Creative Arts for Young Children (EEC 4303) 3 credits**

This course provides developmentally appropriate, inclusive and integrated creative arts curriculum activities for young children in visual arts, dance/movement, music and drama. Practical and hands-on learning provides the context for a thematic approach, including community arts resources and multicultural perspectives. Arts for young children with special needs and English language learners are addressed. Field experience minimum requirement of 10 hours.

### **Blended Early Childhood Methods: Birth to Age 5 (EEC 4313) 4 credits**

*Prerequisites: EEC 3214 with minimum grade of "C"; B.E.C.E. majors only*

Explores an organized approach of teaching young children, with and without disabilities, developmental, educational and functional skills useful in natural environments, including home and educational settings. Field experience required.

### **Community Engagement in Early Childhood Environmental Education (EEC 4404) 3 credits**

This practicum requires collaboration with community agencies in advancing learning, development and health of children through environmental education. In partnership with a community organization, the student engages in learning experiences and contributes in enhancing the community partners' efforts to further the aims of early childhood environmental education. Thirty-six hours of practicum and three hours of consultations with instructor are required. This is an Academic Service Learning (ASL) course.

### **Introduction to Technology for Educators (EME 2040) 3 credits**

An introduction and analysis of educational technologies available to prospective classroom teachers for use in the development and delivery of improved instruction. The technologies and accompanying materials will be demonstrated and used in a wide variety of subjects.

### **Digital Literacy in a Globally Connected World (EME 2620) 3 credits**

Digital technologies have become an influential part of our everyday life. For this reason, digital technology skills have become central across disciplines and are valued as an essential career competency. In this course, students learn how to access, evaluate, apply, participate and interact within the educational and professional digital environments as they solve complex problems within a technology rich world. This is a General Education course.

### **Educational Technology for 21st Century Teaching (EME 4312) 3 credits**

This course prepares learners to integrate technology into the classroom. Emphasis is on the use of current technology tools to facilitate teaching, learning and assessment.

### **Applied Educational Technology (EME 4810) 3 credits**

Systems approach to using traditional and emerging technology in instruction. Emphasis is upon integration of instructional design principles with uses of technology as instructional tools to enhance the quality of classroom instruction and to facilitate the work of the teacher. Includes hands-on experience with traditional educational media, emerging technologies and microcomputer hardware and software.

**Secondary School Effective Instruction (ESE 3940) 3 credits**

A guided field experience including classroom instruction on learner characteristics, cooperative learning, management of student conduct and various domains of the Florida Performance Measurement System (FPMS) and the Educator Accomplished Practices. One day clinical field experience required. Students are placed in schools according to the campus where the student has enrolled. Not offered in the summer.

**Methods of Teaching Foreign Language K-12 (FLE 4333) 4 credits**

Methods of teaching foreign language for students majoring in Foreign Language Education.

**Student Teaching-Foreign Language (FLE 4945) 6-12 credits**

**Yearlong Student Teaching-Foreign Language (FLE 4947) 9-12 credits**

**Language Arts and Literature: Birth through Grade 8 (LAE 4353) 3 credits**

Methods and materials for teaching language arts skills and children's literature from birth through middle school

**Language Arts: Middle and Secondary School (LAE 4360) 3 credits**

*Prerequisite: Permission of instructor*

Techniques of instruction.

**Yearlong Student Teaching-English (LAE 4942) 9-12 credits**

**Student Teaching-English (LAE 4948) 6-12 credits**

**Mathematics Content and Standards for K-6 Teachers (M AE 4310) 3 credits**

*Prerequisites: 6 credits of college-level mathematics with minimum grade of "C"; Elementary Education majors only*

In-depth review of content required to teach K-6 mathematics effectively. Emphasizes relevant Florida mathematics standards and competencies.

**Principles and Methods: K-9 School Math (MAE 4350) 3 credits**

*Prerequisite: MAE 4310, LAE 4353, TSL 4080 (Note: Students majoring in ESE are required to complete 6 credits of college-level math, but are not required to complete MAE 4310 as a prerequisite to this course.)*

A review of mathematics information and skills and a study of methods/materials related to K-9 mathematics teaching in a diverse setting.

**Teaching Middle and Secondary School Mathematics (MAE 4360) 3 credits**

Current materials and strategies for implementing the senior high mathematics curriculum.

**Yearlong Student Teaching-Mathematics (MAE 4944) 9-12 credits**

**Student Teaching-Mathematics (MAE 4945) 6-12 credits**

**Music: Elementary School 1 (MUE 4013) 2 credits**

Students learn the fundamentals of music applicable to teaching music in the elementary classroom.

Content includes learning basic music notation reading, historical and cultural musical styles, as well as the proper techniques for singing and playing instruments. Not open to Music majors.

**Music: Elementary School 2 (MUE 4311) 2 credits**

Open to Music majors only.

[\(See Music courses, College of Arts and Letters section\)](#)

**Secondary Instrumental Methods (MUE 4330) 2 credits**

[\(See Music courses, College of Arts and Letters section\)](#)

**Student Teaching-Music (MUE 4940) 6-12 credits**

**Yearlong Student Teaching-Music (MUE 4941) 9-12 credits**

**Reading Development 1: Birth through Grade 3 (RED 4308) 3 credits**

*Prerequisites: LAE 4353, TSL 4080 with minimum grades of "C"*

This course focuses on emergent and beginning literacy development in children, birth through grade 3. Topics covered include: philosophy; factors affecting literacy success such as child characteristics, family, environment, cultural/ethnic diversity; literacy skills and concepts; assessments; evaluation; approaches, methods and materials using research-based, developmentally appropriate curriculum and practices. Field experience in a classroom setting is required.

**Content Reading: Middle and Secondary Schools (RED 4335) 3 credits**

This course is designed to facilitate the acquisition and integration of reading, writing, and study skills into middle and secondary school content areas.

**Supervised Literacy Practicum (RED 4348) 3 credits**

*Prerequisites: RED 4552 or permission of instructor; for Elementary Education majors only*

*Corequisite: EDE 4943*

Emphasizes relevant Florida Subject Matter Content Standards and Reading Endorsement

Competencies. Supervised field experience (60 in-service hours).

### **Reading Diagnosis and Remediation: Pre-K through Grade 8 (RED 4552) 3 credits**

*Prerequisites: EEX 4250 or (TSL 4080 and LAE 4353 and RED 4308 and RED 4750)*

*Prerequisite or corequisite: RED 4750*

*Prerequisite or corequisite: EEX 4250*

Focuses on the recognition and diagnosis of reading difficulties using a variety of assessment tools and on prescribing and implementing a variety of appropriate methods and materials to improve reading performance. Field experience in a classroom setting is required.

### **Reading Development 2: Grades 3 through 8 (RED 4750) 3 credits**

*Prerequisite: RED 4308*

This course concentrates on strategies and materials appropriate for literacy instruction in grades 3 through 8. Emphasis is placed upon reading and integrating writing into teaching, narrative and non-fiction genres. Utilizing reading to learn is the primary focus.

### **Science Content and Standards for K-6 Teachers (SCE 4113) 3 credits**

*Prerequisites: 7 credits of college level science including 3 credits in physical science, 3 credits in biological science and at least one science laboratory, all with minimum grades of "C"; Elementary Education majors only*

In-depth review of content required to teach K-6 science effectively. Emphasizes relevant Florida Science Standards and Competencies. This is an Academic Service Learning (ASL) course.

### **Principles and Methods: K-9 School Science (SCE 4350) 3 credits**

*Prerequisites: LAE 4353, TSL 4080, SCE 4113 all with minimum grades of "C"*

A review of concepts in science and a study of methods/materials related to K-9 science teaching.

### **Science: Middle and Secondary School (SCE 4360) 3 credits**

*Prerequisite: Senior-level standing in a science discipline*

Techniques of instruction for students enrolled in teacher education programs. This is an Academic Service Learning (ASL) course.

### **South Florida Hydrological Systems (SCE 4843) 3 credits**

*Prerequisite: For high school dual enrollment students*

This course introduces students to scientists who are working in the field of environmental research. Dual enrollment high school students work with scientists and educators to develop an understanding of the interconnectedness and complexity of South Florida water systems and the environmental issues facing them. Students are exposed to engineered research tools that are currently being tested as

solutions to South Florida's environmental challenges.

### **Yearlong Student Teaching-Science (SCE 4941) 9-12 credits**

#### **Student Teaching-Science (SCE 4944) 6-12 credits**

#### **K-9 Social Studies (SSE 4150) 3 credits**

*Prerequisites: LAE 4353 and TSL 4080, with minimum grades of "C"*

Concepts and approaches for teaching social studies in grades K-9.

#### **Social Studies Content and Standards for K-6 Teachers (SSE 4312) 2 credits**

*Prerequisite: For Elementary Education majors only*

In-depth review of content required to teach K-6 social studies effectively. Emphasizes relevant Florida Social Studies Standards and Competencies.

#### **Social Studies: Middle and Secondary School (SSE 4361) 3 credits**

Techniques of instruction for students enrolled in teacher education programs.

### **Yearlong Student Teaching-Social Science (SSE 4941) 9-12 credits**

#### **Student Teaching-Social Science (SSE 4944) 6-12 credits**

#### **Introduction to Theories and Practices of TESOL (TSL 4080) 3 credits**

TSL 4080 is a practical course designed to introduce students to the special methods and unique experiences involved in the teaching of English to speakers of other languages.

#### **TESOL Issues and Practices (TSL 4081) 3 credits**

*Prerequisite: TSL 4080*

Designed to serve as the culminating experience in the area of ESOL for the elementary education major. The main goal of this course is to make the connection between theory and practice. Special attention will be given to the areas of methodology and curriculum. Limited summer enrollment may be available by special permission only.

#### **Applied Linguistics and TESOL (TSL 4251) 3 credits**

Applying linguistics, psycholinguistics, and sociolinguistics to teaching English as a second language with emphasis on pronunciation, intonation, structural analysis, morphophonemics and decoding from print to sound.

#### **ESOL Strategies for Content Area Teachers (TSL 4324) 3 credits**

This course features the study and application of methods, strategies, issues, and materials for teaching Limited English Proficient students. Emphasis will be placed on the areas of language acquisition, multicultural concerns, ESOL through the content areas, and current trends in ESL teaching and learning. The LULAC-META Consent Decree will be explored. This course meets all DOE identified competencies for all special area teachers and all secondary education in service or preservice teachers in all content areas except English.

## **Curriculum and Instruction Graduate Courses**

### **Curriculum in Art Education (ARE 6141) 3 credits**

Explores planning, organizing, and writing curriculum guides in art for various educational levels: elementary, secondary, K-12 programs, community college, and adult education.

### **Art Education (ARE 6142) 3 credits**

Course focuses on current and historical philosophy of art education, including aesthetics, art criticism, and studio methods, to develop an understanding of contemporary issues and their application to practice.

### **Art: Elementary School 2 (ARE 6315) 3 credits**

*Prerequisite: ARE 4313 or equivalent*

An advanced study in techniques and materials in art for the elementary school.

### **Art Education in Elementary School (ARE 6317) 3 credits**

Course focuses on foundational methods for teaching visual art in the elementary classroom with special attention to art integration. Field experience in a visual art class setting at the elementary level is required.

### **Art Education in Secondary School (ARE 6342) 3 credits**

Focuses on art education in middle and high schools through analysis and study of theories, use of visual art materials, curriculum planning and review of practices and research in art education.

### **Curriculum: Elementary School (EDE 6205) 3 credits**

A study of curriculum theory and practice in elementary school.

### **Yearlong Elementary (Grades 1-6) Internship (EDE 6947) 6-9 credits/two semesters**

Yearlong clinical experience in an urban or rural disadvantaged area. Emphasis on Educator Accomplished Practices. First semester: four partial days, one full day clinical experience and two, three-hour class sessions per week. Second semester: five full days per week clinical experience.

### **Classroom Evaluation (EDF 5460) 3 credits**

A general survey of practical methods, designed especially for non-degree-seeking students, for evaluation in the classroom.

### **Research (EDF 5480) 3 credits**

### **Human Development: Applications for Education (EDF 6113) 3 credits**

Explores human development from infancy through adulthood with a focus on its relevance for educational contexts. Topics include physical, cognitive, social, emotional and moral development. Implications of developmental theories for curriculum, instruction and classroom management are discussed.

### **Child Development in Educational Psychology (EDF 6126) 3 credits**

Focus is on the development of understanding concerning physical, social, emotional, and cognitive growth, learning skills, and special needs of children from conception to age eight.

### **Adolescence and Young Adulthood in Educational Psychology (EDF 6138) 3 credits**

Focus is on human development from puberty through young adulthood, including physical, cognitive, social, emotional and moral development to enable teachers to more effectively understand and assist student learning in secondary and higher education.

### **Learning and Cognition in Education (EDF 6142) 3 credits**

Examination of the influence of applied cognition and learning theories to enable educational practitioners to more effectively understand and assist students in the learning process.

### **Educational Psychology (EDF 6229) 3 credits**

Application of psychological principles and related research to assist teachers in promoting academic achievement and fostering progress toward educational goals.

### **Personality Theories in Education (EDF 6339) 3 credits**

Research in personality development, personality theories and social and emotional learning as applied to classroom and educational settings are examined in order to assist educational professionals in promoting students' learning.

### **Discourse Analysis in Education (EDF 6499) 3 credits**

This course introduces theories and methodologies for the study of language in use (i.e., discourse) and offers students a conceptual and analytical framework that can provide a means to make visible the cultural assumptions and "commonsense" values in educational texts and discourses. Different discourse analysis approaches, such as multimodal analysis, interactional sociolinguistics, grounded

theory and ethnography of communication (among others) are discussed as context to then focus on exploring issues of power relations in education and other realms through critical discourse analysis and systemic functional linguistics.

**Black Perspectives in Education (EDF 6615) 3 credits**

Drawing on black epistemologies and research traditions, this course examines historical and contemporary issues and their impact on diverse immigrant and nonimmigrant black populations.

**Race, Class and Gender in Education (EDF 6637) 3 credits**

Drawing on the principles of critical pedagogy, this course examines how the social constructions of race, class and gender influence educational decision making. Analyzes data related to social diversity and examines the implications for equity in education.

**Foundations of Global Education (EDF 6800) 3 credits**

Addresses the nature and scope of global education, multiple national cultures, and their impact on educational practice, international responses to common educational issues, and the representation of global social problems in curricula.

**Foundations of Multicultural Curricula (EDF 6887) 3 credits**

An overview of the historical, philosophical and social foundations of curriculum in the context of the education of diverse populations. Diverse curriculum theories and their implications for curriculum development, educational policy and pedagogical practice are explored.

**Directed Independent Study (EDF 6905) 1-5 credits**

Requires approval by assigned faculty advisor.

**Action Research in Schools and Communities (EDF 6918) 3 credits**

Students engage in collaborative planning for doing action research based on an inquiry question grounded in practice. The readings provide historical, critical, and conceptual frameworks for action research locally, nationally, and internationally.

**Master's Thesis (EDF 6971) 3 credits**

Requires approval by assigned faculty advisor.

**Critical Foundations of Education Inquiry (EDF 7578) 3 credits**

A survey of the multiple forms of critical theory in educational inquiry and their methodological implications. Students will analyze critical research studies and develop theoretical and methodological frameworks for research involving diverse populations.

### **Trends in Analyzing Instructional Practices (EDF 7758) 3 credits**

Students examine teaching practices as "models" or "structures" that guide teaching. Students analyze their own teaching, conduct analysis of student work, and explore research on pedagogy.

### **Instructional Policies and the Teaching Profession (EDF 7917) 3 credits**

Students examine the current political, economic, and social challenges and dilemmas for the teaching profession. The course includes analysis of teacher certification trends, teacher education models, and research on teacher learning.

### **Multicultural Education (EDG 5705) 3 credits**

An introduction to the field of multicultural education, the multiple dimensions of sociocultural diversity and the implications and challenges for equitable education.

### **Special Topics (EDG 5931) 1-5 credits**

### **Curriculum Leadership (EDG 6223) 3 credits**

Course focuses on historical, theoretical, and practical perspectives of curriculum and instruction at the national, state, and local levels. Course is designed for graduate students preparing to assume professional responsibilities as administrators and curriculum developers in institutions associated with K-12 education.

### **U.S. Curricular Trends and Issues (EDG 6224) 3 credits**

Major trends impacting school curriculum from national, state, and local levels and their interactions in terms of the development, implementation, and evaluation of curriculum.

### **Design Components of Curriculum (EDG 6253) 3 credits**

Emphasis upon knowledge and application of design components of curriculum including scope, integration, sequence, continuity, balance, and knowledge representation systems.

### **Instructional Program Development (EDG 6255) 3 credits**

*Prerequisite: Permission of instructor*

Specific methods for organizing knowledge based upon contemporary ideas of how humans think and learn. Examines the latest ideas and research in instructional program development.

### **Program Evaluation in Curriculum and Instruction (EDG 6285) 3 credits**

This course enables students in Curriculum and Instruction to survey program evaluation strategies used in C and I content areas. An emphasis is placed on analyzing and interpreting evaluation literature in subject specific areas. In addition, students examine national and state trends in program evaluation.

### **Instructional Strategies and Assessment Practices (EDG 6345) 3 credits**

A professional initial certification course using research-based strategies to focus on organization and development of instruction, effective lesson planning, instructional strategies to meet the needs of diverse learners through differentiated instruction, and assessment techniques with emphasis on data-driven decision making. FEAPS are emphasized.

### **Global Perspectives of Curricular Trends Across Nations (EDG 6625) 3 credits**

Focuses on comparison, analysis, and evaluation of curricular trends, issues, pedagogy, and resources in education systems in developing and industrialized nations, and implications for national and global citizenship for the 21st century.

### **Documentation and Assessment in Curriculum and Instruction (EDG 6628) 3 credits**

*Prerequisite: Graduate standing*

Offers participants operational definitions and experiences in documentation and assessment for educators. Students combine readings, analyses of experiences in learning environments, critiques of the existing assessment culture and field work.

### **Directed Independent Study (EDG 6906) 1-5 credits**

### **Special Topics (EDG 6931) 1-3 credits**

This course offers an in-depth study of a specialized topic in curriculum, culture and educational inquiry at the graduate level.

### **Seminar in Curriculum (EDG 6935) 3 credits**

A study of curriculum principles, structure, and theories.

### **Special Topics (EDG 6937) 1-5 credits**

Selected topics in education.

### **Internship (EDG 6940) 6-10 credits**

*Prerequisite: Approval of student's major advisor in the appropriate graduate program*

The advisor in the department in which the student is enrolled works mutually with the student and the Director of Student Teaching in assigning the student specialized and professional field experiences. Supervision is provided by qualified personnel on both the local and University level. *Grading S/U*

### **Master's Thesis (EDG 6971) 3 credits**

### **Curriculum Theory (EDG 7221) 3 credits**

The analysis of the historical and philosophical foundations of curriculum theory in the U.S. through the study of the original work of key theorists.

### **Curriculum Implementation for School Improvement (EDG 7251) 3 credits**

*Prerequisites: Must be enrolled in one of the following levels: Doctoral and Education Specialist and permission of instructor*

Prepares educators to proceed to curriculum approval, dissemination and implementation once a curriculum is designed. Content will include preparing and presenting a comprehensive implementation plan and subsequent/on-going curriculum refinement.

### **Directed Independent Study (EDG 7906) 1-5 credits**

### **Praxis in Curriculum and Instruction (EDG 7918) 3 credits**

A capstone experience in which students are guided through the design, implementation and reporting on a study of professional practice in diverse community- or school-based contexts. The final capstone project comprises an oral presentation and a written report.

### **Special Topics (EDG 7932) 1-3 credits**

This course offers an in-depth study of a specialized topic in curriculum, culture and educational inquiry at the doctoral level.

### **Foundations of Curriculum Inquiry (EDG 7938) 3 credits**

*Prerequisite: Admission to doctoral program*

This course should be taken immediately after the candidate is admitted to the doctoral program. It is designed as an introduction to the process of doctoral studies and the nature and purpose of educational research in curriculum and instruction.

### **Research in Curriculum and Instruction (EDG 7944) 3 credits**

*Prerequisites: EDF 7758, EDF 7917, EDG 7221, EDG 7938*

Projects completed in doctoral seminar will be scrutinized to determine their research quality and educational contributions. Emphasis is placed on accurate integration among research, curriculum, and instruction protocols.

### **Dissertation (EDG 7980) 1-15 credits**

### **Motivational Theories in Educational Psychology (EDP 6218) 3 credits**

Application of motivational principles to educational settings in order to assist educational professionals in promoting and maintaining student motivation. Emphasis on learners' internal motivation, including students' goal orientations and mindset, self-efficacy, self-regulated learning and

resilience. Both instructional influences and school-family partnerships are discussed.

### **Field Project in Educational Psychology (EDP 6944) 3 credits**

*Prerequisite: Permission of instructor*

This course is individually designed according to student professional goals. It focuses on extending theoretical knowledge in educational psychology through a field-based experiential capstone learning project.

### **Foundations of Early Childhood Environmental Education (EEC 6026) 3 credits**

Focus on issues as well as trends affecting children's development, health and learning from environmental education and sustainability perspectives. Study of recommended practices as well as programmatic and system requirements in enhancing access to nature, environmental literacy and healthy development of children. Field experience required.

### **Principles and Models of Early Childhood Curriculum (EEC 6236) 3 credits**

This course will provide a conceptual framework for the analysis and practical implementation of early childhood curriculum models. 10 hours of field experience required.

### **Exploring Natural Habitats as a Curriculum for Young Learners (EEC 6239) 3 credits**

Study of natural habitats as contexts for developing integrated environmental education curriculum appropriate for young children. Participation in field trips and on-site practice of effective teaching approaches are required.

### **Integrated Curriculum in Early Childhood (EEC 6246) 3 credits**

*Prerequisites: EEC 6236, EEX 5015*

This course focuses on an integrated math, science, and social studies curriculum for preschool programs. Special emphasis on teaching, planning, implementing, and evaluating integrated curriculum. 20 hours of field experience will be required.

### **Effective Practices in Early Childhood Environmental Education (EEC 6327) 3 credits**

Focus on environmental awareness and learning in both indoor and outdoor settings. Developing a sense of place through curricular activities promoting active content learning, healthy habit development, environmental literacy skills and sustainable choice-making are emphasized. Field trips required.

### **Creative Arts for Young Children (EEC 6711) 3 credits**

Addresses children's creative processes and classroom practices with the goal of promoting children's artistic expression in the visual arts, dance/movement, music and drama. Includes assessment of

creative processes and products, as well as inclusive and multicultural contexts and arts activities.

### **Seminar in Early Childhood Education (EEC 6932) 3 credits**

*Prerequisite Permission of instructor*

An overview of current practices, problems, programs, and issues. It includes analysis of current research and its implications for early childhood education.

### **Field Project/Portfolio in Early Childhood Education (EEC 6947) 3 credits**

*Prerequisites or Corequisites: EDF 6481 and STA 6113 and completion of at least 21 credits of early childhood coursework*

The field project is an individually designed learning activity and a culminating experience for graduate early childhood education students. Students have the opportunity to develop their professional strengths and interests and create a professional portfolio.

### **Survey of Early Childhood in Exceptional Student Education (EEX 5015) 3 credits**

Methods in Early Childhood Student Education (EEX 5245) 3 credits

[\(See Special Education courses, this section\)](#)

### **Models of Learning and Instruction (EME 6051) 3 credits**

Models for designing instruction with emphasis on interface design, feedback mechanisms, new instructional paradigms, trends, issues, and current research.

### **Self-Regulated Learning Systems (EME 6209) 3 credits**

An in-depth examination of the development of instructional materials and the design of instructional systems based upon contemporary learning theories and the evolving view of a technological future.

### **Courseware Design (EME 6415) 3 credits**

*Prerequisite: Permission of instructor*

An introduction to design, development, implementation, and assessment of technology-based learning environments.

### **Digital Literacy for Global Educators (EME 6426) 3 credits**

A survey of the fundamental applications of technology for instructional delivery, digital citizenship, current technology issues and trends.

### **K-12 Online Teaching Foundations (EME 6456) 3 credits**

This course examines strategies to design, manage and deliver meaningful online learning experiences in K-12 learning environments. The practical skills and pedagogical principles to teach K-12 online learning environments utilizing current and emerging technologies are explored.

### **Distance Education in Theory and Practice (EME 6458) 3 credits**

Provides skills and knowledge to plan, develop, and deliver instruction using distance learning education technology. Students will be exposed to knowledge, skills, and tools useful in creating and maintaining an online learning environment. Topics covered include interactivity, communications, curriculum design, instructional design, website design, and distance education software.

### **Instructional Design (EME 6601) 3 credits**

A systems model for instructional design.

### **Technological and Theoretical Foundations of Learning (EME 6623) 3 credits**

An examination of the role of learning theories, including behaviorist, cognitivist, and constructivist perspectives, in the context of technology-rich and technology-infused classroom settings. The integrative use of computer- and internet-based technology to support each of the learning theory perspectives is presented and examined.

### **Organization and Management Learning Technologies (EME 6716) 3 credits**

Organization and management principles, models, and contemporary ideas that point to a redefinition, rebuilding, and reorganization of traditional educational environments. Emphasis is on Total Quality Learning.

### **Authentic, Standards-Based Assessment for 21st Century Learners (EME 6816) 3 credits**

*Prerequisite: Permission of instructor*

A comprehensive overview of the theory and practice of assessment, emphasizing the role of technology in conducting assessments, analyzing data, and using assessment data to improve student achievement. Technology-based assessment tools are explored, including online standardized testing tools, constructivist-based alternative assessment tools, and other web-based technologies.

### **Field Experience in Education and Technology (EME 6945) 1-8 credits**

*Prerequisite: Media core courses*

Practical and professional experiences under qualified supervision and in specific areas of educational media and technology.

### **Senior High School Curriculum (ESE 6215) 3 credits**

Curriculum theory, principles, and practices for the senior high school.

### **Language Arts: Elementary School (LAE 6352) 3 credits**

Modern viewpoints and approaches in teaching language arts; the relation of the contemporary

language description and research to the teaching of language arts in the elementary school. It also offers an in-depth study of selected topics.

**Literature: Elementary School (LAE 6415) 3 credits**

Methods and materials for the creative teaching of children's literature in the elementary school.

**Mathematics: Elementary and Middle School (MAE 6151) 3 credits**

A study of contemporary thinking, practices, and research in the teaching of mathematics to elementary and middle school children.

**Teaching Mathematics: Middle and High School (MAE 6155) 3 credits**

A study of contemporary thinking, practices, and research in the teaching of mathematics to middle and high school students.

**Beginning Reading K-3 (RED 6303) 3 credits**

*Prerequisites: RED 4552, with permission of instructor and/or advisor, and teaching experience*

Designed for the classroom teacher and focuses on an overview of current beginning reading philosophy, curriculum, programs, and materials. Some emphasis is placed on diagnostic and remedial techniques suitable for the K-3 classroom.

**Developmental Reading (RED 6351) 3 credits**

*Prerequisite: LAE 4353*

Course provides an advanced study of theory and practice related to developmental reading instruction. Emphasis is on theoretical considerations of basic reading skills using an interdisciplinary approach.

**Picture Books for Content Learning (RED 6356) 3 credits**

This course emphasizes the identification and integration of picture books and the use of read-alouds for the development of reading and literacy skills in content areas.

**Teaching Reading in Secondary and Middle School (RED 6361) 3 credits**

Emphasis is placed on the reading efficiency and study habits of high school and middle school students. Integrating reading and writing into content fields and reviewing reading materials will also be emphasized.

**Reading Diagnosis (RED 6546) 3 credits**

*Prerequisite: RED 6351*

A formal as well as informal diagnosis of reading problems in a clinical setting. An introduction to and writing of case reports is included.

### **Remedial Reading (RED 6548) 3 credits**

*Prerequisite: RED 6351*

Detailed analyses of case studies in reading with primary emphases on theoretical and etiological factors of reading disability. Classical remedial approaches are included.

### **Trends and Issues in Reading Education (RED 6656) 3 credits**

*Prerequisite: RED 6351 or permission of instructor*

Modern approaches to reading instruction; includes a critical review of issues and innovations.

### **Reading Practicum (RED 6836) 3 credits**

*Prerequisite: RED 6548*

Supervised tutorial experience in working with children exhibiting special reading problems.

### **Topics in Reading Education (RED 7933) 3 credits**

An analysis of specific topics in the area of reading which the instructor will choose. Emphasis will be on the review of literature and active programs related to the topic(s).

### **Seminar in Reading Education (RED 7948) 3 credits**

An analysis of doctoral research proposals in reading education. Emphasis is on critiquing individual student presentations, projects, and investigations.

### **Science: Elementary and Middle School (SCE 6151) 3 credits**

This course covers contemporary thinking, practices, and research in the teaching of science to elementary and middle school children. This is an Academic Service Learning (ASL) course.

### **Capstone Study in Environmental Education (SCE 6196) 3 credits**

*Prerequisites: SCE 6644 and permission of instructor; Graduate Environmental Education majors only*

Course content is individualized according to goals and interests. Requirements: readings, directed independent study/internship, poster/media presentation and research paper linking content in all courses to goals after graduation. Completed during the last semester of the master's degree in Environmental Education. Course is taught at the Pine Jog Environmental Education Center.

### **Advanced Methods of Environmental Education (SCE 6344) 3 credits**

Examines multiple contexts for modern environmental education by visiting community providers including parks, nature centers and wildlife rehabilitators. Requirements: readings, discussions, field trips, interviews, final project. Course is taught at the Pine Jog Environmental Education Center.

### **Perspectives of Environmental Education (SCE 6345) 3 credits**

Provides an overview of the historical and conceptual frameworks that define the field of environmental education, with a focus on future growth and possibilities. Includes readings, discussions, service learning, presentations, field trips and a project linking course content to career goals. Course is taught at the Pine Jog Environmental Education Center.

**Trends and Issues in Environmental Education (SCE 6644) 3 credits**

This course analyzes trends, issues and new research impacting the field of environmental education, including effective program design and assessment. Requirements include readings, discussions, papers, curriculum design and critical review. Course is taught at the Pine Jog Environmental Education Center.

**Social Studies: Elementary and Middle School (SSE 6151) 3 credits**

This course studies and analyzes social studies research and includes selection and organization of learning designs.

**Curriculum Development in TESOL and Bilingual Education (TSL 5142) 3 credits**

Focuses on curriculum and materials selection and development in TESOL and bilingual education from Pre-K to adult for a variety of national and international contexts.

**Methods of TESOL and Bilingual Education (TSL 5345) 3 credits**

The study and applications of methodologies, strategies and materials for teaching English learners (ELs) and bilingual students in a variety of educational settings. For teachers of Pre-K students and adults .

**Assessment Issues for ESOL and Bilingual Populations (TSL 5440) 3 credits**

This course focuses on the theory, research, and practice of assessment related to equity and the education of English and bilingual learners.

**Pedagogical Grammar for ESOL and Bilingual Populations (TSL 6350) 3 credits**

Course focuses on helping teachers develop a repertoire of strategies for planning and delivering "balanced" grammar instruction using fluency- and accuracy-oriented activities to help ESOL and bilingual students use standard English effectively in a variety of educational contexts.

**Teaching Pronunciation in ESOL and Bilingual Programs (TSL 6375) 3 credits**

Course addresses theoretical and practical issues associated with teaching pronunciation to children and adults in English as a second language (ESL), English as a foreign language (EFL), bilingual education, and foreign language education settings.

**Developing Literacy for ESOL and Bilingual Populations (TSL 6376) 3 credits**

*Prerequisites: TSL 6642 and TSL 6700*

Course presents an overview of the research and field-tested methods of teaching literacy in ESOL, EFL (English as a foreign language) and bilingual education programs for Pre-K-12 learners and adults.

### **Theories of TESOL and Bilingual Education (TSL 6642) 3 credits**

For school administrators, in-service teachers, and graduate students in TESOL/Bilingual Education. Addresses theories, underlying principles, and research related to TESOL and bilingual education, especially as they relate to school policies, programs, and services.

### **Language Policy and Planning in Education (TSL 6700) 3 credits**

For school administrators and graduate students in Teaching English to Speakers of Other Languages (TESOL)/Bilingual Education. Addresses language-related policies and procedures in educational settings.

### **TESOL and Bilingual Education Practicum (TSL 6944) 3-9 credits**

*Prerequisites: Completion of all other core courses and permission of instructor*

An intensive observation, learning, and teaching experience in which participants work in a classroom setting under the supervision of a master teacher and/or supervisor of TESOL or Bilingual Education.

## **EDUCATIONAL LEADERSHIP AND RESEARCH METHODOLOGY**

**Undergraduate Courses** /[link to graduate courses](#)

### **Multidisciplinary Introduction to Research (EDF 2910) 1-3 credits**

This course provides students an introduction to research in a variety of disciplines. It is inclusive of multiple disciplines and methodologies, as opposed to a comprehensive survey, and covers material that is both common to research in all disciplines and specific to the students' research interests. Over the course of the semester, students not only begin to build basic research knowledge and skills common to all disciplines, but they also begin to hone their own research interests.

### **Multidisciplinary Research Methods 1 (EDF 2911) 1 credit**

This course allows students to build common research skills and receive guidance in finding a faculty research mentor. It is inclusive of multiple disciplines and methodologies, as opposed to a comprehensive survey, and covers material that is both common to research in all disciplines and specific to the student's research interests. Over the course of the semester, students begin to build basic

research knowledge and skills common to all disciplines. They will also begin to hone their own research interests.

### **Educational Measurement and Evaluation (EDF 3430) 3 credits**

A basic course to train students/teachers to integrate classroom assessment into instructional planning to improve student learning. Along with basic terminology, students develop particular skills in writing instructional objectives, developing test items of various types, constructing rating scales and understanding the interpretation of standardized tests .

### **RI: Multidisciplinary Research Methods 2 (EDF 3912) 1-3 credits**

This course supports students who already have a faculty research mentor as they navigate the undergraduate research process. It is inclusive of multiple disciplines and methodologies, as opposed to a comprehensive survey. Additionally, it covers material that is both common to research in all disciplines and specific to the students' research interests. As a part of this course, students have the opportunity to apply for research grants to fund their own research study. This is a research-intensive (RI) course.

### **RI: Multidisciplinary Research Methods 3 (EDF 3913) 1 credit**

This course supports students who have a faculty research mentor as they navigate the undergraduate research process. This course is inclusive of multiple disciplines and methodologies, as opposed to a comprehensive survey and covers material that is both common to research in all disciplines and specific to the student's research interests. Students learn how to find presentation/publication opportunities and develop their own project into a research presentation for the FAU Undergraduate Research Symposium. This is a research-intensive (RI) course.

### **Exploring Multidisciplinary Research (EDF 4911) 3 credits**

This course guides students through an exploration of the world of academic and applied research, covering concepts that are both common to research in all disciplines and specific to the students' individual research interests. Over the course of the semester, students identify and connect the unifying principles of research across disciplines, gain content knowledge in their areas of interest, experience firsthand the benefits and challenges of conducting a research study from beginning to end and become equipped to make an informed decision on how to incorporate research into their academic and professional paths.

### **Special Topics (EDF 4932) 1-3 credits**

This course offers an advanced study of special topics in educational leadership and research methodology.

### **Introduction to Leadership (LDR 2010) 1-2 credits**

Exposes students to the basic foundation of leadership and its application to college experiences in student leadership roles. Students engage in activities and projects that increase self awareness through the exploration of values, beliefs, culture and identity.

### **Contemporary Issues in Leadership (LDR 3115) 3 credits**

This course offers students interested in the dynamics of contemporary leadership the opportunity to explore relevant leadership trends and examine contemporary leadership theories and schools of thought using articles, film/documentaries, group learning/projects and experiential activities as the learning medium.

### **Leadership in the Fraternal Movement (LDR 3214) 3 credits**

Designed for members of the FAU Fraternity and Sorority Community. Through discussion, group process, experiential learning and application, students learn best practices for building and leading their fraternity or sorority from both a corporate and fraternal perspective. Further, the course positions students to develop and define their leadership through a values-based, ethical leadership lens.

### **Leadership and Social Change (LDR 3216) 3 credits**

Explores the role of leadership in movements of social change. Grand feats to small initiatives and even failed attempts are analyzed in order to consider the common practices of those who seek to improve society.

### **Theories of Leadership (LDR 4104) 3 credits**

This course provides learners with a review of major leadership theories designed to incorporate research findings, practice, skill-building and direct application to real-work scenarios. Specifically, this course covers a variety of topics impacting today's student, public leaders and private-section leaders as a foundation for learning, including power and ethics, diversity, teamwork, leadership development, politics, coaching and mentoring, motivation, creativity, conflict and communication.

### **Ethics and Power in Leadership (LDR 4204) 3 credits**

This course reviews the arguments for ethics in leadership as proposed contemporary leadership theories. It also examines theories of power and authority and seeks answers to the apparent dilemmas through applied moral theory and psychology.

### **Introduction to Field Leadership (LDR 4250) 3 credits**

This course is an introduction to field leadership delivered in an experiential education format. Content includes field leadership theories, program management and design and basic technical skills. The course is a mix of classroom and in-field experiences.

### **Media Literacy and Leadership (LDR 4276) 3 credits**

This course provides an introduction to leadership and media literacy and teaches the skills needed to examine many genres of media, including news, the Internet and more. The class focuses on the ethical principles of leadership via journalism and examines convergence, media ownership and the role of the “citizen journalist.” Through analysis of current leadership styles, research, deconstructing media and guest lectures, the course focuses on the importance of leadership, media literacy and learning how to use media to become active citizens and empowered leaders.

### **Facilitation and Group Development (LDR 4366) 3 credits**

Provides theoretical and experiential understanding of the use of group development activities for facilitating individual and group learning.

### **Capstone Seminar on Leadership (LDR 4951) 3 credits**

The goal of this course is to assist students in the integration of their academic study of leadership and their leadership experiences in preparation for their roles as members of the contemporary work force. Students analyze and synthesize the concept of leadership using cultural, ethical, sociological and historical perspectives.

## **Educational Leadership and Research Methodology Graduate Courses**

### **Leadership Foundation**

#### **Leadership 1: Adult Learning and Assessment (ADE 6381) 3 credits**

*Prerequisite: Graduate standing*

This foundational course focuses on the continuous learning that is essential for all individuals in an effective, dynamic educational unit or organization. It emphasizes analysis of oneself and of organizations and groups as learners and provides an opportunity to explore concepts, processes, and barriers in adult learning.

#### **Leadership 2: Theories and Assessment (EDS 6100) 3 credits**

*Prerequisite: Graduate standing*

The study of leadership theories, characteristics, behaviors, and use of instruments that will provide indicators of leadership style with emphasis on the development of skills and abilities essential for effective leadership for different group situations, and applying knowledge and skills in context of a workplace environment.

#### **Leadership 3: Administrative Processes (EDA 6103) 3 credits**

*Prerequisite: Graduate standing*

Explores processes necessary for leadership. Allows practitioners to develop the decision-making, problem-solving, communications, motivation, and conflict management skills for team building, consensus building, and group leadership.

### **Leadership 5: Reframing Educational Organizations (EDA 7106) 3 credits**

*Prerequisite: Graduate standing*

This course focuses on the structural, human resource, political, and symbolic dynamics of organizational life and the skills necessary to develop a learning organization. Provides understanding of: (1) organizational models, (2) use of organizational structures and behavior, and (3) change models and processes.

### **Educational Leadership Foundations (EDA 7196) 3 credits**

*Prerequisite: Permission of instructor*

This course examines the major philosophies of education and contemporary education sociology and education psychology theories that are foundational to educational leadership. Knowledge of these philosophies and theories of applied disciplines in education inform deeper understanding of current issues and problems facing educational leaders (aims of education, methods of education, teaching and learning, the role of educators and educational leaders) and educational leadership policy and practice. Course content includes: the relationship between philosophy and education and the major schools of philosophy; the relationship between sociology and education; the relationship between psychology and education; and the history of how these three disciplines have changed and influenced educational leadership.

### **Advanced Research Seminar in Educational Leadership for School Leaders (EDA 7918) 3 credits**

*Prerequisite: For doctoral candidates or permission of instructor*

This course is limited to Ph.D. students who have reached candidacy. This is an advanced research course that offers supervised research and instruction on dissertation proposal development and scholarly writing. It may be taken more than once and can be counted towards the 20 required dissertation credits or substituted for EDA 7980. *Grading: S/U*

### **Leadership 6: Seminar in Leadership (EDA 7931) 3 credits**

*Prerequisite: Graduate standing*

Focuses on mind-set and process skills used to lead organizations. Provides practitioners with skills to (1) envision the future, (2) develop coherence, (3) build organizational capacity, and (4) continuously improve their organization.

### **Professional Knowledge School Leaders (K-12)**

### **School Improvement (EDA 6062) 3 credits**

This course examines current issues in school reform and effective strategies for change. It develops an understanding of the role of school leaders in improving school programs and performance. The major focus is placed on school organization, curriculum, and assessment, with the aim of establishing a process of continuous school improvement.

### **Leadership for Social Justice (EDA 6191) 3 credits**

Course provides school leadership learning needed for advocating for student voice through awareness and action. Centered on social, political and economic injustices that should be addressed within schools and their populations, it promotes an inclusive environment that is equitable and culturally relevant for schools' students, teachers, staff, parents and communities.

### **School Operations (EDA 6207) 3 credits**

Course focuses on developing and analyzing school organizational systems for effective and continuous improvement. The course covers how the systems are interconnected to support student learning, understanding the impact of other systems, developing systems for communications with school stakeholders and community, and developing a comprehensive plan for improving their school's systems.

### **Law and Policy (EDA 6232) 3 credits**

This course focuses on the practical aspects and applications of constitutional, statutory and case law relating to education, with particular emphasis on Florida and the law and policy implications and processes related to school leadership.

### **Systems and Community (EDA 6300) 3 credits**

This course covers the philosophy, principles, practices, agencies and organizations involved in or influencing school community programs and initiatives, including collaborative efforts to provide for the educational needs of a multicultural community.

### **Education and Philanthropy (EDA 6375) 3 credits**

The study of the integral role that philanthropy and fundraising play in sustaining educational institutions. Practical and theoretical foundations and emerging trends are also covered.

### **Clinical Evaluation (EDA 6507) 3 credits**

This course focuses on developmental skills for instructional coaches and mentors in formative observation, clinical supervision, feedback skills and professional development planning for increased instructional effectiveness with K-12 teacher preparation students.

### **Evaluation and Leadership Theory for Educational Leaders (EDA 6508) 3 credits**

This course studies leadership theories, characteristics, behaviors and the use of instruments that provide indicators of leadership styles, especially those most applicable to teacher leadership. Students apply knowledge and skills with specific emphasis on impacting K-12 students' learning and achievement in the school setting.

### **Internship 1: Fall (EDA 6945) 3 credits**

One of three internship courses, this is also a corequisite requirement for all school leader educational leadership programs leading to level 1 certification. A stand-alone course, it requires six on-campus seminars and 150 hours of logged tasks, during which interns will be involved on the continuum of observing, participating and leading.

### **Internship 2: Spring (EDA 6946) 3 credits**

One of three internship courses, this is also a corequisite requirement for all school leader educational leadership programs leading to level 1 certification. A stand-alone course, it requires six on-campus seminars and 150 hours of logged tasks, during which interns will be involved on the continuum of observing, participating and leading.

### **Internship 3: Summer (EDA 6947) 3 credits**

This course is one of three internship courses that are a corequisite requirement for all school leader educational leadership programs leading to Level 1 certification. A stand-alone course, it requires six on-campus seminars and 150 hours of logged tasks during which interns will be involved on the continuum of observing, participating and leading.

### **The Context of Educational Administration (EDA 7061 ) 3 credits**

*Prerequisite: Educational Leadership majors only*

The purpose of the course is to prepare school leaders to understand the role of administrators in differing organizational, governance, and policy contexts in which leadership is practiced. The course centers on the belief that administrators must understand the context in which they work prior to attempts at leadership.

### **Ethics and Policy Alternatives (EDA 7069) 3 credits**

*Prerequisite: Educational Leadership majors only*

This course provides a reflective (and reflexive) overview of the educational policy-making process at local, state, and national levels, and of the ethical principles that can influence such policy-making.

### **Seminar in School Law (EDA 7235) 3 credits**

*Prerequisites: Educational Leadership majors only and EDA 6232*

A seminar exploring, through the problem method, various legal aspects related to the administration and organization of American education. Individuals will study and research selected topics in depth.

### **Seminar in School Administration (EDA 7930) 3 credits**

*Prerequisite: Educational Leadership majors only*

Discussion of problems in school administration, patterns of curriculum organization, and research projects. Open only to Educational Leadership and Research Methodology Ed.S. and Ed.D. students who have completed the core courses.

### **Instructional Leadership 1: Role of the Leader in Continuous School Improvement (EDS 6050) 3 credits**

*Prerequisite: Educational Leadership majors only*

The focus of this course is on the role of the instructional leader in continuous whole school improvement to meet state and national requirements; to develop objectives for implementing, assessing, and revising a school improvement plan; and to monitor its ongoing progress and the attainment of its goals.

### **Instructional Leadership 2: Role of the Leader in Improvement of Student Learning (EDS 6052) 3 credits**

The focus of this course is on the instructional leader's role in improvement of student learning and meeting students' needs through professional development growth plans, supervision, and evaluation of teachers to improve classroom performance and student learning.

### **Legal Foundations of Special Education (EEX 7520) 3 credits**

[\(See Special Education courses, this section\)](#)

## **Professional Knowledge Adult and Community Educational Leaders**

### **Adult and Community Education in a Changing Society (ADE 5185) 3 credits**

*Prerequisite: Educational Leadership majors only*

An overview of adult and community education: history, philosophical-based scope, processes, and trends. Special emphasis is placed on the role of lifelong learning in a rapidly changing society.

### **Program and Curriculum Development for Adults (ADE 6184) 3 credits**

*Prerequisite: Educational Leadership majors only*

Philosophy, principles, and practices in designing, implementing, and evaluating programs and curricula for adults in a wide variety of settings.

### **Aging Consideration and Programs (ADE 6194) 3 credits**

*Prerequisite: Educational Leadership majors only*

An examination of the issues, concerns, and best practice in the provision of continuing educational opportunities for the older adult.

### **Organization and Administration of Adult and Community Education (ADE 6265) 3 credits**

*Prerequisite: Educational Leadership majors only*

A comprehensive overview of the principles and processes essential for effective management of adult or community education programs. Addresses the state competencies for adult education administrators.

### **Leading Adult and Professional Learning in Schools (ADE 6268) 3 credits**

This course focuses on the continuous professional learning that is essential for all adults in school settings. It emphasizes self-directed learning and self-analysis while analyzing school and instructional teams through the lens of andragogy and constructive developmental theories.

### **Grant Writing and Program Management for Adult and Community Nonprofit Organizations (ADE 6285) 3 credits**

*Prerequisites: ADE 6381 or permission of instructor; graduate standing*

An opportunity to explore the historical and philosophical approaches to grant writing and resource development in adult and community education, nonprofit organizations or other community-serving organizations, as well as the trends that are evolving such as the use of technology, sustainable practices, data management and analysis.

### **Workplace Learning and Development (ADE 6387) 3 credits**

*Prerequisite: Graduate standing*

Course introduces learners to theoretical foundations and practical applications of workplace learning and development in educational, governmental, community, and private organizations. Formal learning and training, informal and self-directed learning, and career development will be considered from the individual, group, and organizational levels from a multidisciplinary perspective.

### **Assessment, Planning and Sustainability with Geospatial Technologies (ADE 6774) 3 credits**

*Prerequisite: Graduate standing*

An overview of evolving geospatial technologies, the impact of developments in geospatial technology on the individual and society and questions regarding how economics, politics, culture and values affect technological development.

### **Sustainability Leadership for ACE Entrepreneurs and Change Agents (ADE 6695) 3 credits**

*Prerequisites: ADE 6381 or permission of instructor; graduate standing*

This course offers a comprehensive overview of the field of sustainability leadership and the best practices of starting and growing successful triple-bottom line (TBL) for-profit/nonprofit ventures as the sustainability leaders serve more people and deliver more of their nonprofit services to wider audiences.

### **Seminar in Adult/Community Education (ADE 6930) 1-5 credits**

*Prerequisites: Permission of instructor and two courses in adult education*

Selected topics in adult education. Students may select any one or a combination of topics for a maximum of 5 credits.

### **Advanced Seminar in Adult/Community Education (ADE 7935) 3 credits**

*Prerequisite: Graduate standing*

Course provides an opportunity for learners to critically and reflectively examine important topic areas, questions, issues or trends in the field, considering diverse perspectives and identifying productive areas of research. Forming a learning community, the group will examine basic source data and then will develop a major project (individual, group or both) related to the topic.

## **Professional Knowledge Higher Education Leaders**

### **Student Development Theory (EDH 6040) 3 credits**

*Prerequisite: Graduate standing*

Focuses on the study of student development theories in higher-education settings. Meaningful connections between theory, practice and research will be emphasized in the context of colleges, universities and proprietary institutions.

### **Student Affairs Leadership (EDH 6045) 3 credits**

*Prerequisite: Educational Leadership majors only*

Course examines student affairs programs in public and private colleges and universities. Topics include services and programs, issues and ethics, and historical and philosophical foundations.

### **Introduction to Higher Education (EDH 6051) 3 credits**

*Prerequisite: Graduate standing*

Course examines key aspects of higher education in the U.S. within four frameworks: academic affairs, student services, administration, and governance/policy issues. Comparative perspectives are also provided. Students become familiar with leading professional resources and associations.

### **International Comparative Higher Education (EDH 6058) 3 credits**

*Prerequisite: Open to post-baccalaureate, master's and doctoral students only*

Course provides a broad survey of international comparative higher education, including a cross-cultural perspective on historical and contemporary issues related to the structure and governance of higher education systems in various world regions and individual countries.

### **History and Philosophy of Higher Education (EDH 6065) 3 credits**

*Prerequisite: Educational Leadership majors only*

A study of the evolution of western higher education and its philosophical basis. Primary emphasis is on the American college and university movements.

### **Social Justice in Higher Education (EDH 6085) 3 credits**

In this course, students explore issues surrounding various social identities, examine epistemologies that attempt to explain the role these identities play in understanding culture in higher education settings and critically analyze previous and existing higher education policy and practice to better understand the influence of culture, identity and social justice in higher education.

### **Community College Curriculum (EDH 6215) 3 credits**

*Prerequisite: Graduate standing*

An examination of the background, development, function, and goals of the curriculum of the community college.

### **Improvement of Instruction in Colleges (EDH 6305) 3 credits**

*Prerequisite: Graduate standing*

A study in purposes, trends, outcomes, and special programs in the curriculum. It considers techniques for identifying, improving, and rewarding good college teaching. Test construction, measurement, and learning theories are studied.

### **Contemporary Issues in Student Affairs (EDH 6367) 3 credits**

*Prerequisite: Baccalaureate degree*

Designed to acquaint students with an overview of the contemporary, critical issues and challenges involved in the administration and management of student affairs. In addition to reading in the field, practical applications to current issues are discussed.

### **Organization and Administration of Higher Education (EDH 6635) 3 credits**

*Prerequisite: Educational Leadership majors only*

Purposes, organization, and administration of institutions of higher education in the U.S., both public and private, are studied.

### **Special Topics in Higher Education (EDH 6931) 3 credits**

*Prerequisite: Graduate standing in Higher Education*

Focuses on various aspects of higher education in public and private universities, colleges, state colleges and independent, proprietary, private religious and technical institutes.

### **Internship/Exchange (EDH 6941) 3-6 credits**

The course requires 75-150 hours of on-the-job experience and 50 hours of preparation. Supervision is provided by the field professional and the university supervisor. Requires advisor signature to enroll.

Grading: S/U

### **Legal Issues in Higher Education (EDH 7405) 3 credits**

*Prerequisite: Educational Leadership majors only*

This course explores, through the problem method, various legal issues related to American higher education and will enable the individual to study and research in-depth selected topics.

### **Higher Education Business and Finance (EDH 7505) 3 credits**

*Prerequisite: Educational Leadership majors only*

An introduction to concepts and practices of administering business and financial operation in colleges and universities.

### **Doctoral Special Topics in Higher Education (EDH 7932) 1-3 credits**

*Prerequisite: Permission of instructor*

This is a special topics course is intended for higher education leadership Ph.D. students. The title of the course and the topics vary and focus on higher education and research at the Ph.D. level.

### **Higher Education Doctoral Seminar (EDH 7935) 3 credits**

*Prerequisite: Higher Education doctoral students only*

Addresses an eclectic array of issues and challenges facing higher education leaders with an emphasis on connections among theories, practices and research.

### **Dissertation Seminar in Higher Education (EDH 7983) 3 credits**

*Prerequisite: Higher Education doctoral candidates only or permission of instructor*

This dissertation seminar is for Higher Education Leadership Ph.D. students who have reached candidacy. This dissertation seminar offers supervised research and instruction on dissertation proposal, data collection, research and writing. This seminar is designed to facilitate the process of conceptualization. Planning, implementing and defending a quality doctoral dissertation. This seminar may be taken more than once and can be counted towards the 20 required dissertation credits or

substitute EDA 7980. *Grading: S/U*

## **Experiential Component**

Students must have the approval of their advisor or course professor prior to enrolling in experiential courses. A record of the experiential activity must be filed in their department folder.

### **Directed Independent Study (EDA 6905) 1-3 credits**

Requires advisor signature to enroll.

### **Administrative Externship 1, 2, or 3 (EDA 6925) 3-6 credits**

Requires advisor signature to enroll. *Grading: S/U*

### **Principal-Internship (EDA 6942) 3 credits**

*Prerequisites: Leadership and Professional Knowledge courses, permission of instructor*

A capstone course that combines seminars using case study methods and reflective practice along with a 100-hour internship either at the student's home school site or other suitable placement.

### **Directed Independent Study (EDA 7905) 1-3 credits**

Requires advisor signature to enroll.

### **Internship (EDA 7940) 3 credits**

### **Field Project 1 (EDA 7943) 3-6 credits**

The field project is a small research project directly related to the student's work and/or interest in educational leadership. The project is to be planned by the student and advisor and may be completed over more than one semester. The field project can include participation in school plant surveys, accreditation visitation, curriculum studies, administrative analysis, and field research. Requires advisor signature to enroll. *Grading: S/U*

### **Field Project 2 (EDA 7944) 3-6 credits**

This course requires 75 hours of on-the-job experience and 25 hours of preparation. Supervision is provided by the field professional and the university supervisor. Requires advisor signature to enroll. *Grading: S/U*

### **Advanced Leadership Externship 1, 2 or 3 (EDA 7948) 3-6 credits**

*Prerequisites: STA 7114, EDA 6415, EDA 7106, graduate standing and permission of instructor*

Students apply leadership theory to practice inquiry methods to study a current, complex problem of practice.

## **Research and Technology Foundation**

### **Special Topics (EDA 5931) 1-5 credits**

Topics not covered by other courses. Topics will vary.

### **Introduction to Qualitative Inquiry (EDA 6415) 3 credits**

*Prerequisite: Graduate standing*

Introduction to qualitative research design, data collection techniques, fieldwork relations, and data analysis.

### **Educational Research (EDA 6931) 3 credits**

A broad-based consumer-oriented research methods course for Educational Specialist students in Educational Leadership and Research Methodology.

### **Master's Thesis (EDA 6971) 3 credits**

Requires advisor signature to enroll.

### **Advanced Qualitative Inquiry (EDA 7416) 3 credits**

*Prerequisite: EDA 6415*

Qualitative research design, theory building, data analysis, and how to write up qualitative research will be studied. Students will design and implement an individually defined study. Requires professor signature to enroll.

### **Introduction to Modes of Inquiry for Educational Leadership (EDA 7421) 3 credits**

*Prerequisite: Permission of instructor*

This course prepares graduate students to think like researchers and to be able to critique and reframe studies using various modes of inquiry and critical lenses. Students explore how the senses, intuition, along with different genres, such as the arts, are modes of inquiry. This course builds upon a foundational knowledge of quantitative and qualitative research methodology. Students have an opportunity to engage with their own research topic through multiple lenses.

### **Advanced Research (Literature Review) (EDA 7912) 3 credits**

*Prerequisite: Qualifying Exams*

An advanced research methods course with emphasis on review of literature for the dissertation proposal. Requires advisor signature to enroll.

### **Seminar: Apprenticeship in Educational Leadership Research (EDA 7935C) 3 credits**

*Prerequisite: Permission of instructor*

Applying concepts to practice, doctoral students develop their individual research agendas in the context of a small learning community of scholars. The course builds upon students' foundation in qualitative and quantitative research methodology together with the educational leadership canon. The seminar is organized to reflect the work and life of a scholar.

### **Seminar in Educational Leadership Research: Contemporary Problems of Practice (EDA 7936C)**

#### **3 credits**

*Prerequisite: Permission of instructor*

In this course, students examine contemporary problems of practice in educational leadership. They explore how problems can be addressed through the research process and with multiple lenses. The seminar provides opportunities for students to apply new skills and knowledge to their own research projects.

### **Seminar: Multiple Frameworks of Educational Leadership Research (EDA 7937C) 3 credits**

*Prerequisite: Permission of instructor*

In this course, students examine critical issues in educational leadership research. Applying concepts of quantitative and/or qualitative research, doctoral students develop their individual research agendas. They explore how critical problems can be addressed through the research process and with multiple lenses. The course builds upon students' foundation in qualitative and quantitative research methodology together with the educational leadership corpus of knowledge. The seminar provides opportunities for students to apply new skills and knowledge to their own research projects.

### **Seminar: Demystifying Complex Research Questions (EDA 7938C) 3 credits**

*Prerequisite: Permission of instructor*

Students address research questions as an integral part of the research process. Doctoral students develop their individual research agendas in the context of a small learning community of scholars and examine problems of practice in educational leadership. The course builds upon students' foundation in qualitative and quantitative inquiry and provides opportunities for students to apply new skills and knowledge to their own research projects.

### **Seminar in Theory, Policy and Practice: Implications for Research in Educational Leadership (EDA 7939C) 3 credits**

*Prerequisite: Permission of instructor*

Applying concepts to practice, doctoral students develop their individual research projects and consider strategies to disseminate new research. Students are guided to write up research findings for scholarly Tier 1 journals, books and practitioner journals. Further, students consider the implications of research findings to their research project, including relevance and policy implications.

### **Dissertation (EDA 7980) 1-15 credits**

*Prerequisite: Permission of instructor*

A minimum of 20 dissertation credits is required. Students must have been admitted to candidacy and have signature of advisor to enroll. *Grading: S/U*

### **Measurement (EDF 6432) 3 credits**

Basic concepts in measurement and statistics and their application to research and the evaluation of classroom learning. Covers important attributes of instruments used in educational situations, with particular emphasis on the selection and development of instruments for the collection of research data.

### **Educational Research (EDF 6481) 3 credits**

*Prerequisite or corequisite: STA 6113*

Provides the student with the skills necessary to locate, interpret, and analyze educational research. Emphasis is placed on the concepts involved in the critical consumption of educational research.

### **Policy and Politics (EDF 6786) 3 credits**

*Prerequisite: Educational Leadership majors only*

This course facilitates school leadership learning concerning the values, governance, legal and political systems that impact the educational process and learning environment. Important elements include professional, ethical and moral leadership; governance structures, school law and policy, advocacy and the interconnection of inclusive systems that impact the decision making that happens in schools.

### **Educational Research: Presentation and Critique (EDF 6931) 2 credits**

*Prerequisite: EDF 6940*

Formal presentation and evaluation of student's completed investigation of a problem in educational research.

### **Educational Research: Implementation and Evaluation (EDF 6940) 3 credits**

*Prerequisites: EDF 6481 and permission of instructor*

Further study of educational research and design. Includes seminars on selected research and student placement in the educational field to implement the student's research proposal.

### **Advanced Educational Research (EDF 7482) 3 credits**

*Prerequisites: EDF 6481, permission of major professor, and approved dissertation topic*

An in-depth analysis of descriptive and experimental research designs that are appropriate for specific educational problems. An original research report will be produced by the student.

### **Digital Literacy for Global Educators (EME 6426) 3 credits**

(See Curriculum and Instruction courses, this section)

### **Educational Statistics (STA 6113) 3 credits**

*Prerequisite: Graduate standing*

Provides the student with a broad knowledge of statistical concepts and techniques necessary for critical consumption of educational research.

### **Advanced Statistics (STA 7114) 3 credits**

*Prerequisite: STA 6113*

Advanced univariate and multivariate statistical techniques used in educational research are covered. Students are expected to gain knowledge and experience in the use of packaged statistical software in data analysis.

## SPECIAL EDUCATION

**Undergraduate Courses** /[link to graduate courses](#)

[Link to Academy for Community Inclusion Courses](#)

### **Responsible Conduct of Research (EDG 4361) 2 credits**

This course offers participants across disciplines the opportunity to develop awareness and competence in promoting ethics, integrity and the responsible conduct of research (RCR). Students gain knowledge and skills necessary for academic, industrial and institutional researchers to ensure federal compliance with requirements outlined by the U.S. Department of Health and Human Services, Office of Research Integrity. *Grading: S/U*

### **Building Classroom Management and Discipline (EDG 4419) 3 credits**

Course provides an overview of strategies and techniques for organizing and managing classroom settings. Strategies and techniques include arrangements for managing students, materials, time, and space. The course is appropriate for both elementary- and secondary-level teachers.

### **Disability and Society (EEX 2091) 3 credits**

This is an introductory course providing life-span perspectives on disability (applicable to both non-education and education majors), analyzing personal, historical, political, economic, and societal perspectives on individuals with disabilities in society. The course provides a general introduction to disability, using a social science framework understood as sociology, geography, psychology,

anthropology, economics, and political science, and their relationships with history and how they work together to help understand the world. This is a General Education course.

**RI: Disability and Society (EEX 2091) 3 credits**

This is an introductory course providing life-span perspectives on disability (applicable to both non-education and education majors), analyzing personal, historical, political, economic, and societal perspectives on individuals with disabilities in society. The course provides a general introduction to disability, using a social science framework understood as sociology, geography, psychology, anthropology, economics, and political science, and their relationships with history and how they work together to help understand the world. This is a General Education and research-intensive (RI) course.

**Typical/Atypical Child Development, Birth to Age Eight (EEX 3201) 3 credits**

In-depth examination of the theories of child development, physical/brain development, social/emotional, cognitive, and creative development of children birth to age eight who are developing typically as well as those with delays and disabilities.

**Assessment of All Young Children (EEX 3226) 3 credits**

*Prerequisites: EDF 3430, EEX 3201 with minimum grades of "C"; B.E.C.E. majors only*

Focuses on assessment of all young children. Includes identification, administration and interpretation of assessment instruments and processes for intellectual, social, physical, emotional, educational and language evaluation.

**Positive Behavioral Supports in Inclusive Early Childhood Settings (EEX 3603) 3 credits**

*Prerequisites: EEX 3226 with minimum grade of "C"; B.E.C.E. majors only*

Focuses on promoting positive behavior and reducing challenging behavior in children with and without disabilities from infancy to grade 3. Methods and materials using research-based, developmentally appropriate practices are covered. Eight hours of field observation are required.

**Building Family, Community and School Partnerships (EEX 3754) 2 credits**

*Prerequisite: B.E.C.E. majors only*

Focuses on the skills necessary to create positive working relationships with families. Different approaches, methods and materials using research-based developmentally appropriate practices are covered.

**Overview of Programs for Students with Exceptionalities (EEX 4050) 3 credits**

*Prerequisite or corequisite: EEX 2091 or equivalent*

An overview course examining issues in providing educational services to individuals with mild/moderate mental retardation, specific learning disabilities, and/or emotional handicaps. Emphasis

will be placed on definitions and concepts, theories of learning, classification, prevalence, etiology, behavioral characteristics, prevention and intervention strategies, multicultural issues, and family involvement. Service delivery systems will be reviewed and current trends discussed. Four lecture hours per week plus 15 clock hours of field-based observation are required.

### **Instructional Practices for Students with Mild Disabilities (EEX 4066) 3 credits**

*Prerequisites: All required Education courses, programmed major; Corequisite: EEX 4843*

A course covering curriculum methods and materials (academic, behavioral, and life skills) used in programs for individuals with mild learning and behavioral disabilities. Topics include instructional models, curricula development for academic, social, and vocational skills, and accommodations.

### **Inclusive Education for General Educators (EEX 4070) 3 credits**

This course offers education majors the opportunity to understand their roles and responsibilities in teaching students with special needs. Students will explore communication skills necessary for effective collaboration among students, parents, and other school professionals. Three lecture hours per week plus 15 clock hours in field-based observation are required.

### **Language and Speech Disorders (EEX 4101) 3 credits**

*Prerequisite or corequisite: EEX 2091 or equivalent*

Language and speech disorders, as well as dialect and language differences, will be studied in relation to physical, mental, and social characteristics of individuals with language and/or speech disorders/differences. The impact of these characteristics on academic and functional skill acquisition is discussed in relationship to implementation strategies. Three lecture hours per week plus 20 clock hours in field-based observation with elementary and secondary students are required.

### **Language Development and Intervention in Young Children (EEX 4112) 3 credits**

*Prerequisites: EEX 3226 and B.E.C.E. majors only*

Topics include oral language development, strategies to facilitate development, and appropriate intervention strategies for young children birth to age eight with and without language delays or disorders. Field experience required.

### **Assessment of Exceptional Individuals (EEX 4221) 3 credits**

*Prerequisites: EEX 2091 or equivalent, EEX 4050, EEX 4101; ESE majors only*

An introductory course in the assessment of exceptional students designed to present guidelines for assessment procedures. Emphasis is placed upon the utilization of test results, informal evaluation, and classroom assessment.

### **Reading Instruction in Special Education (EEX 4250) 3 credits**

*Prerequisites: EEX 2091 or equivalent, EEX 4050, EEX 4101; ESE majors only*

Course focuses on acquisition of knowledge and skills associated with instructing students who experience mild to moderate problems in learning how to become fluent, independent readers. Emphasis on the areas of phonological awareness, word identification, vocabulary, fluency, and reading comprehension. For ESE students in grades K-12.

### **Instructional Practices for Students with Moderate/Severe Disabilities (EEX 4472) 3 credits**

*Prerequisites: EEX 2091 or equivalent, EEX 4050, EEX 4101, EEX 4221; ESE majors only*

*Corequisite: EEX 4601, EEX 4842*

Course covers basic instructional practices for students with moderate to severe disabilities. Topics include identification of the population, service delivery, the roles and responsibilities of families and professionals, ethical considerations for curriculum development, cultural and linguistic considerations, and best instructional practices in inclusive and non-inclusive settings.

### **Behavior Change Strategies (EEX 4601) 3 credits**

*Prerequisites: EEX 4050, EEX 4101, EEX 4221, programmed major*

This course focuses on applied behavior analysis procedures as used in instructional settings. Emphasis is on designing programs for academic, behavior, and social changes.

### **Classroom Management (EEX 4604) 3 credits**

*Prerequisites: All required Education courses, programmed major; Corequisite: EEX 4843*

An overview of strategies and techniques for organizing and managing classroom settings. Strategies and techniques include classroom arrangements for managing students, materials, time, and space. Emphasis is on working with large groups and multiple groups of students with diverse learning, behavioral, linguistic, and cultural characteristics.

### **Classroom Management for Inclusive Elementary Schools (EEX 4616) 3 credits**

*Corequisite: EDG 3324*

This course provides an overview of strategies and techniques for elementary school teachers learning to organize and manage K-5 classroom settings. Emphasis is placed on working with large groups and multiple groups of students with diverse learning, behavioral, linguistic and cultural characteristics.

### **Collaboration with Professionals and Families (EEX 4751) 2 credits**

*Corequisite: EEX 4946*

Course covers strategies to collaborate with parents and family members of students with disabilities and with school and community personnel who work with these students and families.

### **Special Education Technology (EEX 4763) 3 credits**

Students use, design, and apply the principles of Universal Design for Learning for people with a range of disabilities in class and during field experiences. The course culminates in the development of a technology portfolio that includes teacher tools, assistive technology, curricular content adaptations, and alternatives for instructional delivery and assessment. Field activities are part of this course.

**Practicum 1: Students with Moderate/Severe Disabilities (EEX 4842) 1-3 credits**

*Prerequisites: Programmed major and the following courses with a minimum grade of "C:" EEX 2091, EEX 4050, EEX 4101, EEX 4250, EEX 4221*

*Corequisites: EEX 4472, EEX 4601*

In this in-depth supervised field experience, the student spends a minimum of 6-9 hours per week over a 3-day period in an educational setting. *Grading: S/U*

**Professional Development Practicum in Exceptional Student Education (EEX 4840) 3 credits**

*Prerequisite: Permission of department chair*

A field-based experience in which a professional development plan based upon the needs of the individual student and containing objectives with observable, measurable desired outcomes is implemented. *Grading: S/U*

**Practicum 2: Students with Mild Disabilities (EEX 4843) 3 credits**

*Prerequisites: All required Education courses, programmed major; Corequisites: EEX 4066, 4604*

An in-depth supervised field experience. The student will spend a minimum of six-to-nine hours per week over a three-day period in an educational setting. *Grading: S/U*

**Directed Independent Study (EEX 4905) 3 credits**

**Developing Individual Education Programs (EEX 4932) 1 credit**

*Prerequisites: Programmed ESE major; all General Education courses and Student Teaching prerequisites*

*Corequisites: EEX 4946 and EEX 4751*

Addresses the development of Individual Education Programs (IEP) for students with disabilities who are served in the school system. The course is delivered in a three-day seminar prior to the beginning of Student Teaching with a follow-up session later in the semester.

**Honors Seminar in Exceptional Student Education (EEX 4934) 1-2 credits**

*Prerequisites: EEX 2091, 4050, 4101, 4250, 4221 with grades of "C" or better; Honors in ESE students only*

Guides students to integrate and apply knowledge that serves as the foundation for creating, implementing and evaluating interventions that improve the lives of persons with disabilities across

domains, including: employment, independent living, leisure/recreation and social relationships. This seminar is to be taken the first fall semester of the students' senior year in the ESE program.

### **Special Topics (EEX 4937) 1-3 credits**

Topics in Exceptional Student Education not covered by other courses. Topics will vary.

### **Student Teaching: Exceptional Student Education (EEX 4946) 4-9 credits**

*Prerequisites: All required Education courses, programmed major, permission of advisor*

Final field experience involving demonstration of competencies in assessment, strategic and tactical planning, instructional methods, curricula for academic, social, vocational skills development, and collaborative consultation. *Grading: S/U*

### **Out-of-Field Training Program**

(All courses are permission only)

### **Developing Teacher Internship (EEX 4861) 1 credit**

*Prerequisites: 4611, 4223, 4081, 4241, 4613*

*Corequisites: 4102, 4243, 4762, 4753*

A supervised field experience, including data-based instruction, classroom management, and assessment. Teachers are provided formative and summary evaluations throughout the semester. This course has a significant field experience requirement. This course is required to be taken for two consecutive semesters.

### **Academy for Community Inclusion Program**

### **Emergency Preparation (FFP 1801) 2 credits**

Course provides a fundamental understanding of strategies for preparing and planning for emergency situations. Increasing awareness and developing a personal plan for emergency response is central to the course.

### **Health, Fitness for Life (HSC 2100) 2 credits**

[\(See Exercise Science and Health Promotion courses in the College of Science\)](#)

### **Community Citizenship (ISS 1121) 2 credits**

*Prerequisite: SLS 1200 or permission of instructor*

This course focuses on concepts and approaches for teaching about citizenship and voting including both rights and responsibilities. It emphasizes the rationale for governance, the history of voting and the process of civic participation through voting.

### **Reading for Life (REA 1105) 2 credits**

*Prerequisite: SLS 1200 or permission of instructor*

In this class, students learn strategies to increase comprehension and vocabulary skills. Readings in the course are based on students' interests fostering the idea of reading beyond school.

### **College Experience (SLS 1102) 2 credits**

Exploration of the numerous opportunities, resources and services available to university students as well as skills to optimize the college experience.

### **Increasing Personal Effectiveness (SLS 1200) 2 credits**

*Prerequisite: ACI students only*

*Corequisites: SLS 1304 and SLS 1570*

This course reviews key strategies for personal growth, analyzes personal strengths and weaknesses, identifies personal goals and motivates the participant toward those goals.

### **Personal Development (SLS 1201) 2 credits**

*Prerequisite: SLS 1200 or permission of instructor*

This course is focused on the development of self-understanding, overcoming obstacles and communicating strengths and weaknesses.

### **Recreation and Leisure Skills (SLS 1224) 2 credits**

*Prerequisite: SLS 1200 or permission of instructor*

The course offers the fundamentals of choosing, identifying and registering for or planning for recreation activities. Students engage in recreational activities both on and off campus to fulfill the requirements of this course.

### **Residential Experience (SLS 1250) 2 credits**

*Prerequisite: SLS 1200 or permission of instructor*

This course provides a discussion of interpersonal relationships and the use of life skills such as proactive communication skills, active listening and response skills and conflict resolution techniques.

### **Social Skills (SLS 1251) 2 credits**

*Prerequisite: SLS 1200 or permission of instructor*

Course is designed to assist students in developing conversation skills, resolving interpersonal conflict and enhancing interpersonal effectiveness in a variety of settings.

### **Getting Around the Community (SLS 1266) 2 credits**

*Prerequisite: SLS 1200 or permission of instructor*

This course serves as a guide for students to be able to independently access the community through forms of public transportation as well as to review pedestrian and bike safety rules.

### **Diverse Communities (SLS 1281) 2 credits**

*Prerequisite: SLS 1200 or permission of instructor*

Course is designed to expand students' awareness of the skills necessary to effectively interact with diverse populations. Emphasizes attitudes and competencies that are important in their lives beyond college as well as their interactions with others.

### **Career Exploration (SLS 1304) 2 credits**

*Prerequisite: ACI students only*

*Corequisites: SLS 1200 and SLS 1570*

Structured for self-directed and individualized career exploration. Includes systematic review of career development and exploration with the use of assessment materials and computer-based career development programs such as YES, Self-Directed Searches and preferential inventories. Includes the information of an individual work portfolio.

### **Professional Career Development (SLS 1305) 2 credits**

*Prerequisite: SLS 1200 or permission of instructor*

Students develop a personal profile of skills, interests and values in the process of clarifying career goals. The course activities include exploring occupational options and responsibilities, developing a career path and making career-based decisions.

### **World of Work (SLS 1321) 2 credits**

This course is designed to assist the student with personal and professional development for employment with a concentration on developing a positive self-image, career expectations, learning job search techniques and résumé preparation.

### **Employability Skills (SLS 1350) 2 credits**

*Prerequisite: SLS 1200 or permission of instructor*

Students learn to identify methods to locate, apply for and keep a job.

### **Workplace Relationships (SLS 1354) 2 credits**

*Prerequisite: SLS 1200 or permission of instructor*

This course provides students the opportunity to study how to build appropriate interpersonal relationships with coworkers, supervisors and customers.

### **Business Technology for Community Living (SLS 1392) 2 credits**

*Prerequisite: SLS 1200 or permission of instructor*

Course introduces students to the technology utilized in the business world including résumé writing and editing, seeking information through the Internet, Microsoft Office skills and clerical skills.

### **Critical Thinking (SLS 1505) 2 credits**

Course provides problem-solving techniques and helps students learn how to apply critical thinking skills in their daily activities.

### **Learning with Technology 1 (SLS 1570) 2 credits**

*Prerequisite: ACI students only*

*Corequisites: SLS 1200 and SLS 1304*

An introductory course on today's technology basics to include cellphones, tablets and other types of common technology tools to help students become more skilled in their use in college and on the job. Students also learn skills and techniques in using productivity tools and applications.

### **Learning with Technology 2 (SLS 1571) 2 credits**

*Prerequisite: SLS 1200 or permission of instructor*

Students continue to develop technology skills that support their academic, social and employment activities. The central focus of the course is to develop skills using mobile technology, including cell phones and tablets, especially on the job.

### **Be Safe, Stay Safe (SLS 1601) 2 credits**

*Prerequisite: SLS 1200 or permission of instructor*

Students learn basic skills that will help them to be safe and stay safe in a variety of settings. Students learn how to identify and avoid common threats to personal safety.

### **Living with Roommates (SLS 1602) 2 credits**

*Prerequisite: SLS 1200 or permission of instructor*

This course discusses the differences in living situations and explores how to interpret human behavior and how to adjust, share and compromise in multiple residential settings.

### **Community Resources (SLS 1603) 2 credits**

*Prerequisite: SLS 1200 or permission of instructor*

An overview of how to access community resources that are available in the domains of employment, community access, independent living and recreation/leisure.

### **Personal Finance for Community Living ( SLS 1605 ) 2 credits**

*Prerequisite: SLS 1200 or permission of instructor*

This course teaches students the personal finance skills they need to succeed in adult life. Topics include, but are not limited to, determining financial goals, budgeting, banking and credit.

### **Service Learning (SLS 1940) 2 credits**

Students participate in a variety of service learning activities both on and off campus. Students have the opportunity to reinforce and refine skills including completing a job application, interviewing and personal presentation.

### **Emotional and Behavioral Control (SLS 2202) 2 credits**

*Prerequisite or Corequisite: SLS 2212*

Students develop self-regulation strategies that fall under executive functioning and effortful control to support their academic, social and employment activities. The central focus of this course is to develop skills using strategies that support students in inhibition, flexibility and conflict resolution, leading students to a successful college career, as well as success in the work environment. This course is open to all FAU students.

### **Self-Monitoring of Performance and Attention (SLS 2212) 2 credits**

Students develop and apply self-monitoring strategies that support their academic, social and employment activities. The central focus of this course is to develop skills using a variety of available resources that will help students monitor and control their attention and behavior, contributing to college and career success. This course is open to all FAU students.

### **Personal Well-Being (SLS 2222) 2 credits**

*Prerequisite: SLS 1200 or permission of instructor*

This course increases students' understanding of health information. Students learn how to connect with the health care system and become better consumers of health services.

### **Life Planning (SLS 2225) 2 credits**

*Prerequisite: ACI students only*

Students learn to understand the self and gain an opportunity to develop personal goals and steps needed to achieve those goals. Designed to provide opportunities to gain insights into motivators, values, strengths and personality types.

### **Planning and Prioritizing (SLS 2227) 2 credits**

*Prerequisites: SLS 2202 and SLS 2212 with minimum grades of "C"*

Students develop strategies that will support their academic, career-related and social/leisure activities. The central focus of this course is to develop and generalize skills using strategies that will support students in utilizing their working memory, while continuously updating information. This leads to

students becoming more automatic in their planning, preparing and prioritizing skills, putting major emphasis on time management in these three focal areas. This course is open to all FAU students.

### **Professional Portfolio (SLS 2340) 2 credits**

*Prerequisite: SLS 1200 or permission of instructor*

Course assists in developing a professional career portfolio that helps students document and showcase specific skill area achievements, competencies and career readiness for potential employers. Students demonstrate positive self-presentations to potential employers.

### **Effective Living (SLS 2604) 2 credits**

*Prerequisite: ACI students only*

Students learn how to handle stressful issues that can make life hard. Topics include the mind-body connection, stress management and making healthy life choices. Also the course provides students with a broad base of information to enhance personal decision making.

### **Career Seminar (SLS 2930) 2 credits**

*Prerequisite: SLS 1200 or permission of instructor*

In this course, students learn the necessary details and specifics of their chosen career field so as to enhance their skills and obtain employment. *Grading: S/U*

### **Career Internship (SLS 2943) 2 credits**

*Prerequisite: ACI students only*

An in-depth supervised field experience. Students spend an average of 10 hours per week over a 15-week semester in a job matching their interests. *Grading S/U*

## **Special Education Graduate Courses**

### **Responsible Conduct of Research (EDG 6364) 2 credits**

This course offers participants across disciplines the opportunity to develop awareness and competence in promoting ethics, integrity and the responsible conduct of research (RCR). Students gain knowledge and skills necessary for academic, industrial and institutional research to ensure federal compliance with requirements outlined by the U.S. Department of Health and Human Services, Office of Research Integrity. *Grading: S/U*

### **Managing Inclusive Classrooms: Effective Discipline, Curriculum, and Behavior Strategies (EDG 6408) 3 credits**

Course is designed to prepare educators to meet the needs of all students in diverse, inclusive classrooms. Topics include teaching strategies for academic and behavior problems, effective

discipline, behavioral support, and academic interventions.

### **Survey and Assessment in Early Childhood Education and Early Childhood Special Education (EEX 5015) 3 credits**

Historical, legal, educational, and theoretical rationales for the observation and assessment of young children (birth to age 8). Included will be intellectual, psychosocial, physical, emotional, and educational assessment instruments, procedures, and research implications.

### **Introduction to the Severely and Profoundly Handicapped (EEX 5016) 3 credits**

*Prerequisite: EEX 5051 or permission of instructor*

An overview of concerns related to the severely and profoundly handicapped, including definitions, characteristics, etiological concerns, assessment and programming models, supportive and related services, parent training, and counseling procedures.

### **Atypical Development in Early Childhood Exceptional Student Education (EEX 5017) 3 credits**

This course will provide students with knowledge of theories of typical and atypical child development, with emphasis on stages and sequences of skill acquisition and the impact of disabilities and biomedical risk factors on learning from birth to age 8.

### **Individuals with Disabilities (EEX 5051) 3 credits**

A survey of the various exceptionalities including etiology, incidence, assessment, characteristics, and philosophical and educational implications. Eight hours of observation in special education programs is required.

### **Methods in Early Childhood Special Education (EEX 5245) 3 credits**

*Prerequisite: EEX 5015 or EEX 5017*

A comprehensive course on instructional practices, curriculum and materials to facilitate early development and learning for young children with special needs and children at risk for developmental or learning problems. Course will include best practice in teaching and facilitating learning in natural environments and inclusive settings.

### **Applied Behavior Analysis (EEX 5612) 3 credits**

Theoretical perspectives and practical application of behavior analytic techniques including precision teaching are presented. Also includes classroom organization and consultation skills.

### **Enhancing Collaborations between School, Communities and Families of Students with Special Needs (EEX 5622) 3 credits**

*Prerequisite: EEX 2091 or EEX 5051 or equivalent*

This course emphasizes the collaborative skills for special educators to create and maintain optimal working relationships within families with students with special needs, schools, communities and related stakeholders. Various evidence-based practices or approaches are discussed and applied to various course requirements.

**Family and Community Resources in Early Childhood Special Education (EEX 5755) 3 credits**

Course will focus on family collaboration and support, with emphasis on family systems theory and interaction, community resources, case management and transition for infants, toddlers, and young children with special needs.

**Observation and Participation (EEX 5841) 1 credit**

*Corequisite: EEX 6247*

This course is designed to give graduate students the opportunity to learn how schools and classes provide services to students with disabilities. This course requires a minimum of 30 hours in a field placement. *Grading: S/U*

**Special Topics (EEX 5936) 1-3 credits**

**Seminar in Special Education (EEX 6027) 3 credits**

*Prerequisite: Permission of instructor*

This course should be taken toward the end of the degree program. Critical issues and trends in both categorical and non-categorical areas of special education will be examined through review of current research findings and legal mandates. Students are expected to participate in small group study of topics such as due process, service delivery, and teacher competency.

**Transition Planning for Individuals with Disabilities (EEX 6065) 3 credits**

A comprehensive course covering development and implementation of curricula (social, vocational, academic, and daily living) for individuals with disabilities.

**Nature and Characteristics of Autism Spectrum Disorders (EEX 6095) 3 credits**

Focuses on students with autism spectrum disorders (ASD), including examination of possible etiologies, diagnosis and classification, as well as appropriate curriculum, family involvement and community-referenced behavioral techniques. Requires 20 field experience hours.

**Language and Students with Disabilities (EEX 6121) 3 credits**

Attention is given to the language patterns of several types of exceptional students. Language models, educational strategies, and evaluative instruments are included. The impact of language disorders on academic and functional skills acquisition is highlighted. Eight hours of observation in special

education programs is required.

### **Diagnosis, Assessment and Instructional Decision Making for Students with Autism Spectrum Disorders (EEX 6210) 3 credits**

*Prerequisites: EBD 5246 or EEX 4070 or EEX 5051 or EEX 6095 or equivalent*

A course in the assessment of individuals with autism spectrum disorders (ASD) designed to examine assessment procedures. Emphasis is placed upon the utilization of assessment results for the purpose of instructional decision making.

### **Assessing Students with Disabilities (EEX 6225) 3 credits**

*Prerequisite: EEX 2091 or EEX 5051 or equivalent*

This course describes assessment methods (e.g., instruments, data, procedures) and how they are used and interpreted within multi-tier systems to support and inform instruction of students who are being served in special education and are from cultural, social and economically diverse backgrounds.

### **Program Design in Special Education (EEX 6247) 3 credits**

*Prerequisites: EEX 5612, 6225, 6602; Corequisite: EEX 5841*

A foundational course to help the learner comprehend how assessment, data analysis and instruction are linked in instructional design. This course is paired with a one-credit graduate teaching practicum.

### **Cognitive and Meta-Cognitive Learning Strategies (EEX 6259) 3 credits**

*Prerequisite: EEX 6247 or permission of instructor*

Designed to prepare teachers to develop and use cognitive and meta-cognitive learning strategies (i.e., direct instruction, scaffolding, reciprocal teaching, attribution retraining, and generalization) to promote independent, motivated users of strategies in both academic and social learning.

### **Mathematics Remediation and Interventions for Students with Disabilities (EEX 6290) 3 credits**

*Prerequisite: EEX 6480*

This course emphasizes the approaches to evaluate the gaps and misconceptions students with disabilities have in their understanding of mathematical concepts. Evidence-based instructional practices and interventions are modeled and practiced to address gaps in mathematical conceptual understanding and mastery.

### **Literacy Remediation and Interventions for Students with Disabilities (EEX 6292) 3 credits**

*Prerequisite: EEX 6480*

This fully online asynchronous course addresses principles and practices of evidence-based literacy interventions for students with learning disabilities and other learning needs. Students are able to identify and implement effective interventions in both reading and writing. Topics include theoretical

explanations of reading and writing difficulties, research-based approaches to intervention and procedures for evaluation. This course requires access to a student with a disability to complete the course project.

### **Intervention for Social, Communication, Academic and Functional Skills for Students with Autism Spectrum Disorders (EEX 6298) 3 credits**

*Prerequisites: EBD 5246 or EEX 4070 or EEX 5051 or EEX 6095 or equivalent*

A comprehensive course covering effective instructional practices for teaching social, communication, academic and functional skills to students with autism spectrum disorders (ASD).

### **Program Evaluation of Special Education Programs, Supports and Services (EEX 6320) 3 credits**

*Prerequisite: EEX 2091 or EEX 5051 or equivalent at advisor's discretion*

This course addresses program evaluation for systems, programs and services to enhance the lives of individuals with exceptionalities. The course emphasizes developing a methodology for continuous progress monitoring and improvement of the implementation of evidence-based practices and structures as a part of the process of program proposal development and evaluation.

### **Instructional Design in Special Education (EEX 6480) 3 credits**

*Prerequisite: EEX 2091 or EEX 5051 or equivalent*

This course addresses the methods for special educators to use data and knowledge of general and specialized curricula to improve special education programs for students with exceptionalities using evidence-based practices and effective teaching strategies.

### **Special Education Leadership, Policy and Ethics (EEX 6515) 3 credits**

*Prerequisite: EEX 2091 or EEX 5051 or equivalent at advisor's discretion*

Course is designed to present school professionals with an overview of the special education leadership and policy issues as well as to examine the skills and knowledge required to supervise and lead high quality programs for students with disabilities.

### **Behavior Change and Management Strategies (EEX 6602) 3 credits**

*Prerequisites: EEX 5612 with grade of "B" or higher; enrollment in Exceptional Student Education or a closely related major or permission of instructor*

Specialized behavior-management techniques for use with students who are emotionally handicapped. The course prepares teachers to apply behavior analytic techniques, manage crisis situations and functionally assess problem behaviors. Ethical issues will be considered as will counseling skills for teachers working with disturbed children in schools.

### **Behavior Analytic Teaching (EEX 6609) 3 credits**

*Prerequisite: EEX 5612 with grade of "B" or higher; enrollment in Exceptional Student Education or a closely related major or permission of instructor*

Course presents a behavior analytic framework for teaching and skill development. Course also addresses the scientific research base, rationale, and context for using behavioral teaching.

### **Behavior Assessment and Intervention Selection (EEX 6615) 3 credits**

*Prerequisites: EEX 5612 with grade of "B" or higher; enrollment in Exceptional Student Education or a closely related major or permission of instructor*

This course is an advanced study of behavior assessment, emphasizing functions of problem behavior in school, community, and home settings. Students learn steps and tactics of indirect, descriptive, and analogue assessment (emphasizing experimental assessment in natural settings). Students analyze and interpret data and select intervention strategies based on that analysis.

### **Behavior Analytic Supervision and Management (EEX 6626) 3 credits**

*Prerequisites: EEX 5612, EEX 6602, EEX 6609, EEX 6615, EEX 7618 or permission of instructor*

This course prepares student seeking BCBA certification and special education leadership skills to serve as supervisors for staff disseminating procedures rooted in ABA and related fields. Students learn how to supervise, train, mentor and coach special education professionals and other human service staff based on foundational principles and methods of ABA by working collaboratively with each other and providing constructive feedback. The emphasis is on fostering a work culture that is motivating for all staff while maximizing work performance and minimizing unethical and counter-productive behaviors. Scientific foundations of behavior analysis are integrated in shaping future supervisors as effective trainers, mentors and coaches. Ethical issues are also examined with careful consideration given to supervisory roles across environments and context.

### **Early Intervention Services (EEX 6707) 3 credits**

*Prerequisite: EEX 5015 or 5017, or permission of instructor*

Course provides knowledge and skills to facilitate family-centered early intervention services to infants and toddlers with disabilities or at risk of developing disabilities. These services promote collaboration with families and intervention in natural environments.

### **Ethics in Applied Behavior Analysis (EEX 6747) 3 credits**

*Prerequisites: EEX 5612, EEX 6602, EEX 6609, EEX 6615 and EEX 7618 all with a grade of "B" or higher; enrollment in Exceptional Student Education or closely related major or permission of instructor*

The objective of this course is to enhance understanding of ethical and legal issues behavior analysts face when working in the field. This course also aims to build capacity for correctly implementing

behavior analytic procedures and equipping students with the skills and knowledge needed to become ethically and professionally skilled behavior analysts.

### **Assistive Technology for Educators (EEX 6766) 3 credits**

Theory and application of assistive and adaptive technology and its impact on persons with disabilities and their special and general education teachers.

### **Graduate Teaching Practicum (EEX 6849) 1 credit**

*Prerequisites: EEX 5841, EEX 6247*

*Corequisite: EEX 6480*

This course is an advanced skills practicum for graduates to take before internship but after EEX 5841. In this course students teach students with disabilities and receive feedback on their instruction. This course requires a minimum of 60 hours in a field placement.

### **Graduate Internship in Special Education (EEX 6863) 3-6 credits**

*Prerequisite: Permission of instructor*

Supervised field experience providing students with an opportunity to demonstrate competencies in diagnosis and programming for students in special education. A 6-credit internship is required for students with no previous student teaching and is a full-time internship (i.e., five full days per week in a school). May be repeated for credit.

### **Directed Independent Study (EEX 6905) 1-3 credits**

*Prerequisite: Permission of instructor*

### **Field Project in Special Education (EEX 6942) 3 credits**

*Prerequisite: Permission of instructor*

The field project extends and integrate the student's knowledge and experience. The project involves the demonstration of competencies in selected skills determined by the student's knowledge and interests.

### **Master's Thesis (EEX 6971) 1-3 credits**

### **Contemporary Trends in Special Education (EEX 7025) 3 credits**

*Prerequisite: Admission to the Special Education doctoral program or permission of instructor*

This course provides emerging scholars in special education with opportunities to engage with critical trends in the field. Students are expected to attain expertise in these trends, reflect on them, value them and respond to questions about how these trends shape the future of special education services.

### **Historical, Theoretical and Legal Foundations of Special Education (EX 7026) 3 credits**

*Prerequisite: Admission to the Special Education doctoral program or permission of instructor*

This course examines the historical foundations, theoretical frameworks, legal policies and current trends in special education. This course is designed for students to explore the principles of special education and the impact legislation and past policies have on current special education identification and programming. Students also identify and recognize the basic learning and behavioral characteristics of students with disabilities, including those with learning disabilities, intellectual disabilities, autism and emotional behavioral disorders. The goal of the course is for students to acquire a background of the theoretical and empirical research as a foundation for future investigation.

### **Learning and Behavioral Characteristics of Individuals with Disabilities (EEX 7055) 3 credits**

*Prerequisite: Permission of instructor or admission to ESE Doctoral Program*

A general overview of the theories and characteristics related to all exceptionalities. Focuses on the behavioral and learning characteristics of each disability through the investigation of historical and classic research findings.

### **Doctoral Seminar: Exceptional Student Education (EEX 7341) 3 credits**

*Prerequisites: EEX 7055, EEX 7525, and permission of instructor*

An analysis and synthesis of the theoretical and research issues in special education. Allows student to investigate specialization area in depth, generate research proposal, and helps prepare for the comprehensive exam.

### **Legal Foundations of Special Education (EEX 7525) 3 credits**

*Prerequisite: Permission of instructor or admission to the ESE Doctoral Program*

Exploration of various legal aspects as related to administration, organization, and service delivery models of special education and a study of the ethical and legal principles supporting statutory and judicial activities in special education.

### **Grant Writing (EEX 7526) 3 credits**

*Prerequisite: Admission to a graduate program or permission of instructor*

Course examines the grant writing process involved in obtaining funds in local, national, foundation, corporate, and state funding environments. Students explore funding in the areas of exceptional student education service delivery, research, and personnel preparation. Emphasis on preparing doctoral-level students to develop and write research proposals.

### **Advanced Applied Behavior Analysis (EEX 7618) 3 credits**

*Prerequisite: EEX 5612, EEX 6615, and either EEX 6609 or EEX 6602 all with grades of "B" or higher; enrollment in Exceptional Student Education or a closely related major or permission of*

*instructor*

Course is an advanced study of applied behavior analysis that enlarges and expands on behavior analytic procedures. It emphasizes single-subject research and examines the theory and application of a variety of models of behavior analysis applied to education.

**Cultural and Linguistic Diversity: Issues and Implications in Special Education (EEX 7795) 3 credits**

*Prerequisites: ESE doctoral students or permission of instructor*

This course is designed to examine the critical cultural and linguistic diversity (CLD) issues specific to special education. Issues such as the influence of CLD on prereferral, assessment, placement of CLD students with disabilities, disproportionality, and effective pedagogy for CLD exceptional learners will be examined through a review of current literature.

**Teaching and Learning for Individuals with Disabilities (EEX 7866) 3 credits**

*Prerequisite: Admission to Special Education doctoral program or permission of instructor*

This course provides doctoral students with an in-depth study into teaching and learning for individuals with disabilities. Students are introduced to the teaching and learning process for individuals with disabilities through content (e.g., math, science), populations (i.e., 14 disability categories as described in the Individuals with Disabilities Education Act), learning theory and contexts where teaching and learning take place. The course also provides an overview of large-scale implementation of teaching and learning processes for individuals with disabilities within systems (e.g., classrooms, schools and school districts).

**Directed Independent Study (EEX 7906) 1-5 credits**

*Prerequisite: Permission of instructor*

**Pre-Candidacy Research in Special Education (EEX 7918) 1-6 credits**

*Prerequisite: Permission of instructor*

Pre-candidacy research is an individually designed research experience, meant to engage doctoral students in an active, field-based study. The course requires the design and implementation of a preliminary research project (e.g., pilot or small-scale study) directly related to the student's scholarly interest in ESE. The study is to be planned by the student and a faculty member and may be repeated for credit. An original research report will be produced by the student. *Grading: S/U*

**Seminar in Exceptional Student Education Leadership (EEX 7938) 1 credit**

*Prerequisite: Admission into ESE doctoral program*

Course provides doctoral students with an overview of the roles, responsibilities, and expectations of

doctoral leadership graduates. Each seminar includes directed study in a number of topics relating to professional practices in higher education and other leadership positions. Students enroll in this professional seminar for six semesters, earning 1 credit each semester.

### **Doctoral Internship in Special Education (EEX 7945) 3 credits**

*Prerequisites: Admission to doctoral program in Special Education or permission of instructor*

The course is designed to help doctoral students gain experience in preparing, delivering and teaching an undergraduate course. Students work under the supervision of a faculty mentor, who will co-teach an undergraduate course in special education. *Grading: S/U*

### **Dissertation (EEX 7980) 1-10 credits**

*Grading: S/U*

### **Doctoral Residency in Special Education (EEX 7982) 3 credits**

*Prerequisite: Admission to doctoral program in Special Education or permission of instructor*

Students work under the supervision of a faculty mentor to further the college teaching experience or engage in a research apprenticeship. *Grading: S/U*

### **Educating Special Populations of Gifted Learners (EGI 5246) 3 credits**

An in-depth study of diverse populations of gifted learners including gifted students with disabilities, gifted students from minority groups, gifted females, and young gifted children.

### **Theories and Characteristics of Gifted Learners (EGI 5302) 3 credits**

The theories, characteristics, definitions, and identification procedures for the gifted. Field observations are included.

### **Theory and Development of Creativity (EGI 5305) 3 credits**

An in-depth study of creativity, the creative process, the role of creativity in the classroom, and how it can be measured.

### **Designing Programs for Gifted Learners (EGI 6235) 3 credits**

*Prerequisite or corequisite: EGI 5302 or EGI 5246*

An in-depth study of methods and programming procedures utilized in gifted education.

### **Guidance and Counseling of Gifted Students (SDS 6426) 3 credits**

# CIVIL, ENVIRONMENTAL AND GEOMATICS ENGINEERING

**Undergraduate Courses** / [Link to Graduate Courses](#)

## **RI: Construction Project Management (CCE 4031) 3 credits**

*Prerequisites: Senior standing and permission of department*

Topics covered include planning, design, document preparation, bidding, bid tabulation, construction management, cost estimating, conflict resolution, and scheduling of engineering projects. This is a research-intensive (RI) course and an Academic Service Learning (ASL) course.

**Introduction to Laser Mapping Technology (CCE 4514C) 3 credits** Terrestrial laser mapping technology, current state of the technology, data collection methodologies and requirements, data processing, calibration, errors, database management, filtering techniques, product generation and applications. Lab included.

## **Soil Mechanics (CEG 3011C) 3 credits**

*Prerequisite: EGN 3331 with minimum grade of "C"*

Soil properties, identification and classification of earth materials, stress-strain behavior of soils, movement of water through soils. Introduction to geotechnical design. Laboratory included.

## **Foundation Engineering (CEG 4012) 3 credits**

*Prerequisite: CEG 3011C with minimum grade of "C"*

Fundamental concepts of foundation engineering. Geotechnical engineering theory applied to practical foundation design problems.

## **Ground Improvement Design (CEG 4122) 3 credits**

*Prerequisite: CEG 3011C with minimum grade of "C"*

Physical and mechanical properties of soil; ground improvement techniques and classifications; chemical and mechanical stabilization; ground improvement design concepts and procedures; design of reinforced soils; designing with geosynthetics; foundations and pavement applications.

## **Pavement Design (CEG 4126) 3 credits**

*Prerequisite: CEG 3011C with minimum grade of "C"*

Introduction to analysis of stress, strain, and deflection in flexible and rigid pavements, materials characterization, traffic analysis, AASHTO and mechanistic design, non-destructive design, and pavement rehabilitation.

## **Analysis of Structures (CES 3102C) 3 credits**

*Prerequisite: EGN 3331 with minimum grade of "C"*

Analysis of statically determinate structures, force and displacement methods of analysis of statically indeterminate structures, and matrix method of analysis of large scale structures.

### **Structural Damage Detection (CES 4160) 3 credits**

*Prerequisite: CES 3102C with minimum grade of "C"*

Introduction to structural health monitoring, damage detection sensing technology, signal processing, machine learning and optimization. Students learn about sensor-embedded structural maintenance systems and how to visualize and process sensor data of structures.

### **Structural Design of Buildings (CES 4225) 3 credits**

*Prerequisite: CES 3102C with minimum grade of "C"*

Course covers the fundamental concepts to determine the wind and seismic forces used in the design of buildings. Using the provisions of ASCE 7, wind and seismic force magnitudes, distributions and direction are determined for typical buildings. Wind forces are studied for the MWFRS and for the Components and Cladding. Dynamic analysis of SDOF and MDOF building models are studied. Load transfer through the diaphragm to the lateral force resisting system is studied to determine member forces, drift and torsion.

### **Nonlinear Behavior of Structures (CES 4526) 3 credits**

*Prerequisite: CES 3102C with minimum grade of "C"*

Course provides an introduction to the fundamental concepts used to analyze the nonlinear behavior of structures under static loading conditions. Displacements, member forces and collapse conditions are studied considering equilibrium in the deformed configuration and linear-elastic, perfectly plastic material behavior. Assignments require the development of computer programs written in MATLAB (or Excel) and their solutions verified using the nonlinear modeling capabilities of MASTAN2.

### **Structural Steel Design (CES 4605) 3 credits**

*Prerequisite: CES 3102C with minimum grade of "C"*

AISC specifications for loads and methods of design; design of tension and compression members; design of beams, floor systems bearing plates, column base plates, beam-columns; interaction formulae, moment amplification; simple connections: bolted shear connections, high strength bolts in tension, combined shear and tension fasteners, welded connections.

### **Reinforced Concrete Design (CES 4702) 3 credits**

*Prerequisite: CES 3102C with minimum grade of "C"*

Behavior of reinforced concrete structural elements, concepts of design and proportioning sections for strength and serviceability; background of ACI 318 specification requirements; strength design of

beams, columns, and members under combined axial load and bending; design of footings; introduction to prestressed concrete.

### **Prestressed Concrete Design (CES 4711) 3 credits**

*Prerequisite: CES 4702 with minimum grade of "C"*

Behavior of prestressed concrete structural elements, analysis and design of pre-tensioned and post-tensioned concrete structural members; design for flexure and shear. Anchorage design, partial prestressing, serviceability and structural efficiency of beams, slabs.

### **Computer Aided Design (CGN 2327) 3 credits**

Fundamentals of graphical and spatial analysis; graphics and drafting principles; computer-aided drafting; 2D and 3D visualization, modeling, and construction; engineering applications.

### **Civil Engineering Materials (CGN 3501C) 3 credits**

*Prerequisite: EGN 3331 with minimum grade of "C"*

Aggregates; concrete and other cementitious materials, properties of concrete, mix proportioning; wood and wood products, durability, mechanical properties and allowable values; iron and steel; bituminous materials and mixtures; soils; fiber composites. Laboratory and field trip included.

### **Undergraduate Research in Civil Engineering 1 (CGN 3910) 1 credit**

*Prerequisites: EGN 3331 with minimum grade of "C" and permission of department*

Introduction to research exposure and skill building focused on the scientific process and nature of discovery. Students define research topics, formulate research questions, develop research proposals, prepare experimental plans and develop research communication skills.

### **Special Topics in Civil Engineering (CGN 3930) 1-4 credits**

*Prerequisite: Permission of department*

Topics in civil engineering not covered by other courses.

### **GIS for Civil Engineering Applications (CGN 4321) 3 credits**

*Prerequisite: Permission of instructor*

Presents a comprehensive view of spatial analysis tools with an emphasis on Geographical Information System (GIS) methodology and its application for civil engineering problems.

### **RI: Data-Driven Civil Infrastructure (CGN 4344) 3 credits**

*Prerequisite: EGN 2213 with minimum grade of "C"*

This course covers data-driven infrastructure design, sensor-data analytical approaches and technological applications with civil infrastructure management and planning for smart cities.

Throughout this course, students are expected to learn how to ethically analyze real-world datasets collected from civil infrastructures and have access to various time-series data and spatiotemporal data (e.g., vibration data, temperature, images, trajectories). This is a research-intensive (RI) course.

**RI: Civil, Environmental and Geomatics Engineering Design 1 (CGN 4803C) 3 credits**

*Writing Across Curriculum (Gordon Rule)*

*Prerequisites: CEG 3011C, CES 3102C, CGN 3501C, CWR 3201C, ENV 3001C, SUR 4463 and TTE 3004C, all with minimum grades of "C," GPA greater than 2.0, and permission of department*

*Corequisite: Registration with the NCEES for the Fundamentals of Engineering Exam or Fundamentals of Surveying Exam*

Multidisciplinary design teams are formed for senior capstone design projects with multiple realistic constraints. Projects are developed with the approval of a sponsor/client. Professional practice issues are also presented and discussed. Laboratory included. This is a research-intensive (RI) course and an Academic Service Learning (ASL) course.

**RI: Civil, Environmental and Geomatics Engineering Design 2 (CGN 4804C) 3 credits**

*Writing Across Curriculum (Gordon Rule)*

*Prerequisites: CGN 4803C and a Structural Design restricted elective, both with minimum grades of "C," GPA greater than 2.0, permission of department*

*Prerequisites or Corequisites: Geotechnical design restricted elective, Transportation design restricted elective and Water Resources design restricted elective*

Continuation of CGN 4803C. Multidisciplinary team design projects with multiple realistic constraints culminate with written and oral reports. Design and professional practice issues are also presented and discussed. Laboratory included. This is a research-intensive (RI) course and an Academic Service Learning (ASL) course.

**Directed Independent Study in Civil Engineering (CGN 4905) 1-3 credits**

*Prerequisite: Permission of department*

Study of topics in civil engineering relating to the special needs and interests of individual students.

**Undergraduate Research in Civil Engineering 2 (CGN 4911) 1 credit**

*Prerequisites: CGN 3910 with minimum grade of "C," and permission of department*

Faculty-student mentored research projects including design, literature review, testing, analysis and conclusions.

**Special Topics in Civil Engineering (CGN 4930) 1-4 credits**

*Prerequisite: Permission of instructor*

Topics in civil engineering not covered by other courses.

### **Applied Hydraulics (CWR 3201C) 3 credits**

*Prerequisites: EGN 3311 and (MAP 2302 or MAP 3305) with minimum grades of "C"*

Fundamental properties of incompressible fluids; hydrostatics and fluid motion in closed conduits and open channels; potential flow; boundary layers; preliminary design of hydraulic structures. Laboratory included.

### **Hydrologic Engineering (CWR 4202) 3 credits**

*Prerequisite: CWR 3201C with minimum grade of "C"*

Fundamental components of the hydrologic cycles, rainfall-runoff processes, evaporation, infiltration and groundwater flow water budgets, introduction to water resources system engineering analysis, hydrologic modeling using simulation and spatial analysis tools.

### **Stormwater Modeling and Management (CWR 4307) 3 credits**

*Prerequisite: Hydrology course or permission of instructor*

Presents a comprehensive view of stormwater modeling and management with an emphasis on current modeling techniques and design practices. Provides an in-depth review of fundamentals of hydraulics and hydrology along with spatial analysis tools required for effective stormwater modeling and management.

### **Statics (EGN 3311) 3 credits**

[\(See Interdisciplinary courses, this section\)](#)

### **Strength of Materials (EGN 3331) 3 credits**

[\(See Interdisciplinary courses, this section\)](#)

### **Fundamentals of Energy Engineering (EGN 4732) 3 credits**

*Prerequisite: PHY 2048 with minimum grade of "C"*

This course provides an overview of renewable energy technology and outlines the basic principles of solar electricity, solar water heating, wind power, marine renewable energy, micro-hydro biomass, and heat pumps and their application in urban and rural environments. In addition, the fundamentals of conventional power generation (fossil fuel, nuclear, etc.) are discussed.

### **Environmental Science and Engineering (ENV 3001 C ) 3 credits**

*Prerequisites: CHM 2045 and CHM 2045L or equivalents with minimum grades of "C"*

Physical, chemical, and microbiological components of environmental systems in science and engineering. Introduction to water quality management, air pollution control, solid waste management, pollution prevention techniques, and risk analysis.

**RI: Environmental Fate and Transport (ENV 4053) 3 credits**

*Prerequisites: ENV 3001C, CHM 2046 and CHM 2046L all with minimum grades of "C"*

This course introduces students to the study of the major physical, chemical and biological processes of pollutant transformation and transport between air, water and the subsurface. This is a research-intensive (RI) course.

**Introduction to Pollution Prevention and Sustainability (ENV 4072) 3 credits**

*Prerequisites: PHY 2048 with minimum grade of "C" and permission of department*

This course introduces students to the principles of sustainability, life cycle cost analysis, pollution prevention, environmental impacts of engineering and infrastructure planning and design.

**Air Pollution and Control Systems (ENV 4112) 3 credits**

*Prerequisites: ENV 3001C and CWR 3201C with minimum grades of "C;" permission of department*

*Corequisite: ENV 4112L*

This course introduces students to the regulations dealing with air quality, basic meteorology, the physics at atmospheric dispersion, indoor air quality and design of air pollution control systems.

**Air Pollution Lab (ENV 4112L) 1 credit**

*Prerequisites: ENV 3001C and CWR 3201C with minimum grades of "C;" permission of department*

*Corequisite: ENV 4112*

Practical laboratory work in air sampling and analysis, source testing, instrumentation, criteria air pollutants and dispersion modeling.

**RI: Solid and Hazardous Waste and Site Remediation (ENV 4341) 3 credits**

*Prerequisites: ENV 3001C with minimum grade of "C" and permission of department*

Topics include regulations, collection and design of solid/hazardous waste management facilities, hazardous waste treatment, and site remediation design. This is a research-intensive (RI) course and an Academic Service Learning (ASL) course.

**RI: Water and Wastewater Treatment Systems (ENV 4514) 3 credits**

*Prerequisites: CWR 3201C and ENV 3001C with minimum grades of "C"*

Principles and design of physical, chemical, and biological treatment systems for potable water and wastewater applications. This is a research-intensive (RI) course.

**Special Topics in Environmental Engineering (ENV 4930) 1-4 credits**

Topics in environmental engineering of interest to engineering students.

**RI: Engineering Technology Capstone (ETG 4951) 3 credits**

### *Writing Across Curriculum (Gordon Rule)*

*Prerequisites: SUR 4463 and SUR 3463L with minimum grades of "C", senior standing, GPA greater than 2.0, and permission of department*

*Corequisite: Proof of registration with the NCEES for the FS exam*

Design teams are formed for senior capstone design projects with multiple realistic constraints. Projects are developed with the approval of a sponsor or client. Professional practice issues are also presented and discussed. Laboratory included, This is a Research-Intensive (RI) course and an Academic Service Learning (ASL) course.

### **Introduction to Geomatics Engineering (SUR 2034) 3 credits**

An introduction to the fundamental concepts of geomatics engineering philosophical thought; the technical, professional, ethical, and social responsibilities of the geomatics engineer; geomatics engineering professional and career opportunities; professional ethics and safety.

### **Geomatics ( SUR 3103 ) 2 credits**

*Prerequisites: MAC 1147 or MAC 2210, or both MAC 1140 and MAC 1114, or MAC 2311 with a minimum grade of "C"*

*Corequisite: SUR 3103L*

Theory and application of methods used in geospatial data acquisition, such as distance, direction and angle measurements, traverse computation, trigonometric leveling and height determination, topographic surveying, horizontal/vertical curves, terrestrial positioning with GPS.

### **Geomatics Lab (SUR 3103L) 1 credit**

*Prerequisites: MAC 1147 or MAC 2210, or both MAC 1140 and MAC 1114, or MAC 2311 with a minimum grade of "C"*

*Corequisite: SUR 3103*

Theory and application of methods used in geospatial data acquisition, such as distance, direction and angle measurements, traverse computation, trigonometric leveling and height determination, topographic surveying, horizontal/vertical curves, terrestrial positioning with GPS.

### **Automated Surveying and Mapping (SUR 3141) 2 credits**

*Prerequisites: SUR 3103 and SUR 3103L with minimum grades of "C"*

*Corequisite: SUR 3141L*

Use of computer-aided drafting and mapping from surveyed field data, familiarization with hardware and software available for surveying and mapping computations and drafting, data storage and output from automated devices used in surveying, use of total stations and electronic field data collection systems, field-to-finish products.

### **Automated Surveying and Mapping Lab (SUR 3141L) 1 credit**

*Prerequisites: SUR 3103 and SUR 3103L with minimum grades of "C"*

*Corequisite: SUR 3141*

Use of computer-aided drafting and mapping from surveyed field data, familiarization with hardware and software available for surveying and mapping computations and drafting, data storage and output from automated devices used in surveying, use of total stations and electronic field data collection systems, field-to-finish products.

### **Engineering and Construction Surveying (SUR 3205) 2 credits**

*Prerequisites: SUR 3141 and SUR 3141L with minimum grades of "C;" Corequisite SUR 3205L*

Surveying applications for engineering, construction, and transportation work. Route surveying and geometric design; topographic site surveys and mapping; earthwork computations.

### **Engineering and Construction Surveying Laboratory (SUR 3205L) 1 credit**

*Prerequisites: SUR 3141 and SUR 3141L with minimum grades of "C;" Corequisite: SUR 3205*

Surveying applications for engineering, construction, and transportation work. Route surveying and geometric design; topographic site surveys and mapping; earthwork computations.

### **Land Subdivision and Platting Lab (SUR 3463L) 1 credit**

*Prerequisites: EGN 1002 and MAC 2311 and CGN 2327, all with minimum grades of "C"*

*Corequisite: SUR 4463*

Physical elements of designing land subdivisions, including circulation systems, sewer systems, drainage systems, soils and earthwork grading considerations, erosion control, lot and block arrangement, topography and existing land use factors, geometric analysis procedures, presentations to city planning and zoning boards.

### **Measurement Theory and Data Adjustments (SUR 3520) 3 credits**

*Prerequisites: SUR 3103, SUR 3103L, MAC 2311 and introductory course in statistics, all with minimum grades of "C"*

Applications of mathematics in surveying; measurement theory, analysis of measurements, computation and adjustment of spatial data. Emphasis on computer applications for adjustments and analysis.

### **Special Topics in Geomatics Engineering (SUR 3930) 3 credits**

Selected topics in Geomatics Engineering.

### **Digital Photogrammetry Principles and Applications (SUR 4331C) 3 credits**

*Prerequisites: SUR 3103 and SUR 3103L with minimum grades of "C"*

Use of aerial photographs for mapping, geometry of single photo and stereographic models, scale and relief displacement, vertical and titled photos, parallax, photo mosaics, ground control, stereoplotters, resection, orthophotos, oblique photos. This course also provides an overview of digital photogrammetric principles and its applications in low altitude and close range mapping. Lab exercises are included in the course.

### **Thermal Infrared Remote Sensing and Applications (SUR 4384) 3 credits**

Methods and applications of thermal infrared remote sensing, temperature information with an appropriate spatial and temporal coverage at local and regional scales, use of thermal infrared thermometer and thermal camera technologies.

### **Cadastral Principles and Legal Aspects (SUR 4403) 3 credits**

*Prerequisites: SUR 3141 and SUR 3141L with minimum grades of "C"*

Cadastral systems, legal principles of property boundary retracement, land descriptions, parcel identification, rights-of-way and legal descriptions of real property. Ethical and legal aspects of practice, surveyor as expert witness, surveyor-client relationship, responsibilities to the profession.

### **Subdivision Design (SUR 4463) 2 credits**

*Prerequisites: EGN 1002 and (CGN 2327 or EGN 1111C), all with minimum grades of "C"*

Physical elements of planning subdivision layouts, including circulation, water/sewer, drainage, earthwork grading, erosion control, topography and existing land use factors, geometric analysis procedures, plan/profile views of neighborhood infrastructure, zoning restrictions, easements and setbacks.

