# UNIVERSITY CATALOG NAVIGATION AND PUBLICATION POLICY

This University Catalog enumerates policies, requirements and other essential details regarding both undergraduate and graduate degree programs at Florida Atlantic University. Published annually by the Office of the Registrar, the catalog serves as an informational publication for the University community and the public. This catalog does not constitute an offer for contracts and should not be used for verifying the equivalency of courses to transfer courses or for recording credit on transcripts.

The navigation tiles in the catalog's opening page direct readers to the three main sections of the catalog. The General Information tile leads to specific University units or services. Academic policies, degree requirements, admissions information, student activities and financial assistance programs are among the resources found under the General Information tile. The Academic Programs tile leads to a listing of Florida Atlantic's colleges and a separate section for programs that are interdisciplinary. All degree program information can be found in these sections. The third tile, Course Descriptions, directs readers to FAU's individual course offerings listed by the colleges in which they are offered. The catalog search option at the top of all catalog pages is also a helpful tool for finding specific information within the catalog.

The University reserves the right to amend, adopt or make effective any provision, offering, requirement or policy at any time without notice within the student's period of study at FAU to carry out its purposes and objectives. When incorporating changes, the University will make every reasonable effort to honor the curriculum requirements appropriate to each student's catalog year. However, some courses and programs may be discontinued and requirements may change as a result of curricular review or actions by accrediting associations or other agencies.

This catalog incorporates by reference and is subject to all applicable state and federal laws and rules and the rules and policies of the Florida Board of Education and Florida Atlantic University, which are subject to change at any time.

## ACADEMICS — FLORIDA ATLANTIC'S CHIEF PRIORITY

Welcome to the academic world of Florida Atlantic University. Here you will find a wide choice of majors, a top-notch faculty, small classes and personal attention, all in a beautiful subtropical setting. Florida Atlantic offers its programs at several sites throughout its six-county service region in Southeast Florida, with state-of-the-art student housing available on the Boca Raton and Jupiter campuses. With more than 170 undergraduate and graduate degree programs available, FAU's 30,000 students are receiving the preparation they need to face the future with confidence.

With more than 50 percent of its student body classified as minority or international students, Florida Atlantic ranks as the most racially, ethnically and culturally diverse institution in Florida's State University System. It is designated a Hispanic-Serving Institution, highly ranked by *U.S. News & World Report* for "Social Mobility," and a top degree producer for African American and Hispanic students. *U.S. News & World Report* also ranks FAU as a top public university. The student-to-faculty ratio is 23:1, an advantage normally offered by small, private colleges. Similarly, classes are taught primarily by the University's full-time faculty rather than by graduate students or part-time instructors.

Florida Atlantic is accredited by the Southern Association of Colleges and Schools Commission on Colleges to award associate, baccalaureate, masters, specialist and doctorate degrees. Contact the Southern Association of Colleges and Schools Commission on Colleges at 1866 Southern Lane, Decatur, Georgia 30033-4097 or call 404-679-4500 for questions about the accreditation of FAU.

Students who have a complaint about their educational experience at Florida Atlantic that is not resolved through internal University procedures may also use the above address to contact the SACS Commission, whose complaint procedures are listed [here](#), or they may submit a [complaint form](#) to the Florida Board of Governors at 325 West Gaines Street, Suite 1614, Tallahassee, Florida 32399-0400. Normal inquiries about the University, such as admission requirements, financial aid, educational programs, etc., should be addressed directly to the institution.

In 1993, Florida Atlantic was elected to membership in the prestigious National Association of State Universities and Land-grant Colleges (now the Association of Public and Land-grant Universities), the country's oldest higher education association. FAU is also a member of the Council of Graduate Schools.

## FACULTY

The University's full- and part-time faculty includes 1,300 accomplished scholars and researchers, with 90 percent having doctorates or terminal degrees in their fields. The faculty includes 17 Eminent Scholars, widely acclaimed authorities in their fields who bring special excitement to the classroom and new ideas to

research programs.

## **LIBRARY**

The University Libraries house approximately 3.7 million items, including books, periodicals, government documents, microforms, maps, media and other materials. For more information, visit the Libraries' [website](#).

## **OFFICE OF THE OMBUDS**

The Ombuds works toward solving problems, not as an advocate for individuals or the University but as a supporter for fair outcomes. As an independent agent of the University, reporting to the Division of Administrative Affairs, the Ombuds has access to information from any office within the institution. The Office of the Ombuds is informal and does not generate records or take legal notice, nor does it accept official complaints; however, it can assist you by making appropriate referrals if this is your goal.

Your visit to the Ombuds is confidential except when there is a concern about danger to you or to others. If it is necessary to disclose your identity and your specific issue to gain information essential to the case, you and the Ombuds will discuss this and determine the limits of confidentiality. You should visit the Office of the Ombuds if you need assistance with disputes about fees, academic concerns, housing issues, parking problems, discrimination and/or harassment, red tape and many other matters. The Ombuds may help you to identify and evaluate options to formulate a plan to address your issue, to find the correct person to address your concern or to explain University regulations or policies. The Ombuds will listen to you.

An appointment with the Ombuds can be made by calling 561-297-3693. The Office of the Ombuds is located in the S.E. Wimberly Library, Room 156B. For more information, visit [www.fau.edu/ombuds](http://www.fau.edu/ombuds).

## **POLICY OF NON-DISCRIMINATION**

Florida Atlantic University is committed to a policy of non-discrimination. It is against the policy of the University to discriminate against, or exclude from participation in benefits or activities, either on the staff or in the student body, any person on the grounds of race, color, religion, age, disability, sex, national origin, marital status, veteran status, sexual orientation, gender identity or expression, or students, applicants for employment, faculty and staff (hereinafter collectively referred to as “University Community Members”), as well as third parties providing services to FAU. This Regulation 5.010 (“Regulation”) establishes procedures for a University Community Member to file a complaint of alleged discrimination, harassment or retaliation.

Discriminatory conduct in the form of sexual misconduct/sexual harassment is also prohibited, and procedures for processing and investigation claims of sexual misconduct/sexual harassment by a University employee will be processed in accordance with current University policy on prohibited sexual conduct.

## KEY TO DEGREE DESIGNATIONS

B.A.	Bachelor of Arts
B.A.C.S.	Bachelor of Arts in Computer Science
B.A.E.	Bachelor of Arts in Education
B.Arch.	Bachelor of Architecture
B.B.A.	Bachelor of Business Administration

B.E.C.E.	Bachelor of Early Care and Education
B.F.A.	Bachelor of Fine Arts
B.G.S.	Bachelor of General Studies
B.H.S.	Bachelor of Health Services Administration
B.M.	Bachelor of Music
B.M.E.	Bachelor of Music Education
B.P.M.	Bachelor of Public Management
B.P.S.	Bachelor of Professional Studies
B.P.S.A.	Bachelor of Public Safety Administration
B.S.	Bachelor of Science
B.S.C.E.	Bachelor of Science in Computer Engineering
B.S.C.S.	Bachelor of Science in Computer Science
B.S.C.V.	Bachelor of Science in Civil Engineering
B.S.E.	Bachelor of Science in Education
B.S.E.E.	Bachelor of Science in Electrical Engineering
B.S.E.V.	Bachelor of Science in Environmental Engineering
B.S.G.E.	Bachelor of Science in Geomatics Engineering

## UNIVERSITY PROFILE

Florida Atlantic University is in subtropical South Florida with campuses in Palm Beach, Broward and St. Lucie counties. The six-county (Broward, Indian River, Martin, Okeechobee, Palm Beach and St. Lucie) region, with a population of more than five million, offers all the cultural advantages of a major metropolitan setting and natural treasures ranging from beaches to the Everglades.

Life as a Florida Atlantic University Owl has never been better! From clubs that serve every academic and leisure-time interest to 19 intercollegiate sports teams, including a football team playing in a 30,000-seat on-campus stadium, there's something for everyone at FAU. Enrichment programs, including honors education, internships and hands-on research in beautiful campus environments, coupled with FAU's outstanding faculty of accomplished scholars and researchers, provide bountiful opportunities for FAU students.

The University's 10 colleges function across six sites, with most colleges offering programs at several locations. The University's original campus is in Boca Raton, a suburban residential community midway between Fort Lauderdale and West Palm Beach. FAU Boca Raton is the administrative home of the Dorothy F. Schmidt College of Arts and Letters, the College of Business, the College of Education, the College of Engineering and Computer Science, the Graduate College, the Charles E. Schmidt College of Medicine, the Christine E. Lynn College of Nursing, the Charles E. Schmidt College of Science and the College of Social Work and Criminal Justice. It is a residential campus with programs at lower-division, bachelor's, master's, specialist's and doctoral levels in many fields.

The Dorothy F. Schmidt College of Arts and Letters and the College of Business offer programs at FAU's downtown Fort Lauderdale campus, as well. Arts and Letters and Business also offer programs at FAU Davie, along with the College of Education, the Christine E. Lynn College of Nursing, the Charles E.

Schmidt College of Science and the College of Social Work and Criminal Justice. The Florida Center for Environmental Studies is headquartered on the Davie campus. In Fort Lauderdale and Davie, FAU is co-located with Broward College. Also in Broward County, FAU Dania Beach provides outstanding research facilities, hosting SeaTech, FAU's Institute for Ocean and Systems Engineering.

FAU's John D. MacArthur Campus in Jupiter offers upper-division and graduate courses from the Dorothy F. Schmidt College of Arts and Letters, the College of Education, the Charles E. Schmidt College of Science and the College of Social Work and Criminal Justice. The campus is home to the Harriet L. Wilkes Honors College, a four-year residential liberal arts and science college for high-achieving undergraduates. The Osher Lifelong Learning Institute at Florida Atlantic University provides non-credit liberal arts courses for adults of all ages. FAU's partnership with the Max Planck Florida Institute for Neuroscience, a unit of the renowned Max Planck Society in Germany, gives graduate, undergraduate, and high school students the unique opportunity to learn from, and work alongside, some of the finest minds in the world, including Nobel Laureates.

Located on the Indian River Lagoon in northern St. Lucie County, FAU Harbor Branch Oceanographic Institute is dedicated to exploration, innovation, conservation and education related to the oceans. As a base of operations for a host of research and academic programs — such as coral reef and estuary studies, marine mammal rescue and rehabilitation, semester by-the-sea programs and a variety of research positions and internships — FAU Harbor Branch provides undergraduate students, graduate students and faculty with a high-tech and dynamic environment that is perfect for their varied pursuits.

## RESEARCH

Research plays a vital role in fulfilling the mission of Florida Atlantic University. The [Division of Research](#) provides oversight, expertise and guidance for all research activities throughout the University. FAU is taking its place among the world's great research centers and has been designated a “High Research Activity” institution by the Carnegie Foundation for the Advancement of Teaching.

To enhance interdisciplinary and collaborative research, FAU has established four university-wide research institutes focused on the University's strengths. These are dedicated to improving and addressing diseases of the brain, enhancing human health and quality of life, protecting the environment locally and globally, and using sensors to monitor the world around us. More information can be found [here](#).

## OVERSIGHT

The [Florida Board of Governors](#) and [FAU's Board of Trustees](#) provide guidance and governance to the University.

## TUITION

Tuition fees are charged for each credit scheduled based on the course level and the residency status of the student. Tuition fees per credit appear in the link below. Tuition fees are subject to change by the Florida Board of Governors at any time. The most current tuition fees can be found [here](#). To view our full cost of attendance information page, visit <https://www.fau.edu/finaid/other/cost-of-attendance/>

## FACTS AND FIGURES

### ENROLLMENT

Total Enrollment (Fall 2023)	30,859
Undergraduate Enrollment (Fall 2023)	23,464
Graduate Enrollment (Fall 2023)	5,934
Degree-Seeking (95 percent)	29,398
Non-Degree (5 percent)	1,461
Florida Residents (81 percent)	25,116

### STUDENT STATISTICS

College	Headcount, Fall 2023	Degrees Awarded, 2022-2023*
Dorothy F. Schmidt College of Arts and Letters	4,154	1,140.5
College of Business	8,781	2,212.5
College of Education	1,788	496
College of Engineering and Computer Science	4,051	677
Harriet L. Wilkes Honors College	610	127

Charles E. Schmidt College of Medicine	316	35
Christine E. Lynn College of Nursing	990	506
Charles E. Schmidt College of Science	6,510	1,631
College of Social Work and Criminal Justice	1,762	626
Undergraduate Studies	22	3
Non-Degree	1,873	

\* Degrees awarded include only bachelor's, master's, specialist's and doctoral.

## TEMPERATURE

Average daily high and low temperatures (in degrees Fahrenheit):

Month	High	Low

## VISION STATEMENT

Florida Atlantic University aspires to be recognized as a university known for excellent and accessible undergraduate and graduate education, distinguished for the quality of its programs across multiple campuses and classified as a very high research institution that is internationally acclaimed for its contributions to creativity and research, as well as its collaborations with regional partners.

## MISSION STATEMENT

Florida Atlantic University is a multi-campus public research university that pursues excellence in its

missions of research, scholarship, creative activity, teaching and active engagement with its communities.

## FAU VALUES

Florida Atlantic University values:

- Excellence — In teaching, research and public service
- Accountability — Taking responsibility for actions and being outcome-based
- Teamwork — Seeking collaborative strategies to solve problems
- Integrity — Telling the truth and delivering on our commitments
- Playing to Win — And helping others win
- Innovation — Striving for creative solutions and continuous improvement
- Student Success — Wholly committing ourselves to our students' futures
- Safety — Providing a secure campus environment
- Shared Governance — Making decisions through collaborative processes
- Professionalism — Performing our responsibilities with ethical behavior
- Customer Service — Exceeding the expectations of our clientele
- Respect — Treating people the way we want to be treated
- Engagement — Collaborating with community to benefit all stakeholders

## HISTORY AND CHARACTERISTICS

Florida Atlantic University was established by the Florida State Legislature in 1961 as the fifth university in the state system. When it opened in 1964, Florida Atlantic was one of the few universities in the country to offer only upper-division and graduate-level work. This model was based on the theory that freshmen and sophomores would be served by the community/state college system. In 1984, the University responded to South Florida's population growth and the need to provide increased access to higher education by admitting its first freshman class.

Today, with its well-developed system of distributed campuses that makes high-quality educational programs accessible throughout its six-county service region, Florida Atlantic University serves as a model for other urban, regional universities. Florida Atlantic offers a comprehensive array of undergraduate and graduate programs, enrolls 30,000 students who reflect the rich cultural diversity of the region and generates an annual economic impact that exceeds \$6.3 billion.

Florida Atlantic University's colleges are the Dorothy F. Schmidt College of Arts and Letters, the College of Business, the College of Education, the College of Engineering and Computer Science, the Graduate College, the Harriet L. Wilkes Honors College, the Charles E. Schmidt College of Medicine, the Christine E. Lynn College of Nursing, the Charles E. Schmidt College of Science and the College of Social Work and Criminal Justice. These colleges offer 99 bachelor's, 73 master's, 3 specialist's and 25 doctoral programs.

In spring 2011, the Charles E. Schmidt College of Medicine was granted preliminary accreditation by the Liaison Committee on Medical Education to offer an independent medical education program, which welcomed its charter class in fall 2011. Provisional accreditation — the next step in the accreditation process — was granted in spring 2013. The College has developed an innovative curriculum that features early and continuous community-based clinical experiences and problem-based learning, with emphasis on small-group and self-directed learning. World-class faculty in the College provide a student-centered and patient-focused approach that includes clinical experiences with local physicians, health departments and hospitals, and a state-of-the-art Clinical Skills Simulation Center. A key component of the innovative curriculum is early exposure to patients and the actual practice of medicine. To that end, the College has established relationships with several prominent area hospitals that serve as sites for clerkships, hospital-based electives and residencies. Florida Atlantic also partnered with the Max Planck Florida Institute for Neuroscience to offer a dual Doctor of Medicine/Doctor of Philosophy (M.D./Ph.D.) degree, with the medical degree conferred by the Schmidt College of Medicine and the doctorate conferred by the Schmidt College of Science.

Opened in 1999, the Harriet L. Wilkes Honors College provides a unique and challenging four-year curriculum for the brightest students from Florida and beyond. In addition, the University is home to a wide-ranging continuing education program and one of the largest and most successful lifelong learning programs in the nation, the Osher Lifelong Learning Institute, with more than 50,000 registrations on the Boca Raton, Ft. Lauderdale and Jupiter campuses.

The University's campus locations are situated along Florida's Gold and Treasure coasts, which boast a temperate climate and beautiful beaches, innovative industry and unique cultural opportunities. University locations provide a stimulating environment for Florida Atlantic's outstanding scholars and researchers. FAU has Eminent Scholar Chairs in many academic disciplines, and it is the home of nationally recognized research centers. The Research Park at FAU is facilitating exciting new research and learning initiatives by bringing high-tech industries into close collaboration with faculty and students. In recognition of the University's research funding and doctoral programs, the Division of Colleges and Universities of the Florida Board of Education has designated Florida Atlantic a research university. Additionally, FAU has been classified a "Research University - High Research Activity" by

the Carnegie Foundation for the Advancement of Teaching. FAU also received the Carnegie Community Engagement Classification, an elective designation that indicates institutional commitment to community engagement.

Florida Atlantic is accredited by the Southern Association of Colleges and Schools Commission on Colleges to award associate, baccalaureate, masters, specialist and doctorate degrees. Contact the Southern Association of Colleges and Schools Commission on Colleges at 1866 Southern Lane, Decatur, Georgia 30033-4097 or call 404-679-4500 for questions about the accreditation of Florida Atlantic University.

Florida Atlantic also is a member of the Association of Public and Land-grant Universities, the American Council on Education and the Council of Graduate Schools.

## BOCA RATON LOCATION

Florida Atlantic University opened in 1964 in Boca Raton on an 850-acre site located near the Atlantic Ocean. The campus is conveniently situated halfway between West Palm Beach and Fort Lauderdale and offers a broad range of academic programs, activities and services.

FAU Boca Raton provides an exciting and supportive learning environment for students. The Student Union is the center for student involvement, hosting student organizations that include fraternities and sororities, student media and student government. Students, faculty, staff and members of the greater community enjoy performances ranging from comedians to opera in the 2,400-seat Carole and Barry Kaye Performing Arts Auditorium in the Student Union. The campus supports a variety of popular dining options and has an attractive array of accommodations for residential students. For its commercial music students, FAU offers Hoot/Wisdom Recordings. One of the most active record labels at any university, Hoot/Wisdom has released more than 30 albums produced by students and commercial music faculty. The campus also is the home of FAU's aquatic center; Eleanor R. Baldwin Arena; baseball, football and softball stadiums; tennis courts and track; as well as a variety of fields for club and intramural sports competition.

The five-story S.E. Wimberly Library houses approximately 3.7 million items, including print and online books, periodicals, government documents, microforms, maps, media and other materials. Additionally, the Library provides an exceptional offering of electronic resources, including access to more than 400 databases. Computer labs, study lounges, a media center and tutoring services provide valuable academic support for students. The Library also is home to the Rubin and Cindy Gruber

Sandbox, a state-of-the-art artificial intelligence lab.

The Boca Raton campus hosts art exhibits, theatre productions and concerts in its galleries and theatres. Visiting performers and speakers add to the artistic and intellectual vibrancy of the campus. The Research Park at FAU, situated on the north side of campus, provides students with internship, research and other opportunities linked to the high-tech industries located there. The Boca Raton campus also is home to the 77,000-square-foot Recreation and Fitness Center, which offers free memberships to students, and the Marleen & Harold Forkas Alumni Center, a "home away from home" for FAU's ever-growing alumni population.

FAU Stadium, the University's 30,000-seat football stadium, opened in 2011 along with the adjacent Innovation Village Apartments, which provide top-quality living accommodations to more than 1,200 students. In the same year, the College of Engineering and Computer Science moved into a state-of-the-art "green" headquarters facility that was awarded platinum-level certification under the Leadership in Energy and Environmental Design (LEED) rating system of the U.S. Green Building Council.

Parliament Hall, a seven-story, 614-bed freshman residence hall, opened in 2013. The residence hall became Florida Atlantic's first student-housing facility to have a faculty member in residence and offers scenic views of the Atlantic Ocean from its top floor units. This facility is gold-level LEED-certified. The Atlantic Park Towers residence hall began housing first-year students in fall 2023, offering 616 beds and a full range of amenities. It increased the total student bed count on the Boca Raton campus to 4,700. Another central space for students on the Boca Raton campus is the Student Union, which features fully renovated areas including meeting and conference rooms, an eSports Arena, an outdoor plaza, banquet facilities and the Carole and Barry Kaye Performing Arts Auditorium.

The Schmidt Family Complex for Academic and Athletic Excellence, located next to FAU Stadium, was added in 2020. This complex creates a national model of academic excellence in athletics to attract the nation's top coaches and student-athletes to FAU. The 166,000-square-foot complex features academic support and athletic training facilities, athletics staff offices, and entertainment venues. It also is home to the College of Business' Executive Education programs and the Avron B. Fogelman Sports Museum.

### **Florida Atlantic University Schools on the Boca Raton Campus**

FAU serves students from kindergarten through 12th grade at the following educational facilities. They are all affiliated with FAU's College of Education and provide observation and internship opportunities for education majors.

#### **FAU High School**

FAU High School, established in 2004, is an intensive dual enrollment public high school. Instead of attending class in traditional high school buildings, students take college-level courses in the environment of university classrooms, laboratories and support facilities. This highly selective program offers high school students (grades 9-12) the opportunity to earn high school credits and university course credits at the same time at no cost to parents or guardians. All costs related to university tuition, fees (except parking) and even books are covered by FAU High School. For information, call 561-297-6612.

### **Alexander D. Henderson University School**

The Alexander D. Henderson University School, a public laboratory school, was established in 1968. The school provides an exemplary educational program for students enrolled in grades K-8 while conducting ongoing educational research and curriculum development to benefit other public schools. It serves as a site for student field experiences and provides an excellent opportunity for teacher trainees to work with highly qualified master teachers in a model school environment. The Henderson School consistently ranks among the top-scoring schools in Florida on standardized tests. Students are selected through a lottery system to ensure demographic balance in the student body. For information, call 561-297-3970.

### **Bezos Academy**

In fall 2022, Florida Atlantic University's Board of Trustees unanimously approved a 10-year facilities use agreement with Bezos Academy to open a tuition-free, Montessori-inspired preschool for low-income families adjacent to A.D. Henderson University School. Its opening in 2023 made Florida Atlantic the first university in Florida and second in America to host the Academy on a college campus.

## **BROWARD COUNTY LOCATIONS**

The Florida Legislature designated Florida Atlantic the lead public institution of higher education in Broward County. The University's three Broward locations support its overall mission by providing access to high-quality, complete undergraduate and graduate degree programs to residents of Broward County and the region. Each of the Broward sites — Dania Beach, Davie and Fort Lauderdale — has a

special focus.

## FAU DANIA BEACH AND THE SEATECH RESEARCH INSTITUTE

Located between the Atlantic Ocean and the Intracoastal Waterway in Dania Beach, this research center provides expanded opportunities for the Department of Ocean and Mechanical Engineering. Graduate students greatly benefit from carrying out research and design projects directly in an ocean environment in the areas of acoustics, marine vehicles, marine materials and nanocomposites, among others. FAU Dania Beach builds on five decades of excellence at Florida Atlantic, which established the nation's first undergraduate ocean engineering program in 1965.

## FAU DAVIE

Working in close partnership with Broward College (BC) and other educational institutions, the Davie campus offers a supportive learning environment with particular sensitivity to students of non-traditional age and culturally diverse backgrounds. A high priority is placed on offering the complete upper-division portion of high-demand undergraduate degree programs. Graduate programs in education, business and nursing are available on the Davie campus, as well.

The campus is located on BC's central campus. Students may enter BC as freshmen and graduate from FAU with undergraduate degrees in more than 30 disciplines.

More than 335,000 square feet of carefully designed classrooms; teaching and research laboratories; and faculty, staff and student offices are located on this campus, along with the shared-use, 112,000-square-foot FAU/BC library designed for the 21st century. Other support facilities include a Student Wellness Center and a multiservice Student Union. The campus hosts the innovative Teaching and Leadership Center and is the base of operations for Florida Atlantic's Everglades research and restoration efforts. In addition, the Davie campus is home to the Florida Center for Environmental Studies (CES), creating a nexus of scientific endeavors that support Florida's unique ecosystem.

## FAU FORT LAUDERDALE

The Fort Lauderdale teaching center is home to the upper-division courses in the accredited professional Bachelor of Architecture degree program and the School of Accounting executive programs. Located in downtown Fort Lauderdale, the FAU/Broward College Higher Education Complex supports research and outreach appropriate to a high-density population center. An adjacent

main branch of the Broward County Library serves students and faculty.

For information about FAU Broward campuses, call the administrative offices at 954-236-1000.

## JUPITER AND TREASURE COAST LOCATIONS

The northern locations of Florida Atlantic University — the John D. MacArthur Campus in Jupiter and the Harbor Branch Oceanographic Institute in Fort Pierce — provide the resources of a great state university to the people of northern Palm Beach County and the Treasure Coast. Articulation agreements with Palm Beach State College and Indian River State College ensure compatibility of degree requirements. Students with Associate of Arts degrees from these state colleges, or any public community or state college in Florida, are guaranteed admission to FAU.

## PINE JOG ENVIRONMENTAL EDUCATION CENTER

Pine Jog is a unit of Florida Atlantic's College of Education. Since 1962, Pine Jog has enjoyed a strong relationship with the School District of Palm Beach County. In 2008, FAU Pine Jog leased property to the School District of Palm Beach County to build Pine Jog Elementary School, a Title I public school that was designed with a strong environmental and scientific focus. In exchange for this property lease, the School District constructed an additional 15,000-square-foot facility to serve as the headquarters of the FAU Pine Jog Environmental Education Center. Both facilities have been awarded Gold LEED Standard Certification as set by the U.S. Green Building Council, and the partners collaborate on curriculum, teacher training and creating a culture of sustainability. The Pine Jog campus is located at the corner of Summit Boulevard and Jog Road in West Palm Beach. In addition to the facilities described above, FAU Pine Jog preserves 135 acres of natural Florida habitat located in a highly urbanized section of central Palm Beach County. Pine Jog offers a myriad of resources to schools and communities designed to promote conservation and encourage responsible decision-making regarding critical environmental issues. For more information, please visit Pine Jog's [website](#).

## JOHN D. MACARTHUR CAMPUS

Named for the late philanthropist, the John D. MacArthur Campus in Jupiter is part of a 2,300-acre, mixed-use planned community called Abacoa. Situated off Donald Ross Road east of I-95, Abacoa incorporates business and residential development. The John D. MacArthur Campus is also known as the Jupiter campus.

This campus is the permanent site for Florida Atlantic's northern Palm Beach County operations, including the Harriet L. Wilkes Honors College. The campus currently occupies approximately 45 acres and includes more than 333,000 square feet of building space. Facilities include classroom/office buildings, scientific research buildings, a library, a 500-seat auditorium, a dining hall, a central utility plant and three residence halls. The newest residence hall, a \$17.1 million, 165-bed facility, opened in 2021 to support the growing campus population. Recreational facilities include a soccer field; swimming pool; and tennis, disc golf, volleyball and basketball courts.

In 2023, Florida Atlantic celebrated the opening of the new \$35 million Stiles-Nicholson Brain Institute building. The building features 58,000 square feet of laboratory and instructional space and has allowed for expansion of collaborative research in the STEM areas, as well as increased enrollment of students in the STEM fields. In 2016, the Brain Institute became a Nikon Center of Excellence, making it the seventh designated center in the United States and 17th worldwide at that time.

The Jupiter campus is home to the Max Planck Florida Institute for Neuroscience (MPFI), which is the Max Planck Society's 80th institute worldwide and its first in the United States. Additionally, the Herbert Wertheim UF Scripps Institute for Biomedical Innovation & Technology is located on the eastern end of the campus.

The Jupiter campus provides a complete range of student services, including Admissions, Financial Aid, Health and Wellness, Career Development and Counseling. Additionally, students have easy access to services provided by the campus offices for Registration and Records and Academic Advising.

The campus offers courses and programs from the colleges of Arts and Letters, Education, Science, and Social Work and Criminal Justice. A list of Jupiter campus degree programs follows. To meet the needs of students who often have competing career and family demands, Florida Atlantic has morning, afternoon and evening classes available each semester. For more information about the Jupiter campus, call 561-799-8500.

FAU High School's Jupiter Campus, in partnership with Max Planck Academy, is the premier early university entrance high school experience for STEM-focused juniors and seniors. Students pursue a university curriculum while having opportunities to receive intensive research training and enrichment experiences from FAU and MPFI faculty. In addition, select students may have the opportunity to pursue independent neuroscience-related research projects in MPFI-sponsored laboratories. FAU High School is the only public, accelerated pre-collegiate program that has every one of its students working toward a cost-free bachelor's degree and high school diploma simultaneously. It paves the way for students to graduate college debt-free. For information, call 561-297-4707.

In addition to offering college credit courses, the Jupiter campus is a site of Osher Lifelong Learning Institute classes for adults who wish to enhance their career skills, pursue individual interests or simply learn something new. For information about Osher Lifelong Learning Institute classes, call 561-799-8547.

## **HARRIET L. WILKES HONORS COLLEGE**

The Harriet L. Wilkes Honors College at Florida Atlantic University celebrated its 25th anniversary in 2024. It is a four-year, residential college located on the Jupiter campus and the first public honors institution in the United States to be built from the ground up. Admission criteria are highly selective. The Wilkes Honors College looks for students whose scholastic performance and abilities demonstrate

an active approach to learning and the potential for academic growth.

With its attractive student/faculty ratio of approximately 15:1, the Wilkes Honors College provides an environment for the highest quality education in liberal arts and sciences. Tutorials, one-on-one learning, small classes and affordable state tuition distinguish it from typical honors programs. To view our full cost of attendance information page, visit <https://www.fau.edu/finaid/other/cost-of-attendance/>. The integration of this specially designed campus into the Abacoa community offers an ideal setting for both informal and formal education — an educational opportunity usually found only at small private colleges.

The Wilkes Honors College offers Bachelor of Arts and Bachelor of Science degrees in Liberal Arts and Sciences and Bachelor of Arts and Bachelor of Science degrees in Biological and Physical Sciences. Students choose areas of concentration from the humanities and social sciences or the natural and life sciences. While completing this degree, students actively participate in designing their individual educational programs. They also acquire the valuable lifelong skill of learning independently.

## FAU JUPITER DEGREE PROGRAMS

### DOROTHY F. SCHMIDT COLLEGE OF ARTS AND LETTERS

#### **Undergraduate:**

English  
History  
Interdisciplinary Studies  
Multimedia Journalism  
Political Science  
Public Management  
Women, Gender and Sexuality Studies (minor)

#### **Graduate:**

Public Administration

## FAU HARBOR BRANCH

Florida Atlantic's Harbor Branch Oceanographic Institute, located in northern St. Lucie County, is a state-of-the-art research facility dedicated to exploring the world's oceans, integrating the science and technology of the sea with the needs of humankind. FAU Harbor Branch is involved in research and education in biological, chemical, environmental and marine sciences; marine biomedical sciences; marine mammal conservation; and aquaculture and ocean engineering. Undergraduate students, graduate students and faculty enjoy a high-tech and dynamic environment that is perfect for their varied pursuits. For information, call 772-242-2400.

## ACADEMIC COMMON MARKET

The Academic Common Market is an interstate agreement among Southern states for sharing academic programs at both the baccalaureate and graduate levels. The following participating states are able to arrange for their certified residents who qualify for admission to enroll in specific programs in other states on an in-state tuition basis. For information, call the Graduate College at 561-297-3624.

Alabama	Kentucky	South Carolina
Arkansas	Louisiana	Tennessee
Delaware	Maryland	Texas*
Florida*	Mississippi	Virginia
Georgia	Oklahoma	West Virginia

\* Graduate level only

## OFFICE OF CIVIL RIGHTS AND TITLE IX

The Office of Civil Rights and Title IX (OCR9) at Florida Atlantic University strives to uphold ethical behavior and ensure adherence to relevant laws, regulations, and policies. OCR9 is committed to fostering a working and learning environment free of any unlawful discrimination, harassment or retaliation.

To ensure the University's adherence to federal and state laws addressing discrimination and harassment, as well as University policies and regulations, the OCR9 team is responsible for:

- Managing the University's response and support regarding reports and complaints of unlawful discrimination and harassment.
- Enforcing the University's Anti-Discrimination and Anti-Harassment Regulations and Prohibited Discrimination and Harassment Policy.
- Investigating complaints of discrimination, discriminatory harassment, sexual misconduct, and retaliation that occur in University programs and activities.
- Facilitating the University's employee reasonable workplace accommodations process.
- Providing information, guidance, training, and resources to the FAU community about discrimination and harassment prevention, disability accommodations and sexual misconduct prevention.

Adhering to ethical principles and upholding the values of doing what is right contributes to a positive environment within the Florida Atlantic community and is crucial to stopping discrimination and harassment at FAU. This commitment aids in preventing these issues, addressing them when they occur and ultimately promoting the institution's mission and longstanding commitment to excellence. For additional information, refer to OCR9's [website](#).

## FAU ALUMNI ASSOCIATION

Florida Atlantic graduates can stay in touch with the University through the FAU Alumni Association. Offering programs, publications and services throughout the year, the Alumni Association is governed by a volunteer Board of Directors that meets quarterly. Its 13,000-square-foot facility on the Boca Raton campus, the Marleen & Harold Forkas Alumni Center, serves as a gathering place for alumni and as a venue for a variety of alumni and campus-wide events and traditions.

Programs sponsored by the Alumni Association include the Alumni Hall of Fame and Distinguished Alumni Awards; the Talon Leadership Awards and Parliament of OWLs events at Homecoming; cultural, sports and social events; and professional development and networking programs. The Alumni Association also awards annual scholarships to students. The Student Alumni Association, comprised of the general Association, the Ambassadors and the prOWLers, is sponsored by the FAU Alumni Association.

Among the more than 204,000 FAU alumni are U.S. and foreign dignitaries; Emmy, Grammy and Pulitzer Prize winners; an astronaut; professional athletes; and executives who have served in

organizations such as Google, Franklin Templeton, Boeing, eBay, Motorola and the White House.

The Office of Alumni Relations is the primary liaison between the University and the FAU Alumni Association, the Association's Board and the Student Alumni Association. The office coordinates programs and events for FAU graduates, students and friends. For information, visit [www.faualumni.org](http://www.faualumni.org).

## FAU FOUNDATION

The Florida Atlantic University Foundation, Inc., is a non-profit corporation established to provide the private support that tax-assisted universities such as Florida Atlantic must have to achieve excellence. The Foundation, part of FAU's Division of Institutional Advancement, provides support for scholarships, research, faculty resources and capital projects with regard to the expressed wishes of its donors and in conformity with the mission of the University. All gifts to the Foundation are tax-deductible in accordance with rules of the Internal Revenue Service. The Chief Executive Officer, officers and board members of the Foundation are prepared to counsel interested parties regarding the types of gifts that can be made and tax benefits resulting from donations.

## ENDOWMENTS AND AWARDS

The University's endowment is housed under the FAU Foundation, Inc. In 1973, upon the retirement of Florida Atlantic University's founding president, Dr. Kenneth R. Williams, an endowment of \$50,000 was set up in his honor by a group of contributors. Interest on this endowment supports two \$1,000 awards presented to graduating seniors, one for leadership and one for outstanding scholastic achievement.

The University has 17 Eminent Scholar Chairs, each endowed at \$1 million or more:

- The Glenwood and Martha Creech Eminent Scholar Chair in Science
- The John M. DeGrove Eminent Scholar Chair in Growth Management and Development
- The William F. Dietrich Eminent Scholar Chair in Philosophy
- The Kenan Evren Eminent Scholar Chair in Turkish Business Studies
- The Herbert and Elaine Gimelstob Eminent Scholar Chair in Judaic Studies
- The Christine E. Lynn Eminent Scholar Chair in Nursing
- The Eugene M. and Christine E. Lynn Eminent Scholar Chair in Business
- The John Thomas Ladue McGinty Eminent Scholar Chair in Biology

- The Dr. Robert J. Morrow Eminent Scholar Chair in Social Science
- The Charles Stewart Mott Eminent Scholar Chair in Community Education
- The Office Depot Eminent Scholar Chair in Small Business Research
- The Helen Karpelenia Persson Eminent Scholar Chair in Community Caring
- The Raddock Family Eminent Scholar Chair in Holocaust Studies
- The Charles E. Schmidt Eminent Scholar Chair in Engineering
- The Dorothy F. Schmidt Eminent Scholar Chair in the Arts
- The Dorothy F. Schmidt Eminent Scholar Chair in Humanities
- The Dorothy F. Schmidt Eminent Scholar Chair in the Performing Arts
- Private and state matching funds also established endowments for professorships, fellowships and scholarships at FAU.

## INSTRUCTIONAL RESOURCES

The Office of Information Technology (OIT) is responsible for the University's IT infrastructure and services, information security systems and compliance, administrative systems and client support services. OIT responds as a service and a technical support provider, as well as a consulting resource for many teaching and research efforts. Technology supported includes wireless and wired networks, servers, University-wide e-mail and storage system, software development and operational support of the University's administrative applications, and a centralized technical support.

OIT provides instructional resources to the Florida Atlantic community that include Audiovisual Services, Canvas, Electronic Classrooms, Instructional Computer Labs, Training, Virtual Apps and Videoconferencing, Zoom, Microsoft Teams, and LinkedIn Learning, among many others.

Visit OIT's [website](#) for additional details.

## ONLINE EDUCATION/DISTANCE LEARNING

Florida Atlantic offers a variety of online courses to help meet the needs of students who require more flexibility in their coursework. These courses are designed for students who may not be able to attend a class at a specific time, day or place due to work schedules, family responsibilities, travel or physical challenges. Currently, FAU offers more than 1,000 classes and more than 40 degree programs via non-traditional delivery methods, including interactive video, video streaming, multimedia-enhanced lectures and online. For more information, visit the Center for Online and Continuing Education

[website.](#)

FAU's fully online programs are for students who intend to complete their entire degree online with no on-campus classes. Students may convert to a campus-based or fully online program ONLY once during their enrollment at FAU. Switching back and forth between the campus programs and the online programs is not allowed.

## UNIVERSITY LIBRARIES

The University Libraries include the S.E. Wimberly Library on the Boca Raton campus, collections housed at the Broward County Public Library to serve FAU in downtown Fort Lauderdale, a shared-use library with Broward College in Davie, a 20,000-square-foot library on the John D. MacArthur Campus in Jupiter and a library at Harbor Branch Oceanographic Institute.

The Wimberly Library is a 165,000-square-foot building in the heart of the Boca Raton campus. It provides faculty and student group study rooms, study carrels, seating for approximately 1,200, an electronic classroom, facilities for individuals with disabilities, an audiovisual media center, a computer lab, and the Rubin and Cindy Gruber Sandbox, a 3,400-square-foot artificial intelligence lab. In addition to the computers available for use throughout the library, the entire building is equipped for wireless connectivity. Reference assistance is offered in person or by telephone, email, chat or text. Library instruction sessions may be arranged for classes or individuals. A five-story addition provides students with a 24-hour study location and housing for several special collections.

The University Libraries' extensive holdings of approximately 3.7 million items include books, periodicals, government documents, microforms, maps, media and unique special collections in book arts, American Revolutionary War and Civil War documents, print and recorded music, rare books and manuscripts, and archival materials. The libraries also provide a wealth of electronic resources, including more than 580,000 full-text electronic books and 59,000 full-text electronic journals, plus access to nearly 500 databases.

An online catalog of library holdings provides a listing of materials in the FAU Libraries and the other 11 Florida public university libraries. The library pays for student and faculty access to hundreds of databases, many with full-text articles and books, which are available through the Internet both in the library or off-campus using EZproxy. Through memberships in the Southeast Florida Library Information Network (SEFLIN) and the Center for Research Libraries (CRL), the collections of area libraries and the CRL are available to FAU students, faculty and staff. Research materials not available

in the FAU Libraries' collection may be obtained through interlibrary loan.

[Introduction to FAU](#)[General Information](#)[Academic Calendar](#)[Academic Policies and Regulations](#)[Admissions](#)[Appendices](#)[Campus Maps](#)[Degree Programs](#)[Degree Requirements](#)[Faculty and Administration](#)[Financial Assistance Opportunities](#)[Programs for Enrichment and Specialization](#)[Registration and Records](#)[Student Services and Activities](#)[Tuition, Fees and Refunds](#)

### ACADEMIC PROGRAMS

### COURSE DESCRIPTIONS

## ACADEMIC POLICIES AND REGULATIONS

This Academic Policies and Regulations section is divided into the following subsections. The subsections appear in the following order:

- [Policies for All Students](#)
- [The Grading System](#)

- [Additional Policies for Undergraduate Students](#)
- [Additional Policies for Graduate Students](#)
- [Acceleration Mechanisms for Undergraduate Students](#)  
**including:**
  - [AICE](#)
  - [AP](#)
  - [CLEP](#)
  - [Excelsior](#)
  - [IB](#)
  - [Military Service College Credit \(DSST\)](#)
- [Student Code of Conduct Regulations](#)

## POLICIES FOR ALL STUDENTS

### ADMISSION TO PROFESSIONAL PROGRAMS

Certain courses of study at the University prepare students for entry into a profession, such as architecture, education, nursing and social work. Admission and retention in these programs may require adherence to a professional Code of Ethics. For the requirements of these degree programs, refer to the specific program's information in this catalog or to other materials provided by these programs.

### ATTEMPTED HOURS

Courses appearing on a student's schedule after the drop/add period are considered attempted hours. (See the [Academic Calendar](#) for the last day to drop/add without fee liability.) Courses that a student drops or withdraws from after the drop/add period are also considered attempted hours. Students will find their total attempted hours in their unofficial and official transcripts. For undergraduate students, attempted hours are used to calculate the Excess Hours Surcharge; click [here](#) or see the [Excess Hours Surcharge](#) information below. Refer also to the subsection [Drop/Add and Withdrawal](#) below for other pertinent information regarding dropped courses, withdrawing from courses and fee liability.

### ATTENDANCE

Students are expected to attend all of their scheduled University classes and to satisfy all academic

objectives as outlined by the instructor. The effect of absences upon grades is determined by the instructor, and the University reserves the right to deal at any time with individual cases of non-attendance.

Students are responsible for arranging to make up work missed because of legitimate class absence, such as illness, family emergencies, military obligation, court-imposed legal obligations or participation in University-approved activities. Examples of University-approved reasons for absences include participating on an athletic or scholastic team, musical and theatrical performances and debate activities. It is the student's responsibility to give the instructor notice prior to any anticipated absence and within a reasonable amount of time after an unanticipated absence, ordinarily by the next scheduled class meeting. Instructors must allow each student who is absent for a University-approved reason the opportunity to make up work missed without any reduction in the student's final course grade as a direct result of such absence.

### **Attendance on First Day of Class**

Students are required to attend the first day of class for any course in which they are registered. If a student misses the first day of class for any reason, the student may be administratively withdrawn from the course.

### **Registration Requirement**

No student may attend a course for which he or she is not registered, either as a degree-seeking student or as a non-degree-seeking student.

### **Communication Devices**

Student use of communication devices in the classroom shall be determined by individual faculty members subject to applicable University regulations and policies and applicable state and federal law, including but not limited to the classroom recording provisions in Florida Statute 1004.097. Students should refer to the course syllabus for policies.

## **COURSE CREDITS AND LEVELS**

### **The Semester System**

Since fall 1981, courses taken at FAU are based on the semester system. FAU offers the traditional fall, spring and summer semesters. Each semester is divided into three terms: term 1 is the entire semester, term 2 is the first half of the semester and term 3 is the second half of the semester.

FAU also offers three intersession mini-terms: The 6-week fall intersession, the 3-week spring

intersession and the 7-week summer intersession. In addition, students may choose from three 5-week mini-terms during the fall and spring semesters only. Please refer to the [Academic Calendar](#) for additional information.

All credits awarded by FAU are semester credit hours. Quarter credits may be converted to semester credits by multiplying the quarter credits by  $\frac{2}{3}$  (i.e., 90 quarter credits = 60 semester credits).

### **The Trimester and Quarter Systems**

FAU began offering courses in fall 1964 with credit based on the trimester system. In fall 1967, when the State University System of Florida switched to the quarter system, FAU began offering courses in quarter credits and did so through summer 1981. Transcripts printed during this period were in quarter credits using this formula: quarter credit =  $\frac{3}{2}$  trimester/semester credit (i.e., 90 quarter credits = 60 trimester/semester credits).

### **Course Levels**

The level of a course determines whether it is an undergraduate or graduate course and whether it is an upper-division or lower-division course.

Courses at the 1000, 2000, 3000 and 4000 levels are undergraduate courses. Those at the 1000 and 2000 levels are considered lower-division courses; those at the 3000 and 4000 levels are upper-division courses. Courses at the 5000, 6000 and 7000 levels are graduate courses.

### **Course Numbering System**

For more information, refer to Florida's Statewide Course Numbering System (SCNS), Appendix C in the [Appendices section](#) of this catalog and to the [SCNS website](#).

## **CREDIT TOTALS POSTED ON THE FAU UNOFFICIAL AND OFFICIAL TRANSCRIPTS**

When looking at the unofficial or official transcript, please note that all credits attempted and earned at any previous institution will be listed. If a student repeated any course at an institution, that course will be noted on the transcript as a repeat. The student's GPA from each institution attended will also be posted. However, these courses and GPAs will have no effect on the student's academic standing at FAU. This work is listed under the headings of Institution, Transfer, Total Transfer and Cumulative.

All credits attempted and earned at FAU are posted on the transcript and used for computing the student's GPA and posting academic standing (such as good standing, probation, etc.). Any course repeated at FAU using the Forgiveness Policy will also be noted on the transcript. FAU coursework is

listed under the headings of Current Term, Cumulative, FAU Total, Overall and Total Institution.

Any course taken outside of FAU will not affect the student's FAU GPA nor academic standing.

## DROP/ADD AND WITHDRAWAL

Schedule changes may be made by accessing FAU Self-Service, available through [MyFAU](#), by the appropriate deadlines. Drop/add requests and withdrawals also may be made through MyFAU. Students should understand that adding late into a course might put them at a disadvantage because of the number of classes missed since the start of the semester. Further, not all professors allow students to enter their classes if they have missed the first class. Students must get permission from professors to enter a course late.

Students may generally add or drop courses during the first week of the term without incurring a fee and without receiving a “W” on the transcript for dropped courses. As deadlines vary by the semester and mini-term of registration, please refer to the [Academic Calendar](#) for specific dates to drop/add without fee liability and the deadline for dropping with a “W.”

### Limitations on Number of Withdrawals

Undergraduate students may not withdraw (with a grade of “W” or “ZR”) from more than two courses at the lower-division level (1000- and 2000-level courses) and from more than three courses at the upper-division or higher level (3000- and 4000-level courses; the limitation also applies to undergraduates taking graduate-level courses). Zero- and one-credit courses are excluded from these limitations. Exceptional Circumstance Withdrawals, which carry the “WM” grade, are excluded as well.

### Complete Course Withdrawal

*Undergraduate students wishing to drop or withdraw from all of their classes, please complete the following:*

1. Drop or withdraw from all but one class through MyFAU by the established deadlines.
2. Complete the online FAU Complete Course Withdrawal form through the MyFAU portal.
3. Once received, the Dean of Students Office will review the form and contact the student, if appropriate, to discuss possible strategies or interventions to ensure a timely graduation.
4. The Office of the Registrar will process the withdrawal from the student's final class(es).

*To drop or withdraw from courses during summer terms, students should follow the procedures*

above, but note the time frames in which to complete the drops. Refer to the [Academic Calendar](#) for specific deadlines (and consequences) to drop summer courses.

*Graduate students who wish to withdraw from a graduate program*, click [here](#) for details.

### **Additional Drop/Withdrawal Policies**

Dropped courses, specifically those dropped during the second week of the term after the drop/add period, those that receive a grade of “W” on the transcript and those that receive a grade of “F” on the transcript, will count as attempted hours on the student’s record. Refer to the [Attempted Hours](#) subsection above for information regarding this calculation and its consequences.

Proportionate dates for dropping and withdrawing will be established for courses that are offered in less than the normal semester.

Dropping or withdrawing from courses in which the student is involved in academic irregularities is not permitted.

The subsections Refund of Registration Fees and Repeated Enrollment Fee in the [Tuition, Fees and Refunds section](#) of this catalog may be of interest.

## **ENROLLMENT AND AWARDING OF CERTIFICATE PROGRAMS**

### **Declaring a Certificate and Deadline for Conferral**

Students should declare their interest in pursuing a certificate as early as possible during their enrollment at Florida Atlantic University. Undergraduate students should consult with their academic advisors to discuss enrollment in courses that lead to a certificate to ensure that the enrollment would not affect their timely graduation. Graduate students must officially apply to the academic department managing the certificate program.

Upon completion of all coursework associated with the certificate, students must submit an application for degree/certificate to their college (graduate students must submit the application to the Graduate College). The latest a student can request the awarding of the certificate would be:

- the last term of enrollment in the certificate program; or
- the last term of enrollment in a degree program for students concurrently enrolled in both a certificate and degree program.

Students may not re-enroll (as either degree seeking or non-degree seeking) to request a certificate in

which previously earned credits constituted the completion of the certificate.

### **Recency of Credit**

Students not concurrently enrolled in a degree program must complete all coursework toward the certificate no later than five years from initial enrollment in coursework that is applicable to the certificate. Degree-seeking students must complete certificate coursework within 10 years of the initial enrollment in coursework that is applicable to the certificate. Individual colleges/departments may establish more strict requirements for recency of credit.

### **Transfer Credit**

Upon approval by the academic program, no more than 25 percent of the credits required for the certificate can be transferred from another institution. Individual colleges/departments may establish more strict requirements for transfer credit.

## **EXCEPTIONAL CIRCUMSTANCE WITHDRAWAL (MEDICAL WITHDRAWAL)**

Students withdrawing from all classes in the current semester due to exceptional circumstances, such as illness of the student, military conscription, becoming primary care-giver to immediate family member or death of an immediate family member (parent, spouse, child, sibling or grandparent), may receive a refund, less non-refundable fees, if the request for exceptional circumstance withdrawal is granted.

Students seeking exceptional circumstance withdrawals should contact the Associate Vice President and Dean of Students at 561-297-3542 for the appropriate paperwork or visit

[www.fau.edu/dean/exceptional-withdrawal.php](http://www.fau.edu/dean/exceptional-withdrawal.php).

## **FAU EMAIL**

FAU's primary source for correspondence with students is through the student's FAU email. Messages sent by the University may include time-sensitive information regarding student accounts, announcements and class information. Students are responsible for checking their FAU email on a regular basis. FAU provides an Office 365 email account to all students upon admission and through 1 year after attending the University. For more information about FAU email, click [here](#). For issues with logging into MyFAU, contact the [Office of Information Technology Help Desk](#) or 561-297-3999.

## **FINAL EXAM PERIOD**

Fall and spring term final course examinations will be scheduled during the final week of the term (see

[Final Exam Schedule](#) for current term). Some final examinations may be scheduled on Saturdays and Sundays. The summer semesters do not have final examination periods; course examinations may be given at the discretion of the faculty member teaching the course.

## HONORS CONVOCATION

An Honors Convocation is held each year to recognize high scholastic attainment by individual students and superior teaching by individual faculty members. The program consists of the presentation of various awards to outstanding scholars, the Distinguished Teacher of the Year, the Distinguished Researchers of the Year and Distinguished Service Award recipients.

## GRADUATION PROCEDURE

Students must apply for a degree by the end of the third week of the semester in which they expect to graduate. The Application for Degree form is available on the Office of the Registrar's [website](#). It is the student's responsibility to meet all requirements for the degree. For the deadlines to submit an application for a degree, consult the [Academic Calendar](#).

**Note:** Undergraduate students should refer to the [expectations for timely graduation](#) elsewhere in this section to ensure the timely completion of their degree.

### **Graduating Student Survey**

As part of the degree application process, all undergraduate students are required to complete the Graduating Student Survey. This brief online survey provides a snapshot of students' post-graduation plans. University funding is tied to FAU's ability to report this information. All undergraduates who are graduating must complete the survey to obtain their official transcript. The link to complete the survey will be emailed to students two weeks prior to the last day of classes.

### **Commencement**

Commencement ceremonies are held at the end of each fall, spring and summer semester. Candidates for graduation will be emailed (to their FAU email address) specific information regarding participation in the ceremony and tickets for guests.

## INSTITUTIONAL COMPLAINT PROCESS

Students who have a complaint about their educational experience at Florida Atlantic University that is

not resolved through internal University procedures may contact the following agencies for assistance:

Southern Association of Colleges and Schools

Commission on Colleges

1866 Southern Lane

Decatur, Georgia 30033-4097

## INTELLECTUAL PROPERTY

As a condition of enrollment, students agree that the FAU Intellectual Property Policy applies to University personnel as defined in that policy in section C.1.b., which includes students involved in research who use appreciable University support. These individuals may be involved in research that could result in valuable intellectual property in which FAU may assert its rights. Students agree to abide by the [Intellectual Property Policy of FAU](#) regarding the assignment of intellectual property rights to FAU and the ownership of this intellectual property by FAU. Students further agree that all records that are generated as a part of their research will remain the property of FAU, and upon termination of their research or assistance in research, they will return all such records to their FAU supervisor.

In the event that students are employed by an entity or perform research for an entity other than FAU, which may result in intellectual property, they agree to obtain appropriate prior consent from that entity to the above stated terms.

## POLICY FOR THE USE OF PHOTOGRAPHS AND VIDEOS

Florida Atlantic University routinely photographs and records video of college and departmental programs and student activities for educational and promotional purposes. These photographs and videos appear in official University marketing, fundraising and educational publications and materials, which include but are not limited to college and departmental brochures and newsletters, University websites (ex. FAU.edu and FAU.com), official University social media sites and other University publications and media outlets. For more information, contact Marketing and Creative Services at (561) 297-2080 or (561) 297-1352.

## RELIGIOUS ACCOMMODATION

In accordance with regulations of the Florida Board of Governors and Florida law, students have the right to reasonable accommodations from the University in order to observe religious practices and beliefs with regard to admissions, registration, class attendance and the scheduling of examinations and work assignments. University Regulation 2.007, Religious Observances, sets forth this policy for FAU and may be accessed on the FAU website at [www.fau.edu/regulations](http://www.fau.edu/regulations).

Any student who feels aggrieved regarding religious accommodations may present a grievance to the director of Equal Opportunity Programs. Any such grievances will follow Florida Atlantic University's established grievance procedure regarding alleged discrimination.

## THE GRADING SYSTEM

### UNDERGRADUATE AND GRADUATE GRADING

Florida Atlantic University has a plus/minus (+/-) grading system. Grades for the undergraduate and graduate courses are reported by the symbols indicated in the following table:

Grade	Grade Points per Credit
A	4.00
A-	3.67
B+	3.33

B	3.00
B-	2.67
C+	2.33
C	2.00
C-	1.67
D+	1.33
D	1.00
D-	0.67
F	0.00
AU (Audit)	No credit
CR (Credit by Exam)	Credit only
I	Incomplete
NC	No credit
NR	No reported grade
P (Pass)	Undergraduates only, Credit only
S (Satisfactory)	Credit only
U (Unsatisfactory)	No credit
W (Withdrawal)	No credit
WM (Withdrawal— Exceptional Circumstance)	No credit

## ADMINISTRATIVE NOTATIONS

The following notations are not grades and are not assigned by instructors, but are entered administratively on the transcript when appropriate:

AU	Audit
CR	Credit only
NC	No credit
NR	No reported grade
W	Withdrawal
WM	Withdrawal (Exceptional Circumstance)
ZR	Drop retained (see note below)

The "AU" notation carries no credit and indicates that the student registered for the course only as an auditor.

A "CR" notation indicates that the student received credit for the course by examination (see Credit by Examination later in this section).

The "NC" notation indicates no credit and only pertains to General Education Program courses and selected lower-division courses. More information on the [NC grade](#) appears below.

The "NR" notation is temporarily added to the transcript by the Registrar's Office when an instructor does not turn in a grade for a student in a particular course by the deadline for submission in the semester the course was taken. The "NR" is not a grade, and courses so marked are not included in the grade point average. When the instructor submits a grade to the Registrar's Office, the "NR" notation is replaced.

A "W" notation indicates that the student withdrew from the course during the period after the end of Drop/Add week up through the **Last Day to Drop With a "W."** Please review the [Academic Calendar](#) for specific dates. The course appears on the transcript, but no credit is awarded and the course is not included in the grade point average.

The "WM" notation indicates that the student was granted an Exceptional Circumstance withdrawal.

The "ZR" notation appears next to courses that are dropped after the drop/add period. Drop retained courses are used in the calculation of [attempted hours](#). Note: The ZR notation is no longer in use, but noted here for historical purposes.

## CHANGES OF GRADE

Instructors may, for appropriate reasons, change the grade awarded to a student in a given course within one year of the end of the semester in which the course was taken. If the student received an Incomplete ("I") grade at the conclusion of the course and a letter grade was subsequently assigned, that grade may be changed within one year of the date it was assigned.

After more than one year has passed, the instructor must submit an email to their department chair/school director with the student's name, course subject and number, final grade, and the reason for the delayed grading. The department chair/school director would review and if approved, send to the college dean (or designee). The college dean (or designee) would review and if approved, forward to the Dean of Undergraduate Studies or the Dean of the Graduate College as is appropriate. The final approval is then sent to the Registrar's Office to update the student's record. For College of Medicine medical students, final approval of a late grade change will be completed by the College of Medicine Dean (or designee) and then sent to the College of Medicine Registrar's Office to update the student's record.

Grade changes other than "I" to a grade (e.g., "A" to "B," or "C" to "B") are documented in college records indicating the reason for the change (error in grading test, miscalculation, etc.).

Academic Actions are recalculated and updated as a result of grade changes. Once a degree has been awarded, all coursework leading to that degree is considered final. Grade changes or withdrawal petitions for coursework leading to an awarded degree may be considered only in cases of documented University error or if the coursework in question is documented as solely applying to a degree that is still in progress. All other grade change and withdrawal petition policies still apply.

## INCOMPLETE GRADES

Students who register for a course but fail to complete the course requirements without dropping the course will receive a grade of "F" from the course instructor. A student who is passing a course but has not completed all the required work because of exceptional circumstances may, with the approval of the

instructor, temporarily receive a grade of "I" (incomplete). The grade of "I" is neither passing nor failing, and it is not used in computing a student's grade point average. The "I" grade is not to be used to allow students to do extra work to raise the grade earned during the regular term. It indicates a grade deferral and must be changed to a grade other than "I" within a specified time frame, not to exceed one calendar year from the end of the semester during which the course was taken.

Students cannot graduate from any FAU degree program with a grade of incomplete ("I") on their academic record. Additionally, students pursuing the A.A. degree cannot graduate with an "I" grade on their transcripts.

Instructors use the online grading system to enter "I" grades and expectations for course completion. This includes the academic work the student is missing, the deadline for completion of that work and the grade that will be assigned if the work is not completed by the deadline. It is the student's responsibility to make arrangements with the instructor for the timely completion of this work.

### **Possible ways to resolve "I" grades are:**

1. Complete the work required in the "I" grade agreement made with the instructor.
2. Request that the default grade filed by the instructor be immediately recorded. With approval of either the instructor or department chair, a grade of "F" may be recorded if the instructor did not submit the required documentation with the "I" grade.
3. Petition to withdraw from the course, if exceptional circumstances show merit.

Changes to incomplete grades not resolved beyond the one-year deadline require approval at the University level. See Changes of Grade language, second paragraph above.

[Link to additional grading information for graduate students](#)

## **GRADING INFORMATION SPECIFICALLY FOR UNDERGRADUATE STUDENTS**

### **Standard Grading**

The grades of "A" through "D-" are passing grades, and credit is earned for courses in which they are awarded. Grades of "D+," "D" or "D-," while considered passing for undergraduate students, indicate weak performance. While the credits count toward graduation, some programs require certain courses to be passed with a "C" or better, or some other specific grade, to fulfill requirements for the major. No lower grade, such as a "C-" in this example, will satisfy these program requirements. (See the [Degree Requirements section](#) of this catalog for other requirements, such as Writing Across

Curriculum/Gordon Rule courses.) The grade of "F" is a failing grade and does not earn credit.

### **No Credit (NC) Grading Policy**

The No Credit grading policy is designed to enable degree-seeking Florida Atlantic University students the opportunity to progress through to a timely and successful graduation. This policy allows students to recover from initial difficulties they may experience in the transition to the rigors of university academic coursework.

This policy is limited to courses in the General Education Program and selected lower-division courses. Students will receive a grade of NC (No Credit) if their grade does not meet the minimum requirement. NC grades are not calculated in the student's grade point average (GPA). Grades that meet the minimum will appear as earned on the student's transcript and will be calculated in GPA.

#### ***The following conditions apply to this policy:***

1. The grade of NC is applied a maximum of four times to the listed courses during the student's academic career at FAU and applies only to courses carrying two or more credits.
2. Students receiving one or more NC grades are subject to the University's academic standing flags (probation, suspension, etc.) and must abide by the stipulations for continuation determined by their academic advisor.
3. The grade of NC may not be applied to repeated courses.
4. The NC grade may not be applied to grades awarded due to an academic irregularity. (See University Regulations, Chapter 4, Regulation 4.001, [Code of Academic Integrity](#).)
5. Students wishing to have their earned grade applied (and thus to remove their NC grade) must petition the Office of the Registrar.

#### ***The following courses (and the minimum required grade) fall under this policy:***

1. General Education mathematics and General Education Writing Across Curriculum (WAC or Gordon Rule Writing) courses: Minimum grade is C.
2. All other General Education courses: Minimum grade is D-.
3. MAT 1033 (prerequisite to General Education math course): Minimum grade is C.
4. CHM 1025 (prerequisite to General Education chemistry course): Minimum grade is D-.
5. Beginning foreign language courses, such as SPN 1120 and SPN 1121: Minimum grade is D-.

Students should understand that all coursework, including those courses for which the NC grade policy has been applied, counts in the calculation of [excess hours](#). Students might eventually incur additional fees in the pursuit of their degree. Therefore, they will need to chart their plan of study in consultation with an academic advisor.

## Satisfactory/Unsatisfactory Grading

Certain courses are designated by the department offering them to be graded on a Satisfactory/Unsatisfactory (S/U) basis. In such courses, the grade of "S" indicates satisfactory work and will be awarded credit for the course, but the course will not be included in the grade point average. The grade of "U" indicates unsatisfactory work, will not be awarded credit for the course and will not be included in the grade point average. "S" and "U" grades are not associated with letter grades of "A" through "F." The course syllabus will define what constitutes satisfactory work.

## University Forgiveness Policy (Repeated Courses)

The University Forgiveness Policy permits an undergraduate student to repeat an FAU course and allows only the higher grade to count in the grade point average. The policy does not remove the previous grade but eliminates the effect of that grade on the student's GPA by removing it from the computation. The Forgiveness Policy does not apply to non-degree or transient students. However, students can use forgiveness for classes taken as non-degree if they are degree seeking at the time of the repeat. Undergraduates are permitted to apply the Forgiveness Policy at any time prior to graduation.

Forgiveness Policy Request forms are available [here](#) and should be submitted after the course has been repeated. In the event that a student chooses to repeat a course that is no longer offered by the University, it is the prerogative of the academic unit that offered the original course to either deny the student's request or to designate an appropriate, related substitute course. All freshmen wishing to use the Forgiveness Policy must obtain the approval of an advisor.

### *The following conditions apply to the use of the Forgiveness Policy:*

1. Students may request forgiveness up to three times during their undergraduate study at the University. No more than two forgiveness requests may be at the 3000 and 4000 levels. Undergraduate students approved to take graduate-level courses (5000-level) toward their undergraduate degree may use one of the two upper-division (3000/4000 level) forgiveness requests toward a 5000-level course.
2. The Forgiveness Policy does not apply to S/U courses.
3. The repeated course must be taken at FAU.
4. Grades awarded due to academic irregularities cannot be removed from the GPA calculation under the Forgiveness Policy. (See University Regulations, Chapter 4, Regulation 4.001, [Code of Academic Integrity](#).)
5. For transferred courses, grade forgiveness by the prior institution will be honored by Florida Atlantic University.

Students should understand that all coursework, including those courses for which the Forgiveness Policy has been applied, counts in the calculation of **excess hours**. Students might eventually incur additional fees in the pursuit of their degree, so they will need to chart their plan of study in consultation with an academic advisor.

### **Grade Point Average (GPA) Computation**

Except as provided by the University Forgiveness Policy, an undergraduate student's grade point average is computed by dividing the sum of all grade points earned at FAU by the total number of credits in all courses for which the grades of "A" through "F" have been received. Courses in which notations/grades of "S," "U," "I," "P," "AU," "CR," "W," "WM" or "ZR" have been received will not be used in computing a student's grade point average.

## **GRADING INFORMATION SPECIFICALLY FOR GRADUATE STUDENTS**

**Passing grades:** The grades of "A" through "C," and "S," are passing grades. Note: The grades of "B-," "C+" and "C," while considered passing for undergraduate students, are often indicative of unsatisfactory work for graduate students and may not be accepted for some courses.

**Failing grades:** The grades of "C-," "D+," "D," "D-," "F" and "U" are failing grades. No credits are earned in courses in which grades of "AU," "CR," "F," "I," "U," "W," "WM" or "ZR" are received.

**Thesis/dissertation grades:** All thesis/dissertation credits receive a grade of "S" or "U."

The grades "S" and "U" are used to indicate satisfactory or unsatisfactory performance in courses approved for such grading.

A student who registers for a course but fails to meet the course requirements, without officially dropping the course, will receive a grade of "F" in the course. See Drop/Add section. In extraordinary circumstances, the faculty may record "NR," which will appear on the transcript as "NR" until the situation is resolved.

## **ADDITIONAL POLICIES FOR UNDERGRADUATE STUDENTS**

### **UNDERGRADUATE STUDENT CLASSIFICATION**

Undergraduate student classification is determined by the number of credits completed at all institutions as follows:

Classification	Credits Completed
Freshman	0-29
Sophomore	30-59
Junior	60-89
Senior	90 or more

Freshmen and sophomores are lower-division students, whereas juniors and seniors are upper-division students. Students who have not received a baccalaureate degree and students who are seeking a second baccalaureate degree are undergraduates.

## ACCELERATION MECHANISMS

Several accelerated programs are available to undergraduates. To learn about these, refer to [Acceleration Mechanisms for Undergraduate Students](#), appearing later in this section.

## CONTINUOUS ENROLLMENT/CATALOG YEAR

A student who has completed at least 1 credit during each academic year is considered to have satisfied the minimum requirements for “continuous enrollment.”

Catalog year determines the set of academic requirements (general education and the major) that must be fulfilled for graduation. A student who has been continuously enrolled at FAU may be awarded a degree by satisfying the degree requirements defined in any catalog in effect during the period of continuous enrollment leading up to graduation. Students must follow a single catalog, not a combination of catalogs, to meet graduation requirements. Catalog year academic program requirements are set each fall semester. First-Time-in-College (FTIC) students who begin their attendance at FAU in the summer will follow the academic program requirements of the fall catalog of the same year.

If a required course ceases to be offered prior to a student’s graduation, appropriate adjustments should be recommended by the student’s academic advisor and approved by the dean of the college offering the student’s major. The University will make every reasonable effort to honor the curriculum requirements appropriate to each student’s catalog year.

## DEADLINE FOR DECLARING A MAJOR

Students entering FAU with a clear choice of major should declare a major or pre-major early and devise a plan of study to ensure a timely graduation. Declaring a major early provides students with a sense of direction, strengthens their motivation and helps to inform their course choices. Students entering without a clear choice of major should begin exploring major choices (and career options associated with the majors) very early in their first year.

New freshmen and transfer students without an A.A. degree who have not declared a major or pre-major prior to admission will be required to enroll in SLS 1301, Career and Life Planning, in their first fall or first spring semester, as determined by their academic advisor. These students must declare a major or pre-major upon the anticipated earning of 45 credits (earned credit hours plus any credits for which the students are currently registered).

New transfer students with an A.A. degree must declare a major or pre-major at the time of admission to FAU.

Students with a pre-major must declare a major upon earning 60 credits.

Students must meet with their academic advisor to declare their major. Students can locate their academic advisor through the Success Network. For additional information on the Success Network, please visit [fau.edu/successnetwork/](http://fau.edu/successnetwork/).

## CHANGE OF MAJOR

Undergraduate students contemplating a change of major must meet with an academic advisor and carefully devise a plan of study to ensure a timely graduation. Please refer to the [Timely Graduation Policy](#) for credit requirement thresholds to change a major. Students can locate their academic advisor through the Success Network. For additional information on the Success Network, please visit [fau.edu/successnetwork/](http://fau.edu/successnetwork/).

Changing the major requires permission of the new department and satisfaction of the same academic qualifications as for new applicants for admission to that department. To change the major, an undergraduate must satisfy the prerequisite coursework required for the new major. Other restrictions may apply for admission to certain programs. Undergraduates who change their major are subject to the requirements of the new major in effect at the time of the change and may be subject to the Excess

Hours Surcharge (see below).

## DOUBLE MAJORS

Undergraduate students may pursue two majors. If the two majors are in different degrees, such as a B.A. and a B.S., students will receive the degree in the major that they have designated as their primary major. A double major does not require a minimum number of hours beyond those necessary for completing degree requirements (120 or more hours). To graduate with double majors, students must first declare the primary college and major of their choice on the application for admission. Then, undergraduates must inform the second college and department of their intent by completing a Second Major form, available in the Office of the Registrar. Undergraduates must consult with both departments to ensure that all courses needed for graduation are completed. The same catalog year must be used for both majors. A minimum of 21 credits must be applied exclusively toward requirements in the primary major. Students may not pursue a double major in the same academic program, such as a B.A. and B.S. in Biology.

**Note:** To ensure a timely graduation, students may pursue a double major only if the requirements can be completed without extending the anticipated graduation date. Please refer to the [Timely Graduation Policy](#) for credit requirement thresholds to declare a second major.

Students wishing to pursue a second major and receive two different degrees should refer to the requirements for a Second Baccalaureate Degree, appearing in the [Degree Requirements section](#) of this catalog.

## EXCESS HOURS SURCHARGE

[Florida Statute 1009.286](#) defines “excess hours” as credit hours that exceed the completion requirements for a baccalaureate degree program at state universities. For students enrolling in a state university or a Florida State College System institution for the first time in or after the fall 2009 semester, a tuition rate surcharge will be applied for excess hours. The surcharge is assessed only on the tuition portion of the semester hour cost, not on the fees. To view our full cost of attendance information page, visit <https://www.fau.edu/finaid/other/cost-of-attendance/>. The amount of the surcharge and the allowable “excess hours” are determined by the initial term of entry as indicated below:

1. Fall semester 2009 to summer semester 2011: students will pay a 50 percent tuition surcharge for

each credit hour beyond 120 percent in excess of the hours required. For a degree program of 120 required hours this means any credits above 144 will be subject to the surcharge.

2. Fall semester 2011 to summer semester 2012: students will pay a 100 percent tuition surcharge for each credit hour beyond 115 percent in excess of the hours required. For a degree program of 120 required hours this means any credits above 138 will be subject to the surcharge.
3. Fall semester 2012 and beyond: students will pay a 100 percent tuition surcharge for each credit hour beyond 110 percent in excess of the hours required. For a degree program of 120 required hours, this means any credits above 132 will be subject to the surcharge.

**In determining excess hours, the following will be included when calculating the number of hours taken by a student:**

- All credit hours taken at FAU, including courses the student fails;
- Courses that are dropped after the drop/add period;
- Courses that are repeated; exception: repeated courses for which the student has paid the repeat course surcharge as provided in [Florida Statute 1009.285](#);
- Courses from which a student withdraws;
- Transfer credit earned at another institution that is subsequently applied to the student's degree program at FAU.

**The law does allow for exceptions to the excess hour surcharge. For example, the courses taken under the following circumstances would not count as excess hours:**

- Articulated accelerated credit (e.g., Advanced Placement (AP), International Baccalaureate (IB), College Level Examination Program (CLEP), Dual Enrollment);
- Certification/Recertification and certificate program credits; see FAQ "[What about credit for Certification?](#)"
- Credits required for a dual major;
- Credits taken by active-duty military personnel;
- Credits withdrawn due to medical or personal hardship;
- Internship credit;
- Military Science credits in Reserve Officers' Training Corps (ROTC) programs.
- Remedial and English as a Second Language (ESOL) credit;

All students should make every effort to enroll in and complete only those courses that are required for their degree program. Repeating courses, changing majors and adding minors that are not required as part of a major may result in excess hours. Students should regularly review their degree audit and consult with an academic advisor to ensure that they are not enrolling in excess hours.

To see more information about the bullet points above, click [here](#) for the Excess Hours Surcharge Frequently Asked Questions.

## LIMITATION ON REPEATED COURSES

No course may be repeated more than once, whether at FAU or at any other institution, without the permission of the student's advising office: University Advising Services, in the case of students with 45 or fewer completed credit hours; the college advising office, for those students with greater than 45 completed credit hours; or the Honors College Academic Support Services office, for students at the Harriet L. Wilkes Honors College. To receive permission, the student must explain the reasons for the poor academic performance in past attempts and include a plan for success in the course on the next attempt. Those students who are requesting permission to enroll in the same mathematics course for the third time (or any subsequent attempt) may be required to first enroll in and successfully complete a math boot camp.

## REPEAT COURSE SURCHARGE

In accordance with [Florida Statute 1009.285](#), any student who registers for the same Florida Atlantic University undergraduate course more than two times will be charged a Repeat Course Surcharge for the third and subsequent enrollments in the course. An undergraduate-level course is numbered at the 1000, 2000, 3000 or 4000 level. All courses that are fee-liable will be counted as a registration. The amount of the charge will be determined each term, but is expected to represent the full cost of instruction. To view our full cost of attendance information page, visit <https://www.fau.edu/finaid/other/cost-of-attendance/>.

Exceptions to the Repeat Course Surcharge are individualized study, courses that are repeated as a requirement of a major and courses that continue over multiple semesters. Courses repeated more than two times to increase the grade point average or meet minimum course grade requirements will be eligible for the surcharge.

According to the statute, a student may be granted an exception to the Repeat Course Surcharge upon approval by provost based upon a review of the individual circumstances presented by the student to document exceptional circumstance. Review will be initiated by student petition, which must provide all appropriate documentation to support the claim of exceptional circumstance. A student may appeal only once per course. Petition forms are available for this purpose and can be obtained [here](#) or from the

Office of the Registrar.

## GOOD ACADEMIC STANDING

At Florida Atlantic University, students are in good standing if their cumulative (FAU) grade point average is 2.0 or higher **and** their current (most recent term) grade point average is 2.0 or higher.

### Satisfactory Academic Record

To graduate from Florida Atlantic University, an undergraduate must achieve a satisfactory academic record. A satisfactory academic record is defined as an average of "C" or better on all work attempted (2.0 on a 4.0 scale). Certain majors may require higher standards.

## ACADEMIC PROBATION

A “probation” status is assigned as a notice for undergraduate students and indicates there is an opportunity to raise the grade point average. The status is noted on the FAU transcript. Students on “probation” or “continued probation” may continue to enroll in classes but are strongly encouraged to take advantage of university resources designed to improve academic success, such as meeting with an academic advisor, utilizing the Center for Teaching and Learning for tutoring or visiting the ACCESS office for academic coaching. The full list of university resources is found on the Undergraduate Studies Academic Services [webpage](#).

Undergraduate students (both degree and non-degree seeking) who are unable to maintain a grade point average of 2.0 or higher on all coursework attempted in any semester will be on academic probation. Students on academic probation who are unable to earn a 2.0 grade point average on all coursework attempted in any semester but maintain a cumulative grade point average of 2.0 or higher at FAU will be continued on academic probation.

Students on academic probation who earn a 2.0 grade point average or higher in the next semester but whose cumulative grade point average at FAU is lower than 2.0 will be continued on academic probation.

Undergraduate students are removed from academic probation when they earn at least a 2.0 grade point average in all coursework attempted during the next semester **and** have a cumulative grade point average of 2.0 or higher at Florida Atlantic University.

## SUSPENSION AND DISMISSAL

An undergraduate student on academic probation who fails to earn a 2.0 grade point average in all work attempted in any term and who has a cumulative grade point average of lower than 2.0 at Florida Atlantic University will be suspended from the University. If at any time after having once been suspended, an undergraduate student fails to earn a 2.0 grade point average in all work attempted in any term and has a cumulative grade point average of lower than 2.0 at Florida Atlantic University, the student will be dismissed from the University.

## ACADEMIC ACTIONS FOR FRESHMEN

First-semester freshmen who fail to earn a 2.0 grade point average in their coursework will be required to enter the ACCESS Program in their second semester and abide by the terms of continued enrollment stipulated by their ACCESS academic coach/advisor. ACCESS Program information may be found in the [Student Services and Activities section](#) of this catalog.

Freshmen in their first year who complete their first spring semester (including those starting in the spring semester) with an FAU GPA (undergraduate GPA) below 2.0 (original grades, not the NC grade, are used in the calculation) must enroll in a minimum of 6 credits of summer coursework at FAU. The coursework taken must be chosen in consultation with an academic advisor. Those students who received a grade of "C-" or below, a Withdrawal (W) or an NC grade in their last mathematics course may be required, as well, to first enroll in and successfully complete a math boot camp.

Those freshmen on academic suspension at the end of the spring semester will have the suspension deferred to enable them to take summer courses. Suspension will be removed or applied at the end of the summer term based on the new GPA.

Students who fail to enroll in a minimum of 6 credits of summer coursework at FAU will not be allowed to enroll in fall coursework. Any exception to the summer coursework requirement due to financial and/or personal hardship must be approved through a petition to University Advising Services.

## RETURNING AFTER SUSPENSION

A suspended student is eligible to re-enroll after a minimum of one semester and will return on academic probation due to previous suspension. All students returning from suspension are required to meet with an academic advisor, at which time the terms of re-enrollment will be specified. Students

suspended with 59 or fewer earned credits will meet with an ACCESS academic coach/advisor. ACCESS Program information may be found in the [Student Services and Activities section](#) of this catalog. Students with 60 or more earned credits will meet with an academic advisor in their college.

## RETURNING AFTER DISMISSAL

A dismissed student, after a minimum of one year away from the University, may seek re-entry by reapplying to the University and petitioning for approval from the student's last college/major. If a student is seeking admission to a college different from the original college, the petition process will include notifying the new college regarding the student's intent. If at any time after having once been dismissed, an undergraduate student has a term and cumulative average below 2.0, the student will be dismissed from the University permanently.

## DEFERRED PROBATION, SUSPENSION AND DISMISSAL

If an undergraduate student (both degree and non-degree seeking) takes a single course (or a single course and linked laboratory) in any summer term and is unable to maintain a term GPA of 2.0 or higher, and if this would result in the student being placed on probation, suspension or dismissal, the action will be deferred until the end of the next term in which the student is enrolled. At that time, any academic action will be based on the grades earned in the "next enrolled term" and/or the cumulative FAU GPA. In the event of deferred action, the student's academic status will remain the same as at the end of the term prior to summer.

## DEAN'S LIST

The University recognizes superior academic performance at the end of each semester by the publication of a Dean's List for each college of the University. To be included in this list, an undergraduate student must complete a full-time load (at least 12 credits of graded coursework) with a grade point average of 3.5 or greater. The selection of Dean's List students is based on grades reported on the official grade reporting date for each semester. No changes are made to the list as a result of grade changes and removal of "I" grades. Graded coursework of "AU," "I," "NC," "NR," "P," "S," "U," "W," and "WM" are not used in determining eligibility for the Dean's List.

## PRESIDENT'S LIST

In recognition of superior academic achievement, the President's List is published at the end of each semester of the academic year. This list includes the names of all undergraduate students who have completed 12 or more credits of graded coursework and who have attained a grade point average of 4.0. The selection of President's List students is based on grades reported on the official grade reporting date for each semester. No changes are made to the list as a result of grade changes and removal of "I" grades. Graded coursework of "AU," "I," "NC," "NR," "P," "S," "U," "W," and "WM" are not used in determining eligibility for the President's List.

## GENERAL EDUCATION DIGITAL BADGES

In 2021, the state amended section (s.) 10007.25, Florida Statutes (F.S.) to require Florida public colleges and universities to award a “digital badge” upon completion of coursework intended to demonstrate career readiness. The digital badges are awarded in six Career Readiness Skills areas: Communication Skills, Applied Academic Skills, Critical Thinking Skills, Information Use, Technology Use, and Personal Qualities. The digital badge is automatically awarded to students at the end of the semester in which the student meets the requirements for the digital badge. Students who have earned equivalency through credit-by-examination will also have the badge awarded either at the end of their first semester of enrollment if the exam was taken prior to matriculation or at the end of the semester in which the exam was completed and reported to FAU. More information on digital badges is available [here](#).

## BACCALAUREATE DEGREES OF DISTINCTION

FAU recognizes superior academic performance by granting baccalaureate degrees of distinction to undergraduates who have earned at least 45 credits at FAU as follows:

- ***cum laude*** for an FAU average of 3.50;
- ***magna cum laude*** for an FAU average of 3.70;
- ***summa cum laude*** for an FAU average of 3.90.

An undergraduate transfer student may qualify for a degree of distinction based on all work taken at the upper division (other institutions and FAU), a minimum of 45 credits, if the student has not completed 45 credits at FAU.

An undergraduate earning a second baccalaureate may qualify for a degree of distinction based on all work completed at FAU, a minimum of 30 credits.

All undergraduates receiving degrees of distinction must be recommended for that distinction by the faculty granting that degree.

## TIMELY GRADUATION FOR UNDERGRADUATE STUDENTS

Florida Atlantic University is committed to ensuring that students admitted as undergraduates will make progress toward their degree and graduate in a timely manner. The University will make every effort to employ the advising and academic support personnel necessary to ensure student success. Students also must take responsibility for timely graduation. They must learn their degree requirements as listed in this University Catalog. They must review their degree audit (DARS) as least once every semester. They must meet with an academic advisor and review progress toward their degree at least once every semester.

### **Expectations for Timely Graduation**

In their first semester at FAU, students will be given an “Expected Graduation Date,” which they are expected to follow as they complete their degree requirements. The following rules apply:

1. Students admitted to FAU as freshmen are expected to complete their degree program within four years. (The typical degree program requires 120 credits.) To do so, students must successfully complete a minimum of 30 credits every year.
2. Transfer students who enter FAU with an A.A. degree and other transfer students entering with 60 or more transfer credits are encouraged to complete their degree program within two years.
3. Transfer students entering with 59 or fewer credits are encouraged to complete their degree program in three years.

To graduate within the timeframes specified above, students must successfully complete an average course load of 15 credits every semester. Students should enroll in summer courses so as to lighten their load in semesters when taking particularly difficult courses and to ensure progress toward their degree. Students in degree programs requiring more than 120 credits should take summer coursework in order to graduate in four years. All students entering FAU with fewer than 60 credits are required to earn a minimum of 9 credits in the summer.

Students unable to graduate within the expected graduation timeframes and unable to take a full-time course load in any given semester must secure the approval of an academic advisor and establish a plan

of study. These steps will ensure their continuing progression toward a degree.

All students who have completed 120 credits or more must only enroll in classes required for graduation. Exceptions are allowed with academic advisor approval only for those students needing to maintain a full-time course load due to financial aid or other requirements.

*Upon completing all requirements for their degree, students will graduate and have the opportunity to participate in commencement exercises. Those wishing to take additional courses after meeting degree requirements should consider a second baccalaureate degree, a graduate degree or coursework taken as a non-degree-seeking student.*

All students must understand that credits earned in excess of those hours required for the degree may be subject to [excess hours surcharges](#) mandated by the State of Florida. Students will need to carefully consider the ramifications of their course selection in consultation with an academic advisor. The addition of a minor or additional courses to their academic portfolio may sound appealing, but it also might result in considerable additional expense and a delay in degree completion. A change of major, too, may have the same results.

Students who have completed all requirements for their first major by the deadlines stipulated above must graduate, regardless of missing requirements for a minor, second major or certificate program. Students who have not completed their major requirements within the specified deadlines will graduate with a Bachelor of General Studies (B.G.S.) degree, assuming they have met requirements for this degree.

Students seeking an exception to this requirement should petition the student services office of the college overseeing their primary major. Students allowed an exception to the policy must meet with an academic advisor at least once every semester and follow the plan of study stipulated by the college student services office.

### **Minors, Certificate Programs, Second Majors, Dual Degrees and Change of Major**

To meet the graduation requirements outlined above, students must adhere to the following:

**Minors and Certificate Programs** – Students must declare their minor or enroll in a certificate program after earning at least 45 credits but before completing the final 30 credits required to graduate. Requests will be approved only if it is clear that the student can complete all requirements by the expected graduate date.

**Second Majors and Dual Degrees** – Students must apply for the second major or dual degree after

accumulating at least 45 credits but before completing the final 45 credits required to graduate. Requests will be approved only if it is clear that the student will meet all requirements by the expected graduate date.

**Change of Major** – All students seeking to change their major must meet with an academic advisor and carefully devise a plan of study to ensure a timely graduation. A change of major will not be considered for students who have completed 75 or more credits of coursework, unless there is a clear expectation that the graduation timeframe requirement will be met.

### **Exceptions for Timely Graduation Requirements**

Students seeking an exception to any Timely Graduation requirement should petition the student services office of the college overseeing their primary major.

## **GRADUATION POLICY FOR UNDERGRADUATE STUDENTS**

Florida Atlantic University helps students meet their academic goals by monitoring academic progress toward their degree.

If an undergraduate student has completed his or her respective degree requirements, the academic dean of the student's program confirms this and the student is eligible to be awarded the degree. The University reserves the right to award the degree. Once the degree is awarded, the student must be readmitted to Florida Atlantic University in order to enroll in any courses.

Students pursuing double majors or dual degrees must formally notify their academic dean of their intent. Undergraduate students pursuing dual degrees in different disciplines must obtain formal approval of their academic dean, following established University procedures for such approvals. For further details, refer to the [Double Majors](#) information in this catalog section.

## **PETITIONS**

### **Academic Petitions Process**

Students are expected to be familiar with and to conform to the regulations of the University. An academic petition may be filed when a particular academic requirement or regulation causes undue hardship for the student. Please note that this process does not concern itself with grade reviews (see University Regulations, Chapter 4, Regulation 4.002, [Student Academic Grievance Procedures for Grade Reviews](#)) nor does it act on any financial matters, including refunds for dropped classes or withdrawals (see Fee Petitions and Other Petitions below).

Degree-seeking undergraduate students with declared majors submit their petitions to their college's student services office.

Degree-seeking students with undeclared majors and non-degree-seeking students submit their petitions to University Advising Services.

The procedures to file an academic petition are as follows:

1. Petitioner must fill out an Undergraduate Petition form. The form may be picked up at the college's student services office or at University Advising Services. The petitioner must attach any pertinent information in support of the petition (i.e., medical reports, records, verifying letters, memos from instructors).

**Note:** No petition will be considered without the appropriate documentation. Students should consult their college's student services office or University Advising Services for advice on the type of documentation needed.

2. A typewritten statement describing the extenuating circumstances of the petitioner's request must be submitted with the Undergraduate Petition form.
3. Petitioner must return, signed and dated, the original page of the completed petition form to the college's student services office or University Advising Services, whichever applies.
4. The decision of the college or University Advising Services will be communicated to the petitioner in writing by mail or by email.
5. No petitions will be accepted after the student has graduated with a bachelor's degree.
6. Petitions related to academic withdrawals will not be accepted after one academic year from the end of the semester in which the course was taken.

### **Academic Appeals**

Appeals of petition decisions should be directed to the college dean or, in the case of decisions made by University Advising Services, to the dean of Undergraduate Studies. The decision of the dean (or dean's designee) constitutes final university action.

### **Fee Petitions**

Contact the Controller's Office if the petition relates to refunds, waivers or withdrawal from courses for other than exceptional circumstances.

### **Other Petitions**

Withdrawal for exceptional circumstances is a type of petition for which the Office of Student Affairs is responsible. This type of petition is discussed in detail in two sections of this University Catalog: [above](#) in this section and in the [Tuition, Fees and Refunds section](#).

## ADDITIONAL POLICIES FOR GRADUATE STUDENTS

### ACADEMIC APPEALS

Exceptions to graduate policies and procedures must be submitted for approval using Form 10-Request to Waive a University Requirement. All requests must be reviewed by the degree-granting program, the appropriate college dean and the dean of the Graduate College.

### ACADEMIC PROGRESSION PLAN

The minimum graduate program cumulative GPA requirement for degree-seeking graduate students is a 3.0. **Note:** Individual graduate programs may specify more stringent or specialized requirements beyond this minimum requirement. Students in graduate or professional degree programs whose cumulative grade point average for their graduate program falls below 3.0 at the end of a semester will be designated as not in good academic standing by the University and will be placed on academic probation. Graduate students on probation are expected to submit a signed and completed [Form 11 - Academic Progression Plan \(APP\)](#) to the Graduate College to continue in their program of study.

Students will develop an APP with their academic advisor or program coordinator, gather the necessary signatures and submit the form to the Graduate College. The major professor and program director/coordinator will ensure that the student on probation adheres to the approved APP (i.e., registers for the prescribed degree-applicable courses). The advisor or program coordinator may recommend dismissal instead of developing and approving an APP. In this case, the graduate program will initiate the dismissal process as defined by the [2015 Provost's memo](#).

For a student who fails to meet the requirements stipulated in the APP (i.e., fails to attain a 3.0 cumulative grade point average by the end of the next full term of enrollment), the graduate program will initiate the dismissal process unless a revised APP is submitted and approved by the Graduate College. A revised APP will be required if the department does not recommend dismissal, and pending acceptance by the dean of the Graduate College, the student will be allowed to continue in the degree program. Academic dismissal constitutes a separation of the student from the University for academic reasons. Students on dismissal will not be permitted to register for courses, including registering as a

non-degree student. A graduate student who is dismissed and subsequently enrolls as a non-degree-seeking graduate student, or as a graduate student at another institution, may not have this coursework count toward fulfilling degree requirements should the student ever be readmitted into the same graduate program at FAU.

## CHANGE OF MAJOR

Degree-seeking graduate students who change from one major to another must complete a new application, pay a \$30 application fee and have their credentials reviewed in the same manner as all other students applying for admission. Exceptions to this graduate policy and procedure must be submitted for approval using Form 16-Official Graduate Change of Program. All requests must be approved by the academic college and reviewed by the Graduate College.

## CONTINUOUS ENROLLMENT

Graduate students are required to enroll for at least 1 credit during at least two semesters (fall, spring or summer) of every academic year in order to remain eligible for the degree. Students who have been admitted to candidacy normally should enroll in the Thesis (6971) or Dissertation (7980) course in their departments. Those who have not yet been admitted to candidacy, but do not need to take additional courses, should enroll in an appropriate Directed Independent Study course or Advanced Research course.

Students who fail to maintain continuous enrollment, as defined above, lose their eligibility for the degree. In such cases, students are required to submit a new application and pay a new \$30 application fee. In addition, students may be required to register for additional credits of Directed Independent Study, Thesis or Dissertation in an amount equal to the number of such credits missed while not continuously enrolled.

## FULL-TIME ENROLLMENT AND PETITIONS

For fall and spring semesters: Graduate students registered for 9 or more credits are considered full-time, registrations for 7 credits are considered 3/4-time and registrations for 4.5 credits are considered half-time. For the summer semester: Graduate students registered for 6 credits are considered full-time, registrations for 5 credits are considered 3/4-time and registrations for 3 credits are considered half-time.

Graduate students may petition to take fewer credits and maintain full-time graduate student status. Students must meet the eligibility guidelines below to submit the petition (Form 10-Request to Waive a University Requirement) and must satisfy at least one of the following four conditions:

1. Master's degree students who have completed all required coursework as listed on their approved Plan of Study and are only enrolled in thesis credits may petition to be classified as full-time graduate students with an enrollment of at least 3 credits.
2. Doctoral degree students who have advanced to candidacy, have completed all required coursework as listed on their approved Plan of Study and are only enrolled in dissertation credits may petition to be classified as full-time graduate students with an enrollment of at least 3 credits.
3. All graduate students who have completed all coursework and thesis/dissertation credits as listed on their approved Plan of Study and are only enrolled to satisfy continuous enrollment requirements to complete their thesis or dissertation may petition to be classified as full-time graduate students with an enrollment of at least 1 credit.
4. All graduate students in their last semester of study, as verified by their approved Plan of Study, may petition to be classified as full-time graduate students with an enrollment of the remaining credits needed to complete their degree.

### **Eligibility Guidelines**

The following eligibility guidelines must first be satisfied prior to submitting the petition to seek full-time graduate student status. A separate petition must be submitted for each term in which this status is being sought. The student must have:

1. An approved Plan of Study on file in the Graduate College;
2. Maintained continuous enrollment during the previous 12-month period;
3. Enrolled in the minimum number of credits as stipulated by one of the four applicable conditions above.

## **GRADUATING SEMESTER ENROLLMENT**

### **For Thesis and Dissertation Students**

All graduate students seeking a degree that requires a thesis, dissertation or graduate thesis exhibition must register for at least one credit in the term in which the degree is to be awarded. Individual graduate degree programs may have additional requirements.

## **LEAVE OF ABSENCE**

Graduate students who find it necessary to temporarily suspend their studies may apply for leave of absence from graduate study. Leave of absence is intended for students who are unable to pursue their studies at all, rather than for students who are actively working on a thesis or dissertation after completing coursework. Leave of absence is approved by the Graduate College on the basis of the recommendation of the student's faculty advisor, department chair and college dean. To apply for a leave of absence, students use a Form 10-Request to Waive a University Requirement.

Degree-seeking students returning after an absence of more than one year will be subject to the following:

1. File a new graduate admissions application with appropriate documentation.
2. Re-establish Florida residency for tuition purposes.
3. Be in good academic standing (eligible to return) at FAU and at any institution attended since the last period of enrollment at FAU.
4. Provide official transcripts to the Graduate College from any institution attended since the last period of enrollment at FAU.
5. Submit proof of conformity to the Measles Immunization Policy of the State University System for graduate students under the age of 40 who have not previously submitted this information.
6. Students who were enrolled without being fully admitted into a graduate degree program will not be eligible to return.
7. Returning students will be admitted under the catalog guidelines in place at the time of re-admission.

## RECENCY OF CREDITS

No credit that is more than 10 years old at the time the Florida Atlantic University graduate degree is awarded may be counted toward that degree. Credits transferred into or applied to an FAU program are considered earned in the first semester of enrollment at FAU. **Note:** Individual graduate programs may have stricter recency of credit time limits.

## SATISFACTORY ACADEMIC PERFORMANCE

To remain in good academic standing, each graduate student at Florida Atlantic University must maintain a satisfactory record. A cumulative 3.0 average must be maintained on all degree requirements. This is the minimum quality necessary for a graduate degree at Florida Atlantic University. **Note:** Individual degree programs may have higher academic performance standards.

## TIME LIMIT FOR COMPLETION OF DOCTORAL DEGREE REQUIREMENTS

All requirements for the doctoral degree must be completed within five calendar years from the time the student passes the preliminary or qualifying examination and is admitted to candidacy for the doctoral degree. Leaves of absence do not extend the five-year limit. Extensions (in one-year increments) beyond the five-year limit will be considered through the submission of a formal [Form 10](#) petition. If the student's program coordinator, program director and/or department chair does not choose to approve an Extension of Time (EOT), then the student may no longer be enrolled in that program at Florida Atlantic University.

## TRANSFER CREDITS

Master's programs may accept a **maximum of 6 graduate credits** earned from another institution beyond a baccalaureate degree. Doctoral programs may accept a **maximum of 36 credits** earned elsewhere in an approved graduate program. A **maximum of 6 graduate credits** earned from another institution in a non-degree-seeking status may be transferred. The Graduate College reserves the right to request a professional evaluation of credits transferred from universities outside the U.S.

Acceptance of transfer credits for a course is dependent upon the following provisions:

1. The student received a grade of 3.0 or better on a 4.0 scale in the course to be transferred.
2. The course was taken at a regionally accredited institution.
3. The course is relevant to the graduate program in which the student is accepted, as judged by the graduate or supervisory committee of the department or program.
4. The course is listed on the official transcript received by the Graduate College.
5. The course was completed within six years preceding admission to the program.

Since many graduate programs do not accept transfer credits that have been applied to a completed degree, the student should consult the department offering the degree. See individual departments for particular degree requirements.

## WITHDRAWAL

A graduate student who wishes to officially withdraw from a graduate program must complete and

submit a Form 15-Graduate Program Official Withdrawal to the Graduate College. To access the form, please visit the Graduate College [website](#).

## ACCELERATION MECHANISMS FOR UNDERGRADUATE STUDENTS

FAU participates in numerous programs that afford students the opportunity to accelerate their degree programs if they so desire. The accelerated programs and policies appear below. **Note:** Test scores and credits awarded under each program are subject to change when mandated by the state. The scores and credits listed in the current catalog at the time the test is taken will determine the credits that will be awarded. The FAU catalog is the only official source to determine credit to be awarded by FAU for acceleration mechanisms.

### Correspondence Courses

### Undergraduate Enrollment in Graduate Courses

#### Credit by Examination, including:

- Advanced International Certificate in Education (AICE)
- Advanced Placement (AP)
- College Level Examination Program (CLEP)
- International Baccalaureate (IB)

### Excelsior College Examinations

#### Military Service College Credit:

- DSST Examination Program

## CORRESPONDENCE COURSES – UNDERGRADUATES

The University may award up to 10 credits of correspondence coursework toward admission provided the credit earned was "C" or higher and appears on the transcript of a regionally accredited college or university. Acceptability of such credit for advanced standing and/or degree credit will be determined by the individual college. Credit earned in this manner will be treated as transfer credit.

The State University System of Florida offers a program of about 80 courses by correspondence through the Division of Continuing Education of the University of Florida. Courses are offered in each of the following departments: Advertising, Anthropology, Art, Business, Criminology and Law, Economics, Education, English, English as a Second Language, Geography, Geology, Germanic and Slavic Languages, History, Journalism, Latin, Linguistics, Mathematics, Philosophy, Political Science, Psychology, Public Relations, Religion, Romance Languages, Sociology, Statistics, Study Skills and Textiles. Correspondence courses are also offered in the professional programs of Dietary Management, Insurance Pre-Licensing, Legal Assistant and Water Management. Program information and course details may be obtained [here](#), or by calling the Division of Continuing Education at the University of Florida: 800-327-4218 or 352-392-1711.

## UNDERGRADUATE ENROLLMENT IN GRADUATE COURSES

Undergraduate students may enroll in certain graduate courses for credit with permission of their department or the instructor of the course. A maximum of 12 graduate credits, taken before the student has fulfilled the baccalaureate degree requirements, may be applied to a graduate degree with the approval of the department. **No credits applied toward an undergraduate degree may be used to fulfill requirements for a graduate degree unless specifically approved by the department offering the graduate degree.**

## CREDIT BY EXAMINATION – UNDERGRADUATES

Credit by Examination may be earned from the **Advanced International Certificate in Education (AICE), Advanced Placement (AP) Policy, College Level Examination Program (CLEP) and International Baccalaureate (IB) Program**. Credit will not be awarded for examinations covering the same areas or for comparable college courses already completed. Students are urged to consult with the dean of their college in order to ascertain which examinations would be appropriate for their degree program.

A maximum of 45 credits may be earned by examination. Note that although college credit may be earned from AICE, AP and IB examinations, this credit may only be earned while the student is in high school. Credit earned in this manner will be treated as transfer credit.

## ADVANCED INTERNATIONAL CERTIFICATE IN EDUCATION (AICE)

The AICE program is an international, advanced secondary curriculum and assessment program equivalent to the British system of "A-Levels." For more information, visit the [AICE website](#).

\* If credit already awarded for ENC 1101 or ENC 1102, may award ENC X121 and ENC X122.

\*\* Award credit for ENC 1102 if student has credit for ENC 1101.

\*\*\* Award credit for ENC 1102/LIT X006 if student has credit for ENC 1101.

## ADVANCED PLACEMENT (AP)

Advanced Placement (AP) examinations are given at the end of the year in high school Advanced Placement courses. Students may earn credits for Advanced Placement examinations taken in high schools as specified below. Credit will not be awarded for both AP and CLEP examinations covering the same course material. Official test scores sent directly from the testing center to Florida Atlantic University are required in order to award credit. To request official scores and for information visit the [AP website](#) or call 888-225-5427.

\*\*\* MUT 1111 and MUT 1241 if both aural and non-aural subscores are 3 or higher.

## COLLEGE LEVEL EXAMINATION PROGRAM (CLEP)

Undergraduate students may earn credits from the CLEP examinations provided they have not received comparable college credit in the CLEP examination area. Minimum scores are subject to change at any time. Official scores must be sent to FAU from the testing center. Scores cannot be posted from other institutions' transcripts. To obtain official scores, visit the [CLEP website](#). For a Transcript Request form and other pertinent information or call 800-257-9558.

## INTERNATIONAL BACCALAUREATE (IB)

Florida Atlantic University will award credit based on scores achieved on IB diploma program examinations.

Students will be awarded up to 30 credits. Students with a score of 4 on subject areas will receive 3-4 credits for each examination. Students with a score of 5 or above will receive 6-8 credits.

Students who are awarded IB credit for ENC 1101, ENC 1102 or MAC 1105 will receive Gordon Rule credit for these courses.

For more information, visit the [IB website](#).

## MILITARY SERVICE COLLEGE CREDIT

Consistent with [Florida Board of Governors Regulation 6.013](#), Military Veterans and Active Duty, undergraduate students who are or were members of the United States Armed Forces may earn appropriate academic college credit for college-level training and education acquired in the military. College credit will be granted to students with military training and coursework that is recognized by the American Council on Education (ACE), subject to institution transfer practices and limitations on amount, level, etc., of transfer credit. Military training coursework will be subject to the same treatment as any other transfer credit evaluated, with the utilization of the ACE *Guide to the Evaluation of Educational Experiences in the Armed Services* for determining equivalency and alignment of military

coursework with applicable University courses. If the coursework fulfills a general education, major course, and/or degree requirement, consistent with the college/department policy, the credit will be granted for meeting that requirement toward graduation. Applicable course credit may include elective course credit toward the degree.

To apply for such credit, military veterans or active duty service members should submit one of the following forms of documentation and/or evidence of appropriate test scores on the DSST Examination Program (formerly DANTES Subject Standardized Tests) in college and technical subjects. See DSST exams and scores below the required documentation details.

### Required Documentation

*For the United States Army, United States Coast Guard, United States Marine Corps, United States Navy:*

Request a military transcript or DD214/DD295 Course Completion Certificates.

*For the United States Air Force:*

Request a Community College of the Air Force transcript (if applicable) from

<https://www.airuniversity.af.edu/Barnes/CCAF/Display/Article/803247/> or DD214/DD295 Course Completion Certificates.

*For the Department of Defense:*

Request a Defense Language Institute transcript (if applicable).

# STUDENT CODE OF CONDUCT REGULATIONS

## RESPONSIBILITY AND DISCIPLINE

Florida Atlantic University is dedicated to the intellectual, social and moral development of students in order to provide responsible leaders who can work effectively in a democratic society.

Under the authority granted by the Florida Board of Governors, the University has the right and responsibility to determine who shall be admitted to the institution, the conduct or behavior acceptable to the institution and under what conditions one may continue as a student. As a condition for admission to the University, students agree to abide by the policies and regulations of the institution. The President of the University has responsibility for student conduct and discipline. That responsibility shall be exercised through the University Student Code of Conduct, which is administered through the [Office of Student Conduct](#), a department within the Division of Student Affairs.

Every student is subject to federal and state law, respective county and city ordinances and all Florida Board of Governors and University rules and regulations. Violations of these laws, ordinances or rules and regulations may subject the violator to appropriate disciplinary action by University authorities.

The President or approved designee shall have the authority, after notice to the student of the charges and a hearing thereon, to expel or otherwise discipline any student found to have violated a rule or regulation of the Florida Board of Governors or the University or any law or ordinance.

The President or approved designee shall have the authority to order any student to cease and desist any activity that in the President's or designee's judgment disrupts the orderly operation of the institution. Any student failing to abide by the cease and desist order shall be subject to interim suspension pending a hearing.

The conviction of a student for a criminal offense of a kind that interferes with the educational or orderly operation of the University or of a kind which, if the student were allowed to remain enrolled, would endanger the health, safety or property of members of the academic community, shall be sufficient grounds for expulsion or other disciplinary action against such student.

Except as provided above, in all student violations of non-academic rules and regulations, a student shall be afforded adequate notice of charges, a reasonable time to answer, a fair and impartial hearing and a decision. The final administrative appeal shall be to the President or approved designee who may

reopen the hearing, order a new hearing or accept determination of sanctions. In the conclusion of the appeal process, the decision of the President or president's designee shall be final. For full details of the FAU Student Code of Conduct, see [University Regulation 4.007](#).

## CODE OF ACADEMIC INTEGRITY

Florida Atlantic University students are expected to maintain the highest ethical standards. Academic dishonesty is considered a serious breach of these ethical standards because it interferes with the University mission to provide a high-quality education in which no student enjoys an unfair advantage over any other. Academic dishonesty is also destructive of the University community, which is grounded in a system of mutual trust and places high value on personal integrity and individual responsibility.

The FAU Code of Academic Integrity describes the expectations for students' ethical academic conduct and the procedures for charging a student with a violation of the Code. It also outlines the procedures for students to appeal such charges.

Academic dishonesty includes any act designed to obtain, or assist another in obtaining, academic credit, grades or other recognition, which is not properly earned, or behavior that improperly advances, protects or diminishes the academic status of individuals or the University. Examples of academic dishonesty include, but are not limited to, the following:

### 1. Cheating

- a. The unauthorized use of notes, books, electronic devices or other study aids while taking an examination or working on an assignment.
- b. Providing unauthorized assistance to or receiving assistance from another person or entity during an examination or while working on an assignment.
- c. Having someone take an exam or complete an assignment in one's place.
- d. Securing an exam, receiving an unauthorized copy of an exam, sharing a copy of an exam or uploading an exam or exam questions online.

### 2. Plagiarism

- a. The presentation of words from any other source or another person as one's own without proper quotation and citation.

- b. Putting someone else's ideas or facts into your own words (paraphrasing) without proper citation.
  - c. Turning in someone else's work as one's own, including the buying and selling of term papers or assignments.
3. Other Forms of Dishonesty
  - a. Falsifying or inventing information, data or citations.
  - b. Failing to comply with examination regulations or failing to obey the instructions of an examination proctor.
  - c. Submitting the same paper or assignment, or part thereof, in more than one class without the written consent of both instructors.
  - d. Any other form of academic cheating, plagiarism or dishonesty.

For full details of the FAU Code Academic Integrity, see [University Regulation 4.001](#).

## UNIVERSITY REGULATIONS

Additional rules regarding student responsibility and discipline and a host of other regulations are set out in the Florida Atlantic University Regulations. University Regulations are subject to change without notice. For the University Regulations in effect at any given time, visit [www.fau.edu/regulations](http://www.fau.edu/regulations).

### ACADEMIC PROGRAMS

### COURSE DESCRIPTIONS

## ADMISSIONS

This Admissions section is divided into the following subsections. The subsections appear in the following order:

- [Undergraduate Admissions](#)
- [Transfer Admissions](#)

- [Undergraduate International Admissions](#)
- [Harriet L. Wilkes Honors College Admissions](#)
- [University Honors Program Admissions](#)
  
- [Graduate Admissions](#)
- [Graduate International Admissions](#)
- [Additional Admission Information for All Students](#)
- [Non-Degree-Seeking Students](#)
- [Residency Information](#)

## ADMISSION

Anyone who wishes to pursue a degree program offered by Florida Atlantic University should apply to become a degree-seeking student. Applicants should consult the requirements for each type of admission (freshman, transfer, international or graduate) detailed in this section of the catalog. Students seeking undergraduate admission may apply [online](#). Graduate applicants may also apply [online](#).

Applications should be accompanied or followed by the documentation required for each type of admission. Persons who seek to pursue a master's, specialist's or doctoral degree should consult the subsection on Graduate Admissions appearing in this section.

## READMISSION

Students who were accepted to FAU in the past and enrolled with a degree-seeking status, and who now wish to return to the University after an absence of at least three consecutive semesters (e.g., fall, spring and summer semesters) must apply for readmission.

Degree-seeking students returning after an absence of more than a year may also be subject to the following:

1. If the last enrollment was more than one year (three consecutive semesters) ago, the student must file a new admission application with the appropriate documents and submit a new application fee of \$30.
2. The student must be in good standing (eligible to return) at FAU and at any institution attended since the last period of enrollment at FAU.
3. If the student has attended another institution since the last period of enrollment at FAU, official transcripts with all work attempted/completed must be forwarded directly to the FAU Office of

Admissions by the registrar of the other institution(s).

4. Military personnel out for three or more consecutive semesters because of military service are required to submit a new application and official transcripts. They will be readmitted consistent with the provisions of Presidential Executive Order 13607, Section 2(e), provided that satisfactory academic progress was being made prior to the interruption of their studies due to service requirements. The application fee will be waived upon receipt of a copy of their military orders.
5. Any readmission applicants who feel they qualify as Florida Residents for tuition purposes must complete the Residency Classification portion of their new application and once admitted, complete a new [Residency Affidavit](#). Failure to provide all relevant information and supporting documents could result in a Non-Florida/out-of-state status regardless of residency status since last attending FAU.
6. Returning students must submit proof of conformity to the FAU Immunization Policy if they have not already done so. Refer to [Student Health Services](#).

## CHANGE OF ENTRY

Admission to FAU is for a specific term, and students must enroll during that term. To change the entry term, submit to [admissions@fau.edu](mailto:admissions@fau.edu) the [Change of Entry Date form](#). While admission is for a specific term, applications and fees are valid for one academic year (three consecutive semesters). A student's request for a change of entry term must be received by the stated [application deadlines](#). If a student attends another collegiate institution in the interim, an official transcript of all work attempted/completed is required. A new application and the application fee are required when admission is changed to a term that begins more than three semesters after the initial admission entry term. (Example: Fall term to a future fall term = new application and fee are required.) Before submitting a Change of Entry Date form, note that admission to the initial term of entry does not guarantee admission to a future term. The Office of Undergraduate Admissions reserves the right to change an applicant's term of entry due to class size or competitiveness of the applicant pool.

## FOREIGN LANGUAGE ADMISSION REQUIREMENT

All admitted undergraduate students must satisfy the statewide foreign language admission requirement. Students must complete a two-year foreign language sequence in high school or the equivalent proficiency at the college or university level. American Sign Language satisfies the criteria of a foreign language for the purposes of this requirement.

**Note:** The Foreign Language Admission Requirement is different from the Foreign Language

Graduation Requirement. See the [Degree Requirements section](#).

## UNDERGRADUATE ADMISSIONS

### ADMISSION POLICY

The Office of Undergraduate Admissions provides information to prospective students and the general public about the University through on-campus and off-campus communications, counseling, presentations, tours and informational services. Those interested in learning about the educational opportunities and degree programs available at the University should contact the Office of Undergraduate Admissions, Florida Atlantic University, 777 Glades Road, Boca Raton, FL 33431 (561-297-3040) or visit the Undergraduate Admissions [website](#).

All procedures related to application and admission to University undergraduate degree programs are handled in the Office of Undergraduate Admissions. The University actively encourages applications from all persons who are motivated to pursue university studies and who have obtained adequate academic preparation to succeed. All interested persons, regardless of race, color, religion, gender, national origin, age, sexual orientation, physical disablement, marital status or veteran status, are encouraged to submit applications. The admission review process does not discriminate on the basis of any of these factors.

The Office of Undergraduate Admissions maintains the confidentiality of all application documentation. Undergraduate applications and all accompanying materials become the property of Florida Atlantic University.

### DEADLINE DATES

The entry terms for degree programs are fall, spring and summer. All students are encouraged to apply as early as possible. Freshman applications completed by the **priority filing date** will be assured of review. All documentation in support of the application must be submitted by the filing date. Freshman applications received after the priority filing date will be considered for admission on a space-available basis or for the following spring term.

## APPLICATION CATEGORIES FOR DEGREE-SEEKING STUDENTS

Credits Completed	Application Category
0-11	Freshman
12-59	Lower-Division Transfer
60+	Upper-Division Transfer
Bachelor's Degree	Second Bachelor's Student

## REQUIRED CREDENTIALS AND DOCUMENTATION

### Application and Application Fee

A completed, signed application for admission is required. A non-refundable \$30 application fee payable in U.S. dollars drawn on a U.S. bank, an international money order in U.S. dollars or a U.S. traveler's check is required prior to a student's admission. The application is [online](#).

Please note: It is important to provide the correct email address for the applicant. Communication to the applicant regarding the application process will be through email. Students will be able to check their status online by going to [appstatus.fau.edu](http://appstatus.fau.edu). Application decisions will be accessible through the online status check. Only those students receiving an acceptance to FAU will receive a letter through the mail. Students whose admission has been deferred or who have not been offered admission will receive communication via email. Students who have previously applied to FAU should use a new or different email address in their new application.

### Lower-Division Course Requirements

Freshman and sophomore students taking lower-division courses must attend classes on the Boca Raton campus or through the Harriet L. Wilkes Honors College in Jupiter.

## Test Scores

First-year applicants are required to submit official CLT/SAT/ACT scores to receive an admission decision. Official results of CLT or SAT or ACT examinations must be submitted by all applicants with fewer than 60 degree credits completed at a postsecondary institution. Transfers with 30 or more but fewer than 60 transferrable semester credits who have successfully completed (C or higher) at least one English Composition course and one college-level mathematics course that consists of three (3) semester credits are not required to submit the test scores. High school transcripts may be required to demonstrate completion of the foreign language admission requirement. The official scores must be sent directly from one or both of the testing agencies listed below. SAT/ACT/CLT minimum test scores are set by the [Florida Board of Governors](#).

### SAT College Board ATP

866-630-9305

[www.collegeboard.com](http://www.collegeboard.com)

FAU's SAT school code number: 5229

### ACT

ACT Records

P.O. Box 451

Iowa City, IA 53243-0451

319-337-1313

[www.actstudent.org](http://www.actstudent.org)

FAU's ACT school code number: 0729

### CLT - Classic Learning Test

73 Franklin Street

Annapolis, MD 21401

844-925-8392

[www.cltexam.com](http://www.cltexam.com)

In order to expedite the review of their admissions application, students can self-report the test scores at [appstatus.fau.edu](http://appstatus.fau.edu). Official test scores will still be required by the first day of class at FAU.

## Transcripts

For first-year applicants, the University has adopted the Self-Reported Student Academic Record

(SSAR). This new method allows students to enter all courses and associated grades that have been attempted, or will be attempted, for high school and/or college credit without requiring the submission of an official transcript to the university. Official transcripts will be required after high school graduation only. All freshmen applicants (except international students), should create a Self-Reported Student Academic Record on the [SSAR website](#) and link it to their application. SSAR linking steps and SSAR FAQ's are available [here](#).

Final transcripts (from high school and previously attended colleges) must be official. Official transcripts from each postsecondary school attended must be provided. An official transcript is one that is issued by the school or college attended. It must bear appropriate signatures or seals and be in a sealed envelope until delivered to the Office of Undergraduate Admissions. Transcripts opened prior to delivery are no longer official. **Note:** An official transcript is required from every college or university attended. **Final official transcripts should be submitted by the first day of class. Students who fail to provide official transcripts will have a registration hold on their account for future terms.**

Transcripts transmitted electronically through the Florida FASTER system or through SPEEDE/Express are considered official. Transcripts transmitted by fax are not considered official.

### **Transfer of Massive Open Online Courses (MOOCS)**

Undergraduate students who have been admitted to the University may request evaluation of online courses, including Massive Open Online Courses (MOOCS), taken at previous institutions. It is the student's responsibility to request evaluation of credit by the FAU Office of Undergraduate Admissions prior to the initial term of enrollment.

#### ***Courses awarded credit must satisfy the following criteria:***

1. Course content and learning outcomes must be comparable to a course offered at FAU;
2. Course must meet the quality and accreditation standards intended for a transfer course;
3. Faculty determination that the online course is relevant to the student's intended program of study and/or is comparable to a General Education course requirement;
4. Transfer credits that other post secondary Florida institutions have previously evaluated and awarded credits **may** be accepted.

#### ***Applicant responsibilities include providing the following:***

1. Official transcripts;
2. A course syllabus;
3. Credentials of the faculty member teaching the course;

4. Course objectives and learning outcomes for the course;
5. Information requested by the faculty member to determine demonstrated mastery of the course competency.

Students will be notified if the credit requested has been approved. If they wish to appeal the decision, that appeal should be directed to the Dean of Undergraduate Studies. The Dean will forward the appeal to the appropriate committee/college.

## ADMISSION CRITERIA

Each year, Florida Atlantic University receives more applications than allotted freshman seats for the incoming fall class. Therefore, the admissions process is competitive. The level of competition is determined by the number of applicants, the quality of their academic credentials and the University's enrollment goals, which are established in conjunction with the University's mission and current state educational policies and funding. **Meeting minimum eligibility requirements set by the [Florida Board of Governors](#) does not guarantee admission to Florida Atlantic University.** Admission to FAU is for a specific term, and students must enroll during that term. To change the entry term, make a request by email to [admissions@fau.edu](mailto:admissions@fau.edu) or by submitting the [Change of Entry](#) form.

Admissions officers understand that the college admissions process can be difficult. Therefore, they strive to make the process as transparent as possible and give consideration to all aspects of a student's file. Questions are welcomed.

### Requirements

Initial application review is based on the applicant's academic profile as represented by the high school grade point average, rigor of curriculum and/or performance on standardized tests (SAT/ACT/CLT). An SAT or ACT or CLT is required of all applicants for freshman admission.

1. ***Students are required to submit an SAT or ACT or CLT score for admissions consideration.***

FAU will use the highest subscores from multiple test dates to create the ACT composite and the SAT and CLT total to satisfy admission requirements. During the application process students should report their exam scores for each test and report all exams taken. Do not report practice scores and do not mix and match scores in the reporting process. The writing sections of the ACT or rSAT are not required.