### **RI: Foundations of Unmanned Aerial Systems (UAS) Mapping (SUR 4503C) 3 credits**

*Prerequisite: Permission of instructor*

Course covers the fundamental components of small unmanned aerial systems (sUAS) and how they are used to produce high resolution, spatially accurate planimetric maps and 3-D models of the terrain. This is a research-intensive (RI) course.

### **Geodesy and Geodetic Positioning (SUR 4530 ) 2 credits**

*Prerequisites: SUR 3141, SUR 3141L with minimum grades of "C"*

*Corequisite: SUR 4530L*

Concepts of geodesy, ellipsoidal geometry, geodetic coordinates, gravity, datums, satellite orbits and practical applications of GPS data collection, post-processing and adjusting networks.

### **Geodesy and Geodetic: Positioning Lab (SUR 4530L) 1 credit**

*Prerequisites: SUR 3141, SUR 3141L with minimum grades of "C"*

*Corequisite: SUR 4530*

Concepts of geodesy, ellipsoidal geometry, geodetic coordinates, gravity, datums, satellite orbits, and practical applications of GPS data collection, post-processing and adjusting networks. Lab is coordinate with lecture.

### **Directed Independent Study in Geomatics Engineering (SUR 4905) 1-3 credits**

*Prerequisite: Permission of department*

Study of topics in geomatics engineering relating to the special needs and interests of individual students.

### **Special Topics in Geomatics Engineering (SUR 4930) 3 credits**

Selected topics in Geomatics Engineering.

### **Introduction to Transportation Engineering (TTE 3004C) 3 credits**

*Prerequisite: EGN 1002 with minimum grade of "C" or permission of instructor*

Introduction to transportation engineering, including planning, permitting, and environmental considerations; design calculations; capacity analysis and simulation; presentation skills necessary for the proper development of transportation improvements.

### **Transportation Planning and Logistics (TTE 4005C) 3 credits**

*Prerequisite: TTE 3004C with minimum grade of "C"*

Fundamental concepts for multimodal transportation engineering, planning, and systems analysis. Topics include transportation demand and supply system simulations, impact estimation, linear and integer programming, and the evaluation of competing transportation alternatives.

### **Transportation Operations and Logistics Management (TTE 4105) 3 credits**

*Prerequisite: TTE 3004C or URP 3000 with minimum grade of "C" or permission of instructor*

Provides multimodal solutions that relieve congestion, optimize infrastructure investments, promote travel options and reduce greenhouse gas emissions. Modeling of complex interactions and causal relationships among current issues. Topics include transportation modes and technologies, vehicle dynamics, basic facility design, capacity analysis, transportation planning, evaluation and choice, network analysis, logistics and ITS. Additional topics include transportation risk assessment and computation, evacuation modeling, reliability analysis, infrastructure interdependency analysis and network impact assessment.

### **Highway Engineering (TTE 4810) 3 credits**

*Prerequisite: TTE 3004C with minimum grade of "C"*

Course covers planning, design and operation of highway geometric design, modern methods for traffic control, traffic flow capacity, highway location and design, highway engineering economics, traffic measurement devices and technologies; signal systems, corridor control, automatic driver information; incident detection; and autonomous vehicle operation.

## **Civil, Environmental and Geomatics Engineering Graduate Courses**

### **Civil Engineering Project Management (CCE 5036) 3 credits**

This is a course in which planning, design, document preparation, bidding, big tabulation, construction management, cost estimation, conflict resolution and scheduling for civil engineering projects are covered.\

### **Advanced Foundation Engineering (CEG 6105) 3 credits**

Rigid and flexible earth retaining structures; shallow and deep foundations; laterally loaded piles; sheet-pile walls, braced excavations, cellular cofferdams, and buried culverts; consolidation settlement, stress distribution, elastic settlement, load bearing capacity; seepage and dewatering of foundation excavations.

### **Soil Stabilization and Geosynthetics (CEG 6124) 3 credits**

Soil chemistry, mineralogy, and properties; techniques of soil reinforcement, soil improvement, and soil treatment; chemical stabilization; mechanical stabilization; designing with geosynthetics; foundations and pavement applications.

### **Pavement Analysis and Design (CEG 6129) 3 credits**

Stresses and strains in flexible and rigid pavements, materials characterization, pavement performance, mechanistic design principles, AASHTO design method, pavement rehabilitation.

### **Terrestrial Laser Scanning (CEG 6304C ) 3 credits**

This course gives an introduction to applications of terrestrial laser scanning systems in geosciences, engineering, urban planning, forestry, architecture, emergency planning and forensics.

### **Structural Health Monitoring (CES 5164) 3 credits**

*Prerequisite: CES 3102C with minimum grade of "C"*

This course explores the theory and applications of structural health monitoring, which is a new technology to diagnose the state of structural conditions based on sensor data and novel data analytics approaches. This course covers various important topics, including sensing technology, signal processing, machine learning and optimization. Students are expected to gain a deep understanding of sensor-embedded structural maintenance systems and to learn how visualize and process sensor data.

**Nonlinear Behavior of Structures (CES 5527) 3 credits**

This course provides an introduction to the fundamental concepts used to analyze the nonlinear behavior of structures under static loading conditions. Displacements, member forces and collapse conditions are studied considering equilibrium in the deformed configuration and linear-elastic, perfectly plastic material behavior. Assignments require the development of computer programs written in MATLAB (or Excel) and their solutions verified using nonlinear modeling capabilities of MASTAN2.

**Advanced Building Design (CES 5583) 3 credits**

*Prerequisite: CES 3102C*

This course covers the fundamental concepts to determine the wind and seismic forces used in the design of buildings. Using the provisions of ASCE 7, wind and seismic force magnitudes, distributions and direction are determined for typical buildings. Wind forces are studied for the MWFRS and for components and cladding. Dynamic analysis of SDOF and MDOF building models are studied. Load transfer through the diaphragm to the lateral force resisting system is studied to determine member forces, drift and torsion.

**Advanced Structural Analysis (CES 6106) 3 credits**

Review of matrix-force and displacement methods and their applications to civil structures.

**Finite Element Methods in Civil Engineering (CES 6119) 3 credits**

Variational principles, weighted residual methods, convergence criteria, shape functions for one-, two-, and three-dimensional elements, isoparametric elements, and applications to structural and geotechnical engineering

**Bridge Design (CES 6325) 3 credits**

Planning, design, and construction of bridges. Discussion of bridge types and factors affecting the selection of type: concrete versus steel, prestressed, composite, segmental concrete bridges; design issues and techniques; detailed case study of a particular bridge; recent technological developments in bridge engineering.

**Structural Dynamics (CES 6585) 3 credits**

Response of lumped parameter systems to dynamic loading: formulation and solution of problems of one or more degrees of freedom for discrete systems, modal analysis, numerical integration, and transform techniques. Response of continuous systems. Introduction to earthquake engineering: response spectra, energy absorption capacity of structures, estimation of damping, seismic design, seismic codes, and soil-structure interaction. Wind effects on structures and hurricane-resistant design.

Blast-resistant design. Approximate design methods.

### **Advanced Steel Structures (CES 6607) 3 credits**

Review of basic steel design; beam columns; interaction formulas; first-order and second-order moments; eccentric bolted and welded connections; moment resisting connections; composite construction; effective flange width; shear connectors; composite beams with formed steel deck; plate girder proportions; AISC requirements; flexure-shear interaction.

### **Advanced Reinforced Concrete (CES 6706) 3 credits**

Analysis and design of two-way slabs, floor systems, deep beams, shear walls and footings. Limit state, yield line and deflection analysis. Continuity, tall buildings, seismic, and hurricane-resistant design. Torsion.

### **Prestressed Concrete (CES 6715) 3 credits**

Behavior, analysis and design of pretensioned and post-tensioned concrete structures. Flexural, shear, bond and anchorage zone design. Partial prestressing strength, serviceability and structural efficiency of beams, slabs, tension and compression members. Frameworks and bridges.

### **Design and Analysis for Engineering Data (CGN 5716) 3 credits**

*Prerequisites: Basic course in statistics or permission of instructor*

Course covers development of hypothesis and thesis-driven data analysis via applications of the basic principles of experimental design to analysis of engineering data, computational algorithms for sample size optimization, analysis of variance for experiments with a single factor, multi-variate analysis.

### **Special Topics in Civil Engineering (CGN 5935) 3 credits**

*Prerequisite: Permission of instructor*

Study relating to specialized topics associated with civil engineering.

### **Graduate Seminar (CGN 5937) 0 credit**

*Prerequisite: Graduate standing*

The objective is to encourage and enhance graduate student participation in technical seminars or presentations deemed appropriate by the department for graduate students. This course requires participation of graduate students in a minimum of five technical seminars or presentations in one semester. *Grading: S/U*

### **Infrastructure Maintenance and Management (CGN 6616) 3 credits**

The course involves evaluating infrastructure systems (water, sewer, stormwater, roads, bridges, rail, power) to identify concepts on repair, replacement and maintenance, including dollars to spend on

same.

### **Directed Independent Study (CGN 6905) 1-3 credits**

*Prerequisite: Permission of instructor*

Study of topics in civil engineering relating to the special needs and interests of individual students.

### **Special Topics (CGN 6930) 1-3 credits**

*Prerequisite: Permission of instructor*

Topics in civil engineering.

### **Master's Thesis (CGN 6971) 1-10 credits**

### **Advanced Research (CGN 7978) 1-9 credits**

*Prerequisite: Permission of department*

Course covers research that is relevant to the student's course of study in the Ph.D. program. This course requires oversight by the student's advisor who can assess the student's performance at the end of the semester. This course can be taken prior to admission to candidacy for the doctoral degree and may be repeated in multiple semesters. *Grading: S/U*

### **Dissertation - Transportation and Environmental Engineering (CGN 7980) 1-15 credits**

*Prerequisite: Permission of department*

*Grading: S/U*

### **Stormwater Modeling and Management (CWR 5308) 3 credits**

The course presents a comprehensive view of stormwater modeling and management with an emphasis on current modeling techniques and design practices. The course provides an in-depth review of fundamentals of hydrology along with spatial analysis tools required for effective stormwater modeling and management.

### **Groundwater Flow (CWR 6125) 3 credits**

Infiltration; Capillarity; Groundwater and Aquifers; Anisotropy; Groundwater motion; Darcy's law, Dupuit-Forcheimer's law; Potential flow; Flow nets; Conformal mapping; Unsaturated flow; Diffusion and dispersion; Well hydraulics, Theis equation; Drainage; Salt water intrusion; Legal doctrines; Economics of groundwater.

### **Open-Channel Hydraulics (CWR 6235) 3 credits**

Review of basic hydraulics: Continuity, momentum and energy balance; Uniform and steady flow; Non-uniform flow; Critical flow; Gradually-varied flow; Surface profiles; Chezy's and Manning's

formulas; Laminar and turbulent flow; Velocity distribution; Unsteady flow; Rapidly varying flow; Flood routing; Design of open-channels.

### **Dynamic Hydrology (CWR 6525) 3 credits**

Dynamics and statistics of principal hydrometeorological processes; Hydrologic cycle; Precipitation, Infiltration; Evapotranspiration; Surface runoff; Percolation; Groundwater motion; Storm water management; Hydrologic modeling; Water budget; Hydrologic time series, Stochastic analysis; ARARMA models.

### **Water Resource System Engineering (CWR 6818) 3 credits**

Nature of water resource systems; Systems analysis, Objective functions; Optimal policy analysis; Linear programming; Dynamic programming; Political and economic objectives; Water resource subsystems; Deterministic and stochastic parameters; Large-scale, multi-objective projects; Water allocation; Supply and demand; Hierarchical modeling of water resource systems.

### **Modeling Methods in Water Resources and Environmental Engineering (EES 6025) 3 credits**

Classification of PDEs; fundamentals of numerical analysis; numerical stability, consistency, and convergence; method of characteristics; variational principles; finite differences; finite elements; integral-boundary element method; applications to water resource and environmental engineering problems.

### **Energy Engineering ( EGN 5735 ) 3 credits**

This course provides an overview of renewable energy technology and outlines the basic principles of solar electricity, solar water heating, wind power, marine renewable energy, micro-hydro, biomass and heat pumps and their application in urban and rural environments. In addition, the fundamentals of conventional power generation (fossil fuel nuclear, etc.) are discussed.

### **Water and Wastewater Treatment (ENV 5510) 3 credits**

*Prerequisites: CWR 3201C or equivalent, ENV 3001C or equivalent, and permission of instructor*

This course introduces students to the principles and design of physical, chemical and biological treatment systems for potable and wastewater applications.

### **Hydraulic Systems Engineering (ENV 5565C) 3 credits**

This class is outlines the concepts behind the design of piping and pumping stations. The class includes a review of hydraulics and piping networks, pipe materials, pump selection, multiple pump systems, sewer pumping networks and pump station design and appurtenances.

### **Special Topics in Environmental Engineering (ENV 5935) 3 credits**

*Prerequisite: Permission of instructor*

Study relating to specialized topics associated with environmental engineering.tte

### **Air Pollution and Control (ENV 6115) 3 credits**

Review of air quality and air pollution problems. Sources, characteristics, and effects of specific air pollutants; Lower atmospheric motion dynamics; Dispersion and interaction of pollutants in the atmosphere; Smog effects; Air quality standards and regulations; Air pollution control methods; Acid rain.

### **Solid Waste Management (ENV 6356) 3 credits**

Quantities and composition of refuse; Municipal and industrial solid waste disposal methods; Sanitary landfills; Incineration; Grinding and composting of refuse; Energy recovery from solid wastes; Hazardous waste; Optimization techniques to solid waste operation and management.

### **Water Supply and Treatment (ENV 6418) 3 credits**

Bacteriological, chemical, and physical water quality standards; distribution systems; water treatment theory and design; aeration; coagulation and flocculation; sedimentation; filtration; disinfection; softening; membranes.

### **Contamination of Aquatic Sediment (ENV 6441) 3 credits**

*Prerequisites: ENV 3001C*

Topics include: cohesive sediments, settling, re-suspension, aggregation, flocculation, pollutant adsorption/desorption; partitioning of chemicals, sediment toxicity assessment, bioassays/bioassessments, aquatic sediment sampling.

### **Wastewater Engineering (ENV 6507) 3 credits**

Wastewater characterization, collection, and pumping. Physical unit operations and biological treatment unit process design including screening, sedimentation, filtration, activated sludge, disinfection, sludge digestion, and sludge disposal.

### **Environmental Systems and Processes (ENV 6668) 3 credits**

Physical, chemical, and biological processes, reactor theory, particle transport, mass transfer, mixing, advection, dispersion, diffusion, sorption, phase transfer.

### **Sustainability and Pollution Prevention (ENV 6932) 3 credits**

This course introduces students to the principles of engineering sustainability, life cycle cost analysis, pollution prevention and environmental resource management of infrastructure planning and design.

### **Offshore Structures (EOC 6431) 3 credits**

(See [Ocean and Mechanical Engineering courses](#), this section)

### **Special Topics in Geomatics Engineering (SUR 5935) 3 credits**

*Prerequisite: Permission of instructor*

Study relating to specialized topics associated with geomatics engineering.

### **Digital Photogrammetry and Image Interpretation (SUR 6335C) 3 credits**

This course provides students with an advanced understanding of digital photogrammetric principles and their applications. This includes the techniques for calibration of digital cameras, extraction of point and linear features and 3D reconstruction of visible surfaces. The course also enables students to independently implement the digital photogrammetric concepts throughout projects, such as calibration of mobile phone camera and 3D surface reconstruction from stereoscopic images.

### **Thermal Infrared Remote Sensing (SUR 6387C) 3 credits**

*Prerequisite: GIS 4035C with minimum grade of "C" or permission of instructor*

Temperature is one of the most important physical variables. Temperature information with an appropriate spatial and temporal coverage is a key to addressing most of the environmental challenges on both local and regional scales. Measuring temperature remotely by thermal infrared is a new technology, which has found a wide area of applications. In this course, students learn the basic theory of sensors and data processing and analysis. They also investigate new applications of thermal infrared remote sensing on civil infrastructure and environmental systems monitoring.

### **Advanced Unmanned Aerial System Mapping (SUR 6402) 3 credits**

Covers the fundamental components of small unmanned aerial systems (sUAS) and how they are used to produce high resolution, spatially accurate, planimetric maps and 3-D models of the terrain.

### **Traffic Signal Systems (TTE 6259) 3 credits**

This course teaches students about advanced concepts of traffic signal systems that are currently used in the U.S. Students design, evaluate and optimize various components of traffic signal operations both for individual intersections and coordinated traffic signal systems.

### **Intelligent Transportation Systems (TTE 6272) 3 credits**

Provides instruction on topics related to intelligent transportation systems, including theoretical fundamentals of systems engineering, traffic flow theory, architecture of telecommunications networks, freeway and arterial management and other topics related to ITS.

### **Transportation System Analysis (TTE 6501) 3 credits**

Concepts of operations research using various models to optimize holistic operations of transportation systems from the perspectives of sustainability, resilience, environmental impacts and robustness are discussed. Programming model development and optimizations based on mathematical interpretations of descriptive problems are also covered.

### **Highway Traffic Characteristics and Measurements (TTE 6505) 3 credits**

This course instructs students on the concept of advanced traffic operations including the characteristics of functional relationships between traffic modeling and travel demand forecasting. Students evaluate transportation scenarios and design solutions to improve traffic operations.

### **Transportation and Supply Chain Systems (TTE 6507) 3 credits**

A study of engineering decision problems for transportation and supply chain systems, relying primarily on the quantitative methods of operations research. Topics include an introduction to the components of logistics systems, such as suppliers, customers, inventory, orders and freight transportation systems and the interactions between these components; a thorough coverage of models and solution techniques for the design and control of logistics systems, primarily network and network-based optimization models; and study in the application of such models and solution techniques.

### **Maritime Freight Operations (TTE 6508) 3 credits**

Addresses important transportation modeling techniques for maritime freight transport. Mathematical models are used to represent transportation problems, and commercial computer software packages are used to evaluate and investigate modern freight transportation systems.

### **Sustainable Public Transportation (TTE 6651) 3 credits**

Designed to outline the principles of transit systems in the urban transportation arena, functional relationships that govern bus and rail transit, and issues associated with unbalanced flow and lane control, transportation system management and railroad economics and policies.

### **Highway Engineering (TTE 6815) 3 credits**

Route selection including environmental impacts, vertical and horizontal alignment, intersection design, evaluation of subgraded soil strengths, and pavement design, drainage, and overlay design.

## **ELECTRICAL ENGINEERING AND COMPUTER SCIENCE**

**Undergraduate Courses** / [Link to Graduate Courses](#)

### **Biomedical Instrumentation and Measurements (BME 4503C) 3 credits**

*Prerequisite: EEL 3502 with minimum grade of "C"*

This course covers design of biomedical instrumentation and diagnostic devices (aspects of electronic, mechanics, chemical and biological components) to measure physiological parameters. It also covers design of diagnostic devices and methods for point-of-care detection of biomarkers in tissue.

**Artificial Intelligence for Cybersecurity (CAI 4802) 3 credits**

*Prerequisites: CAP 4773 and (COP 3410C or COP 3530C) with minimum grades of "C"*

This course introduces artificial intelligence methods within the field of cybersecurity. Students learn how supervised learning, unsupervised learning and big data are applied in practice to relevant various cybersecurity models, including in characterizing cyber-attacks, malware and intrusion detection, and threat modeling. The importance of fairness, transparency and explainability in cybersecurity machine learning models is highlighted.

**Applications of Artificial Intelligence (CAP 2603) 3 credits**

This course provides an overview of the field of artificial intelligence (AI) with emphasis on contemporary techniques and applications of AI in many areas, including computer vision, natural language processing and medical diagnosis. The course broadens the participants' view of the field of AI, allowing a better understanding of its foundations, risks, applications and implications.

**Tools for Data Science (CAP 2751) 3 credits**

This course focuses on data manipulation, curation, visualization, exploration, interpretation and modeling using standard packages and tools employed in the field of data science, as well as best practices for maintaining data and software using version control.

**RI: Experimental Design and Data Analysis (CAP 2753) 3 credits**

*Prerequisite: STA 2023 or equivalent*

This course deals with principles of experimental design and data analysis. Topics covered include design of experiments, sampling and analysis of resulting data. This is a research-intensive (RI) course.

**Introduction to Game Programming (CAP 4028) 3 credits**

*Prerequisite: COP 3530*

Introduction to designing and building video games using high level programming languages and animation libraries. The techniques learned can be applied to simulations, instrumentation, and educational software and other software applications that require dynamic high speed interactive displays of graphic objects.

**Digital Image Processing (CAP 4401) 3 credits**

*Prerequisites: (EEE 4541 or STA 4821) and COP 3530 or permission of instructor*

Introduction to digital image processing principles, tools and algorithms. Includes topics in image representation, encoding and analysis, such as filtering, transformation, segmentation, feature extraction and pattern recognition. Use of image processing software tools for lab assignments and projects.

### **Computational Genomics (CAP 4511) 3 credits**

*Prerequisites: (COP 2220 or COP 3035) and STA 2023 and PCB 3063, all with minimum grades of "C" or permission of instructor*

This course focuses on the computational analysis of modern high throughput genomic data. In particular, the course covers the application of R packages in performing exploratory data analysis, predictive modeling and addressing questions about different types of genomic data.

### **Algorithms for Bioinformatics (CAP 4543) 3 credits**

*Prerequisites: (COP 3530 or COP 3410) and PCB 3063, all with minimum grades of "C" or permission of instructor*

This course covers the data structures and algorithms commonly used in the field of bioinformatics. Emphasis is on topics related to classical and modern techniques employed for biological sequence analysis.

### **Applied Machine Learning and Data Mining (CAP 4612) 3 credits**

*Prerequisite: STA 2023 or equivalent*

This course covers theoretical foundations and tools for machine learning and data mining. The class introduces fundamental machine learning topics such as data engineering, supervised learning and unsupervised learning with case studies. Credit will not be given for both CAP 4612 and CAP 6610.

### **Introduction to Deep Learning (CAP 4613) 3 credits**

*Prerequisite: COP 3530 or COP 3410 with minimum grade of "C" or permission of instructor*

This course teaches students basic concepts of deep learning. The course covers three major topics, including statistical machine learning, neural network structures and deep neural networks. Detailed topics include introduction to machine learning algorithms, perceptron learning, multi-layer neural networks, and deep neural network structures and learning algorithms. The lectures include practical sessions dedicated to the implementation and programming of deep learning frameworks.

### **Trustworthy Artificial Intelligence (CAP 4623) 3 credits**

*Prerequisites: COP 4773 and (COP 3014C or COP 3530C)*

Topics include preliminary materials security, trust and AI; human agency and oversight; technical robustness and safety; privacy and data governance; transparency; diversity, non-discrimination and fairness; societal and environmental well-being; and accountability.

### **Introduction to Artificial Intelligence (CAP 4630) 3 credits**

*Prerequisite: COP 3530 or COP 3410 with minimum grade of "C" or permission of instructor*

A broad introduction to the core concepts of artificial intelligence, including intelligent agents, problem solving by search, knowledge representation and reasoning and learning from examples. Programming in Python and possibly other software environments.

### **Introduction to Data Mining and Machine Learning (CAP 4770) 3 credits**

*Prerequisites: (COP 3530 or COP 3410) and (EEE 4541 or STA 4821 or STA 2023 or equivalent) with minimum grades of "C"*

This course teaches the principles of data mining and machine learning. Topics include classical machine learning algorithms, such as regression, classification and clustering, feature selection methods and applications of machine learning.

### **Introduction to Data Science and Analytics (CAP 4773) 3 credits**

*Prerequisites: (COP 2220 or COP 3035) and (EEE 4541 or STA 4821 or STA 2023) with minimum grades of "C" or permission of instructor*

This course deals with the principles of data science and analytics. Topics covered include statistical analysis of data, measurement techniques and tools, machine learning methods, knowledge discovery and representation, classification and prediction models.

### **Modeling and Simulation of Systems (CAP 4833) 3 credits**

*Prerequisites: COP 3014, COP 3014L, and STA 4821*

Extending the classical world views of computer simulation with object-oriented programming and analysis. Examples from computer systems, ecology, service and manufacturing systems.

### **Introduction to Logic Design (CDA 3201C) 4 credits**

*Prerequisite or Corequisite: COP 2220*

Fundamentals of logic design, Boolean algebra, simplification of Boolean expressions, design of combinational circuits, design with SSI and MSI logic ICs including PLDs. Flip flops, analysis and synthesis of sequential circuits, design with MSI and LSI logic ICs. Training kits will be used in the lab to build logic circuits.

### **Computer Logic Design (CDA 3203) 3 credits**

This course introduces Boolean algebra, logic gates. Students use combinational logic and build a set of adders, leading up an arithmetic-logic unit (ALU). Students learn sequential logic and build a set of registers, memory devices and RAM. Course also introduces machine language and instruction sets. Students learn the concepts by implementing a series of small projects using design tools as well as

hardware description languages (HDLs).

### **Introduction to Microprocessor Systems (CDA 3331C) 3 credits**

*Prerequisites: CDA 3201C and COP 2220 with minimum grades of "C"*

Architecture of a 32-bit microprocessor, addressing modes, instruction set, assembly language programming, program design, hardware model, exception handling and interface to memory and peripherals. Training kits will be used in the lab to run assembly programs.

### **Computer Architecture (CDA 4102) 3 credits**

*Prerequisites: CDA 3203 and COP 2220 or COP 3275C with minimum grades of "C"*

This course teaches fundamental concepts in computer architecture with emphasis on the impact of the architecture software performance. Students learn the concepts by implementing a series of small programming projects to learn and exercise concepts such as pipelining, caching and instruction level parallelism.

### **CAD-Based Computer Design (CDA 4204) 3 credits**

*Prerequisite: CDA 3201C; Corequisite: CDA 3331C (may be taken before CDA 4204)*

Use of Verilog hardware description language for hierarchical behavioral level design of a CPU using current industry standards and design methodologies. Techniques for performance enhancement.

### **Introduction to VLSI (CDA 4210) 3 credits**

*Prerequisites: CDA 3203 and EEE 3300 with minimum grades of "C" or permission of instructor*

Exposes students to digital VLSI design and simulation tools with simple examples. Use of commercial state-of-the-art industrial CAD/CAE tools. This is an Academic Service Learning (ASL) course.

### **Design of Digital Systems and Lab (CDA 4240C) 3 credits**

*Prerequisite: CDA 3203 with minimum grade of "C"*

In this course, students learn to use a hardware description language (mainly VHDL) in the digital design process. Emphasis is on system-level concepts and high level design representations. Students also have the opportunity to use a commercial synthesis tool to automatically map high level descriptions to field programmable gate arrays (FPGAS). The lab-intensive, hands-on aspect of this course presents different approaches to digital system modeling and design with the use of HDLS.

### **Introduction to Cryptographic Engineering (CDA 4321) 3 credits**

*Prerequisite: COP 2220*

This course is devoted to the state-of-the-art in cryptographic hardware/software and embedded systems. Students learn about computational algorithms and architecture of the cryptographic devices. Students also re-learn programming of cryptographic primitives on ASM and C on PC or embedded

devices.

### **Hardware Security (CDA 4323) 3 credits**

*Prerequisite: CDA 4240C with minimum grade of "C"*

This course covers an introduction to hardware security and trust, introduction to cryptographic processors and processing overhead analysis, physical attacks and countermeasures, field-programmable gate array (FPGA) security, hardware Trojan detection and isolation, side-channel analysis, integration of security as a design metric and counterfeit electronics detection and prevention.

### **Introduction to Embedded System Design (CDA 4630) 3 credits**

*Prerequisite: CDA 4240C with minimum grade of "C"*

This is a practical, hands-on course that teaches the design and analysis of embedded computing systems that interact with physical processes. Topics covered include embedded architectures, interaction with devices (I/O), concurrency, real-time principles and embedded software. Students learn concepts through a series of laboratory exercises with state-of-the-art embedded processors and industry-standard development tools. Students design and build an embedded system with a custom PCB.

### **Introduction to Software Design (CEN 3062C) 3 credits**

*Prerequisite: COP 3035C with minimum grade of "C"*

This course introduces fundamental programming concepts in object-oriented design and abstraction. Design, implementation, testing and debugging object-oriented programs are emphasized, as well as how to analyze, instantiate and connect components that are reusable parts.

### **Principles of Software Engineering (CEN 4010) 3 credits**

*Prerequisite: COP 3530 or COP 3410*

An introduction to the basic principles and practices of software engineering. Exposes students to a wide range of software engineering concepts and state-of-the-art technologies. Emphasis is placed on learning and practicing software engineering principles through team course project and gaining appreciation of “programming in the large.” Topics include both technical aspects and non-technical aspects of software engineering, such as software life cycle models, specification and design methods, implementation and testing issues, deployment and post maintenance. Students are required to complete a team project involving written and oral presentations and demonstrations. This is an Academic Service Learning (ASL) course.

### **Hardware Software Codesign (CEN 4214) 3 credits**

*Prerequisites: CDA 3203 and EEE 3300 with minimum grades of "C" or permission of instructor*

This course helps students learn the concepts of top-down design, system design methodology and HW design workflow. Students also receive an introduction to field-programmable gate array (FPGA) design and learn about various embedded system platforms available in the market that can be utilized for HW/SW codesign.

### **Introduction to Computer Systems Performance Evaluation (CEN 4400) 3 credits**

*Prerequisites: COP 3014 and (EEE 4541 or STA 4821 or STA 2023 or equivalent)*

Principles of the quantitative evaluation techniques for computer system hardware and software, emphasizing the establishment and analysis of performance criteria. Deterministic and stochastic methods will be discussed.

### **Software Engineering Project (CEN 4910) 3 credits**

*Prerequisite: CEN 4010*

Applies software engineering principles and practices taught in CEN 4010. Students work in teams to develop a software system, following a process similar to industry practices coupled with the software engineering method and theory. Students complete a team project involving written and oral presentation and demonstrations.

### **Cooperative Education - Information Engineering Technology (CET 3949) 1-3 credits**

*Prerequisite: Permission of instructor*

Supervised work experience in information engineering technology. Open only to students in the B.I.E.T. program. *Grading: S/U*

### **Computer Organization and Design (CET 4333) 3 credits**

*Prerequisite: COP 2220 or equivalent*

Basic computer systems design and architecture. An introduction to design of computer memories, CPUs, I/O devices, buses, and addressing schemes. Open only to students in the B.I.E.T. program. Credit will not be given for both CET 4333 and CDA 3331C.

### **Database Application Development (CET 4427) 3 credits**

*Prerequisite: COP 3014 or equivalent*

Design and implementation of database applications within the concept of central administration. Oracle is used as a vehicle. Programming project is required. Open only to students in the B.I.E.T. program. Credit will not be given for both CET 4427 and COP 3540.

### **Capstone Project (CET 4915) 4 credits**

*Prerequisites: Senior standing, B.I.E.T. majors*

Working in groups, students undertake a complete project from specification through implementation

and deployment. Open only to students in the B.I.E.T. program.

### **Topics in Information Engineering Technology (CET 4930) 1-3 credits**

*Prerequisite: Permission of instructor*

Topics not covered by existing courses. Course content varies by offering. Open only to students in the B.I.E.T. program.

### **Topics in Computer Science and Engineering (CIS 2930) 1-4 credits**

Study relating to topics in computer science and computer engineering.

### **Cyber Physical System Security (CIS 4213) 3 credits**

*Prerequisite: COP 3530 or permission of instructor*

This course exposes students to fundamental aspects of security regarding cyber-physical systems, so they may apply the techniques to tackle a broad scope of current and future security challenges.

Students study several tools and techniques commonly used by hackers to compromise a system. Then they learn methods to defend against these attacks.

### **Operating Systems Security (CIS 4367) 3 credits**

*Prerequisite: COP 4610 or permission of instructor*

This course is an introduction to the secure design of operating systems. Through hands-on experimentation, students gain an understanding of how hardware and software constructs protect modern operating systems.

### **Applied Cryptography and Security (CIS 4634) 3 credits**

*Prerequisite: MAD 2104 with minimum grade of "C"*

Topics covered include mathematical background, algorithmic number theory, classical crypto, implementation aspects of private- and public-key crypto, and advanced topics such as crypto primitives, rational crypto, secure multiparty computation, hash functions, digital signatures, and privacy-preserving protocols. Students may not enroll in this course and CIS 5371.

### **Communication Networks (CNT 4007) 3 credits**

*Prerequisite: COP 3530 or COP 3410 with minimum grade of "C"*

An introductory course in computer networks with focus on internet protocol (IP) networks. Topics covered include congestion/flow/error control, routing, addressing, naming, multi-casting, switching, internetworking and network security. Students learn the concepts by implementing a series of modeling and implementation projects requiring significant design and performance evaluation.

### **Introduction to Data Communications (CNT 4104) 3 credits**

*Prerequisite: COP 3530 and CDA 3331C*

To develop an understanding of the various aspects of data communications and computer networking systems. Topics include data transmission, multiplexing, switching, Ethernet and WiFi, Internet protocols and architecture, Internetworking, transport and application layer protocols.

**Introduction to the Internet of Things and Sensor Networks (CNT 4164) 3 credits**

*Prerequisite: Senior standing or permission of instructor*

The course covers applications, architecture, routing and communication protocols for Internet of Things (IoT) and sensor networks. Technical and operational aspects of these communication networks are also discussed. The role of artificial intelligence in developing smart communication protocols and applications of IoT and sensor networks is discussed. Finally, the course includes discussions of emerging challenges, opportunities and future directions.

**Foundations of Cybersecurity (CNT 4403) 3 credits**

*Prerequisites: (COP 3410C or COP 3530C) and (CNT 4007 or COP 3813 or COP 3834)*

Overview of technical aspects of data security with emphasis on the Internet. Attacks and defenses. The design of secure systems.

**Network and Data Security (CNT 4411) 3 credits**

*Prerequisites: COP 3530 and COT 4400 or permission of instructor*

This course is an introduction to the broad field of computer, data and information security. It covers both computer security (e.g., security policies, access control, viruses, etc.) and network security (e.g., protocols for maintaining confidentiality for email or for secure web transactions), along with relevant background in basic cryptography (e.g., encryption/digital signatures).

**Computer Network Projects (CNT 4713) 3 credits**

*Prerequisite: COP 3530*

Course provides conceptual and practical understanding of the various aspects of computer networks protocols, technologies, and measurements. Introduction to network programming with emphasis on the TCP/IP protocol suite.

**Computer Programming and Data Literacy for Everyone (COP 1031C ) 3 credits**

This course introduces students from outside the College of Engineering and Computer Science to computational thinking and the art of computer programming using Excel and Python. No prior programming background is required. This is a General Education course and an Academic Service Learning (ASL) course.

**Mobile Applications for Android (COP 1660) 3 credits**

*Prerequisite: Permission of instructor*

The course helps students develop applications for the smart phone. They use a software emulator to develop the application and a real phone to demonstrate its viability. The focus is on computer science and engineering aspects to develop, debug, test and obtain performance metrics to compare and contrast the two implementations.

### **Programming 1 (COP 2220C) 0 or 3 credits**

This course teaches computational thinking and problem solving. Students learn the Python programming language, foundational programming concepts, abstraction, program design and software development tools. Students also learn the concepts by developing a series of small programs. A final project allows students to put together the programming concepts learned in the course.

### **Programming 2 (COP 3014) 3 credits**

*Prerequisite: COP 2220 with a "C" or better*

This course covers the fundamentals of object-oriented programming using the C++ language. It introduces object-oriented principles such as abstraction, composition, classes, objects, inheritance, polymorphism and interfaces. Other topics covered in the context of solving problems include Standard Template Libraries, iterators and collections, lambda expressions and elements of functional programming.

### **Foundations of Computer Science Lab (COP 3014L) 1 credit**

*Corequisite: COP 3014*

Laboratory experiments and exercises in Computer Science will be done. Students will learn to use Unix.

### **Introduction to Programming in Python (COP 3035C) 0 or 3 credits**

Introduction to programming with Python for students with no prior programming experience. Course introduces programming fundamentals, algorithm development, debugging, testing and visualization with applications.

### **Systems Programming with C++ (COP 3275C) 3 credits**

*Prerequisite: COP 2220C or COP 3035C with minimum grade of "C"*

*Corequisite: CEN 3062C*

This course builds on the foundations of programming skills, with an introduction to C++, machine characteristics and low-level data representation, memory management, modern libraries and language features, Linux system, interacting with operating-system services and introduction to concurrent programming.

### **Data Structures and Algorithm Analysis with Python (COP 3410C) 0 or 3 credits**

*Prerequisite: (COT 2000C or MAD 2104) and (CEN 3062C or COP 3035C) with minimum grades of "C"*

This course is an advanced programming class that covers data structures and algorithm analysis using the Python programming language. The course covers various data structures (including arrays, linked lists, stacks, queues, trees) and abstract data types in the design and implementation of computer programs.

### **Data Structures and Algorithm Analysis (COP 3530C) 0 or 3 credits**

*Prerequisites: (COT 2000C or MAD 2104) and (COP 3014 or COP 3275C) with minimum grades of "C"*

The design, implementation and run-time analysis of important data structures and algorithms. The data structures considered include sorted arrays, linked lists, stacks, queues, and trees. An approach based on abstract data types and classes will be emphasized. The use of recursion for algorithm design. Class design and implementation in C++. Programming assignments in the C++ language.

### **Introduction to Database Structures (COP 3540) 3 credits**

*Prerequisite: COP 3530 or COP 3410 with minimum grade of "C"*

An introduction to the design, implementation and application of database systems, with a focus on relational databases. Key core topics include relational algebra, data models, normalization, file storage, indexing, memory and transaction management and the SQL programming language. Advanced topics related to contemporary database design and applications are also covered.

### **Introduction to Internet Computing (COP 3813) 3 credits**

*Prerequisite: COP 3014 or COP 2034*

This course teaches students how to design web pages and develop websites at the introductory to intermediate level. The course is project oriented. Students are required to finish several Internet-based projects using the tools introduced in class.

### **Introduction to Web Programming (COP 3834) 3 credits**

*Prerequisite: CEN 3062C or COP 3014 or COP 3410C with minimum grade of "C"*

This course introduces frontend and backend development skills, and experience with layout, functionality and interactivity of websites. Students gain knowledge to build fast, responsive and personalized user experience websites.

### **Principles of Programming Languages (COP 4020) 3 credits**

*Prerequisites: (COP 3530 or COP 3410) and COT 4420 with minimum grades of "C"*

Programming language representation, translation and execution (compiled, interpreted); recursive-

descent parsing; type systems (static/dynamic, strong/weak), parameter passing; memory management (static/dynamic); programming paradigms: procedural, object-oriented, functional, concurrent.

### **Python Programming (COP 4045) 3 credits**

*Prerequisite: COP 3530 or COP 3410 with minimum grade of "C"*

This course covers advanced topics in the Python programming language with applications to practical problem-solving involving data manipulation and analysis. The course provides a quick introduction to Python. Topics covered are data structures (lists, arrays, dictionaries, sets, comprehensions), functions, files and object-oriented language elements. In the second part of the course, students learn to apply advanced language features and methodologies in combination with third-party libraries for scientific computation to develop real-world applications.

### **Advanced Java Programming (COP 4259) 3 credits**

*Prerequisite: COP 3530 or COP 3410 with minimum grade of "C"*

This Java course for problem solving and programming covers basic and advanced topics in Java, including, but not limited to, flow of control, classes, methods, arrays, strings, inheritance, polymorphism, interfaces, algorithms, data structures and applications.

### **Object-Oriented Design and Programming (COP 4331) 3 credits**

*Prerequisite: COP 3530 or COP 3410*

Introduces the Java programming language and the main phases of the object-oriented development process, including requirements analysis, design and implementation. Focuses on object-oriented design principles and covers topics such as UML, design patterns, reflection, serialization, generic types and multithreading. Students collaborate on a software term project that involves the entire development cycle.

### **Computer Operating Systems (COP 4610) 3 credits**

*Prerequisite: CDA 4102 and COP 3530 C with minimum grade of "C"*

This course provides the basic concepts and core principles used in modern operating systems. Topics covered include processes, concurrency, synchronization, scheduling, multiprogramming, memory management and file systems. The students learn the concepts by developing a series of simulations and small programs. A group project allows students to put together the concepts learned in the course.

### **Mobile App Project (COP 4655) 3 credits**

*Prerequisite: COP 3530 or COP 3410 with minimum grade of "C"*

This course is an introduction to mobile app development for common mobile platforms. Course uses frameworks and tools that are widely used in the industry. Students learn fundamentals of app

development and complete a course project.

### **Advanced Database Systems (COP 4703) 3 credits**

*Prerequisite: COP 3540 with minimum grade of "C"*

An introduction to contemporary database designs and applications, with a focus on non-relational databases common in the era of big data. Key core topics include an introduction to NoSQL, aggregate data and distribution models, as well as column-oriented, key-value, document-oriented and graph-oriented databases. Open-source NoSQL database programs are highlighted to solidify concepts and to equip students with skills transferable beyond the classroom.

### **Full-Stack Web Development (COP 4808) 3 credits**

*Prerequisite: COP 3813 or COP 3826 COP 3530 or COP 3410 with minimum grade of "C"*

This course teaches students how to design and develop websites and web-based applications using contemporary tools and standards. This course is project-oriented. Student develop hands-on knowledge of the latest web development tools, languages and frameworks, and use that knowledge to complete several web-based projects.

### **Foundations of Cloud Computing (COP 4814) 3 credits**

*Prerequisite: COP 3530 or COP 3410 with minimum grade of "C"*

Introduction to the concept of cloud computing as a new programming model for dynamic application interaction over the web. The course covers how to program web services and micro-services and how to implement, describe, register, discover, invoke and deploy web services using web services' standards, such as SOAP, WSDL, UDDI and RESTful.

### **Cutting-Edge Web Technologies (COP 4854) 3 credits**

*Prerequisites: COP 3530 and COP 3813*

Hands-on knowledge of the latest web development tools, languages, and models. Students develop projects consisting of innovative web-based solutions. Topics include characteristics and foundations of web-based applications; web development frameworks and best practices; server-side and client-side technologies, languages and libraries; usability and human factors; and content-sharing tools and technologies.

### **Foundations of Computing (COT 2000C) 3 credits**

Basic course that introduces foundational concepts in computing, including common tools for software development.

### **Topics in Computer Science and Engineering (COT 2930) 1-3 credits**

*Prerequisite: Permission of instructor*

Study relating to specialized topics.

### **Topics in Computer Science and Engineering (COT 3930) 1-3 credits**

*Prerequisite: Permission of instructor*

Study relating to specialized topics.

### **Cooperative Education - Computer Science/Engineering (COT 3949) 1-3 credits**

*Prerequisite: Permission of department*

*Grading: S/U*

### **Design and Analysis of Algorithms (COT 4400) 3 credits**

*Prerequisite: COP 3530 or COP 3410 with minimum grade of "C"*

Mathematical analysis of algorithm complexity; algorithm design techniques (such as divide and conquer, greedy and dynamic programming) in the context of problem domains such as sorting and optimization problems; graph algorithms; data structures (heaps, priority queues, hash tables and binary search trees); introduction to NP-completeness.

### **Theory of Computation (COT 4420) 3 credits**

*Prerequisite: COP 3530 or COP 3410 with minimum grade of "C"*

Formal models of computation, including finite state automata, pushdown automata and Turing machines; applications to deciding (parsing) formal languages, including regular, linear and context-free languages; non-determinism; the Church-Turing thesis.

### **Directed Independent Study (COT 4900) 1-3 credits**

*Prerequisite: Permission of instructor*

Study of topics relating to the special needs and interests of individual students.

### **Topics in Computer Science and Engineering (COT 4930) 1-3 credits**

*Prerequisite: Permission of instructor*

Study relating to specialized topics.

### **Senior Seminar (COT 4935) 1 credit**

*Prerequisite: Senior standing; open only to Computer Science or Computer Engineering majors*

Study and discussion regarding the social, legal, and ethical aspects of computing.

### **Electronics 1 (EEE 3300) 3 credits**

*Prerequisite: EEL 3111 with minimum grade of "C"*

Operational amplifiers and applications to analog signal processing and conditioning; introduction to electronic circuits simulation software (such as PSPICE and ADS); introduction to solid state

semiconductor devices (diodes, BJT, MOSFET) and their applications.

### **High Frequency Amplifier Design (EEE 4360C) 3 credits**

*Prerequisites: EEL 3470, EEE 3300*

Scattering parameters, matching networks and the Smith chart, amplifier stability considerations, amplifier design to meet various criteria, low noise, broadband, high power amplifier design, RF oscillator design, CAD design techniques.

### **Electronics 2 and Lab (EEE 4361 C ) 3 credits**

*Prerequisites: EEE 3300 and EEL 3118L with minimum grades of "C"*

Simulation and computer-aided analysis and design (with ADS) of multi-transistor BJT and MOSFET wideband amplifiers: Differential amplifiers, single-stage and multi-stage voltage amplifiers, amplifier bandwidth and feedback amplifiers. Hands-on lab experiments include design of BJT wideband amplifiers, mini-project competitions and familiarization with industry-grade equipment such as network, logic and spectrum analyzers.

### **Electronics 3 and Lab (EEE 4362C) 3 credits**

*Prerequisite: EEE 4361C with minimum grade of "C"*

This course provides the student with both the theory and applications of digital and analog electronics beyond Electronics 2. Topics include CMOS analog and digital analysis and design of integrated electronic circuits, computer-aided circuit simulation and design with ADS and electronics lab tools.

### **Nanobiotechnology (EEE 4424) 3 credits**

*Prerequisite: Permission of department*

The sensing and characterization of biological entities, processes and events with novel nanoscale devices and non-object mediated modalities has immediate and far-reaching impacts. This course covers the fundamentals of nanotechnology in biological and biomedical research. The coursework is approached from an engineering perspective offering insights on the details of nanoscale fabrication processes as well as cell biology.

### **Introduction to Digital Signal Processing (EEE 4510) 3 credits**

*Prerequisite: EEL 3502 with minimum grade of "C"*

Introduction to digital signal processing, review of Fourier, Laplace and Z-transforms, discrete Fourier transform, the FFT algorithm, digital filter design and implementation, basic theory of adaptive filter design and implementation, LMS algorithm, Wavelet transform and filtering.

### **Stochastic Processes and Random Signals (EEE 4541) 3 credits**

*Prerequisite: MAC 2312 with minimum grade of "C"*

Introduction to probability, statistics and random processes, conditional probability, random variables, distribution and density functions, stochastic processes, the central limit theorem, power spectral density, detection of signals in the presence of noise. Applications communication networks and system performance evaluation.

### **Special Topics (EEL 1935) 1-4 credits**

*Prerequisite: Permission of instructor*

Lower-division special topics in areas of electrical engineering not covered by other courses such as experimental advanced high school work.

### **C for Engineers (EEL 2161 ) 3 credits**

Introduces the fundamental capabilities of C++ and MATLAB. Illustrates the numerical problem-solving process, testing and interpretation of results through a variety of engineering examples and applications.

### **Circuits 1 (EEL 3111) 3 credits**

*Prerequisites: PHY 2049 and EGN 1002 with grades of "C" or better*

*Prerequisites or Corequisites: MAC 2313 and MAP 3305*

Introductory to electric circuit analysis: passive and active sign conventions; Ohm's and Kirchhoff's laws; network analysis, theorems as applied to d-c and a-c circuits; basic op-amp circuits; single time constant transient analysis; phaser representations and sinusoidal steady state; real and reactive single phase power.

### **Circuits 2 (EEL 3112) 2 credits**

*Prerequisite: EEL 3111 with minimum grade of "C"*

Continuation of Circuits 1: Second order transient response; 3-phase power; Fourier series; Laplace transforms; frequency response; 2-port networks; introduction to computer analysis with PSPICE and MATLAB.

### **Electronics Laboratory 1 (EEL 3118L) 3 credits**

*Prerequisite or Corequisite: EEE 3300 with minimum grade of "C"*

Introduction to basic electronic test equipment and measurement techniques; analysis and design of passive electrical RC circuits; analysis and design of op-amp, diode and BJT analog circuits, and introduction to MOSFET circuits.

### **Electromagnetic Fields and Waves (EEL 3470) 3 credits**

*Prerequisites: EEL 3111, MAC 2313*

Vector analysis, electrostatic fields, magnetostatic fields, transverse electromagnetic waves, reflection and refraction of plane waves, and transmission lines.

### **Signals and Digital Filter Design (EEL 3502) 3 credits**

*Prerequisite: MAC 2312 with minimum grade of "C"*

Sampling and data reconstruction, Z Transform, design of simple digital FIR and IIR filters, MATLAB programming and hardware implementation considerations, selected audio and image processing applications and basic spectrum analysis using FFT. Special emphasis is on the processing of realistic music, sound and image signals. Significant portion of the course lecture time is devoted to MATLAB DSP demonstrations.

### **Electronics Laboratory 2 (EEL 4119L) 3 credits**

*Prerequisites: EEE 4361C , EEL 3118L with minimum grades of "C"*

*Prerequisites or Corequisites: EEL 3470, EEL 4656*

Experiments and projects to supplement the theoretical work in core courses.

### **Network Synthesis (EEL 4140) 3 credits**

*Prerequisite: EEL 4656*

Introduction to filter design. Topics include physical realizability, passive and active 2-port network synthesis, sensitivity calculations, switched capacitor filters, OTAs, introduction to digital filters.

### **Electric Power Systems (EEL 4216) 3 credits**

*Prerequisite: EEL 3111*

Fundamentals of electromechanical devices; energy conversion, transformers and rotary machines. The operation and analysis of power systems is presented. Topics include energy supply and demand, structure of power systems, power system components, voltage and frequency control and load flows.

### **Electrical Machines (EEL 4220) 3 credits**

*Prerequisite: EEL 3111 with minimum grade of "C"*

Transformers, 3-phase distribution systems, 3-phase motors and generators, dc motors and generators, motor speed control, single phase ac motors.

### **Photovoltaic Power Systems (EEL 4281) 3 credits**

*Prerequisite: EEE 3300 with minimum grade of "C"*

This course provides students with both theory and applications of the fundamental principles of photovoltaic systems. This course also introduces the latest research and development on photovoltaic-integrated smart grid technology. Students gain real-world experience from design project(s).

### **RF Devices and Circuits (EEL 4421C) 3 credits**

*Prerequisite: EEL 3470 with minimum grade of "C"*

RF filter design, active RF components and component modeling, matching and biasing networks, RF oscillators, mixers and frequency synthesizers, use of RF CAD software for system simulation.

### **RF and Microwave Laboratory (EEL 4433C) 3 credits**

*Prerequisite: EEL 3470*

Develop a basic understanding of modern microwave measurement techniques, practical laboratory measurements and introduction to microwave CAD design software on UNIX based workstations.

### **Microwave Engineering (EEL 4436C) 3 credits**

*Prerequisites: EEL 3470, EEE 3300*

Review of electromagnetics, transmission lines, waveguides, microwave network analysis, impedance matching and tuning, microwave resonators, microwave power dividers, couplers and filters, microwave oscillators and mixers, CAD design techniques.

### **Introduction to Antennas (EEL 4461) 3 credits**

*Prerequisite: EEL 3470*

Antenna parameters, wire antennas, loop antennas, array matching techniques, broadband antennas, traveling wave antennas and antenna measurements.

### **Electromagnetic Compatibility (EEL 4478) 3 credits**

*Prerequisites: EEE 4361C and EEL 3470*

Introduction to electromagnetic compatibility (EMC), intersystem and intra-system interferences and their characteristics, coupling by conduction and radiation, shielding, and interference reduction techniques.

### **Principles of Communication Systems (EEL 4512 C ) 3 credits**

*Prerequisites: MAC 2313 and EEL 3502 with minimum grades of "C"*

*Prerequisite or Corequisite: EEE 4541 or STA 4821*

Linear time-invariant systems; impulse response and transfer function; AM/FM modulators and demodulators; random processes through linear systems; power spectral density; noise effects in continuous waveform modulation systems. Select homework requires use of Matlab for experimentation and simulations.

### **Communications Systems Lab (EEL 4512L) 1 credit**

*Prerequisite or Corequisite: EEL 4512*

Lab experiments include: AM and FM transmitters and receivers, time division and frequency

multiplexing, phase-locked loops.

### **Introduction to Digital Communication Systems (EEL 4522) 3 credits**

*Prerequisite: EEL 4512C with minimum grade of "C" or permission of instructor*

Sampling and quantization; pulse-code modulation; delta modulation; matched filters, inter-symbol interference and adaptive equalizers; coherent BPSK, BFSK; non-coherent BFSK and differential BPSK; M-ary modulation and bandwidth efficiency; spread-spectrum communications and CDMA systems; channel coding. Select homework assignments require use of MATLAB for experimentation and simulations.

### **Introduction to Wireless Communication Systems (EEL 4580) 3 credits**

*Prerequisite: EEL 4512C with minimum grade of "C" or permission of instructor*

This course introduces students to fundamental principles of wireless system design, focusing on modern techniques used in wireless cellular systems (5G/6G and beyond) and WiFi, various levels of system design, from information compression, modulation/detection to traffic analysis. Labs and a project are given on how to design and build a wireless system and how to test the system on software radios.

### **Control Systems 1 (EEL 4652 C ) 3 credits**

*Prerequisites: EEL 3502 and MAP 3305 with minimum grades of "C"*

Theory and hands-on practice of classical control: stability, transient and steady-state performance, controller design techniques, simulations and computer-aided system design; lab experiments of digital control using microcontrollers.

### **Control Systems Lab (EEL 4652L) 1 credit**

*Prerequisite or Corequisite: EEL 4652*

Lab experiments including analog computers, PID temperature control, DC servo, system identification from frequency response, computer-aided design, system simulation using MATLAB and introduction to digital control systems.

### **Analysis of Linear Systems (EEL 4656) 3 credits**

*Prerequisite: EEL 3111 with minimum grade of "C"*

State variables, delta function and Impulse response, convolution, Fourier Transform and applications, discrete time systems, Z-transform and applications, Fourier transform of discrete signals.

### **Directed Independent Study (EEL 4905) 1-4 credits**

*Prerequisite: Permission of instructor*

Study of topics relating to the special needs and interests of individual students. May be taken for

repeated credit.

### **Special Topics (EEL 4930) 1-4 credits**

*Prerequisite: Permission of instructor*

Topics in specialized areas, such as networks, electronics, and machines, not adequately covered in other courses. May be repeated for credit.

### **Cooperative Education - Electrical Engineering (EEL 4949) 1-4 credits**

Cooperative work study for electrical engineering students. *Grading: S/U*

### **3D Modeling and Design (ETD 3366) 3 credits**

*Prerequisite: CDA 3203 with minimum grade of "C"*

This course introduces students to the basic concepts of SOLIDWORKS and AutoCAD, including 3D modeling with emphasis on electrical and electronic applications.

### **Nature: Intersections of Science, Engineering, and the Humanities (ETG 2831) 3 credits**

Course focuses on the reciprocal influence of science in its endeavor to understand nature, engineering in it attempts to harness nature, and the humanities in their essential role as the shapers of values. This is accomplished through a combination of learned readings, penetrating discussions, computer models and software tools, and a final project and competition. This is a General Education course.

### **Artificial Intelligence Applications in Biology (IDS 4139) 3 credits**

[\(See Interdisciplinary Studies courses, College of Science section\)](#)

### **Data Science Capstone (ISC 4941) 1-3 credits**

*Prerequisites: CCJ 3071, CAP 2751, CAP 2753, MAP 2192, QMB 3302, and STA 2023*

Students in the B.S. program with Major in Data Science and Analytics apply theoretical knowledge, methods and tools to a real-world data science problem. Students can work individually or in teams under the supervision of the course instructor or another faculty member.

### **Introduction to Queueing Theory (MAP 4260) 3 credits**

*Prerequisite: STA 4821*

Queueing theory and its application to computer performance evaluation, operating systems analysis, telecommunications, and operations research.

### **Stochastic Models for Computer Science (STA 4821) 3 credits**

*Prerequisite: MAC 2312 or MAC 2282 with minimum grade of "C"*

Basic principles of probability and statistics for modeling and experimentation in computer science.

Topics include conditional probability, random variables, distribution and density functions, stochastic

processes, queueing theory, the central limit theorem and simulation.

## **Electrical Engineering and Computer Science Graduate Courses**

### **Introduction to Biomedical Engineering (BME 5000) 3 credits**

Course provides a broad perspective of biomedical engineering as applied to topics in contemporary biology, physiology, and medicine, including biotechnology and bioinformatics.

### **Bioimaging (BME 5537) 3 credits**

Course provides students of engineering and science with an introduction to the physical and signal processing bases of modern medical imaging systems.

### **Biosystems Modeling and Control (BME 5742) 3 credits**

Dynamic modeling and control of select biological and physiological processes.

### **Special Topics in Bioengineering (BME 5937) 3 credits**

*Prerequisite: Permission of instructor*

Selected topics in bioengineering.

### **Stem Cell Engineering (BME 6324) 3 credits**

Focuses on the stem cell's research and engineering to clarify the nature of these cells, their sources and categories, their engineering for different purposes, their role as cellular therapeutic approach, reprogramming of ordinary cells into stem cells through a combination of readings, penetrating discussions and animation of new techniques and tools (short movies).

### **Tissue Engineering (BME 6334) 3 credits**

Principles and newest concepts of tissue engineering. Learning and studying molecular, cellular and tissue culture aspects of TE and Laboratory work and high level of instrumentations that helps this Laboratory work to grow the tissues. Mechanical functions of the cells, extracellular matrix, types, quality, purposes of scaffolds as the supporters of 3-D tissue growth, discussed.

### **Neural Engineering (BME 6362) 3 credits**

Neural engineering concentrates on the development of technologies for rehabilitation, treatment or compensation of damages in the central and peripheral nervous systems. Modern techniques and signal processing algorithms used in brain machine interface applications, including different brain recording and stimulation methods and closed-loop brain control applications, are discussed.

### **Computational Modeling of Biological Neural Networks (BME 6425) 3 credits**

This course covers main concepts of neuroscience and uses tools from science and mathematics to

explain how information is processed in the brain. The course begins at modeling single brain cells and expands to computational models of neural coding and architecture of biological neural networks.

**Bioinformatics: Biomedical Perspectives (BME 6762) 3 credits**

*Prerequisite: Engineering/Science B.S. degree*

Introduction to bioinformatics - definition and applications. Concepts and definitions of molecular biological terms. Genomics and Proteomics. Biological sequence analysis and Next-generation sequencing. Translational and clinical bioinformatics. Viral bioinformatics and rational vaccine designs. Cytogenetic and phylogenetic informatics. Sequence search analysis tools and protocols. Information resources: databases and networks.

**Algorithms in Bioinformatics (BME 6765) 3 credits**

*Prerequisite: CAP 5548 or COP 3410 or COP 3530 with minimum grade of "C" or permission of instructor*

This course covers the data structures and algorithms commonly used in the field of bioinformatics. Emphasis on topics related to classical and modern techniques employed for biological sequence and peptide analysis.

**Directed Independent Study (BME 6905) 1-4 credits**

Directed independent study as defined by instructor.

**Special Topics in Bioengineering (BME 6935) 3 credits**

*Prerequisite: Permission of instructor*

Selected topics in bioengineering.

**Master's Thesis - Bioengineering (BME 6971) 1-9 credits**

Thesis work under supervision. *Grading: S/U*

**Data Analysis and Modeling for Cybersecurity (CAI 6803) 3 credits**

*Prerequisite: Permission of instructor*

This course introduces data science to the field of cyber security. Digital investigation approaches for cybersecurity are discussed. Further, data analytics and traffic analysis methodologies are presented. Data acquisition and sound analysis methods are also explained. Approaches for inferring and attributing various types of cyberattacks are presented.

**Digital Image Processing (CAP 5405) 3 credits**

*Prerequisite: Permission of instructor*

This course introduces students to image processing principles, tools, techniques, and algorithms. topics

include image representation, analysis, filtering and segmentation, and pattern recognition. students are trained to use image processing software tools for lab assignments and projects.

### **Data Structures and Algorithms for Bioinformatics (CAP 5548) 3 credits**

*Prerequisites: COP 3035 and PCB 3063 or permission of instructor*

This course introduces students to the data structures and analysis of algorithms using the Python programming language. It covers the various data structures and data types in the design and implementation of computer programs. Emphasis is on topics related to bioinformatics applications.

### **Introduction to Neural Networks (CAP 5615) 3 credits**

*Prerequisite: Graduate standing*

Brief introduction to biological neural systems. Models of neural mechanisms of learning and memory. Neural net applications to image processing, pattern recognition, machine learning, optimization problems, and robotics. Hardware implementation issues.

### **Computational Foundations of Artificial Intelligence (CAP 5625) 3 credits**

*Prerequisite: COP 2220 or COP 3035 or permission of instructor*

This course covers the mathematical and programming foundations of artificial intelligence (AI) and machine learning (ML) using contemporary programming languages and tools. As a result, students develop familiarity with mathematical methods (and associated notation, software packages and libraries) that are widely used in AI and ML projects and literature.

### **Introduction to Data Science (CAP 5768) 3 credits**

*Prerequisite: Programming competency at the level of an online short course (e.g., Code Academy)*

This course surveys foundational topics in data science and reinforces practical programming skills in the context of data analytics. Students learn fundamentals of computational data analysis using statistics and machine learning and gain experience working with data sets from a variety of domains. Students may not enroll in CAP 5768 if they have already taken CAP 4773.

### **Special Topics in Artificial Intelligence (CAP 5937) 3 credits**

*Prerequisite: Permission of instructor*

Selected topics in artificial intelligence.

### **Multimedia Systems (CAP 6010) 3 credits**

Components of multimedia systems. Fundamental techniques for multimedia compression and multimedia synchronization. Multimedia networks. Video retrieval and indexing techniques. Overview of multimedia tools and applications, such as on-demand services and video conferencing, and questions of suitability of problems for expert systems solution and of means of attack.

### **Multimedia Programming (CAP 6018) 3 credits**

This course provides background and experience in efficient multimedia development. Students develop multimedia applications, such as media players.

### **Social Networks and Big Data Analytics (CAP 6315) 3 credits**

This course teaches students basic concepts of Big Data Analytics with focus on social network analysis and modeling. The class covers three major topics: graphs and social network models, Big Data Analytics platform and MapReduce (Hadoop) programming, and social network analytics and mining algorithms.

### **Foundations of Vision (CAP 6411) 3 credits**

*Prerequisite: Graduate standing or permission of instructor*

Study of the interdisciplinary science of vision combining the psychological, neurophysiological, and computational aspects of vision research. Research paper and project topics will be chosen from a list of latest developments in the field.

### **Computer Vision (CAP 6415) 3 credits**

*Prerequisite: Graduate standing*

Course covers fundamentals of computer vision and their applications in various areas such as medicine, homeland security, entertainment, and manufacturing.

### **Evolutionary Computing (CAP 6512) 3 credits**

*Prerequisite: COP 3530*

Course provides understanding and exploration of biologically inspired computation. In-depth look at genetic algorithms (variables to be optimized and/or minimized), genetic programming (tree representation and parsing), classifier systems (GA variations and production rules), and evolutionary programming and strategies. Students will have a number of hands-on simulations and design assignments.

### **Computational Genomics (CAP 6517) 3 credits**

*Prerequisites: COP 3035 and PCB 3063 or permission of instructor*

This course focuses on the computational analysis of modern high-throughput genomic data. In particular, the course covers the application of R packages in performing exploratory data analysis, predictive modeling and addressing questions about different types of genomic data.

### **Data Mining for Bioinformatics (CAP 6546) 3 credits**

*Prerequisites: (COP 2220 or COP 3035) and (STA 2023 or STA 4821) or permission of instructor*

Course focuses on the principles of data mining as it relates to bioinformatics. Topics covered include gene selection, class imbalance, classification, biomarker discovery and prediction models. No prior knowledge of biology is required.

### **Databases for Bioinformatics (CAP 6547) 3 credits**

*Prerequisites: CAP 5548 and COP 3410 or COP 3530 or permission of instructor*

This course provides students with theory and tools for the design and implementation of relational database systems with an emphasis on bioinformatics applications.

### **Applied Machine Learning (CAP 6610) 3 credits**

*Prerequisite: STA 2023*

This course covers theoretical foundations and tools for machine learning and data analytics. The class introduces major machine learning topics, such as supervised learning, unsupervised learning and numeric predictive models. Case studies include application of machine learning to different domains. Credit will not be given for both CAP 4612 and CAP 6610.

### **Sparse Learning (CAP 6617) 3 credits**

This course introduces new concepts, theory, algorithms and applications of sparse representation and modeling, and their relationship with deep learning. Topics covered include mathematical preliminaries, L1 optimization, pursuit algorithms, sparse representation classifiers, sparse dictionary learning, sparse deep learning and applications.

### **Machine Learning for Computer Vision (CAP 6618) 3 credits**

*Prerequisite: Programming skills*

Introduction to machine learning techniques and their application in computer vision problems. Discusses image processing principles, techniques and algorithms. Use of MATLAB for lab assignments and projects.

### **Deep Learning (CAP 6619) 3 credits**

This courses teaches students basic concepts of deep learning with applications in computer science, engineering, business and other areas. The class covers major topics including math preliminaries, machine learning basics, deep forward networks, convolution networks, autoencoders, representation learning networks and their implementations and applications.

### **Reinforcement Learning (CAP 6629) 3 credits**

Students in this course study theoretical properties and practical applications of reinforcement learning. Course topics include Markov decision process, dynamic programming, temporal-difference learning, planning and learning with tabular methods, and deep reinforcement learning.

### **Artificial Intelligence (CAP 6635) 3 credits**

The basic concepts, techniques, and applications of artificial intelligence: representations, search strategies, control, communication, deduction, agents, evolutionary computation and machine learning.

### **Natural Language Processing (CAP 6640) 3 credits**

This course provides students with both theory and applications of natural language processing. It includes relevant background material in linguistics, mathematics, probability and computer science. Some of the topics covered in the class are text similarity, part-of-speech tagging, parsing, semantics, question answering, sentiment analysis and text summarization.

### **Data Mining and Machine Learning (CAP 6673) 3 credits**

Course deals with the principles of data mining and machine learning. Topics to be covered include machine learning methods, knowledge discovery and representation, classification and prediction models.

### **Artificial Intelligence in Medicine and Healthcare (CAP 6683) 3 credits**

*Prerequisite: Graduate standing or permission of instructor*

This course introduces the underlying concepts, methods and potential of intelligent systems in medicine. It explores the application of artificial intelligence (AI) and machine learning methods, techniques and tools to specific areas in medicine and healthcare. As a research-and-project-based course, student have opportunities to identify and specialize in particular AI methods, clinical/healthcare applications and relevant tools.

### **Information Retrieval (CAP 6776) 3 credits**

This course teaches concepts, techniques and popular tools and applications in information retrieval (IR), which aims to obtain relevant information from a collection of resources. The class covers efficient text indexing, text processing, web search and text mining. New applications are also introduced.

### **Web Mining (CAP 6777) 3 credits**

Course covers the techniques used to model, analyze, and understand the Internet and the web, especially the web graph and hypertext data.

### **Advanced Data Mining and Machine Learning (CAP 6778) 3 credits**

*Prerequisite: CAP 5615 or CAP 6635 or CAP 6673*

The study of advanced topics in data mining and machine learning. Current research issues in data mining and its application in bioinformatics, computer network security, computer science, and

software engineering.

### **Data-Driven Engineering (CAP 6805) 3 credits**

*Prerequisite: Permission of instructor*

The main objective of the course is to teach students the skills they need for system modeling, system behavior prediction or training adaptive systems all based on using relatively large datasets. Advanced methods of linear algebra, computer programming and optimization techniques are core elements of the course.

### **Computational Advertising and Real-Time Data Analytics (CAP 6807) 3 credits**

*Prerequisites: Graduate standing or permission of instructor; open to graduate students in Computer Engineering, Computer Science, Electrical Engineering*

This course teaches students basic concepts of computational advertising with a focus on real-time data analytics for displaying advertisement. The class introduces different key aspects of building platforms for online advertising, the computational requirement, tools and solutions.

### **Directed Independent Study in Artificial Intelligence (CAP 6901) 1-3 credits**

The study of topics relating to the special needs and interests of individual students.

### **Special Topics in Artificial Intelligence (CAP 6938) 3 credits**

*Prerequisite: Permission of instructor*

Selected topics in artificial intelligence.

### **Graduate Projects in Electrical Engineering and Computer Science (CAP 6951) 3 credits**

*Prerequisite: Graduate standing in the College of Electrical Engineering and Computer Science or permission of instructor*

Students apply theory, methods and analysis tools in a team-oriented environment to a real-world problem. These projects are supervised by the course instructor, faculty members within the EECS Department or local industry engineers, analysts and scientists.

### **Master's Thesis - Artificial Intelligence (CAP 6974) 1-9 credits**

*Prerequisite: Admission to candidacy*

Thesis work under supervision. *Grading: S/U*

### **Data Acquisition and Control (CDA 5175) 3 credits**

*Prerequisite: CDA 3331C*

A project-oriented course focusing on the design and implementation of data acquisition and control applications. Students learn the fundamental issues of sensing real life signals, analyzing data, and

controlling actuators. Students also learn how to select the right hardware/software combination to best fit any given application. Course is open for both graduate and senior undergraduate students in the science and engineering disciplines.

### **Cryptographic Engineering (CDA 5326) 3 credits**

This course provides an application perspective of cryptography and focuses on the computations, engineering and secure implementations. This is a course for students interested in hardware and software design in industry and real-world security and cryptographic applications.

### **Evaluation of Parallel and Distributed Systems (CDA 6122) 3 credits**

Analytical modeling techniques for evaluating performance, reliability, and performability of parallel and distributed systems. Case studies.

### **Multiprocessor Architecture (CDA 6132) 3 credits**

Multiprocessor interconnections and memory organizations. Performance evaluation, software issues, and case studies.

### **Advanced Computer Architecture (CDA 6155) 3 credits**

*Prerequisite: CDA 4102 or equivalent*

The course offers basic concepts and techniques needed to design and analyze high performance computer architecture.

### **Structured VLSI Design (CDA 6214) 3 credits**

*Prerequisite: CDA 4204 or permission of the instructor*

Use of commercial, state-of-the-art computer-aided design software for structured, testable design synthesis for CMOS VLSI. Design complexity: A 16-bit microcontroller.

### **Embedded System Design 1 (CDA 6316) 3 credits**

Develops the ability to define and design microcontroller-based systems using state-of-the-art system design tools and methodologies.

### **Networks on Chip (CDA 6565) 3 credits**

*Prerequisite: CDA 4102, CNT 4713 or permission of instructor*

Course focuses on a systematic approach to the design of the communication infrastructure as a feasible solution to design complex systems. Networks on chip (NoC) over the next decade could lead to a fundamental paradigm shift in system modeling, design and development.

### **Software Engineering (CEN 5035) 3 credits**

*Prerequisite: Graduate standing*

An introduction to basic principles and practices of software engineering. Emphasis is placed on programming language support for software engineering principles, especially techniques for data abstraction, code reusability, and programming-in-the-large. Other topics include software life cycle models, general design, implementation and testing issues, specification and design methodologies, and model-based approaches to software design.

### **Auto Code Generation (CEN 5042) 3 credits**

*Prerequisites: Graduates or seniors in Computer Science and Computer Engineering, others with permission of instructor; familiarity with Java, XML and UML desirable, but will be covered in an accelerated manner* Software tool and library development for modern applications using the MVC (model-view-control) paradigm; use of Java. XML and UML to facilitate rapid development of optimized applications. Use of Eclipse Modeling Framework (EMF) to generate code easily.

### **Cloud Computing (CEN 5086) 3 credits**

*Prerequisite: Graduate standing*

Study of cloud computing and the use and architecture of this model of computation. Exploration of the services provided by clouds, their internal structure and their possibilities and limitations.

### **Special Topics (CEN 5931) 1-4 credits**

### **Software Maintenance and Evolution (CEN 6027) 3 credits**

This course covers fundamental aspects of software maintenance and evolution, including concepts and techniques, process models for system evolution, and software maintenance case studies.

### **Software Requirements Engineering (CEN 6075) 3 credits**

*Prerequisite: CEN 4010, CEN 5035, or another introductory course in software engineering*

Principles of requirements elicitation, specification and analysis. A broad range of methods will be presented in the context of how they support these principles. Both functional and non-functional requirements will be addressed. Other topics include problem analysis, modeling, requirements documentation, and prototyping.

### **Software Engineering Measurements (CEN 6080) 3 credits**

*Prerequisite: Knowledge of SW engineering/permission of instructor*

Basic concepts, techniques, and applications of software complexity metrics. Topics covered include theory of measurement, applying measurements to software, token-based metrics, data collection, cost estimation models, productivity measures, quality, and reliability models.

### **Software Reliability Engineering (CEN 6081) 3 credits**

*Prerequisite: STA 4821*

Introduction to the basic principles of software reliability engineering. Topics covered include system definition, model selection, parameter determination, and project-specific techniques and applications.

### **Software Architecture and Patterns (CEN 6085) 3 credits**

*Prerequisite: COP 5339*

A study of high-level reusable abstractions that describe the integration of interacting components in a complex software system and the reusable patterns that describe solutions to recurring problems in software engineering.

### **Computer Performance Modeling (CEN 6405) 3 credits**

Use of statistical software packages such as SAS for data validation, description and analysis of statistical models used in computer science and software engineering.

### **Special Topics (CEN 6930) 3 credits**

### **Graduate Seminar (CGS 5937) 0 credit**

*Prerequisite: Graduate standing*

A seminar series with distinguished speakers. Students must attend at least five seminar presentations.

*Grading: S/U*

### **Practical Aspects of Modern Cryptography (CIS 5371) 3 credits**

*Prerequisite: Graduate standing*

Topics to be covered: (a) mathematical background, algorithmic number theory, classical crypto, implementation aspects of private- and public-key crypto, and (b) advanced topics on crypto such as crypto primitives, rational crypto, secure multiparty computation, hash functions, digital signatures and privacy-preserving protocols. Students may not enroll in CIS 5371 if they have already taken CIS 4634.

### **Computer Data Security (CIS 6370) 3 credits**

Overview of the technical aspects of data security with emphasis on the Internet and the design of secure systems.

### **Distributed Systems Security (CIS 6375) 3 credits**

*Prerequisite: CIS 6370*

Most practical information systems are distributed systems. They provide access to corporate information on employees and customers and must adapt to application needs. This course considers the security issues of such systems together with possible solutions.

### **Cryptocurrencies and Blockchain Technologies (CIS 6730) 3 credits**

*Prerequisites: (Graduate standing or permission of instructor) and programming skills*

This course introduces technical aspects of blockchains, public distributed ledgers and cryptocurrency systems. Students also learn the concepts and tools for developing distributed and secure applications with public distributed ledgers.

### **Computer Networks (CNT 5008) 3 credits**

*Prerequisite: Graduate standing*

Covers the internet architecture and its main communication protocols, including the physical layer and connection technologies (e.g., Ethernet and WiFi), routing, transport protocols, end-to-end application protocols (e.g., HTTP and DNS), performance aspects, technology advances and future directions.

### **Sensor Networks and Smart Systems (CNT 5109) 3 credits**

*Prerequisite: Permission of instructor*

This research-oriented course focuses on smart system applications and discusses sensor networks and their use in smart systems.

### **Computer Network Programming (CNT 5715) 3 credits**

*Prerequisites: CNT 4104 and COP 3530*

A network communication course with focus on the programming aspects of computer networking protocols. Students are required to develop a communication protocol system.

### **Embedded Networked Sensor Systems (CNT 6108 ) 3 credits**

*Corequisite: COP 3530*

This course introduces the technical foundations of embedded networked sensor systems, the building blocks of the Internet of Things. Both theory and implementation are emphasized, covering concepts, software foundations, basic embedded circuits, communication protocols and network algorithms.

### **Internet of Things (CNT 6167) 3 credits**

*Prerequisite: Permission of instructor*

This research-oriented course covers technical and operational aspects of the Internet of Things (IoT) and includes a discussion on the most recent advances and innovative applications.

### **Advanced Computer Networking (CNT 6516) 3 credits**

*Prerequisite: CNT 4104 or equivalent C/C ++ programming*

Covers advanced topics in computer networking, such as ad hoc wireless networks, cognitive networking, delay-tolerant networks and software defined networking. Students will understand the key mechanisms and networking protocols underlying these emerging networking architectures.

### **Vehicular Networks (CNT 6528) 3 credits**

Studies vehicular ad hoc networks routing and MAC protocols, broadcast protocols, applications and performance modeling.

### **Mobile Computing (CNT 6517) 3 credits**

A study of the main issues in mobile computing and the approaches that address them.

### **Ad Hoc Networks (CNT 6518) 3 credits**

*Prerequisites: CNT 4104 and MAD 2104*

A comprehensive approach to fundamentals of ad hoc networks, including media access protocols, routing protocols, implementation, and communication performance.

### **Video Communication (CNT 6885) 3 credits**

This course introduces video compression and issues in video transmission over wired and wireless networks. Course covers video technologies widely used in the industry, such as MPEG-2, MPEG-4, H.264, and transport protocols, such as RTP.

### **Object-Oriented Software Design (COP 5339) 3 credits**

*Prerequisite: Proficiency in C or C++ programming*

Classes and objects as the basis of software development. Object-oriented analysis and design using OMT, implementation using C++ and Java. Credit will not be given for both COP 4331 and 5339.

### **Functional Programming with Scala (COP 5377) 3 credits**

*Prerequisites: COP 3410 or COP 3530*

Introduces the foundations of functional programming using the Scala language. Covers theoretical concepts, starting from recursion, typeful programming, algebraic data types, monoids, monads and combinators. Introduces advanced programming techniques, such as lazy computation, higher order functions, streams and pure functional parallelism applicable for parallel applications on multi-core systems.

### **Compiler Writing 1 (COP 5625) 3 credits**

*Prerequisites: CDA 3331C and COP 3530*

A comprehensive study of the issues involved in compiler construction: lexical, syntactic, and semantic analysis, code generation, run-time support, and error handling. Each student will write complete compiler.

### **Mobile Application Development (COP 5675) 3 credits**

*Prerequisite: A college-level programming course*

This course provides study and practice of the life cycle of mobile application development. The class covers architecture, design and engineering issues, techniques and methodologies for mobile application development. Students learn a framework for mobile application development and work on a practical project where they can demonstrate their newly acquired skills.

### **Semantic Web Programming (COP 5859) 3 credits**

*Prerequisites: Graduates and seniors in Computer Science and Computer Engineering, others with permission of instructor; familiarity with Java*

Semantic web building blocks (standards, languages and frameworks). Open source tools. Integrated flow with our examples. Build an infrastructure to develop personal and practical Apps. Open to majors in computer science and engineering and others with consent of instructor.

### **Convex Optimization (COP 6511) 3 credits**

*Prerequisite: Permission of instructor*

This course introduces students to the basic theory of optimization, including least-squares, linear and quadratic programs, semidefinite programming, minimax, optimality conditions and the duality theorem. Methods include steepest descent, conjugate gradient and interior point methods, which are discussed in detail.

### **New Directions in Database Systems (COP 6726) 3 credits**

*Prerequisite: Ability to program in C or C++*

Study features of state-of-the-art object-relational, Java-enabled database systems using Oracle as a vehicle. Topics covered include SQL, Java, object-oriented features of SQL, and the implementation of stored subprograms and triggers using PL/SQL and JDBC. Also covered are server-side Web programming with PL/SQL, Java servlets, JavaServer Pages (JSP) as well as XML processing using Oracle. No prior knowledge of SQL, Java, or Web programming is assumed.

### **Visual Information Retrieval (COP 6728) 3 credits**

*Prerequisite: Graduate standing*

Studies the interdisciplinary research area of visual information retrieval. Research paper and project topics are chosen from a list of latest developments and open challenges and opportunities in the field.

### **Theory and Implementation of Database Systems (COP 6731) 3 credits**

*Prerequisite: Ability to program in C or C++*

The investigation of the fundamental principles and practices of relational database processing and design. Topics include SQL, embedded SQL, integrity constraints, transaction processing, normalization theory, query optimization, and relational algebras. Oracle is used as a vehicle in these

investigations.

### **Advanced Internet Systems (COP 6819) 3 credits**

*Prerequisite: A college-level programming course*

This course introduces web technologies that are used to build back-end systems that enable scalable web applications. The course covers technical issues surrounding back-end systems and provides the background to design and develop solutions with constantly evolving web technologies.

### **Topics in Computer Science (COT 5930) 1-3 credits**

*Prerequisite: Permission of instructor*

Study relating to specialized topics.

### **Theory and Philosophy of Computation (COT 6200) 3 credits**

This course covers major topics in the theory of computation and its philosophical meanings.

### **Analysis of Algorithms (COT 6405) 3 credits**

*Prerequisite: Graduate standing with major in Artificial Intelligence, Computer Engineering or Computer Science, or permission of instructor*

Design and analysis of algorithms from several areas in computer science. Topics include divide and conquer, maximum flow, dynamic programming, greedy algorithms, NP-completeness and approximation algorithms.

### **Information Theory (COT 6426) 3 credits**

*Prerequisite: EEE 4541 or permission of instructor*

In this course, information is defined as reduction in uncertainty. The problem of lossless digital data compression is then studied, including optimality, computability and algorithmic complexity considerations. The problem of data storage in imperfect hardware and data transmission over imperfect pathways is studied along with identifying error correction methods and their limits. Lossy compression is explored, and a brief treatment of modern quantum information theory concludes the course.

### **Secret Sharing Protocols (COT 6427) 3 credits**

*Prerequisite: Graduate standing or permission of instructor*

Course offers core secret sharing constructions along with their properties (symmetric/non-symmetric). Applications are discussed in three different models: 1) Standard: threshold, verifiable, generalized, weighted, geometric, dynamic, visual, multistage, proactive and quantum; 2) Interdisciplinary: rational, social and socio-rational; and 3) Hierarchical: disjunctive, conjunctive and sequential.

**Randomized Algorithms (COT 6446) 3 credits**

*Prerequisite: COP 3410 or COP 3530 or permission of instructor*

This course introduces several basic techniques in the design and analysis of randomized algorithms and their applications.

**Directed Independent Study-CS (COT 6900) 1-3 credits**

The study of topics relating to the special needs and interests of individual students.

**Directed Independent Study-CE (COT 6905) 1-3 credits**

The study of topics relating to the special needs and interests of individual students.

**Topics in Computer Science (COT 6930) 1-3 credits**

*Prerequisite: Permission of instructor*

**Master's Thesis-Computer Science (COT 6970) 1-9 credits**

*Prerequisite: Admission to candidacy*

*Grading: S/U*

**Dissertation-Computer Science (COT 7980) 1-15 credits**

*Prerequisite: Admission to candidacy*

*Grading: S/U*

**Video Processing (DIG 6645) 3 credits**

Fundamentals of digital video acquisition, processing, storage, indexing, retrieval, and transmission over communication networks. Principles of contemporary video compression standards. Latest developments in digital video products and services.

**Master's Thesis-Computer Engineering (ECM 6971) 1-9 credits**

*Prerequisite: Admission to candidacy*

*Grading: S/U*

**Dissertation-Computer Engineering (ECM 7980) 1-15 credits**

*Prerequisite: Admission to candidacy*

*Grading: S/U*

**Biosignal Processing (EEE 5286) 3 credits**

*Prerequisite: Graduate standing*

This course covers the generation of bioelectrical signals, their acquisition, modeling and analysis. Modeling and analysis tools cover adaptive filtering, time-frequency analysis, model-based spectral

analysis, stochastic signals and signal representation in orthogonal bases: wavelet transforms.

### **CMOS Amplifiers (EEE 5321) 3 credits**

*Prerequisite: Graduate standing*

Analysis, simulation, and computer-aided design of basic open-loop and feedback, single-stage and differential CMOS amplifiers, taking into account frequency response, noise, and parameters tolerance. Design software includes Excel, Pspice and ADS.

### **High Frequency Amplifiers (EEE 5371) 3 credits**

Electromagnetic fields and waves, analysis and design of transistor circuits; tow-port networks, matching networks, stability considerations, RF transistor amplifier design, broadband and high-power design methods; CAD techniques for RF amplifier design.

### **Nanobiotechnology (EEE 5425) 3 credits**

*Prerequisite: Graduate standing in engineering and/or physical/biological sciences*

This course covers the sensing and characterization of biological entities with novel nanoscale devices and nano-object mediated modalities. It also covers the fundamentals of nanotechnology in biological and biomedical research.

### **Digital Processing of Signals (EEE 5502) 3 credits**

*Prerequisite: Graduate standing*

An analysis of discrete signals and systems, difference calculus, sampling theory, Z-transform and the discrete Fourier transform, digital filter synthesis and implementation, and fast Fourier transform algorithms.

### **Introduction to Radar Systems (EEE 5557) 3 credits**

*Prerequisites: Graduate standing*

An introduction to radar systems. Topics include radar equations, pulse and tracking radars, and radar transmitters and receivers.

### **RF CMOS VLSI Devices for Wireless Communications (EEE 6323) 3 credits**

*Prerequisites: EEE 3300, 4361C*

RF VLSI aspects of monolithic RFIC's in wireless communication systems. Emergence of CMOS RF VLSI applications. Front and back end uses with practical examples.

### **RF Devices and Circuits (EEE 6374) 3 credits**

RF filter design, active RF components and component modeling, matching and biasing networks, RF oscillators, mixers and synthesizers, use of RF CAD software for system simulation.

### **Adaptive Signal Processing (EEE 6504) 3 credits**

*Prerequisite: EEE 5502*

This course covers the principles of linear adaptive filtering, various adaptive filtering techniques, and their relationships to optimal linear filter solutions. Also emphasized are such applications such as adaptive filtering as noise and echo cancellation, adaptive equalization, line enhancement, and beam forming.

### **Advanced Signal Processing (EEE 6508) 3 credits**

*Prerequisite: EEE 5502*

Course provides an in-depth study of a select set of topics in digital signal processing (DSP). Topics include advanced digital filter design techniques, reconstruction of signals from DSP samples, wavelets, and multirate signal processing and its applications to speech analysis. Course is designed for graduate students with a strong background in DSP fundamentals and MATLAB.

### **Digital Processing of Speech Signals (EEE 6585) 3 credits**

*Prerequisite: EEE 5502*

A course in digital modeling, processing, and representation of speech signals, short time Fourier analysis, speech spectrograms, linear predictive coding, person-machine communication by voice.

### **Queueing Theory (MAP 6264) 3 credits**

*Prerequisite: STA 4821*

Development of mathematical models for performance analysis of computer and telecommunications networks. Review of probability, introduction to stochastic processes, development of classical teletraffic and queueing models, application to modern computer and telecommunications networks.

### **Power System Analysis and Control (EEL 5256) 3 credits**

*Prerequisite: Graduate standing*

Study of the fundamentals of power grid, such as phasor, transformers, transmission line, power flow and symmetrical faults.

### **Microwave Engineering (EEL 5437) 3 credits**

*Prerequisite: Graduate standing*

Electromagnetic theory, harmonic transmission lines, waveguides, microwave network analysis, impedance matching and tuning, microwave resonators, power dividers, couplers and filters, microwave oscillators and mixers, CAD design techniques.

### **Digital Communications Systems (EEL 5500) 3 credits**

*Prerequisite: EEL 4512C*

Random signals and noise, random processes, physical noise sources, and digital data transmission and reception.

### **Modern Control (EEL 5613) 3 credits**

*Prerequisite: Engineering graduate standing or permission of instructor*

Fundamentals of linear systems theory and practice as applied to multi-input and multi-output feedback control systems: State variable models, stability, controllability, observability, state feedback and estimation, linear quadratic regulators, computer-aided analysis and design (using Matlab control systems toolbox).

### **Control Systems 2 (EEL 5654) 3 credits**

*Prerequisite: Graduate standing*

Internal stability, stabilization, minimum weighted sensitivity control design, controller design in the presence of unknown disturbances, and model uncertainty.

### **Robotic Applications (EEL 5661) 3 credits**

*Prerequisite: Senior or graduate standing*

Robot classification, robot systems, economic justification; product design for robot assembly; programming, part feeding, tooling.

### **Special Topics in Electrical Engineering (EEL 5934) 1-5 credits**

*Prerequisite: Permission of instructor*

An advanced course in specialized areas not adequately covered in other courses. It may be repeated for credit.

### **Advanced Photovoltaic Power Systems (EEL 6284) 3 credits**

*Prerequisites: EEE 3300 or permission of instructor*

This is an advanced course on solar electrical system analysis. Using basic electrical theories, the course provides an estimate of how much energy is delivered or recovered from several solar systems. Projects include designs of stand-alone solar systems and grid-tied systems. Students cannot take this course and EEL 4281 for credit.

### **Smart Grid (EEL 6297) 3 credits**

Exposes students to concepts, theories, methods and latest topics in smart grids. Topics covered include principles and practices in data analytics, optimization, control, renewable energy and electrical power systems.

### **Fourier Optics and Holography (EEL 6449) 3 credits**

Analysis of two-dimensional linear systems, scalar diffraction theory, Fresnel and Fraunhofer diffraction, transforming properties of lenses, optical imaging systems, theory and application of holography.

**Smart Antennas (EEL 6468) 3 credits**

This course covers the underlying principles and current state-of-the-art of smart antennas and array processing algorithms that can readily raise the signal-to-noise ratio of signals of interest, null-out or suppress interferers, identify active signals and their direction of arrival and track signal sources as they move in space. Topics covered include deterministic, mean-square optimal and adaptive beamforming; direction-of-arrival estimation; and joint space-time data processing.

**Electromagnetic Theory 1 (EEL 6482) 3 credits**

Review of fundamental concepts. Electromagnetic theorems and concepts, including duality, uniqueness, field equivalence, reciprocity, Green's functions; boundary value problems in rectangular, cylindrical, and spherical coordinates.

**Digital Satellite Communication (EEL 6509) 3 credits**

Satellite communication systems, satellite orbits, propagation effects, link budget calculating performance of digital modulation options.

**Telecommunications: Waves, Fibers and Antennas (EEL 6519) 3 credits**

*Prerequisite: Permission of instructor*

Course provides students of engineering/science with an introduction to basics of physics and engineering of telecommunication systems' components.

**Information Theory (EEL 6532) 3 credits**

*Prerequisite: EEE 4541 or permission of instructor*

Information theory, entropy, coding information sources, noisy channels, codes for error detection and correction.

**Detection Theory (EEL 6537) 3 credits**

*Prerequisite: EEE 4541*

Hypothesis testing; detection of signals and noise; detection of signals with unknown parameters; detection of weak signals; non-parametric detection; decentralized detection; robust detection; and applications.

**Signal Processing for Machine Learning (EEL 6556) 3 credits**

*Prerequisite: Permission of instructor*

This is a project-based course emphasizing signal processing methods that are used to prepare signals for machine learning that can be adapted into the machine learning architecture.

### **Fiber Optic Communication (EEL 6563) 3 credits**

*Prerequisite: EEL 4512C*

Optical fiber waveguides, optical sources and detectors, optical modulation and demodulation, fiber optic components and devices, noise in optical systems, system design.

### **Wireless Networks (EEL 6591) 3 credits**

*Prerequisite: CNT 5008*

Basic concepts and recent advances in field of wireless communication networks. Fundamentals of wireless communication technology and study of representative networks, such as cellular wireless network, WLAN, PAN, ad hoc wireless networks and wireless sensor networks.

### **Mobile Communication (EEL 6593) 3 credits**

Basics of mobile/cellular communication systems, propagation - fading models, diversity gain, link margins, modulation, performance analysis.

### **Wireless Personal Communication Systems (EEL 6597) 3 credits**

*Prerequisite: EEL 5500 or permission of instructor*

Course introduces seniors and graduate students in electrical engineering to the fundamentals of wireless personal communication services, systems, and networks. The course focuses on the principles, technologies, system architectures, and standards for wireless access networks for telephony, data communications, and portable computing.

### **Nonlinear Control Systems Engineering (EEL 6621) 3 credits**

*Prerequisite: EEL 4652C*

Explores the most common nonlinearities that occur in practical feedback control design and their effect on system's performance and control design. Course covers Phase Plane Methods, Describing Function, PID auto-tuning, Sliding Mode Control, Lyapunov Control Design and Feedback Linearization.

### **Intelligent Control (EEL 6682) 3 credits**

Recent trends related to learning and decision-making capabilities of intelligent control systems using neural networks and fuzzy logic. Emphasis on controller design for industrial applications.

### **Neural Complex and Artificial Neural Networks (EEL 6819) 3 credits**

Multifaceted representation of neural activity in terms of neurobiology, cognitive science, art of

computation, cybernetics and physics of statistical mechanics. Neural network modeling mimicking biological neural complex and development of artificial neural networks.

### **Directed Independent Study (EEL 6905) 1-4 credits**

*Prerequisite: Permission of instructor*

Courses in specialized areas not adequately covered in other courses may be taken for repeated credit.

### **Special Topics in Electrical Engineering (EEL 6935) 1-4 credits**

### **Master's Thesis-Electrical Engineering (EEL 6971) 1-9 credits**

*Grading: S/U*

### **Dissertation-Electrical Engineering (EEL 7980) 1-15 credits**

*Grading: S/U*

### **Graduate Internship (EGN 5940) 1-3 credits**

Summer industrial work experience in student's major field of study. *Grading: S/U*

### **Advanced Research (EGN 6918) 1-9 credits**

*Prerequisite: Permission of instructor*

Research relevant to the student's course of study in the Ph.D. program. This course requires oversight by the student's advisor who can assess the student's performance at the end of the semester. This course can only be taken prior to admission to candidacy for the doctoral degree and may be repeated in multiple semesters. *Grading: S/U*

## **INTERDISCIPLINARY**

**Undergraduate Courses** / [Link to Graduate Courses](#)

### **Discoveries in Engineering: Electronic Design and Operational Amplifiers (EEL 1007C) 3 credits**

*Prerequisite: For pre-approved dual-enrolled high school students only*

Basic and advanced electronic design principles in theory, computer lab PSPICE simulations and hands-on electronics lab experiments and design project. Topics include audio amplifiers, filters, AM wireless optical communication, and extensive technical report assignments.

### **Fundamentals of Engineering (EGN 1002) 3 credits**

Engineering survival skills: orientation, professionalism, planning, problem solving, creative thinking, software and calculator techniques, time and project management, teaming skills, engineering disciplines, report writing, and technical communications.

**University Honors Seminar in Engineering (EGN 1930) 3 credits**

*Writing Across Curriculum (Gordon Rule)*

A seminar in the University Honors Program on topics in engineering.

**University Honors Seminar in Engineering (EGN 1932) 3 credits**

*Gordon Rule, computational*

A seminar in the University Honors Program on topics in Engineering.

**Special Topics (EGN 1935) 1-4 credits**

*Prerequisite: Permission of instructor*

Lower-division special topics in areas of engineering not covered by other courses such as experimental advanced high school work.

**Special Topics (EGN 2935) 1-4 credits**

*Prerequisite: Permission of instructor*

Lower-division special topics in areas of engineering not covered by other courses such as experimental advanced high school work.

**Statics (EGN 3311) 3 credits**

*Prerequisite: PHY 2048 with minimum grade of "C"*

*Prerequisite or Corequisite: MAC 2312*

Analysis of force and moment systems for static equilibrium of trusses, beams, frames, and machines; elements of frictions; centroid, center of gravity, center of mass, and moment of inertia.

**Dynamics (EGN 3321) 3 credits**

*Prerequisite: EGN 3311 with minimum grade of "C"*

Dynamics of particles and rigid bodies, applications of free-body diagrams, Newton's second law, the impulse-momentum method and the work-energy principle to solve dynamic problems in mechanical systems.

**Strength of Materials (EGN 3331) 3 credits**

*Prerequisite: EGN 3311 with minimum grade of "C"*

Concepts of stress and strain; mechanical properties of materials, force, deformation and stress analysis of structural members; stress and strain transformations; principal stresses; failure theories; and concept of buckling.

**Engineering Thermodynamics (EGN 3343) 3 credits**

*Prerequisite: PHY 2048, MAC 2312, with minimum grade of "C"*

Topics include properties of a simple pure compressible substance, equations of state, the first law of thermodynamics, internal energy, specific heats, enthalpy and the application of the first law to a system or a control volume. The study of the second law of thermodynamics is also discussed leading to the discovery of entropy as a property and its ramifications.

### **Engineering Materials 1 (EGN 3365) 3 credits**

*Prerequisite or Corequisite: EGN 3331 with minimum grade of "C"*

Structure of material systems from the atomic, micro and macroscopic standpoints. Equilibrium and non-equilibrium structures. Relationship between structure and electrical, thermal, mechanical and failure properties of metals, ceramics and polymeric materials. Strengthening mechanisms in materials.

### **Special Topics (EGN 3935) 1-4 credits**

*Prerequisite: Permission of instructor*

Special topics in areas of engineering not covered by other courses.

### **Engineering Professional Internship (EGN 3941) 0-4 credits**

*Prerequisite: FAU student and permission of college*

Course offers students the opportunity to gain real world exposure and supervised experience related to engineering and computer science careers. Students integrate theory with practice in experiential learning acquired through direct involvement in on/off-campus internship opportunities. Students develop marketable skills in preparation for future employment or graduate school studies.

### **Cooperative Education in Engineering (EGN 3945) 0 credit**

*Prerequisite: Junior standing*

Supervised work experience under approved industrial supervision in the college's part-time cooperative education program. Course may be taken up to four times. *Grading: S/U*

### **Inventive Problem Solving in Engineering (EGN 4040) 3 credits**

Common problem-solving methods, followed by an introduction to TRIZ (Russian acronym for systematic inventive thinking); introduction to intellectual property, including patents, copyrights, trademarks, trade secrets and unfair competition.

### **Vibration Synthesis and Analysis (EGN 4323) 3 credits**

*Prerequisites: (MAP 3305 or MAP 2302) and EGN 3321 with minimum grades of "C"*

Free and forced vibration of mechanical systems, damping, periodic and transient excitations, two degree of freedom and continuous systems.

### **Dynamic Systems (EGN 4432) 3 credits**

*Prerequisites: (MAP 3305 or MAP 2302) and (EGN 2213 or EEL 2161) and EGN 3321, all with minimum grades of "C"*

Acquaints students with basic knowledge about dynamic systems, systems stability analysis and basic controller design.

### **Innovative Sensing and Actuation Technologies (EGN 4670C) 3 credits**

*Prerequisites: EGM 4045 or EOC 4612C and EOC 3130L or EML 4730L all with minimum grade of "C"*

Introduction to innovative technology in sensing and actuation through a series of modules each comprising lectures, seminar and laboratory.

### **Honors Directed Independent Study (EGN 4906) 3 credits**

Project-orientated study of engineering topics relating to the special needs and interests of individual Innovation Leadership Honors Program students.

### **Directed Independent Research in Engineering and Computer Science (EGN 4911) 0-3 credits**

*Prerequisite: Permission of instructor*

The student works closely with a research mentor to conduct research and inquiry in engineering and computer science. The requirements for the course and the criteria for evaluation are agreed upon by the research mentor and the student. *Grading: S/U*

### **Directed Independent Research in Engineering and Computer Science (EGN 4915) 1-3 credits**

*Prerequisite: Permission of instructor*

The student works closely with a research mentor to conduct research and inquiry in engineering and computer science. The requirements for the course and the criteria for evaluation are agreed upon by the research mentor and the student.

### **Engineering Honors Seminar (EGN 4933) 0 credit**

*Prerequisite: For students in the Engineering Honors program*

A seminar in the Engineering Honors program on topics related to leadership, research, entrepreneurship and innovation. Students may enroll in this course up to five times. *Grading: S/U*

### **Special Topics (EGN 4935) 1-4 credits**

*Prerequisite: Permission of instructor*

Special topics in engineering not covered by other courses.

### **RI: Engineering Design 1 (EGN 4950C) 3 credits**

*Prerequisite: EEE 4541 or STA 4821 with minimum grade of "C"*

*Prerequisite or Corequisite: CEN 4010 or EEE 4361C with minimum grade of "C"*

Students develop and present proposals for capstone design projects to be completed in EGN 4952C. Work in interdisciplinary teams is required. Topics include system design theory and practice, local and global impacts of computing and engineering solutions, multiple constraints, lifelong learning and ethics. This is a research-intensive (RI) course and an Academic Service Learning (ASL) course.

### **RI: Engineering Design 2 (EGN 4952C) 3 credits**

*Prerequisite: EGN 4950C*

Continuation and completion of multidisciplinary team projects initiated in EGN 4950C. This is a research-intensive (RI) course and an Academic Service Learning (ASL) course.

### **Honors Undergraduate Thesis (EGN 4972) 3 credits**

Thesis preparation for research conducted by Innovation Leadership Honors Program students.

### **Innovation Leadership Internship (EGS 4942) 1 credit**

*Prerequisites: Participation in ILHP*

A collaborative effort between an individual student, the University through the Center for Innovation Leadership, and a University partner that provides the enrichment experience. The effort begins with an appropriate proposal, agreed to by all parties, that defines the scope of the work to be accomplished and a schedule for completion. *Grading: S/U*

### **Discoveries in Engineering:**

#### **Introduction to Ocean Engineering and Underwater Vehicles (EOC 1665C) 3 credits**

*Prerequisite: For pre-approved dual-enrolled high school students only*

This course introduces basic ocean engineering disciplines and principles of vehicle motion. Laboratory assignments provide hands-on experiences in designing, building, and testing remotely operated and autonomous marine vehicle models.

### **Interdisciplinary Graduate Courses**

#### **Honors Directed Independent Study (EGN 5908) 3 credits**

*Prerequisite: Permission of instructor*

Project-oriented study of engineering topics related to the special interests of individual Innovation Leadership Honors Program students in the combined B.S./M.S. programs.

#### **Special Topics (EGN 6930) 1-4 credits**

*Prerequisite: Permission of instructor*

Courses in specialized interdisciplinary areas of engineering. May be repeated for credit.

# OCEAN AND MECHANICAL ENGINEERING

[Undergraduate Courses](#) / [Link to Graduate Courses](#)

## **Biomaterials (BME 4100) 3 credits**

This course covers a comprehensive introduction of biomaterials science, the properties of biomaterials, the classes of biomaterials and the applications of biomaterials in medicine. The content of this course includes preparation, characterization and biological evaluations of biomaterials. Specific biomaterials such as bioceramics, polymers and hydrogels are discussed.

## **Neural Engineering (BME 4361) 3 credits**

This course introduces students to the nervous system and basic neuroscience principles that govern neural interface engineering. After an introduction to the nervous system and brain diseases, the course focuses on bioengineering technologies for neural interfaces toward imaging, sensing, interfacing and activating neural function in health and disease.

## **Introduction to Biosignal Processing (BME 4509) 3 credits**

*Prerequisite: EEL 3502 with minimum grade of "C" or permission of instructor*

This course covers the generation of bioelectrical signals, their acquisition, modeling, and analysis. Modeling and analysis tools cover adaptive filtering, time-frequency analysis, model-based spectral analysis, stochastic signals and signal representation in orthogonal bases, such as wavelet transforms. The physiology of electrical signal generation covers ionic transport in cellular membranes and propagation of electrical signals in cells and tissues. The range of biomedical signals covered includes such common signals as the electroencephalograms, evoked potentials, electromyograms and electrocardiograms. The students write MATLAB codes to perform common signal analysis such as filtering, autocorrelation and covariance, Fourier-based spectral analysis, the short-time Fourier transform and noise reduction.

## **Introduction to Bioimaging (BME 4536) 3 credits**

*Prerequisite: EEL 3502 with minimum grade of "C" or permission of instructor*

The course fits within the goals of the college to foster and facilitate interdisciplinary research, and it provides students with the necessary fundamental concepts to do research in biomedical imaging. Topics of the course cover image characteristics, Fourier transforms, image acquisition, image processing and analysis, convolution, sampling, resolution, contrast, filtering; principle of imaging tools such as radiography, CT, ultrasound, MRI and optical imaging.

### **Nanotechnology (BME 4571) 3 credits**

*Prerequisites: Some math, physics, and chemistry*

Fundamental science behind nanotechnology. Tools of nanosciences. Smart materials. Sensors. Biomedical applications. Energy capture, transformation, and storage. Optics and electronics. Fabrication and modeling. Nano business and nano industry.

### **Introduction to Nanobiotechnology (BME 4574) 3 credits**

*Prerequisite: Senior standing in engineering and/or physical/biological sciences*

The sensing and characterization of biological entities, processes and events, with novel nanoscale devices and nano-object mediated modalities, have immediate and far-reaching impacts. This course covers the fundamentals of nanotechnology in biological and biomedical research. The coursework is approached from an engineering perspective offering insights on the details of nanoscale fabrication processes as well as cell biology. The basics of biology and chemistry, with a focus on how to engineer the behavior of molecules at the nanoscale, are also introduced and analyzed. Concepts and processes related to BioMEMS and microfluidics are also explained.

### **Introduction to Microfluidics and BioMEMS (BME 4581) 3 credits**

*Prerequisites: EML 3701, MAP 3305 with minimum grades of "C"*

A comprehensive introduction to microfluidics, micro-electro-mechanical systems (MEMS) and applications in the life sciences. Topics include laminar flow, viscosity, surface tension, dimensionless numbers, Electrokinetics, photolithography, soft lithography, flow control, flow sensors of micrometer scale as well as applications of microfluidics and MEMS for molecular biology and cell biology.

### **Aerodynamics (EAS 4101) 3 credits**

*Prerequisite: EML 3701 with minimum grade of "C"*

This course introduces engineering concepts and analytical techniques used in aeronautical engineering. The course focuses on the aerodynamics of airfoils and wings in subsonic, transonic and supersonic flight.

### **Flight Dynamics (EAS 4105) 3 credits**

*Prerequisite: EAS 4101 with minimum grade of "C"*

This course provides an introduction to the flight dynamics, modeling and fundamental stability and control aspects of aircraft. The course covers aircraft roll, pitch and yaw static stability and control basics and develops the full nonlinear equations of motion. The concept of numerical simulation of these equations is also introduced. Finally, with the dynamic models in-hand, open-loop response to actuation of the control systems is analyzed and the concept of closed-loop aircraft control system design is presented.

### **Circuits 1 (EEL 3111) 3 credits**

### **Programming 1 (COP 2220) 3 credits**

(See [Electrical Engineering and Computer Science courses](#), this section)

### **Electro-Mechanical Devices (EGM 4045) 3 credits**

*Prerequisites: (MAP 3305 or MAP 2302) and PHY 2044 and (EGN 2213 or EEL 2161), all with minimum grades of "C"*

Introduction to basic DC and AC circuits; passive and active filtering; DC and AC motors; and Arduino micro-controller for hardware and software interfaces.

### **Finite Element Analysis for Engineering Design (EGM 4350) 3 credits**

*Prerequisite: EGN 3331 with minimum grade of "C"*

Fundamental concepts of finite element software to perform the stress, vibration, and heat transfer analyses of various engineering design problems.

### **Intermediate Strength of Materials (EGM 4523C) 3 credits**

*Prerequisite: EGN 3331 with minimum grade of "C"*

An extension of the theories and applications of the principles of mechanics of materials taught in EGN 3331, including determining the deflection of beams by different methods, solving statically indeterminate problems, studying the phenomenon of stress concentration in practical situations and applying static failure theories in design.

### **Engineering Graphics (EGN 1111C) 3 credits**

Sketching techniques. Multiview drawings, pictorials, section views, auxiliary views, and engineering problem layout. Descriptive geometry. Three-dimensional modeling and computer graphics.

### **Computer Applications in Engineering 1 (EGN 2213) 3 credits**

*Prerequisite or Corequisite: MAC 2312 with minimum grade of "C"*

An introduction to programming in MATLAB, this course includes some matrix concepts, input/output statements, for and while loops, if and else-if statements, built-in functions, self-written functions, some built-in solvers and projects illustrating applications to engineering topics.

### **Statics (EGN 3311) 3 credits**

### **Dynamics (EGN 3321) 3 credits**

### **Strength of Materials (EGN 3331) 3 credits**

### **Engineering Thermodynamics (EGN 3343) 3 credits**

### **Engineering Materials 1 (EGN 3365) 3 credits**

### **Dynamic Systems (EGN 4432) 3 credits**

(See [Interdisciplinary courses, this section](#))

### **Experimental Methodology (EML 3523C) 3 credits**

*Prerequisite: EGM 4045 with minimum grade of "C"*

*Prerequisites or Corequisites: EGN 3321, EML 3701, STA 4032, all with minimum grades of "C"*

Study of typical measuring systems and solutions of engineering problems by experimental means, to include analysis of experimental data.

### **Fluid Mechanics (EML 3701) 3 credits**

*Prerequisites: EGN 3311 and EGN 3343 with minimum grades of "C"*

*Prerequisite or Corequisite: MAP 3305 with minimum grade of "C"*

Characteristics of a fluid, fluid statics, flow fields, fundamental laws, control volume concept, some applications of the fundamental laws in integral form, dimensional analysis and similitude, flow in pipes, single-path pipe line problems, networks, and boundary layer concepts.

### **Applied Thermal-Fluid Engineering (EML 4127) 3 credits**

*Prerequisite: EML 4142 with minimum grade of "C"*

Applications of fluid mechanics and heat transfer, including: turbomachinery, heat exchangers, condensation and boiling heat transfer, special topics in fluid mechanics, heat transfer, and design projects.

### **Heat Transfer (EML 4142) 3 credits**

*Prerequisites: EML 3701 and MAP 3305 with minimum grades of "C"*

Modes of heat transfer, one- and two-dimensional steady state heat conduction, unsteady heat conduction, numerical methods, computer program projects, empirical relations for forced and free convection, radiation properties, shape factors, radiation heat exchange between gray bodies.

### **Plastics and Composites (EML 4236) 3 credits**

*Prerequisites: EGN 3331 or equivalent and EGN 3365 or equivalent with minimum grades of "C"*

Course covers the structure and properties of polymers and the design of plastic parts. It also provides an introduction to composite materials.

### **Machine Design 2 (EML 4262) 3 credits**

*Prerequisites: EGN 1111C, EGN 3321 and EGN 3331 or equivalents with minimum grades of "C"*

The study of kinematics, dynamics, and design of machinery and related components. Topics include analysis and synthesis of linkages, cams, bearings, gears, and gear trains.

### **Fabrication of Mechanical Engineering Systems (EML 4263C) 2 credits**

*Prerequisite: EGN 3365 with minimum grade of "C"*

*Corequisite: EML 4521C with minimum grade of "C"*

An Introductory course directed at acquainting mechanical engineering students with the basic machinery and machining processes used to fabricate parts of mechanical engineering systems.

### **Mechanical Control System (EML 4312) 3 credits**

*Prerequisite: EGN 4432 with minimum grades of "C"*

Course covers fundamental concepts in controls: block diagram, transfer function, stability, response in time and frequency domains, Root Locus, Bode and Nyquist Diagrams, PID controller design. Also the control of discrete systems is discussed.

### **Manufacturing Methods (EML 4321) 3 credits**

*Prerequisite: EGN 3365 or equivalent with minimum grade of "C"*

Structure and properties of materials, thermal treatments and material selection for particular applications. Casting, powder metallurgy, forming, machining and joining processes.

### **Principles of Turbomachinery (EML 4401) 3 credits**

*Prerequisite: EML 3701 with minimum grade of "C"*

This course covers basic principles related to gas turbines, applications to stationary power generators and aircraft propulsion systems, guiding principles in gas turbine cycles, design of basic components and their performance prediction.

### **Introduction to Solar Energy (EML 4416C) 3 credits**

*Prerequisite: EGN 3343 or equivalent with minimum grade of "C"*

*Pre- or Corequisite: EML 4142 with minimum grade of "C"*

Energy and the human condition. The sun and the earth. A review of first principles. Collection of solar energy. Applications of solar energy. Two hours lecture, six hours lab.

### **Introduction to Energy Conversion Processes and Systems (EML 4450) 3 credits**

*Prerequisite or Corequisite: CWR 3201C or EGN 3343 with minimum grade of "C" or permission of instructor*

Introduction to principles, theories and processes of devices and systems that convert thermal, chemical, solar, biological and electromagnetic energy into electrical, mechanical and alternative chemical forms. Energy conversion performance and characteristics and sources of inefficiencies are

explored for applications that include fossil energy combustion, solar, wind, hydro, biomass, thermoelectric and geothermal energy systems. Several interesting topics including carbon capture/storage and fuel cells are covered.

### **Introduction to Wind and Ocean Energy Turbines (EML 4457) 3 credits**

*Prerequisite: EGN 3331 with minimum grade of C*

An introduction to wind and ocean energy systems, turbine blade design, wind, wave and ocean current loading, advanced materials design, cyclic and cumulative fatigue, matrix stiffness and finite element methods.

### **Machine Design (EML 4500) 3 credits**

*Prerequisites: EGM 4523C, EGN 1111C, all with minimum grades of "C"*

*Prerequisite or Corequisite: EML 4730L with minimum grade of "C"*

Introduction to machine design; fundamental principles in strength of materials; static and fatigue failure theories; design of machine elements; and design projects.

### **RI: Engineering Design (EML 4521C) 3 credits**

*Prerequisites or Corequisites: Senior standing, permission of department, EML 4127, EML 4500, EGM 4350,*

*with minimum grades of "C"*

*Corequisite: EML 4263C*

The design process, including decision theory, creativity concepts, human factors, optimization techniques, reliability, statistics and professional ethics, engineering economy and incorporation of engineering standards, codes and multiple constraints. Material selection and testing. Fatigue and fracture design. This is a research-intensive (RI) course. This is an Academic Service Learning (ASL) course.

### **Computer Applications in Mechanical Engineering 2 (EML 4534) 3 credits**

*Prerequisites: (MAP 3305 or MAP 2302) and (EGN 2213 or COP 2220) all with minimum grades of "C"*

Review of MATLAB Language, numerical methods utilized in solving mechanical engineering problems, projects related to solid body mechanics, and thermal systems.

### **RI: Design Project (EML 4551) 3 credits**

*Prerequisite: EML 4521C with minimum grade of "C"*

Continuation and completion of individual and group projects initiated in prerequisite course EML 4521C, Engineering Design. This is an Academic Service Learning (ASL) course. This is a research-

intensive (RI) course.

### **Design Against Uncertainty (EML 4571) 3 credits**

*Prerequisite: EGN 3331 or equivalent with minimum grade of "C"*

The basic modern concepts for design of engineering structures against uncertainty will be elucidated in this course. The following topics will be studied: safety factors, probabilistic design through reliability, convex modeling of uncertainty, fuzzy subsets based design, Taguchi methods.

### **Mechanical Engineering Lab (EML 4730L) 3 credits**

*Prerequisites: EGN 2213 and EML 3523C with minimum grades of "C"*

Experimental work related to heat transfer, fluid mechanics, mechanical systems, materials and solid mechanics.

### **Introduction to Robotics (EML 4800) 3 credits**

*Prerequisite: Senior standing*

An introductory course for robotics that includes robotic arms configuration, trajectory planning, controls, sensors and sample applications.

### **Mechatronics (EML 4804C) 3 credits**

*Prerequisites: EGM 4045 and EGN 2213 with minimum grade of "C"*

This course includes electronics, microcontrollers programming, microcontrollers interfacing, implementation of control algorithms on microcontrollers, lab experiments and projects.

### **Directed Independent Study (EML 4905) 1-3 credits**

*Prerequisite: Permission of instructor*

Study of topics relating to the special needs and interests of individual students. May be taken for repeated credit.

### **Special Topics (EML 4930) 1-3 credits**

*Prerequisite: Permission of instructor*

Topics in specialized areas, such as analytical methods in mechanical engineering, statistical analysis in engineering, and engineering design practice, not adequately covered in other courses. May be repeated for credit.