In order to expedite the review of their admissions application, students can self-report the test scores at [appstatus.fau.edu](http://appstatus.fau.edu) or in their Self-Reported Academic Record (SRAR). Official test

scores will still be required by the first day of class at FAU.

## 2. *High School Grade Point Average*

The high school grade point average is calculated by the University using grades from academic courses. Dual Enrolled, Advanced, Honors, Gifted, Advanced Placement, International Baccalaureate and Advanced International Certificate in Education (AICE) courses are given additional weight in the University's calculation of the grade point average.

## 3. *High School Units*

Most successful applicants have taken a rigorous course load and have challenged themselves by taking courses with additional weight. Applicants are expected to have **minimally** completed the following 18 (minimum) high school units:

English	4 Carnegie units (3 with substantial writing)
Mathematics	4 units (at the level of Algebra 1 or higher)
Natural Science	3 units (at least 2 with laboratory)
Social Science	3 units
Foreign Language	2 units (of the same foreign language)
Academic Electives	2 units

Appropriate academic and elective courses are listed in the Counseling for Future Education Handbook, published by the [Florida Department of Education](#).

### **Diploma**

All incoming freshmen must possess a valid high school diploma prior to enrollment. Proof of graduation must be provided in the form of a final official transcript indicating the date of graduation.

### **Applicants with a GED**

Students with a General Equivalency Diploma (GED) from any state must submit official test scores to the Office of Undergraduate Admissions. Applicants with a GED should also submit high school transcripts from any schools attended.

### **Early Admission**

Students who have completed their junior year of high school in Florida may be considered for Early Admission. Students must enter for the fall term. If accepted for Early Admission, students enter FAU as freshmen instead of attending high school for their senior year. Qualifications for consideration of Early Admission are:

1. A 3.8 or better GPA after six semesters of high school;
2. An rSAT score of at least 1290 with an Evidence-Based Reading & Writing component score of no less than 490 and a Math component score of no less than 480; or an ACT score of 27 with no less than 18 on the English component, 19 on the Reading component and 19 on the Math component; or a CLT score of 91 with Sum of the Verbal Reasoning and Grammar/Writing Sections: 38, Quantitative Reasoning Section: 16.
3. Permission from their high school to allow FAU courses to satisfy any remaining requirements toward high school graduation;
4. Written recommendations attesting to the student's maturity and readiness to meet the academic and personal challenges posed by early entry into higher education;
5. Must be a Florida resident from Broward or Palm Beach County and meet the requirements to be classified as a Florida resident per [Florida Statute 1009.21](#);
6. Must submit an Early Admission supplemental application.
7. Have the desire to complete their bachelor's degree at FAU.

At the end of their freshman year, successful Early Admission students will have completed both their freshman year of college and graduation requirements for their senior year of high school. As part of the Early Admission requirements, an official transcript noting the high school diploma and date awarded must be submitted at the end of their freshman year. Contact University Advising Services at 561-297-3064 or the Office of Undergraduate Admissions at 561-297-3040 for additional information, or visit [University Advising Services](#).

### **High School Dual Enrollment**

The High School Dual Enrollment Program allows qualified students from Broward and Palm Beach counties in 6th through 12th grades to earn college credit toward a postsecondary degree or certificate at a Florida public institution that will also count as credit toward a high school diploma. For additional information, visit the Office of the Registrar's [website](#) or call 561-297-2009.

### **Non-Traditional Program of Study**

Any student who completes a non-traditional program of study not measured in Carnegie Units, such as attending an institution that is not regionally accredited, must present credentials equivalent to those listed for applicants with a GED. Students completing a home education program according to [Section](#)

[1002.41 of the Florida Statutes](#) are eligible for admission. Additional documentation may be required to verify student eligibility.

### **Profile Assessment Admission**

Students who have applied for admission and do not meet the standard requirements may be eligible for admission through a student profile assessment that considers additional factors, including but not limited to: family educational background, socioeconomic status, graduate of a low-performing high school, international baccalaureate program graduate, geographic location and special talents. These additional factors shall not include preferences in the admission process for applicants on the basis of race, national origin or sex. For more information, see Admissions Appeals later in this section.

### **Selective and Limited Access Programs**

For reasons of accreditation standards, state certification requirements, space or fiscal limitations, the Florida Board of Governors has designated the undergraduate programs in nursing and architecture, as well as the Harriet L. Wilkes Honors College, as limited access. Additionally, the College of Business, College of Engineering and Computer Science, College of Science, School of Communication and Multimedia Studies and the Department of Music are all selective in the admission of students to their programs. Admission to FAU does not guarantee admission to a selective or limited access program. For specific entrance information on these programs, applicants should consult the appropriate college or department.

### **Talented Twenty**

A student applying for admission who is a graduate of a Florida public high school, has completed 18 required high school units as listed in the Florida Department of Education Rule 6C-6.002(3)(a), ranks in the top 20 percent of his/her high school graduating class and has submitted either SAT or ACT test scores shall be admissible to a public university in Florida. The public universities will use class rank as determined by the Florida Department of Education. Students who want to appeal their admission based on the Talented Twenty classification should follow the [Board of Governors](#) process.

### **Tuition Deposit**

Florida Atlantic University requires a \$200 non-refundable tuition deposit from all admitted freshman students in order to confirm enrollment in the freshman class. The tuition deposit is applied directly toward tuition and fees for the student's first semester. For information, call the Office of Undergraduate Admissions at 561-297-3040 or click [here](#).

## **APPEALS**

## Admission Appeals

All students should utilize the online status check to view an admission decision. Students who are not offered admission or have been deferred will be notified of this decision only through the online status check. Undergraduate applicants who do not meet the minimum admission requirements may be reviewed by the executive director of Undergraduate Admissions and the [Faculty Committee on Student Admissions \(FCSA\)](#). Students with special talents or abilities; physical, learning or emotional disabilities; or personal or family hardships may appeal the initial admission decision. The FCSA includes University faculty members and administrators who evaluate admission based on evidence other than academic work. The FCSA determines the student's ability to succeed in future academic endeavors. Students should present **additional** evidence of potential for academic success and explain reasons why reconsideration is warranted. Students must appeal in writing and submit letters of recommendation, a personal statement and any other documentation that would substantiate admission as an exception. Appeals from anyone other than the student are not considered.

## Foreign Language Admission Requirement Appeals

Students who have not fulfilled the foreign language admission requirement during high school due to a disability may petition for a course substitution. The student will need to contact the [Student Accessibility Services Office](#) to receive a letter of support. The student may petition for a course substitution through the Faculty Committee on Student Admissions (FCSA).

If the petition is approved by FCSA, the student will be given a list of courses, of which two in the same category should be chosen to satisfy the foreign language admission requirement.

# TRANSFER ADMISSIONS

Students who have attended other regionally accredited postsecondary institutions may be admitted to Florida Atlantic University as transfer students. Transfer admissions requirements are established by [Florida Statute 6.004](#). The requirements for admission differ according to the number of transferable credits completed. Students who have completed the Associate in Arts degree at a Florida public community or state college have satisfied the academic requirements for admission as transfer students. The University has developed A.S. to B.S./B.A. programs in certain majors for students who entered Florida community or state colleges in the fall of 2000 or later.

Please note: Students must earn at least 75 percent of all upper-division courses in the major department from FAU. Some major departments may require more than 75 percent. Consult the degree requirements section of the major for details.

**LINK to FAU**

The LINK program is an opportunity for transfer students to continue their college education and receive their bachelor's degree from FAU. The program is available to students of Broward College, Miami-Dade College, Palm Beach State College and Indian River State College. Benefits include: comprehensive on-site joint advising and priority admission to FAU for students who graduate with their Associate in Arts degree.\* For more information, please click [here](#).

\*Consistent with university policy, limited-access and restricted-access programs may require an additional admission process.

**Lower-Division Transfers – Applicants with Fewer than 60 Transferable Credits**

Transfer applicants with fewer than 60 transferable credits from a regionally accredited institution should meet the same admission criteria as freshmen, including high school grade point average and rSAT or ACT scores. In addition, applicants must have a minimum 2.5 cumulative grade point average in their college or university coursework and be in good academic standing at the last institution attended (2.0 GPA or above).

**Upper-Division Transfers – Applicants with 60 or more Transferable Credits**

Students who have completed at least 60 transferable credits from a regionally accredited institution but have not received the Associate in Arts degree from a Florida public community or state college may be admitted as upper-division transfers. Applicants must have achieved a minimum 2.5 cumulative grade point average in all prior college or university courses and be in good academic standing at the last institution attended (2.0 GPA or above).

**Upper-Division Transfers – Applicants Holding the Associate in Arts Degree from a Florida Public Community or State College**

Students who have received the Associate in Arts degree from a Florida public community or state college will be admitted as transfers with priority over applicants who are not Florida residents. They are considered to have completed all general education requirements, and their entering grade point average will be the grade point average for all transferable courses as shown on their final transcript from the community or state college. Students with a Florida community or state college Associate in Arts degree will be admitted to Florida Atlantic University but are not guaranteed admission to a limited access program. Additionally, some programs have higher admission requirements than the general university requirements. Refer to specific program information in this catalog.

**Transfer Students With 90 or More Attempted Credits**

All applicants who have attempted more than 90 college credits will be individually reviewed on a

course-by-course basis. Important information:

1. Applicants should present a cumulative GPA of 2.25 or higher on all attempted college work AND should have completed 67 percent or more of their attempted coursework.
2. Applicants must be in good academic standing at their last attended institution.
3. Applicants with 90 or more attempted credits who have not completed prerequisite coursework for their intended degree program will likely not be admitted.
4. Applicants with over 90 credits must meet FAU admissions requirements as well as their intended academic program requirements.
5. Students who have attempted core courses within academic programs and prerequisites more than three times will not be admitted to FAU. Example: Enrolled and attempted Calculus 1 three times and failed or received a below minimum grade or withdrew and are interested in Engineering or Business.
6. Meeting minimum eligibility requirements does not guarantee admission.
7. Applicants with a A.A. degree and attempted or earned additional coursework are held to the 90 or more standards.
8. Students who have attempted 90 or more college credits may have exhausted their financial aid eligibility.

Students without a clear choice of major or those lacking prerequisite coursework should consider a Bachelor of General Studies (B.G.S.) degree. A B.G.S. may also be advised depending on academic history and professional goals. Students should discuss this option with a transfer advisor during onboarding.

### **Tuition Deposit**

Florida Atlantic University requires a \$100 non-refundable tuition deposit from all admitted transfer students in order to confirm enrollment for the term to which they were admitted. The tuition deposit is applied directly toward tuition and fees for the student's first semester. For information, call the Office of Undergraduate Admissions at 561-297-3040 or click [here](#).

### **Second Baccalaureate – Applicants Holding a Baccalaureate Degree**

Students applying for a second baccalaureate degree must have received their first bachelor's degree from a regionally accredited institution and achieved a cumulative grade point average of 2.5 or higher and be in good academic standing at the last institution attended (2.0 GPA or above).

### **Transfer Credit**

In accordance with normal Florida public university procedures, all transferred postsecondary credits will be entered on the FAU record. In certain cases, however, some credits may not be acceptable

toward graduation, depending on the student's major. College-level courses in academic subjects are normally accepted, but vocational training courses, for example, may be acceptable only in a related major. Remedial courses are not accepted for credit toward the degree.

The Office of Undergraduate Admissions conducts an initial evaluation of transferable credits from regionally accredited institutions. The final decision on the acceptability of transferred courses to satisfy University requirements or those of specific degree programs is made by the college in which the student enrolls. Transfer students must meet with an academic advisor soon after their arrival at FAU to ascertain the acceptability of their transferred courses.

The University has implemented a new tool to assist transfer students in understanding whether courses they have taken at another institution are transferable to FAU. A final determination of transfer credit is based on the grade the student earned, anticipated major at FAU and the date of acceptance. The Transfer Equivalency Service (TES), may be accessed at the following [website](#).

### **Transfer of Massive Open Online Courses (MOOCS)**

Undergraduate students who have been admitted to the University may request evaluation of online courses, including Massive Open Online Courses (MOOCS), taken at previous institutions. It is the student's responsibility to request evaluation of credit by the FAU Office of Undergraduate Admissions prior to the initial term of enrollment. For requirements and other details, refer to the [MOOCS entry](#) listed with Undergraduate Admissions above.

### **Admission Decisions**

Admission decisions are made on a rolling basis. Applicants may check the status of their application by going [online](#) and clicking on "Check your application status." When an applicant's file is considered complete, it will be evaluated for an admission decision. Only those applicants who have been accepted will be notified by postal mail in addition to the online decision. A decision is rendered usually within six to eight weeks after the file is considered complete. Admission is for the specified entry term only. To request a change of entry, students must contact the Office of Undergraduate Admission in writing or by emailing [admissions@fau.edu](mailto:admissions@fau.edu). A Change of Entry form can be found [here](#).

## **UNDERGRADUATE INTERNATIONAL ADMISSIONS**

International students must meet the admission criteria for the type of application they are submitting, as outlined in the [Admission Criteria](#) section noted above. In addition, international applicants must satisfy the following conditions:

**Step 1: Submit Application and Fees**

Due to additional processing time needed for international students, submit a complete application, a \$30 application fee and all required documentation, including supporting academic credentials and appropriate test scores and financial documentation, by the following dates for the corresponding terms:

***Undergraduate Students - All materials needed by:***

<b><i>Fall</i></b>	<b><i>Spring</i></b>	<b><i>Summer</i></b>
April 1	October 1	February 15

***Freshman Priority deadline date is February 15 for the fall term.***

**Step 2: Submit Required Academic Credentials**

The academic credentials required will vary based upon the student's entry level.

First-time, incoming international students should have their high school records, including courses/subjects and grades completed during the course of their entire high school career and exam results, such as CXC/GCSES, etc., evaluated by an evaluation agency. The evaluation process is required from all students who are not educated in U.S.-based curriculum or IB curriculum. The evaluation must be conducted course-by-course and show the overall U.S. grade point average (GPA); the mathematics GPA should be calculated separately. A list of evaluation service members may be found at the [NACES](#) accredited evaluation website. If the student attends an international high school patterned after the U.S. educational system outside the United States, they should proceed with completing the [SSAR report](#).

Students who have foreign postsecondary coursework have the option of requesting an internal evaluation completed by a FAU foreign credential evaluator. If an internal evaluation is requested, Admissions requires a certified English translation plus the original transcript from the postsecondary institution. These documents must arrive in a sealed envelope provided the by the institution and the translation agency. Students who would like information on how to request an internal evaluation from FAU should email [Admissions](#) with their Z number after they have applied for admission.

OR, a [NACES](#) accredited evaluation. The equivalency evaluation must be course-by-course with a GPA.

**Step 3: SAT, ACT or CLT Scores**

SAT and ACT test scores are required for all freshman applicants as well as for all students with less than 60 credits from an accredited post-secondary institution.

SAT test information can be found at [www.collegeboard.com](http://www.collegeboard.com) (FAU school code: 5229).

ACT Test Information can be found at [www.actstudent.org](http://www.actstudent.org) (FAU school code: 0729).

CLT: Classic Learning Test information can be found at [www.cltexam.com](http://www.cltexam.com).

The ACT On Campus test is offered at FAU's Testing Center for FAU applicants only and scores can only be used for FAU admission and not portable to any other college or university. For more information, go to [www.fau.edu/testing/all-tests/act/](http://www.fau.edu/testing/all-tests/act/)

#### **Step 4: Submit English Proficiency Tests**

Students who meet the Florida Board of Governors requirements for college readiness through SAT or ACT section scores in Verbal/Reading and English sections may be academically qualified for admission to FAU and exempt from English Proficiency exams. Students **MUST** meet the minimum qualifications for each section score of at least one test:

#### **SAT**

Evidence-Based Reading and Writing Score - 490

#### **ACT Section Scores**

Reading Score - 19

English Score - 17

#### **CLT (Classic Learning Test)**

Sum of the Verbal Reasoning and Grammar/Writing Sections Score - 38

Quantitative Reasoning Section Score - 16

Students who do not meet the above score threshold can provide proof of English Proficiency by meeting **ONE** of the following requirements:

- Completion of at least three years of secondary education from a high school based in the United States or abroad with full curriculum of instruction in English.
- Completion of at least three years of secondary education from a high school based in a country where English is the majority native-speaking language, or where English is the primary language of instruction starting in the primary grades.
- Completion of at least 30 post-secondary credits, including ENC 1101 and ENC 1102 or the equivalent with a grade of "C" or higher, from a U.S. regionally accredited post-secondary institution or from a recognized post-secondary institution abroad with full curriculum of

instruction in English.

- Completion of at least 60 post-secondary credits or an associate degree or higher from a U.S. regionally accredited postsecondary institution or from a recognized post-secondary institution abroad with full curriculum of instruction in English.

If non-English speaking students do not meet the [SAT/ACT/CLT sub-section](#) minimums or any of the categories listed above, they are required to submit an English Proficiency Exam or complete the [Intensive English Institute Academic Track](#) as proof of English proficiency. **FAU will only accept the following exams to demonstrate English proficiency:**

English Proficiency Provider	Minimum Score	Websites
TOEFL	iBT (80) PBT (550)	<a href="http://www.ets.org/toefl">www.ets.org/toefl</a>
IELTS	6.5	<a href="http://www.ielts.org">www.ielts.org</a>
Cambridge English Language Assessment	180	<a href="http://www.cambridgeenglish.org">www.cambridgeenglish.org</a>
Pearson Test of English Academic 55 (PTE)		<a href="http://www.pearsonpte.com">www.pearsonpte.com</a>
Duolingo English Test (DET)	110	<a href="http://englishtest.duolingo.com">englishtest.duolingo.com</a>
OHLA	Elite	<a href="http://www.ohla.com">www.ohla.com</a>
ELS	112	<a href="http://www.els.edu/english-programs/intensive-english">www.els.edu/english-programs/intensive-english</a>
FAU Intensive English Institute	Level VI (Bridge)	<a href="http://www.fau.edu/intensive-english/academic-track/">www.fau.edu/intensive-english/academic-track/</a>
Hong Kong Examinations and Assessment Authority (HKDSE)	5	<a href="http://www.hkeaa.edu.hk/en/hkdse/">www.hkeaa.edu.hk/en/hkdse/</a>
International GCSE IGSE English C/4 Grade		
International Baccalaureate (IB)	English Higher Level 6	
Study Group English for University Studies	Score 65 percent	

For students not meeting the English Proficiency, please see our [Conditional Admissions Track \(CAT\) Intensive English Institute](#).

## Step 5: Immigration/Visa Requirements

International applicants who are accepted to FAU must submit immigration-related documentation to the International Students and Scholar Services Office. For a list of the documents and additional details, please visit the [website](#).

### **Additional Undergraduate International Admissions Options:**

#### ***Conditional Admission Track (CAT) Program***

The Conditional Admission Track of the [Intensive English Institute](#) provides conditional admission for academically qualified international students who need access to English language and other academic and social preparation for success in a U.S. university setting. Conditional Admission Track students will be fully integrated into the Florida Atlantic University community and learn English, hone study habits and absorb cultural nuances that will lead to success in their studies at FAU. To learn more, click [here](#).

## **HARRIET L. WILKES HONORS COLLEGE ADMISSIONS**

The Harriet L. Wilkes Honors College is located at FAU's MacArthur campus in Jupiter. It is a close-knit, residential community committed to providing an intensive educational experience for carefully selected undergraduate students. Freshmen are required to live on campus for the first two years; transfer students with an A.A. degree are not required to live on campus. Wilkes Honors College students take an active role in the learning process by producing original research and engaging in experiential learning through an internship or study abroad and a senior thesis. The Jupiter campus is also home to the Jupiter Life Science Initiative (JLSI), a one-of-a-kind partnership with Scripps Florida, the Max Planck Florida Institute for Neuroscience and the FAU Brain Institute, where Wilkes Honors College students have the opportunity to pursue research and internships. For students whose plans include graduate or professional school, the Wilkes Honors College is an exceptional option to consider.

Prospective students interested in admissions to the Wilkes Honors College should apply through the [Common App](#). However, all applicants are reminded to only submit one application for admission to the University. The evaluation process includes all aspects of the application, including optional submissions of academic papers and résumé to bolster their application. These supplemental documents are helpful in assessing a student's readiness for the rigorous academic environment of the Wilkes Honors College. The College seeks students who demonstrate an active approach to learning and potential for outstanding academic growth. The Wilkes Honors College conducts a holistic review of each applicant directly following their admission to the University; for this reason it is highly recommended that all supplemental documents are submitted to the Wilkes Honors College in Jupiter at

the same time that students submit their online applications to FAU. Each application is read by a member of the admissions staff or by members of the faculty admission committee. Transfer students do not apply directly through the Common App, but instead through FAU's undergraduate admissions [application](#). For additional information, visit the College's [website](#).

The Wilkes Honors College is also home to the Wilkes Medical Scholars Program, a highly-selective 7- or 8-year BS/MD degree pathway. Students admitted to the program are conditionally admitted to FAU's College of Medicine. Students may replace the required thesis with the first year of medical school coursework. The Wilkes Medical Scholars Program is administrated by the College of Medicine, which also oversees the program admission process. For more information and for the online application to the Wilkes Medical Scholars Program, visit the [website](#).

## Requirements

1. Acceptance to FAU.
2. Indication of Harriet L. Wilkes Honors College preference on honors section of undergraduate application or by submitting the [Common App](#) (listed as Wilkes Honors College of FAU).

## Recommended

1. A student résumé detailing extracurricular activities, community involvement, work experience, honors and awards.
2. A graded academic research paper (a typed, analytical paper of at least 500 words, preferably including instructor comments).

For questions about the application process, phone 561-799-8646 or email the [Honors College Office of Admissions](#); email supplemental documents to the [Honors College Office of Admissions](#).

## Application Deadlines

The priority deadline to be admitted to the Wilkes Honors College is December 15th. Incoming freshmen admitted by the priority deadline will receive an application for Scholars Day, an invitation only event. Scholars Day participants compete for the top scholarship awards. After December 15th, Wilkes Honors College applications are reviewed on a rolling basis. Due to limited space in the residence halls, students are strongly encouraged to apply and submit all supporting documents as early as possible.

# UNIVERSITY HONORS PROGRAM ADMISSIONS

Florida Atlantic University's Honors Program for entering freshmen on the Boca Raton campus provides special opportunities to those students who are academically successful, highly motivated and committed to excellence. Honors Program students take advantage of special advising, small seminar classes taught by outstanding faculty and their own sections of an intensive first-year experience course. Admission is selective and competitive. For additional information, visit the program's [website](#).

The supplemental application and additional documents are not required for those students receiving an invitation. However, students must submit confirmation of their attendance. Students not receiving an invitation are highly encouraged to consider applying. A supplemental application is required along with additional documents. All of the information submitted is used to consider the applicant's strengths and abilities. The program looks for students who demonstrate an active approach to learning and the potential for outstanding academic growth. A holistic review begins once all of the required documents have been received.

## Requirements

1. Acceptance to FAU.
2. A supplemental application, available [here](#).
3. A résumé covering extracurricular activities, community involvement, work experience, honors and awards.
4. A graded writing sample (typed analytical paper of 500 words).

Questions about the application process should be addressed to the Office of Undergraduate Admissions at 561-297-3040 or [honors@fau.edu](mailto:honors@fau.edu).

# GRADUATE ADMISSIONS

## ADMISSION POLICY

The Graduate College assists prospective students and the general public in learning about the University and its graduate programs, including procedures related to application and admission to University degree programs. Those interested in learning about the educational opportunities and degree programs available at the University should contact the Graduate College, Florida Atlantic University, 777 Glades Road, SU 80, Room 101, Boca Raton, FL 33431 (561-297-3624) or visit the College's [website](#).

The University actively encourages applications from all persons who are motivated to pursue university studies and who have obtained adequate academic preparation to succeed. The application

and admission process attempts to identify those applicants who are prepared to benefit from university study and who can benefit from specific university services to improve their likelihood of success.

All interested persons, regardless of race, color, religion, gender, national origin, age, sexual orientation, physical disablement, marital status or veteran status, are encouraged to submit applications. The admission review process does not discriminate on the basis of any of these factors.

## ADMISSION REQUIREMENTS

A student seeking admission into an FAU graduate program must have a bachelor's degree or equivalent from a regionally accredited institution or, for students educated abroad, the U.S. equivalent of a bachelor's degree from a regionally accredited institution.

Graduate program applicants must meet the minimum standards set forth by the Florida Board of Education, the University, and when applicable, more stringent admission standards set by each department.

Applicants to graduate programs are required to present their scores on the Aptitude Test of the Graduate Record Exam or equivalent scores on equivalent measures approved by the Board. The University may waive this requirement in individual cases, and some major departments may exclude this requirement. Consult the appropriate department within each [college section](#) for admissions information.

Applicants must check the individual departmental admission requirements, which are listed separately within each college section.

Graduate admissions are competitive and meeting minimum program requirements does not guarantee admission.

**Note:** Applicants who find that regular admission and curricular requirements cause an undue hardship may request a waiver of such requirements through their individual departments. All such requests that require a waiver of University policy will be sent to the Graduate College for final action.

## FILING DATES

The entry terms for degree programs are fall (August), spring (January) and summer (May). However, students should apply as early as possible. Applications completed by the recommended Filing Date

will be assured of prompt review. Late applications will be handled in the order received.

Applicants	Filing Dates		
	<i>Fall</i>	<i>Spring</i>	<i>Summer</i>
Domestic	July 1	November 1	April 1
International	June 1	October 1	March 1

Contact the appropriate college and department for specific application requirements and possible earlier filing dates.

**Note:** The above-listed filing dates are only meant as final deadlines for submitting a graduate admission application. International applicants should check their specific program application requirements as departments may have earlier submission deadlines. International applicants are strongly encouraged to check processing times with the U.S. embassy or consulate where they plan to apply for student visas. Visa appointment availability and processing times vary significantly from country to country. Students with questions about visa procedures and processing times may email [International Student Services](#).

## ADMISSION CATEGORIES FOR DEGREE-SEEKING STUDENTS

Graduate students may apply for degree programs in the categories below. (**Note:** Students who do not intend to pursue a degree program should follow the procedures outlined under the Non-Degree-Seeking Students subsection later in this Admissions section.)

### Master's Degree

This program is for an applicant who holds a bachelor's degree from a regionally accredited college or university and who intends to pursue a program leading to a master's degree at Florida Atlantic University.

### Specialist's Degree

This program is for an applicant who holds a master's degree from a regionally accredited college or university and who intends to pursue a program leading to the Education Specialist degree at Florida Atlantic University.

### Doctoral Degree

In most cases, this program is for an applicant who holds a master's degree from a regionally accredited college or university and who intends to pursue a program leading to a doctoral degree at Florida

Atlantic University.

## REQUIRED CREDENTIALS AND DOCUMENTATION

### Applications

The application for admission as well as all other required documents must be filed with the Graduate College before any final decision can be made regarding the eligibility of an applicant.

Application deadlines appear above and in the program summary. Click [here](#) to obtain the graduate admission procedures. In most instances, applications submitted after the Filing Date will be considered for the next available entry date.

### Required Documents

1. Graduate Application: A completed application for graduate admission is required for all degree-seeking applicants.
2. Application Fee: A non-refundable \$30 application fee payable in U.S. dollars drawn on a U.S. bank is required prior to the handling of any application.
3. Transcripts: Applicants must request that one official transcript be sent directly to the Graduate College from the Registrar of each college or university attended. If the applicant receives the transcripts directly from the Registrar, they should not open the envelopes, but send them, unopened, to the Graduate College. An official transcript is one that is issued by the school or college attended, bearing appropriate signatures or seals, and kept in a sealed envelope. Transcripts opened prior to delivery are no longer official and will not be accepted.

The Graduate College requires all applicants whose transcripts are from foreign institutions to have their credentials evaluated by a professional evaluation service. Click [here](#) for details regarding credential evaluation requirements for individual degree programs. Applications cannot be processed until these evaluations are received. Note that only foreign credential evaluations conducted by a National Association of Credential Evaluation Services (NACES) member organization will be accepted. To view a list of NACES members, visit the [website](#).

4. Examinations: All applicants must submit their scores on the general section of the Graduate Record Examination (GRE). Applicants for admission to certain programs must submit scores on the appropriate subject section of the Graduate Record Examination. Business applicants must submit scores on the Graduate Management Admissions Test (GMAT). GRE or GMAT scores

more than five years old will not be accepted. Exceptions to this requirement will be considered by petition. Some major departments may exclude this requirement. Consult the appropriate department within each [college section](#) for admissions information.

5. Additional Records: Applicants may be required to submit such additional materials as specified by the individual colleges and graduate programs.
6. To comply with Florida Atlantic University policy, all students, prior to registration, must submit immunization records through an online process. FAU requires documented proof of immunization to measles and rubella for all students. In addition, all students must provide documentation of vaccinations against meningococcal meningitis and hepatitis B or provide a signed waiver for each declined vaccination. Refer to [Student Health Services](#).

### **Departmental Requirements**

Each applicant for admission to graduate study should consult the portion of the catalog that corresponds with the academic program the student wishes to pursue. Additional evidence may be required by individual colleges and/or departments. Admission to graduate study does not constitute admission to candidacy for the degree. Students must satisfy departmental requirements governing admission to candidacy. Each applicant should make an appointment with the appropriate college official to plan an individual program.

## **ADMISSION DECISIONS**

Completed applications are decided upon by the college in which the applicant expects to enroll. Colleges may admit or deny applicants' admission based upon their own specified criteria. Official notification of decision is issued by the Graduate College.

### **Conditional Admission**

Colleges may admit students on a conditional basis using their specific college criteria.

## **GRADUATE INTERNATIONAL ADMISSIONS**

### **Required Documents**

1. Graduate Application: A completed application for graduate admission is required for all degree-seeking applicants.
2. Application Fee: A non-refundable \$30 application fee payable in U.S. dollars drawn on a U.S. bank is required prior to the handling of any application.

3. **Transcripts:** Applicants must request that one official transcript be sent directly to the Graduate College from the Registrar of each college or university attended. If the applicant receives the transcripts directly from the Registrar, they should not open the envelopes, but send them, unopened, to the Graduate College. An official transcript is one that is issued by the school or college attended, bearing appropriate signatures or seals, and kept in a sealed envelope. Transcripts opened prior to delivery are no longer official.
4. **Foreign Credential Evaluation:** The Graduate College requires all applicants whose transcripts are from foreign institutions to have their credentials evaluated by a professional evaluation service. Click [here](#) for details regarding credential evaluation requirements for individual degree programs. Applications cannot be processed until these evaluations are received. Note that only foreign credential evaluations conducted by a National Association of Credential Evaluation Services (NACES) member organization will be accepted. To view a list of NACES members, visit the [website](#).
5. **English Language Requirement:** Graduate students must furnish evidence of proficiency in English by submitting scores from one of the following examinations: the Test of English as a Foreign Language (TOEFL), the Test of English as a Foreign Language – Internet-Based Test (TOEFL iBT), the International English Language Testing System (IELTS), or the Duolingo test. A university-wide minimum paper-based score of 548 (CBT-173) is required for the TOEFL, a score of 79 is required for the TOEFL iBT, a band score of 6.0 is required for the IELTS, and a score of 110 is required for the Duolingo test. Individual colleges and departments may require higher proficiency in English scores than the minimums given above.
6. **Examinations:** All applicants must submit their scores on the general section of the Graduate Record Examination (GRE). Applicants for admission to certain programs must submit scores on the appropriate subject section of the Graduate Record Examination. Business applicants must submit scores on the Graduate Management Admissions Test (GMAT). GRE or GMAT scores more than five years old will not be accepted. Exceptions to this requirement will be considered by petition. Some departments may exclude this requirement. Consult the appropriate department within each [college section](#) for admissions information.
7. **Additional Records:** Applicants may be required to submit additional materials as specified by the individual colleges and graduate programs.
8. Once the academic part of admissions is completed, graduate international students must submit the Financial Certification form as evidence of sufficient financial resources and original bank letter(s) proving expected amount of money for the first year of study. In addition, international students who are transferring from another U.S. institution are required to submit the Visa Clearance form. For details and to print the forms, click [here](#).
9. To comply with Florida Atlantic University policy, all students, prior to registration, must submit

immunization records through an online process. FAU requires documented proof of immunization to measles and rubella for all students. In addition, all students must provide documentation of vaccinations against meningococcal meningitis and hepatitis B or provide a signed waiver for each declined vaccination. Refer to [Student Health Services](#).

10. All international students are required to purchase annual medical insurance. Contact the Office of International Services at 561-297-3049 for more information or visit its [website](#).

## Departmental Requirements

Each applicant for admission to graduate study should consult the portion of the catalog that deals with the academic program the student wishes to pursue. Additional evidence may be required by individual colleges and/or departments. Admission to graduate study does not constitute admission to candidacy for the degree. Students must satisfy departmental requirements governing admission to candidacy. Each applicant should make an appointment with the appropriate college official to plan an individual program.

# ADDITIONAL ADMISSION INFORMATION FOR ALL STUDENTS

## ADMISSION TO PROFESSIONAL PROGRAMS

Certain courses of study at the University prepare students for entry into a profession, such as architecture, education, nursing and social work. Admission and retention in these programs may require adherence to a professional code of ethics. For application and other requirements of these degree programs, refer to the specific program's information in this catalog or to other materials provided by these programs.

## CAMPUS TOURS

Undergraduate information sessions and guided campus tours are available for all interested individuals on the Boca Raton campus each weekday at 10 a.m. and 1 p.m. and on most Saturdays only in the fall and spring semesters at 9 and 10 a.m., except for University holidays and the Saturdays of home football games. The walking tours leave from the Undergraduate Admissions Office in the Student Support Services Building and last approximately one hour. Group tours or special requests may be accommodated; however, in order to allow time for preparation, please call the number below prior to the day of the tour. There may be times and days that we are unable to accommodate the special requests. Call 561-297-3040 for more information or click [here](#).

## MISCONDUCT - ADMISSIONS REVIEW BOARD

Responses to questions on the application related to academic or behavioral misconduct and/or criminal history are required for all applicants. After applying for admission, students with past misconduct or criminal history must submit a full statement of relevant facts and any additional information as requested by the Office of the Dean of Students, Office of the Registrar, or Graduate College. Providing the requested documentation does not preclude students from being considered by the ARB for enrollment at FAU. The ARB meets monthly, and student files must be complete in order to be reviewed by the Board. Students are encouraged to monitor their email for updates on their status.

### **Institutional**

Applicants with prior misconduct at an educational institution must disclose the incident(s) on the application.

*Are you currently, or have you ever been, charged with or subject to disciplinary action for scholastic (such as plagiarism or cheating) or any other type of behavioral misconduct at any educational institution? You do not need to disclose academic dismissal, suspension, or probation for poor grades.*

Applicants are expected to complete all sanctions assigned by a previous institution(s) and are expected to be in good conduct standing with the institution(s).

### **Criminal**

Applicants with a prior criminal violation(s) must disclose the incident(s) on the application.

Answering truthfully and disclosing information about the situation(s) does not automatically discount consideration for admission.

*Have you ever been charged with a violation of the law, misdemeanor and/or felony (even if adjudication was withheld) which resulted in, or, if still pending could result in, probation, community service, restitution, a jail sentence or the revocation or suspension of your driver's license (you are not required to include traffic violations which only resulted in a fine)?*

Applicants who are still completing terms of a legal violation(s) such as supervised probation, deferred probation, deferred prosecution, community service, fines and/or restitution or other terms may not be eligible for review by the Admissions Review Board unless completion will occur within six months from the first day of the entry term.

The University reserves the right to deny admission or readmission to an applicant when it determines

that the admission of the student represents a safety risk to the University community and/or when denial of the application is determined to be in the best interest of the University.

Students whose applications are denied by the Admissions Review Board may request review of the denial by the Office of the University Provost. The request for review must be submitted to the Office of Admissions for undergraduate applicants, the Office of the Registrar for non-degree or transient applications, or the Graduate College for graduate applicants within two weeks of the date of the notice of denial. The submission must include the basis for the additional review and any additional documentation for consideration by the Office of the Provost.

## NATION OF CITIZENSHIP INFORMATION

Applicants need to declare their nation of citizenship. If their nation of citizenship is not the United States, applicants will need to provide a copy of their Visa, Notice of Action-approved, a valid employment authorization card (valid through the term of entry) or Resident Alien Card (green card). This information is necessary to determine international student status.

## NON-DEGREE-SEEKING STUDENTS

Non-degree-seeking students at Florida Atlantic University are those who wish to enroll for courses but do not intend to earn a degree from FAU. Non-degree students who wish to become degree-seeking must submit an application with the Office of Undergraduate Admissions or the Graduate College on or before the deadline posted on the [Admissions site](#) or [Graduate Programs site](#). Credits that have been earned as a non-degree-seeking student may be applied to the student's degree program; however, this is contingent upon acceptance to the University and approval by the college in which the student's program is housed. For an explanation of the number of credits that may be applied and other specifics, refer to the heading Registration for Non-Degree-Seeking Students in the [Registration and Records section](#) of this catalog.

Students must submit a [Non-Degree Enrollment application](#) accompanied by a \$30 non-refundable and non-transferable fee. Undergraduate non-degree applicants must have earned a minimum of a high school diploma in order to be admitted in a non-degree status. Graduate non-degree applicants must have earned a minimum of a bachelor's degree in order to be admitted in a non-degree status. Official transcripts are not required for this process. A [Non-Degree Residency application](#) and supporting documentation must be provided for review in order to qualify for in-state tuition; students who do not provide paperwork are coded as non-Florida residents.

Registration on a space-available basis is conducted during regular and late registration periods, as listed in the University's [Academic Calendar](#). To comply with Florida Atlantic University policy, all students, prior to registration, must submit immunization records through an online process. FAU requires documented proof of immunization to measles and rubella for all students. In addition, all students must provide documentation of vaccinations against meningococcal meningitis and hepatitis B or provide a signed waiver for each declined vaccination. Refer to [Student Health Services](#).

Non-degree students who have not enrolled at FAU for three or more consecutive semesters must submit a new Non-Degree Enrollment application, a new Non-Degree Residency application and supporting documentation as noted above accompanied by a \$30 non-refundable, non-transferable application fee.

**Note for undergraduate students:** Students in a non-degree-seeking status are not eligible for financial aid. Students who have been denied admission to FAU as degree-seeking undergraduates must wait three semesters before they are eligible to register as non-degree-seeking students.

**Note for graduate students:** Students in a non-degree-seeking status are not eligible for financial aid. Students in non-degree-seeking status who at a later date enroll in a graduate degree program may not transfer more than one-third of the required coursework into the program or may not use course credits that are more than seven years old at the time of graduation. Satisfactory academic performance as an FAU non-degree-seeking student will not guarantee admission into a graduate degree program. Students dismissed from an FAU graduate degree program may not subsequently enroll using the non-degree-seeking status to fulfill coursework or grade requirements for the program in which they were enrolled.

## RESIDENCY INFORMATION

All applicants must complete the Residency Classification for Tuition Purposes affidavit through [Owl Residency Portal](#) and submit the required documentation, regardless of the duration of their presence in Florida. Incomplete, unsigned or blank forms will result in the classification of “**Non-Florida Resident**” status for tuition purposes until the documentation has been provided, reviewed and approved by the Residency Officer.

Students who are not United States citizens must provide appropriate documentation from Immigration and Naturalization Services that designates their status while living in the United States. Resident alien cards (green cards), employment authorization cards or eligible Visa types must be submitted at the

time students submit their application. All documentation must be valid through the term of entry. Those applicants with expired paperwork must be referred to the Office of Immigration and Naturalization Services. All students who were previously classified as non-U.S. citizens and are now returning as U.S. citizens must submit updated documentation.

Additional information may be requested by the University. To view our full cost of attendance information page, visit <https://www.fau.edu/finaid/other/cost-of-attendance/>. The submission of requested documentation does not guarantee Florida residency status. All residency information is reviewed in accordance with [Florida Statute 1009.21](#). All residency documentation must be submitted no later than two weeks prior to the first day of classes for the initial term of entry or for the term in which the student is applying for in-state tuition. Current graduate students must file with the Registrar's Office for reclassification.

The Undergraduate Admissions and Graduate College offices determine residency status for degree-seeking students prior to their first term of enrollment. Further information on residency is located on the Undergraduate Admissions [website](#) or the Graduate College [website](#).

Students who would like Florida residency classification after their first term of enrollment should refer to the Residency Reclassification subsection in the [Registration and Records section](#) of this catalog.

To appeal an initial residency determination, a student may obtain a Residency Classification Appeal form from the Registrar's Office and submit that appeal no later than the last day of the current term for which the appeal is to be effective. The appeal is reviewed by the Residency Appeals Committee.

The Residency Appeals Committee decision constitutes the final decision of Florida Atlantic University. A student may seek judicial review of this final University decision under [Section 120.68, Florida Statutes](#). This may be done by filing within thirty (30) days of the date of this decision: (i) a Notice of Appeal with the Agency Clerk of Florida Atlantic University; and (ii) a copy of the Notice of Appeal with the Clerk of the Fourth District Court of Appeal or the Court of Appeal for the district in which the student resides, together with any filing fees that may be prescribed by law.

## APPLICANT RECORDS

Applicant records are the property of the University for use by faculty, staff and agents of the University for admissions, registration, counseling, financial aid or any other activity related to the applicant's academic program. Applicant records are confidential and may only be released to the applicant. Applicants requesting that the University release their records to a third party must provide

specific written authorization.

## CONTACT INFORMATION

Correspondence regarding undergraduate admission, including transcripts and test scores, should be sent to:

Florida Atlantic University  
Office of Undergraduate Admissions  
777 Glades Road, P.O. Box 3091  
Boca Raton, FL 33431-0991  
561-297-3040  
Fax 561-297-2758

**BACHELOR OF URBAN AND REGIONAL PLANNING (B.U.R.P.)**

(College of Science)

## BACHELOR OF URBAN DESIGN (B.U.D.)

(College of Science)

## BACHELOR OF GENERAL STUDIES

The Bachelor of General Studies (B.G.S.) degree allows students to design a plan of study to meet their personal interests and career goals. The plan of study is more flexible than that required in the traditional degree programs. The degree is intended for those members of the local community already in careers who need a degree to advance professionally or personally, as well as for current FAU students who meet the 120-credit requirement, but because of personal or employment imperatives, need to hasten their time to degree completion.

### **Degree Requirements**

In consultation with an advisor, students map out a plan of study that includes 15 credits of upper-division coursework in one discipline. All other requirements for the FAU degree apply, including:

1. A minimum of 120 credits overall;
2. All General Education Program requirements (36 credits);
3. Writing Across Curriculum (Gordon Rule Writing) requirements;
4. At least 45 credits at the upper-division level;
5. The last 30 credits of upper-division credits taken in residence at FAU;
6. A minimum 2.0 FAU GPA overall and in the 15-credit upper-division coursework selected in one discipline.

Students may not pursue the Bachelor of General Studies as a second major, second degree or second baccalaureate.

Students may pursue minors and/or certificates with the B.G.S. degree as long as the pursuit does not extend time to graduation or other existing college restrictions. No course overlap may occur between the B.G.S. 15-credit discipline and the minor(s). However, course overlap between the certificate(s) and the B.G.S. 15-credit discipline is allowed. Course overlap between the certificate(s) and the minor(s) is allowed.

Students interested in pursuing the Bachelor of General Studies should contact the advising office

of the FAU college that houses the student's selected discipline. Contact information for college advising offices is found in the [General Information](#) section of this catalog.

## FAU HONORS PROGRAMS

Undergraduates have a variety of honors options to choose from at FAU.

### **HARRIET L. WILKES HONORS COLLEGE**

Academically accomplished students can take advantage of the complete all-honors education of the Harriet L. Wilkes Honors College in Jupiter, Florida. The Honors College provides an extraordinary liberal arts and science education in a unique living and learning environment located on FAU's beautiful John D. MacArthur campus, 40 minutes north of the main Boca Raton campus. It is an opportunity for motivated students to take all four years of their coursework at the honors level, in classes with an average size of 15 students. Honors College students receive the benefits of a small, selective, residential liberal arts college while also having full access to the research opportunities of a large university, including access to the world-renowned Scripps Research and Max Planck Institutes, located on the Jupiter campus and FAU's Harbor Branch Oceanographic Institute in Fort Pierce.

Among the unique features of the Wilkes Honors College in Jupiter:

- All admitted students are awarded substantial merit scholarships including a significant number of "full-ride" scholarships (up to \$60,000 over four years).
- Small class sizes mean students interact closely with professors who are internationally known scholars, researchers and authors.
- All students complete either an internship or a study abroad. Students have access to internships at Scripps Florida and the Max Planck Florida Institute, as well as internships in the arts and humanities, law, politics, environmental studies and many other disciplines. Students have access to an extensive array of study abroad opportunities.
- Pathways in Business, Education, Engineering, and Nursing enable students to pursue focused career objectives while also receiving a strong foundation in the liberal arts and sciences.
- The Wilkes Medical Scholars Program enables a select group of students to receive a B.A. from the Wilkes Honors College and the M.D. degree from FAU's College of Medicine in seven to eight years.
- All Honors College students write an honors thesis in their senior year and take advantage of other opportunities to conduct research alongside faculty members. Honors College students have

published their work in scholarly journals and are encouraged to present research at conferences.

- Students live in spacious residence halls and can take part in an impressive variety of recreational activities.

For more information visit the Wilkes Honors College [website](#).

## UNIVERSITY HONORS PROGRAM

Another option for undergraduates is the University Honors Program (UHP) based primarily on the Boca Raton campus. Each year a number of highly qualified entering freshmen are selected for the University Honors Program. This two-year program provides a unique, enhanced educational experience. Through a series of small honors seminars and expanded course offerings, University Honors presents an exciting alternative to the normal program and course requirements for students in their first two years of attendance.\* The University Honors Program seeks to admit those students who will benefit most from the enrichment offered by this experience. Selection decisions are based upon a student's academic record in a college preparatory curriculum, SAT or ACT scores, liveliness of intellect, school and community involvement and capacity for leadership. Students who are not invited may submit a University Honors Program Supplemental Application, an academic writing sample and a résumé.

The program consists of 14 honors credits. All students are required to take 2 credits of Honors Introduction to Academic Life (SLS 1501) offered in the fall. In addition, students are expected to complete 12 credits in courses that are specially designated as honors courses and also fulfill General Education requirements. These courses include:

1. University Honors core seminars that focus on topics central to a liberal arts education. They substitute for regular courses in the General Education Program, FAU's General Education curriculum; some are designated by a 1930 course number. These courses are limited to 22 students because they fulfill the Writing Across Curriculum requirements. Typically, students in the University Honors Program are expected to take four seminars during their freshman year.
2. Specially designated honors sections of lower-division courses, affording intensive exposure to course material.
3. Advanced courses approved as substitutes for General Education requirements.
4. Additional elective honors seminars taken in the second year of attendance.
5. A successfully completed honors compact conducted in connection with a course or Directed Independent Study.
6. An honors directed independent research (DIR) course with a faculty member of their choice.

Honors students should consider pursuing the FAU Undergraduate Research Certificate, as many of the Honors requirements are also applicable to this [Research Certificate](#).

In order to successfully complete the University Honors Program, students must maintain a 3.0 grade point average in their honors courses and an overall grade point average of 3.5. Students must also complete 20 hours of volunteer work. Completion of the University Honors Program will be recognized at a special University awards ceremony and will be noted on the student's Florida Atlantic University transcript.

### **Substitutes for General Education Program Requirements**

All seminars offered by the University Honors Program satisfy General Education requirements. If students wish to complete a University Honors Program requirement by an alternative means (such as 2 through 6 above), that plan must be discussed with a UHP advisor and approved in advance by both the University Honors Director (who certifies that the work is being done at the honors level) and the Dean of Undergraduate Studies (who certifies that the work fulfills a General Education requirement).

\*Students with an A.A. degree should consider applying to an upper-division honors course in the major program and not the University Honors Program.

**Note:** Whenever a University Honors Program seminar satisfies a Writing Across Curriculum requirement, a grade of "C" or better is required. Substitutions for these seminars are subject to approval by the major college.

For additional information, visit the University Honors Program [website](#).

## **HONORS-IN-THE-MAJOR PROGRAMS**

Honors-in-the-Major Programs at Florida Atlantic University offer qualified and intellectually curious upper-division students the opportunity to enrich their academic experience by working closely with faculty on creative, scholarly or research projects.

Honors-in-the-Majors Programs are offered in select departments within each of the colleges and are designed for students to delve deeper and begin the professionalization into their chosen disciplines with faculty members committed to excellence in creative, scholarly or research endeavors.

For existing Honors-in-the-Major programs, please visit:

<https://www.fau.edu/honorsinthemajor/program-information/existing-honors-in-the-major/>

These programs are approved by the University Honors Council once departments design their

respective programs and determine their program's entry and completion requirements. Courses demonstrate increased rigor and demands consistent with an honors program. A thesis or a capstone project is a hallmark in each of these programs. Graduate courses, as designated by departments, count as honors courses for students completing Honors-in-the-Major Programs, once the University Honors Council has approved them.

For a graduate course to count for an Honors-in-the-Major Program, the course must be taken for a grade. Satisfactory/Unsatisfactory (S/U) courses will not count. A grade of "C" or higher is required for the course to count toward the Honors in-the-Major Program.

In most cases, financial aid can be used for the graduate course, as long as the course is degree applicable. It is advisable to meet with a Financial Aid Counselor to review the student's customized financial aid package.

## UNDERGRADUATE STUDIES CERTIFICATE

### Undergraduate Research

These programs provide a multidisciplinary perspective and are available to all undergraduate students, unless stated otherwise in the program descriptions. Program descriptions are listed in specific college sections.

## COMBINED DEGREE PROGRAMS

All combined bachelor's/master's degree programs offered at the University require a minimum of 150 credits, comprised of a minimum of 120 credits for the baccalaureate degree and a minimum of 30 credits for the master's degree. All combined bachelor's/doctoral degree programs require a minimum of 192 credits, comprising a minimum of 120 credits for the baccalaureate degree and a minimum of 72 credits for the doctoral degree. All master's degree program credits or doctoral degree program credits must be at the graduate level (5000 level or above). A maximum of 12 credits of graduate coursework may be used to satisfy both degrees. The baccalaureate degree will be conferred before the graduate degree. Individual programs may have more stringent requirements. Please follow the links to the college sections below for the individual combined degree program information.

# GRADUATE CERTIFICATES

In addition to the above degree programs, the University offers the following graduate certificate programs:

### College of Arts and Letters Graduate Certificates

English as a Second Language (ESL) Studies

Film and Culture

Literary Translation

Nonprofit Executive Leadership

Public Ethics and Leadership

Public Policy

Sexuality and Gender Education

Women, Gender and Sexuality Studies

### College of Business Graduate Certificates

Big Data Analytics: Business

Crisis and Disaster Management

Environmental Management (Certificate is not admitting students at this time.)

Health Administration

Hospitality and Tourism Management

Innovation Entrepreneurship

Legal Compliance Management (Certificate is not admitting students at this time.)

Professional Accounting

Risk Management

Transportation, Logistics and Supply Chain Management

(offered jointly with the College of Engineering and Computer Science)

### College of Education Graduate Certificates

Environment Education

Instructional Design  
K-12 Online Teaching  
Multicultural Education  
Teacher Leadership

### **College of Engineering and Computer Science Graduate Certificates**

Aerospace Engineering  
Artificial Intelligence  
Big Data Analytics: Computer Science  
Biomedical Engineering  
Corrosion  
Cyber Security: Computer Science  
Energy Resilience  
Offshore Engineering  
Transportation Engineering  
Transportation, Logistics and Supply Chain Management (offered jointly with the College of Business)

### **College of Medicine Graduate Certificates**

Biomedical Science  
Genomics and Predictive Health

### **College of Nursing Graduate Certificates**

Adult/Gerontological Nurse Practitioner  
Advanced Holistic Nursing  
Clinical Nurse Leader  
Family Nurse Practitioner  
Nurse Educator  
Nursing Administration and Financial Leadership  
Psychiatric Mental Health Nurse Practitioner

### **College of Science Graduate Certificates**

Cyber Security: Mathematics

Economic Development and Tourism

Environmental Restoration

Geographic Information Systems

Medical Physics

Neuroeconomics

Neuroscience

Post-Baccalaureate Research Education Program in Chemistry

Remote Sensing

Sustainable Community Planning

### **College of Social Work and Criminal Justice Graduate Certificates**

Addictions

Child Welfare

Healthy Aging

Social Justice

These programs provide a multidisciplinary perspective and are available to all graduate students, unless stated otherwise in the program descriptions. Program descriptions are listed in specific college sections.

## UNDERGRADUATE DEGREE REQUIREMENTS

Students assume all responsibility for all graduation requirements.

## UNDERGRADUATE STUDIES, OFFICE OF THE DEAN

The Undergraduate Studies Office is headed by the Dean of Undergraduate Studies who reports directly to the University Provost and Chief Academic Officer.

Under the supervision of the Dean, a number of academic support services make major contributions to the enhancement of the undergraduate experience. They include University Advising Services, Academic Coaching and Career Enhancement for Student Success (ACCESS), Jupiter Advising Services (Academic Advising, Coaching and Transfer Services), the Center for Teaching and Learning (Center for Learning and Student Success, Science Learning Center, University Center for Excellence in Writing, Math Learning Center, Learning Assistant Program, eSuccess, and Scholarship

of Teaching), Office of Undergraduate Research and Inquiry, Prestigious Fellowships, Scholars Program, Student-Athlete Success Center, Testing and Certification, Office of Academic Success Initiatives, University Honors Program, Honors-in-the-Major Program and Writing Across the Curriculum.

## PLANNING THE DEGREE PROGRAM

Students should plan their degree program in consultation with their advisor. For planning purposes, it is important to read this Degree Requirements section carefully and to refer questions to the advisor or other appropriate offices. Many of the degree requirements described are most conveniently satisfied during the lower division (prior to the student's completion of 60 credits). When planning their lower-division program, students should consider the General Education Program requirements and others, such as the Writing Across Curriculum (Gordon Rule) and College-Level Computation Skills (Gordon Rule) as described in this section, the college requirements for their major as described in this section and their major college requirements as described in the appropriate college section.

## UNIVERSITY ADVISING SERVICES

The academic advising philosophy for [University Advising Services \(UAS\)](#) is based on the Appreciative Advising model. It is the intentional collaborative practice of asking positive, open-ended questions that help students optimize their educational experience, achieve their dreams and goals and reach their potential. The student and advisor, as partners, work together to discover the student's passion and dreams, design a plan to achieve those dreams, deliver on that plan and make changes as necessary to achieve their goals.

The primary focus for UAS is first- and second-year students. UAS provides a safety net for these students when they are not sure where to go for assistance. In support of this mission, the UAS office offers a comprehensive array of services aimed at helping students develop and implement an appropriate and meaningful education plan. UAS provides:

- Advising and course selection for all undecided/exploratory students regardless of number of earned credits;
- Support services for students not in good academic standing with up to 60 earned credits;
- Support services for students with fewer than 60 earned credits (freshmen and sophomores);
- Pre-Law Advising and Support ([PLUS](#)) Program;
- Educate Tomorrow at FAU ([ET@FAU](#)) for former foster youth and homeless students;

- First Generation Advising and Support ([First and Proud](#));
- General Education Curriculum evaluations and substitutions;
- Academic support and resources for FAU High School, dual enrolled, early admission and non-degree students.

**Note:** Referrals to specific college advising offices are made after three semesters and/or 45 earned credits for those students who have declared majors and are in good academic standing.

All program activities and services offered by University Advising Services are aimed at aiding students in developing and implementing an appropriate and meaningful educational plan. For information, visit the University Advising Services website or call 561-297-3064.

## UNDERGRADUATE STUDIES COURSES

### **Special Topics in Undergraduate Studies (IDS 2932) 1-4 credits**

Special topics of interest to undergraduate students.

### **Special Topics in Undergraduate Studies (IDS 2933) 0 credit**

Special topics of interest to undergraduate students. *Grading: S/U*

### **RI: Professional Capstone (IDS 4894) 1-4 credits**

*Prerequisite: Permission of department*

Students complete a culminating product/performance that is reflective of applied expertise gained in the competency areas of their undergraduate studies with a focus on demonstrating academic program reflections and career readiness. This course is intended to be taken in the semester of graduation. This is a Research-Intensive (RI) course.

### **Special Topics in Undergraduate Studies (IDS 4931) 0 credits**

Special topics of interest to undergraduate students. *Grading: S/U*

### **Special Topics in Undergraduate Studies (IDS 4932) 1-4 credits**

Special topics of interest to undergraduate students.

### **Career and Life Planning (SLS 1301) 1 credit**

Offered by the FAU Career Center and taught by nationally certified career counselors, this course provides an overview of career development theories and decision-making skills for career/life planning. It focuses on self-assessment, choosing a major, exploring career paths and developing an

action plan to help achieve career goals. The course also provides strong emphasis on the development of presentation, oral and written communication skills as essential skills for any future major/career.

**Note:** All freshmen as well as transfer students entering without an A.A degree who have not declared a major or pre-major by the end of their first semester at FAU (excluding summer terms) will be required to enroll in this course in their second semester.

### **FAU iSucceed: College Success Strategies (SLS 1410) 0 credit**

*Prerequisite: Admission as an FTIC student who enrolls at FAU through Jump Start or similar admissions pathway programs*

This course is designed to develop the skills and build the self-awareness students need to make a successful transition to the university. Based on positive psychology and learning theory, class activities encourage students to reflect on how they learn, their strengths and curricular and co-curricular planning and opportunities to support their academic and career goals. *Grading: S/U*

### **First-Year Interest Group Experience (SLS 1411) 1 credit**

*Prerequisites: Admission as an FTIC student who enrolls at FAU for the fall semester*

This is a themed seminar course where students experience the academic culture and get connected to their specific college. Students investigate hot topics and trends in their majors, participate in learning opportunities that build relationships, skills and knowledge that contribute to their academic and career success and reflect on how their personal interests and majors play roles in the FAU scholarly community. *Grading: S/U*

### **The Learning Community Experience (SLS 1412) 0 credit**

The Learning Community experience combines student academic learning in and out of the classroom through activities, both discipline- and interdisciplinary-specific. Based on Student Development Theory, students participate in a variety of programs, workshops and events and reflect on their relevance to enhancing the students' overall college experience. *Grading: S/U*

### **The Learning Community Experience Part 2 (SLS 1413) 0 credit**

*Prerequisite: SLS 1412*

This course provides students with additional opportunities to engage in activities and programs to support the Learning Community Education model. Based on Student Development Theory, students participate in a variety of programs, workshops and events, and reflect upon their relevance to the enhancement of their overall college experience while they are concluding their first college year. *Grading S/U*

### **The Learning Community Student Leader Experience (SLS 1414) 0 credit**

*Prerequisites: SLS 1412, SLS 1413*

This course prepares students, called Learning Community Liaisons, to serve as mentors to those students who are in the Learning Community program for their freshman year at Florida Atlantic University. *Grading S/U*

### **Honors Introduction to Academic Life (SLS 1501) 2 credits**

Required for first-year students in the University Honors Program, this course is designed to increase the students' success in college by assisting them in obtaining the knowledge and skills necessary to reach their educational objectives. Topics include the nature of postsecondary education, time management, test-taking, communication skills, study techniques, question-asking skills, and library use. This is an Academic Service Learning (ASL) course.

### **Learning Strategies and Human Development (SLS 1503) 2 credits**

Designed to assist students in making the transition into higher education. Topics include time management, test-taking skills, learning strategies and styles, diversity, short- and long-term planning, developing analytical and critical thinking skills, relationships and campus resources.

### **Special Topics in Student Success (SLS 1931) 0-3 credits**

This course permits Undergraduate Studies to pilot new courses to support specific student populations and programs as identified to increase student learning, development, engagement and outcomes pertaining to retention and academic success. *Grading: S/U*

### **Special Topics in Student Learning and Development (SLS 2932) 0-3 credits**

This course permits Undergraduate Studies to pilot new courses to support specific student populations and programs as identified to increase student learning, development, engagement and outcomes pertaining to retention and academic success.

### **Foundations for Personal Academic and Professional Development (SLS 3115) 3 credits**

*Prerequisite: Permission of department*

This course is designed to prepare transfer students to successfully transition into higher education and make informed decisions about their educational and professional development. Students cultivate and apply skills essential to meeting the scholastic expectations of a four-year university such as critical thinking, oral/written communication, time management, test-taking, learning strategies, financial literacy, digital citizenship, using campus resources and professional workplace competence.

## **UNDERGRADUATE RESEARCH**

To recognize undergraduate students' excellence in undergraduate research, the Office of Undergraduate Research and Inquiry (OURI) offers the [Undergraduate Research Certificate](#). Requirements for the research certificate include completion of 12 credits of research exposure, skill-building and intensive courses as well as dissemination of the outcomes of student research and inquiry through a research presentation or exhibition. The Undergraduate Research Curriculum Committee determines any course or dissemination substitutions toward the certificate. OURI offers the following Interdisciplinary course to facilitate tracking of student dissemination.

### **Undergraduate Research Forum (IDS 4914) 0 credit**

*Prerequisite: Permission of instructor*

This is a zero-credit course for students who are accepted to present at any of FAU's undergraduate research symposia or approved external research symposia/exhibitions. *Grading: S/U*

OURI was created to expand the culture of undergraduate research and inquiry at all FAU campuses, and includes four main goals: 1) Integrating a research and inquiry focus into the curriculum; 2) Expanding co-curricular opportunities for students and faculty to engage in the participation and dissemination of research activities; 3) Rewarding and recognizing faculty and students who are active scholars; 4) Enhancing the climate and culture to support all research and inquiry initiatives at FAU. These efforts recently paid off when FAU was named one of three recipients of the Council on Undergraduate Research Award for Undergraduate Research Accomplishments. The national award recognizes institutions that have developed exemplary programs that provide high-quality research, scholarship and creative experiences for undergraduates. For more information regarding the undergraduate research and inquiry opportunities available, visit the [OURI website](#).

## ASSOCIATE IN ARTS DEGREE REQUIREMENTS

To earn an Associate in Arts degree from FAU, students must be degree-seeking and:

1. Earn a minimum of 60 credits in academic courses acceptable toward the degree with at least a cumulative 2.0 FAU GPA.
2. Earn a minimum of 40 of the 60 credits at the lower-division (1000-2000) level as indicated by the Statewide Course Numbering System (SCNS) designations or their equivalents.
3. Earn a minimum of 30 of the 40 lower-division (1000-2000) credits at FAU. (This may be waived for students who transfer more than 30 lower-division degree-applicable credits from a single Florida public state college.)
4. Earn a minimum of 30 of the 60 credits in residence at FAU and complete the last semester in

residence at FAU.

5. Apply no more than 30 credits of non-traditional credit toward the degree earned through Advanced Placement (AP), College Level Examination Program (CLEP), Correspondence Courses, International Baccalaureate (IB) or Military Service Schools, subject to limits for each as stated in the [Academic Policies and Regulations section](#) of this catalog. Credits earned in this manner will be considered transfer credits.
6. Fulfill the General Education Program requirements.
7. Satisfy the Writing Across Curriculum (Gordon Rule) and College-Level Computation Skills (Gordon Rule) requirements (see explanation elsewhere in this section).
8. Meet the Foreign Language Entrance Requirement (FLENT).
9. Complete the Florida Civic Literacy Requirement (for students who initially entered a Florida college system institution or a state university in fall 2018 and thereafter).
10. Submit an Associate in Arts degree application to University Advising Services (see the [Application for Degree](#) explanation elsewhere in this section).

Students may not receive an A.A. degree from both FAU and the home Florida College System (FCS) institution. Students may apply for an Associate in Arts degree in one of two ways:

1. Associate in Arts degree awarded at FAU.
2. Associate in Arts degree awarded to FCS transfer students by the awarding FCS institution through the reverse transfer of credit earned at FAU. FAU will notify students who transfer more than 30 credits from a single Florida College System institution about being eligible to receive an Associate in Arts degree at their home FCS institution

**Note:** After completing all requirements for the Associate in Arts degree, students may apply for the A.A. degree in any semester prior to the semester in which their baccalaureate degree is awarded. If students do not complete the requirements for their baccalaureate degree, they must request their Associate in Arts degree within five (5) years of completing all requirements for that degree. Non-degree students and students who have already earned an A.A. degree may not apply for the A.A. degree at FAU. Additionally, students with an "I" (incomplete grade) or "NR" (no reported grade) on their transcripts may not apply for the A.A. degree until the "I" and/or "NR" grades are removed.

## BACCALAUREATE DEGREE REQUIREMENTS

To earn a baccalaureate degree, students must:

1. Earn a minimum of 120 credits in academic courses acceptable toward the degree (some programs

- require more than 120 credits). Attain a minimum 2.0 grade point average in the courses required for a major program at FAU.
2. Earn a minimum of 45 of these 120 credits at the upper division as indicated by the Statewide Course Numbering System (SCNS) designations or their equivalents. In some programs, graduate-level courses may be used to satisfy undergraduate requirements; however, no undergraduate will be required to take a graduate-level course as part of a normal degree requirement.
  3. Apply no more than 60 credits of non-traditional credit toward the degree earned through Credit by Exam, Correspondence Courses and Military Service Schools, subject to credit limits for each as stated in the [Academic Policies and Regulations section](#) of this catalog. Credits earned in this manner will be considered transfer credits.
  4. Earn the last 30 upper-division credits in residence at FAU. In programs requiring more than 120 credits, at least 25 percent of the total number of credits required for the degree must be earned in residence at FAU.
  5. Earn at least 75 percent of all upper-division credits required for the major from FAU. Some majors may require more than 75 percent. Consult the degree requirements section of the major for details.
  6. Fulfill the General Education Program requirements.
  7. Summer Credit Requirement: Earn a minimum of 9 credits by attending one or more summer terms at either FAU or another university in the Florida State University System. This requirement applies only to students admitted to FAU as freshmen or as transfer students with fewer than 60 credits ([Florida Board of Governors Regulation 6.016](#)). (For those students enrolled before fall 2011, credits earned and transferred through the Advanced International Certificate in Education (AICE) Program, Advanced Placement (AP) Program, College Level Examination Program (CLEP), Dual Enrollment (DE) Program or International Baccalaureate (IB) Program may be applied toward the 9-credit summer requirement, thereby reducing students' summer credit requirement total.)
  8. Satisfy the Writing Across Curriculum (Gordon Rule) and College-Level Computation Skills (Gordon Rule) requirements (see explanation elsewhere in this section).
  9. Fulfill the admission and graduation requirements of the department and college granting the degree as described following the Lower-Division College and Department Requirements (explanation elsewhere in this section).
  10. Fulfill the foreign language graduation requirement. This requirement applies to all B.S. degree programs (unless otherwise specified) and to all B.A. degree programs. Other select degrees may require the foreign language graduation requirement (for more information, please refer to the specific degree program requirements).

11. Submit an Application for Degree form (see [Application for Degree](#) explanation elsewhere in this section).

### Academic Learning Compacts

In compliance with Policy Guideline 05.02.15 as approved by the Chancellor of the State University System, Florida Board of Governors Office, FAU will provide students access to information about Academic Learning Compacts for each baccalaureate degree program. The Academic Learning Compact for each program identifies 1) content/discipline knowledge and skills, 2) communication skills and 3) critical thinking skills students in that program are expected to demonstrate prior to graduation and the methods by which students will be assessed on these skills. Students may obtain print copies of Academic Learning Compacts for each baccalaureate degree program by contacting the appropriate program or department.

## SECOND BACCALAUREATE DEGREE REQUIREMENTS

To earn a second baccalaureate degree, students must:

1. Earn a minimum of 30 credits in residence at FAU beyond those required for the first degree. Students earning two degrees simultaneously (a "dual degree") must earn at least 150 credits.
2. Earn at least 75 percent of all upper-division credits required for the major from FAU. Some majors may require more than 75 percent. Consult the degree requirements section of the major for details.
3. Satisfy the admission and graduation requirements of the department and college granting the second degree as described under the heading Lower-Division College and Department Requirements (explanation elsewhere in this section). Students who have received a bachelor's degree from a four-year accredited institution of higher education will be deemed as having met the FAU general education requirements. Students must meet the foreign language requirement, however, if required for one of the two degrees.
4. Submit an Application for Degree form (see [Application for Degree](#) elsewhere in this section).

## MINOR REQUIREMENTS

In addition to pursuing a major, students may declare no more than two minors. Students must earn at least 75 percent of all credits required for the minor from FAU. Some departments may require more than 75 percent. A list of available minors appears in the [Degree Programs section](#) of this catalog. The descriptions and requirements for each minor are listed under the Academic Programs link within the

college in which the minors are offered.

**Note:** To ensure a timely graduation, students may pursue a minor only if requirements for that minor can be completed without extending the anticipated graduation date. Please refer to the [Timely Graduation Policy](#) for credit requirement thresholds to declare a minor.

## GENERAL EDUCATION CURRICULUM

(For students matriculating in fall 2024 and later, pending Board of Governors approval.)

The General Education Curriculum is designed to ensure that every undergraduate student graduates as an informed citizen through participation in rigorous General Education courses that equip students with the academic tools they will need to succeed, not only as undergraduates in their degree programs, but also as responsible citizens in a complex world.

Students must complete a minimum of 36 credits of General Education coursework. This requirement includes a minimum of 15 credits mandated by the State of Florida General Education Core and up to 21 credits of General Education Institutional requirements, distributed as indicated in five subject areas.

Subject Area	[Group A] State of Florida General Education Core	[Group B] General Education Institutional Requirements*	Total
Communications	3	3	6
Humanities	3	3	6
Social Science	3	3	6
Natural Science	3	3	6
Mathematics	3	3	6
Additional Enrichment**	0	6	6
<b>Total</b>	<b>15</b>	<b>21</b>	<b>36</b>

\* Students may satisfy [Group B] General Education Institutional Requirements with [Group A] State of Florida General Education Core courses from the same subject area.

**\*\* Choose 6 credits from Humanities, Social Science or Natural Science.**

Some majors require or recommend specific General Education courses. Make sure to check with an academic advisor.

Students who enter Florida Atlantic without an Associate in Arts (A.A.) degree from a Florida state school must fulfill the University's General Education requirements. A course may be used to simultaneously satisfy a General Education Curriculum requirement and a requirement of the student's major program. All course selections should be made in consultation with an academic advisor.

For students who enter Florida Atlantic holding the Associate in Science (A.S.) degree from a Florida public community or state college: The Associate in Science degree prepares students for entry into employment, but it is also a transfer degree and basis for admission to a related baccalaureate degree program at FAU. Courses taken as part of the Associate in Science degree at a Florida public community or state college to meet the General Education requirements will transfer and apply toward the thirty-six (36) General Education credits required for the baccalaureate degree at FAU. Since Associate in Science degrees typically require 15 credits of general education coursework, students must complete the remaining credits of General Education coursework at FAU.

General Education Core courses implement the required principles, standards and content in accordance with section 1007.55, Florida Statutes. Each General Education Core course option contains high-level academic and critical thinking skills and common competencies that students must demonstrate to successfully complete the course. Prior to the award of an Associate in Arts or baccalaureate degree, a student entering a state university as a first-time-in-college student in the fall term 2015 and thereafter must complete at least one course from each of the General Education subject areas listed in this section.

[Link to General Education Communication Requirements](#)

[Link to General Education Humanities Requirements](#)

[Link to General Education Social Science Requirements](#)

[Link to General Education Natural Science Requirements](#)

[Link to General Education Mathematics Requirements](#)

## **I. Communication**

(6 credits required; a grade of "C" or higher is required in each course)

Communication courses afford students the ability to communicate effectively, including the ability to write clearly and engage in public speaking. Students who complete the Communication requirement will be able to:

1. Demonstrate effective written and oral communication skills by exhibiting the control of rhetorical elements that include clarity, coherence, comprehensiveness and mechanical correctness.
2. Analyze, interpret and evaluate information to formulate critical conclusions and arguments.
3. Identify and apply standards of academic integrity.

---

### Communication Courses

(6 credits required; a grade of "C" or higher required in each course)

---

Students must choose two of the following courses, one of which must be from Group A.

---

#### [Group A] State of Florida General Education Core

---

College Writing 1 (required) (WAC) (or a course with an ENC prefix for which ENC 1101 is a direct prerequisite)	ENC 1101	3
--	----------	---

---

#### [Group B] General Education Institutional Course Options

---

College Writing 2 (WAC)	ENC 1102	3
-------------------------	----------	---

---

*The following courses may be substituted for ENC 1102:*

---

University Honors Seminar in Writing (WAC) (for Wilkes Honors College and University Honors Program students only)	ENC 1930	3
---	----------	---

---

Special Topics: College Writing 2 (WAC)	ENC 1939	3
---	----------	---

---

Writing History (WAC)	HIS 2050	3
-----------------------	----------	---

---

**Note:** Upon successful completion of ENC 1101 with a grade of “C” or higher, students will earn a [badge](#) for “Fundamentals of Written Communication,” transferable across all Florida institutions of higher education.

**Note:** Students must take four Writing-Across-the-Curriculum (WAC) courses, two of which must be taken from the Communication subject area to comply with the [State Board of Education College-Level Communication and Computation Skill Requirements](#) (also known as the Gordon Rule).

## II. Humanities

(6 credits required)

Humanities courses afford students the ability to think critically through the mastering of subjects concerned with human culture, especially literature, history, art, music and philosophy, including selections from the Western canon. Students fulfilling the Humanities requirement will:

1. Demonstrate understanding of various forms of human expression.
2. Reflect critically on subjects concerned with human culture.

---

### Humanities Courses

(6 credits required)

Students must take two of the following courses, one of which must be from Group A. The second course may be from Group A or Group B.

---

#### [Group A] State of Florida General Education Core

Art Appreciation	ARH 2000	3
History and Appreciation of Music	MUL 2010	3
Introduction to Philosophy (WAC)	PHI 2010	3
Appreciation of Theatre	THE 2000	
Honors Introduction to Humanities (for Wilkes Honors College and University Honors Program students only)	HUM 2020	3
Honors Introduction to Literature (for Wilkes Honors College and University Honors Program students only)	LIT 2000	3

---

#### [Group B] General Education Institutional Course Options

Culture and Architecture: The Master Builder	ARC 2208	3
--	----------	---

Appreciation of Dance	DAN 2100	3
Film Appreciation or Honors Film Appreciation (for University Honors Program students only)	FIL 2000	3
Global Jewish Communities	JST 2452	3
Introduction to Latin American Studies or Honors Introduction to Caribbean and Latin American Studies (for University Honors Program students only)	LAS 2000	3
Global Perspectives on Language	LIN 2607	3
Introduction to World Literature	LIT 2100	3
Interpretation of Fiction (WAC)	LIT 2010	3
Interpretation of Poetry (WAC)	LIT 2030	3
Interpretation of Drama (WAC)	LIT 2040	3
Interpretation of Creative Nonfiction (WAC)	LIT 2070	3
Interpretation of Creative Nonfiction (WAC)	LIT 2931	3
Music in Global Society	MUH 2121	3
Public Speaking	SPC 2608	3
History of Civilization 1 (WAC)	WOH 2012	3
History of Civilization 2	WOH 2022	3

### III. Social Science

(6 credits required)

Social Science courses afford students an understanding of the basic social and behavioral science concepts and principles used in the analysis of behavior and past and present social, political and economic issues. Students who satisfy the Social Science requirement will demonstrate the ability to:

1. Describe patterns of human behavior.
2. Describe how institutions influence human behavior and how humans influence these

institutions.

3. Apply appropriate disciplinary methods to the analysis of social, psychological, ethical, political, technological or economic issues.

---

### Social Science Courses

(6 credits required)

Students must take two of the following courses, one of which must be from Group A. The second course may be from Group A or Group B.

---

#### [Group A] State of Florida General Education Core

United States History to 1877*	AMH 2010	3
United States History since 1877*	AMH 2020	3
Introduction to Anthropology (WAC)	ANT 2000	3
Macroeconomic Principles	ECO 2013	3
Government of the United States*	POS 2041	3
General Psychology	PSY 1012	3

\* Fulfills partial requirements for [Civic Literacy](#).

---

#### [Group B] General Education Institutional Course Options

Culture and Society	ANT 2410	3
Law, Crime, and the Criminal Justice System	CCJ 2002	3
Digital Culture	DIG 2202	3
Microeconomic Principles	ECO 2023	3
Contemporary Economic Issues	ECP 2002	3
The Educated Citizen in a Global Context	EDF 2854	3
Disability and Society or RI: Disability and Society	EEX 2091	3
Digital Literacy in a Globally Connected World	EME 2620	3
Climate Change: The Human Dimensions	EVR 1110	3

Environment and Society	EVR 2017	3
World Geography	GEA 2000	3
Introduction to World Politics	INR 2002	3
Introduction to Language	LIN 2001	3
Culture, Consumers, and the Global Marketplace	MAR 2142	3
Risk, Resilience, and Rising Seas (R3)	PAD 2081	3
Changing Environment of Society, Business, and Government	PAD 2258	3
Global Political Theory	POT 2000	3
Global Perspectives of Social Services	SOW 1005	3
Sociological Perspectives	SYG 1000	3
Social Problems	SYG 2010	3
Global Society	SYP 2450	3
Designing the City	URP 2051	3

#### IV. Natural Science

(6 credits required)

Natural Science courses afford students the ability to critically examine and evaluate the principles of the scientific method and model construction, and use the scientific method to explain natural experiences and phenomena. Students who satisfy the Natural Science requirement will be able to:

1. Explain important scientific concepts, principles and paradigms.
2. Use the scientific method to explain how principles of scientific inquiry and ethical standards are used to develop and investigate research questions.
3. Critically evaluate scientific claims, arguments and methodology.
4. Analyze resulting data and draw appropriate conclusions from such data.

#### Natural Science Courses

(6 credits required)

Students must take two of the following courses, one of which must be from Group A. The second course may be from Group A or Group B. One of the courses must have a lab.

**[Group A] State of Florida General Education Core**
*For Non-Science Majors:*

Introduction to Astronomy	AST 2002	3
Life Science (BSC 1005L: Life Science Lab or RI: Life Science Lab available )	BSC 1005	2 3 w/Lab
Contemporary Chemical Issues	CHM 1020C	3
Blue Planet	ESC 2000	3
Environmental Science and Sustainability	EVR 1001	3
Physical Geology/Evolution of the Earth	GLY 2010C	4
Introduction to Oceanography or Honors Introduction to Oceanography (for Wilkes Honors College and University Honors Program students only)	OCE 2001	3

*For Science Majors:*

Biological Principles (BSC 1010L: Biological Principles Lab available)	BSC 1010	3 4 w/Lab
Anatomy and Physiology 1 (BSC 2085L: Anatomy and Physiology 1 Lab available)	BSC 2085	3 4 w/Lab
General Chemistry 1 (CHM 2045L: General Chemistry 1 Lab available)	CHM 2045	3 4 w/Lab
General Physics 1 (PHY 2048L: General Physics 1 Lab available)	PHY 2048	4 5 w/Lab
College Physics 1	PHY 2053	4

(or any course in the natural sciences for which one of the above General Education Core course options in Natural Science is the direct prerequisite)

### **[Group B] General Education Institutional Course Options**

#### *For Non-Science Majors:*

Introduction to Biological Anthropology (ANT 2511L: Introduction to Biological Anthropology Lab available)	ANT 2511	3 4 w/Lab
---	----------	--------------

Nature: Intersections of Science, Engineering, and the Humanities	ETG 2831	3
---	----------	---

The History of Earth and Life	GLY 2100	3
-------------------------------	----------	---

Human Mission to Mars	IDS 2382	3
-----------------------	----------	---

Weather, Climate and Climate Change	MET 2010	3
-------------------------------------	----------	---

Physical Science	PSC 2121	3
------------------	----------	---

#### *For Science Majors:*

Biodiversity (BSC 1011L: Biodiversity Lab available)	BSC 1011	3 4 w/Lab
---	----------	--------------

Chemistry for Health Sciences (CHM 2032L: General Chemistry for the Health Sciences Lab available)	CHM 2032	3 4 w/Lab
---	----------	--------------

Note: PHYX020 is not offered at FAU but may be transferred from a Florida public institution.

## **V. Mathematics**

(6 credits required; a grade of "C" or higher required in each course)

(For students entering in the 2024-25 academic year and thereafter.)

Mathematics courses afford students a mastery of foundational mathematical and computation models and methods by applying such models and methods in problem solving. The Mathematics requirement is intended to give students an appreciation of mathematics and prepare them to think precisely and critically about quantitative problems. Students who satisfy the Mathematics requirement will be able

to:

1. Identify and explain mathematical theories and their applications.
2. Determine and apply appropriate mathematical and/or computational models and methods in problem solving.
3. Display quantitative literacy.

---

### **Mathematics Courses**

(6 credits required; a grade of "C" or higher required in each course)

---

Students must take two of the following courses, one of which must be from Group A. The second course may be from Group A or Group B.

---

#### **[Group A] State of Florida General Education Core**

College Algebra	MAC 1105	3
Calculus with Analytic Geometry 1	MAC 2311	4
Mathematical Thinking in Context 1	MGF 1130	3
Introductory Statistics	STA 2023	3

(or any mathematics course for which one of the above General Education Core course options in Mathematics is the direct prerequisite)

---

#### **[Group B] General Education Institutional Course Options**

Computer Programming and Data Literacy for Everyone (For non-College of Engineering and Computer Science majors)	COP 1031C	3
Trigonometry	MAC 1114	3
Precalculus Algebra	MAC 1140	3
Precalculus Algebra and Trigonometry	MAC 1147	4
Introduction to Calculus with Applications (by permission only)	MAC 2210	4
Methods of Calculus	MAC 2233	3

---

Life Science Calculus 1	MAC 2241	4
Calculus with Analytic Geometry 2	MAC 2312	4
Mathematics for Biological Sciences 1	MAP 2491	3
Mathematical Thinking in Context 2	MGF 1131	3
Logic	PHI 2102	3

### **Additional Enrichment**

(6 credits)

(For students matriculating fall 2025 and later; pending Board of Governors approval.)

Students can choose 6 credits from the Humanities, Social Science or Natural Science subject areas. All course selections should be made in consultation with an academic advisor.

### **Foundations of Global Citizenship**

(Subject area will no longer be available after summer 2025. Courses from this area are reassigned to Humanities or Social Science, pending Board of Governors approval.)

## **CORE CURRICULUM REQUIREMENTS**

(For students matriculating before fall 2009.)

A minimum of 36 credits required.

---

### **Communications Requirement**

(6 credits; two courses; grade of "C" or better)

College Writing 1*	ENC 1101	3
College Writing 2*	ENC 1102	3

\* Writing Across Curriculum (Gordon Rule) course.

---

### **Mathematics Requirement**

(6 credits; two courses from the following list; grade of "C" or better)

---

Mathematical Thinking in Context 1* (was MGF 1106)	MGF 1130	3
Mathematical Thinking in Context 2* (was MGF 1107)	MGF 1131	3
College Algebra*	MAC 1105	3
Trigonometry*+	MAC 1114	3
Precalculus Algebra*+	MAC 1140	3
Methods of Calculus*	MAC 2233	3
Calculus with Analytic Geometry 1*+	MAC 2311	4
Calculus with Analytic Geometry 2*	MAC 2312	4
Introductory Statistics*	STA 2023	3
Logic*	PHI 2102	3

**Note:** Students must take at least one course with the prefix MAC or MGF.

\* Gordon Rule Computation course.

+ Requires a passing score on math placement test before registration.

### **Social Sciences Requirement**

(9 credits; three courses from three different disciplines)\*

Introduction to Anthropology	ANT 2000	3
Culture and Society	ANT 2410	3
World Geography	GEA 2000	3
Macroeconomic Principles	ECO 2013	3
Microeconomic Principles	ECO 2023	3
Contemporary Economic Issues	ECP 2002	3
Changing Environment of Society, Business and Government	PAD 2258	3
Government of the United States	POS 2041	3
Introduction to World Politics	INR 2002	3

General Psychology	PSY 1012	3
Introductory Sociology	SYG 1000	3
Social Problems	SYG 2010	3

\* The following courses are in the same discipline: ANT 2000 and 2410; ECO 2013, 2023 and ECP 2002; POS 2041 and INR 2002; SYG 1000 and 2010.

### Humanities Requirement

(9 credits; two courses from two different disciplines)\*

Interpretation of Fiction**	LIT 2010	3
Interpretation of Poetry**	LIT 2030	3
Interpretation of Drama**	LIT 2040	3
Introduction to Philosophy**	PHI 2010	3
History of Civilization 1**	WOH 2012	3

and one course from the following list:

Culture and Architecture: The Master Builder	ARC 2208	3
Art Appreciation	ARH 2000	3
History and Appreciation of Music	MUL 2010	3
Appreciation of Theatre	THE 2000	3
Appreciation of Dance	DAN 2100	3
Film Appreciation	FIL 2000	3

\* The following courses are in the same discipline: LIT 2010, 2030 and 2040.

\*\* Writing Across Curriculum (Gordon Rule) course.

### Natural Sciences Requirement

(6 credits; two courses, one with a lab, from two different disciplines; a higher-level science course may be substituted)\*

Introduction to Biological Anthropology	ANT 2511 &	3 or 4
---	------------	--------

	ANT 2511L	
Introduction to Astronomy **	AST 2002	3
Life Science and Life Science Lab** or Life Science and RI: Life Science Lab	BSC 1005 & BSC 1005L	2 or 3
Biological Principles with Lab**	BSC 1010 & BSC 1010L	3 or 4
Anatomy and Physiology with Lab	BSC 2085 & BSC 2085L	3 or 4
Contemporary Chemical Issues**	CHM 1020C	3
General Chemistry for the Health Sciences with Lab	CHM 2032 & CHM 2032L	3 or 4
General Chemistry 1 with Lab	CHM 2045 & CHM 2045L	3 or 4
The Blue Planet	ESC 2000	3
Physical Geology/Evolution of the Earth	GLY 2010C	4
The History of the Earth and Life	GLY 2100	3
Weather, Climate and Climate Change	MET 2010	3
Introduction to Oceanography	OCE 2001	3
General Physics 1	PHY 2048	3
College Physics 1	PHY 2053	4
Physical Science**	PSC 2121	3

\* The following courses are in the same discipline: BSC 1005&L, 1010&L and 2085&L; CHM 1020C, 2032&L, and 2045&L; ESC 2000, GLY 2010C, GLY 2100 and MET 2010; AST 2002, PHY 2048, PHY 2053 and PSC 2121.

\*\* For non-science majors.

## General Education Requirements for Transfer Students

Students who have fulfilled all General Education requirements from any Florida public community college, state college or university will be considered to have met all the requirements of Florida Atlantic University's General Education Program (see above).

Transfer students who matriculate without having met all General Education requirements must meet the requirements of the General Education Program at FAU. Transfer students matriculating under an existing articulation agreement, however, must meet the requirements outlined in the articulation agreement.

## CIVIC LITERACY REQUIREMENT

Pursuant to Florida Statute 8.006, baccalaureate degree-seeking students initially entering a Florida college system (FCS) institution or a state university system (SUS) institution in fall 2018 and thereafter are required to demonstrate competency in civic literacy. Students are expected to complete this requirement by the end of their first year at FAU. No student may graduate without having met this requirement.

Presently, there are three cohorts of students attending Florida public institutions subject to different Civic Literacy requirements.

### **Cohort 1:**

Students first entering the SUS or FCS prior to fall 2018 - The Civic Literacy Requirement does not apply.

### **Cohort 2:**

Students first entering the SUS or FCS from fall 2018 to summer (1 and 2) 2021 - Complete a course or exam

### **Cohort 3:**

Students first entering the SUS or FCS in summer (3) 2021 and thereafter - Complete both a course and exam.\*

\* For Cohort 3 students only: High school students who pass the Florida Civic Literacy Examination in high school, which began in fall 2021, are exempt from the postsecondary exam requirement. However, they are still required to successfully complete the course. Certain accelerated mechanisms meet the course requirement (see in the table below.)

**For Cohorts 2 and 3: Options for meeting the Civic Literacy Requirement**

<b>Options</b>	<b>Score</b>	<b>Meets Course Competency</b>	<b>Meets Exam Competency</b>
<b>Courses</b>			
AMH 2020 if taken after fall 2018 <i>(including dual enrollment if taken after fall 2018)</i>	Passing grade	X	
POS 2041 if taken after fall 2018 <i>(including dual enrollment if taken after fall 2018)</i>	Passing grade	X	
<b>Accelerated Mechanisms</b>			
Advanced Placement (AP): Government and Politics: United States Exam	3	X	X
Advanced Placement (AP): United States History Exam	4	X	X
Cambridge AICE: History, U.S. History, c. 1840-1990 (A-Level) Exam	A-E	X	
CLEP: American Government Exam	50	X	X
IB History, History of	5-7	X	

## America Exam

**Additional Assessments**

U.S. Citizenship and Immigration Services Naturalization Test - Civics (U.S. history and government) with supplemental questions	60 out of 100	X
Florida Civic Literacy Examination (FLCE) (availability began in fall 2021)	48 out of 80	X

The Civic Literacy test is proctored. Students may take the exam in one of two ways, either remotely using Honorlock or at the FAU Testing and Certification Center. Nominal fees apply. For details regarding both testing options, visit FAU's [Civic Literacy site](#). Free Civic Literacy workshops are available to prepare for the exam. To learn more, click [here](#). To review frequently asked questions about the Civic Literacy Requirement, click [here](#).

## FOREIGN LANGUAGE REQUIREMENT

Florida Atlantic University has two language requirements: FLENT (Foreign Language Entrance Requirement) and FLEX (Foreign Language Exit Requirement, also known as the Foreign Language Graduation Requirement).

FLENT is an admission requirement of the State University System that requires a student to have taken two years of the same language in high school. Universities may waive the FLENT requirement for students seeking admission. However, if FLENT is waived, the student must satisfy the FLEX requirement no matter what degree is being pursued at FAU.

FLEX is two semesters of the same language at the first-year college level or a demonstrated equivalent proficiency.

FLEX is required for all B.S. degree programs (unless otherwise specified) and for all B.A. degree programs. Other select degrees may require FLEX (for more information, please refer to the specific degree program requirements). FLEX is also required if the FLENT entrance requirement was waived.

FLEX may be satisfied by any of the following methods:

- Successful completion of two semesters of a first-year college-level sequence (XXX 1120/1121\*) of the same foreign language.-
- Successful completion of the second semester of a first-year college-level sequence (XXX 1121 course) OR a higher-level foreign language course.
- Take a placement exam and achieve a passing score to test out of the requirement. This can be fulfilled by CLEP, AP or IB (see the [Acceleration Mechanisms for Undergraduate Students section](#) of the catalog for passing scores).
- Students who have significant prior exposure in a foreign language and do not have one of the placement examinations listed above (CLEP, AP or IB) should contact the Department of Languages, Linguistics and Comparative Literature to complete a standardized examination.
- For students whose secondary or post-secondary curriculum was taught in a foreign language, the Department of Languages, Linguistics and Comparative Literature can evaluate their official school records to determine if the language proficiency has been met.
- Successful completion of the second semester of a first-year, college-level American Sign Language sequence, unless specified differently by the student's degree program.

\* FAU has standard course numbering for its foreign language courses. All first-year, first-semester courses are numbered 1120 and all first-year, second-semester courses are numbered 1121. For example: SPN 1120; SPN 1121.

**Note:** As a general guideline for placement purposes, one year of foreign language study at the high school level equates to one semester of foreign language study in college. If a student has taken one year of Spanish in high school for example, that student would normally be expected to enroll in SPN 1121, the second semester of Beginning Spanish Language and Culture. If, however, more than three years have elapsed between the student's high school language study and his/her continuation at FAU, then this guideline may not apply.

## FOUNDATIONAL COURSE REQUIREMENT

Attempting to complete a Foreign Language requirement or a General Education Mathematics

requirement in the months before graduation can sometimes derail graduation plans. To stay on track to graduate, students must plan their course schedules to ensure that these and other foundational courses are taken early in their academic careers. To ensure that students are successful, Florida Atlantic University requires that all students, whether freshmen or transfer, complete the following courses within the prescribed timeframes after matriculation:

ENC 1101 (College Writing 1)	Within first year
General Education Mathematics Requirement (at least one course)	Within first year
Foreign Language Requirement	Within two years
Civic Literacy Requirement	Within two years

Some students may have completed one or more of these requirements before matriculation at FAU. Students should check their Degree Audit Report to see if these requirements have been met.

## COLLEGE-LEVEL COMMUNICATION AND COMPUTATION SKILL REQUIREMENTS — GORDON RULE

Florida Atlantic University has formulated policies and developed curricula to comply with the State Board of Education on College-Level Communication and Computation Skills, also known as the Gordon Rule. This rule requires students entering college or university study for the first time to successfully complete, with grades of "C" or higher, 12 credits of writing and 6 credits of mathematics as a requirement for admission to the upper division. The 12 writing credits must be distributed as follows: 6 credits of English coursework (College Writing 1 and 2) and 6 credits of additional coursework in which the student is required to demonstrate college-level writing skills through multiple assignments. For the computation requirement, 6 credits of mathematics must be in courses at or above the level of college algebra. The computation requirement is typically satisfied through the General Education Program's [Mathematics](#) requirements (noted above).

Students transferring from out-of-state institutions who think they may have completed Gordon Rule equivalent courses with grades of "C" or better must obtain a letter from the previous institution that demonstrates they have fulfilled the writing or computation criteria listed above. Such letters should be mailed directly to the Office of the Registrar at FAU.

## Communication Skills — Writing Across the Curriculum

FAU implemented its Writing Across the Curriculum (WAC) program to strengthen the teaching and learning of writing in undergraduate education. The WAC program satisfies the Gordon Rule for writing and communication by mandating that:

1. Writing counts for at least 80 percent of the course grade in ENC 1101, ENC 1102 and [ENC 1102-substitute courses](#). For the 2000-to-4000-level WAC courses, writing counts for at least 50 percent of the course grade;
2. Writing assignments engage students in intellectual activities central to the course objectives;
3. Some class time is devoted to discussing strategies for improving student writing;
4. WAC courses include at least one substantial revision of a graded paper;
5. Substantive feedback be provided on all writing that leads to a grade.

A small number of WAC courses have been certified to substitute for College Writing 2. These 1000-level courses have the same requirements as ENC 1102, but are taught by specially trained faculty who use disciplinary readings. The current courses that substitute for ENC 1102 are listed below and are identified as WAC (Gordon Rule) courses in the course schedule. WAC courses in the 2000, 3000 and 4000 level are also listed below and as WAC (Gordon Rule) in the schedule.

The University's WAC program promotes the teaching of writing across all levels and all disciplines. WAC asserts that writing-to-learn activities have proven effective in developing critical thinking skills, learning discipline-specific content and understanding and building competence in the modes of inquiry and writing for various disciplines and professions.

Faculty who teach WAC classes have been specially trained to develop courses that provide frequent and significant opportunities for students to write, revise and discuss their writing. As more courses become WAC-certified, students will have increased opportunities to develop their writing and critical thinking skills from the freshman year through graduation, whatever their major course of study. For more information, contact the University Center for Excellence in Writing by clicking [here](#) or calling 561-297-3498.

The following courses are available to meet the WAC (Gordon Rule) writing requirements. For a list of WAC courses offered through the [Harriet L. Wilkes Honors College](#), see that section in this catalog.

---

### WAC (Gordon Rule) Courses Required

(6 credits of English coursework with a grade of "C" or higher):

---

College Writing 1	ENC 1101	3
-------------------	----------	---

(All students must take ENC 1101; there are no substitutes for this course.)

College Writing 2 (Students must take ENC 1102 or one of the substitutes for ENC 1102 appearing below.)	ENC 1102	3
---	----------	---

### **WAC (Gordon Rule) substitutes for ENC 1102**

University Honors Seminar in Writing	ENC 1930	3
--------------------------------------	----------	---

Special Topics: College Writing 2	ENC 1939	3
-----------------------------------	----------	---

Writing History	HIS 2050	3
-----------------	----------	---

Being Cared For: Reflections from the Other Side of the Bed	NSP 1195	3
---	----------	---

### **Required**

(6 credits of additional writing coursework with a grade of "C" or higher):

Students must choose two of the following courses to meet the remaining writing requirements.

University Honors Seminars (various subject areas, prefixes, numbers)		3
--	--	---

Introduction to Anthropology	ANT 2000	3
------------------------------	----------	---

Cultures of South Asia	ANT 3361	3
------------------------	----------	---

Architectural Research Methods and Analysis	ARC 3091	3
---	----------	---

Honors Art Appreciation	ARH 1930	3
-------------------------	----------	---

RI: Civil, Environmental and Geomatics Engineering Design 1	CGN 4803C	3
---	-----------	---

RI: Civil, Environmental and Geomatics Engineering Design 2	CGN 4804C	3
---	-----------	---

Introduction to Diversity for Educators	EDF 2085	3
---	----------	---

Writing for Technical Professions	ENC 2248	3
-----------------------------------	----------	---

Professional Writing-	ENC 3213	3
-----------------------	----------	---

Advanced Exposition	ENC 3310	3
Principles of Research Writing	ENC 4138	3
Writing for Nonprofits	ENC 4354	3
Studies in Writing and Rhetoric	ENG 4020	3
RI: Engineering Technology Capstone	ETG 4951	3
Honors Film Appreciation (for University Honors Program students only)	FIL 2000	3
Introduction to Business Communication (available to Business juniors and higher only)	GEB 3213	3
RI: Historical Methods	HIS 3150	3
Aerospace History	HIS 4322	3
RI: Senior Seminar	HIS 4935	3
Honors Reading Seminar	IDH 4931	1-3
Advanced Systems Analysis and Design	ISM 4133	3
Italian Film Classics	ITT 3521	3
Italian-American Cinema	ITT 3522	3
Honors Introduction to Caribbean and Latin American Studies (for University Honors Program students only)	LAS 2000	3
Interpretation of Fiction	LIT 2010	3
Interpretation of Poetry	LIT 2030	3
Interpretation of Drama	LIT 2040	3
Interpretation of Creative Nonfiction	LIT 2070	3
Senior Seminar in Public Management	PAD 4935	3

Introduction to Philosophy	PHI 2010	3
Profession of Social Work	SOW 3302	3
Rhetorical Analysis of Democracy	SPC 4273	3
The Rhetoric of Argument	SPC 4517	3
Rhetorical Criticism	SPC 4680	3
History of Civilization 1	WOH 2012	3
Green Consciousness	WST 4349	3

### Computation Skills — Gordon Rule Mathematics

The Gordon Rule computation requirement may be satisfied by earning 6 credits from the following list, with a grade of “C” or higher, including at least one course with the prefix MAC or MGF. Students typically satisfy Computation Skills (Gordon Rule) Mathematics requirements through the General Education Program's [Mathematics](#) requirements. (noted above).

College Algebra	MAC 1105	3
Trigonometry	MAC 1114	3
Precalculus Algebra	MAC 1140	3
Precalculus Algebra and Trigonometry	MAC 1147	4 or 5
Methods of Calculus	MAC 2233	3
Life Science Calculus 1	MAC 2241	4
Calculus with Analytic Geometry 1	MAC 2311	4
Calculus with Analytic Geometry 2	MAC 2312	4
Discrete Mathematics	MAD 2104	3
Differential Equations 1	MAP 2302	3
Mathematics for Biological Sciences 1	MAP 2491	3
Topics in Mathematics	MAT 1932	1-3

University Honors Seminar in Mathematics	MAT 1935	3
Mathematical Thinking in Context 1	MGF 1130	3
Mathematical Thinking in Context 2	MGF 1131	3
Logic	PHI 2102	3
Experimental Design and Statistical Inference	PSY 3234	3
Topics in Statistics	STA 1932	1-3
Introductory Statistics	STA 2023	3
Intermediate Statistics Lab	STA 3163L	1

**Note:** The mathematics requirement may be partially or completely satisfied by passing the appropriate AP, IB or CLEP examination.

## MATH PLACEMENT

All entering freshmen, as well as entering transfer students with no prior college-level coursework in mathematics, are placed in their first mathematics course at FAU based on a combination of factors, including performance in high school mathematics coursework, high school overall GPA, and SAT or ACT scores. Students without this data are required to take an online assessment. For more information about this assessment, visit the Math Placement Assessment [website](#).

## APPLICATION FOR DEGREE

### ASSOCIATE IN ARTS DEGREE

Students (both first-time-in-college and transfer students with fewer than 40 credits) may apply for the Associate in Arts (A.A.) degree by the end of the third week of the semester in which the student expects to graduate. Students may not apply for the A.A. degree and a baccalaureate degree in the same semester. Students who receive the A.A. degree do not participate in the commencement programs. For details, see the Associate in Arts Degree Requirements explanation elsewhere in this section.

Application form is available on the University Advising Services [website](#) or by calling 561-297-3064.

## BACCALAUREATE DEGREES

A student must apply for a degree using the Application for Degree form found in the Office of the Registrar's [website](#) by the end of the third week of the semester in which the student expects to graduate. It is the student's responsibility to meet all requirements for the degree. For the specific dates to apply for a degree, refer to the [Academic Calendar](#).

## MASTER'S, SPECIALIST'S AND DOCTORAL DEGREES

Graduate students must apply for a degree no later than the end of the third week of the semester in which the student expects to graduate. Refer to the [Academic Calendar](#) for specific deadline dates.

The date printed in the Academic Calendar is the deadline date for the Application for Degree form to be accepted by the Office of the Registrar. It is the student's responsibility to allow adequate time to obtain signatures AND meet the Application for Degree deadline. Students cannot submit this form directly to the Office of the Registrar; it requires approval by the Graduate College Dean. (Depending upon the graduate program, additional signatures may be required prior to submitting to the Graduate College.) The Application for Degree form can be found on the Office of the Registrar's [website](#). This form can be submitted prior to the semester a student expects to graduate.

### **Graduating Student Survey**

As part of the degree application process, all students are required to complete the Graduating Student Survey. This brief online survey provides a snapshot of the student's post-graduation plans. University funding is tied to FAU's ability to report this information. All graduating students must complete the survey to obtain their official transcript. The link to complete the survey will be emailed to students two weeks prior to the last day of classes.

## LOWER-DIVISION COLLEGE/DEPARTMENT REQUIREMENTS/RECOMMENDED COURSES

Most of the colleges and departments of the University require prerequisites for upper-division transfer and second baccalaureate students. In addition, many colleges and departments recommend courses for their majors. A course may be used to satisfy both a college or department requirement and also a University requirement (e.g., a geology major may use general chemistry to satisfy a Department of

Geosciences admission requirement and the general education natural science requirement). The following are the college and department lists of required and recommended courses. In this list, check the college and department in which a major is planned.

## **Links to Lower-Division Requirements**

[College of Education](#)

[College of Engineering and Computer Science](#)

[Harriet L. Wilkes Honors College](#)

[Christine E. Lynn College of Nursing](#)

[Charles E. Schmidt College of Science](#)

[College of Social Work and Criminal Justice](#)

## **THE DOROTHY F. SCHMIDT COLLEGE OF ARTS AND LETTERS**

The Dorothy F. Schmidt College of Arts and Letters offers the Bachelor of Architecture degree (B.Arch.) and the Bachelor of Arts degrees (B.A.) with majors in Anthropology, Art, Communication Studies, English, History, Interdisciplinary Studies, Jewish Studies, Languages and Linguistics, Multimedia Studies, Music, Philosophy, Political Science, Sociology, and Theatre. The Bachelor of Fine Arts (B.F.A.) may be earned in Art and Theatre. The College also awards the Bachelor of Music (B.M.), and a Bachelor of Music Education (B.M.E.) is offered in conjunction with the College of Education. The College also offers a Bachelor of Public Management (B.P.M.) and a Bachelor of Public Safety Administration (B.P.S.A.). Students should refer to the appropriate desired major in the [Dorothy F. Schmidt College of Arts and Letters section](#) of this catalog for lower-division and major requirements.

It is highly recommended that all College of Arts and Letters majors register for and attend either a freshman or transfer student orientation prior to their initial registration. More information regarding all requirements is available through the college's Office of Student Academic Services, 561-297-3800 (Boca Raton campus), 954-236-1101 (Davie campus) or 561-799-8698 (Jupiter campus).

## ARCHITECTURE

The five-year professional Bachelor of Architecture (B.Arch.) degree is based on a total of 159 credits. Entry into the program is possible at the junior, senior or thesis level, provided the student has presented an acceptable portfolio and completed all prerequisite courses. Students who have completed the A.A. degree with required architecture prerequisite courses at Florida's community or state colleges may enter the B.Arch. program at the junior level and complete 99 credits beyond the A.A. degree. Students who have completed design studios beyond the A.A. level at an approved, accredited institution may enter the program at a level determined by faculty based on a portfolio review.

---

### Architecture: Lower-Division Prerequisites

Architectural Design 1 through 4, Architectural History, Architectural Theory, Structures, Materials and Methods, Methods of Calculus and College Physics with Lab (the lab is to be taken only if the second core science class is taken without a lab)	35
--	----

---

### Recommended Courses:

Art Appreciation	3
------------------	---

Trigonometry	3
--------------	---

---

### Public Management: Lower-Division Prerequisites

#### Required Courses:

Government of the U.S.	3
------------------------	---

Macroeconomic Principles	3
--------------------------	---

Information Systems Fundamentals	3
----------------------------------	---

Statistics	3
------------	---

## THE COLLEGE OF BUSINESS

Students in the College of Business, except Health Administration and General Economics majors, are

required to complete the following courses, with a grade of "C" or better in each:

Accounting Principles 1 and 2	6
Economic Principles (macro and micro)	6
Information Systems Fundamentals	3
Methods of Calculus	3
Introductory Statistics	3

## THE COLLEGE OF EDUCATION

The College of Education offers undergraduate degree programs in Early Care and Education, Elementary Education, English Education, Exceptional Student Education, Mathematics Education, Science Education, and Social Studies Education. Students should refer to the appropriate desired major in the [College of Education section](#) of this catalog for lower-division and major requirements.

Due to numerous changes in the general education lower-division preparation requirements, it is important for all College of Education majors to register for and attend either a freshman or transfer student orientation prior to their initial registration. More information regarding all requirements is available through the College of Education Office for Academic and Student Services.

## THE COLLEGE OF ENGINEERING AND COMPUTER SCIENCE

All entering students must meet University requirements. The Division of Engineering Student Services (561-297-2780) is available to assist students who are undecided as to a major field of study.

The College of Engineering and Computer Science fully complies with the State of Florida Common Prerequisites for Computer Science and Engineering. Students transferring from Florida community or state colleges who have completed these prerequisites and met admission standards will be admitted to the college.

Detailed advising sheets outlining the courses needed at the community or state college and at FAU are available for students transferring from Miami Dade, Broward, Palm Beach and Indian River colleges. These sheets also provide a useful guide for students transferring from other institutions. Students

should contact their community or state college advisor or the FAU department in which they intend to enroll.

All students should be aware of academic program graduation requirements (indicated in the departmental listings) that specify certain minimum grades in calculus, physics, and other courses.

## THE HARRIET L. WILKES HONORS COLLEGE

The Wilkes Honors College, located on the John D. MacArthur campus in Jupiter, offers four-year academic programs resulting in a Bachelor of Arts or Bachelor of Science degree in Liberal Arts and Sciences or a Bachelor of Arts or Bachelor of Science degree in Biological and Physical Sciences.

Information about lower-division (core) requirements, core requirement descriptions, and other graduation requirements is available [here](#). For further information, see the [Honors College section](#) of this catalog.

### Concentration Requirements

In addition to fulfilling the core and other graduation requirements, students must complete the requirements in their concentration, which include an honors thesis. Honors College students may elect a concentration in: American Studies, Anthropology, Art (Transdisciplinary Visual Arts), Biological Anthropology, Biological Chemistry, Biology, Business, Chemistry, Data Analytics, Economics, English Literature, Environmental Science, Environmental Studies, History (Interdisciplinary), Interdisciplinary Critical Theory, International Studies, Latin American Studies, Law and Society, Marine Biology, Mathematical Sciences (Interdisciplinary), Mathematics, Medical Humanities, Neuroscience, Philosophy, Physics, Political Science, Psychology, Spanish, Women's Studies or Writing or design their own concentration in consultation with faculty advisors. Information about the requirements for each concentration is available [here](#).

English Composition		
College Writing 1+	ENC 1101	3
College Writing 2+	ENC 1102	3
+ Writing Across Curriculum (Gordon Rule) course		

**Mathematics** (6 credits minimum; two courses from the following list, including at least one course with a prefix MAC or MGF; Gordon Rule; must receive a "C" or better):

Mathematical Thinking in Context 1	MGF 1130	3
Mathematical Thinking in Context 2	MGF 1131	3
College Algebra	MAC 1105	3
Trigonometry	MAC 1114	3
Methods of Calculus	MAC 2233	3
Calculus with Analytic Geometry 1	MAC 2311	3
Calculus with Analytic Geometry 2	MAC 2312	3
Introductory Statistics or higher level, required	STA 2023	3

**Social Sciences** (9 credits, three courses from three departments):

Introduction to Anthropology	ANT 2000	3
World Geography	GEA 2000	3
Microeconomic Principles	ECO 2023	3
Macroeconomic Principles	ECO 2013	3
Contemporary Economic Issues	ECP 2002	3
Government of the U.S.	POS 2041	3
Introduction to World Politics	INR 2002	3
General Psychology*	PSY 1012	3
Introductory Sociology*	SYG 1000	3
Social Problems	SYG 2010	3

\* Required for nursing; a grade of "C" or better.

**Humanities** (9 credits, three courses, choose two courses from two departments):

Interpretation of Fiction**	LIT 2010	3
Interpretation of Poetry**	LIT 2030	3
Interpretation of Drama**	LIT 2040	3
Introduction to Philosophy**	PHI 2010	3
History of Civilization 1**	WOH 2012	3

\*\* Writing Across Curriculum (Gordon Rule) course and choose one from the following five courses:

Art Appreciation	ARH 2000	3
Appreciation of Dance	DAN 2100	3
Film Appreciation	FIL 2000	3
History and Appreciation of Music	MUL 2010	3
Appreciation of Theatre	THE 2000	3

***Sciences*** (20 credits):

Anatomy and Physiology 1 with Lab	3
Anatomy and Physiology 2 with Lab	3
Chemistry with Lab	4
Microbiology with Lab	4
Nutrition	3
Human Development	3

## THE CHARLES E. SCHMIDT COLLEGE OF SCIENCE

### Major Department Requirements

#### ***Biological Sciences***

General Biology (or Botany and Zoology)	8
---	---

General Chemistry with Lab	8
Organic Chemistry with Lab	8
General Physics with Lab	10
Mathematics (including one semester of calculus and statistics)	6-8

***Recommended Elective***

Foreign Language*	8
-------------------	---

***Chemistry***

General Chemistry	8
Calculus	8
Organic Chemistry	8
General Physics	10

***Recommended Elective***

Foreign Language*	8
-------------------	---

\* Alternatively, the requirement may be met by making a satisfactory score on AP, CLEP or IB examinations.

## THE COLLEGE OF SOCIAL WORK AND CRIMINAL JUSTICE

### Majors: Criminal Justice and Social Work

#### College Requirements

In addition to the University's general education and degree requirements, students enrolled in the college must successfully complete a major, with a minimum grade of "C" in each major prefixed course. Students must also maintain a minimum grade point average of "C" in all coursework

attempted. The College requires completion of cognate work as specified by the major program. A minimum of 45 credits toward the degree must be at the upper-division (3000 and 4000) level.

---

### **Criminal Justice: Lower-Division Prerequisites**

---

#### ***Required Courses:***

Foreign Language	8
Law, Crime and the Criminal Justice System	3
Statistics	3

---

### **Social Work: Lower-Division Prerequisites**

---

#### ***Required Courses:***

Life Science with Lab*	3
General Psychology*	3
Introductory Sociology*	3
Government of the U.S.*	3
Micro- or Macroeconomics*	3
Statistics	3

\* Statewide requirement for all Social Work programs.

## COMBINED PROGRAMS

All combined bachelor's/master's degree programs offered at the University require a minimum of 150 credits, comprised of a minimum of 120 credits for the baccalaureate degree and a minimum of 30 credits for the master's degree. All combined bachelor's/doctoral degree programs require a minimum of 192 credits, comprised of a minimum of 120 credits for the baccalaureate degree and a minimum of 72 credits for the doctoral degree. All master's degree program credits or doctoral degree program credits must be at the graduate level (5000 level or above). A maximum of 12 credits of graduate coursework may be used to satisfy both degrees. The baccalaureate degree will be conferred before the graduate degree. Individual programs may have more stringent requirements. Please see the [Degree](#)

[Programs](#) section for a list of combined degree programs and the [college sections](#) for the individual combined degree program information.

## GRADUATE DEGREE REQUIREMENTS

Graduate students are responsible for knowing and adhering to University policies and procedures pertaining to graduate education.

### MASTER'S DEGREE GENERAL REQUIREMENTS

The following are general degree requirements for any master's degree at FAU. Students should consult the portion of the catalog dealing with their chosen program for any special or additional requirements.

1. A minimum of 30 credits is required for any master's degree.
2. At least one-half of the credits included in any master's degree program shall be designated as 6000-level courses or above.
3. At least one-half of the credits offered for any master's degree shall be in a single field of concentration.
4. A minimum grade point average of 3.0 is required on all work attempted in a graduate program.
5. If a required thesis or dissertation deals with any federally mandated compliance issues, approval by the appropriate University committee prior to the collection of data is required. Contact the Division of Research for information (561-297-0777).

### MASTER OF ARTS OR MASTER OF SCIENCE DEGREE REQUIREMENTS

1. A thesis may be required under the supervision of a major professor and a graduate committee, appointed specially for each student by the chair of the major department and with the approval of the dean of the student's college. The thesis must be an original work in the student's major area of specialization. The form of the thesis will follow requirements specified by the college in which it was written; the thesis must follow the Requirements for Graduate Thesis and Dissertation Guidelines, available on the Graduate College [website](#). In general the thesis will comply with the publication requirements of the student's major field. One copy of the thesis is required by the University. Students should check with their graduate advisors concerning the number of additional copies requested by the college. All students submitting master's theses or dissertations will be required to submit an electronic copy to the University library using the library's online

submission website. In the case of programs that offer a non-thesis option, these specifications for a thesis do not apply.

2. If required, the student must demonstrate reading knowledge of a foreign language appropriate to the student's area of specialization as determined by the college awarding the degree.
3. The student must complete a minimum of 30 credits beyond the requirements of the bachelor's degree, of which at least 6 credits must be in graduate-level courses in the major. For thesis students, thesis course credit is in addition to this requirement in the major and is determined by the major department. Non-thesis students must complete at least 12 credits in graduate-level courses in their major.
4. A college or department may impose such additional requirements as the faculty may consider desirable, e.g., courses in research methodology, orientation examinations, qualifying examinations or oral examinations in defense of the thesis.

## MASTER OF ARTS IN TEACHING OR MASTER OF SCIENCE IN TEACHING REQUIREMENTS

The University offers the Master of Arts in Teaching degree in the following disciplines: Anthropology, English, French, Geography, Political Science and Spanish.

The University offers the Master of Science in Teaching degree in the following disciplines: Biological Sciences, Chemistry, Economics, Mathematical Sciences and Physics.

### Admission Requirements

For admission requirements for these degrees see the Graduate Degree Program Information heading in the appropriate college section in this catalog.

### Degree Requirements

1. A minimum of 30 credits (excluding internship) beyond the baccalaureate is required. These include:
  - a. A minimum of 18 credits in the major subject, of which 12 must be in graduate-level courses;
  - b. A minimum of 6 credits involving the study and report of a significant instructional problem in the major discipline. The thesis may be waived and coursework substituted by the supervisory committee or advisor.
2. An internship worth 6 credits is required.

## MASTER OF FINE ARTS DEGREE REQUIREMENTS

1. Completion of the core curriculum and the area of special concentration is required.
2. A minimum grade point average of 3.0 in all work attempted in the graduate program is required.
3. See the [Dorothy F. Schmidt College of Arts and Letters section](#) of this catalog describing the M.F.A. degrees for additional requirements for graduation.

## SECOND MASTER'S DEGREE REQUIREMENTS

A second master's degree will be conferred upon the same individual if the second degree represents at least 30 graduate-level credits of additional work in the discipline and if all of the requirements of the college awarding the degree have been fully met. A course from a prior master's degree can be used to satisfy a degree requirement for a second master's degree, but then additional coursework in the discipline may be required to attain a minimum of 30 unique graduate credits. **Note:** The policy on [Transfer Credits](#) applies to second master's degrees.

### Supervisory Committee for Master's and Specialist's Degrees

Each graduate student preparing a thesis shall have a supervisory committee composed of at least three members of the graduate faculty or associate graduate faculty. One of the members shall serve as the chair of the supervisory committee. The supervisory committee shall approve the student's plan of study, monitor the student's academic progress, approve the thesis subject, evaluate the thesis defense and approve the final document. The minor, or related fields, if applicable, shall have representation on the supervisory committee.

### Plan of Study for Master's and Specialist's Degrees

1. All degree-seeking graduate students should have an approved Plan of Study on file with the Graduate College no later than halfway through their required coursework and before enrolling in thesis or dissertation credits, if applicable. Students must have an approved Plan of Study on file with the Graduate College prior to the term in which they intend to graduate. All students receive an email confirmation through the MyPOS system when their Plan of Study is approved by the Dean of the Graduate College.
2. Changes to an approved Plan of Study require the submission and approval of a revision. If the approved Plan of Study was submitted online through the MyPOS system, any revision(s) must also be submitted online via MyPOS. If the approved Plan of Study was submitted on paper, any revision(s) must be submitted using the paper Form 9-Revision to Existing Plan of Study.

Revisions need only be filed once and may be submitted during the final term in which the student plans to graduate.

3. A Form 12-Research Compliance and Safety form must be completed by any graduate student conducting research involving human or animal subjects, intellectual property issues, or environmental health and safety training for the thesis. Any federally mandated compliance issues must be approved by the appropriate University committee prior to the collection of data.