### **Special Projects in Mechanical Engineering (EML 4932) 1-3 credits**

*Prerequisite: Permission of instructor*

Experimental work in the laboratory and/or with the computer on topics not adequately covered in other courses. May be repeated for credit.

### **Cooperative Education - Mechanical Engineering (EML 4949) 1-3 credits**

Cooperative work study with mechanical-oriented organizations for mechanical engineering students who have completed at least one full semester of upper-level mechanical engineering courses. May be used for a total of 2 or 3 credits toward technical electives. *Grading: S/U*

### **University Honors Seminar in Ocean Sciences (EOC 1930) 3 credits**

*Writing Across Curriculum (Gordon Rule)*

*Prerequisite: Permission of instructor*

A seminar in the University Honors Program on topics in ocean sciences.

### **Fabrication of Ocean Engineering Systems (EOC 2801) 1 credit**

*Prerequisite: EGN 1111C with minimum grade of "C"*

A laboratory course directed to acquainting ocean engineering students with the basic machinery and machining processes used to fabricate parts of engineering systems for use in an ocean environment.

### **Ocean Engineering Fluid Mechanics (EOC 3123) 4 credits**

*Prerequisites: EGN 3321, EGN 3343, EOC 3130L and MAC 2313, all with minimum grades of "C"*

The first course of a two-semester study of incompressible-fluid flow and its application to ocean engineering with emphasis on fluid properties, hydrostatic forces, buoyancy and stability of floating bodies including metacentric height concepts, fluid dynamics, dimensional analysis, modeling, real flows in closed conduits and open channels, boundary-layers, lift and drag, turbo-machines, computational and experimental methods, resistance and propulsion of marine vehicles, and design problems. A grade of "C" or better is required for the major.

### **Ocean Engineering Laboratory (EOC 3130L) 3 credits**

*Prerequisites: CHM 2045, CHM 2045L, PHY 2044, PHY 2049L and EEL 2161, all with minimum grades of "C"*

Introduction to engineering laboratory methods and techniques with experiences in measurements, experiment planning, data recording, and laboratory report preparation. Five major lab experiences, including one or more at sea, are included.

### **Materials 1 - Marine Topics (EOC 3213) 1 credit**

*Prerequisite: EGN 3365 or equivalent with minimum grade of "C"*

Introduction to atmospheric and submerged marine corrosion. Corrosion prevention methods. An introduction to cathodic protection. Introduction to fracture and fracture control in marine environments. Materials and devices for energy storage, primary/secondary batteries, fuel cells. Composite materials for marine applications.

### **Acoustics for Ocean Engineers (EOC 3306) 3 credits**

*Prerequisites: EGM 4045 and EOC 3130L, with minimum grades of "C"*

Fundamentals of acoustics. Sound propagation in fluids; speech, hearing, noise, architectural acoustics, loudspeakers, microphones, transducers, underwater sound transmission.

### **Structural Analysis (EOC 3410C) 3 credits**

*Prerequisite: EGN 3331 or equivalent with minimum grade of "C"*

Classical methods of analysis of beams, trusses, frames, cables, and arches for ocean and other structural applications. Approximate methods, moment area, virtual work, consistent deformations.

### **Ship Hydrodynamics (EOC 4124) 3 credits**

*Prerequisite: EOC 3123 with minimum grade of "C"*

The second course of a two-semester study of incompressible-fluid flow and its application to ocean engineering with emphasis on: fluid properties, hydrostatic forces, buoyancy and stability of floating bodies including metacentric height concepts, fluid dynamics, dimensional analysis, modeling, real flows in closed conduits and open channels, boundary-layers, lift and drag, turbo-machines, computational and experimental methods, resistance and propulsion of marine vehicles, and design problems.

### **Ocean Thermal Systems (EOC 4193) 3 credits**

*Prerequisite: EGN 3343 with minimum grade of "C"*

*Prerequisite or Corequisite: EOC 3123 with minimum grade of "C"*

Basic concepts of heat and mass transfer concepts with application to the ocean and ocean systems. Applications will include power cycles and heat exchangers in ocean systems. The interactive environmental processes involving solar radiation, convective ocean circulation, evaporation and mixtures will be considered.

### **Marine Materials and Corrosion (EOC 4201C) 3 credits**

*Prerequisite: EGN 3365 or equivalent with minimum grade of "C"*

Materials selection for marine applications. Atmospheric and submerged marine corrosion. Corrosion prevention and fracture and failure analysis. Materials and devices for energy storage, primary/secondary batteries, fuel cells and electrochemical capacitors. Composite materials, strengthening mechanisms.

### **Underwater Acoustics (EOC 4307C) 3 credits**

*Prerequisite: EOC 3306 with minimum grade of "C" or permission of instructor*

Sonar equations, underwater sound propagation, sonar system performance and design.

### **Ocean Structures (EOC 4412) 3 credits**

*Prerequisite: EOC 3410C with a minimum grade of "C"*

Matrix and finite-element methods, environmental loading, stability, and dynamics of floating body applied to ocean structures.

### **Ocean Wave Mechanics (EOC 4422) 3 credits**

*Prerequisite: EOC 3123 with minimum grade of "C"*

*Prerequisite or Corequisite: EGN 4323 with minimum grade of "C"*

Small amplitude wave theory, finite amplitude waves, wave generation, wave forecasting, wave measurements. Wave force on fixed structures, floating bodies and moored bodies.

### **Introduction to Ship Structural Design (EOC 4510) 3 credits**

*Prerequisites: EGN 3331 and EOC 3410C with minimum grades of "C"*

Course introduces fundamental knowledge of ship theory needed to design and analyze ship structures under hydrostatic and wave-induced forces that result in primary hull stresses.

### **Introduction to Electronics and Programming (EOC 4612C) 3 credits**

*Prerequisites: COP 2220, EEL 3111, all with minimum grade of "C"*

*Corequisite: EOC 3130L with minimum grade of "C"*

Introduction to basic electronics and programming by means of lectures, laboratory assignments and a term project. Laboratory assignments include simple switching and filtering circuits using transistors and op-amp sensor and actuator interfaces, data communication and Arduino programming. The term project involves designing a marine vehicle that incorporates many components covered in class.

### **Introduction to Ocean Instrumentation (EOC 4620) 3 credits**

*Prerequisite: EOC 3130L with minimum grade or "C" or permission of instructor*

This course provides an overview of instrumentations and data analysis that are required for design, fabrication and calibration of ocean systems, such as offshore structures, underwater vehicles, surface vessels, underwater acoustic imagery, underwater optical imagery and pressure vessels.

### **Ocean and Environmental Data Analysis (EOC 4631C) 3 credits**

*Prerequisite: EOC 3130L with minimum grade of "C"*

*Prerequisite or Corequisite: EGN 4323 with minimum grade of "C"*

Fourier transform applications to the processing of ocean engineering related types of signals.

Introduction to probability and statistics. Digital processing techniques. Laboratory work involving analysis of ocean engineering-related signals using modern data acquisition systems.

**RI: Ocean Engineering Systems Control and Design (EOC 4804) 3 credits**

*Prerequisites: All 3000-level core engineering courses required by the department, excluding EOC 3213, and including EOC 4193 and EGN 4432, each with minimum grades of "C"*

*Corequisite: EOC 4631C with minimum grade of "C"*

Ocean engineering design, giving consideration to creativity, professionalism and incorporation of engineering standards, codes and multiple constraints. Ocean systems design, simulation and control. Dynamic modeling, system trade-offs and system evaluation. Feasibility, preliminary and final design for project to be completed in EOC 4804L. This is a research-intensive (RI) course.

**RI: Ocean Engineering Systems Control and Design Laboratory (E OC 4804L) 4 credits**

*Prerequisite: EOC 4804 with minimum grade of "C"*

Completion and execution of the system design project developed in previous EOC 4804 including detail design, final design, fabrication, testing, evaluation, and reporting of results in written and oral form. This is a research-intensive (RI) course.

**Directed Independent Study (EOC 4905) 1-3 credits**

*Prerequisite: Permission of instructor*

**Special Topics (EOC 4930) 1-4 credits**

*Prerequisite: Permission of instructor*

New developments in Ocean Engineering and related areas.

**Cooperative Education - Ocean Engineering 1 & 2 (EOC 4949) 1-3 credits**

*Prerequisite: Successful completion of one semester of upper-level ocean engineering curriculum*

Cooperative work-study with ocean oriented organizations for ocean engineering students who have completed at least one full semester of upper-level Ocean Engineering. On-the-job training and instruction. May be repeated once for credit. These credits do not count toward the bachelor's degree.

*Grading: S/U*

**Introduction to Oceanography (OCE 2001) 3 credits**

(Note: Ocean Engineering majors may not take this course for credit.)

Using the scientific method, critical thinking skills, data analysis, this course examines the fundamental processes of the ocean system, composed of an atmosphere, hydrosphere, lithosphere and biosphere, through time. The course also explores interactions among these spheres, including critical analysis of scientific theories and emphasizes oceanic connections with humanity. This is a General Education course.

### **Oceanography (OCE 3008) 3 credits**

*Prerequisite: CHM 2045 with minimum grade of "C"*

Nature of sea water; trace and major constituents; the ocean carbon, phosphorous, and nitrogen cycles; basins, continental shelf, deep ocean floor; thermal vents, manganese nodules, marine sediments; marine life; plate tectonics; estuaries and mixing processes; pollution; corrosion and biofouling; winds, waves, tides, currents and ocean circulation processes; energy (heat, light, sound); depth, temperature, salinity, and other physical effects.

### **Ocean and Mechanical Engineering Graduate Courses**

#### **Topics in Biomechanical Engineering (BME 5930) 3 credits**

*Prerequisites: Mechanical Engineering students, permission of instructor*

Study relating to specialized topics associated with biomechanical engineering including, but not limited to, biomechanics, bio-fluid mechanics, biosensors and MEMS, and nanotechnology.

#### **Biomaterials (BME 6105) 3 credits**

*Prerequisite: EGN 3365*

This course covers the knowledge of biomaterials in science and engineering. All types of biomaterials as well as their applications in biomedical fields are introduced and discussed extensively.

#### **Nanotechnology (BME 6572) 3 credits**

An introduction to nanotechnology through lectures, demonstrations, and projects covering fundamental science behind nanotechnology; tools for nanosciences; smart materials; sensors; biomedical applications; energy capture, transformation, and storage; optics and electronics; fabrication and modeling; and the nano business, nano industry.

#### **Advanced Topics in Microfluidics and BioMEMS (BME 6585) 3 credits**

*Prerequisites: EML 3701 and MAP 3305, or permission of instructor*

A comprehensive introduction to microfluidics, micro-electro-mechanical systems (MEMS) and microfabrication techniques. Advanced topics on the applications of microfluidics and MEMS for bioengineering problems (bioMEMS). Topics include fluid properties, flow behavior, electrokinetics, photolithography, soft lithography, flow control, manipulation and characterization of biological cells using engineered microdevices.

#### **Optimal Control Systems (EEL 6672) 3 credits**

*Prerequisite: Permission of instructor*

The optimization theory is applied to continuous and discrete dynamic systems.

### **Introduction to Finite Element Methods (EGM 5351) 3 credits**

*Prerequisites: Senior or graduate standing, MAD 3400 or equivalent*

Application of finite element programs to problems in heat transfer, fluid mechanics, vibration, stress analysis and machine design.

### **Advanced Strength of Materials (EGM 6533) 3 credits**

*Prerequisite: Graduate standing*

Elements of plane elasticity, failure theories, and advanced topics in bending and torsion of structural elements. It serves as an introduction to finite element methods and applications in machine design.

### **Mechanics of Composite Materials (EGM 6562) 3 credits**

*Prerequisite: Graduate standing*

An introduction to composites, basic principles of elasticity, unidirectional composites, short-fiber composites, laminated composites, strength analysis, composite designs, joint criteria, and test methods.

### **Special Topics (EGN 5930) 1-4 credits**

*Prerequisite: Permission of instructor*

Courses in specialized interdisciplinary areas of engineering. May be repeated for credit.

### **Industrial Automation (EIN 5603C) 3 credits**

*Prerequisite: EML 4312 or its equivalent*

Design of pneumatic and hydraulic systems for automation, use of programmable logic controller for combinational and sequential systems implementation, computerized numerical control machine tools and robotics, integration of manufacturing stations into a system.

### **Topics in Mechanical Engineering (EML 5931) 3 credits**

*Prerequisites: Mechanical Engineering students; permission of instructor*

Study relating to specialized topics associated with mechanical engineering including, but not limited to, energy, machines, solid mechanics, fluid mechanics, thermodynamics, heat transfer, robotics, experimental methodology, vibrations, material and control.

### **Graduate Seminar (EML 5937) 0 credit**

*Prerequisite: Graduate standing*

A seminar series with distinguished speakers. Students must attend at least five seminar presentations.

*Grading: S/U*

### **Mechanical Vibrations (EML 6223) 3 credits**

*Prerequisite: Graduate standing*

Step and impulse loads, multiple degrees of freedom, influence coefficients, matrix methods, vibration of continuous systems, Lagrange's equations. This course serves as an introduction to non-linear and random vibrations.

**Failure Prevention (EML 6233) 3 credits**

*Prerequisite: Graduate standing*

Modes of mechanical failure, strength and deformation of metals, theories of failure, fatigue and fracture, life prediction, statistics, fretting, wear, and corrosion.

**Fracture Mechanics (EML 6239) 3 credits**

*Prerequisite: Graduate standing*

An introduction to linear elastic fracture mechanics. It studies deformation response of materials, toughness, fatigue and fracture, environmentally assisted cracking, experimental methods, and data reduction.

**Advanced Engineering Dynamics (EML 6271) 3 credits**

A course in three-dimensional kinematics and kinetics of particles and rigid bodies, Lagrangian mechanics, Hamilton's principle, and engineering application to discrete and continuous systems.

**Advanced Control Systems (EML 6317) 3 credits**

*Prerequisite: EGN 4432*

Control design applications via root locus and frequency-based approaches are explored theoretically and applied to laboratory systems. Nonlinear sliding mode control theory is introduced and applied to a lab system. Each student also explores an individual project based on control of a system.<BR>

**Turbomachinery (EML 6402) 3 credits**

*Prerequisite: Graduate standing*

Performance characteristics of turbomachines, basic laws, the cascade theory, the thin airfoil theory, inviscid flow in three dimensions, boundary layers, axial flow turbines.

**Solar Energy Engineering (EML 6417C) 3 credits**

*Prerequisite: Graduate standing*

The fundamentals of solar radiation, transmission, and absorption; flat plate and focussing collectors, thermal storage, heating and cooling of structures, distillation, process heat generation, and power generation. Two hours lecture and six hours lab are required.

**Advanced Energy Conversion Processes and Systems (EML 6451) 3 credits**

*Prerequisite: EML 3701 or permission of instructor*

This course provides fundamentals of thermodynamics, fluid mechanics, heat transfer, chemistry and transport phenomena applied to various energy conversion systems. System analysis of energy conversion in thermal, mechanical, chemical, electrical and biological processes is introduced. Current status and future outlook of each energy source and its associated conversion processes is also discussed. Energy conversion performance characteristics and sources of inefficiencies are explored for a variety of applications.

### **Wind and Ocean Energy Turbines (EML 6455) 3 credits**

*Prerequisite: EGN 3331*

A comprehensive introduction to wind and ocean energy systems, turbine blade design, wind and ocean current loading, advanced materials in design, cyclic and cumulative fatigue, matrix stiffness and finite element method. The application of advanced topics in wind and ocean energy systems addresses contemporary issues.

### **Advanced Fluid Dynamics (EML 6716) 3 credits**

*Prerequisites: Graduate standing, EML 3701 or permission of instructor*

A survey of fluid dynamics, this course addresses the fundamental principles and their applications in a variety of engineering and science problems. Topics covered include dimensional analysis, kinematics, dynamics, inviscid flow, viscous flow, vorticity, boundary layer, turbulence, compressible flow, flow with gravity and flow of industrial and natural processes.

### **Directed Independent Study (EML 6905) 1-3 credits**

*Prerequisite: Permission of instructor*

Study of advanced topics related to special needs and interests of the individual student. May be taken for repeated credit.

### **Advanced Research (EML 6918) 1-9 credits**

*Prerequisite: Permission of instructor*

This course encourages research that is relevant to the student's course of study in the Ph.D. program. This course requires oversight by the student's advisor who can assess the student's performance at the end of the semester. This course can only be taken prior to admission to candidacy for the doctoral degree and may be repeated in multiple semesters.

### **Special Topics (EML 6930) 1-3 credits**

*Prerequisite: Graduate standing*

A course in specialized area not adequately covered in other courses. It may be repeated for credit.

**Master's Thesis - Mechanical Engineering (EML 6971) 1-9 credits**

*Grading: S/U*

**Dissertation-Mechanical Engineering (EML 7980) 1-15 credits**

*Grading: S/U*

**Mathematical Methods in Ocean Engineering 1 (EOC 5172) 3 credits**

*Prerequisite: Permission of instructor*

First of a two-course sequence of mathematical methods in solving ocean engineering problems in hydrodynamics, vehicle dynamics, acoustics and vibrations, ocean structures, and electrical and mechanical systems.

**Topics in Ocean Engineering (EOC 5931) 1-4 credits**

*Prerequisites: Ocean Engineering students; permission of instructor*

Study relating to specialized topics associated with ocean engineering including, but not limited to, hydrodynamics, acoustics, corrosion, marine environment, structures and ship design, autonomous systems and control.

**Special Topics in Ocean Engineering (EOC 5934) 1-5 credits**

*Prerequisite: Permission of instructor*

Advanced topics in specialized areas of ocean engineering not adequately covered in other courses. This course may be repeated for credit.

**Marine Renewable Energy (EOC 6145) 3 credits**

*Prerequisite: Graduate standing or permission of instructor*

Fundamentals of marine renewable energy including a review of the state-of-the-industry related to producing electrical power from tides, ocean currents, waves, offshore wind and thermal gradients. The fundamental design and operating principles of each type of energy extraction system are discussed as well as the associated available energy densities and total available resources for each.

**Advanced Fracture and Failure Processes 1 (EOC 6157) 3 credits**

*Prerequisites: EOC 6216C, EOC 6230, or permission of instructor*

Advanced treatment of microscopic and macroscopic theories of plastic deformation, strengthening mechanisms, and fracture; fracture mechanics, fatigue and environmental cracking, stress corrosion cracking, corrosion fatigue and hydrogen embrittlement. Emphasis is on materials employed in structural marine applications.

**Mathematical Methods in Ocean Engineering 2 (EOC 6174) 3 credits**

*Prerequisite: EOC 5172*

Second of a two-course sequence of mathematical methods in solving ocean engineering problems in hydrodynamics, vehicle dynamics, acoustics and vibrations, ocean structures, and electrical and mechanical systems.

**Advanced Hydrodynamics 1 (EOC 6185) 3 credits**

*Prerequisite: Graduate standing or permission of instructor*

A two-semester sequence providing a comprehensive and rigorous background in hydrodynamics for ocean engineering graduate students. The course will cover development of basic equations and fundamental approximations, potential flow, low and high Reynold's number flows, turbulence, and boundary layers. It employs basic analytic and numerical methods of problem solving.

**Advanced Hydrodynamics 2 (EOC 6186) 3 credits**

*Prerequisites: PHZ 4113, EOC 6185*

The second course in a two-semester sequence providing a comprehensive and rigorous background in hydrodynamics for ocean engineering graduate students. The course will cover development of basic equations and fundamental approximations, potential flow, low and high Reynold's number flows, turbulence, and boundary layers. Basic analytic and numerical methods of problem solving are used.

**Computational Fluid Dynamics (EOC 6189) 3 credits**

*Prerequisites: PHZ 4113, EOC 6185 and EOC 6186*

A systematic instruction of computing techniques for fluid flow including fundamentals of computational fluid dynamics, finite difference methods for incompressible flow, finite element simulation, and numerical methods in free-surface flow.

**Turbulent Flow (EOC 6190) 3 credits**

*Prerequisites: PHZ 4113, EOC 6185 and EOC 6186*

An introduction to turbulent transport of momentum and heat, the dynamics of turbulence, wall-bounded shear flows, boundary-free shear flows, turbulent diffusion, shear flow dispersion.

**Corrosion 1 (EOC 6216C) 3 credits**

*Prerequisite: Graduate standing*

Theory of corrosion with regard to electrode potential, polarization and passivity, and corrosion prevention; techniques in corrosion research; corrosion and corrosion prevention in the marine environment.

**Corrosion 2 (EOC 6218C) 3 credits**

*Prerequisite: EOC 6216C*

The theory of corrosion with regard to electrode potentials, polarization, and passivity as well as corrosion prevention. It covers techniques in corrosion research; corrosion and corrosion prevention in the marine environment.

### **Physical Metallurgy (EOC 6230) 3 credits**

*Prerequisite: Permission of instructor*

The theoretical aspects of physical metallurgy: the structure of atoms and crystals, laboratory techniques, thermodynamics of metals, structure of alloys, dislocation theory.

### **Ocean and Seabed Acoustics (EOC 6312) 3 credits**

*Prerequisite: EOC 3306 or permission of instructor*

Course provides an overview of ocean and seabed acoustics including the theory of underwater sound generation, propagation, and reception that is required for the design of sonar systems and acoustic experiments.

### **Engineering Principles of Acoustics (EOC 6317C) 3 credits**

*Prerequisite: Permission of instructor*

The physical principle of acoustics, governing equations and their solutions, bounded and unbounded media, sources, sound generation propagation and measurement.

### **Offshore Structures (EOC 6431) 3 credits**

Basic structural systems, environmental loading, fixed and gravity type platforms, semi-submersibles, floating and compliant platforms, external pressure shell structures including oil storage tanks, pipelines, wet and dry subsea completion systems, buoy engineering, concepts for frontier areas, dynamic response.

### **Hydrodynamic Aspects of Ship Design (EOC 6515) 3 credits**

*Prerequisite: EOC 6185 or equivalent*

Course covers the hydrodynamics of naval architecture with topics including resistance, propulsion, sea-keeping, and maneuvering with emphasis on geometric effects on vehicle performance.

### **Ocean Instrumentation (EOC 6625) 3 credits**

*Prerequisite: Graduate standing in Ocean, Mechanical or Electrical Engineering discipline*

Provides an overview of instrumentations and data analysis that are required for design, fabrication and calibration of ocean systems, such as platforms and offshore structures, autonomous underwater vehicles, surface vessels, underwater imagery, pressure vessels and pipelines.

### **Signal Processing (EOC 6630) 3 credits**

*Prerequisite: Graduate standing or permission of instructor*

Theory of information processing with particular applications in the fields of communication and sonar.

### **Engineering Data Analysis (EOC 6635) 3 credits**

Fourier transform applications to the processing of ocean engineering related types of signals, time and frequency domain analysis of signals, signal processing techniques, laboratory work involving actual ocean time series data using modern data acquisition systems.

### **Intelligent Underwater Vehicles 1 (EOC 6663) 3 credits**

*Prerequisites: STA 4032*

Engineering principles for intelligent, unmanned, untethered, underwater vehicles (IU3 vehicles). Topics include vehicle kinematics; and tasks, behavior, locomotion, power sources and sensors.

### **Directed Independent Study (EOC 6908) 1-3 credits**

Reading and research on selected appropriate topics.

### **Special Topics (EOC 6934) 1-3 credits**

*Prerequisite: Permission of instructor*

New developments and advanced work in specialized areas of ocean engineering designed for individual student interest.

### **Dissertation (EOC 7980) 1-15 credits**

*Grading: S/U*

### **Master's Thesis (OCE 6971) 1-10 credits**

*Grading: S/U*

### **Physical Aspects of Oceanography (OCP 6050) 3 credits**

*Prerequisite: Admission to graduate program in Ocean Engineering*

A critical review of physical, chemical, and geological oceanography. Extensive assigned reading, seminars, etc. are required.

Honors College courses are open to Honors College students as well as other Florida Atlantic University students with at least a 3.5 cumulative GPA who obtain permission of the instructor and the Honors College Dean's Office. Courses unique to the Honors College are found in the specific Department listings below and are accompanied by descriptions and pre/corequisites if applicable.

To read the descriptions and pre/corequisites of other courses offered by the Honors College but not unique to the College (non-honors versions of these courses are offered in other FAU colleges), look for the italic note under each course below for referral to the appropriate section in the catalog where the course's complete listing appears.

## DIVISION OF HUMANITIES

Components of this Division: Arabic, Art, Classics, Composition/Rhetoric, French, Humanities, Interdisciplinary Studies, Literature, Music, Philosophy, and Spanish.

### ARABIC

#### **Honors Beginning Arabic Language and Culture 1 (ARA 1120) 4 credits**

This course is an introduction to Modern Standard Arabic, also known as International Arabic or Classical Arabic. The student learns the Arabic alphabet (writing system and phonetics) as well as basic vocabulary and grammar (syntax and morphology) of Standard Arabic.

#### **Honors Beginning Arabic Language and Culture 2 (ARA 1121) 4 credits**

This course is a part two of an introduction to Modern Standard Arabic, also known as International Arabic or Classical Arabic. The students learn different tenses (the imperfect, the subjunctive, the jussive and the imperative) and some complex grammatical structures in Arabic.

### ART

#### **Honors Art Appreciation (ARH 2000) 3 credits**

(See [Visual Arts and Art History courses, College of Arts and Letters section](#))

#### **Honors History of Art 1 (ARH 2050) 3 credits**

This illustrated class is a general introduction to the history of art across time and space: from Prehistoric to the Gothic; from Egypt, Greece, the Near East, Europe, Asia to Mesoamerica. By taking this class, students are expected to develop an understanding of art in various forms in its historical context. This is a General Education course.

#### **Honors History of Art 2 (ARH 2051) 3 credits**

This illustrated class is a general introduction to the history of art across time and space: from

Renaissance to the contemporary world; from Europe to Africa, Asia, America, and the Pacific. By taking this class, students are expected to develop a critical understanding of art in various forms in its historical context. This is a General Education course.

**Honors Still Image/Moving Image (ARH 2701) 3 credits**

This course develops the student's understanding and appreciation of the visual arts through critical study of contemporary issues in the visual arts and rigorous examination of the ideas of "Painting" and the "Fine Arts" in our image-saturated era. The course will develop students' understanding of the connections between contemporary images and art history and help students become more sophisticated viewers and articulate critics of the visual arts and other visual media. This is a General Education course.

**Honors Beginning Study Abroad in Art History (ARH 2957) 1-6 credits**

Credit for enrollment in approved beginning art history courses in approved study abroad programs.

**Honors Intermediate Study Abroad in Art History (ARH 3957) 1-6 credits**

Credit for enrollment in approved intermediate art history courses in approved study abroad programs.

**Honors Directed Independent Research in Art History (ARH 4915) 1-3 credits**

Students work with research mentors to conduct research and inquiry in Art History. Requirements for the course and the criteria for evaluation are agreed upon by the mentor and student. A directed independent research form is completed for each DIR student.

**Honors Directed Independent Research in Art History (ARH 4916) 1-3 credits**

Students work with research mentors to conduct research and inquiry in Art History. Requirements for the course and the criteria for evaluation are agreed upon by the mentor and student. A directed independent research form is completed for each DIR student. *Grading: S/U*

**Honors Special Topics in Art History (ARH 4930) 3 credits**

Art of various cultural periods and/or thematic frameworks. May be repeated for credit.

**Honors Advanced Study Abroad in Art History (ARH 4959) 1-6 credits**

Credit for enrollment in approved advanced art history courses in approved study abroad programs.

**Honors Elements of Visual Thinking (ART 1014) 3 credits**

This course develops the student's understanding of the visual arts through critical study of the fundamentals of perception and visual composition, and through very active participation in the art-making process. Diverse materials and processes will be explored, including two-dimensional and

three-dimensional forms. Ideas of content are also addressed. This is a General Education course.

### **Honors Design and Color Phenomena (ART 1202C) 4 credits**

In this studio course, the fundamentals of color and design and their effects on 2D and 3D space are explored. This is a General Education course.

### **Honors Drawing 1 (ART 1300C) 3 credits**

Beginning drawing. Required for art majors. This is a General Education course.

### **Honors Photoshop (ART 1602C) 3 credit**

Course serves as a fundamental introduction to Photoshop basics. Students are introduced to digital manipulation, layers and other digital-editing tools that are part of this graphic software. This is a General Education course.

### **Honors Digital Art Photography (ART 1661C) 3 credits**

An introductory course designed to explore the multiple ways in which digital enhancement and other special effects can be used to create fine art photographic images. Students learn photographic basics such as depth of field, lighting and composition. This is a General Education course.

### **Honors Painting 1 (ART 2500C) 3 credits**

*Prerequisites: ART 1300C and ART 2540C*

Students develop their understanding of the visual arts through critical study of the fundamentals of perception and visual composition and through active practice making paintings. The course is an introduction to the process of oil painting. Problems of format, composition and content are also addressed. Students become articulate makers of paintings and articulate critics of those objects. This is a General Education course.

### **Honors Painting 2 (ART 2501C) 3 credits**

*Prerequisite: ART 2500C*

Students continue to develop their understanding of the visual arts through critical study of the fundamentals of perception and visual composition and through active practice making paintings. The course is a continuation of the process of oil painting. Problems of format, composition and content are also addressed. Students become articulate makers of paintings and articulate critics of those objects.

### **Honors Watercolor (ART 2540C) 4 credits**

Course stresses material and conceptual concerns relative to watercolor and other water-based media, including wash, mark, transparency, luminosity, and issues in composition and content. Students will develop their perceptual skills by working in the studio and on site. Students will develop their critical

skills during in-class critique and discussion, as well as through readings and research. This is a General Education course.

### **Honors Installation Art (ART 2804C) 4 credits**

From the animated and digitized installations of Tambino and Shahzia Sikander to the installation and performative video installations of Adrian Piper, new media digital technology is greatly influencing the ways in which contemporary artists comment on issues concerning privacy/surveillance, ethnicity/race, gender/biology. As a seminar/studio-based course, Honors Installation Art is designed to provide students with the opportunity to combine traditional materials with digital technology in order to observe how innovative practices can be introduced to their artistic expression. This is a General Education course.

### **Honors Beginning Study Abroad in Art (ART 2957C) 1-6 credits**

Credit for enrollment in approved beginning studio art courses in approved study abroad programs.

### **Honors Material Transformations (ART 3213C) 3 credits**

An introduction to the formal study of three-dimensional form, elements of patterns, textures and design. Through experimentation with both traditional and non-traditional materials, the structure, spatial design and portioned dimension of 3-D objects are explored. This background is considered essential to the education of students who are concerned with art's practice.

### **Honors Introduction to Illustration (ART 3255C) 3 credits**

Central to the art of storytelling is a well-designed image. Nonverbal, compelling illustrations grab all of our creative imaginations. As a beginning-level class, this course introduces students to basic techniques that promote visual communication.

### **Honors Scientific Illustration 1 (ART 3275C) 4 credits**

Supports the accurate and detailed visual recording of plant life found in the environment. Emphasis is placed on realistically duplicating the subject rather than solely exploring artistic creativity.

### **Honors Introduction to Botanical Art Illustration (ART 3277C) 3 credits**

*Prerequisite: ART 1300C or ART 1602C or ART 2540C or permission of instructor*

This course focuses on the accurate portrayal of various plant species both native and non-native to Florida.

### **Honors Advanced Experimental Drawing (ART 3382C) 4 credits**

*Prerequisites: ART 1300C or permission of instructor*

Course emphasizes active practice making drawings. Focus will be on the presentation of more sophisticated problems in drawing (format and composition), further exploring its material and conceptual possibilities, its history as an art form, and its future as an art medium. Students will choose subject matter. Instructor will set parameters of format and materials.

### **Honors Animating the Graphic Novel (ART 3646C) 4 credits**

Focuses on the creative elements behind animating the visual novel. Using traditional media, digital video, photography and other technologies, students create images for their graphic novels that push the formal structure of how these visual stories are created.

### **Honors Introduction to Programming for Visual Art (ART 3657C) 4 credits**

*Prerequisite: For Honors College students only*

This course introduces software as an art medium. This means that the course combines the "making" of art projects involving computer programming with thinking about algorithmic art and digital culture. Students learn basic programming concepts that are common to most modern programming languages. Students also discuss readings on topics in digital culture. Toward the end of the semester, students create a final project based on an original idea of their own.

### **Honors Environmental Art (ART 3840C) 4 credits**

Provides an introduction to the expansive field of environmental art. This background is considered essential to the education of students who are concerned with art's practice in concert with the environment.

### **Honors Artists and Community (ART 3841C) 4 credits**

Students research and observe community outreach programs developed by artists and organizations. As a result of their observations, students then develop their own community art projects.

### **Honors Intermediate Study Abroad in Art (ART 3957C) 1-6 credits**

Credit for enrollment in approved intermediate studio art courses in approved study abroad programs.

### **Honors Game Studies (ART 4640) 4 credits**

The class provides an introduction to game studies primarily through readings and discussions but also through practical exercises of playing games and game-making.

### **Honors Electronics and Electronic Objects for Art (ART 4645C) 4 credits**

This course introduces electrical and some mechanical engineering techniques for the purpose of making art. Students receive a systematic introduction to building circuits with electronic components and ultimately make their own sensing and actuation devices. Readings and discussions on cultural

issues surrounding electronic objects and environments accompany the technical instruction. Students create a final project based on an original idea of their own.

### **Honors 3D Computer Game Development (ART 4653C) 4 credits**

This course focuses on developing 3D games or other interactive 3D experiences within the context of art. The focus is on creatively re-imagining 3D computer games, not on re-creating existing game experiences.

### **Honors 2D Computer Game Development (ART 4658C)**

This course focuses on developing 2D games or other interactive 2D experiences within the context of art. The emphasis is on creatively re-imagining 2D computer games, not on re-creating existing game experiences.

### **Honors The Body in Art: The Figure in Context (ART 4854C) 4 credits**

This seminar/studio-based course is designed to examine the representation of bodies in art.

### **Honors Directed Independent Study in Art (ART 4905C) 1-4 credits**

*Prerequisite: ART 1300C, ART 2540C, or permission of instructor*

This course exists specifically for the independently driven and curious student. The student will develop a semester-long course of study in collaboration with the instructor. Experimental approaches that address current discussion and practice in the visual arts will be emphasized. The student will work independently, meeting with the instructor on an arranged basis.

### **Honors Thesis Research in Art (ART 4912C) 3-4 credits**

*Prerequisite: Permission of advisor*

In conjunction with the advisor, the student selects and evaluates materials related to his/her area of interest in art. This work prepares the student to undertake the completion of the Honors Thesis in Art. Students are required to submit a proposal, as well as a substantial annotated bibliography and sketchbook.

### **Honors Directed Independent Research in Art (ART 4915) 1-3 credits**

Students work with research mentors to conduct research and inquiry in Art. Requirements for the course and the criteria for evaluation are agreed upon by the mentor and student. A directed independent research form is completed for each DIR student.

### **Honors Directed Independent Research in Art (ART 4916) 1-3 credits**

Students work with research mentors to conduct research and inquiry in Art. Requirements for the course and the criteria for evaluation are agreed upon by the mentor and student. A directed

independent research form is completed for each DIR student. *Grading: S/U*

### **Honors Special Topics in Art (ART 4934C) 3-4 credits**

This course develops the student's understanding of the visual arts through focused critical study of topics in perception and visual composition. Diverse materials and processes are explored. Ideas of format, composition, subject matter, and content are also addressed. Experimental approaches that address current discussion and practice in the visual arts are emphasized.

### **Honors Internship in Art (ART 4947) 1-4 credits**

*Prerequisite: Permission of instructor*

Students participate in projects in the visual arts on the international, national, regional, or local level to develop practical experience in the relevant disciplines, e.g., work in the National Endowment for the Arts, in local museums or galleries, with arts councils, or in schools.

### **Honors Advanced Study Abroad in Art (ART 4957C) 1-6 credits**

Credit for enrollment in approved advanced studio art courses in approved study abroad programs.

## **CLASSICS**

### **Honors Classical Mythology (CLT 3370) 3 credits**

*Writing Across Curriculum (Gordon Rule)*

An examination of classical Greek mythology from a cross-cultural perspective. Comparison and contrast of ancient myths (primarily Greek mythology, but with some attention to Near Eastern, Egyptian, Hindu, and Roman tales) and modern "urban legends" in terms of story patterns, cultural values, and reception theory.

### **Honors Latin 1 (LAT 1120) 4 credits**

*Prerequisite: Permission of instructor*

Intensive introductory study of Latin language with emphasis on reading, translation, grammatical analysis, and vocabulary; study of Latin literature, philosophy, and history in translation.

### **Honors Latin 2 (LAT 1121) 4 credits**

*Prerequisites: Permission of instructor and LAT 1120 or equivalent*

Intensive introductory study of Latin language with emphasis on reading, translation, grammatical analysis, and vocabulary; builds on knowledge and skills acquired in Latin 1 to complete the first-year language sequence; study of Latin literature, philosophy, and history in translation.

## COMPOSITION/RHETORIC

### **Honors Creative Writing (CRW 3010) 3 credits**

*Prerequisite: ENC 1101 or equivalent*

Guidance and criticism for beginners in writing prose fiction and poetry.

### **Honors Creative Writing Retellings (CRW 3126) 3 credits**

Course is devoted to mastering the art of fiction. The special theme for this course is Retellings: Myths and Fairy Tales. Students are expected to read and discuss representative works from established authors as well as write their own original pieces.

### **Honors Creative Nonfiction (CRW 3224) 3 credits**

Course is devoted to mastering the art of creative nonfiction writing, including personal essays, profiles, travel writing and multimedia writing. Students are expected to read and discuss representative nonfiction from established authors as well as write their own original works.

### **Honors Writing the Novel (CRW 4122) 3 credits**

This course focuses on the process for planning out, writing, a collaborative workshop and revision for a novel. The goal of this class is to have a draft completed by the end of the semester, with detailed character information and a thought-out plan for the novel-in-progress. The subject of the novel is up to the student, and the format of the chapters may vary, as long as the student considers the pages as a whole. The challenge here is to push oneself to focus on one project in particular rather than a number of small assignments and foresee one project to completion (or near it).

### **Honors Science Fiction and Fantasy Writing (CRW 4123) 3 credits**

This class explores the limits and possibilities of the science fiction/fantasy/horror (scifi/f/h) genres. Students read and analyze works of scifi/f/h, with particular attention to the authors' use of craft. Students create their own works in these genres through brainstorming, in-class writing, journaling, drafting and revising.

### **Honors Directed Independent Research in Writing (CRW 4915) 1-3 credits**

Students work with research mentors to conduct research and inquiry in Writing. Requirements for the course and the criteria for evaluation are agreed upon by the mentor and student. A directed independent research form is completed for each DIR student.

### **Honors Directed Independent Research in Writing (CRW 4916) 1-3 credits**

Students work with research mentors to conduct research and inquiry in Writing. Requirements for the course and the criteria for evaluation are agreed upon by the mentor and student. A directed

independent research form is completed for each DIR student. *Grading: S/U*

### **Honors Advanced Creative Writing Workshop (CRW 4924) 3 credits**

This course is a writing workshop. Twice a semester, students submit a five- to ten-page work-in-progress that receives feedback from their peers and the professor. Students use this feedback to develop and revise their work for submission in a final fifteen- to twenty-page work (for stories, essays or scripts) or an eight- to ten-poem portfolio.

### **Honors Special Topics in Creative Writing (CRW 4930) 3 credits**

[\(See English courses, College of Arts and Letters section\)](#)

### **Honors College Writing (ENC 1101) 3 credits**

*Writing Across Curriculum (Gordon Rule)*

*Prerequisite: Permission of instructor*

[\(See English courses, College of Arts and Letters section\)](#)

### **Honors College Writing 2 (ENC 1102) 3 credits**

*Writing Across Curriculum (Gordon Rule)*

*Prerequisite: ENC 1101 with a grade of "C" or better*

This course is designed to help students think about and improve their own writing. Students will write and revise three thesis-driven essays on the topics of their choice, in addition to weekly short writing assignments that will include rhetorical analysis, topic proposals, annotated bibliographies and other prompts. Students will develop their research skills and work toward polished, elegant writing.

### **Honors Research and the Writing Process (ENC 2135) 3 credits**

Course enables students to develop independent research skills through access to FAU's library system as well as through access to a variety of Internet resources including daily use of an on-campus computer laboratory. Emphasis is on the student's development of the first draft of a research paper of at least 4000 words.

### **Honors Advanced Exposition (ENC 3310) 3 credits**

*Writing Across Curriculum (Gordon Rule)*

[\(See English courses, College of Arts and Letters section\)](#)

### **Honors Special Topics in Rhetoric and Composition (ENC 4931) 3 credits**

*Writing Across Curriculum (Gordon Rule)*

This course addresses special topics and selected genres of rhetoric and composition. Since the content will vary, this course may be repeated for credit.

**Honors Introduction to Linguistics (LIN 3010) 3 credits**

*Writing Across Curriculum (Gordon Rule)*

**Honors Directed Independent Study in Linguistics (LIN 4905) 1-3 credits**

*Prerequisite: Permission of instructor*

**Honors Directed Independent Research in Linguistics (LIN 4915) 1-3 credits**

Students work with research mentors to conduct research and inquiry in Linguistics. Requirements for the course and the criteria for evaluation are agreed upon by the mentor and student. A directed independent research form is completed for each DIR student.

**Honors Directed Independent Research in Linguistics (LIN 4916) 1-3 credits**

Students work with research mentors to conduct research and inquiry in Linguistics. Requirements for the course and the criteria for evaluation are agreed upon by the mentor and student. A directed independent research form is completed for each DIR student. *Grading: S/U*

**Honors Special Topics in Linguistics (LIN 4930) 1-3 credits**

*Prerequisite: None*

[\(See Languages, Linguistics, and Comparative Literature courses, College of Arts and Letters section\)](#)

## FRENCH

**Honors Beginning French**

**Language and Culture 1 (FRE 1120) 4 credits**

**Honors Beginning French**

**Language and Culture 2 (FRE 1121) 4 credits**

**Honors Intermediate French**

**Language and Culture 1 (FRE 2220) 4 credits**

**Honors Intermediate French Language and Culture 2 (FRE 2221) 4 credits**

[\(See Languages, Linguistics, and Comparative Literature courses, College of Arts and Letters section\)](#)

**Honors French Language and Culture Study Abroad (FRE 2957) 1-6 credits**

*Prerequisite: Permission of instructor*

Credit for enrollment in approved French language and culture in approved study abroad programs.

**Honors Advanced French Language and Culture 1 (FRE 3400) 4 credits**

*Prerequisite: FRE 2221, placement, or permission of instructor*

[\(See Languages, Linguistics, and Comparative Literature courses, College of Arts and Letters section\)](#)

### **Honors French or Francophone Culture Study Abroad (FRE 3957) 1-6 credits**

*Prerequisite: Permission of instructor*

Credit for enrollment in approved French or Francophone culture course in approved study abroad programs.

### **Honors Francophone Language and Culture (FRE 4502) 2-4 credits**

*Prerequisite: Permission of instructor*

Intensive study of aspects of French language.

### **Honors Directed Independent Research in French Language and Culture (FRE 4915) 1-3 credits**

Students work with research mentors to conduct research and inquiry in French Language and Culture. Requirements for the course and the criteria for evaluation are agreed upon by the mentor and student. A directed independent research form is completed for each DIR student.

### **Honors Directed Independent Research in French Language and Culture (FRE 4916) 1-3 credits**

Students work with research mentors to conduct research and inquiry in French Language and Culture. Requirements for the course and the criteria for evaluation are agreed upon by the mentor and student. A directed independent research form is completed for each DIR student. *Grading: S/U*

### **Honors Special Topics in French Language Studies (FRE 4930) 2-4 credits**

*Prerequisite: Permission of instructor*

[\(See Languages, Linguistics, and Comparative Literature courses, College of Arts and Letters section\)](#)

### **Honors Francophone Cultures and Civilizations (FRT 2510) 3 credits**

Examines the evolution of the French state and cultural identity, the creation and dissolution of the Francophone colonial empire, and the aspects of anti- and post-colonial thought and letters in French culture and Francophone cultures of Africa, the Caribbean, and Vietnam. This is a General Education course.

### **Honors Introduction to Francophone Literatures (FRW 3112) 3 credits**

*Prerequisite: FRE 3400 or permission of instructor*

Introduction to the study of literatures in French from France and other Francophone countries. Detailed analysis of poetry, plays, and prose from a variety of approaches. Class conducted in French.

### **Honors Directed Independent Study in French (FRW 4905) 1-3 credits**

[\(See Languages, Linguistics, and Comparative Literature courses, College of Arts and Letters section\)](#)

### **Honors Thesis Research in French (FRW 4912) 3 credits**

*Prerequisites: Junior or senior standing and permission of instructor*

In conjunction with the advisor, the student selects and evaluates materials related to an area of interest in French and/or Francophone literature and/or culture. This work prepares the student to write the honors thesis in French. Students are required to submit a proposal as well as a substantial annotated bibliography.

**Honors Directed Independent Research in French Literature (FRW 4915) 1-3 credits**

Students work with research mentors to conduct research and inquiry in French Literature. Requirements for the course and the criteria for evaluation are agreed upon by the mentor and student. A directed independent research form is completed for each DIR student.

**Honors Directed Independent Research in French Literature (FRW 4916) 1-3 credits**

Students work with research mentors to conduct research and inquiry in French Literature. Requirements for the course and the criteria for evaluation are agreed upon by the mentor and student. A directed independent research form is completed for each DIR student. *Grading: S/U*

**Honors French or Francophone Literature Study Abroad (FRW 4957) 1-6 credits**

*Prerequisite: Sophomore standing or permission of instructor*

Credit for enrollment in approved study abroad programs. Since the content will vary, this course may be repeated for credit.

**RI: Honors Thesis in French (FRW 4970) 1-6 credits**

*Prerequisites: Senior standing, permission of instructor, and FRW 4912*

Intense reading and writing leading to an honors thesis on a topic related to a theoretical or critical aspect of French and/or Francophone literature and/or culture. This course is research intensive (RI).

## HUMANITIES

**Honors Beginning Foreign Language and Culture 1 (FOL 1120) 4 credits**

**Honors Beginning Foreign Language and Culture 2 (FOL 1121) 4 credits**

*Grading: Regular*

*Prerequisites: None*

[\(See Languages, Linguistics, and Comparative Literature courses, College of Arts and Letters section\)](#)

**Honors Directed Independent Study in Foreign Language (FOL 4905) 1-4 credits**

*Prerequisite: Permission of instructor*

This course offers students the option of learning any given aspect (linguistic, cultural, grammatical) of

a foreign language not regularly taught at the Honors College. May be repeated for credit.

**Honors Directed Independent Research in a Foreign Language (FOL 4915) 1-3 credits**

Students work with research mentors to conduct research and inquiry in a Foreign Language. Requirements for the course and the criteria for evaluation are agreed upon by the mentor and student. A directed independent research form is completed for each DIR student.

**Honors Directed Independent Research in a Foreign Language (FOL 4916) 1-3 credits**

Students work with research mentors to conduct research and inquiry in a Foreign Language. Requirements for the course and the criteria for evaluation are agreed upon by the mentor and student. A directed independent research form is completed for each DIR student. *Grading: S/U*

**Honors Introduction to Humanities (HUM 2020) 3 credits**

In this course, students learn about the creative ideas and accomplishments of various cultures in various fields of humanities that may include art, architecture, drama, history, music, literature, philosophy and religion. The course includes cultural expressions from the Western canon and may also include expressions from around the globe. This is a General Education course.

**Honors Writing in the Humanities 1 (HUM 2932) 1 credit**

This course studies essay formats, documentation styles, organization of material, point of view, consideration of audience, argumentative forms, diction, and grammar and mechanics, as well as the process of writing as learning in the humanities. May be repeated for credit.

**Honors Humanities Study Abroad (HUM 2952) 1-4 credits**

*Prerequisite: Sophomore standing*

Credit for enrollment in approved study abroad programs. May be repeated for credit.

**Honors Directed Independent Study in the Humanities (HUM 4905) 1-3 credits**

*Prerequisite: Permission of instructor*

Directed independent research in interdisciplinary aspects of the humanities.

May be repeated for credit.

**Honors Directed Independent Research in Humanities (HUM 4915) 1-3 credits**

Students work with research mentors to conduct research and inquiry in Humanities. Requirements for the course and the criteria for evaluation are agreed upon by the mentor and student. A directed independent research form is completed for each DIR student.

**Honors Directed Independent Research in Humanities (HUM 4916) 1-3 credits**

Students work with research mentors to conduct research and inquiry in Humanities. Requirements for

the course and the criteria for evaluation are agreed upon by the mentor and student. A directed independent research form is completed for each DIR student. *Grading: S/U*

### **Honors Writing in the Humanities 2 (HUM 4932) 1 credit**

*Prerequisite: Junior/senior standing or permission of instructor*

This course studies essay formats, documentation styles, organization of material, point of view, consideration of audience, argumentative and organizational forms necessary to advanced work in the humanities. May be repeated for credit.

### **Honors Internship in the Humanities (HUM 4947) 1-12 credits**

*Prerequisite: Permission of instructor*

Students will participate in projects in the humanities, international, national, or local, in order to develop practical experience in the relevant disciplines: e.g., work in National Endowment for the Humanities, local museums, art councils, schools. *Grading: S/U*

### **Honors Humanities Study Abroad (HUM 4957) 1-6 credits**

*Prerequisite: Sophomore standing*

Credit for enrollment in approved study abroad programs.

## **INTERDISCIPLINARY STUDIES**

### **Honors College Forum (IDH 1022) 1 credit**

*Required for all Honors College students.* Consists of lectures and presentations by noted University faculty and invited guests. The Honors Forum provides students with exposure to a wide range of disciplines and faculty scholarship. May be repeated for credit once. *Grading: S/U*

### **Honors Flagler Scholar Seminar 1 (IDH 2021) 1 credit**

*Prerequisite: Flagler Scholar standing*

Interdisciplinary studies in education, designed to integrate the lower-level curricula of Flagler scholars into a meaningful synthesis; may be taken twice for credit, with different contents, as organizing seminar for students in the first two years of their program.

### **Honors Law, Culture and Human Rights (IDH 3610) 1 credit**

Readings and discussion to give students a better understanding of the arguments for and against cultural relativism, claims that there are universal human rights and the issue of to what extent the law should recognize cultural and human rights claims.

### **Honors Law in the Real World (IDH 3720) 1 credit**

*Prerequisite: For Honors College students only or permission of instructor*

Introduction to how the law impacts individuals' personal and professional lives, and how it applies to a wide range of disciplines.

### **Honors Flagler Scholar Seminar 2 (IDH 4038) 1 credit**

*Prerequisite: Flagler Scholar standing*

Interdisciplinary studies in education designed to integrate the upper-level curricula of Flagler scholars into a meaningful synthesis. May be taken twice for credit, with different contents, as organizing seminar for students in the second two years of their program.

### **Honors Directed Independent Research in Interdisciplinary Studies (IDH 4915) 1-3 credits**

Students work with research mentors to conduct research and inquiry in Interdisciplinary Studies. Requirements for the course and the criteria for evaluation are agreed upon by the mentor and student. A directed independent research form is completed for each DIR student.

### **Honors Directed Independent Research in Interdisciplinary Studies (IDH 4916) 1-3 credits**

Students work with research mentors to conduct research and inquiry in Interdisciplinary Studies. Requirements for the course and the criteria for evaluation are agreed upon by the mentor and student. A directed independent research form is completed for each DIR student. *Grading: S/U*

### **Honors Interdisciplinary Critical Inquiry Seminar (IDS 1930, 2931, 3932, 3935, 4933) 1-3 credits**

A team-taught course that engages in interdisciplinary critical inquiry connecting courses from different disciplines to explore problems from a variety of perspectives and establish connections among distinct disciplines. May be repeated for credit. IDS 3935 is a Writing Across Curriculum (Gordon Rule) course.

### **Honors Interdisciplinary Studies Freshman Seminar (IDS 1933) 3 credits**

*Writing Across Curriculum (Gordon Rule)*

Topics vary. Seminar for freshmen that takes an interdisciplinary approach to a given topic. The aim is to show how multiple disciplines and genres contribute to our understanding of the topic. May be repeated for credit.

### **Honors Special Topics (IDS 2930) 1-3 credits**

Honors Special Topics course approaching a topic from multiple perspectives. As content may vary, course may be repeated.

**Honors Interdisciplinary Study Abroad (IDS 2952) 1-6 credits**

*Prerequisite: Sophomore standing*

Credit for enrollment in approved study abroad programs.

**Honors Audubon's Nature: Scientific Illustration (IDS 3131C) 4 credits**

Offers students the opportunity to observe, study, analyze, research and later visually illustrate species in their natural environment.

**Honors Special Topics in Interdisciplinary Studies (IDS 3930) 1-3 credits**

An open enrollment course used to cover special subject matters not presently offered by other Honors College courses. Because content varies, course may be repeated for credit.

**Honors Interdisciplinary Critical Inquiry Lab Seminar (IDS 3932L) 1-3 credits**

A team-taught course that engages in interdisciplinary critical inquiry and includes a lab connecting courses from different disciplines to explore problems from a variety of perspectives and establish relationships among distinct disciplines. May be repeated for credit.

**Honors Directed Independent Study in Interdisciplinary Studies (IDS 4905) 1-3 credits**

*Prerequisite: Permission of instructor*

Directed independent research in interdisciplinary studies of the arts and sciences.

**Honors Special Topics in Interdisciplinary Studies (IDS 4930) 1-3 credits**

*Prerequisite: Junior standing*

An open enrollment course used to cover special subject matters not presently offered by other Honors College courses. Because content varies, course may be repeated for credit.

**Honors Internship in Interdisciplinary Studies (IDS 4947) 1-12 credits**

*Prerequisite: Permission of instructor*

An internship experience in interdisciplinary fields such as Women's Studies, Environmental Studies or Rhetoric/Communication. This course provides students with an opportunity to apply academic concepts beyond the university, for example, in a nonprofit, corporate or government setting. *Grading: S/U*

**Honors Interdisciplinary Study Abroad (IDS 4957) 1-4 credits**

*Prerequisite: Sophomore standing*

Credit for enrollment in approved study abroad programs. May be repeated for credit.

**RI: Honors Thesis (IDS 4970) 1-6 credits**

*Writing Across Curriculum (Gordon Rule)*

*Prerequisites: Senior standing and sufficient course work in the area of study*

Intensive research and writing leading to completion of an honors thesis. May be repeated for credit.

This course is a research intensive (RI) course.

**Honors Introduction to Academic Life (SLS 1501) 2 credits**

Required for first-year Honors College students. This course is designed to increase the students' success in college by assisting them in obtaining the knowledge and skills necessary to reach their educational objectives. Topics include the nature of postsecondary education, time management, test-taking, communication skills, study techniques, question-asking skills, and library use. This is an Academic Service Learning (ASL) course.

## LITERATURE

**Honors American Literature to 1865 (AML 2010) 3 credits**

*Writing Across Curriculum (Gordon Rule)*

An overview of American literature, including representative writers of the Colonial, Enlightenment and Romantic periods. This is a General Education course.

**Honors American Literature: 1865-1945 (AML 2022) 3 credits**

*Writing Across Curriculum (Gordon Rule)*

An overview of American literature from 1865 to 1945, including representative writers of the Colonial, Enlightenment, and Romantic periods. This is a General Education course.

**Honors American Literature: 1945 to Present (AML 2053) 3 credits**

An overview of American literature since 1945, this course is writing intensive. This is a General Education course.

**Honors American Novel to 1900 (AML 3111) 3 credits**

**Honors American Novel since 1900 (AML 3121) 3 credits**

[\(See English courses, College of Arts and Letters section\)](#)

**Honors Major American Writers: 19th Century (AML 4310) 3 credits**

Course examines the works of poetry, fiction, and non-fiction prose from 1800 to 1900 by major American writers. One of the course's goals is to prepare upper-level students to achieve a level of critical thinking and writing sufficient to author a senior thesis in English.

**Honors African-American Literature (AML 4603) 3 credits**

In this course, students explore the development of African-American literature from the 19th-century slave narratives to contemporary poetry and fiction, looking closely at themes of identity, family, and society as well as issues of language and narrative style.

**Honors Native-American Literature (AML 4640) 3 credits**

**Honors Special Topics in American Literature (AML 4930) 3 credits**

**Honors Literature and Film (ENG 4114) 3 credits**

(See [English courses, College of Arts and Letters section](#))

**Honors Directed Independent Study in English (ENG 4905) 1-3 credits**

*Prerequisite: Permission of instructor*

Reading and research in advanced subjects in English. May be repeated for credit.

**Honors Directed Independent Research in English (ENG 4915) 1-3 credits**

Students work with research mentors to conduct research and inquiry in English. Requirements for the course and the criteria for evaluation are agreed upon by the mentor and student. A directed independent research form is completed for each DIR student.

**Honors Directed Independent Research in English (ENG 4916) 1-3 credits**

Students work with research mentors to conduct research and inquiry in English. Requirements for the course and the criteria for evaluation are agreed upon by the mentor and student. A directed independent research form is completed for each DIR student. *Grading: S/U*

**RI: Honors Shakespeare (ENL 4333) 3 credits**

Representative plays. This is a research-intensive (RI) course.

**Honors British Literature to 1798 (ENL 2012) 3 credits**

*Writing Across Curriculum (Gordon Rule)*

Major works, writers and movements of early British literature. This is a General Education course.

**Honors British Literature since 1798 (ENL 2022) 3 credits**

*Writing Across Curriculum (Gordon Rule)*

Major works, writers and movements of modern British literature. This is a General Education course.

**Honors Special Topics in British Literature (ENL 4930) 3 credits**

(See [English courses, College of Arts and Letters section](#))

**Honors Comedy and the Devil (LIT 1051) 3 credits**

*Writing Across Curriculum (Gordon Rule)*

Course covers theological and cultural problems developed in the western literary tradition around comedy and laughter; and draws on social, economic, religious, and political discourses for its content. This is a General Education course.

**Honors Freshman Seminar in Literature (LIT 1933) 3 credits**

*Writing Across Curriculum (Gordon Rule)*

A philosophical or historical approach to basic questions of enduring importance, emphasizing improvement of critical thinking and writing skills. May be repeated for credit. This is a General Education course.

**Honors Introduction to Literature (LIT 2000) 3 credits**

*Writing Across Curriculum (Gordon Rule)*

In this course, students are assigned readings representative of a broad range of literary genres and cultures. These readings cover a variety of literary movements and historical eras. The readings include, but are not limited to, selections from the Western canon. Written analysis of literary works may be required. Students will be provided with opportunities to practice critical interpretation. This is a General Education course.

**Honors Interpretation of Fiction (LIT 2010) 3 credits**

*Writing Across Curriculum (Gordon Rule)*

*Prerequisite: None*

**Honors Interpretation of Poetry (LIT 2030) 3 credits**

*Writing Across Curriculum (Gordon Rule)*

*Prerequisite: None*

**Honors Interpretation of Drama (LIT 2040) 3 credits**

*Writing Across Curriculum (Gordon Rule)*

*Prerequisite: None*

[\(See English courses, College of Arts and Letters section\)](#)

**Honors Medieval Cultures (LIT 3133) 3 credits**

A survey of the literary and cultural history of the European Middle Ages, this course considers the social, economic, religious, and political worlds that produced the literature.

**Honors Literary Theory (LIT 3213) 3 credits**

Introduces various schools of critical and literary theory to bear upon the interpretation of literary texts, such as new criticism, psychoanalysis, myth studies, poststructuralism, phenomenology, feminism,

postcolonialism, Marxism and more.

### **Honors Travel Literature (LIT 3306) 3 credits**

Course considers travel writing and the relation of travel to literary production from the Middle Ages to the present. Course materials will include novels, poems, guide books, and newspaper travel supplements.

### **Honors Science, Alchemy, and Magic in Early Modern England (LIT 3432) 3 credits**

A survey of the literary history of the early modern scientific revolution as it relates to literary production and print culture. Considers the co-involvement of literature and scientific thought and thus contributes to the interdisciplinary commitment to the Honors College curriculum.

### **Honors Workshop in Dramatic Literature (LIT 3925) 1 credit**

Analysis and reading aloud of literature. Emphasis on character development, articulation, rhyme and meter, and translation from written to spoken word. May be repeated for up to 4 credits.

### **RI: Honors Milton and the English Revolution (LIT 4243) 3 credits**

Major prose and poetry of John Milton, with special emphasis on the religious and political controversies of the middle and late 17th century. This is a research-intensive (RI) course.

### **Honors Women in Literature (LIT 4383) 3 credits**

*Writing Across Curriculum (Gordon Rule)*

This course introduces students to the "Women's Movement" in literature, focusing on the generation of women's poetry throughout the 20th and 21st centuries in America.

### **Honors Literature and the Environment (LIT 4434) 3 credits**

### **Honors Special Topics in Comparative Literature (LIT 4930) 3 credits**

[\(See English courses, College of Arts and Letters section\)](#)

## MUSIC

### **Honors Appreciation of Music (MUL 2010) 3 credits**

In this course, students survey the history of classical music from antiquity to the modern period, focusing on Western music. The curriculum may also integrate a variety of popular and global styles where appropriate. This is a General Education course.

### **Honors Freshman Seminar in Music (MUS 1933) 3 credits**

Variable content course in music that may be repeated for credit. The course develops students'

appreciation and understanding of music and enhances sensitivity to musical expression. It also develops an understanding of the social or historical contexts in which music is created.

## PHILOSOPHY

### **Honors Ancient Greek Philosophy (PHH 3100) 3 credits**

*Writing Across Curriculum (Gordon Rule)*

*Prerequisite: Permission of instructor*

A study of the Greek philosophers from the pre-Socratics through Plato and Aristotle. Special attention will be given to the cultural contexts in which philosophical speculation took place.

### **Honors Greek and Roman Philosophy (PHH 3150) 3 credits**

An historic, thematic, and analytical study of primary sources in Greek and Roman philosophy from Aristotle through Boethius.

### **Honors Modern Philosophy 1: The Renaissance through Enlightenment (PHH 3400) 3 credits**

*Writing Across Curriculum (Gordon Rule)*

A survey of philosophers from 1500 to 1800, with detailed study of selected primary sources.

### **Honors Special Topics in the History of Philosophy (PHH 3930) 1-4 credits**

*Writing Across Curriculum (Gordon Rule)*

Honors study of key figures or movements in the history of philosophy, seminar format. Figures or movements studied include Aristotle, Kant, Wollstonecraft, Beauvoir, Fanon, Existentialism, Marxism. Topics will vary from term to term. May be repeated for credit.

### **Honors Freshman Seminar in Philosophy (PHI 1933) 3 credits**

*Writing Across Curriculum (Gordon Rule)*

Introductory consideration of selected problems in ethics, aesthetics, and theory of knowledge in light of the history and methods of philosophy, with emphasis on interdisciplinary applications of philosophical argumentation.

### **Honors Introduction to Philosophy (PHI 2010) 3 credits**

In this course, students will be introduced to the nature of philosophy, philosophical thinking, major intellectual movements in the history of philosophy, including topics from the western philosophical tradition, and various problems in philosophy. Students will strengthen their intellectual skills, become more effective learners, and develop broad foundational knowledge. This is a General Education course.

### **Honors Introduction to Logic (PHI 2101) 3 credits**

An introduction to logic, methods of proof, and symbolic logic. Includes the use of language in logical arguments, deductive and inductive reasoning, and the predicate calculus. This is a General Education course.

### **Honors Ways of Knowing (PHI 2361) 3 credits**

Examines ways of knowing in the natural sciences, social sciences, and moral philosophy. This is a General Education course.

### **Honors Ethics of Social Diversity (PHI 2642) 3 credits**

*Writing Across Curriculum (Gordon Rule)*

Considers the ethical implications of differences in race, gender, religion, lifestyles, and ethnicity. Examines both philosophical discussions of liberty, equality, and community. Political debates on topics such as affirmative action, English-only initiatives, and hate speech codes. This is a General Education course.

### **Honors Theory of Knowledge (PHI 3300) 3 credits**

*Writing Across Curriculum (Gordon Rule)*

This course acquaints students with some problems, views and arguments in the study of epistemology. Special attention is given to the value of knowledge, the analysis of knowledge, skepticism and various (potential) ways of obtaining knowledge.

### **Honors Philosophy of Mind (PHI 3320) 3 credits**

*Writing Across Curriculum (Gordon Rule)*

This course engages in a careful and in-depth study of some of the major issues and problems in the philosophy of mind, through the reading of original texts and/or secondary sources. The topics examined include, but are not limited to, the mind/body problem, the nature of consciousness and the problem of personal identity.

### **Honors Philosophy of Medicine (PHI 3456) 3 credits**

The focus of this course will be an evaluation of the relationship between science and ethics within the practice of medicine. It studies evidence-based medicine, models of the physician-patient relationship, and clinical methodology and reasoning. The course concludes with a mock conference in which students present their medical/philosophical work to peers.

### **Honors Biomedical Ethics (PHI 3633) 3 credits**

This course considers the basic ethics of technological and biomedical advancements in our age,

including end-of-life and right-to-life issues, and examines the impact of biomedicine upon human beings in society and as individuals.

### **Honors Ethics in Business, Government and Society (PHI 3653) 3 credits**

Addresses ethical issues that arise in business, government and society from an interdisciplinary perspective, drawing on literature, film and classic texts in philosophy and political theory. Also includes what it means to be ethical, why one should be moral and what kind of conduct leads to a happy life.

### **Honors Ethical Theory (PHI 3670) 3 credits**

Covers key concepts and arguments in moral deliberation based on an analysis of historical and contemporary readings in ethical theory. Focuses on the problems of defining the "good" and determining what "ought" to be done.

### **Honors Environmental Philosophy (PHI 3682) 3 credits**

*Writing Across Curriculum (Gordon Rule)*

*Prerequisite: Permission of instructor*

Examines philosophical issues raised by environmental studies. Discusses ideas of nature from the perspectives of multicultural intellectual history. Explores the ethical and practical as well as the ontological, epistemic, and cosmological dimensions of ecological thinking.

### **Honors Artificial Intelligence Ethics (PHI 3692) 3 credits**

This course offers an interdisciplinary approach to ethical issues raised by artificial intelligence (AI) including liability issues of self-driving cars/drones, economic impacts of AI, ethical concerns with predictive analytics using big data and the ethical status of robots.

### **Honors Philosophy of Religion (PHI 3704) 3 credits**

An historical, cross-cultural, thematic, and analytical study of primary sources in philosophy of religion.

### **Honors Philosophy of Science (PHI 4400) 3 credits**

An examination of the central concepts of the theory of knowledge within the context of scientific investigation; the nature and structure of scientific knowledge, the nature of formal reasoning, the role of observation, the function of models, the nature of perception, scientific explanation, scientific truth, probabilistic and inductive inference and the nature of causal laws.

### **Honors Directed Independent Study (PHI 4906) 1-4 credits**

Directed independent research in philosophy.

### **Honors Directed Independent Research in Philosophy (PHI 4915) 1-3 credits**

Students work with research mentors to conduct research and inquiry in Philosophy. Requirements for the course and the criteria for evaluation are agreed upon by the mentor and student. A directed independent research form is completed for each DIR student.

### **Honors Directed Independent Research in Philosophy (PHI 4916) 1-3 credits**

Students work with research mentors to conduct research and inquiry in Philosophy. Requirements for the course and the criteria for evaluation are agreed upon by the mentor and student. A directed independent research form is completed for each DIR student. *Grading: S/U*

### **Honors Special Topics in Philosophy (PHI 4930) 1-4 credits**

(See [Philosophy courses, College of Arts and Letters section](#))

### **Honors Study Abroad in Philosophy (PHI 4959) 1-6 credits**

Study of philosophy either in approved study abroad programs or as research directed by an Honors College faculty member.

### **Honors Religion: Theory, Culture and Society (REL 3102) 3 credits**

This course is an introduction to characteristic forms of human religious expression and practice. Typical features of religion are identified, specific rituals are analyzed and particular issues of religion and late modernity are explored.

## **SPANISH**

### **Honors Beginning Spanish Language and Culture 1 (SPN 1120) 4 credits**

### **Honors Beginning Spanish Language and Culture 2 (SPN 1121) 4 credits**

### **Honors Spanish for Healthcare Professions (SPN 2162) 3 credits**

*Prerequisite: SPN 2220*

This course has been specifically designed to meet the needs of students pursuing a career in the medical field. The course interweaves culture, language instruction and healthcare material. As such, students perform a variety of exercises and activities designed to strengthen each of these areas.

### **Honors Intermediate Spanish Language and Culture 1 (SPN 2220) 4 credits**

*Grading: Regular*

### **Honors Intermediate Spanish Language and Culture 2 (SPN 2221) 4 credits**

(See [Languages, Linguistics, and Comparative Literature courses, College of Arts and Letters section](#))

**Honors Spanish Language and Culture Study Abroad (SPN 2957) 1-6 credits**

*Prerequisite: Permission of instructor*

Credit for enrollment in approved Spanish language and culture in approved study abroad programs.

**Honors Advanced Spanish: Conversation (SPN 3400) 4 credits**

**Honors Advanced Spanish: Composition (SPN 3401) 4 credits**

*Prerequisite: SPN 3400 or equivalent*

[\(See Languages, Linguistics, and Comparative Literature courses, College of Arts and Letters section\)](#)

**Honors Directed Independent Study in Spanish Language and Culture**

**(SPN 4905) 1-3 credits**

*Prerequisite: Permission of instructor*

May be repeated for credit.

**Honors Directed Independent Research in Spanish Language and Culture (SPN 4915) 1-3 credits**

Students work with research mentors to conduct research and inquiry in Spanish Language and Culture.

Requirements for the course and the criteria for evaluation are agreed upon by the mentor and student.

A directed independent research form is completed for each DIR student.

**Honors Directed Independent Research in Spanish Language and Culture (SPN 4916) 1-3 credits**

Students work with research mentors to conduct research and inquiry in Spanish Language and Culture.

Requirements for the course and the criteria for evaluation are agreed upon by the mentor and student.

A directed independent research form is completed for each DIR student. *Grading: S/U*

**Honors Special Topics in Spanish Language and Culture (SPN 4930) 1-3 credits**

*Prerequisite: SPN 3400 or equivalent*

**Honors Advanced Spanish Language and Culture Study Abroad (SPN 4957) 1-6 credits**

*Prerequisite: Appropriate lower-division Spanish and/or permission of instructor*

[\(See Languages, Linguistics, and Comparative Literature courses, College of Arts and Letters section\)](#)

**Honors Hispanic Culture and Civilization (SPT 2530) 3 credits**

The culture and heritage of Spain, and the cultural development of Latin America from pre-Columbian civilization to the present, through the study of literary texts in contexts of history, geography, art, attitudes and customs (taught in English). This is a General Education course.

**Honors The 1959 Cuban Revolution: Race, Gender and Sexuality (SPT 4550 ) 3 credits**

*Prerequisite: Permission of department*

*Corequisite: IDS 3932*

This interdisciplinary course provides a historic and sociocultural background of 1959 revolutionary Cuba and the impact this political turnover had on U.S./Cuban relations.

**Honors Introduction to Hispanic Literature (SPW 3030) 3 credits**

(See [Languages, Linguistics, and Comparative Literature courses](#), College of Arts and Letters section)

**Honors Spanish Literature: From the Jarchas to Calderón (SPW 3104) 3 credits**

*Prerequisites: SPN 3400 and SPW 3030, or permission of instructor*

Spanish literature survey course from the Medieval period (Jarchas) to the Baroque period (Calderón).

**RI: Honors Latin American Literature: Modernism to Post Boom (SPW 3134) 3 credits**

*Prerequisites: SPN 3400 and SPW 3030 or permission of instructor*

Survey course offering an overview of Latin American literature from the "modernista" works to the present. This is a research-intensive (RI) course.

**Honors Latin American Literature: Pre-Columbian and Colonial (SPW 3136) 3 credits**

*Prerequisites: SPN 3400 and SPW 3030 or permission of instructor*

An overview of the pre-Columbian and Colonial literary production of Spanish-speaking Latin American countries.

**Honors Spanish Literature: Enlightenment to the 20th Century (SPW 3584) 3 credits**

*Prerequisite: SPW 3030 or permission of instructor*

This course familiarizes the student with the Spanish literature produced from the 18th century to the 20th century. The student will become familiar with the most significant authors of this period, its themes, its recurrent literary forms, and the critical problems associated with them.

**Honors New Literature of the Spanish Caribbean (SPW 4492) 3 credits**

*Prerequisite: SPW 3030 or permission of instructor*

Course examines the most recent fiction of the Spanish-speaking Caribbean to explore issues of race, gender, and sexual orientation, classes, religions, ecology, and politics.

**Honors Don Quixote (SPW 4604) 3 credits**

*Prerequisite: SPN 3400 or SPW 3030 or permission of instructor*

In this course, students read "El ingenioso hidalgo Don Quijote de la Mancha (The Ingenious Gentleman Don Quixote of La Mancha)" in its entirety. Through class discussions, papers and critical articles, students will understand its place in the history of Spanish literature, its significance to world literature and its presence in popular imagery.

### **Honors Directed Independent Study in Spanish or Latin American Literature**

**(SPW 4905) 1-3 credits**

*Prerequisite: SPW 3030 or permission of instructor*

Reading and research in advanced subjects in Spanish or Latin American literature. May be repeated for credit.

### **Honors Directed Independent Research in Spanish Literature (SPW 4915) 1-3 credits**

Students work with research mentors to conduct research and inquiry in Spanish Literature.

Requirements for the course and the criteria for evaluation are agreed upon by the mentor and student.

A directed independent research form is completed for each DIR student.

### **Honors Directed Independent Research in Spanish Literature (SPW 4916) 1-3 credits**

Students work with research mentors to conduct research and inquiry in Spanish Literature.

Requirements for the course and the criteria for evaluation are agreed upon by the mentor and student.

A directed independent research form is completed for each DIR student. *Grading: S/U*

### **Honors Special Topics in Spanish or Latin American Literature (SPW 4930) 1-3 credits**

[\(See Languages, Linguistics, and Comparative Literature courses, College of Arts and Letters section\)](#)

### **Honors Spanish or Latin American Literature Study Abroad (SPW 4957) 1-6 credits**

*Prerequisite: Sophomore standing or permission of instructor*

Credit for enrollment in Peninsular or Latin American literature courses in approved study abroad programs.

## **DIVISION OF NATURAL SCIENCES AND MATHEMATICS**

Components of this Division: Biology, Chemistry, Interdisciplinary Science and Mathematics, Mathematics, and Physics.

### **BIOLOGY**

**Honors Life Science (BSC 1005) 2 credits**

**Honors Life Science Lab (BSC 1005L) 1 credit**

**Honors Biological Principles (BSC 1010) 3 credits**

**Honors Biological Principles Lab (BSC 1010L) 1 credit**

**Honors Biodiversity (BSC 1011) 3 credits**

### **Honors Biodiversity Lab (BSC 1011L) 1 credit**

[\(See Biological Sciences courses, College of Science section\)](#)

### **Honors Freshman Seminar in Biology (BSC 1933) 3 credits**

*Writing Across Curriculum (Gordon Rule)*

Special topics course for freshmen in which the approach is generally philosophical and/or historical, focusing on basic questions and issues of enduring importance related to the topic. The course emphasizes improvement of students' critical thinking and writing skills. This is a General Education course.

### **Honors Anatomy and Physiology 1 (BSC 2085) 3 credits**

*Prerequisite or Corequisite: BSC 2085L with minimum grade of "C-"*

A study of structure and physiology from the cellular to the system levels in the human body, including integumentary, skeletal, muscular, nervous and endocrine systems.

### **Honors Anatomy and Physiology 1 Lab (BSC 2085L) 1 credit**

*Prerequisite or Corequisite: BSC 2085 with minimum grade of "C-"*

Laboratory investigations to augment the content of BSC 2085.

### **Honors Anatomy and Physiology 2 (BSC 2086) 3 credits**

*Prerequisites: BSC 2085 and BSC 2085L with minimum grades of "C-"*

*Corequisite: BSC 2086L*

### **Honors Anatomy and Physiology 2 Lab (BSC 2086L) 1 credit**

*Corequisite: BSC 2086*

[\(See Biological Sciences courses, College of Science section\)](#)

### **Honors Experimental Design and Data Analysis (BSC 3452C) 3 credits**

This course focuses on the basic concepts of hypothesis testing, experimental design and data analysis. Students learn how to design research projects from the inception of an idea, collect data, formulate a hypothesis, develop sampling/experimental designs and analyze data in the R software environment. The course's objective is to give students tools to design and develop their honors theses and research projects.

### **Honors Biotechnology 1 Lab (BSC 4403L) 2 credits**

*Prerequisite: Permission of instructor*

### **Honors Directed Independent Study in Biology (BSC 4905) 1-3 credits**

*Grading: S/U*

[\(See Biological Sciences courses, College of Science section\)](#)

### **Honors Molecular Ecology (BSC 4442C) 3 credits**

*Prerequisites: BSC 1010, BSC 1010L, BSC 1011, BSC 1011L, CHM 2046, CHM 2046L*

This is an introductory course that focuses on characterizing individuals, populations and species through molecular variation (deoxyribonucleic acid - DNA). It includes theory and laboratory sections and provides the basis for DNA analyses in any living organism. Molecular markers are used to quantify genetic diversity, track movement of individuals, measure inbreeding and characterize new species. Students learn how to use these methods in the laboratory and through computer analyses.

### **Honors Directed Independent Research in Biology (BSC 4915) 1-3 credits**

*Prerequisite: Permission of instructor*

Students work with research mentors to conduct research and inquiry in Biology. Requirements for the course and the criteria for evaluation are agreed upon by the mentor and student. A directed independent research form is completed for each DIR student.

### **Honors Directed Independent Research in Biology (BSC 4916) 1-3 credits**

*Prerequisite: Permission of instructor*

Students work with research mentors to conduct research and inquiry in Biology. Requirements for the course and the criteria for evaluation are agreed upon by the mentor and student. A directed independent research form is completed for each DIR student. *Grading S/U*

### **Honors Special Topics in Biology (BSC 4930) 1-3 credits**

[\(See Biological Sciences courses, College of Science section\)](#)

### **Honors Evolution of Life on Earth (GLY 4105) 3 credits**

*Prerequisite: BSC 1011 with a minimum grade of C-*

This is an interdisciplinary course combining topics from geology and biology. As such, it applies basic biological and geological principles such as evolution, ecology, plate tectonics and stratigraphy to understanding the complexity of life through time and the evolutionary and ecological processes that brought about those changes. The course reviews the evolutionary history of major groups of organisms as seen in the fossil record and major events such as the origins of life, the invasion of land, mass extinctions and climate changes.

### **Honors General Microbiology (MCB 3020) 3 credits**

*Prerequisites: 8 credits of general biology; 4 credits of general chemistry*

*Corequisites: CHM 2046 and 2046L; MCB 3020L*

This course surveys the fundamentals of microbiology, including classification of microbial types, microbe-host interactions, microbes in disease, and applied and environmental microbiology.

### **Honors General Microbiology Lab (MCB 3020L) 1 credit**

*Corequisite: MCB 3020*

The application of fundamental techniques in the isolation, cultivation, and identification of microorganisms.

### **Honors Survey of Marine Biology (OCB 2000) 3 credits**

A survey of life in the sea and the relationships between marine organisms and their environment.

### **Honors Marine Biology and Oceanography (OCB 3012) 3 credits**

*Prerequisites: BSC 1010 and 1011 or permission of instructor; Corequisite: OCB 3012L*

Discussions of major concepts of modern marine biology with emphasis on life in subtropical and tropical seas.

### **Honors Marine Biology and Oceanography Lab (OCB 3012L) 1 credit**

*Corequisite: OCB 3012*

Laboratories, including field studies and field trips of the varied marine habitats of southern Florida.

### **Honors Introduction to Oceanography (OCE 2001) 3 credits**

(See [Ocean and Mechanical Engineering courses, College of Engineering and Computer Science section](#))

### **Honors Genetics (PCB 3063) 4 credits**

*Prerequisites: BSC 1010, BSC 1010L, BSC 1011, BSC 1011L*

(See [Biological Sciences courses, College of Science section](#))

### **Honors Issues in Human Ecology (PCB 3352) 3 credits**

(See [Biological Sciences courses, College of Science section](#))

### **Honors Animal Behavior (PCB 3411) 3 credits**

*Prerequisites: 8 credits of introductory biology and 3 credits of ecology*

A one-semester, advanced-level course that surveys modern approaches to the study of animal behavior, emphasizing the integration of ecological, evolutionary, ethological, and physiological approaches.

### **Honors Human Morphology and Function 1 (PCB 3703) 3 credits**

*Prerequisites: BSC 1010, 1010L, 1011, 1011L, CHM 2210, 2211 with a minimum grades of "C"*

*Corequisite: PCB 3703L*

Normal structure and physiology of the human skeletal, muscle and nervous systems. Lecture format.

Designed for the pre-professional student planning admission to a graduate clinical program.

### **Honors Human Morphology and Function 1 Lab (PCB 3703L) 1 credit**

*Prerequisites: BSC 1010, 1010L, 1011, 1011L, CHM 2210, 2211 with minimum grades of "C"*

*Corequisite: PCB 3703*

The normal structure and physiology of the human skeletal, muscle and nervous systems are discussed in a laboratory format. Designed for the pre-professional student planning admission into a clinical graduate program.

### **Honors Human Morphology and Function 2 (PCB 3704) 3 credits**

*Prerequisites: BSC 1010, 1010L, 1011, 1011L, CHM 2210, 2211 with a minimum grades of "C"*

*Corequisite: PCB 3704L*

Normal structure and physiology of the human skeletal, muscle and nervous systems. Lecture format. Designed for the pre-professional student planning admission to a graduate clinical program.

### **Honors Human Morphology and Function 2 Lab (PCB 3704L) 1 credit**

*Prerequisites: BSC 1010, 1010L, 1011, 1011L, CHM 2210, 2211 with minimum grades of "C"*

*Corequisite: PCB 3704*

The normal structure and physiology of the human cardiovascular, renal, respiratory, gastrointestinal, endocrine and reproductive systems are discussed in a laboratory format. Designed for the pre-professional student planning admission into a clinical graduate program.

### **Honors Principles of Ecology (PCB 4043) 3 credits**

*Prerequisite: 8 credits of general biology*

[\(See Biological Sciences courses, College of Science section\)](#)

### **RI: Honors Drosophila Genes and Behavior (PCB 4054C) 3 credits**

*Prerequisites: BSC 1010 and BSC 1010L and permission of instructor*

This course brings students closer to an understanding of how genetic variations can manifest in behavioral phenotypes using the widely utilized model organism, *Drosophila melanogaster*. Conceptual knowledge is gained in *Drosophila* husbandry, use as a model system, disease models and how genes affect behavior using behavioral assays. Students learn how to collect, analyze and derive significance from scientific data. This is a research-intensive (RI) course.

### **Honors Cell Biology (PCB 4102) 4 credits**

*Prerequisites: BSC 1010, PCB 3063*

An examination of the structure and function of major classes of molecules found within a cell. Examining the cytoskeleton, endomembrane system and cell signaling pathways permits students to

learn how these diverse systems interact to form a functional cell.

### **Honors Immunology (PCB 4233) 3 credits**

*Prerequisites: MCB 3020 or PCB 3063 with minimum grades of "C" or permission of instructor*

This honors course focuses on the scientific study of the immune system as it pertains to the human body's defense system to prevent disease. Topics include immune system development, humoral- and cell-mediated immunity, disease and treatments involving immunization, immunodeficiency, autoimmunity and biotherapeutics. Topics cover both systemic, molecular and cellular interactions of the immune system as it works to distinguish self from non-self.

### **Honors Biology of Cancer (PCB 4234) 3 credits**

*Prerequisites: BSC 1010, PCB 3063, PCB 4102*

Course explores the biology of cancer using molecular information-genetics and cell biology-to understand the fundamental ways in which cancer can occur, spread, and be treated.

### **Honors Developmental Biology (PCB 4253) 3 credits**

*Prerequisites: BSC 1010, PCB 3063*

Developmental biology is the branch of biology that examines the development of an organism from a single cell to an adult organism. Emphasis on the molecular pathways that drive development and the model organisms used to research these pathways.

### **Honors Behavioral Ecology (PCB 4414) 4 credits**

*Prerequisite: PCB 3063 or permission of instructor*

Behavioral adaptations of organisms to their ecological settings and their significance as evolutionary responses to processes guided by natural selection.

### **Honors Evolution (PCB 4673) 3 credits**

*Prerequisites: PCB 3063 and BCH 3033 or permission of instructor*

An in-depth examination of the mechanisms that operate in the evolutionary process.

### **RI: Honors Neurophysiology (PCB 4832C) 3 credits**

*Prerequisites: BSC 1010 and BSC 1010L and permission of instructor*

Neurophysiology brings the students closer to understanding neurophysiological signaling at the cellular level and the whole animal by using actual wet laboratory experiences supplemented with lectures. Students look at signaling from the perspective of the electrical properties of neurons, the basis for all neuronal function. The students learn through both theory and practical laboratory experiences, and then translate their findings into modular reports. This is a research-intensive (RI) course.

### **Honors Cellular Neuroscience (PCB 4841) 3 credits**

*Prerequisite: PCB 3063 with minimum grade of "C" or permission of instructor*

This course is designed for upper-level undergraduates looking to expand their understanding of the cellular mechanisms that make up the nervous system. Students explore the cells that make up the nervous system, the unique properties neurons possess and how neurons communicate and integrate signaling.

### **Honors Vertebrate Zoology (ZOO 2303) 3 credits**

*Writing Across Curriculum (Gordon Rule)*

*Prerequisites: BSC 1010, 1010L, 1011, 1011L*

*Corequisite: ZOO 2303L*

A study of the structure, relationships and natural history of the vertebrates with special emphasis on the ecology of subtropical and neotropical species.

### **Honors Vertebrate Zoology Lab (ZOO 2303L) 1 credit**

*Corequisite: ZOO 2303*

A laboratory examination of selected topics in the biology of vertebrates, including formal surveys of the taxa and occasional weekend field trips.

### **Honors Coral Reef Ecology (ZOO 4556) 3 credits**

*Prerequisites: BSC 1010, BSC 1011*

Explores both the physical and biological aspects of coral reef ecosystems, including associated seagrass and mangrove habitats. Lectures and field trips are used to cover the ecologically relevant aspects of coral reef systems.

### **Honors Principles of Human Neuroanatomy (ZOO 4742) 3 credits**

*Prerequisites: BSC 1010, BSC 1010L, BSC 1011, BSC 1011L, all with minimum grades of "C"*

This course focuses on the basic structural components and interconnections of the human brain, spinal cord and peripheral nervous system at the level of functional circuits. A discussion of diseases and injuries that disrupt the morphological integrity of the human nervous system is included.

## **CHEMISTRY**

### **Honors Biochemistry (BCH 3033) 3 credits**

*Prerequisites: CHM 2210 and 2211; Corequisite: BCH 3033L*

An introduction to biochemistry taught for honors students. Course examines the structure of proteins

and enzymes, nucleic acids, carbohydrates, and lipids.

***Honors Biochemistry Lab (BCH 3033L) 1 credit***

*Prerequisite: CHM 2211; Corequisite: BCH 3033*

Focuses on standard biochemical laboratory techniques of isolation of proteins, purification, and separation of proteins.

**Honors Contemporary Chemical Issues (CHM 1020C) 3 credits**

**Honors Introductory Chemistry (CHM 1025) 3 credits**

**Honors General Chemistry 1 (CHM 2045) 3 credits**

**Honors General Chemistry 1 Lab (CHM 2045L) 1 credit**

**Honors General Chemistry 2 (CHM 2046) 3 credits**

**Honors General Chemistry 2 Lab (CHM 2046L) 1 credit**

[\(See Chemistry and Biochemistry courses, College of Science section\)](#)

**Honors Organic Chemistry 1 Lab (CHM 2204L) 1 credit**

*Prerequisites: CHM 2046, 2046L; Corequisite: CHM 2210*

An introduction to organic chemistry lab. Course covers basic organic chemistry techniques such as thin layer chromatography, extraction, recrystallization, melting point and distillation as well as an introduction to molecular modeling. Concepts covered in CHM 2210 will be further covered in this laboratory.

**Honors Organic Chemistry 2 Lab (CHM 2205L) 1 credit**

*Prerequisite: CHM 2204L; Corequisite: CHM 2211*

This course covers application of basic organic chemistry techniques learned in CHM 2204L, chemistry of functional groups, and additional topics such as spectroscopy.

**Honors Organic Chemistry 1 (CHM 2210) 3 credits**

*Corequisite: CHM 2204L*

**Honors Organic Chemistry 2 (CHM 2211) 3 credits**

*Corequisite: CHM 2205L*

[\(See Chemistry and Biochemistry courses, College of Science section\)](#)

**Honors Environmental Chemistry (CHM 3085) 3 credits**

*Prerequisites: CHM 2045, CHM 2046*

The chemistry of the environment. Includes processes in the atmosphere, hydrosphere, and geosphere, and their interactions. Selected emphasis on the physical processes that distribute materials through the environment. Topics include ozone, smog, greenhouse gases, global warming, energy, pE/pH, gas laws,

redox cycling of elements, organic matter, chemistry of drinking and waste waters, biocides, and green chemistry.

### **Quantitative Analysis (CHM 3121) 3 credits**

*Prerequisite: CHM 2045, 2045L, 2046, 2046L; Corequisite: CHM 3121L*

Principles of analysis; gravimetric, volumetric and instrumental methods.

### **Honors Quantitative Analysis Lab (CHM 3121L) 1 credit**

*Prerequisite: CHM 2045, 2045L, 2046, 2046L; Corequisite: CHM 3121*

Experiments in volumetric, gravimetric, and instrumental methods of analysis.

### **Honors Chemistry of Natural Products (CHM 3290) 3 credits**

*Prerequisite: CHM 2211 or permission of instructor*

Study of natural products whose molecules are synthesized by living organisms and that consequently are of interest as possible pharmaceuticals themselves or lead to compounds for the development of new pharmaceuticals. Uses and abuses of natural products and their derivatives will be explored.

### **Honors Introduction to Physical Chemistry (CHM 3400) 3 credits**

*Prerequisites: 8 credits of general chemistry and 4 credits each of physics and calculus*

### **Honors Inorganic Chemistry (CHM 3609) 3 credits**

*Prerequisites: CHM 2045, CHM 2046; Corequisite: CHM 3609L*

### **Honors Inorganic Chemistry Lab (CHM 3609L) 1 credit**

*Prerequisites: CHM 2045, CHM 2046; Corequisite: CHM 3609*

[\(See Chemistry and Biochemistry courses, College of Science section\)](#)

### **Honors Instrumental Methods of Analysis (CHM 4135) 3 credits**

*Prerequisites: CHM 2045, 2045L, 2046, 2046L; Corequisite: CHM 4135L*

Introduction to the principles of instrumental chemical analysis. Topics covered will include a variety of atomic and molecular spectroscopic methods, electroanalytical methods, and chemical separation methods.

### **Honors Instrumental Methods of Analysis Lab (CHM 4135L) 1 credit**

*Prerequisites: CHM 2045, 2045L, 2046, 2046L; Corequisite: CHM 4135*

Introduction of several instrumental methods for chemical analysis.

### **Honors Directed Independent Study in Chemistry (CHM 4905) 1-4 credits**

[\(See Chemistry and Biochemistry courses, College of Science section\)](#)

### **Honors Directed Independent Research in Chemistry (CHM 4915) 1-3 credits**

Students work with research mentors to conduct research and inquiry in Chemistry. Requirements for the course and the criteria for evaluation are agreed upon by the mentor and student. A directed independent research form is completed for each DIR student.

### **Honors Directed Independent Research in Chemistry (CHM 4916) 1-3 credits**

Students work with research mentors to conduct research and inquiry in Chemistry. Requirements for the course and the criteria for evaluation are agreed upon by the mentor and student. A directed independent research form is completed for each DIR student. *Grading S/U*

### **Honors Special Topics in Chemistry (CHM 4933) 1-4 credits**

(See [Chemistry and Biochemistry courses, College of Science section](#))

## **INTERDISCIPLINARY SCIENCE AND MATHEMATICS**

### **Honors Scientific Writing 1 (ISC 2932) 1 credit**

This class covers the essentials of scientific writing in theory and in practice.

### **Honors Sciences and Mathematics Study Abroad (ISC 2952) 1-6 credits**

*Prerequisite: Sophomore standing*

Credit for enrollment in approved study abroad programs.

### **Honors Interdisciplinary Science and Mathematics Seminar (ISC 3933) 1 credit**

*Prerequisite: Junior standing*

An interdisciplinary seminar designed primarily for students concentrating in science and math, this course is open to both juniors and seniors. It provides preparation for developing a senior thesis proposal. Students should enroll for this course in the year prior to the academic year that they will begin their thesis.

### **Honors Special Topics in Science and Mathematics (ISC 4930) 1-4 credits**

*Prerequisite: Junior standing*

Juniors and seniors in science and mathematics will present seminars based upon literature and laboratory research.

### **Honors Scientific Writing 2 (ISC 4932) 1 credit**

*Prerequisite: ISC 2932 or permission of instructor*

This class covers advanced issues in scientific writing in theory and practice.

### **Honors Interdisciplinary Science and Mathematics Seminar (ISC 4933) 1 credit**

*Prerequisite: Junior standing*

Juniors and seniors in science and mathematics present seminars based upon literature and laboratory research.

### **Honors Internship in Science and Mathematics (ISC 4947) 1-12 credits**

*Prerequisite: Permission of instructor*

Provides students with an opportunity to gain first-hand experience in science and mathematics beyond the university, for example, in a government or corporate setting. It contributes to the mission of the Honors College by encouraging students to explore interdisciplinary connections in their work and to discuss these in a detailed essay. *Grading: S/U*

### **Honors Sciences and Mathematics Study Abroad (ISC 4957) 1-6 credits**

*Prerequisite: Sophomore standing*

Credit for enrollment in approved study abroad programs.

## **MATHEMATICS**

### **Honors Foundations of Programming (COP 2000) 3 credits**

An introduction to the fundamentals of modern computer programming with emphasis on visual design, problem solving, coding style, and structured programming. Topics include decision and repetition statements, data types and arrays, procedures, event-driven programming, and testing and debugging. Optional topics: graphics, Web page programming, objects and classes, and files and databases.

### **Honors Introduction to Programming in C (COP 2220) 3 credits**

Introduction to programming in C. Variable types, arithmetic statements, input/output statements, loops, conditional statements, functions, arrays and structures. Programming projects in C.

### **Honors Topics in Computer Programming (COP 2930) 3 credits**

*Prerequisite: Permission of instructor*

Special current topics in introductory-level computer programming, such as (but not restricted to) Web programming, script programming, database programming, modeling, and specialized software tools. Since the content will vary, the course may be repeated for credit.

### **Honors Advanced Programming (COP 3012) 3 credits**

*Prerequisite: COP 2220 or COP 2000 ("C" or better)*

The second-semester course advances students' basic programming skills with emphasis on user

interface design, problem solving, and coding style in an object-oriented language, such as C++ or Java. Topics include abstract data types and structures, recursion, special algorithms, objects, classes and events, and testing and debugging. Optional topics: graphics, web page programming, and databases.

**Honors Introduction to Data Science (COP 3076) 3 credits**

*Prerequisite: STA 2023 or permission of instructor*

An introductory seminar in data science with training in R.

**Honors Topics in Computer Science (COT 4930) 3 credits**

(See [Electrical Engineering and Computer Science courses](#), College of Engineering and Computer Science section)

**Honors Modern Analysis (MAA 4200) 3 credits**

*Prerequisite: MAC 2313*

(See [Mathematics courses](#), College of Science section)

**Honors Introductory Complex Analysis (MAA 4402) 3 credits**

**Honors Precalculus Algebra and Trigonometry (MAC 1147) 4-5 credits**

*Gordon Rule, computational*

**Honors Calculus with Analytic Geometry 1 (MAC 2311) 4 credits**

*Gordon Rule, computational*

*Prerequisite: MAC 1147 or placement*

**Honors Calculus with Analytic Geometry 2 (MAC 2312) 4 credits**

*Gordon Rule, computational*

**Honors Calculus with Analytic Geometry 3 (MAC 2313) 4 credits**

*Gordon Rule, computational*

(See [Mathematics courses](#), College of Science section)

**Honors Discrete Mathematics (MAD 2104) 3 credits**

*Gordon Rule, computational*

*Prerequisite: MAC 1105 or permission of instructor*

A proof-oriented approach to and applications of propositional logic, sets, functions, relations, combinatorics, graphs and trees. This is a General Education course.

**Honors Graph Theory (MAD 4301) 3 credits**

*Prerequisite: MAD 2104*

**Honors Differential Equations (MAP 2302) 3 credits**

*Gordon Rule, computational*

*Prerequisites: MAC 2311 and MAC 2312*

[\(See Mathematics courses, College of Science section\)](#)

### **Honors Matrix Theory (MAS 2103) 3 credits**

*Gordon Rule, computational*

*Prerequisite: MAC 2311 or placement*

Vectors and vector spaces. Linear transformation and matrices. Rank and determinants. Systems of linear equations. Diagonalization. Characteristic values. This is a General Education course.

### **Honors Introduction to Number Theory (MAS 3203) 3 credits**

*Prerequisite: MAC 2312*

### **Honors Differential Equations 2 (MAP 4303) 3 credits**

### **Honors Modern Algebra (MAS 4301) 3 credits**

*Prerequisite: MAS 2103*

[\(See Mathematics courses, College of Science section\)](#)

### **Honors Modern Algebra 2 (MAS 4302) 3 credits**

*Prerequisite: MAS 4301 with minimum grade of "C"*

A continuation of Honors Modern Algebra, MAS 4301. Covers basic structures of abstract algebra, such as groups, rings and ideals, fields, polynomials and factorization and the classical Galois theory of fields and equations.

### **Honors Topics in Mathematics (MAT 1932) 3 credits**

*Gordon Rule, computational*

*Prerequisite: Intermediate algebra or equivalent*

Topics of interest to lower-division students. This is a General Education course.

### **Honors Freshman Seminar in Mathematics (MAT 1933) 3 credits**

*Writing Across Curriculum (Gordon Rule)*

Special topics course for freshmen in which the approach is generally philosophical and/or historical, focusing on basic questions and issues of enduring importance to the topic.

### **Honors Directed Independent Research in Mathematics (MAT 4915) 1-3 credits**

Students work closely with research mentors to conduct research and inquiry in Mathematics.

Requirements for the course and the criteria for evaluation are agreed upon by the research mentor and the student. A directed independent research form is completed for each DIR student.

### **Honors Directed Independent Research in Mathematics (MAT 4916) 1-3 credits**

Students work closely with research mentors to conduct research and inquiry in Mathematics.

Requirements for the course and the criteria for evaluation are agreed upon by the research mentor and the student. A directed independent research form is completed for each DIR student. *Grading: S/U*

### **Honors Directed Independent Study in Mathematics (MAT 4906) 1-4 credits**

### **Honors Special Topics in Mathematics (MAT 4930) 1-4 credits**

(See [Mathematics courses, College of Science section](#))

### **Honors Mathematical Thinking in Context 1 (MGF 1130) 3 credits**

*Gordon Rule, computational*

In this course, students will utilize multiple means of problem solving through student-centered mathematical exploration. The course is designed to teach students to think more effectively and increase their problem-solving ability through practical application and divergent thinking. The course is appropriate for students in a wide range of discipline/programs. This is a General Education course.

### **Honors General Topology (MTG 4302) 3 credits**

*Prerequisite: MAS 4301 (may be taken concurrently)*

Introduces the fundamentals of point-set topology and topological spaces, essential material for any student who wishes to study topology or analysis at the graduate level.

### **Honors Introductory Statistics (STA 2023) 3 credits**

*Gordon Rule, computational*

(See [Mathematics courses, College of Science section](#))

### **Honors Intermediate Statistics (STA 3164) 3 credits**

*Gordon Rule, computational*

*Prerequisite: STA 2023*

Large-sample estimation and tests of hypotheses, t-tests, chi-square tests, one-way ANOVA, linear and multiple regression, correlation, and experimental designs. Laboratory includes use of statistical software to organize, describe, present, and analyze data.

## **PHYSICS**

### **Honors Introduction to Astronomy (AST 2002) 3 credits**

(See [Physics courses, College of Science section](#))

### **Honors Topics in Physics (PHY 1931) 3 credits**

(See [Physics courses, College of Science section](#))

### **Honors General Physics 1 (PHY 2048) 4 credits**

#### **Honors General Physics 1 Lab (PHY 2048L) 1 credit**

*Pre- or corequisite: PHY 2048 or PHY 2053 with minimum grade of "C"*

### **Honors General Physics 2 (PHY 2049) 4 credits**

*Pre- or Corequisite: PHY 2049 or PHY 2054 with minimum grade of "C"*

#### **Honors General Physics 2 Lab (PHY 2049L) 1 credit**

*Corequisite: PHY 2049*

(See [Physics courses, College of Science section](#))

### **Honors College Physics 1 (PHY 2053) 4 credits**

*Prerequisites: MAC 1114 or MAC 1147 or MAC 2233 or MAC 2281 or MAC 2311 with minimum grade of "C"*

*Corequisite: PHY 2048L*

This course is the first in a two-part series intended for non-physics majors, offering an algebra and trigonometry approach to topics such as kinematics, dynamics, energy, momentum, rotational motion, fluid dynamics, oscillatory motion and waves. The course fosters analytical and critical thinking skills to promote a scientific understanding of the real world. No credit for physics majors. This is a General Education course.

### **Honors College Physics 2 (PHY 2054) 4 credits**

*Prerequisite: PHY 2053*

*Corequisite: PHY 2049L*

This algebra- and trigonometry-based course surveys fundamental laws and phenomena of electricity and magnetism, optics, special relativity, atomic and nuclear physics. Emphasis is on the understanding of physical concepts through examples drawn from the physical and life sciences.

### **Honors Introduction to Modern Physics (PHY 3101) 3 credits**

*Prerequisite: PHY 2049*

Experimental foundations of quantum physics; optical and X-ray spectra, interaction and duality of particles and radiation; vector model of the atom, exclusion principle, periodic table of elements; molecular structure, electrical properties of metals and semiconductors; elementary nuclear and particle physics.

### **Honors Intermediate Mechanics (PHY 3221) 4 credits**

*Prerequisite: PHY 2049*

Vector algebra; particle dynamics, Newton's law of gravitation, Kepler's laws; systems of particles, conservation laws; introduction to generalized mechanics, Lagrangian mechanics; tensor algebra; rigid body motion.

### **Honors Thermal Physics (PHY 3513) 3 credits**

*Prerequisite: PHY 2049 or equivalent; Corequisite: MAC 2313 or permission*

Treatment of classical thermodynamics, including fundamental postulates, entropy, equations of state, thermodynamic equilibrium and potentials, Maxwell relations, and phase transitions.

### **Honors Electricity and Magnetism (PHY 4320) 4 credits**

*Prerequisites: PHY 2049 and MAC 2313*

Introduction to classical electrodynamics, including vector calculus, electrostatics, magnetostatics, Maxwell's equations, and electromagnetic radiation.

### **Honors Statistical Physics (PHY 4523) 3 credits**

*Prerequisite: PHY 2049 or equivalent*

Review of classical thermodynamics; ideal gas kinetic theory; Maxwell-Boltzmann distribution; the partition function; Bose-Einstein and Fermi-Dirac distributions; ensembles, fluctuations and irreversible processes.

### **Honors Introductory Quantum Physics (PHY 4602) 3 credits**

*Prerequisite: PHY 2049 or equivalent*

An introduction to quantum physics with emphasis on one-dimensional problems, wave-particle duality, the Schrodinger equation, measurement, and the formalism and interpretation of quantum theory.

### **Honors Directed Independent Study in Physics (PHY 4905) 1-3 credits**

### **Honors Directed Independent Research in Physics (PHY 4915) 1-3 credits**

Students work with research mentors to conduct research and inquiry in Physics. Requirements for the course and the criteria for evaluation are agreed upon by the mentor and student. A directed independent research form is completed for each DIR student.

### **Honors Directed Independent Research in Physics (PHY 4916) 1-3 credits**

Students work with research mentors to conduct research and inquiry in Physics. Requirements for the course and the criteria for evaluation are agreed upon by the mentor and student. A directed independent research form is completed for each DIR student. *Grading: S/U*

### **Honors Special Topics in Physics (PHY 4936) 1-4 credits**

*Prerequisite: Permission of instructor*

[\(See Physics courses, College of Science section\)](#)

### **Honors Introduction to Relativity (PHZ 3601) 3 credits**

*Prerequisite: PHY 2049 or equivalent*

An introduction to special and general relativity.

### **Honors Physical Science (PSC 2121) 3 credits**

A self-contained course for non-science majors that emphasizes analytical thinking and problem solving. It covers essential concepts in astronomy, physics, chemistry, geology and meteorology. No credit for both PSC 2121 and PHY 2048 or 2053.

## **DIVISION OF SOCIAL SCIENCES**

Components of this Division: American Studies, Anthropology, Asian Studies, Business, Economics, Environmental Studies, Geography, History, Interdisciplinary Social Sciences, International Studies, Latin American Studies, Law and Society, Political Science, Psychology, and Women's Studies/Sociology.

## **AMERICAN STUDIES**

### **Honors U.S. History to 1877 (AMH 2010) 3 credits**

### **Honors U.S. History since 1877 (AMH 2020) 3 credits**

### **Honors American Environmental History (AMH 3630) 3 credits**

[\(See History courses, College of Arts and Letters section\)](#)

### **Honors Directed Independent Research in American History (AMH 4915) 1-3 credits**

Students work with research mentors to conduct research and inquiry in American History.

Requirements for the course and the criteria for evaluation are agreed upon by the mentor and student.

A directed independent research form is completed for each DIR student.

### **Honors Directed Independent Research in American History (AMH 4916) 1-3 credits**

Students work with research mentors to conduct research and inquiry in American History.

Requirements for the course and the criteria for evaluation are agreed upon by the mentor and student.

A directed independent research form is completed for each DIR student. *Grading: S/U*

**Honors Special Topics in American History AMH 4932) 3 credits**

This course is a research intensive (RI) course.

(See [History courses, this Division, Honors College](#))

**Honors American Literature to 1865 (AML 2010) 3 credits**

*Writing Across Curriculum (Gordon Rule)*

An overview of American literature, including representative writers of the Colonial, Enlightenment and Romantic periods. This is a General Education course.

**Honors American Literature: 1865-1945 (AML 2022) 3 credits**

**Honors American Literature: 1945 to Present (AML 2053) 3 credits**

(See [Literature courses, Division of Humanities, Honors College](#))

**Honors American Novel to 1900 (AML 3111) 3 credits**

**Honors American Novel since 1900 (AML 3121) 3 credits**

(See [English courses, College of Arts and Letters section](#))

**Honors Major American Writers: 19th Century (AML 4310) 3 credits**

**Honors African-American Literature (AML 4603) 3 credits**

(See [Literature courses, Division of Humanities, Honors College](#))

**Honors Afrofuturism (AML 4600) 3 credits**

*Prerequisite: 2000-level literature course with minimum grade of "C"*

Students read and critically analyze literature, academic scholarship and other resources in exploring the multi-genre creative movement of Afrofuturism, which reevaluates the past and imagines alternate realities and futures for African American and African peoples.

**Honors Native-American Literature (AML 4640) 3 credits**

**Honors Special Topics (AML 4930) 3 credits**

(See [English courses, College of Arts and Letters section](#))

**Honors Colloquium in American Studies (AMS 3003) 3 credits**

**Honors Violence in the United States (AMS 4332) 3 credits**

**Honors Special Topics in American Studies (AMS 4930) 3 credits**

This course is a research intensive (RI) course.

(See [History courses, this Division, Honors College](#))

**Honors Literature and Film (ENG 4114) 3 credits**

[\(See English courses, College of Arts and Letters section\)](#)

**Honors Special Topics in Interdisciplinary Studies (IDS 3930) 1-3 credits**

**Honors Special Topics in Interdisciplinary Studies (IDS 4930) 3 credits**

**RI: Honors Thesis (IDS 4970) 3 credits**

This course is a research intensive (RI) course.

[\(See Interdisciplinary Studies courses, Division of Humanities, Honors College\)](#)

**Honors Ethics of Social Diversity (PHI 2642) 3 credits**

[\(See Philosophy courses, Division of Humanities, Honors College\)](#)

**Honors Government of the United States (POS 2041) 3 credits**

[\(See Political Science courses, this Division, Honors College\)](#)

**Honors Law and American Society (POS 3691) 3 credits**

[\(See Political Science courses, College of Arts and Letters section\)](#)

**Honors the U.S. Presidency (POS 4414) 3 credits**

[\(See Political Science courses, this Division, Honors College\)](#)

**Honors Constitutional Law 1: Government Powers and Limits (POS 4603) 3 credits**

*Prerequisite: None*

**Honors Constitutional Law 2: Civil Rights and Liberties (POS 4604) 3 credits**

*Prerequisite: None*

[\(See Political Science courses, College of Arts and Letters section\)](#)

## ANTHROPOLOGY

**Honors Freshman Seminar in Anthropology (ANT 1933) 3 credits**

*Writing Across Curriculum (Gordon Rule)*

Special topics will focus on the basic philosophical and/or historical questions and issues regarding culture and humankind. Critical thinking and writing skills are emphasized. This is a General Education course.

**Honors Introduction to Anthropology (ANT 2000) 3 credits**

This version of the course is not Writing Across Curriculum (Gordon Rule)

[\(See Anthropology courses, College of Arts and Letters section\)](#)

### **Honors Magic, Witchcraft, and Religion (ANT 2240) 3 credits**

Students learn anthropological approaches to religion, specifically to topics such as religious specialists, healing, new religions, millenarian movements, and religious change. The goal of the course is to give students an understanding of anthropological perspectives on the role of religion in human life. This is a General Education course.

### **Honors Culture and Society (ANT 2410) 3 credits**

Perspective on the human condition by examining some of the principal cultural differences between traditional and modern societies. Using ethnographic materials, examination of how people formulate their world views (cosmology) and live by the social logics of reciprocity and kinship. These are compared with world views and social logics of markets and bureaucracy in industrial societies. This is a General Education course.

### **Honors Introduction to Biological Anthropology (ANT 2511) 3 credits**

*Corequisite: ANT 2511L*

The course covers all aspects of the origin and evolution of humankind. Subject matter includes concepts of evolutionary thought, mammalian osteology, genetics concerning evolution, statistics and geometrics used in physical anthropology, what makes a hominin, modern and ancient non-human primates, the progression through hominin evolution and modern human variation. This is a General Education course.

### **Honors Introduction to Biological Anthropology Lab (ANT 2511) 1 credit**

*Corequisite: ANT 2511*

Hands-on projects to accompany lessons from ANT 2511, including methods for measuring hominin crania, other bones and DNA analysis. This is a General Education course.

### **Honors Peoples Around the World (ANT 3212) 3 credits**

[\(See Anthropology courses, College of Arts and Letters section\)](#)

### **Honors Peoples of Latin America (ANT 3332) 3 credits**

Course examines the anthropology of modern-day cultures of Latin America.

### **RI: Honors Ritual and Symbolism (ANT 4244) 3 credits**

*Writing Across Curriculum (Gordon Rule)*

Students learn the process of research and writing in the anthropology of ritual and symbolism and meet all six Student Learning Outcomes of research intensive (RI) courses.

### **Honors Anthropology of the Andes (ANT 4331) 3 credits**

Anthropological approaches to the study of Andean cultures, including ecological, structuralist, symbolic, Marxist, feminist, critical, and post-modern anthropological and ethnohistorical analyses.

### **Honors Himalayan Cultures (ANT 4368) 3 credits**

This course helps students develop an understanding of the Himalayan cultures of South Asia. The course lectures, discussions, and assignments convey a thorough understanding of the geo-ecology, history, cultural diversity, and contemporary issues of the region.

### **Honors Theory in Cultural Anthropology (ANT 4417) 3 credits**

Course reviews the history of anthropological theory and situate it within the social sciences. The course covers structural-functionalist, symbolic-interpretive, feminist, Marxist, and post-modern approaches to anthropology.

### **Honors Development Debate in South Asia (ANT 4474) 3 credits**

This course addresses development from an anthropological perspective, as an international issue with culturally specific locales. Topics covered include development strategies in the fields of education, economics, technology, and environmental studies. These are discussed in relation to case studies gathered from development projects throughout South Asia.

### **Honors Research Methods in Cultural Anthropology (ANT 4495) 3 credits**

(See [Anthropology courses, College of Arts and Letters section](#))

### **Honors Directed Independent Research in Anthropology (ANT 4915) 1-3 credits**

Students work with research mentors to conduct research and inquiry in Anthropology. Requirements for the course and the criteria for evaluation are agreed upon by the mentor and student. A directed independent research form is completed for each DIR student.

### **Honors Directed Independent Research in Anthropology (ANT 4916) 1-3 credits**

Students work with research mentors to conduct research and inquiry in Anthropology. Requirements for the course and the criteria for evaluation are agreed upon by the mentor and student. A directed independent research form is completed for each DIR student. *Grading: S/U*

### **Honors Special Topics in Anthropology (ANT 4930) 3 credits**

Examines ways by which historical events become cultural practice and the means of transmitting, reproducing, and recreating historical knowledge. Examines myths, oral narratives, ritual, symbolism, and written texts. May be repeated for credit.

### **Honors Internship in Anthropology (ANT 4947) 3 credits**

*Prerequisite: ANT 2410*

Credit for work performed in approved internship opportunities related to anthropology. May be repeated for credit. *Grading: S/U*

### **Honors Study Abroad in Anthropology (ANT 4959) 3-16 credits**

*Prerequisite: ANT 2410*

Credit for enrollment in approved study abroad programs related to anthropology.

## **ASIAN STUDIES**

### **Honors Freshman Seminar in Asian Studies (ASN 1933) 3 credits**

*Writing Across Curriculum (Gordon Rule)*

Variable topic course designed to introduce freshmen to Asian studies through exploration of specific topics. Emphasis on writing, critical thinking, and interdisciplinary approaches to Asian studies.

### **Honors Introduction to Asian Studies (ASN 3006) 3 credits**

The purpose of this course is to introduce students to some of the major issues and themes in Asian regional studies. The course combines humanities and social science approaches to the study of Asia to enable students to explore the variety of Asian culture/societies. The course begins by critically looking at the concept of "Asia" and how it has been constructed/destroyed through different academic endeavors. The course then moves on to examine the heterogeneity of the so-called "Asian experience" through the study of foods, films, popular culture, art, religion and social relations in Asian communities.

### **Honors Directed Asian Studies (ASN 4905) 3 credits**

Interdisciplinary, individualized area studies in East, Southeast, Central or South Asia; course materials are selected to create specific areas of focus commensurate with student's needs, instructor's interest, and curriculum design. May be repeated for credit.

### **Honors Directed Independent Research in Asian Studies (ASN 4915) 1-3 credits**

Students work with research mentors to conduct research and inquiry in Asian Studies. Requirements for the course and the criteria for evaluation are agreed upon by the mentor and student. A directed independent research form is completed for each DIR student.

### **Honors Directed Independent Research in Asian Studies (ASN 4916) 1-3 credits**

Students work with research mentors to conduct research and inquiry in Asian Studies. Requirements for the course and the criteria for evaluation are agreed upon by the mentor and student. A directed independent research form is completed for each DIR student. *Grading: S/U*

### **Honors Special Topics in Asian Studies (ASN 4930) 3 credits**

*Prerequisite: ASN 3006 or permission of instructor*

Interdisciplinary area studies in East, Southeast, Central or South Asia; course materials are selected to create specific areas of focus commensurate with instructor's interest. Since the content may vary, this course may be repeated for credit.