## DOCTORAL DEGREE REQUIREMENTS

Doctoral degrees require at least 72 credits beyond the baccalaureate degree. For specific requirements of individual doctoral programs, see the Doctoral Degree Program Information heading in the appropriate college section. For doctoral requirements in the College of Education, see the following headings: Specialist's Degree Program Information and Doctoral Degree Program Information. These graduate credits must be taken as part of an approved graduate program of study. Some programs require considerably more than the minimum of 72 credits because of the nature of the discipline and the standards of the associated profession.

## SECOND DOCTORAL DEGREE REQUIREMENTS

A second doctoral degree will be conferred upon the same individual if the second degree represents at least 72 credits of additional work in residence and if all of the requirements of the college awarding the degree have been met.

### **Supervisory Committee for Doctoral Degrees**

Each doctoral candidate shall have an advisor and a supervisory committee composed of at least three members of the graduate faculty. One of the members shall serve as the chair of the supervisory committee. The supervisory committee shall approve the student's plan of study, monitor the student's academic progress, approve the dissertation subject, prepare, give, and evaluate the qualifying examination, evaluate the dissertation defense and approve the final document. The minor, or related fields, if applicable, shall have representation on the supervisory committee.

### **Plan of Study for Doctoral Degrees**

1. All degree-seeking graduate students should have an approved Plan of Study on file with the Graduate College no later than halfway through their required coursework and before enrolling in thesis or dissertation credits, if applicable. Students must have an approved Plan of Study on file

with the Graduate College prior to the term in which they intend to graduate. All students receive an email confirmation through the MyPOS system when their Plan of Study is approved by the Dean of the Graduate College.

2. Changes to an approved Plan of Study require the submission and approval of a revision. If the approved Plan of Study was submitted online through the MyPOS system, any revision(s) must also be submitted online via MyPOS. If the approved Plan of Study was submitted on paper, any revision(s) must be submitted using the paper Form 9-Revision to Existing Plan of Study. In addition, changes to the supervisory committee require a paper Form 9 for all doctoral students with an approved Form 8-Admission to Candidacy on file with the Graduate College. Revisions need only be filed once and may be submitted during the final term in which the student plans to graduate.
3. A Form 12-Research Compliance and Safety form must be completed by any graduate student conducting research involving human or animal subjects, intellectual property issues, or environmental health and safety training for the dissertation. Any federally mandated compliance issues must be approved by the appropriate University committee prior to the collection of data.

### **Admission to Candidacy for Doctoral Degrees**

1. Graduate students become candidates for the doctoral degree once they are granted formal admission to candidacy. Such admission requires the approval of the student's supervisory committee, the department chair, the college dean and the dean of the Graduate College. The approval must be based on (a) the academic record of the student, (b) the opinion of the supervisory committee concerning overall fitness for candidacy, (c) an approved dissertation topic and (d) a qualifying examination as determined by the appropriate department/program.
2. Application for admission to candidacy should be made as soon as the qualifying examination has been passed and a dissertation topic has been approved by the student's supervisory committee. To be formally admitted to candidacy, the student must submit a Form 8-Admission to Candidacy for the Doctoral Degree to the Graduate College. All students receive an email confirmation when the Admission to Candidacy form is approved by the Dean of the Graduate College. An approved Plan of Study must be on file with the Graduate College prior to formal admission to candidacy. Students must be admitted to candidacy at least one semester before applying for graduation. Students may not register for dissertation credit until they have been admitted to candidacy.

- [Grants](#)
- [Loans](#)

- [Mandatory Course Entry Quiz](#)
- [Need-Based Financial Aid](#)
- [Non-Need-Based Financial Aid](#)
- [Scholarships](#)
- [Short-Term Advance](#)
- [Student Employment Programs](#)
- [Summer Financial Aid](#)
- [Transient Student Procedures for Students Receiving Financial Aid](#)

Florida Atlantic University offers comprehensive financial aid programs to assist in meeting reasonable educational expenses for both full-time and part-time students who might otherwise be unable to afford college. Reasonable educational expenses include tuition and fees, room and board, books and supplies, transportation, miscellaneous personal expenses, and expenses related to childcare of a student's dependents. To view our full cost of attendance information page, visit the [website](#).

For financial aid purposes during fall and spring terms, undergraduate students enrolled for 12 or more credits and graduate students enrolled for 9 or more credits are considered "full-time students." To see the summer enrollment classification table, refer to the section labeled [Summer Financial Aid](#) below.

In addition to providing funds on the basis of demonstrated financial need in the form of grants, work study awards and loans, FAU offers scholarships to recognize and reward talent, academic achievement and meritorious performance.

Students who may be eligible for educational benefits under any Veterans Administration program should refer to the subsection "Military and Veterans Student Success Center" in the [Student Services and Activities section](#) of the catalog. Students should also contact the Military and Veterans Student Success Center on campus well in advance of their first time registering at the University.

The Florida Atlantic University financial aid program is administered by the Office of Student Financial Aid without regard to race, creed, color, sex, physical handicap or national origin. This ensures equitable treatment of all qualified applicants. For forms to submit and information concerning financial aid, scholarships, need-based employment and other special programs, contact the Office of Student Financial Aid by visiting its [website](#).

## NEW STUDENTS TO FAU

New FAU students are encouraged to visit the Office of Student Financial Aid's [website](#) and click on "Apply for Aid." Information on how to apply for financial aid, different types of aid available, navigating the Financial Aid section of [MyFAU](#), accepting awards and how to apply for money to purchase books/school supplies can be found here.

## MANDATORY COURSE ENTRY QUIZ

Students will be required to complete the Mandatory Course Entry Quiz for ALL classes in which they are enrolled. According to Federal Regulations, a student is considered not to have begun attendance if a school is unable to document the student's attendance in each class. Title IV financial aid (Direct Loans, Pell Grant, SEOG and Federal Workstudy) will not disburse for each class in which the survey has not been completed.

In addition to completing the Mandatory Course Entry Quiz, students are required to maintain eligibility for Title IV funding by displaying documented academic activity in their courses. Examples of valid forms of documented activity include faculty attendance rosters, graded assignments, quizzes and exams. Students should be aware that they may be required to repay any aid disbursed for a course for which they have no documented academic activity, even if the Mandatory Course Entry Quiz was completed. More details and instructions can be found at [Mandatory Course Entry Quiz](#).

## NEED-BASED FINANCIAL AID

The need-based financial aid programs are administered according to a nationally accepted policy that the family, meaning parents, student and/or spouse, is responsible for a student's educational expenses. Need-based financial aid is available to fill in the gap that may exist between the total cost of education and what the family can reasonably be expected to contribute. This aid is awarded on the basis of greatest financial need with priority given to those students who apply by the FAU priority consideration date of April 1. Complete the [FAFSA application](#) (Free Application for Federal Student Aid) as soon as possible beginning October 1 each year. FAU school codes are: Boca Raton campus - 001481; Davie campus - E00584; Jupiter campus - E00830.

For more details on various forms of available financial aid, visit [Types of Financial Aid](#) .

### **Eligibility Requirements for Need-Based Financial Aid**

After submitting the Free Application for Federal Student Aid ([FAFSA](#)), students must immediately

fulfill any outstanding student requirements. Funds will not be awarded until the student's financial aid file is complete and, in some cases, until the student is enrolled. If there are any unsatisfied requirements, students will receive an email notification via their FAU email account. To check the status, visit [Check Your Financial Aid Status](#).

## Verification

Verification is a process to confirm that the information provided on the FAFSA is accurate. Each year, 30 percent of applicants who fill out the FAFSA are randomly selected for verification by the U.S. Department of Education. FAU reserves the right to select students for verification if there is inconsistency or discrepancy in the information submitted. Verification ensures that the information students and parents report is accurate. For more details, visit [The Verification Process](#).

## SUMMER FINANCIAL AID

Summer 2024 Financial Aid Offers begin in April for students who meet the following criteria:

1. If previously enrolled at FAU, the student must be registered for summer 2024 courses at FAU.
2. The student must have a completed 2023-2024 FAFSA on file with FAU.
3. The student must have no unsatisfied financial aid requirements for the 2023-2024 academic year. Unsatisfied requirements will be displayed when viewing the [Financial Aid Status](#).
4. The applicant MUST satisfy all general aid eligibility requirements as listed under the [Financial Aid Policies](#).

## SUMMER ENROLLMENT REQUIREMENTS

Financial aid applicants must register for ALL summer sessions (summer terms 1, 2 and 3) by the summer 1 drop/add deadline (see [Academic Calendar](#) for date) and must remain at least half time (see criteria below for definition of half-time enrollment) to be considered eligible for most forms of aid.

<b>Undergraduate Students</b>	<b>Students Admitted to a Bachelor's Degree Program</b>
<i>To be considered</i>	<i>Your Summer FAU enrollment must be</i>
Full Time	12 or more credits
Three Quarter Time	9-11 credits

Half Time	6-8 credits
<b>Graduate Students</b>	<b>Students Admitted to a Master's or Doctoral Degree Program</b>
<i>To be considered</i>	<i>Your Summer FAU enrollment must be</i>
Full Time	6 or more credits
Three Quarter Time	5 credits
Half Time	3-4 credits

Regardless of award projections, all types of grant support are directly linked to the hours attending. Grant disbursements will be calculated based upon a student's final enrollment at the end of drop/add week. Grants may be reduced based on changes in hours attended.

### **Less than Half Time**

Students will NOT be eligible for most forms of financial aid or grants if they are enrolled less than half time at FAU. In some cases, Federal Pell Grant recipients may be eligible to receive their Pell Grant with less than half time enrollment. Some private/alternative loans are available for students enrolled less than half time if additional funds are needed.

## GRANTS

Grants are financial aid offers that are based on financial need. If grants are offered as a part of a student's financial aid offer, FAU will automatically accept them for the student. More details on types of grants available, eligibility criteria, disbursement criteria, renewal criteria can be found at [Grants](#).

## LOANS

Loans are a form of financial aid that MUST be repaid. A minimum of half-time enrollment is required for the disbursement of a loan. FAU encourages students to only borrow what is needed to cover their cost of attendance for the academic year.

Information regarding a student's **Federal** loans is submitted to the [National Student Loan Data System \(NSLDS\)](#) and is accessible by guaranty agencies, lenders and schools determined to be authorized users of this system. Students can review their Federal Loan History on NSLDS to monitor

their progression toward the aggregate limit.

Loan process steps must be completed at least two weeks prior to disbursement to ensure that the student receives their funds in a timely manner, with the exception of the [Short Term Advance](#).

More details on types of loans available, eligibility criteria, disbursement criteria and interest rates can be found at [Loans](#) .

## STUDENT EMPLOYMENT PROGRAMS

### NEED-BASED EMPLOYMENT PROGRAMS

**The Federal Work Study Program** is a need-based, federally funded, part-time employment program, which allows eligible students to earn money to help pay for education expenses. Students must complete the [Free Application for Federal Student Aid \(FAFSA\)](#) each year to be considered for federal financial aid, including FWS.

**Florida Work Experience Program** is a State of Florida-funded, need-based program providing eligible Florida students the opportunity to secure work experiences complementary to and which reinforce the student's educational and career goals.

Recipients of the Florida Work Experience Program may work on campus in positions that complement and reinforce academic and career goals. All recipients of the FWEP program **MUST be Florida Residents and must be graduate students.**

## TRANSIENT STUDENT PROCEDURES FOR STUDENTS RECEIVING FINANCIAL AID

A concurrently enrolled student is one who is degree seeking and taking classes at FAU (Home School) AND another eligible institution (Host School) in the same semester. Financial aid is disbursed from FAU based on the student's total combined enrollment (FAU + Host School) for the semester.

An outgoing consortium enrolled student is one who is degree seeking at FAU (Home School) BUT is ONLY taking classes at another institution (Host School) AND would like to receive their scheduled FAU Financial Aid Offer(s). FAU ENROLLMENT STATUS MUST BE ZERO CREDIT HOURS.

An incoming consortium enrolled student is one who is NOT degree seeking at FAU (Host School). Therefore, financial aid status and information must be addressed to their degree-seeking institution (Home School).

More details can be found at [Special Programs](#).

## NON-NEED-BASED FINANCIAL AID

[Federal Parent PLUS Loans](#) is a low interest loan available to assist the parents of dependent students admitted and enrolled in an undergraduate degree program or graduate students admitted and enrolled in a graduate degree program. To be eligible for the Direct PLUS Loan, the parent borrower should not have adverse credit history. Maximum eligibility is equal to cost of education minus other aid. Repayment of principal and interest begins within 60 days after the loan is fully disbursed. The borrowers may be eligible to defer repayment until the student graduates or ceases to be enrolled at least half time. In order to receive a Direct PLUS Loan, students must first file a [Free Application for Federal Student Aid \(FAFSA\)](#).

[Direct Unsubsidized Stafford Loans](#) are available for all students once the FAFSA information determines a student's financial need. Some students may only qualify for unsubsidized. Repayment is the same as the Direct Subsidized Loan except that students accrue interest while enrolled. For more information, click [here](#).

[Federal Grad PLUS Loan](#) is a loan directly from the U.S. Department of Education. It is NOT a loan through a bank. The Direct Graduate PLUS Loan is an unsubsidized loan, meaning interest begins to accumulate on the loan from the time it is disbursed. A student will receive an automatic deferment while enrolled in school at least half-time, and for an additional six months after the student graduates, leaves school, or drops below half-time enrollment. The student does not have to start making payments until this deferment period ends.

**Job Location and Development (JLD)** Off-campus job resources are open to all registered, degree-seeking, U.S. Employment Authorized students, regardless of financial need. For more details visit [Part-Time Jobs](#).

### Short Term Advance Program

The [Short Term Advance](#) is a university monetary advance available to assist degree-seeking students

enrolled at least half time with:

- Purchasing textbooks
- Emergency funds relating to educational expenses
- Unanticipated living expenses

Keep in mind that the Short-Term Advance is NOT a source of funding to assist with paying tuition and other related fees at FAU or transient student enrollment at another college/university. Students may borrow **up to \$750.00**. In addition, a **\$5.00** non-refundable processing fee will be assessed.

**NOTE: If the student is under 18 years of age** , please download the [Parental Short Term Advance Application](#) and submit it to the Office of Student Financial Aid. In addition, the student must also [setup direct deposit online](#).

## FAU BOOKSTORE LINE OF CREDIT PROGRAM

In addition to the Short Term Advance, eligible Financial Aid recipients may receive a \$600 line of credit for textbook purchases from the FAU Bookstore. The line of credit can be used for online and in store textbook purchases only. The amount of the line of credit used will be posted as a charge to the student's FAU account. *Students who meet the eligibility criteria will be notified of their eligibility for this program via their FAU email.* For more details visit [FAU Bookstore Line of Credit Program](#) .

## DISBURSEMENT ESTIMATOR

The financial aid disbursement estimator is designed as a tool to help students determine what they need to pay the University and represents only an **ESTIMATE** of what financial aid may disburse based on their enrollment and offer status now. At the time of the actual disbursement process, where appropriate for individual offers, items such as residency, grade level, satisfactory academic progress, unmet need, and/or loan entrance or promissory note requirements may affect whether or not the individual offers disburse. Also, at the time of actual disbursements, other charges or credits to students' accounts not displayed now (such as Housing, Meal Plans, parking or library fines, Florida Prepaid and Matriculation waivers) may be applied to their account. For more details, visit [Disbursement Estimator Tool](#) .

## SCHOLARSHIPS

[Scholarships](#) are designed to reward, encourage and assist students in pursuing academic excellence and leadership roles. Academic achievements, leadership positions, campus or community activities, work experience and financial need, are considered during the scholarship selection process. Financial need is determined by the [Free Application for Federal Student Aid \(FAFSA\)](#).

### **Bright Futures Scholarship Program**

This program is a state-funded scholarship offered to Florida high school graduates based on high school academic achievement. Students must enroll in an eligible Florida public or private postsecondary educational institution. For additional information, contact a high school counselor or call the Florida Department of Education at 1-888-827-2004. More details on the Florida Academic Scholars and Florida Medallion Scholars can be found at [Bright Futures](#) .

## **OUTSIDE RESOURCE**

An outside resource is any form of financial assistance a student receives that is awarded based on their educational pursuit and is not processed through the University's Financial Aid, Controller, Foundation or Directed Research offices.

The student must inform FAU of any outside resource they receive. Examples would be a scholarship check made payable directly to the student, or support from an outside agency that will be covering educational expenses for the student in the form of direct reimbursement. To report an outside resource, submit the following form to the student's assigned financial aid counselor at [Student Statement of Outside Resources](#).

Examples of resources that do not need to be reported are any resources that are processed through the University system, such as: Florida Pre-paid, Student Loans, Financial Aid Grants, Florida Bright Futures, FAU Tuition Exemptions, VA Educational Benefits, FAU Scholarships or Scholarships made directly payable to FAU or co-payable to FAU/Student.

### ACADEMIC PROGRAMS

### COURSE DESCRIPTIONS

## PROGRAMS FOR ENRICHMENT AND SPECIALIZATION

The following programs may be taken in conjunction with a degree program. An exception is the Secondary Education Program available to persons holding a bachelor's degree from an accredited university.

**Certificate Programs** - Enhance a student's major program of study by allowing specialization in a certain field or evolving industry. Florida Atlantic University offers numerous certificate programs for undergraduate and graduate students. Certificate program information may be found in the [Degree Programs section](#) and in the College sections within this catalog.

**Education Abroad** - Provides activities, advising and programming for students interested in traveling abroad for credit as part of their academic studies.

**Intensive English Studies Programs** - Provide instruction in all areas of the English language. Available to international students, scholars and professionals.

**Lifelong Learning Programs** - Assist non-traditional students in expanding their knowledge. Programs include Continuing Education, the Osher Lifelong Learning Institute and 60-Plus Audit.

**Military Programs** - Offer students opportunities to receive [Air Force](#) and [Army ROTC](#) experience while pursuing their bachelor's degrees. A [Military Science minor](#) is also available.

**Oak Ridge Associated Universities (ORAU) Consortium** - Provides a consortium of 91 colleges and universities that works with its member institutions to help their students and faculty gain access to federal research facilities throughout the country.

**Post-Baccalaureate Pre-Health Professions Program** - Provides a preparatory program for students planning to continue their education beyond FAU in the medical, dental or veterinary fields.

**Pre-Law Preparation** - Provides guidance for undergraduates interested in attending law school.

**Secondary Education Programs** - Offers degree and certification programs in various subjects for individuals interested in teaching and meeting Florida certification requirements.

## EDUCATION ABROAD

### Overview

Florida Atlantic University Education Abroad, part of the [Center for Global Engagement](#), offers both undergraduate and graduate students the opportunity to travel abroad for academic purposes. Students enhance their personal, professional and academic résumé—demonstrating they have the intercultural competence and versatility needed to compete in today's global workforce. Programs may include study, internships, service learning and research opportunities abroad.

Students of all majors and from all colleges at undergraduate and graduate levels are invited to participate, as most programs have coursework taught in English (though some do require proficiency or knowledge of a foreign language). Undergraduate students must have a minimum 2.5 cumulative GPA and graduate students a 3.0 GPA in order to participate; some programs may have additional GPA or admissions requirements.

## TYPES OF PROGRAMS

### **Faculty-Led Study Abroad Programs**

Education Abroad works with faculty and administrators across the colleges to offer short-term study abroad programs, ranging from 1-6 weeks, throughout the year. These programs are a great option for first-time travelers and students whose personal, professional or academic situation does not allow them to be out of the country for an extended period of time. Recent short-term program destinations have included Belgium, Brazil, China, Costa Rica, Ecuador, England, France, Greece, Israel, Italy, Japan, Mexico, Peru and Spain. Though some programs are repeated annually, Education Abroad supports faculty in developing new and exciting programs in traditional and non-traditional disciplines and destinations. This allows students to explore the world while taking FAU courses and traveling with professors.

### **Student Exchange Programs**

FAU has reciprocal student exchange agreements with educational institutions around the world, offering semester, academic year, and in some cases, summer study abroad opportunities. Students participating in an exchange program are registered through FAU and pay FAU tuition while studying at the institution abroad and earning credits toward their degree. Coursework is available in a wide range of subjects, including business, engineering, science, architecture, humanities, social sciences and more. Some programs offer courses in the local language, while others offer coursework conducted all in English. Leading partner institutions are located in Australia, Finland, France, Germany, Ireland, Japan, Portugal, South Korea and Sweden.

### **Direct Enroll**

Students have the option to directly enroll in a program with a study abroad partner institution or organization. Education Abroad provides support and advising throughout this process, and students receive transfer credit for the successful completion of coursework abroad.

### **Funding**

Students who are interested in participating in a study abroad experience have various funding opportunities available. Certain types of institutional, state and federal financial aid may be applied to FAU-sponsored study abroad programs, including Pell Grants, Bright Futures Scholarships, Florida Prepaid and the FAU Presidential Scholarship. Education Abroad offers its own study abroad scholarship and advises students on external scholarships, such as the Benjamin A. Gilman International Scholarship, the Fund for Education Abroad Scholarship, the Boren Scholarship.

### **Getting Started with Study Abroad**

Students who are considering adding an experience abroad to their academic studies should contact Education Abroad as soon as possible. Advanced planning allows adequate time to meet with the Education Abroad staff, have coursework reviewed, apply for scholarships and complete the application and acceptance materials on time.

More information on programs and funding can be found on the Education Abroad [website](#), by visiting the Education Abroad office located on the Boca Raton campus in General Classroom South (GS) 212Q or by sending an [email](#).

## **INTENSIVE ENGLISH STUDIES PROGRAMS**

International students, scholars and professionals may receive instruction in all areas of the English language at FAU through the Intensive English Institute (IEI).

The Intensive English Institute offers English for business or a career or to prepare for study at an American university. Instruction is given in listening and comprehension, grammar, reading, writing, composition, vocabulary development, conversation and multicultural understanding. For more information, visit the Intensive English Institute's [website](#) or call 561-297-0179.

In addition, the Intensive English Institute offers a prestigious Bridge Program, which provides conditional admission to FAU degree programs (undergraduate and graduate). For details, visit the Bridge Program's [website](#) or contact [IEI@fau.edu](mailto:IEI@fau.edu).

## **LIFELONG LEARNING PROGRAMS**

Florida Atlantic University recognizes that learning is a lifetime process and sponsors several programs specifically to facilitate lifelong learning.

## **The Osher Lifelong Learning Institute**

The Osher Lifelong Learning Institute is one of the largest and most successful lifelong learning programs in the nation. With more than 20,000 patrons enrolled on the Boca Raton and Jupiter campuses, members choose from a schedule of non-credit courses and lectures given by Eminent Scholars and national and international figures in a wide variety of fields, including foreign policy, music, art, history, science, literature, philosophy, current events and film. For information and a schedule of courses, visit its [website](#) or call 561-297-3171. For the Osher Lifelong Learning Institute at FAU Jupiter, click [here](#) or call 561-799-8547.

## **Continuing Education**

As part of the academic mission of FAU, Continuing Education provides both credit and non-credit opportunities to individuals who seek to expand their educational horizons. Through Continuing Education, in excess of 24,000 students take classes, seminars and workshops in professional training, test preparation, personal growth, languages, investment management and many other pursuits.

Credit courses within Continuing Education are provided by accredited faculty members in a variety of non-traditional settings: weekend; distance education, including telecourses, Internet and video; corporate courses both sponsored and paid for by employees for reimbursement; extension and international.

Non-credit courses, education and training for government employees and nonprofit organizations, certifications and individual career needs are also within this division's mission. For more information, visit the Center for Online and Continuing Education [website](#) or call 800-228-5845 or 561-297-0178.

## **The 60-Plus Audit Program**

Permanent residents of Florida who are at least 60 years of age may audit credit courses for free. Registration is on a space-available basis after degree-seeking students have registered. For registration dates, instructions and a list of courses, visit the Registrar's Office [website](#).

## **MILITARY PROGRAMS**

[Link to Army ROTC Program/ Link to Military Science Minor](#)

## **AEROSPACE STUDIES - AIR FORCE (AFROTC)**

Florida Atlantic University, in cooperation with the Department of Aerospace Studies, Air Force

Reserve Officer Training Corps (AFROTC) at the University of Miami, provides academic instruction and training leading to active duty commissioned service in the United States Air Force.

AFROTC is an educational program designed to provide college students the opportunity to become Air Force officers while completing a bachelor's degree. The AFROTC program provides superior hands-on leadership training and is designed to prepare cadets to assume positions of increasing responsibility as officers in service to their country.

Normally, the program is four years, but in some instances students can complete requirements in three years. The first two years of the program, the General Military Course (GMC), consist of a one-hour class, three hours of leadership laboratory/practical military training and two hours of organized physical conditioning each week. AFROTC cadets compete for entry into the last two years of the program, the Professional Officer Course (POC). Competition includes both quantitative and qualitative factors, such as grade point average, unit commander's evaluation, aptitude test scores and physical fitness test scores. If selected, cadets must complete a 14-day summer program referred to as Field Training at Maxwell Air Force Base in Montgomery, AL before entering the POC.

After earning a degree and successfully completing all Air Force ROTC requirements, cadets are commissioned as Air Force officers with a four-year active duty service commitment. Pilots, Combat Systems Officers and Air Battle Managers have longer service commitments upon completion of specialized training.

For more information, contact Detachment 155 Cadre at 305-284-2870 or browse its [website](#).

## **Enrollment**

There is no military obligation to enroll in AFROTC. To enroll students must meet the following criteria:

- Be a U.S. citizen or resident alien, or be able to become a U.S. citizen prior to attending Field Training the summer following sophomore year;
- Be a full-time college student enrolled in 12 credits per semester;
- Be able to participate in a demanding physical fitness program;
- Be able to pass a Department of Defense Medical Examination;
- Have solid moral character;
- Maintain AFROTC minimum required grade point average.

## **Scholarships**

More than 70 percent of Air Force ROTC scholarships are awarded to undergraduate students in

engineering or other scientific and technical disciplines. However, students in every degree program enjoy scholarship opportunities, as the Air Force seeks to engage students who excel both academically and militarily. Scholarships are awarded in increments of two, three and four years. Air Force ROTC offers several types of scholarships. Type 1 covers full tuition and most required fees. Type 2 covers tuition and fees but is capped at \$18,000 annually. Type 3 pays up to \$9,000 annually and can be used at any university that offers Air Force ROTC. Type 7 scholarships are normally designated for in-state-tuition-level institutions. All types of awards provide an allowance for books, most required fees and a monthly non-taxable stipend. All scholarship cadets are required to meet certain academic, military and physical fitness standards to earn and maintain scholarship benefits.

### **Benefits**

All AFROTC cadets receive uniforms, books and equipment for ROTC classes at no cost. Upon commissioning as Second Lieutenant, the starting salary and allowances are worth more than \$68,000 annually\*. Free medical and dental care, 30 days paid annual vacation and added educational benefits are also part of the compensation package.

\* Based on 2021 Pay Chart and Miami, FL Housing Allowance for a Second Lieutenant (2d Lt O-1).

### **Aerospace Studies Course Descriptions**

Classes and labs are held at the University of Miami in Coral Gables.

#### **Heritage and Values of the United States Air Force 1 (AFR 1101) 1 credit**

#### **Heritage and Values of the United States Air Force 2 (AFR 1121) 1 credit**

Survey courses designed to provide an introduction to the Air and Space Forces to encourage students to pursue a U.S. Air Force career or at least seek additional information to be better informed about the role of the USAF. The courses allow students to examine general aspects of the Department of the Air Force, leadership fundamentals, service benefits and opportunities for officers. The courses also lay a foundation for becoming an Air or Space professional by outlining USAF heritage and values. As foundational courses, these courses also provide a historical perspective such as lessons on war and the U.S. military, AF operations, principles of war and airpower. Additionally, these courses provide students with a knowledge-level understanding for the employment of air and space power from an institutional, doctrinal and historical perspective. Students are introduced to the military way of life and gain knowledge of what it means to be an Air or Space professional.

#### **Team and Leadership Fundamentals 1 (AFR 2130) 1 credit**

### **Team and Leadership Fundamentals 2 (AFR 2131) 1 credit**

Survey courses designed to provide a fundamental understanding of both leadership and team building. It is imperative that students are taught from the beginning that there are many layers to leadership, including aspects that do not always jump to mind. Such aspects include listening, understanding themselves, being a good follower and problem solving efficiently. Students apply these leadership perspectives when completing team building activities and discussing conflict management. Students should demonstrate basic verbal and written communication skills.

### **Leading People and Effective Communication 1 (AFR 3220) 3 credits**

#### **Leading People and Effective Communication 2 (AFR 3230) 3 credits**

This course is designed to build on the leadership fundamentals taught in lower-level AFR courses. Students have the opportunity to utilize their skills as they assume more of a leadership role. The goal of this course is for students to develop a more in-depth understanding of how to lead people effectively and provide them with the tools to use throughout their various leadership roles. Students hone their writing and briefing skills. Many students may lack public speaking skills; this course is designed to assist in building the confidence needed for briefing sessions in front of an audience. Additionally, this course includes guided discussion centered on leadership and ethics. Students begin thinking about leadership through their own lens furthering the development of their leadership skills.

### **National Security, Leadership Responsibilities and Commissioning Preparation 1 (AFR 4201) 3 credits**

### **National Security, Leadership Responsibilities and Commissioning Preparation 2 (AFR 4211) 3 credits**

This course is designed to increase comprehension of the basic elements of national security policy and process. Students should know basic Department of the Air Force operations as well as understand selected roles of the military in society and current domestic and international issues affecting the military profession. Students should understand the responsibility, authority and functions of a Department of the Air Force commander and selected provisions of the military justice system. The final portion of the course is designed to prepare students for a career as a second lieutenant as they transition from civilian life to military life.

## **MILITARY SCIENCE**

The Army Reserve Officer Training Corps (ROTC) is a program (normally college electives) that

incorporates extensive leadership, management, problem solving, fitness and level 1 military skills into any college student's curriculum regardless of the student's selected major. This program has proven its unparalleled value to students long after graduation and well into their desired career, whether civilian or military. ROTC is an elective course that is taken each semester of college, and upon completion of the program requirements and awarding of a bachelor's degree (or graduate degree), the student is commissioned as an Officer in the active Army, Reserves or National Guard.

Students interested in ROTC, but not ready to make a commitment, may take classes as freshmen and/or sophomores and incur no military obligation. Students entering their junior year or about to begin a two-year graduate program in the fall of an academic year may spend five weeks in summer training at the Leaders Training Course in Fort Knox, Kentucky. In that program, students learn skills normally taught in the first two years of ROTC, earn pay, and then without obligation, make a decision about ROTC and the Army. Contact the Military Science program at 561-297-6484 or Mr. John Mccammon at [jmccamo@fau.edu](mailto:jmccamo@fau.edu) for additional information.

### **Enrollment**

The program is open to all full-time students attending Florida Atlantic University (or other cross-enrolled universities). Courses are taught at FAU's Boca Raton campus. A list of available courses appears after this Military Science description.

### **Instruction and Training**

There is no military service obligation associated with the first two years of the program unless a student is an ROTC scholarship recipient. These courses introduce students to skills taught at U.S. Army Basic Training. They include military customs and courtesies, organization and rank structure leadership assessment, patrolling, map reading, first aid and many others. Courses consist of outdoor/indoor instruction and are, by design, 80 percent practical "hands-on" training conducted both on campus and throughout South Florida. Juniors and seniors continue to use these hands-on techniques while the emphasis is on developing and refining leadership skills. As juniors and seniors and advanced course Cadets, they are also charged with teaching and mentoring basic course students. Closely monitored and supervised by experienced Military Officers and senior enlisted soldiers, these juniors and seniors plan and organize events and other training far beyond their personal expectations.

### **Scholarships**

Army ROTC has national and campus-based scholarships. These scholarships pay full tuition or up to \$12,000 per school year for room and board. The scholarship also pays \$1,200 annually for books and up to \$500 per month for spending money. Applications for scholarships are accepted during the

academic year with priority given to enrolled ROTC students. Scholarship winners are usually committed to four years of active duty, earning salaries comparable to civilian sector incomes, but with the experience that few civilian careers can offer. Non-scholarship and selected scholarship Cadets can request either full-time active service or part-time service in the Reserves or National Guard.

### **Benefits**

All ROTC Army Cadets receive uniforms, books and equipment for ROTC classes at no cost. Upon being commissioned a 2nd Lieutenant in the U.S. Army, a student will receive a starting salary and allowances worth more than \$56,000 per year. Free medical and dental care, 30 days paid annual vacation with added educational benefits are also included in the compensation package.

### **Organizations**

**Ranger Challenge** - A physically demanding course designed to prepare Cadets for area and regional competition against other ROTC units. Cadets train weekly to perfect skills in weapons handling and assembly, marksmanship, orienteering, hand grenade throwing, physical fitness, combat patrolling and combat load road-marching.

**Color Guard** - An elite organization of Cadets skilled in marching, drill and ceremony. Members post the colors at FAU sporting events, civic/veteran events and campus/community functions.

### **Special Programs**

Students unable to participate in ROTC during the freshman and sophomore years may qualify for admission to advanced ROTC (junior and senior years) by attending a 30-day course (basic camp) at Fort Knox, Kentucky, during the summer between their sophomore and junior year. Attendees incur no military obligation.

An alternative entry program is also available for students who meet certain criteria and are unable to attend basic camp.

### **Special Training**

Outstanding Cadets may be qualified to attend special Army schools such as Mountain Warfare Training, Northern Warfare School, Air Assault School or Airborne School. Selection is competitive and based on the student's academic and physical performance record. Cadets receive uniforms, boots and other equipment necessary for all ROTC classes and training. Outstanding Cadets are honored at frequent award ceremonies.

### **Military Science Course Descriptions**

Classes and labs are held at Florida Atlantic University's Boca Raton campus.

### **Foundations of Officership (MSL 1001) 1 credit**

*Corequisite: MSL 1001L*

Students examine the unique duties and responsibilities of Officers, discuss the organization and role of the Army, review basic life skills pertaining to fitness and communication and analyze Army values and expected ethical behavior.

### **Foundations of Officership Lab (MSL 1001L) 0 credit**

*Corequisite: MSL 1001*

Laboratory component for MSL 1001.

### **Basic Leadership (MSL 1002) 1 credit**

*Corequisite: MSL 1002L*

Course presents fundamental leadership concepts and doctrine. Students practice basic skills that underlie effective problem solving, apply active listening and feedback skills, examine factors that influence leader and group effectiveness and examine the Officer experience.

### **Basic Leadership Lab (MSL 1002L) 0 credit**

*Corequisite: MSL 1002*

Laboratory component for MSL 1002.

### **Individual Leadership Studies (MSL 2101) 2 credits**

*Corequisite: MSL 2101L*

Course develops problem solving and critical thinking skills and helps students apply communication, feedback and conflict resolution skills.

### **Individual Leadership Studies Lab (MSL 2101L) 0 credit**

*Corequisite: MSL 2101*

Laboratory component for MSL 2101.

### **Leadership and Teamwork (MSL 2102) 2 credits**

*Corequisite: MSL 2102L*

Focuses on self development guided by knowledge of self and group processes; challenges current beliefs, knowledge and skills; and provides equivalent preparation for the ROTC Advanced Course as the Leader's Training Course.

### **Leadership and Teamwork Lab (MSL 2102L) 0 credit**

*Corequisite: MSL 2102*

Laboratory component for MSL 2102.

### **Leadership and Problem Solving (MSL 3201) 3 credits**

*Corequisite: MSL 3201L*

Concentrates on preparing students to become officers in the United States Army and, more immediately, for attendance at the Leadership Development Assessment Course (LDAC) in Fort Lewis, Washington. Special emphasis is placed on physical fitness, land navigation, troop leading procedures, preparing operations orders and leader execution. Examines the basic skills that underlie effective problem solving in the execution of leadership by analyzing military missions and planning military operations.

### **Leadership and Problem Solving Lab (MSL 3201L) 0 credit**

*Corequisite: MSL 3201*

Laboratory component for MSL 3201.

### **Leadership and Ethics (MSL 3202) 3 credits**

*Corequisite: MSL 3202L*

Concentrates on preparing students to become officers in the United States Army and, more immediately, for attendance at the Leadership Development Assessment Course (LDAC) in Fort Lewis, Washington. Special emphasis is placed on physical fitness, land navigation, troop leading procedures, preparing operations orders and leader execution. Develops Cadet leadership competencies and ethical leader responsibilities. At the conclusion of the course, Cadets will be capable of planning, coordinating, navigating, motivating and leading a team or squad in the execution of a small unit tactical mission or battle drill during a classroom PE, a Leadership Lab or during a Situational Training Exercise (STX) in a field environment.

### **Leadership and Ethics Lab (MSL 3202L) 0 credit**

*Corequisite: MSL 3202*

Laboratory component for MSL 3202.

### **Leadership and Management (MSL 4301) 3 credits**

*Corequisite: MSL 4301L*

Builds on Leadership Development and Assessment Course (LDAC) experience to solve organizational and staff problems, including discussing staff organization, functions and processes; analyzing counseling responsibilities and methods; examining principles of subordinate motivation and organizational change and applying leadership and problem solving principles to a complex case study/simulation.

### **Leadership and Management Lab (MSL 4301L) 0 credit**

0268

*Corequisite: MSL 4301*

Laboratory component for MSL 4301.

### **Officership (MSL 4302) 3 credits**

*Corequisite: MSL 4302L*

This is a capstone course designed to explore topics relevant to 2nd Lieutenants entering the Army. It describes the legal aspects of decision making and leadership, analyzes Army organization for operations from the tactical to strategic level, assesses administrative and logistics management functions, discusses reporting and permanent change of station (PCS) process, teaches students how to perform platoon leader actions and examines leader responsibilities that foster an ethical command climate.

### **Officership Lab (MSL 4302L) 0 credit**

*Corequisite: MSL 4302*

Laboratory component for MSL 4302.

### **U.S. Military History (MSL 4400) 3 credits**

This course covers American military history from the Colonial Period (1600s) through present-day wars. The focus is on the evolution of the United States Army's structure, strategy, tactics and weaponry with an emphasis on the interrelationship of the military establishment with American society. The presentation of material is divided between lectures, video presentations and independent research.

### **Directed Independent Study (MSL 4900) 1-3 credits**

*Prerequisite: Permission of department*

Course includes supervised reading and writing assignments of independent study in United States military history.

## **MILITARY SCIENCE UNDERGRADUATE MINOR**

*(Minimum of 15 credits required)*

The Military Science minor, offered by FAU's Army ROTC program, is available to all FAU degree-seeking students on the condition that they meet requirements for commissioning into the United States Army following completion of their undergraduate studies. The minor requires a minimum of 15 credits taken from the courses below. All courses taken for the minor must be completed with a grade

of “C” or better and at least 75 percent of the courses for the minor must be completed at FAU. The Military Science minor will be awarded upon completion of the bachelor’s degree. For additional information, please contact 561-297-6484 .

---

### **Required Courses (15 credits from courses below)**

Leadership and Problem Solving	MSL 3201	3
Leadership and Ethics	MSL 3202	3
Leadership and Management	MSL 4301	3
Officership	MSL 4302	3
U.S Military History	MSL 4400	3

---

### **Military Science Electives (not required for this minor but recommended)**

Foundations of Officership	MSL 1001	1
Basic Leadership	MSL 1002	1
Individual Leadership Studies	MSL 2101	2
Leadership and Teamwork	MSL 2102	2

## OAK RIDGE ASSOCIATED UNIVERSITIES (ORAU) CONSORTIUM

Since 2002, Florida Atlantic University students and faculty have benefited from the University's membership in Oak Ridge Associated Universities (ORAU). ORAU is a consortium of 91 colleges and universities and a contractor for the U.S. Department of Energy (DOE) located in Oak Ridge, Tennessee. ORAU works with its member institutions to help their students and faculty gain access to federal research facilities throughout the country; to keep its members informed about opportunities for fellowship, scholarship and research appointments; and to organize research alliances among its members.

Through the Oak Ridge Institute for Science and Education (ORISE), the DOE facility that ORAU operates, undergraduates, graduates, postgraduates and faculty enjoy access to a multitude of

opportunities for study and research. Students can participate in programs covering a wide variety of disciplines, including biomedical sciences, business, earth sciences, engineering, epidemiology, geological sciences, mathematics, nuclear chemistry, pharmacology, physics and ocean sciences. Appointment and program length range from one month to four years. Many programs are especially designed to increase the numbers of underrepresented minority students pursuing degrees in science- and engineering-related disciplines. A listing of these programs and other opportunities, their disciplines and details on locations and benefits can be found in the [ORISE website](#).

ORAU's Office of Partnership Development seeks opportunities for partnerships and alliances among ORAU's members, private industry and major federal facilities. Activities include faculty development programs, such as the Ralph E. Powe Junior Faculty Enhancement Awards, the Visiting Industrial Scientist Program and various services to Chief Research Officers. For information about ORAU and its programs, visit the [ORAU website](#).

## POST-BACCALAUREATE PRE-HEALTH PROFESSIONS PROGRAM

The Charles E. Schmidt College of Science offers a Post-Baccalaureate Pre-Health Professions certificate for students interested in pursuing medical, dental, veterinary or other health-related professions and who have not completed prerequisite courses as undergraduates. This certificate program is designed to assist students academically, build their research portfolios and help them obtain healthcare shadowing and volunteering experiences. The requirements for this certificate are listed under the Interdisciplinary Programs heading in this catalog's [Charles E. Schmidt College of Science section](#) or visit the Pre-Health Professions Office [website](#).

## PRE-LAW PREPARATION

The best preparation for law school is a good undergraduate education. There is no single pre-law curriculum, but it is important to complete a course of study that develops reading, writing, speaking and analytical thinking skills. Students should select a major based upon their interests and their abilities. Elective courses should be taken to complement the major and to develop special skills. Law school graduates who have developed an identifiable second area of competence as undergraduates often enhance their professional opportunities. Students interested in public service will find courses in government and law especially useful.

A pre-law curriculum is the particular set of courses each prospective law student selects to earn a baccalaureate degree. By the judicious selection of courses, students learn skills and gain knowledge crucial to success in law school and in the practice of law.

Although many different majors can be a strong basis for application to and success in law school, the following courses may be particularly suited to these goals:

---

### **Basic Courses in American Government**

United States History to 1877	AMH 2010	3
-------------------------------	----------	---

United States History since 1877	AMH 2020	3
----------------------------------	----------	---

The Government of the U.S.	POS 2041	3
----------------------------	----------	---

Issues in American Politics	POS 3033	3
-----------------------------	----------	---

---

### ***Law-Related Courses***

Business Law 1	BUL 4421	3
----------------	----------	---

Business Law 2	BUL 4422	3
----------------	----------	---

The Criminal Justice System	CCJ 3024	3
-----------------------------	----------	---

Issues in Criminal Law	CCJ 4931	3
------------------------	----------	---

Mass Communication Law and Regulation	MMC 4200	3
---------------------------------------	----------	---

Constitutional Law: Government Powers and Limits	POS 4603	3
--	----------	---

The Judicial Process	POS 4609	3
----------------------	----------	---

---

### ***Courses to Develop Analytical and Communication Skills (verbal and written)***

Advanced Exposition	ENC 3310	3
---------------------	----------	---

Logic	PHI 2102	3
-------	----------	---

---

Public Speaking	SPC 2608	3
Argumentation and Debate	SPC 4513	3
Propaganda	SPC 4540	3

For more information on pre-law studies, click [here](#).

## SECONDARY EDUCATION PROGRAMS

Secondary Education degree programs are offered by the College of Education in partnership with the Dorothy F. Schmidt College of Arts and Letters and the Charles E. Schmidt College of Science. These programs are approved by the Florida Department of Education (DOE) and National Council for Accreditation of Teacher Education (NCATE). This state and NCATE approval represents the transferability of teaching credentials from state to state.

Secondary programs currently approved include the following subject areas and grade levels:

- Art (K-12)\*
- English Education (6-12)
- Foreign Language Education (French K-12\*, Spanish K-12\*)
- Mathematics Education (6-12)
- Music Education (K-12)
- Science Education (Biology 6-12, Chemistry 6-12, Physics 6-12)
- Social Science Education (6-12)

\* *Certification program only*

More information pertaining to the Secondary Programs is available in the [College of Education section](#) of this catalog under the Department of [Curriculum and Instruction](#) or on the Department of Curriculum and Instruction's [website](#). Students may also refer to the College of Education's Office for Academic and Student Services [website](#). For Music Education information, refer to the Dorothy F. Schmidt College of Arts and Letters [Department of Music](#).

**Registration and Records information at FAU's Partner campuses:**

FAU Davie	954-236-1010
FAU Jupiter	561-799-8549

**Registration Requirement**

No student may attend a course for which he or she is not registered, either as a degree-seeking student or as a non-degree-seeking student.

## ORIENTATION, ADVISEMENT AND REGISTRATION FOR ENTERING DEGREE-SEEKING STUDENTS

All new, first baccalaureate, degree-seeking students are required to attend orientation, advisement and registration programs. The Office of New Student Orientation coordinates all orientation programs for undergraduate degree-seeking students. Orientation is designed to accomplish many goals: introduce students to FAU and the University's services and programs, provide academic advising and assist students with the challenges they will face as new students at FAU. Even if students attended another institution, orientation is essential for getting ahead at FAU because it provides the basic information needed to succeed at FAU. The program presents this information in the most concise manner possible so that a student's time at orientation is spent efficiently.

Detailed instructions pertaining to orientation, advisement and registration are sent to new students as they are admitted. For additional information, refer to the "New Student Orientation" heading in the [Student Services and Activities section](#) of this catalog, or visit the office's [website](#).

**Registration for Continuing Degree-Seeking Students**

Continuing students at FAU may register during the registration period (see the [Academic Calendar](#) for dates). Students use FAU Self-Service, available through [MyFAU](#), to register for courses.

**Academic Advising**

Academic advising is an integral part of the higher education experience. Its primary purpose is to assist students in developing meaningful educational plans compatible with their life goals. This is accomplished in a variety of ways, but always in collaboration with college, departmental or professional advising personnel. These meetings provide the student with an introduction to the campus, to student services and to the academic programs and requirements of the major.

## **Advising Policy Statement**

Florida Atlantic University recognizes and embraces its responsibility to provide students with the necessary and appropriate skills, abilities, information and resources to enable them to make enlightened decisions. To meet the challenges of excellence in education, this institution is committed to offering its students the opportunity to receive assistance and guidance in clarifying life and career goals, develop suitable educational plans, strengthen decision-making skills, increase their awareness of University policies and procedures and acquire information regarding University and community resources.

Students must be active participants in deciding the goals and direction of their university experience, and they are expected to avail themselves of all opportunities to become knowledgeable, self-directed and competent decision-makers. As partners in the advising process, the student and advisor work toward the common goal of enhancing the academic experience by devising the best possible academic program. However, students must ultimately take responsibility for their own progress toward a degree.

## **Advising in the Colleges**

The specific type of advising program adopted by the academic units at FAU varies by college and by department. Students are urged to check with their major college or department to familiarize themselves with the advising program pertaining to them.

The academic advising and registration process varies from college to college. Each process is described according to the college in which the student is enrolled.

Registration appointment times are assigned to currently enrolled students prior to registration. The [Registration Schedule](#) is available a few weeks prior to the beginning of registration for the upcoming term. Academic advising may occur at any point during the academic year. Academic advisement is not mandatory; however, certain circumstances may require some students to see an advisor. Please contact your college or department advising office to determine academic advising procedures and to make an appointment for advisement.

Although advising may not be required in every college, students should inform their colleges and individual departments of any changes made in their schedule so that these offices are able to keep accurate records. See "Determining a Semester Schedule" in this section for more information.

Closed Classes - In order to obtain permission to register for a filled class, check each college's procedure by selecting the "Closed Classes" option in the online course schedule. The current course

schedule is available at [myfau.fau.edu](https://myfau.fau.edu). In all cases, a signature, college stamp and override stamp are required for registration in person.

## COLLEGE-SPECIFIC ADVISING REQUIREMENTS

### DOROTHY F. SCHMIDT COLLEGE OF ARTS AND LETTERS (FAU BOCA RATON)

Academic advising in the Dorothy F. Schmidt College of Arts and Letters fosters relationships with undergraduate students to assist them in achieving their academic, personal, and professional goals. Students pursuing majors or minors in the College should plan to work closely with academic advisors throughout their program to ensure they understand and are meeting all degree requirements at the state, college, and university levels.

Students. . .

1. Attend and participate in a University orientation session. This session will provide general information about policies and processes essential to the student's success as well as facilitate initial interactions with an advisor as the student begins to plan a schedule and academic coursework.
2. Are advised by professional advisors in Student Academic Services as well as faculty members in certain academic departments. Students are expected to seek advisement in their respective major area as well as meet with academic advisors in Student Academic Services. Additional information about the appropriate resources and appointments are available by calling 561-297-3800 or visiting its [website](#).
3. Are expected to have prepared a tentative schedule prior to meeting with an advisor. Advisors are not able to register students for courses or plan exact schedules. Students will receive guidance and accurate information about appropriate or recommended course(s) but will develop a specific schedule and register themselves using the available online resources.
4. Are expected to schedule an appointment proactively with an advisor once a semester to ensure they remain on track to meet their academic goals and degree requirements within University completion guidelines. However, more frequent advising sessions may be helpful and allow additional opportunities to explore interests, discuss goals and obtain assistance with decision making as needed.

### DOROTHY F. SCHMIDT COLLEGE OF ARTS AND LETTERS (FAU DAVIE)

## Students with 60 or more credits. . .

1. Attend and participate in a University orientation session. This session will provide general information about policies and processes essential to the student's success as well as facilitate initial interactions with an advisor as the student begins to plan a schedule and academic coursework.
2. Are advised by professional advisors in Student Academic Services. Students are expected to seek advisement in their respective major area as well as for the remainder of the College and University requirements. Additional information about the appropriate resources and appointments are available by contacting Student Academic Services at 561-297-3800 or visiting its [website](#).
3. Are expected to have prepared a tentative schedule prior to meeting with an advisor. Advisors are not able to register students for courses or plan exact schedules. Students will receive guidance and accurate information about appropriate or recommended course(s) but will develop a specific schedule and register themselves using the available online resources.
4. Are expected to schedule an appointment proactively with an advisor once a semester to ensure they remain on track to meet their academic goals and degree requirements within University completion guidelines. However, more frequent advising sessions may be helpful and allow additional opportunities to explore interests, discuss goals and obtain assistance with decision making as needed..

## DOROTHY F. SCHMIDT COLLEGE OF ARTS AND LETTERS (FAU JUPITER)

### Students. . .

1. Attend University orientation in their first semester.
2. Meet with an academic advisor to discuss curriculum requirements and selection of courses and to design a program of study.
3. May need to seek advising services on the Boca Raton or Davie campus (or via phone/Skype appointment) depending on their particular major.

## COLLEGE OF BUSINESS (FAU BOCA RATON)

### New Students. . .

1. Attend College orientation and complete semester registration.

## Continuing Students. . .

1. Are required to meet with an academic advisor every semester. For appointment availability, visit the College's [website](#) or call 561-297-3688.
2. Are required to meet with an advisor the semester prior to the anticipated graduation date for a graduation audit.

## COLLEGE OF BUSINESS (FAU DAVIE)

### New Students. . .

1. Attend College orientation and complete semester registration.

### Continuing Students. . .

1. Are required to meet with an academic advisor every semester. For appointment availability, visit the College's [website](#) or call 954-236-1290.
2. Are required to meet with an advisor the semester prior to the anticipated graduation date for a graduation audit.

## COLLEGE OF BUSINESS (FAU JUPITER)

### Students. . .

1. Attend college orientation.
2. Make an appointment with an academic advisor in the Academic Services Office, SR 139, 561-799-8697.
3. Are required to meet with an advisor the semester prior to the anticipated graduation date for a graduation audit.

## COLLEGE OF EDUCATION (FAU BOCA RATON)

### New Students. . .

1. Attend College orientation.
2. Break up into groups according to major.

3. Are advised of selection of courses within group.
4. Complete registration (in person first semester, online or in person thereafter).

#### Continuing Students. . .

1. Are assigned permanent advisors once complete records are on file in the Office for Academic and Student Services, ED 230.
2. May make an appointment with their advisor or in the [Office for Academic and Student Services](#) (561-297-3570) at any point in the semester for academic advisement.
3. May see an advisor for counseling at time of registration each term.
4. Are expected to see an advisor the semester prior to student teaching and graduation.

## COLLEGE OF EDUCATION (FAU DAVIE)

#### New Students. . .

1. Attend College orientation.
2. Break into groups according to major.
3. Are counseled by an advisor.
4. Complete registration in LA 203.

#### Continuing Students. . .

1. Must have approval from an advisor to make changes in scheduled courses after the registration period.
2. Are expected to see an advisor for counseling at the time of registration for each term.
3. May secure advice and assistance at any time from an advisor at College of Education, ES 202, 954-236-1028.

## COLLEGE OF EDUCATION (FAU JUPITER)

#### New Students. . .

1. Attend College orientation.
2. Receive individual or group counseling from an advisor.
3. Complete registration in SR 139 or online through [myfau.fau.edu](https://myfau.fau.edu).

## Continuing Students. . .

1. Must have approval from an advisor to make changes in scheduled courses after the registration period.
2. Are expected to see an advisor for counseling at the time of registration for each term.
3. May secure advice and assistance at any time from an advisor at College of Education, 561-799-8135.

## COLLEGE OF ENGINEERING AND COMPUTER SCIENCE

### All Students. . .

Are assigned an advisor upon admission to a program. Due to the sequential nature of all baccalaureate programs in the College of Engineering and Computer Science, students are strongly encouraged to remain in close contact with their assigned advisors when making decisions regarding their academic programs. Some departments require consultation with an advisor each semester. Click [here](#) for advisor information.

### New Students. . .

1. Attend College orientation.
2. Attend departmental orientation sessions where they meet advisors and develop individual programs of study.
3. Complete registration.
4. Should first consult with their advisor if it appears necessary to drop.

### Continuing Students. . .

1. Receive registration information and instructions in the mail.
2. Discuss progress with advisor each term, especially the term prior to graduation.
3. May self-advise and complete registration if they are following a planned program approved by their advisor. However, some departments require consultation with an advisor each semester.

## HARRIET L. WILKES HONORS COLLEGE

### All Students. . .

1. Attend the Honors College orientation. Only students who attend orientation will be assured of

early advisement.

2. During orientation, advising appointment material will be distributed to students. It will contain the advisor's name, location and time of the appointment.
3. Faculty members within the Honors College are the advisors. They will discuss with students the curriculum requirements and selection of courses and will aid in designing a program of study. If all registration holds have been cleared, students will register for classes following this appointment.
4. Students are required to consult with their advisor when making any changes to their schedule (adding/dropping classes, etc.) and also each semester during registration to discuss the schedule and register for the next term. Honors College students may register online once they meet with their advisor and their advising hold is removed. For more information, consult the College's [website](#).

## CHRISTINE E. LYNN COLLEGE OF NURSING

Students admitted to the Bachelor of Science in Nursing. . .

1. Attend College orientation when admitted to FAU.
2. Attend College of Nursing orientation when admitted to B.S.N. program.
3. Are expected to see the College academic advisor prior to the registration period each term if questions arise. Freshman Direct Admit Track and Accelerated Track advisors then register students in all the nursing courses.
4. Must see their advisor the semester prior to anticipated graduation.

Freshman Direct Admit Track information: [nursing.fau.edu/admissions/bachelor-of-science-nursing-program/freshman-direct-admit/index.php](https://nursing.fau.edu/admissions/bachelor-of-science-nursing-program/freshman-direct-admit/index.php)

Accelerated Track information: [nursing.fau.edu/admissions/bachelor-of-science-nursing-program/accelerated-bsn/index.php](https://nursing.fau.edu/admissions/bachelor-of-science-nursing-program/accelerated-bsn/index.php)

RN-B.S.N. Track Information: [nursing.fau.edu/admissions/bachelor-of-science-nursing-program/rn-to-bsn/index.php](https://nursing.fau.edu/admissions/bachelor-of-science-nursing-program/rn-to-bsn/index.php)

All admitted and continuing Nursing students. . .

1. Freshman Direct Admit Track and Accelerated Track meet with advisors at least twice a semester.
2. RN-B.S.N. Track students meet with advisor at least once a semester.

3. All B.S.N. students must see their advisor the semester prior to anticipated graduation.
4. Advisors for the Freshman Direct Admit Track and Accelerated Track register students in all nursing courses.

## CHARLES E. SCHMIDT COLLEGE OF SCIENCE (FAU BOCA RATON)

Students. . .

1. Attend College orientation in their first semester.
2. Plan a schedule of courses.
3. Complete registration (in person first semester, online thereafter).
4. Are expected to see an advisor at time of registration each term.
5. Are expected to see an advisor the semester prior to anticipated graduation.

Consult the College's [website](#) for more information.

## CHARLES E. SCHMIDT COLLEGE OF SCIENCE (FAU DAVIE)

Students. . .

1. Attend College orientation in their first semester.
2. Are expected to seek advisement from the Office of Academic Support Services in LA 421 and the faculty advisor in the student's major academic discipline.
3. Meet with an advisor to discuss curriculum requirements and selection of courses and design a program of study.
4. Fill out the registration forms and complete registration (with an advisor their first semester, online or in person thereafter).
5. Are expected to notify the Office of Academic Support Services before making changes in scheduled courses after the registration period.
6. Are expected to contact their advisor prior to registration each term.
7. May secure advice and assistance at any time from the [Office of Academic Support Services](#) and the faculty members in their major academic discipline.

## CHARLES E. SCHMIDT COLLEGE OF SCIENCE (FAU JUPITER)

Students. . .

1. Attend College orientation.
2. Make an appointment with an academic advisor in SR 139 and the faculty advisor in their major academic discipline.
3. Are expected to meet with an academic advisor during their first semester in the Charles E. Schmidt College of Science.
4. Meet with an advisor to discuss curriculum requirements and selection of courses and design a program of study.
5. Are expected to see an advisor before registration each term and the semester before anticipated graduation for a graduation audit.
6. May receive academic services through the Academic Programs Office, SR 118, 516-799-8697.

## COLLEGE OF SOCIAL WORK AND CRIMINAL JUSTICE

Students. . .

1. Must attend a University Orientation prior to their first semester, during which they will be advised on the selection of courses and directed on how to complete registration.
2. May make an appointment for advisement in Student Services at the Davie, Boca Raton or Jupiter campus any time after they have submitted their official transcripts to the Office of Undergraduate Admissions, and they have been posted. Click [here](#) for contact information.
3. Are expected to consult with an advisor during the advance and regular registration periods.
4. Are expected to meet with an academic advisor during the semester prior to the semester of anticipated graduation for a graduation audit and at any time the student needs academic advisement. Students are required to meet with an advisor at least once a year.

## COURSE LOAD

### **Undergraduates**

Full-time undergraduate students are those who are registered for 12 or more credits in any semester. A typical undergraduate course load is 15 or 16 credits with 18 credits being the maximum. Registrations exceeding this maximum must be approved in advance by the dean of the college.

The maximum undergraduate load in the summer semester is 9 credits each for short terms 2 and 3, and

18 credits for the full term 1. The maximum for the entire summer (whatever combination is taken) may not exceed 18 credits. Registrations exceeding this maximum must be approved in advance by the dean of the college.

Half-time undergraduate students are those who are registered for 6 to 11 credits. Any student registered for 5 or fewer credits is classified as less than half-time. Students who drop courses during a semester, reducing their registration below 12 credits, will be classified as outlined above.

## **Graduates**

For fall and spring semesters: Graduate students registered for 9 or more credits are considered full-time, registrations for 7 credits are considered 3/4-time and registrations for 4.5 credits are considered half-time.

For the summer semester: Graduate students registered for 6 credits are considered full-time, registrations for 5 credits are considered 3/4-time and registrations for 3 credits are considered half-time.

Registrations exceeding 15 credits in any semester must be approved in advance by the Graduate College. This procedure is accomplished by completing a Form 10-Request to Waive a University Requirement, available in any college dean's office. Graduate students who drop courses and reduce their enrollment below the full-time minimums will be regarded as part-time students. See below for exceptions: Graduate Student Enrollment Petitions.

Note: Students on F-1 visas, students on graduate assistantships, students living in on-campus housing and student athletes are required to register for a full-time course load.

## **COURSE SCHEDULE**

The course schedule is available at [www.fau.edu/registrar/courses/index.php](http://www.fau.edu/registrar/courses/index.php) (select searchable schedule). The University provides the current term's schedule and preliminary schedules for future terms up to 18 months in advance to allow for student planning. The schedule includes, but is not limited to, details on course sections, meeting times and room assignments. It is subject to change without notice.

### **Determining a Semester Schedule**

Prior to selecting courses for each semester, undergraduate and graduate students should:

1. Read the [Degree Requirements section](#) in this University Catalog for the requirements pertaining to the student's degree.
2. Check the prerequisites and course descriptions of the relevant courses in the Course Description sections within each college section in this catalog.
3. See the course schedule ([myfau.fau.edu](http://myfau.fau.edu)) to determine when and where the relevant courses are offered.
4. Review the Online Degree Audit information found at [myfau.fau.edu](http://myfau.fau.edu) in the Student Services tab.
5. See the subsection Course Load in this section for maximum course-load limits.
6. See University Forgiveness Policy in the [Academic Policies and Regulations section](#) if intending to repeat a course.
7. See an academic advisor
8. **Additional recommendations for undergraduates:** See the Undergraduate Enrollment in Graduate Courses subsection in the Academic Policies and Regulations section of this catalog if interested in enrolling in a graduate-level (5000-, 6000-level) course.
9. See the subsection [Transient Students](#) in this section if considering taking a course elsewhere.

### Waitlist Program

FAU's new waitlist program, accessible through [MyFAU](#), allows students to place themselves on a waitlist for classes that have reached the maximum enrollment limit. Students are notified by email if a spot opens in the class and are given a pre-determined amount of time to register. Should that time expire, the open seat is then made available to the next student on the list. Courses are selected for waitlist by the department offering the course. Therefore, waitlist courses may vary from semester to semester.

## DUAL ENROLLMENT FOR QUALIFIED HIGH SCHOOL STUDENTS

The High School Dual Enrollment Program allows qualified students in 6th through 12th grades to earn college credit toward a postsecondary degree or certificate at a Florida public institution that will also count as credit toward a high school diploma. For additional information, visit the Office of the Registrar's [website](#) or call 561-297-2009.

## RECLASSIFICATION TO FLORIDA RESIDENT STATUS FOR TUITION PURPOSES

Enrolled students who are classified as non-Florida residents for tuition purposes and who, after reading the determination of resident status for tuition purposes in [Florida Statute 1009.21](#), believe that they may qualify for in-state tuition, may submit a [Request for Residency Reclassification form](#), available online or from the Office of the Registrar. Forms must be submitted to the Registrar by the deadline published in the [Academic Calendar](#). Supporting documentation is required to substantiate residency for tuition purposes. Merely submitting documentation for Florida residency classification does not guarantee Florida residency status.

To appeal a residency determination, a student must submit a Residency Classification Appeal form to the Residency Appeals Committee through the Office of the Registrar. This form must be submitted by the last day of the current term in which the student intends to be reclassified.

The Residency Appeals Committee decision constitutes the final decision of Florida Atlantic University. A student may seek judicial review of this final University decision under [Section 120.68, Florida Statutes](#). This may be done by filing within thirty (30) days of the date of this decision: (i) a Notice of Appeal with the Agency Clerk of Florida Atlantic University; and (ii) a copy of the Notice of Appeal with the Clerk of the Fourth District Court of Appeal or the Court of Appeal for the district in which the student resides, together with any filing fees that may be prescribed by law.

## REGISTRATION FOR AUDITORS

Auditors are those individuals wishing to attend classes without receiving credit. Auditors who are FAU degree-seeking students need to fill out the [Request for Audit](#) form each semester that they register to audit a course. Students should check with their college to determine if there are limits on auditing courses. Students cannot change to audit status after the end of the drop/add period. Auditors who are not degree-seeking at FAU, must fill out the [Non-Degree Enrollment application](#) and the [Request for Audit](#) form.

All students (whether degree-seeking or non-degree-seeking) wishing to audit a course must also obtain approval from the instructor on the Request for Audit form (signature of instructor and college stamp are required). No college credit is given for audited courses. Audited courses appear on the student's transcript with a notation of AU. Regular tuition and fees apply. To view our full cost of attendance information page, visit <https://www.fau.edu/finaid/other/cost-of-attendance/>. Registration for auditors is conducted during the drop/add registration period. See the [Academic Calendar](#) for specific dates. Registration for auditors is on a space-available basis and, because of limitations in instructional

resources, the enrollment of auditors may be restricted in some courses.

### **60+ Audit Program**

The 60+ Audit Program allows Florida residents who are 60 years of age or older to audit, tuition-free (other registration fees still apply), courses appearing in the 60+ schedule of courses. A Florida resident is defined as an individual who has resided in the state for 12 consecutive months, prior to the beginning of classes, and who has established legal ties in Florida (see [Florida Statute 1009.21](#)).

The 60+ Audit Program's requirements and courses are posted on the Registrar's Office website for spring term and for summer/fall terms. The website provides a detailed explanation of the documents required to register for this program. To view details of the 60+ Audit Program, click [here](#). For additional information, call 561-297-3050.

## **REGISTRATION FOR NON-DEGREE-SEEKING STUDENTS**

Non-degree-seeking students are those who do not wish to enter a degree program at FAU but would like to take courses at FAU for credit, perhaps with the intention of transferring those credits to another institution or for their own enrichment. Undergraduate non-degree applicants must have earned a minimum of a high school diploma in order to be admitted in a non-degree status. Graduate non-degree applicants must have earned a minimum of a bachelor's degree in order to be admitted in a non-degree status. Non-degree-seeking students must process the [Non-Degree Enrollment application](#), available online or at the Office of the Registrar. A \$30 non-refundable and non-transferable fee must accompany the Non-Degree Enrollment application. Florida residency documentation and verification of compliance with the State of Florida's Measles/Rubella Immunization Policy also must be provided at the time of registration. Students who do not supply a completed [Non-Degree Residency application](#) along with supporting documentation will be classified for tuition purposes as a non-Florida resident.

Consult the [Academic Calendar](#) for registration dates. Registration of non-degree-seeking students is on a space-available basis and, because of limitations in instructional resources, the enrollment of non-degree-seeking students may be restricted in some courses.

Non-degree-seeking students are subject to the same academic standards and pay the same fees as degree-seeking students. Non-degree-seeking students are subject to all drop/add, withdrawal, and payment deadlines published in the [Academic Calendar](#). (Refer to Drop/Add and Withdrawal in the [Academic Policies and Regulations section](#) as well.) It is the student's responsibility to ensure that

course prerequisites and any other course qualifications have been met prior to registering. Check with the department offering the course(s) for prerequisites.

Non-degree-seeking students who decide to pursue a degree must change their status to degree-seeking by applying for admission to the University. An undergraduate or graduate admission application and all credentials necessary for admission to degree status must be submitted by the application deadline for the semester. All requirements for admission to degree programs in effect at that time must be met. Refer to the [Admissions section](#) for specific information.

Credits earned as a non-degree-seeking student will appear on an FAU transcript but are not intended for application to FAU degree programs. However, up to one-half of degree requirements earned in non-degree status at FAU may be applied to an undergraduate degree program, but only upon degree-seeking admission to the University and approval by the college in which the student's program is housed. For example, students who do not present transfer credits could apply up to 60 non-degree credits earned at FAU toward their 120-credit degree program. Students with transfer credits, for example 30 credits, may apply up to 45 non-degree credits earned at FAU toward their 120-credit degree program (120 credits minus 30 transfer credits = 90 credits remaining and  $1/2$  of 90 = 45 credits).

For graduate students, credits earned as a non-degree-seeking student will appear on an FAU transcript but are not intended for application to an FAU graduate program. Up to one-third of degree requirements earned in non-degree status may be applied to a degree program at FAU, but only upon degree-seeking admission to the University and approval by the college in which the student's program is housed. However, no college may count such credit in excess of one-third of the credits toward a graduate degree without an approved Form 10-Request to Waive a University Requirement.

Non-degree students who have not enrolled at FAU for three or more consecutive semesters must submit a new Non-Degree Enrollment application, a new Non-Degree Residency application and supporting documentation as noted above accompanied by a \$30 non-refundable, non-transferable application fee.

**Note:** Students in a non-degree-seeking status are not eligible for financial aid. Students who have been denied admission to FAU as degree-seeking undergraduates must wait three semesters before they are eligible to register as non-degree-seeking students.

**Note:** International students on J-1 visas may be admitted as non-degree-seeking students after

submission and processing of a non-degree application if they are coming to FAU as part of a reciprocal student exchange under an operative exchange agreement between FAU and their home institution, or if they are a sponsored student. Students coming on an exchange program must work with the Office of International Programs to meet all requirements of the exchange and to obtain information on how to apply as a non-degree-seeking student. Sponsored students seeking access as non-degree-seeking must work with their desired host department before applying for non-degree-student status. The J-1 visa will be issued by FAU for the specific purpose and period of study at FAU once the student is approved for the exchange or for non-degree status as a sponsored student.

## RETURNING STUDENTS

If you are a former degree-seeking FAU student, but not currently enrolled, your eligibility to return will depend on several factors. If you have not attended for at least three consecutive semesters (ex. fall, spring and summer semesters), you must re-apply for admission. Undergraduate students, click [here](#). Graduate students, click [here](#).

Degree-seeking students returning after an absence of more than a year may also be subject to the following:

1. If the last enrollment was more than one year (three consecutive semesters) ago, the student must file a new admissions application with the appropriate documents and submit a new application fee of \$30.
2. Any re-admission applicants who feel they qualify as Florida Residents for tuition purposes must complete the Residency Classification portion of their new application. Failure to provide all relevant information and supporting documents could result in a Non-Florida/out-of-state status, regardless of residency status since last attending FAU.
3. The student must be in good standing (eligible to return) at FAU and at any institution attended since last period of enrollment at FAU.
4. If the student has attended another institution since the last period of enrollment at FAU, official transcripts must be forwarded by the registrar of the other institution(s) directly to the FAU Office of Admissions for undergraduate students and to the Graduate College for graduate students.
5. Returning students under the age of 40 must submit proof of conformity to the Measles Immunization Policy of the State of Florida if they have not already done so. Check with [Student Health Services](#).
6. Students who have not enrolled for three consecutive semesters or more will not be allowed to enroll for courses without being fully admitted by either the Office of Admissions or the Graduate

College. Students whose admission has been denied must contact the relevant admissions office for re-evaluation of their status and must be admitted before they can return.

7. Students who re-apply to a program are not guaranteed re-admission to the program in which they were previously admitted. Due to possible changes in admissions standards and capacity at any given time, students may be denied admission even if their academic records remained the same or improved since their last enrollment.
8. Students will be required to follow the University Catalog guidelines in place at the time of re-admission.
9. Students who are returning after more than three consecutive semesters away from FAU must go through orientation again and pay the orientation fee.

If you are a non-degree-seeking student and you have attended within the last 12 months, go to [myfau.fau.edu](http://myfau.fau.edu) to begin the registration process. If it has been more than 12 months or three consecutive semesters (ex., fall, spring and summer semesters), you must file a [Non-Degree Residency Classification form](#), available online or at the Office of the Registrar.

## TRANSIENT COURSEWORK

Upon matriculation at Florida Atlantic University, undergraduate students are expected to take courses required for their degree in residence at FAU. (See the following section for exceptions for students matriculating with an A.A. degree from an FCS institution.) Students wishing to take courses elsewhere must follow the process found on the [FAU Transient Student website](#) and obtain approval in advance.

Also, students should be aware of the following requirements:

1. The last 30 upper-division credits must be taken at FAU;
2. At least 75 percent of the upper-division courses in the major must be taken at FAU. Some majors may require more than 75 percent. Consult the degree requirements section of the major for details.

Students who find it necessary to take an upper-division course elsewhere within their last 30 credits of enrollment may petition to do so via the Academic Petitions Process. See the Academic Petitions Process and Academic Appeals subsections in the [Academic Policies and Regulations section](#) of this catalog. This petition must be approved before students can submit their transient request at [www.fau.edu/transient](http://www.fau.edu/transient).

In order for a transient form to be approved, the student must be in good standing at FAU and eligible

to register for the term of the transient form. If the transient term is the first term of the student's admission, the student must also be registered for courses at FAU.

For information on financial aid for transient coursework, visit [www.fau.edu/finaid/getting-started/special-programs.php](http://www.fau.edu/finaid/getting-started/special-programs.php)

### **Transient Coursework for Students with an Associate in Arts from a Florida College System (FCS) Institution**

Students matriculating at FAU with an A.A. degree from an FCS institution may continue to earn credits at the FCS institution, provided that the following is met:

1. The course is the same prefix and course number as a course listed by FAU as required for the degree or as a course prerequisite for a required course for the degree.
2. Students must meet the same minimum grade requirements as the course grade minimums required of native students.
3. The earning of such credit *does not conflict* with the FAU's residency requirements in final semesters.

### **Transfer to Another Institution**

A student who plans to transfer from FAU to another institution should, at the earliest possible date, request that an official FAU transcript be forwarded by the Office of the Registrar to the new institution (see Transcripts within this section). Evaluation of transcripts is the responsibility of the new institution.

## **STUDENT RECORDS**

Student records submitted to the University become the property of the University and cannot be returned to the student or released to a third party. These records will be used by officials of the University in any manner deemed appropriate in order to guide students toward their academic objectives.

It is the policy of the University to include in the academic records of undergraduate students all appropriate college-level work attempted or completed at another institution. In the case of second baccalaureate and graduate students, only work attempted or completed at another institution after receipt of the baccalaureate degree and approved by a college representative for use in the FAU degree

program is included in the academic record.

### **Access to Student Records**

Florida Atlantic University regulations, federal law and state law guarantee certain rights pertaining to University records and personally identifiable information on file with the University. These rights may be exercised by any student or prior student. The parent or guardian of a student may exercise such rights when the student is under 18 years of age and/or a dependent under the Internal Revenue Service definition of dependent.

Additional information regarding access, rights and restrictions related to student records may be found at:

1. [University Regulation 4.008](#);
2. [Florida Statutes Chapter 1002](#);
3. [The Family Educational Rights and Privacy Act \("FERPA"\)](#) (20 U.S.C. § 1232g; 34 CFR Part 99);
4. The Office of the Registrar.

### **Hold on Records**

Student records may be placed in a hold status because of financial or other obligations to the University. While the student's records are on hold, registration will not be permitted nor will official transcripts be released. Records will be held until the obligation is cleared to the satisfaction of the office or department issuing the hold.

### **Transcripts**

Official transcripts of a student's FAU academic record are available from the Office of the Registrar. Official transcript requests may be made through [myfau.fau.edu](https://myfau.fau.edu). There is a \$10 charge per transcript. Official transcripts will not be issued for students with any financial obligations to the University. Please allow two business days for processing.

Unofficial transcripts are also available at [myfau.fau.edu](https://myfau.fau.edu).

## **STATISTICS (STUDENTS' RIGHT TO KNOW)**

For FAU graduation rates and other student statistics, visit the Office of Institutional Effectiveness and Analysis [website](#).

FAU's Clery Act Report, Disclosure of Campus Security Policy and Campus Crime Statistics, is available on the [FAU Police website](#). Paper copies may be obtained at the Police Department. The Clery Act also includes a Fire Safety Report.

## DIVISION OF STUDENT AFFAIRS

The Division of Student Affairs is responsible for matters of general student welfare and student activities. It is the leader in providing comprehensive and integrated campus life programs and services with a vision to cultivate a student-centered environment that contributes to students becoming socially responsible global citizens with an enduring connection to the University.

The Vice President for Student Affairs coordinates the overall operation, which includes the following departments: Campus Recreation, Career Center, Counseling and Psychological Services, Dean of Students Office, Housing and Residential Life, International Services, Military and Veterans Affairs, New Student Transitions and Family Engagement, Owls Care Health Promotion, Student Accessibility Services, Student Government, Student Health Services, Student Involvement, Student Media, Student Union, United Campus Ministries, Upward Bound, and Weppner Center for LEAD and Service Learning.

### **Vice President's Office**

The Vice President is the chief administrative officer for Student Affairs throughout the University. Student success is at the heart of every program and resource this office offers. All of its programs, services and facilities are built around students, with the goal of helping them become active participants on campus and beyond. For additional information or help, visit the Student Affairs [website](#).

### **Dean of Students Office**

The Dean of Students Office includes the Office of Student Conduct and Conflict Resolution, Victim Services and student care/case management services. The office strives to facilitate inclusive, civil, productive, value-based participation in the FAU community through advocacy services and restorative justice practices. The office oversees the Exceptional Circumstances Withdrawal (ECW) process and facilitates both the Beyond Food Program and the homeless verification process. Through this office, a student can receive assistance and/or a referral when an extenuating circumstance prevents them from succeeding academically.

### **Student Care/Case Management Services**

The Student Care/Case Management team is housed in the Dean of Students Office and provides advocacy and coordination of resources (both on campus and in the surrounding community) to students in need. The team assists students with navigating and understanding the services, processes and policies of the University. The student care/case managers work with the exceptional circumstance withdrawal process, work to help homeless and foster care students succeed academically, offer advice to students dealing with academic issues in the classroom, serve as contact for the Beyond Food program, and function as the starting point for students dealing with a host of other issues. Feel free to arrange an appointment by calling 561-297-3542.

Should students need help concerning personal, academic or social problems, the Dean of Students Office is ready to provide assistance. For information, call 561-297-3542 or visit [www.fau.edu/dean](http://www.fau.edu/dean). While the Dean of Students Office is physically located at the Boca Raton campus, staff members are available to travel to the Broward and Northern campuses to meet with students as needed.

### **Victim Services**

Victim Services is located in FAU's Wimberly Library (LY-3). The Victim Services staff is available to assist any student who may identify as a victim, whether the incident occurred recently, in the past, on or off campus. The staff is trained to provide students with information about appropriate resources and procedures.

## **BROWARD AND NORTHERN CAMPUSES STUDENT AFFAIRS**

Campus Life on the Broward and Northern campuses enhances the overall educational experiences of students by providing comprehensive and integrated campus life events and programs, services and facilities that challenge and support Florida Atlantic students through the promotion of academic success and student development. Relevant and desirable outcomes also relate to the goals of career readiness, leadership, wellness and life skills. Campus Life for the Davie, Fort Lauderdale and Dania Beach campuses is coordinated through the [Student Affairs offices](#) on the Davie campus. Campus Life for the northern campuses is coordinated through the [Student Affairs offices](#) on the John D. MacArthur Campus (Jupiter).

## **ACADEMIC COACHING AND CAREER ENHANCEMENT FOR STUDENT SUCCESS (ACCESS)**

The ACCESS Program and coaching center is located on the Boca Raton and Jupiter campuses as a

branch of [University Advising Services \(UAS\)](#) and provides selected students with academic coaching/advising, tutoring and major/career counseling. Services include regular meetings with an ACCESS academic coach/advisor with a focus on academic skill development. Students can expect to review progress in their courses; participation in time-management, study skills, test taking and special topics workshops conducted by ACCESS academic coaches/advisors; connection to academic support such as tutoring and supplemental instruction; participation in peer academic coaching; and enrollment in SLS 1301: Career and Life Planning, designed for students with major and career indecision. For additional information visit: [www.fau.edu/access](http://www.fau.edu/access)

## OFFICE OF ACADEMIC SUCCESS INITIATIVES

The Office of Academic Success Initiatives (ASI) coordinates a number of first-year experience programs aimed at easing a student's transition to Florida Atlantic and supporting them in defining and reaching their educational goals. FAU's signature online student success course, iSucceed, is designed to be taken by students in their first semester of enrollment. Each fall semester, first-year students are also eligible to enroll in a First-Year Interest Group (FIG) that connects them with faculty, advisors and other students in their college. Enrollment in each FIG is capped at 25 students to encourage the development of a community of students who share common interests. Students enrolled in a FIG are also paired with a Peer Academic Coach – an upper-class student who has been successful at FAU and offers informal guidance and advice.

ASI is also responsible for the assessment of FAU's general education curriculum, and supports the development of existing and new courses in that program through consultation and training. The assessment work extends through collaborations across the University to use student outcome and other data to inform practice and recommend improvements. For more information, visit this [website](#).

## ATHLETICS

Florida Atlantic University Athletics comprises 19 intercollegiate teams involving more than 500 student-athletes who compete in baseball, basketball, beach volleyball, cross country, football, golf, soccer, softball, spirit, swimming and diving, tennis, track and field, and volleyball.

For the latest news on FAU Athletics, follow the Owls at [www.fausports.com](http://www.fausports.com) or @fauathletics on Facebook, X/Twitter and Instagram.

# BUSINESS SERVICES

This office offers many services to the University community, including those below. For complete information, visit its [website](#).

## **Banking Services**

The Boca Raton campus has five ATMs located in the following locations: the lobby of the Student Union, the lobby of the Administration Building, the Breezeway Food Court, the lobby of the University Village Apartments, and the FAU football stadium. The Davie and Jupiter campuses each have an ATM in their student lounges.

## **Bookstore**

The University Bookstore on the Boca Raton campus is located on the Breezeway. For more information, call 561-297-3720. In Broward, call 954-236-1950. In Jupiter, call 561-799-8538.

## **Campus Copy**

Campus Copy is a full- and self-service copy center. It provides self-service coin- and card-operated copiers and offers complete, full-service copying, binding and finishing services. Color copies, transparencies, spiral binding, two computer work stations and a cash-to-card machine are just a few of the other services available. For more information, call 561-297-3508.

## **Copy Services**

Copy Services offers self-service coin- and card-operated convenience copiers throughout the campus. In addition to coin- and card-operated copiers, Copy Services provides copiers to meet departmental needs, billed by either auditron codes or meter readings.

## **Food Services**

FAU offers a dining program that includes residential dining, catering and popular-branded concepts. The well-balanced food services program creates the ideal campus dining experience to meet the needs of the diverse University community. Venues on the Boca Raton campus include Atlantic Dining Hall, the Breezeway Food Court, Dunkin' Donuts, the FAU Club, Outtakes convenience stores, Starbucks, and Subway. Venues on FAU's partner campuses are also available. Visit the Dining Services [website](#) for more information.

## **Owl Card Center**

Business Services administers the issuance of student Owl Cards. The Owl Card is the official picture identification and debit card for Florida Atlantic University students. The Owl Card is required of all

students and is available to faculty and staff. An Owl Card may be obtained by presenting an official, government-issued picture ID (driver's license, passport, military ID), a current tuition payment receipt, or proof of financial aid, scholarship or loan (award letter). The Owl Card is also the student's library card, meal plan card, Owl Bucks and Flex Bucks card and building access card for certain campus residence halls, computer labs and classrooms.

The Owl Card Center (561-297-2700) is located on the Boca Raton campus. Additional Owl Card Center services include full fax service, passport photos, Palm Tran Bus passes, visitor cards and laminating service.

For Owl Card information on the Davie campus, 954-236-1549; Fort Lauderdale campus, 954-762-5353; Jupiter campus, 561-799-8690.

### ***Owl Card Off-Line Debit Program***

The Owl Card Off-Line Debit Program utilizes a student's University ID and the most current technology available in off-line debit card systems. Card holders may put money on their cards in either the Owl Card Center or in cash-to-card machines located throughout campus. Owl Cards may then be used to pay for purchases at Campus Copy, computer labs (pay for print), select vending machines and washers and dryers in the residence halls.

### ***Owl Card Online Program (Owl Bucks)***

Florida Atlantic University's online declining balance account, better known as Owl Bucks, is a convenient, prepaid account designed for students, faculty and staff. Owl Bucks allows account holders to make purchases everywhere that Owl Bucks are accepted.

Anyone with an Owl Card may open an Owl Bucks account. Owl Bucks give spending flexibility at participating campus locations, including Atlantic Dining Hall, Breezeway Food Court, Outtakes, Starbucks and FAU Bookstore.

### **Palm Tran Bus Passes**

Business Services has a relationship with the Board of County Commissioners for the sale of Palm Tran Bus Passes. They are available for purchase in the Owl Card Center.

Palm Tran: [www.palmtran.org](http://www.palmtran.org)

Tri-Rail Information: [www.tri-rail.com](http://www.tri-rail.com)

### **Student Purchases with Office Depot and Corporate Express**

Business Services manages the contract with Office Depot and Corporate Express for University purchases. The contract and contract pricing are also extended to students. Students can go online and place orders with Office Depot and Corporate Express at discounted prices. Orders are delivered to the Business Services Office and can be picked up at the Owl Card Center. Most orders are delivered the next day. To place an order or to obtain information, visit [Business Services](#).

### **Administrative Offices - Business Services**

For questions, comments, or suggestions, contact 561-297-2041 or [bizservices@fau.edu](mailto:bizservices@fau.edu). The Office of Business Services is located on the Boca Raton campus in Student Services, Building 8, Suite 124.

## CAMPUS RECREATION

Campus Recreation creates movement and engagement opportunities to enhance the social and physical well-being of the FAU Community. All facilities and programs are available to FAU students with a valid Owl Card and also to Campus Recreation members. For more information about Campus Recreation facilities, programs and services, visit its [website](#) or call 561-297-4512.

### Boca Raton Campus Recreation Facilities and Programs

#### **Recreation and Fitness Center**

The FAU Recreation and Fitness Center is a state-of-the-art facility where students, faculty, staff and alumni can meet, workout, relax and enjoy being part of FAU campus life. Located on the Boca Raton campus at the northeast entrance of the Breezeway along University Drive, the FAU Recreation and Fitness Center is a modern, 77,000-square-foot facility offering:

- A 13,000-square-foot fitness center with more than 60 pieces of cardio equipment, two circuit-training units and a free-weight area;
- Two multipurpose rooms designed for group fitness and sport club practices;
- Cycling studio;
- Three multipurpose courts for basketball, volleyball, indoor soccer and badminton;
- An outdoor leisure and lap pool with zero-depth entry, three 25-yard lap lanes and outdoor lounge;
- Men's and women's health-club-style locker rooms;
- Social corridor with group seating, activity viewing, WiFi and more.

#### **Intramural Sports**

The Intramural Sports program provides student s and Rec Members an opportunity to participate in a

variety of competitive and recreational sports leagues, tournaments and special events. Create or join a team and check the [Campus Recreation website](#) for season start dates and registration information. Available sports vary but may include basketball, flag football, soccer, softball and volleyball.

### **Club Sports**

The Club Sports program promotes student participation in a variety of physical and athletic activities. Nearly 30 student organizations are considered sports clubs. Check the [Campus Recreation website](#) for current clubs, president contact information and practice schedules. Sport clubs may be highly competitive, such as surf and rugby, or instructional, such as Tae Kwon Do.

### **Group Fitness**

The Group Fitness program offers a variety of fitness class options to meet different schedules and styles. The motivating and educated instructors strive to provide safe and effective workouts to assist all participants in reaching their fitness goals. Typical classes include yoga, Pilates, kickboxing, strength, cycling and more. For more information, visit the [Campus Recreation website](#).

### **Personal Training**

Personal trainers act as expert guides and consultants who assist clients in reaching individually selected fitness goals. This is accomplished by teaching the client how to perform exercises correctly and effectively through individual program design and one-on-one training. For package options and pricing, visit the [Campus Recreation website](#).

### **Outdoor Adventures**

Outdoor Adventures serves students, faculty, staff and community members. Outdoor Adventures comprises gear rentals, adventure trips, challenge course programming, a climbing center and freshmen outdoor programs. The program is committed to offering adventure-based experiential education opportunities that promote personal growth, leadership development and respect for others and the natural world. View trip information on the [Campus Recreation website](#).

## **ADDITIONAL BOCA RATON CAMPUS RECREATION FACILITIES**

**Track and Field Complex:** Includes a synthetic turf field for student recreation use at designated times and an eight-lane performance track.

**Henderson Fields Complex:** The 6.5-acre home of Intramural Sports and Club Sports, the Henderson fields may be reserved by student organizations for special functions.

**Outdoor Basketball and Tennis Courts:** Six lighted tennis courts and four lighted basketball courts available for open recreation.

### **Challenge Course and Climbing Center**

FAU is home to the most comprehensive Challenge Course in South Florida. The course is located just north of the track and field complex and can be easily recognized by the 40-foot tower. With more than 30 low and high elements and numerous portables, the course can be customized to provide an experiential-based program for local organizations. Both FAU and the surrounding communities may book programming at the course. For more information, visit the [Challenge Course page](#) on the Campus Recreation website.

## **DAVIE CAMPUS AND JUPITER CAMPUS RECREATION**

The Student Wellness Center is located on the west side of the Davie campus. The center is a 3,400 square-foot, fully functional workout facility equipped with state-of-the-art cardio and strength equipment, showers and lockers. It also offers exercise programs, fitness evaluations, group fitness classes and fitness resources. The department provides opportunities for students to engage in recreational activities off campus, including waterparks, sporting events and various outdoor activities. All currently enrolled FAU students have a free membership. Memberships for faculty, staff, family and alumni are also available. For more information about recreation services on the Broward campuses, contact 954-236-1018, [browardwellness@fau.edu](mailto:browardwellness@fau.edu) or visit [www.fau.edu/campusrec/broward](http://www.fau.edu/campusrec/broward).

Campus Recreation on the Jupiter campus includes open recreation, intramural sports, outdoor programming and a limited number of gym memberships available at a local gym. To connect with Campus Recreation on the Jupiter campus, visit [Jupiter Campus Recreation](#) or call 561-799- 8696.

## **CAREER CENTER**

The nationally award-winning Career Center supports Florida Atlantic students, alumni and employer partners in building meaningful careers and a successful future in the global community. The Florida Atlantic Career Center is a comprehensive collection of credentialed professionals who are committed to supporting FAU students and alumni in developing and improving essential career skills, experiences and connections. The Career Center has been recognized state-wide and nationally and has helped

Florida Atlantic become one of the most career-centric universities in the nation.

The Career Center is available to meet with students at the Boca Raton, Davie and Jupiter campuses both in person and virtually. To connect with the Career Center:

Phone: 561-297-3533

Email: [career@fau.edu](mailto:career@fau.edu)

Instagram: @FAUCareerCenter

### **Career Coaching, Education and College Liaisons**

The Career Coaching and Education team provides one-on-one, evidence-based comprehensive services to help all students (first year – Ph.D. and alumni) build toward their futures, such as deciding on a major or career, résumé building, LinkedIn development, interviewing practice and assistance finding jobs and internships. The Center helps all students develop holistic career readiness skills and understand career pathways and the top career skills employers seek.

The College Liaison team involves individuals who provide personalized career services to colleges throughout the University. College liaisons build relationships with faculty, staff, employers, students, and community members to produce strong career ecosystems for professional success.

### **Kick Off Your Future**

Kick Off Your Future Career Readiness Module is a student's introduction to the career planning process, helping students build toward their future by understanding career pathways and salary potential. This module provides many benefits, including:

- An understanding of personal values, interests and skills and how these relate to academic majors and careers.
- An understanding of academic and career readiness skills requirements.
- An increased awareness of employment opportunities and wage prospects for each major.
- An understanding of all the critical career readiness resources at the Career Center.

### **Experiential Learning and Internships**

The Experiential Learning and Internships team specializes in securing internship and experiential learning opportunities for students to acquire industry experience, while equipping students with career competencies that will increase their employability skills upon graduation.

### ***Professional Internship (IDS 3949) 0-4 credits***

*Prerequisites: Students must have completed one semester at Florida Atlantic as evidenced by having an FAU GPA on record and permission of instructor*

This course offers students the opportunity to gain “real-world” exposure and supervised experience related to their major, specific field of study or career interests. Students integrate theories learned in the classroom with experiential activities acquired through direct involvement in on/off campus internship opportunities. Students develop marketable skills in preparation for future employment or graduate school studies. *Grading: S/U*

### ***Owls-on-the-Job Shadow Program***

The Owls-on-the-Job Shadow Program offers students a “first look” into an organization, to see what a day-in-the-life-of a career looks like. This valuable experience can range from half a day to 1 week. This program takes place during Florida Atlantic’s winter break and spring semester. For more information on the Owls-on-the-Job Shadow Program, contact an Internship Specialist at [intern@fau.edu](mailto:intern@fau.edu).

### ***Micro-Internships***

Micro-internships are paid, short-term (5-to-40 hours), project-based, professional assignments in a variety of functions and industries. When launching a career, micro-internships provide a tremendous opportunity. Not only can students and recent graduates explore different career paths and work on interesting assignments, they can also demonstrate their abilities to potential employers while building their professional portfolio and network. Students and recent graduates can create an account [here](#).

### **Employer & Community Engagement and Recruitment Services**

The Employer Engagement team works with employers to create individualized recruitment plans for recruiting Florida Atlantic talent for internship and career opportunities. The Employer Engagement team hosts a variety of on- and off-campus recruitment activities, including career fairs, networking events, on-campus interviews, virtual information sessions, and more. The team also specializes in educating employers on best practices for recruiting and hiring Florida Atlantic students and alumni.

### **Handshake**

Handshake is the #1-way college students find jobs. Handshake is the online job portal that allows students to search for full- and part-time job opportunities and find on- and off-campus jobs and internships. It allows students to register for career fairs and events and research companies that are hiring. Students should schedule an appointment on Handshake to meet with a career coach.

All newly admitted and current Florida Atlantic students and alumni have access to Handshake. Click [here](#) to access the account login.

## Premium Resources

**LinkedIn Learning:** LinkedIn Learning is a leading online learning platform assisting active FAU students, faculty and staff to discover and develop skills through an online library of high-quality, expert-led videos and courses. It has unique insights and provides a more personalized learning experience with instructional content relevant to an individual's professional interests and goals.

Courses may be accessed at any time from mobile devices and computers. Available for both iOS and Android. Click [here](https://www.fau.edu/linkedin-learning/) for details. <https://www.fau.edu/linkedin-learning/>

**Major KnOWLedge:** This is an early exploration tool that helps students identify personal interests and their relationships to career pathways. Students complete a career assessment that matches their results to majors at Florida Atlantic and occupations based on interests.

**Iris Photobooth:** Florida Atlantic students, alumni and faculty have access to professional headshots that may be used on platforms such as LinkedIn and Handshake. The Self-Service Iris Booth:

- Uses high-quality studio lighting and photography equipment.
- Allows users to approve or retake photos and displays posing tips.
- Allows users to crop photos, touch up blemishes, whiten teeth or apply filters.
- Instantly delivers digital photos via email.

**Big Interview:** Big Interview teaches communication skills, self-confidence, negotiation and other vital workplace-readiness competencies. Video interviewing is the way of the future. This feature helps ensure students are prepared to thrive in the workforce by offering training on virtual interviews with instant AI-generated feedback.

**Jobscan:** This is a résumé software tool that analyzes how a résumé would perform in an Applicant Tracking System (ATS). Jobscan's optimization technology is based on the same search and ranking algorithms used by top ATS and provides students with suggestions for formatting and key qualification and skill matching. The premium Jobscan account allow students to perform unlimited scans of their résumé to see how it performs in various Applicant Tracking Systems. Jobscan's résumé builder can also assist in creating and formatting a new document.

## CENTER FOR LEARNING AND STUDENT SUCCESS (CLASS)

As part of the Center for Teaching and Learning, the [Center for Learning And Student Success](#)

(CLASS) is available to assist all undergraduate students throughout their academic journey. CLASS cultivates student success and academic excellence by developing academic support and engagement programs that guide students to a future of lifelong learning.

CLASS, under the Division of Undergraduate Studies, coordinates:

1. The Science Learning Center: FAU's newest academic support center is located in the Schmidt Family Complex next to the FAU Stadium. This 4,500 square foot interactive center offers small group tutoring for students in both major based and general education science courses from chemistry and organic chemistry, biology and psychology to physics and anatomy. Microscopes, anatomy models, chemical models, and virtual reality equipment further enhance the learning experience. Appointments are available at [www.fau.edu/tutoring](http://www.fau.edu/tutoring).
2. Supplemental Instruction (SI): A series of weekly study sessions for students taking historically difficult courses from accounting and Spanish to chemistry and physics. SI is open to all students who want to improve their understanding of course material and improve their grades. Attendance is voluntary and FREE. SI is a chance to get together with people in the class to compare notes, to discuss important concepts, to develop strategies for studying and learning the subject and to test themselves before the professor does. At each SI session, students are guided through course material by an SI leader who has previously taken the course and earned an "A."
3. Tutoring programs: CLASS Tutoring Services provides free group tutoring by peer tutors in content-area courses. Peer tutors help improve performance in a difficult course by modeling effective study techniques and breaking down difficult concepts. Peer tutors are successful students who have earned at least an "A-" in the courses they tutor, have been recommended by their professors and have been trained in tutoring techniques through the tutor training program. Their goal is to help students review course content through the use of interactive learning strategies. Students can schedule appointments, but pending availability drop-in sessions are offered each week for many courses. CLASS also offers students the opportunity to become volunteer tutors through its Owl-to-Owl (OtO) Volunteer Tutoring program. Through this program, OtO tutors build upon their leadership skills, receive training and gain experience providing their peers with academic support, while earning volunteer hours.
4. eLearning and eTutoring: The eLearning academic support services provides students with resources to facilitate a successful online learning experience. The focus is to assist students with the integration of technology into fully online courses. CLASS offers extensive online tutoring for a variety of courses to help support students in both fully online and in person classes.
5. Civic Literacy Workshops: In order to earn a degree from FAU, students must demonstrate proficiency in Civic Literacy. This can be completed in various ways, including completion of

courses (AMH 2020 or POS 2041), CLEP testing, AP testing, or a Civic Literacy exam. CLASS offers workshops to help students learn the material so they can pass the Civic Literacy exam. For more information about the workshops, visit the [CLASS Civic Literacy website](#).

CLASS is located within the Center for Teaching and Learning in General Classroom South (GS-2, room 223). The CLASS Office is open 9 a.m. to 7 p.m. Monday through Thursday, 9 a.m. to 4 p.m. Friday and 1 to 5 p.m. Sunday. For information, visit the [CLASS website](#), call 561-297-0906 or email [stay@fau.edu](mailto:stay@fau.edu).

## CENTER FOR TEACHING AND LEARNING

The Center for Teaching and Learning (CTL) at Florida Atlantic University is dedicated to ensuring the academic success of every student and providing faculty the necessary tools and resources to excel in teaching. CTL's ultimate goal is the creation of a culture of engagement where students become fully engaged in the learning process, both with their instructors and with their peers, and where faculty from diverse disciplines can engage one another in the pedagogy of teaching, with the ultimate goal of enhancing student learning.

Located on the second floor of General Classroom South, CTL provides a variety of support services to help students to engage, achieve and excel. CTL houses the following divisions:

### **The Office of Academic Success Initiatives**

(ASI) coordinates several first-year experience initiatives including iSucceed, FAU's signature online student success course, and First-Year Interest Groups (FIGs). The office supports faculty teaching in the General Education Program through course development consultations and assessment of learning objectives. The ASI team also works with other units across the University on a range of assessments of student learning and other measures of success.

The Center for Learning And Student Success (CLASS) provides free Supplemental Instruction, tutoring and other support to students in courses throughout the Boca Raton and Broward campuses. Online support is available as well through the extensive eTutoring program. CLASS also provides Civic Literacy workshops to help students prepare to take the Civic Literacy exam and oversees the new Science Learning Center in the Schmidt Family Complex next to the FAU stadium.

The Math Learning Center provides free math tutoring for students on a drop-in basis, by appointment for one-on-one tutoring and online via eTutoring.

The Office for Undergraduate Research and Inquiry (OURI) provides support to students from all colleges and campuses interested in participating in research, scholarship and creative activities. OURI offers opportunities for undergraduate students to get funded, published, showcased, recognized and involved.

The University Center for Excellence in Writing provides appointment-based support on the Boca Raton, Broward and Jupiter campuses and online to help all members of the University community enhance their writing.

Stop by the Center for Teaching and Learning in General Classroom South or visit its [website](#).

## COMMUNITY OR STATE COLLEGE HONOR SOCIETY

Students who were members of Phi Theta Kappa at a community or state college are invited to join Alpha of Florida, the Phi Theta Kappa alumni association at Florida Atlantic University. Students can share their transfer experience, receive transfer information or learn how to continue their involvement with Phi Theta Kappa by calling Angel Nevin at 561-297-3962 or emailing [anevin@fau.edu](mailto:anevin@fau.edu). Please be advised the chapter is currently inactive, but inquiries are welcome.

## COUNSELING AND PSYCHOLOGICAL SERVICES (CAPS)

Counseling and Psychological Services (CAPS) strives to provide FAU students with quality, individualized, timely and effective mental health services that allow them to improve and maintain their mental well-being; therefore, meeting their educational, personal, emotional and psychological goals. CAPS offers individual, relationship and group counseling, psychiatric services, referral to the community, crisis intervention, consultations and an after-hours crisis line to currently enrolled FAU students. Its professionally trained multidisciplinary staff is dedicated to assisting students with a wide range of personal concerns through identification and development of healthy coping skills. The staff at CAPS provides a warm and caring office atmosphere in which students are treated with sensitivity and dignity. Records and information at CAPS are confidential and separate from all other University records. Information about students receiving services cannot be disclosed without their written permission and is —confidential except when disclosure is required by law.

To make an appointment at the Boca Raton campus, call 561-297-3540; at the Davie campus, call 954-

236-1210; at the Jupiter campus, call 561-799-8635.

## EDUCATION ABROAD

The Education Abroad Office, part of the Center for Global Engagement, provides services and leadership to strengthen the international dimensions of academic programs at Florida Atlantic University. Education Abroad is responsible for establishing, supporting and coordinating international learning activities for undergraduate and graduate students as well as faculty. These include:

1. Developing, managing and overseeing international academic programs, including study abroad and student exchange programs;
2. Developing and managing international cooperation agreements with academic institutions around the world;
3. Facilitating greater internationalization of the University and Colleges;
4. Serving as a liaison to state, regional, national and international education organizations and consortia.

The Education Abroad Office provides comprehensive services and support to undergraduate and graduate students who wish to study abroad. It also encourages and assists faculty in developing new educational programs abroad and to enhance existing programs. Education Abroad also maintains information on the general scholarships and postgraduate fellowship opportunities that are available. It serves as the FAU office for the Fulbright Student Program and Gilman and Boren study abroad award programs. For detailed information on the office's Study Abroad Programs, see the [Programs for Enrichment and Specialization section](#) of this catalog or visit its [website](#).

## FEE PAYMENT DROP BOX

The Boca Raton campus is the only campus location that provides the convenience of a drop box. The drop box is available in the Student Support Services Building (SU, 80). If the amount of fees due is known, students are encouraged to put checks in the drop box. Please write the Student ID number on the check. Do not deposit cash in the drop box. No envelopes are required. NOTE: By depositing check payments in the drop box, you are authorizing FAU to electronically process your check. The electronic debit to your checking account may be on the same day your check payment is processed.

## FINANCIAL AID

FAU's financial aid program is administered by the Student Financial Aid Office. In Boca Raton, call 561-297-3530; in Broward, call 954-236-1229; in Jupiter, call 561-799-8697. For information about financial aid, read the section on [Financial Assistance Opportunities](#) in this catalog or visit the Financial Aid [website](#).

## FRATERNITY AND SORORITY LIFE

The FAU campus provides a wide range of academic, social and community service activities for students, and membership in a fraternity or sorority is a great first step toward enjoying all the benefits that FAU has to offer. Collectively, fraternities and sororities constitute one of the largest student groups on campus, and they have all made the commitment to doing more and being more; to having an experience that develops them as better, more ethical men and women. The Office of Fraternity and Sorority Life encourages students to fully explore the non-committal opportunity offered to understand what makes FAU's fraternity and sorority community so impactful.

The best resource for more information about the FAU fraternity and sorority community is [www.fau.edu/fslife](http://www.fau.edu/fslife), where you can find more information about individual chapters and the overall experience here at FAU.

## GRADUATE AND PROFESSIONAL STUDENT ASSOCIATION

The Graduate and Professional Student Association (GPSA) is the official voice and advocate for the graduate and professional student population. Co-advised by professionals in the Division of Student Affairs and the Graduate College, GPSA strives to provide graduate-centric experiences, which develop students scholastically and professionally. Examples of such experiences are social programming, workshops, conference travel funding networking opportunities, academic and nonacademic support resources and graduate and professional student organizations (GPSOs). GPSA also acts as a conduit for the resolution of the needs and concerns unique to FAU graduate and professional students by serving on the Graduate Council in the [Graduate College](#).

Visit the GPSA [website](#) for information. Email [gpsa@fau.edu](mailto:gpsa@fau.edu) or connect in person at the Boca Raton campus UN 234; Davie campus, SD 203; and Jupiter campus, SR 151.

# HOUSING

## **Off-Campus Housing**

The Off-Campus Housing Service, a computerized list of area rooms, apartments and houses for rent. For information, call 561-297-3735 or visit the [website](#).

## **On-Campus Housing — Housing and Residential Education**

### ***Boca Raton Campus***

Approximately 4,700 students live in FAU Housing. Applications for FAU Housing are assigned on a first-come, first-served basis, with first-year students receiving preference in the residence hall communities. Students are encouraged to apply early as space is limited. Space is not available for married students or students with families.

The University offers two basic styles of housing accommodation: suite-style residence halls, primarily for first-year students and other undergraduate students, and apartments for upper-division students. All facilities are air-conditioned and include standard furnishings, utilities, cable TV service, wireless Internet access, laundry facilities and community lounges.

A number of student staff and full-time professional staff members are available throughout FAU Housing to assist with student needs. The Residential Education staff connect students to purposeful experiences and resources that support their academic success, personal development and community engagement as they progress toward graduation; advise students about the Resident Student Association and community-council groups in FAU Housing; and assist students in transitioning from home to on-campus life.

### ***Jupiter Campus***

Approximately 450 students live in three suite-style residence halls on the Jupiter campus. All full-time, first-year admitted students at the Harriet L. Wilkes Honors College are required to live on campus and purchase a meal plan for their first and second year. Exemptions from this policy may be requested for the following reasons:

1. Students are at least 24 years of age;
2. Students are married;
3. Students have a dependent child; or
4. Students are U.S. military veterans, returning from a tour of duty.

Non-Honors College students who attend the Jupiter campus can apply for housing also but are not

required to live on campus. Priority is given to Honors College students.

## INTERNATIONAL SERVICES

The International Services Office provides comprehensive programs and services for international students and scholars enrolled at the University or otherwise engaged in research and other academic pursuits. The office collaborates across the University to advance the recruitment, enrollment, retention, and graduation of international students. Key programs and services include: compliance, reporting and record maintenance for the F and J visa program under the Student and Exchange Visitor Program (SEVIS); pre-arrival, visa documentation and orientation services for newly admitted international students; international student advising and workshops/seminars on topics of interest for current international students; and academic/social/cultural integration support through the International Integration Initiative (I3@FAU). Signature events include International Education Week and the Festival of nations.

International students with F and J status have two visa-specific registration holds that must be cleared

prior to registration for courses: the IS hold (removed after the student obtains the form I-20 or DS-2019 and confirms that the appropriate F or J visa has been granted), and the MM hold (removed after the student provides proof of appropriate health insurance coverage in compliance with Florida Board of Governors statutes and University policies).

International students complete a mandatory immigration check-in process upon arrival to the University. Students must report to International Services and present their passport, visa, form I-20/DS-2019, and the arrival/departure record (which can be downloaded at [www.cbp.gov/I94](http://www.cbp.gov/I94) after arrival in the United States). Additionally, international students must report a local physical U.S. address to International Services within 10 days of arrival in the United States.

Annual medical insurance for all F and J students is required for 52 continuing weeks beginning in August of each academic year. Additionally, J-2 visa holders (dependents of J-1 students/scholars) are also required to purchase medical insurance in compliance with federal requirements for the J Exchange Visitor Program. F and J visa holders must purchase the University-approved insurance plan or provide an acceptable alternate insurance plan by submitting the Alternate Insurance Compliance Form. Contact the International Services by [email](#), phone (561-297-3049) or visit the [website](#).

## MAIL SERVICES

The Mail Center processes all University-related mail and shipments. This includes the internal University mail to and from all campuses, incoming and outgoing courier mail to and from other state agencies, all incoming and outgoing U.S. mail, and shipments handled by other carriers such as UPS, FedEx, Airborne and DHL. The Mail Center is the point of contact for all bulk mailings. Mail directed to resident students is handled by the Housing Department. For information on Mail Services, contact 561-297-3172.

For the convenience of students, faculty and staff, a self-service postal kiosk is located in Campus Copy. This kiosk offers self-service functions including books of stamps, express and priority mail and other USPS functions. There is no surcharge for any of the mail services offered.

## MATH LEARNING CENTER

The Math Learning Center (MLC), located in GS211, assists FAU students in developing their math problem solving skills. The MLC is staffed by graduate and undergraduate student tutors. All tutors

receive extensive training and are certified through the College Reading and Learning Association. The MLC also houses the Learning Assistant (LA) Program, providing active learning in the Calculus course sequence.

The MLC provides the following academic support services to FAU students for free:

- Drop-in tutoring during all hours of operation;
- Small group tutoring by appointment, as available;
- eTutoring (see [webpage](#));
- Review sessions for specific courses;
- SAM Lab (Succeed At Math) in GS207 for Methods of Calculus.

Visit the Math Learning Center's [webpage](#) for further information, including hours of operation

## MILITARY AND VETERANS STUDENT SUCCESS CENTER

Florida Atlantic University is approved for the education and training of veterans and their children under all public laws now in effect. The [Military and Veterans Student Success Center Affairs](#) (MVSSC), located on the Boca Raton campus (Bldg. 31E, Room 173), assists all U.S. military service members, veterans, and their dependents. MVSSC provides tuition and fee deferments in accordance with Florida Statute, Title XLVII, Chapter 1009.27, Out-of-State Tuition and Fee Waivers in accordance with Florida Statute 1009.26 (13) & (14), Veteran Non-Resident Tuition Waivers in accordance with Florida Statute 1009.26, Section 36, (12)(a), Department of Veteran Affairs (VA) work-study opportunities, and Side-X-Side Career Readiness programs.

Students who intend to use VA educational benefits at FAU should contact the MVSSC office before applying to the University and at least two months prior to the anticipated semester start date. This time is required to obtain the necessary information and documents for processing of educational benefits from the VA.

Veterans and other students receiving VA education benefits or military tuition assistance are eligible for one fee deferment per semester by completing FAU's VA Enrollment Certification Request form available [here](#), which provides students with additional days within the semester to pay tuition and fees; see [Student Services Last Day to Pay](#) page for deadline dates with VA deferment (updated each semester). Certification is not automatic and must be requested prior to the start of each term. Requests may be submitted as early as 30 days prior to the start of the semester. If not submitted on time, VA

cannot guarantee on-time payment.

### **Out-of-State Tuition and Fee Waiver Eligibility Criteria**

Section 1009.26 (13) & (14), Florida Statutes, established the Congressman C.W. “Bill” Young Veteran Waiver Program, which requires a state university to waive out-of-state fees for a person who is:

An honorably discharged veteran of the United States Armed Forces, the United States Reserve Forces, or the National Guard who physically resides in this state while enrolled in the institution

or

Entitled to and uses educational assistance provided by the United States Department of Veterans Affairs for a quarter, semester, or term beginning after July 1, 2015, who physically resides in this state while enrolled in the institution.

### **Florida Veteran Non-Resident Tuition Waiver Program Eligibility Criteria**

Section 1009.26, Section 36, (12)(a), Florida Statutes, waives out-of-state fees for a person who is:

An honorably discharged veteran of the United States Armed Forces, the United States Reserve Forces, or the National Guard **and** physically resides in this state while enrolled in the institution.

### **Rate of Pursuit**

Rate of Pursuit (RoP) applies specifically to Chapter 33. It differs from training time, which is used for all other chapters. Schools certify actual credit. VA calculates RoP by dividing the number of credit (or credit hour equivalents) being pursued by the number of credits considered to be full-time by the school. The resulting percentage is the student’s RoP. See FAU's full-time requirements [here](#) for undergraduate and graduate levels.

Examples: If full-time is 12 credits, then the RoP:

- 6 credits (or credit equivalents) is 50% ( $6, 12 = 50\%$ )
- 7 credits (or credit equivalents) is 58% ( $7, 12 = 58\%$ )

For more detail on the VA's summer enrollment RoP breakdown and graduate enrollment in non-individually defined semesters breakdown click [here](#).

Eligibility for VA benefits are determined by the Federal Department of Veterans Affairs as per VA rules and regulations. For questions regarding semester deferments, Out-of-State Tuition and Fee Waivers, enrollment certification and other all services, contact FAU’s MVSSC at 561- 297-4725 or by

emailing [veterans@fau.edu](mailto:veterans@fau.edu). For additional information regarding other veterans educational programs, VA monthly stipends or specific information about benefits and/or payments, contact the VA education hotline at 1-888-442-4551 or use the [Ask VA \(AVA\) portal](#).

## NEW STUDENT TRANSITIONS AND FAMILY ENGAGEMENT

The New Student Transitions and Family Engagement Office provides quality transitional experiences that maximize students' ability to achieve their dreams and goals and optimize their potential, assisting them in developing confidence and resourcefulness throughout their Florida Atlantic journey. New Student Transitions oversees three main sections:

- Orientation
- Family Engagement
- The Mentoring Project

### **Orientation**

Orientation is a required University-wide program for all new undergraduate students (first-time-in-college and transfer students). The purpose of the New Student Transitions and Family Engagement Office is to provide programs and services that facilitate the transition of new students into the University, prepare new students for the University's educational opportunities and integrate students into the campus community.

A comprehensive orientation is offered in partnership with each of the University's locations where student services are provided. Included are programs with the Boca Raton campus and transfer programs with the Davie and Jupiter campuses. Orientation for Wilkes Honors College students is also held in partnership with the Jupiter campus.

Orientation Leaders support all New Student Transitions and Family Engagement Programs. They are dedicated, spirited and highly trained individuals who ease the transition for incoming students and their families. By sharing their knowledge of campus resources and experiences at FAU, they support a smooth transition for new students.

The New Student Transitions and Family Engagement Office is located on the Boca Raton campus and may be reached at 561-297-2733. For more information about orientation at all campuses, click [here](#) or send an email to [orientme@fau.edu](mailto:orientme@fau.edu).

Since family involvement can be very important in determining student success, family members are

welcome to register as guests and participate in orientation.

## Family Engagement

The Family Engagement team assists families in supporting their students at Florida Atlantic. With a goal of building a positive experience for students and their families, this service provides direct family access to any questions and concerns regarding their students.

The Office of New Student Transitions and Family Engagement encourages families to stay connected with their student and the FAU community. Through multiple forms of media (newsletters, social media and ongoing family training), the office keeps families connected through the different stages of their students' collegiate career. Through Programs that include perspective seminars, the family spring events and the signature Owl Family Weekend, the Office of New Student Transitions and Family Engagement is here to ensure that families feel supported through their students' academic journey. For more information, click [here](#), contact the office at 561-297-2733 or email [owlfamily@fau.edu](mailto:owlfamily@fau.edu).

## The Mentoring Project

The Mentoring Project is designed to create pathways of opportunity and connection through relationships that promote student success. It connects undergraduate FAU students with faculty, staff, graduate students or peer mentors. Students who are new to FAU can request a "Connections" mentor any time during their first two terms of enrollment. Returning students serve as peer mentors or may be mentored through more than 20 mentoring opportunities offered through academic departments, Student Affairs or community service programs. For more information about mentoring, click [here](#) or email [mentoring@fau.edu](mailto:mentoring@fau.edu).

## OWLS CARE HEALTH PROMOTION

[Owls Care Health Promotion](#) empowers students to be healthy, responsible and successful by providing wellness information, dynamic programs and services on health-related issues, such as stress management, healthy lifestyle, sexual health and well-being, substance safety, healthy relationships, and much more. These services enhance the health of the Florida Atlantic community and increase opportunities for students' academic and personal success.

On the Boca Raton campus, the office is in the Schmidt Family Complex, SF-107, Suite 158A. On the Jupiter campus, the office is in the Student Resource Building, SR-MC03, in the Burrow. Self-Care and Wellness Resource locations can be found in the [MyFAU app](#). Need more information? Please email [wellness@fau.edu](mailto:wellness@fau.edu). Hours on both the Boca and Jupiter campuses vary and can be found in the Linktree

on [@fauowls care](#) on Instagram.

### **Owls Care Leaders**

Owls Care Leaders are NASPA-certified Peer Educators who serve as representatives for Owls Care Health Promotion, providing outreach and education on topics including stress management, bystander intervention, suicide prevention and more. For information on how to become an Owls Care Leader, call 561-297-1048 or visit the Owls Care Health Promotion [website](#).

### **Women's Resource and Community Connection**

The Women's Resource and Community Connection (WRCC), a program under Owls Care Health Promotion, is a student space that targets the meaning and belonging, health and wellness, career preparedness and student success of communities of women and other individuals at Florida Atlantic. The WRCC helps to connect students with the services and resources they need to do their best through outreach and education led by Owls Care Leaders. Owls Care Leaders serve as representatives for the WRCC and Owls Care Health Promotion.

For location and hours, follow [@fauowls care](#) on Instagram and visit the Linktree in bio.

## **PARKING AND TRANSPORTATION SERVICES**

Parking and Transportation Services is responsible for managing the parking program in the interest of providing safe, convenient and well-designed parking facilities for more than 30,000 students, faculty, staff and visitors. To properly manage the parking facilities, the department administers a vehicle registration program and corresponding sale of decals, plans and develops parking lots, administers the appeals process, enforces the parking rules and maintains financial accountability.

University traffic patrollers provide a constant presence within the lots and are available to answer questions regarding parking procedures and regulations. On the Davie campus, parking regulations are enforced by FAU and Broward College officials. On the Fort Lauderdale campus, parking rules in the public garage are enforced by the City of Fort Lauderdale. Parking and Transportation Services can be reached at 561-297-2771. For additional information and to purchase a decal, visit [www.fau.edu/parking](http://www.fau.edu/parking) .