## **BUSINESS**

### **Honors Principles of Accounting 1 (ACG 2021) 3 credits**

Accounting serves as the language of business. It is how investors, regulators, owners and even employees and the general public can understand what and how a business is doing. In this class, the focus is on financial accounting, how businesses keep track of all their transactions and operations, and how this information is used to build reports and statements that fall within general professional and legal guidelines. In addition, there is discussion on why organizations and management may be incentivized to lie about the accounting information they report and the effects of such misrepresentation.

### **Honors Principles of Accounting 2 (ACG 2071) 3 credits**

*Prerequisite: ACG 2021 with minimum grade of "C"*

Accounting serves as the language of business. It is how investors, regulators, owners, and even employees and the general public can understand what and how a business is doing. In this class, the focus is on managerial accounting, how organizations use internal information and data to assess their own operations, and if they are achieving their stated goals. Students also assess the different needs of internal and external users of accounting information and how this influences the principles underlying their preparation and presentation. In addition, there is a discussion of issues of information asymmetry, data security and investor expectations.

### **Honors Fundamentals of Real Estate (REE 3005) 3 credits**

This is an interdisciplinary business course designed to immerse students in the fundamental concepts and practical aspects of real estate - one of the U.S. economy's largest industries. In this course, students explore the dynamic relationship between real estate and the broader economy, linking foundational concepts, such as property rights and ownership, to broader economic patterns and trends. This understanding allow students to critically analyze the housing market and understand the influence of government policies and regulations on real estate practices.

## ECONOMICS

### **Honors Freshman Seminar in Economics (ECO 1933) 3 credits**

*Writing Across Curriculum (Gordon Rule)*

A philosophical or historical approach to basic questions of enduring importance, emphasizing improvement of critical thinking and writing skills. This is a General Education course.

### **Honors Macroeconomic Principles (ECO 2013) 3 credits**

*Prerequisite: None*

### **Honors Microeconomic Principles (ECO 2023) 3 credits**

*Prerequisite: None*

### **Honors Intermediate Microeconomics (ECO 3101) 3 credits**

*Prerequisites: ECO 2023*

### **Honors Intermediate Macroeconomics (ECO 3203) 3 credits**

*Prerequisites: ECO 2013 or equivalent*

[\(See Economics courses, College of Business section\)](#)

### **Honors Advanced Research and Writing Methods in Business and Economics 1 (ECO 3951) 2 credits**

This course is intended to give Honors College students with concentrations in business and economics the practical skills they need to develop an original research project in business or economics. Students learn both the structure of research reports and the process of conducting professional-level research. Writing is also emphasized in this course.

### **Honors Market Process Economics: An Analysis of Time and Ignorance (ECO 4053) 3 credits**

*Prerequisite: ECO 2023*

This course aims to provide honors students in business and economics with the foundations of market process economics. This includes an understanding of how the market process approach works; ideas to generate a market process approach to a variety of research problems; and an opportunity to improve written and oral communication skills.

### **Honors Industrial Organization and Game Theory (ECO 4400) 3 credits**

*Prerequisite: ECO 2023 or permission of instructor*

This course introduces students to the analysis of the behavior of firms under different market structures-competitive, monopolistic, and oligopolistic. The coverage also includes such topics as introduction to game theory, strategic behavior of firms, price discrimination, information, and patents and technological change.

### **Honors Econometrics: Applied Regression Analysis (ECO 4412) 3 credits**

*Prerequisite: STA 2023 or permission of instructor*

This course considers a set of statistical tools and their application to a wide range of empirical problems in various fields, including economics, political science, finance, sociology, environmental studies, medicine, and more.

### **Honors Public Finance and Public Policy (ECO 4531) 3 credits**

*Prerequisite: ECO 2023*

Class uses microeconomic tools to model the government's resource decisions. Topics includes models of government expenditures and revenue (taxation), standards for market efficiency and failure, welfare economics, and federalism. The course also includes analysis of topical issues, such as programs for the poor and social security.

### **Honors Modern Political Economy (ECO 4532) 3 credits**

*Prerequisite: ECO 2023*

This course gives students an introduction to the issues and analysis of modern political economy. Unlike most other courses in economics or public policy, however, this course is less about the policies themselves and more about developing models to explain how and why a given policy is adopted. In other words, the course explores economic models of politics.

### **Honors Directed Independent Study in Economics (ECO 4906) 1-3 credits**

*Prerequisite: Permission of instructor*

Independent directed readings in economics.

### **Honors Directed Independent Research in Economics (ECO 4915) 1-3 credits**

Students work with research mentors to conduct research and inquiry in Economics. Requirements for the course and the criteria for evaluation are agreed upon by the mentor and student. A directed independent research form is completed for each DIR student.

### **Honors Directed Independent Research in Economics (ECO 4916) 1-3 credits**

Students work with research mentors to conduct research and inquiry in Economics. Requirements for the course and the criteria for evaluation are agreed upon by the mentor and student. A directed independent research form is completed for each DIR student. *Grading: S/U*

### **Honors Special Topics in Economics (ECO 4932) 3 credits**

Content will vary. Course may be repeated for credit.

### **Honors Advanced Research and Writing Methods in Business and Economics 2 (ECO 4953) 2 credits**

*Prerequisite: ECO 3951*

This course is intended to give Honors College students with concentrations in business and economics the practical skills they need to develop an original research project in business or economics. Students learn both the structure of research reports and the process of conducting professional-level research. While writing technique is emphasized in this course, critiquing and reviewing skills are more finely honed in this second research course.

### **Honors Law and Economics (ECP 3451) 3 credits**

*Prerequisite: ECO 2023 with a minimum grade of "C"*

Exploration of economic approaches to the law. Application of economic theories to issues arising in areas of law, such as contracts, tort, criminal law, and property law.

### **Honors Environmental Economics (ECP 4302) 3 credits**

*Prerequisites: ECO 2013 and ECO 2023, or permission of instructor*

### **Honors International Economic Development (ECS 3013) 3 credits**

*Prerequisites: ECO 2013 and ECO 2023, or permission of instructor*

[\(See Economics courses, College of Business section\)](#)

## **ENVIRONMENTAL STUDIES**

### **Honors Environmental Science and Sustainability (EVR 1001) 3 credits**

This course is a survey of basic chemical, biological and physical principles of environmental science and their applications to environmental issues. This course is appropriate for students in a wide range of disciplines or programs. This is a General Education course.

### **Honors Freshman Seminar in Environmental Studies (EVR 1933) 3 credits**

*Writing Across Curriculum (Gordon Rule)*

Special topics interdisciplinary environmental studies seminar for first-year students. The course focuses on basic questions of enduring importance related to the topic and emphasizes critical thinking and writing skills. This is a General Education course.

### **Honors Environment and Society (EVR 2017) 3 credits**

[\(See Geosciences courses, College of Science section\)](#)

### **Honors Energy Resources: Trends, Policy, and Environment (EVR 3314) 3 credits**

This course provides an assessment of conventional and alternative energy sources in the U.S. and global contexts. It emphasizes energy issues in relation to environmental concerns, particularly global warming, and explores elements of a comprehensive energy policy needed for future sustainability.

### **Honors Parks and Preservation (EVR 3421) 3 credits**

This course addresses a range of social issues related to parks and other protected spaces, including their historical emergence, cultural meanings, use and design.

### **Honors Marine Conservation (EVR 4420) 3 credits**

A one-semester, upper-level course in the scientific principles, ethics, legal issues, and management concerns of conservation biology in coastal and marine waters. Readings from scientific and policy literature will be discussed at length in class.

### **Honors Directed Independent Study in Environmental Studies (EVR 4905) 1-3 credits**

*Prerequisite: EVR 2017*

Designed for students who wish to investigate topics that are not addressed in other environmental studies courses. Students will work independently, meeting with the instructor on an arranged basis. May be repeated for credit.

### **Honors Directed Independent Research in Environmental Studies (EVR 4915) 1-3 credits**

Students work with research mentors to conduct research and inquiry in Environmental Studies. Requirements for the course and the criteria for evaluation are agreed upon by the mentor and student. A directed independent research form is completed for each DIR student.

### **Honors Directed Independent Research in Environmental Studies (EVR 4916) 1-3 credits**

Students work with research mentors to conduct research and inquiry in Environmental Studies. Requirements for the course and the criteria for evaluation are agreed upon by the mentor and student. A directed independent research form is completed for each DIR student. *Grading: S/U*

### **Honors Special Topics in Environmental Studies (EVR 4930) 3 credits**

Advanced special topics interdisciplinary environmental studies seminar for upper-division students. The course focuses on advanced questions related to the topic and emphasizes critical thinking and writing skills.

### **Honors Internship in Environmental Studies (EVR 4947) 1-6 credits**

*Prerequisite: Permission of instructor*

Credit for work performed in approved internship opportunities related to environmental studies. May be repeated for credit. *Grading: S/U*

### **Honors Study Abroad in Environmental Studies (EVR 4957) 1-6 credits**

Credit for enrollment in approved study abroad programs related to environmental studies. May be repeated for credit.

### **Honors Global Environmental Issues (EVS 3403) 3 credits**

*Writing Across Curriculum (Gordon Rule)*

In addition to learning about global environmental problems, such as global warming, ozone depletion, and biodiversity loss, students explore political, social, and economic factors that impact international cooperation regarding these issues. They also learn about the debates surrounding key concepts, such as sustainable development and free trade.

### **Honors Conservation Biology (EVS 4414) 3 credits**

Course covers the principles, ethics, legal issues, and management concerns of conservation biology.

## **GEOSCIENCES**

### **Honors World Geography (GEA 2000) 3 credits**

### **Honors Geography of the Developing World (GEA 3003) 3 credits**

[\(See Geosciences courses, College of Science section\)](#)

### **Honors Special Topics in Geography (GEO 4930) 3 credits**

[\(See Geosciences courses, College of Science section\)](#)

### **Honors Geographic Information Systems (GIS 3044C) 3 credits**

This course introduces students to principles and applications of geographic information systems, emphasizing key concepts related to data capture and management, map design, production, and analysis. Students will pay a nominal lab fee that will cover costs of printer paper and ink.

## **HISTORY**

### **Honors U.S. History to 1877 (AMH 2010) 3 credits**

*Grading: Regular*

### **Honors U.S. History since 1877 (AMH 2020) 3 credits**

*Grading: Regular*

### **Honors American Environmental History (AMH 3630) 3 credits**

[\(See History courses, College of Arts and Letters section\)](#)

### **Honors Special Topics in American History (AMH 4932) 3 credits**

The study of a special area of American history. Topics will vary. Course may be repeated for credit.

### **Honors Colloquium in American Studies (AMS 3003) 3 credits**

This course is an upper-level introduction to the methods and sources of American studies as an academic discipline. Students are presumed to have some prior knowledge of American history, American literature, American politics, and American society.

### **Honors Violence in the United States (AMS 4332) 3 credits**

Examines violence in the United States, including violent entertainment, violent crime, sexual violence, media violence, and guns in American life, as well as censorship and regulation.

### **Honors Directed Independent Research in American Studies (AMS 4915) 1-3 credits**

Students work with research mentors to conduct research and inquiry in American Studies. Requirements for the course and the criteria for evaluation are agreed upon by the mentor and student. A directed independent research form is completed for each DIR student.

### **Honors Directed Independent Research in American Studies (AMS 4916) 13 credits**

Students work with research mentors to conduct research and inquiry in American Studies. Requirements for the course and the criteria for evaluation are agreed upon by the mentor and student. A directed independent research form is completed for each DIR student. *Grading: S/U*

### **Honors Special Topics in American Studies (AMS 4930) 3 credits**

Examines the nature of violence in the United States from an historical perspective. The course will meet requirements for the Honors College Concentration in American Studies.

### **Honors 20th Century Europe (EUH 2341) 3 credits**

*Writing Across Curriculum (Gordon Rule)*

Europe's 20th century was one of the bloodiest and most tragic as well as the most optimistic and progressive eras in world history. This Writing Across Curriculum (WAC) introductory course explores how such contradictory impulses played out over the space of ten decades. This is a General Education course.

### **Honors Russia Under the Tsars (EUH 3575) 3 credits**

This course explores Russia's history from its origins in the state of Kievan Rus' over 1000 years ago to the traumas of modernization in the late 19th century. The focus is on the culture and ideas of the 19th century as Russia struggled with what it called the "cursed questions," i.e., the difficulty of moving

from a traditional past to a modern future. The course ends in 1881 when Tsar Alexander II was assassinated, and the socialist revolutionary movements that would lead to the Soviet Union were just getting underway.

**Honors The Soviet Union and Since (EUH 3576) 3 credits**

*Prerequisite: WOH 2012 and WOH 2022*

History of the Soviet Union. Topics include the Bolshevik Revolution, Stalinism, Soviet politics, culture, and society.

**Honors European Intellectual History 1 (EUH 3604) 3 credits**

Explores important ideas and values that helped shape modern European history. Topics include the impact of science on social thought, concepts of political liberty, romantic individualism, and historical determinism.

**Honors Revolution in Europe (EUH 3662) 3 credits**

Study of both the French and Russian revolutions in the context of general theories of revolution as well as specific debates about the meaning and impact of each event.

**Honors Special Topics in European History (EUH 4930) 3 credits**

[\(See History courses, College of Arts and Letters section\)](#)

**Honors Freshman Seminar in History (HIS 1933) 3 credits**

*Writing Across Curriculum (Gordon Rule)*

Special topics course emphasizing critical thinking and writing skills. May be repeated for credit.

**Honors Research and Writing in History (HIS 4054) 1 credit**

This course is intended to give students with an Honors College concentration in history the practical skills they need in research and written communication to succeed in writing an honors thesis in history.

**RI: Honors The City and its Underground: Metropolis and Counterculture in Modern Europe (HIS 4405) 3 credits**

*Prerequisite: Prior history course or permission of instructor*

This research-intensive (RI) and interdisciplinary history course uses methods of geography and urban studies to explore the ways in which cities create alternative spaces, associations and cultural possibilities.

**Honors Directed Independent Study in History (HIS 4906) 2-3 credits**

**Honors Special Topics in History (HIS 4930) 3 credits**

[\(See History courses, College of Arts and Letters section\)](#)

**Honors Directed Independent Research in History (HIS 4915) 1-3 credits**

Students work with research mentors to conduct research and inquiry in History. Requirements for the course and the criteria for evaluation are agreed upon by the mentor and student. A directed independent research form is completed for each DIR student.

**Honors Directed Independent Research in History (HIS 4916) 1-3 credits**

Students work with research mentors to conduct research and inquiry in History. Requirements for the course and the criteria for evaluation are agreed upon by the mentor and student. A directed independent research form is completed for each DIR student. *Grading: S/U*

**Honors Special Topics in Latin American History (LAH 4930) 3 credits**

**Honors History of Civilization 1 (WOH 2012) 3 credits**

*Writing Across Curriculum (Gordon Rule)*

**Honors History of Civilization 2 (WOH 2022) 3 credits**

*Writing Across Curriculum (Gordon Rule)*

[\(See History courses, College of Arts and Letters section\)](#)

**Honors The History of Food and Eating (WOH 2420) 3 credits**

*Writing Across Curriculum (Gordon Rule)*

This course examines the global history of human food consumption from the ancient world through to the modern era. It explores questions of diet and nutrition, economics, world trade, pleasure and ritual. This is a General Education course.

**RI: Honors History of Terrorism (WOH 4209) 3 credits**

*Prerequisite: One prior history course or permission of instructor*

What is terrorism? How much does the definition depend on the definer? The course examines how political violence arose and grew to become a widespread and, unfortunately, common practice in the modern world. This is a research-intensive (RI) course.

## INTERDISCIPLINARY SOCIAL SCIENCES

**Honors Writing in the Social Sciences 1 (ISS 2932) 1 credit**

*Corequisite: Enrollment in a social science course*

Addresses the components of effective writing and communication in the social sciences, with use of peer review and revisions. May be repeated for credit.

### **Honors Social Sciences Study Abroad (ISS 2952) 1-6 credits**

*Prerequisite: Sophomore standing*

Credit for enrollment in approved study abroad programs.

### **Honors Computational Social Science (ISS 4304) 3 credits**

*Prerequisites: COP 3076 and STA 2023 or permission of instructor*

An introduction to the application of computational methods to the study of social behavior including, but not limited to, investigations of natural language and social networks.

### **Honors Directed Independent Study in the Social Sciences (ISS 4906) 1-3 credits**

*Prerequisite: Permission of instructor*

Independent directed readings in the social sciences.

### **Honors Directed Independent Research in Social Sciences (ISS 4915) 1-3 credits**

Students work with research mentors to conduct research and inquiry in Social Sciences. Requirements for the course and the criteria for evaluation are agreed upon by the mentor and student. A directed independent research form is completed for each DIR student.

### **Honors Directed Independent Research in Social Sciences (ISS 4916) 1-3 credits**

Students work with research mentors to conduct research and inquiry in Social Sciences. Requirements for the course and the criteria for evaluation are agreed upon by the mentor and student. A directed independent research form is completed for each DIR student. *Grading: S/U*

### **Honors Advanced Research and Writing in the Social Sciences (ISS 4932) 1 credit**

Advanced course on preparing for thesis research in the social sciences. Students develop a thesis introduction and at least one additional chapter. Reading and critiquing of others' writing is a crucial component of the class. May be repeated for credit.

### **Honors Internship in the Social Sciences (ISS 4947) 1-12 credits**

Provides students with first-hand experience in the use of the social sciences in a non-classroom setting, such as in government, nonprofit organizations, or the corporate world. It contributes to the Honors College curriculum by encouraging students to explore interdisciplinary connections in their work and to discuss these in a detailed essay. *Grading: S/U*

### **Honors Social Sciences Study Abroad (ISS 4957) 1-6 credits**

*Prerequisite: Sophomore standing*

Credit for enrollment in approved study abroad programs. May be repeated for credit.

## INTERNATIONAL STUDIES

### **Honors Culture and Society (ANT 2410) 3 credits**

(See Anthropology courses, this Division, Honors College)

### **Honors Peoples Around the World (ANT 3212) 3 credits**

(See Anthropology courses, College of Arts and Letters section)

### **Honors Peoples of Latin America (ANT 3332) 3 credits**

### **Honors Ritual and Symbolism (ANT 4244) 3 credits**

### **Honors Anthropology of the Andes (ANT 4331) 3 credits**

### **Honors Special Topics in Anthropology (ANT 4930) 3 credits**

(See Anthropology courses, this Division, Honors College)

### **Honors Comparative Politics (CPO 3003) 3 credits**

(See Political Science courses, College of Arts and Letters section)

### **Honors Latin American Politics (CPO 4303) 3 credits**

*Writing Across Curriculum (Gordon Rule)*

(See Political Science courses, College of Arts and Letters section)

### **Honors Religion and Politics in Latin America (CPO 4305) 3 credits**

(See Political Science courses, this Division, Honors College)

### **Honors Macroeconomic Principles (ECO 2013) 3 credits**

*Prerequisite: None*

### **Honors Microeconomic Principles (ECO 2023) 3 credits**

*Prerequisite: None*

(See Economics courses, College of Business section)

### **Honors Environmental Economics (ECP 4302) 3 credits**

*Prerequisites: ECO 2013 and 2023 or permission of instructor*

### **Honors International Economic Development (ECS 3013) 3 credits**

*Prerequisites: ECO 2013 and 2023 or permission of instructor*

(see Economics courses, College of Business section)

### **Honors Russia Under the Tsars (EUH 3575) 3 credits**

### **Honors The Soviet Union and Since (EUH 3576) 3 credits**

**Honors European Intellectual History (EUH 3604) 3 credits**

**Honors Revolution in Europe (EUH 3662) 3 credits**

(See [History courses](#), [this Division](#), [Honors College](#))

**Honors Environment and Society (EVR 2017) 3 credits**

(See [Geosciences courses](#), [College of Science section](#))

**Honors Beginning French Language and Culture 1 (FRE 1120) 4 credits**

**Honors Beginning French Language and Culture 2 (FRE 1121) 4 credits**

**Honors Intermediate French Language and Culture 1 (FRE 2220) 4 credits**

**Honors Intermediate French Language and Culture 2 (FRE 2221) 4 credits**

(See [Languages, Linguistics, and Comparative Literature courses](#), [College of Arts and Letters section](#))

**Honors French Language and Culture Study Abroad (FRE 2957) 1-6 credits**

**Honors Advanced French Language and Culture 1 (FRE 3400) 4 credits**

**Honors French or Francophone Culture Study Abroad (FRE 3957) 1-6 credits**

**Honors Francophone Language and Culture (FRE 4502) 2-4 credits**

(See [French courses](#), [Division of Humanities](#), [Honors College](#))

**Honors Special Topics in French Language Studies (FRE 4930) 2-4 credits**

*Prerequisite: Permission of instructor*

(See [Languages, Linguistics, and Comparative Literature courses](#), [College of Arts and Letters section](#))

**Honors Francophone Cultures and Civilizations (FRT 2510) 3 credits**

**Honors Introduction to Francophone Literatures (FRW 3112) 3 credits**

(See [French courses](#), [Division of Humanities](#), [Honors College](#))

**Honors Directed Independent Study in French (FRW 4905) 1-3 credits**

(See [Languages, Linguistics, and Comparative Literature courses](#), [College of Arts and Letters section](#))

**Honors Thesis Research in French (FRW 4912) 3 credits**

**Honors French or Francophone Literature Study Abroad (FRW 4957) 1-6 credits**

**RI: Honors Thesis in French (FRW 4970) 1-6 credits**

This course is research intensive (RI).

(See [French courses](#), [Division of Humanities](#), [Honors College](#))

**Honors World Geography (GEA 2000) 3 credits**

(See [Geosciences courses](#), [College of Science section](#))

**Honors Conservation and Use of Natural Resources (GEO 2372) 3 credits**

**Honors Spanish or Latin American Literature Study Abroad (SPW 4957) 1-6 credits**

This course is research intensive (RI).

(See [Spanish courses](#), Division of Humanities, Honors College)

## LAW AND SOCIETY

**Honors U.S. History to 1877 (AMH 2010) 3 credits**

**Honors U.S. History since 1877 (AMH 2020) 3 credits**

**Honors American Environmental History (AMH 3630) 3 credits**

(See [History courses](#), College of Arts and Letters section)

**Honors Special Topics in American Studies (AMS 4930) 3 credits**

(See [History courses](#), this Division, Honors College)

**Honors Law and Economics (ECP 3451) 3 credits**

(See [Economics courses](#), this Division, Honors College)

**Honors Special Topics in Interdisciplinary Studies (IDS 3930) 1-3 credits**

**Honors Special Topics in Interdisciplinary Studies (IDS 4930) 3 credits**

**RI: Honors Thesis (IDS 4970) 3 credits**

This course is research intensive (RI).

(See [Interdisciplinary Studies courses](#), Division of Humanities, Honors College)

**Honors Ancient Greek Philosophy (PHH 3100) 3 credits**

[\(See Political Science courses, College of Arts and Letters section\)](#)

**Honors Ethics of Social Diversity (PHI 2642) 3 credits**

[\(See Philosophy courses, Humanities Division, Honors College\)](#)

**Honors Government of the U.S. (POS 2041 ) 3 credits**

**Honors Punishment (POS 2692) 3 credits**

**Honors Privacy (POS 3626) 3 credits**

[\(See Political Science courses, this Division, Honors College\)](#)

**Honors Law and American Society (POS 3691) 3 credits**

**Honors Constitutional Law 1: Government Powers and Limits (POS 4603) 3 credits**

*Prerequisite: None*

**Honors Constitutional Law 2: Civil Rights and Liberties (POS 4604) 3 credits**

*Prerequisite: None*

[\(See Political Science courses, College of Arts and Letters section\)](#)

**Honors Special Topics in Political Science (POS 4932) 1-3 credits**

**Honors History of Political Theory (POT 3021) 3 credits**

[\(See Political Science courses, this Division, Honors College\)](#)

**Honors Principles of Social Psychology (SOP 3004) 3 credits**

[\(See Psychology courses, this Division, Honors College\)](#)

**Honors Sociological Perspectives (SYG 1000) 3 credits**

[\(See Sociology courses, College of Arts and Letters section\)](#)

**Honors Introduction to Women's Studies (WST 3015) 3 credits**

**Honors Feminist Theory (WST 4504) 3 credits**

[\(See Women's Studies/Sociology courses, this Division, Honors College\)](#)

## POLITICAL SCIENCE

**Honors Comparative Politics (CPO 3003) 3 credits**

[\(See Political Science courses, College of Arts and Letters section\)](#)

**Honors Latin American Politics (CPO 4303) 3 credits**

[\(See Political Science courses, College of Arts and Letters section\)](#)

### **Honors Religion and Politics in Latin America (CPO 4305) 3 credits**

This course examines the relationship between religion and politics in Latin America. Topics include religion and conquest, modernization and the church, liberation theology and revolution, and the growth of evangelical protestantism and Afro-Brazilian religions, such as Umbanda and Candomble.

### **Honors Introduction to World Politics (INR 2002) 3 credits**

#### **Honors American Foreign Policy (INR 3102) 3 credits**

[\(See Political Science courses, College of Arts and Letters section\)](#)

### **Honors Exporting Democracy: U.S. Policy Toward Latin America in the 20th Century (INR 3248) 3 credits**

Explores U.S./Latin American relations, including efforts to export democracy, current challenges, and contemporary policy issues, including human rights, drugs, immigration, and international political economy.

### **Honors Advanced Diplomacy (INR 4503) 3 credits**

In this course, students learn diplomatic skills through simulated exercises and through the student of diplomacy theories and concepts. At the conclusion of the course, students represent the university in a National Model United Nations competition. Extensive country and committee research is undertaken throughout the semester. Course may be repeated up to three times.

### **Honors Government of the United States (POS 2041) 3 credits**

In this course, students will investigate how the national government is structured and how the American constitutional republic operates. It covers the philosophical and historical foundations of American government, including but not limited to the Declaration of Independence, the United States constitution and all its amendments, and The Federalist Papers. The course examines the branches of government and the government's laws, policies, and programs. It also examines the ways in which citizens participate in their government and ways their government responds to citizens. This is a General Education course.

### **Honors Freshman Seminar in Political Science (POS 1933) 3 credits**

*Writing Across Curriculum (Gordon Rule)*

Variable topic course to introduce freshmen to political science.

### **Honors Punishment (POS 2692) 3 credits**

Interdisciplinary consideration of punishment that draws on texts in moral and political philosophy, the social sciences, court decisions, films, and other sources. Examines philosophical justifications and

criticisms of punishment as well as legal and public policy controversies on topics such as insanity defense, capital punishment, and plea-bargaining. This is a General Education course.

### **Honors Privacy (POS 3626) 3 credits**

Seminar examines government and private invasions of privacy, weighing the value of privacy against the need to make information public and enforce the law. Draws on philosophy, law, anthropology, and social history in exploring the factors shaping societal expectations of privacy.

### **Honors Moot Court (POS 3675) 1-3 credits**

Analysis of court cases concerning selected moot court topics. Prepares students for competition in moot court, with attention to legal analysis and persuasive delivery. May be repeated for credit.

### **Honors Law and American Society (POS 3691) 3 credits**

(See [Political Science courses, College of Arts and Letters section](#))

### **Honors Political Psychology (POS 4206) 3 credits**

*Prerequisite: POS 2041 or PSY 1012*

An examination of the reciprocal influence of psychology and politics, including the psychological origins, correlates and consequences of political behavior (e.g., voting, seeking office); psychology and political campaigns; personality and political effectiveness; and government and human needs.

### **Honors The U.S. Presidency (POS 4414) 3 credits**

*Prerequisite: POS 2041 or permission of instructor*

Examination of the historical and contemporary role of the presidency, including the presidential selection process and the office's evolution in status, powers, administrative responsibilities, leadership, and decision-making.

### **Honors Constitutional Law 1: Government Powers and Limits (POS 4603) 3 credits**

*Prerequisite: None*

### **Honors Constitutional Law 2: Civil Rights and Liberties (POS 4604) 3 credits**

*Prerequisite: None*

### **Honors The Judicial Process (POS 4609) 3 credits**

*Prerequisite: POS 2041*

(See [Political Science courses, College of Arts and Letters section](#))

### **Honors Directed Independent Study in Political Science (POS 4905) 1-3 credits**

(See [Political Science courses, College of Arts and Letters section](#))

### **Honors Directed Independent Research in Political Science (POS 4915) 1-3 credits**

Students work with research mentors to conduct research and inquiry in Political Science.

Requirements for the course and the criteria for evaluation are agreed upon by the mentor and student.

A directed independent research form is completed for each DIR student.

### **Honors Directed Independent Research in Political Science (POS 4916) 1-3 credits**

Students work with research mentors to conduct research and inquiry in Political Science.

Requirements for the course and the criteria for evaluation are agreed upon by the mentor and student.

A directed independent research form is completed for each DIR student. *Grading: S/U*

### **Honors Special Topics in Political Science (POS 4932) 1-3 credits**

Selected topics in political science. Since content will vary, this course may be repeated for credit.

### **Honors Political Science Study Abroad (POS 4957) 1-6 credits**

Credit for enrollment in approved study abroad programs.

### **Honors History of Political Theory (POT 3021) 3 credits**

*Writing Across Curriculum (Gordon Rule)*

Introduction to important works of political theory spanning over 2,000 years that address issues such as What is justice?, What makes a government legitimate?, Under what conditions is revolution justified?, How does human nature constrain the possibilities available to us in politics?

## **PSYCHOLOGY**

### **Honors Psychopathology (CLP 4143) 3 credits**

*Prerequisite: PSY 1012*

Introduces students to psychopathology, including issues surrounding definitions of abnormality, classifications, assessment, diagnosis, what we think causes psychopathology, and what we can do to prevent and treat it.

### **Honors Health Psychology (CLP 4314) 3 credits**

*Prerequisites: PSY 1012*

Course introduces students to the field of health psychology, a branch of psychology concerned with the effects of individual behaviors and lifestyles on physical health. Topics will include prevention and treatment of disease, health behaviors, such as nutrition and physical activity, psychological impact of illness, and improvement of the health care system.

### **Honors Psychology of Human Development (DEP 3053) 3 credits**

*Prerequisite: PSY 1012*

Course examines changes in behavior over the course of development and the processes underlying these changes. All major areas of child development are reviewed, including cognitive, social/personality, language and biological, with attention to development in adolescence and adulthood. This is a General Education course.

**Honors Personality and Social Development (DEP 4095) 3 credits**

*Prerequisite: At least one of the following: PPE 3003, SOP 3004, and DEP 3053*

An advanced course that surveys theory and research in three broad areas (moral development, longitudinal studies of personality, and nature and nurture) and introduces students to specific techniques used in current research projects in personality and social development.

**Honors Psychology of Aging (DEP 4464) 3 credits**

*Prerequisite: PSY 1012*

Examines changes in cognition and behavior that occur in adulthood and the processes underlying these changes.

**Honors Sensation and Perception (EXP 3202) 3 credits**

*Prerequisite: PSY 1012 or permission of instructor*

Course introduces students to how humans sense and how their bodies interpret these senses. Explores the physiological mechanisms that allow for sensation and the means by which the brain encodes and interprets this information, leading to the final perceptual experience.

**Honors Cognition (EXP 3604) 3 credits**

*Prerequisite: PSY 3213*

Experimental and theoretical aspects of human learning and cognition. Topics include attention, human learning and memory, organization of knowledge, concept formation and problem solving.

**Honors Thinking and Decision Making (EXP 4631) 3 credits**

The study of thinking and decision making lies at the nexus of the two major approaches to understanding the world, reason, and empiricism. This course considers both the normative models of how we should reason and empirical studies of how we in fact think and decide.

**Honors Personality (PPE 3003) 3 credits**

*Prerequisite: PSY 1012 or equivalent*

A survey of contemporary theory and research in the study of personality.

**Honors Biological Bases of Behavior (PSB 3002) 3 credits**

[\(See Psychology courses, College of Science section\)](#)

**Honors Behavioral Neuroscience (PSB 3340) 3 credits**

*Prerequisite: PSY 1012 or permission of instructor*

Course introduces students to what is known currently about nervous system mechanisms that underlie behavior and provides a better understanding of the scientific methods used to generate this knowledge.

**Honors Drugs and Behavior (PSB 3441) 3 credits**

*Prerequisite: PSY 1012 or permission of instructor*

Introduction to the chemical bases of behavior and how various drugs influence the biological and psychological aspects of a behaving organism. The introduction will be enhanced by the basics of neuropsychopharmacology and neurochemical signaling, followed by an evaluation of major drug classifications.

**Honors Neuroscience of Addiction (PSB 4243) 3 credits**

*Prerequisite: 8 credits in Biology or Neuroscience*

This is an advanced course designed for students who already have a background in neuroscience and/or biology. The course directive is to first provide a brief review by didactic lectures of the central nervous system with emphasis at the areas of the brain involved in addiction. The course is divided in three modules. The first module provides a basic understanding of the biochemistry, pharmacology, physiology and behavior underlying addiction. Module two focuses on the genetics and epigenetic aspects of addiction, whereas module three covers the mechanism of action of drugs, such as cocaine, amphetamines, opioids, nicotine and alcohol.

**Honors General Psychology (PSY 1012) 3 credits**

[\(See Psychology courses, College of Science section\)](#)

**Honors Freshman Seminar in Psychology (PSY 1933) 3 credits**

*Writing Across Curriculum (Gordon Rule)*

Special topics course for freshmen in which the approach is generally philosophical and/or historical and focuses on basic questions and issues of enduring importance to the topic.

**Honors Writing in Psychology and the Behavioral Sciences (PSY 2932) 1 credit**

*Writing Across Curriculum (Gordon Rule)*

Essentials of writing in psychology and the behavioral sciences. Includes an introduction to APA style.

**RI: Honors Research Methods in Psychology (PSY 3213) 3 credits**

*Writing Across Curriculum (Gordon Rule)*

Examines the different ways in which psychologists design and conduct research. Students will learn how to formulate good, testable questions; how to design experiments to test these questions; and techniques for collecting, interpreting, and presenting data. The course is writing instructive. When "RI" is in the title, it means this course has a research intensive component.

**Honors Research Methods in Psychology Lab (PSY 3213L) 1 credit**

*Prerequisite: PSY 1012; Corequisite: PSY 3213*

Students design and conduct a psychological experiment. They also learn how to use SPSS to analyze data.

**Honors Experimental Design and Statistical Inference (PSY 3234) 3 credits**

*Gordon Rule, computational*

**Honors Psychometrics and Psychological Testing (PSY 4302) 3 credits**

*Prerequisite: PSY 1012 or permission of instructor*

[\(See Psychology courses, College of Science section\)](#)

**Honors History and Systems of Psychology (PSY 4604) 3 credits**

*Prerequisites: 12 credits (four courses) in psychology*

[\(See Psychology courses, College of Science section\)](#)

**Honors Directed Independent Study in Psychology (PSY 4905) 1-3 credits**

*Prerequisite: Permission of instructor*

*Grading: Regular*

**Honors Directed Independent Study in Psychology (PSY 4906) 1-3 credits**

*Grading: S/U*

**Honors Directed Independent Research in Psychology (PSY 4915) 1-3 credits**

Students work with research mentors to conduct research and inquiry in Psychology. Requirements for the course and the criteria for evaluation are agreed upon by the mentor and student. A directed independent research form is completed for each DIR student.

**Honors Directed Independent Research in Psychology (PSY 4916) 1-3 credits**

Students work with research mentors to conduct research and inquiry in Psychology. Requirements for the course and the criteria for evaluation are agreed upon by the mentor and student. A directed independent research form is completed for each DIR student. *Grading: S/U*

**Honors Special Topics in Psychology (PSY 4930) 1-3 credits**

[\(See Psychology courses, College of Science section\)](#)

### **Honors Advanced Writing in Psychology and the Behavioral Sciences (PSY 4933) 1 credit**

*Prerequisites: Permission of instructor*

Writing in psychology and the behavioral sciences, with an introduction to thesis writing.

### **Honors Advanced Seminar in Psychology (PSY 4936) 3 credits**

*Prerequisite: Junior or senior standing or permission of instructor*

Advanced seminar for students with a concentration in psychology or neuroscience, behavior and cognition. Students read, review and discuss contemporary research on an important topic in psychology. Topics may differ each semester. If space permits, the course may be taken multiple times for credit.

### **Honors Principles of Social Psychology (SOP 3004) 3 credits**

*Prerequisite: PSY 1012 or permission of instructor*

An introduction to and an overview of social psychology. This is a General Education course.

## **WOMEN'S STUDIES/SOCIOLOGY**

### **Honors Race, Gender, Class, Sexuality and Science (SYD 4792) 3 credits**

Examines various ways in which scientific discourses have participated in constructing categories of "difference." Over the years, these discourses have been employed by various dominant groups to justify the marginalization of certain populations. This course looks at attempts made by marginalized groups, and by science itself, to disrupt such categories.

### **Honors Gender and Society (SYD 4800) 3 credits**

[\(See Sociology courses, College of Arts and Letters section\)](#)

### **Honors Queer Studies in Global Perspectives (SYD 4802) 3 credits**

*Prerequisites: SYG 1000 or WST 3015 or ANT 2410*

This interdisciplinary course introduces students to social, historical, and theoretical perspectives regarding the construction and representation of homosexuality/heterosexuality and transgenderism as well as gay, lesbian, and bisexual histories.

### **Honors Sociological Perspectives (SYG 1000) 3 credits**

[\(See Sociology courses, College of Arts and Letters section\)](#)

### **Honors Freshman Seminar in Sociology (SYG 1933) 3 credits**

*Writing Across Curriculum (Gordon Rule)*

Special topics interdisciplinary seminar for freshmen. The course focuses on basic questions of enduring importance related to the topic and emphasizes critical thinking and writing skills. This is a General Education course.

### **Honors Directed Independent Study in Sociology (SYG 4905) 1-3 credits**

*Prerequisite: SYG 1000*

Designed for students who desire to investigate topics that are not addressed in other sociology courses. Students will work independently, meeting with the instructor on an arranged basis. May be repeated for credit.

### **Honors Directed Independent Research in Sociology (SYG 4915) 1-3 credits**

Students work with research mentors to conduct research and inquiry in Sociology. Requirements for the course and the criteria for evaluation are agreed upon by the mentor and student.

### **Honors Directed Independent Research in Sociology (SYG 4916) 1-3 credits**

Students work with research mentors to conduct research and inquiry in Sociology. Requirements for the course and the criteria for evaluation are agreed upon by the mentor and student. A directed independent research form is completed for each DIR student. *Grading: S/U*

### **Honors Internship in Sociology (SYG 4947) 1-6 credits**

*Prerequisite: SYG 1000*

Credit for work performed in approved internship opportunities related to sociology. May be repeated for credit. *Grading: S/U*

### **Honors Study Abroad in Sociology (SYG 4957) 1-6 credits**

*Prerequisite: SYG 1000*

[\(See Sociology courses, College of Arts and Letters section\)](#)

### **RI: Honors Thesis in Sociology (SYG 4970) 1-6 credits**

*Writing Across Curriculum (Gordon Rule)*

Prerequisites: Senior standing and permission of instructor

The thesis in sociology is a rigorous research paper on a topic approved by the thesis supervisor and a second member of the Honors College faculty. The thesis aspires to be an original, significant, research-based contribution to knowledge about social issues. An oral defense of the thesis will be presented in public forum. This course is research intensive (RI).

### **Honors Family and Society (SYO 4100) 3 credits**

[\(See Sociology courses, College of Arts and Letters section\)](#)

### **Honors Sex Panics in History and Society (SYP 4303) 3 credits**

*Prerequisite: SYG 1000 or equivalent*

This interdisciplinary course looks at some of the ways in which sexuality has been conceptualized in history, culture, literature, law, media, medicine, and science, while also paying close attention to the panics and fears that are embodied within such conceptualizations.

### **Honors Gender and Technology (SYP 4803) 3 credits**

This course is a social study of the relationships between gender and technology. In addition to examining both gender and technology as cultural and political categories that have no distinct definitions, the course explores how technology helps to form and distinguish the realm of the masculine and feminine, as well as how ideas about gender help form our view of technology.

### **Honors Introduction to Women's Studies (WST 3015) 3 credits**

*Writing Across Curriculum (Gordon Rule)*

Multidisciplinary study of the heritage of women and the nature of gender-related problems in contemporary societies, stressing cultural images of women, socialization by gender, women's history, and feminist methods of analysis. May be considered either an Arts and Humanities or Social Science course.

### **Honors Feminist Theory (WST 4504) 3 credits**

*Prerequisite: WST 3015*

In addition to surveying a wide range of contemporary feminist theories, this course examines the intellectual roots of modern feminist theory as well as feminist attempts to overhaul its intellectual roots. Although the focus of this course is on the contemporary feminist theoretical terrain, it also examines how feminist theory itself is intertwined with other academic debates.

### **Honors Directed Independent Study in Women's Studies (WST 4905) 1-3 credits**

*Prerequisite: WST 3015*

[\(See Women, Gender and Sexuality Studies courses, College of Arts and Letters section\)](#)

### **Honors Directed Independent Research in Women's Studies (WST 4915) 1-3 credits**

Students work with research mentors to conduct research and inquiry in Women's Studies. Requirements for the course and the criteria for evaluation are agreed upon by the mentor and student. A directed independent research form is completed for each DIR student.

### **Honors Directed Independent Research in Women's Studies (WST 4916) 1-3 credits**

Students work with research mentors to conduct research and inquiry in Women's Studies.

Requirements for the course and the criteria for evaluation are agreed upon by the mentor and student. A directed independent research form is completed for each DIR student. *Grading: S/U*

**Honors Special Topics in Women's Studies (WST 4930) 3 credits**

(See [Women, Gender and Sexuality Studies courses, College of Arts and Letters section](#))

**Honors Internship in Women's Studies (WST 4947) 1-6 credits**

*Prerequisite: WST 3015*

Credit for work performed in approved internship opportunities related to women's studies. May be repeated for credit. *Grading: S/U*

**Honors Study Abroad in Women's Studies (WST 4957) 1-6 credits**

*Prerequisite: WST 3015*

Credit for enrollment in approved study abroad programs related to women's studies. May be repeated for credit.

## UNDERGRADUATE COURSES

[Link to graduate courses](#)

### **Professionalism, Ethics and Topics in Medicine (PCB 4084) 0 credit**

*Prerequisite: For students in the Medical Pipeline/Med Direct program*

In this course, students are introduced to the topics of professionalism in medical practice, as well as to bioethics as an interdisciplinary subject. Students are provided with the opportunity to study, evaluate and discuss defining issues in the field of bioethics and begin to develop an understanding of the professional practice of medicine. These competencies support the students in their academic careers as well as in the field of medicine beyond. *Grading: S/U*

### **Directed Independent Study (PCB 4905) 1-3 credits**

*Prerequisite: Permission of instructor and Department*  
Independent research.

### **Directed Independent Research (PCB 4915) 1-3 credits**

This course is designed for students conducting undergraduate research with faculty and allows documentation of these projects on their transcripts.

### **Directed Independent Research (PCB 4916) 0-3 credits**

This course is designed for students conducting undergraduate research with faculty and allows documentation of these projects on their transcripts. *Grading: S/U*

### **Special Topics (PCB 4930) 1-8 credits**

Special topics of interest to biomedical students.

## GRADUATE COURSES

### **Foundations of Medicine 1 (BMS 6015) 10 credits**

*Prerequisite: Medical students only*

Provides students with an understanding of the fundamental principles necessary to become a competent, compassionate, informed, professional and conscientious physician with unique opportunities for direct patient care. Assists students in developing the knowledge, skills, attitudes and behaviors needed to interview and examine the patient, to answer clinical questions, to understand the importance of patient advocacy and disease prevention, to explore the barriers to healthcare and to instill the foundation for the ethical and legal framework of patient care.

### **Foundations of Medicine 2 (BMS 6016) 13 credits**

*Prerequisites: Medical students only; BMS 6015*

A continuation in the Foundations of Medicine series. Provides students with an understanding of the fundamental principles necessary to become a competent, compassionate, informed, professional and conscientious physician with unique opportunities for direct patient care. Assists students in developing

the knowledge, skills, attitudes and behaviors needed to interview and examine the patient, to answer clinical questions, to understand the importance of patient advocacy and disease prevention, to explore the barriers to healthcare and to instill the foundation for the ethical and legal framework of patient care.

### **Foundations of Medicine 3 (BMS 6017) 13 credits**

*Prerequisites: Successful completion of the first year of the medical program; BMS 6015, BMS 6016*

The Foundations of Medicine (FOM) courses provide students with an understanding of the fundamental principles necessary to become a competent, compassionate and professional physician with opportunities for direct patient care. This is an Academic Service Learning (ASL) course.

### **Neuroscience and Behavior (BMS 6020) 9 credits**

*Prerequisite: Medical students only*

Provides the basic concepts and vocabulary in the areas of neuroanatomy, neurophysiology, sensory systems, neurochemistry, neuropharmacology, neuropathology, neurology and psychiatry. Uses an integrated approach combining lectures, problem-based learning (PBL) and anatomy laboratory instruction. The PBL sessions in small groups provide the fundamental knowledge of common neurological and psychiatric disorders, complemented by lectures for specific diseases. The presentation of the neuroanatomy component emphasizes correlations with clinical cases and leads to the localization of brain lesions. The instruction in gross anatomy of the head and neck are integrated with clinical correlates.

### **Foundations of Medicine 4 (BMS 6022) 4 credits**

*Prerequisites: BMS 6015, BMS 6016, BMS 6017*

The Foundations of Medicine (FOM) courses provide students with an understanding of the fundamental principles necessary to become a competent, compassionate and professional physician. This is the final FOM course in a four-course group offered in the first two years of medical school.

### **Fundamentals of Biomedical Science (BMS 6031) 21 credits**

*Prerequisite: Medical students only*

Provides students with a broad function in critical biomedical science subject areas, including biochemistry, molecular biology, cell biology, genetics, pharmacology, pathology, physiology, histology, anatomy and embryology.

### **Integrated Morphology 1 (BMS 6102C) 4 credits**

*Prerequisite: Permission of instructor*

This course involves the developmental, microscopic and gross anatomical features of the organs

located in the thorax and abdomen of the human. A laboratory includes a cadaveric dissection experience and examination of tissue samples using virtual microscopy.

### **Integrated Morphology 2 (BMS 6104C) 4 credits**

*Prerequisite: Permission of instructor*

This course involves the gross anatomical features of the structures of the back, limbs, head and neck of the human. A laboratory includes a cadaveric dissection experience.

### **Clinical Microbiology (BMS 6303) 3 credits**

*Prerequisite: MCB 3020*

Students learn the relevant facts and principles underlying bacteria, parasites, pathogenicity and host resistance. Armed with this fundamental information, students will then be capable of understanding and utilizing contemporary modes of treatment and prevention.

### **Synthesis and Transition (BMS 6405) 4 credits**

*Prerequisite: Successful completion of all previous courses in the M.D. program*

A three-week course at the beginning of Year 3 designed to help students synthesize knowledge and prepare for a smooth transition to the Year 3 clerkships. The course includes (1) a Case Seminar, a complex multidisciplinary PBL/IQ case that focuses on differential diagnosis and treatment decisions; (2) Sim center and interactive work on clinical reasoning and clinical skills building; and (3) orientation to the Year 3 clerkships.

### **Autonomic Function and Diseases (BMS 6523) 3 credits**

*Prerequisite: Permission of instructor*

Course covers both the physiological and clinical study of the autonomic nervous system (ANS) emphasizing the neural circuitry aspects of systemic regulation. Topics are introduced in lectures and followed up by recent journal articles.

### **Pathophysiology and Therapeutics 1 (BMS 6541) 8 credits**

*Prerequisite: BMS 6020*

Provides the basic concepts and vocabulary in the areas of the anatomy, chemistry, histology, microbiology, pathology, pharmacology and physiology of the gastrointestinal and hepatic systems and human nutrition, including normal nutrition and diagnosis and management of common nutritional disorders. Uses an integrated approach by combining lectures, problem-based learning and simulated laboratory instruction.

### **Pathophysiology and Therapeutics 2 (BMS 6542) 11 credits**

*Prerequisite: BMS 6541*

An 11-week course in the fall semester of year two. Provides the basic concepts and vocabulary in the areas of the anatomy, chemistry, histology, microbiology, pathology, pharmacology and physiology of the cardiovascular system, the respiratory system and related components of the hematologic system. Uses an integrated approach by combining lectures, problem-based learning and simulated laboratory instruction.

### **Pathophysiology and Therapeutics 3 (BMS 6543) 9 credits**

*Prerequisites: BMS 6541 and 6542*

A nine-week course in the fall semester of year two. Provides the basic concepts and vocabulary in the areas of the anatomy, chemistry, histology, microbiology, pathology, pharmacology and physiology of the renal system, the endocrine system, the reproductive system and related components of the hematologic system. Uses an integrated approach by combining lectures, problem-based learning and simulated laboratory instruction.

### **Pathophysiology and Therapeutics 4 (BMS 6544) 6 credits**

*Prerequisites: BMS 6541, 6542, 6543*

A six-week course in the spring semester of year two. Provides the basic concepts and vocabulary in the areas of the anatomy, chemistry, histology, microbiology, pathology, pharmacology and physiology of the immunologic system, mechanisms of host-defense, infectious disease, including public health aspects, and common hematologic malignancies. Revisits and expands on concepts of immunity and infection and includes diseases of the dermatologic system and the eye. Uses an integrated approach by combining lectures, problem-based learning and simulated laboratory instruction.

### **Fundamentals of General Pathology (BMS 6601) 3 credits**

Covers the basic pathophysiology of mechanisms of disease in medicine and incorporates gross pathologic, microscopic and radiologic material to assist in understanding fundamental disease.

### **Brain Diseases: Mechanism and Therapy (BMS 6736) 3 credits**

*Prerequisite: Permission of instructor*

Discussion of the molecular and cellular basis of brain diseases and of the current status of therapeutic intervention for those diseases.

### **Directed Study Medicine (BMS 6900) 1-12 credits**

*Prerequisite: Medical students only*

A College of Medicine course in which medical students pursue directed independent work under the guidance of a faculty member.

### **USMLE Step 1 Review (BMS 6960) 6 credits**

*Prerequisites: Successful completion of all previous courses in the M.D. program*

A College of Medicine course in which medical students pursue directed independent study with faculty support and resources in preparation for the USMLE Step 1 Examination.

### **Biomedical Data and Informatics (BSC 6459) 3 credits**

*Prerequisite: Permission of instructor*

This course teaches essential concepts and methodology for biomedical data acquisition and analysis with an emphasis on the analysis of massive data. The course sets up the foundation for students' careers in biomedical informatics in a wide range of fields including biomedical academia, pharmaceutical and biotechnology industries.

### **Introduction to Radiation Biology (BSC 6834) 3 credits**

*Prerequisites: BSC 1010, 1010L, PHY 2048, 2048L, 2049, 2049L and permission of instructor*

An overview of the effects of ionizing radiations on human and other biological systems. The course involves consideration of cell survival after exposure to ionizing radiations, repair of radiation damage, radiosensitizers and radioprotectors, doses and risks in diagnostic radiology, cardiology, nuclear medicine, and basic safety rules. A student seminar is required at the end of the course.

### **Neural Plasticity (GMS 6021) 3 credits**

*Prerequisite: Permission of instructor*

This course is designed to provide students with a functional understanding of the field of basic neuroscience with application to brain plasticity throughout the lifespan. Emphasis is on the integrated understanding of learning and memory, structural and synaptic plasticity in animal models with relevance to human brain function in health and disease.

### **Biomedical Science Core Technologies Laboratory (GMS 6091C) 3 credits**

*Prerequisite: Permission of instructor*

The aim of this course is to provide students with the introductory skills required for research success in the biomedical sciences. The course combines traditional classroom-based learning with hands-on practical laboratory experience and instruction. This course provides students with the fundamentals required for biomedical science research, including responsible conduct in biomedical research, understanding and applying the scientific method, hypothesis construction and experimental application, experimental design and data collection, and data analysis and presentation.

### **Macromolecular Therapy for Human Diseases (GMS 6301) 3 credits**

*Prerequisite: BCH 3033 or PCB 4023 or equivalent*

Discussion of the molecular and cellular basis of human diseases and of the current status of therapeutic intervention for the specified diseases with focus on macromolecular therapy.

### **Molecular Basis of Disease and Therapy (GMS 6302) 3 credits**

*Prerequisites: BCH 4035 and (PCB 4023 or PCB 4522)*

Explores the molecular basis of selected viral pathogens, genetic diseases and cancer through lectures and presentations by faculty in the College of Science and College of Medicine, Scripps Florida and private industry representatives. Discusses novel technologies aimed at developing therapeutics together with the activity of modern biotechnology in drug development.

### **Pharmacology (GMS 6513) 3 credits**

*Prerequisite: Permission of instructor*

This course introduces the study of the properties, effects and therapeutic value of the primary agents in major drug categories. Topics include cholinergic drugs, adrenergic drugs, hormones, diuretics, cardiovascular agents, respiratory drugs and gastrointestinal agents.

### **Advanced Pharmacology (GMS 6551) 3 credits**

*Prerequisite: Permission of instructor*

The pharmacology course is divided into two parts. The first part is usually delivered in the spring semester focusing on pharmacokinetics and neuropharmacology. In the second part, students explore chemotherapeutics and anti-inflammatory drugs. To inspire students to learn high-level pharmacology, the course emphasizes mechanisms of action of each therapeutic drug.

### **Principles of Neuroimmunology (GMS 6708) 3 credits**

*Prerequisite: Permission of instructor*

This course is designed to provide the fundamental knowledge and essential concepts in the emerging field of psychoneuroimmunology (PNI). PNI is an interdisciplinary science that studies the connection and influence between the central nervous system, the immune system, and behavior. Understanding the interplay between these systems leads to discoveries of novel mechanisms of physiology and pathology, developments of novel therapies for the treatments of inflammatory diseases, neurodegenerative and affective disorders. The course seeks to provide a basic understanding of the neuroscience, immunology, physiology and behavioral science underlying PNI interactions and to use PNI research as a platform to present students with modern strategies for understanding molecular mechanisms involved in the immunomodulation of neural functions and neuromodulation of immune activities.

### **Biomedical Concepts and Translational Applications (GMS 6841) 3 credits**

*Prerequisite: Permission of instructor*

This course is a comprehensive fundamental course intended for biomedical majors. It provides cutting-edge, high-interest topics in the field of human health to doctoral and master's students in biomedical science. In this course, students explore the concepts of biology in different fields and how they are related to human health. The course also provides students with translational applications to clinical health problems and allows considerable flexibility in tailoring their course of study to suit their educational goals.

**Data Interpretation and Analysis in the Age of Precision Medicine (GMS 6860) 3 credits**

*Prerequisite: Permission of instructor*

Biomedical Science is a broad field comprising many applied sciences geared toward the development of new approaches in healthcare or public health. This unique College of Medicine course is designed for graduate students headed toward a broad array of postgraduate vocational opportunities in areas ranging from professional education, health care and scientific fields through business. Students are introduced to data interpretation, analysis and presentation approaches. Further, students are exposed to novel precision medicine concepts and database research.

**Host Defense and Inflammation (MCB 6208) 3 credits**

*Prerequisite: PCB 4233 or equivalent with a minimum grade of "B-"*

Course covers the immunology emphasizing mechanisms of host defense and inflammation in chronic inflammatory diseases. Mechanisms emphasized are roles of macrophages that are heterogeneous and diverse populations regulating host defense and inflammation. Mycobacterial infections and allergic asthma are presented as disease models of chronic inflammatory diseases.

**Family and Community Health Sciences Longitudinal Integrated Clerkship (MDC 7011) 10 credits**

*Prerequisite: Enrolled in the third year of the medical program*

FCHS is organized as a Longitudinal Integrated Clerkship (LIC). It has 24 instructional weeks and is made up of 21 weeks of clinical experiences and didactic instruction in three graded integrated clerkships and six disciplines that are not graded, plus two weeks for assessments and one week of orienting activities. FCHS includes experiences in obstetrics and gynecology, pediatrics and psychiatry. Students receive separate clerkship grades in these three disciplines. It also includes experiences in anesthesia, critical care, emergency medicine, neurology, pathology and radiology.

**Medical and Surgical Sciences Longitudinal Integrated Clerkship (MDC 7012) 10 credits**

*Prerequisite: Enrolled in the third year of the medical program*

Medical and Surgical Sciences, organized as a Longitudinal Integrated Clerkship (LIC), has 24

instructional weeks and is made up of 22 weeks of clinical experiences and didactic instruction in three graded integrated clerkships and six disciplines that are not graded, plus one week for assessments and one week of orienting activities. Includes experiences in medicine, surgery and geriatrics/palliative care, as well as experiences in anesthesia, critical care, emergency medicine, neurology, pathology and radiology.

### **Community and Preventative Medicine Clerkship (MDC 7120) 14 credits**

*Prerequisite: Enrolled in the third year of the medical program*

Throughout the third year of medical school, within the Community and Preventive Medicine Clerkship, students are assigned one-on-one to a primary care provider, either an internist or a family physician in the community. The goal of this longitudinal preceptor experience is for students to build their own panel of patients, developing a relationship over time and following patients to different clinical experiences that are part of their medical care.

### **Obstetrics and Gynecology Clerkship (MDC 7180) 20 credits**

*Prerequisite: Enrolled in the third year of the medical program*

Consists of an inpatient labor and delivery experience, an inpatient gynecologic surgery experience, an outpatient preceptor-based experience (including sessions in an outpatient ob/gyn office), and a subspecialty experience (reproductive endocrinologist, maternal-fetal specialist, uro-gynecologist, gynecologic oncologist). Provides opportunity for students to observe and gain basic knowledge in the care of both obstetrics and gynecology patients in inpatient and outpatient settings. Under supervision by attendings, students are involved in every aspect of the patient's care.

### **Internal Medicine Clerkship (MDC 7200) 25 credits**

*Prerequisite: Enrolled in the third year of the medical program*

Students develop a comprehensive approach to the evaluation and care of the adult medical patient, continuing to improve their ability to obtain, record, analyze and communicate clinical information. Each student gains an awareness of the knowledge, skills, values and attitudes that internists strive to acquire and maintain throughout their professional lives. Students have supervised responsibility for patient care, learning to integrate clinical knowledge with practical experience.

### **Pediatrics Clerkship ( MDC 7400) 20 credits**

*Prerequisite: Enrolled in the third year of the medical program*

Provides medical students with the knowledge and clinical experience necessary to develop basic skills in the evaluation and management of health and disease in infants, children and adolescents. An introduction to the care of children emphasizing those aspects of pediatrics that should be understood and mastered by all physicians, regardless of ultimate career goals.

### **Surgery Clerkship (MDC 7600) 25 credits**

*Prerequisite: Enrolled in the third year of the medical program*

An intense clinical experience that introduces students to the basic principles of surgery. Equips students with the knowledge and skills relevant to surgical management that all physicians should possess. Aims to emphasize patient responsibility and professional behavior as essential qualities for young physicians to develop.

### **Psychiatry Clerkship (MDC 7830) 20 credits**

*Prerequisite: Enrolled in the third year of the medical program*

Part of the six-month longitudinal integrated clerkship experience (FCHS). Divided into two sections: A four-week inpatient experience and an integrated outpatient/subspecialty experience. Designed to help students develop clinical skills and a knowledge base in psychiatry. In addition to the inpatient, outpatient, C-L Substance Abuse and off-campus experiences, students attend regular didactic lectures.

### **Elective Rotation (MDE 8011) 6-12 credits**

*Prerequisite: Enrolled in the third or fourth year of medical program*

Fourth year electives accommodate the diverse educational needs of medical students. They offer students the opportunity to explore diverse options in the field of medicine and provide them the opportunity to further their medical knowledge, skills and attitudes.

### **Transition to Residency (MDE 8067) 18 credits**

*Prerequisite: Completion of all other fourth year courses and requirements*

This capstone course spans the entire fourth year of medical school. The goal of this course is to prepare students for the United States Medical Licensing Exam (USMLE) Step 2, Electronic Residency Application Services (ERAS) process and National Resident Matching Process (NRMP), and to develop the knowledge, attitudes and skills necessary to work effectively as interns, residents and practicing physicians. In addition, the educational activities allow students to meet specific Entrustable Professional Activities (EPAs) required for residency.

### **Acting Internship Rotation (MDI 8010) 12 credits**

*Prerequisite: Enrolled in the fourth year of the M.D. program*

The overall goal of this course is for the student to provide care for a group of patients, applying knowledge and clinical reasoning to medical practice. These rotations provide the opportunity for the student to assume a high level of responsibility for patient care.

### **Selective Rotation (MDS 8011) 12 credits**

*Prerequisite: Enrolled in the fourth year of medical program*

Selective rotations explore the diversity of medical fields and increase the educational experience, providing hands-on patient care through the scope of multiple specialties. Students evaluate patients under supervision and have meaningful patient care experiences in the specialties they choose.

### **Advanced Molecular and Cellular Biology (PCB 5532) 3 credits**

*Prerequisites: CHM 2210, PCB 4023, BCH 3033 and permission of instructor*

Course is designed to provide students with a basic background and advanced topics in cell and molecular biology. Emphasis is placed on human physiology and disease.

### **Neurobiology of Addiction (PCB 5844) 3 credits**

*Prerequisite: Permission of instructor*

This course provides graduate students with fundamental information on molecular, cellular and neurocircuitry systems in the brain that are responsible for drug addiction. Common neurobiological elements are emphasized that provide novel insights into how the brain mediates the acute rewarding effects of drugs of abuse and how it changes during the transition from initial drug use to compulsive drug use and addiction.

### **Immunology Seminar (PCB 5930) 1 credit**

Graduate students in the College of Medicine and the College of Science interested in immunology introduce topics, discuss the data and summarize conclusions from one or a few related cutting-edge articles published in immunology journals. The article(s) deal with research in cellular or molecular immunology. The seminar is also intended to encourage graduate students to present their research-in-progress and acquire feedback from their colleagues and faculty.

### **Advanced Cell Physiology (PCB 6207) 3 credits**

*Prerequisite: Permission of instructor*

Course describes in-depth membrane physiology, intracellular signaling pathways and cellular function, with an emphasis on neurons and human muscle cells (skeletal, smooth and cardiac muscle cells).

### **Emerging Applications in Oncology and Pharmacogenomics (PCB 6230) 3 credits**

*Prerequisite: PCB 6667 or permission of instructor*

The course covers the rapidly evolving applications of genomics to cancer diagnosis and treatment and pharmacogenomics, exploring how natural genetic variation impacts human health, susceptibility to disease and the development of targeted treatments.

### **Molecular Basis of Human Cancer (PCB 6235) 3 credits**

*Prerequisites: Graduate standing and PCB 4023 or BCH 3033 or PCB 6207 with minimum grade of*

"B-"

Course covers current concepts and knowledge of cancer, exploring the molecular and cellular mechanisms underlying cancer progression with an aim to understand the processes of tumorigenesis.

### **Problem-Based Immunology (PCB 6238) 3 credits**

*Prerequisites: Graduate standing and PCB 4233 or equivalent with a minimum grade of "B-"*

Course provides an up-to-date understanding of the basic science of immunology and how that science applies to the realities of patient care. The fundamental mechanisms of immunity are illustrated by cases of genetic defects in the immune system, immune complex diseases, immune mediated hypersensitivity reactions and autoimmune and alloimmune diseases.

### **Tumor Immunology (PCB 6239) 3 credits**

*Prerequisites: Graduate standing and PCB 4233 or equivalent with a minimum grade of "B-"*

Explores the role of the immune system in cancer and the implications for the host. The effect of the tumor-host interactions on the developing neoplasm are studied by considering related topics such as angiogenesis, MMPs, chemokines and metastasis. Additionally, the course explores the role of the immune system in defense against the tumors and the mechanism by which cancer cells escape the surveillance system.

### **Human Genetics (PCB 6665) 3 credits**

*Prerequisite: Permission of instructor*

Designed to provide students with a functional understanding of the field of human genetics as it applies to progressive research and medicine. Emphasizes the integrated understanding and application of Genetic Analysis, Diagnosis and Mechanisms in human disease.

### **Integrating Genomics into Predictive Health (PCB 6667) 3 credits**

*Prerequisite: Permission of instructor*

This graduate level course is taught by faculty leaders in genomics, precision medicine and predictive health. The content covers all aspects of this rapidly evolving field from understanding the structure of the human genome, to exploring how natural genetic variation impacts human disease and health to applying new technologies and tools across a wide range of clinical conditions including pre-conception screening, diagnostic testing, drug tailoring, and health forecasting.

### **Molecular Biology of the Cardiovascular System and Cardiac Disease (PCB 6705) 3 credits**

*Prerequisites: BCH 3034, PCB 4023, or permission of instructor*

Examination of the molecular biology of cellular function focused on tissue adaptation in cardiovascular disease. Investigation of survival responses to cellular stress in atherosclerosis, cardiac

hypertrophy, myocardial ischemia and hypertension.

### **Molecular Mechanism of Aging and Age-Related Diseases (PCB 6817) 3 credits**

*Prerequisite: Permission of instructor*

This course is designed to provide students with contemporary knowledge of current concepts in aging and age-related diseases. The course explores the molecular and cellular mechanisms underlying the aging process with an emphasis on aging mechanisms. Hallmarks of aging in multiple organisms are emphasized with special emphasis on human aging.

### **Adult Neurogenesis (PCB 6848) 3 credits**

*Prerequisites: Graduate standing and PSB 6037 or PSB 6345 or equivalent*

The background of stem cells and neuroscience is covered followed by several aspects of neurogenesis, including where neurogenesis happens in the brain, how it happens, why it happens and, more importantly, how it might help the brain heal itself.

### **Physiology of the Heart (PCB 6885) 3 credits**

*Prerequisites: BCH 3034, PCB 4023, or permission of instructor*

Course emphasizes the relationship between the biochemical properties of the individual constituents of the heart cell (myocardium), the biophysics of cardiac muscle function and the performance of the intact heart. The course format will involve lectures, journal club presentations, round table discussions, invited speakers as well as special projects.

### **Directed Independent Study (PCB 6905) 1-3 credits**

*Prerequisite: Permission of instructor and Department*  
Independent research.

### **Directed Independent Research (PCB 6915) 1-3 credits**

*Prerequisite: Permission of instructor*

Directed independent research courses are designed for students conducting research with faculty in the College of Medicine, which allows documentation of these projects on their transcripts.

### **Directed Independent Research (PCB 6916) 0-3 credits**

*Prerequisite: Permission of instructor*

Directed independent research courses are designed for students conducting research with faculty in the College of Medicine, which allows documentation of these projects on their transcripts. *Grading: S/U*

### **Special Topics (PCB 6933) 1-8 credits**

*Prerequisite: Permission of instructor*

Topics of interest to students in Biomedical Science, such as clinical microbiology and protein misfolding and disease.

**Graduate Seminars (PCB 6934) 1-2 credits**

Graduate students will give one to two presentations on research papers or specific topics (1-2 credits).

*Grading: S/U*

**Master's Thesis (PCB 6971) 1-12 credits**

*Grading: S/U*

**Thesis-Related Research (PCB 6974) 2-3 credits**

*Prerequisite: Biomedical Science master's thesis students only*

This course is a vehicle allowing students to conduct research for their master's thesis prior to writing and defending their proposal.

**Developmental Neurobiology (PSB 6515) 3 credits**

*Prerequisites: PSY 1012 and PSB 3002*

In-depth coverage of the principles and recent advances in the development of the brain and nervous system, including nerve cell migration, axon outgrowth, specificity, plasticity, neurotrophism, nerve cell death and the influence of experience on the nervous system.

## COURSE DESCRIPTIONS

[Link to Christine E. Lynn College of Nursing Programs](#)

**Undergraduate Courses/** [link to graduate courses](#)

### Fundamentals of Nursing Practice 1 (NUR 3026C) 2 credits

*Prerequisites: Admission to B.S.N. program, BSC 2085, BSC 2085L, or equivalent, BSC 2086, BSC*

*2086L, or equivalent, MCB 2004. MCB 2004L, or equivalent*

*Corequisites: NUR 3065, NUR 3065L*

Course focuses on practical application of basic nursing skills using a scientific basis. This first course on fundamentals of nursing practice emphasizes beginning nursing skills through evidence-based, compassionate, culturally sensitive, ethical and safe practice principles.

### **Fundamentals of Nursing Practice 2 (NUR 3029C) 2 credits**

*Prerequisite: NUR 3026C*

*Corequisites: NUR 3262, NUR 3262L*

Focuses on practical application of complex nursing skills using a scientific basis. This second course on fundamentals of nursing practice emphasizes the expansion of nursing skills through evidence-based, culturally sensitive, ethical and safe practice principles.

### **Health Assessment in Nursing Situations (NUR 3065) 2 credits**

*Prerequisite: Admission to B.S.N. program, BSC 2085, BSC 2085L, or equivalent, BSC 2086, BSC 2086L, or equivalent*

*Corequisite: NUR 3065L*

Focus is on the process of conducting a holistic health assessment across the lifespan. Emphasis is on the attributes of compassionate care, relation centered care, and distinguishing between normal and abnormal clinical findings.

### **Health Assessment in Nursing Situations Lab (NUR 3065L) 1 credit**

*Prerequisite: Admission to B.S.N. program, BSC 2085, BSC 2085L, or equivalent, BSC 2086, BSC 2086L, or equivalent*

*Corequisite: NUR 3065*

Focuses on the systematic obtainment of a complete and accurate history, performing clinically relevant holistic health assessment of adults including modifications for infants, children, older adults and persons with special needs. Emphasizes the application of professional caring and ethical principles in conducting the health assessment. *Grading: S/U*

### **Foundations of Caring Science in Nursing Situations (NUR 3115) 3 credits**

Introduces nursing as a distinct discipline of knowledge and unique professional practice grounded in caring science. The evolution of the science and art of professional nursing as a discipline is examined. Emphasis is placed on introducing the student to caring science, as well as concepts of civility and inclusivity, as foundations for practice. Nursing's role in local, global, sociopolitical issues are also discussed.

### **Foundations of Nursing Practice (NUR 3119C ) 2 credits**

*Prerequisite: Admission to B.S.N. program, BSC 2085, BSC 2085L, BSC 2086, BSC 2086L, MCB 2004, MCB 2004L*

*Corequisites: NUR 3065, NUR 3065L*

Focuses on the study of the concepts and principles necessary to competently perform the technological skills and therapeutic interventions needed for professional nursing practice. Topics include knowledge, judgment, skills and professional values within a legal/ethical framework for nursing. Emphasis is on using multiple ways of knowing as an organizing framework and application of concepts and principles that are basic to an environment of safety. Developmental, genetic and environmental risk factors that affect healthcare are explored. Nursing situations and simulations are used to apply the concept of safe, quality care.

### **Pharmacotherapeutics (NUR 3145) 3 credits**

*Prerequisite: Admission to the B.S.N. program*

*Corequisite: NUR 4125*

Emphasizes the principles of pharmacotherapeutics in the treatment of illness and promotion of wellness across the lifespan. Identifies nursing implications in the safe administration and monitoring of the effects of pharmacotherapeutic agents. Focuses on the development of clinical reasoning skills in the application of drug therapy.

### **Creating Healing Environments (NUR 3171) 3 credits**

*Prerequisite: NUR 3115*

Focuses on the creation of healing environments from multiple perspectives. Emphasis is on self-care management and the design of environments that promote caring, health, wellness and healing and the development of self as a healing environment. The impact of architecture and technology on health and healing is explored. Environments and organizational structures that promote health equity and a culture of caring are included.

### **Food, Nutrition, and Health (NUR 3183) 3 credits**

Course examines the principles of human nutrition, including nutrient characteristics, digestion, absorption, metabolism, food sources, functions, requirements and interrelationships with other nutrients, health and diseases.

### **Chronic Care in Nursing Situations for Adults and Aging Populations (NUR 3262) 3 credits**

*Prerequisites: NUR 3026C, NUR 3029C, NUR 3065, NUR 3065L, NUR 3145 and NUR 4125*

*Corequisite: NUR 3262L, NUR 3029C*

Focuses on theoretical foundations of chronic health conditions among adults and aging populations.

Emphasis is placed on the concepts of health promotion, disease prevention, and maintenance of function throughout the life course. Uses best evidence to create caring environments that ensure quality and safety across settings. The nurse's role as a member of the interprofessional team in providing culturally appropriate health teaching, screening, and care transitions is explored.

### **Chronic Care in Nursing Situations for Adults and Aging Populations in Practice (NUR 3262L) 2 credits**

*Prerequisites: NUR 3026C, NUR 3065, NUR 3065L, NUR 3145, NUR 4125*

*Corequisites: NUR 3262, NUR 3029C*

Provides opportunities to use nursing knowledge and apply principles of wellness, health promotion, disease prevention and maintenance of function for adults, focusing on persons with chronic health conditions. Use of best evidence to promote and preserve wellness for persons and families living with chronic health conditions is core. Integrates principles of communication and information management. Emphasizes cultural differences in health teaching, screening and community referrals. *Grading: S/U*

### **Nursing Care of Children: Nursing Situations (NUR 3358) 3 credits**

*Prerequisites: NUR 3029C, NUR 3065, NUR 3065L, NUR 3115, NUR 3145 and NUR 4125*

*Corequisite: NUR 3358L*

Focuses on holistic and developmentally appropriate nursing care of children and their family members. Emphasizes understanding normal childhood development, common health challenges, and appropriate nursing care to promote well-being in children and families through compassionate caring. Explores how collaboration with persons, families and interprofessional teams creates quality outcomes and a culture of safety.

### **Nursing Care of Children: Nursing Situations in Practice (NUR 3358L) 1 credit**

*Prerequisites: NUR 3029C, NUR 3065, NUR 3065L, NUR 3115, NUR 3145 and NUR 4125*

*Corequisite: NUR 3358*

Integrates the study of caring science with concepts and theories of family, human growth and development, health promotion, risk reduction, and disease management for nursing situations with children and families. Examines developmental and cultural differences in health assessments, screenings, health teaching, and community referrals. Emphasizes collaboration with persons, families, and interprofessional teams to create quality outcomes and a safety culture.

### **Maternal Newborn: Nursing Situations (NUR 3455) 3 credits**

*Prerequisites: NUR 3029C, NUR 3065, NUR 3065L, NUR 3115, NUR 3145, NUR 4125*

*Corequisite: NUR 3455L*

Focuses on the study of caring science and the use of multiple ways of knowing in nursing situations

with childbearing women and newborns. Addresses health promotion, risk reduction, and disease management for nursing situations in childbearing women and newborns. Examines health assessments, screenings, health teaching using a holistic nursing approach. Describes collaboration with persons, families, and interprofessional teams to create quality outcomes and a safety culture.

**Maternal Newborn: Nursing Situations in Practice (NUR 3455L) 1 credit**

*Prerequisites: NUR 3029C, NUR 3065, NUR 3065L, NUR 3115, NUR 3145, NUR 4125*

*Corequisite: NUR 3455*

Integrates the study of caring science and the use of multiple ways of knowing in practicum situations with childbearing women and newborns. Implements health promotion, risk reduction and disease management in childbearing women and newborns. Conducts health assessments, screenings and health teaching using a holistic nursing approach. Collaborates with persons, families and interprofessional teams to create quality outcomes and a culture of safety.

**The Developing Family: Nursing Situations (NUR 3465) 4 credits**

*Prerequisites: NUR 3065, NUR 3065L, NUR 3115, NUR 3119C, NUR 4125 and NUR 3145*

*Corequisite: NUR 3465L*

Integrates the study of caring science with concepts and theories of family, human growth and development, health promotion, risk reduction and disease management for nursing situations with childbearing women, children and families. Examines evidence-based, age-appropriate communication strategies and nursing responses. Also examines developmental and cultural differences in health assessments, screenings, health teaching and community referrals. Emphasizes collaboration with persons, families and interprofessional teams to create quality outcomes and a culture of safety. Explores the nurse's role in advocacy for women, children and families on issues of equity in health policy and access to healthcare.

**The Developing Family: Nursing Situations in Practice (NUR 3465L) 2 credits**

*Prerequisites: NUR 3065, NUR 3065L, NUR 3115, NUR 3119C, NUR 4125 and NUR 3145*

*Corequisite: NUR 3465*

Integrates the study of caring science with concepts and theories of family, human growth and development, health promotion, risk reduction and disease management for nursing situations with childbearing women, children and families. Examines evidence-based, age-appropriate communication strategies and nursing responses. Also examines developmental and cultural differences in health assessments, screenings, health teaching and community referrals. Emphasizes collaboration with persons, families and interprofessional teams to create quality outcomes and a culture of safety. Explores the nurse's role in advocacy for women, children and families on issues of equity in health policy and access to healthcare. *Grading: S/U*

### **Professional Nursing Practice (NUR 3821) 2 credits**

Examines the professional identity of the nurse including accountability, perspective, collaborative disposition, and comportment, that reflects nursing's characteristics and values. Examines ethical principles related to nursing practice. Describes the development of the nurse as an individual who is resilient and capable of adapting to ambiguity and change.

### **Systems, Quality and Information Technology (NUR 4079) 3 credits**

*Prerequisite: NUR 3821*

Examines the role of the nurse in responding to complex systems of healthcare while employing established and emerging principles of safety and improvement science. Describes the use of informatic processes and technologies in the delivery of safe, highquality, and efficient healthcare services in accordance with best practices and professional and regulatory standards.

### **General Pathophysiology (NUR 4125) 3 credits**

*Prerequisites: BSC 2085 and BSC 2085L or equivalent, BSC 2086 and BSC 2086L or equivalent*

*Prerequisites or Corequisites: MCB 2004, CHM 2032 and CHM 2032L*

Focuses on the pathophysiology of human illness within a systems framework. Emphasis is on understanding pathophysiology as an alteration of normal subsystem physiological function altering health of the individual. Course concepts provide the basis for interpretation and analysis of signs and symptoms within a framework of health and disease. Presents selected pathophysiological nursing situation exemplars and the concepts to related conditions in diverse clients across the lifespan.

### **Nursing Research (NUR 4165) 3 credits**

*Prerequisites: STA 2023 or equivalent and admission to the B.S.N. program*

Explores the relationship between theory, research and practice. Examines fundamental principles of the research process, including ethical and cultural considerations. Students search and critically appraise nursing research studies.

### **Psychiatric and Mental Health: Nursing Situations Across the Lifespan (NUR 4525) 3 credits**

*Prerequisites: NUR 3029C, NUR 3065, NUR 3065L, NUR 3115, NUR 4125 and NUR 3145*

*Corequisite: NUR 4525L*

Integrates behavioral concepts and standards of practice to design person-centered care in psychiatric mental health nursing situations. Presents principles of communication as a foundation for developing caring relationships. Uses clinical reasoning and evidence-based practice to provide effective psychiatric-mental health nursing care.

### **Psychiatric and Mental Health: Nursing Situations in Practice (NUR 4525L) 1 credit**

*Prerequisites: NUR 3029C, NUR 3065, NUR 3065L, NUR 3115, NUR 3145 and NUR 4125*

*Corequisite: NUR 4525*

Presents principles of communication in developing caring, therapeutic relationships with persons in psychiatric settings, using mental health concepts and theoretical frameworks to examine coping behaviors in response to alterations in psychological functioning. Acute care and community-based experiences provide opportunities for students to participate in interprofessional team planning, interventions and therapeutic group meetings. *Grading: S/U*

### **Population Health: Nursing Situations (NUR 4638) 3 credits**

*Prerequisite: NUR 4125*

*Corequisite: NUR 4638L*

Emphasizes promoting the health and well-being of populations across the lifespan and continuum of care. Explores core public health functions, principles of epidemiology, cultural competency, social determinants of health, health promotion and disease and injury prevention through the nursing process. Focuses on disaster and emergency preparedness to protect population health.

### **Population Health Practicum: Nursing Situations (NUR 4638L) 1 credit**

*Prerequisite: NUR 4125*

*Corequisite: NUR 4638*

Provides clinical experience for nursing students in community and/or public health settings with an emphasis on population-focused nursing care across the lifespan and continuum of care. Emphasis is on using the nursing process to provide safe, effective, equitable, sociocultural and linguistically appropriate care to promote the health and well-being of families, communities, and populations.

### **Acute Care in Nursing Situations with Adults and Aging Populations (NUR 4716) 3 credits**

*Prerequisites: NUR 3262, NUR 3262L*

*Corequisite: NUR 4716L*

Focus is on the integration, translation, and application of nursing knowledge using multiple ways of knowing for adults and aging populations with acute alterations in health. Emphasis is on developing clinical judgment utilizing person-centered care and interprofessional teams to promote quality and safety across the four spheres of care.

### **Acute Care in Nursing Situations with Adults and Aging Populations in Practice (NUR 4716L) 2 credits**

*Prerequisites: NUR 3262, NUR 3262L*

*Corequisites: NUR 4716*

Focus is on the application, integration, and translation of nursing knowledge using multiple ways of

knowing for adults and aging populations experiencing acute alterations in health in this clinical practicum course. Emphasis is on the application of clinical reasoning and judgment in providing person-centered care with interprofessional teams to promote quality and safety. *Grading: S/U*

### **Management of Complex Care in Nursing Situations with Adults and Aging Populations (NUR 4764) 3 credits**

*Prerequisites: NUR 4716 and NUR 4716L*

*Corequisite: NUR 4764L*

Emphasis is placed on integrating advanced concepts, caring science, and evidence-based standards in complex nursing situations. Highlights the importance of nursing as a part of a multidisciplinary approach to adult patients with complex health problems.

### **Management of Complex Care in Nursing Situations with Adults and Aging Populations in Practice (NUR 4764L) 1 credit**

*Prerequisites: NUR 4716 and NUR 4716L*

*Corequisite: NUR 4764*

Emphasis is placed on advancing clinical reasoning by integrating complex concepts and foundational nursing knowledge, caring science, and evidence-based standards to design person-centered care in complex nursing situations. This clinical practicum enhances the role development of the student in forming collaborative relationships with patients, their families and the interprofessional team. Focuses on application of clinical reasoning and judgment in nursing responses that nurture the wholeness of persons to maximize outcomes and improve quality of life. *Grading: S/U*

### **Professional Development in Nursing 1: Ethical and Legal Perspectives of Caring (NUR 4824) 1 credit**

*Prerequisite: Admission to B.S.N. program*

Provides an introduction to the profession of nursing with emphasis on professional and personal accountability and theory-guided practice. Legal and ethical principles are examined and applied in nursing situations. Provides opportunities to establish personal and professional boundaries, examine individual beliefs and values and develop a personal philosophy of nursing emerging from the College of Nursing philosophy of caring.

### **Nursing Practice Immersion (NUR 4829L) 3 credits**

*Prerequisites: NUR 3358, NUR 3358L, NUR 3455, NUR 3455L, NUR 4716, NUR 4716L, NUR 4638, NUR 4525, NUR 4525L*

*Corequisites: NUR 4764 and NUR 4764L*

Provides a precepted integrative clinical practicum to synthesize competencies and skills required of

the entry level professional nurse. Focuses on integration of one's professional nursing identity within the organizational environment in which healthcare is delivered. Emphasizes principles of team dynamics, prioritization of patient care, gaining confidence in clinical reasoning and clinical judgment. This is an Academic Service Learning (ASL) course. *Grading: S/U*

### **Professional Development in Nursing 2: Designer of Caring Environments (NUR 4833) 1 credit**

*Prerequisite or Corequisite: NUR 4824*

Examines the professional identity of the nurse as an advocate and a member of the interdisciplinary team using concepts and theories of nursing, chaos and complexity, organizational design, QSEN and IPE competencies as foundations to quality care and patient safety. Explores caring models of leadership, teamwork, decision making and priority setting in nursing situations.

### **Professional Development in Nursing 3: Leader/Coordinator of Caring Environments (NUR 4860) 1 credit**

*Prerequisite: NUR 4833*

Examines the role of the nurse as leader and manager in creating a caring, healing environment in a unique sociopolitical, cultural, economic and technological atmosphere. Analyzes professional, organizational, historical and social factors influencing healthcare delivery within an evolving healthcare system. Emphasizes building cultures of quality and safety in complex healthcare delivery systems based on organizational strengths, using multiple strategies within environmental turbulence and change and managing fiscal resources for cost effectiveness. Provides interprofessional collaborative practice opportunities.

### **Professional Development in Nursing 4: Member of a Caring Profession (NUR 4861) 1 credit**

*Prerequisite or Corequisite: NUR 4860*

Discusses contemporary issues confronting the nursing profession. Investigates methods to advocate for patients and the profession. Explores the profession's impact on the dynamic evolution of healthcare. Emphasizes professional skills, such as portfolio development, interviewing, peer evaluation and the advancement of nursing's role. Also considers professional issues related to self-care of the nurse, such as work-life balance, healthy work environments and resource assistance in building a nursing career.

### **Directed Independent Study (NUR 4905) 1-3 credits**

*Prerequisite: Permission of department*

### **Directed Independent Research (NUR 4916) 0-3 credits**

This course is designed for students conducting undergraduate research with faculty. *Grading: S/U*

### **Special Topics (NUR 4930) 1-3 credits**

*Prerequisite: Permission of department*

This is an Academic Service Learning (ASL) course.

### **Honors Seminar in Nursing 1 (NUR 4934) 3 credits**

*Prerequisite: NUR 4165 with minimum grade of "C;" College of Nursing junior standing*

The first of three courses in the Honors in Nursing Program. The course focuses on building research skills required for scholarship, understanding how evidence and knowledge are developed, identifying gaps in the literature, formulating research questions and conducting ethical research.

### **Honors Seminar in Nursing 2 (NUR 4935) 3 credits**

*Prerequisite: NUR 4934 with minimum grade of "C;" College of Nursing junior standing*

The second of three courses in the Honors in Nursing program, this course builds upon the previous seminar and helps students design a research proposal.

### **RI: Honors Seminar in Nursing 3 (NUR 4936) 1-3 credits**

*Prerequisite: NUR 4935 with minimum grade of "C;" College of Nursing senior standing*

This third and final course in the honors in nursing program helps students conduct an approved independent research project under the direction of a faculty member. At the completion of the project, students submit a written paper and present the work in an oral or poster format. This is a research-intensive (RI) course.

### **RI: Scholarship for Evidence-Based Nursing Practice (NUR 4937) 3 credits**

*Prerequisites: For College of Nursing undergraduate students only*

This course prepares the B.S.N. student to identify issues, appraise and integrate evidence, and evaluate outcomes. The emphasis is on translation of current evidence into nursing practice. This is a research-intensive (RI) course.

## **Nursing Graduate Courses**

### **Advanced Health Assessment (NGR 6002) 2 credits**

*Prerequisites: NGR 6110, 6141; matriculated students only or permission of department*

Focuses on advanced assessment; history-taking; risk appraisal; health promotion; psychosocial, developmental, functional assessment and physical examination techniques. Emphasis is on diagnostic reasoning skills in assessing deviations from normal.

### **Advanced Health Assessment Lab (NGR 6002L) 1 credit**

*Prerequisites: NGR 6110, 6141*

*Corequisites: NGR 6002; matriculated students only*

Provides a lab experience for the study of advanced health assessment. It includes supervised experiences of advanced clinical assessment and physical diagnosis.

### **Advanced Concepts for Direct Care Nursing Situations (NGR 6006) 3 credits**

*Prerequisites: NGR 6141, NGR 6002, NGR 6002L, NGR 6172*

Explores how the advanced level of physiological concepts, assessment and pharmacology build a substantive knowledge base within their area of practice. Students apply advanced conceptual knowledge to their individual direct care focus in the nursing situations, i.e. adults, pediatrics, maternal/child, mental health or another specific care area.

### **Direct Care Focus Practicum (NGR 6006L) 3 credits**

*Prerequisites: NGR 6141, NGR 6002, NGR 6002L, NGR 6172*

*Prerequisite or c orequisite: NGR 6006*

Students apply conceptual knowledge within their individual direct care focus practice areas.

### **Advanced Nursing Practice Grounded in Caring (NGR 6110) 3 credits**

*Prerequisites: B.S.N. or permission of department*

Examines the philosophical and theoretical foundations of caring as the essential concept for nursing practice, research, administration and education. Major contributions to an understanding of caring from nursing as well as from humanities and science are surveyed. Emphasis on conceptualizations in nursing and philosophical literature. Students examine the implications of caring in relation to the use of multiple ways/patterns of knowing.

### **Advanced Pathophysiology (NGR 6141) 3 credits**

*Prerequisite: Undergraduate pathophysiology recommended*

Offers advanced study of human pathophysiology as it relates to the detection of disease and nurturing wholeness of individuals and families throughout the lifespan using nursing situations grounded in caring.

### **Foundations of Holistic Nursing 1: Advanced Nursing Situations (NGR 6168) 3 credits**

*Prerequisite: Permission of department*

The course advances the knowledge of historical, philosophical, and theoretical foundations of holistic nursing for practice and research. The focus is on the development of a foundation of a reflective nursing practice and incorporates caring for self as an essential component of advanced holistic nursing.

### **Foundations of Holistic Nursing 2: Advanced Nursing Situations (NGR 6169) 3 credits**

This course advances knowledge of contemporary views of healing and holistic nursing practice grounded in caring. An emphasis on holistic communication, therapeutic environments, nurse coaching and the body-mind-spirit connection supports a synthesis of knowledge of the foundations of practice. The focus is on refinement of reflective nursing practice and caring for self as foundational components of advanced holistic nursing.

### **Advanced Pharmacotherapeutics (NGR 6172) 3 credits**

*Prerequisite: Undergraduate pharmacology recommended, NGR 6141; matriculated students only or permission of department*

Builds on foundational knowledge of the use of pharmacotherapeutic agents including complementary and alternative therapies. Focuses on the major drug categories for physiological systems with indications, therapeutic and adverse effects and drug interactions in individuals across the lifespan in the promotion, maintenance and restoration of health. Personal, genetic and environmental practice considerations are addressed.

### **Advanced Pharmacotherapeutics 2 (NGR 6176) 3 credits**

*Prerequisite: NGR 6172*

This course builds on the principles of advanced pharmacotherapeutics and is designed to prepare advanced nursing practice students for their prescribing role as primary care providers. The focus is on the application of contemporary advanced drug knowledge and evidence-based decision making in the clinical setting for safe and effective prescribing across the life span.

### **Primary Care 1: Foundations of Advanced Nursing Practice (NGR 6200) 3 credits**

*Prerequisites: NGR 6002L, 6141, 6172, 6110, 6811*

*Corequisite: NGR 6200L*

Focuses on the foundational study of primary care across the lifespan using nursing situations in advanced practice grounding in caring science, including health promotion, disease prevention, assessment, diagnosis and management of common conditions in the primary care setting.

### **Primary Care 1 Practicum: Foundations of Advanced Nursing Practice (NGR 6200L) 2-3 credits**

*Prerequisites: NGR 6002L, 6141, 6172, 6110, 6811*

*Corequisite: NGR 6200*

Allows students to integrate the foundational concepts of primary care in the practice settings to diagnose and manage common conditions across the lifespan. Development of the advanced practice nursing role utilizes nursing situations grounded in caring science and includes health promotion, disease prevention, ethical- and evidenced-based practice.

### **Perspectives of Aging (NGR 6251) 3 credits**

*Prerequisite: Permission of department*

Emphasizes knowledge of the aging experience as a foundation to the advanced nursing practice of adult/gerontological nursing with culturally, ethnically and economically diverse groups of older adults, grounded in caring science. Includes history of gerontological nursing and an appreciation of the uniqueness and beauty of aging and social gerontology theories.

### **Developing Expertise in Holistic Healing: Advanced Nursing Situations (NGR 6296L) 3 credits**

*Prerequisites: NGR 6002 and NGR 6002L or permission of department*

*Corequisite: NGR 6168*

Course focuses on advanced holistic nursing with development of expertise in healing modalities grounded in caring. Emphasis is placed on reflective integration of mind-body practices, nurse coaching and other modalities to promote health and well-being.

### **Integrating Expertise in Holistic Practice: Advanced Nursing Situations (NGR 6297L) 3 credits**

*Prerequisite: NGR 6296L or permission of department*

Provides an opportunity to reflect and apply the student's knowledge and expertise in holistic nursing in preparation for professional practice. Emphasis is placed on developing a confident practice that answers uniquely to individual and group health and wellness needs. An evidence-based project is required.

### **Care of Children: Nursing Situations in Advance Practice (NGR 6301) 3 credits**

*Prerequisites: NGR 6141, NGR 6002, NGR 6200 and NGR 6200L*

Focuses on the care of children from infancy through adolescence using nursing situations in advanced practice including health promotion, disease prevention, health protection, assessment, diagnosis and management of health in the primary care setting. Emphasizes an appreciation of the wholeness and uniqueness of the individual and family in relation to psychosocial, cultural, spiritual, developmental and political issues affecting the health and well-being of children.

### **Women's Health: Nursing Situations in Advanced Practice (NGR 6342) 3 credits**

*Prerequisites: NGR 6141, NGR 6002, NGR 6200 and NGR 6200L*

Focuses on the care of women using nursing situations in advanced practice including health promotion, disease prevention, assessment, diagnosis and management of common female and reproductive conditions across the lifespan. An appreciation of the wholeness and uniqueness of the individual and family in relation to psychosocial, cultural, spiritual, developmental and political issues is incorporated into strategies to enhance the health and well-being of women.

**Psychopathological Disorders Across the Lifespan: Advanced Nursing Situations (NGR 6503) 3 credits**

*Prerequisites: NGR 6141, 6172*

*Prerequisites or Corequisites: NGR 6002, 6002L*

This course focuses on the advanced knowledge of psychopathology, assessment, diagnosis, differential diagnosis, prevalence and impact on the individual and family well-being across the lifespan.

**Psychiatric Mental Health Nursing Across the Lifespan: Role Synthesis in Advanced Nursing Practice (NGR 6505L) 4 credits**

*Prerequisites: NGR 6508, 6508L*

Role functions of psychiatric mental health nurse practitioners are synthesized to prepare students for certification, professional engagement and practice management of persons with common or complex mental disorders across the lifespan.

**Psychiatric Mental Health Nursing Across the Lifespan: Diagnosis and Medication Management in Advanced Nursing Practice (NGR 6507L) 2 credits**

*Prerequisites: NGR 6141, 6172*

*Corequisites: NGR 6002, NGR 6002L*

This course focuses on advanced knowledge of psychopathology, assessment, diagnosis, differential diagnosis, the introduction of psychiatric and mental health diagnoses in clinical practice, and management of psychiatric and mental health pharmacologic medications and non-pharmacological care in the practice setting.

**Psychiatric Mental Health Nursing Across the Lifespan: Group Therapy in Advanced Nursing Situations (NGR 6508) 3 credits**

*Prerequisites: NGR 6509, 6509L*

*Corequisite: NGR 6508L*

Emphasis is placed on the theoretical and conceptual models of group therapy management and treatment of adults children and families with mental health disorders across the lifespan.

**Psychiatric Mental Health Nursing Across the Lifespan Practicum 2: Group Therapy in Advanced Nursing Practice (NGR 6508L) 3 credits**

*Prerequisites: NGR 6509, 6509L*

*Corequisite: NGR 6508*

Theoretical and conceptual models of group therapy, pharmacological therapeutics and non-pharmacological care are applied in the treatment of adults, children and families.

**Psychiatric Mental Health Nursing Across the Lifespan: Individual and Family Therapy in Advanced Nursing Situations (NGR 6509) 3 credits**

*Prerequisites:* NGR 6538, 6503

*Corequisite:* NGR 6509L

Emphasis is on the theoretical and conceptual models of individual and family psychotherapy, pharmacological therapeutics and non-pharmacological care in treatment of adults, children and families across the lifespan.

**Psychiatric Mental Health Nursing Across the Lifespan Practicum 1: Individual and Family Therapy in Advanced Nursing Practice (NGR 6509L) 4 credits**

*Prerequisites:* NGR 6538, 6503

*Corequisite:* NGR 6509

In this course, mental health concepts are applied in the diagnosis of mental disorders. Individual and family psychotherapies, pharmacologic therapeutics and non-pharmacological care are used in the treatment of adults, children and families.

**Psychopharmacology Across the Lifespan for Advanced Nursing Practice (NGR 6538) 3 credits**

*Prerequisites:* NGR 6141, 6172

*Prerequisites or Corequisites:* NGR 6002, 6002L

This course addresses advanced concepts in neurobiology, pharmacokinetics, pharmacodynamics and psychopharmacologic treatment of individuals with psychiatric and mental disorders across the lifespan.

**Primary Care 2: Foundations of Advanced Nursing Practice (NGR 6605) 3 credits**

*Prerequisite:* NGR 6200

*Corequisite:* NGR 6605L

Focuses on the expanding study of primary care across the lifespan using nursing situations in advanced practice grounded in caring science, including health promotion, disease prevention, assessment, diagnosis and management of more complex conditions in the primary care setting.

**Primary Care 2 Practicum: Foundations of Advanced Nursing Practice (NGR 6605L) 4 credits**

*Prerequisite:* NGR 6200 and 6200L

*Corequisite:* NGR 6605

Allows students to integrate the foundational concepts of primary care in the practice setting to diagnose and manage common and complex conditions across the lifespan. Development of the advanced practice nursing role utilizes nursing situations grounded in caring science and includes health promotion, disease prevention, ethical- and evidenced-based practice.

### **Comprehensive Care of Adolescents through Older Adults (NGR 6607) 3 credits**

*Prerequisites: NGR 6605, permission of department*

*Corequisite: NGR 6607L*

Focuses on preparing AGNP students in the management of adolescents, adults and older adults and their families/caregivers in primary care settings across the continuum of care. Nursing situations grounded in caring are used to diagnose and manage complex health conditions. Prepares students for certification, practice management and professional engagement.

### **Comprehensive Care of Adolescents through Older Adults Practicum (NGR 6607L) 4 credits**

*Prerequisites: NGR 6605L, permission of department*

*Corequisite: NGR 6607*

Students prepare for comprehensive management of adolescents, adults and older adults and their families with specialized, complex health care in primary care settings across the continuum of care. Development of the advanced practice nursing role utilizes nursing situations grounded in caring science and includes health promotion, disease prevention and ethical- and evidence-based practice.

### **Primary Care of Families: Comprehensive Advanced Nursing Practice (NGR 6619) 3 credits**

*Prerequisites: NGR 6605, NGR 6605L*

*Corequisite: NGR 6619L*

Family nurse practitioner students prepare for comprehensive management of primary care patients across the lifespan. Nursing situations grounded in caring are used to diagnose and manage common and complex health conditions in a variety of health care settings. Prepares students for certification, practice management and professional engagement.

### **Primary Care of Families Practicum (NGR 6619L) 4 credits**

*Prerequisites: NGR 6605; NGR 6605L*

*Corequisite: NGR 6619*

Prepares family nurse practitioner students for comprehensive management of primary care patients across the lifespan. Nursing situations grounded in caring are used to diagnose and manage common and complex health conditions in a variety of health care settings. Prepares students for certification, practice management and professional engagement.

### **Integrated Holistic Health, Wellness and Nurse Coaching Practicum (NGR 6630L) 3 credits**

*Prerequisite: NGR 6168*

*Corequisite: NGR 6169*

Course focuses on integrating expertise in advanced holistic nursing, grounded in caring. Emphasis is placed on developing a reflective advanced holistic practice that integrates nurse coaching and an

awareness of other modalities in the development of a confident practice to promote the health and well-being of persons within a global, diverse society. An evidence-informed project is required.

### **Epidemiology for Advanced Nursing Practice (NGR 6673) 3 credits**

Examines the distribution and determinants of health and disease in human populations.

Epidemiological tools used in advanced nursing practice to improve health by altering personal, social and environmental risk factors are introduced. This is an Academic Service Learning (ASL) course.

### **Creative Teaching - Learning Methods in Nursing Education (NGR 6711) 3 credits**

*Prerequisite: NGR 6718*

Course focuses on creative teaching/learning strategies to foster knowledge development and critical reasoning within a caring student/faculty community. The creative design of teaching/learning modalities used in classroom-based, online and nursing practice environments are explored, critiqued, and practiced. Teaching/learning theories, design concepts, and evaluation criteria are studied and applied using an interactive approach to promote teaching excellence.

### **Curriculum Evolution and Models in Nursing Education (NGR 6713) 3 credits**

Examines the concept of caring-based nursing education as the central value and dominant construct of the discipline. Also projects the evolution of nursing education in higher education, the development and structure of the discipline in curriculum design, and the role of the nursing educator in academia historically and for the future.

### **Evaluation in Nursing Education (NGR 6718) 3 credits**

*Prerequisite: NGR 6713*

Course provides an examination of various assessment and evaluation strategies within the context of caring in nursing for use in program evaluation, admission, placement, progression, and graduation decisions in nursing education.

### **Financial Administration of Nursing Systems (NGR 6722) 3 credits**

*Prerequisite: Permission of department*

Introduces healthcare financial management, providing a foundation for application in a caring-based nursing leadership practice. Financial management principles are presented, including financial management framework, financial accounting, cost analysis, planning and control, financial resource decision-making, managing financial resources and future directions of nursing and financial management.

### **Advanced Nursing Administration Practicum 1 (NGR 6723L) 1-2 credits**

*Prerequisite: Permission of department*

Provides an opportunity to reflect upon and apply knowledge acquired in the core, cognate or concentration courses to administrative nursing practice within the health care delivery system. Students synthesize and apply knowledge grounded in caring and humanizing the health care system in a practice setting under supervision of a mentor.

### **Advanced Nursing Administration Practicum 2 (NGR 6724L) 1-4 credits**

*Prerequisites: Permission of department*

Provides an opportunity to reflect upon and apply knowledge acquired in the core, cognate or concentration courses to administrative nursing practice within the health care delivery system, with specific focus on varied practice settings. Students synthesize and apply knowledge grounded in caring and humanizing the health care system in a practice setting under supervision of a mentor. Students engage in systematic inquiry as a foundation for their nursing practice as an administrator.

### **Leadership in Nursing Administration: Advanced Nursing Situations (NGR 6725) 3 credits**

Explores and focuses on the components of nursing leadership situations within the health care delivery system. Students are given the opportunity to examine the concepts of leadership, behavior and culture of organizations and the impact of nursing leadership on the creation of caring environments in health care delivery systems.

### **Philosophical and Theoretical Foundations of Advanced Nursing Practice Roles (NGR 6811) 3 credits**

*Prerequisite: NGR 6110 or permission of department*

Focuses on the evolution of philosophical and theoretical foundations of nursing in nursing research and theory guided practice. Theory development and evaluation include an emphasis on middle range theories and their use in advanced nursing roles across multiple settings.

### **Nursing Research and Evidence-Based Practice (NGR 6812) 3 credits**

*Prerequisite: Undergraduate statistics and NGR 6811 or permission of department*

Emphasizes nursing research and the integration of theories, evidence, clinical judgment and interprofessional perspectives using translational processes to evaluate and enhance nursing practice and health care policy.

### **Quantitative Methods for Advancement of Health Sciences and Nursing Practice (NGR 6814) 3 credits**

*Prerequisite: Permission of department*

Builds on the basic statistical concepts and fundamental research strategies that apply to nursing research and practice. Students design clinical questions that investigate problems in nursing and health

systems evaluation.

### **Nursing Informatics (NGR 6871) 3 credits**

*Prerequisite: Permission of department*

Focuses on nursing informatics and the promotion, generation, management and processing of relevant data in order to use information and develop knowledge that supports nurses and the care of patients in all practice domains and nursing situations. Information technology and human caring factors that influence nursing informatics are addressed.

### **Leadership, Policy and Finance in Advanced Nursing Practice (NGR 6891) 3 credits**

Focuses on organizational and systems leadership. Financial structure quality and safety, informatics, healthcare technology and reform are examined. An emphasis is placed on the effects of nursing leadership grounded in caring on clinical outcomes and population health.

### **Influencing Health Care Policy Through Nursing: Advanced Nursing Situations (NGR 6892) 3 credits**

Examines issues and trends in the development and impact of policy on the health care delivery system. An emphasis is placed upon the process of legislative health policy and the role of professional nursing in influencing the policy-making process.

### **Directed Independent Study (NGR 6905) 1-4 credits**

*Prerequisites: Permission of department and faculty; requires proposal and contract*

Guided independent reading and research in advanced topics in nursing based on individual interests.

### **Special Topics (NGR 6930) 1-6 credits**

*Prerequisite: Permission of faculty/department*

The study of a special area of nursing. Topics will vary. Course may be repeated for credit. See end of course listing for possible topics. This is an Academic Service Learning (ASL) course.

### **Advanced Nursing Education Practicum (NGR 6944L) 1-3 credits**

*Corequisites: NGR 6711 or NGR 6713 or NGR 6718*

Integrates the pedagogy of teaching with theories of nursing through guided practice in classroom, online and practice settings. Activities focus on curriculum development, teaching/learning strategies and evaluation methods.

### **Nursing Project (NGR 6970) 1-6 credits**

*Prerequisites: NGR 6812; permission of department; contract with faculty committee; candidacy form required*

This course offers the opportunity for a scholarly endeavor to identify, develop, implement, and evaluate a nursing project that has evolved from nursing practice and is clearly grounded in nursing knowledge. More than three credits may be required to complete the project.

### **Thesis Research (NGR 6971) 1-6 credits**

*Prerequisites: NGR 6812; permission of department; contract with faculty committee; candidacy form required*

This course provides the opportunity for the student to design, implement, and complete a formal research investigation. Research proposals must involve authorization by the University Committee on Human Subjects and possibly other outside entities.

### **Evolution of Nursing as a Discipline and Practice (NGR 7111) 3 credits**

*Prerequisite: Admission to Ph.D. program or permission of department*

Analyzes the historical development of nursing as a discipline of knowledge and professional practice. Privileges and responsibilities of the nurse as scholar, practitioner, healer, and educator are examined.

### **Philosophies of Science Grounding Nursing (NGR 7115) 3 credits**

*Prerequisite: Admission to Ph.D. program*

Presents a critical analysis of different philosophical views of science that have shaped the history and development of the discipline and practice of nursing. Examines major philosophical paradigms as they relate to the art and science of nursing. The plurality of philosophies is necessary to reflect the many facets of nursing in relation to human science, critical science and feminist critique, complexity sciences, applied science, and practice science, which all will be discussed and debated.

### **Caring Science 1: An Essential Domain of Nursing Knowledge (NGR 7116) 3 credits**

*Prerequisite: Admission to Ph.D. program*

Advanced study of caring from ontological, epistemological, ontical and anthropological and praxis perspectives. Focus is on the theoretical grounding of phenomena in caring science.

### **Caring Science 2: Developing Phenomena of Interest within Research Focus Areas (NGR 7118) 3 credits**

*Prerequisites: NGR 7116, for Ph.D. students*

Course focuses on knowledge gaps in caring science related to phenomena of interest within the context of the four research areas: healthy aging across the lifespan, holistic health, health equity and transforming healthcare environments

### **Caring Science 3: Innovative Methodologies to Study Caring Science (NGR 7119) 3 credits**

*Prerequisites: NGR 7118, NGR 7815, NGR 7818, for Ph.D. students*

Evaluates and designs caring science-based approaches in nursing and team science. Develops expertise in applying innovative methodologies to study phenomena of interest within caring science.

### **Theory Development and Application in Nursing (NGR 7121) 3 credits**

*Prerequisite: Admission to Ph.D. program*

Explores patterns of knowing, theory development, and evaluation in the context of nursing knowledge guided by caring philosophy. Nursing theories are studied with emphasis on middle range theory as applied to practice and research. Concept analysis methods are introduced as a foundation for theory building and evaluation.

### **Theoretical Grounding for Caring-Based Practice ( NGR 7124) 3 credits**

*Prerequisite: Admission to D.N.P. program*

This course examines the philosophical and theoretical foundations of caring as essential for the Doctor of Nursing Practice (D.N.P.). Students explore insight into the human health experience as explicitly presented in grand, mid-range and practice theories. Students apply theory to guide D.N.P. practice and create innovative models of healthcare that are grounded in caring.

### **Population-Based Caring in Aging Societies (NGR 7661) 3 credits**

*Prerequisite: Epidemiology*

Course offers an in-depth study of population-based healthcare in an increasingly diverse aging society. Includes consideration and distribution determinants of health and illness as well as policy changes.

### **Population-Based Healthcare and Health Equity (NGR 7662C) 3 credits**

*Prerequisites: NGR 6673, NGR 7855*

This course offers an in-depth study of population-based health in an increasingly diverse society. Focus includes analyzing data to identify gaps in inequities in care and monitoring trends in outcomes for populations across the lifespan. Students develop plans to promote and protect the health of the most vulnerable populations, using culturally tailored organizational strategies to promote diversity, equity and inclusion and build equitable processes to promote health equity.

### **Crafting the Life of Scholarship (NGR 7709) 3 credits**

*Prerequisite: Admission to Ph.D. program or permission of department*

Prepares the doctoral student to integrate behaviors and attributes of "being scholarly" into a variety of career choices. Course explores the application of scholarly practices and outcomes to positions in academia, practice, organizations, government, and other settings.

### **Ethics and Public Policy for Promoting Health (NGR 7738) 3 credits**

*Prerequisites: Permission of department*

This course examines the intersectionality of nursing, individual, community and public policy with the goal of creating collaborative partnerships to influence policy related to contemporary health issues. Students apply knowledge of the processes to advocate for healthcare that honors human dignity and supports inclusivity and health equity in services at local, state, national and global levels. Students explore caring philosophies and theories to inform advanced nursing practice and impact public policy initiatives.

**Introduction to Practice Management: Advanced Nursing Practice (NGR 7767) 3 credits**

*Prerequisite: Permission of department*

This course provides a comprehensive overview of practice, business, finance and management principles necessary to establish and maintain a successful, compassionate clinical nursing practice.

**The Role of the Doctor of Nursing Practice as Scholar (NGR 7768) 3 credits**

*Prerequisites: NGR 7124, NGR 7855; admission to D.N.P. program*

This course examines the distinct practice scholarship role of the D.N.P. in improving health outcomes from the lens of caring. Emphasis on the history of nursing and healing, professional communication, optimal health environments, and the need for changes within a complex health care system.

**Healthcare Systems Leadership and Finance (NGR 7793) 3 credits**

*Prerequisite: Admission to D.N.P. program*

Course explores the structure and functions of healthcare delivery systems and healthcare financing with special consideration to the impact of an aging population. The role of the D.N.P. in creating caring environments through both organizational and systems policy changes are addressed throughout the course.

**Interprofessional Leadership in Healthcare (NGR 7795) 3 credits**

*Prerequisite: Admission to D.N.P. program*

This course explores the structure and functions of the U.S. healthcare delivery system. Particular emphasis is on the role of the Doctor of Nursing Practice (D.N.P.) in humanizing healthcare delivery systems, using theories and principles of leadership and impacting both organizational and systems policy changes. Historical and current policies are examined focusing on interprofessional collaboration, conflict management and leading teams.

**Qualitative Research Methods 1 (NGR 7815) 3 credits**

*Prerequisite: Admission to Ph.D. program or permission of department*

Overview of qualitative research methods used in the development of nursing knowledge. Research design, sampling, data collection, data analysis, criteria for rigor, and ethical issues are explored. The

philosophical, epistemological, ethical, and aesthetic foundations of qualitative research methods are examined.

### **Mixed Methods in Practice-Based Research (NGR 7816) 3 credits**

*Prerequisites: NGR 7815 and NGR 7818 or permission of instructor*

Focuses on examination of mixed methods approach for practice-based research encompassing the evolution of mixed methods, designs, rigor, data collection, analysis, interpretation and presentation of the results.

### **Qualitative Research Methods 2 (NGR 7817) 3 credits**

*Prerequisite: NGR 7815 or equivalent or permission of department*

Designed for nursing students and students in other disciplines to achieve an advanced level of expertise in selected qualitative approaches. Expected course outcome is a completed qualitative project.

### **Advanced Nursing Research: Applied Quantitative Design and Method (NGR 7818) 3 credits**

*Prerequisites: NGR 7846, NGR 7115, NGR 7116, NGR 7121, NGR 7932, NGR 7934*

Examines advanced experimental and non-experimental research methods including sampling, instrumentation, data collection and data analysis. Integrates interpretation of findings and application to nursing practice. Analyzes ethical issues related to research and research-based nursing practice.

### **Measurement in Practice-Based Research (NGR 7822) 3 credits**

*Prerequisite: NGR 7818 or permission of department*

Analysis of measurement strategies for practice-based research, encompassing selection, evaluation, and development of measures and instruments.

### **Evaluating Systems and Models of Care in Advanced Practice Nursing (NGR 7826) 3 credits**

*Prerequisite: Permission of department*

An examination of various program evaluation strategies for nursing models and systems of care. Phases of evaluation are included.

### **Applied Advanced Statistics (NGR 7845) 3 credits**

*Prerequisites: NGR 7815, NGR 7818*

Focuses on advanced statistical concepts and research strategies for knowledge development in the discipline of nursing and the health sciences with an emphasis on longitudinal analyses.

### **Essential Statistical Methods for Nursing Science (NGR 7846) 3 credits**

*Prerequisites: 6000-level statistics class and permission of department*

An interdisciplinary course focusing on advanced statistical concepts and research strategies for knowledge development in the discipline of nursing and health sciences. Advanced biostatistical analyses such as hierarchical linear modeling, logistic regression, survival analysis, repeated measures, ANOVA, MANOVA, MANCOVA and structural equation modeling will be included.

### **Research for Advanced Practice Nursing (NGR 7850) 3 credits**

*Prerequisite: Permission of department*

Application of research to support advanced nursing practice with aging and diverse populations and to support new models of care delivery using evidence-based practice.

### **Innovations in Inquiry (NGR 7853) 3 credits**

*Prerequisites: NGR 7815, NGR 7818, NGR 7822, NGR 7817*

This course explores innovative approaches to inquiry, including implementation science, community-based participatory research, mixed methods, and meta-analysis/synthesis. Additional information includes challenges of designing and conducting studies with innovative inquiry approaches and translation of research findings to enable adoption of evidence-based change.

### **Translation of Evidence for Advanced Practice Nursing (NGR 7855) 3 credits**

*Prerequisite: Admission to D.N.P. program*

This course prepares the D.N.P. student for scholarship and knowledge needed for translation into practice. Major outcomes of the course are the development of knowledge and skills needed to develop a clinical question, review, and synthesize the literature and statistical understanding for evidence-based practice. Caring science guides a selected practice improvement model toward development of the future D.N.P. project.

### **Caring, Informatics and Technology in Advanced Nursing Practice (NGR 7876) 3 credits**

*Prerequisite: Admission to D.N.P. program*

This course offers an in-depth study of nursing informatics and technology from a human caring perspective. Students use health information/technology to identify gaps and inform decision making to improve outcomes across all health systems.

### **Healthcare System Analysis and Quality Improvement (NGR 7895) 3 credits**

*Prerequisite: Admission to D.N.P. program*

This course provides an in-depth exploration into the science of improvement as a guide for quality initiatives in healthcare. Content areas include assessing organizations for gaps and deficiencies, methods for collecting and analyzing relevant data, and creating evidence-based strategies for positive change.

### **Directed Independent Study (NGR 7905) 1-3 credits**

*Prerequisite: Permission of advisor or dissertation chair*

Course provides opportunity for directed, independent, scholarly study with expert faculty in an area related to the student's focus of study.

### **Doctoral Seminar in Knowledge Development 1 (NGR 7932) 1 credit**

*Prerequisites: Admission to Ph.D. program or permission of department*

Introduces students to the role of doctoral scholar. Focuses on approaches to knowledge development through search, critique, and management of literature sources. *Grading: S/U*

### **Doctoral Seminar in Knowledge Development 2 (NGR 7934) 1 credit**

*Prerequisites: NGR 7932*

Critique and synthesize literature to identify gaps in disciplinary nursing knowledge and formulate a research question.