## **PRE-COLLEGIATE PROGRAMS**

Pre-Collegiate Programs enhance the educational experiences of students by providing programs and services that are holistic and based on theories of learning and human development. The office's Upward Bound Program provides several services that promote entry in and completion of a postsecondary education. Additional services include:

- Advice and assistance in secondary and postsecondary course selection;
- Assistance in preparing for college entrance examinations and completing college admission applications;
- Information on the full range of federal student financial aid programs and benefits (including Federal Pell Grant awards and loan forgiveness) and resources for locating public and private scholarships;
- Assistance in completing financial aid applications, including the Free Application for Federal Student Aid;
- Guidance and assistance in secondary school re-entry, alternative education programs for secondary school dropouts that lead to the receipt of a regular secondary school diploma; entry into general educational development (GED) programs; or entry into postsecondary education;
- Education or counseling services designed to improve the financial and economic literacy of students or the students' parents, including financial planning for postsecondary education;
- Advocacy for underrepresented students;
- Training in leadership skills; assessments of students' educational goals and individual needs;
- Instruction in Mathematics through Pre-Calculus, Laboratory Science, Foreign Language, Composition and Literature.

For further information on the programs and services offered within Pre-Collegiate Programs, call 561-297-1185 or visit its [website](#).

## STUDENT ACCESSIBILITY SERVICES

[Student Accessibility Services \(SAS\)](#) takes great pride in the academic and personal achievements of students with disabilities. Florida Atlantic University is committed to providing equal access for individuals with disabilities to all academic, social, cultural and recreational programs. SAS is compliant with Section 504 of the Rehabilitation Act of 1973, as amended, and the Americans with Disabilities Act Amendments Act of 2008.

The mission of SAS is to collaborate with the institution's diverse community to ensure that all aspects of campus life — learning, working and living — are universally accessible. This office is committed

to providing quality and comprehensive individualized services and state-of-the-art assistive technology while adapting to the dynamic needs of the diverse student population of Florida Atlantic. SAS works with faculty and staff to ensure that reasonable accommodations are provided to FAU students. It seeks to form collaborations that promote an inclusive learning environment for students' social, academic and career success.

Numerous support services are available to students with disabilities, including:

- Disability consultation and support
- Classroom accommodations
- Note-taking services
- Testing accommodations
- Sign language/C-Print services
- Assistive technology training and access
- Learning strategies
- SAS Mentor Program
- Volunteer opportunities
- Scholarships

Self-identification and registration with SAS is at the student's option and is not mandatory. However, in order to receive authorized academic accommodations from FAU due to a disability, the student must register with SAS. Information on registering with SAS can be found on the SAS [website](#). Academic accommodations are based on self-report of the disability, effective prior accommodations, observation and interaction with the SAS consultant, as well as disability documentation submitted by the student. These accommodations are provided to support students in achieving academic success at the University as well as to assist them in developing the necessary compensatory skills they will need to be successful after graduation. All disability-related records are confidential and are released only with the student's written permission.

The SAS Office for the Boca Raton campus is located in SU 133. Call 561-297-3880 (voice) or 711 (TTY). Office hours are 8 a.m. to 5 p.m. (via phone only from 5 p.m. to 6 p.m.), Monday through Thursday and 8 a.m. to 5 p.m. on Friday.

The SAS Office for the Broward campuses is located at the Davie campus in LA 131. Call 954-236-1222 (voice) or 711 (TTY). Office hours are 8 a.m. to 5 p.m., Monday through Friday.

The SAS Office for the Jupiter campus is located in SR 111F. Call 561-799-8585 (voice) or 711

(TTY). Office hours are 8 a.m. to 5 p.m., Monday through Friday.

## STUDENT ACTIVITIES AND INVOLVEMENT

As a part of the total educational experience at Florida Atlantic University, student activities and involvement opportunities are regularly revised and updated to meet the needs and preferences of the student body.

The Student Activities and Involvement Office is in charge of four main areas: Registered Student Organizations, Student Government and Campus Activities. Student Activities and Involvement offers over 300 registered student organizations and a multitude of ways for students to connect at FAU. For a complete list of all organizations and student organization events, click [here](#).

Student Activities and Involvement is a resource for all students to stay engaged while at FAU. Students can get involved in Homecoming, events, internships, research, volunteer opportunities, media, Student Government, club sports and much more. For more information, call 561-297-3735 (Boca), 561-799-8724 (Jupiter) or 954-236-1001 (Broward) or visit this [website](#).

## STUDENT-ATHLETE SUCCESS CENTER

The Student-Athlete Success Center provides assistance to the more than 500 student-athletes at FAU as they strive to reach their educational goals while they compete in intercollegiate athletics. Academic counselors work closely with coaches, faculty and a variety of campus resources to help facilitate students' academic progress and personal development throughout college life. This is accomplished by instituting academic and social support programs, including, but not limited to, Academic Enhancement, Tutorial Services, Counseling, Secondary Advising, Study Hall, Eligibility Tracking, Career Development and Life Skills. The major emphasis with each of these programs is to provide students with the resources and fundamental skills that will foster academic achievement and promote the holistic development of the student-athlete population.

The Student-Athlete Success Center is located in the Oxley Center on the Boca Raton campus. For information, call 561-297-2297.

## OFFICE OF STUDENT CONDUCT

0325

The Office of Student Conduct (OSC) is a department within the Office of the Associate Vice President and Dean of Students/Division of Student Affairs. The purpose of the Office of Student Conduct is to support the educational mission of Florida Atlantic University by administering the Student Code of Conduct, described in [University Regulation 4.007](#), and serving as a resource to the University community and beyond.

The University's Student Code of Conduct is an integral part of the educational mission of the University. It emphasizes the development of each individual's acceptance of his or her own personal and social responsibilities, ensuring fairness in the implementation of the procedural requirements described in this regulation for all students.

The University's Student Code of Conduct is designed to provide and help maintain an atmosphere within the University Community that is conducive to academic pursuits. Serious action against a student, such as separation, is considered and invoked only when other remedies fail. The University, however, recognizes its responsibilities to all members of the University community, and the protection of personal, institutional rights and property is a primary focus of the process in Regulation 4.007.

## STUDENT EMPLOYMENT

The Student Employment Office provides information on both on-campus and off-campus jobs to degree-seeking students, regardless of financial need. The office maintains "Get a Job!," a current online job database available to students and employers. Call 561-297-6156 for details or visit the Student Employment [website](#).

## STUDENT GOVERNMENT

Florida Atlantic University (FAU) Student Government (SG) is the official voice and governing body of the student population. Modeled after the federal and state governments, FAU SG has three branches, Executive, Legislative and Judicial, serving students University wide and campus specific at the Boca Raton campus, Broward campuses and the Jupiter campus. In addition to being the student governing body, SG serves as one of the largest on-campus opportunities for student leadership, legislative action, lobbying and advocacy for the student experience.

The Executive Branch consists of the Student Body President, Vice President, Boca Raton Governor,

Broward Campuses Governor, and Jupiter Campus Governor and their Administrative Cabinets. The President represents the student body University wide to FAU administration, Florida Legislature and nationally. It is the responsibility of the executive branch to work on initiatives that improve campus life. The Student Body President, Vice President and Campus Governors are elected in the spring for one-year terms.

The Legislative Branch reflects students from three areas: Boca Raton campus, Broward campuses and Jupiter campus. There is a University-wide student senate and three campus-based houses of representatives. It is the responsibility of the legislative branch to maintain SG statutes that enable self-governance, allocate funding from the activity and service fee budget and provide a check and balance for executive programs. Legislators are elected each fall for one-year terms.

The Judicial Branch is composed of the Chief Justice and three campus-based Associate Justices. The Student Court interprets the law. The Student Court may hear cases regarding Student Body Constitution, statutory due process and violations. It also reviews SG statutes for legislation that may be unconstitutional according to the SG Constitution. Members of the Student Court are also trained hearing officers of the Student Affairs Student Conduct Board.

SG works closely with the departments of Activity & Service Accounting and Budget Office (ASAB) and Student Activities and Involvement to support student-centered activities and services.

Professional staff and faculty members support SG. The advisors are full-time administrators with advanced degrees in higher education administration, leadership and accounting who advise and support SG by assisting with the student coordination of University-wide and campus-based initiatives, providing training and advisement.

Visit the SG [website](#) for information. Email [gpsa@fau.edu](mailto:gpsa@fau.edu) or connect in person at the Boca Raton campus, UN 234; Davie campus, SD 214; and Jupiter campus, SR 151.

### **Students Advocating Volunteer Involvement (SAVI)**

The Student Government agency Students Advocating Volunteer Involvement ([SAVI](#)) provides community service and leadership opportunities to all interested students. SAVI offers students the opportunity to coordinate volunteer and fundraising events to support the community. SAVI also assists clubs and other student organizations in their community service efforts. SAVI is based on the Boca Raton, Broward and Jupiter campuses.

Contact [SAVI](#) for your campus:

Boca Raton campus: 561-297-3607

Broward campuses: 954-236-1183

Jupiter campus: 561-799-8724

## STUDENT HEALTH SERVICES

Student Health Services (SHS) provides high quality, affordable and accredited healthcare to registered FAU students at the Boca Raton, Jupiter, and Davie campuses. Its student-focused services offer a primary care solution to both commuter and residential students. A student's health and the ability to thrive academically are closely linked. It is the goal of Student Health Services' dedicated team of professionals to provide caring, confidential health and dental care and credible health information to help FAU students stay healthy, graduate on time and establish lifelong health habits. Students who pay the FAU health fee are eligible for services and have access to self-pay discounts. No payment is required at the time of service; any charges will be sent to the student's account. Insurance is not required to use Student Health Services, but SHS is an in-network provider with a number of major insurances. Check the [website](#) for a complete list. Schedule an appointment today or stop in to visit the campus medical, women's health, nutrition, or dental (Boca Raton campus only) clinic.

## STUDENT MEDIA

The Department of Student Media provides learning opportunities in media that promote student participation and enrichment through the practice of newspaper, television and radio journalism. The Department of Student Media plays an integral role at Florida Atlantic University by covering its wide-ranging events and programs, providing entertainment and giving students the opportunity to gain real-world experience in print journalism, television and radio broadcast production. Led by professional advisors, students involved in student media gain hands-on experience that can't be found in a classroom. In addition to building résumés, student media offer a wide range of paid and volunteer positions that allow students to focus on their academics while also committing time to producing materials and building portfolios. The Department of Student Media is located on the Boca Raton campus, Building 31 (UN), Room 207. For more information, call 561-297-0448 or visit [www.fau.edu/studentmedia](http://www.fau.edu/studentmedia).

# STUDENT UNION

## **Boca Raton Campus**

The [Student Union](#) is the community center for all members of the Florida Atlantic University campus, including students, faculty, staff and visitors. It contributes directly to the educational mission of Florida Atlantic by providing encouragement and opportunities for participation in educational, cultural and recreational activities. The facilities provide a central place for students and others to spend time learning, socializing and relaxing while feeling more closely connected to the campus. The Student Union is home to the eSports Gaming Center that includes gaming computers, a console gaming area and an area for billiards, foosball, air hockey and table tennis. The Student Union also provides a home for registered student organization meetings and events, including concerts, comedy shows, leadership conferences and much more.

## **Davie Campus**

Located on the Davie campus in Broward County, the 20,000-square-foot Student Union houses offices for Student Government and advisors, a student lounge with a computer room, a large multipurpose room for events, health and counseling services, Steve's Espresso Café and a 5,800-square-foot University bookstore. The Davie Student Union is also the place for students to get their Owl Cards, reserve study rooms, rent laptops/tablets or purchase a snack from vending machines. The Union is the center of campus life where students can gather, talk, relax or engage in various university activities and programs.

### ***Hours:***

Monday through Thursday, 7:30 a.m. to 11 p.m.

Friday, 7:30 a.m. to 7 p.m.

Saturday, 7:30 a.m. to 6 p.m.

Sunday, 11:30 a.m. to 7 p.m.

Direct inquiries to 954-236-1332. For further information, including upcoming events, call the building coordinator at 954-236-1314.

## **Jupiter Campus**

Located on the John D. MacArthur campus in Jupiter, the Burrow Student Union houses offices for Student Government and advisors, multiple lounge and study areas, a TV and video gaming consoles, academic and gaming computers, charging lockers, a wellness cart, microwave, water and ice machine, as well as Keurig and coffee vending machines. Recreational equipment includes a ping pong table,

billiards, foosball and air hockey, as well as video and board games. Outdoor recreational equipment such as basketballs, volleyballs, soccer and footballs are also available for check out. Other services include scantron check out, Night Owls dispatch, stamping of approved flyers for posting, lost and found and general event support. The Burrow is the center of campus life where events and programs occur frequently and students socialize, study and engage in various activities.

***Hours:***

Monday through Friday, 8:00 a.m. to 12:00 a.m.

Saturday through Sunday, 10:00 a.m. to 8:00 p.m.

Summer hours Monday through Friday, 9:00 a.m. to 5:00 p.m.

Call 561-799-8681 to reach the Burrow Front Desk.

## TESTING AND CERTIFICATION

The Testing and Certification Center provides testing services for FAU students, faculty, staff and the community.

Florida Atlantic University is a national, state and university test center. National tests include ACCUPLACER, ACT, CLEP, LSAT, MAT, PRAXIS and TOEFL. State and university tests include TEAS and other academic and professional tests. In addition, FAU is a Prometric test center. To view a listing of tests offered by Prometric, visit [www.prometric.com](http://www.prometric.com). Individuals may also schedule appointments to have correspondence tests proctored. Accommodations for students with disabilities are made available in coordination with Student Accessibility Services. For details, visit its [website](#).

Services for faculty include makeup testing on a limited basis, scoring multiple-choice tests and providing a computer analysis of the results via email. The Student Perception of Teaching forms are now completed online each semester. The results are available online through the FAU [website](#).

Contact the office for testing hours and services at [fautesting@fau.edu](mailto:fautesting@fau.edu) or 561-297-3160 on the Boca Raton campus and 954-236-1220 on the Davie campus. For more information, visit the Testing and Certification [website](#).

## TRANSFER STUDENT SERVICES

The Transfer Student Services Center provides a streamlined onboarding process for transfer students through:

- Comprehensive transfer admissions services;
- Pre-admission and transition academic advising;
- Facilitating student connection to on-campus resources.

In addition, Transfer Student Services publishes [Transition Guides](#) for students who are planning on transferring to FAU. The guides include transferrable lower-division courses for all undergraduate majors at FAU. They are designed to assist students navigate a smooth transfer.

For additional resources offered by Transfer Student Services, visit its [website](#) or reach out at 561-297-0165 or [transfer@fau.edu](mailto:transfer@fau.edu)

## TUITION AND BILLING SERVICES

[Student Financial Services](#), part of the Controller's Office, is responsible for the collection of all funds due to the University, student account billing, Financial Aid refunds and collection of delinquent accounts. For detailed information on such topics as payment deadlines, installment plans, direct deposit, Florida Prepaid, online payment and many more topics, please visit its [website](#).

Boca Raton Campus, Student Services Building, SU-80, Room 130

Hours: Monday through Thursday, 8 a.m. to 6 p.m.; Friday, 8 a.m. to 5 p.m.

Phone: 561-297-6101

Fax: 561-297-0683

[webcontroller@fau.edu](mailto:webcontroller@fau.edu)

## OFFICE OF UNDERGRADUATE RESEARCH AND INQUIRY (OURI)

Students are invited to distinguish their FAU education by participating in the process of discovery through undergraduate research and creative activity! FAU offers a wealth of resources for students to engage in these opportunities through the Office of Undergraduate Research and Inquiry (OURI). OURI provides students the unique opportunity to collaborate with faculty and fellow students on

scholarly research and inquiry projects and provides a variety of resources to support undergraduate students. These include: undergraduate research grants and the summer undergraduate research fellowship (SURF) that fund undergraduate research projects; the [Undergraduate Research Certificate](#), a 12-credit program that recognizes students' excellence in research; the Undergraduate Research Symposium that showcases student projects on three campuses; and the Florida Atlantic Undergraduate Research Journal, which publishes original creative projects and scholarly papers.

OURI also offers a variety of workshops designed to guide students through the process of finding a mentor, getting involved in research, research ethics, and communicating findings. There are also faculty workshops geared toward assisting in the process of designating undergraduate courses as research intensive (RI). Interested students may also join the Council for Scholarship and Inquiry (CSI), OURI's student organization, to learn more about the research process and engage with other students and faculty. Students are also encouraged to meet with OURI peer mentors and/or share their knowledge by serving as an OURI peer mentor. FAU's Office of Undergraduate Research and Inquiry is located in GS 212. For more information about undergraduate research and inquiry opportunities at FAU, visit [www.fau.edu/our](http://www.fau.edu/our) or reach the office at [our@fau.edu](mailto:our@fau.edu) or 561-297-OURI (6874).

## UNIVERSITY CENTER FOR EXCELLENCE IN WRITING

The University Center for Excellence in Writing (UCEW) is a free service for all members of the FAU community—undergraduate and graduate students, staff, faculty and visiting scholars alike. Its services are devoted to the support and promotion of writing. Trained writing center consultants help writers at any stage of the writing process (brainstorming, drafting, revising) with papers for courses, senior or master's theses, dissertations, job or graduate school applications, articles for publication, grant proposals and other documents. Consultants provide writing assistance rather than editing or proofreading services.

The UCEW provides a range of other services, including support for computer-facilitated teaching and learning for writing classes and hosting brown-bag discussions, workshops and presentations by guest speakers for FAU and the local community. The center also serves as the campus clearinghouse for research in literacy, pedagogy and computer-facilitated teaching of writing and for the Writing Across the Curriculum Program.

Writers are encouraged to take advantage of this free service, interact with other writers, gain perspective on their own work and develop additional strategies in reading and writing for all writing

projects.

The main branch of the University Center for Excellence in Writing is on the Boca Raton campus in GS 215. For a list of all sites and hours of operation and to register for services and schedule an appointment, visit the UCEW [website](#).

## UNIVERSITY POLICE

The Florida Atlantic University Police Department provides a full range of public safety services 24 hours a day, seven days a week on the Boca Raton and Jupiter campuses. Police are also present daytime hours on the other campuses. The FAU Police Department operates in accordance with the Police Standards and Training Commission in the state of Florida. Officers are fully trained professionals who are committed to assisting the University community in all of its public safety needs.

Some services provided by the University Police include vehicle, motorcycle, foot and bicycle patrol, criminal investigation, traffic enforcement, fingerprinting, accident investigation, special events management, crime prevention programs and victim advocacy.

The Victim Advocacy Program is for all students, faculty and staff who may become the victim of crime either off or on any FAU campus. The victim advocate can help with information about options in cases of rape, sexual harassment, stalking, cyber-stalking, domestic/relationship violence, assault, battery and other crimes. Information is available concerning victim compensation, obtaining an injunction (restraining order), reporting to the Dean of Students and referrals to campus and community resources. Individuals DO NOT have to file a police report to utilize the services of the victim advocate. Individuals may remain anonymous when talking to the advocate.

For information, call 561-297-0500 (after hours, this number is routed to Police dispatch), email [victimservices@fau.edu](mailto:victimservices@fau.edu), or visit [www.fau.edu/police/victimservices](http://www.fau.edu/police/victimservices). The Victim Services Office is located on the Boca Raton campus in the Wimberly Library, Room 156.

Campus Crime Statistics are available online through [www.fau.edu/police](http://www.fau.edu/police). The current police blotter, dates of upcoming self-defense classes (RAD) and educational information are also available at this website. Timely warnings or crime alerts will be posted to this site.

Crime Prevention Programs provide information on safety and security precautions to students, faculty

and staff members through seminars, bulletins, brochures and the website. University police personnel conduct training and provide crime prevention information each semester on these and other topics:

- Acquaintance Rape Programs for women and men
- Personal Safety - reduce your risk of becoming a victim
- Drugs and Alcohol
- Relationship Violence, Healthy Relationships
- Resident Housing Safety
- Burglary/Theft Prevention

University Police personnel are available to provide any additional crime prevention programming that may be needed to address an ongoing problem or special situation.

The Police Department encourages all members of the campus community to become involved in crime prevention. The department operates an Anonymous Crime-Reporting Program . Contact 561-297-3500 for more information.

**Rape Aggression Defense (RAD) Training** is a self-defense class offered to women only. These three-meeting classes are conducted on different campuses at different times of the year. Schedule information and registration are available on the Police [website](#). The FAU Police Department Central Police dispatch can provide more information at 561-297-3500.

The department operates an **Anonymous Crime Reporting Program** called "Silent Witness." Individuals can provide information through the Police [website](#).

Also available is the "Tips" line: a voice mail system that allows individuals to leave information for law enforcement concerning crime. The Tips line number is 561-297-4636. In emergencies, call 911.

Campus theft can be a serious problem. Resident halls, personal items and vehicles should be secured at all times. Make note of the serial numbers of all electronic items and check to see if these are covered by insurance. When parking, valuables should be placed in the trunk of the vehicle out of sight and the vehicle should be locked. Textbooks should be marked with the owner's name or an identifying mark somewhere on an inside page for proof of ownership so the books can be returned if recovered. Register bicycles with University Police in person at the Police station. Registration serves as a theft deterrent and aids in the recovery of bicycles.

The Community Service Officer (CSO) Program employs students in a security capacity on the Boca Raton campus. The objectives of the CSO Program are to provide a safer living and working

environment for the campus community by augmenting law enforcement presence and providing FAU students with campus safety information. All CSO employees are provided with basic security and first aid training and are in direct communication with Police dispatch.

Students, faculty and staff who are on the Boca Raton campus in the evening may call the Night Owls Campus Escort Service (561-297-6695) to accompany them safely to all locations on campus. These escorts work from dusk to the early hours of the morning when classes are in session.

"Code Blue" emergency telephones are located throughout the Boca Raton and Jupiter campuses. Students should locate the telephones in the area where they normally park. These phones feature safety lighting and ring directly to emergency providers.

Remember when calling 911 from cellular phones, give the location first so that dispatchers can transfer the call to the closest police agency.

Campus phones: dial 911 for emergency police, fire and medical response on all campuses. Central Dispatch for all FAU campuses is 561-297-3500.

### **Police Services by Campus**

***Dania Beach/SeaTech Campus:*** Call 911 for all emergencies. The on-campus number is 954-924-7000 (business hours). The FAU Police Department central Police dispatch is available at 561-297-3500.

***Davie Campus:*** Call 911 for all emergencies. On-campus number: 954-236-1140 (24 hours). The FAU Police Department central Police dispatch is available at 561-297-3500.

***Fort Lauderdale Campus:*** Call 911 for all emergencies. On-campus numbers are Higher Education Complex Security Desk: 954-201-7636 (24 hours) and Askew Tower: 954-201-7949 (business hours). The FAU Police Department central Police dispatch is available at 561-297-3500.

***Harbor Branch Campus:*** Call 911 for all emergencies. The FAU Police Department central policy dispatch is available at 561-297-3500. On-campus number: 772-528-5729 (business hours).

***Jupiter Campus:*** Call 911 for all emergencies. The FAU Police Department central Police dispatch is available at 561-297-3500. The FAU Police Department provides a full range of public safety services 24 hours a day, seven days a week on the John D. MacArthur campus in Jupiter. To ensure safety, it is suggested that staff members inform Campus Police when working alone late at night. The police

officer on duty can be reached at anytime by calling the cellular phone number 561-339-0015 or office number 561-799-8700.

More information about the FAU Police Department on all FAU campuses is available at the following:

Main Dispatch: 561-297-3500

Email: [faupd@fau.edu](mailto:faupd@fau.edu)

Website: [www.fau.edu/police](http://www.fau.edu/police)

## WEBSITE

Additional information is available on the Florida Atlantic University website at [www.fau.edu](http://www.fau.edu). Visit FAU's website to learn more about the University, its programs and its services.

## WEPPNER CENTER FOR LEAD AND SERVICE-LEARNING (LEAD AND SERVE)

The Weppner Center for LEAD and Service-Learning focuses on empowering students' pursuit of their own developmental growth by cultivating lifelong leadership skills and engaging in experiential service learning to become more effective citizens in their community.

Lead and Serve provides volunteer opportunities through Days of Service to immersive alternative break experiences known as Owl Breaks, develops leadership workshops and conferences such as iLead and WeLead: Community Engagement Conference, and encourages students to be civically minded by promoting voter engagement and democratic involvement.

Students can also become ambassadors of Lead and Serve by serving on the Student Government's Students Advocating for Volunteerism and Involvement (SAVI) board or applying to become an Elite Owl, a premier leadership position at Florida Atlantic. The department also collaborates with the College of Education to develop the [Leadership Studies Minor](#). More information about Lead and Serve can be found on its [website](#).

### ACADEMIC PROGRAMS

### COURSE DESCRIPTIONS

## TUITION, FEES AND REFUNDS

### REGISTRATION FEES

Tuition and other fees are due on or before the last day to pay (see the [Academic Calendar](#) and [Tuition and Billing Important Dates](#)). A student is not considered officially registered and may not attend

classes until fees are paid or arrangements are made to pay fees. Arrangements to pay fees include, but are not limited to: acceptance of a financial aid award; acceptance of a tuition deferment for pending financial aid; third party billing, including payment by the Florida Prepaid College Program; participation in one of the [University's payment plans](#) (not available during the summer semesters); or matriculation or non-resident waivers. Florida Statutes do not allow FAU to register any individual who has debts with the University.

Tuition and fees are charged for each credit scheduled based on the course level and the residency status of the student. To view our full cost of attendance information page, visit <https://www.fau.edu/finaid/other/cost-of-attendance/>. Tuition and fees are subject to change by the Florida Board of Governors at any time. For the most current tuition fees visit [www.fau.edu/controller/student-services/tuition-breakdown](http://www.fau.edu/controller/student-services/tuition-breakdown) or [www.fau.edu/regulations/chapter8](http://www.fau.edu/regulations/chapter8).

The tuition and fees apply to all courses, to all degree- and non-degree-seeking students and for all semesters unless specifically noted otherwise in official University publications. To determine their fee schedule, students auditing classes should read the [Registration for Auditors](#) section in this catalog.

All degree-seeking students should read the [Financial Assistance Opportunities](#) section of this catalog.

## STUDENT ACCOUNT AUTHORIZED USERS

Students can authorize others, such as parents, guardians or sponsors, to view their accounts and pay their bills. To authorize a user, the student submits the new user's email address and signs an electronic authorization on the FAU Billing website. Sign-up instructions can be found [here](#).

### **Repeat Course Surcharge Fee**

A student enrolled in the same undergraduate college credit course more than twice will be charged a Repeat Course Surcharge for the third and subsequent enrollments in the course. Individualized study courses and courses intended to continue over multiple semesters may be excluded from this charge. To view our full cost of attendance information page, visit <https://www.fau.edu/finaid/other/cost-of-attendance/>. See Repeat Course Surcharge in the [Academic Policies and Regulations](#) section for more details.

## SUNDRY FEES

To view our full cost of attendance information page, visit <https://www.fau.edu/finaid/other/cost-of-attendance/>.

Late Payment Fee*	\$100
Late Registration Fee*	\$100
Application (fee is non-refundable)	\$30
Material and Supply Fee**	variable
Mandatory Photo ID Fee***	\$10
Freshman Orientation Fee	\$104
Required Overnight Housing Fee	\$35
Freshman Orientation Guest Fee(fees are non-refundable)	\$70
Freshman Tuition Deposit (fee is non-refundable)	\$200
Transfer Orientation Fee	\$54
Transfer Orientation Guest Fee (fees are non-refundable)	\$27
Transfer Student Tuition Deposit (fee is non-refundable)	\$100
eLearning Fee (per credit hour)	\$30
Transportation Access includes parking decal (fee is non-refundable)****	
Summer	\$32.04
Fall and Spring	\$76.90/per semester

\* See [Academic Calendar](#) for dates. An initial registration after the end of the Drop/Add period will incur a \$100 late registration fee.

\*\* Certain courses have been designated to include material and supply fees.

\*\*\* A mandatory photo ID fee must be paid during the first semester enrolled at FAU or for

replacement of a lost photo ID. This is a non-refundable fee. Students must present a paid fee receipt at the photo ID office in the Student Union, Boca Raton campus (or other campus locations) to have the photo ID processed.

\*\*\*\* All students are assessed a transportation access fee at the time of registration to be paid along with their tuition. This fee supports the University's transportation infrastructure and increases student access to transportation services. Upon registration, a student will be eligible to obtain a permit online through [myfau.fau.edu](https://myfau.fau.edu). Parking and Transportation Services is responsible for managing parking services on all FAU campuses. All students, whether part-time, full-time, day or evening or members of the Osher Lifelong Learning Institute, are required to pay a transportation access fee, which is included in the tuition at the time of registration. Decals may be obtained online at [myfau.fau.edu](https://myfau.fau.edu), under the "Students" tab. For more information, call 561-297-2771 or visit the Parking and Transportation Services [website](#) for a copy of the parking rules, an FAU map or visitor information.

## NON-RESIDENT TUITION EXEMPTION PROGRAM FOR INTERNATIONAL STUDENTS

International students attending any of Florida's state universities or community colleges may be eligible to apply for admission as residents for tuition purposes. In order to qualify, students must be from one of the countries with which Florida Linkage Institutes are established. Students are required to return home after their graduate study or undergraduate study, for a length of time equal to their exemption period. The Institutes also have criteria for selection of students who will receive out-of-state fee waivers.

For information about the Linkage Institutes in Florida and the state universities/community colleges that process applications for each particular institute, click [here](#). A student does not need to attend the Institute where the linkage office is located.

## VA CHAPTER 31 AND CHAPTER 33 – ASSESSMENT OF LATE FEES

In accordance with Title 38 US Code 3679 subsection (e), Florida Atlantic University adopts the following additional provisions for any students using U.S. Department of Veterans Affairs (VA) Post 9/11 G.I. Bill® (Ch. 33) or Vocational Rehabilitation & Employment (Ch. 31) benefits, while payment

to the institution is pending from the VA.

Florida Atlantic University will not:

- Prevent the student's enrollment;
- Assess a late penalty fee to the student;
- Require the student to secure alternative or additional funding;
- Deny the student access to any resources (access to classes, libraries, or other institutional facilities) available to other students who have satisfied their tuition and fee bills to the institution.

However, to qualify for this provision, such students are required to:

- Produce the VA Certificate of Eligibility (COE) or a Purchase Order Number (PO#) by the Last Day to Drop/Add class (per Academic Calendar). The PO# is replacing the VA Form 28-1905 and is equivalent to the authorization number;
- Submit a request to be certified;
- Provide additional information needed to properly certify the enrollment as described in other institutional policies.

## ESTIMATES OF LIVING EXPENSES

Click [here](#) to see estimated costs of attendance at FAU. The figures provide a rough estimate of the basic expenses for full-time, Florida-resident undergraduate and graduate students and for full-time, Non-Florida resident undergraduate and graduate students for an academic year (fall and spring semesters).

### **Fee Payment Drop Box**

The Boca Raton campus is the only campus location that provides the convenience of a drop box. The drop box is available in the Student Support Services Building (SU 80). If the amount of fees due is known, students are encouraged to put checks in the drop box. Please write the Student ID number on the check. Do not deposit cash in the drop box. No envelopes are required. NOTE: By depositing check payments in the drop box, you are authorizing FAU to electronically process your check. The electronic debit to your checking account may be on the same day your check payment is processed.

### **Registration Cancellation by the University**

Unless prior payment arrangements have been made with the Controller's Office, failure to pay all

tuition and fees by the last day to pay as posted in the [Academic Calendar](#) and [Tuition and Billing Important Dates](#) will result in cancellation of the student's registration by the Controller's Office (i.e., all courses selected by the student).

Students cancelled for non-payment of fees may be reinstated. Reinstatement requires immediate fee payment in full using a Webcheck or credit card or requires other University-approved arrangements for fee payment (installment payment, deferment or third party billing), plus a \$100 late payment and a \$100 reinstatement fee. Reinstatement after the cancellation of classes requires an appeal to be filed with the Registrar's Office

### **Dishonored Checks**

Pursuant to Florida law, individuals have 15 days from receipt of “notice to tender payment to Florida Atlantic University” to pay for the full amount of a dishonored check, plus a service charge of \$25 if the face value of the check does not exceed \$50; \$30 if the face value of the check exceeds \$50, but does not exceed \$300; \$40 if the face value of the check exceeds \$300, but does not exceed \$800; and 5 percent of the face value of the check in the amount of \$800 or greater. Electronic check payments (WebChecks) returned due to entering an invalid account number will be assessed a \$25 service charge.

Unless this amount is paid in full within the specified time, the dishonored check may be turned over to the state attorney for criminal prosecution and/or to a collection agency.

Individuals who do not tender payment within the 15-day period are also subject to cancellation of registration with fee liability.

Individuals who have given two or more dishonored checks will be placed on a cash, money order or cashier's check basis for any subsequent registrations.

**Note:** Stopping payment on a check is considered the same as a dishonored check.

### **Dropping Courses**

Once courses are selected for the semester, no changes in course status occur unless the student initiates the changes. To drop a course(s), the University's formal drop procedure must be followed by accessing the appropriate option within FAU Self-Service, available through [MyFAU](#). Failing to attend the course(s), telling the instructor(s) of an intention to drop, failing to pay tuition and fees for a course(s) or similar action will not change the student's course selection status nor will it reduce fee liability. For more information regarding the drop procedure, refer to the [Academic Policies and Regulations section](#) of this catalog.

## Fee Liability

Fee liability (meaning payment is due for all tuition and fees) occurs when a fee deferment is accepted (i.e., deferrals for financial aid applicants who are approved to receive aid), arrangements for fee payment are made or a partial payment is made. Formally dropping a course(s) before the end of the drop/add period relieves the student of fee liability for the course(s) that are dropped. Formally dropping a course(s) after the drop/add period does not change fee liability. Students must still pay for the course(s) that they drop. To view our full cost of attendance information page, visit <https://www.fau.edu/finaid/other/cost-of-attendance/>.

## REFUND OF REGISTRATION FEES

1. Students who drop a class or withdraw from the University before the end of the first week of classes will receive a full refund, less non-refundable fees.
2. Students who withdraw from all full-term semester courses during the second through fourth weeks of the semester (other than for exceptional circumstances) will receive a 25 percent refund, less non-refundable fees.
3. Students who drop a class after the fourth week of classes will not receive a refund unless the drop takes place due to exceptional circumstances, such as illness, military conscription or death of an immediate family member. Situations such as employment changes, relocation of home, transportation problems, dislike for the instructor/course, etc., are not considered "exceptional circumstances." For more information, see Exceptional Circumstance Withdrawal below.
4. If a student drops a class after the drop/add period, a full refund, less any non-refundable fees, may be provided upon approval of the Fee Petition by the Office of the Controller, Tuition and Billing Services, SU 130. The [Fee Petition form](#) should be completed online and then printed and submitted along with the supporting documentation to substantiate the petition. The Fee Petition form must be submitted within six months after the last day of classes for the semester. Situations such as employment changes, relocation of home, transportation problems, dislike for the instructor/course, etc., are not considered circumstances for filing a fee petition.

## Refund

Signing up for [Direct Deposit](#) will expedite receipt of refunds for financial aid and all other refunds due from student accounts. All other refunds will be generated through checks and mailed to the address on file.

## REFUND OF HOUSING FEES

The Housing Contract cannot be cancelled after the opening date for housing. Any student who has not cancelled the Housing Contract before the opening date of housing will be responsible for all University housing fees for the academic year.

A full refund of housing fees will be granted if a student is denied admission to the University or is academically suspended and requests a cancellation before the opening date for housing.

Each resident is encouraged to become familiar with the terms, conditions and freshman residency requirement specified in the Housing Contract.

### Exceptional Circumstance Withdrawal (Medical Withdrawal)

Students withdrawing from all classes in the current semester due to exceptional circumstances, such as illness of the student, military conscription, becoming primary care-giver to immediate family member or death of an immediate family member (parent, spouse, child, sibling or grandparent), may receive a refund, less non-refundable fees, if the request for ECW is granted. Students seeking Exceptional Circumstance Withdrawals should contact the Associate Vice President and Dean of Students at 561-297-3542 for the appropriate paperwork or visit [www.fau.edu/dean/exceptional-withdrawal.php](http://www.fau.edu/dean/exceptional-withdrawal.php).

## WITHDRAWAL FROM THE UNIVERSITY

Students who withdraw from all full-term semester courses during the second through fourth weeks of the semester (other than for exceptional circumstances) will receive a 25 percent refund, less non-refundable fees. No refunds for withdrawal other than for exceptional circumstances will be granted after the fourth week of classes.

Undergraduate and graduate financial aid recipients who officially or unofficially withdraw from the University may be required to repay all or a portion of the grants and loans based on the last date of attendance at an academically related activity as documented by University records. For students who were originally enrolled in multiple parts of term, the last date of attendance would ONLY include all days attended in any parts of term within the semester, excluding any overlapping days attended. The Office of Student Financial Aid is responsible for calculating amounts that must be repaid by the student. Before withdrawing, please read all of the information on this topic [here](#).

### **Delinquent Accounts/Collections**

According to [Florida Statute 1010.03](#), each University is directed to exert every effort to collect all delinquent accounts, including utilizing a collection agency and restricting the release of transcripts, diplomas and other University services. Therefore, any student account with a balance more than 90 days past due is deemed eligible to be sent to collections. Once a student account is placed with a collection agency, the account will be assessed significant collection costs, up to 33.33 percent, in addition to the original account balance.

### COURSE DESCRIPTIONS

## INTERDISCIPLINARY PROGRAMS

Florida Atlantic University's interdisciplinary programs capitalize on the advancements and knowledge of various academic disciplines to offer students unique programs of study. By combining related and sometimes unrelated disciplines across FAU colleges, these programs prepare students for multifaceted careers.

The programs listed below are offered across multiple colleges. The University also offers interdisciplinary programs shared by various departments within a college. Those programs are listed within the specific college sections.

### Undergraduate Programs

- [Bachelor of Professional Studies](#)
- [Bachelor of Science with a Major in Data Science and Analytics](#)
- [Cybersecurity Minor and Certificate](#)
- [FAU Max Planck Honors Program](#)
- [Interdisciplinary Applications of Artificial Intelligence Minor and Certificate](#)

## **Undergraduate Minor**

- [Health Humanities](#)

## **Undergraduate Certificates**

- [Applied Mental Health Services](#)
- [Data Science](#)
- [Undergraduate Research Certificate](#)

## **Graduate Programs**

- [Master of Science with Major in Data Science and Analytics](#)
- [Master of Science with Major in Information Technology and Management](#)
- [Professional Master of Science with Major in Information Technology and Management](#)
- [Doctor of Philosophy with Major in Neuroscience](#)

## **Graduate Certificates**

- [Big Data Analytics](#)
- [Professional Big Data Analytics](#)
- [Cyber Security](#)
- [Transportation, Logistics and Supply Chain Management](#)

# **UNDERGRADUATE PROGRAMS**

## **PROFESSIONAL STUDIES**

### **BACHELOR OF PROFESSIONAL STUDIES (B.P.S.)**

*(Minimum of 120 credits required)*

The Bachelor of Professional Studies (B.P.S.) is a cross-disciplinary degree program designed for

working adults who have earned an A.A. or A.S. or have completed the State of Florida general education requirements but did not complete their bachelor's degree. This degree is for individuals who have been out of college more than one year and for whom completing a degree could lead to advancement or change in their career. The B.P.S. requires a minimum of 120 credits and completion of advanced coursework in six professional competency areas, which includes a required capstone project (IDS 4894).

Students pursuing a Bachelor of Professional Studies will have the flexibility to take courses across colleges at FAU and in various formats, including in-person day or evening courses or online courses. Professional Studies also offers a fully online program; however, it's important to note that due to the variety of course options available under this program, a specific course may not be available in this format. To verify if a particular course is available in a fully online format, please refer to the [course schedule](#) or reach out to [professionalstudies@fau.edu](mailto:professionalstudies@fau.edu) via email. Professional Studies students are not permitted to concurrently earn a B.A. or B.S. degree. Students must meet all University and state bachelor's degree requirements.

### Admission Requirements\*

1. Completion of an A.A., A.S. or the State of Florida general education requirements.
2. Program entry is for returning students who have not maintained continuous enrollment, as defined by University policy, at a state college and/or university.
3. Minimum 2.0 overall GPA.
4. Foreign Language Entrance Requirement: Two years of same foreign language in high school.\*\*

\* Exceptions will be considered by petition on a case-by-case basis.

\*\* If Foreign Language Entrance Requirement was not achieved in high school, students must complete the Foreign Language Graduation Requirement: Second semester proficiency at the college level.

### Degree Requirements

1. A minimum of 120 credits overall.
2. A minimum of a 2.0 FAU GPA.
3. A minimum of 30 upper-division credits must be earned at FAU.
4. A minimum of 45 upper-division credits must be 3000-4000 level or higher.
5. [Foreign Language Entrance Requirement](#).
6. [Civic Literacy Requirement](#): Only required if the student is entering the Florida

College/University Public System on or after fall 2018.

7. **Summer Credit Requirement:** Only required if the student is admitted to FAU with fewer than 60 transfer credits.
8. **Gordon Rule Writing and Computational Skill Requirement.** Student must earn a "C" or better in each course applied to this requirement.
9. General Education Requirement: [FAU's General Education Program](#) or A.A. degree from Florida public institution.
10. Core competencies of 18 credits. IDS 4894 required. Student must earn a "C" or better.

---

## Core Competencies

*18 credits with a minimum of one course from each of the six areas. IDS 4894 required.*

---

### Advanced Writing - 3 credits

Professional Writing	ENC 3213	3
Advanced Exposition	ENC 3310	3
Writing for Nonprofits	ENC 4354	3
Studies in Writing and Rhetoric	ENG 4020	3
Rhetoric of Argument	SPC 4517	3

Globalization and Social Movements	SYP 3454	3
Global Social Change	SYP 4453	3
Study Abroad (must be upper division and an approved course)		3
<b>Career Enrichment Requirement - 3 credits</b>		

Professional Internship	IDS 3949	0-4
RI: Professional Capstone ( <b>Req uired</b> )	IDS 4894	1-4
Capstone Seminar on Leadership	LDR 4951	3
Professional Development	SLS 4342	3
Directed Independent Study	Any prefix with 4905/4906	1-4

### Electives (if needed)

If elective coursework is needed to complete the total of 120 credits or the upper-division or residency minimums, please see the program academic advisor for a list of suggested courses.

Returning students are highly encouraged to take SLS 3115, Foundations for Personal Academic and Professional Development in the first semester.

Students are strongly encouraged to gain practical experience through participation in internship opportunities. For more information, contact the FAU Career Center at 561-297-3533 or visit the [website](#).

## HONORS PROGRAM IN PROFESSIONAL STUDIES

The Honors in Professional Studies Program provides FAU's students in the Bachelor of Professional Studies (B.P.S.) program the opportunity to achieve academic excellence beyond the level of standard coursework. Students interested in pursuing the Honors designation in the Professional Studies Program need to meet the following eligibility and admission requirements.

### Requirements for Eligibility and Admission to the Honors in Professional Studies Program

The number of students in the program is limited to 20 percent of students within the Bachelor of Professional Studies Program. To be eligible for the program, students must:

1. Meet all university requirements to declare major in the B.P.S. program;
2. Complete the equivalent of a full-time enrollment semester at FAU (12 credits) with a cumulative GPA of at least 3.25; and
3. Submit a formal application after completion of, or in the semester when, 12 credits are

completed and prior to the beginning of the semester in which student seeks to enroll in the Honors in Professional Studies Program

The application package should include:

1. Application Form;
2. Unofficial transcript;
3. Personal statement;
4. A letter of support from a member of the Professional Studies Faculty (This should be from one of the faculty members from one of the 12 credits of courses already taken in requirement 2); and
5. Interview with Program's Coordinator and Advisor.

### **Requirements to Maintain Eligibility in the Honors Professional Studies Program**

1. Maintain good academic and ethical standing;
2. Maintain cumulative GPA of 3.25 in the 12 credits of Honors-in-the-Major coursework; and
3. Maintain cumulative GPA of at least 3.25 in the final 30 credits, which includes the Honors coursework.

If any of the above standards for maintaining eligibility in the program are not met, students will be advised accordingly on how to undertake remedial actions after meeting with the Program's Coordinator and Advisor.

Students will not be allowed to continue in the Honors in Professional Studies Program for:

1. Any violation of the Code of Academic Integrity; or
2. Any grade of less than a "B" in an Honors-in-the-Major course requirement.

### **Program Enrichment Requirements**

Honors-level enrichment seeks to enhance students' experience in the program. For students to receive the Honors-in-the-Major designation, the following enrichment requirements must be met:

#### ***General Enrichment Requirement***

Students in the Honors in Professional Studies Program will be required to complete one of the following:

1. Join a professional or honors organization;
2. Participate in extensive mentoring in practical research or internship by a faculty member (e.g., a

- Summer Undergraduate Research Fellowship (SURF), an Undergraduate Research Grant);
3. Submit research to any of the FAU Research Symposia;
  4. Submit research to FAU's Undergraduate Research Journal or appropriate external publication (to be approved by the Program's Coordinator and Advisor);
  5. Once per semester, attend a faculty seminar or professional development seminar (to be approved by the Program's Coordinator and Advisor); and

Other enrichment activity as approved by the Program's Coordinator and Advisor.

### ***Coursework Requirement***

The Honors in Professional Studies Program requires completion of 9 credits of coursework. These 9 credits can be any combination of Honors-Level designated courses or courses where additional enrichment requirements have been agreed upon between the student and the instructor of the course as per the guidelines of the Honors Compact contract.

### ***Honors Compact Procedure***

Students must register for an approved upper-division course that may be designated as Honors-level with an Honors Compact. These are to be determined in consultation with the Program's Coordinator and Advisor.

1. The student approaches the instructor and requests the course be designated as Honors;
2. The decision is entirely the instructor's; however, the Program's Coordinator and Advisor will work closely with instructors to facilitate the process.
3. Once the instructor and the student agree on the terms of the Honors Compact (ideally before the drop/add date), the signed document is forwarded to the University Honors Program Director for final approval.

Ideally, Honors courses (Honors Compacts) should be completed no later than the equivalent of the next to last semester at FAU.

### ***Honors Capstone Project Requirement***

Student will complete IDS 4894 RI: Professional Capstone (as an Honors Compact) for 3 credits. The final honors capstone product or performance is assessed by the faculty supervisor and involves a public capstone presentation or performance.

## DATA SCIENCE AND ANALYTICS BACHELOR OF SCIENCE (B.S.)

### Data Science in the Natural Sciences Concentration

### Data Science and Engineering Concentration

### Data Science in Business Concentration

*(Minimum of 120 credits required)*

The Bachelor of Science with Major in Data Science and Analytics (BSDSA) is a multi-college, interdisciplinary program jointly administered by the Department of Mathematics and Statistics in the Charles E. Schmidt College of Science, the Department of Electrical Engineering and Computer Science (EECS) in the College of Engineering and Computer Science, the Department of Information Technology and Operations Management (ITOM) in the College of Business, the Department of Political Science in the Dorothy F. Schmidt College of Arts and Letters and the School of Criminology and Criminal Justice in the College of Social Work and Criminal Justice. The program aims to prepare students with the essential skill sets across disciplines needed for data-driven applications in industry, business and government. To allow for maximum flexibility in career aspirations, students can select from three concentrations:

- [Data Science in the Natural Sciences Concentration](#)
- [Data Science and Engineering Concentration](#)
- [Data Science in Business Concentration](#)

### Admission Requirements

All students must meet the minimum admission requirements of the University. Refer to the [Admissions](#) section of this catalog.

### Prerequisite Coursework for Transfer Students

Students transferring to Florida Atlantic University must complete lower-division requirements including the requirements of the General Education Program, College Algebra and Introductory Statistics. Lower-division requirements may be completed through the A.A. degree from any Florida public college, university or community college, or through equivalent coursework at another regionally accredited institution. Before transferring and to ensure timely progress toward the BSDSA degree, students must also complete the prerequisite courses for their major as outlined in the [Transition Guides](#).

All courses not approved by the Florida Statewide Course Numbering System that will be used to

satisfy requirements will be evaluated individually on the basis of content and will require a catalog course description and a copy of the syllabus for assessment.

## Capstone

The Capstone for the B.S. degree with major in Data Science and Analytics is a cross college course that can be taken multiple times with a minimum of 3 credits as a requirement for the degree. Students apply their theoretical knowledge, methods and tools acquired during the Data Science and Analytics program to a real-world problem and engage in processing data and applying appropriate analytic methods to the problem. Students implement a solution using appropriate tools and can work individually or in teams under the supervision of the course instructor or another faculty member. This can be accomplished in three ways: an approved Project, Research Experience or Written Thesis.

## Degree Requirements

The minimum number of credits required for the Bachelor of Science with major in Data Science and Analytics is 120 credits: 36 credits in the General Education Program, 48 credits of major requirements and up to 36 credits of general e lectives. Additional requirements:

1. A minimum of 45 upper-division credits;
2. Students must attain a minimum grade of "C" in all major courses to receive credit in the major; and
3. No major course with a pass/fail grade will be accepted.

The 48 required credits for the major are listed below.

## HEALTH HUMANITIES UNDERGRADUATE MINOR

*(Minimum of 15 credits)*

The minor in Health Humanities is open to all undergraduate students at FAU. The minor is awarded

upon graduation from an undergraduate program at FAU; it is not awarded independently of an undergraduate degree.

### ***Requirements***

Requirements for the minor include completion of 15 credits with a minimum overall GPA of 2.0. Students must complete at least 12 credits in the Dorothy F. Schmidt College of Arts and Letters, with at least 9 credits at the upper-division (3000-4000) level.

The courses listed below are all electives and are pre-approved for the minor. Courses from outside the College of Arts and Letters are listed so that students in those colleges may know which courses from their own college may be applied to the Health Humanities minor. For consideration of courses not listed below, please contact the minor program director, [Prof. Michael Rapoport](#).

**CYBERSECURITY**  
**UNDERGRADUATE MINOR**  
**UNDERGRADUATE CERTIFICATE**

*(Minimum of 12 credits required)*

Cybersecurity is the study of methods to ensure information and system security. Industry and

government need an educated workforce to serve as information and systems security analysts, security and network administrators and more. Due their extensive expertise and facilities, the departments of Information Technology and Operations Management (in the College of Business), Electrical Engineering and Computer Science (In the College of Engineering and Computer Science) and Mathematics and Statistics (in the College of Science) have jointly designed the Cybersecurity Minor and Certificate. Three tracks, each requiring 12 credits, constitute the minor and certificate: Information Technology (IT), Computer Science (CS) and Mathematical Sciences (MS).

## Tracks

***IT Cybersecurity Track:*** The 12 credits should be completed as follows: one IT core course, two 3-credit courses from the IT elective list and one 3-credit course from the IT, CS or MS elective course lists. A maximum of 3 credits used for the minor may count toward other major requirements. A minimum of two courses (6 credits) must be exclusive to the minor.

***CS Cybersecurity Track:*** The 12 credits should be completed as follows: one CS core course, two 3-credit courses from the CS elective course list and one 3-credit course from the IT, CS or MS elective course lists.

***MS Cybersecurity Track:*** The 12 credits should be completed as follows: one MS core course, two 3-credit courses from the MS course list and one 3-credit course from the IT, CS or MS elective course lists.

## Admission

Open to students who satisfy the prerequisites required for each course in the program with a minimum grade of "C." Each track in the program requires 12 credits with minimum grades of "C" in all courses. Students cannot obtain both a certificate and a minor. All course materials are in English. All international students must demonstrate proficiency in English to enter the program.

The certificate is available to degree-seeking students, non-degree students and working professionals. Students pursuing the certificate may apply for it in the college where the track is located upon successful completion of the coursework.

---

## IT Cybersecurity Track

### ***Required IT Core Course***

Business Data Communications	ISM 4220	3
------------------------------	----------	---

***IT elective courses: Select two from this list and one more from any track list***

Introduction to Cybersecurity	ISM 4320	3
Management of Information Assurance and Security	ISM 4323	3
Computer Forensics	ISM 4324	3

## CS Cybersecurity Track

### *Required CS Core Course*

Foundations of Cybersecurity	CNT 4403	3
------------------------------	----------	---

*CS elective courses: Select two from this list and one more from any track list. Additional courses may be used as replacements with prior approval of the department.*

Trustworthy Artificial Intelligence	CAP 4623	3
Introduction to Cryptographic Engineering	CDA 4321	3
Cyber Physical Systems Security	CIS 4213	3
Operating Systems Security	CIS 4367	3
Network and Data Security	CNT 4411	3

## MS Cybersecurity Track

### *Required MS Core Course*

Cryptography and Information Security	CIS 4362	3
---------------------------------------	----------	---

*MS elective courses: Select two from this list and one more from any track list*

RI: Introduction to Data Science	CAP 3786	3
Introduction to Coding Theory	MAD 4605	3
Mathematics of Cybersecurity	MAP 4190	3
Mathematics for Cryptography	MAS 4206	3

## THE FAU MAX PLANCK HONORS PROGRAM (MPHP)

Eligible College of Science majors in Biology, Psychology, Neuroscience and Behavior, and Medical Biology may apply to participate in this Jupiter-specific honors program for undergraduates. For students pursuing the MPHP, 3 to 6 of the elective credits in their individual program must be applied toward the requirements of the MPHP. These include successful completion of a Capstone experience (1 to 3 credits) and three different MPHP Enrichment courses (1 credit each) from those listed below. A minimum grade of "B" must be achieved in graded courses ("S" in non-graded courses) among these exclusive MPHP course options for the credits to count toward the requirements of the MPHP. Visit the [MPHP website](#) to apply.

### FAU Max Planck Honors Program Required Coursework

#### Core Course (required for all participants)

Honors Introduction to Neuroscience Research	PSB 4003	1
--	----------	---

#### Enrichment Course Electives (at a minimum, two different courses are required)

Honors Scientific Communication	BSC 4934	1
---------------------------------	----------	---

Honors Advanced Cell Imaging for Neuroscientists	PCB 4933C	1
--	-----------	---

Honors Advanced Genetics	PCB 4935	1
--------------------------	----------	---

Honors Advanced Physiology	PCB 4937C	1
----------------------------	-----------	---

Honors Advanced Scientific Grant Writing	PCB 4956	1
--	----------	---

Honors Life Science Technologies	PSB 4110	1
----------------------------------	----------	---

Honors Advanced Techniques in Neuroscience	PSB 4112C	1
--	-----------	---

Honors Directed Independent Research	PSB 4916	0-3
--------------------------------------	----------	-----

Honors Symposium Presentation	PSB 4922	1
-------------------------------	----------	---

Honors Special Topics in Neuroscience	PSB 4931	1-3
---------------------------------------	----------	-----

Max Planck Honors Seminar	PSB 4932	1
---------------------------	----------	---

Honors Journal Club in Neuroscience	PSB 4951	1
<b>Capstone Options</b> (at least 3 credits in one of the following courses is required)		
FAU Max Planck Honors Capstone	PSB 4902	1-3
Honors Mentored Research	PSB 4910	1-3
FAU Max Planck Honors Thesis	PSB 4970	1-3

## INTERDISCIPLINARY APPLICATIONS OF ARTIFICIAL INTELLIGENCE

### UNDERGRADUATE MINOR

### UNDERGRADUATE CERTIFICATE

*(Minimum of 12 credits required)*

This minor or certificate require completion of four courses (12 credits) with a minimum grade of "C." Students must ensure that they have the necessary prerequisites for the selected courses. Waiver of prerequisites will be made on a case-by-case basis. Students cannot apply for both the minor and certificate in Interdisciplinary Applications of AI. Students can apply to one track at most.

The certificate is available to degree-seeking students, non-degree students and working professionals.

The minor is available to all undergraduate degree-seeking students and may be earned upon successful completion of the coursework below and the simultaneous completion of a bachelor's degree at FAU.

For the minor:

1. At least 9 of the 12 credits must be earned from FAU.
2. A t least 9 of the 12 credits must be upper-division credits.

### Tracks

The program contains four tracks from different disciplines.

**Societal Applications of Artificial Intelligence.** This 12-credit track is offered by the Department of Philosophy in the Dorothy F. Schmidt College of Arts and Letters. The program provides students with a fundamental awareness of how Artificial Intelligence (AI) operates, an understanding of how AI is utilized and comprehension of the consequences of those applications in various societal domains. The program requires no prior formal engineering or technical expertise.

**Core Courses - 6 credits**

Select two courses from the following four courses. At least one of the two core courses must be AMH 3372 or PHI 2681.

History of American Technology	AMH 3372	3
Applications of Artificial Intelligence	CAP 2603	3
Applied Machine Learning and Data Mining	CAP 4612	3
Ethics and Artificial Intelligence	PHY 2681	3

**Elective Courses - 6 credits**

Select two courses from the Electives Table.

**Business Applications of Artificial Intelligence.** This 12-credit track is offered by the Department of Information Technology and Operations Management (ITOM) in the College of Business. It requires no prior, formal engineering or technical experience. The program offers a business manager's level of understanding of Artificial Intelligence and how it can be positioned to improve efficiency and effectiveness across the organization, including what is the basket of AI tools that can be used in what business problems, how to customize available AI tools for the specific organizational problem and be successful, and how to avoid caveats.

**Core Courses - 6 credits**

Select two courses from the following four courses. At least one of the two core courses must be ISM 4041 or ISM 4421.

Applications of Artificial Intelligence	CAP 2603	3
Applied Machine Learning and Data Mining	CAP 4612	3
Contemporary Issues of Digital Management	ISM 4041	3
Artificial Intelligence and Digital Transformation for Business	ISM 4421	3

**Elective Courses - 6 credits**

Select two courses from the Electives Table.

**Technology Applications of Artificial Intelligence.** This 12-credit track is offered by the Department

of Electrical Engineering and Computer Science in the College of Engineering and Computer Science. Artificial Intelligence is making agriculture more precise and efficient, revealing new medical technologies and bringing the prospect of autonomous transportation and advanced manufacturing closer to reality. To become competitive, companies and corporations will have to embrace AI technological innovations to some extent. This program requires no prior formal engineering or technical experience. It provides students with knowledge and skills in the concepts, technologies and applications of Artificial Intelligence.

---

### Core Courses - 6 credits

Applications of Artificial Intelligence	CAP 2603	3
Applied Machine Learning and Data Mining	CAP 4612	3

### Elective Courses - 6 credits

Select two courses from the Electives Table.

**Scientific Applications of Artificial Intelligence.** This 12-credit track is offered by the Department of Mathematics and Statistics in the Charles E. Schmidt College of Science. The program provides students, through hands-on experience, an introduction to how Artificial Intelligence impacts the analysis of scientific data to gain a better understanding of natural, physical and social phenomena.

---

### Core Courses - 6 credits

Select two courses from the following three courses.

Applications of Artificial Intelligence	CAP 2603	3
RI: Introduction to Data Science	CAP 3786	3
Applied Machine Learning and Data Mining	CAP 4612	3

### Elective Courses - 6 credits

Select two courses from the Electives Table. At least one course must be chosen from the College of Science elective group.

---

### Electives Table - 6 credits

Select two courses.

## UNDERGRADUATE CERTIFICATES

### APPLIED MENTAL HEALTH SERVICES

#### UNDERGRADUATE CERTIFICATE

*(Minimum of 17 credits required)*

The undergraduate certificate in Applied Mental Health Services, offered jointly by the Department of Psychology and by the Department of Counselor Education in the College of Education, provides a curricular experience for students who wish to pursue careers in clinical psychology, mental health counseling and allied human services that enhances the student's chosen major. This program is also specialized training for students who wish to pursue graduate degrees in these critical-need careers.