### **Doctoral Seminar in Knowledge Development 3 (NGR 7936) 1 credit**

*Prerequisites: NGR 7934*

Describe ethical research methods consistent with research questions and potential sources of funding. Plan for comprehensive examination.

### **Role Development: D.N.P. Seminar 1 (NGR 7941) 1 credit**

*Prerequisite: Admission to D.N.P. program*

Introduction to the Doctor of Nursing Practice (D.N.P.) role, including the history of nursing and healing, optimal health environments, the need for change in healthcare delivery, interprofessional collaboration and teamwork.

### **Integration of Cultural Concepts: D.N.P. Seminar 2 (NGR 7942C) 2-4 credits**

*Prerequisite: NGR 6110*

Explores cultural diversity issues and concepts and addresses health disparities to promote health equity for vulnerable populations, with special emphasis on aging across the lifespan.

### **Project Development: D.N.P. Seminar 3 (NGR 7943C) 1-3 credits**

*Prerequisites: NGR 7826 and NGR 7850*

Guides the student in the process of developing a D.N.P. project integrating the role of the D.N.P. in practice.

### **D.N.P. Project and Residency (NGR 7945C) 1-6 credits**

*Prerequisites: NGR 7943C and approval of the D.N.P. project proposal*

Course encompasses clinical practice components and completion of a final practice-based project. Projects will reflect the D.N.P. designing systems of care across the lifespan within a caring framework. In a designated practice setting, the program requires a minimum of 250 clinical hours across two semesters. Course will be repeated at least once to meet overall program requirements. This is an Academic Service Learning (ASL) course. *Grading: S/U*

### **Residency in Advanced Practice Nursing (NGR 7945L) 3 credits**

*Prerequisites: NGR 7943C and approval of D.N.P. project proposal*

This residency course provides a comprehensive practice experience to allow the learner to further synthesize and expand upon nursing knowledge, competency and caring science for advanced nursing practice at a high level of expertise. Learners begin implementation of the D.N.P. project in their area of specialization. This is an Academic Service Learning (ASL) course. *Grading: S/U*

### **Scholarship Practicum (NGR 7946) 3 credits**

*Prerequisites: NGR, 7815, NGR 7818*

Course emphasizes scholarship processes of discovery, application, teaching and integration that create the context for coursework, discussion and practicum.

### **Practicum for the Doctor of Nursing Practice (NGR 7947L) 1-3 credits**

*Prerequisites: NGR 7895; admission to D.N.P. program*

This practicum course provides a comprehensive experience for the student to further synthesize and expand upon caring science for advanced practice nursing. Students translate research into practice, link policy making with clinical systems and serve as change agents for health care. The student chooses an area of advanced practice nursing for clinical immersion. *Grading: S/U*

### **Doctor of Nursing Practice Proposal Development (NGR 7974) 3 credits**

*Prerequisites: NGR 7855, NGR 7895; admission to D.N.P. program*

This course guides the student in developing a D.N.P. project proposal to improve clinical practice and patient outcomes. The student collaborates with practice partners to create a project proposal addressing a particular situation/concern in the practice setting.

### **Project Implementation, Evaluation and Dissemination (NGR 7975C) 1-3 credits**

*Prerequisites: NGR 7974; admission to D.N.P. program*

This course encompasses the implementation, evaluation and dissemination of the student's final scholarly D.N.P. project. Projects reflect the D.N.P. student's designing systems of care within a caring framework in a designated practice setting. This course may be repeated until the project is completed.

*Grading: S/U*

### **Doctoral Synthesis (NGR 7978) 1-3 credits**

*Prerequisite: Successful completion of all required course work*

Offers the doctoral student the opportunity, with faculty support and supervision, to synthesize learning from prior courses in preparation for Doctoral Comprehensive Examinations. May be repeated once.

*Grading: S/U*

### **Advanced Research (NGR 7979) 1-3 credits**

*Prerequisite: Permission of dissertation chair*

Offers the doctoral student the opportunity, with faculty support and supervision, to prepare and defend the dissertation proposal. Course may be taken for more than one semester. May be repeated once.

Credits can count toward dissertation hours. Total credits will not exceed 6. *Grading: S/U*

### **Dissertation (NGR 7980) 1-15 credits**

*Prerequisites: NGR 7978, 7979*

Offers the doctoral student the opportunity, with faculty support and supervision, to complete and defend the dissertation. Minimum 15 credits for graduation, which may include up to 6 credits for NGR 7979. May be taken for more than one semester. *Grading: S/U*

## BIOLOGICAL SCIENCES

**Undergraduate Courses** /[link to graduate courses](#)

**\* Prerequisite courses must be completed with grades of "C-" or better.**

**\* Vascular Plant Anatomy (BOT 3223) 2 credits**

*Prerequisite: One year of general biology, including general botany; Corequisite: BOT 3223L*

A study of the origin, structure and function of the principal cells, tissues and organs of the vascular plants with emphasis on the angiosperms. Lecture and laboratory.

**Vascular Plants Lab (BOT 3223L) 2 credits**

*Corequisite: BOT 3223*

A laboratory examination of the major taxa of vascular plants.

**\* Principles of Plant Physiology (BOT 4503) 2 credits**

*Prerequisites: BSC 1010, BSC 1010L*

This course covers aspects of plant life involving growth, development, reproduction and interaction with the environment, with underlying principles in cell biology, biochemistry, biophysics, genetics, physiology, evolution and ecology.

**\* Plant Physiology Lab (BOT 4503L) 2 credits**

*Prerequisites: BSC 1010, BSC 1010L*

This course uses a series of lab exercises to study the principles of plant physiology, focusing on hands-on lab experience and learning of experimental design, research tools and methodology and scientific writing skills.

**\* Plant Cell Biology (BOT 4542) 3 credits**

*Prerequisites: BSC 1010, 1010L, 1011, 1011L*

This course covers the cell biological aspects established in plant anatomy, plant physiology, plant growth and development, plant taxonomy, plant biochemistry and plant molecular biology. Emphasis is on experimental approaches used to understand these processes at the molecular level. A discussion of model organisms and cell types is included.

**\* Plant Biotechnology (BOT 4734C) 3 credits**

*Prerequisite: BSC 1010 or BSC 1010L or permission of instructor*

Course provides materials to help students gain current knowledge of structure and function of plant genomes, genes, and gene products; to learn hands-on techniques of DNA-transfer-based plant biotechnology; and to train for a professional career in plant/agriculture biotechnology research.

**\* Prerequisite courses must be completed with grades of "C-" or better.**

**Life Science (BSC 1005) 2 credits**

This course applies the scientific method to critically examine and explain the natural world including but not limited to cells, organisms, genetics, evolution, ecology and behavior. This is a General Education course.

**\* Life Science Lab (BSC 1005L) 1 credit**

*Prerequisite or Corequisite: BSC 1005*

Laboratory investigation of biological knowledge relevant to social, economic, environmental and philosophical problems. This is a General Education course.

**\* RI: Life Science Lab (BSC 1005L) 1 credit**

*Prerequisite or Corequisite: BSC 1005*

Laboratory investigation of biological knowledge relevant to social, economic, environmental and philosophical problems. This is a General Education course. This course is research intensive (RI).

**Biological Principles (BSC 1010) 3 credits**

*Corequisite: BSC 1010L*

In this course students apply the scientific method to critically examine and explain the natural world.

This course covers molecular biology, cellular biology, genetics, metabolism and replication. This is a General Education course.

### **Biological Principles Lab (BSC 1010L) 1 credit**

*Corequisite: BSC 1010*

An introduction to general laboratory procedures to demonstrate the basic principle of biology. This is a General Education course.

### **Biodiversity (BSC 1011) 3 credits**

*Corequisite: BSC 1011L*

An introduction and survey of organismal diversity, including fungi, protists, plants and animals. Phylogenetic relationships, evolutionary mechanisms, and ecological processes are emphasized. Origins of life and human evolution. This is a General Education course.

### **Biodiversity Lab (BSC 1011L) 1 credit**

*Corequisite: BSC 1011*

A survey of the diversity of eukaryotic organisms. This is a General Education course.

### **Introduction to Biology at Florida Atlantic University (BSC 1019) 0 credits**

*Prerequisite: For Biology majors*

This course provides students with an introduction to the Biology major at Florida Atlantic University (FAU) and tools for success in the FAU Biology degree program. The course is for and about the student. It was developed to support students in identifying, accessing and navigating the numerous programs and opportunities that the FAU Biology Department offers its students as well as other FAU resources specific to student success in the discipline of biology.

### **University Honors Seminar in Biological Sciences (BSC 1930) 3 credits**

*Writing Across Curriculum (Gordon Rule)*

A seminar in the University Honors Program on topics in biological sciences.

\* Prerequisite courses must be completed with grades of "C-" or better.

### **Anatomy and Physiology 1 (BSC 2085) 3 credits**

This course is the first part of a two-semester sequence in which students examine human anatomy and physiology through a systems approach based on the interaction between form and function, from the microscopic components of cells and tissues to the organismal level. Emphasis is placed on histology and the integumentary, skeletal, muscular and nervous systems. This is a General Education course.

### **Anatomy and Physiology 1 Lab (BSC 2085L) 1 credit**

2432

Laboratory investigations to augment the content of BSC 2085. This is a General Education course.

**Anatomy and Physiology 2 (BSC 2086) 3 credits**

A study of the structure and functions of the following systems in the human body: cardiovascular, lymphatic, respiratory, digestive, urinary and reproductive.

**Anatomy and Physiology 2 Lab (BSC 2086L) 1 credit**

Laboratory investigations to augment the content of BSC 2086.

**Biology Study Abroad (BSC 2952) 1-6 credits**

*Prerequisites: Minimum 2.5 GPA or higher and permission from the Office of International Programs*

Biology credit for enrollment in an approved study abroad undergraduate program.

**\* Conservation Biology (BSC 3052) 3 credits**

*Prerequisites: BSC 1010, 1010L, 1011, 1011L*

A survey of the major concepts and current issues in conservation. Lectures address the value of biodiversity, the current state of biodiversity, threats to biodiversity and what has and can be done to stem the loss of biodiversity.

**\* Prerequisite courses must be completed with grades of "C-" or better.**

**Introduction to Biological Research (BSC 3453) 1 credit**

*Prerequisites: By application only and permission of instructor*

This course is the first course in the program called Biological Research. Students apply and are accepted to this program before being permitted to register for the course. The course introduces students to research in biological fields. It also facilitates the matching of students to research faculty by promoting seminars and trains the students in ethics and intellectual property of ideas.

**\* Biological Research Writing (BSC 3481) 2 credits**

*Prerequisite: BSC 3453*

This course is intended for undergraduates to experience lab research while working on their own independent project and presenting it in the form of a graded proposal and public presentation. This is NOT an honors-level course.

**Cooperative Education - Biology (BSC 3949) 1-3 credits**

*Grading: S/U*

**\* Molecular Genetics of Aging (BSC 4022) 3 credits**

*Prerequisite: BSC 1010 or BSC 1011*

An in-depth examination of current theories of aging, molecular pathways modulating aging and major discoveries about aging in mammals and in different model organisms, including yeast, *C. elegans*, *Drosophila* and mouse.

**Climate Change Biology: Ecosystems to Human Health (BSC 4307) 3 credits**

This course focuses on biological aspects of rapid climate change on biomes and human health (e.g., loss of biodiversity in tropical rainforests limit drug discovery opportunities). Loss of ecosystems is threatening important ecosystem services to people around the world and has behavioral and physiological impacts on humans, affecting their health and well-being. Adaptations/solutions to the climate change crisis are also discussed. The format is lecture, in-class discussions and student-led presentations.

**\* Laboratory Methods in Biotechnology (BSC 4403L) 3 credits**

*Prerequisites: MCB 3020, MCB 3020L, BCH 3033 and PCB 3063*

Course offers hands-on experience in some of the basic and essential lab skills required in molecular biology and biotechnology that are directly transferable to the workplace. Concepts behind designing and implementing controlled experiments involving manipulation of DNA, RNA and protein are discussed.

**\* Concepts in Bioinformatics (BSC 4434C) 3 credits**

*Prerequisites: PCB 3063; open to students in Biology, Bioengineering, Science/Engineering and Computer Science*

The course outlines concepts underlying the mining of the human genome, blending biology, medicine and engineering.

**\* Biology of Cancer (BSC 4806) 3 credits**

*Prerequisites: MCB 3020*

A consideration of chemical, viral and physical oncogenic agents; genetics and host factors; immunological response to neoplasia; chemotherapy.

**\* Prerequisite courses must be completed with grades of "C-" or better.**

**Directed Independent Study (BSC 4905) 1-3 credits**

*Prerequisite: Permission of instructor*

*Grading: S/U*

**Directed Independent Research in Biological Sciences (BSC 4910) 0-3 credits**

*Prerequisite: Permission of instructor*

The student works closely with a research mentor to conduct research and inquiry in biological sciences. The requirements for the course and the criteria for evaluation are agreed upon by the research mentor and the student. *Grading: S/U*

**Honors Research (BSC 4917) 3 credits**

*Prerequisites: BSC 4905 with minimum grade of "B," admission to Biology Honors Program and permission of instructor*

Supervised independent research for students in the Biology Honors program. Must earn an "A" to receive Biology Honors Distinction.

**Honors Thesis (BSC 4918) 3 credits**

*Prerequisite: BSC 4917 with minimum grade of "B"*

A continuation of research initiated in BSC 4917. Requires preparation of a written paper and presentation of results at a departmental seminar. Must earn an "A" to receive Biology Honors Distinction.

**Special Topics (BSC 4930) 1-3 credits**

Special topics of interest to biological sciences students.

**Seminar (BSC 4932) 1 credit**

A variable title seminar series in which students experience information exchange among professional scientists. This course offers a more informal, less intimidating environment to talk with faculty, graduate students and other researchers. Invited speakers are from various institutions allowing students to network regarding further schooling/jobs. *Grading: S/U*

**Honors Scientific Communication (BSC 4934) 1 credit**

*Prerequisite: Permission of instructor*

This is a course for students interested in scientific research. The students are introduced to various techniques and software important for data processing and presentation of their research data. The students learn to effectively present their research to the general public and to the scientific community in written form such as research proposals, conference presentations, seminars and publications.

**Biology Study Abroad (BSC 4957) 1-6 credits**

*Prerequisite: Minimum 2.5 GPA or higher*

Biology credit for enrollment in an approved study abroad undergraduate program.

**\* Prerequisite courses must be completed with grades of "C-" or better.**

**\* Critical Thinking in Environmental Science (EVS 4021) 3 credits**

*Prerequisites: EVR 2017 or PCB 3352 or permission of instructor*

An exploration of contemporary and emerging societal issues in environmental science, with an emphasis on seeking practical solutions to complex problems through reading, discussion, written critical analysis and practical research.

**Directed Independent Research in Environmental Science (EVS 4916) 0-3 credits**

*Prerequisite: For bachelor's degree students in Arts and Letters and Science*

The student works closely with a research mentor to conduct research and inquiry in environmental science. The requirements for the course and the criteria for evaluation are agreed upon by the research mentor and the student. *Grading: S/U*

**Culture of Aquatic Organisms (FAS 4403) 3 credits**

This course exposes students to the field of aquaculture (i.e., controlled cultivation of aquatic organisms) through lecture, discussion and assignments on topics such as culture requirements of aquatic species (mollusks, crustaceans, fish, seaweed), production systems and operation, disease diagnosis and biosecurity, nutrition, business feasibility and environmental issues.

**Artificial Intelligence Applications in Biology (IDS 4139) 3 credits**

[\(See Interdisciplinary Studies courses, this section\)](#)

**\* Microbiology for Health Services (MCB 2004) 3 credits**

*Prerequisites: BSC 1010 and BSC 1010L, or BSC 2085 and BSC 2085L, or BSC 2086 and BSC 2086L*

*Corequisite: MCB 2004*

Introduction to microbiology with emphasis on the role of microbiology in health services. Covers the progressions and control of bacterial infections. Not acceptable as a substitute for MCB 3020 or as biology elective credit for Biology majors.

**\* Microbiology for Health Services Lab (MCB 2004L) 1 credit**

*Prerequisites: BSC 1010 and BSC 1010L, or BSC 2085 and BSC 2085L, or BSC 2086 and BSC 2086L*

Introduction and demonstration of basic techniques in immunology, virology and bacteriology. Not acceptable as biology elective for Biology majors or as a substitute for MCB 3020L.

**\* General Microbiology (MCB 3020) 3 credits**

*Prerequisites: BSC 1010, BSC 1010L, BSC 1011, BSC 1011L, CHM 2045, CHM 2045L, CHM 2046, CHM 2046L*

A survey of microbiological concepts, microbial types and the use of microorganisms in medicine, agriculture and industry. Lecture.

**\* General Microbiology Lab (MCB 3020L) 1 credit**

*Prerequisites: BSC 1010, BSC 1010L, BSC 1011, BSC 1011L, CHM 2045, CHM 2045L, CHM 2046, CHM 2046L*

The application of fundamental techniques in the isolation, cultivation and identification of microorganisms. Laboratory.

**\* Medical Bacteriology (MCB 4203) 3 credits**

*Prerequisite: MCB 3020*

The classification and epidemiology of bacteria infecting humans. The role of host defenses in prevention and/or limitation of infection by these organisms and careful examination of the progression of the infections to the disease state. Lecture.

**Epidemiology of Infectious Diseases (MCB 4276) 3 credits**

This course examines the basic principles of epidemiology in the context of infectious diseases. Topics include the distribution and determinants of disease. Case studies from current literature supplement textbook material. The course places a strong emphasis on quantitative aspects of the field, including experimental design and basic statistics.

**\* Prerequisite courses must be completed with grades of "C-" or better.**

**\* Virology (MCB 4503) 3 credits**

*Prerequisites: MCB 3020, 3020L*

An in-depth examination of the physical and structural characteristics, and the methods of replication of mammalian viruses. Viral pathogenesis, immunology, antiviral therapy, transformation, prions, and a detailed examination of human pathogenic viruses.

**\* Microbial Ecology (MCB 4603) 3 credits**

*Prerequisites: 8 credits of general biology; 8 credits of general chemistry*

A study of factors influencing microorganisms in the environment and the influence of microorganism on the environment.

**\* Topics in Microbiology (MCB 4930) 1-4 credits**

*Prerequisites: 8 credits in microbiology; permission of instructor*

A detailed consideration of specialized areas in microbiology, including bacterial genetics, bacterial physiology and mycology. Lecture.

**\* Marine Biodiversity (OCB 4032) 3 credits**

*Prerequisites: CHM 2045, CHM 2045L, CHM 2046, CHM 2046L*

*Corequisite: OCB 4032L*

An overview of the diversity of marine algae, plants and animals, emphasizing the marine biota of Florida, with discussions of marine biodiversity issues.

**\* Marine Biodiversity Laboratory (OCB 4032L) 1 credit**

*Prerequisites: CHM 2045, CHM 2045L, CHM 2046, CHM 2046L*

*Corequisite: OCB 4032*

An overview of the diversity of marine algae, plants and animals, emphasizing the marine biota of Florida, with field trips to local habitats.

**\* Marine Biology (OCB 4043) 2 credits**

*Prerequisites: BSC 1010, BSC 1010L, BSC 1011, BSC 1011L and (ZOO 3205 and ZOO 3205L or PCB 4043)*

*Corequisite: OCB 4043L*

Discussions of the major concepts of modern marine biology with emphasis on life in subtropical and tropical seas.

**\* Marine Biology Field Studies and Laboratory (OCB 4043L) 2 credits**

*Prerequisites: BSC 1010, BSC 1010L, BSC 1011, BSC 1011L and (ZOO 3205 and ZOO 3205L or PCB 4043)*

*Corequisite: OCB 4043*

Field studies of the varied marine habitats of southern Florida: laboratories corresponding to field studies, field trips.

**\* Marine Microbiology and Molecular Biology (OCB 4525) 3 credits**

*Prerequisites: CHM 2045, CHM 2045L, CHM 2046, CHM 2046L*

*Corequisite: OCB 4525L*

An overview of microbiology and molecular biology in the context of marine ecosystems. The course covers diverse aspects of marine microbiology and molecular biology, including both fundamental concepts and specialized topics, such as symbiosis, extreme environments, and biotechnological applications.

**\* Marine Microbiology and Molecular Biology Laboratory (OCB 4525L) 3 credits**

*Prerequisites: CHM 2045, CHM 2045L, CHM 2046, CHM 2046L-*

*Corequisite: OCB 4525*

An overview of microbiology and molecular biology techniques in the context of marine ecosystems.

Three hours of lab every week.

**\* Prerequisite courses must be completed with grades of "C-" or better.**

**\* Marine Ecology (OCB 4633) 3 credits**

*Prerequisites: CHM 2045, CHM 2045L, CHM 2046, CHM 2046L*

*Corequisite: OCB 4633L*

Basic and advanced concepts of marine ecology, including the history of the field, population dynamics in marine systems and the internal and external mechanisms that control marine populations. The final third of the class is an overview of the major marine ecosystems of the world.

**\* Marine Ecology Laboratory (OCB 4633L) 1 credit**

*Prerequisites: CHM 2045, CHM 2045L, CHM 2046, CHM 2046L*

*Corequisite: OCB 4633*

A hands-on laboratory course focusing on the ecology of marine organisms. Field sampling trips to local habitats complement laboratory-based activities. Six hours of lab every two weeks.

**\* Marine Science (OCE 4006) 3 credits**

*Prerequisites: CHM 2045, CHM 2045L, CHM 2046, CHM 2046L*

An introduction to geological, chemical and physical oceanography.

**\* Genetics (PCB 3063) 4 credits**

*Prerequisites: BSC 1010 and CHM 2045*

An in-depth analysis of the mechanisms that operate in transmission genetics and an introduction to eucaryotic molecular genetics.

**\* Cell Biology (PCB 3023) 3 credits**

*Prerequisites: BSC 1010, CHM 2045*

Genetics at the molecular level as related to gene structure, function, variation and control with a comprehensive treatment of plant and animal cell structure and function. Basic concepts of cell physiology are treated.

**Issues in Human Ecology (PCB 3352) 3 credits**

A discussion and analysis of the major environmental issues confronting modern humans, with emphasis on southern Florida.

**\* Evolution (PCB 3674) 3 credits**

*Prerequisite: BSC 1010*

An in-depth examination of the mechanisms that operate in the evolutionary process.

**\* Human Morphology and Function 1 (PCB 3703) 3 credits**

*Prerequisites: BSC 1010, 1010L, 1011, 1011L, CHM 2210, 2211; Corequisite: PCB 3703L*

Normal structure and physiology of the human skeletal, muscle, and nervous systems. Lecture format. Designed for the preprofessional student planning admission into a graduate clinical program.

**\* Human Morphology and Function 1 Laboratory (PCB 3703L) 1 credit**

*Prerequisites: BSC 1010, 1010L, 1011, 1011L, CHM 2210, 2211; Corequisite: PCB 3703*

Laboratory exercises illustrating principles presented in PCB 3703, considering the anatomy and physiology of the human skeletal, muscle, and nervous systems. Designed for the preprofessional student planning admission into graduate clinical programs.

**\* Prerequisite courses must be completed with grades of "C-" or better.**

**\* Human Morphology and Function 2 (PCB 3704) 3 credits**

*Prerequisites: BSC 1010, 1010L, 1011, 1011L, CHM 2210, 2211; Corequisite: PCB 3704L*

Normal structure and physiology of the human cardiovascular, renal, respiratory, gastrointestinal, endocrine, and reproductive systems. Lecture format. Designed for the preprofessional student planning admission into graduate clinical programs.

**\* Human Morphology and Function 2 Laboratory (PCB 3704L) 1 credit**

*Prerequisites: BSC 1010, 1010L, 1011, 1011L, CHM 2210, 2211; Corequisite: PCB 3704*

Laboratory exercises illustrating principles presented in PCB 3704, considering anatomy and physiology of the human cardiovascular, renal, respiratory, gastrointestinal, endocrine, and reproductive systems. Designed for the preprofessional student planning admission into graduate clinical programs.

**\* Principles of Ecology (PCB 4043) 3 credits**

*Prerequisites: BSC 1010, 1010L, 1011, 1011L, CHM 2045*

A functional approach to the basic principles and concepts of modern ecology. Lecture and field trips.

**\* Genetics Lab (PCB 4067L) 3 credits**

*Prerequisites: Students must have already taken BSC 1010 and 1011. While it is preferable to have also completed PCB 3063, qualified students currently enrolled in Genetics will be considered (please contact instructors)*

This laboratory course is open to advanced undergraduates and graduate students. Students gain significant experience in classical and molecular genetics using two powerful model systems, the

roundworm *Caenorhabditis elegans* and fruit fly *Drosophila melanogaster*. Experiments are performed to identify morphological and behavioral mutant phenotypes, investigate gene linkage and crossing over, establish dominant versus recessive and sex-linked versus autosomal inheritance, and generate genetic maps.

**\* Immunology (PCB 4233) 3 credits**

*Prerequisites: MCB 3020, 3020L*

The tissues, cells and biochemical components of the immune system, and the role of immune responses in the diagnosis and prevention of disease. Lecture.

**\* Freshwater Ecology (PCB 4301) 3 credits**

*Prerequisites: BSC 1010, 1010L, 1011, 1011L, CHM 2045, 2045L, 2046, 2046L*

*Corequisite: PCB 4301L*

A survey of the diversity, functions, environmental stressors and restoration of freshwater ecosystems, including groundwater, wetlands, lakes and rivers. Extra emphasis is placed on Florida freshwater ecosystems.

**\* Freshwater Ecology Lab (PCB 4301L) 1 credit**

*Prerequisites: BSC 1010, BSC 1010L, BSC 1011, BSC 1011L, CHM 2045, CHM 2045L, CHM 2046, CHM 2046L*

*Corequisite: PCB 4301*

A hands-on field course focused on the ecology and biodiversity of various freshwater ecosystems. Field trips emphasize functions of ecosystems, species identification and quantitative differences between environments.

**\* Prerequisite courses must be completed with grades of "C-" or better.**

**\* Molecular Genetics (PCB 4522) 3 credits**

*Prerequisite: PCB 3063 with minimum grade of "C"*

The genetic control and molecular basis of gene expression.

**\* Genes and Development (PCB 4594) 3 credits**

*Prerequisites: BSC 1010, 1010L, 1011, 1011L*

Introduction to cellular and molecular mechanisms that underlie organismal development including differential gene regulation, pattern formation, animal stem cells and cloning, sex determination and developmental disorders.

**\* Comparative Animal Physiology (PCB 4723) 3 credits**

*Prerequisites: BSC 1010, BSC 1010L, BSC 1011, BSC 1011L, CHM 2045, CHM 2045L, CHM 2046, CHM 2046L, CHM 2210, CHM 2211*

A comparison among vertebrates of major physiological systems; nerve, muscle, respiration, circulation, osmoregulation, excretion, temperature regulation and energy metabolism.

**\* Comparative Animal Physiology Lab (PCB 4723L) 1 credit**

*Prerequisites: BSC 1010, BSC 1010L, BSC 1011, BSC 1011L, CHM 2045, CHM 2045L, CHM 2046, CHM 2046L, CHM 2210, CHM 2211*

*Corequisite: PCB 4723*

Laboratory experiments designed to explore fundamental physiological processes.

**\* RI: Neurophysiology (PCB 4832C) 3 credits**

*Prerequisites: BSC 1010, BSC 1010L and permission of instructor*

Students learn neurophysiological signaling at the cellular level and whole animal by using wet laboratory experiences supplemented with lectures. The course examines signaling from the perspective of the electrical properties of neurons and their signaling, the basis for all neuronal function. Students learn through both theory and practical laboratory experiences and then translate their findings into modular reports. This is a research-intensive (RI) course.

**Cellular Neuroscience and Disease (PCB 4842) 3 credits**

*Prerequisite: PCB 3023 or PCB 3063 with minimum grade of "B-"*

The course focuses on the cellular aspects of human neurological diseases and disorders. Lectures provide the basic knowledge about common cellular and molecular mechanisms, principles and pathways relevant to neuronal processes and neurological diseases.

**Practical Cell Neuroscience (PCB 4843C) 3 credits**

*Prerequisites: PCB 3063 with minimum grade of "B-"*

This course focuses on understanding neurophysiological signaling at the cellular level. It looks at signaling from the perspective of single ion channels to cellular synaptic transmission. Students learn through both theory and practical laboratory experiments and apply these principles in an experimental proposal that they present and execute, resulting in a final report.

**Genes, Neurons and Behavior (PCB 4852) 3 credits**

This course is designed for students to understand the neural basis of behavior at the single neuron level. Students read original research papers that use the most up-to-date methods in genetics, electrophysiology and behavior in a field now called "optogenetics." The objective of the course is to integrate students' work in related courses (such as Comparative Animal Behavior, Biological Basis of

Behavior, Genetics or Neuroscience) to gain an in-depth understanding of the field of neuroscience and behavior. The course includes neural simulations (run on Biology computers) designed to enhance an understanding of neuron function. This course also introduces students to the laboratories doing modern research in this field on the various FAU campuses. In some instances, it will lead students toward graduate programs at FAU and elsewhere in the United States.

**\* Prerequisite courses must be completed with grades of "C-" or better.**

### **Honors Advanced Cell Imaging for Neuroscientists (PCB 4933C) 1 credit**

*Prerequisite: Permission of instructor*

This is an intensive, four-day minimester in light microscopy for students participating in the FAU Max Planck Honors Program (MPHP). The course provides an introduction to practical imaging applications in cellular neuroscience that employ fluorescence and laser scanning. *Grading: S/U*

### **Honors Advanced Genetics (PCB 4935) 1 credit**

*Prerequisite: Permission of instructor*

Detailed study of molecular control of genetic processes including gene expression, development and optogenetics, and a review of historical and current genetic research methods.

### **Honors Advanced Physiology (PCB 4937C) 1 credit**

*Prerequisite: Permission of instructor*

This course is designed for the preprofessional student planning admission into graduate clinical programs. The course consists of laboratory investigations illustrating the structure and physiology of the human body, including cardiovascular, renal, respiratory, gastrointestinal, endocrine and reproductive systems.

### **Honors Advanced Scientific Grant Writing (PCB 4956) 1 credit**

*Prerequisite: Permission of instructor*

Students are introduced to content, techniques and software important in the preparation and submission of neuroscience grant proposals to the National Science Foundation and the National Institutes for Health.

### **Honors Introduction to Neuroscience Research (PSB 4003) 1 credit**

*Prerequisite: Permission of instructor*

This course is designed to introduce incoming FAU Max Planck Honors Program (MPHP) participants to the Program. Students are introduced to neuroscience faculty and build an intellectual community with peer MPHP participants. Specific programmatic responsibilities that undergraduates typically do not encounter are emphasized as are analysis, synthesis and evaluation of information-components

fundamental to eventual successful fulfillment of the research requirements associated with MPHP completion.

### **Honors Advanced Life Science Technologies (PSB 4110) 1 credit**

*Prerequisite: Permission of Instructor*

Students are exposed to current and historic research technologies using specialized instrumentation, including advanced light microscopy, electron microscopy, CRISPR-Cas9 and more. Students learn how data are collected and analyzed using the various techniques.

### **Honors Advanced Techniques in Neuroscience (PSB 4112C) 1 credit**

*Prerequisite: Permission of instructor*

Students receive hands-on training in the application of current neuroscience research techniques using specialized instrumentation. Students learn to both generate and analyze data. *Grading: S/U*

### **FAU Max Planck Honors Capstone (PSB 4902) 1-3 credits**

*Prerequisite: Permission of instructor*

Directed research in which the student develops a significant deliverable that enhances public education in neuroscience (such as computational models or simulations or the development and hosting of an event). The deliverable should demonstrate a synthesis of the whole of the neuroscience content to which the student has been exposed via the FAU Max Planck Honors Program with an emphasis on community outreach. *Grading S/U*

### **Honors Mentored Research (PSB 4910) 1-3 credits**

*Prerequisite: Permission of instructor*

Directed research in which the student works closely with a faculty mentor to conduct research and inquiry in neuroscience toward completion of a scientific grant proposal, a scientific seminar presentation or poster and a scientific journal article. *Grading: S/U*

**\* Prerequisite courses must be completed with grades of "C-" or better.**

### **Honors Directed Independent Research (PSB 4916) 0-3 credits**

*Prerequisite: Permission of instructor*

The student works closely with a research mentor to conduct research and inquiry in neuroscience. The requirements for the course and the criteria for evaluation are agreed upon by the research mentor and the student in alignment with the requirements of the FAU Max Planck Honors Program. *Grading: S/U*

### **Honors Symposium Presentation (PSB 4922) 1 credit**

*Prerequisite: Permission of instructor*

This is a guided independent study course individualized for each student. Students receive supervised study of research opportunities in neuroscience and attend the Max Planck Florida Institute for Neuroscience's Symposium Research Conference. *Grading: S/U*

### **Honors Special Topics in Neuroscience (PSB 4931) 1-3 credits**

*Prerequisite: Permission of instructor*

Special topics in neuroscience of interest to FAU Max Planck Honors program participants.

### **Max Planck Honors Seminar (PSB 4932) 1 credit**

*Prerequisite: Permission of instructor*

The FAU Max Planck Honors Program (MPHP) seminar is a seminar series with distinguished speakers from outside and inside the Max Planck Florida Institute (MPFI) for Neuroscience. *Grading: S/U*

### **Honors Journal Club in Neuroscience (PSB 4951) 1 credit**

*Prerequisite: Permission of instructor*

Students learn to read, select, present and discuss recently published articles on relevant topics in neuroscience in a journal club format. *Grading: S/U*

### **FAU Max Planck Honors Thesis (PSB 4970) 1-3 credits**

*Prerequisite: Permission of instructor*

Directed research in which the student works closely with a faculty mentor to conduct research and inquiry in neuroscience toward completion of a written honors thesis. The requirements for the course and the criteria for evaluation are agreed upon by the research mentor and the student in alignment with requirements of the FAU Max Planck Honors Program. *Grading: S/U*

### **\* Invertebrate Zoology (ZOO 3205) 3 credits**

*Prerequisites: 8 credits in general biology*

*Corequisite: ZOO 3205L*

A survey of the invertebrate phyla from the Protozoa through the lower Chordate stressing comparative aspects of morphology and development as well as phylogenetic aspects and ecology.

### **Invertebrate Zoology Lab (ZOO 3205L) 2 credits**

*Prerequisites: 8 credits in general biology*

*Corequisite: ZOO 3205*

Laboratory studies of the structure and diversity of invertebrate organisms.

### **Introduction to Animal Locomotion (ZOO 4373) 3 credits**

*Prerequisites: BSC 1010, BSC 1011 with minimum grades of "C"*

This course explores animal movement over a range of species and environments. It explores modes of locomotion taking into account anatomy and mechanics of both skeletal and muscular systems and the media through which an animal moves. Topics are presented through lecture material and readings from the primary literature and text.

**\* Ornithology (ZOO 4472) 2 credits**

*Prerequisite: 8 credits of biology*

*Corequisite: ZOO 4472L*

The study of the anatomy, physiology, taxonomy, evolution, ecology and special adaptations of birds. Lecture.

**Ornithology Laboratory (ZOO 4472L) 2 credits**

*Corequisite: ZOO 4472*

Laboratory and field study of birds. Also includes field identification of major groups of birds. Laboratory and field study.

**\* Prerequisite courses must be completed with grades of "C-" or better.**

**Vertebrate Structure Development and Evolution (ZOO 4690) 3 credits**

*Prerequisite: BSC 1010, BSC 1010L, BSC 1011, BSC 1011L with minimum grades of "C"*

*Corequisite: ZOO 4690L*

Course covers phylogeny and diversity of vertebrate structures, along with their development through organogenesis, differentiation and growth lead to an understanding of the relationships and functioning of living organisms. Key events in vertebrate evolution are discussed.

**Vertebrate Structure and Development Laboratory (ZOO 4690L) 2 credits**

*Prerequisites: BSC 1010, BSC 1010L, BSC 1011, BSC 1011L with minimum grades of "C"*

*Corequisite: ZOO 4690*

Laboratory emphasis is on the diversity, development, form and function of vertebrate structures. Study of vertebrates includes major developmental stages, skeletal preparations, dissection of preserved specimens and demonstrations to integrate understanding of vertebrate form.

**\* Principles of Human Neuroanatomy (ZOO 4742) 3 credits**

*Prerequisites: BSC 1010, BSC 1010L, BSC 1011, BSC 1011L*

This course focuses on the basic structural components and interconnections of the human brain, spinal cord and peripheral nervous system at the level of functional circuits. A discussion of diseases and injuries that disrupt the morphological integrity of the human nervous system is included.

## **Biological Sciences Graduate Courses**

### **Flora of South Florida (BOT 5155) 2 credits**

*Prerequisites: BOT 3223, 3223L, or the equivalent, or permission of instructor*

*Corequisite: BOT 5155L*

A study of the major plant associations existing in southern Florida, their positions in the ecology of the region, and the history of their relationships to the temperate and tropical floras.

### **Flora of South Florida Laboratory (BOT 5155L) 2 credits**

*Corequisite: BOT 5155*

An examination of the plants and plant associations in southern Florida, including laboratory and field trips.

### **Advanced Plant Cell Biology (BOT 5582) 3 credits**

This course covers cell and molecular biology using experimental approaches, including discussion of model organisms.

### **Plant Ecology (BOT 6159C) 4 credits**

An introduction to the fundamentals of plant ecology, the major ecosystems of South Florida and the ecology of their characteristic vegetation. The ecology of plants is examined at four basic levels of organization: the individual plant, plant populations, plant communities and ecosystems.

### **Advanced Plant Physiology (BOT 6506) 2 credits**

*Prerequisite: Graduate standing or permission of instructor*

A study of plant life involving growth, development, reproduction (flowering), and interaction with the environment. A detailed discussion of the related principles in cellular biology, biochemistry, molecular biology, evolution biology and ecology and of research tools/methodology.

### **Advanced Plant Physiology Lab (BOT 6506L) 2 credits**

*Prerequisite: Graduate standing or permission of instructor*

This course uses a series of lab exercises to help students better understand the principles of plant physiology. It emphasizes hands-on training in experimental skills and learning of experiment design, research tools and methodology.

### **Advanced Plant Biotechnology (BOT 6735C) 3 credits**

*Prerequisite: Graduate standing or permission of instructor*

This course combines lectures and labs. Each student has his/her own research project. This course

provides materials and training to help students gain current knowledge of structure and function of plant genomes, genes and gene products, to learn hands-on techniques of DNA-transfer-based plant biotechnology and to prepare for a professional career in plant/agriculture biotechnology research

### **Special Topics (BSC 5931) 1-4 credits**

#### **Marine Conservation Biology (BSC 6316) 3 credits**

*Prerequisites: For graduate Biological Sciences, Environmental Sciences or Integrative Biology majors or permission of instructor*

Marine conservation biology is an emerging discipline that draws together the fundamentals of biology, marine science, conservation and management, ethics and policy. Students gather and integrate information from diverse areas to understand threats to marine biodiversity and use contemporary techniques to address marine conservation problems.

#### **Advances in Finfish Aquaculture (BSC 6342) 3 credits**

*Prerequisite: Culture of Marine Organisms or permission of instructor*

Explores issues affecting finfish aquaculture for food production and fisheries stock enhancement worldwide. Topics include sustainability, new and historic methods for fish culture and issues and controversies faced by finfish aquaculturists.

#### **Integrative Biology 1 (BSC 6390) 3 credits**

*Prerequisite: Admission to Integrative Biology Ph.D. program or permission of instructor*

Through lectures, readings, journal club, classroom discussions, and student papers, course explores the idea of integrative biology and connectivity in biological systems.

#### **Laboratory Methods in Biotechnology (BSC 6408L) 3 credits**

*Prerequisite: Permission of instructor*

This lab course provides students with hands-on experience in some of the basic, but essential lab skills required in molecular biology and biotechnology that are directly transferable to the workplace. Emphasis is on understanding the concepts behind designing and implementing controlled experiments. These techniques involve manipulation of DNA, RNA and protein.

#### **Practical Cell Neuroscience (BSC 6417C ) 3 credits**

*Prerequisite: Graduate standing*

This course brings the students closer to understanding neurophysiological signaling at the cellular level, where only a few cells communicate in close proximity. The course looks at signaling from the perspective of single ion channels to cellular synaptic transmission. The electrical properties of neurons and their signaling are the basis for all neuronal function. The students learn these principles through

both theory and practical laboratory and apply them in an experimental proposal, which they present and then execute resulting in a final report.

### **Computer Graphics for Biologists (BSC 6455) 3 credits**

*Prerequisite: Graduate standing or permission of instructor*

This hands-on course introduces students to how computer graphics are used in biological sciences for illustration, data extraction and presentation. Each class will integrate formal lecture sessions with hands-on application at a computer.

### **Bioinformatics (BSC 6458C) 4 credits**

*Prerequisite: Permission of instructor*

A practical approach to accessing nucleic/protein databases, management of databases, identification of genes, and electronic expression profiling.

### **Scientific Communication (BSC 6846) 3 credits**

*Prerequisite: Permission of instructor*

Introduces students interested in scientific research to various techniques and software important for data processing and presentation of research data. Students learn to effectively present research to the general public and to the scientific community in written form, such as research proposals, conference presentations, seminars and publications.

### **Directed Independent Study (BSC 6905) 1-3 credits**

*Grading: S/U*

### **Integrative Biology Ph.D. Lab Rotation (BSC 6913) 1-9 credits**

*Prerequisite: Permission of instructor*

A lab rotation aids the student in making a well-informed choice of lab and supervisor for their dissertation research without a long-term commitment. It allows the student to be exposed to a range of science and networking opportunities within the program. The student participates in all lab activities, like any other lab member. The student may be assigned to work with another student/postdoctoral fellow in the lab or take on a simple project achievable within the rotation period. *Grading: S/U*

### **Directed Independent Research in Biological Sciences (BSC 6917) 0-3 credits**

*Prerequisite: Permission of instructor*

The student works closely with a research mentor to conduct research and inquiry in Biological Sciences. The requirements for the course and the criteria for evaluation are agreed upon by the research mentor and the student. *Grading: S/U*

### **Seminar (BSC 6935) 1 credit**

*Grading: S/U*

### **Special Topics (BSC 6936) 1-4 credits**

#### **Ecology Research Seminar (BSC 6937) 1 credit**

A seminar course in which students select papers from ecological literature and facilitate discussions with other students and professors. Course grading is dependent on participation in class discussions. All students will lead at least one paper discussion. *Grading: S/U*

#### **Seminar (BSC 6938) 1 credit**

A variable title seminar series for students to experience information exchange among professional scientists. This course offers a more informal, less intimidating environment in which to talk with faculty, graduate students and other researchers. Invited speakers are from various institutions allowing students to network regarding further schooling/jobs. *Grading: S/U*

#### **Professional Science Master's (P.S.M.) in Business Biotechnology - Scientific Internship (BSC 6946) 2 credits**

*Prerequisite: Permission of instructor*

Course provides students with experience and exposure to a research environment in a for-profit biotechnology/biopharmaceutical company. *Grading: S/U*

#### **Professional Science Master's (P.S.M.) in Business Biotechnology - Business Internship (MAN 6946) 2 credits**

*Prerequisite: Permission of instructor*

Students gain experience and exposure to the business side of a research environment in a for-profit biotechnology/biopharmaceutical company, including raising capital, intellectual property, finance and marketing. *Grading: S/U*

#### **Journal Club - Molecular Biology (BSC 6956) 1 credit**

*Prerequisite: Molecular biology*

A practical approach to learning how to discuss scientific literature in molecular biology in a journal club format

#### **Journal Club (BSC 6958) 1 credit**

A variable title journal club series for students to experience scientific information exchange. This course offers a more informal, less intimidating environment in which to talk with faculty, graduate

students and other researchers. *Grading: S/U*

### **Master's Comprehensive Exam (BSC 6962) 1 credit**

*Prerequisite: Permission of instructor*

Students in the M.S. non-thesis and M.S.T. programs take three written comprehensive examinations on designated areas within the microbiology and organismal specialties (as stated in the FAU Regulations for Master's Degrees). The written exams are administered on the dates agreed to by the student and their committee members. Question types require written responses, primarily in essay and definition formats. *Grading: S/U*

### **Master's Proposal Seminar (BSC 6963) 1 credit**

*Prerequisite: Permission of instructor*

This seminar is presented by the student usually in the first year (no later than the student's third semester). The student is guided by the advisor and Graduate Supervisory Committee on the proposal's format that is best suited to the student's discipline, following the Graduate College's formatting requirements. The student adheres to all thesis proposal procedures and the timeline. The student presents the seminar to an open audience and the Graduate Supervisory Committee asks questions on the proposal and decides if it warrants approval. *Grading: S/U*

### **Master's Thesis (BSC 6971) 1-6 credits**

*Prerequisite: Permission of instructor*

This course is intended for Biology master's students conducting original research on their master's thesis topic. *Grading: S/U*

### **Master's Defense Seminar (BSC 6975) 1 credit**

*Prerequisite: Permission of instructor*

A thesis results and defense seminar is presented by the student in the fall or spring of the second year. The student is guided by the advisor and Graduate Supervisory Committee on the proposal's format that is best suited to the student's discipline, following the Graduate College's formatting requirements. The student adheres to all thesis defense procedures and the timeline. The student presents the seminar to an open audience, and the Graduate Supervisory Committee asks questions on the results and defense and decides if it warrants approval. *Grading: S/U*

### **Advanced Research in Integrative Biology (BSC 7978) 1-9 credits**

*Prerequisite: Admission to Ph.D. program in Integrative Biology*

Research that is focused and relevant to the student's course of study in the Ph.D. program in Integrative Biology. This course requires oversight by the student's dissertation advisor, who can grade the student's performance at the end of the semester. *Grading: S/U*

### **Dissertation (BSC 7980) 1-9 credits**

*Prerequisite: Admission to doctoral candidacy*

Dissertation research in Ph.D. program in Integrative Biology. *Grading: S/U*

### **Ocean Optics and Remote Sensing (EOC 6267) 3 credits**

This course explores the field of bio-optics and associated applications toward ocean color remote sensing of the environment, including open ocean, coastal ocean and inland lake systems.

### **Environmental Science Directed Independent Study (EVS 6905) 1-3 credits**

*Prerequisite: Permission of instructor*

This course provides graduate students with concrete research experience in a particular area of environmental science not normally covered in a course. *Grading: S/U*

### **Directed Independent Research in Environmental Science (EVS 6916) 0-3 credits**

*Prerequisite: For students in Environmental Science master's program*

The student works closely with a research mentor to become competent in at least one aspect of graduate-level research and inquiry in environmental science. This course is typically lab- or field-based. The requirements for the course and the criteria for evaluation are agreed upon by the research mentor and the student. *Grading: S/U*

### **Fundamentals of Environmental Research (EVS 6917) 1 credit**

*Prerequisite: For students in the Environmental Science master's program*

This weekly seminar develops students' skills in scientific presentations through lectures and student presentations and provides basic introduction to common practices or requirements for the developing, conducting and reporting of environmental science research programs. *Grading: S/U*

### **Environmental Science Colloquium Series (EVS 6920) 1 credit**

Environmental Science students attend colloquia presented by faculty, professional environmental scientists and advanced graduate students. Students gain experience in written and oral communication through class discussions, writing assignments and presentations. *Grading: S/U*

### **Environmental Science Internship (EVS 6949) 0-3 credits**

*Prerequisite: Permission of instructor*

This is an internship course that offers students "real-world" experience in a structured format within environmental science disciplines (such as biology, chemistry, geosciences, environmental engineering or urban and regional planning), which are related to each student's graduate degree program. *Grading: S/U*

### **Writing Science for Ecologists (EVS 6956) 3 credits**

Communicating science through writing is a key aspect of any career in ecology, environmental science or natural resources. In this course, students use a combination of instruction and practice to learn key techniques to hone their writing skills. Topics range from grammatical structure to tailoring the written message for the audience. This writing-intensive course uses the iterative approach of writing, reviewing, editing and revising with peer support groups to allow students to improve their written products. Students also gain familiarity with the process of developing scientific documents (e.g., manuscripts, grant proposals, technical reports) in an increasingly collaborative field focusing on the peer-review process used by primary literature journals.

### **Environmental Science Master's Thesis (EVS 6971) 1-6 credits**

*Prerequisite: Permission of instructor*

This course is intended for graduate students conducting original research on their master's thesis topic.

*Grading: S/U*

### **Plant Microbiomes and Applications (MCB 6672) 2 credits**

This course explores microbial associations with plants and roles they play in plant health, invasion, disease and yield. Emphasis is on the microbiomes of the phyllosphere, caulosphere and rhizosphere of plants with applications in conservation ecology, horticulture and agriculture.

### **Advances in Human Microbiomes (MCB 6674) 3 credits**

A presentation of the community structure and ecology of the human microbiomes including oral, skin and gut. The roles and functional diversity of the gut bacteria as well as the factors that shape the microbiome niches are discussed. Concepts in dysbiosis and trends in engineering the human microbiomes are presented.

### **Advanced Topics in Microbiology (MCB 6930) 1-4 credits**

*Prerequisites: 16 credits in microbiology and permission of instructor*

A critical review of specialized topics in bacteriology, virology, mycology, immunology, or other areas of microbiology. This is a lecture course.

### **Biological Oceanography (OCB 6066) 3 credits**

*Prerequisites: BSC 1010 and BSC 1011*

This course explores major biological processes within the world's oceans, including estuaries, continental margins and the open ocean.

### **Coral Reef Ecosystems (OCB 6266) 3 credits**

*Prerequisite: Permission of instructor*

Explores the structure, biology, ecology, significance and current status of coral reef ecosystems through a combination of lectures and discussions.

### **Coral Reef Ecosystems Lab (OCB 6266L) 1 credit**

*Prerequisite: Permission of instructor*

*Corequisite: OCB 6266; ability to swim/snorkel 400 yards; preferred AAUS scientific diver certification*

Field-and-laboratory-based exploration of coral reef ecosystems focused on coral identification and underwater scientific methods for coral research.

### **Marine Trophic Ecology (OCB 6638C) 3 credits**

*Prerequisite: OCB 6066 or equivalent or permission of instructor*

This course involves the advanced study of theory and techniques in marine trophic ecology. The course begins with an overview of marine communities and habitats over which trophic interactions occur, followed by discussion of the various associated processes (e.g., predation, energy transfer) involved at the individual, population, community and ecosystem level. Throughout the process, students are exposed to various techniques used to study trophic interactions in marine environments, from traditional dissections of predators to chemical/genetic tracers and emerging technologies such as biologging.

### **Marine Fisheries Ecology and Management (OCB 6715C) 4 credits**

*Prerequisites: For graduate Biology, Environmental Science and Marine Science majors or permission of instructor*

This course involves the advanced study of theory and techniques in fisheries science, including behavior and ecology of exploited fisheries populations (shellfish, finfish, etc.), and protected resources, such as applications to resource management.

### **Natural History of the Indian River Lagoon (OCB 6810) 3 credits**

*Prerequisite: Graduate standing or permission of instructor*

An overview of the marine plants and animals, habitats, and environmental conditions in the Indian River Lagoon, including human impacts. Field trips to local habitats complement lecture and labs.

### **Chemical Oceanography (OCC 6050) 3 credits**

*Prerequisite: CHM 2045; recommended: CHM 2046 and CHM 2210*

This course explores major chemical processes within the world's oceans, including estuaries, continental margins and the open ocean.

### **Image and Video Processing and Vision in Marine Environment (OCE 5266) 3 credits**

*Prerequisite: EEE 4510 or permission of instructor*

Course studies the fundamentals of electro-optical image and video processing in the underwater environment. Covers topics such as underwater image and video enhancement techniques, underwater stereo vision and emerging underwater imaging system concepts.

### **Marine Global Change (OCE 6019) 3 credits**

*Prerequisite: Graduate standing or permission of instructor*

Introduction to long-term and global scale changes in terrestrial and marine environments and the impact those changes have in marine settings, especially the coastal ocean. Natural and anthropogenic changes are described and compared. Topics include invasions, extinctions, climate change, food web modifications, and freshwater issues in the coastal zone.

### **Biological and Chemical Oceanography (OCE 6057) 3 credits**

*Prerequisites: Graduate standing, CHM 2045, BSC 1010 and BSC 1011*

Explores major biological and chemical processes within the world's ocean, including estuaries, continental margins and the open ocean.

### **Ecology of Infectious Marine Diseases (OCE 6059) 3 credits**

*Prerequisites: Graduate standing and PCB 6772; PCB 4043 is recommended*

Marine wildlife disease ecology takes a holistic approach to examining multi-parasite and multi-host systems across diverse habitats and geographic regions. This course covers a wide range of marine phyla and examines the multi-faceted role of the environment in the ecology and epidemiology of infectious marine disease.

### **Marine Science and Oceanography Directed Independent Research (OCE 6908) 1-3 credits**

*Prerequisite: Permission of instructor*

This course provides graduate students with research experience not covered in other courses.

*Grading: S/U*

### **Marine Science and Oceanography Colloquium (OCE 6922) 1 credit**

This course is intended to bring together faculty and students in the field of marine science at FAU to showcase research ongoing at the Boca Raton, Davie and Harbor Branch Oceanographic Institute (HBOI) campuses. Occasional visiting speakers are welcome as well. The course is broadcast among the Boca Raton, Davie and HBOI campuses, with participation by students and faculty at all three locations. Topics are varied and depend on the current research interests of students and faculty.

*Grading: S/U*

### **Marine Science and Oceanography Comprehensive Exam (OCE 6964) 1 credit**

*Prerequisite: Permission of instructor*

Students in the M.S. non-thesis and M.S.T. programs take three written comprehensive examinations on designated areas within the marine science and oceanography specialties (as stated in the FAU Regulations for Master's Degrees). The written exams are administered on the dates agreed to by the student and their committee members. Question types require written responses, primarily in essay and definition formats. *Grading: S/U*

### **Marine Science and Oceanography Thesis Proposal (OCE 6970) 1 credit**

*Prerequisite: Permission of instructor*

This seminar is presented by the student, usually in the first year (no later than the student's third semester). The student is guided by the advisor and Graduate Supervisory Committee on the proposal's format that is best suited to the student's discipline, following the Graduate College's formatting requirements. The student adheres to all thesis proposal procedures and the timeline. The student presents the seminar to an open audience and the Graduate Supervisory Committee asks questions on the proposal and decides if it warrants approval. *Grading: S/U*

### **Marine Science and Oceanography Master's Research (OCE 6972) 1-9 credits**

*Prerequisite: Permission of instructor*

This course provides graduate students with research experience not covered in other courses, including master's research. *Grading: S/U*

### **Marine Science and Oceanography Thesis Defense (OCE 6975) 1 credit**

*Prerequisite: Permission of instructor*

A thesis results and defense seminar is presented by the student in the fall or spring of their second year. The student is guided by the advisor and Graduate Supervisory Committee on the proposal's format that is best suited to the student's discipline, following the Graduate College's formatting requirements. The student adheres to all thesis defense procedures and the timeline. The student presents the seminar to an open audience, and the Graduate Supervisory Committee asks questions on the results and defense and decides if it warrants approval. *Grading: S/U*

### **Advanced Genetics Lab (PCB 5064L) 3 credits**

*Prerequisites: Graduate standing and BSC 1010, BSC 1011 and PCB 3063 with minimum grades of "C-" or better*

This laboratory course is open to advanced undergraduates and graduate students. Students gain significant experience in classical and molecular genetics using two powerful model systems, the

roundworm *Caenorhabditis elegans* and fruit fly *Drosophila melanogaster*. Experiments are performed to identify morphological and behavioral mutant phenotypes, investigate gene linkage and crossing over, establish dominant versus recessive and sex-linked versus autosomal inheritance and generate genetic maps.

### **Advanced Molecular Genetics of Aging (PCB 5245) 3 credits**

*Prerequisite: BSC 1010 or BSC 1011 with a minimum grade of "C-"*

An in-depth examination of current theories of aging, molecular pathways modulating aging and major discoveries about aging in mammals and in different model organism, including yeast, *C. Elegans*, *drosophila* and mouse.

### **Conservation Biology (PCB 6045) 3 credits**

*Prerequisite: Graduate standing or permission of instructor*

A study of the principles and practice of conservation biology. Emphasis on the primary threats to biodiversity and the application of contemporary tools to solve conservation problems.

### **Advanced Ecology (PCB 6046) 3 credits**

*Prerequisites: PCB 4043 or ecology equivalent*

Provides graduate students with a background in development of ecology as a science and current ecological theory and application of ecology for ecosystem management.

### **Advanced Immunology (PCB 6236) 3 credits**

*Prerequisite: PCB 4233*

A study of the chemical and biological natures of antigens and antibodies: their preparation and reactions in vivo and in vitro, their applications in basic science and therapy, and the immunochemical and experimental methods involved with tagged or free immunologic products. It is a lecture course.

### **Freshwater Ecology (PCB 6307)3 credits**

*Prerequisites: ZOO 3205, ZOO 3205L*

*Corequisite: PCB 6307L*

A study of limnological processes, with an emphasis on subtropical freshwater habitats, their physicochemical characteristics, and associated fauna and flora.

### **Freshwater Ecology Laboratory and Field Studies (PCB 6307L) 2 credits**

*Corequisite: PCB 6307*

A field oriented study of the freshwater plants and animals of southern Florida and the techniques employed on the analysis of freshwater habitats.

### **Marine Ecology (PCB 6317) 3 credits**

*Prerequisites: ZOO 3205 and OCB 4043*

*Corequisite: PCB 6317L*

A study of the principles, concepts, and techniques of marine and estuarine ecology. Environmental factors, adaptations, habitats, communities, and applications of current ecological theory are studied. Lecture, laboratory, and field work are included.

### **Marine Ecology Laboratory and Field Studies (PCB 6317L) 2 credits**

*Corequisite: PCB 6317*

A study of the Methods and Techniques of marine ecological research and their application in the field. Data collections, analysis and presentation.

### **Ecological Theory (PCB 6406) 3 credits**

*Prerequisites: PCB 4043 or equivalent and senior or graduate level proficiency in Biology or permission of instructor*

A functional approach to and a critical examination of the principles and concepts in ecosystem theory.

### **Climate Change: Ecosystems to Human Health (PCB 6409) 3 credits**

*Prerequisite: Graduate standing or permission of instructor*

This course covers the physical science of climate change and how these changes modify the hydrological cycle and thermal regions on a global scale. It also covers current adaptation plans on the global, national and regional scale.

### **Experimental Design and Biometry (PCB 6456) 3 credits**

*Prerequisite: Permission of instructor*

Course covers basic statistical concepts and procedures that are necessary to conduct statistical analysis in biological research. The topics covered are probabilistic foundations, experimental designs and their analyses, summarizing and visualizing data, and inferential statistics.

### **Genes and Development (PCB 6595) 3 credits**

*Prerequisite: Graduate standing or permission of instructor*

Students become familiar with the cellular and molecular mechanisms underlying organismal development, including differential gene regulation, intercellular communication, fertilization, pattern formation, organogenesis, animal stem cells and cloning, evolution and development, sex determination and developmental disorders.

### **Environmental Physiology (PCB 6749) 3 credits**

This course examines how animals function in and respond to their natural environments, that is the study of animals in their natural habitat, with reflections on behavioral strategies, ecology and evolution. The initial part of the course looks at specific physiological challenges faced by animals in different environments (e.g., salt and water balance). The second part of the course looks at how animals adapt to specific environments. Both textbooks and recent journal articles are utilized as source materials.

### **Aquatic Animal Health (PCB 6772) 3 credits**

*Prerequisite: Graduate standing*

A comprehensive study of basic processes in aquatic organisms, with an emphasis on marine fish and invertebrates.

### **Physiology of Marine Animals (PCB 6775) 3 credits**

*Prerequisites: 4 credits in physiology*

A study of how marine animals function in their environment.

### **Neurophysiology (PCB 6835C) 3 credits**

*Prerequisite: Graduate standing or permission of instructor*

Neurophysiology brings students closer to understanding neurophysiological signaling at the cellular level and whole animal through the use of actual wet and dry laboratory experiences supplemented with lectures. Focuses on signaling from the perspective of the electrical properties of neurons and their signaling, the basis for all neuronal function. Students learn through both theory and practical laboratory experiences and then translate their findings into modular reports.

### **Advanced Neurophysiology Lab (PCB 6837L) 3 credits**

*Prerequisite: Graduate standing or permission of instructor*

Advanced neurophysiology brings students closer to understanding neurophysiology signaling at the cellular level and whole animal through the use of actual laboratory experiences. Focuses on signaling from the perspective of single ion channels to cellular synaptic transmission and behavior. The electrical properties of neuronal and their signaling is the basis for all neuronal function.

### **Cellular Neuroscience and Disease (PCB 6849) 3 credits**

*Prerequisite: PCB 3063 and permission of instructor; Corequisite: PCB 3023*

This course focuses on the cellular aspect of human neurological diseases, analyzing different signaling pathways and connecting malfunctions in them to various neurological disorders.

### **Sensory Biology and Behavior of Fishes (PCB 6871) 3 credits**

*Prerequisite: Permission of instructor*

A study of the anatomy and physiology of sensory structures in fishes, as well as the neural processing and behaviors elicited by these senses. Topics include vision, olfaction, audition, gustation, lateral line, tactile and electrosensation.

### **Neuroscience Seminar (PSB 6920) 0-1 credit**

A seminar on current research topics and techniques from leaders in the field. *Grading: S/U*

### **Advanced Animal Locomotion (ZOO 6376) 3 credits**

*Prerequisite: Permission of instructor*

This course explores animal movement over a range of species and environments. Students explore modes of locomotion by examining anatomy and mechanics of both skeletal and muscular systems and the media through which an animal moves. Topics are presented through lecture material and readings from the primary literature and text. Students show mastery of topics through presentations utilizing active learning techniques and written papers.

### **The Biology of Sea Turtles (ZOO 6406) 3 credits**

*Prerequisites: Graduate standing and permission of instructor*

This upper-level lecture, lab and field course introduces the behavioral, ecological and evolutionary adaptations of sea turtles and conservation-related topics. Major topics include species identification, functional anatomy, reproduction, migration, navigation, feeding ecology, physiology, development, nests and hatchlings, threats to survival and conservation strategies.

### **Biology of Sharks and Their Relatives (ZOO 6409) 3 credits**

*Prerequisite: Permission of instructor if the student is currently enrolled as an undergraduate*

Studies biology, ecology, physiology, behavior and taxonomy of the elasmobranch fishes. Includes a review of extant families and contemporary topics in elasmobiology through readings from the primary literature.

### **Seminar in Ichthyology (ZOO 6459) 1-2 credits**

*Prerequisite:*

A critical review of current literature dealing with fishes and fisheries. This course may be repeated for credit to a maximum of 4 credits. *Grading: S/U*

### **Principles in Behavioral Ecology (ZOO 6520) 3 credits**

*Prerequisites: For M.S., Ph.D. students in College of Science with B.S. in Biology, Psychology or Zoology*

This course seeks to understand the evolution and fitness consequences of behavior. Students read scientific papers and discuss key concepts and areas of study in the field of behavioral ecology.

### **Seminar on Emerging Topics in Avian Ecology (ZOO 6544C) 1 credit**

*Prerequisite: Graduate standing or permission of instructor*

Primarily student-led discussions of recent papers on an emerging topic-in avian ecology. Topic varies each semester and has application to the broader field of ecology. Students may take the course repeatedly up to a maximum of 4 credits.

### **Human Neuroanatomy (ZOO 6748) 3 credits**

*Prerequisite: Graduate standing or permission of instructor*

Detailed study of the anatomical components of the human nervous system at the cellular and systems level, with particular emphasis on the structure and function of the brain and spinal cord. An overview of diseases and injuries of the human nervous system will be included.

## CHEMISTRY AND BIOCHEMISTRY

### **Undergraduate Courses** /[link to graduate courses](#)

#### **Biochemistry 1 (BCH 3033) 3 credits**

*Prerequisites: CHM 2210 and CHM 2211*

The organic chemistry of biological compounds; carbohydrates; amino acids; peptides, and proteins; nucleosides and nucleotides; nucleic acids, replication, transcription and translation; saponifiable lipids; steroids and terpenes.

#### **Biochemistry 2 (BCH 3034) 3 credits**

*Prerequisite: BCH 3033*

Bioreactions and the role of enzymes and coenzymes; energy aspects; generation and utilization of ATP; metabolic pathways; regulatory mechanisms; photosynthesis.

#### **Biochemistry Laboratory (BCH 3103L) 3 credits**

*Prerequisites: BCH 3033 and CHM 2211L with minimum grades "C"*

An introduction to experimental techniques in physical chemistry as applied to biological systems; quantitative measurements in biochemistry.

#### **RI: Advanced Biochemistry (BCH 4035) 3 credits**

*Prerequisite: BCH 3033 with minimum grade of "C"*

Topics cover the structure and function of proteins and their biotechnological, medical and scientific use. In addition, students are assigned research topic assignments that facilitate understanding and

practical application of research methods used in protein chemistry. This is a research-intensive (RI) course.

### **Contemporary Chemical Issues (CHM 1020C) 3 credits**

This course provides students with an introduction to chemical principles and applications for the nonscience major. Students engage in problem solving and critical thinking while applying chemical concepts. Topics include the scientific method of problem solving, classification of matter, atomic theory, the periodic table, gases, chemical reactions, energy and chemical bonds.-This is a General Education course.

### **Introductory Chemistry (CHM 1025) 3 credits**

Introductory readiness course in general chemistry for students with weaker but satisfactory backgrounds in high school chemistry and algebra.

### **University Honors Seminar in Chemistry (CHM 1930) 3 credits**

*Writing Across Curriculum (Gordon Rule)*

A seminar in the University Honors Program on topics in chemistry.

### **Special Topics (CHM 1932) 1-4 credits**

Special topics course in chemistry.

### **General Chemistry for the Health Sciences (CHM 2032) 3 credits**

*Corequisite: CHM 2032L*

An introduction to the fundamental concepts of chemistry: scientific measurements; atomic theory; molecules and chemical bonds; chemical reactions; aqueous solutions; salts and electrolytes; acid-base theory; radioactivity and nuclear chemistry. Orientation toward majors in the allied health fields. This is a General Education course.

### **General Chemistry for the Health Sciences Lab (CHM 2032L) 1 credit**

*Corequisite: CHM 2032*

Intermediate experimental studies of chemical principles. This is a General Education course.

### **General Chemistry 1 (CHM 2045) 3 credits**

*Prerequisites or Corequisites: Students must have passed CHM 1025 or are currently enrolled or previously passed one of the following: MAC 1105, MAC 1114, MAC 1140, MAC 1147, MAC 2233, MAC 2311, MAC 2210*

*Corequisite: CHM 2045L*

This course is designed for students pursuing careers in the sciences or who need a more rigorous

presentation of chemical concepts than is offered in an introductory course. Students engage in problem solving and critical thinking while applying chemical concepts. Topics include the principles of chemistry including atomic theory, electronic and molecular structure, measurement, stoichiometry, bonding, periodicity, thermochemistry, nomenclature, solutions and the properties of gases. This is a General Education course.

### **General Chemistry 1 Lab (CHM 2045L) 1 credit**

*Corequisite: CHM 2045*

An introduction to experimental techniques in chemistry designed to demonstrate basic chemical principles. This is a General Education course.

### **General Chemistry 2 (CHM 2046) 3 credits**

*Prerequisite: CHM 2045; Corequisite: CHM 2046L*

An introduction to chemical principles including atomic structure, chemical bonding, kinetics, thermodynamics and properties of the elements. A prerequisite to all other chemistry courses in science programs.

### **General Chemistry 2 Lab (CHM 2046L) 1 credit**

*Prerequisites: CHM 2045, CHM 2045L; Corequisite: CHM 2046*

An introduction to experimental techniques in chemistry designed to demonstrate basic chemical principles. Qualitative analysis of selected anions and cations.

### **Organic Chemistry 1 (CHM 2210) 3 credits**

*Prerequisite: Minimum grades of "C" in CHM 2045, 2045L, 2046, and 2046L*

A study of the compounds of carbon and their physical properties, structures, chemical behavior and reaction mechanisms.

### **Organic Chemistry 2 (CHM 2211) 3 credits**

*Prerequisite: Minimum grade of "C" in CHM 2210*

Continuation of CHM 2210.

### **Organic Chemistry Lab (CHM 2211L) 2 credits**

*Prerequisite: CHM 2210*

*Prerequisite or Corequisite: CHM 2211*

Experimental study of the synthesis, purification, and identification of organic compounds using microscale techniques.

### **Directed Independent Research in Chemistry (CHM 2915) 1-3 credits**

Students work closely with research mentors to conduct research and inquiry in Chemistry. Requirements for the course and the criteria for evaluation are agreed upon by the research mentor and the student.

### **Directed Independent Research in Chemistry (CHM 2916) 0-3 credits**

Students work closely with research mentors to conduct research and inquiry in Chemistry. Requirements for the course and the criteria for evaluation are agreed upon by the research mentor and the student. *Grading: S/U*

### **Chemistry Study Abroad (CHM 2952) 1-6 credits**

*Prerequisite: Sophomore standing*

Credit for enrollment in approved study abroad programs.

### **Chemical Literature (CHM 3060) 1 credit**

*Prerequisites: CHM 2211 and some experience with a foreign language*

Skills in searching the chemical literature for information on specific topics to be presented in written and oral reports.

### **Environmental Chemistry (CHM 3080) 3 credits**

*Prerequisites: CHM 2045, 2046, 2210, 2211*

The chemistry of the environment. Includes processes in the atmosphere, hydrosphere, and geosphere, and their interactions. Selected emphasis on the physical processes that distribute materials through the environment. Topics include ozone, smog, greenhouse gases, global warming, energy, pE/pH, gas laws, redox cycling of elements, organic matter, chemistry of drinking and waste waters, biocides, and green chemistry.

### **Quantitative Analysis (CHM 3120) 2 credits**

*Prerequisites: CHM 2045, 2045L, 2046, 2046L; Corequisite: CHM 3120L*

Principles of analysis; gravimetric, volumetric and instrumental methods.

### **Quantitative Analysis Lab (CHM 3120L) 2 credits**

*Prerequisite: CHM 2045, 2045L, 2046, 2046L; Corequisite: CHM 3120*

Experiments in volumetric, gravimetric, and instrumental methods of analysis.

### **Introduction to Physical Chemistry (CHM 3400) 3 credits**

*Prerequisite: CHM 2046*

Principles of physical chemistry with special attention to applications in earth science and oceanography. For students in earth sciences, oceanography, and engineering. This course is also

intended for B.A. candidates in Chemistry.

**Physical Chemistry 1 (CHM 3410) 3 credits**

*Prerequisites: CHM 2211 with minimum grade of "C" and 8 credits of physics*

*Corequisite: CHM 3410L*

An introduction to theories of the states of matter, thermodynamics, phase and chemical equilibria, electrochemistry, kinetics and factors affecting reactivity and statistical thermodynamics.

**Physical Chemistry 1 Lab (CHM 3410L) 2 credits**

*Corequisite: CHM 3410*

Experiments in physical chemistry.

**Physical Chemistry 2 (CHM 3411) 3 credits**

*Prerequisite: CHM 3410*

*Corequisite: CHM 3411L*

Introduction to quantum chemistry, a description of quantum mechanics (QM) and Schrodinger equation, application of QM to rotational/vibrational motions and electronic spectroscopy, utilization of QM to describe atomic/molecular orbitals, structures and bonding.

**Physical Chemistry 2 Lab (CHM 3411L) 2 credits**

*Corequisite: CHM 3411*

Advanced experiments in physical chemistry.

**Inorganic Chemistry (CHM 3609) 3 credits**

*Prerequisite: CHM 2210; Corequisite: CHM 3609L*

A study of periodicity in the chemistry of the elements, descriptive inorganic chemistry, synthesis of inorganic compounds. For B.A. candidates in Chemistry.

**Inorganic Chemistry Laboratory (CHM 3609L) 1 credit**

*Corequisite: CHM 3609*

Experiments in inorganic chemistry.

**Cooperative Education - Chemistry (CHM 3949) 1-3 credits**

*Grading: S/U*

**Bioanalytical Instrumentation (CHM 4139) 2 credits**

*Prerequisites: CHM 3120, BCH 3033, and either PHY 2049 or PHY 2054*

*Corequisite: CHM 4139L*

An introduction to the theory, design, and operation of advanced instrumentation currently used in

research and quality control/quality assurance laboratories for the analysis and characterization of biomolecules. Topics include spectroscopic techniques, separation techniques, electrochemical methods, and statistical treatment of data.

### **Bioanalytical Instrumentation Lab (CHM 4139L) 2 credits**

*Prerequisites: CHM 3120L, BCH 3033, and PHY 2049L*

*Corequisite: CHM 4139*

Advanced experiments in the isolation, analysis, and characterization of biomolecules using spectroscopic, chromatographic, and electrochemical methods.

### **Organic Chemistry 3 (CHM 4220) 3 credits**

*Prerequisite: CHM 2211L*

*Corequisite: CHM 3410*

An in-depth study of a wide variety of organic reactions drawing on both valence bond and molecular orbital theories to explain reactivity. Strong emphasis on curved-arrow mechanisms.

### **Organic Spectroscopy (CHM 4230C) 3 credits**

*Prerequisites: CHM 2210 and CHM 2211*

This course aims at presenting an introduction to the techniques used to characterize mono- and di-functional organic molecules.

### **RI: Introduction to Drug Design (CHM 4273) 3 credits**

*Prerequisite: CHM 2210 or BCH 3033*

Basic principles of organic chemistry and biochemistry vital to drug design and drug action are the focus of this course with use of important drugs as examples. The course is further enhanced with student case projects with the goal of encouraging creative-and-critical thinking. This is a research-intensive (RI) course.

### **Introduction to Drug Development (CHM 4274C) 3 credits**

*Prerequisite: CHM 2211*

This course provides the basics in U.S. FDA drug regulations, facilities and process qualifications and the processes involved in drug discovery and development. Students learn how specific activities fit into the overall scheme of drug development and evaluate the impact of each activity on the overall progression of a new drug candidate. The principles of good documentation practices and basic analytical assays are introduced by hands-on activities.

### **Introduction to Drug Formulation (CHM 4276C) 3 credits**

*Prerequisites: CHM 2211 and CHM 4274C*

This course provides an introduction to drug formulation. Students learn about drug discovery, pharmacology, toxicology and formulation. Students are introduced to different forms of drug formulation, various routes of administration and assays to analyze these dosage forms. A laboratory portion is included that involves analytical assays for suspensions and solid dosage forms.

### **Medicinal Chemistry (CHM 4292) 3 credits**

*Prerequisites: BCH 3033 and CHM 2211 with grades of "C" or higher*

This course provides a comprehensive and balanced introduction to medicinal chemistry beginning with fundamental principles and progressing to principal methods used in drug design.

### **Introduction to Chemical Biology (CHM 4300) 3 credits**

*Prerequisites: BCH 3034 and CHM 2211*

A comprehensive introduction to the origins and emerging frontiers of chemical biology. This course develops the fundamental chemistry of molecules found in nature, a quantitative description of their interaction with themselves and each other and subsequent effects on biological function. Topics include protein design, molecular evolution, chemical genetics, metabolic engineering and methods in genomics and proteomics research.

### **RI: Structural Biochemistry (CHM 4350) 3 credits**

*Prerequisite: BCH 3033 with minimum grade of "C"*

Course emphasizes a computer-based approach to teaching structural biochemistry. It uses hands-on experience to develop essential skills for understanding relationships between structure and function of biomolecules. State-of-the-art software for visualization, manipulation and simulation of various biomolecules is used throughout. This course contains an assignment or multiple assignments designed to help students conduct research and inquiry at an intensive level. This is a research-intensive (RI) course.

### **Materials Chemistry (CHM 4714) 3 credits**

*Prerequisite: CHM 2210*

An introduction to solid-state and inorganic materials chemistry. Preparative techniques and physical methods of characterization are discussed, particularly X-ray diffraction. Semiconductors, carbon-based electronics, nanomaterials, etc. are discussed in context with their structures and optical, magnetic and conductive properties.

### **Directed Independent Study (CHM 4905) 1-4 credits**

*Grading: S/U*

### **Directed Independent Research in Chemistry (CHM 4915) 1-3 credits**

Students work with research mentors to conduct research and inquiry in Chemistry. Requirements for the course and the criteria for evaluation are agreed upon by the mentor and student.

### **Directed Independent Research in Chemistry (CHM 4916) 0-3 credits**

Students work with research mentors to conduct research and inquiry in Chemistry. Requirements for the course and the criteria for evaluation are agreed upon by the mentor and student. *Grading: S/U*

### **Senior Seminar (CHM 4930) 1 credit**

### **Special Topics (CHM 4933) 1-4 credits**

### **Chemistry Study Abroad (CHM 4957) 1-6 credits**

*Prerequisite: Sophomore standing*

Credit for enrollment in approved study abroad programs.

### **RI: Honors Thesis in Chemistry (CHM 4972) 2 credits**

*Prerequisites: Students must have completed two semesters of CHM 4905 with grade of "B+," have maintained an overall Chemistry GPA of 3.3 and obtain permission of instructor*

This research intensive (RI) course provides the opportunity for in-depth, independent undergraduate research. This includes all aspects of the research process: development of a research question and the methods or experimental procedures utilized to study that question, how to conduct scientific experiments, data analysis and interpretation, including scientific technical writing. Students gain experience communicating the results of their research project in the form of an undergraduate thesis.

## **Chemistry and Biochemistry Graduate Courses**

### **Advanced Biochemistry (BCH 6740) 3 credits**

*Prerequisite: Graduate standing*

Principles of biomolecular structure determination by spectroscopic methods. Enzyme kinetics. Transport mechanisms across membranes. Molecular physiology and molecular genetics.

### **Advanced Topics in Biochemistry (BCH 6930) 3 credits**

*Prerequisite: Graduate standing*

Special topics in biochemistry.

### **Organic Chemistry 3 (CHM 5224) 3 credits**

*Prerequisite: Graduate standing*

A detailed overview of organic reaction mechanisms utilizing valence bond and molecular theories and

kinetic analysis.

### **Materials Chemistry (CHM 5716) 3 credits**

*Prerequisite: College of Science or College of Engineering graduate students only*

An introduction to solid-state and inorganic materials chemistry. Preparative techniques and methods of characterization are discussed, particularly X-ray diffraction. Semiconductors, carbon-based electronics, nanomaterials, etc. are discussed in context with their structures and optical, magnetic and conductive properties. A crystallography workshop is included.

### **Introduction to Chemical Research (CHM 5944) 1 credit**

Intended to be an introduction of new graduate students to the research interests of the department faculty. Departmental procedures and organizations will be discussed. Philosophical consideration of doing scientific research will also be discussed. All new graduate students are expected to take this course. *Grading: S/U*

### **Bioanalytical Methods and Applications (CHM 6137) 2 credits**

*Prerequisite: Graduate standing*

Analytical chemistry deals with methods and instruments that can determine the quality and the quantity of matters of interest. For biological samples, special care is necessary to deal with their fragility, heterogeneity and complexity. This course covers the operating principles and practical application of modern methodologies and technologies used for chemical analysis for biological samples. Research design, sample isolation, quantification, data analysis and result interpretation are discussed.

### **Instrumentation (CHM 6157) 3 credits**

*Prerequisite: Graduate standing*

An overview of modern instrumental techniques used in various areas of chemistry (analysis, characterization, identification). Topics include spectroscopy, chromatography, electrochemistry, theory and applications.

### **Advanced Organic Chemistry (CHM 6225) 3 credits**

*Prerequisite: Graduate standing*

Introduction to the concepts of modern physical organic chemistry. Elementary molecular orbital theory and applications. Methods for determining reaction mechanisms. Linear free energy relationships. Solvolysis reactions.

### **Advanced Drug Development (CHM 6277C) 3 credits**

This course provides the overview on processes involved in drug discovery and development. The

principles of current good manufacturing practices (cGMPs), quality control and quality assurance are covered. This course also gives an overview of U.S. Food and Drug Administration (FDA) regulations and intellectual property rights. Experts in drug development and regulation present lectures on these topics. A laboratory portion is included that involves the process of analytical method development, validation, stability analysis and the associated protocols and reports.

### **Drug Design (CHM 6278) 3 credits**

Basic principles of organic chemistry and biochemistry vital to drug design and drug action are the focus of this course with use of clinically important drugs as examples. Students who complete this course successfully will be proficient in understanding the processes involved in drug discovery and development from lead identification to introduction into clinical studies.

### **Advanced Drug Formulation (CHM 6279C) 3 credits**

This is an advanced course offering in-depth coverage of drug formulation. The course helps in understanding pre-clinical formulation; pharmacokinetic, stability and compaction studies; and formulation of various types of dosage forms.

### **Structural Biochemistry (CHM 6351) 3 credits**

*Prerequisite: CHM 2210 with minimum grade of "C"*

Emphasizes a computer-based approach to teaching structural biochemistry. It uses hands-on experience to develop essential skills for understanding the relationships between structure and function of biomolecules. Classes are held in computer labs. State-of-the-art software for visualization, manipulation and simulation is used throughout.

### **Advanced Topics in Organic Chemistry (CHM 6380) 3 credits**

Synthesis, reaction mechanisms, and physical organic chemistry.

### **Medicinal Chemistry (CHM 6428) 3 credits**

*Prerequisites: CHM 2211, BCH 3034, CHM 3411, all with minimum grade of "C"*

This course provides a comprehensive and balanced introduction to medicinal chemistry beginning with fundamental principles and progressing to principal methods used in drug design such as quantitative structure-activity relationships, computer-aided drug design and combinatorial chemistry.

### **Kinetics and Energetics of Reactions (CHM 6720) 3 credits**

*Prerequisite: Graduate standing*

A detailed look at reactions of chemical elements and molecules, their rates and thermodynamics. Chemical kinetics, rate laws, collision theory and transition state theory. Reaction and structural dynamic. Thermochemistry, properties of ideal and non-ideal systems. Chemical equilibria.

### **Synthesis and Characterization (CHM 6730) 3 credits**

*Prerequisite: Graduate standing*

Synthetic procedures and methods for preparation of inorganic, organic, and polymeric compounds, with special attention to recent developments. Methods of characterization and identification of chemical compounds, with emphasis on physical methods.

### **Topics in Chemistry (CHM 6830C) 1-4 credits**

### **Graduate Research (CHM 6918) 1-12 credits**

*Prerequisite: Permission of instructor*

Supervised research in chemistry. *Grading: S/U*

### **Graduate Seminar (CHM 6935) 1 credit**

Non-thesis topic.

### **Graduate Seminar (CHM 6936) 1 credit**

Thesis research seminar.

### **Current Topics in Bioanalysis (CHM 6937) 1 credit**

Analytical chemistry deals with methods and instruments that can determine the quality and the quantity of matters of interest. For biological samples, special care is necessary to deal with their fragility, heterogeneity and complexity. This course covers the operating principles and practical application of modern methodologies and technologies used for chemical analysis for biological samples. Research design, sample isolation, quantification, data analysis and result interpretation are discussed.

### **Master's Thesis (CHM 6971) 1-6 credits**

*Grading: S/U*

### **Advanced Research in Chemistry (CHM 7978) 1-9 credits**

*Prerequisite: Admission to doctoral candidacy*

Focused, relevant research in the student's course of study in the Ph.D. program in chemistry. This course requires oversight by the student's dissertation advisor. *Grading: S/U*

### **Dissertation (CHM 7980) 1-12 credits**

*Prerequisite: Admission to doctoral candidacy*

*Grading: S/U*

### **Chemistry for Environmental Scientists (CHS 6611) 3 credits**

*Prerequisites: Two semesters college chemistry with lab, graduate standing*

Course is designed for environmental scientists and requires minimal chemical training (one year of general chemistry with a "C" or better or permission of instructor). Introductory chemical basics are covered to lay a foundation for the remainder of the course. Atmospheric chemistry (global warming, ozone layer) are covered. However, aquatic chemistry and its effects on biotic communities and humans are emphasized.

## **COMPLEX SYSTEMS AND BRAIN SCIENCES**

### **Graduate Courses**

#### **Nonlinear Dynamic Systems (ISC 5453) 3 credits**

Introduction to nonlinear dynamical systems in an interdisciplinary setting. Topics covered include one-, two- and three-dimensional ordinary differential equations, bifurcations, one- and two-dimensional maps, iterated function systems, time scale separation and self-organization and elementary stochastic systems.

#### **Cognitive Neuroscience (ISC 5465) 3 credits**

An interdisciplinary survey of the neural basis of cognitive functions such as perception, attention, memory, and language.

#### **Directed Independent Study (ISC 5908) 1-3 credits**

*Prerequisite: Permission of Instructor*

Directed independent study in complex systems and brain sciences for undergraduate and graduate students.

#### **Special Topics (ISC 5930) 3 credits**

Special topics course in complex systems and brain sciences for both undergraduate and graduate students. Specific title, content, and textbook(s) vary with topic.

#### **Methods in Complex Systems (ISC 6450) 3 credits**

Classical statistical analysis and inference of linear systems and how those statistical methods and analysis procedures differ for non-linear complex systems. Topics include fractals, chaos, neural networks, and self-organizing critical systems.

#### **Computational Neuroscience 1 (ISC 6460) 3 credits**

*Prerequisite: Permission of instructor*

Covers the basics of computational neuroscience and introduces many research topics of both biological and artificial neural networks.

**Directed Independent Study (ISC 6908) 1-3 credits**

*Grading: S/U*

**Introduction to Complex Systems Tools (ISC 6925) 3 credits**

Objective of this "boot camp" is to provide students with the prerequisites-some conceptual background and sufficient working knowledge of mathematics-necessary to master the mathematically-based graduate courses at the Center for Complex Systems and Brain Science.

**Special Topics (ISC 6930) 1-3 credits**

Discussion of special topics in complex systems and brain sciences.

**Seminar in Attention (ISC 6932) 3 credits**

*Prerequisite: Permission of instructor*

This course examines attention and its role in perception, cognition, and action. Students read recent research articles dealing with significant issues in this area.

**Proseminar on Research in Complex Systems (ISC 6937) 1-3 credits**

Introductory survey course of research in complex systems and brain sciences at Florida Atlantic University, aimed at first semester graduate students.

**Advanced Research (ISC 7978) 1-9 credits**

*Prerequisite: Admission to Ph.D. degree program*

Focused, relevant research in the student's course of study in the Ph.D. degree program in complex systems and brain sciences. This course requires oversight by the student's dissertation advisor.

*Grading: S/U*

**Dissertation (ISC 7980) 1-15 credits**

*Grading: S/U*

**Dynamical Systems and Chaos 1 (MAP 6211) 3 credits**

[\(See Mathematics and Statistics courses, this section\)](#)

**Developmental Neurobiology (PSB 6515) 3 credits**

**Cellular and Molecular Neuroscience (PSB 6345) 3 credits**

**Systems and Integrative Neuroscience (PSB 6346) 3 credits**

## **Special Topics in Behavioral Neuroscience (PSB 6930) 3 credits**

### **Special Topics (PSY 5930) 3 credits**

(See [Psychology courses, this section](#))

## ENVIRONMENTAL SCIENCES

This interdisciplinary master's program draws on several disciplines in the Charles E. Schmidt College of Science. [See the Interdisciplinary Programs section in the College of Science Programs section.](#)

## EXERCISE SCIENCE AND HEALTH PROMOTION

**Undergraduate Courses** /[link to graduate courses](#)

### **Exercise Physiology 1 (APK 4110) 3 credits**

*Prerequisites: BSC 2085, BSC 2085L, BSC 2086, BSC 2086L, CHM 2045 and CHM 2045L, all with minimum grades of "C"*

*Corequisite: APK 4110L*

A lecture course dealing with the physiological responses and adaptations to acute and chronic forms of exercise. Areas of emphasis include: energy metabolism, cardiovascular, physiology, pulmonary function, muscular system, body composition and aging.

### **Exercise Lab Techniques (APK 4110L) 1 credit**

*Prerequisites: BSC 2085, 2085L, 2086, 2086L, CHM 2045, 2045L, HSC 2100, all with minimum grades of "C"*

*Corequisite: APK 4110*

The application of physiological principles toward understanding the physiological adjustments that occur to maintain homeostasis in the exercising human.

### **Exercise Physiology 2 (APK 4134) 2 credits**

*Prerequisites: APK 4110 and 4110L with minimum grades of "C"*

Course furthers the underlying knowledge of physiological function as it pertains to exercise. Perspectives and data related to environmental aspects of exercise are explored, with special attention on training at altitude and the effects of microgravity on muscle loss and bone density.

### **Health, Fitness for Life (HSC 2100) 2 credits**

A study of the strategies and techniques of healthful living. A wellness model will provide the

framework for this course. Personal health and fitness appraisals will be conducted.

### **First Aid and CPR (HSC 2400) 2 credits**

Study of the techniques of emergency first aid, cardiopulmonary resuscitation and accident prevention. Emphasis will be placed on examining the interrelationships among human behavior of the environment and accidents. Opportunity exists for each student to earn First Aid, CPR, and AED certification.

### **Perspectives in Health (HSC 3102) 3 credits**

*Prerequisite: Junior standing or higher and HSC 2100 with a grade of "C" or better*

A study of the major health and wellness issues facing humankind. Emphasis will be placed on examining appropriate health enhancement strategies.

### **Stress Management (HSC 4104) 3 credits**

*Prerequisite: Junior standing or higher*

The course includes a comprehensive study of the scientific foundations of stress. These include lifestyle conditions and their relationship to disease, recognizing stressors in various settings and stages of life, behavioral change interventions, and stress management techniques. This course examines and applies stress management concepts based on individual response and adaptation to internal and external influences.

### **Sexual Health Peer Education (HSC 4133) 3 credits**

Students gain knowledge and professional presentation skills related to sexual health. By presenting learned sexual health information in front of various academic audiences, students demonstrate their understanding of the concepts.

### **Weight Management (HSC 4139) 3 credits**

*Prerequisite: Junior standing or higher*

Course examines the different aspects of weight management. Weight loss and weight gain methods are discussed and insight is provided into the healthy approach of weight loss and weight gain. A variety of commercial diets are explored and critiqued.

### **Substance Abuse (HSC 4143) 3 credits**

*Prerequisite: Junior standing or higher*

The course examines the different aspects of substance abuse on personal health, identifies factors associated with substance use and abuse, describes the signs and symptoms of possible substance use and abuse, and identifies methods of prevention and control.

### **Health Promotion (HSC 4581) 3 credits**

*Prerequisite: HSC 2100 with a grade of "C" or better*

A study of the fundamental concepts of health education and health promotion. Emphasis will be given to the process and practice of health promotion and the application of related health behavioral theories and models.

### **Pilates Exercise (PEM 1127) 2 credits**

A comprehensive exercise course designed to instruct students to the exercise techniques and philosophy of Joseph H. Pilates.

### **Weight Training (PEM 1130) 2 credits**

Course introduces students to the basic fundamental and scientific principles of weight training and conditioning, as well as to improve overall fitness level and skill. Students learn to weight lift independently, while improving at their own pace to reach their fitness goals.

### **Jogging (PEM 1145) 2 credits**

This course provides basic knowledge regarding proper jogging techniques, training, and overall physical fitness. Areas covered include clothing/shoes, training techniques, walking injuries, importance of heart rate, and psychological barriers to jogging. Importance of individual fitness, primarily in respect to cardiovascular endurance, will be emphasized with flexibility and strength.

### **Yoga (PEM 2121) 1 credit**

This course is designed to introduce students to yoga. The class includes theory and physical practice of body position, breathing and meditation.

### **Swimming (PEN 2121) 1 credit**

Instruction and practice in the elementary forms of swimming.

### **Swim Fitness (PEN 2172) 1 credit**

*Prerequisite: Ability to swim 25 yards (any stroke)*

Introduction of the principles and techniques of swimming for fitness enhancement.

### **Applications of Training Physiology 1 (PEP 3192) 3 credits**

*Prerequisites: HSC 2100, PSY 1012 with grades of "C" or better or equivalent*

*Prerequisites or Corequisites: APK 4110 and APK 4110L*

This course bridges the gap between science and practical application to gain a better understanding of how the body works most efficiently. This includes understanding functional anatomy, movement, screens/assessments, corrective exercises, program designs and leadership roles for various types of

exercise styles/programs.

### **Exercise Leadership 2 (PEP 3136) 3 credits**

*Prerequisites: HSC 2100, PSY 1012 with grades of "C" or better*

*Prerequisites or Corequisites: APK 4110 and APK 4110L with grades of "C" or better*

Methods and techniques in the use of various weight training equipment and machines. Scientific principles of strength training, program development, exercise leadership and supervision of weight training and other group exercise activities are included.

### **Applications of Training Physiology 2 (PEP 4138) 3 credits**

*Prerequisites or Corequisites: APK 4134, PEP 3192 and PET 4550 with grades of "C" or better*

Course continues to bridge the gap between scientific principles and application into practice. Program design and applied principles of bodily systems (i.e., muscle and endocrine) are discussed in a manner that can practically improve athletic performance.

### **Neurophysiology of Human Movement (PET 3050) 3 credits**

*Prerequisites: BSC 2085, 2085L, 2086, 2086L, PSY 1012 with grades of "C" or better or permission of instructor*

A study of nervous system function across molecular, cellular and systems levels to explain involuntary and voluntary human movement.

### **Introduction to Health and Exercise Science (PET 3102) 3 credits**

*Prerequisites: Exercise Science and Health Promotion majors only, minimum, Junior standing or higher*

An introductory course designed to examine the philosophical, historical, psychosocial origin of the fields of exercise science and health promotion. Current issues and future directions will be explored.

### **Nutrition in Health and Exercise (PET 3361) 3 credits**

*Prerequisite: Junior standing or higher*

Study of the nutritional needs of the athlete and active person. Emphasis includes: fat, carbohydrate, protein, vitamin, mineral and water needs of the active person; energy metabolism, food and fluid intake prior to, during, and after exercise; nutritional management of anemia and diabetes; nutrient needs of the young and old athlete.

### **Tactical Strength and Conditioning (PET 4093) 3 credits**

This course addresses the unique training and conditioning requirements of tactical athletes with an emphasis on the physiological, metabolic and biomechanical demands related to these occupations. This class prepares students for NSCA's TSAC-F certification and employment within the tactical

strength and conditioning field.

### **Obesity: Biological, Psychological and Cultural Factors (PET 4263) 3 credits**

Focuses on different influences such as biology, psychology and culture in weight gain eventually leading to obesity. Also emphasizes the different approaches and settings of prevention and intervention in weight loss and weight loss maintenance (e.g., physical activity, dietary and pharmacological).

### **Kinesiology (PET 4330C) 4 credits**

*Prerequisites: BSC 2085, 2085L, 2086, 2086L with grades of "C" or better*

A study of functional anatomy and elementary biomechanics. Emphasis will be placed on the analysis of the skeletal, muscular and nervous systems and the biomechanical factors associated with efficient motor performance.

### **Biomechanics (PET 4340C) 3 credits**

*Prerequisites:-APK 4110, APK 4110L, BSC 2085, BSC 2085L, BSC 2086, BSC 2086L, all with grades of "C" or better*

A study of the biomechanics of sport and exercise. Emphasis will be placed on an analysis of efficiency in human movement.

### **Management Principles in Exercise Science and Health Promotion (PET 4404) 3 credits**

*Prerequisite: PET 3102 with a grade of "C" or better*

Study of management principles in the field of exercise science and health promotion. Emphasis is placed on entrepreneurial skills, social media marketing, technology and financial management. Industry trends, market analysis, modern practices and development strategies related to creating a web-based fitness/wellness business are covered.

### **Exercise Testing and Prescription (PET 4550) 4 credits**

*Prerequisite: HSC 2100, APK 4110, APK 4110L, BSC 2085, BSC 2085L, BSC 2086, BSC 2086L, CHM 2045, CHM 2045L, all with grades of "C" or better*

A practical course in exercise testing and programming for apparently healthy individuals and those with controlled disease including program design, preset health status assessment, protocols for the evaluation of cardiovascular functions, aerobic capacity, muscular fitness, pulmonary function and body composition, basic electrocardiography, interpretation of test results, and handling emergency situations.

### **Fitness Assessment and Exercise Prescription (PET 4551) 3 credits**

*Prerequisites: HSC 2100, APK 4110, APK 4110L with grades of "C" or better or equivalent*

Introduces techniques appropriate for screening for exercise, health appraisal, assessment, and exercise prescription for apparently healthy individuals or those who have controlled disease.

### **Exercise Testing and Prescription for Special Populations (PET 4552) 3 credits**

*Prerequisites: APK 4110, APK 4110L, PEP 3192, PET 4551 with grades of "C" or better or permission of instructor*

Focuses on exercise programs specifically designed for special populations including cardiac rehabilitation. Includes pharmacology, electrocardiography, pathophysiology of chronic diseases, exercise testing, prescription, and leadership for special cases.

### **Directed Independent Study (PET 4905) 1-3 credits**

### **Special Topics (PET 4930) 1-3 credits**

Topics not covered by other courses. Topics will vary.

### **Internship (PET 4946) 3-9 credits**

*Prerequisite: All ESHP program course work and permission of internship coordinator*

Supervised field experience in one or more of the following professional settings: recreation, administration, physical fitness leadership, health promotion, sports management. Supervision is provided by both the cooperating agency and university.

### **Practicum in Exercise Science and Health Promotion (PET 4947) 3 credits**

*Prerequisites: APK 4110 and HSC 2400 with grades of "C" or better*

Introduction to field experiences in exercise science and health promotion.

## **Exercise Science and Health Promotion Graduate Courses**

### **Advanced Exercise Physiology 1 (APK 6111) 3 credits 3 credits**

*Prerequisite: APK 4110*

An advanced study of human physiology and its interactions with physical activity and training. Emphasis will be placed on the study of the mechanisms underlying the acute and chronic responses to stress.

### **Advanced Exercise Physiology 2 (APK 6116) 3 credits**

*Prerequisite: APK 4110 or equivalent*

A comprehensive examination of the major organ systems contributing to the physiological response to exercise, both acute and chronic. Specifically, this course focuses on three of these systems:

cardiovascular, pulmonary, and neuromuscular.

### **Drug Abuse Behavior (HSC 5156) 3 credits**

Drug abuse behavior is examined from the biological, psychological and sociological perspectives. Epidemiological patterns are studied to identify contributory causal relationships in drug use behavior. Various interventions to control, prevent and manage the behavior are examined and evaluated to identify effective behavior change strategies.

### **Chronic Stress and Population Health (HSC 5177) 3 credits**

Exploration of a science-based study of stress as it relates to the mechanisms of psychological stressors to induce chronic health issues. In addition, issues related to the measurement, prevalence and intervention strategies are discussed. Epidemiological data are examined to determine disproportionate prevalence rates of health status among various population groups.

### **Human Obesity (HSC 5178) 3 credits**

This course focuses on advanced topics, including various factors contributing to weight gain that eventually leads to obesity in humans. Topics include the influences of biology, psychology and culture. This course also emphasizes the different research and evidence-based approaches and settings of prevention and intervention in weight loss and weight loss maintenance. Finally, the lectures, discussions and projects (critiques of articles and nutritional/behavioral assessments) given in this course enable students with advanced theoretical and practical knowledge to understand and evaluate obesity prevention interventions.

### **Personal and Community Health (HSC 5203) 3 credits**

Health problems and issues relating to the individual and to the community.

### **Teaching Health in Elementary School (HSC 5315) 3 credits**

Curriculum, theory, and practices in teaching health in the elementary school.

### **Advanced Concepts in Health Promotion (HSC 5587) 3 credits**

Analysis of the growing body of knowledge concerning health promotion and health behavior. Concepts of theory, research and practice are analyzed and used as a framework for advanced investigative study.

### **Evaluation of Health Promotion and Health Education Programs (HSC 6115) 3 credits**

Introduces procedures and skills essential to the evaluation of health promotion and health education programs in a variety of settings. Major areas include selecting evaluation design, issues, and steps involved in conducting an evaluation and communicating evaluation results.

### **Needs Assessment and Program Planning in Health Promotion (HSC 6248) 3 credits**

Provides students with the practical knowledge and skills to assess health resources and needs and to develop and implement health promotion programs in different settings.

### **Epidemiological Basis of Health (HSC 6505) 3 credits**

A study of the human and environmental factors that enhance or diminish health. An examination of the strategies for health enhancement will be emphasized.

### **Health Behavior, Health Education, and Health Promotion (HSC 6585) 3 credits**

Provides the fundamental concepts of health behavior within social and psychological contexts. Focus is on applying health behavior theories to development of effective health promotion programs. Health education skills addressing problems relating to lifestyle and physical health will be introduced.

### **Advanced Sport Nutrition (HUN 6247) 3 credits**

*Prerequisite: PET 3361 or equivalent*

An advanced study of the role of nutrition as a means to enhance performance in exercise and sport. Topics include principles of energy metabolism, nutrients in their use during exercise, regulation of metabolism by macro and micro nutrients and their role in weight control with athletes. The validity and safety of proposed ergogenic aids are also explored.

### **Exercise Neuroscience (PET 5077) 3 credits**

*Prerequisite: APK 4110*

A team-taught course highlighting the results of clinical exercise trials targeting the age-related loss in neuroprotective mechanisms and skeletal muscle function.

### **Strength and Conditioning Program Design (PET 5391) 3 credits**

*Prerequisite: PEP 3136 or equivalent*

Course teaches students how to design strength and conditioning programs for heterogeneous populations. Development of these programs is through the advanced periodized manipulation of acute training variables. The course covers high-level sport-specific exercise prescription that aids injury prevention and performance enhancement.

### **Advanced Exercise Testing and Prescription (PET 5521) 3 credits**

A study of the common techniques and equipment used in the exercise science field. Practical applications will be examined and discussed. Areas of emphasis will include electrocardiography, blood pressure, body composition, oxygen consumption, and respiratory measures.

### **Special Topics (PET 5930) 1-4 credits**

Special topics in exercise science and health promotion.

### **Practical Applications in Exercise Science and Health Promotion (PET 5947) 1-3 credits**

*Prerequisite: PET 4550, APK 6111, or permission of instructor*

Supervised clinical experience in fitness development and health enhancement education.

### **Behavior and Performance in Sport and Exercise (PET 6216) 3 credits**

A study of the social and psychological variables affecting sport and exercise performance. Emphasis will be placed on topics such as lifestyle assessment, theories of play, stress, motivation, aggression, and group cohesion.

### **Functional Biomechanics (PET 6346) 3 credits**

*Prerequisite: PET 4330C or equivalent*

Students gain knowledge of biomechanical measurement techniques involving movement and technique analysis, force-posture relationships, investigation of dynamic muscular parameters, and electromyography. Students apply the principles of biomechanics in an analysis, study, and reporting of selected exercise and sports movements.

### **Skeletal Muscle Physiology (PET 6382) 3 credits**

*Prerequisite: APK 4110 or permission of instructor*

This course explores skeletal muscle plasticity and adaptation to exercise and disease. Focus is on pre-clinical rodent models and humans, but also other experimental systems where appropriate. Emphasis is placed on skeletal muscle responses occurring at the cell and molecular level.

### **Research and Evaluation (PET 6505C) 3 credits**

A study of basic and applied research principles and methodology and their application to the testing and evaluation of physical performance and associated behaviors in recreation and athletics. This course serves as a capstone experience, which includes a mock research proposal (three chapters of a master's thesis) and a video presentation.

### **Directed Independent Study (PET 6905) 1-5 credits**

Current Issues in Exercise Science and Wellness Education (PET 6930) 3 credits

This course deals with the study of special topics of interest to the exercise science and wellness education fields. Topics will vary.

### **Master's Thesis (PET 6971) 1-6 credits**

### **Entrepreneurship in Health/Fitness Industry (SPM 6116) 3 credits**

Study of the management process of health/fitness programs in corporate, community, and commercial settings.

### **Educational Statistics (STA 6113) 3 credits**

(See [Educational Leadership and Research Methodology courses in the College of Education.](#))

## GEOSCIENCES/GEOGRAPHY

**Undergraduate Courses** /[link to graduate courses](#)

### **Environmental Issues in Atmospheric and Earth Science (ESC 3704) 3 credits**

Investigation of the complex interactions between humans and their environment. Environmental problems encompassing selected aspects of the atmosphere, hydrosphere, biosphere, and lithosphere: including deforestation, desertification, air and water quality, and processes of land degradation.

### **Environmental Science and Sustainability (EVR 1001) 3 credits**

This course is a survey of basic chemical, biological and physical principles of environmental science and their applications to environmental issues. This course is appropriate for students in a wide range of disciplines or programs. This is a General Education course.

### **Climate Change: The Human Dimensions (EVR 1110) 3 credits**

Anthropogenic climate change is often thought of from a scientific perspective. However, because it is human created, we also need to understand the human dimensions, such as how people (not only scientists) understand climate, how people affect climate, and how climate affects people. This course provides an inspirational perspective on human behavior, leaving students with a refined understanding of and appreciation for our common futures. This is a General Education course.

### **Environment and Society (EVR 2017) 3 credits**

Introduction to the study of major environmental problems and issues confronting modern society: economic and ecosystem concepts, population patterns and dynamics, resource use and misuse, environmental quality, and environmental citizenship. This is a General Education course.

### **Climate Change: Myths, Realities and Solutions (EVR 3114) 3 credits**

In this course, students learn the science behind the changing climate. Students also learn the common arguments and how to discern the truth. Finally, students learn about how resilient communities can be built that not only mitigate and adapt, but also thrive.

### **Hazards, Climate and People (EVR 4112) 3 credits**

This course introduces the interaction between society and natural hazards with special consideration given to perceptions of risk, vulnerability, preparedness and recovery. Additionally, the course explores climate change and uncovers its role as related to the magnitude and frequency of certain hazards. This is an Academic Service Learning (ASL) course.

### **Introduction to Coastal Freshwater Resources (EVR 4453) 3 credits**

In this course, students explore the intricacies of freshwater resources in coastal areas, examine the effects of natural and human activities on these resources and delve into the scientific and technological aspects associated with water resource development and conservation. Coastal freshwater systems in Florida, in particular, face numerous challenges such as global warming, sea-level rise, hurricane flooding, droughts, over-pumping, seawater intrusion and more.

### **World Geography (GEA 2000) 3 credits**

Examination of contemporary world problems through geographical analysis of physical, economic, social, and political systems of major countries and world regions. Credit will not be given for both GEA 2000 and GEA 3003. This is a General Education course.

### **Geography Study Abroad (GEA 2952) 1-6 credits**

*Prerequisite: Sophomore standing and permission of instructor*

Credit for enrollment in approved study abroad programs.

### **Geography of the Developing World (GEA 3003) 3 credits**

Survey of the physical, economic, political, and social systems that characterize the lesser developed nations of the world. Focus on problems affecting Latin America, Africa, the Middle East, South Asia, and China. Credit will not be given for both GEA 3003 and GEA 2000.

### **RI: Human-Environment Interactions in South Florida (GEA 4275) 3 credits**

This course is for Geography majors and majors in other related fields. Methods covered in previous Geosciences courses are emphasized in a collaborative learning environment. Critical and systematic thinking skills are used in a series of case-study projects. This is a research-intensive (RI) course.

### **Culture and Environment: Latin American and the Caribbean (GEA 4405) 3 credits**

This course explores Latin American and Caribbean environments and peoples. Particular attention is paid to natural regions, culture, colonization, religion, politics, agriculture, art, and globalization. Ideas and concepts are illustrated with PowerPoint presentations and videos.

### **Geography Study Abroad (GEA 4957) 1-6 credits**

*Prerequisite: Sophomore standing and permission of instructor*

Credit for enrollment in approved study abroad programs.

### **Introduction to Physical Geography (GEO 2200C) 3 credits**

The natural environment and its physical patterns - an introduction to landforms, soils, water, vegetation, and other physical features of the earth. Laboratory work.

### **Sea-Level Rise: Impacts and Responses (GEO 3342) 3 credits**

This course surveys causes and impacts of climate change and sea-level rise and the resulting impacts on metropolitan South Florida. Critical issues related to climate change and sea-level rise are examined.

### **Quantitative Methods (GEO 4022) 3 credits**

*Prerequisite: STA 2023 or equivalent*

Introduction to quantitative methods used in regional, economic and geographic analysis.

### **Water Resources (GEO 4280C) 3 credits**

*Prerequisite: GEO 2200C or GLY 2010C or equivalent*

Distribution, management, and use of water. Topics include agricultural and personal water use, wetland degradation and pollution.

### **Biogeography (GEO 4300) 3 credits**

Biogeography is the study of past and present distribution of plants and animals. The course combines the disciplines of biology and ecology with spatial and temporal aspects of geography. Class will be taught through lecture, in-class laboratory sessions with homework assignments, and field trips to local sites.

### **American Cultural Landscape (GEO 4422) 3 credits**

An examination of the cultural, economic and political forces that have given shape to the American landscape.

### **Tourism and Commercial Recreation (GEO 4542) 3 credits**

Geographic analysis of tourism and commercial recreation. Emphasis will be placed on spatial variation in tourist flows and tourism development, and the cultural, environmental, and economic impacts of tourism.

### **Urban Geography (GEO 4602) 3 credits**

Pattern of urban settlements. Types, functional areas, and the influence of distribution upon social, political and economic development. Emphasis on transportation, land use and the planning process.

### **Transportation and Spatial Organization (GEO 4700) 3 credits**

Transportation development, network configuration and allocation of transport flows. Analytical problems.

### **Directed Independent Study (GEO 4905) 1-3 credits**

*Prerequisite: Permission of instructor*

*Grading: S/U*

### **Directed Independent Research in Geosciences (GEO 4915) 1-6 credits**

Students work closely with research mentors to conduct research and inquiry in Geosciences.

Requirements for the course and the criteria for evaluation are agreed upon by the research mentor and the student.

### **Directed Independent Research in Geosciences (GEO 4916) 0-6 credits**

Students work closely with research mentors to conduct research and inquiry in Geosciences.

Requirements for the course and the criteria for evaluation are agreed upon by the research mentor and the student. *Grading: S/U*

### **Geosciences Honors Colloquium (GEO 4920) 1 credit**

*Prerequisite: Permission of instructor*

Exposes undergraduate students in the Honors track in Geography to various research topics and methodologies in the geosciences. Lectures given by a variety of speakers in the academic and professional realms of the geosciences. Repeatable for credit.

### **Special Topics (GEO 4930) 1-3 credits**

Specially arranged programs in remote sensing, GIS, and physical or human geography.

### **Field Experience (GEO 4948C) 1 credit**

*Prerequisites: Junior or senior standing; permission of instructor*

Direct observation, description, and analysis of selected field sites and associated topics. *Grading: S/U*

### **Introduction to Mapping and GIS (GIS 3015C) 3 credits**

Analysis of map properties and use of maps as sources of information. Essentials of location, scale, projection, direction, elevation, and general map elements. Introduction to map making in geographic information systems.

### **Photogrammetry and Aerial Photograph Interpretation (GIS 4021C) 3 credits**

Principles of aerial photography and photogrammetry including the photographic production process,

electromagnetic principles, history of aerial photography and aerial platforms, elements of visual image interpretation, and analog and digital (soft copy) photogrammetric methods.

### **Remote Sensing of the Environment (GIS 4035C) 3 credits**

*Prerequisite or Corequisite: GIS 3015C or equivalent*

Principles of photographic and electromagnetic remote sensing systems which detect, record and measure distributions of natural and cultural phenomena. Interpretation of aerial and orbital imagery for urban and environmental research and planning.

### **Digital Image Analysis (GIS 4037C) 3 credits**

*Prerequisite: GIS 4035C or equivalent*

Advanced remote sensing covering the analysis of digital satellite imagery of the Earth. Emphasis on the use of computer-based image processing systems.

### **Principles of Geographic Information Systems (GIS 4043C) 3 credits**

*Prerequisite: GIS 3015C or equivalent*

Basic concepts of geographic information systems. Evaluation of hardware and software components. Examination of data structures, and fundamental GIS functions. Application potential and laboratory experience with selected GIS systems.

### **Applications in Geographic Information Systems (GIS 4048C) 3 credits**

*Prerequisite: GIS 4043C or equivalent*

Advanced technical, implementation and application issues in geographic information systems. Geocoding, algorithms for 2- and 3-dimensional representations, and system planning and implementation issues.

### **Web GIS (GIS 4054C) 3 credits**

*Prerequisite: GIS 4043C or equivalent*

This course provides students with a comprehensive and up-to-date overview of Web GIS, including the basic concepts, principles, related fields and frontiers. It also provides the state-of-the-art technical skills to build Web GIS applications and the knowledge needed to choose from various Web GIS development options.

### **Programming in GIS (GIS 4102C) 3 credits**

*Prerequisite: GIS 4043C or equivalent*

The course introduces students to the basic programming concepts and methodologies for customizing and/or extending the available functions in the cutting edge GISystems and the pertinent statistical data analysis methods.

### **Spatial Data Analysis (GIS 4115C) 3 credits**

*Prerequisite: GIS 4043C*

This course introduces a variety of spatial quantitative methods commonly used in the GISciences.

### **Geospatial Databases (GIS 4118) 3 credits**

*Prerequisite: GIS 4043C*

Geospatial databases provide the functions of storing, managing and querying geospatial data and are essential components of Geographical Information Systems (GIS). This course covers the fundamental principles, techniques and methodologies for designing and implementing a geospatial database and querying and geoprocessing in geospatial databases.

### **Geovisualization and GIS (GIS 4138C) 3 credits**

*Prerequisite: GIS 3015C or equivalent*

Advanced map design with an emphasis on the visualization of spatial data in a virtual environment. Lab projects include animated maps, fly-through animations, and 3D visualizations.

### **Mobile GIS and Drone Technology (GIS 4140C) 3 credits**

*Prerequisite: GIS 3015C with minimum grade of "C"*

This course introduces students to essential methods of generating spatial data in the field using mobile GIS and Unmanned Aerial Systems (UAS). The fundamentals of Global Navigation Satellite Systems (GNSS) is covered as will the operation of various UAS, FAA regulations that govern their use and the production of photogrammetric derivatives for subsequent use in GIS.

### **Weather, Climate and Climate Change (MET 2010) 3 credits**

Introduction to the processes of Earth's surface and atmosphere that lead to distinctive weather patterns and climate zones as experienced by humanity. The course examines temperature and pressure, atmospheric circulation, precipitation and storms, the hydrological cycle, global climate and vegetation patterns, air pollution and climate change. This is a General Education course.

### **Atmospheric Hazards (MET 3052) 3 credits**

*Prerequisite: MET 2010*

This course delivers comprehensive knowledge of atmospheric hazards, emphasizing the physical explanation, historical precedents and the influence of climate change. Through the analysis of diverse case studies, students explore a range of atmospheric hazards including tropical cyclones, severe thunderstorms, tornadoes, droughts, heatwaves, wildfires, winter storms and compound and cascading events where multiple hazards intersect. Special attention is given to the ways in which climate change is altering the frequency and impact of these hazards.

### **Tropical Climatology (MET 3112) 3 credits**

*Prerequisite: MET 2010*

This course presents a comprehensive exploration of tropical climatology. The focus is on the fundamental principles governing tropical weather and climate, the processes driving the circulation, severe weather events, and the pivotal role of the tropical climate in shaping global circulation patterns.

### **Climate Data Applications (MET 4142) 3 credits**

*Prerequisite: MET 2010*

This course offers a comprehensive introduction to the world of climate data. Students explore the differences between various types of climate data, understand their sources and multiple formats and gain hands-on experience in data handling, visualization and interpretation. With an emphasis on practical applications, students develop basic programming skills (Python) to assess, analyze and utilize climate data effectively for research and decision-making.

## **Geography Graduate Courses**

### **Environmental Restoration (EVR 6334) 3 credits**

*Prerequisite: GEO 4300 or PCB 4043, or permission of instructor*

Course introduces students to the rapidly expanding practice of restoring degraded ecosystems and landforms through a mixture of lecture, discussion, field visits, and individual research projects.

### **Restoration Implementation and Management (EVR 6358) 3 credits**

Restoration projects require the approval of multiple government agencies and cooperation of affected landowners and stakeholders at every phase. This course covers the legal aspects of government approval, creating communication plans for coalition building and collaboration with stakeholders, conflict resolution and ethics in restoration. The course uses a combination of discussion of academic literature, lecture, case studies and guest speakers, including from state and federal agencies, consulting firms and non-governmental organizations.

### **Paleoenvironmental Reconstruction (EVR 6931) 3 credits**

This seminar broadly examines paleoenvironmental research with a focus on environmental and climate change across the Holocene. Emphasis on the application of proxies and interpreting past human-environment interaction. This seminar broadly examines paleoenvironmental research with a focus on environmental and climate change across the Holocene. Emphasis on the application of proxies and interpreting past human-environment interaction.

### **Defining and Measuring Global Change Vulnerability (EVR 6938) 3 credits**

*Prerequisite: Permission of instructor*

This seminar introduces graduate students to the concepts and methods associated with scholarly research on global change vulnerability. This emerging literature derives from decades of research on coupled human-environment interactions. The fundamental premise is that there is a reciprocal relationship between people and their biophysical environments.

### **Human-Environmental Interactions (GEA 6277) 3 credits**

This course provides graduate students in geography with an environment to practice the various methods and approaches learned in their graduate program. It uses a multidisciplinary approach to explore diverse aspects of human-environment interactions in a specified region. This is an Academic Service Learning (ASL) course.

### **Biogeography (GEO 5305) 3 credits**

Biogeography is the study of distributions of organisms and the processes responsible for the patterns. This course examines theories concerning spatio-temporal processes and patterns, populations, communities, ecosystems, biodiversity, disturbance, succession, speciation and conservation. Classes are taught by lecture, discussion of academic literature and field-based research at local sites.

### **Geographic Analysis of Population (GEO 5435C) 3 credits**

*Prerequisite: GEO 4022 or equivalent*

Examination of theory and method in the geographical analysis of population. Focus on population distribution, its composition and causes, consequences, and projection of change. Mathematical and statistical models.

### **Research in the Geosciences (GEO 6118) 3 credits**

*Prerequisite: Admission to graduate program in geosciences*

An introduction to and overview of research in the geosciences with an emphasis on department research interests. This seminar is recommended strongly for all beginning geoscience graduate students.

### **Plants and People (GEO 6317) 3 credits**

*Prerequisite: Permission of instructor*

Course explores interaction between humans and plants - how people use plants in terms of traditional rural resource use and modern urban use. Topics covered include medicine, food, gardens, agriculture, religion, construction, ornamentation and fuel.

### **Culture, Conservation, and Land Use (GEO 6337) 3 credits**

Course considers relationship between humans and environment with emphasis on current cultural practices and ideologies concerning preservation and consumption from both local and global perspectives. A portion of the course is designed to permit students to reflect on the personal roles all of us play in relation to the ecosystems in which we live.

### **Seminar in Urban Area Analysis (GEO 6608) 3 credits**

An analysis of the distribution, structure, patterns of land use and transportation, economic base, inter- and intra-relationships, and other spatial aspects of urban phenomena. Emphasis upon modern data acquisition techniques, quantitative analysis and measurement, and graphical methods of analysis and presentation. Content will vary; may be repeated.

### **Directed Independent Study (GEO 6908) 1-3 credits**

Individually formulated research project pursued under the direction of a staff member competent in the particular phase of geographic study. Physical parameters, theories and applications of photography, radar, thermal infrared and other data-gathering systems will be investigated. Conversion of data for cartographic or computer graphics display will be studied. Content will vary (no more than 3 credits may be applied to the minimum degree requirements).

### **Graduate Research (GEO 6918) 1-12 credits**

*Prerequisite: Permission of instructor*

Supervised research in the geosciences. *Grading: S/U*

### **Geosciences Colloquium Series (GEO 6920) 1 credit**

This course is designed to help incoming graduate students develop an awareness of and an appreciation for the multiple research perspectives/approaches that can be brought to studies in geosciences. It is organized around presentations in the department's colloquium series, which showcases geoscience-related research by faculty and graduate students in and outside the department.

*Grading: S/U*

### **Seminar in Special Topics in Regional or Systematic Geography (GEO 6938) 3 credits**

A study of selected topics that are central to the advanced study of geography: construction, analysis, and synthesis of regional systems. It includes techniques, methodology, and procedures for defining and solving problems of a geographic nature and involves case study illustrations. Specific content will vary.

### **Master's Thesis (GEO 6971) 1-6 credits**

Original investigation leading to scholarly analysis of a significant geographic topic in the area of specialization which will be supervised by a major professor and a graduate committee. *Grading: S/U*

### **Advanced Research (GEO 7978) 1-9 credits**

*Prerequisite: Doctoral students only*

Dissertation related research prior to taking the candidacy exam. May be repeated in subsequent semesters.

### **Dissertation (GEO 7980) 1-9 credits**

*Prerequisite: Doctoral students only*

Dissertation related research taken after passing the candidacy exam.

### **Digital Image Analysis (GIS 5033C) 3 credits**

*Prerequisite: GIS 4035C or GIS 5038C*

Course is the second in a three-course sequence that follows the national model for core curriculum in remote sensing. Digital techniques for processing and analyzing remotely sensed imagery include image enhancement, image classification, ground truthing, and accuracy assessment.

### **Remote Sensing of the Environment (GIS 5038C) 3 credits**

*Prerequisite: GIS 3015C*

The first of a three-course sequence, this one covers principles and concepts of remote sensing, aerial photograph and satellite image interpretation and analysis. Includes a survey of remote sensing data sources, hands on lab projects in a GIS environment and an introductory research project.

### **Principles of Geographic Information Systems (GIS 5051C) 3 credits**

*Prerequisite: GIS 3015C or equivalent*

Basic concepts of geographic information systems. Evaluation of hardware and software components. Examination of data structures and fundamental GIS functions. Application potential and laboratory experience with GIS systems. Basic GIS project design and implementation.

### **Applications in Geographic Information Systems (GIS 5100C) 3 credits**

*Prerequisite: GIS 4043C or GIS 5051C or equivalent*

Advanced techniques for raster modeling, network systems, and statistical analysis in geographic information systems. System planning and implementation issues in applying GIS in diverse areas. GIS-based spatial modeling issues.

### **Programming in Geographic Information Systems (GIS 5103C) 3 credits**

*Prerequisites: GIS 4043C or 5051C*

Course covers basic computer programming concepts and methodologies. Issues for customizing and/or extending available functions in selected cutting edge GIS are discussed along with advanced

geoprocessing modeling and data analysis with scripts. Project design and development are addressed.

### **Photogrammetry and Aerial Photography Interpretation (GIS 6028C) 3 credits**

This course introduces concepts, theories and applications of photogrammetry. It covers history, principle, geometry, stereoscopy of aerial photography and fundamentals of analytical photogrammetry.

### **LiDAR Remote Sensing and Applications (GIS 6032C) 3 credits**

*Prerequisites: GIS 5051C; Geosciences graduate students only*

Introduces LiDAR principles, sensors and platforms, data processing and analysis and applications. Students master basic skills of LiDAR needed to leverage the commercial LiDAR sources and information products in a broad range of applications.

### **Web GIS (GIS 6061C) 3 credits**

*Prerequisite: GIS 4043C or GIS 5051C*

This course provides students with a comprehensive and up-to-date overview of Web GIS, including the basic concepts, principles, related fields and frontiers. It also provides state-of-the-art technical skills to build Web GIS applications and the knowledge needed to choose from various Web GIS development options.

### **Geospatial Databases (GIS 6112C) 3 credits**

*Prerequisite: GIS 4043C or GIS 5051C or equivalent*

Geospatial databases provide the functions of storing, managing and querying geospatial data and are an essential component of geographical information systems (GIS). This course covers the fundamental principles, techniques and methodologies for designing and implementing a geospatial database and querying and geoprocessing in geospatial databases. Students receive hands-on experience via labs and projects.

### **Topics in Geoinformation Science (GIS 6120) 3 credits**

*Prerequisites: GEO 4022 and GIS 4043C or equivalent*

Technical, operational, and management issues in geographic information systems. Examination of GIS function algorithms, data structures, error analysis, and other topics in GIS applications.

### **Hyperspectral Remote Sensing (GIS 6127) 3 credits**

*Prerequisites: GIS 4035C and 4037C or GIS 5033C and 5038C*

Course introduces state-of-the-art techniques for the processing and interpretation of hyper- and ultraspectral data with a focus on thematic information extraction from airborne and satellite-based hyperspectral sensors. Course covers the full hyperspectral remote sensing processing chain from data

acquisition and calibration to image processing and thematic mapping.

### **Spatial Data Analysis (GIS 6306) 3 credits**

*Prerequisite: GIS 5051C*

Introduces a range of spatial statistical methods commonly used in the analysis of geo-spatial data in GISciences. Emphasis on gaining insight into the overall framework for analysis and developing an understanding of various concepts with in-depth treatment of select techniques. Methods are mainly discussed within the context of GIS technology.

## **GEOLOGY**

**Undergraduate Courses** /[link to graduate courses](#)

### **The Blue Planet (ESC 2000) 3 credits**

Using the scientific method, critical thinking skills and data analysis, this course will examine the fundamental processes of the Earth system, composed of an atmosphere, hydrosphere, lithosphere, biosphere and exosphere, through time. The course will also explore interactions between these spheres, including critical analysis of scientific theories and emphasizes Earth's connections with humans. This is a General Education course.

### **Physical Geology/Evolution of the Earth (GLY 2010C) 4 credits**

Using the scientific method, critical thinking skills and data analysis, this course examines the fundamental processes of the Earth system, composed of an atmosphere, hydrosphere, cryosphere, lithosphere, biosphere and exosphere, through time. The course also explores interactions between these spheres, including critical analysis of scientific theories and emphasizes lithospheric connections with humanity. This is a General Education course.

### **The History of the Earth and Life (GLY 2100) 3 credits**

An introduction to historical geology. The study of ancient continents and life forms, with special emphasis on the geologic history of the North American continent. This is a General Education course.

### **Geology Study Abroad (GLY 2952) 1-6 credits**

*Prerequisite: Sophomore standing*

Credit for enrollment in approved study programs.

### **Geology of Florida (GLY 4155C) 4 credits**

*Prerequisite: GLY 2010C or equivalent*

General review of the geological evolution of Florida from the Paleozoic to the recent. Emphasis is given to the local geomorphology and stratigraphy, and to evolution, extinction, and systematics of the major fossils. Also discussed are theories on the origin of the Everglades, fossil and living coral reef tracts, and the regional hydrogeology. Lecture, laboratory and field studies.

### **Paleontology (GLY 3603C) 3 credits**

*Prerequisites: GLY 2100 and an introductory biology course*

An introduction to the study of fossil plants and animals. Emphasis will be placed on the taxonomy and classification of major plant and animal phyla represented as fossils, and on the evolution of life as shown by the fossil record. Lecture, laboratory and field studies.

### **Coastal and Marine Science (GLY 3730) 3 credits**

Introduction to the study of coastal and marine environments, particularly as they are related to human use and management of biophysical resources. Focuses on materials and dynamic processes of ocean basins, sediments, and seawater; including ocean-climate linkage, greenhouse effect, and sea-level change.

### **Cooperative Education - Geology (GLY 3949) 1-3 credits**

*Grading: S/U*

### **Environmental Geochemistry (GLY 4241) 3 credits**

*Prerequisite: One semester of college chemistry*

Examination of current geochemical problems affecting the earth at global, regional, and local scales. Discussion of the natural geochemical background of substances including a review of geochemical principles.

### **Mineralogy and Petrology (GLY 4310C) 4 credits**

*Prerequisite: CHM 2045, CHM 2054L, GLY 2010C and PHY 2048*

Identification and classification of rocks and minerals in hand samples and thin sections using their physical and chemical properties. Discussion of elementary crystallography, symmetry and chemical bonding in controlling physical and chemical mineral properties. Association of igneous and metamorphic rocks to structures, landforms and tectonic settings. Use of mineral suites and textures to constrain rock crystallization and deformation history. Discussion of chemical equilibrium and the phase rule, and x-ray mineralogy techniques. Lecture and laboratory.

### **Ancient Carbonate Platforms (GLY 4351C) 3 credits**

*Prerequisite: Permission of instructor*

This course introduces students to the geology of the carbonate platforms including types of platforms,

types of sediment, platform sediment zonation and interpretation of carbonate sedimentary record. Includes nine- to eleven-day field trip to western Texas and southern New Mexico.

### **Structural Geology (GLY 4400C) 4 credits**

*Prerequisite: GLY 2010C*

Structural features of the earth's crust and the deformational forces responsible. Structural aspects of rock mechanics. Applications to mineral exploration and mining, hydrogeology, and engineering geology. Lecture and laboratory.

### **Solid Earth Geophysics (GLY 4451) 3 credits**

Course gives an introduction to the fundamental principles of each major branch of geophysics: seismology, gravitation, magnetism, and electrical and thermal properties. Emphasis is given to geodynamics and plate tectonics.

### **Stratigraphy and Sedimentation (GLY 4500C) 4 credits**

*Prerequisites: GLY 2010C and GLY 2100*

An introduction to sediments, sedimentary processes, and the stratigraphic record. Focus will be on methods of stratigraphic analysis, transport and deposition of sedimentary environments, and types and compositions of sedimentary rocks. Lecture and laboratory.

### **Geomorphology (GLY 4700C) 3 credits**

An introductory study of landscapes, how they formed in response to earth-building and erosional processes and their relationship to underlying geology. Applications of landform analysis to geological mapping, mineral and petroleum exploration, geological and ocean engineering. Global landscapes. Slide illustrated lectures and laboratory.

### **Geology Field Methods (GLY 4750C) 3 credits**

*Prerequisite: Permission of instructor*

Geologic survey techniques, identification and description of rocks, structures and fossils, and report writing. Includes an out-of-state field trip (in southeast U.S.) plus several weekend trips to southern Florida localities. A fee is charged for field trips.

### **Field Camp (GLY 4790) 6 credits**

*Prerequisite: Approval by department's undergraduate committee*

Exercises in field mapping, air photo interpretation, stratigraphic analysis, structural and hydrologic problems. The camp is held in the Durango, Colorado, area during mid-May to mid-June (summer term A). In addition to the University's standard credit registration fees, a separate camp fee is charged. For 2001 the fee was \$1300. Food and other personal expenses are additional.

### **Hydrogeology (GLY 4822) 3 credits**

*Prerequisites: GLY 2010C, MAC 2311, and CHM 2045 or permission of instructor*

Strong environmental emphasis. Analytical study of the principles and applications of ground and surface water flow. Quantitative prediction of leachate attenuation. Flow net theory. Well hydraulics. Water quality, management and legislation.

### **Groundwater Numerical Modeling (GLY 4832C) 3 credits**

*Prerequisite: GLY 4822 or equivalent*

This course introduces students to the theory and practice of groundwater modeling, with emphasis on model conceptualization, construction, simulation and calibration using Groundwater Modeling System (GMS), an advanced and popular 3D simulation software for groundwater flow and transport modeling. The class comprises three parts: a rapid overview/review of groundwater mechanics, an introduction to finite-difference methods and application of GMS.

### **Directed Independent Study (GLY 4905) 1-3 credits**

*Prerequisite: Requires prior arrangement with faculty member*

*Grading: S/U*

### **Directed Independent Research in Geosciences (GLY 4915) 1-6 credits**

Students work closely with research mentors to conduct research and inquiry in Geosciences. Requirements for the course and the criteria for evaluation are agreed upon by the research mentor and the student.

### **Directed Independent Research in Geosciences (GLY 4916) 0-6 credits**

Students work closely with research mentors to conduct research and inquiry in Geosciences. Requirements for the course and the criteria for evaluation are agreed upon by the research mentor and the student. *Grading: S/U*

### **Special Topics (GLY 4930C) 1-3 credits**

Specially arranged programs in geology.

### **Field Experience (GLY 4948C) 1 credit**

*Prerequisites: Junior or senior standing; permission of instructor*

Direct observation, description, and analysis of selected field sites and associated topics. *Grading: S/U*

### **Geology Study Abroad (GLY 4957) 1-6 credits**

*Prerequisite: Sophomore standing*

Credit for enrollment in approved study programs.

## **Geology Graduate Courses**

### **Paleoenvironments and People (EVR 6417) 3 credits**

This course examines paleoclimate events and past human-environment interaction primarily during the Holocene. Through exploring how people have modified their environment and responded to notable climate stress events such as the Younger Dryas, Terminal Classic Drought and Little Ice Age, students gain experience and skills to consider how future climate scenarios may affect modern societies.

### **Environmental Geochemistry (GLY 5243) 3 credits**

*Prerequisite: One year of college chemistry*

Examination of current geochemical problems affecting the earth at global, regional, and local scales. Discussion of the natural geochemical background of substances including a review of geochemical principles.

### **Shore Erosion and Protection (GLY 5575C) 3 credits**

Study of geomorphology and use of coasts, sediment budgets and dune-beach interaction, effects of engineering structures, coastal hydraulics, tides and currents, waves and structures, coastal water level fluctuations, shore erosion control, beach replenishment, coastal protection and restoration, fate of replenished beaches.

### **Marine Geology (GLY 5736C) 3 credits**

Theoretical and applied earth science in the marine environment. Introduction to the history of marine geology, structure and evolution of continental margins and the worlds basins in terms of modern plate tectonic theory, ocean sediments and sedimentary regimes, geologic effects of waves and currents, dynamics of coastal environmental processes, fluctuations of mean sea level through time, ocean mineral resources.

### **Advanced Topics in Applied, Coastal, and Hydrogeology (GLY 5934) 3 credits**

Occasional advanced courses in specialized areas of engineering, coastal and hydrogeology not fully covered in other program courses.

### **Advanced Environmental Geochemistry (GLY 6246) 3 credits**

A study of the principles of geochemistry as they are applied to environmental problems relating to water. Hydrogeology includes study of contamination of surface and underground terrestrial water and coastal waters. The course will familiarize students with the methods, capabilities, and jargon of

geochemistry as it applies to their areas of interest.

### **Comparative Carbonate Sedimentology (GLY 6352) 3 credits**

*Prerequisites: Permission of instructor*

Dedicated to the study of carbonate deposits in the process of formation, methods of studies, examination of sediment types and factors that control their distribution and tracking depositional environments, rocks and calcareous organisms into the recent geologic past (Pleistocene and Holocene).

### **Environmental Geophysics (GLY 6457 ) 3 credits**

*Prerequisite: Graduate standing in geology or related discipline or permission of instructor*

An introduction to near-surface geophysical methods for mapping the ground at shallow depths. Emphasis on electromagnetic and electrical methods such as ground penetrating radar (GPR) and resistivity imaging specifically for environmental applications. A field-based case study using an integrated array of real geophysical data sets collected in a local site will be conducted to give students a practical approach to applied geophysical methods.

### **Coastal Environments (GLY 6737) 3 credits**

Dynamics of depositional systems in coastal environments. Emphasis on variability of sediments, geomorphology and littoral processes associated with coastal dunes, lagoons, estuaries, beaches and nearshore environments.

### **Global Environmental Change (GLY 6746) 3 credits**

An introduction to the study of global climate change through time. Included and in-depth studies of the causes of and evidence for past environmental changes, major perturbations of global natural environmental systems, the effects of sea level changes, solar variations, and planetary dynamics on climate, and details of Quaternary paleoclimate models.

### **Groundwater Solute Transport Modeling (GLY 6828) 3 credits**

*Prerequisite: GLY 6836 or equivalent*

Studies the mechanisms that govern the movement of water and pollutants in aquifers. Develops a complete conceptual model and overviews a sound mathematical model of flow and pollution in saturated aquifers, including the relevant processes and internal relations, and identifies their parameters. Introduction of numerical methods. Uses documented analytical and numerical models for the solution of groundwater flow with solute. Extensive hands-on experience on PC and Workstation.

### **Modeling Groundwater Movement (GLY 6836) 3 credits**

*Prerequisite: GLY 4832C or equivalent*

Focuses on hydrogeologic modeling, considers groundwater flow space and time scale, and surface-ground waters interaction. Evaluates methods of analysis for the rainfall-runoff process, evapotranspiration and soil moisture, deep percolation, river-aquifer interaction and flow routing, and catchment basin modeling. Construction of the conceptual groundwater model, defining the mathematical solution, and application of the numerical method of solution. Surveys numerical methods. Overviews the parameter identification. Uses documented numerical models and computer codes for the solution of groundwater problems. Extensive hands-on experience on PC and Workstation.

**Methods in Hydrogeology (GLY 6838) 3 credits**

*Prerequisite: GLY 4822 or equivalent with a grade of "C" or better, or permission of instructor*

Designed to introduce students to practical aspects of hydrogeology, including project design, field methods and data analysis.

**Coastal Hazards (GLY 6888) 3 credits**

A global review of natural and human-induced hazards as they affect coastal zones, including the identification of site specific and regional coastal hazards. Mitigation and management are related to individual and community hazard perceptions, risk assessment and response. Emphasis is placed on the susceptibility of the SE Florida region to oil (chemical) spills, coastal floods due to extreme events, and to the potential impacts of global sea level rise.

**Benchmark Developments in Hydrogeology (GLY 6897) 3 credits**

*Prerequisite: GLY 4822 or permission of instructor*

This seminar examines changes in humans' understanding of groundwater through time beginning with ancient uses of groundwater, continuing through the present and ending with projections about the future of hydrogeologic research. Students will solidify their knowledge of the fundamental principles of hydrogeology and will broaden their understanding of the history and philosophy of science.

**Directed Independent Study (GLY 6908) 1-3 credits**

Faculty supervised directed independent study. *Grading: S/U*

**Thesis Seminar (GLY 6931) 3 credits**

Methods, procedures and policies for preparing, presenting, defending, and completion of a thesis or dissertation. Focus on the framework and scientific style for scholarly reports and composition. Consideration of title; abstract; introduction; data selection, correlation and arrangement; methods and experiment; results; discussion; summaries; and conclusions. Practica provide weekly experience to

steps in thesis preparation.

### **Special Topics in Applied Geology (GLY 6934) 1-4 credits**

Occasional special topics and courses in specialized areas of coastal geology, hydrogeology, engineering geology and environmental geology.

### **Master's Thesis (GLY 6971) 1-6 credits**

*Grading: S/U*

### **Physical and Geological Oceanography (OCE 6097) 3 credits**

*Prerequisite: Permission of instructor*

Provides an overview of the atmospheric, physical and geological processes that govern our oceans and coastal margins.

## **INTERDISCIPLINARY STUDIES**

### **Undergraduate Courses**

#### **Introduction to Animal Science (ANS 3006C) 4 credits**

*Prerequisites: BSC 1010, 1010L, 1011, 1011L and CHM 2045, 2045L, 2046, 2046L*

Overview of nutrition, physiology, genetics, growth and development related to the equine, beef, swine, dairy, aquatic and poultry industries. Overview of the farm animal, poultry and aquatic industries. Lab consists of relevant field experiences in these industries.

#### **Introduction to Undergraduate Research 1: Lower Division (IDS 1911) 1 credit**

*Prerequisite: Permission of instructor*

This course introduces first-year students to academic research and prepares them for engagement in undergraduate research.

#### **Introduction to Undergraduate Research 2: Lower Division (IDS 1913) 1 credit**

*Prerequisites: IDS 1911 with minimum grade of "C," permission of instructor*

This course introduces first-year students to the process of discovery as it relates to formulating research questions, preparing a research poster and developing research communication skills.

#### **Health Science 1: Foundation (IDS 2122) 3 credits**

An introductory course into interprofessional education and collaborative practice (IPECP) within the world of healthcare through specific competencies. Students will be exposed to team-based learning through understanding roles, responsibilities, ethics, communication and teamwork.

### **Human Mission to Mars (IDS 2382) 3 credits**

This course is designed to explore the challenges and opportunities offered by the planned human missions to Mars, covering topics such as human space travel to the red planet, the impact of spaceflight on the human body, the effects of long-term spaceflight on human consciousness, human relationships and groups of humans, the key components of building and functioning a Martian habitation module, growing food on Mars and the ethical and political issues related to a human mission to Mars. To address problems and challenges associated with these topics, students explore the process of scientific inquiry and creativity applying the scientific method to propose solutions to problems in these various areas. All the while, they also embrace the uncertainty associated with the critical evaluation of these problems and challenges. This is a General Education course.

### **Undergraduate Research Experience (IDS 2912) 0 credits**

*Prerequisite: Permission of instructor*

This course is designed to provide skill building for undergraduate research. Students define research topics, formulate research questions, conduct a literature review, prepare research proposals and develop research communication skills. Students may enroll in this course up to two times. *Grading: S/U*

### **Health Science 2: Evaluating the Evidence (IDS 3184) 1 credit**

*Prerequisite: IDS 2122*

*Corequisite: IDS 3893*

In this course students are introduced to evidence-based health care and the process of identifying and evaluating the evidence.

### **Health Science 3: Capstone (IDS 3893) 1 credit**

*Prerequisite: IDS 2122*

*Corequisite: IDS 3184*

In this course students evaluate and disseminate evidence related to a health issue.

### **Premed Success (IHS 3124) 2 credits**

*Prerequisites: 8 credits of general biology and chemistry*

Designed to help pre-health professional students (medical, dental, pharmacy, veterinary, etc.) negotiate the complex and often confusing world of medical school applications, admission tests, admission essays, interviews, financing medical school and much more. The scope of this course can be expanded to fit student needs and interests.

### **Basic Clinical Skills for Pre-Health Students (IDS 3125) 2 credits**

*Prerequisite: Minimum overall GPA of 3.0*

Provides students with basic clinical skills that will ensure more meaningful medical experiences (through shadowing or volunteering) prior to entering a health-related graduate program. Students are introduced to medical professionalism and gain basic medical knowledge through training on blood borne pathogens, vital signs, CPR, HIPAA, EKGs and taking patient histories.

**Fundamentals of Research and Inquiry (IDS 3910) 1 credit**

*Prerequisite: Permission of instructor*

Introduction to scientific research. Students learn and apply the scientific method to their own research questions. The course focuses on scientific literacy such as reading scientific papers, interpreting and analyzing data and communicating scientific results. The course promotes and facilitates the matching of students to research mentors, but cannot guarantee the matching.

**Introduction to Undergraduate Research Design (IDS 3911) 1 credit**

*Prerequisite: Permission of instructor*

Introduction to research exposure and skill building focused on the scientific process and nature of discovery. Students define research topics, formulate research questions, develop research proposals, prepare experimental plans and develop research communication skills.

**Medical Shadowing Internship (IDS 3940) 1 credit**

*Prerequisites: IDS 3125 and a minimum GPA of 3.0*

Designed for students interested in becoming healthcare professionals such as medical doctors, dentists, pharmacists and veterinarians. Students explore the medical field by shadowing selected healthcare professionals in a variety of settings and observing their daily activities, obtaining limited hands-on experience. The scope of this course can be expanded to fit student needs and interests. May be repeated for credit for up to six semesters.

**Science Internship (IDS 3941) 1-3 credits**

*Prerequisite: Permission of instructor*

This is an internship course that offers students "real-world" experience in a structured format within specific science disciplines (such as biology, psychology, chemistry, geosciences, physics or mathematics) and which are related to each student's science major. *Grading: S/U*

**Artificial Intelligence Applications in Biology (IDS 4139) 3 credits**

*Prerequisites: BCH 3033 or PCB 3063 or permission of instructor*

This course introduces the underlying concepts, techniques and potential of artificial intelligence (AI) in biology. It explores the application of AI and machine learning (ML) methods and algorithms to selected areas in biology. The course also exposes students to contemporary interactive tools to build

AI and ML solutions without the need for extensive programming.

### **Directed Independent Study (IDS 4906) 1-3 credits**

*Prerequisite: Permission of instructor*

Study of topics relating to the special needs and interests of individual students. *Grading: S/U*

### **Special Topics (IDS 4934) 1-3 credits**

Special topics of interest to science students.

### **Current Issues in Biomedicine (ISC 1430) 1 credit**

Course is designed for pre-health profession freshmen who participate in the Freshman Learning Communities. This course is an introduction to current/controversial issues in the medical field that helps students understand the innovations on the horizon in medicine. Students will leave the course more knowledgeable about cutting-edge research in biomedicine and the various career paths in this field.

### **Introduction to Preprofessional Studies (PCB 3083) 3 credits**

*Prerequisites: 8 credits general chemistry, 8 credits general biology, permission of instructor*

*Corequisite: PCB 3083L*

To familiarize premedical or allied field students with the requirements, demands and rewards of a career in medicine. The course features lectures about a variety of medical disciplines.

### **Introduction to Preprofessional Studies Lab (PCB 3083L) 1 credit**

*Prerequisite: Permission of instructor; Corequisite: PCB 3083*

Shadowing of physicians in hospital and office settings, including visits to local facilities and observations of actual medical procedures.

## **MATHEMATICS AND STATISTICS**

Courses offered by the Department of Mathematics and Statistics may require the use of a calculator or computer software. Mathematics majors may not count mathematics courses taken as pass/fail as part of their program.

*Prerequisite courses must be completed with grades of "C" or better.*

**Mathematics Placement Assessment (ALEKS PPL):** All entering freshmen, as well as entering transfer students with no prior college-level course work in mathematics, are required to take an online

exam to determine placement in their first mathematics course at FAU. Students may take the exam multiple times, with the highest score used to determine placement. There is a nominal charge for the exam. It is highly recommended that entering transfer students with prior college-level course work in mathematics, but who need additional mathematics courses, also take the exam (though it is not a requirement). For more information, visit [here](#).

**Undergraduate Courses** /[link to graduate courses](#)

**\*Prerequisite courses must be completed with grades of "C" or better.**

**\* RI: Introduction to Data Science (CAP 3786) 3 credits**

*Prerequisite: COP 2220 or MAD 2502*

This research-intensive (RI) course surveys the foundational topics in data science: Data acquisition, data exploration and visualization, data analysis with statistics and machine learning, data at scale via working with big data. The course uses statistical software to work through real-world examples that illustrate these concepts. Concurrently, students learn statistical and mathematical foundations that power the data scientific approach to problem solving.

**\* Cryptography and Information Security (CIS 4362) 3 credits**

*Prerequisites: MAS 2103 and MAD 2502*

Classical cryptology, entropy. Stream and block ciphers. Public-key versus symmetric cryptography, one-way and trap-door functions. Primality and factorization, DLP, Diffie-Hellman, RSA and ElGamal cryptosystems. Issues of computer and network security. Secure protocols, identification, authentication, digital signatures, secret sharing schemes.

**\* Modern Analysis (MAA 4200) 3 credits**

*Prerequisites: MAC 2313, MAD 2104 and MHF 3202*

Basic properties of real numbers. Functions. Limits and properties of continuous functions. Differential calculus.

**\* Introductory Analysis 1 (MAA 4226) 3 credits**

*Prerequisite: MAS 3156*

Course covers real and complex numbers, metric spaces, sequences and series, continuity, differentiation and integration of functions of one or more real variables.

**\* Introductory Analysis 2 (MAA 4227) 3 credits**

*Prerequisite: MAA 4226*

Continuation of Introductory Analysis 1. Course covers real and complex numbers, metric spaces,

sequences and series, continuity, differentiation and integration of functions of one or more real variables.

**\* Introductory Complex Analysis (MAA 4402) 3 credits**

*Prerequisite: MAC 2313*

An introduction to complex analysis, analytic functions, Taylor series, Cauchy's theorem. Calculus of residues. Recommended for engineering and science majors.

**\* College Algebra (MAC 1105) 3 credits**

Gordon Rule, computational

*Prerequisite: MAT 1033 or MGF 1130 or MGF 1131 or suitable placement score*

Through this course, student will develop problem solving skills, critical thinking, computational proficiency, and contextual fluency through the study of equations, functions, and their graphs. Emphasis will be placed on quadratic, exponential, and logarithmic functions. Topics will include solving equations and inequalities, definition and properties of a function, domain and range, transformations of graphs, operations on functions, composite and inverse functions, basic polynomial and rational functions, exponential and logarithmic functions, and applications. This is a General Education course.

**\* Trigonometry (MAC 1114) 3 credits**

Gordon Rule, computational

*Prerequisite: MAC 1105*

Theory of trigonometric functions and their inverses, graphs, identities and conditional equations, solutions of triangles, complex numbers and polar representation. Additional topics as time permits. This is a General Education course.

**\* Precalculus Algebra (MAC 1140) 3 credits**

Gordon Rule, computational

*Prerequisite: MAC 1105*

*Recommended Corequisite: MAC 1114*

Polynomial, rational, and other algebraic functions; exponential and logarithmic functions; piecewise-defined functions. Properties and graphs of functions. Polynomial and rational inequalities. Conic sections. Matrices and determinants. Sequences and series. Mathematical induction. Binomial theorem. Applications. This is a General Education course.

**\* Precalculus Algebra and Trigonometry (MAC 1147) 4 or 5 credits**

Gordon Rule, computational

*Prerequisite: MAC 1105*

Polynomial, rational, and other algebraic functions; trigonometric, inverse trigonometric, exponential and logarithmic functions; piecewise-defined functions. Properties and graphs of functions. Polynomial and rational inequalities. Trigonometric identities. Conditional trigonometric equations. Conic sections. Solutions of triangles. Vector algebra. Parametric equations. Polar coordinates. Matrices and determinants. Sequences and series. Mathematical induction. Binomial theorem. Applications. This is a General Education course.

**\*Prerequisite courses must be completed with grades of "C" or better.**

**\* Introduction to Calculus with Applications (MAC 2210) 4 credits**

*Prerequisite: MAC 1105*

This course provides an overview of the salient math topics most heavily used in the core sophomore-level STEM courses. These include algebraic manipulation, trigonometry, vectors and complex numbers, sinusoids and harmonic signals, systems of equations and matrices, differentiation, integration and differential equations. All math topics are presented within the context of applications. This is a General Education course.

**\* Methods of Calculus (MAC 2233) 3 credits**

*Gordon Rule, computational*

*Prerequisite: MAC 1105*

A descriptive and intuitive introduction to the methods and applications of differentiation and integration. Primarily for social science and business administration majors. This is a General Education course.

**\* Life Science Calculus 1 (MAC 2241) 4 credits**

*Gordon Rule, computational*

*Prerequisite: MAC 1105*

This course is an introduction to the methods and applications of differential and integral calculus for students in the life sciences. Topics include limits, continuity, derivatives of basic functions in mathematics, differentiation rules, optimization problems, the definite integral and area under a curve, basic theory of differential equations and modeling with differential equations in life sciences. This is a General Education course and counts toward the Gordon Rule computational requirement. Students cannot receive credit for both this course and Methods of Calculus (MAC 2233).

**\* Calculus with Analytic Geometry 1 (MAC 2311) 4 credits**

*Gordon Rule, computational*

*Prerequisites: MAC 1147, or MAC 2210, or both MAC 1140 and MAC 1114*

In this course, students will develop problem solving skills, critical thinking, computational proficiency, and contextual fluency through the study of limits, derivatives, and definite and indefinite integrals of functions of one variable, including algebraic, exponential, logarithmic, and trigonometric functions, and applications. Topics will include limits, continuity, differentiation and rates of change, optimization, curve sketching, and introduction to integration and area. This is a General Education course.

**\* Calculus with Analytic Geometry 2 (MAC 2312) 4 credits**

*Gordon Rule, computational*

*Prerequisite: MAC 2311*

Continuation of MAC 2311. Logarithmic, Exponential, hyperbolic, and inverse trigonometric functions, techniques of integration, partial fractions, area, trapezoid and Simpson's rules, volume, work; analytic geometry; Taylor approximations; sequences and series; polar representation of complex numbers. This is a General Education course.

**\* Calculus with Analytic Geometry 3 (MAC 2313) 4 credits**

*Prerequisite: MAC 2312*

Vector space, inner product, length, cross product, curves in space; functions of several variables: differentiability, gradient, tangent planes, differential approximation, surfaces, optimization with constraints, multiple integrals, theorems of Green, Stokes and Gauss.

**\* Discrete Mathematics (MAD 2104) 3 credits**

*Gordon Rule, computational*

*Prerequisite: MAC 1105 or higher*

A proof-oriented approach to and applications of propositional logic, sets, functions, relations, combinatorics, graphs and trees.

**\* Introduction to Computational Mathematics (MAD 2502) 3 credits**

*Prerequisite: MAC 2311 or MAP 2492*

*Corequisite: MAP 2492*

An introduction to mathematical computation by means of algorithmically solving a number of mathematical problems. Introduction to C++. The emphasis will be on the mathematical algorithms involved with problems from analysis, number theory, combinatorics, algebra, linear algebra, numerical analysis and probability.

**Discrete Mathematical Structures (MAD 3106) 3 credits**

*Prerequisites: MAC 2311 or MAD 2104 or MAS 2103 with minimum grades of "C"*

Introduction of various mathematical structures and theorems to prepare students for further study in mathematics and applied mathematics. Topics are chosen from graph theory, network flows, matchings and algorithmic proofs, min-max theorems, lattices, Hasse diagrams, finite geometries and designs, eventually periodic functions, and periodic structures.

**\*Prerequisite courses must be completed with grades of "C" or better.**

**\* Numerical Methods (MAD 3400) 3 credits**

*Prerequisites: MAC 2312, and some programming experience (not available for students with credit for MAD 4401)*

An introductory course in scientific computation for engineering and science students. Topics covered include numerical errors, roots of equations, curve fitting, matrix methods, numerical integration, solution of differential equations and graphic output.

**\* Graph Theory (MAD 4301) 3 credits**

*Prerequisites: MAD 2104 and MAS 2103*

A first course in theory and applications of graphs including basic properties; coloration; algebraic and geometric aspects; enumeration; algorithms; network flows.

**\* Numerical Analysis 1 (MAD 4401) 3 credits**

*Prerequisites: MAC 2313, MAP 2302, MAS 2103 and some programming experience*

Floating point arithmetic, interpolations, approximations, differentiation and integration, linear and non-linear systems of equations, differential equations, eigenvalues and eigenvectors, error analysis and norms. This course emphasizes theory. (Not available for students with credit for MAD 3400.)

**Post-Quantum Cryptography (MAD 4475) 3 credits**

*Prerequisites: MAS 2103 and COP 2220 with minimum grades of "C"*

This course provides an introduction to quantum-resistant cryptographic schemes: their underlying mathematical problems, formalisms, and constructions, with a focus on the computational aspects. Topics include code-based cryptography, lattice-based cryptography, isogeny-based cryptography, and multivariate-based cryptography.

**Cryptography of Blockchain (MAD 4476) 3 credits**

*Prerequisites: MAD 2104 and COP 2220 with minimum grades of "C"*

This course provides mathematical foundations of blockchain. Topics include history of blockchain, consensus mechanisms, Hash function, digital signature schemes, zero-knowledge proofs and SNARKs, verifiable random functions and quantum-safe blockchain.

**\* Introduction to Coding Theory (MAD 4605) 3 credits**

*Prerequisites: MAS 2103 and STA 4442 or equivalent*

Introduction to the theory of Error Correcting Codes. Binary symmetric channel, probability of error, finite fields, linear codes, standard array, maximum likelihood decoding, sphere packing, Plotkin and other bounds, Hamming codes, Perfect codes, BCH codes, Dual codes, the Krawtchouk polynomials, and MacWilliams' theorem.

**Topics in Mathematics for Teachers (MAE 1935) 1-3 credits**

**Topics in Mathematics for Teachers (MAE 3935) 1-3 credits**

**\* Mathematics of Data Science (MAP 2192) 3 credits**

*Prerequisites: MAC 1105 or MGF 1106 or MGF 1130 and programming competency at the level of an online short course*

This course surveys mathematical foundations in data science. Topics may include modeling with functions, matrices, solving linear systems, differentiation, integration, multivariate thinking and geometry, regression models, optimization, sensitivity analysis and graph theory.

**\* Differential Equations 1 (MAP 2302) 3 credits**

*Gordon Rule, computational*

*Prerequisite: MAC 2312*

An introduction to ordinary differential equations stressing basic techniques and applications.

**Mathematics for Biological Sciences 1 (MAP 2491) 3 credits**

*Gordon Rule, computational*

*Prerequisite: MAC 1105 with minimum grade of "C"*

This course is an introduction to the fundamental mathematical methods in differential and integral calculus, and introductory concepts in differential equations and dynamical systems with an emphasis on modeling dynamic processes in the biological sciences. Topics include limits, continuity, derivatives of basic functions in mathematics, differentiation rules, vector fields and changes in states, the Riemann integral and area under a curve, Euler's method for computing solutions to differential equations and optimization problems. Theory is complemented with basic programming to aid visualization, modeling and simulation. This is a General Education course and counts toward the Gordon Rule computational requirement. Students cannot receive credit for both this course and Methods of Calculus (MAC 2233).

**Mathematics for Biological Sciences 2 (MAP 2492) 3 credits**

*Prerequisite: MAP 2491 or MAC 2233 or MAC 2241 or Mac 2311 with minimum grade of "C"*

This is the second semester of the Mathematics for Biological Sciences sequence. It develops the foundational mathematical machinery necessary to study behaviors and properties of continuous and discrete dynamical systems of more than one variable including results from multivariate calculus, differential equations and linear algebra. Mathematical concepts are grounded in real examples, from and applications to, biology, physiology, neuroscience, ecology, evolution, psychology and/or the social sciences. Theory is complemented with basic programming to aid visualization, modeling and simulation.

**\*Prerequisite courses must be completed with grades of "C" or better.**

**\* Engineering Mathematics 1 (MAP 3305) 3 credits**

*Prerequisite: MAC 2312*

Complex numbers, first order differential equations, second order linear differential equations, solution of equations by Laplace transforms, solution of linear systems of differential equations.

**\* Applied Mathematical Modeling (MAP 4103) 3 credits**

*Prerequisites: MAP 2492 or ([MAP 2302 or MAP 3305] and [MAS 2103 or MAC 2313])*

This course covers the use of differential and difference equations in scientific modeling. Emphasis is on the "modeling" cycle with undergraduate research and inquiry (URI) components.

**Introduction to Methods in Complex Systems (MAP 4112) 3 credits**

*Prerequisites: MAC 2313 and (MAS 2103 or MAP 3305)*

Introduction to mathematical tools for analyzing and developing complex systems, including neural networks, reinforcement learning and deep learning systems. Basic principles, methods and applications of deep artificial neural networks to scientific data with an emphasis on image data.

**\* Actuarial Mathematics 1 (MAP 4172) 3 credits**

*Prerequisites: MAC 2311, MAC 2312, MAC 2313, and STA 4442*

The course covers concepts from calculus and probability as they pertain to actuarial sciences. It covers differential equations, parameterized curves, general probability, Bayes' theorem, and univariate and multivariate probability distributions.

**\* Actuarial Mathematics 2 (MAP 4173) 3 credits**

*Prerequisites: ECO 2023 and RMI 3011*

Interest theory (discrete and continuous), mathematics underlying economics and finance.

**\* Mathematics of Cybersecurity (MAP 4190) 3 credits**

*Prerequisites: MAD 2104 and MAS 2103*

This course introduces students to common mathematical concepts and tools relevant to cybersecurity. It includes fundamentals on metrics, probability models, data analysis, graph theory and game theory. By studying examples, students learn how to use mathematics to analyze and solve problems in cybersecurity.

**\* Differential Equations 2 (MAP 4303) 3 credits**

*Prerequisite: MAP 2302*

Further techniques in ordinary differential equations and an introduction to partial differential equations.

**\*Prerequisite courses must be completed with grades of "C" or better.**

**\* RI: Industrial Problems in Applied Math (MAP 4913) 3 credits**

*Prerequisites: MAP 2492 or ([MAP 2302 or MAP 3305] and [MAS 2103 or MAC 2313])*

This research-intensive course pits students in small groups against real-world problems provided by industrial partners.

**Internship in Actuarial Sciences (MAP 4945) 1-6 credits**

*Prerequisite: Permission of department*

Supervised internships individually assigned to accommodate students' professional development in the actuarial field. May be repeated for a maximum of 6 credits.

**\* Matrix Theory (MAS 2103) 3 credits**

*Prerequisite: MAC 2233 or MAC 2311*

Vectors and vector spaces. Linear transformation and matrices. Rank and determinants. Systems of linear equations. Diagonalization. Characteristic values.

**Vector Calculus (MAS 3156) 3 credits**

*Prerequisites: MAC 2313 and MAS 2103, with minimum grades of "C"*

Implicit and inverse Function Theorems; Vectors and Vector Fields in Space; Divergence and Curl; Green's, Stokes' and Gauss' Theorems. Introduction to Tensors and Applications.

**Introductory Number Theory (MAS 3203) 3 credits**

The basic theory of divisibility and congruences. The theorems of Fermat, Euler and Wilson. Quadratic residues.

**\* Linear Algebra 2 (MAS 4107) 3 credits**

*Prerequisite: MAS 2103 or Linear Algebra 1*

Vector spaces, complex numbers, basis and dimension, eigenvalues and eigenvectors, Cayley-Hamilton theorem, Jordan normal form, and other topics.

**\* Mathematics for Cryptography (MAS 4206) 3 credits**

*Prerequisites: MAD 2104 and MAS 2103*

This course introduces students to the mathematical foundations of cryptography. It includes probability theory, modular arithmetic, selected topics from number theory, coding theory and lattices. In this course, students learn how mathematics is used in the construction and analysis of cryptographic schemes with some applications in modern cryptography.

**\* Modern Algebra (MAS 4301) 3 credits**

*Prerequisites: MAD 2104 and MHF 3202*

Elementary number theory. Groups, rings and ideals, polynomials, and fields.

**\* Introductory Abstract Algebra 1 (MAS 4304) 3 credits**

*Prerequisite: MAS 4301*

Course covers basic structures of abstract and linear algebra, such as groups, rings and ideals, polynomials and factorization, vector spaces and modules, linear transformations, and the classical Galois theory of fields.

**\* Introductory Abstract Algebra 2 (MAS 4306) 3 credits**

*Prerequisite: MAS 4304*

A continuation of Introductory Abstract Algebra 1. Course covers basic structures of abstract and linear algebra, such as groups, rings and ideals, polynomials and factorization, vector spaces and modules, linear transformations, and the classical Galois theory of fields.

**Intermediate Algebra (MAT 1033) 3 credits**

*Prerequisite: High school algebra*

This course covers topics in intermediate algebra, including properties of and operations on real numbers, scientific notation, linear equations and inequalities, polynomial and rational expressions, exponents and radicals, products and factoring, quadratic equations, and graphing.

**University Honors Seminar in Mathematics (MAT 1930) 3 credits**

*Writing Across Curriculum (Gordon Rule)*

A seminar in the University Honors Program on topics in mathematics.

**\*Prerequisite courses must be completed with grades of "C" or better.**

**Topics in Mathematics (MAT 1931) 1-4 credits**

*Prerequisite: Permission of instructor*

Topics of interest to lower-division students.

**Topics in Mathematics (MAT 1932) 1-3 credits**

*Gordon Rule, computational*

*Prerequisite: Permission of instructor; Corequisite: MAC 1105*

Topics of interest to lower-division students.

**University Honors Seminar in Mathematics (MAT 1935) 3 credits**

*Gordon Rule, computational*

A seminar in the University Honors Program on topics in mathematics.

**Mathematics Study Abroad (MAT 2952) 1-6 credits**

*Prerequisite: Sophomore standing*

Credit for enrollment in approved study abroad programs.

**Cooperative Education - Mathematics (MAT 3949) 1-2 credits**

*Grading: S/U*

**Directed Independent Study (MAT 4906) 1-4 credits**

*Prerequisite: Permission of instructor*

Study of topics relating to the special needs and interests of individual students.

**Directed Independent Research in Mathematics (MAT 4915) 1-6 credits**

Students work closely with research mentors to conduct research and inquiry in Mathematics.

Requirements for the course and the criteria for evaluation are agreed upon by the research mentor and the student.

**Directed Independent Research in Mathematics (MAT 4916) 0-6 credits**

Students work closely with research mentors to conduct research and inquiry in Mathematics.

Requirements for the course and the criteria for evaluation are agreed upon by the research mentor and the student. *Grading: S/U*

**Special Topics (MAT 4930) 1-4 credits**

*Prerequisite: Permission of instructor*

Lectures on specialized topics.

**\* Mathematical Problem Solving (MAT 4937) 3 credits**

*Prerequisites: MAD 2104, MAS 2103, MAC 2312 and (suggested) MAD 2502*

Miscellany of challenging mathematical problems not usually met in the standard courses.

### **Mathematics Study Abroad (MAT 4957) 1-6 credits**

*Prerequisite: Sophomore standing*

Credit for enrollment in approved study abroad programs.

### **Honors Thesis in Mathematics (MAT 4970) 3 credits**

*Prerequisite: Permission of department*

Supervised research and writing of the honors thesis.

### **Mathematical Thinking in Context 1 (MGF 1130) 3 credits**

*Gordon Rule, computational*

In this course, students will utilize multiple means of problem solving through student-centered mathematical exploration. The course is designed to teach students to think more effectively and increase their problem-solving ability through practical application and divergent thinking. The course is appropriate for students in a wide range of discipline/programs. This is a General Education course.

*\*Prerequisite courses must be completed with grades of "C" or better.*

### **Mathematical Thinking in Context 2 (MGF 1131) 3 credits**

*Gordon Rule, computational*

Through this course, students will experience the practicality of mathematics in a global society. Students will engage in applications of tools and techniques of mathematics in a variety of contextual situations from everyday life. The course is appropriate for students in a wide range of discipline/programs. This is a General Education course.

### **\* Introduction to Advanced Mathematics (MHF 3202) 3 credits**

*Prerequisite: MAC 2312*

This course serves as a transition into advanced mathematics courses. Students learn the formalism for correctly doing and writing proofs in mathematics. Topics include logic and language of proofs, set theory, mathematical induction, relations and orders, functions, and foundations of advanced calculus.

### **\* Mathematical Logic (MHF 3302) 3 credits**

*Prerequisites: PHI 2102 or MAD 2104 or MAS 2103 or permission of instructor*

An introduction to mathematical logic from a contemporary point of view with an eye toward its applications in philosophy, computer science and linguistics.

**\* History of Mathematics (MHF 3404) 3 credits**

*Prerequisite: MAD 2104*

Chronological study of the evolution of mathematical thought from primitive counting to modern ideas up to the 21st century.

**\* Survey of Geometry (MTG 3212) 3 credits**

*Prerequisite: MAD 2104*

Euclidean and non-Euclidean geometries. Introduction to projective geometry and the geometry of transformations.

**\* Topology for Data Science (MTG 4325) 3 credits**

*Prerequisites: MAD 2104, MAS 2103 and (COP 2220 or MAD 2502)*

Introduction to concepts and methods in applied topology and topological data analysis tools, including persistent homology, and their uses in data science: topological spaces, metric spaces, continuity, simplicial complexes, vector spaces and simplicial homology. Mathematical concepts are grounded by discussions of efficient implementations of computational algorithms and applications.

**Topics in Geometry (MTG 4930) 1-4 credits**

Topics in geometry chosen from Euclidean Geometry, Projective Geometry, Geometry of the Complex Plane, Hyperbolic Geometry, Finite Geometries, Automorphism Groups, Riemannian Geometry, Fractal Geometry, Combinatorial Geometry, Computational Geometry, or other areas of current interest.

**University Honors Seminar in Statistics (STA 1930) 3 credits**

*Writing Across Curriculum (Gordon Rule)*

A seminar in the University Honors Program on topics in statistics.

***\*Prerequisite courses must be completed with grades of "C" or better.***

**Topics in Statistics (STA 1932) 1-3 credits**

*Gordon Rule, computational*

Topics of interest to lower-division students.

**\* Introductory Statistics (STA 2023) 3 credits**

*Gordon Rule, computational*

*Prerequisite: MAT 1033 or MAC 1105 or MGF 1130 or MAC 2233*

In this course, students will utilize descriptive and inferential statistical methods in contextual situations, using technology as appropriate. The course is designed to increase problem-solving abilities

and data interpretation through practical applications of statistical concepts. This course is appropriate for students in a wide range of disciplines and programs. This is a General Education course.

### **Statistics Study Abroad (STA 2952) 1-6 credits**

*Prerequisite: Sophomore standing*

Credit for enrollment in approved study abroad programs.

### **\* SAS for Data and Statistical Analyses (STA 3024) 3 credits**

*Prerequisite: STA 2023 or equivalent*

This course introduces the SAS language in a lab-based format. The objective is to develop programming and statistical computing skills to address data management and analysis issues using SAS. The course provides an extensive survey of some of the most common statistical tools and provides decision-making strategies in selecting the appropriate statistical method for the data at hand.

### **\* Computational Statistics (STA 3100) 3 credits**

*Prerequisites: MAC 2311 and STA 2023 or higher*

Computer algorithms for evaluation, simulation and visualization, random number generation, sampling from prescribed distributions. Simulations, graphics for data display, computation of probabilities and percentiles, hypothesis testing, simple linear regression and multiple regression.

### **Intermediate Statistics Laboratory (STA 3163L) 1 credit**

*Gordon Rule, computational*

*Prerequisite: PSY 3234*

Computer organization, computer implementation of basic and intermediate statistical inferences that include describing data, graphic presentation, analysis of data. Applications will reflect the descriptive and statistical inferences appropriate to the discipline under which this course is offered (e.g., business, education, engineering, mathematics, psychology, etc.).

### **\* Introduction to Biostatistics (STA 3173) 3 credits**

*Prerequisite: MAC 1105*

Introduces basic statistical concepts and procedures that are necessary to conduct statistical analysis for biological researchers. The topics covered are probabilistic foundations, experimental designs and their analyses, summarizing and visualizing data, inferential statistics, including hypothesis tests and regression modeling.

\*Prerequisite courses must be completed with grades of "C" or better.

### **Cooperative Education - Statistics (STA 3949) 1-2 credits**

*Prerequisite: Permission of instructor*

*Grading: S/U*

**\* Probability and Statistics for Engineers (STA 4032) 3 credits**

*Prerequisite: MAC 2312*

Basic concepts of probability; random variables; discrete and continuous probability distributions; functions of random variables; estimation theory; tests of hypotheses.

**\* Applied Statistics 1 Lab (STA 4202L) 1 credit**

*Prerequisite: STA 4442*

*Corequisite: STA 4234*

This is a first course in regression analysis. Regression analysis explores relationships among variables by modeling a response. The course focuses on data analysis, statistical graphs and diagnostics via personal computing.

**\* Statistical Designs (STA 4222) 3 credits**

*Prerequisites: STA 4234, and MAC 2312*

Basic concepts of experimental design: randomized blocks, Latin squares, incomplete blocks, factorial designs, fractional factorials, nested designs. Introduction to design of sample surveys: simple random, stratified, cluster sampling; complex designs; ratio and regression estimation; enumerative versus analytical surveys. Student project required.

**\* Applied Statistics 1 (STA 4234) 2 credits**

*Prerequisite: STA 4442; Corequisite: STA 4202L*

Point and interval estimation, hypothesis tests, non-parametric procedures, contingency tables. Essential distribution theory. Linear models, including multiple regression and analysis of variance. Emphasis on data analysis, statistical graphics, and diagnostics via personal computing.

**\* RI: Statistical Learning (STA 4241) 3 credits**

*Prerequisites: STA 4234 or equivalent*

This is an introductory-level course in supervised learning with a focus on regression and classification methods. The course helps students to understand basic concepts, ideas and methods in statistical learning. Considerable amount of effort is also placed on computational aspects of algorithm implementation. This is a research-intensive (RI) course.

**\* Probability and Statistics 1 (STA 4442) 3 credits**

*Prerequisite: MAC 2312*

An introductory course treating combinatorics, probability spaces, laws of large numbers, and central limit theorem. An introduction to Markov processes, information theory and applications.

**\*Prerequisite courses must be completed with grades of "C" or better.**

**\* Probability and Statistics 2 (STA 4443) 3 credits**

*Prerequisite: STA 4442*

Properties of test statistics, estimation and testing, linear models, contingency tables; topics from non-parametric statistics, design of experiments or methods of inference.

**\* Linear Programming and Game Theory (STA 4618) 3 credits**

*Prerequisite: MAS 2103*

Dantzig's simplex method. Duality. Convexity and optimal strategies. Applications.

**\* Applied Statistics 2 (STA 4702) 3 credits**

*Prerequisite: STA 4234*

Multivariate statistical methods, including the multivariate normal distribution, component analysis, factor analysis, multivariate analysis of variance and regression, discriminant analysis, and causal modeling. Students will use SAS and/or SPSS statistical software.

**Applied Time Series and Forecasting (STA 4853) 3 credits**

*Prerequisite: STA 4234 or equivalent*

Gives a basic introduction to time series and forecasting methods that can be applied to finance, economics, engineering and the natural and social sciences. Topics covered include stationary processes, ARMA models, modeling and forecasting with ARMA processes, spectral analysis and non-stationary and seasonal time series models.

**Directed Independent Study (STA 4906) 1-4 credits**

*Prerequisite: Permission of instructor*

Study of topics relating to the special needs and interests of individual students.

**Directed Independent Research in Mathematical Sciences (STA 4915) 1-6 credits**

Students work closely with research mentors to conduct research and inquiry in Mathematical Sciences. Requirements for the course and the criteria for evaluation are agreed upon by the research mentor and the student.

**Directed Independent Research in Mathematical Sciences (STA 4916) 0-6 credits**

Students work closely with research mentors to conduct research and inquiry in Mathematical Sciences. Requirements for the course and the criteria for evaluation are agreed upon by the research mentor and the student. *Grading: S/U*

### **Special Topics (STA 4930 ) 1-4 credits**

*Prerequisite: Permission of instructor*

Topics of interest to upper-division students.

### **Statistics Study Abroad (STA 4957) 1-6 credits**

*Prerequisite: Sophomore standing*

Credit for enrollment in approved study abroad programs.

## **Mathematics and Statistics Graduate Courses**

*\*Prerequisite courses must be completed with grades of "C" or better.*

### **Introduction to Data Science (CAP 5768) 3 credits**

(See [Computer Science and Computer Engineering courses](#), College of Engineering and Computer Science section)

### **\* Multivariable Analysis (MAA 5105) 3 credits**

*Prerequisites: MAA 4200, MAS 4107*

Derivative of a function of several variables, implicit and inverse function theorems, submanifolds of Euclidean space, rank theorem, tangent spaces, the derivative as a linear transformation, differential forms, integration on manifolds, Stokes' Theorem.

### **\* Introductory Analysis 1 (MAA 5228) 3 credits**

*Prerequisite: MAS 3156 or permission of instructor*

Metric space topology, uniform convergence, Arzela-Ascoli theorem, differentiation and integration of single variable functions, power series, Stone-Weierstrass Theorem, measure theory, Lebesgue integral, convergence theorems for the Lebesgue integral, absolute continuity, the fundamental theorem of calculus.

### **\* Introductory Analysis 2 (MAA 5229) 3 credits**

*Prerequisite: MAA 5228*

Continuation of topics in MAA 5228. Metric space topology, uniform convergence, Arzela-Ascoli theorem, differentiation and integration of single variable functions, power series, Stone-Weierstrass Theorem, measure theory, Lebesgue integral, convergence theorems for the Lebesgue integral, absolute continuity, the fundamental theorem of calculus.

### **\* Real Analysis (MAA 6306) 3 credits**

*Prerequisite: MAA 5229*

Abstract measure theory. The Lebesgue integral. Convergence. Radon Nikodym and Fubini theorems.  $L_p$  spaces and selected topics.

### **Complex Analysis 1 (MAA 6406) 3 credits**

*Prerequisite: MAA 5228*

The complex plane and its geometry, stereographic projection and linear fractional transformations, analytic and harmonic functions, contour integration, Cauchy's theorem and the calculus of residues, and special functions and conformal mapping.

### **Topics in Real and Complex Analysis (MAA 6416) 1-4 credits**

*Prerequisite: Permission of instructor*

Advanced treatment of topics such as theory of distributions, Fourier analysis, and special functions. May be repeated for credit.

**\*Prerequisite courses must be completed with grades of "C" or better.**

### **\* Introduction to Functional Analysis (MAA 6506) 3 credits**

*Prerequisites: MAS 5145, MAA 5228, and MAA 5229*

Introduction to the theory of functional analysis. Normed linear spaces, Hilbert spaces, Hahn-Banach Theorem, Open Mapping Theorem, Uniform Boundedness Principle, weak convergence, bounded linear operators. Applications to partial differential equations.

### **\* Introductory Combinatorics (MAD 5202) 3 credits**

*Prerequisites: MAC 2313 and MAD 2104 or permission of instructor*

An introductory course in combinatorics; graphs and networks, enumeration, lattices, designs, codes, applications, and proof techniques.

### **\* Introduction to Cryptology and Information Security (MAD 5474) 3 credits**

Classical ciphers and their analysis; unconditional versus computational security; basic constructions for stream ciphers; examples and modes of operation of block ciphers; cryptographic hash functions; public key encryption with ElGamal and RSA; digital signature schemes; Diffie-Hellman key exchange.

### **Introductory Discrete Mathematics (MAD 6108) 3 credits**

*Prerequisite: Enrolled in M.S.T. program or permission of instructor*

Topics include sets, logic, graph theory, algorithms, counting, recurrence equations and generating

functions. Advanced topics may be chosen from partially ordered sets, Boolean algebras, automata and game theory. This course is not intended for Ph.D. students.

### **Enumerative Combinatorics (MAD 6206) 3 credits**

*Prerequisite: Permission of instructor*

Introduction to enumeration. Sets and multisets, permutations, sieve methods, partially ordered sets, lattices, incidence algebra, Moebius inversion, and generating functions.

### **\* Combinatorics 2 (MAD 6207) 3 credits**

*Prerequisite: MAD 6206*

Advanced topics in graph theory, enumeration, generating functions and symmetric functions. Students are expected to present material from the textbook and to solve exercises.

**\*Prerequisite courses must be completed with grades of "C" or better.**

### **Topics in Combinatorics (MAD 6209) 1-4 credits**

*Prerequisite: Permission of instructor*

Advanced treatment of topics such as block designs, coding theory, enumeration, graph theory, matroid theory, and umbral calculus. May be repeated for credit.

### **\* Graph Theory (MAD 6307) 3 credits**

*Prerequisite: MAS 4107 or MAS 5311*

A first graduate course in theory and applications of graphs, including basic properties, algorithms, matchings, network flows, connectivity, colorings, planarity, vector spaces, and polynomials associated with a graph.

### **Computational Mathematics (MAD 6403) 3 credits**

*Prerequisite: Graduate standing or permission of instructor*

An introduction to some of the fundamental tools and methods of computational mathematics and their applications.

### **\* Numerical Analysis (MAD 6407) 3 credits**

*Prerequisites: MAA 5105, MAA 5228, and MAS 5145 or permission of instructor*

Graduate-level treatment of scientific computing and numerical analysis: floating point number systems, nonlinear systems of equations, function approximation, numerical optimization, numerical methods for differential equations.

### **\* Cryptanalysis (MAD 6478) 3 credits**

*Prerequisites: MAD 6477 or MAD 5474*

Entropy, probabilistic attacks. Passive and active attacks. Ciphertext-only, known-plaintext, chosen-plaintext, chosen-ciphertext attacks, adaptive attacks. Types of security. Know attacks on computationally secure systems. Meet in the middle attacks. Differential and linear cryptanalysis. Random number generators, tests, analysis and weakness.

**\* Coding Theory (MAD 6607) 3 credits**

*Prerequisites: MAS 4301 or permission of instructor*

Channels, introduction to information theory, Shannon's capacity theorem, linear codes, Hamming, cyclic codes, BCH codes, sphere packings, the Golay codes, weight enumerators, MacWilliams' equation.

**\*Prerequisite courses must be completed with grades of "C" or better.**

**Topics in Mathematics for Teachers (MAE 5935) 1-4 credits**

*\*Prerequisite courses must be completed with grades of "C" or better.*

**\* Introduction to Dynamical Systems and Chaos 1 (MAP 6211) 3 credits**

*Prerequisite: Engineering Mathematics 2*

Scalar autonomous equations, elementary bifurcations, scalar maps, one-dimensional chaos, scalar non-autonomous equations, bifurcations of periodic equations, equations on tori and circle maps, planar autonomous systems.

**\* Ordinary Differential Equations (MAP 6336) 3 credits**

*Prerequisites: MAA 5228 and MAS 5145, or permission of instructor*

Introduction to the theory of ordinary differential equations (ODEs), including existence, uniqueness, continuous dependence of solutions, the Hartman-Grobman Theorem, the Stable Manifold Theorem, the Poincare-Bendixson Theorem, and Floquet Theory. Applications to mechanical and biological systems.

**\* Partial Differential Equations (MAP 6345) 3 credits**

*Prerequisite: MAA 5105*

Introduction to the theory of partial differential equations. Laplace's Equation, the Heat Equation, the Wave Equation, first order equations, The Fourier Transform, Sobolev spaces, the Sobolev embedding theorems, and second order elliptic equations.

**Topics in Applied Mathematics (MAP 6436) 1-4 credits**

*Prerequisite: Permission of instructor*

Advanced treatment of topics including ordinary and partial differential equations, potential theory, the calculus of variations, and optimal control theory. May be repeated for credit.

**Internship in Applied Mathematics (MAP 6941) 1-6 credits**

*Prerequisites: Graduate level and permission of instructor*

Supervised internships individually assigned to accommodate graduate students' professional development in applied mathematics. May be repeated for a maximum of 6 credits.

**\* Linear Algebra (MAS 5145) 3 credits**

*Prerequisite: MAS 4107*

Linear transformations, eigenvalues and eigenvectors, characteristic and minimal polynomials, rational and Jordan canonical forms, determinants, quadratic forms, orthogonal diagonalization of symmetric matrices, unitary and Hermitian transformations.

**\* Introductory Abstract Algebra 1 (MAS 5311) 3 credits**

*Prerequisite: MAS 4301 or permission of instructor*

Groups, subgroups, and homomorphisms, the Sylow theorems, the structure theorem for finite abelian groups, elementary theory of fields and polynomial rings, the fundamental theorem of Galois theory.

**\* Introductory Abstract Algebra 2 (MAS 5312) 3 credits**

*Prerequisite: MAS 5311 or permission of instructor*

Continuation of MAS 5311. Groups, subgroups, and homomorphisms, the Sylow theorems, the structure theorem for finite abelian groups, elementary theory of fields and polynomial rings, the fundamental theorem of Galois theory.

**\* Algebraic Number Theory (MAS 6215) 3 credits**

*Prerequisites: MAS 5311, 5312*

The structure of the ring of integers in an algebraic number field; extension of primes and decomposition into products of prime ideals, action of the Galois group on these decompositions, bounds on the size of the ideal class group and the structure of the group of units.

**\*Prerequisite courses must be completed with grades of "C" or better.**

**Number Theory and Cryptography (MAS 6217) 3 credits**

Elementary number theory with applications to cryptography, including: congruences and modular arithmetic, finite fields, public key cryptography (RSA), primality testing and factoring.

**\* Algebraic Curves (MAS 6315) 3 credits**

*Prerequisites: Graduate standing; MAS 5311 and MAS 5312*

An introduction to algebraic curves. Topics include affine algebraic sets and varieties, local properties of plane curves, projective varieties, morphisms and rational maps.

**\* Advanced Algebra and Geometry (MAS 6318) 3 credits**

*Prerequisites: MAS 2103 and MAS 4301*

Integrative treatment of advanced topics in classical algebra and geometry. Not intended for students in the Ph.D. program in mathematics.

**\* Commutative Algebra (MAS 6333) 3 credits**

*Prerequisites: Graduate standing; MAS 5311 and MAS 5312*

An introduction to commutative rings. Topics include ideals, modules, rings and modules of fractions, integral dependence and valuations and chain conditions (Noetherian and Artinian rings).

**Topics in Algebra (MAS 6396) 1-4 credits**

*Prerequisite: Permission of instructor*

Advanced treatment of topics such as field theory and Galois theory, finite groups, abelian groups, ring theory, commutative rings, cohomology of algebraic systems and ordered algebraic structures. May be repeated for credit.

**Special Topics (MAT 5932) 1-4 credits**

*Prerequisite: Permission of instructor*

Lectures on advanced specialized topics. May be repeated for credit.

**Seminar in Mathematics (MAT 5938) 0-4 credits**

*Prerequisite: Permission of instructor*

This course is a graduate problem-solving seminar, intended to prepare students for the Ph.D. qualifying exams in algebra and analysis. A variety of problems is assigned each week, and students are expected to present and discuss solutions in class. *Grading: S/U*

**\* Supervised University Instruction in Mathematics (MAT 5946) 1-3 credits**

*Prerequisite: Permission of instructor*

Guidance and supervised practice in the art of lecturing undergraduate mathematics. May be repeated once for credit. *Grading: S/U*

**\* Problem Solving and Recreational Mathematics (MAT 6516) 3 credits**

*Prerequisites: MAA 4200 and MAS 4301*

Introduction to mathematical problem solving literature, principles and methods of problem solving, and analysis of selected famous problems in recreational mathematics. Not intended for students in the Ph.D. program in mathematics.

**\* Mathematics and Technology (MAT 6715) 3 credits**

*Prerequisites: MAS 2103 and MAA 4200*

Technology has the potential to enhance the understanding and emphasize the interconnectedness of mathematics. This class explores applications of different classes of computer software. The student learns how appropriate technology can be used to present, explore, and build mathematical intuition. This course is not intended for students in the Ph.D. program in mathematics.

**\*Prerequisite courses must be completed with grades of "C" or better.**

**Directed Independent Study (MAT 6907) 1-4 credits**

*Prerequisite: Permission of instructor*

Advanced topics relating to the special needs and interests of individual students.

**Special Topics (MAT 6933) 1-4 credits**

*Prerequisite: Permission of instructor*

Topics will vary. May be repeated for credit.

**Advanced Seminar in Mathematics (MAT 6939) 1-4 credits**

*Prerequisite: Permission of instructor*

Advanced seminar in mathematics on specialized topics. May be repeated for credit. *Grading: S/U*

**Master's Thesis (MAT 6971) 1-6 credits**

**Advanced Research in Mathematics (MAT 7978) 1-9 credits**

*Prerequisite: Admission to Ph.D. program*

Research that is focused and relevant to the student's course of study in the Ph.D. program in Mathematics. The course requires oversight by the student's dissertation advisor. *Grading: S/U*

**Dissertation (MAT 7980) 1-12 credits**

*Prerequisite: Admission to doctoral candidacy*

**Topics in the History of Mathematics (MHF 6405) 3 credits**

Studies of English translations of various mathematical classics from ancient to modern times, covering a wide range of various mathematical ideas relevant to the teaching of mathematics at the high school level.

**Calculus from a Historical Perspective (MHF 6410) 3 credits**

Selected topics in calculus from the historical point of view including Archimedes' quadrature of the parabola, the calculation of Pi, the Bernoulli numbers, and sums of powers of numbers.

**\* Advanced Euclidean Geometry (MTG 6226) 3 credits**

*Prerequisites: MAS 2103 and MAS 4301*

Emphasizes the uses of homogeneous barycentric coordinates in triangle geometry and of dynamic software to explore basic theorems and problems. Not intended for students in the Ph.D. program in mathematics.

**Applied Differential Geometry (MTG 6256) 3 credits**

*Prerequisite: MAA 5105*

Differentiable manifolds, affine connections, tensor analysis, Riemannian geometry and Lie groups, with applications to physics and complex variables.

**General Topology 1 (MTG 6316) 3 credits**

Basic axioms and concepts of point-set topology, Tietze extension theorem, Urysohn lemma, Tychonoff theorem.

**\*Prerequisite courses must be completed with grades of "C" or better.**

**\* Applied Computational Topology (MTG 6329) 3 credits**

*Prerequisites: MAS 2103 and (MAD 2502 or CAP 5768)*

An introduction to the computational methods of topology, focusing on topological data analysis, persistence homology and applications.

**\* Algebraic Topology (MTG 6345) 3 credits**

*Prerequisites: MAA 5228, MAA 5229, MAS 5311, and MAS 5312*

An introduction to the fundamental concepts and basic methods of algebraic topology: homotopy, homology, and cohomology of cell complexes and their applications to geometry and algebra.

**Fractal Geometry (MTG 6415) 3 credits**

*Prerequisite: Permission of instructor*

Fractal geometry describes the seemingly irregular shapes and patterns we encounter in the natural world. This course explores the mathematical concepts behind fractal geometry and gives numerous applications of integration of mathematics with the natural world.

### **Dynamical Systems, Chaos, and Computing (MTG 6418) 3 credits**

*Prerequisite: Permission of instructor*

Students reconstruct some modern mathematical discoveries in dynamical systems using widely accessible programs such as spreadsheets and dynamical geometry software. Explorations illustrate the relation of chaos theory to iteration of second order polynomials and fractal geometry as well as general mathematical patterns.

### **\* Biostatistics (STA 5195) 3 credits**

*Prerequisite: STA 4234*

An introduction to statistical tools used routinely for inference and data analysis in the health sciences. Topics include biostatistical design of medical studies, measure of disease occurrence and association, methods for rates and proportions, ROC analysis for screening and diagnosis, discrimination and classification, principal component analysis and factor analysis, log-linear models and survival analysis.

### **\* Statistical Computing (STA 6106) 3 credits**

*Prerequisite: STA 4443 or equivalent*

Algorithms in statistical computing: Random number generation, generating other distributions, random sampling and permutations. Matrix computations in linear models. Non-linear optimization with applications to statistical procedures. Other topics of current interest, such as issues of efficiency and use of graphics.

### **Survey of Statistics and Probability (STA 6116) 3 credits**

*Prerequisite: Enrolled in M.S.T. program or permission of instructor*

Topics include graphical analysis of data, statistical inference and modeling, analysis of variance and the design of experiments. Not intended for Ph.D. students in mathematics.

### **\* Survival Analysis (STA 6177) 3 credits**

*Prerequisite: STA 4234 or equivalent*

Introduces basic concepts of clinical trials, then the principles and methods of statistical inference that are commonly used for epidemiologic analysis of survival data. The major topics covered are: Basic concepts in survival analysis, types of censoring, life table and Kaplan-Meier, log-rank method and Cox proportional model. Software package R language is utilized.

**\* Biostatistics - Longitudinal Data Analysis (STA 6197) 3 credits**

*Prerequisite: STA 4234*

Course covers techniques for analyzing longitudinal or repeated measured data, including derivation and estimation of model parameters. Also covers univariate and multivariate analysis of variance for repeated measures, random or mixed-effect models, covariate pattern models, generalized estimating equations models, mixed-effect logistic regression models, and missing data in longitudinal studies.

**\* Applied Statistical Methods (STA 6207) 3 credits**

*Prerequisite: STA 4443 or STA 6326 or equivalent*

Overviews of normal theory inference and categorical data methods; basic concepts of experimental design; analysis of variance and covariance; introduction to regression models and selection procedures. Statistical software Minitab and R are used for data analysis.

**\* Regression Analysis (STA 6236) 3 credits**

*Prerequisites: STA 4032 or STA 4443 and senior or graduate standing*

This course provides basic theory, methods and applications of regression analysis. Topics covered include simple regression (least squares method), multiple regression, transformation, inference and correlation analysis, categorical variables, residual diagnostics, model building and multi-collinearity.

**\* Mathematical Statistics (STA 6326) 3 credits**

*Prerequisite: STA 6444*

Theory of inference, regression, ANOVA, robust procedures, or other selected topics.

**\* Mathematical Probability (STA 6444) 3 credits**

*Prerequisite: STA 4443*

Theory of random variables, stochastic processes, Brownian motion, renewal processes, martingales, or other selected topics and applications.

**Topics in Probability and Statistics (STA 6446) 1-4 credits**

Advanced treatment of topics from stochastic processes, limit laws, decision theory, and sequential methods. May be repeated for credit.

**\* Applied Time Series Analysis (STA 6857) 3 credits**

*Prerequisite: STA 4234*

This course introduces fundamental concepts and some common models for time series data. Topics include stationarity, autocovariance function and spectrum, integral representation of a stationary time series and interpretation, ARMA, ARIMA and GARCH models, estimation and forecasting,

multivariate time series, using R for the analysis of time series, and applications of time series.

### **Directed Independent Study (STA 6907) 1-4 credits**

Study of topics relating to the special needs and interests of individual students.

**\* Prerequisite courses must be completed with grades of "C" or better.**

## PHYSICS

### **Undergraduate Courses** /[link to graduate courses](#)

#### **Introduction to Astronomy (AST 2002) 3 credits**

This course provides a comprehensive look at modern astronomy, emphasizing the use of the scientific method and the application of physical laws to understand the Universe including Earth and its environment. Throughout this course, students develop the ability to discern scientific knowledge from non-scientific claims by using critical thinking. Designed for non-science majors; no credit for Physics B.S. majors. This is a General Education course.

#### **Astronomy and Astrophysics (AST 3018) 3 credits**

*Prerequisites: AST 2002 and (PHY 2048 or PHY 2053)*

*Corequisite: PHY 2048 or PHY 2053*

Survey of astronomy and astrophysics for physical science, engineering or mathematics majors. Covers a broad range of astronomical topics from orbital mechanics to cosmology. Focuses on explaining astrophysical processes through observation and theoretical models.

#### **Solar System Astronomy (AST 3110) 3 credits**

*Prerequisites: AST 2002 and (PHY 2048 or PHY 2053)*

*Corequisite: PHY 2048 or PHY 2053*

An intermediate, interdisciplinary course on the nature and dynamics of the solar system through applications of physics, atmospheric science, chemistry and geology. The course expands students' understanding of the different bodies in the solar system, of the fundamental principles of Earth processes to explain/predict processes on other bodies in or outside the solar system and to help them to consider the bodies for future exploration.

#### **Techniques of Observational Astronomy (AST 3722) 3 credits**

*Prerequisites: AST 2002 and (PHY 2048 or PHY 2053)*

*Corequisite: PHY 2048 or PHY 2053*

An in-depth treatment of how professional astronomers gather, reduce, analyze and interpret observations, mostly focused on the optical/infrared portion of the electromagnetic spectrum.

**Stars and the Galaxy (AST 4300) 3 credits**

*Prerequisites: AST 2002 and (PHY 2048 or PHY 2053)*

*Corequisite: PHY 2048 or PHY 2053*

Course provides a solid foundation in the subject of stellar structure and how it relates to our understanding of the Milky Way and its neighbors in the Local Group. The approach concentrates largely on the stellar populations of these systems, the techniques used to study their chemical abundances, ages and distances.

**Galaxies and Cosmology (AST 4402) 3 credits**

*Prerequisites: AST 2002 and (PHY 2048 or PHY 2053)*

*Corequisite: PHY 2048 or PHY 2053*

Study of different types of galaxies, their evolution, their relationship to active galaxies and quasars and the evolution of the Universe.

**First-Year Physics Seminar (PHY 1090) 1 credit**

This course introduces beginning Physics majors to the department, its faculty, resources and research opportunities.

**University Honors Seminar in Physics (PHY 1930) 1-4 credits**

*Writing Across Curriculum (Gordon Rule)*

A seminar in the University Honors Program on topics in physics.

**Physics for Engineers 2 (PHY 2044) 3 credits**

*Prerequisites: MAC 2312 and PHY 2048*

Intended for engineering majors, the course surveys fundamental laws and phenomena of electricity, magnetism, and optics. Emphasis on mathematical analysis of physical problems.

**General Physics 1 or General Physics for Engineers 1 (PHY 2048) 3 or 4 credits**

*Prerequisite: MAC 2311*

This calculus-based course serves as the first in a two-part series, covering topics like kinematics, dynamics, energy, momentum, rotational motion, fluid dynamics, oscillatory motion and waves. Designed for science and engineering majors, the course integrates critical thinking, analytical skills and real-world applications. The 3-credit version of this class is exclusively for Engineering majors. This is a General Education course.

### **General Physics 1 Laboratory (PHY 2048L) 1 credit**

*Corequisite: PHY 2048 or PHY 2053*

Experiments in mechanics, fluids, heat, wave motion and sound comprise this course. Several classes cover developing theoretical problem solving techniques. This is a General Education course.

### **General Physics 2 (PHY 2049) 4 credits**

*Prerequisites: PHY 2048 and MAC 2312*

Intended for science majors, the course surveys fundamental laws and phenomena of electricity, magnetism, and optics. Emphasis on mathematical analysis of physical problems.

### **General Physics 2 Laboratory (PHY 2049L) 1 credit**

*Corequisite: PHY 2049 or PHY 2054 or PHY 2044*

Experiments in electricity and magnetism, optics, and modern physics comprise this course. Several classes cover developing theoretical problem solving techniques.

### **College Physics 1 (PHY 2053) 4 credits**

*Prerequisite: Minimum grade of "C" in one of the following: MAC 1114 or 1147 or 2233 or 2311*

This course is the first in a two-part series intended for non-physics majors, offering an algebra and trigonometry approach to topics such as kinematics, dynamics, energy, momentum, rotational motion, fluid dynamics, oscillatory motion and waves. The course fosters analytical and critical thinking skills to promote a scientific understanding of the real world. No credit for physics majors. This is a General Education course.

### **College Physics 2 (PHY 2054) 4 credits**

*Prerequisite: PHY 2053*

The algebra- and trigonometry-based course surveys fundamental laws and phenomena of electricity and magnetism, optics, special relativity, atomic and nuclear physics. Emphasis on understanding of physical concepts through examples drawn from the physical and life sciences. No credit for physics majors.

### **Physics Study Abroad (PHY 2952) 1-6 credits**

*Prerequisite: Sophomore standing*

Credit for enrollment in approved study abroad programs.

### **Survey of Modern Physics (PHY 3101C) 3 credits**

*Prerequisites: PHY 2049 and MAP 3305*

Survey of the quantum and statistical theories underlying modern physics as well as an overview of

atomic and nuclear physics. The in-class lecture section will be complemented by experimental and computational exercises.

### **Classical Mechanics (PHY 3221) 3 credits**

*Prerequisites: PHY 2048, MAP 3305*

This course covers analytical mechanics through the Lagrangian and Hamiltonian variational formalisms. It emphasizes problem solving in applications to central-force and rigid-body motion as well as small oscillations.

### **Electromagnetism 1 (PHY 3323) 3 credits**

*Prerequisite: PHY 2049, MAC 2313*

Study of dynamic fields and the unification of electric and magnetic phenomena. Emphasis on induction and radiation phenomena with applications to optics and relativistic electrodynamics.

### **Electromagnetism 2 (PHY 3324 ) 3 credits**

*Prerequisite: PHY 3323*

This course studies dynamic fields and the unification of electric and magnetic phenomena. In particular, it considers induction and radiation phenomena as well as topics in optics and relativistic electrodynamics.

### **Physical Electronics (PHY 3722C) 3 credits**

*Prerequisite: PHY 2049*

A series of interrelated lectures and laboratory exercises that studies D.C. and A.C. circuits, transistors, vacuum tubes, rectifiers, amplifiers, oscillators, and pulse circuits. Emphasis on building circuits, including integrated circuits.

### **Undergraduate Laboratory 1 (PHY 3802L) 1-2 credits**

*Prerequisite: PHY 3101C*

A series of laboratory experiments in classical and modern physics, electrical measurement techniques, and optics, with applications to problems in atomic, nuclear, and solid-state physics comprise this course.

### **Third-Year Physics Seminar (PHY 3932) 1 credit**

*Prerequisite: PHY 3101C*

Focuses on career development for upper-division Physics majors. Topics covered include graduate school applications, CV/résumé development and undergraduate research opportunities.

### **Statistical Physics (PHY 4523) 3 credits**

*Prerequisites: PHY 3101C*

An introduction to the statistical mechanics and thermodynamics of macroscopic systems in equilibrium. This course develops various ensemble theories and uses them to study the physical properties of classical and quantum ideal gases, crystals, magnetic materials and other systems.

**Quantum Mechanics 1 (PHY 4604) 3 credits**

*Prerequisite: PHY 3101C*

This course introduces the modern theory of quantum mechanics. It studies both wave and matrix mechanics as well as their interrelation in the modern theory. Applications studied include particle systems, the simple harmonic oscillator, and the hydrogen atom.

**Quantum Mechanics 2 (PHY 4605) 3 credits**

*Prerequisite: PHY 4604*

Continuation of the development of modern quantum mechanics with emphasis on approximation methods suitable for analyzing more realistic quantum systems. Course also examines one or more advanced topics of current interest in the field.

**Undergraduate Laboratory 2 (PHY 4803L) 1 credit**

*Prerequisite: PHY 3101C*

Continued laboratory experiments in classical and modern physics, electrical measurement techniques and optics, with applications to problems in atomic, nuclear and solid-state physics.

**Directed Independent Study (PHY 4905) 1-3 credits**

*Prerequisite: Permission of instructor*

Study of topics in physics relating to the special needs and interests of individual students.

**Undergraduate Research (PHY 4910) 1-6 credits**

*Prerequisite: Permission of instructor*

This course offers credit to undergraduates participating in current research within the department.

**Special Topics (PHY 4936) 1-4 credits**

*Prerequisite: Permission of instructor*

Lectures and directed reading on topics of contemporary interest in physics.

**Physics Study Abroad (PHY 4957) 1-6 credits**

*Prerequisite: Sophomore standing*

Credit for enrollment in approved study abroad programs.

**Undergraduate Thesis (PHY 4972) 3-6 credits**

*Prerequisite: Permission of instructor*

This course offers credit to undergraduates participating in current research within the department and preparing a final activity report. Undergraduate theses must be approved by research supervisors and the department chair, but need not be defended. *Grading: S/U*

**Computational Physics (PHZ 3151C) 3 credits**

*Prerequisites: MAC 2313, PHY 3101C*

The course covers selected topics in numerical computation and computer-assisted analysis, with applications to physical systems.

**Mathematical Methods for Physics (PHZ 4113) 3 credits**

*Prerequisite: MAP 3305*

This course develops applied mathematics for the physical sciences. It introduces integral transform, Green's function and orthogonal function expansion methods for solving differential equations. It also examines selected advanced topics, such as complex variables.

**Introduction to Biophysics (PHZ 4710) 3 credits**

*Prerequisites: PHY 2054 or PHY 2049 or equivalent*

An introductory survey of the ideas and application of physics in the realm of biology. Accessible to both Physics and Biology students. Emphasis is placed on how the ideas and tools of statistical physics can be used to give physical insights into complex biological problems with the aim of reaching new levels of quantitative understanding and prediction.

**Physical Science (PSC 2121) 3 credits**

A self-contained course for non-science majors that emphasizes analytical thinking and problem solving. It covers essential concepts in astronomy, physics, chemistry, geology and meteorology. No credit for both PSC 2121 and one of PHY 2043, PHY 2048 or 2053. This is a General Education course.

**Physics Graduate Courses**

**Directed Independent Study (AST 6907) 1-3 credits**

Independent study of advanced topics supervised by a member of the Physics faculty.

**Topics in Physics (PHY 5935) 1-4 credits**

An intensive study of topics of special interest to inservice teachers. It provides no credit toward a major in Physics.

### **Special Topics (PHY 5937) 1-4 credits**

*Prerequisite: Permission of instructor*

Lectures and directed reading in advanced physics.

### **Mechanics (PHY 6247) 3 credits**

Classical mechanics from the advanced standpoint: Hamilton's principle, Lagrange's and Hamilton's equations, canonical transformations, Hamilton-Jacobi equations, and integral invariants.

### **Electromagnetism (PHY 6346) 3 credits**

Boundary-value problems in electrostatics, magnetostatics and steady currents; it looks at multipoles, dielectrics, Maxwell's equations, and energy and momentum of the electromagnetic field.

### **Electromagnetic Fields (PHY 6347) 3 credits**

*Prerequisite: PHY 6346*

Plane electromagnetic waves and wave propagation, wave guides, simple radiating systems, radiation from moving charges, and scattering and multipole fields.

### **Statistical Mechanics (PHY 6536) 3 credits**

Theory and application of classical and quantum statistical mechanics.

### **Quantum Mechanics 1 (PHY 6645) 3 credits**

Fundamental concepts of quantum mechanics, quantum dynamics, angular momentum, exactly solvable three-dimensional problems, symmetry in quantum mechanics, approximation methods, scattering theory.

### **Quantum Mechanics 2 (PHY 6646) 3 credits**

*Prerequisite: PHY 6645*

Advanced concepts of quantum mechanics, many-particle theory and the local density approximation, introduction to relativistic and quasi-relativistic quantum theory, time-dependent perturbation theory and the interaction of particles with radiation.

### **Quantum Field Theory 1 (PHY 6668) 4 credits**

*Prerequisite: PHY 6645*

Introduction to relativistic particle equations (Klein-Gordon, Dirac, Maxwell, Proca); classical field theory (Euler Lagrange equations and Noether's theorem); symmetries and invariances; introduction to field quantization; quantization of the Klein-Gordon, Dirac and Maxwell fields; covariant commutation relations; S-matrix expansion; Wick's theorem; QED S-operators and S-matrix elements to second order.

### **Quantum Field Theory 2 (PHY 6669) 3 credits**

*Prerequisite: PHY 6668*

Cross sections, Spin sums, polarization sums, trace theorems; calculation of QED interactions; radiative corrections; renormalization; introduction to weak interactions; leptonic weak interactions; IVB theory; gauge theory of weak interactions; the Goldstone model; the Higgs model; standard electro-weak theory.

### **Directed Independent Study (PHY 6907) 1-3 credits**

Independent study of advanced topics supervised by a member of the Physics faculty.

### **Graduate Research (PHY 6918) 1-12 credits**

*Prerequisite: Permission of instructor*

Supervised research in physics for master's degree. *Grading: S/U*

### **Graduate Colloquium (PHY 6920) 1 credit**

*Prerequisite: Permission of instructor*

This includes lectures and discussion on current topics in physics by graduate students, faculty, or visitors. *Grading: S/U*

### **Special Topics (PHY 6938) 1-4 credits**

Lectures and reading in physics.

### **Master's Thesis (PHY 6971) 1-12 credits**

*Prerequisite: Permission of graduate coordinator*

*Grading: S/U*

### **Advanced Research in Physics (PHY 7978) 1-9 credits**

*Prerequisite: Admission to Ph.D. program*

Research that is focused and relevant to the student's course of study in the Ph.D. program in Physics. The course requires oversight by the student's dissertation advisor. *Grading: S/U*

### **Dissertation (PHY 7980) 1-12 credits**

*Prerequisite: Admission to doctoral candidacy*

*Grading: S/U*

### **Mathematical Physics (PHZ 5115) 3 credits**

Further topics in mathematical physics including: solution of partial differential equations by Greens functions, perturbation theory, integral equations, calculus of variations, and topics of special interest.

### **Mathematical Physics 2 (PHZ 5116) 3 credits**

Topics in mathematical physics including: complex variables, calculus on manifolds, Riemannian geometry, Lie groups, connections and curvature on fiber bundles, and/or selected topics of special interest.

### **Computational Physics (PHZ 5156) 3 credits**

*Prerequisite: Two semesters of calculus or permission of instructor*

Introduction to the use of numerical methods to solve realistic physics problems. Emphasis on good programming techniques and on obtaining insight into the problem rather than just numerical answers. Discussion of recent developments such as distributed and symbolic computing.

### **Introduction to Biophysics (PHZ 5715) 3 credits**

*Prerequisites: PHY 2049 or PHY 2054 or equivalent*

A survey of the ideas and application of physics in the realm of biology designed to be accessible to physics or biology students. Emphasis on how the ideas of statistical physics can be used to give physical insights into complex biological problems with quantitative understanding and prediction.

### **Numerical Relativity (PHZ 7609) 3 credits**

*Prerequisite: PHY 6938 (General Relativity)*

Offers an introduction to the mathematical formalisms employed to solve the Einstein equations numerically.

### **Radiation Biology (RAT 6204) 3 credits**

*Prerequisite: Permission of instructor*

An overview of the effects of ionizing radiations on human and other biological systems. The course involves consideration of cell survival after exposure to ionizing radiations, repair of radiation damage, radiosensitizers and radioprotectors, doses and risks in diagnostic radiology, cardiology, nuclear medicine and basic safety rules. A student seminar is required at the end of the course.

### **Radiation Protection and Safety (RAT 6310) 3 credits**

*Prerequisite: Permission of instructor*

Course provides students with the knowledge and technical background to understand the calculation methodology, compliance with safety standards and use of quantitative risk assessment for radiation protection and safety.

### **Shielding and Commissioning (RAT 6376) 3 credits**

*Prerequisite: Permission of instructor*

Covers the science of opening a new radiation oncology center. Covers shielding calculations, installing and running the acceptance testing of a linear accelerator, high dose rate brachytherapy afterloader, CT simulator, treatment planning systems, commissioning of the treatment planning systems.

### **Medical Imaging Physics ( RAT 6616 ) 3 credits**

*Prerequisite: Graduate standing*

Course covers the mathematical and physical principles of medical imaging and its applications as recommended by the AAPM. Students obtain a good understanding of Radiography, Computed Tomography (CT), Magnetic Resonance Imaging (MRI), Ultrasound Imaging (US), Fluorescence and Nuclear Medical Imaging.

### **Radiation Therapy Physics (RAT 6628) 3 credits**

Introductory course with a clinical orientation that reviews the rationale, basic science, methods, and applications of radiation therapy to the treatment of human diseases. Low- and high-energy photon therapy, electron and proton therapy, and low- and high-dose rate brachytherapy.

### **Advanced Photon Beam Radiation Therapy (RAT 6629) 3 credits**

*Prerequisite: RAT 6628*

Course covers the physics and clinical application of advanced external beam photon therapies with special emphasis on IMRT (Intensity Modulated Radiation Therapy).

### **Radiation Physics (RAT 6686) 3 credits**

Course covers the basics of ionizing and non-ionizing radiation, atomic and nuclear structure, basic nuclear and atomic physics, radioactive decay, interaction of radiation with matter, radiation detection, and dosimetry.

### **Nuclear Medical Physics ( RAT 6687 ) 3 credits**

*Prerequisite: Permission of instructor*

Covers the fundamentals of nuclear physics and its application in the medical field as recommended by the AAPM. Students gain understanding of the physics and instrumentation of nuclear medicine.

### **Directed Independent Study (RAT 6904) 1-3 credits**

*Prerequisite: Permission of instructor*

Guided study of advanced topics in medical physics relating to particular needs of individual students.

### **Directed Independent Study (RAT 6907) 1-3 credits**

Independent study of advanced topics supervised by a member of the Physics faculty.

### **Seminar in Medical Physics (RAT 6932) 1 credit**

*Prerequisite: Permission of instructor*

Includes lectures and discussion on current topics in medical physics by faculty, graduate students and visitors. *Grading: S/U*

### **Radiation Therapy: Clinical Practicum and Shadowing (RAT 6947) 3 credits**

*Prerequisites: RAT 6628, RAT 6629*

Application of medical physics to cancer therapy in a hospital setting under close supervision. Dosimetry, calibrations, commissioning, radiation survey, and treatment planning. Clinically oriented laboratory-type projects are assigned. *Grading: S/U*

### **Master's Thesis (RAT 6975) 7 credits**

*Prerequisite: Permission of advisor*

Research supervised by the thesis advisor. *Grading: S/U*

## PSYCHOLOGY

**Undergraduate Courses** /[link to graduate courses](#)

### **Comparative Animal Behavior (CBH 4024) 3 credits**

*Prerequisite: PSY 1012, BSC 1010*

An introduction to the evolution and adaptive significance of animal behavior. Topics include traditional and modern ethological concepts; sensory function; orientation, migration and communication; territoriality and animal social behavior.

### **Psychopathology (CLP 4144) 3 credits**

*Prerequisite: PSY 1012*

Understanding of so-called physical and mental illness by means of conventional and common path theories.

### **Clinical Psychology (CLP 4343) 3 credits**

*Prerequisite: PSY 1012*

Provides an understanding of the practice of modern clinical psychology. Students will be able to understand the theory and application of evidence-based practice in clinical psychology, including assessment, treatment, forensic settings, healthcare applications and organizational consulting.

### **Forensic Psychology (CLP 4390) 3 credits**

*Prerequisite: PSY 1012 with minimum grade of "C-"*

This course provides an introduction to forensic psychology – the application of psychological science and professional psychological practice to the law to inform a pending legal decision. “Forensic” comes from the Latin word for “court,” and “forensic psychologists” are psychologists who help courts make decisions about people when some question related to psychology is involved. Thus, forensic psychologists are typically involved in cases “preadjudication,” which means before the legal decision is made.

### **Psychology of Human Development (DEP 3053) 3 credits**

*Prerequisite: PSY 1012*

Examines changes in behavior over the course of development and the processes underlying these changes. All major areas of child development are reviewed, including cognitive, social/personality, language, and biological, with attention to development in adolescence and adulthood.

### **Personality and Social Development (DEP 4095) 3 credits**

*Prerequisites: PSY 1012 and DEP 3053*

A review of psychological theory and research on age trends and individual differences in personality and social development.

### **Infant Development (DEP 4115) 3 credits**

*Prerequisites: PSY 1012 and DEP 3053*

*Corequisite: DEP 3053*

This course provides an overview of the field of infant development with a particular focus on behavioral development. Topics to be considered are physical, physiological, sensory, perceptual, and cognitive development during the first year of life in humans and other species.

### **Language Acquisition (DEP 4130) 3 credits**

*Prerequisites: PSY 1012 and DEP 3053*

A broad background course in the psychological aspects of language and its acquisition. Topics include the psychology and acquisition of grammar, word meaning, reading comprehension, and conversational rules, among others.

### **Cognitive Development (DEP 4163) 3 credits**

*Prerequisites: PSY 1012 and DEP 3053*

An examination of psychological research and theory of age changes in children's thinking. Topics include Piagetian theory and concept and memory development.

### **Psychology of Adolescence (DEP 4305) 3 credits**

*Prerequisite: PSY 1012*

A topical study of adolescent behavioral and psychological development with emphasis on theory, methods of inquiry, and practical implications.

### **Human Development Laboratory (DEP 4797C) 3 credits**

*Prerequisite: DEP 3053*

Students participate in research activities and seminar discussions that illustrate current methods in the psychological study of human development. Firsthand research experiences and related readings provide exposure to and training in the practice of human developmental research applied to different age periods and domains.

### **Cognition (EXP 3505) 3 credits**

*Prerequisites: PSY 1012 and PSY 3234 with minimum grade of "C-"*

*Corequisite: PSY 3234 with minimum grade of "C-"*

Experimental and theoretical aspects of human learning and cognition. Topics include attention, human learning and memory, organization of knowledge, concept formation and problem solving.

### **Human Perception (EXP 4204) 3 credits**

*Prerequisites: PSY 1012 and either EXP 3505 or PSB 3002*

The development of theoretical models of human perception on the basis of experimental research into visual sensory systems, the perception of movement and space, and differential information processing capacities.

### **Psychology of Motivation (EXP 4304) 3 credits**

*Prerequisite: PSY 1012*

A critical examination of the concept of motivation as an explanatory mechanism in understanding behavior.

### **Psychology of Learning (EXP 4404) 3 credits**

*Prerequisite: PSY 1012 and PSY 3213*

Lectures concerned with problems, methods and content in the area of learning.

### **Human Memory (EXP 4525) 3 credits**

*Prerequisite: PSY 1012*

This course presents psychological research and theory related to human memory. Multiple memory systems are discussed, including short-term or working memory, long-term memory, procedural

memory, implicit memory, and semantic memory. Different populations of memory users are also discussed, including children, older adults, and amnesics.

### **Cognition Laboratory (EXP 4934C) 3 credits**

*Prerequisites: PSY 1012 and EXP 3505 (may be taken concurrently)*

Students apply knowledge of cognitive psychology to the testing of scientific hypotheses, improve skills in oral and written reports, and obtain firsthand experience with the ways that cognitive psychologists use computers to conduct research.

### **Industrial Organizational Psychology (INP 4003) 3 credits**

*Prerequisite: PSY 1012 with minimum grade of "C-"*

This course describes the applications of psychology to the modern business world, including advertising and marketing, negotiation and selling, customer service, hiring and firing, motivation and teamwork, coaching and discipline, supervision and leadership, organizational stress-management, dysfunctional work behavior, workplace violence and harassment, conflict resolution and crisis management, organizational culture and business ethics, and careers in business psychology and corporate consulting.

### **Interpersonal Processes (PCO 4734) 3 credits**

*Prerequisites: PSY 1012 and either PSY 3213 or PSY 3234*

An examination of psychological processes involved in the development, maintenance and dissolution of interpersonal relationships.

### **Personality Theories (PPE 4003) 3 credits**

*Prerequisite: PSY 1012*

Psychoanalytic, behavioristic and humanistic theories of personality. Primary emphasis on cognitive systems of individuals.

### **Experimental Studies of Personality (PPE 4700) 3 credits**

*Prerequisite: PSY 1012*

An examination of psychological theory and research on how a variety of personality trait dimensions interact with situations to determine social behavior.

### **Biological Bases of Behavior (PSB 3002) 3 credits**

*Prerequisites: PSY 1012 and PSY 3234 with minimum grade of "C-"*

*Corequisite: PSY 3234 with minimum grade of "C-"*

A study of the structures and functions of the neural and endocrine systems as they relate to behavior.

### **Computer Lab in Psychobiology (PSB 3002L) 3 credits**

*Prerequisite: PSB 3002*

Computer-based system of instruction that covers cell biology, electrical theory, resting-membrane potentials, action potentials, synaptic potentials, neuroanatomy and neurochemistry, and sensory systems.

### **Biological Bases of Behavior 2 (PSB 4006) 3 credits**

*Prerequisite: PSB 3002*

A survey of the biological bases of specific species-typical behaviors such as sleep, language and memory, ingestive behaviors, reproductive behavior, emotion and stress, and human communication.

### **Neuropsychology (PSB 4240) 3 credits**

*Prerequisites: PSY 1012 and PSB 3002*

Explores the fundamentals of human neuropsychology, including the effects of brain damage on memory, language and spatial behavior, development and recovery of function.

### **Human Psychophysiology (PSB 4323) 3 credits**

*Prerequisite: PSB 3002*

An introduction to the study of human physiological responses (EEG, EKG, etc.) and related psychological processes.

### **Psychopharmacology (PSB 4444) 3 credits**

*Prerequisites: PSY 1012 and PSB 3002*

An introduction to the major classes of psychoactive drugs and how they affect behavior. Equal emphasis will be given to laboratory and clinical studies.

### **Developmental Psychobiology (PSB 4504) 3 credits**

*Prerequisite: PSY 1012*

Examines biological and psychological contributions to the development of behavior. Topics include: the concept of innate behavior; critical periods in early development; and selected aspects of motivational development.

### **RI: Neurobiology of Learning and Memory (PSB 4810) 3 credits**

*Prerequisites: PSB 3002, PSB 4006, PSY 3213*

This course examines contemporary and classical research on the neural substrates of learning and memory. The format includes 50 percent lectures and 50 percent student presentations of research papers. Students work in groups to design and complete a research project during the semester. This is a research-intensive (RI) course.

### **Neuroscience of Sleep (PSB 4842) 3 credits**

*Prerequisite: PSB 3002 with minimum grade of "C-"*

This course introduces the field of sleep science. Topics addressed include the neurochemistry of sleep, circadian biology, normal sleep physiology, sleep across the lifespan, diagnostic sleep testing, sleep deprivation, sleep disorders and dreams.

### **Directed Independent Research in Neuroscience and Behavior (PSB 4915) 1-3 credits**

*Prerequisite: Permission of instructor*

Students work closely with research mentors to conduct research and inquiry in neuroscience and behavior. Requirements for the course and the criteria for evaluation are agreed upon by the research mentor and the student.

### **Directed Independent Research in Neuroscience and Behavior (PSB 4917) 0-3 credits**

*Prerequisite: Permission of instructor*

Students work closely with research mentors to conduct research and inquiry in neuroscience and behavior. Requirements for the course and the criteria for evaluation are agreed upon by the research mentor and the student. *Grading: S/U*

### **Special Topics in Neuroscience and Behavior (PSB 4930) 3 credits**

*Prerequisite: Permission of instructor*

A detailed examination of selected topics of interest to students in neuroscience and behavior.

### **General Psychology (PSY 1012) 3 credits**

In this course, students will gain an introduction to the scientific study of human behavior and mental processes. Topics may be drawn from historical and current perspectives in psychology. This is a General Education course.

### **University Honors Seminar in Psychology (PSY 1930) 3 credits**

*Writing Across Curriculum (Gordon Rule)*

A seminar in the University Honors Program on topics in psychology.

### **Special Topics in Psychology (PSY 2930) 1-3 credits**

*Prerequisite: Permission of department*

Selected topics in psychology.

### **Psychology Study Abroad (PSY 2952) 1-6 credits**

*Prerequisite: Sophomore standing*

Credit for enrollment in approved study abroad programs.

### **Careers in Psychology (PSY 3070) 3 credits**

*Pre- or corequisite: PSY 1012*

The purpose of this course is to introduce the discipline of psychology and describe careers that psychology majors typically pursue.

### **Research Methods in Psychology (PSY 3213) 3 credits**

*Prerequisites: PSY 1012 and PSY 3234 with minimum grade of "C-"*

*Corequisite: PSY 3234 with minimum grade of "C-"*

Introduction to research design and methods in psychology. Topics include observation and description of behavior; methods of measurement; and analytic and quasi-analytic experimental design. Laboratory exercises included to illustrate designs and provide experience in research report writing.

### **Experimental Design and Statistical Inference (PSY 3234) 3 credits**

*Gordon Rule, computational*

*Prerequisite: PSY 1012*

Interpretation of data and inferential techniques are considered for a variety of experimental paradigms in the life sciences including small and correlated samples.

### **Cooperative Education - Psychology (PSY 3949) 1-3 credits**

*Grading: S/U*

### **Multicultural Psychology (PSY 4027) 3 credits**

*Prerequisite: PSY 1012*

*Prerequisites or Corequisites: PSY 3213 and PSY 3234*

The purpose of this course is to examine cultural processes as a defining characteristic of what it is to be human and as a central, or proximal, variable in psychology. The course is intended to provide students with a better appreciation of the myriad ways in which culture determines psyche and behavior and to enhance their awareness of the countless variation in human behavior across cultures. This course prepares students to navigate modern issues of multiculturalism in a diverse society.

### **Psychometrics and Psychological Testing (PSY 4302) 3 credits**

*Prerequisites: PSY 1012 and PSY 3234*

Theory and method in personality measurement: reliability, validity, examples of tests used to measure personality traits and other dispositions.

### **History and Systems of Psychology (PSY 4604) 3 credits**

*Prerequisite: PSY 1012*

Philosophical sources. Emergence of such systems as structuralism, functionalism, behaviorism, and Gestalt psychology and contemporary theory in psychology.

**Evolutionary Psychology (PSY 4810) 3 credits**

*Prerequisite: PSY 1012*

Provides a broad overview of historical and modern research and theory in evolutionary psychology, the study of the evolution of the mechanisms of the mind. Topics include mating, parenting, social exchange, and violence.

**Directed Independent Study (PSY 4906) 1-3 credits**

*Prerequisite: Permission of instructor*

*Grading: S/U*

**Directed Independent Research in Psychology (PSY 4915) 1-3 credits**

*Prerequisite: Permission of instructor*

Students work with research mentors to conduct research and inquiry in Psychology. Requirements for the course and the criteria for evaluation are agreed upon by the mentor and student.

**Directed Independent Research in Psychology (PSY 4916) 0-3 credits**

*Prerequisite: Permission of instructor*

Students work with research mentors to conduct research and inquiry in Psychology. Requirements for the course and the criteria for evaluation are agreed upon by the mentor and student. *Grading: S/U*

**Special Topics (PSY 4930) 1-3 credits**

*Prerequisite: Permission of instructor*

Selected topics in Psychology.

**Honors Seminar (PSY 4932) 3 credits**

*Prerequisite: Permission of department*

**Honors Critical Questions in Psychology (PSY 4935) 3 credits**

*Prerequisites: 3.2 GPA and invitation from faculty (permission of instructor)*

An advanced seminar-style course for undergraduate honors students in the B.A. in Psychology or B.S. in Neuroscience and Behavior programs, which introduces key concepts on controversial issues from different psychological viewpoints. Topics vary from semester to semester, such as relationship between psychological development and evolution, incidence of violence in society and prosecution of violent acts, and whether or not artificial intelligence is a good model for human intelligence.

### **Psychology Study Abroad (PSY 4957) 1-6 credits**

*Prerequisite: Sophomore standing*

Credit for enrollment in approved study abroad programs.

### **Honors Thesis (PSY 4970) 1-3 credits**

*Prerequisite: Permission of department*

*Grading: S/U*

### **Social Psychology (SOP 3004) 3 credits**

*Prerequisites: PSY 1012 and PSY 3234 with minimum grade of "C-"*

*Corequisite: PSY 3234 with minimum grade of "C-"*

Introduction to psychological theory and research on the nature and causes of human social behavior.

### **Psychology of Women (SOP 3742) 3 credits**

*Prerequisite: PSY 1012*

Lectures and discussions dealing with the empirical and theoretical literature related to the psychological aspects of sexual differentiation in general, and women in particular.

### **Social Behavior Laboratory (SOP 4230C) 3 credits**

*Prerequisite: PSY 1012*

Methods and theories relevant to the scientific study of social behavior, with special attention to social attraction, helping and compliance, group productivity, and the spread of social influence in groups and populations. Lecture and laboratory.

### **Police Psychology (SOP 4750) 3 credits**

*Prerequisite: PSY 1012 with minimum grade of "C-"*

Understand the current applications of psychology to policing and law enforcement, including (1) operational assistance (community policing, crisis negotiation, special units, criminal investigation); (2) clinical services (critical incident response, officer-involved shooting, law enforcement psychotherapy, family services); and (3) administrative and management services (officer selection and screening, fitness-for-duty, discipline and internal investigation).

### **Psychology and the Law (SOP 4751) 3 credits**

*Prerequisite: PSY 1012*

Course helps students understand the modern applications of psychology to civil and criminal competencies, torts and personal injury, investigation and interviewing, the insanity defense, criminal classification, juvenile and family law, sexual deviance and violent behavior, offender profiling, dangerousness prediction, trial testimony, jury psychology and the role of the psychologist as expert

witness.

### **Intermediate Statistics Lab (STA 3163L) 1 credit**

*Gordon Rule, computational*

*Prerequisites: PSY 1012 and PSY 3234 (may be taken concurrently)*

Computer organization, computer implementation of basic and intermediate statistical inferences that include describing data, graphic presentation, analysis of data. Applications will reflect the descriptive and statistical inferences appropriate to the discipline under which this course is offered (e.g., business, education, engineering, mathematics, psychology, etc.).

### **Social Psychology Study Abroad (SYP 2952) 1-6 credits**

*Prerequisite: Sophomore standing*

Credit for enrollment in approved study abroad programs.

### **Social Psychology Study Abroad (SYP 4957) 1-6 credits**

*Prerequisite: Sophomore standing*

Credit for enrollment in approved study abroad programs.

## **Psychology Graduate Courses**

### **Seminar in Cognitive Development (DEP 6067) 3 credits**

A study of the development of processes involved in thinking and learning.

### **Parent-Child Relationships (DEP 6609) 3 credits**

Course will provide an overview of contemporary theory and research on human parent-child relationships. Fundamentals of developmental psychology will be applied to central issues facing children, parents, and their families.

### **Evolutionary Developmental Psychology (DEP 6610) 3 credits**

*Prerequisite: Graduate status or permission of instructor*

This seminar acquaints students with the emerging field of evolutionary developmental psychology. Introduction of key concepts, issues, and lines of research. Students are expected to take an active role in discussing and developing the topic under consideration.

### **Special Topics in Developmental Psychology (DEP 6930) 3 credits**

A survey of current research and theory pertaining to selected topics in developmental psychology.

### **Seminar in Development of Social Cognition (DEP 6931) 3 credits**

A critical review of contemporary theory and research on social cognition as it relates to children's social and personality development.

**Seminar in Individual Differences in Children's Thinking (DEP 6932) 3 credits**

An overview and critical analysis of concepts, theories and empirical findings related to individual differences in children's (and adults') intellectual performance.

**Seminar in Human Perception (EXP 6208) 3 credits**

A study of the development of theoretical models of perception with an emphasis on human information-processing capacities.

**Seminar in Cognition (EXP 6609) 3 credits**

A discussion of experimental and theoretical aspects of cognition. Topics include attention, human learning and memory, organization of knowledge, problem solving, and decision making.

**Special Topics in Cognition (EXP 6930) 3 credits**

A survey of the current literature pertaining to selected topics in cognition.

**Directed Independent Study (EXP 6908) 1-3 credits**

*Grading: S/U*

**Special Topics in Personality and Social Psychology (PPE 6930) 3 credits**

A survey of the current literature pertaining to selected topics in personality and social psychology.

**Principles of Neuroscience (PSB 6037) 3 credits**

A survey of principles of neuroscience as they relate to behavior. Topics include morphology and connectivity of neural cells, biological potentials, gross structure of the central and peripheral nervous system, and sensory, motor, and higher-order integrative functions.

**Seminar in Behavioral Neuroscience (PSB 6058) 3 credits**

A subdiscipline of neuroscience, behavioral neuroscience explores how behavior is controlled by the nervous system. Topics such as neural control of waking and arousal, neural control of movement, and the role of dopamine in reinforcement are covered.

**Cellular and Molecular Neuroscience (PSB 6345) 3 credits**

This is a graduate course in neuroscience that covers the structure and function of neurons and glial cells including electrophysiology, neurotransmitter systems and synaptic function/plasticity. It is given in conjunction with PSB 6346.

### **Systems and Integrative Neuroscience (PSB 6346) 3 credits**

This course is for graduate students who have completed PSB 6345 successfully. This course follows PSB 6345 with content on development, neuroanatomy, sensory systems, motor systems and cognition.

### **Developmental Neurobiology (PSB 6515) 3 credits**

*Prerequisites: PSY 1012 and PSB 3002*

In-depth coverage of the principles and recent advances in the development of the brain and nervous system, including nerve cell migration, axon outgrowth, specificity, plasticity, neurotrophism, nerve cell death, and the influence of experience on the nervous system.

### **Developmental Neuropsychology (PSB 6516) 3 credits**

*Prerequisite: Graduate status or permission of instructor*

This seminar is designed to introduce students to theories and research on brain maturity and human cognitive development. Key concepts such as brain asymmetry and neuroplasticity are analyzed. Abnormalities resulting from neurological or other biological disruptions are discussed.

### **Neuroscience Ph.D. Lab Rotation (PSB 6910L) 2 credits**

Students admitted to the Neuroscience Ph.D. program complete three laboratory research rotations in Year 1 (fall-spring semesters) with different faculty mentors to gain research experience in the area of neuroscience. *Grading: S/U*

### **Special Topics in Behavioral Neuroscience (PSB 6930) 3 credits**

A survey of the current literature pertaining to selected topics in behavioral neuroscience.

### **Advanced Research in Neuroscience (PSB 7918) 1-9 credits**

*Prerequisites: Completion of 18 required credits in Year 1 of the Neuroscience Ph.D. program and a GPA of at least 3.0*

Focused, relevant research in the student's course of study in the Ph.D. program in Neuroscience. This course requires oversight by the student's dissertation advisor, who can grade the student's performance at the end of the semester. Advanced research work forms the basis for the dissertation proposal.

*Grading: S/U*

### **Dissertation (PSB 7980) 1-9 credits**

*Prerequisite: Admission to doctoral candidacy*

Dissertation research leading the Ph.D. degree in Neuroscience. *Grading: S/U*

### **Special Topics (PSY 5930) 3 credits**

Selected topics in psychology.

### **Experimental Design 1 (PSY 6206) 3 credits**

An introduction to the design and analysis of experiments in psychology, with special emphasis on analysis of variance models.

### **Experimental Design 1 Lab (PSY 6206L) 1 credit**

The primary goal of this course is to provide students with hands-on experience using SPSS, an advanced statistical software package used in the social and biological sciences. Students gain experience in behavioral data entry, manipulation, analysis, interpretation and visualization.

### **Experimental Design 2 (PSY 6207) 3 credits**

*Prerequisite: PSY 6206 or its equivalent*

Advanced treatment of experimental designs in psychology, with special emphasis on the analysis of variance in multifactor experiments. It also examines covariance and multiple regression analysis.

### **Special Topics (PSY 6930) 1-3 credits**

Selected topics in psychology are discussed.

### **Cooperative Education - Psychology (PSY 6949) 1-3 credits**

### **Master's Thesis (PSY 6971) 1-6 credits**

*Grading: S/U*

### **Advanced Research in Psychology (PSY 7978) 1-9 credits**

*Prerequisite: Admission to Ph.D. program*

Focused, relevant research in the student's course of study in the Ph.D. program in psychology. This course requires oversight by the student's dissertation advisor. *Grading: S/U*

### **Dissertation (PSY 7980) 1-15 credits**

*Grading: S/U*

### **Advanced Social Behavior (SOP 6079) 3 credits**

Advanced theory and methods for studying the dynamics of social systems. Topics include social interaction, the social inhibition of pro- and antisocial behavior, group productivity, and dynamic social impact.

## **URBAN AND REGIONAL PLANNING**

## **Undergraduate Courses** /[link to graduate courses](#)

### **Designing the City (URP 2051) 3 credits**

This course focuses on the process of urbanization and the social, cultural, political, and economic dynamics behind the complex urbanization process. It explores the historical development of cities, how different patterns of human behavior shape the city space, the role of society in place-making, and planning and governance of cities, including related institutions and organizations. This is a General Education course.

### **Introduction to Urban Planning and Design (URP 3000) 3 credits**

An introduction to and survey of the evolution of cities, urban planning and urban design. Both historical and contemporary perspectives will be employed. Concepts and theories about planning and the relationship between knowledge and action. The political, social and economic forces affecting communities, planning and design.

### **Planning Methods (URP 4011) 3 credits**

Proficiency in application of quantitative and qualitative analytical techniques. Analysis of past and existing conditions and evaluation of alternative policies and programs. Computer applications in planning.

### **City Structure and Change (URP 4055) 3 credits**

This course assists students in understanding the built environment as a dynamic product of social, cultural, political, and economic forces. Students conduct field work to analyze spatial structure and gain experience in graphic communication using maps, drawings, diagrams, and images.

### **Planning Implementation Strategies (URP 4120) 3 credits**

Legal, economic, and political mechanism and strategies for implementing plans, policies and programs to stimulate growth, stem urban decline and protect historic, cultural, and natural resources. Regulatory tools, incentive and disincentive policies, eminent domain, public acquisition, and public spending options used to promote public objectives in planning.

### **Introduction to Visual Planning Technology (URP 4254) 3 credits**

The practice of urban planning now requires that students understand how to use a variety of computer-based applications for creating appropriate visual information linked to other types of data. This course provides an overview of several of these applications: PowerPoint, Excel, Adobe Photoshop, GIS, and 3D visualization.

### **Advanced Visual Planning Technologies (URP 4255) 3 credits**

*Prerequisites: URP 4254 with minimum grade of "C"; For B.U.D. and B.U.R.P. students only*

The practice of urban planning now requires that students understand how to use a variety of computer-based programs for creating appropriate visuals and graphics. This course explores the computer-based programs to conduct site analysis, create persuasive graphics and improve communications.

### **RI: Web-Based Applications in Planning (URP 4273) 3 credits**

This course focuses on web-based urban and regional planning applications and how they can provide decision support to community-wide land use design, suitability modeling, scenario-based design, comparisons and evaluation of alternatives. This is a research-intensive (RI) course.

### **Plan Making and Zoning (URP 4343) 3 credits**

*Prerequisite: URP 3000*

Designed to provide students with an understanding of how plans are made and how cities are designed. Emphasis on why planners plan, the different scales and types of plans, how zoning works and how to conduct planning analyses.

### **Sustainable Cities (URP 4403) 3 credits**

The sustainability of cities has gained attention due to the effects of urbanization on the environment, the economy, and social and political justice. This course focuses on planning as a means of making cities more sustainable.

### **RI: Sustainable Cities (URP 4403) 3 credits**

The sustainability of cities has gained attention due to the effects of urbanization on the environment, the economy, and social and political justice. This course focuses on planning as a means of making cities more sustainable. This course is research intensive (RI).

### **Environmental Planning Methods (URP 4420) 3 credits**

Focus on balancing growth and development with protection and preservation for natural resources. Emphasizes planning problems and options in suburban and exurban settings. Concern for air, water and land resources, as well as wildlife habitat.

### **Planning for Hazards/Disasters (URP 4430) 3 credits**

*Prerequisite: Juniors and seniors only*

Designed to provide students with an understanding of the impact of natural hazards on cities and communities. Emphasis is placed on practical mitigation and recovery strategies as they relate to planning and plan development, vulnerability concepts and methods and the collaboration between organizations, agencies and institutions in efforts toward resilient and sustainable communities.

### **Health and the Built Environment (URP 4523) 3 credits**

The course covers historical/current intersections between urban planning and health, epidemiological and public health principles and methods, and various aspects of health (e.g., exercise, injuries, respiratory health) that are influenced by the built environment and urban planning. Students gain knowledge of Health Impact Assessments and other tools that can be used by urban planners to incorporate considerations of health.

### **Urban Development Planning Methods (URP 4546) 3 credits**

This course focuses on redevelopment, rehabilitation and reuse of existing urbanized areas such as older neighborhoods, downtowns, waterfronts, shopping plazas, and strip commercial developments. Emphasizes community and economic development options to stem decline, stimulate revitalization, promote infill development and gain more efficient use of land and space.

### **Introduction to Transportation Planning (URP 4710) 3 credits**

Introduction to transportation planning issues, planning processes and travel behavior data.

### **RI: Shared and Automated Transport: Current Trends (URP 4712) 3 credits**

This course engages students in the current state of knowledge regarding emerging shared and automated transport modes, drawing from information about current professional practices as well as the research literature. As a seminar-style course, students engage in readings, discussions and presentations to learn about these new modes and grapple with the emerging policy and planning issues surrounding them. This is a research-intensive (RI) course.

### **Land Use and Transportation Planning (URP 4714) 3 credits**

*Prerequisite: For B.U.D. and B.U.R.P. students or permission of instructor*

Transportation shapes the development of cities. This course examines the relationship between transportation and land use and examines what policies have been successful in creating balanced multimodal transportation systems and integrated land uses. Topics address land use theory and patterns; market forces; regional planning livable communities and smart growth; urban design and new urbanism; mobility, accessibility and multimodal transportation systems; transit-oriented development; and zoning.

### **Capital Facilities Planning (URP 4730) 3 credits**

*Prerequisites: URP 3000 and URP 4011*

Course familiarizes students with common local and regional capital facilities. Topics include attributes of such facilities, capital improvement plans, and capital improvement budgeting. Students learn how to construct capital improvement plans and programs and how to analyze the fiscal impacts of capital investment.

### **Housing Policy and Planning (URP 4741) 3 credits**

This course introduces low income housing policies in the United States and the methods to conduct needs assessment for affordable housing. It also addresses other related issues, such as housing bubbles and foreclosures and policy responses in the housing market.

### **Site Planning (URP 4870) 3 credits**

This course covers the basic principles and methods of site planning and the evaluation of site plans.

### **Urban Design: Theories and Methods (URP 4883) 3 credits**

*Prerequisite: Upper-level undergraduate standing*

Provides fundamental knowledge in terms of urban design theories, basic methods of analysis and modes of graphic representations in urban design. Course emphasizes graphic communication and presentation skills necessary for use in urban design projects.

### **Directed Independent Study (URP 4905) 1-3 credits**

Independent study, research or other directed project to extend and integrate the student's knowledge of issues and applications related to planning practice.

### **Directed Independent Research (URP 4910) 1-3 credits**

*Prerequisite: Permission of instructor*

Independent research to extend and integrate the student's knowledge of issues and approaches in the field.

### **Directed Independent Research (URP 4916) 0 credits**

*Prerequisite: For B.U.D. and B.U.R.P. students*

This is a supervised research course. *Grading: S/U*

### **Urban Design Studio 1 (URP 4920) 3 credits**

*Prerequisites: URP 4870 and URP 4883; for B.U.D. students with permission of instructor*

*Prerequisite or Corequisite: URP 4883*

This studio presents design approaches to study complex small- and mid-scale projects and the network of agents in their transformation. Students learn basic principles of urban design, fundamental skills to integrate multi-scalar design strategies and experiment with various representation methods.

### **Urban Design Studio 2 (URP 4922) 3 credits**

*Prerequisites: For B.U.D. students; permission of instructor; URP 4920 and URP 4255 with minimum grades of "C"*

The studio explores urban design as a catalyst of vibrant urban cultural life. Students engage in the conceptualization, planning and design of a district-scale intervention, while learning about urban revitalization from regional and global initiatives.

**RI: Urban Design Capstone (URP 4923) 3 credits**

*Prerequisites: For B.U.D. students; permission of instructor; URP 4922 with minimum grade of "C"*

Students develop an intensive research-based design project reflective of their interests. Emphasis on research design, data gathering methods and translating findings into a written report with design solutions. Studio time is used for lectures, to meet with faculty about their projects and to present progress reports to the class. This is a research-intensive (RI) course.

**RI: Honors Urban Design Capstone (URP 4924) 3 credits**

*Prerequisites: URP 4922 with minimum grade of "C"; for B.U.D. students or permission of instructor*

Students produce a substantive research-based design project that reflects an interdisciplinary approach and meaningful connections focusing on urban design with links among related academic fields. The course focuses on the creation of knowledge pertinent to the field, including leadership, creative and critical thinking, and engagement with the world outside the university. The course involves the refinement of writing, graphics and oral presentation skills to develop a professional-level urban design report. This is a research-intensive (RI) course.

**Special Topics (URP 4930) 1-3 credits**

**Planning Internship (URP 4945) 3 credits**

*Prerequisite: Permission of instructor*

This course requires 160 hours of work as an intern in a planning or planning-related agency or company, submission of a report that reflects on that experience and its relationship to material that each student has learned in the course of his or her studies at FAU and a resume critique by the Career Development Center. *Grading: S/U*

**Planning Abroad (URP 4955) 3 credits**

An opportunity to study urban and regional planning practice in another country.

**RI: Honors Planning Capstone (URP 4978) 3 credits**

Completion of an individual project involving student research and analysis of a problem or issue in planning and design. Refinement of writing and graphics skills or oral presentation. Emphasis on systematic work with regular deadlines and ongoing feedback from the instructor. This is a research-intensive (RI) course.

### **RI: Planning Capstone (URP 4979) 3 credits**

*Prerequisites: URP 3000, URP 4011, URP 4870*

Completion of an individual project involving student research and analysis of a problem or issue in planning and design, synthetic work resulting in (a) research paper or (b) planning document, film or three-dimensional model. Refinement of writing and graphics skills or oral presentation. This is a research-intensive (RI) course.

## **Urban and Regional Planning Graduate Courses**

### **Planning Abroad (URP 5958) 3 credits**

An opportunity to study urban and regional planning practice in another country.

### **History and Theory of Planning (URP 6101) 3 credits**

Covers the emergence and evolution of the planning profession, as well as the design and theoretical concepts that underpin contemporary planning practice .

### **Urban Governance (URP 6115) 3 credits**

Provides an overview of the literature on planning and governance. Focuses on the relationship between government and governance, governance in the networked society and participatory governance and conflict management.

### **Legal Aspects of Planning (URP 6131) 3 credits**

An overview of the legal issues in planning and discussion of the regulatory processes that enable planners to shape community growth and development.

### **Planning Methods 1 (URP 6200) 3 credits**

Quantitative reasoning skills in urban and regional planning; development of appropriate computer skills.

### **Statistics for Urban Planning (URP 6211) 3 credits**

This course provides an introduction to statistics with emphasis on applications to practical problems relevant to urban planning.

### **Regional and Scenario Planning (URP 6237) 3 credits**

Discussion of the need for regional planning and the unique governance challenges of regional planning. Theory and application of scenario planning techniques.

### **Introduction to GIS in Planning (URP 6270) 3 credits**

Overview of planning information systems, including basic terminology, tools, and policy issues. Lab fee: \$10 per student. To view our full cost of attendance information page, visit <https://www.fau.edu/finaid/other/cost-of-attendance/>.

### **Managing GIS Projects (URP 6272) 3 credits**

*Prerequisite: URP 6270 or permission of instructor*

Organizational and management issues involved in implementing geographic information systems.

### **GIS Applications in Planning (URP 6277) 3 credits**

*Prerequisite: URP 6270 or permission of instructor*

This course provides urban and regional planning applications of GIS. Included are demonstrations of environmental planning, community and economic development planning, urban design, and land use planning. Students learn to use GIS as a tool for decision-making.

### **Advanced Plan Making and Zoning (URP 6345) 3 credits**

Advanced plan making and zoning enables students to understand why and how plans are made, the different scales and types of plans, how zoning regulations work, and planning and zoning consistency. The course has four parts: (1) provide an overview of plans and plan making followed by adopting zoning regulations to implement those plans; (2) focus on the natural environment when making plans and zoning regulations; (3) focus on the built environment when making plans and zoning regulations; and (4) provide an overview of how planning and zoning works in practice.

### **Sustainable Cities (URP 6406) 3 credits**

Explores the intellectual foundations and historical development of sustainability as a concept, places it within the larger context of various development theories and looks at how it has influenced real-world practice in planning and public policy.

### **Environmental Analysis in Planning (URP 6425) 3 credits**

Analysis of natural and urban environments, and the application of planning systems.

### **Environmental Policy and Programs (URP 6429) 3 credits**

Policy and analytic perspectives on major issues in environmental planning systems.

### **Urban Revitalization Strategies (URP 6545) 3 credits**

Detailed examination of economic, management, and design tools in local economic development planning.

### **Economic Development Planning (URP 6549) 3 credits**

Policy and analytic perspectives on major issues in community and economic development planning

systems.

### **Transportation Planning (URP 6711) 3 credits**

Coverage of transportation planning issues, methods and basic policy analysis approaches. Overview of transportation planning, methods, and emerging planning issues.

### **Land Use and Transportation Planning (URP 6716) 3 credits**

*Prerequisite: Permission of instructor*

Transportation shapes the development of cities. This course examines the relationship between transportation and land use and examines the policies that have been successful in creating balanced multimodal transportation systems and integrated land uses. Topics address land use theory and patterns; market forces; regional planning, livable communities and smart growth; urban design and new urbanism; mobility, accessibility and multimodal transportation systems; transit-oriented development; and zoning.

### **Shared and Automated Transport: The Future of Urban Mobility (URP 6719) 3 credits**

This course engages students with the current state of knowledge regarding shared and automated transport modes, drawing from information about current professional practices as well as the research literature. As a seminar-style course, students become acquainted with research methods and how they can be used to inform understanding of emerging policy and planning issues surrounding new transportation modes.

### **Capital Facilities Planning (URP 6732) 3 credits**

Planning systems and analytical techniques for urban infrastructure.

### **Seminar in Housing (URP 6742) 3 credits**

Private sector production of housing; public sector regulation of housing. Development regulations and rent control; federal, state, and local government roles in providing housing.

### **Urban Spatial Structure (URP 6840) 3 credits**

Course covers economic theories and descriptive history of the spatial development of metropolitan areas and the role of technology and public policies in shaping urban growth and change. Equity perspectives on urban form and related public policies are also explored.

### **Urban Development and Design (URP 6841) 3 credits**

Overview of urban development processes, including basic terminology, tools, and policy issues.

### **Site Planning (URP 6873) 3 credits**

Principles and basic methods of site planning and site plan evaluation; development design guidelines; site plan approval process.

**Urban Design (URP 6881) 3 credits**

Elements, concepts, and methods of urban design. Analysis of urban form; methods of implementation.

**Urban Design Workshop (URP 6886) 3 credits**

Application of physical planning skills to a selected urban design problem; district or project scale.

**Directed Independent Study (URP 6905) 1-3 credits**

Research on analysis of a problem-oriented planning topic or project.

**Planning Workshop (URP 6920) 3 credits**

Individual and team approaches to resolving planning problems and issues.

**Special Topics (URP 6930) 3 credits**

Special topics in urban and regional planning.

**Planning Internship (URP 6945) 3 credits**

Supervised work experience in a public planning agency or private organization with planning concerns. *Grading: S/U*

**Master's Thesis (URP 6971) 3 credits**

*Prerequisites: 24 credits toward M.U.R.P. degree; M.U.R.P. students only*

Master's thesis course for planning students who are interested in research careers and further study at the doctoral level. To be repeated for a total of 6 credits.

**Planning Project (URP 6979) 3 credits**

*Prerequisite: 30 credits of urban planning courses*

Synthetic work resulting in: (a) research paper; (b) planning document; or (c) film or three-dimensional model.

# CRIMINOLOGY AND CRIMINAL JUSTICE

**Undergraduate Courses** / [link to graduate courses](#)

## **Law, Crime and the Criminal Justice System (CCJ 2002) 3 credits**

An introductory course that provides students with an understanding of law, crime, and the criminal justice system in America. This is a General Education course.

## **Crime and Everyday Life (CCJ 2034) 3 credits**

This course is designed to help students develop a broader understanding of environmental influences on crime and criminal events. Students are introduced to topics of the realities of crime statistics and how they may appear skewed by media and political interpretation. In addition, students develop skills in crime mapping and how to view locations critically for crime management and potential crime prevention strategies. This includes students working in classroom groups to complete crime mapping sessions and evaluate simulated criminal complaint reports.

## **Special Topics (CCJ 2930) 1-3 credits**

In-depth analysis of current and emerging issues in criminal justice (lower division).

## **Criminology (CCJ 3014) 3 credits**

*Prerequisite: CCJ 4700*

A study of criminal and delinquent behavior theories within the context of several disciplines.

## **The Criminal Justice System (CCJ 3024) 3 credits**

Comprehensive survey of the history, philosophy and organization of the American police, the courts and correctional institutions, including probation and parole. Study of crime, law and the administration of criminal justice.

## **Artificial Intelligence for Social Good (CCJ 3071) 3 credits**

In this course, students learn about the social implications of artificial intelligence, data science and big data; strategies to ensure these systems are accountable to the communities and contexts they are meant to serve; and applied in ways that promote justice and equity.

## **Crime in the Schools (CCJ 3660) 3 credits**

Analysis of the nature and causes of crime committed on secondary and postsecondary school campuses. Explores the role of drugs, weapons, gangs, and bullies in creating fear and disorder. Reviews legal issues, legislative actions, liability concerns, and previous strategies.

### **Victimology (CCJ 3666) 3 credits**

The course provides an overview of the study of victims and the process, etiology and consequences of victimization. Special attention is paid to the types of victims, theories of victimization and the victim's treatment within the criminal justice system. (May be taken for credit in Women's Studies Program.)

### **Cooperative Education (CCJ 3949) 1-3 credits**

To provide professional experience for criminal justice majors. Open only to Criminal Justice majors. Credits do not count toward graduation. *Grading: S/U*

### **Ethics and the Justice System (CCJ 4054) 3 credits**

Course provides an introduction to theories in ethics and the exploration of a variety of ethical/moral issues that characterize and define the different facets of criminology and criminal justice policy and practice.

### **Restorative Community Justice (CCJ 4141) 3 credits**

This course introduces students to the basic concepts of restorative community justice, which includes victims, offenders, and communities in a reparative response to criminal behavior. Offenders are held accountable, while victims and communities are enabled to participate in the justice process as key stakeholders.

### **Immigration and the Criminal Justice System (CCJ 4196) 3 credits**

This course is designed to present an overview of the immigration consequences to non-citizens as a result of criminal activity. The course presents an in-depth study of immigration cases, the theories behind immigration law, including the consequences to an immigrant's status if they are convicted of a crime. The course examines the USSC landmark case *Padilla v. Kentucky*, examines immigration terms, defines and distinguishes what a conviction is for immigration purposes, and examines the main immigration consequences and major immigration crimes.

### **Drug Courts (CCJ 4293) 3 credits**

This course provides an in-depth examination of the historical and contemporary use of drug courts in the United States. Using scholarly articles, book chapters, documentaries, guest speaker(s)/interviews and courtroom observations, the course reveals many levels of how drug courts are utilized. Critical thinking and discussion ability are required for the course.

### **RI: Drug Courts (CCJ 4293) 3 credits**

This course provides an in-depth examination of the historical and contemporary use of drug courts in the United States. Using scholarly articles, book chapters, documentaries, guest speaker(s)/interviews and courtroom observations, the course reveals many levels of how drug courts are utilized. Critical

thinking and discussion ability are required for the course. This course is research intensive (RI).

### **Death Penalty (CCJ 4361) 3 credits**

This course is designed as an overview of death penalty litigation in America. The course presents an in-depth study of death penalty cases and the theories behind the death penalty. The course also explores death penalty sentencing including aggravating and mitigating circumstances. Methods of execution in the United States, their significance to the constitutionality of the death penalty and the potential future of the death penalty are covered.

### **Criminal Justice Management (CCJ 4450) 3 credits**

A study of criminal justice management and practice as it applies to the police, courts, and corrections.

### **Gangs, Groups and Justice (CCJ 4508) 3 credits**

This course is a critical examination of the history and development of gangs, including criminal justice system responses to gangs and gang-related behaviors. The course examines the relationship between gangs and other groups of offenders. In addition, the course examines the role of gangs in criminal behavior as well as the use of traditional theories of crime in the explanation of gang behavior.

### **Teen Technology Misuse (CCJ 4554) 3 credits**

Twenty-first century teens have employed communications technology to mistreat, embarrass, harass, control, threaten or abuse others. This includes, but is not limited to, cyber bullying, sexting, the criminal use of Facebook, electronic dating violence, predation and stalking. Students learn of the sociological, criminological, developmental and practical implications of this problem and how it can be addressed.

### **Studying Violence (CCJ 4623) 3 credits**

Course examines causes, patterns, results, and policies that deal with different types of criminal violence.

### **Serial Homicide (CCJ 4627) 3 credits**

This course is designed to provide students with an in-depth examination of the killers among us. It focuses on the myths and stereotypes that have evolved from mass media and public efforts to find explanations for the relatively rare phenomenon of serial homicide.

### **Media and Crime (CCJ 4631) 3 credits**

Students in this course learn how the criminal justice system is portrayed in television, movies, print, social media, radio and more. The finale to this course has students selecting a recent significant

criminal justice event/case and presenting a comparison of how it was covered in two media outlets. This allows students to recognize media frames, claims makers and narratives.

### **Elders and the Criminal Justice System (CCJ 4632) 3 credits**

This course utilizes an interdisciplinary approach to examining the many ways in which elders interface with the criminal justice system. Topics covered include the nature and extent of elderly crime, the criminal justice system's response to older offenders, elders as participants in criminal trials, elders as victims of crime and abuse, and legal issues for elderly populations. Particular attention is placed on assessing these topics from a policy perspective that incorporates concern for administrative, legal and ethical issues.

### **Drugs and Crime (CCJ 4642) 3 credits**

This course examines the dynamics of the international traffic in illicit drugs and presents an overview of the major issues of drug control. It also provides students with an understanding of the various organized criminal groups that operate in the United States and that play a major role in the illicit drug market.

### **White Collar Crime (CCJ 4644) 3 credits**

This course examines the definitions of white collar crime, as well as the extent and costs of this behavior. The majority of the class centers on the examination of different types of white collar crime, with an emphasis on corporate crime. Case studies are used to illustrate specific instances of white collar crime.

### **Race, Ethnicity and Criminal Justice (CCJ 4662) 3 credits**

*Prerequisites: All CCJ courses must be passed with a "C" or better*

This course utilizes a variety of theoretical and empirical readings to examine three interconnected domains surrounding the intersection of race, ethnicity, class, crime and criminal justice. It explores racial and ethnic relations in society, racial differences in crime and violence and racial and ethnic disparities in the justice system. The goal of the course is to provide a foundation for critically assessing the often controversial issues surrounding race, ethnicity, crime and criminal justice in society.

### **Women and Criminal Justice (CCJ 4670) 3 credits**

This course will provide an overview of women's involvement in the criminal justice system as offenders, victims and professionals. Considerable attention will be given to the treatment of women in the context of the larger social system. (May be taken for credit in Women, Gender and Sexuality Studies Program.)

### **Violence in Relationships (CCJ 4678) 3 credits**

This course introduces students to the intersection of gender and violence. Students explore the nature of relational violence, its historical roots and its manifestation on modern social life and institutions in relation to physical, emotional and sexual abuse. Additionally, the plight of battered women, the reasoning for staying with their abusers and their attempts to find safety are analyzed.

### **Human Trafficking: A Global Social Justice Issue (CCJ 4694) 3 credits**

This course is an examination of modern day slavery, or human trafficking. In this course students learn about the types of human trafficking, who the offenders and victims are, the trauma experienced by victims, the national and global scope of the problem and the role that governments, the criminal justice system, media and culture play in this issue.

### **Violence Against Women (CCJ 4697) 3 credits**

This course serves as an introduction to violence against women by drawing on mundane everyday life in a patriarchal system. There already exists an overview of violence against women in terms of dating violence and rape during times of war and domestic violence. Specifically, the course explores the relationships among women, patriarchy, pop culture and politics to discover the link to everyday oppression, violence against women, and the core root of the violence and harm as well as its perpetuation.

### **Methods of Research in Criminal Justice (CCJ 4700) 3 credits**

*Prerequisite: STA 2023*

A study of the purpose of research, the logic of scientific inquiry and research techniques in criminal justice.

### **Directed Independent Study (CCJ 4905) 1-3 credits**

*Prerequisite: Permission of instructor*

Under faculty supervision, students conduct independent reading, extensive research, and detailed analysis of a specified topic beyond the scope of the CCJ curriculum. Students are responsible for reviewing the Department's DIS guidelines and preparing a written application before registration. Minimum GPA of 3.0 required. Permission of the faculty supervisor is mandatory. Course cannot be repeated more than twice. A second repetition requires approval of the Department Chair.

### **Directed Independent Research (CCJ 4915) 1-3 credits**

*Prerequisites: For Criminology and Criminal Justice Majors only; permission of instructor*

A research project designed to extend and integrate the student's knowledge of issues and applications related to criminology and criminal justice.

### **Issues in Criminal Law (CCJ 4931) 3 credits**

Selected issues and contemporary problems in criminal law.

### **Special Topics (CCJ 4934) 1-3 credits**

In-depth analysis of current and emerging issues in criminal justice.

### **Criminal Justice Field Experience 1 (CCJ 4940) 0-4 credits**

*Prerequisite: Permission of instructor*

Supervised experience in areas such as police, courts, corrections, and other justice-related fields. Open only to Criminal Justice majors and minors. This is an Academic Service Learning (ASL) course.

*Grading: S/U*

### **Criminal Justice Field Experience 2 (CCJ 4941) 0-4 credits**

*Prerequisite: Permission of instructor*

Supervised experience in areas such as police, courts, corrections, and other justice-related fields. This course allows students to take a second internship after having completed CCJ 4940. However, credits from this course cannot be applied to the 30 credits required for the Criminal Justice major. They would be applied to the student's free electives. This is an Academic Service Learning (ASL) course. *Grading:*

*S/U*

### **Criminal Justice Study Abroad (CCJ 4947) 1-6 credits**

Course provides the opportunity for students to undertake criminal-justice-related study overseas in a group experience, pursuing structured visits to justice agencies in the chosen jurisdiction.

### **Corrections (CJC 4310) 3 credits**

An analysis of major correctional systems; their objectives and programs as they relate to the rehabilitation of offenders.

### **Introduction to Forensic Science (CJE 3674) 3 credits**

Forensic Science is the application of scientific disciplines and principles to the legal system, particularly the litigation in court of contested factual disputes. This course examines the distinct fields of education and study that collectively comprise the forensic sciences. These fields include, among others, forensic psychiatry and psychology; forensic anthropology; forensic pathology; forensic toxicology, serology and DNA typing; questioned documents; crime scene investigation; forensic engineering; fingerprint evidence; polygraph and other investigative devices; and forensic chemistry, including drug analysis.

### **Criminal Justice Technology (CJE 3692C) 3 credits**

Lab course that includes an overview and application of computer hardware and software with criminal justice data for criminal justice purposes. Course also includes discussion of concepts and practice as well as helps prepare students for the criminal justice workplace environment.

### **International Criminal Justice Systems (CJE 4174) 3 credits**

This course examines the different types of criminal justice systems that exist around the world and assess the growing threat to the United States from transnational criminal organizations. The course also traces the internationalizations of U.S. Law Enforcement and provides students with an understanding of the problems and challenges that face U.S. Law Enforcement personnel who must operate within a foreign criminal justice system.

### **Advanced Forensic Science (CJE 4247) 3 credits**

*Prerequisite: CJE 3674*

Advanced forensic science is designed to give the participants a deeper understanding of the methods, tools, and techniques used by both crime scene investigators and crime lab technicians to determine the probative value of evidence that may be produced during a criminal event. This class focuses on the techniques and information that can be gleaned from recovered evidence, the proper and detailed analysis of that evidence, and the use of both evidence and investigator notes to create an accurate reconstruction of a criminal event.

### **Policing in America ( CJE 4352 ) 3 credits**

Police organization and administration and its relationship to public administration. The politics of law enforcement. The urban political structure as it impinges on police administration.

### **Problem Solving in Crime Situations (CJE 4412) 3 credits**

Examination of contributing factors, analysis techniques, and crime prevention responses to crime and disorder problems. The course focuses on concepts and research results from environmental criminology, problem analysis, and situational crime prevention.

### **Crime Prevention (CJE 4444) 3 credits**

An examination of the theory, operation and evaluation of crime prevention as a function of the criminal justice system.

### **Fundamentals of Criminal Investigation (CJE 4610) 3 credits**

This course is designed to provide students with an understanding of the fundamentals of criminal investigations, blending scientific theories of crime detection with practical approach techniques. The course also covers both the rules of law as well as the ethical and legal obligations of the investigator.

### **Crime Analysis (CJE 4663) 3 credits**

An introduction to crime analysis and crime mapping, this course examines types of techniques used to study crime and disorder patterns and problems in law enforcement today. It covers the theory, data collection methods, and statistics used as well as the history of career opportunities for crime analysis.

### **Computer Crime (CJE 4668) 3 credits**

This course provides an overview of computer crime from a criminal justice perspective. It also examines computer crime prevention, computer security, legal and social issues, and modern investigative methodologies.

### **Juvenile Justice Administration ( CJJ 4010 ) 3 credits**

This course examines the historical, legal, organizational and social development of the juvenile justice system. The juvenile court, juvenile interactions with law enforcement, delinquency prevention and correctional programs are discussed and assessed.

### **Criminal Law and the Constitution (CJL 4064) 3 credits**

The course exclusively uses legal cases to study the limits of constitutional law as it relates to a defendant's due procedural rights as the individual is processed through the criminal justice system.

### **Judicial Administration and the Criminal Courts (CJL 4510) 3 credits**

A study of judicial administration and the operation of the criminal courts in an organizational content.

### **Terrorism (DSC 4012) 3 credits**

Students gain a historical perspective of the international evolution of terrorism. Emphasis is placed upon contemporary terrorist motive means and opportunity. Course also examines motivational factors - religious, political, and ideological - that drive various groups.

## **Criminology and Criminal Justice Graduate Courses**

### **Understanding Criminal Behavior (CCJ 6056) 3 credits**

Considers the scientific thought and practice in the field of criminology. Analyzes criminal and delinquent behavior within the demographic and ecological systems of society.

### **Restorative Justice Research, Policy and Practice (CCJ 6142) 3 credits**

Contrasts traditional justice system approaches with restorative justice by exploring the theory, policies and practices of this paradigm.

### **Courts, Sentencing and the Judicial Process (CCJ 6295) 3 credits**

Provides students with significant and influential research on topics related to judicial process in America. Exposes students to models of courtroom decision-making that address bureaucratic and organizational forces, politics, race and sex and the necessarily human nature of sentencing. Examines social policies aimed at the courts and sentencing.

### **Prisoner Re-entry Policy and Practice (CCJ 6335) 3 credits**

Offender re-entry is the process of transition of offenders from jails and prisons to the community. This seminar provides students with an in-depth analysis of the system and intervention elements impacting offender re-entry.

### **Applying Criminal Justice Theory, Research and Policy (CCJ 6485) 3 credits**

Application of knowledge and best practices by formulating, implementing, analyzing and evaluating a program or policy within a criminal justice agency.

### **Serial Homicide (CCJ 6608) 3 credits**

This course is designed to provide students with an in-depth examination of the killers among us. It focuses on the myths and stereotypes that have evolved from mass media and public efforts to find explanations for the relatively rare phenomenon of serial homicide.

### **Crime in Everyday Life (CCJ 6619) 3 credits**

Examines opportunity theory and how it can be used to understand types of crime and disorder that occur in everyday life. Covers how societal changes have impacted crime throughout history, the use of crime prevention through environmental design (CPTED) and how situational crime prevention can be used to reduce and address crime problems.

### **Violence Research and Policy (CCJ 6624) 3 credits**

Examines the issues that influence policies addressing interpersonal criminal violence. These issues include data sources and evaluation of their quality, patterns and theories of violence, different types of violence, and examination and evaluation of existing policies.

### **Class, Race and Gender in Criminal Justice (CCJ 6669) 3 credits**

An examination of how class, race and gender structure experiences within the criminal justice system. Explores class, race and gender in terms of criminal victimization, patterns of offending and roles within each part of the criminal justice system, including police, courts and corrections.

### **Victims and the Justice Process (CCJ 6675) 3 credits**

Advanced overview of the victims' rights movement, victimization theory, and the justice system's

response to victimization, as well as contemporary practices related to victim participation in the justice process. Explores initiatives for enhancing awareness of, sensitivity to, and integration of victims in the justice system.

### **Human Trafficking: A Global Justice Issue (CCJ 6696) 3 credits**

This seminar style course is an examination of modern-day slavery, or human trafficking. In this course, students learn about the different types of human trafficking including sex and labor trafficking, domestic servitude, debt bondage, organ trafficking, child soldiering and forced marriage. Students also learn who the offenders and victims are, the trauma experienced by victims, the national and global scope of the problem and the role that governments, the criminal justice system, NGOs and culture play in this issue.

### **Sex Offender Research and Policy (CCJ 6699) 3 credits**

Explores topics related to the sex offender population in the United States, including the history of sex offender laws to present legislation, sex offender typologies and statistics regarding sex crime victimization and perpetration. Popular sex offender policies are critically examined and strategies of sex crimes are explored.

### **Research Methods (CCJ 6704) 3 credits**

*Prerequisites: PAD 6701, STA 6113*

Course provides students with the fundamental theories and practice of criminological and criminal justice research. It examines theory and research, the nature of causation, the structure of inquiry, including research design, conceptualization, measurement and sampling; modes of observation, including experiments, survey research, and evaluation research; and elementary application of qualitative and quantitative analysis.

### **Qualitative Research and Methods in Criminal Justice (CCJ 6709) 3 credits**

This course is an opportunity to learn and apply key components of qualitative research, including planning and preparing impactful qualitative research projects, conducting fieldwork (online or in person), collecting and analyzing qualitative data and communicating results effectively through publication and presentation. Students first synthesize their interests in criminology and criminal justice (broadly defined) to actions they can take or social areas they can access to develop their own research questions. Then they collect or develop their own qualitative data set either online through social media, legal documents and governmental reports or through other sources. By the end of the course, students will be conceptually sorting and thematically analyzing that data and writing up results and reflections from their experiences.

### **Advanced Research and Evaluation for Criminal Justice (CCJ 6712) 3 credits**

Provides students advanced skills and knowledge in criminological and criminal justice research and evaluation. Course covers quantitative and qualitative methods used in evaluation and applied research and advanced techniques commonly used in the field.

### **Program Evaluation in Criminal Justice (CCJ 6735) 3 credits**

This course serves as an introduction to evaluation methodology and evaluation tools commonly used to assess publicly funded programs. Students become familiar with the concepts, methods and applications of evaluation research; learn how to read evaluation research critically; understand how to use evaluation results to anticipate or improve program performance; and will be able to propose an appropriate evaluation plan to assess the implementation and effectiveness of a program.

### **Criminal Justice Research and Policy Foundations (CCJ 6902) 3 credits**

Analyzes significant scholarship related to policing, judicial process and adult/juvenile corrections, covering system reforms and contemporary policies and practices.

### **Directed Independent Study (CCJ 6905) 3 credits**

*Prerequisite: Permission of instructor*

Reading, research, and in-depth analysis of a selected topic under faculty direction. Students are responsible for identifying a topic of study and securing the approval of an appropriate faculty member before registration.

### **Special Topics (CCJ 6934) 3 credits**

In-depth exploration, analysis, and assessment of contemporary topics of special concern to the administration of criminal/juvenile justice systems.

### **Master's Thesis (CCJ 6971) 1-6 credits**

*Prerequisite: Program coordinator approval; Grading: S/U*

### **Corrections Research, Policy and Practice (CJC 6021) 3 credits**

Analysis of policy, theory and research pertinent to the administration and management of jails, prisons and community corrections. Reviews historical development of corrections policy and analysis of reform efforts.

### **Prison Gangs (CJC 6216) 3 credits**

This course is a critical examination of the characteristics and impacts of prison gangs, including criminal justice system responses to prison gangs, prison culture and organization, and how they influence misconduct, victimization and desistance from gangs and crime. The course examines the relationship between prison gangs, communities, law enforcement and other groups of people. In

addition, the course examines the role of prison gangs in criminal behavior as well as the use of traditional theories of crime (e.g., structural and process perspectives) in the explanation of prison gang behavior.

### **History of Policing (CJE 6057) 3 credits**

Course provides students with a macro view of American policing, including historical interactions with vulnerable and minority populations. The course presents a forum to discuss the chronological evolution of policing and to critique strategic and philosophical evidence. Key events and turning points in American policing are also discussed, including the development of the FBI, relevant case law, oversight commissions and more.

### **Police Research, Policy and Practice (CJE 6426) 3 credits**

Examines the factors of recent police innovation and critically explores the effects on crime and disorder through research.

### **Computer Crime Research and Policy (CJE 6688) 3 credits**

Provides an overview of cybercrime from a criminal justice perspective. Examines current trends, security elements, legal and social elements and modern investigative methodologies. Reviews latest research with a focus on identifying best practices for individuals, organizations and society to create and implement in their prevention and response goals.

### **Juvenile Justice Research, Policy and Practice (CJJ 6046) 3 credits**

Analysis of policy, theory and research pertinent to the management of juvenile justice systems and youth service agencies. Focuses on policy issues and responses to at-risk youth, spanning prevention, diversion and intervention within a multilayered, intergovernmental context.

### **Problem-Solving Courts (CJL 6521) 3 credits**

This course is designed for students to learn about common policies related to problem-solving courts and to examine the theoretical and empirical research underlying them.

## **SOCIAL WORK**

**Undergraduate Courses** / [link to graduate courses](#)

*A minimum grade of "C" is required for each social work (SOW-prefixed) course.*

### **Global Perspectives of Social Services (SOW 1005) 3 credits**

Prepares students to critically analyze and propose possible solutions for challenges facing social service

programs in developing and industrial countries using frameworks based on human rights, social development, and sustainable development. This is a General Education course.

### **Race and Cultural Inclusion in Social Work (SOW 1130) 3 credits**

This course provides students with an understanding of the concepts of race, culture, and inclusive practice in the field of social work. Students are provided the opportunity to explore and examine the role of cultural diversity, including the origin of specific populations and the effects of migration on cultures. Further, students will gain an understanding of the effects of diaspora and migration and the interactions that exist between and among cultures, societies and nations.

### **University Honors Seminar in Social Work (SOW 1930) 3 credits**

*Writing Across Curriculum (Gordon Rule)*

A seminar in the University Honors Program on topics in social work.

### **Special Topics (SOW 2930) 1-3 credits**

The career of social work is explored in relationship to social problems.

### **Social Welfare Policy and Provisions (SOW 3232) 3 credits**

*Prerequisite or Corequisite: SOW 3302; majors only*

An analysis of social welfare policies and provisions within the context of the history of social welfare; income maintenance, housing, employment, health care, child welfare and other special populations.

This is an Academic Service Learning (ASL) course.

### **Profession of Social Work (SOW 3302) 3 credits**

*Writing Across Curriculum (Gordon Rule)*

Programs, policies, and services, their auspices, goals, and operations for consumers of various social, racial and ethnic groups.

### **Human Behavior and Social Environment 1 (SOW 4101) 3 credits**

*Prerequisite or Corequisite: SOW 3302*

Human behavior and development as they are influenced in the macro social environment. Emphasis on social systems theory, political process, organizations and institutions.

### **Human Behavior and Social Environment 2 (SOW 4102) 3 credits**

*Prerequisite or Corequisite: SOW 3302*

Human behavior and development as they are influenced by multiple factors in the social environment

through the lifespan to the termination of life. This is an Academic Service Learning (ASL) course.

### **Family Violence (SOW 4141) 3 credits**

An in-depth analysis of social work and the family, with particular focus on violence within the family. Attention will be given to all areas of abuse and/or neglect, as they affect all members of the family — children, adults, and elders.

### **Social Justice and Social Work: Issues and Responses (SOW 4212) 3 credits**

This course is designed to critically analyze social justice issues in social work and social policy.

### **Ethical Issues in Social Work Practice (SOW 4290) 3 credits**

This course provides students with a comprehensive exploration of values and ethical issues as they apply to social work theory, research, policy and practice with individuals, families, groups, organizations and communities. Although values and ethical issues pervade all social work studies, this course provides students with an opportunity to study these issues in greater depth than may be provided in other courses.

### **Social Work Practice with Individuals (SOW 4300) 3 credits**

*Prerequisites: SOW 3232 and 3302 or permission of instructor; minimum FAU GPA of 2.5 to enroll*

*Prerequisites or Corequisites: SOW 4101 and 4102*

Introduction to methods and practice. Basic principles, values, ethics, interviewing skills, problem assessment, solving, intervention, and evaluation (at the micro level).

### **Social Work Practice with Families (SOW 4304) 3 credits**

*Prerequisites: SOW 4300 and minimum FAU GPA of 2.5 to enroll*

This course explores the Generalist Intervention Model (GIM) as it relates to social work with families. This exploration is set upon the foundation of contemporary social work values as well as the historic mission of social work as a profession. This is an Academic Service Learning (ASL) course.

### **Social Work Practice with Groups (SOW 4322) 3 credits**

*Prerequisites: SOW 4300 and minimum FAU GPA of 2.5 to enroll*

This course explores the Generalist Intervention Model (GIM) as it relates to generalist social work with small groups. This exploration is set upon the foundation of contemporary social work values as well as the historic mission of social work as a profession.

### **Social Work Practice with Communities and Organizations (SOW 4343) 3 credits**

*Prerequisite: SOW 4300 and minimum FAU GPA of 2.5 to enroll*

Delineation and study of intervention and change strategies, with groups and communities. Focus on

social action, social planning, community development, political social work and legislative processes (macro level). This is an Academic Service Learning (ASL) course.

### **Inclusive Social Work Practice (SOW 4346) 3 credits**

This course provides students with knowledge, skills and strategies required to promote social change from an agency and community level. Students explore the experiences of people from various backgrounds in terms of color, ethnicity, culture, national origin, class, gender, age, religion, physical or mental ability, gender identity and expression, and sexuality.

### **Issues in Counseling Women (SOW 4357) 3 credits**

An in-depth analysis of treatment strategies that have particular relevance to the population of women most likely to become social work clients. Designed as an integrative learning experience, students may examine their own feelings and beliefs about women, as well as become familiar with empirical evidence and clinical interventions.

### **Research Methods in Social Work (SOW 4403) 3 credits**

*Prerequisite: SOW 3302*

Introduction to the principles and methods of basic social work research, ethical conduct of research within the context of social work purposes and values. Formulation of problems for study that address the social needs of diverse population groups.

### **Field Education in Social Work (SOW 4510) 12 credits**

*Prerequisite: Permission of instructor and minimum FAU GPA of 2.5 to enroll*

Open only to social work majors. Supervised experience in a variety of social work settings.

Application to be made to Director of Social Work Internships during previous semester. (See student manual for eligibility requirements.) *Grading: S/U*

### **Evidence Based Diversity Practice in Social Work (SOW 4620) 3 credits**

An in-depth analysis of various problems encountered by selected minority groups and social work intervention strategies aimed at prevention, solution and remediation. Groups selected for study may include African Americans, Hispanics, Haitians, Native Americans and other groups such as women, the elderly, the handicapped, gays, lesbians, transgenders and migrant workers.

### **Social Work with Aging Populations (SOW 4643) 3 credits**

The aging experience from a social work perspective, with an emphasis on biopsychosocial assessment and intervention. The student focuses on individual, family, group, community, social policy, and other environmental factors as they affect the aging experience. Special attention is directed toward aging

and social attitudes.

### **Child Welfare (SOW 4650) 3 credits**

An in-depth analysis of child welfare policy, programs and practice. Attention will be given to all areas of child welfare, with special emphasis on Florida policies and laws and family-focused practice.

### **Social Work Practice with Vulnerable Children and Families (SOW 4654) 3 credits**

*Prerequisite or Corequisite: SOW 4650*

Second of two courses for social work students who plan to work with vulnerable children.

### **Social Work and Emergency Relief (SOW 4679) 3 credits**

Examines the psychosocial effects of natural and technological disasters on individuals and families using an ecological framework and developmental theory. Emphasis on assessment skills and cultural competency in discerning appropriate interventions.

### **Substance Use Disorders in Social Work (SOW 4700) 3 credits**

An overview of prevailing thinking and theories of substance abuse. The course will explore the dominant cultural view and alternative perspectives. Special emphasis on gender roles, family systems, theory and modalities and the social worker's role.

### **Introduction to Human Trafficking in Social Work Practice (SOW 4783) 3 credits**

This course explores the topic of human trafficking. Students learn terminology, the different types of trafficking and how cultural issues and vulnerabilities can contribute to trafficking, and they understand the scope of the problem through current statistics and reports, both domestic and global.

### **Social Work and Positive Well-Being (SOW 4802) 3 credits**

Course explores recent body of scientific research regarding positive emotional states, mental wellness and optimal well-being. Students learn empirically tested interventions and how to use them with clients to cope with challenges and enhance their quality of life.

### **Spiritual Dimensions of Social Work Practice (SOW 4844) 3 credits**

Provides a framework of knowledge, values, skills, and experiences for culturally competent, ethical, and spiritually-sensitive social work practice. Practice skills of assessment and intervention at the B.S.W. level are emphasized.

### **Directed Independent Study (SOW 4905) 1-5 credits**

*Prerequisite: Permission of instructor*

### **Directed Independent Research (SOW 4915) 3 credits**

2579

*Prerequisites: B.S.W. students only; permission of instructor and department*

A research project designed to expand and integrate students' knowledge of issues and implementation of intervention and clinical practices related to social work.

### **Special Topics in Social Welfare (SOW 4930) 3 credits**

An in-depth analysis of current social welfare issues, such as social gerontology, legal aspects of social work practice, social work and immigration, etc. Topics vary from semester to semester.

### **Social Work Study Abroad (SOW 4957) 1-3 credits**

*Prerequisite: Permission of instructor*

Credit for enrollment in approved study abroad programs. This is an Academic Service Learning (ASL) course.

## **Social Work Graduate Courses**

### **Human Behavior and Social Environment 1 (SOW 6105) 3 credits**

Students apply social theories, including systems, social exchange, conflict and social constructionism, to historical and social problems. They analyze how macro forces shape human behavior, as well as how human behavior impacts social systems. Emphasis is given to the issues of social and economic justice.

### **Human Behavior and Social Environment 2 (SOW 6106) 3 credits**

Study of biological, psychological, social and spiritual development of individuals across the lifespan as it applies to the delivery of culturally competent, evidence-based practice with diverse and vulnerable populations.

### **Social Work and Trauma (SOW 6116) 3 credits**

*Prerequisite: SOW 6533 with minimum grade of "B-"*

This course explores and develops an understanding of trauma in its many forms and guides social workers in selecting empirically based interventions. The course informs social workers on the prevention of secondary trauma.

### **Psychopathology in Clinical Social Work Practice (SOW 6125) 3 credits**

*Prerequisite: SOW 6305 with minimum grade of "B-"*

Focuses on mental health issues with children, adolescents, adults, elders and families. Built on the identification, analysis and implementation of empirically based assessment tools that have incorporated statistically valid reliability and validity studies. Major classification systems, such as diagnostic, statistical, manual of mental disorders and other schemes for assessing and understanding

human behavior are covered.

### **Cognitive-Behavioral Theory and Techniques for Social Work (SOW 6128) 3 credits**

*Prerequisite: SOW 6533 with minimum grade of "B-"*

Advanced clinical theory course presents theory and practice applications for advanced curriculum.

### **Social Work and Human Sexuality (SOW 6153) 3 credits**

*Prerequisite: SOW 6533 with minimum grade of "B-"*

This course takes a biopsychosocial approach to addressing issues in clinical practice related to human sexuality. It is designed to increase Social Work students' comfort level and sensitivity to the diversity of sexual issues people experience.

### **Social Work and Positive Well-Being (SOW 6156) 3 credits**

*Prerequisite: Completion of M.S.W. Foundation Curriculum*

Consistent with the social work focus on the strengths and well-being of the individual, this course emphasizes mental wellness, positive emotions and optimal well-being.

### **Conflict Resolution (SOW 6158) 3 credits**

*Prerequisite: Completion of M.S.W. Foundation Curriculum*

M.S.W. practice course where students explore the theoretical basis for a conflict resolution approach and gain experience in how to put the techniques into practice.

### **Social Justice and Social Work: Issues and Responses (SOW 6214) 3 credits**

This course is designed to critically analyze social justice issues in social work and social policy.

### **Social Welfare History and Policy (SOW 6235) 3 credits**

Students develop knowledge and competencies on how social service policies and programs are designed to address specific social problems in the United States. Students examine and critically analyze historical and current state and federal social welfare policies and programs. This is an Academic Service Learning (ASL) course.

### **Ethical Issues in Contemporary Social Work Practice (SOW 6296) 3 credits**

Helps social work students become more effective in dealing with complex ethical issues in professional social work practice.

### **Generalist Social Work Practice with Individuals (SOW 6305) 3 credits**

*Corequisite: SOW 6532*

Students develop knowledge and competencies in applying the generalist practice model (engagement,

assessment, treatment planning, intervention, evaluation and termination) with individual clients. Students learn how to integrate National Association of Social Workers code of ethics and the principles of evidence-based practice through all stages of the social work process.

**Generalist Social Work Practice with Organizations and Communities (SOW 6306) 3 credits**

Students develop knowledge and competencies in applying the generalist practice model to influence macro change with institutions, policies and environments using evidence-based practice and NASW Code of Ethics. Macro social work history and theories are examined. This is an Academic Service Learning (ASL) course.

**Generalist Social Work Practice with Families and Groups (SOW 6324) 3 credits**

Covers evidence-supported theories and practice techniques when working with groups and families. Students apply the generalist social work practice model: engagement, assessment, planning, implementation, evaluation, termination and follow up, and engage in self-reflective and practice-based learning throughout the course.

**Advanced Theory and Social Work Practice with Adults and Families (SOW 6348) 3 credits**

*Prerequisites: SOW 6306 and SOW 6533, with minimum grades of "B-"*

Prepares students for advanced clinical practice with adults and families in varied settings with diverse populations.

**Case Management (SOW 6349) 3 credits**

Provides an in-depth examination of case management service modality for social work practice.

**Couple Therapy in Social Work Practice (SOW 6353) 3 credits**

*Prerequisite: SOW 6533 with minimum grade of "B-"*

This course introduces students to the theoretical foundations and practice techniques of couple therapy. The major models of couple therapy are explored. Students are encouraged to integrate theory with clinical practice with couples.

**Administration and Supervision (SOW 6377) 3 credits**

Demonstrates how management activities contribute to service effectiveness for clients and staff.

**Social Work Research (SOW 6404) 3 credits**

Students develop knowledge and competencies to identify and evaluate ethical quantitative and qualitative research methodology, especially evidence-based interventions for clinical practice.

**Field Instruction and Integrative Seminar 1 (SOW 6532) 3 credits**

*Corequisite: SOW 6305*

Seminar for integration of field experience with evidence-based coursework.

**Field Instruction and Integrative Seminar 2 (SOW 6533) 3 credits**

*Corequisite: SOW 6618*

Seminar for integration of field experience with evidence-based coursework.

**Advanced Year Field Instruction and Integrative Seminar 1 (SOW 6535) 3 credits**

Assists concentration year students to integrate theoretical models and concepts with field practice.

**Advanced Year Field Instruction and Integrative Seminar 2 (SOW 6536) 3 credits**

*Corequisite: SOW 6611*

This is the second semester seminar for concentration year field practice. The course is designed to assist students with the integration of theories with practice.

**Advanced Context of Social Work Practice within Healthcare (SOW 6605) 3 credits**

Focuses on the context (policy, organization, technology) of social work practice and explores practice decisions that structure the helping relationship across multiple settings.

**Advanced Social Work Practice and Policy in Mental Health Settings (SOW 6606) 3 credits**

*Prerequisite: Completion of Foundation Curriculum*

Course focuses on social work practice and policy issues in mental health settings at three levels of intervention: prevention/health promotion, remediation of existing mental health problems, and coping with chronic mental health problems.

**Clinical Social Work with Families (SOW 6611) 3 credits**

*Prerequisite: SOW 6535*

*Corequisite: SOW 6536*

This course enables the student to understand, analyze and apply social work knowledge, values and skills to generalist and clinical practice with families, from the family systems, developmental and clinical perspectives.

**Clinical Social Work with Groups (SOW 6618) 3 credits**

*Prerequisite: SOW 6305*

*Corequisite: SOW 6533*

This course provides students with the knowledge, skills, self-awareness and values to practice generalist and clinical social work with groups.

**Social Work and Spirituality (SOW 6626) 3 credits**

Examines issues pertaining to spiritually-sensitive social work practice regarding clients of diverse religious and philosophical ideologies.

### **Social Work with Aging Populations (SOW 6641) 3 credits**

*Prerequisite: M.S.W. majors only*

An introduction to social gerontology for graduate-level social work students. Provides a biopsychosocial introduction to social gerontology from a social work perspective.

### **Advanced Theory and Social Work Practice with Elders and Families (SOW 6646) 3 credits**

*Prerequisites: SOW 6306 and SOW 6533, with minimum grades of "B-"*

Focuses on the study of ageism, concepts of aging, physical and mental health concerns of elders, long-term care, direct practice with elders, and policy-related issues. This is an Academic Service Learning (ASL) course.

### **Social Work Practice with Vulnerable Children and Families (SOW 6653) 3 credits**

*Prerequisite or Corequisite: SOW 6656*

Provides a framework of knowledge and skills necessary to practice with children and their families.

### **Advanced Theory and Social Work Practice with Children, Adolescents and Families (SOW 6655) 3 credits**

*Prerequisites: SOW 6306 and SOW 6533, with minimum grades of "B-"*

Focuses on the application of theories, concepts, and principles in direct treatment of children and adolescents.

### **Child Welfare (SOW 6656) 3 credits**

*Prerequisite: Completion of Foundation Curriculum*

Course examines the issues of professional practice in child welfare that will enable students to bring skills and knowledge to their practice in assessing and intervening in situations of abuse and neglect involving children and families.

### **Inclusive Social Work Practice (SOW 6671) 3 credits**

This course is designed to provide students with knowledge, skills and strategies required to promote social change from an agency- and community- level using an anti-oppression framework. In this course, students explore the oppressive experiences of people from various backgrounds.

### **Animal-Assisted Therapy (SOW 6672) 1 credit**

*Prerequisite: Completion of M.S.W. Foundation Curriculum*

A seminar that explores human-animal bonding. Human-animal bond and the potential for intervention

will be discussed within therapeutic settings and across diverse populations with individuals, families, and groups.

### **Loss and Grief: Individual, Family, Cultural Perspectives (SOW 6678) 3 credits**

*Prerequisite: Completion of Foundation Curriculum*

Course gives students an opportunity to explore and understand their perceptions and beliefs on death and dying and how individual cultural differences influence that experience. The course prepares students to work with clients dealing with feelings of grief and loss.

### **Transition Course (SOW 6693) 3 credits**

*Prerequisite: Bachelor of Social Work required*

Course assists students transitioning from undergraduate-level coursework to graduate-level coursework in the M.S.W. program.

### **Intervention in the Field of Addictions (SOW 6712) 3 credits**

*Prerequisite: Completed M.S.W. Foundation Curriculum*

Course prepares students to assess and intervene with clients affected by substance and abuse.

### **Social Work Practice in Behavioral/Process Addictions (SOW 6714) 3 credits**

*Prerequisite: M.S.W. majors only*

This course provides an overview of the principles of behavior/process addictions and the processes and mechanisms that underlie addiction. Students are introduced to the epidemiology and developmental course of addiction. They are also introduced to risk and protective influences that act throughout the course of addiction resulting in adverse health consequences. Genetic and environmental underpinnings are discussed, and effective interventions and treatment modalities are identified.

### **Social Work Practice with Survivors of Human Trafficking (SOW 6786) 3 credits**

*Prerequisite: M.S.W. majors only*

This course explores the topic of human trafficking and helps students to better understand this form of modern day slavery. The readings, videos and assignments center around current events and current topics of discussion in the trafficking field, as well as where the movement originated and what the future holds. During this course, students learn terminology, the different types of trafficking and how cultural issues and vulnerabilities can contribute to trafficking. They also learn and understand the scope of the problem through current statistics and reports, both domestic and global.

### **Mindfulness and Social Work Practice (SOW 6803) 3 credits**

*Prerequisite: Completion of M.S.W. Foundation Curriculum*

Students learn and experience specific practices that enhance their ability to purposefully attend to and manage their thoughts and feelings so that they can experience more balanced, stable and peaceful lives. In addition, they transfer this knowledge into their social work practice with individuals and/or groups. During class, students learn the theoretical foundations as well as the practical elements of mindfulness, including sitting and moving meditations.

### **Directed Independent Study (SOW 6905) 1-3 credits**

This course assists the student in implementing an independent study project under the guidance of a social work faculty advisor.

### **Special Topics (SOW 6930) 3 credits**

Study relating to topics in social work. This is an Academic Service Learning (ASL) course.

### **Special Topics (SOW 6932) 1-6 credits**

*Prerequisites: Completion of M.S.W. Foundation Curriculum*

Special topic variable credit courses for M.S.W. students.

### **Study Abroad (SOW 6957) 3 credits**

*Prerequisite: Completion of M.S.W. Foundation Curriculum*

An interdisciplinary course to provide students with opportunities to experience a foreign country from within and focusing on native social services.

### **Psychopathology in Advanced Clinical Social Work (SOW 7129) 3 credits**

*Prerequisite: D.S.W. students only*

Course explores diagnostics and treatment of psychopathology in clinical social work practice. Current DSM is considered as well as evidence-informed practices used by clinical social workers in working with mental health services consumers.

### **Advanced Clinical Social Work Practices with Individuals, Groups and Families (SOW 7369) 3 credits**

*Prerequisite: D.S.W. students only*

This course focuses on evidence-based advanced clinical social work practice with individuals, groups, and families. It seeks to provide the student with a methodology for incorporating best social work clinical practices as grounded in the evidence-based research literature.

### **Behavioral Science Statistics in Advanced Clinical Social Work (SOW 7417) 3 credits**

*Prerequisite: For D.S.W. students only*

This course describes the use of quantitative methods for inquiry in the social and behavioral sciences.

The course expands on using SPSS for data analysis and introduces students to the advantages and challenges of working with secondary data. Students gain hands-on experience with the preparation and data analysis of data sets.

### **Clinical Social Work Research and Statistics (SOW 7433) 3 credits**

*Prerequisite: For D.S.W. students only*

Course examines evidence-based clinical social work research methods to improve clinical practice and clinical measurement tools and to engage in various social work research methodologies. As a result, implementation of evidence-based clinical social work interventions and therapies occur.

### **Quantitative Research in Clinical Social Work (SOW 7494) 4 credits**

*D.S.W. students*

The course provides core concepts of rigorous research methodology, inferential statistics, statistical interpretation and critical analysis of empirical studies to inform advanced clinical social work practice.

### **Qualitative Research in Clinical Social Work (SOW 7496) 3 credits**

*Prerequisite: D.S.W. students only*

This course reviews areas of research in clinical social work utilizing qualitative methods, including design methods data collection and analysis. The course also provides information relevant to publishing qualitative research for strengthening social work practice.

### **Advanced Clinical Social Work Capstone: Proposal Writing (SOW 7498) 4 credits**

*Prerequisite: D.S.W. students only*

In this seminar, students learn how to write, orally present and critique proposals. Students learn the different types and settings for various practice and research proposals, apply writing tips to their own proposal and critique samples of proposals from both the field and academia. *Grading: S/U*

### **Clinical Social Work Supervision and Administration (SOW 7619) 3 credits**

*Prerequisite: For D.S.W. students only*

This course focuses on administration and clinical supervision for social workers. Frameworks and critical tasks involved in administration and supervision of social workers are examined.

### **Interpersonal Neuroscience and Advanced Clinical Social Work (SOW 7696) 3 credits**

*Prerequisite: D.S.W. students only*

This course integrates clinical, developmental and behavioral science theories with current interpersonal neurobiology and brain science.

### **Emerging Theories and Methods in Advanced Clinical Social Work (SOW 7698) 3 credits**

*Prerequisite: D.S.W. students only*

This course focuses on gaining an understanding of the current emerging trends in clinical social work treatment environments by exploring theories and interventions that are emerging in response to new understandings of human behavior and psychopathology as well as technological advances that affect service delivery.

### **Theories and Epistemology of Advanced Clinical Social Work Practice (SOW 7757) 3 credits**

*Prerequisite: For D.S.W. student s only*

This course prepares students for subsequent courses on clinical social work theory, research and practice by providing them with a contextual understanding of social work, including the history of social work theory, research, values, ethics, alternate models of practice, the role of technology and inter-professional perspectives.

### **Social Work Pedagogy (SOW 7776) 3 credits**

*Prerequisite: For D.S.W. students only*

Students use evidence-based clinical social work practices for curriculum design, course design, course delivery and evaluations. They examine the educational standards (EPAs) of the Council on Social Work Education and learn to help B.S.W./M.S.W. students develop the competencies identified by the CSWE.

### **Advanced Clinical Social Work Capstone: Defense and Dissemination (SOW 7910) 6 credits**

*Prerequisite: SOW 7913; For D.S.W. students only*

In this seminar, students demonstrate their ability to discuss, defend and disseminate their work.

*Grading: S/U*

### **Advanced Clinical Social Work Capstone: Implementation (SOW 7913) 3 credits**

*Prerequisite: D.S.W. students only*

In this seminar, DSW candidates complete the activities associated with their proposed capstone project. Capstone Implementation should be approximately completed in a 14–16-week window from launch to wrap-up. As activities and specific timelines will vary by capstone type, the main deliverables in this course will be capstone progress reports, and a final assignment of a draft outline of the capstone paper. *Grading: S/U*

### **Special Topics (SOW 7938) 3 credits**

*Prerequisite: D.S.W. students only*

This is a special topics course in the D.S.W. program for D.S.W. students, advancing knowledge and

skills appropriate for doctoral level clinical practice scholars.

**Advanced Clinical Social Work Practicum (SOW 7940) 3 credits**

*Prerequisite: D.S.W. students only*

This course offers students the option to pursue a clinical research practicum or a pedagogical experience. A formal learning plan adopted by the D.S.W. coordinator, the student and a practicum consultant must be in place prior to enrollment in this course.

Madison McShane, M.Ed.	Director of Education Abroad
Jane Morgan, M.Ed.	Director of Operations for the Osher Lifelong Learning Institute, Boca
Frando Patterson, M.S.	Director of Testing and Evaluation
Colin Polsky, Ph.D.	Director of the Florida Center for Environmental Studies
John Renne, Ph.D.	Director of the Center for Urban and Environmental Solutions
Kelly J. Shannon, Ph.D.	Director of the Peace, Justice and Human Rights Initiative

## **Administration - Regional Campuses**

### **Broward Campuses**

Colin Polsky, Ph.D.	Associate Vice President for Academic Affairs
Nori Carter, M.S.	Director of Campus Life
Michelle Cavallo, Ph.D.	Director of Operations
Miguel Hernandez, M.S.	Director of Academic and Enrollment Management Support Services
Farley S. Leiriao, M.AC.	Director of Business and Financial Auxiliary Services
Alyson E. Warner, M.A.	Director of Development

**FAU Northern Locations (Jupiter and Harbor Branch)**

Robert W. Stackman, Jr., Ph.D.	Associate Vice President for Academic Affairs
Kerry Kruckel, B.A.	Assistant Vice President of Development, Jupiter
Cara Perry, M.A.	Associate Vice President of Communication, FAU Northern Campuses
Elijah Watlington, Ed.D.	Associate Executive Director for the Osher Lifelong Learning Institute, Jupiter
Bethany Stanhope, Ph.D.	Executive Director of Academic Operations, Jupiter
James M. Sullivan, Ph.D.	Executive Director for Harbor Branch Oceanographic Institute
Amanda L. Nickeson, M.A.	Director for Development of Harbor Branch Oceanographic Institute
Cecilia Sarmiento, M.S.	Director of Student Services and Campus Life, Northern Campuses

**Division of Financial Affairs**

Jayson Iroff, B.S.	Vice President and Chief Financial Officer
Christ Eitel, M.B.A.	Associate Vice President for Budget/Financial Planning and Analysis
Louisa Pontiroli Kelly, M.B.A, C.P.A.	Assistant Vice President and University Controller
Maria Bimonte-Yerganian, M.B.A.	Director of Procurement

**Division of Institutional Advancement**

David Green, M.B.A.	Interim Vice President
---------------------	------------------------

Sharon Brown, M.B.A, C.P.A.	Assistant Vice President for Finance and Administration
Kerry Kruckel, B.A.	Assistant Vice President for Development, Jupiter
Ryan Britton, J.D.	Executive Director of Government Relations
Elizabeth Tucker, M.N.M.	Interim Executive Director for Advancement Services and Director of Prospect Research and Management
Laurie Carney, M.P.A.	Senior Director of Development, Dorothy F. Schmidt College of Arts and Letters
David Decker-Drane, M.Arch.	Director of Foundation Board Operations and Chief Aide to the Vice President
Michael D'Eugenio, B.S.	Director of Development, Student Affairs
Michael Graffin, M.A.	Director of Development, Athletics
Jorene Jameson, Ph.D.	Director of Development, College of Education
Kelly Kirkpatrick Marmol, M.A.	Director of Development, Charles E. Schmidt College of Science
Michael Miller, B.A.	Director of Development, College of Engineering and Computer Science
Elise Morgenstern, M.S.	Director of Development, University Libraries
Melissa Stires, B.S.	Director of Development, Christine E. Lynn College of Nursing

### **Division of Public Affairs**

Peter Hull, M.A.	Vice President
Scott Silversten, M.S.	Associate Vice President for Communications and Marketing

Joshua Glanzer, B.S.	Associate Vice President for Public Affairs and Media Relations
Cara Perry, M.A.	Associate Vice President for Research Communications
Amy Haycock, M.A.	Assistant Vice President for Presidential Communications
Crystal Bacchus, B.F.A.	Art Director
Amanda Burns, M.B.A.	Director of Video Services
Laurie Donahue, B.F.A.	Director of Creative Services
Gisele Galoustian, B.A.	Senior Media Relations Director for Research and Health
Lisa Metcalf, M.A.	Senior Media Relations Director for University News
Amber Bonfont, B.S.	Media Relations Director, Business
Jonathan Fraysure, B.S.	Media Relations Assistant Director, Academic Life and University Initiatives
Dexter LaMont, B.S.	Assistant Vice President, Brand Development, Licensing and Marketing
Chad Beattie, M.B.A.	Director of Marketing
<b>Division of Research</b>	
Gregg Fields, Ph.D.	Interim Vice President
Karin Scarpinato, Ph.D.	Senior Associate Vice President for Research
Cara Perry, M.A.	Associate Vice President for Research Communications
Lynn Asseff, M.P.A.	Assistant Vice President for Research Finance

Miriam Campo, B.A.	Assistant Vice President for Research, Sponsored Programs
Elisa Gaucher, M.B.A.	Assistant Vice President for Research Integrity
Sylvia Gografe, D.V.M., Ph.D.	Assistant Vice President for Research, Comparative Medicine
Sandra D. Marin Ruiz, Ed.D.	Assistant Vice President and Regional Director for Florida SBDC
Thomas Graziano, M.B.A.	Director of Core Facilities Operations
Heather Saunders, B.S.	Director of Research Accounting
Nancy Thoman, M.N.M., CRA	Director of Sponsored Programs
Jeanne M. Vivianni, M.P.A.	Director of Research Development
Dana J. Vouglitois, J.D., C.L.P.	Associate Director of Technology Development

### **Division of Student Affairs**

Larry Faerman, Ph.D.	Vice President
Brian Fisher, Ed.D.	Associate Vice President of Operations
Audrey L. Pusey, M.Ed.	Dean of Students
Brian M. Montalvo, M.S., Ed.S., NCC, CCC	Assistant Vice President of Career Services
Donald Van Pelt, Jr., M.S., M.B.A.	Assistant Vice President of Student Engagement
Sherry Bynes, M.A.	Executive Director of TRIO Programs
Kathleen Gardner, Ph.D.	Executive Director of Housing and Residential Education
Nori Carter, M.S.	Director of Student Services and Campus Life, Broward
Thomas Cleare, Ph.D.	Director of Student Health Services

Laura DiPasquale, Ph.D.	Director of Counseling & Psychological Services
Jordan DiPentima, M.Ed.	Director of New Student Transitions and Family Engagement
Donald Gabriel, B.A.	Director of Military and Veterans Affairs
Rebecca Goldstein, Ph.D.	Director of Assessment and Academic Initiatives
Addiel Gomez, M.A.	Director of Marketing and Communications/Student Media
Tikiy'a Henry, Ed.D.	Interim Director of First Generation Student Success
Catherine Kellman-Pitan, M.A., M.B.A.	Director of Housing and Residential Education
Marlynn Lopez, M.Ed.	Director of Weppner Center for LEAD and Service-Learning (Lead and Serve)
Chris Hall Lynch, Ed.S.	Director of Student Union
Danielle McCalla, M.S.	Director of Student Activities and Involvement
Karen Murray, M.S.	Director of Owls Care Health Promotion
Cecilia Sarmiento, M.S.	Director of Student Services and Campus Life, Jupiter
Michelle Shaw, M.Ed.	Director of Student Accessibility Services
Warren Shaw, M.S.	Director of Campus Recreation
Charles Thompson, M.S.	Director of Technology Services

## FACULTY

### Faculty A-B

**Aalo, Valentine;** Professor of Electrical Engineering; Ph.D., Southern Illinois University, Carbondale.

**Abaid, Teresa L.;** Associate Librarian; M.L.S., Queens College.

- Abbate, Anthony J.;** Professor of Architecture; M.Arch., Washington University; A.I.A., N.C.A.R.B.
- Abraha, Yonas;** Senior Instructor of Mathematics and Statistics; M.S., Florida Atlantic University.
- Abtahi, Homayoon (Amir);** Associate Professor of Mechanical Engineering; Ph.D., Massachusetts Institute of Technology.
- Acello, Eileen;** Instructor of Marketing; M.S., Saint Joseph's University.
- Acosta, Melanie;** Associate Professor of Curriculum and Instruction; Ph.D., University of Florida.
- Adams, Robert D.;** Professor of English; Ph.D., Washington University, St. Louis.
- Adenmosun, Elizabeth;** Visitor Instructor of Nursing; Ph.D., Florida Atlantic University.
- Afanador-Llach, Camila;** Associate Professor of Visual Arts and Art History; M.F.A., Rhode Island School of Design.
- Agapova, Anna;** Associate Professor of Finance; Ph.D., Georgia State University.
- Agarwal, Ankur;** Assistant Professor of Computer Science and Engineering; Ph.D., Florida Atlantic University.
- Akinpelu, Olufunmilayo;** Visiting Instructor of Nursing; D.N.P., Florida Atlantic University.
- Albruna Miranda, Julian Alfonso;** Assistant Professor of Medicine; M.D., University of Guadalajara.
- Alderman, Pamela;** Associate University Librarian; M.S.L.S., Case Western University.
- Alexander, William;** Associate Professor of Psychology; Ph.D., Indiana University.
- Alexandre, Pierre;** Director and Associate Professor of Health Administration; Ph.D., Florida International University.
- Alhalabi, Bassem A.;** Associate Professor of Computer Science and Engineering; Ph.D., University of Southwestern Louisiana.
- Allen, Ethan J., Jr.;** Head Campus Librarian; M.A., University of South Florida.
- Allgood, Ilene;** Senior Instructor of Curriculum and Instruction; Ed.D., Florida Atlantic University.
- Almonte, Mauricio;** Senior Instructor of Spanish; M.A., Bowling Green State University; Ph.D., Vanderbilt University in process.
- Al-Moshaigh, Abdullah;** Visiting Instructor of Accounting; Ph.D., Florida Atlantic University.
- Alter, Scott;** Associate Professor of Emergency Medicine, Associate Research Director, Emergency Medicine Core Faculty and Assistant Dean for Clinical Research; M.D., Rutgers Robert Wood Johnson Medical School.
- Altman, Sigal;** Instructor of Criminology and Criminal Justice; M.S., Florida Atlantic University.
- Amadori, Claudia;** Instructor of English; M.F.A., Florida Atlantic University.
- Amirault, Ray;** Assistant Professor of Curriculum and Instruction; Ph.D., Florida State University.
- An, Pak-Cheung Edgar;** Professor of Ocean Engineering; Ph.D., University of New Hampshire.
- Ananthakrishnan, Palaniswamy;** Associate Professor of Ocean Engineering; Ph.D., University of California, Berkeley.
- Ande, Patrick;** Lab Coordinator, Department of Chemistry and Biochemistry; M.S., University of

Tennessee, Knoxville.

**Andrew, Jan;** University School Instructor; M.Ed., Washington University.

**Antonelli, Melissa;** Visiting Instructor, Curriculum and Instruction; Ph.D., Florida Atlantic University.

**Anzures, Gizelle;** Assistant Professor of Psychology; Ph.D., University of Toronto.

**Araghi, Farshad;** Associate Professor of Sociology; Ph.D., University of Georgia.

**Archer, Andrea;** Visiting Assistant Professor of Nursing; Ed.D., Nova Southeastern University.

**Arias, Aimee K.;** Associate Dean and Associate Professor of Political Science; Ph.D., University of Miami.

**Arikan, Andac;** Associate Professor of Management Programs; Ph.D., New York University.

**Ariza, Eileen;** Professor of Curriculum and Instruction; Ed.D., University of Massachusetts.

**Arneklev, Bruce;** Associate Professor of Criminology and Criminal Justice; Ph.D., University of Oklahoma.

**Arockiasamy, M.;** Professor of Civil Engineering and Director of the Center for Infrastructure and Constructed Facilities; Ph.D., University of Wisconsin, Madison; P.E.

**Atkin-Plunk, Cassandra;** Assistant Professor of Criminology and Criminal Justice; Ph.D., Sam Houston State University.

**Atkins, Burton;** Instructor of Political Science; Ph.D., University of Wisconsin.

**Atkins, Thomas R.;** Professor of Theatre and Dance; M.F.A., Yale University.

**Attonito, Jennifer;** Instructor of Health Administration; Ph.D., Florida International University.

**Augustyn, Prisca;** Professor of German and Linguistics; Ph.D., University of California, Berkeley.

**Aurélien Buie, Louise;** Assistant Dean for the College of Nursing; Ed.D. University of Florida.

**Averkiou, Peter A.;** Associate Professor of Pediatrics; M.D., Albany Medical College.

**Axe, Barry;** Visiting Instructor, Management and International Business; Ed.D., Temple University.

**Ayyanathan, Kasirajan;** Associate Professor of Biological Sciences; Ph.D., Indian Institute of Science, Bangalore, India.

**Azarderakhsh, Reza;** Assistant Professor, Computer & Electrical Engineering and Computer Science, and I-SENSE Fellow; Ph.D., Western University.

**Babbar, Sunil;** Professor of Information Technology and Operations Management; Ph.D., Kent State University.

**Backstrom, Laura;** Assistant Professor of Sociology; Ph.D., University of Indiana-Bloomington.

**Baghbani, Mehrdad S.;** Assistant Professor of Visual Arts and Art History; M.F.A., Michigan State University.

**Bagby, Jonathan;** Associate Professor of Electrical Engineering; Ph.D., Michigan State University.

**Baganz, Nicole;** Research Assistant Professor of Biomedical Science and Director of the FAU Brain

Institute's ASCEND Program; Ph.D., University of Texas.

**Baghersad, Milad;** Assistant Professor of Information and Technology and Operations Management; Ph.D., Virginia Tech University.

**Bai, Shi;** Associate Professor of Mathematics and Statistics; Ph.D., Australian National University.

**Baima, Nicholas;** Assistant Professor of Philosophy; Ph.D., University of Washington.

**Baldwin, John;** Associate Professor of Biology; Ph.D.; University of California, Davis.

**Balkan, Stacey;** Assistant Professor of English; Ph.D., The City University of New York.

**Baltrucki, Matt;** Assistant Professor of Music; M.M., McGill University.

**Banchetti, Marina;** Chair and Associate Professor of Philosophy; Ph.D., University of Miami.

**Banerjee, Kuntal;** Associate Professor of Economics; Ph.D., Cornell University.

**Barakat, Maysaa;** Assistant Professor of Educational Leadership and Research Methodology; Ph.D., Auburn University.

**Barbera, Salvatore;** Instructor of Health Administration; D.H.A., Central Michigan University.

**Barenholtz, Elan;** Associate Professor of Psychology; Ph.D., Rutgers University.

**Bargsten, Joey;** Associate Professor of Communication and Multimedia Studies; Ph.D., University of Iowa.

**Barnhardt, Terrence;** Associate Scientist of Psychology; Ph.D., University of Arizona.

**Barrios, Barclay;** Associate Dean for the College of Arts and Letters and Associate Professor of English; Ph.D., Rutgers University.

**Barron, Bruce J.;** Assistant Librarian; M.A., University of South Florida.

**Barsky, Allan;** Professor of Social Work; Ph.D., University of Toronto.

**Barzey, Chrisencia;** University School Instructor; M.Ed., Florida Atlantic University.

**Basiratmand, Mehran;** Instructor, Information Technology and Operations Management; Ph.D., Florida Atlantic University.

**Batalama, Stella;** Dean of the College of Engineering and Computer Science and Professor of Electrical Engineering; Ph.D., University of Virginia.

**Battistella, Dennis;** Visiting Instructor of Information Technology and Operations Management; M.B.A., New York Institute of Technology.

**Baxley, Traci;** Associate Professor of Curriculum and Instruction; Ed.D., Florida Atlantic University.

**Beattie, Ashley;** Assistant Professor of Integrated Medical Science; M.D., University of Miami Miller School of Medicine.

**Beaujean, Pierre-Philippe J.;** Associate Professor of Ocean Engineering; Ph.D., Florida Atlantic University.

**Beetle, Christopher;** Associate Professor of Physics; Ph.D., Pennsylvania State University.

**Begleiter, David;** Clinical Affiliate Assistant Professor and Ultrasound Perceptor; M.D., State University of New York Downstate College of Medicine.

**Behara, Ravi S.;** Professor of Information Technology and Operations Management; Ph.D., Manchester Metropolitan University, U.K.

**Benenson, R.;** Adjunct Professor of Physics; Ph.D., University of Wisconsin.

**Benjamin, Latanya;** Associate Professor of Integrated Medical Science; M.D., MCP Hahnemann University (now Drexel University).

**Bennett, Evan;** Associate Professor of History; Ph.D., College of William and Mary.

**Bentley-Kemp, Lynne;** Instructor of Photography; Ph.D., Florida Atlantic University.

**Ben-Zadok, Efraim;** Professor of Public Administration; Ph.D., New York University.

**Beoku-Betts, Josephine;** Professor of Sociology and Women's Studies; Ph.D., University of Wisconsin, Madison.

**Berber, Mustafa;** Assistant Professor of Geomatics Engineering; Ph.D., University of New Brunswick, Canada.

**Berenbaum, Maria Alvarez;** Associate Librarian; M.L.S., University of California, Los Angeles.

**Berger, Alan L.;** Raddock Family Eminent Scholar in Holocaust Studies and Professor of English; Ph.D., Syracuse University.

**Berkowitz, Leonard;** Assistant Professor of Integrated Medical Science; D.O., New York Institute of Technology.

**Berlatsky, Eric;** Chair and Associate Professor of English; Ph.D., University of Maryland.

**Bernardin, H. John;** Professor of Management and International Business and Research Professor of Management; Ph.D., Bowling Green State University.

**Bernet Patrick;** Associate Professor of Health Administration; Ph.D., Temple University.

**Bertollo, Suzanne;** Assistant Dean for Medical Education and Associate Professor; M.D., University of Florida.

**Bertrand, Herlie;** Visiting Instructor of Nursing; M.S., Florida Atlantic University.

**Besser, Lilah M.;** Assistant Professor of Urban and Regional Planning; Ph.D., University of North Carolina, Chapel Hill.

**Bhagwanji, Yash;** Associate Professor of Curriculum and Instruction; Ph.D., University of Illinois, Urbana-Champaign.

**Bhattacharjee, Papiya;** Senior Instructor of Mathematics and Statistics; Ph.D., Bowling Green State University.

**Bilgihan, Anil;** Associate Professor of Hospitality and Tourism Management; Ph.D., University of Central Florida.

**Billington, Barbara;** University School Instructor; B.S., University of Kansas.

**Billington, Mary Ellen;** Assistant Professor of Emergency Medicine and Emergency Medicine Core Faculty; M.D., Florida Atlantic University.

**Binninger, David M.;** Associate Professor of Biological Sciences; Ph.D., University of North

Carolina, Chapel Hill.

**Bird, Jennifer;** Core Teaching Instructor of Curriculum and Instruction; Ph.D., Miami University of Ohio.

**Bishop, Desmond;** Instructor, Information Technology and Operations Management.

**Bjorklund, David F.;** Associate Chair and Professor of Psychology; Ph.D., University of North Carolina, Chapel Hill.

**Blakely, Randy;** Professor of Biomedical Science and Executive Director of FAU's Brain Institute; Ph.D., Johns Hopkins School of Medicine.

**Blanks, Janet;** Professor for Complex Systems and Brain Sciences; Ph.D., University of California.

**Blattner, Geraldine;** Associate Professor of French and Linguistics; Ph.D., Pennsylvania State University.

**Bloom, Jennifer;** Provost Fellow for Leadership and Professional Development and Associate Professor of Educational Leadership and Research Methodology; Ph.D., University of Illinois, Urbana-Champaign.

**Blount, Janelle;** Instructor of English; M.A., University of California, Dominguez-Hills.

**Bloetscher, Frederick;** Associate Dean and Associate Professor of Civil Engineering; Ph.D., University of Miami; P.E.

**Boerum, Christopher;** Senior Instructor of Exercise Science and Health Promotion; M.S., Florida Atlantic University.

**Bogotch, Ira;** Professor of Educational Leadership and Research Methodology; Ed.D., Florida International University.

**Bohan, Gregory;** Instructor of Hospitality and Tourism Management; M.S., Florida International University.

**Bolojan, Daniel;** Assistant Professor of Architecture; M.Arch., Institute of Architecture, University of Applied Arts, Vienna.

**Bommareddy, Ajay;** Associate Professor of Pharmacology; Ph.D., South Dakota State University.

**Booton, Barry O.;** University Instructor of Mathematics and Statistics; Ph.D., University of Illinois, Chicago.

**Borum, Melissa;** Instructor of Nursing and Clinical Coordinator; M.S.N., University of South Florida.

**Bosshardt, William D.;** Professor of Economics and Director, Center for Economic Education; Ph.D., Purdue University.

**Bou-Harb, Elias;** Assistant Professor, Computer & Electrical Engineering and Computer Science; Ph.D., Concordia Institute for Information Systems Engineering.

**Boudreaux, Christopher;** Associate Professor of Economics; Ph.D., Florida State University.

**Bourassa, Steven C.;** Director and Professor of Urban and Regional Planning; Ph.D., University of Pennsylvania.

- Bowers, Phyllis H.;** Assistant Professor of Counselor Education; Ph.D., University of New Mexico.
- Bozarth, Ken;** Instructor of Information Technology and Operations Management; B.A., Florida Atlantic University.
- Branaman, Ann;** Chair and Associate Professor of Sociology; Ph.D., Pennsylvania State University.
- Brant, Katarina;** Instructor of Management Programs; Ph.D., Florida Atlantic University.
- Brennan, Lisa Ann;** Research Associate Professor for the College of Medicine; Ph.D., University of Ulster, Ireland.
- Brennen, Marlene;** Assistant Professor of Nursing; D.N.P., Florida Atlantic University.
- Brewer, Ernest Andrew;** Assistant Dean for School Engagement, College of Education; Ed.D., University of Central Florida.
- Brickman, Lawrence;** Associate Professor of Surgery; M.D., Free University of Brussels, Belgium.
- Briggs, Tiffany Roberts;** Chair and Associate Professor of Geosciences; Ph.D., University of South Florida.
- Broadbent, Michelle;** Interim Assistant Dean and Clinical Assistant Professor for the College of Nursing; M.S.N., Delta State University.
- Broderick, Amy;** Associate Professor of Visual Arts and Art History; M.F.A., Maryland Institute College of Art.
- Brooks, Clarence;** Associate Professor of Theatre and Dance; M.F.A., University of Washington.
- Brooks, William R.;** Professor of Biological Sciences; Ph.D., Florida State University.
- Brown, Clifford T.;** Associate Professor of Anthropology; Ph.D., Tulane University.
- Brown, Georgia;** Field Faculty, Social Work; M.S.W., University of Texas, Arlington.
- Brown, Raquel;** Visitor Instructor of Nursing; Ph.D., Florida Atlantic University.
- Brown, Sarah;** Associate Professor of History; Ph.D., Georgia State University.
- Brown, Susannah;** Professor of Curriculum and Instruction; Ph.D., Florida State University.
- Brown, Victoria;** Professor of Curriculum and Instruction; Ed.D., University of West Florida.
- Brown-King, Clarene;** Instructor of Nursing; Ph.D., Barry University.
- Bryan, Valerie;** Professor of Educational Leadership and Research Methodology; Ed.D., Florida Atlantic University.
- Bubna, Nisha;** Assistant Professor of Integrated Medical Science; M.D., New York Medical College.
- Bucak, Ayse Papatya;** Associate Professor of English; M.F.A., Arizona State University.
- Buckton, Oliver;** Professor of English; Ph.D., Cornell University.
- Bullard, Lofton A.;** Senior Instructor of Computer Science and Engineering; Ph.D., Florida Atlantic University.
- Butcher, Howard K.;** Director of Ph.D. Programs for the College of Nursing and Professor of Nursing; Ph.D., University of South Carolina.
- Buteau, Stephan;** Assistant Professor of Medicine, Academic Internist; M.D., Meharry Medical

College.

## Faculty C-D

**Caceres, Jennifer W.;** Senior Associate Dean for Student Affairs and Admissions and Associate Professor of Integrated Medical Science; M.D., University of Medicine and Dentistry of New Jersey.

**Cai, Guoqiang Q.;** Professor of Mechanical Engineering and Center for Applied Stochastics; Ph.D., Florida Atlantic University.

**Cain, Calli;** Assistant Professor of Criminology and Criminal Justice; Ph.D., University of Nebraska, Omaha.

**Calargé, Carla;** Associate Professor of French and Francophone Studies; Ph.D., University of Iowa.

**Caldierón, Jean-Martin;** Associate Professor of Architecture; Ph.D., Tohoku University, Japan.

**Camargo, Diego;** Instructor of Architecture; M.Arch., Polytechnic University of Catalonia, Barcelona.

**Cañete Quesada, Carmen;** Assistant Professor of Spanish; Ph.D., Vanderbilt University.

**Canfield, Brian S.;** Professor of Counselor Education; Ed.D., Texas A&M University.

**Cao, Jian;** Associate Professor of Accounting; Ph.D., Kent State University.

**Caputi, Jane;** Professor of Women's Studies; Ph.D., Bowling Green State University.

**Caputi, Massimo;** Professor of Biomedical Science; Ph.D., International School for Advanced Studies, Trieste, Italy.

**Cardei, Ionut E.;** Associate Professor of Computer Science and Engineering; Ph.D., University of Minnesota.

**Cardei, Mihaela;** Associate Dean and Associate Professor of Computer Science and Engineering; Ph.D., University of Minnesota.

**Carlsson, Leif A.;** Professor of Mechanical Engineering; Ph.D., Chalmers University of Technology, Sweden.

**Carlstrom, Deborah;** Instructor of Curriculum and Instruction; Ed.D., Florida Atlantic University.

**Carnahan, Al;** Instructor in the College of Education and Director of the Student Teaching Program; Ed.S., Florida Atlantic University.

**Carnovale, Jessica;** Instructor, Information Technology and Operations Management; Master in Legal Studies, University of Arizona.

**Carnovale, Steven;** Associate Professor, Information Technology and Operations Management; Ph.D., Rutgers University.

**Carreno-Lukasik, Gina;** Senior Instructor of Sociology; Ph.D., Florida State University.

**Carter, Susan L.;** Instructor of Information Technology and Operations Management; M.A.S., Florida Atlantic University.

- Caruso, Joseph**; Instructor of Biological Sciences; Ph.D., University of Georgia.
- Carvelli, Lucia**; Associate Professor of Neuroscience; Ph.D., Mario Negri Institute for Pharmacological Research, Milan.
- Cassanetti, Nico**; Senior Instructor of English; M.F.A., Florida Atlantic University.
- Castater, Nichole**; Instructor of Finance; Ph.D., University of South Carolina.
- Castro, Stephanie**; Associate Professor of Management; Ph.D., University of Miami.
- Castrogiovanni, Gary**; Desantis Distinguished Professor of Management/Entrepreneurship and Program Director, Management/Entrepreneurship; Ph.D., Texas Tech University.
- Caudill, Steven B.**; Chair and Kaye Distinguished Professor of Economics; Ph.D., University of Florida.
- Cervený, Janice F.**; Instructor of Management; Ph.D., The State University of New York, Buffalo.
- Cervone, Skye**; Instructor of English; Ph.D., Florida Atlantic University.
- Cesar, Gabriel**; Assistant Professor of Criminology and Criminal Justice; Ph.D., Arizona State University.
- Chadwell, Katherine**; Assistant Dean and Associate Professor for the College of Nursing; D.N.P., Florida Atlantic University.
- Chamely-Wiik, Donna M.**; Instructor of Chemistry; Ph.D., Florida Atlantic University.
- Chandrashekar, Lakshman**; Associate Professor of Management Programs; Ph.D., Southern Illinois University at Carbondale.
- Chang, Bebe**; Assistant Librarian; M.L.I.S., University of South Florida.
- Chang, Lun-Ching**; Associate Professor of Mathematics and Statistics; Ph.D., University of Pittsburgh.
- Chandrashankar, Chitra**; Instructor of Chemistry; Ph.D., Wesleyan University.
- Chapman, DaLaine**; Assistant Professor of Music Education; Ph.D., University of Texas, Austin.
- Charbonneau, Stephen**; Associate Professor of Communication and Multimedia Studies; Ph.D., University of California, Los Angeles.
- Charles, Cornelia**; Assistant Professor of Medicine; M.D., Howard University.
- Chasteen, Nikki**; Instructor of English; M.A., Nova Southeastern University.
- Cheng, Ping**; Professor of Real Estate; Ph.D., Georgia State University.
- Chenovick, Clarissa**; Assistant Professor of English; Ph.D., Fordham University.
- Chiang-Hanisko, Lenny**; Associate Professor of Nursing; Ph.D., Boston College.
- Chie-For, Basil**; Assistant Professor of Clinical Biomedical Science; M.D., University of the Witwatersrand, Johannesburg, South Africa.
- Chin, Pauline**; Senior Instructor of Information Technology and Operations Management; Ph.D., University of Florida.
- Chiplock, Amanda**; Associate University Librarian; M.L.I.S., Simmons College.

**Chive, Joanne;** Instructor of Graduate Business Communications Programs; Ed.D., University of Central Florida.

**Choma, Joseph;** Director and Professor of Architecture; Ph.D., University of Cambridge.

**Christenson, Troy;** Assistant Librarian; M.L.I.S., San Jose State University.

**Cippitelli, Andrea;** Research Associate Professor of Biomedical Science; Ph.D., University of Camerino.

**Clayton, Lisa;** Associate Professor of Emergency Medicine, Program Director of the Emergency Medicine Residency and Chair of the Emergency Medicine Department; D.O., Ohio University.

**Cohen, Julianna;** Instructor of English.

**Cole, Rebel;** Professor of Finance; Ph.D., University of North Carolina, Chapel Hill.

**Collins, Branson;** Assistant Professor of Integrative Health and Director of the FAU Institute for Integrative Health; M.D., UMDNJ Robert Wood Johnson Medical School.

**Comas, Xavier;** Professor of Geosciences; Ph.D., Rutgers University.

**Compomizzi, Joseph;** Director and Senior Instructor of Business Communications; Ph.D., Robert Morris University.

**Conrod, Frédéric;** Associate Professor of Comparative Literature (French, Spanish); Ph.D., University of Colorado.

**Cooke, Donna;** Associate Professor of Management; Ph.D., University of Miami.

**Cooke, Roderick;** Assistant Professor of Languages, Linguistics and Comparative Literature; Ph.D., Columbia University.

**Cooley, Morgan;** Assistant Professor of Social Work; Ph.D., Florida State University.

**Cooper, Robert B.;** Professor of Computer Science and Engineering; Ph.D., University of Pennsylvania.

**Corr, Rachel;** Associate Professor of Anthropology; Ph.D., University of Illinois.

**Cox, Kevin;** Instructor of Management Programs; Ph.D., Florida Atlantic University.

**Crain, Michael Alan;** Instructor of Accounting; D.B.A., University of Manchester.

**Crichlow, Vaughn;** Interim Associate Director and Assistant Professor of Criminology and Criminal Justice; Ph.D., Michigan State University.

**Crisuolo, Melissa;** Senior Instructor of English; M.F.A., University of Florida.

**Critchfield, Christine;** University School Instructor; B.S., Florida Atlantic University.

**Cross, Lorraine;** University School Associate Professor and Director of the Program and School Initiatives Effective Teaching Practices; M.Ed., Florida Atlantic University.

**Cudic, Mare;** Assistant Professor of Chemistry and Biochemistry; Ph.D., University of Zagreb, Croatia.

**Cudic, Predrag;** Chair and Professor of Chemistry and Biochemistry; Ph.D., University of Zagreb, Croatia.

**Cumming, Douglas;** Professor of Finance and DeSantis Distinguished Professor of Finance and Entrepreneurship; Ph.D., University of Toronto.

**Cunningham, Candace;** Assistant Professor of History; Ph.D., University of South Carolina.

**Cunningham, James E.;** Associate Professor of Music; Ph.D., University of Washington.

**Cunningham, Stephanie;** Professor of Visual Arts and Art History; M.F.A., University of Notre Dame.

**d'Anjou, Philippe;** Professor of Architecture; M.Arch., Laval University.

**Dagbovie-Mullins, Sika;** Associate Professor of English and Director of Graduate Studies; Ph.D., University of Illinois, Urbana-Champaign.

**Dahmus, Sue;** Instructor of Management; Ph.D., Florida Atlantic University.

**Dalin, Miriam Sanua;** Professor of History; Ph.D., Columbia University.

**Danesh, Ali;** Professor of Communication Sciences and Disorders and Director of the Audiology Clinic; Ph.D., University of Memphis.

**Dardano, Anthony, Jr.;** FAU Site Director of the Program in General Surgery, Boca Raton Regional Hospital; D.O., Nova Southeastern University.

**Dardano, Anthony, Sr.;** Associate Dean for Academic Affairs/Delray Medical Center and Affiliate Professor of Integrated Medical Science; M.D., University of Bologna.

**Dario, Lisa;** Assistant Professor of Criminology and Criminal Justice; Ph.D., Arizona State University.

**Darling, Sharon;** Associate Professor of Special Education; Ph.D., Georgia State University.

**Darlington, Patricia;** Associate Professor of Communication and Multimedia Studies; Ph.D., University of Florida.

**Dassa, Lori;** Assistant Professor for Effective Teaching Practices, Curriculum and Instruction; Ed.D., Nova Southeastern

**Davies, Stephen T.;** University School Instructor; M.S., Nova Southeastern University.

**De Groff, Delores;** Associate Professor of Computer and Electrical Engineering and Computer Science; Ph.D., Florida Atlantic University.

**De St. Croix, Blane;** Associate Professor of Visual Arts and Art History; M.F.A, Cranbrook Academy of Art.

**Decker, Marc;** Assistant Professor of Music, D.M.A., University of Iowa.

**DeDonno, Michael;** Assistant Professor of Educational Leadership and Research Methodology; Ph.D., Case Western Reserve University.

**Dennett, Susan;** Visiting Assistant Professor of Educational Leadership and Research Methodology; Ph.D., Florida Atlantic University.

**DeLuca, Allison;** Assistant University Librarian; M.S., Florida State University.

- Demner, Adam**; Assistant Professor of Integrated Medical Science and Director of Addiction Psychiatry; M.D., New York Medical College.
- DeNero, Mary**; University School Assistant Professor; M.Ed., University of Houston.
- DeRosa, Marshall L.**; Professor of Political Science; Ph.D., University of Houston.
- Desir, Rosemond**; Assistant Professor of Accounting; Ph.D., University of Massachusetts, Amherst.
- Detwiler, Kate**; Assistant Professor of Anthropology; Ph.D., New York University.
- Deuchar, Ross**; Professor Affiliate of Criminology and Criminal Justice; Ph.D., University of Strathclyde.
- Deutsch, Elana**; OB-GYN Co-Clerkship Director, Assistant Professor of Clinical Biomedical Science; M.D., University of South Florida.
- DeWalt, Christina**; Assistant Professor of Communication and Media Studies; Ph.D., The University of Oklahoma.
- Dhanak, Manhar**; Chair and Professor of Ocean and Mechanical Engineering; Ph.D., University of London.
- Dial, Timothy**; Associate Professor of Theatre and Dance; M.F.A., University of Tennessee.
- DiCicco, Joel M.**; Instructor of Accounting; Ph.D., Florida Atlantic University.
- Di Corcia Mark J.**; Assistant Dean for Medical Education and Associate Professor of Integrated Medical Science; Ph.D., Purdue University.
- DiCosola, Michaela A.**; Professor of Visual Arts and Art History; M.F.A., University of Florida.
- Dinev, Tamara**; Chair and Professor of Information Technology and Operations Management; Ph.D., Florida Atlantic University.
- Dobrin, Adam**; Associate Professor of Criminology and Criminal Justice; Ph.D., University of Maryland.
- Dobson, Andrew**; Visiting Assistant Professor of Philosophy; B.A., University of Australia.
- Dochterman, Sara**; Assistant Director of Social Work; M.S.W., Florida Atlantic University.
- Donahue, Janice E.**; University Librarian and Assistant Dean; M.S., Florida State University.
- Doras, Theodore**; Assistant University Librarian; M.L.I.S., Florida State University.
- Dorchin, Susan**; Senior Instructor of Music; B.M., Boston Conservatory of Music.
- Dragojlovic, Veljko**; Associate Professor of Chemistry; Ph.D., University of British Columbia.
- Drees, Kevin**; Senior Instructor of Mathematics and Statistics; Ph.D., Bowling Green State University.
- Drowos, Joanna**; Associate Dean for Faculty Affairs and Professor of Family Medicine; D.O., Nova Southeastern University.
- Drucker, Donna**; Instructor of Social Work; M.S.W.; State University of New York, Stonybrook.
- Du, Deguo**; Assistant Professor of Chemistry and Biochemistry; Ph.D., University of Pennsylvania.
- Du, Sarah E.**; Assistant Professor of Ocean and Mechanical Engineering; Ph.D., Stevens Institute of Technology.

**Dubois, Philippe**; Instructor of Finance; Ph.D., Florida Atlantic University.

**Duboue, Erik**; Assistant Professor of Biology; Ph.D., New York University.

**Dukes, Charles**; Chair of Curriculum and Instruction and Professor of Special Education; Ed.D., Florida International University.

**Dumbaugh, Eric**; Associate Professor of Urban and Regional Planning; Ph.D., Georgia Institute of Technology.

**Dunlea, Claudia**; Senior Instructor of History; Ph.D., University of Hamburg, Germany.

**Dunn, Kimberly A.**; Associate Professor of Accounting; Ph.D., Georgia State University.

**Dupre, Muriel**; University School Instructor; M.S., Northeast Louisiana University.

**Durbeej, Jerry**; Instructor of Graduate Business Communications Programs; Ph.D., Florida Atlantic University.

**Durnell-Uwechue, Nannetta**; Associate Professor of Communication and Multimedia Studies; Ph.D., Ohio State University.

**Dye, Karen Chinander**; Senior Instructor of Information Technology and Operations Management; Ph.D., University of Pennsylvania.

## **Faculty E-G**

**Earles, Julie**; Associate Professor of Psychology; Ph.D., Georgia Institute of Technology.

**Eason, Shane**; Instructor of Communication and Multimedia Studies; M.F.A., Concordia University, Montreal.

**Edison, Neil**; Clinical Affiliate Assistant Professor of Integrated Medical Science; M.D., New York Medical College.

**Edwards, Karethy**; Endowed Professor of Nursing; Ph.D., University of Oklahoma.

**Edwards, Parker B.**; Assistant Professor of Mathematics and Statistics; Ph.D., University of Florida.

**Eggenberger, Terry**; Professor of Nursing; Ph.D., Florida Atlantic University.

**Eisenberg, Ellen**; Associate Professor of Integrated Medical Science; M.D., Boston University School of Medicine.

**Elishakoff, Isaac E.**; Distinguished Research Professor of Mechanical Engineering and Professor of Mathematics and Statistics; Ph.D., Moscow Energetics Institute.

**Elliott, Richard**; Professor of Integrated Medical Science; M.D., Ph.D., University of Wisconsin-Madison.

**Ellis, Kimberly**; Associate Professor of Management Programs; Ph.D., Florida State University.

**Ellis, Meredith**; Assistant Professor of Anthropology; Ph.D., Syracuse University.

**Ellison, Anthony P.;** Visiting Instructor of Economics; M.Phil., Bath University.

**Ely, Christopher;** Associate Professor of History; Ph.D., Brown University.

**Emadikhiav, Mohsen;** Assistant Professor of Information Technology and Operations Management; Ph.D., University of Connecticut.

**Emelianchik-Key, Kelly;** Assistant Professor of Counselor Education; Ph.D., Old Dominion University.

**Engeberg, Erik, D.;** Assistant Professor of Ocean and Mechanical Engineering; Ph.D., University of Utah.

**Engle, Stephen D.;** Professor of History; Ph.D., Florida State University.

**English, Zachary;** Assistant University Librarian; M.L.I.S., University of South Florida.

**Erdol, Nurgun;** Professor of Electrical Engineering; Ph.D., University of Akron; P.E.

**Ergood, Alyse;** Associate University Librarian; M.A., University of South Florida.

**Escaleras, Monica;** Chair and Professor of Economics; Ph.D., Florida International University.

**Escuder, Ana T.;** Senior Instructor of Mathematics and Statistics; Ph.D., Florida Atlantic University.

**Esiobu, Nwadiuto;** Associate Professor of Biology; D.Sc., University of Louvain, Belgium.

**Evangelista, Jasmin;** Instructor of Nursing; D.N.P., Florida Atlantic University.

**Exantus, Maude;** Instructor of Nursing; D.N.P., Florida Atlantic University.

**Fadiman, Maria;** Professor of Geosciences; Ph.D., University of Texas, Austin.

**Fallik, Seth;** Assistant Professor of Criminology and Criminal Justice; Ph.D., Sam Houston State University.

**Fang, Xiaohua;** Associate Professor of Accounting; Ph.D., University of Toronto.

**Farazmand, Ali;** Professor of Public Administration; Ph.D., Syracuse University.

**Faria, Joao Ricardo;** Professor of Economics; Ph.D., University of Kent, Canterbury.

**Fedden, Victoria;** Instructor of English; M.F.A., Florida Atlantic University.

**Feidelman, Lawrence;** Instructor of Information Technology and Operations Management; M.S., University of Pennsylvania.

**Feinberg, Marc;** Affiliate Assistant Professor of Integrated Medical Science and Site Director for the Neurology Residency Program at Delray Medical Center; M.D., State University of New York Downstate Medical Center College of Medicine.

**Feinman, Ronald;** Adjunct Professor of History; Ph.D., City University of New York.

**Feinstein, Stacey;** Clinical Affiliate Assistant Professor and Ultrasound Preceptor; D.O., New York College of Osteopathic Medicine.

**Fejes, Fred;** Professor of Communication and Multimedia Studies and Director, Honors Program; Ph.D., University of Illinois.

**Fenichel, Emily**; Associate Professor of Visual Arts and Art History; Ph.D., University of Virginia.

**Fenichel, Ethan**; Assistant University Librarian; M.S.I.S., University of Tennessee.

**Fergile, Marlee**; Instructor of Nursing; D.N.P., Florida Atlantic University.

**Ferguson, Michelle**; Assistant Professor of Nursing; D.N.P., University of Miami.

**Fernandez, Eduardo B.**; Professor of Computer Science and Engineering; Ph.D., University of California, Los Angeles; P.E.

**Ferris, Allison**; Associate Professor of Medicine, Program Director of the Internal Medicine Residency Program and Chair of the Medicine Department; M.D., Drexel University College of Medicine.

**Fewkes, Jacqueline**; Assistant Professor of Anthropology; Ph.D., University of Pennsylvania.

**Feyereisen, Scott**; Assistant Professor of Health Administration; Ph.D., University of Arizona.

**Fields, Gregg B.**; Interim Vice President for Research, Executive Director for the Institute for Human Health & Disease Intervention, and Professor of Chemistry and Biochemistry; Ph.D., Florida State University.

**Fily, Yaouen**; Assistant Professor of Physics; Ph.D., University of Tours.

**Fink, Deborah Ann**; Assistant University Librarian; M.S.L.I.S., Syracuse University.

**Finnegan, Lisa**; Associate Professor of Special Education; Ph.D., University of Central Florida.

**Finucane, Adrian**; Assistant Professor of History; Ph.D., Harvard University.

**Fisher, Chris-Ann**; Visiting Clinical Assistant Professor of Nursing; D.N.P., Palm Beach Atlantic University.

**Fleitas, Patricia P.**; Professor of Music; D.M.A., University of Texas, Austin.

**Floyd, Deborah**; Professor of Educational Leadership and Research Methodology; Ed.D., Virginia Polytechnic Institute and State University.

**Flynn, Daniel**; Research Professor for the College of Science and Harbor Branch Oceanographic Institute; Ph.D., North Carolina State University.

**Forbes, C.**; Associate Professor of Psychology and Associate Director of the FAU Stiles-Nicholson Brain Institute; Ph.D., University of Arizona.

**Forbes, Valery**; Dean of the College of Science and Professor of Biological Sciences; Ph.D., The State University of New York, Stony Brook.

**Ford, Timothy J.**; Professor of Mathematics and Statistics; Ph.D., Colorado State University.

**Forgan, James**; Associate Professor of Special Education; Ph.D., University of Miami.

**Foster, Jennifer G.**; Associate Professor of Medicine, Director of the Year 3 Curriculum and Director of the Year 4 Curriculum; M.D., St. George's University.

**Fox, Phillip J.**; Instructor of English.

**Fox, Regis**; Assistant Professor of English; Ph.D., University of California, Riverside.

**Frain, Michael**; Professor of Counselor Education; Ph.D., University of Wisconsin.

**Frankel, Kenneth M.**; Associate Librarian; M.A., University of South Florida.

**Fraser-Damas, Shonte;** Assistant Professor of Family Medicine and Medical Director for Quality and Efficiency, FAU Medicine Primary Care; M.D., American University of Antigua College of Medicine.

**Frazier, Evelyn;** Instructor of Biological Sciences; Ph.D., Northern Arizona University.

**Freeman-Costin, Katherine;** Professor of Integrated Medical Science and Biostatistics Core Leader, Institute on Healthy Aging and Lifespan Studies; D. O., Columbia University.

**Freire Machi, Jacqueline;** Research Assistant, Professor of Biomedical Science; Ph.D., University of Sao Paulo.

**Friedman, Barbara;** Lecturer in French; M.A.T., Fairleigh Dickinson University.

**Friedman, Marla;** Instructor, Graduate Business Communications Programs; M.A., Emerson College, Belgium.

**Frisk, George V.;** Professor of Ocean Engineering; Ph.D., Catholic University of America.

**Frost, Tiffany;** Instructor of English; M.A., Florida Atlantic University.

**Fuentes, Dominique;** Senior Instructor of Graduate Business Communications Program; J.D., The George Washington University.

**Furht, Borko;** Professor of Computer Science and Engineering; Ph.D., University of Belgrade.

**Furman, Andrew;** Professor of English and Director of Graduate Studies; Ph.D., Pennsylvania State University.

**Furner, Joseph;** Professor of Curriculum and Instruction; Ph.D., University of Alabama.

**Gallan, Andrew;** Assistant Professor of Marketing; Ph.D., Arizona State University.

**Gallant, Desmond;** Associate Professor of Theatre and Dance; M.F.A., Florida Atlantic University.

**Galup, Stuart D.;** Associate Professor of Information Technology and Operations Management; D.B.A., Nova Southeastern University.

**Gamble, Richard;** Associate Professor of Theatre and Dance; Ph.D., Texas Tech University.

**Gamboa, Yolanda;** Associate Professor of Spanish and Comparative Literature; Ph.D., Purdue University.

**Gammack-Clark, James;** Senior Instructor of Geosciences; M.A., Florida Atlantic University.

**Ganson, Barbara;** Professor of History; Ph.D., University of Texas, Austin.

**Garcia-Feijoo, Luis;** Professor of Finance; Ph.D., University of Missouri, Columbia.

**Gauci, Michael;** Instructor of Accounting; M.TX., Florida Atlantic University.

**Gaze, Angela;** Senior Instructor of Accounting; M.A., Florida Atlantic University.

**Gelb, Ira J.;** Senior Academic Advisor to the Dean for Prebaccalaureate Programs, Professor of Clinical Biomedical Science, Director Emeritus of Cardiology and Co-Director of Cardiovascular Module for year-one medical students; M.D., New York University.

**Gendler, Richard S.;** Instructor of Accounting; J.S.D., Thomas Jefferson School of Law.

**Gengo, Rita;** Assistant Professor of Nursing; Ph.D., University of Sao Paulo.

**George, Gimol T;** Assistant Professor of Integrated Medical Science; Ed.D., Nova Southeastern University.

**Gerstein, Edmund;** Research Director of Psychology; Ph.D., Florida Atlantic University.

**Ghenai, Chaouki;** Assistant Professor of Mechanical Engineering; Ph.D., University of Orleans, Orleans, France.

**Ghoraani Behnaz;** Assistant Professor, Computer & Electrical Engineering and Computer Science, and I-SENSE Fellow; Ph.D., Ryerson University, Toronto, Canada.

**Ghosh, Suman;** Professor of Economics; Ph.D., Cornell University.

**Giannetti, Antoine;** Associate Professor of Finance; Ph.D., Cornell University.

**Gibson, Loren;** Instructor of Geomatics Engineering; M.S., State University of New York.

**Gifford, Sheryl;** Instructor of English; Ph.D., Florida Atlantic University.

**Gill, Carman;** Chair and Professor of Counselor Education; Ph.D., University of North Carolina, Greensboro.

**Gilmore, Grant R.;** Adjunct Professor of Marine Biology; Ph.D., Florida Institute of Technology.

**Glegg, Stewart A.;** Professor of Ocean Engineering; Ph.D., Southampton University; P.E.

**Gleiber, Marni;** Assistant Professor of Integrated Medical Science; M.D., George Washington University.

**Glynn, Simon V.;** Professor of Philosophy; Ph.D., University of Manchester.

**Godenschwege, Tanja;** Assistant Professor of Biology; Ph.D., Bayerische Julius-Maximilians University, Wurzburg, Germany.

**Godon, Nuria;** Associate Professor of Spanish; Ph.D., University of Colorado.

**Gografe, Sylvia;** Research Associate Professor of Biomedical Science; D.V.M., Ph.D., University of Leipzig, Germany.

**Goldberg, Mary Lou;** Instructor in the College of Education and Interim Associate Director of the Office for Academic and Student Services, Northern campuses; Ed.D., Temple University.

**Goldman, Daniel S.;** Associate Dean for Academic Affairs of Bethesda Memorial Hospital and Clinical Affiliate Associate Professor of Integrated Medical Science; M.D., University of Mississippi.

**Goldman, Stuart;** Professor of Integrated Medical Science; M.D., Tufts University.

**Goldstein, Peggy;** Associate Professor of Special Education; Ed.D., Florida Atlantic University.

**Gonzalez, Manny;** Associate Professor of Social Work and D.S.W. Coordinator; Ph.D., Adelphi University.

**Gonzalez-DeHass, A.;** Professor of Curriculum and Instruction; Ph.D., University of Florida.

**Goo, Jahyun;** Associate Professor of Information Technology and Operations Management; Ph.D., The State University of New York, Buffalo.

**Goodrick, Elizabeth;** Professor Professor, Health Administration; Ph.D., University of Illinois.

**Gordon, Shirley C.;** Professor of Nursing; Ph.D., University of Florida.

**Gosser-Esquilín, Mary Ann;** Professor of Spanish and Comparative Literature; Ph.D., Yale University.

**Gothard, Andrew;** Instructor of English; Ph.D., University of Miami.

**Graham, James;** Instructor of Visual Arts and Art History; M.F.A., University of Illinois, Urbana-Champaign.

**Graham, Laura;** Assistant Professor of Visual Arts and Art History; M.F.A., University of Illinois, Urbana-Champaign.

**Granata, Richard;** Professor of Ocean Engineering; Ph.D., The American University.

**Granger, Jamie;** Senior Instructor of Graduate Business Communications Programs; Ph.D., Florida State University.

**Granger, Willa;** Assistant Professor of Architecture; Ph.D., University of Texas, Austin.

**Grant, Patrick A.;** Associate Chair for the Department of Biomedical Science and Associate Professor, Biomedical Science; Ph.D., Karolinska Institute.

**Graves, B. Sue;** Associate Professor of Exercise Science and Health Promotion; Ed.D., University of North Carolina, Greensboro.

**Greenberg, Alisa;** Senior Instructor of Mathematics and Statistics; M.S., Florida Atlantic University.

**Griffin, Sean;** Visiting Assistant Professor of Communication and Multimedia Studies; Ph.D., University of Southern California.

**Gropper, Daniel;** Dean of the College of Business and Professor of Finance; Ph.D., Florida State University.

**Gropper, Sareen;** Professor of Nursing; Ph.D., Florida State University.

**Gross, Robert;** Instructor of Physics; Ph.D., Florida Atlantic University.

**Groton, Danielle;** Assistant Professor of Social Work; Ph.D., Florida State University.

**Grunfeld, George;** Instructor of Graduate Business Communications Programs; Ed.D., Nova Southeastern University.

**Guastafarro, Wendy;** Interim Director and Associate Professor of Criminology and Criminal Justice and Associate Dean for Research; Ph.D., University of Albany.

**Gumus, Gulcin;** Associate Professor of Health Administration; Ph.D., Cornell University.

**Gundersen, Elizabeth C.;** Associate Professor of Integrated Medical Science, Assistant Dean for Student Affairs and Director of the Palliative Care Fellowship; M.D., Medical College of Virginia.

**Guneratne, Anthony;** Professor of Communication and Multimedia Studies; Ph.D., Indiana University.

**Gurses, Mehmet;** Associate Professor of Political Science; Ph.D., University of North Texas.

**Gustafsson, Patricia;** Field Faculty, Social Work; M.S.W., Florida Atlantic University.

**Guthrie, Kathleen M.;** Professor of Biomedical Science; Ph.D., University of California, Irvine.

**Gutman, Daniel S.;** Assistant Professor of Integrated Medical Science; M.D., University of Florida.

## **Faculty H-J**

**Haces, Alberto M.;** Lecturer in Chemistry; Ph.D., University of California, Riverside.

**Hagar, Kristen;** Associate Clerkship Director for Community and Preventive Medicine; M.D., University of Miami.

**Hagood, Taylor;** Professor of English; Ph.D., University of Mississippi.

**Hahn, Maureen;** Research Associate Professor of Biomedical Science; Ph.D., Wayne State University.

**Hahn, William;** Assistant Professor of Mathematics and Statistics; Ph.D., Florida Atlantic University.

**Hain, Debra;** Professor of Nursing; D.N.S., Florida Atlantic University.

**Haire, Henry;** Associate Professor of Integrated Medical Science; M.D., University of Miami.

**Haken, Hermann;** Professor of Mathematics and Statistics and Complex Systems and Brain Sciences; Ph.D., University of Erlangen.

**Haklits, Rose;** Instructor of Nursing; D.N.P., Western Connecticut State University.

**Hall, Michael;** Assistant Professor of Exercise Science and Health Promotion; Ph.D., University of Tennessee.

**Hallstrom, Jason O.;** Professor, Computer & Electrical Engineering and Computer Science, and Director, I-SENSE; Ph.D., Ohio State University.

**Hamilton, David;** Assistant Professor of Languages, Linguistics and Comparative Literature; Ph.D., McGill University, Montreal, Quebec, Canada.

**Han, Chingping (Jim);** Professor of Information Technology and Operations Management; Ph.D., Pennsylvania State University.

**Han, James;** Professor of Information Technology and Operations Management; Ph.D., Pennsylvania State University.

**Hanafy, Khalid;** Research Associate Professor Biomedical Science; M.D., Ph.D., The University of Texas Health Science Center of Houston .

**Hanne, Eric;** Associate Professor of History; Ph.D., University of Michigan.

**Harari, Jack;** Associate Dean for Academic Affairs of West Boca Medical Center and Affiliate Professor of Integrated Medical Science; M.D., University of Miami Miller School of Medicine.

**Harari, Michael;** Associate Professor of Management Programs; Ph.D., Florida International University.

**Hardman, John;** Visiting Assistant Professor of Educational Leadership and Research Methodology; Ph.D., Florida Atlantic University.

**Harrawood, Michael;** Associate Professor of English; Ph.D., University of California, Berkeley.

**Harris, Michael S.;** Chair and Associate Professor of Anthropology; Ph.D., Southern Methodist

University.

**Harris, Nancy;** Assistant Professor of Nursing; D.N.P., Florida Atlantic University.

**Hart, Paul;** Associate Dean and Professor of Information Technology and Operations Management; Ph.D., University of Southern California.

**Hart, Sharon L.;** Associate Professor of Visual Arts and Art History; M.F.A., University of North Carolina, Chapel Hill.

**Hartmann, James X.;** Professor of Microbiology; Ph.D., Michigan State University.

**Harvey, Mark;** Associate Professor of Sociology; Ph.D., University of Wisconsin, Madison.

**Hashemi, Javad;** Professor of Mechanical Engineering; Ph.D., Drexel University.

**Hauser, William;** Assistant Professor of Criminology and Criminal Justice; Ph.D., Florida State University.

**Hawkins, Michele;** Interim Provost and Vice President for Academic Affairs and Professor of Social Work; Ph.D., Southern Illinois University.

**Hawkins, Sam;** Instructor of Political Science; Ph.D., Tufts University.

**Hawkins, Wesley;** Dean of the College of Social Work and Criminal Justice and Professor of Social Work; Ph.D., Southern Illinois University.

**Hawthorne, Dawn;** Associate Professor of Nursing; Ph.D., Florida International University.

**Hayashi, Maris L.;** Associate Librarian; M.A.L.S., University of Iowa.

**Headley, Clevis;** Associate Professor of Philosophy; Ph.D., University of Miami.

**Heidt, Stephen;** Assistant Professor of Communication and Multimedia Studies; Ph.D., Georgia State University.

**Heinze, Katherine;** Assistant Professor of Nursing; Ph.D., Johns Hopkins University.

**Henaio, Lina;** Instructor of Spanish; M.A., Florida Atlantic University.

**Henn, Peter;** Instructor of Urban and Regional Planning; J.D., University of Miami.

**Hennekens, Charles H.;** Sir Richard Doll Professor and Senior Academic Advisor to the Dean; M.D., Cornell University, Ph.D., Harvard University.

**Henson, Jacob;** Instructor of English; M.F.A., Florida Atlantic University.

**Her, Tony;** Assistant Professor of Anatomy and Director of Anatomical Programs, M.D., Spartan University School of Medicine.

**Herst, David;** Senior Instructor of Management Programs; Ph.D., University of South Florida.

**Hickey, Christopher;** Visiting Instructor of Biology; Ph.D., Ohio State University.

**Higgs, Julia L.;** Professor of Accounting; Ph.D., University of South Carolina; C.P.A.

**Hill, Marc;** Visiting Assistant Professor of Physics; Ph.D., Harvard University.

**Hindle, Tobin;** Scientist for Geosciences; Ph.D., Florida Atlantic University.

**Hinduja, Sameer;** Professor of Criminology and Criminal Justice; Ph.D., Michigan State University.

**Hinshaw, Wendy;** Associate Professor of English and Director of the Writing Program; Ph.D., Ohio

State University.

**Hoban, Deborah;** Assistant University Librarian; M.S., Florida State University.

**Hoff, Erika;** Professor of Psychology; Ph.D., University of Michigan.

**Hoffman, Frederick;** Professor of Mathematics and Statistics; Ph.D., University of Virginia.

**Hofmann, Michael;** Associate Professor of Communication and Multimedia Studies; Ph.D., Free University of Berlin.

**Horne, Cassandre;** Visiting Assistant Professor of Nursing; Ph.D., Florida Atlantic University.

**Hill, Terje;** Associate Dean of the Honors College and Associate Professor of Mathematics and Statistics; Ph.D., Kent State University.

**Holland, Peter;** Associate Professor of Integrated Medical Science; M.D., University of South Florida.

**Holley, Allison Marie Shein;** Assistant Professor of Integrated Medical Science; M.D., University of Miami.

**Holloway, Ken;** Associate Professor of History; Ph.D., University of Pennsylvania.

**Hong, Sang Wook;** Associate Professor of Psychology; Ph.D., University of Chicago.

**Hopwood, William S.;** Professor of Accounting; Ph.D., University of Florida.

**Horky, Anthony J.;** Instructor of Accounting; J.D., Nova Southeastern University.

**Horswell, Michael J.;** Dean of the College of Arts and Letters and Associate Professor of Spanish and Comparative Literature; Ph.D., University of Maryland, College Park.

**Horton, Gail;** Professor of Social Work; Ph.D., Florida International University.

**Hough, Phillip;** Associate Professor of Sociology; Johns Hopkins University.

**Howard, Heather;** Assistant Professor of Social Work; Ph.D., Simmons College.

**Huang, Chun-Jung;** Assistant Professor of Exercise Science and Health Promotion; Ph.D., Virginia Commonwealth University.

**Huang, Derrick;** Associate Professor of Information Technology and Operations Management; Ph.D., Harvard University.

**Huang, Shihong;** Associate Professor of Computer Science and Engineering; Ph.D., University of California, Riverside.

**Huang, Xupei;** Professor of Biomedical Science; Ph.D., University of Paris XII, Creteil, France, and M.D., Nanjing Medical University, China.

**Huber, Jeffrey;** Associate Professor of Architecture; M.Arch., University of Florida; A.I.A., N.C.A.R.B., LEED AP.

**Huchital, Daniel H.;** Senior Lecturer in Chemistry; Ph.D.; Stanford University.

**Hudson, Bryant;** Assistant Professor of Management Programs; Ph.D., University of Texas. Dallas.

**Hughes, Colin;** Associate Professor of Biological Sciences; Ph.D., Rice University.

**Hughes, Katherine M.;** Senior Instructor of Psychology; Ph.D., Florida Atlantic University.

**Hughes, Patrick;** Associate Professor of Emergency Medicine; D.O., Michigan State University.

**Hulnik, Laura**; Assistant University Librarian; M.L.S., McGill University.

**Hur, Inkyoung**; Assistant Professor of Information Technology and Operations Management; Ph.D., Florida International University.

**Hutchings, Mitchell**; Assistant Professor of Music; D.M.A., Eastman School of Music.

**Ilyas, Mohammad**; Professor of Computer Science and Engineering; Ph.D., Queens University, Ontario; P.E.

**Imgrund, Caitlin**; Assistant Professor of Communication Sciences and Disorders; Ph.D., University of Kansas.

**Iragavarapu, Vijaya**; Professor of Biomedical Science; Ph.D., University of Miami.

**Isaacson, Richard**; Director, Center for Brain Health and Associate Professor of Integrated Medical Science; M.D., University of Missouri-Kansas City School of Medicine.

**Isgor, Ceylan**; Associate Professor of Biomedical Science; Ph.D., Indiana University.

**Ito, Keiko**; Senior Instructor of Mathematics and Statistics, M.S., Florida Atlantic University.

**Ivey, Michelle**; Assistant Professor of Chemistry; Ph.D., University of California, Irvine.

**Ivy, Russell**; Associate Provost for Assessment and Programs and Associate Professor of Geography; Ph.D., University of Florida.

**Iwamoto, Hideki**; Research Associate Professor of Biomedical Science; Ph.D., Tooin University of Yokohama.

**Jacomino, Mario**; Associate Professor of Pediatrics; M.D., Ponce School of Medicine, Puerto Rico.

**Jakee, Keith**; Assistant Professor of Economics; Ph.D., George Mason University.

**Jakubow, James J.**; Senior Instructor of Psychology; Ph.D., Graduate Center of the City University of New York.

**Jang, Jinwoo**; Assistant Professor of Civil, Environmental and Geomatics Engineering and Faculty Fellow (I-SENSE); Ph.D., Columbia University.

**Jarvis, Cheryl Burke**; Professor of Marketing; Ph.D., Indiana University.

**Javadinia, Amir**; Assistant Professor of Marketing; Ph.D., University of South Carolina.

**Javakhadze, David**; Associate Professor of Finance; Ph.D., University of Missouri.

**Jia, Kailiang**; Assistant Professor of Biological Sciences; Ph.D., University of Texas.

**Joella, Laura**; Associate Professor of Music; D.M.A., Michigan State University.

**Johan, Sofia**; Associate Professor of Finance; Ph.D., University of Tilburg, The Netherlands.

**Johanson, Erik**; Assistant Professor of Geosciences; Ph.D., University of Tennessee.

**Johnson, Kenneth**; Associate Dean of Graduate Programs and Professor of Finance; Ph.D., University

of Alabama.

**Johnson, Linda;** Professor of Visual Arts and Art History; M.F.A., Virginia Commonwealth University.

**Johnston, Kathryn L.;** Associate Professor of Theatre and Dance; M.F.A., University of South Carolina.

**Jones, Courtney D.;** Assistant Professor of Music, D.M.A., University of California, Los Angeles.

**Jones, Lana;** Instructor of Psychology; Ph.D., University of Miami.

**Jones, Nancy;** Associate Professor of Psychology; Ph.D., University of Maryland-College Park.

**Jones, Steve;** Instructor of English; Ph.D., Ball State University.

**Jones, Tarsha;** Assistant Professor of Nursing; Ph.D., Duquesne University.

## **Faculty K-M**

**Kachmar, Diane C.;** University Librarian; M.L.S., Florida State University.

**Kaisar, Evangelos;** Chair of Civil, Environmental and Geomatics Engineering and Professor of Civil Engineering; Ph.D., University of Maryland.

**Kajiura, Stephen;** Assistant Professor of Biology; Ph.D., University of Hawaii, Manoa.

**Kalies, William D.;** Professor of Mathematics and Statistics; Ph.D., Cornell University.

**Kalva, Hari;** Associate Professor of Computer Science and Engineering; Ph.D., Columbia University.

**Kane, Michael;** Professor of Social Work; Ph.D., Barry University.

**Kang, Yun-qing;** Assistant Professor of Ocean and Mechanical Engineering; Ph.D., Sichuan University.

**Kanter, Douglas;** Chair and Associate Professor of History; Ph.D., University of Chicago.

**Kantorow, Marc;** Associate Dean for Graduate Medical Programs and Professor of Biomedical Science; Ph.D., George Washington University.

**Kaplan, Arlene;** Instructor of Social Work; Ph.D., Florida International University.

**Kaufman, Norman S.;** Associate Provost and Professor; Ph.D., Syracuse University.

**Keba, Michelle;** Associate Librarian and Senior Medical Librarian and Head of the Medical and Health Sciences Collection and User Services Department; M.S., The University of Texas at Austin.

**Kelly, Tracian;** Assistant Professor of Nursing; D.N.P., Florida Atlantic University.

**Kelly, Warren Hill;** Senior Instructor of English; Ph.D., University of Mississippi.

**Kelso, J.A. Scott;** Martha and Glenwood Creech Eminent Scholar Chair in Science and Professor of Complex Systems and Brain Sciences and Psychology; Ph.D., University of Wisconsin, Madison.

**Kennedy, Ashley G.;** Assistant Professor of Philosophy; Ph.D., University of Virginia.

**Kenzer, Martin;** Professor of Geography; Ph.D., McMaster University.

**Kersten, Alan;** Associate Professor of Psychology; Ph.D., Georgia Institute of Technology.

**Kharlamov, Viktor;** Assistant Professor of Languages, Linguistics and Comparative Literature; Ph.D., University of Ottawa, Canada.

**Khoshgoftaar, Taghi M.;** Professor of Computer Science and Engineering; Ph.D., Virginia Polytechnic Institute and State University.

**Kidwell, Roland;** Professor of Management Programs; Ph.D., Louisiana State University.

**Kiley, Erin;** Senior Instructor of English; M.F.A., Florida Atlantic University.

**Kim, Dukhong;** Associate Professor of Political Science; Ph.D., Northwestern University.

**Kim, Myeongsub;** Assistant Professor of Ocean and Mechanical Engineering; Ph.D., Georgia Institute of Technology.

**King, Beth;** Associate Professor of Nursing; Ph.D., Iowa State University.

**Kirchman, Paul;** Associate Professor of Biological Sciences; Ph.D., Emory University.

**King, David;** Assistant Professor of Criminology and Criminal Justice; Ph.D., Indiana University.

**Kirshner, Orin;** Senior Instructor and Graduate Lecturer of Political Science; Ph.D., New School for Social Research.

**Klein, Matthew A.;** Interim Director of Surgical Simulation and Education; M.D., University of Texas, San Antonio.

**Klein, Sipai;** Associate Professor of English and Director of the University Center for Excellence in Writing; Ph.D., New Mexico State University.

**Kleinman, Joseph;** Clinical Affiliate Assistant Professor of Integrated Medical Science; M.D., University of Chicago.

**Knight, Rainford;** Adjunct Professor of Finance; Ph.D., Florida Atlantic University.

**Koch-Rose, Marguerite;** Associate Professor of Biological Sciences; Ph.D., University of Miami.

**Kofman, Irena;** Visiting Instructor of Music; D.M.A., University of Miami.

**Kohlbeck, Mark;** Professor of Accounting; Ph.D., University of Texas, Austin.

**Kollander, Patricia;** Professor of History; Ph.D., Brown University.

**Kornblau, Amy I.;** Associate Librarian; M.A., University of South Florida.

**Kossack, Edgar W.;** Associate Professor of International Business; Ph.D., University of Georgia.

**Koszalinski, Rebecca;** Associate Professor of Nursing; Ph.D., Florida Atlantic University.

**Kovandzic, Tom;** Assistant Professor of Criminology and Criminal Justice; Ph.D., Florida State University.

**Krause-Parello, Cheryl A.;** Associate Dean and Distinguished Professor for the College of Nursing; Ph.D., Rutgers University.

**Kuchta, Veronika;** Assistant Professor of Mathematics and Statistics; Ph.D., University of Surrey, U.K.

**Kula, Aaron;** Instructor, University Library; M.M., New England Conservatory of Music.

**Kumar, David**; Professor of Curriculum and Instruction; Ed.D., Vanderbilt University.

**Kumi-Diaka, James**; Associate Professor of Biology; Ph.D., A.B. University.

**Labanowski, Mary C.**; Associate Professor of Integrated Medical Science; M.D., University of Rochester.

**Lamb, Corey**; Associate Professor of Visual Arts and Art History; M.F.A., Indiana University, Bloomington.

**Lambert, Julie**; Associate Professor of Curriculum and Instruction; Ph.D., Florida State University.

**Landes, Eric**; Associate Professor of Visual Arts and Art History; M.F.A., Indiana University.

**Landsman-Wohlsifer, David**; Instructor of Social Work; Ph.D., Institute for Advanced Study of Human Sexuality, San Francisco.

**Lang, Thomas**; Assistant Professor of Integrated Medical Science; M.D., St. George's University School of Medicine.

**Langlois, Ricky**; Senior Instructor of Criminology and Criminal Justice; M.S., Lynn University.

**Lanning, Kevin**; Associate Professor of Psychology; Ph.D., University of California, Berkeley.

**Lapp, Susanne I.**; Associate Professor of Curriculum and Instruction; Ed.D., University of Cincinnati.

**LaRocco, Annette**; Assistant Professor of Political Science; Ph.D., University of Cambridge.

**Larrondo-Petrie, Maria**; Professor of Computer Science and Engineering; Ph.D., Florida Atlantic University.

**Lau, Andy W. C.**; Assistant Professor of Physics; Ph.D., University of California, San Diego.

**Laursen, Brett**; Professor of Psychology; Ph.D., University of Minnesota.

**Lautar, Rebecca**; Chair and Professor of Music; M.M. with Distinction, Indiana University.

**Lawer Friedberg, Jennifer**; Visiting Instructor of Business Communications; Ph.D., Nova Southeastern University.

**Leader, Karen**; Associate Professor of Visual Arts and Art History; Ph.D., New York University.

**Leavitt, Mary Ann**; Assistant Professor of Nursing; Ph.D., Florida Atlantic University.

**Leblanc, Kenny**; Instructor of Graduate Business Communications Programs; D.S.L., Regent University.

**Leip, Leslie**; Associate Professor of Public Administration; Ph.D., University of Missouri, St. Louis.

**Leit, Jodi S.**; Core Teaching Instructor and Advisor of Curriculum and Instruction; M.Ed., Florida Atlantic University.

**Lemeh, Dorothea**; Assistant Professor of Visual Arts and Art History; M.F.A., Pennsylvania State University.

**LeMoine, Rebecca**; Assistant Professor of Political Science; Ph.D., University of Wisconsin, Madison.

**Lenartowicz, Tomasz**; Associate Professor of Management and International Business; Ph.D.,

University of South Carolina.

**Lenz, Timothy O.;** Professor of Political Science; Ph.D., University of Minnesota.

**Leone, Donald J.;** Visiting Assistant Professor of Geomatics Engineering; Ph.D., Rensselaer Polytechnic Institute.

**Lepore, Salvatore D.;** Assistant Professor of Chemistry and Biochemistry; Ph.D., Purdue University.

**Lettman, Stacy;** Assistant Professor of English; Ph.D., University of Southern California.

**Leventouri, Theodora;** Professor of Physics; Ph.D., University of Athens, Greece.

**Levow, Roy B.;** Professor of Computer Science and Engineering; Ph.D., University of Pennsylvania.

**Levy, Eric J.;** Senior Instructor of Economics; M.S., Florida Atlantic University.

**Levy, Ting;** Senior Instructor of Economics; Ph.D., University of Florida.

**Lewin, Philip;** Assistant Professor of Sociology; Ph.D., University of Georgia.

**Lewis, Elaine;** University School Instructor; M.Ed., Florida Atlantic University.

Professor of Integrated Medical Science; Ph.D., Stanford University.

**Li, Dawei;** Associate Professor, Biomedical Science; Ph.D., Shanghai Jiaotong University.

**Li, Mingxiang;** Associate Professor of Management Programs; Ph.D., University of Wisconsin-Madison.

**Li, Yang;** Assistant Professor of Mathematics and Statistics; Ph.D., University of Minnesota, Twin Cities, and Ph.D., Iowa State University.

**Li, Yanmei;** Associate Professor of Urban and Regional Planning; Ph.D., Ohio State University.

**Lieberman, Mary G.;** Associate Professor of Educational Leadership and Research Methodology; Ed.D., Harvard University.

**Ligler, Heather;** Assistant Professor of Architecture; Ph.D., Georgia Institute of Technology.

**Lin, Yuandan;** Professor of Mathematics and Statistics; Ph.D., Rutgers University.

**Lindbeck, Kristen;** Associate Professor of Jewish Studies; Ph.D., Jewish Theological Seminary.

**Litvak, Isaiah;** Eminent Scholar of Management and International Business; Ph.D., Columbia University.

**Liu, Feng-Hao;** Assistant Professor, Computer & Electrical Engineering and Computer Science; Ph.D., Brown University.

**Liu, Gao;** Assistant Professor of Public Administration; Ph.D., University of Kentucky.

**Liu, Long;** Associate Professor of Economics; Ph.D., Syracuse University.

**Lizotte-Waniewski, Michelle;** Associate Professor of Integrated Medical Science and Director of HealthFirst; Ph.D., University of Massachusetts, Amherst.

**Locke, Stephen C.;** Professor of Mathematics and Statistics; Ph.D., University of Waterloo.

**Lohmann, Kenneth J.;** Adjunct Professor of Marine Biology; Ph.D., University of Washington.

**Long, Hongwei;** Professor of Mathematics and Statistics; Ph.D., University of Warwick.

**Longo, Joy;** Interim Associate Dean for the College of Nursing and Associate Professor of Nursing;

Ph.D., Florida Atlantic University.

**Lopez-Viego, Miguel;** Program in General Surgery, Site Director, Bethesda Hospital East; M.D., University of Miami Miller School of Medicine.

**Lorenz, Melanie;** Associate Professor of Marketing; Ph.D., University of Alabama.

**Lottenberg, Lawrence;** Associate Dean for Academic Affairs for St. Mary's Medical Center and Affiliate Associate Professor of Surgery, Interim Program Director, General Surgery and Interim Chair of the Surgery Department; M.D., University of Miami Miller School of Medicine.

**Louda, Deborah W.;** Associate Professor of Integrated Medical Science; Ph.D., University of Miami.

**Louda, J. William;** Research Professor of Chemistry; Ph.D., University of South Florida.

**Love, Tamara;** Assistant Professor of Nursing; D.N.P., University of Wisconsin.

**Lowe, Benno P.;** Professor of History and Director of Graduate Studies; Ph.D., Georgetown University.

**Lu, Michael;** Associate Professor of Biomedical Science; Ph.D., University of Massachusetts.

**Lubarsky, Robert;** University Instructor in Mathematics and Statistics; Ph.D., Massachusetts Institute of Technology.

**Luck, George;** Associate Professor of Integrated Medical Science; M.D., Tulane University School of Medicine.

**Lukasik, Gregory;** Senior Instructor of Sociology; Ph.D., Florida State University.

**Luna, Naelys;** Dean of the College of Social Work and Criminal Justice and Professor of Social Work; Ph.D., Fordham University.

**Lundberg, Eric;** Associate Professor of Mathematics and Statistics; Ph.D., University of South Florida.

**Luria, Rachel;** Associate Professor of Rhetoric and Composition; M.F.A., University of South Carolina.

**Luther, William J.;** Graduate Director and Associate Professor of Economics; Ph.D., George Mason University.

**Lyn, Francis E.;** Associate Director and Associate Professor of Architecture; M.Arch., Princeton University.

**Lyons, H. Jay;** Associate Professor of Biology; Ph.D., University of New Mexico.

**Lypnik, Evelyn;** Instructor of Nursing; M.S.N., Capella University.

**MacDonald, Ian;** Assistant Professor of English; Ph.D., Columbia University.

**Mahfuz, Hassan;** Professor of Ocean Engineering; Ph.D., Florida Atlantic University.

**Mahgoub, Imadeldin;** Professor of Computer Science and Engineering; Ph.D., Pennsylvania State University.

- Malluche, Hartmut H.;** Visiting Research Professor and Senior Advisor to the Dean for Clinical and Translational Research; M.D., J.W. Goethe University.
- Mammah, Kyndall;** Assistant Professor of Nursing; Ph.D., Barry University.
- Manage, Neela D.;** Associate Professor of Economics; Ph.D., George Washington University.
- Mangan, Richard;** Instructor, Criminology and Criminal Justice; M.A., Florida State University.
- Mangleburg, Tamara;** Associate Professor of Marketing; Ph.D., Virginia Polytech Institute and State University.
- Maniaci, Michael;** Assistant Professor of Psychology; Ph.D., University of Rochester.
- Mansilla-Bjalme, Julissa;** Senior Instructor of Spanish; M.A., Florida Atlantic University.
- Marandici, Mircea;** Instructor of Information Technology and Operations Management; M.S., Syracuse University.
- Mariani, Melissa;** Associate Professor of Counselor Education; Ph.D., Florida Atlantic University.
- Marion, Donna;** Senior Instructor of Psychology; Ph.D., Florida Atlantic University.
- Markwith, Scott;** Professor of Geosciences; Ph.D., University of Georgia.
- Marques, Oge;** Associate Professor of Computer Science & Engineering; Ph.D., Florida Atlantic University.
- Martin, Barbara;** University School Instructor; M.Ed., Florida Atlantic University.
- Martines, Johanna;** University School Instructor; M.S., Pace University and Richmond College.
- Martinez, Laurie;** Assistant Professor of Nursing; Ph.D., Florida Atlantic University.
- Martinez, Leonardo;** Instructor of Physics; M.S., The State University of New York.
- Martinez, Lisa;** Associate Professor of Medicine and Medicine Clerkship Director; M.D., University of Miami.
- Martinez, Paulina;** Assistant Professor of Social Work; Ph.D., Barry University.
- Martinez, Valentina;** Instructor of Anthropology; M.A., Southern Methodist University.
- Martiza, Flores;** Senior Instructor of Sociology; Ph.D., University of Miami.
- Maslin-Ostrowski, Patricia;** Professor of Educational Leadership and Research Methodology; Ed.D., Harvard University.
- Mason, Julia;** Associate Professor of English; Ph.D., University of South Florida.
- Masory, Oren;** Professor of Mechanical Engineering; Ph.D., Technion Israel Institute of Technology.
- Matanzo, Jane;** Associate Professor of Curriculum and Instruction; Ph.D., University of Maryland.
- Mavica, Lauren W.;** Instructor of Psychology; Ph.D., Florida Atlantic University.
- McAfee, Francis;** Associate Professor of Communication and Multimedia Studies; M.F.A., Florida Atlantic University.
- McClellan, Joy;** M.S.W. Coordinator; M.S.W., Barry University.
- McClure, Todd;** Instructor of Marketing; Ph.D., Southern Illinois University, Carbondale.
- McConnell, Brian;** Chair and Professor of Visual Arts and Art History; Ph.D., Brown University.

**McCormic, Kathryn;** Instructor of Social Work; M.S.W., Florida Atlantic University.

**McCoy, Michael;** Associate Professor of Biology; Ph.D., University of Florida.

**McCue, Clifford;** Associate Professor of Public Administration; Ph.D., Florida International University.

**McGarrah, James;** Visiting Instructor of Writing; M.F.A., Vermont College.

**McGetchin, Douglas;** Associate Professor of History; Ph.D., University of California, San Diego.

**McGovern, William;** Assistant Professor of Mathematics and Statistics; Ph.D., University of Florida.

**McKay, Becka;** Associate Professor of English and Director of Creative Writing; Ph.D., University of Iowa.

**McNutt, Lynn;** Assistant Professor of Theatre and Dance; M.F.A., George Washington University.

**Medina, David;** Assistant Professor of English; Ph.D., Northeastern University.

**Medina, Fernando;** Professor and Chair of Physics; Ph.D., Princeton University.

**Meeroff, Daniel E.;** Dean of Undergraduate Studies, Professor of Civil, Environmental and Geomatics Engineering and Director of the Laboratories for Engineered Environmental Solutions; Ph.D., University of Miami; E.I.T.

**Mehallis, Mantha V.;** Director of Executive Developmental Programs; Ph.D., Michigan State University.

**Mehrani, Saharnaz;** Assistant Professor, Information Technology and Operations Management; Ph.D., University of Connecticut

**Mello, Lawrence J.;** Assistant University Librarian; M.L.S., University of Maryland.

**Menachof, David;** Associate Professor of Information Technology and Operations Management; Ph.D., University of Tennessee.

**Mendelson, Harvey;** Instructor of Information Technology and Operations Management; M.S., Polytechnic Institute of Brooklyn.

**Mendoza, Martha;** Associate Professor of Spanish and Linguistics; Ph.D., University of California, Berkeley.

**Menzie Suderam, Janet;** Research Assistant and Professor of Biomedical Science; Ph.D., Florida Atlantic University.

**Merchant, Hemant;** Associate Professor of Management Programs; Ph.D., Purdue University.

**Merk, Vivian;** Assistant Professor of Ocean and Mechanical Engineering; Ph.D., ETH Zurich, Switzerland.

**Merlin, Louis;** Assistant Professor of Urban and Regional Planning; Ph.D., University of North Carolina, Chapel Hill.

**Meyerowitz, Aaron;** Professor of Mathematics and Statistics; Ph.D., Colorado State University.

**Migdal, Michelle;** Senior Instructor of Graduate Business Communications Program; J.D., Nova Southeastern University.

**Miller, DeAndra;** Instructor of English; M.F.A., Florida International University.

**Miller, Hugh T.;** Professor of Public Administration; Ph.D., American University.

**Miller, Katie;** Associate Professor of Special Education; Ph.D., University of Central Florida.

**Miller, Timothy;** Assistant Professor of English; Ph.D., University of Notre Dame.

**Miller, Warner A.;** Chair and Professor of Physics; Ph.D., University of Texas, Austin.

**Mills, Carol;** Director and Professor of Communication and Multimedia Studies; Ph.D., Purdue University.

**Milton, Sarah;** Chair and Professor of Biology; Ph.D., University of Miami.

**Mireles-James, Jason;** Associate Professor of Mathematics and Statistics; Ph.D., University of Texas, Austin

**Mishra, Chandra S.;** Professor of Management Programs; Ph.D., University of Texas.

**Mitchell, Susan C.;** Professor of English; M.A., Georgetown University.

**Mitsova, Diana;** Associate Professor of Urban and Regional Planning; Ph.D., University of Cincinnati.

**Mitton, Steven;** Instructor of History; Ph.D., Louisiana State University.

**Monestime, Judith;** Instructor of Health Administration; D.B.A., Walden University.

**Moore, Jon;** Associate Professor of Biological Sciences; Ph.D., Yale University.

**Moosai, Susan;** University Instructor of Mathematics and Statistics; Ph.D., Florida Atlantic University.

**Morancy, Wanda;** Visiting Instructor of Nursing; D.N.P., Barry University.

**Morris, John D.;** Professor of Mathematics and Statistics of Educational Leadership and Research Methodology; Ph.D., University of Florida.

**Morse, Nicole;** Director of Women, Gender and Sexuality Studies and Assistant Professor of Communication and Multimedia Studies; Ph.D., University of Chicago.

**Morton, Jeffrey Scott;** Professor of Political Science; Ph.D., University of South Carolina.

**Moslemian, Davood;** Associate Professor of Mechanical Engineering; Ph.D., University of Illinois.

**Motta, Francis;** Assistant Professor of Mathematics and Statistics; Ph.D., Colorado State University.

**Mountford, Meredith L.;** Associate Professor of Educational Leadership and Research Methodology; Ph.D., University of Wisconsin, Madison.

**Mroz, Richard C., Jr.;** Assistant Professor of Health Sciences; D.A., Catholic University of America.

**Muhammad, Wazir;** Assistant Professor of Physics; Ph.D., Kyungpook National University, Daegu, Korea.

**Mullen, Jacqueline;** Instructor of English; M.A., Florida Atlantic University.

**Mulvaney, Becky;** Associate Professor of Communication and Multimedia Studies; Ph.D., University of Iowa.

**Munson, Marcella;** Chair of Languages, Linguistics, and Comparative Literature and Associate Professor of French and Comparative Literature; Ph.D., University of California, Los Angeles.

**Murphey, Rodney K.;** Professor of Biological Sciences; Ph.D., University of Oregon.

**Murray, Maxime**; Instructor of Mathematics and Statistics; Ph.D., Florida Atlantic University.

**Musgrove, Ann**; Associate Professor of Curriculum and Instruction; Ed.D., Florida Atlantic University.

## **Faculty N-Q**

**Nagarajan, Sudhagar**; Assistant Professor of Civil, Environmental and Geomatics Engineering; Ph.D., Ohio State University.

**Narayanan, Ramaswamy**; Professor of Biological Sciences; Ph.D., National University of Ireland, Dublin.

**Nardini, Gia**; Assistant Professor of Marketing; Ph.D., University of Florida.

**Naudot, Vincent**; Professor of Mathematics and Statistics; Ph.D., Universite de Bourgogne, Dijon-France.

**Nawarathna, R. H. Harsha**; Instructor of Mathematics and Statistics; Ph.D., Florida Atlantic University.

**Nayak, Aditya**; Assistant Professor of Ocean and Mechanical Engineering; Ph.D., Johns Hopkins University.

**Nazarian Rostami, Roozbeh**; Assistant Professor of Integrated Medical Science; M.D., Ross University.

**Neelakantaswamy, Perambur**; Professor of Electrical Engineering; Ph.D., Indiana Institute of Technology.

**Nesbitt, Laurie S.**; Instructor, Graduate Business Communications Programs, College of Business; M.A., Monterey Institute of International Studies.

**Neshenko, Nataliia**; Assistant Professor, Information Technology and Operations Management; Ph.D., Florida Atlantic University.

**Neu, Rachael A.**; Assistant Librarian; M.A., University of South Florida.

**Neubaum, Donald**; Professor of Management Programs; Ph.D., Georgia State University.

**Newman, David**; Associate Professor of Nursing; Ph.D., Cleveland State University.

**Newmann, Lawrence**; Senior Instructor of Health Administration; D.P.M., Illinois College of Podiatry.

**Nicolaou, K.C.**; Adjunct Professor of Chemistry; Ph.D., University of London.

**Nichols, Angela D.**; Assistant Professor of Political Science; Ph.D., University of North Texas.

**Nichols, Bryan**; Associate Professor of Curriculum and Instruction; Ph.D., University of South Florida.

**Nichols, Matthew**; Instructor of Music; M.M., University of Miami.

**Nielsen, Sarah**; Instructor of Graduate Business Communications Programs; Ed.D., Florida

International University.

**Nightengale-Lee, Bianca**; Assistant Professor of Curriculum and Instruction; Ph.D., University of Louisville.

**Nikoloutsos, Konstantinos**; Visiting Assistant Professor of Modern and Classical Greek; Ph.D., University of Birmingham, U.K.

**Nikolova, Daniela**; University Instructor of Mathematics and Statistics; Ph.D., University of Sofia, Bulgaria.

**Njambi, Wairimu Ngaruiya**; Associate Professor of Women's Studies; Ph.D., Virginia Polytechnic Institute and State University.

**Nojournian, Mehrdad**; Assistant Professor, Computer & Electrical Engineering and Computer Science, Ph.D., University of Waterloo, Canada.

**Noonburg, Erik**; Assistant Professor of Biology; Ph.D., University of California, Santa Barbara.

**Norman, Sandra L.**; Associate Professor of History; Ph.D., Brown University.

**Nouri-Shirazi, Mahyar**; Professor of Integrated Medical Science; Ph.D., Chiba University, Japan.

**Nowak, Andrzej**; Professor of Psychology; Ph.D., University of Warsaw.

**Nur-tegin, Kanybek**; Assistant Professor of Economics; Ph.D., University of Nebraska, Lincoln.

**Nyhan, Ronald**; Associate Professor of Public Administration and Associate Dean of the College of Social Work and Criminal Justice; Ph.D., Florida Atlantic University.

**O'Brien, William**; Professor of Environmental Studies; Ph.D., Virginia Polytechnic Institute and State University.

**Oleinik, Anton**; Associate Professor of Geology; Ph.D., Purdue University.

**Oleinikov, Andrew**; Associate Professor of Biomedical Science; Ph.D., Moscow State University.

**O'Neill, Jessica**; Assistant University Librarian; M.L.I.S., University of South Florida.

**Ortega, María**; Associate Dean and Professor for the College of Nursing; D.N.P., Florida Atlantic University.

**Osborne-Parker, Tamar**; Instructor of English.

**Ostinelli, Max**; Assistant Professor of Marketing; Ph.D., McGill University.

**Ouslander, Joseph**; Professor of Geriatric Medicine; M.D., Case Western Reserve University.

**Ozawa, Akihiko**; Research Associate Professor of Biomedical Science; Ph.D., Ehime University.

**Paczkowski, Patch**; Instructor of Management Programs; Ph.D., Rensselaer Polytechnic Institute.

**Padron, Kristy**; Assistant University Librarian; M.L.I.S., Wayne State University.

**Palkon, Dennis**; Professor of Health Administration; Ph.D., University of Pittsburgh.

**Palma, Lynne;** Associate Professor of Nursing; D.N.P., Case Western Reserve University.

**Pandya, Abhijit S.;** Professor of Computer Science and Engineering and of Complex Systems and Brain Sciences; Ph.D., Syracuse University.

**Panzer, Daphne D.;** University School Instructor; M.Ed., Florida Atlantic University.

**Parandjuk, Joanne;** Assistant Librarian; M.L.I.S., University of South Florida.

**Park, Juyoung;** Associate Professor of Social Work; Ph.D., University of Maryland.

**Park, Soyoung;** Assistant Professor of Hospitality and Tourism Management; Ph.D., Pennsylvania State University.

**Parrish, Darlene A.;** University Librarian; Ph.D., Florida State University.

**Patterson, Patricia;** Associate Professor of Public Administration; Ph.D., American University.

**Patton, Joseph;** Instructor of Management Programs; M.B.A., University of Miami.

**Pazdur, Susan;** University School Instructor; B.A.E., Florida Atlantic University.

**Pellen, Rita M.;** University Librarian and Associate Dean of Libraries; M.L.S., University of Pittsburgh.

**Peluso, Paul R.;** Interim Chair of Special Education and Professor of Counselor Education; Ph.D., Georgia State University.

**Pendakur, Manjunath;** Professor of Communication and Multimedia Studies; Ph.D., Simon Fraser University.

**Penhollow, Tina;** Associate Professor of Exercise Science and Health Promotion; Ph.D., University of Arkansas.

**Pennathur, Anita;** Chair and Professor of Finance; Ph.D., University of Alabama.

**Perry, Gary W.;** Professor of Psychology and Professor of Complex Systems and Brain Sciences; Ph.D., University of Manchester.

**Perry, Justin;** Dean of the Honors College and Professor of Psychology; Ph.D., Boston College.

**Persichetti, Edoardo;** Associate Professor of Mathematics and Statistics; Ph.D., University of Auckland.

**Perumareddi, Parvathi;** Associate Professor of Integrated Medical Science; D.O., Nova Southeastern University.

**Pestana, Tatiana;** Assistant Professor of Integrated Medical Science; M.D., Albany Medical College.

**Peterson, Mark;** Professor of Management and International Business; Ph.D., University of Michigan.

**Peterson, Vance;** Instructor of Electrical Engineering; Ph.D., Florida Atlantic University.

**PetitHomme, Edna;** Instructor of Nursing; D.N.P., Florida Atlantic University.

**Petrich, Kevin;** Senior Instructor of Communication and Multimedia Studies; Ph.D., Florida Atlantic University.

**Pettener, Emanuele;** Senior Instructor of Italian; Ph.D., Florida Atlantic University.

**Phillips, Nadine;** Instructor of Nursing; M.S.N., Florida Atlantic University.

- Pina, Philip A.;** Senior Instructor of Mathematics and Statistics; M.S., University of Florida.
- Pinsker, Robert;** Associate Professor of Accounting; Ph.D., University of South Florida.
- Piper, Fred;** Research Professor of Mathematics and Statistics; Ph.D., University of London.
- Placide, Sharon;** Instructor of Sociology; Ph.D., Florida International University.
- Platt, Keith;** Senior Clinical Instructor of Social Work; D.S.W., University of Tennessee.
- Plocharczyk, Leah P.;** Assistant University Librarian; M.L.S., University of South Florida.
- Ploger, Donald;** Associate Professor of Curriculum and Instruction; Ph.D., Rutgers University.
- Polak, Kate;** Assistant Director of the University's Center for Excellence in Writing and Visiting Instructor of English; Ph.D., University of Cincinnati.
- Polsky, Colin;** Associate Vice President for Broward Campuses and Professor of Geosciences; Ph.D., Pennsylvania State University.
- Pomeranets, Anna;** Instructor of Finance; Ph.D., Rutgers University.
- Poole, Deandre;** Instructor of Communications; Ph.D., Howard University.
- Porcaro, Connie K.;** Associate Professor of Communication Sciences and Disorders; Ph.D., University of Arizona.
- Postell, Faye;** Instructor of Nursing; M.S.N., Florida Atlantic University.
- Potenti, Fabio;** Associate Clerkship Director for Surgery (Cleveland Clinic); M.D., Università di Medicina e Chirurgia, Firenze, Italy.
- Potter, Richard;** Senior Instructor of English; M.A., Florida Atlantic University.
- Poulson, Nancy Kason;** Professor of Spanish and Latin American Studies; Ph.D., University of Illinois.
- Powell, Katherine;** Core Teaching Instructor of Curriculum and Instruction; Ed.D., University of Massachusetts, Amherst.
- Pratt, Beth;** Assistant Professor of Nursing; Ph.D., Florida Atlantic University.
- Prentice, Howard M.;** Professor of Biomedical Science; Ph.D., University of London.
- Prescott, Kyle;** Associate Professor of Music; D.M.A., University of Texas, Austin.
- Preston, Karen;** Visiting Instructor in Management Programs; M.H.R., Ohio State University.
- Presuel-Moreno, Francisco;** Associate Professor of Ocean and Mechanical Engineering; Ph.D., University of South Florida.
- Prier, Eric;** Professor of Political Science; Ph.D., Florida State University.
- Proffitt, C. Edward;** Associate Professor of Biological Sciences; Ph.D., University of South Florida.
- Prokocki, Eric;** Assistant Professor of Geosciences; Ph.D., University of Illinois, Urbana-Champaign.
- Prusher, Ilene;** Instructor of Communication and Multimedia Studies; M.A., Columbia University.
- Prysmakova, Palina;** Assistant Professor of Public Administration; Ph.D., Florida International University.
- Puro, Neeraj;** Assistant Professor of Health Administration; Ph.D., University of Alabama at

Birmingham.

**Pusztai, Zsuzsa;** Visiting Instructor, Information Technology and Operations Management; M.B.A., Florida Atlantic University.

**Pyka, Ian;** Visiting Instructor of Exercise Science and Health Promotion; M.S., University of Tennessee.

**Quan, Ning;** Professor of Biomedical Science; Ph.D., University of Tennessee.

**Quidley-Rodriguez, Narciso;** Assistant Professor of Nursing; Ph.D., University of Miami.

**Quieroz, Magno;** Assistant Professor of Information Technology and Operations Management; Ph.D., University of Wollongong.

**Quintero, Stella;** Instructor of Hospitality and Tourism Management; M.B.A., Lynn University.

**Quintyne, Nicholas;** Assistant Professor of Biological Sciences; Ph.D., Johns Hopkins University.

## **Faculty R-S**

**Rabil, Robert;** Professor of Political Science; Ph.D., Brandeis University.

**Rackman, Sasha;** Assistant Professor of Geriatric Medicine; M.D., Sackler School of Medicine, Tel Aviv University.

**Radulovic, Ai Beng Serene;** Senior Instructor of Mathematics and Statistics; M.S., University of Connecticut.

**Radulovic, Dragan;** Professor of Mathematics and Statistics; Ph.D., University of Connecticut.

**Rakestraw, Joseph;** Assistant Professor of Accounting; Ph.D., Virginia Polytechnic Institute and State University.

**Ramasamy, Rangasamy;** Professor of Special Education; Ph.D., University of Arizona.

**Ramirez, Andres A.;** Associate Professor of Curriculum and Instruction; Ed.D., University of Massachusetts, Amherst.

**Raviv, Daniel;** Professor of Electrical Engineering; Ph.D., Case Western Reserve University.

**Read, Donna;** Associate Professor of Curriculum and Instruction; Ph.D., Michigan State University.

**Rebar, Lauri;** Associate University Librarian; M.L.S., University of South Florida.

**Reddy, D.V.;** Professor of Civil Engineering; Ph.D., University of Liverpool; P.E.

**Redman, Frederick;** Senior Instructor of English; M.A., Florida Atlantic University.

**Reilly, Anne;** Visiting Instructor of Biology; Ph.D., University of Georgia.

**Reilly, Susan S.;** Professor of Communication and Multimedia Studies; Ph.D., Pennsylvania State

University.

**Rendon, Ramona;** Senior Instructor of Spanish; M.A., Florida Atlantic University.

**Renne, John;** Associate Professor of Urban and Regional Planning and Director of the Center for Urban and Environmental Solutions; Ph.D., Rutgers University.

**Ress, Sunghae;** Assistant University Librarian; M.A., University of South Florida.

**Retrouvey, Michele;** Assistant Professor of Pediatric Radiology, Pathophysiology and Therapeutics Course Director, and Director of Radiology Education; M.D., Eastern Virginia Medical School.

**Reyes-Guerra, Daniel;** Associate Professor of Educational Leadership and Research Methodology; Ph.D., Florida Atlantic University.

**Rezler, Evonne M.;** Associate Dean for Student Services, Director of Program Assessment and Associate Scientist for Chemistry and Biochemistry; Ph.D., University of Sydney.

**Rinne, Craig;** Senior Instructor of Graduate Business Communications Programs; Ph.D., University of Florida.

**Rhodd, Rupert G.;** Associate Dean of the College of Business and Associate Professor of Economics; Ph.D.; Fordham University.

**Rhodes, William;** Professor of Electrical Engineering; Ph.D., Stanford University.

**Rhone, Angela;** Professor of Curriculum and Instruction; Ed.D., University of North Carolina.

**Rhorer, Marc A.;** Assistant Dean for Academic Affairs and Instructor for the College of Business; Ph.D., Florida Atlantic University.

**Ricci, Peter;** Director and Clinical Associate Professor of Hospitality and Tourism Management; Ed.D., University of Central Florida.

**Richardson, Renee;** Instructor of Accounting; M.A., Florida Atlantic University.

**Richardson, Susan;** Affiliate Research Assistant and Professor of Biology; Ph.D., Yale University.

**Richey, Brenda;** Associate Professor of International Business; Ph.D., Ohio State University.

**Ridener, Barbara R.;** Associate Professor of Curriculum and Instruction; Ph.D., University of Georgia.

**Rivera, Ashley;** Assistant Professor of Nursing; Ph.D., Florida Atlantic University.

**Robe, Chris;** Associate Professor of Communication and Multimedia Studies; Ph.D., Lehigh University.

**Robinson, Philip;** Associate Professor of Clinical Biomedical Science; M.D., University of Miami.

**Robishaw, Janet D.;** Chair of the Biomedical Science Department, Senior Associate Dean for Research and Professor of Biomedical Science; Ph.D., Pennsylvania State University.

**Roche, Stéphane P.;** Assistant Professor of Chemistry and Biochemistry; Ph.D., Université Blaise Pascal, France.

**Rodgers, Tyler;** Assistant Professor of Architecture; M.Arch., Harvard University.

**Rodrigues, Claudia de Oliveira;** Associate Professor of Biomedical Science; Ph.D., Federal

University of Rio de Janeiro.

**Romance, Nancy R.;** Professor of Curriculum and Instruction; Ed.D., Florida Atlantic University.

**Rooney, Scarlett;** Senior Instructor of English; M.F.A., Florida Atlantic University.

**Root, Ann;** Senior Instructor of Marketing; Ph.D., University of Michigan.

**Roper, Steven D.;** Professor of Political Science; Ph.D. University of Missouri-Columbus.

**Rose, Gavin E.;** Assistant Professor of Psychiatry and Psychiatry Residency Program Director; M.D., University of Maryland, Baltimore.

**Rose, Mark H.;** Professor of History; Ph.D., Ohio State University.

**Rosen, Zvi;** Assistant Professor of Mathematics and Statistics; Ph.D., University of California, Berkeley.

**Rosselli, Monica;** Associate Chair and Professor of Psychology; Ph.D., National Autonomous University of Mexico.

**Rosson, Barry T.;** Professor of Civil Engineering; Ph.D., Auburn University.

**Rossow, David;** Senior Instructor of Music; M.A., Florida Atlantic University.

**Rossow, Stacie;** Assistant Professor; M.A., Florida Atlantic University.

**Roth, Zvi;** Professor of Electrical Engineering and Interim Co-Director of the Florida/Israel Institute; Ph.D., Case Western Reserve University; P.E.

**Rothe, Dawn;** Professor of Criminology and Criminal Justice; Ph.D., Western Michigan University.

**Rubin, Robin;** Instructor of Social Work; M.S.W., Florida Atlantic University.

**Rubin, Sigal;** Instructor of Criminology and Criminal Justice and Undergraduate Coordinator; M.S., Florida Atlantic University.

**Rubin, Stacy;** Assistant Professor of Medicine and Foundations of Medicine Course Director; M.D., University of Miami Miller School of Medicine.

**Rueda Quintana;** Mario; FAU Site Co-Director of St. Mary's Medical Center; M.D., University of Miami.

**Ruest, Annina;** Assistant Professor of Art; M.F.A., University of California, San Diego.

**Ruiz, Amalia;** Instructor of Spanish; M.A., Florida Atlantic University.

**Ruthenberg, Myriam;** Professor of Italian and Comparative Literature; Ph.D., New York University.

**Ryan Ellen;** Associate Professor of Social Work; Ph.D., Southern Illinois University.

**Rynkiewich, Katharina;** Assistant Professor of Anthropology; Ph.D., Washington University in St. Louis.

**Sacco, Lea;** Assistant Professor of Population Health and Social Medicine; Ph.D., University of Texas, Health Science Center.

**Sacks, Emily;** Senior Instructor of Graduate Business Communications Programs; Ph.D.; Florida

Atlantic University.

**Sagher, Yoram**; Professor of Mathematics and Statistics; Ph.D., University of Chicago.

**Saginer, Jesse**; Associate Professor of Urban and Regional Planning; Ph.D., Cleveland State University.

**Salinas, Cristobal**; Assistant Professor of Educational Leadership and Research Methodology; Ph.D., Iowa State University.

**Salisbury, Lauren**; Instructor of English; M.A., Florida Atlantic University.

**Salivar, Gary C.**; Assistant Dean and Professor of Mechanical Engineering; Ph.D., University of Missouri; P.E.

**Salmon, Michael**; Research Professor of Biological Sciences; Ph.D., University of Maryland.

**Sánchez-Samper, Alejandro**; Associate Professor of Music; M.M., University of Miami.

**Sandell, John**; Associate Professor of Architecture; M.Arch., Cranbrook Academy of Art.

**Santaniello, Neil**; Senior Instructor of Communication and Multimedia Studies; M.S.J., Northwestern University.

**Sapat, Alka K.**; Director and Professor of Public Administration; Ph.D., The State University of New York, Stony Brook.

**Sarhang Zadeh, Olfat**; Instructor of Civil, Environmental and Geomatics Engineering; M.E.Sc., Western University, Canada.

**Sawant, Rajeev**; Assistant Professor of Management Programs; Ph.D., Tufts University.

**Scarlatos, Panagiotis D.**; Professor of Civil Engineering and Director of the Center for Intermodal Transportation Safety and Security; Ph.D., Aristotle University of Thessaloniki; P.E.

**Scheide, Daniel**; Associate University Librarian; M.S.L.I.S., University of Illinois, Urbana-Champaign.

**Schiff, Mara**; Associate Professor of Criminology and Criminal Justice; Ph.D., New York University.

**Schindlbeck, Mary**; Senior Instructor of Information Technology and Operations Management; Ph.D., Florida Atlantic University.

**Schmidmeier, Markus**; Professor of Mathematics and Statistics; Ph.D., University of Munich.

**Schmidt-Kastner, Rainald**; Associate Professor of Clinical Neuroscience; M.D., University of Düsseldorf, Germany.

**Schock, Steven G.**; Professor of Ocean Engineering; Ph.D., University of Rhode Island; P.E.

**Schonebek, Tomas P.**; Professor of Mathematics and Statistics; Ph.D., Massachusetts Institute of Technology.

**Schoorman, Dilys**; Professor of Curriculum and Instruction; Ph.D., Purdue University.

**Schwartz, Harry**; Instructor of Management Programs; M.P.A., University of Quebec-National School of Public Administration.

**Schwartz, Jason**; Professor of English; Ph.D. Lehigh University.

**Schwartz, Michelle**; Assistant Professor of Integrated Medical Science; M.D., University of Vermont.

**Schwerin, Edward W.**; Professor of Political Science; Ph.D., University of Hawaii.

**Schyndel, Malka**; Associate Librarian; M.S.L.S., Wayne State University.

**Sclafani, Melissa**; Assistant Professor of Visual Arts and Art History; M.F.A., University of Colorado, Boulder.

**Scodari, Christine**; Professor of Communication and Multimedia Studies; Ph.D., Ohio State University.

**Scott, Jermaine**; Assistant Professor of History; Ph.D., Northwestern University.

**Scott, John (Jack)**; Associate Professor of Special Education; Ph.D., University of Florida.

**Searcy, Deborah**; Senior Instructor of Management Programs; Ph.D., University of Maryland.

**Seavey, Scott**; Assistant Professor of Accounting; Ph.D., University of Missouri, Columbia.

**Seeley, Lotus**; Assistant Professor of Sociology; Ph.D., University of Michigan.

**Sembiante, Sabrina**; Associate Professor of Curriculum and Instruction; Ph.D., University of Miami.

**Sementelli, Arthur**; Associate Professor of Public Administration; Ph.D., Cleveland State University.

**Sempertegui, Tito**; Instructor of Chemistry and Biochemistry; Ph.D., Florida Atlantic University.

**Serra, Ilaria**; Associate Professor of Italian and Comparative Literature; Ph.D., Florida Atlantic University.

**Severson, David I.**; Visiting Assistant Professor of Educational Leadership; Ed.D., Harvard University.

**Shaktini, Namascar**; Associate Professor of French and Comparative Literature; Ph.D., University of California, Santa Cruz.

**Shamburger, Dawn**; Assistant Professor of Theatre and Dance; M.F.A., University of North Carolina, Greensboro.

**Shankar, Ravi**; Professor of Computer Science and Engineering; Ph.D., University of Wisconsin, Madison; P.E.

**Shannon, Kelly**; Associate Professor of History; Ph.D., Temple University.

**Sharma, Ashok**; Psychiatry Residency Program, Site Director; M.D., St. George's University School of Medicine.

**Sharma, Bharti**; Instructor of Information Technology and Operations Management; Ph.D., Florida Atlantic University.

**Sharples, Jason**; Assistant Professor of History; Ph.D., Princeton University.

**Shaw, Hope**; Assistant Professor of Nursing; Ph.D., Barry University.

**Shaykhutdinov, Renat**; Associate Professor of Political Science; Ph.D., Texas A&M University.

**Shen, Wen**; Associate Professor of Biomedical Science; Ph.D., The State University of New York.

**Shepherd, Deborah W.**; Associate Dean for the Office for Academic and Student Services and Instructor for the College of Education; Ed.D. Nova Southeastern University.

**Sheremata, Summer;** Assistant Professor of Psychology; Ph.D., Boston University.

**Sherman, Diane;** Professor of Social Work, Ph.D., University of Texas, Austin.

**Shih, Richard Dee;** Professor of Emergency Medicine; M.D., Thomas Jefferson University.

**Shockley, Kristin;** Instructor of Political Science; M.A., Florida Atlantic University.

**Shockley, Robert E.;** Chair and Professor of Educational Leadership and Research Methodology; Ph.D., Pennsylvania State University.

**Shorrock, Thomas;** Chair and Associate Professor of Theatre and Dance; M.A., University of Louisville.

**Shusterman, Richard M.;** Dorothy F. Schmidt Eminent Scholar in Humanities and Professor of Philosophy; Ph.D., Oxford University.

**Sica, Francesco;** Assistant Professor of Mathematics and Statistics; Ph.D., McGill University.

**Sider, Darby;** Associate Clerkship Director for Internal Medicine; M.D., University of Virginia School of Medicine.

**Siegel, Leslie;** Assistant Librarian, M.A., University of South Florida.

**Siegel, Philip H.;** Visiting Instructor of Accounting; Ph.D., University of Memphis.

**Sigler, Bryan;** Instructor of Health Administration; M.B.A., Louisiana Tech University.

**Silverman, Stephen;** Dean of the College of Education and Professor of Education; Ed.D., University of Massachusetts, Amherst.

**Sim, Gerald;** Associate Professor of Communication and Multimedia Studies; Ph.D., University of Iowa.

**Sindaco, Beth;** Instructor of Graduate Business Communications Programs; J.D., Widner University School of Law.

**Sirounis, Michelle;** University School Instructor; B.S., Florida Atlantic University.

**Siwak, Ann;** University Instructor, A.D. Henderson School; B.A., University of Maryland.

**Skinner-Osei, Precious;** Instructor of Social Work; Ph.D., Barry University.

**Sloas, Lincoln;** Assistant Professor of Criminology and Criminal Justice; Ph.D., George Mason University.

**Smatrakalev, Georgi;** Instructor of Accounting; Ph.D., Institute of Economics at the Bulgarian Academy of Sciences.

**Smith, Adam James;** Assistant Professor of Communication and Multimedia Studies; M.F.A., Stanford University.

**Smith, Dawn M.;** Associate Librarian and Assistant Dean for Public Services; M.A., University of South Florida.

**Smith, Eugene;** Professor of Chemistry; Ph.D., University of Wisconsin, Milwaukee.

**Smith, Hank;** Affiliate Research Assistant Professor of Biology; M.A., Hofstra University.

**Smith, Steven;** Instructor of Management Programs; Ph.D., Rutgers University.

- Snyder, Patricia A.;** Professor of Chemistry; Ph.D., University of California, San Diego.
- Snyder, Sarah;** Visiting Instructor of Nursing; Ph.D., University of Miami.
- Sobhan, Khaled;** Professor of Civil Engineering; Ph.D., Northwestern University; E.I.T.
- Solano, Joshua;** Associate Professor of Emergency Medicine and Director of Quality Improvement and Patient Safety; M.D., University of Florida.
- Song, Feijun (Henry);** Assistant Professor of Ocean Engineering; Ph.D., Florida Atlantic University.
- Sorgente, Tami;** Instructor of Computer Science and Engineering; M.S., Florida Atlantic University.
- Soroko, Kristen April;** Assistant Professor of Theatre and Dance; M.F.A., Yale University.
- Soroko, Lee;** Assistant Professor of Theatre and Dance; M.F.A., University of Texas.
- Spadola, Christine;** Assistant Professor of Social Work; Ph.D., Florida International University.
- Stackman, Robert W., Jr.;** Associate Vice President for Academic Affairs, John D. MacArthur Campus, Dean of the Graduate College, and Professor of Psychology; Ph.D., Rutgers University.
- Stadnik, Maria;** Senior Instructor of Mathematics and Statistics; Ph.D., Northwestern University.
- Starling, Elizabeth;** Instructor of Physics; Ph.D., Université Libre de Bruxelles, Belgium.
- Stawikowski, Maceij;** Assistant Scientist of Chemistry and Biochemistry; Ph.D., University of Gdansk, Poland.
- Steigenga, Timothy;** Professor of Political Science; Ph.D., University of North Carolina, Chapel Hill.
- Stevanovic, Aleksandar;** Assistant Professor of Civil Engineering; Ph.D., University of Utah.
- Stewart, Adele;** Postdoctoral Fellow, Biomedical Science; Ph.D., University of Iowa.
- Stockard, Emily;** Associate Professor of English and Associate Department Chair; Ph.D., University of North Carolina.
- Stollar, Thomas;** Assistant Professor of Visual Arts and Art History; Ph.D., University of Sunderland, England.
- Strain, Christopher;** Associate Professor of History and American Studies; Ph.D., University of California, Berkeley.
- Stricoff, Ronald L.;** FAU Site Director of West Boca Medical Center; M.D., University of Xochicalco.
- Strudwick, Jane;** Associate University Librarian; M.L.S., University of South Florida.
- Sturrock, Suzanne;** University School Instructor; B.S., Florida State University.
- Su, Tsung-Chow J.;** Professor of Mechanical Engineering; Eng.Sc.D., Columbia University; P.E.
- Sudarkasa, Niara;** Distinguished Visiting Scholar; Ph.D., Columbia University.
- Sugnet, Linda;** Core Teaching Instructor of Curriculum and Instruction; M.Ed., Elmira College.
- Sule, Sachin;** Associate Professor of Integrated Medical Science; M.D., University of Bombay.
- Suriaga, Armiel;** Assistant Professor of Nursing; Ph.D., Florida Atlantic University.
- Suttenberg, Laurie;** Instructor of Social Work; D.S.W., Rutgers University.
- Sutter, Kari;** Assistant Professor of Integrated Medical Science; M.D., University of Miami.
- Sweet, Jonathan;** Senior Instructor of Information Technology and Operations Management; Ph.D.,

Florida Atlantic University.

## Faculty T-V

**Talbert, Melvin;** Core Teaching Instructor of Curriculum and Instruction; Ed.D., Florida Atlantic University.

**Tang, Yufei;** Assistant Professor, Computer & Electrical Engineering and Computer Science, and I-SENSE Fellow; Ph.D., University of Rhode Island.

**Tao, Rui;** Associate Professor of Biomedical Science; Ph.D., Rutgers University.

**Taylor, John;** Instructor of Accounting; J.D., University of Miami.

**Taylor, Taryne Jade;** Assistant Professor of English; Ph.d., University of Iowa.

**Teegavarapu, Ramesh;** Assistant Professor of Civil Engineering; Ph.D., University of Manitoba; P.E., P.Eng.

**Telkes, Ilknur;** Assistant Professor, Biomedical Science; Ph.D., University of Houston.

**Terentis, Andrew C.;** Assistant Professor of Chemistry; Ph.D., University of Sydney.

**Terjesen, Siri;** Professor and Associate Dean for Research and External Relations at FAU Business; Ph.D., Cranfield University, U.K.

**Thams, Yannik;** Associate Professor of Management Programs; Ph.D., Florida International University.

**Theisen, Tim C.;** Instructor of Biological Sciences; Ph.D., Florida Atlantic University.

**Thevenot, Maya;** Associate Professor of Accounting; Ph.D., Pennsylvania State University.

**Thompson, Heather;** Interim Chair and Assistant Professor of Social Work; B.S.W. Program Coordinator; Ph.D., Florida State University.

**Thornhill, Daniel;** Assistant Professor of Spanish Second Language Acquisition; Ph.D., University of Illinois, Urbana-Champaign.

**Thur, Victoria;** Assistant University Librarian; M.L.S., University of South Florida.

**Tichy, Wolfgang;** Assistant Professor of Physics; Ph.D., Cornell University.

**Tille-Victorica, Nancy;** Instructor of French and Spanish; Ph.D., University of Texas, Austin.

**Toll, Lawrence;** Professor of Biomedical Science; Ph.D., University of California, Los Angeles.

**Torres, Ayse;** Assistant Professor of Counselor Education; Ph.D., Florida Atlantic University.

**Toledo, Christine;** Assistant Professor of Nursing; Ph.D., University of Miami.

**Towell, Janet;** Professor of Curriculum and Instruction; Ed.D., University of Maryland.

**Tran, Hoang Vu;** Assistant Professor of Curriculum and Instruction; Ph.D., University of California, Berkeley.

**Trapani, William;** Associate Professor of Communication and Multimedia Studies; Ph.D., University

of Iowa.

**Trevino, Len**; Professor of Management Programs and Program Director of International Business; Ph.D., Indiana University.

**Trewick, Lillith**; Senior Instructor of English; M.A., Florida Atlantic University.

**Trotter, Dorothea**; Instructor of English; Ph.D., Freie Universitat Berlin.

**Trotter, Evelyn**; Senior Instructor of Languages, Linguistics, and Comparative Literature; Ph.D., University of California, Los Angeles.

**Tsai, Chi-Tay**; Professor of Mechanical Engineering; Ph.D., University of Kentucky.

**Tuncer, Necibe**; Professor of Mathematics and Statistics; Ph.D., Auburn University.

**Tunick, Mark**; Professor of Political Science; Ph.D., University of California, Berkeley.

**Turcotte, Margaret M.**; Director and Professor, Office of Executive Education; Ph.D., University of Connecticut.

**Ulin, Julieann**; Associate Professor of English and Director of Undergraduate Studies; Ph.D., University of Notre Dame.

**Ungvichian, Vichate**; Professor of Electrical Engineering; Ph.D., Ohio University; P.E.

**Urquhart, William T.**; Instructor of Accounting; Masters of Professional Accounting, University of Texas, Austin; C.P.A.

**Vado, Karina**; Assistant Professor of English; Ph.D., University of Florida.

**Vallacher, Robin R.**; Interim Chair and Professor of Psychology; Ph.D., Michigan State University.

**Vance Noelk, Debra**; University School Instructor; M.A.E.D., Florida Atlantic University.

**Van der Put, Elaine**; Senior Associate Dean for Administration and Assistant Professor of Biomedical Science; Ph.D., University of Miami.

**Van Dyke, Teresa B.**; Assistant Librarian; M.A., University of South Florida.

**Van Praag, Henriette**; Associate Professor of Biomedical Science; Ph.D., Tel-Aviv University.

**Van Tassel, Eric**; Associate Professor of Economics; Ph.D., University of California, Riverside.

**VanWormer, Karen**; Instructor of Management Programs; M.S., Ohio State University.

**VanZwieten, James**; Assistant Research Professor of Civil, Environmental and Geomatics Engineering; Ph.D., Florida Atlantic University.

**Varela Castro, Maria del Carmen**; Assistant Professor of Psychology; Ph.D., University of Chicago.

**Vasquez, Maria**; Assistant Professor of Educational Leadership and Research Methodology; Ph.D., University of Louisville.

**Vassiliev, Yevgeniy**; Assistant Professor of Mathematics and Statistics; Ph.D., University of Notre Dame.

**Vaughan, Michelle**; Associate Professor of Curriculum and Instruction; Ed.D., Florida Atlantic University.

**Vázquez, Miguel**; Associate Professor of Hispanic Literature; Ph.D., Indiana University.

**Velasquez, Joseph**; Associate Professor of Visual Arts and Art History; M.F.A., University of Wisconsin, Madison.

**Verma, Siddhartha**; Assistant Professor of Ocean and Mechanical Engineering; Ph.D., California Institute of Technology.

**Vermisso, Emmanouil**; Associate Professor of Architecture; M.Arch., Syracuse University.

**Vernon, Laura**; Professor of Psychology; Ph.D., University of Illinois, Urbana-Champaign.

**Vertes, Robert**; Professor of Psychology and Complex Systems and Brain Sciences; Ph.D., The New School University, New York.

**Villares, Elizabeth**; Professor of Counselor Education; Ph.D., University of Florida.

**Von Ellenrieder, Karl D.**; Associate Professor of Ocean Engineering; Ph.D., Stanford University.

**Von Spalding, Ruth**; Instructor of Communication and Multimedia Studies; M.F.A., California Institute of the Arts.

**Voss, Richard**; Professor of Mathematics and Statistics; Ph.D., University of California, Berkeley.

## **Faculty W-Z**

**Wagner, Kevin**; Chair and Professor of Political Science; Ph.D., University of Florida.

**Wainberg, James S.**; Associate Professor of Accounting, Ph.D., University of Massachusetts, Amherst.

**Walsh, Mary**; Instructor of Accounting; J.D., Boston University; C.P.A.

**Wang, Xin**; Associate Professor of Electrical Engineering; Ph.D., Auburn University.

**Wang, Yingcai**; Research Assistant Professor of Biomedical Science and Director of iPSC Shared Facility; M.D., Ph.D., Qingdao University.

**Wang, Yuan**; Chair and Professor of Mathematics and Statistics; Ph.D., Rutgers University.

**Ward, J. B.**; Instructor of Hospitality and Tourism Management; Ph.D., Texas Tech University.

**Ward, Julie**; Assistant Professor of Visual Arts and Art History; Ph.D., Ohio State University.

**Warburton, David L.**; Associate Professor of Geology; Ph.D., University of Chicago.

**Warshaw, Jarrett**; Associate Professor of Educational Leadership and Research Methodology; Ph.D., University of Georgia.

**Waterman, Daniel**; Research Professor of Mathematics and Statistics; Ph.D., University of Chicago.

**Watlington, Eliah**; Associate Executive Director for the Osher Lifelong Learning Institute, Jupiter,

and Professor of Educational Leadership; Ed.D., University of Virginia.

**Wayth, Laura;** Assistant Professor of Acting; M.F.A., Harvard University.

**Wedding, Cynthia;** Instructor of English.

**Wei, Jianning;** Associate Professor of Biomedical Science; Ph.D., University of Kansas.

**Weibo, Liu;** Associate Professor of Geosciences; Ph.D., University of Kansas.

**Weinberg, Eyal;** Assistant Professor of History; Ph.D., University of Texas, Austin.

**Weiner, Suzanne;** Assistant Professor of Medicine; M.D., Albert Einstein College of Medicine.

**Weiss, Debra R.;** Assistant Professor of Integrated Medical Science; D.O., Philadelphia College of Osteopathic Medicine.

**West, Lyndon;** Associate Professor of Chemistry and Biochemistry; Ph.D., Victoria University, New Zealand.

**Wetherell, Geoffrey;** Assistant Professor of Psychology; Ph.D., DePaul University.

**Wetterer, James;** Professor of Biological Sciences; Ph.D., University of Washington.

**White, Dustin;** Assistant Professor of Architecture; M.Arch., Clemson University.

**White, James;** Instructor of English; M.F.A., Florida Atlantic University.

**White, Justin;** Associate Professor of Spanish Linguistics and Director of the Spanish Basic Language Program; Ph.D., Florida State University.

**Whitehair, Curtis;** Interim Dean of the College of Medicine, Senior Associate Dean for Graduate Medical Education, Associate Professor of Physical Medicine and Rehabilitation; M.D., Ross University.

**Whitehurst, Michael;** Professor of Exercise Science and Health Promotion; Ed.D., University of Georgia.

**Whiteman, Alan;** Associate Program Director and Instructor of Health Administration; Ph.D., Walden University.

**Widder, Edith A.;** Adjunct Professor of Marine Biology; Ph.D., University of California.

**Widener, Patricia;** Associate Professor of Sociology; Ph.D., Brown University.

**Wiese, Lisa;** Associate Professor of Nursing; Ph.D., Florida Atlantic University.

**Wiggill, Sarah;** Assistant Professor of Family Medicine, Community and Preventive (CPM) Clerkship Director and Director of Community Preceptorships; M.D., University of South Florida, Morsani College of Medicine.

**Wilcox, Teresa;** Professor of Psychology; Ph.D., University of Arizona.

**Wille, Luc T.;** Chair and Professor of Physics; Ph.D., University of Ghent.

**Willems, Patricia;** Associate Professor of Curriculum and Instruction; Ed.D., University of Florida.

**Williams, Dale;** Interim Chair and Professor of Communication Sciences and Disorders; Ph.D., Southern Illinois University.

**Williams, David;** Associate Professor of Communication and Multimedia Studies; Ph.D., University of

Kansas.

**Williams, Ethlyn;** Chair and Professor of Management Programs; Ph.D., University of Miami.

**Williamson, Elizabeth;** Assistant Professor, Physical Therapy; Ph.D., Wake Forest University.

**Willis, Linsey;** Instructor of Management Programs; D.P.A., Nova Southeastern University.

**Wilson, Jeffrey;** Assistant Professor of Medicine, Academic Hospitalist; M.D., Florida Atlantic University, College of Medicine.

**Wilson, Margaret;** University School Instructor; B.A., Florida Atlantic University.

**Wilson, Thomas C.;** Professor of Sociology; Ph.D., University of Colorado.

**Wilt, Kevin;** Chair and Associate Professor of Music and Composer in Residence; D.M.A., Michigan State University.

**Wilson, Candy;** Associate Professor of Nursing; Ph.D., University of Colorado.

**Winkowska-Nowak, Katarzyna;** Senior Instructor of Mathematics and Statistics; Ph.D., Florida Atlantic University.

**Winn, Laura;** Instructor of Communication and Multimedia Studies; Ph.D., University of Georgia, Athens.

**Wisdom-Chambers; Karen;** Assistant Professor of Nursing; D.N.P., Florida Atlantic University.

**Wojcikiewicz, Ewa;** Associate Professor of Biomedical Science and Co-Director, Lifelong Learning and Discovery Thread; Ph.D., University of Miami.

**Wolgin, David L.;** Professor of Psychology; Ph.D., Rutgers University.

**Wood, Sarah;** Interim Chair of the Women's and Children's Health Department, Vice Dean for Medical Education and Professor of Pediatrics; M.D., Harvard University.

**Woodworth, Joy;** Instructor of Computer Science and Engineering; M.S., Florida Atlantic University.

**Wu, Jang-Yen;** Professor of Biomedical Science; Ph.D., University of California, San Francisco.

**Wurthmann, Kurt;** Assistant Professor of Management Programs; Ph.D., Columbia University.

**Wyatt, Adam;** Associate Professor of Integrated Medical Science and Director of Evaluation and Assessment; Ph.D., University of Georgia.

**Wyneken, Jeanette;** Associate Professor of Biology; University of Illinois.

**Xie, Zhixiao;** Professor of Geography; Ph.D., The State University of New York, Buffalo.

**Yang, Charles;** Professor of Insurance; Ph.D., University of Texas, Austin.

**Yang, KwangSoo;** Assistant Professor, Computer & Electrical Engineering and Computer Science; Ph.D., University of Minnesota.

**Yuan, Hong;** Chair and Professor of Marketing; Ph.D., University of Michigan.

**Yi, Peng;** Assistant Professor of Civil, Environmental and Geomatics Engineering; Ph.D., Johns Hopkins University.

**Yildirim, Ilyas;** Assistant Professor of Chemistry and Biochemistry; Ph.D., University of Rochester.

**Yin, Zhijun;** Instructor of Mathematics and Statistics; Ph.D., University of Cincinnati.

**Yong, Yan;** Professor of Civil Engineering; Ph.D., University of Illinois.

**Yoo, Chul;** Associate Professor of Information Technology and Operations Management; Ph.D., University of Buffalo.

**Young II, George R.;** Director and Associate Professor of Accounting; Ph.D., University of Texas, Arlington; C.P.A.

**Young, Sherry L.;** Senior Instructor; M.B.A., Florida Atlantic University; C.P.A.

**Yousif, Shermeen;** Assistant Professor of Architecture; Ph.D., Texas A&M University.

**Yu, Yi-Kuo;** Assistant Professor of Physics; Ph.D., Columbia University.

**Yudin, Mary;** Visiting Assistant Professor of Spanish; Ph.D., Pennsylvania State University.

**Yuhn, Ky-hyang;** Associate Professor of Economics; Ph.D., Northern Illinois University.

**Zager, Michael;** Dorothy F. Schmidt Eminent Scholar in the Performing Arts and Professor of Music; Diploma in Music Composition, Mannes College of Music.

**Zahra, Touqir;** Assistant Professor of Integrated Medical Science; M.D., University of Punjab.

**Zainuddin, Hanizah;** Associate Professor of Curriculum and Instruction; Ph.D., Indiana University, Bloomington.

**Zhang, Caiyun;** Professor of Geosciences; Ph.D., University of Texas, Dallas.

**Zhang, Qi;** Research Assistant Professor of Biomedical Science; Ph.D., University of Pennsylvania.

**Zhang, Xiao-Dong;** Associate Professor of Mathematics and Statistics; Ph.D., California Institute of Technology.

**Zhang, Xiaolang;** Assistant Professor of Geosciences; Ph.D., University of Hong Kong and Southern University of Science and Technology.

**Zhang, Xing-Hai;** Associate Professor of Biology; Ph.D., University of Calgary, Canada.

**Zhang, Ye;** Associate Professor of Hospitality and Tourism Management; Ph.D., Indiana University.

**Zhu, Xingquan;** Assistant Professor of Computer Science and Engineering; Ph.D., Fudan University.

**Zhu, Yijie;** Assistant Professor of Geosciences; Ph.D., University of South Florida.

**Zhuang, Hanqi;** Chair of Electrical Engineering and Computer Science and Professor of Electrical Engineering; Ph.D., Florida Atlantic University.

**Zilouchian, Ali;** Associate Dean for Academic Affairs in the College of Engineering and Computer Science and Professor of Electrical Engineering; Ph.D., George Washington University.

**Zoeller, Robert F., Jr.;** Professor of Exercise Science and Health Promotion; Ph.D., University of

Pittsburgh.

**Zourdos, Michael;** Chair and Professor of Exercise Science and Health Promotion; Ph.D., Florida State University.

**Zvolensky, Julianne;** Instructor of English; M.A., Florida Atlantic University.

## **Faculty Emeritus**

**Abbott, Jarold G.;** Professor Emeritus in Management; Ph.D., Massachusetts Institute of Technology.

**Archibald, Cynthia M.;** Professor Emeritus in Nursing; Ph.D., Barry University.

**Ashworth, Sara;** Professor Emeritus in Teacher Education; Ed.D., Temple University.

**Baker, Earl W.;** Professor Emeritus in Chemistry; Ph.D., Johns Hopkins University.

**Banter, John C.;** Professor Emeritus in Chemistry; Ph.D., Western Reserve University.

**Barry, Charlotte;** Professor Emeritus in Nursing; Ph.D., University of Miami.

**Berry, Leonard;** Professor Emeritus in Geography; Ph.D., University of Bristol.

**Bieber, Theodore I.;** Professor Emeritus in Chemistry; Ph.D., New York University.

**Blum, Cynthia;** Professor Emeritus in Nursing; Ph.D., Florida Atlantic University.

**Bopp, William;** Professor Emeritus in Criminology and Criminal Justice; Ed.D., Florida Atlantic University.

**Boykin, Anne;** Professor Emeritus in Nursing; Ph.D., Vanderbilt University.

**Brigman, Greg A.;** Professor Emeritus in Counselor Education; Ph.D., Georgia State University.

**Bristol, Valerie J.;** Professor Emeritus in Curriculum and Instruction; Ph.D., Ball State University.

**Brown, Robert G.;** Professor Emeritus in Teacher Education; Ed.D., University of Florida.

**Brown, Susan Love;** Professor Emeritus in Anthropology; Ph.D., University of California, San Diego.

**Bruenn, Stephen W.;** Professor Emeritus in Physics; Ph.D., Columbia University.

**Budd, Mike;** Professor Emeritus; Ph.D., University of Iowa.

**Bulfin, Susan;** Professor Emeritus in Nursing; D.N.P., Augusta University.

**Burganger, Judith;** Professor Emeritus in Music; M.M., Staatliche Hochschule fur Music und Darstellende Kunst Stuttgart.

**Burnett, Clyde R.;** Professor Emeritus in Physics; Ph.D., University of Wisconsin.

**Carraher, Charles E.;** Professor Emeritus in Chemistry; Ph.D., University of Missouri.

**Case, Robert O.;** Professor Emeritus in Mechanical Engineering; Ph.D., University of Alabama.

**Ceros-Livingston, Patsy A.;** Professor Emeritus in Instructional Technology and Research; Ph.D., Florida State University.

**Cervený, Robert P.;** Professor Emeritus in Information Technology and Operations Management; Ph.D., University of Texas, Austin.

**Childrey, John**; Professor Emeritus in English; Ed.D., University of Virginia.

**Clare, Donald A.**; Professor Emeritus in Public Administration; Ph.D., University of Oregon.

**Courtenay, Walter R., Jr.**; Professor Emeritus in Zoology; Ph.D., University of Miami.

**Crabb, Eugene**; Professor Emeritus in Music; D.M.A., University of Southern California.

**Crawley, Sharon**; Professor Emeritus in Curriculum and Instruction; Ed.D., University of Houston.

**Cruz-Janzen, Marta**; Professor Emeritus in Teaching and Learning; Ph.D., University of Denver.

**Davidson, James Blaine**; Professor Emeritus in Ocean Engineering; M.S., University of California, Los Angeles.

**Decker, Larry E.**; Eminent Scholar and Professor Emeritus in Educational Leadership; Ph.D., Michigan State University.

**Delaney, Walter**; Associate Professor Emeritus in Art; M.F.A., University of Michigan.

**Derfler, Leslie**; Professor Emeritus in History; Ph.D., Columbia University.

**Diaz, Carlos**; Professor Emeritus in Curriculum, Culture, and Educational Inquiry; Ed.D., Florida Atlantic University.

**Dobkin, Sheldon**; Professor Emeritus in Biology; Ph.D., University of Miami.

**Dorst, Claire**; Professor Emeritus in Painting; M.F.A., University of Wisconsin, Madison.

**Dow, Tsung**; Professor Emeritus in History; Ph.D., National Cheng Chih University.

**Dunphy, Lynne**; Professor Emeritus in Nursing ; Ph.D., University of Miami.

**Early, John**; Professor Emeritus in Anthropology; Ph.D., Harvard University.

**Faulkner, John S.**; Professor Emeritus in Physics; Ph.D., Ohio State University.

**Federico, Marilyn C.**; Associate Professor Emeritus in Educational Leadership; Ed.D., Florida Atlantic University.

**Finkl, Charles**; Professor Emeritus in Geosciences; Ph.D., University of Western Australia.

**France, Nancey**; Professor Emeritus in Nursing; Ph.D., University of Colorado.

**Fraschetti, Peter A.**; Professor Emeritus in Teacher Education; M.S., Florida State University.

**Frazer, Heather**; Professor Emeritus in History; Ph.D., Duke University.

**Fritzer, Penelope**; Professor Emeritus in Teaching and Learning; Ph.D., University of Miami.

**Gaonkar, Gopal H.**; Professor Emeritus in Mechanical Engineering; Ph.D., Washington University.

**Gatlin, Douglas**; Professor Emeritus in Political Science; Ph.D., University of North Carolina.

**Gazourian, Martin G.**; Professor Emeritus in Electrical Engineering; Ph.D., Cornell University.

**Glazer, Stuart**; Professor Emeritus in Music; D.M.A., Texas Tech University.

**Golden, Peggy**; Professor of Management Programs; Ph.D., University of Kentucky.

**Gould, Carol**; Professor Emeritus in Philosophy; Ph.D., The State University of New York, Buffalo.

**Greenfield, Wilma L.**; Professor Emeritus in Social Work; Ph.D., University of California.

**Guglielmino, Lucy M.**; Professor Emeritus in Educational Leadership; Ed.D., University of Georgia.

**Haky, Jerome E.**; Associate Professor Emeritus in Chemistry; Ph.D., Case Western Reserve

University.

**Hamlin, Elwood**; Professor Emeritus in Social Work; Ph.D., Catholic University of America.

**Hanson, Howard**; Professor Emeritus in Geosciences; Ph.D., University of Miami.

**Hardy, Deirdre J.**; Professor Emeritus in Architecture; M.A., University of Florida; A.I.A.

**Hartley, Craig S.**; Professor Emeritus in Engineering; Ph.D., Ohio State University.

**Hartt, William H.**; Professor Emeritus in Ocean Engineering; Ph.D., University of Florida; P.E.

**Hnatysh, Walter**; Professor Emeritus in Visual Arts and Art History; M.F.A., Temple University.

**Hokenson, Jan W.**; Professor Emeritus in Languages, Linguistics and Comparative Literature; Ph.D., University of California, Santa Cruz.

**Hsu, Sam Chung**; Professor Emeritus in Computer Science and Engineering; Ph.D., Florida Atlantic University.

**Huckshorn, Robert J.**; Professor Emeritus in Political Science; Ph.D., University of Iowa.

**Hullihan, William F.**; Associate Professor Emeritus in Teacher Education; Ed.D., University of Florida.

**Hung, Chao-shun**; Professor Emeritus in Economics; Ph.D., Texas A&M University.

**Hunt, John J.**; Associate Professor Emeritus in Educational Leadership; Ph.D., Harvard University.

**Hunt, William M.**; Professor Emeritus in Instructional Technology and Research; Ph.D., Florida State University.

**Jordan, Robin G.**; Professor Emeritus in Physics; Ph.D., University of Sheffield.

**Jurewicz, John T.**; Professor Emeritus in Engineering; Ph.D., Washington State University.

**Kalinich, David B.**; Professor Emeritus in Criminology and Criminal Justice; Ph.D., Michigan State University.

**Kauffman, A. Daniel**; Professor Emeritus in Instructional Technology and Research; Ph.D., Texas A&M University.

**Kersey, Harry**; Professor Emeritus in History; Ph.D., University of Illinois.

**King, Benjamin**; Professor Emeritus in Information Technology and Operations Management; Ph.D., University of Chicago.

**Kirkwood-Tucker, Toni Fuss**; Associate Professor Emeritus in Teacher Education; Ed.D., Florida International University.

**Klingler, Lee C.**; Professor Emeritus in Mathematical Sciences; Ph.D., University of Wisconsin, Madison.

**Koku, Paul S.**; Professor Emeritus in Marketing; Ph.D., Rutgers University.

**Lamborn, Bjorn N.**; Professor Emeritus in Physics; Ph.D., University of Florida.

**LeBlanc, Lester L.**; Professor Emeritus in Ocean Engineering; Ph.D., University of Rhode Island.

**Lee, David R.**; Professor Emeritus in Geography; Ph.D., University of California, Los Angeles.

**Li, Zhongwei**; Professor Emeritus of Biomedical Science; Ph.D., Academia Sinica, China.

- Liehr, Patricia;** Interim Dean of the College of Nursing and Professor Emeritus in Nursing; Ph.D., University of Maryland.
- Lin, Yukweng K.;** Professor Emeritus in Engineering; Ph.D., Stanford University.
- Locsin, Rozzano;** Professor Emeritus in Nursing; Ph.D., University of the Philippines.
- Lombardo, Anthony;** Professor Emeritus in Chemistry; Ph.D., Syracuse University.
- Low, Jennifer;** Professor Emeritus in English; Ph.D., University of Virginia.
- Lynch, Ann Q.;** Professor Emeritus in Counselor Education; Ed.D., University of Florida.
- Magliveras, Spyros S.;** Professor Emeritus in Mathematical Sciences; Ph.D., University of Birmingham, England.
- Mahoney, Sheila A.;** Professor Emeritus in Biology; Ph.D., Washington State University.
- Marcovitz, Alan B.;** Professor Emeritus in Computer Science and Engineering; Ph.D., Columbia University.
- Marsh, G. Alex;** Professor Emeritus in Biology; Ph.D., Virginia Institute of Marine Science, College of William and Mary.
- McBride, Dorothy;** Professor Emeritus in Political Science; Ph.D., Vanderbilt University.
- McCaffrey, Ruth;** Professor Emeritus in Nursing; N.D, Case Western Reserve University.
- McCarty, Daniel;** Professor Emeritus in Finance; Ph.D., Georgia State University.
- McDaniel, William;** Professor Emeritus in Finance; Ph.D., Georgia State University.
- McGuire, James B.;** Professor Emeritus in Physics; Ph.D., University of California.
- McGuirk, Carol;** Professor Emeritus in English; Ph.D., Columbia University.
- Messenger, Roger A.;** Professor Emeritus of Electrical Engineering; Ph.D., University of Minnesota.
- Milman, Mario M.;** Professor Emeritus in Mathematical Sciences; Ph.D., Australian National University.
- Mohl, Raymond A.;** Professor Emeritus in History; Ph.D., New York University.
- Morales-Jones, Carmen;** Professor Emeritus in Teaching and Learning; Ph.D., Florida State University.
- Morgera, Salvatore;** Professor Emeritus in Electrical Engineering; Ph.D., Brown University.
- Mullin, Ronald C.;** Professor Emeritus in Mathematical Sciences; Ph.D., University of Waterloo.
- Murtaugh, Daniel;** Professor of English; Ph.D., Yale University.
- Nash, Allan J.;** Professor Emeritus in Psychology; Ph.D., Purdue University.
- Nathan, Norman;** Professor Emeritus in English; Ph.D., New York University.
- Niederhausen, Heinrich;** Professor Emeritus of Mathematical Sciences; Dr. Techn., Technische Universität Graz.
- Orbach, Kenneth N.;** Professor Emeritus in Accounting; Ph.D., Texas A&M University; C.P.A.
- Parker, Marilyn E.;** Professor Emeritus in Nursing; Ph.D., Kansas State University.
- Peitgen, Heinz-Otto;** Professor Emeritus in Mathematical Sciences; Doctor of Natural Science and

Habilitation, University of Bonn.

**Perumareddi, Jayarama R.;** Professor Emeritus in Chemistry; Ph.D., University of Southern California.

**Petuch, Edward J.;** Professor Emeritus in Geology; Ph.D., University of Miami.

**Prusa, Carol;** Professor Emeritus in Painting and Drawing; M.F.A., Drake University.

**Purnell, Marguerite J.;** Associate Professor Emeritus in Nursing; Ph.D., University of Miami.

**Ray, Marilyn;** Professor Emeritus in Nursing; Ph.D., University of Utah.

**Restrepo, Jorge I.;** Professor Emeritus in Geology; Ph.D., Colorado State University.

**Richie, Nicholas D.;** Associate Professor Emeritus in Health Administration; Ph.D., University of Michigan.

**Richman, Fred;** Professor Emeritus in Mathematical Sciences; Ph.D., University of Chicago.

**Roberts, Charles E.;** Professor Emeritus in Geography; Ph.D., Pennsylvania State University.

**Romeo, Felicia;** Professor Emeritus in Teaching and Learning; Ed.D., University of Houston.

**Ross, Joel, E.;** Professor Emeritus in Management; D.B.A., George Washington University.

**Russo, Kathleen;** Professor Emeritus in Art History; Ph.D., Florida State University.

**Ryan, William;** Associate Professor Emeritus in Management and International Business; Ph.D., Indiana University.

**Sashi, C. M.;** Professor Emeritus in Marketing; Ph.D., Northwestern University.

**Schilit, Jeffrey;** Professor Emeritus in Education; Ph.D., Ohio State University.

**Schroeck, Franklin E.;** Professor Emeritus in Mathematical Sciences; Ph.D., University of Rochester.

**Schultz, Ronald R.;** Professor Emeritus in Geography; Ph.D., University of Washington.

**Schuster, Fred E.;** Professor Emeritus in Management; D.B.A., Harvard University.

**Schwarz, Robert;** Professor Emeritus in Philosophy; Ph.D., University of Wisconsin.

**Scroggins, Mark;** Professor Emeritus in English; Ph.D., Cornell University.

**Shaw, Eric H.;** Professor Emeritus in Marketing; Ph.D., Temple University.

**Sherman, Rose;** Professor Emeritus in Nursing; Ed.D., Columbia University.

**Smith, Jerald;** Professor Emeritus in Management; Ph.D., University of Louisville.

**Smith, Marlaine C.;** Professor Emeritus in Nursing and Former Eminent Scholar; Ph.D., New York University.

**Solomon, Martin K.;** Professor Emeritus in Computer Science and Engineering; Ph.D., Stevens Institute of Technology.

**Sperry, Len;** Professor Emeritus in Counselor Education; Ph.D., Northwestern University.

**Stephenson, Samuel;** Professor Emeritus in Information Technology and Operations Management; Eng.Sc.D., New York University.

**Stevens, Karl, K.;** Professor Emeritus in Mechanical Engineering; Ph.D., University of Illinois.

**Stinchcomb, Jeanne;** Professor Emeritus in Criminology and Criminal Justice; Ph.D., Virginia

Commonwealth University.

**Stronge, William B.;** Professor Emeritus in Economics; Ph.D., Iowa State University.

**Tappen, Ruth;** Professor Emeritus in Nursing and Christine E. Lynn Eminent Scholar; Ed.D., Columbia University.

**Tata, Robert J.;** Professor Emeritus in Geography; Ph.D., Syracuse University.

**Taylor, Robert;** Professor Emeritus in Accounting; Ph.D., University of Colorado.

**Tennant, Jeffrey S.;** Professor Emeritus in Ocean Engineering; Ph.D., Clemson University; P.E.

**Touhy, Theris A.;** Professor Emeritus in Nursing; D.N.P., Case Western Reserve University.

**Unwalla, Darab;** Professor Emeritus in Management; Ph.D., University of Bombay.

**Warren, Dwight W.;** Professor Emeritus in Biomedical Science; Ph.D., University of Southern California, Los Angeles.

**Watson, Robert;** Professor Emeritus in Printmaking; M.F.A., Ohio University.

**Weiss, Gerald;** Professor Emeritus in Anthropology; Ph.D., University of Michigan.

**Weissbach, Herbert;** Professor Emeritus in Biological Science and Chemistry; Ph.D., George Washington University.

**White, Daniel R.;** Professor of Philosophy and Humanities; Ph.D., Florida State University.

**Wiesenfeld, John R.;** Professor Emeritus in Chemistry; Ph.D., Case Institute of Technology.

**Williams, Christine;** Professor Emeritus in Nursing; D.N.S., Boston University.

**Winland-Brown, Jill E.;** Professor Emeritus in Nursing; Ed.D., Florida Atlantic University.

**Yiu, Paul;** Professor Emeritus in Mathematical Sciences; Ph.D., University of British Columbia.

## APPENDIX A:

### ANTI-DISCRIMINATION AND ANTI-HARASSMENT

To view the University's Anti-Discrimination and Anti-Harassment Regulation, please click [here](#).

## APPENDIX B:

### A GUIDE TO BIAS-FREE COMMUNICATION

People in the University community are increasingly aware of the need to use language that recognizes our diversity and does not offend, demean or exclude people on the basis of gender, race, ethnic group, religion, age, ability/disability or sexual orientation.

Changing our language usage, however, does not come easily or automatically. Familiar ways of writing and speaking are more comfortable; substitute phrases do not always spring quickly to mind.

Several years ago, the University developed a guide to assist faculty, staff and students with these issues. FAU's guide very closely mirrors "Guide to Bias-Free Communications" prepared by the University of Wisconsin-Madison and is used here with UW's permission. FAU recognized the many hours of discussion about sensitive issues that preceded the final draft of UW's Guide.

These guidelines are meant to help you find a more encompassing word or phrase when you need it and to be more attuned to language that, whether intended or not, may offend others. The guidelines aim primarily at written material but apply as well to the spoken word.

This area is controversial and in flux. Usage that groups prefer today may change next year. The point is to try to communicate in a way that is respectful of diversity. Also, the examples we cite may not satisfy everyone.

We welcome your comments, questions and suggestions on how to make these guidelines more useful and pertinent.

## GENDER

1. Include all people in general references by substituting gender-neutral words and phrases for gender-biased words.

<b>Example</b>	<b>Recommended</b>
mankind	people, humanity, human beings
man-to-man defense	one-on-one defense
man the operation	staff the operation
manpower	labor, human resources
layman's terms	ordinary terms
man hours	staff hours, hours
man-made	manufactured, synthetic, artificial

2. Communicate to everyone including both male and female reference points. (Don't presume marital or familial relationships.)

<b>Example</b>	<b>Recommended</b>
faculty and wives	faculty, spouses and guests
you and your spouse are invited...	you and your guest are invited...
boyfriends/girlfriends	friends, guests, partners
Dear Sir	Dear Sir or Madam Dear Madam or Sir Dear Colleague, Greetings

3. Avoid gender-biased pronouns by:

- a. Dropping pronouns that signify gender and restructuring the statement.

**Example**

**Recommended**

Each student should hand in his term paper by...

Each student should hand in a term paper by...

b. Changing to plural construction.

**Example**

**Recommended**

Each student should hand in his term paper by...

Students should hand in term papers by...

A nurse cares for her patients.

Nurses care for their patients.

c. Replacing masculine or feminine pronouns with "one" or "you."

**Example**

**Recommended**

Each student should hand in his term paper by...

You should hand in your term paper by...

d. Avoid awkward construction such as he(she), s/he, (s)he, or him/her. Such constructions, which can be easily reworked, imply that women are considered to be the subject only as an afterthought.

**Example**

**Recommended**

As a professor emeritus, s/he is entitled to a reduced parking fee in Lot 60.

A professor emeritus is entitled to a reduced parking fee in Lot 60.

When welcoming a new teaching assistant, ask him/her to provide a permanent address

When welcoming new teaching assistants, ask them to provide permanent addresses.

4. Use parallelism to refer to women and men equally and to make references consistent.

**Example**

**Recommended**

Danny Jones, a strong basketball

Jones, a strong player, and Favor, a powerful runner, are...

athlete, and Suzy Favor, an attractive young runner, are...

10 men students and 16 female students...

10 male students and 16 female students...

Prof. Brown and Julia Smith were recently promoted.

Prof. Brown and Prof. Smith were recently promoted.

5. "Women" is often used, incorrectly or inappropriately, as an adjective. Consider using "female" or eliminating the adjective if it's unnecessary.

**Example**

**Recommended**

Geraldine Ferraro was the first woman vice-presidential candidate.

Geraldine Ferraro was the first female vice-presidential candidate.

Dr. Helen Popovich became the first woman president of FAU on Sept. 1, 1983.

Dr. Helen Popovich became the first female president of FAU on Sept. 1, 1983.

6. If a direct quote (derived from research or an interview) offends or inappropriately excludes women or men and is not essential to your document, consider eliminating, paraphrasing or replacing the quote.

7. Use neutral words for "man" and "woman" in job titles or descriptions.

**Example**

**Recommended**

chairman

chair

policemen

police officers

sales girl

sales clerk

spokesman

spokesperson

lady lawyer

lawyer

founding fathers

founders

8. Base communication on relevant qualities, not on sex. Avoid sexual stereotyping.

Example	Recommended
She's a good basketball player. She shoots like a man.	She's a good basketball player. She shoots well.
A brilliant female researcher...	A brilliant researcher...

9. Avoid any reference to marital status, parental status or affectional status unless it is directly relevant.
10. When choosing photographs or illustrations, consider the balance of women and men. Also, be conscious of the relative positions of women and men and their actions. Non-verbal messages conveyed by portraying men standing/women sitting, men gesturing at smiling women, men pointing to or working with lab and other equipment while women passively observe imply status differences. Such implications, whether subtle or direct, are unrealistic in the modern workplace or university. Work with artists and photographers to update graphic content.

## DISABILITIES

1. The terms impairment, disability and handicap are not synonymous. Be sensitive to the meaning of each.

An **impairment** is a physiological condition. Example: Arthritis is an impairment in which tissues of the joints are damaged.

A **disability** is the consequence of an impairment. A disability may or may not be handicapping. Example: Disabilities resulting from arthritis include difficulty in bending the spine or limbs, and thus difficulty in walking or performing tasks.

A **handicap** is the social implication of a disability; a condition or barrier imposed by society, the environment or oneself. The term should not be used to describe a disability. Example: People

with arthritic knees and hips may be handicapped by the absence of elevators in older buildings.

2. Disabilities may be the result of either injury or disease, often a disease long past. Disabled people should not automatically be viewed as sick or having a disease.
3. Put people first, not their disabilities.

<b>Example</b>	<b>Preferred</b>
The visually impaired students used a special keyboard.	The students with visual impairments used a special keyboard.

4. Do not focus on a disability unless it is relevant to your communication.

**Irrelevant**

The new instructor, whose bout with polio left him on crutches, will teach two sections of African history.

**Relevant**

The author of the text on legal rights for the disabled writes from experience. She has had paraplegia since childhood.

5. In photos and illustrations, depict disabled people in everyday situations—work, home, play—and show them interacting with people who are not disabled. Do not focus on wheelchairs, crutches or other adaptive equipment.
6. When the context calls for discussion of people with and without disabilities, use that term—"people without disabilities"—rather than "normal" or "able-bodied." ("Normal" implies that by comparison disabled people are abnormal; "able-bodied" suggests that all people with disabilities have physical disabilities or are unable to compensate for their disabilities.) "Non-disabled" is another useful term.
7. Avoid language that portrays people with disabilities as either unfortunate, helpless victims or, at the other extreme, as courageous superhumans.

## RACE AND ETHNICITY

1. Avoid identifying people by race or ethnic group unless it is relevant. We don't usually point out that an individual is white or of Anglo-Saxon heritage. The same rule should apply to other groups.

<b>Inappropriate</b>	<b>Recommended</b>
Andrew Young, the black mayor of Atlanta, cast his vote.	Andrew Young, mayor of Atlanta, cast his vote.
Maria Duran, a Hispanic professor of physics, has been promoted to associate professor.	Maria Duran, a professor of physics, has been promoted to associate professor.
Alpha Beta Gamma, the black fraternity, wants to re-roof its building.	Alpha Beta Gamma wants to re-roof its building.

2. Avoid the term "non-white," which sets up white culture as the standard by which all other cultures should be judged. Also avoid "culturally disadvantaged" and "culturally deprived." These terms imply that the dominate culture is superior to other cultures or that other groups lack a culture.
3. Refer to individuals as "members of a minority group" or specify the minority group (e.g., Latino) when minority group identity is pertinent. ("Minority" refers to a group and serves as a modifier in the term "minority group.")

<b>Example</b>	<b>Preferred</b>
Women and minorities are encouraged to apply.	Women and members of minority groups are encouraged to apply.
Minorities attended the meeting.	Members of the Hmong and Korean communities attended the meeting.

4. Avoid words, images or situations that reinforce stereotypes and that imply all people of a

particular race or ethnic group are the same.

### **Example**

Not surprisingly, the Asian-American students did best in the math contest.

### **The Problem**

Assuming it is relevant to point out that this group excelled, the phrase "not surprisingly" may reinforce the stereotype that all Asian-Americans have superior aptitude in math.

Stereotypical phrases occur much more commonly in spoken than in written communications. Be conscious of what you say as well as what you write.

5. Stay attuned to the current terminology by which racial and ethnic groups refer to themselves. Usage changes (e.g., from "Negro" to "African American," from "Oriental" to "Asian American"). National newspaper and television news are good indicators of current usage. Also, ask people what term they prefer.

People who trace their ancestry through the Caribbean or Central and South America may identify themselves as coming from any one of a number of different cultures and ethnic groups. For instance, the terms Hispanic, Latino/a, Chicano/a and Puertorriqueno/a all have different meanings. Many people whom the U.S. Census would describe as "Hispanic" prefer the term "Latino or Latina." Some people with Spanish-sounding surnames may have indigenous Indian, German or Asian ancestry or prefer to be referred to by their nationality, e.g., Colombian, Nicaraguan, Guatemalan. Others may prefer that no reference be made to their nationality or ancestry.

People whose ancestors originally populated North America may want to be identified with specific communities, such as Seminole or Miccosukee, or they may prefer to be referred to as "American Indian" or "Native American" rather than "Indian." If in doubt, ask.

Also, attention must be paid to the punctuation used in referring to racial and ethnic groups. The terms "African American," "Asian American" and so forth are nouns and should not be hyphenated. However, when these terms are used as modifiers (e.g., "the Asian-American students" in example number 4), they should be hyphenated.

6. Be sensitive to religion when referring to various ethnic groups. Don't make assumptions. For

instance, just as not all Arabs are Muslims, most nationalities and ethnicities will embody different religious practices. Avoid stereotyping a race, nationality or ethnic group with a specific religion.

7. Be sure your communications do not patronize or give token attention to members of racial or ethnic groups. Exaggerated focus on people's accomplishments or insincere and gratuitous references to their concerns imply that these people are not normally successful or accomplished or are not considered to be in the mainstream of society.
8. Review written communications and visual materials to ensure that, where appropriate, all groups—women, men, minority and ethnic group members, older people and disabled people—are represented.

This does not mean that every publication, video or similar material must include all groups at all times or that participation of particular groups should be exaggerated or overstated. But generic campus publications, such as college bulletins or communications that are part of a continuing series (such as newspapers or annual reports), should aim for reasonable representation of all groups involved.

## SEXUAL ORIENTATION

1. "Gender orientation" and "sexual orientation" are preferred to "sexual preference," a term that implies that being homosexual, bisexual or heterosexual is a matter of choice.
2. Most gay people prefer the term "gay" to the somewhat clinical "homosexual." The term "gay" may be used to refer to both men and women, but "lesbian" is the term preferred by gay women. Keep in mind also that people of a bisexual orientation may not consider themselves to be part of either the gay or heterosexual community. As a matter of principle, refer to societal groups in the way that members of each group prefer. Ask people what term they prefer.
3. Avoid using "gay lifestyle" or "lesbian lifestyle." Being gay or lesbian is not a lifestyle; it is a fundamental orientation. In addition, gays' lives and relationships are as diverse as those of the rest of the population.
4. "Gay community" is an umbrella term used in the same manner that a name such as "the Italian-American community" is used to describe a group whose members have similar, but not identical,

backgrounds and social agendas. The term may be used to refer to both men and women but again, "lesbian and gay community" is preferred.

5. Include the viewpoint of somebody who is gay when reporting on a gay topic. Better yet, solicit more than one gay viewpoint, since the gay, lesbian and bisexual community is not monolithic.
6. Avoid classroom or extracurricular activities or exercises that assume all students are heterosexual or that otherwise invade students' privacy.

## AGE

1. Refer to a person's age only when it is relevant to the medium or the message. For example, communications that follow newspaper style are generally expected to state a subject's age. However, in most internal University communications, age is not pertinent and its mention may even be distracting.

### **Irrelevant**

The researchers, ages 56 and 60, won a grant from NIH.

### **Relevant**

Patricia Schmidt, 12, will study at FAU this spring. She is the youngest student ever to enroll at the University.

2. If you use a generic age description, ask your subjects what wording they prefer. Do they refer to themselves as older persons or senior citizens? As youths, teenagers or young people?
3. Avoid cliches such as "precocious," "spry" or "chipper," and avoid generalizations that reinforce stereotypes about age. Middle school children are not necessarily troublemakers, and not everyone over 80 lives in a nursing home.
4. Don't assume older people are less intellectually, physically or emotionally able than other age groups. Also don't underestimate the capabilities of younger people simply on the basis of their age.

### **Inappropriate**

Carl Elliot, 12, feeds his dog every day without having to be reminded.

Darleen Hampton, 62, still puts in a full day in the admissions office.

5. Don't use patronizing language.

Example	Recommended
The sweet little old lady beamed as she entered the classroom.	The older woman smiled as she entered the classroom.

6. In communications meant to represent a range of experiences or viewpoints, include people of diverse ages.

7. Newspaper style dictates that females 18 years or older are women, not girls; males 18 years or older are men, not boys. In a university setting, however, it may be more appropriate to refer to all students, whether 17 or 60, as men and women.

## APPENDIX C:

### FLORIDA'S STATEWIDE COURSE NUMBERING SYSTEM

Courses in this catalog are identified by prefixes and numbers that were assigned by Florida's Statewide Course Numbering System (SCNS). This numbering system is used by all public postsecondary institutions in Florida and participating nonpublic institutions. The major purpose of this system is to facilitate the transfer of courses between participating institutions. Students and administrators can use the online SCNS to obtain course descriptions and specific information about course transfer between participating Florida institutions. This information is on the SCNS [website](#).

Each participating institution controls the title, credit and content of its own courses and recommends the first digit of the course number to indicate the level at which students normally take the course. Course prefixes and the last three digits of the course numbers are assigned by members of faculty discipline committees appointed for that purpose by the Florida Department of Education in Tallahassee. Individuals nominated to serve on these committees are selected to maintain a representative balance as to type of institution and discipline field or specialization.

The course prefix and each digit in the course number have a meaning in the SCNS. The listing of prefixes and associated courses is referred to as the "SCNS taxonomy." Descriptions of the content of

courses are referred to as "statewide course profiles."

### EXAMPLE OF COURSE IDENTIFIER

<b>Prefix</b>	ENC	English Composition
<b>Level Code</b> (first digit)	1	Lower (Freshman) Level at this institution
<b>Century Digit</b> (second digit)	1	Freshman Composition
<b>Decade Digit</b> (third digit)	0	Freshman Composition Skills
<b>Unit Digit</b> (fourth digit)	1	Freshman Composition Skills I
<b>Lab Code</b>		No laboratory component in this course

### GENERAL RULE FOR COURSE EQUIVALENCIES

Equivalent courses at different institutions are identified by the same prefixes and same last three digits of the course number and are guaranteed to be transferable between participating institutions that offer the course, with a few exceptions, as listed below in *Exceptions to the General Rule for Equivalency*.

For example, a freshman composition skills course is offered by 84 different public and nonpublic postsecondary institutions. Each institution uses "ENC\_101" to identify its freshman composition skills course. The level code is the first digit and represents the year in which students normally take the course at a specific institution. In the SCNS taxonomy, "ENC" means "English Composition," the century digit "1" represents "Freshman Composition," the decade digit "0" represents "Freshman Composition Skills" and the unit digit "1" represents "Freshman Composition Skills I."

In the sciences and certain other areas, a "C" or "L" after the course number is known as a lab indicator. The "C" represents a combined lecture and laboratory course that meets in the same place at the same time. The "L" represents a laboratory course or the laboratory part of a course that has the same prefix and course number but meets at a different time or place.

Transfer of any successfully completed course from one participating institution to another is guaranteed in cases where the course to be transferred is equivalent to one offered by the receiving institution. Equivalencies are established by the same prefix and last three digits and comparable faculty credentials at both institutions. For example, ENC 1101 is offered at a community college. The same course is offered at a state university as ENC 2101. A student who has successfully completed ENC 1101 at a Florida College System institution is guaranteed to receive transfer credit for ENC 2101 at the state university if the student transfers. The student cannot be required to take ENC 2101 again since ENC 1101 is equivalent to ENC 2101. Transfer credit must be awarded for successfully completed equivalent courses and used by the receiving institution to determine satisfaction of requirements by transfer students on the same basis as credit awarded to the native students. It is the prerogative of the receiving institution, however, to offer transfer credit for courses successfully completed that have not been designated as equivalent.

**Note:** Credit generated at institutions on the quarter-term system may not transfer the equivalent number of credits to institutions on the semester-term system. For example, 4.0 quarter hours often transfers as 2.67 semester hours.

## THE COURSE PREFIX

The course prefix is a three-letter designator for a major division of an academic discipline, subject matter area or subcategory of knowledge. The prefix is not intended to identify the department in which a course is offered. Rather, the content of a course determines the assigned prefix to identify the course.

## AUTHORITY FOR ACCEPTANCE OF EQUIVALENT COURSES

Section 1007.24(7), Florida Statutes, states:

Any student who transfers among postsecondary institutions that are fully accredited by a regional or national accrediting agency recognized by the United States Department of Education and that participate in the statewide course numbering system shall be awarded credit by the receiving institution for courses satisfactorily completed by the student at the previous institutions. Credit shall be awarded if the courses are judged by the appropriate statewide course numbering system faculty committees representing school districts, public postsecondary educational institutions, and participating nonpublic postsecondary educational institutions to be academically equivalent to courses offered at the receiving institution, including equivalency of faculty credentials, regardless of the public or nonpublic control of the previous institution. The Department of Education shall ensure that credits

to be accepted by a receiving institution are generated in courses for which the faculty possess credentials that are comparable to those required by the accrediting association of the receiving institution. The award of credit may be limited to courses that are entered in the statewide course numbering system. Credits awarded pursuant to this subsection shall satisfy institutional requirements on the same basis as credits awarded to native students.

## EXCEPTIONS TO THE GENERAL RULE FOR EQUIVALENCY

Since the initial implementation of the SCNS, specific disciplines or types of courses have been excepted from the guarantee of transfer for equivalent courses. These include courses that must be evaluated individually or courses in which the student must be evaluated for mastery of skill and technique. The following courses are exceptions to the general rule for course equivalencies and may not transfer. Transferability is at the discretion of the receiving institution.

1. Courses not offered by the receiving institution.
2. For courses at nonregionally accredited institutions, courses offered prior to the established transfer date of the course in question.
3. Courses in the \_900-999 series are not automatically transferable and must be evaluated individually. These include such courses as special topics, internships, apprenticeships, practica, study abroad, theses and dissertations.
4. Applied academics for adult education courses.
5. Graduate courses.
6. Internships, apprenticeships, practica, clinical experiences and study abroad courses with numbers other than those ranging from 900-999.
7. Applied courses in the performing arts (art, dance, interior design, music and theatre) and skills courses in criminal justice (academy certificate courses) are not guaranteed as transferable. These courses need evidence of achievement (e.g., portfolio, audition, interview, etc.).

## COURSES AT NONREGIONALLY ACCREDITED INSTITUTIONS

The SCNS makes available on its [website](#) a report entitled "Courses at Nonregionally Accredited Institutions" that contains a comprehensive listing of all nonpublic institution courses in the SCNS inventory, as well as each course's transfer level and transfer effective date. This report is updated monthly.

Questions about the SCNS and appeals regarding course credit transfer decisions should be directed to

Maria Jennings at [mjennings@fau.edu](mailto:mjennings@fau.edu) in the Office of the Registrar at FAU, or to the Florida Department of Education, Office of Articulation, 1401 Turlington Building, Tallahassee, Florida 32399-0400. Special reports and technical information may be requested by calling the SCNS office at 850-245-0427 or by visiting its [website](#).

## APPENDIX D:

### FLORIDA ATLANTIC UNIVERSITY INTEREST GROUP

#### **Discussion List**

FAU-L is an unmoderated discussion list dealing with issues, concerns and news related to Florida Atlantic University, its alumni, students, faculty, visitors and friends. The discussion list intends to exchange ideas, answer questions and share experiences between and among members. This discussion list is open to all interested individuals and organizations.

#### *To subscribe or unsubscribe:*

1. Log into FAU's Sympa website at <https://lists.fau.edu>.
2. Enter **fau-l** in the search for list(s) field and click search links. Click on the fau-l link.
3. On the left side of the page, click **Subscribe or Unsubscribe** and follow the prompts.
4. A confirmation email will be sent.

#### *To post a message to the list members:*

Send a message to the mailing list's address through email by addressing it to [fau-l@lists.fau.edu](mailto:fau-l@lists.fau.edu). Or, messages can be sent from within FAU's Sympa website:

1. Log into FAU's Sympa website at <https://lists.fau.edu>.
2. Click the link for **fau-l**.
3. Click **Post**.
4. In the mail form, fill in the subject line.
5. Write in the message body.
6. Click **Send to selected recipient**.

## APPENDIX E:

### FLORIDA ATLANTIC UNIVERSITY ON THE INTERNET

## **FAU Website**

An interesting and always growing body of current information about FAU is available at [www.fau.edu](http://www.fau.edu).

## **Course Schedule**

FAU's course schedule has information about current class sizes and is updated regularly with details about cancelled, closed and held classes. Any changes of time, day or location are also available in the course schedule at [myfau.fau.edu](http://myfau.fau.edu).