Students who have completed 60 credits with a GPA of 3.0 or better may apply for the certificate program. The program requires a minimum of 17 credits by completing the psychology and counselor education courses below. Students must attain a 3.0 GPA or better to qualify for the certificate. A grade

of "C-" or better (unless otherwise noted in the course description) is required in all psychology courses taken as part of the requirements for the Applied Mental Health Services certificate. Students receiving a bachelor's degree in the Department of Psychology will meet the requirements for certification by completing the courses listed below, as well as their prerequisites. Students from other departments should meet with an advisor to determine eligibility and requirements for this certificate program. Students who qualify will receive a certificate of completion and a notation on their transcript.

---

### Required Courses - 15 credits

Psychopathology	CLP 4144	3
Clinical Psychology	CLP 4343	3
Neuropsychology	PSB 4240	3
Career and Lifespan Development	SDS 3340	3
Interpersonal Communication Skills	SDS 4410	3

---

### Elective Courses - 2 credits, minimum

Forensic Psychology	CLP 4390	3
Special Topics (in Counseling)*, **	MHS 5930	3
University Student Mentoring and Peer Coaching *	SDS 3483	2
Police Psychology	SOP 4750	3
Psychology and the Law	SOP 4751	3

\* Course offered in the Department of Counselor Education in the College of Education.

\*\* Prerequisite: Permission of instructor.

## DATA SCIENCE UNDERGRADUATE CERTIFICATE

*(Minimum of 15 credits required)*

Data Science is the study of methods to manage, analyze and extract knowledge from data. Industry and government need an educated workforce with the necessary expertise to make use of the enormous volumes of data available to them. Due to their extensive expertise and facilities, the departments of Mathematics and Statistics and Electrical Engineering and Computer Science have jointly designed the Data Science certificate. This 15-credit certificate program has two tracks: Mathematical Sciences (MathSci) and Computer Science and Analytics (CS). The Data Science certificate draws the 15 credits from Computer Science, Mathematics and Statistics.

### Admission

The program is open to students who satisfy the prerequisite courses required for each course in the certificate curriculum. Both tracks - MathSci and CS - require two core courses and three elective courses for a total of 15 credits. All five courses must be completed with a grade of "C" or better.

---

#### Core Courses - 6 credits

RI: Introduction to Data Science	CAP 3786	3 <b>or</b>
Introduction to Data Science and Analytics	CAP 4773	3 <b>or</b>
Introduction to Data Science	CAP 5768	3
Probability and Statistics for Engineers	STA 4032	3 <b>or</b>
Probability and Statistics 1	STA 4442	3 <b>or</b>
Stochastic Models for Computer Science	STA 4821	3

---

#### Elective Courses by Track - 9 credits

##### *MathSci Track*

Select two from the following courses and one more from this list or the list of CS elective courses.

RI: Computational Statistics	STA 4102	3
Statistical Designs	STA 4222	3
RI: Statistical Learning*	STA 4241	3
Applied Statistics 1	STA 4234	2
Applied Statistics 1 Lab	STA 4202L	1

Applied Statistics 2*	STA 4702	3
-----------------------	----------	---

Applied Time Series and Forecasting	STA 4853	3
-------------------------------------	----------	---

\* Recommended electives.

### ***CS Track***

Select two from the following courses and one more from this list or the list of MathSci elective courses.

Introduction to Deep Learning	CAP 4613	3
-------------------------------	----------	---

Introduction to Artificial Intelligence	CAP 4630	3
---	----------	---

Introduction to Data Mining and Machine Intelligence	CAP 4770	3
--	----------	---

Introduction to Computer Systems Performance Evaluation	CEN 4400	3
---	----------	---

Introduction to Database Structures	COP 3540	3
-------------------------------------	----------	---

Applied Database Systems	COP 4703	3
--------------------------	----------	---

## **UNDERGRADUATE RESEARCH UNDERGRADUATE CERTIFICATE**

*(Minimum of 12 credits required)*

To recognize undergraduate students' excellence in undergraduate research, the Office of Undergraduate Research and Inquiry (OURI) has established the Undergraduate Research Certificate. Requirements for the Research Certificate include completion of 12 credits of research exposure, skill-building and intensive courses as well as dissemination of the outcomes of students' research and inquiry through a research presentation or exhibition.

Degree-seeking undergraduate students may earn the Research Certificate by completing the following requirements.

1. 12 credits of coursework related to undergraduate research from the following:
  - a. Up to 6 credits of General Education Program courses or Honors Core courses (for Wilkes Honors College students) at the Research Level including:

---

**Research Exposure, General Education Courses Approved List**

---

Honors Introduction to Anthropology	ANT 2000	3
Life Science Lab or RI: Life Science Lab	BSC 1005L	1
Contemporary Chemical Issues	CHM 1020C	3
General Chemistry For the Health Sciences	CHM 2032	3
General Chemistry 1	CHM 2045	3
Honors Psychopathology	CLP 4143	3
Principles of Macroeconomics	ECO 2013	<b>3 or</b>
Principles of Microeconomics	ECO 2023	3
Disability and Society	EEX 2091	3
The Blue Planet	ESC 2000	3
Honors 20th Century Europe	EUH 2341	3
Honors Freshman Seminar in History	HIS 1933	3
Honors Ways of Knowing	PHI 2361	3
Honors Privacy	POS 3623	3
Introductory Statistics	STA 2023	3
Social Problems	SYG 2010	3

- b. Up to 3 credits of Research Skill-Building coursework in research methods from the approved list below.
- c. At least 3 credits of Research-Intensive-designated courses and/or Directed Independent Research. Honors thesis and courses with honors compacts can substitute for the Research-Intensive designation.

2. Presentation at one of the FAU Undergraduate Research Symposia (Boca Raton, Broward and Jupiter), Senior Engineering Design Showcase or appropriate discipline-specific conferences, symposia, exhibitions, or showcases (internal or external), as approved by the University's

Undergraduate Research Curriculum Committee. For internal symposia, students register for a zero-credit course: IDS 4914, Undergraduate Research Forum. For the Senior Engineering Design Showcase, students will receive credit for the dissemination of their research upon successful completion of one of the following courses: CGN 4804C, EGN 4952C, EOC 4804L or EML 4551 with a minimum grade of "C."

Additional stipulations include:

1. Courses that are taken S/U may count toward the certificate with a grade of Satisfactory; for courses with standard grading, students must complete the courses with a minimum grade of "C."
2. A maximum of 3 transfer credits may be applied to the certificate.
3. Course substitutions will be reviewed by the Undergraduate Research Curriculum Committee on a case-by-case basis.
4. Students should consult with the Office of Undergraduate Research and Inquiry and/or their undergraduate advisor for more information.

## GRADUATE PROGRAMS

### DATA SCIENCE AND ANALYTICS

#### MASTER OF SCIENCE (M.S.)

**Data Science via Scientific Inquiry Concentration**

**Data Science and Engineering Concentration**

**Data Science in Business Concentration**

**Data Science in Society Concentration**

The Master of Science with Major in Data Science and Analytics (MSDSA) is a multi-college interdisciplinary program jointly administered by the Department of Mathematics and Statistics in the Charles E. Schmidt College of Science, the Department of Electrical Engineering and Computer Science in the College of Engineering and Computer Science, the Department of Information

Technology and Operations Management in the College of Business and the Department of Political Science in the Dorothy F. Schmidt College of Arts and Letters. The program aims to prepare students with essential skill sets needed to analyze small, fast, big, massive and complex data. To allow for maximum flexibility in career aspirations, students may select from four concentrations:

- [Data Science via Scientific Inquiry Concentration](#), Department of Mathematics and Statistics
- [Data Science and Engineering Concentration](#), Department of Electrical Engineering and Computer Science (EECS) (This concentration is also available fully online.)
- [Data Science in Business Concentration](#), Department of Information Technology and Operations Management
- [Data Science in Society Concentration](#), Department of Political Science

### **Admission Requirements**

To be admitted to the MSDSA program, applicants must:

1. Have obtained a bachelor's degree from an accredited institution and possess a minimal background consisting of MAC 2233 (Methods of Calculus) or equivalent and STA 2023 (Introductory Statistics) or equivalent. Students applying to the Data Science and Engineering concentration must have completed a college-level introductory programming course with a minimum grade of "C." Knowledge of Python and statistical packages such as R, as well as coursework in linear algebra are recommended for all concentrations;
2. Have an undergraduate GPA of 3.0 or higher in the last 60 credits of undergraduate coursework;
3. Submit two letters of recommendation for all concentrations, except the Data Science and Engineering concentration;
4. Have attained scores of at least 151 (verbal) and 151 (quantitative) on the Graduate Record Examination (GRE). GRE scores more than five years old are not acceptable normally. GRE is not required for admission to the Data Science and Engineering concentration;
5. Be proficient in written and spoken English. International students from non-English-speaking countries must present a score of at least 500 (paper-based test) or 213 (computer-based test) or 79 (internet-based test) on the Test of English as a Foreign Language (TOEFL) or a score of at least 6.0 on the International English Language Testing System (IELTS); and
6. Meet other requirements of the FAU Graduate College.

### **Curriculum Requirements**

The MSDSA program offers both thesis and non-thesis options. Both options require a minimum of 30 credits. Students are required to take one common core course, two additional core courses, four concentration courses and three elective courses for the total of 30 credits. The exact courses taken are

to be determined by the students and their advisory committee. The thesis option requires only one elective course and 6 thesis credits. Students selecting the thesis option must complete and defend a written thesis successfully.

### Data Science via Scientific Inquiry Concentration

#### Common Core Courses

Introduction to Data Science	CAP 5768	3
------------------------------	----------	---

Biostatistics	STA 5195	3
---------------	----------	---

Biostatistics	STA 5195	3 or
Data Mining and Machine Learning	CAP 6673	3 or
Introduction to Business Analytics and Big Data	ISM 6404	3

*Take four concentration courses*

Advanced Anthropological Research 2	ANG 6092	3
Quantitative Reasoning in Anthropological Research	ANG 6486	3
Social Networks and Big Data Analytics	CAP 6315	3
Quantitative Communication Research	COM 6316	3
Social Media and Web Analytics	ISM 6555	3

Seminar in Political Behavior	POS 6208	3
Research Design in Political Science	POS 6736	3
Seminar in Advanced Research Methods	SYA 6305	3

*Take three elective courses from the Electives Table. Thesis option requires only one elective course and 6 thesis credits.*

## Electives Table

### ***Business Analytics***

Data Mining and Predictive Analytics	ISM 6136	3
Database Management Systems	ISM 6217	3
Introduction to Business Analytics and Big Data	ISM 6404	3
Advanced Business Analytics	ISM 6405	3
Social Media and Web Analytics	ISM 6555	3
Data Management and Analysis with Excel	QMB 6303	3
Data Analysis for Managers	QMB 6603	3

### ***Database and Cloud Computing***

Multiprocessor Architecture	CDA 6132	3
Cloud Computing	CEN 5086	3
New Directions in Database Systems	COP 6726	3
Theory and Implementation of Database Systems	COP 6731	3
Database Management Systems	ISM 6217	3

### ***Data Mining and Machine Learning***

Introduction to Neural Networks	CAP 5615	3
---------------------------------	----------	---

Social Networks and Big Data Analytics	CAP 6315	3
Data Mining for Bioinformatics	CAP 6546	3
Machine Learning for Computer Vision	CAP 6618	3
Deep Learning	CAP 6619	3
Reinforcement Learning	CAP 6629	3
Artificial Intelligence	CAP 6635	3
Data Mining and Machine Learning	CAP 6673	3 <b>or</b>
Applied Machine Learning	CAP 6610	3

## **INFORMATION TECHNOLOGY AND MANAGEMENT MASTER OF SCIENCE (M.S.)**

**Advanced Information Technology Concentration**

**Business Analytics Concentration**

**Computer Science Data Analytics Concentration**

**Cybersecurity Concentration**

**Information Technology Management Concentration**

The Master of Science with Major in Information Technology and Management (MSITM) is jointly offered by the Department of Electrical Engineering and Computer Science (EECS) in the College of Engineering and Computer Science and the Department of Information Technology and Operations Management (ITOM) in the College of Business. Designed for highly motivated individuals with computing and/or managerial backgrounds, the program aims to prepare students for a management career in the area of information technology in organizations. To allow for maximum flexibility in career aspirations, students can select from four concentrations: Advanced Information Technology, emphasizing the technical aspect of organizational IT systems; Information Technology Management, focusing on the management issues of IT in organizations; Business Analytics; Computer Science Data Analytics; and Cybersecurity. The program is offered in person with the Business Analytics and the Information Technology Management concentrations offered in person and fully online.

### **Admission Requirements**

To be admitted to the MSITM program applicants must have:

1. An undergraduate degree in Computer Science, Information Engineering Technology or an IT-related field of study. Applicants with another undergraduate degree and documented work

- experience of two or more years in an IT function will be evaluated as well;
2. An undergraduate GPA of 3.0 or higher;
  3. GRE or GMAT scores more than five years old are normally not acceptable. The GRE and the GMAT requirement is waived for any student who has a baccalaureate degree from either FAU's Department of Electrical Engineering and Computer Science (EECS) or FAU's Department of Information Technology and Operations Management (ITOM) with a GPA of at least 3.25 (out of a possible 4.0) in the last 60 credits attempted prior to graduation. GRE/GMAT is not required for admission to the Advanced Information Technology Concentration, Computer Science Data Analytics Concentration and Cybersecurity Concentration;
  4. International students from non-English-speaking countries must be proficient in written and spoken English as evidenced by a score of at least 500 (paper-based test) or 213 (computer-based test) or 79 (Internet-based test) on the Test of English as a Foreign Language (TOEFL) or a score of at least 6.0 on the International English Language Testing System (IELTS); and
  5. Meet other requirements of the FAU Graduate College.

## Degree Requirements

Students in all concentrations are required to complete 30 graduate credits, or ten, 3-credit courses (5000 level or higher), with a 3.0 GPA or better to graduate.

Students in the Advanced Information Technology, ~~Computer Science Data Analytics~~, and Cybersecurity concentrations will be awarded the degree by the College of Engineering and Computer Science, while those in the Information Technology Management and Business Analytics concentrations will have their degrees awarded by the College of Business. For more information about the Master of Science in Information Technology and Management degree program, call the Department of Electrical Engineering and Computer Science at 561-297-3482, or email [ceecs@fau.edu](mailto:ceecs@fau.edu).

## Advanced Information Technology Concentration (30 credits)

---

### Students are required to take the following three courses:

---

Software Engineering	CEN 5035
Theory and Implementation of the Database Systems	COP 6731
Management of Information Systems and Technology	ISM 6026

---

*In addition, students must take five electives from graduate courses with prefixes CAP, CDA, CEN,*

***CIS, COP, COT and CNT offered by the Department of Electrical Engineering and Computer Science (EECS).***

**The last two electives must be chosen from the following ITOM courses:**

Mobile Apps for Business	ISM 6058
Data Mining and Predictive Analytics	ISM 6136
Information Technology Project and Change Management	ISM 6316
Management of Information Assurance and Security	ISM 6328
Enterprise Information Technology Service Management	ISM 6368
Advanced Business Analytics	ISM 6405
Business Innovation with Artificial Intelligence	ISM 6427C
Blockchain and Crypto Assets: Digital Business Transformation	ISM 6455
Web-Based Business Development	ISM 6508
Information Technology Sourcing Management	ISM 6509
Social Media and Web Analytics	ISM 6555
Special Topics	ISM 6930
Data Management and Analysis with Excel	QMB 6303

### **Information Technology Management Concentration (30 credits)**

**Students are required to take the following six courses offered by the College of Business:**

Management of Information Systems and Technology	ISM 6026
Information Technology Project and Change Management	ISM 6316

Management of Information Assurance and Security	ISM 6328
Web-Based Business Development	ISM 6508
Information Technology Sourcing Management	ISM 6509
Communication Strategies for Business Professionals and Core-Course Follow-Up	GEB 6215

**Students must take one elective from the following ITOM courses:**

Mobile Apps for Business	ISM 6058
Data Mining and Predictive Analytics	ISM 6136
Enterprise Information Technology Service Management	ISM 6368
Advanced Business Analytics	ISM 6405
Business Innovation with Artificial Intelligence	ISM 6427C
Blockchain and Crypto Assests: Digital Business Transformation	ISM 6455
Social Media and Web Analytics	ISM 6555
Special Topics	ISM 6930
Data Management and Analysis with Excel	QMB 6303

***In addition, students must take three electives from graduate courses with prefixes CAP, CDA, CEN, CIS, COP, COT and CNT offered by the Department of Electrical Engineering and Computer Science (EECS).***

**Computer Science Data Analytics Concentration (30 credits)**

**Students are required to take the following three courses offered by the Electrical Engineering and Computer Science (EECS) Department:**

Introduction to Data Science	CAP 5768
Software Engineering	CEN 5035

*In addition, students must take four EECS Department electives as follows: two graduate courses with the prefix CAP and two graduate courses with prefixes CAP, CDA, CEN, CIS, COP, COT and CNT.*

**The last three electives must be chosen from the following ITOM courses:**

Data Mining and Predictive Analytics	ISM 6136
Database Management Systems	ISM 6217
Introduction to Business Analytics and Big Data	ISM 6404
Advanced Business Analytics	ISM 6405
Business Innovation with Artificial Intelligence	ISM 6427C
Social Media and Web Analytics	ISM 6555
Special Topics	ISM 6930
Data Management and Analysis with Excel	QMB 6303
Data Analysis for Managers	QMB 6603

**Note:** Students in this concentration may satisfy the requirements for the [Big Data Analytics certificate](#). Follow up with the EECS advisor to see if the student meets all the requirements for the certificate.

### **Business Analytics Concentration (30 credits)**

**Students are required to take the following six courses offered by the College of Business:**

Management of Information Systems and Technology	ISM 6026
Data Mining and Predictive Analytics	ISM 6136
Introduction to Business Analytics and Big Data	ISM 6404
Business Innovation with Artificial Intelligence	ISM 6427C

Advanced Business Analytics	ISM 6405 <b>or</b>
-----------------------------	--------------------

Social Media and Web Analytics	ISM 6555
--------------------------------	----------

Communication Strategies for Business Professionals and Core-Course Follow-Up	GEB 6215
---	----------

**Students must take one elective from the following ITOM courses:**

Mobile Apps for Business	ISM 6058
--------------------------	----------

Information Technology Project and Change Management	ISM 6316
--	----------

Management of Information Assurance and Security	ISM 6328
--	----------

Enterprise Information Technology Service Management	ISM 6368
--	----------

Blockchain and Crypto Assets: Digital Business Transformation	ISM 6455
---	----------

Web-Based Business Development	ISM 6508
--------------------------------	----------

Information Technology Sourcing Management	ISM 6509
--	----------

Special Topics	ISM 6930
----------------	----------

Data Management and Analysis with Excel	QMB 6303
---	----------

***In addition, students must take three electives from the EECS Department as follows: two graduate courses with the prefix CAP and one graduate course with prefixes CAP, CDA, CEN, CIS, COP, COT and CNT.***

### **Cybersecurity Concentration (30 credits)**

**Students are required to take the following three courses:**

Software Engineering	CEN 5035
----------------------	----------

Theory and Implementation of the Database Systems	COP 6731
---	----------

Management of Information Systems and Technology	ISM 6026
--	----------

**Students must take three cybersecurity courses from the list below. Course substitution is allowed with the advisor's prior approval.**

Cryptographic Engineering	CDA 5326
Practical Aspects of Modern Cryptography	CIS 5371
Computer Data Security	CIS 6370
Distributed Systems Security	CIS 6375
Cryptocurrencies and Blockchain Technologies	CIS 6730
Secret Sharing Protocols	COT 6427
Data Analysis and Modeling for Cybersecurity	CAI 6803

**Students must take two Electrical Engineering and Computer Science (EECS) courses with prefixes of CAP, CDA, CEN, CIS, COP, COT, CTS or CNT offered by the EECS department.**

**The last two electives must be chosen from the following Information Technology and Operations Management (ITOM) courses:**

Management of Information Assurance and Security	ISM 6328
Digital Forensics Management	ISM 6376
Business Innovation with Artificial Intelligence	ISM 6427C
Blockchain and Crypto Assets: Digital Business Transformation	ISM 6455
Special Topics	ISM 6930

## **INFORMATIONAL TECHNOLOGY AND MANAGEMENT MASTER OF SCIENCE (M.S.) PROFESSIONAL PROGRAM**

**Advanced Information Technology Concentration**

**Business Analytics Concentration**

**Computer Science Data Analytics Concentration**

**Information Technology Management Concentration**

The Professional Master of Science with major in Information Technology and Management is a self-supporting program offered jointly by the Department of Electrical Engineering and Computer Science

in the College of Engineering and Computer Science and the Department of Information Technology and Operations Management in the College of Business. This program is designed for working professionals. It offers four concentrations and requires 30 credits. Degree requirements are listed in the tables below. The program is offered in person with the Business Analytics and the Information Technology Management concentrations offered in person and fully online.

### **Advanced Information Technology Concentration (30 credits)**

**Students are required to take the following three courses:**

Software Engineering	CEN 5035
----------------------	----------

Theory and Implementation of the Database Systems	COP 6731
---	----------

Management of Information Systems and Technology	ISM 6026
--	----------

*In addition, students need to take six electives from the graduate courses with prefixes CAP, CDA, CEN, CIS, COP, COT and CNT offered by the Department of Electrical Engineering and Computer Science (EECS).*

**Lastly, one elective course must be chosen from the following ITOM courses:**

Mobile Apps for Business	ISM 6058
--------------------------	----------

Data Mining and Predictive Analytics	ISM 6136
--------------------------------------	----------

Information Technology Project and Change Management	ISM 6316
--	----------

Management of Information Assurance and Security	ISM 6328
--	----------

Enterprise Information Technology Service Management	ISM 6368
--	----------

Advanced Business Analytics	ISM 6405
-----------------------------	----------

Business Innovation with Artificial Intelligence	ISM 6427C
--	-----------

Blockchain and Crypto Assets: Digital Business Transformation	ISM 6455
---	----------

Web-Based Business Development	ISM 6508
--------------------------------	----------

Information Technology Sourcing Management	ISM 6509
--	----------

Social Media and Web Analytics	ISM 6555
Special Topics	ISM 6930
Data Management and Analysis with Excel	QMB 6303

### **Information Technology Management Concentration (30 credits)**

**Students are required to take the following six courses offered by the College of Business:**

Management of Information Systems and Technology	ISM 6026
Information Technology Project and Change Management	ISM 6316
Management of Information Assurance and Security	ISM 6328
Web-Based Business Development	ISM 6508
Information Technology Sourcing Management	ISM 6509
Communication Strategies for Business Professionals	GEB 6217

**Students must take two electives from the following ITOM courses:**

Mobile Apps for Business	ISM 6058
Data Mining and Predictive Analytics	ISM 6136
Enterprise Information Technology Service Management	ISM 6368
Advanced Business Analytics	ISM 6405
Business Innovation with Artificial Intelligence	ISM 6427C
Blockchain and Crypto Assets: Digital Business Transformation	ISM 6455
Social Media and Web Analytics	ISM 6555
Special Topics	ISM 6930

Data Management and Analysis with Excel

QMB 6303

*In addition, students must take two electives from graduate courses with prefixes CAP, CDA, CEN, CIS, COP, COT and CNT offered by the Department of Electrical Engineering and Computer Science (EECS).*

### Computer Science Data Analytics Concentration (30 credits)

**Students are required to take the following three courses offered by the Electrical Engineering and Computer Science (EECS) Department:**

Introduction to Data Science	CAP 5768
------------------------------	----------

Software Engineering	CEN 5035
----------------------	----------

Theory and Implementation of the Database Systems	COP 6731
---	----------

*In addition, students must take five EECS department electives as follows: two graduate courses with the prefix CAP and three graduate courses with prefixes CAP, CDA, CEN, CIS, COP, COT and CNT.*

**The last two electives must be chosen from the following ITOM courses:**

Data Mining and Predictive Analytics	ISM 6136
--------------------------------------	----------

Database Management Systems	ISM 6217
-----------------------------	----------

Introduction to Business Analytics and Big Data	ISM 6404
---	----------

Advanced Business Analytics	ISM 6405
-----------------------------	----------

Business Innovation with Artificial Intelligence	ISM 6427C
--	-----------

Social Media and Web Analytics	ISM 6555
--------------------------------	----------

Special Topics	ISM 6930
----------------	----------

Data Management and Analysis with Excel	QMB 6303
---	----------

Data Analysis for Managers	QMB 6603
----------------------------	----------

**Note:** Students in this concentration may satisfy the requirements for the [Big Data Analytics certificate](#). Follow up with the EECS advisor to see if the student meets all the requirements for the certificate.

### **Business Analytics Concentration (30 credits)**

**Students are required to take the following seven courses offered by the College of Business:**

Management of Information Systems and Technology	ISM 6026
Data Mining and Predictive Analytics	ISM 6136
Introduction to Business Analytics and Big Data	ISM 6404
Advanced Business Analytics	ISM 6405
Business Innovation with Artificial Intelligence	ISM 6427C
Social Media and Web Analytics	ISM 6555
Communication Strategies for Business Professionals	GEB 6217

**Students must take one elective from the following ITOM courses:**

Mobile Apps for Business	ISM 6058
Information Technology Project and Change Management	ISM 6316
Management of Information Assurance and Security	ISM 6328
Enterprise Information Technology Service Management	ISM 6368
Blockchain and Crypto Assets: Digital Business Transformation	ISM 6455
Web-Based Business Development	ISM 6508
Information Technology Sourcing Management	ISM 6509
Special Topics	ISM 6930
Data Management and Analysis with Excel	QMB 6303

***In addition, students must take two electives from the EECS department as follows:one graduate***

*course with the prefix CAP and one graduate course with prefixes CAP, CDA, CEN, CIS, COP, COT and CNT.*

## NEUROSCIENCE

### DOCTOR OF PHILOSOPHY (PH.D.)

*(Minimum of 72 credits required)*

The Neuroscience Graduate doctoral program (NGP) is a multi-college, multi-institute interdisciplinary degree program organized in partnership with the FAU Brain Institute. Graduate-level instruction is provided by faculty in multiple departments located in the Charles E. Schmidt College of Science, the Charles E. Schmidt College of Medicine, the College of Engineering and Computer Science, the College of Education and the Harriet L. Wilkes Honors College. Affiliated faculty from the Max Planck Florida Institute for Neuroscience and Scripps Research Florida also participate in the program.

The program aims to equip students with the advanced conceptual and technical skills needed to forge productive, neuroscience-oriented careers in industry, academia and government. To allow for maximum flexibility in career aspirations, students have the opportunity to pursue thesis research in laboratories located in any of the Colleges and Institutes noted above. Program faculty have expertise in a broad range of research areas, including cellular and molecular neuroscience, cognitive and behavioral neuroscience, computational neuroscience, synaptic plasticity, brain development, learning and memory, neuroimmunology, auditory and speech neuroscience, visual neuroscience and neurology. The work is directed at understanding the mechanisms underlying neurodegeneration, stroke, autism, epilepsy, depression, sleep disorders and drug addiction, in order to advance effective treatments.

#### **Admission Standards**

The program seeks to admit applicants who are academically excellent and have completed an undergraduate or M.S. degree demonstrating substantial training in the biological sciences, psychology, or engineering and computer sciences. Recommended preparation includes upper-division courses in biology (molecular/cellular biology, genetics, physiology), psychology (animal and human behavior, learning and memory, cognition), chemistry (organic chemistry, biochemistry), mathematics (statistics and calculus) and computer engineering and programming. Prior coursework in neuroscience is desirable, and evidence of prior research experience is particularly important. A competitive applicant usually will have prior research experience and should describe their research experience in the Statement of Purpose/Personal Statement.

#### **Admission Requirements**

All students must meet the minimum graduate admission requirements of the University. Refer to the Prospective Students and Admissions sections on the [Graduate College website](#). Additional requirements are:

1. Completion of a bachelor's or M.S. degree from a regionally accredited institution in an appropriate major, prior to anticipated start date in the Ph.D. program.
2. Minimum GPA of 3.40 as an undergraduate and/or M.S. student.
3. Complete sets of transcripts from all previous collegiate institution(s) attended.
4. A minimum of three letters of recommendation, preferably from instructors and advisors who are familiar with the applicant's recent academic and research experiences.
5. An essay of Purpose/Interests in the form of a Personal Statement.
6. GRE scores are optional.
7. International students whose native language is not English must score at least 79-80 (Internet-based test) on the Test of English as a Foreign Language (TOEFL). Satisfactory TOEFL scores can offset verbal GRE scores at the discretion of the program's Recruitment Committee. Additionally, international students whose transcripts are from non-U.S. institutions must have their credentials evaluated course-by-course. International students must also demonstrate competency in spoken English.

Previous graduate coursework may be applied toward the course requirements of the Neuroscience Ph.D. Students may receive up to 15 credits earned beyond the baccalaureate degree, including up to 9 credits of Core course credit, not to include Laboratory Rotations and Neuroscience Seminar, based on comparable courses taken prior to admission. Transfer credits must be approved by the Program Steering Committee and the Graduate College. Evaluation of transfer credits will be based on content and will require an official copy of each course syllabus for assessment.

### **Degree Requirements**

The Doctor of Philosophy with Major in Neuroscience is a research-intensive degree requiring a minimum of

72 credits beyond the baccalaureate degree. The following are specific requirements for this degree:

1. Completion of 21 core credits listed in Required Core Courses.
2. Completion of 9 elective credits from the courses listed in Elective Courses.
3. Completion of 24 dissertation credits.
4. The remaining 18 credits may include elective coursework at the 6000-level or above, advanced research or dissertation research credits that support the student's research plan with approval of the student's Ph.D. supervisor.

5. Completion of Neuroscience Ph.D. Lab Rotations, representing eight-week research internships in different laboratories during the fall and spring semesters of Year 1.
6. Acceptance into the laboratory of an approved program faculty member for thesis research by the end of the spring semester of Year 1.
7. Achievement of a “B” or higher grade in all courses, with an overall GPA of at least 3.0 maintained.
8. With the exception of Neuroscience Seminar and Laboratory Rotations, no core or elective courses can be taken with the option of satisfactory/unsatisfactory grading.
9. Students must enroll in the Neuroscience Seminar each fall and spring semester for the entire time they remain in program, with the expectation that most students will graduate in five years. Starting in Year 2, the Neuroscience Seminar will be taken for 0 credit.
10. Admission to Ph.D. candidacy requires the writing and successful public defense of an original dissertation research proposal.
11. Degree completion requires the writing and successful public defense of a dissertation describing the context, approach, results and impact of thesis research.
12. Students are expected to publish at least one peer-reviewed research paper as first author involving research activities described in their thesis proposal prior to degree completion.

---

### Required Core Courses

Brain Diseases: Mechanisms and Therapy	BMS 6736	3
Scientific Communication	BSC 6846	3
Neuroscience Seminar* <i>(fall and spring of Year 1)</i>	PSB 6920	2
Cellular and Molecular Neuroscience	PSB 6345	3
Systems and Integrative Neuroscience	PSB 6346	3
Neuroscience Ph.D. Lab Rotation <i>(fall and spring of Year 1)</i>	PSB 6910L	4
Experimental Design 1**	PSY 6206	3 or
Computational Neuroscience 1**	ISC 6460	3

---

**Required Core credits** **21**

<b>Dissertation</b>	PSB 7980	<b>24</b>
<b>Elective Courses (some may have prerequisites)</b>		
<i>Choose at least three courses from the list</i>		
Bioinformatics: Bioengineering Perspectives	BME 6762	3
Practical Cell Neuroscience	BSC 6417C	3
Biomedical Data and Informatics	BSC 6459	3
Introduction to Neural Networks	CAP 5615	3
Introduction to Data Science	CAP 5768	3
Foundations of Vision	CAP 6411	3
Data Mining for Bioinformatics	CAP 6546	3
Artificial Intelligence	CAP 6635	3
Data Mining and Machine Learning	CAP 6673	3
Biosignal Processing	EEE 5286	3
Seminar in Human Perception	EXP 6208	3
Seminar in Cognition	EXP 6609	3
Special Topics in Cognition (such as Attention and Consciousness, Machine Perception and Cognitive Robotics)	EXP 6930	3
Neural Plasticity	GMS 6021	3
Principles of Neuroimmunology	GMS 6708	3
Nonlinear Dynamical Systems	ISC 5453	3
Cognitive Neuroscience	ISC 5465	3

Methods in Complex Systems	ISC 6450	3
Computational Neuroscience 1	ISC 6460	3
Neurobiology of Addiction	PCB 5844	3
Advanced Cell Physiology	PCB 6207	3
Neurophysiology	PCB 6835C	3
Adult Neurogenesis	PCB 6848	3

Seminar in Behavioral Neuroscience	PSB 6058	3
Developmental Neurobiology	PSB 6515	3
Developmental Neuropsychology	PSB 6516	3
Special Topics in Behavioral Neuroscience (such as Functional Neuroanatomy)	PSB 6930	3
Experimental Design 2	PSY 6207	3
Special Topics (such as Neuroscience of Sleep)	PSY 6930	3
Neural Bases of Human Communication	SPA 5107	3
Adult Language Disorders	SPA 6410	3
Genetics of Communication Disorders	SPA 6438	3
Biostatistics	STA 5195	3
Human Neuroanatomy	ZOO 6748	3
<b>Electives credits</b>		<b>9</b>
<i>Additional elective coursework at the 6000 level or above, advanced research or dissertation credits that support the student's research plan</i>		<b>18</b>
<b>Total</b>		<b>72</b>

\* Neuroscience Seminar (PSB 6920) is taken in the fall and spring of Year 1 for 1 credit per semester. In later years, it is taken for 0 credit every fall and spring semester.

\*\* Students must either take Experimental Design 1 (PSY 6206) or Computational Neuroscience 1 (ISC 6460), but need not take both.

### **Supervisory Committee Requirements**

By mutual agreement, students identify their final Ph.D. supervisor and research lab before the end of the spring semester of Year 1. A Supervisory Committee, including the Ph.D. supervisor and three other graduate faculty, knowledgeable in aspects of the project, is assembled during the fall of Year 2. Students are encouraged to include on their committee one faculty-level member who is not a member of the Neuroscience Graduate Program, including graduate faculty from other institutions. The Ph.D. supervisor serves as the chair of the Supervisory/Dissertation Advisory Committee, except when the supervisor is an affiliate FAU faculty member at the Max Planck Florida Institute or the Scripps Research Institute Florida. The chair of the committee must have a full-time appointment at FAU, with affiliate faculty serving as co-chairs.

### **Qualifying Exam and Proposal Defense**

Students in the Neuroscience doctoral program must prepare a written grant proposal modeled on NIH or NSF templates for predoctoral fellowship applications. The proposal will be targeted to their chosen area of research. Students will present their proposal orally in an open forum advertised to the University community, followed by an oral examination consisting of questions from the student's Supervisory Committee. Following the defense, committee members vote to either pass, pass with conditions, or fail the student. If passed with conditions, students must be able to satisfy any conditions set by the committee within three months prior to resubmission of their proposal for a second oral examination.

### **Doctoral Dissertation Defense**

Students in the Neuroscience doctoral program will develop a written dissertation following the format required by the Graduate College, present the findings of their research orally in a forum open and advertised to the public, followed by an oral examination by the student's Dissertation Committee. Following the defense, committee members vote to either pass, pass with conditions, or fail the student. Students must satisfy any conditions imposed by the committee within three months prior to resubmission of their proposal for a second oral examination. The committee shall determine whether the student passes or fails the thesis defense examination and allows for a re-examination following the rules of the Graduate College.

# GRADUATE CERTIFICATES

## BIG DATA ANALYTICS GRADUATE CERTIFICATE

*(Minimum of 12 credits required)*

The digital age is here to stay. Organizations now own and have access to unfathomable amounts of data. New technologies and efforts are needed to move on to the next phase of the digital revolution - the data revolution. To provide students with the knowledge necessary in this age of Big Data, the Department of Electrical Engineering and Computer Science (EECS) and the Department of Information Technology and Operations Management (ITOM) have jointly designed the Big Data Analytics graduate certificate. This 12-credit certificate allows graduate students to expand their knowledge and skills in the concepts, technologies, and tools of business intelligence, data analytics and business analytics and be recognized for their achievement. The certificate program has two tracks: Computer Science (CS), which is also available fully online, and Business (BU).

### Tracks

**CS Track:** The Big Data Analytics certificate with a track in Computer Science will be granted to a student who completes three 3-credit courses from the CS Data Analytics course list and one 3-credit course from the ITOM Business Analytics course list.

**BU Track:** The Big Data Analytics certificate with a track in Business will be granted to a student who completes three 3-credit courses from the ITOM Business Analytics course list and one 3-credit course from the CS Data Analytics course list.

### Admission

**CS Track:** Open to students who have a B.S. degree in Computer Science or in a related field of Science or Engineering and a GPA of at least 3.0. Students must satisfy the prerequisites for each course in the program. All four courses must be completed with a GPA of 3.0 or better. All course materials are in English; all international students must demonstrate proficiency in English to enter the program.

**BU Track:** Open to students who have a bachelor's degree in Business or in a related field and a GPA of at least 3.0. Students must satisfy the prerequisites for each course in the program. All four courses must be completed with a GPA of 3.0 or better. All course materials are in English; all international students must demonstrate proficiency in English to enter the program.

## Big Data Analytics Courses by Track

### *CS Data Analytic Courses*

Select three from this list and one from the list of ITOM courses.

Introduction to Neural Networks	CAP 5615	3
Introduction to Data Science	CAP 5768	3
Social Networks and Big Data Analytics	CAP 6315	3
Data Mining for Bioinformatics	CAP 6546	3
Applied Machine Learning	CAP 6610	3
Deep Learning	CAP 6619	3
Data Mining and Machine Learning	CAP 6673	3
Information Retrieval	CAP 6776	3
Web Mining	CAP 6777	3
Advanced Data Mining and Machine Learning	CAP 6778	3
Big Data Analytics with Hadoop	CAP 6780	3
Computer Performance Modeling	CEN 6405	3
Deep Learning	CAP 6619	3
Computational Advertising and Real-Time Data Analytics	CAP 6807	3

### *ITOM Business Analytics Courses*

Select three from this list and one from the list of CS courses.

Data Mining and Predictive Analytics	ISM 6136	3
Database Management Systems	ISM 6217	3
Introduction to Business Analytics and Big Data	ISM 6404	3
Advanced Business Analytics	ISM 6405	3

Business Innovation with Artificial Intelligence	ISM 6427C	3
Social Media and Web Analytics	ISM 6555	3
Data Management and Analysis with Excel	QMB 6303	3
Data Analysis for Managers	QMB 6603	3

## **BIG DATA ANALYTICS**

### **GRADUATE CERTIFICATE**

### **PROFESSIONAL PROGRAM**

*(Minimum of 12 credits required)*

The Professional Big Data Analytics certificate is designed for working professionals currently enrolled in self-supporting programs in the College of Business or College of Engineering and Computer Science. This is a stand-alone certificate tailored for working professionals and alumni with graduate degrees who are looking for specialized knowledge in Big Data Analytics. The certificate consists of 12 credits offered jointly by the colleges and two tracks from which to choose courses. Tracks and lists of courses are the same as for the Big Data Analytics graduate certificate noted above.

## **CYBER SECURITY**

### **GRADUATE CERTIFICATE**

*(Minimum of 12 credits required)*

Cybercrime-related issues especially impact the State of Florida because a significant part of the state's economic development comes from tourism, international banking and high-tech industries. The number of scientists, engineers and experts needed with special skills in cyber security exceeds the number available. The Cyber Security certificate provides opportunities for graduate students to expand their knowledge and skills to meet the needs of the cyber security field. Due to their extensive expertise and facilities, the departments of Electrical Engineering and Computer Science (EECS) and Mathematics and Statistics have jointly designed the Cyber Security certificate. This 12-credit certificate program has two tracks: Computer Science (CS), which is also available fully online, and Mathematics (Math).

## Tracks

**CS Track:** The Cyber Security certificate with a track in Computer Science will be granted to a student who completes four 3-credit courses as follows: three 3-credit courses from the CS Cyber Security course list and one 3-credit course from either the CS or the Math Cyber Security course list.

**Math Track:** The Cyber Security certificate with a track in Mathematics will be granted to a student who completes four 3-credit courses as follows: three 3-credit courses from the Math Cyber Security course list and one 3-credit course from either the Math or the CS Cyber Security course list.

## Admission

**CS Track:** Open to students who have a B.S. degree in Computer Science or in a related field of Science or Engineering and a GPA of at least 3.0. Students must satisfy the prerequisites for each course in the program. All four courses must be completed with a GPA of 3.0 or better. All course materials are in English; all international students must demonstrate proficiency in English to enter the program.

**Math Track:** Open to students who have a bachelor's degree in mathematics or in a related field and a GPA of at least 3.0. Students must satisfy the prerequisites for each course in the program. All four courses must be completed with a GPA of 3.0 or better. All course materials are in English; all international students must demonstrate proficiency in English to enter the program.

## Cyber Security Courses by Track

### *CS Cyber Security Courses*

Select three from this list and one more from this list or the list of Math courses. Additional courses may be used as replacements with prior approval of the EECS Department.

Practical Aspects of Modern Cryptography	CIS 5371	3
Computer Data Security	CIS 6370	3
Distributed Systems Security	CIS 6375	3
Secret Sharing Protocols	COT 6427	3
Data Analysis and Modeling for Cybersecurity	CAI 6803	3

### *Math Cyber Security Courses*

Select three from this list and one more from this list or the list of CS courses.

Introduction to Cryptology and Information Security	MAD 5474	3
Cryptanalysis	MAD 6478	3
Coding Theory	MAD 6607	3
Number Theory and Cryptography	MAS 6217	3

## TRANSPORTATION, LOGISTICS AND SUPPLY CHAIN MANAGEMENT GRADUATE CERTIFICATE

*(Minimum of 12 credits required)*

To provide students with the knowledge necessary in this age of connected supply chains, the Department of Information Technology and Operations Management (ITOM) in the College of Business and the Department of Civil, Environmental and Geomatics Engineering (CEGE) in the College of Engineering and Computer Science offer a jointly designed certificate in Transportation, Logistics and Supply Chain Management. This 12-credit certificate permits graduate students to expand their knowledge on the technical skills of transportation engineering and the analytical business decision-making skills of supply chain management.

### Admission

This certificate program is open to students who have a bachelor's degree in business or engineering or in a related field and a GPA of at least 3.0. Students must satisfy the prerequisites for each course in the program.

### Curriculum

All four required courses must be completed with a GPA of 3.0 or better. All course materials are in English; all international students must demonstrate proficiency in English to enter the program.

### Required Courses by Department

## Association of Schools of Music.

The Dorothy F. Schmidt College of Arts and Letters offers Bachelor of Arts degrees (B.A.) with majors in Anthropology, Art, Communication Studies, English, History, Interdisciplinary Studies, Jewish Studies, Multimedia Studies, Music, Philosophy, Political Science, Sociology, Theatre, and Languages, Linguistics and Comparative Literature. The College also offers a Bachelor of Architecture (B.Arch.), Bachelor of Public Management (B.P.M.) and a Bachelor of Public Safety Administration (B.P.S.A.). The Bachelor of Fine Arts (B.F.A.) may be earned in Art and Theatre. The College also awards the Bachelor of Music (B.M.), and a Bachelor of Music Education (B.M.E.) is offered in conjunction with the College of Education. University programs leading to teacher certification in art and foreign languages are available to undergraduate students registered in the Dorothy F. Schmidt College of Arts and Letters. In addition, the College offers several minors available at the undergraduate level.

For graduate students, the College offers a range of Master of Arts (M.A.) degrees with majors in Anthropology, Communication, English, History, Political Science, Sociology, and Languages, Linguistics and Comparative Literature as well as an interdisciplinary M.A. degree with major in Women, Gender and Sexuality Studies. The College also offers Master of Music (M.M.), Master of Nonprofit Management (M.N.M.) and Master of Public Administration (M.P.A.) degree programs.

Master of Fine Arts degrees (M.F.A.) may be earned in Studio/Fine Arts, Creative Writing, Media, Technology and Entertainment, and Theatre. (The M.F.A. in Media, Technology and Entertainment is currently on suspension and not accepting students.)

A combined degree program - Bachelor of Architecture/Master of Urban and Regional Planning Advanced Standing - is offered jointly by the Dorothy F. Schmidt College of Arts and Letters and the Charles E. Schmidt College of Science. For a complete description of this B.Arch./M.U.R.P. Advanced Standing Program, see the Department of Urban and Regional Planning.

Graduate students may obtain the Master of Arts in Teaching (M.A.T.) degree in Anthropology.

A Doctor of Philosophy degree (Ph.D.) with a Major in Comparative Studies and a Doctor of Philosophy degree (Ph.D.) with Major in Public Administration are offered by the Dorothy F. Schmidt College of Arts and Letters as well.

In addition, the College offers several certificate programs, interdisciplinary in nature, at both the undergraduate and graduate levels.

Each type of program—bachelor's degree programs, master's degree programs, the doctoral program and the certificate programs—is described in the following sections. The course offerings pertaining to each program are listed by department at the end of the College section.

## BACHELOR'S DEGREE PROGRAM INFORMATION

### General Studies Degree Program

The University offers a Bachelor of General Studies (B.G.S.) degree program that allows students to design a plan of study to meet their personal interests and career goals. The 120-credit program includes 15 credits of upper-division coursework in one discipline, which students select in consultation with an advisor. For more B.G.S. details and degree requirements, please refer to the [Degree Programs section](#) of this catalog.

### Degree Requirements

To receive a bachelor's degree in the Dorothy F. Schmidt College of Arts and Letters, students must complete the following requirements.

## BACHELOR OF ARCHITECTURE

1. The School of Architecture requires that all prerequisites be met prior to enrolling in the upper-division (3000 level or above) design studio sequence. Failure to fulfill all prerequisites prevents entry into any design studio. Students who have not met prerequisites will be administratively withdrawn from the course at the time the deficiency is determined to exist.
2. The last 30 upper division credits (5000-level courses) must be earned in residence at FAU.
3. Students in Architecture should consult their program's student manual/handbook for more detailed information.

## BACHELOR OF ARTS

*(Freshmen and transfer students with fewer than 30 credits)*

1. All degree requirements of the University. (See [Degree Requirements section](#) of this catalog.)
2. All requirements in the major. Refer to the description of major requirements listed with each undergraduate degree program in this section.
3. Majors in Art History, History, Music and Philosophy will take 9 credits in Arts and Letters

electives.

4. The University Foreign Language Graduation Requirement.
5. A cumulative average of "C" or better in all coursework attempted. At least a "C" or better in each course in the major, minor or certificate. All courses in the major must be graded. Pass/Fail is not accepted.
6. File an Application for Degree form, available at the Office of the Registrar. File with the Office of Student Academic Services.
7. Certification by the faculty of the College for the awarding of the degree.

### **Additional Admission Requirements**

Any student who does not have a "C" average in freshman English will be required to take further expository writing. Proficiency in a foreign language is strongly recommended for admission to programs leading to a Bachelor of Arts degree.

## **BACHELOR OF ARTS**

*(Transfer students with 30 credits or more)*

1. All degree requirements of the University, with a minimum of 120 credits in academic courses, except Architecture, which requires 159 approved credits (see the [Degree Requirements section](#) of this catalog).
2. All requirements in the major. Refer to the description of major requirements listed with each undergraduate degree program in this section. All coursework transferred from another institution in the major field must be approved in writing by the chair of the major department.
3. A minimum of 9 credits (12 credits at the upper division in the School of Communication and Multimedia Studies) within the Dorothy F. Schmidt College of Arts and Letters but outside the major department, excluding courses used to satisfy the foreign language requirement and any course used to satisfy lower-division General Education requirements in Arts and Letters. The Departments of Anthropology, English, Political Science, Sociology, and Languages, Linguistics and Comparative Literature do not require Arts and Letters electives. These departments treat this requirement as "free" electives.
4. A cumulative average of "C" or better in all coursework attempted. At least a "C" or better in each course in the major, minor or certificate. All courses in the major must be graded. Pass/Fail is not accepted.
5. File an Application for Degree form, available at the Office of the Registrar. File with the Office of Student Academic Services.

6. Certification by the faculty of the College for the awarding of the degree.

## **BACHELOR OF FINE ARTS, BACHELOR OF MUSIC, BACHELOR OF MUSIC EDUCATION**

*(Freshmen and transfer students with fewer than 30 credits)*

1. All degree requirements of the University, including the University Foreign Language Requirement (Bachelor of Fine Arts-Art majors only; Bachelor of Fine Arts-Theatre, Bachelor of Music and Bachelor of Music Education majors are excluded from this requirement). (See [Degree Requirements section](#) of this catalog.)
2. All requirements in the major. Refer to the description of major requirements listed with each undergraduate degree program in this section.
3. A cumulative average of "C" or better in all coursework attempted.
4. The University Foreign Language Graduation Requirement (Bachelor of Fine Arts-Theatre, Bachelor of Music and Bachelor of Music Education majors are excluded from this requirement.)
5. At least a "C" or better in each course in the major, minor or certificate. All courses in the major must be graded. Pass/Fail is not accepted.
6. File an Application for Degree form, available at the Office of the Registrar. File with the Office of Student Academic Services.
7. Certification by the faculty of the College for the awarding of the degree.

## **BACHELOR OF FINE ARTS, BACHELOR OF MUSIC, BACHELOR OF MUSIC EDUCATION**

*(Transfer students with 30 credits or more)*

1. All degree requirements of the University, with a minimum of 120 credits in academic courses. (See the [Degree Requirements section](#) of this catalog.)
2. All requirements in the major. Refer to the description of major requirements listed with each undergraduate degree program in this section. All coursework transferred from another institution in the major field must be approved in writing by the chair of the major department.
3. A cumulative average of "C" or better in all coursework attempted
4. At least a "C" or better in each course in the major, minor or certificate. All courses in the major must be graded. Pass/Fail is not accepted.
5. The Foreign Language Entry Requirement.
6. File an Application for Degree form, available at the Office of the Registrar. File with the Office

of Student Academic Services.

7. Certification by the faculty of the College for the awarding of the degree.

## BACHELOR OF NONPROFIT MANAGEMENT AND BACHELOR OF PUBLIC ADMINISTRATION

Refer to the admission and degree requirements under the [School of Public Administration](#) header.

## SECOND BACCALAUREATE DEGREE REQUIREMENTS

### Bachelor of Arts and Bachelor of Fine Arts Programs

1. A minimum of 30 credits must be earned in residence at FAU, in addition to the first degree (a minimum total of 150 credits for concurrent degrees).
2. Satisfy the admission requirements of the college granting the second degree.
3. Satisfy all College and department degree requirements. Refer to Degree Program Requirements under the major department listed below.
4. File an Application for Degree form, available at the Office of the Registrar. File with the Office of Student Academic Services.

## MASTER'S DEGREE PROGRAM INFORMATION

The **Master of Arts degree** is offered in Anthropology, Communication, English, History, Languages, Linguistics and Comparative Literature, Political Science, Sociology, and Women, Gender and Sexuality Studies.

The **Master of Arts in Teaching degree** is offered in the Department of Anthropology.

The **Master of Fine Arts degree** is offered in Fine Arts in the Department of Visual Arts and Art History, in Creative Writing in the Department of English, in Media, Technology and Entertainment in the School of Communication and Multimedia Studies and in Design and Technology and Performance in the Department of Theatre and Dance. (The M.F.A. in Media, Technology and Entertainment is currently on suspension and not accepting students.)

The **Master of Music degree** is offered in the School of the Arts, Department of Music.

The **Master of Nonprofit Management** and the **Master of Public Administration** are offered in the School of Public Administration.

## **M.A., M.A.T., M.F.A., M.M. ADMISSION REQUIREMENTS**

To be admitted to the Master of Arts, the Master of Arts in Teaching, the Master of Fine Arts or the Master of Music degree program, the student must meet the following criteria:

1. For Visual Arts and Art History and Political Science:
  - a. At least a 3.0 average in the 60 credits prior to receipt of the bachelor's degree or a graduate degree from an accredited institution.
  - b. For Anthropology, Communication, the English M.A., Sociology, Theatre and Women, Gender and Sexuality Studies: At least a 3.0 average in the 60 credits prior to receipt of the bachelor's degree and competitive GRE scores.
  - c. For the M.A. in Languages, Linguistics and Comparative Literature and the M.F.A. in Creative Writing: At least a 3.0 grade point average in the last 60 undergraduate credits.
  - d. For Music: A baccalaureate in music and a satisfactory audition, writing sample or portfolio depending on desired concentration.
  - e. For History: At least a 3.0 average in the 60 credits prior to receipt of the bachelor's degree, a 155 on the verbal portion and a 4.0 on the analytical writing section of the GRE.
2. Recommendation for admission by the proposed major department and the Dorothy F. Schmidt College of Arts and Letters graduate committee.
3. An undergraduate degree in the discipline (since departments may vary in requirements, students should discuss their qualifications with the department).
4. Master of Fine Arts students must pass an acting audition, pass a directing evaluation or have portfolios evaluated, depending upon their major sequence.

### **Master's Degree Requirements**

To be eligible for the Master of Arts, Master of Arts in Teaching, Master of Fine Arts, Master of Music, Master of Nonprofit Management or Master of Public Administration degree from the Dorothy F. Schmidt College of Arts and Letters, the student must complete all University requirements for the degree. To be recommended by the department and the graduate committee, the student must meet all departmental requirements.

Graduate students must meet the language requirement set by each department in the College of Arts and Letters for their graduate degree programs.

## DOCTORAL DEGREE PROGRAM INFORMATION

The Dorothy F. Schmidt College of Arts and Letters offers Doctor of Philosophy degrees in Comparative Studies and in Public Administration.

Comparative Studies is the application of various approaches within the humanities, arts and social sciences to the study of significant issues. The Ph.D. in Comparative Studies also involves developing expertise in advanced interdisciplinary and multidisciplinary study, including exploration of topics and materials from at least two traditional disciplines (e.g., political science and English literature; anthropology and history; art history, literature and communication).

The Ph.D. in Public Administration offers paths of study in Administrative Theory and Inquiry, Public Policy Studies, Organizational Studies, Public Budgeting and Financial Administration, and Urban and Regional Planning. Also, students are allowed to assemble paths of study of their own devising.

Admission and degree requirements for these Ph.D. programs are listed under the Comparative Studies Department or School of Public Administration headings later in this section.

## INTERDISCIPLINARY MINORS

### ENVIRONMENT AND SOCIETY UNDERGRADUATE MINOR

*(Minimum of 12 credits required)*

The undergraduate minor in Environment and Society introduces students to the intersecting fields of Environmental and Climate Science, Environmental Humanities (inclusive of Literature and the Visual Arts), Political Science, Sociology, History, and Women, Gender, and Sexuality Studies. Careers in Environmental Journalism, Environmental Consulting, and Climate Change Mitigation and Postsecondary Education in Environmental Humanities and Environmental Studies require interdisciplinary study across the humanities, geosciences and social sciences. The expanding academic discipline of Environmental Humanities, which recognizes that our environmental dilemmas are fundamentally problems of ethics and political power, demands fluency in this expanding field of study.

Students may earn this minor by completing 12 credits in courses that focus on Environment and Society. Students may choose from the content courses below to meet the 12-credit requirement.

Of the 12 credit hours required for the minor, 9 must be at the upper-division level; at least 75 percent of required credits for the minor must be completed at FAU; and students completing the minor must earn a minimum overall FAU grade point average of 2.0 within the coursework required. Program Coordinator: Dr. Stacey Balkan, Department of English, [sbalkan@fau.edu](mailto:sbalkan@fau.edu)

## FILM AND VIDEO UNDERGRADUATE MINOR

*(Minimum of 16 credits required)*

The undergraduate minor in Film and Video gives students in any major the opportunity to bring together courses from several departments and colleges into a multidisciplinary curriculum emphasizing all aspects of film and video. Participating are faculty from communication and multimedia studies, literature, languages, anthropology, theatre and other disciplines. Students are offered scholarly study of the history, theory and criticism of film, video and television as well as hands-on courses in video production. The minor structures FAU's current course offerings in film and video to guide undergraduate students through a cohesive study of film and its related disciplines.

This program is open to all degree-seeking students, with the exception of those pursuing the B.A. in Multimedia Studies (Film and Media concentration). Students may enroll with the program director at any time but must be enrolled by the time they apply for graduation. The minor will be awarded upon completion of the bachelor's degree. A student who already holds a baccalaureate degree may pursue the minor in conjunction with a second bachelor's degree. All courses taken in the program may be counted toward other general and specific graduation requirements, and courses taken to fulfill other requirements may be applied to the film and video program.

The curriculum consists of four parts: the core course, Film Appreciation, which introduces students to basic critical and technical concepts in film analysis; one course in the history of film and video; one course in theory and/or criticism; and two courses in production and/or contexts. Students must follow the distribution guidelines and complete a minimum of five courses. Each course must be completed with a grade of "C" or better to be counted toward the minor. At least 75 percent of all credits for the minor must be earned from FAU. In addition to the regular curriculum, other courses with significant attention to film and video may be approved by the program director.

## HEALTH HUMANITIES

## UNDERGRADUATE MINOR

*(Minimum of 15 credits)*

The minor in Health Humanities is open to all undergraduate students at FAU. The minor is awarded upon graduation from an undergraduate program at FAU; it is not awarded independently of an undergraduate degree. For minor details click [here](#).

## MUSEUMS, ARCHIVES AND PUBLIC HISTORY UNDERGRADUATE MINOR

*(Minimum of 18 credits required)*

This 18-credit multidisciplinary minor in Museums, Archives and Public History is designed to train undergraduate students in the increasingly sophisticated and interconnected fields of public history, museum studies, archive and records management, conservation of art and artifacts, historic preservation, material culture, digital humanities and web-based exhibit design, and material culture. The minor equips students with the latest skills to serve in associated jobs in the public and private sectors, including professional opportunities in museums, galleries, historical societies, archaeological sites, libraries, private and corporate collections, and archives. At least 75 percent of the 18 credits required for the minor must be completed at FAU. Students completing the minor must have a minimum overall FAU grade point average of 2.0 within the coursework required.

## PEACE, JUSTICE AND HUMAN RIGHTS UNDERGRADUATE MINOR

*(Minimum of 12 credits required)*

The Peace, Justice and Human Rights (PJHR) minor is designed to provide an enriching educational experience for degree-seeking students interested in themes of peace, social justice and human rights. For details about the minor, see the [Peace, Justice and Human Rights minor and certificate](#) entry below.

## SPORT STUDIES UNDERGRADUATE MINOR

*(Minimum of 12 credits required)*

The undergraduate minor in Sport Studies gives students in any major the opportunity to bring together courses from across Arts and Letters to explore various aspects of sports and society that will help

strengthen their ability to see sports not just as a game, but as a significant aspect of modern society.

This minor is open to all degree-seeking students and will be awarded upon completion of a bachelor's degree. A student who already holds a baccalaureate degree may pursue the minor in conjunction with a second bachelor's degree. All courses taken in the program may be counted toward other general and specific graduation requirements, and courses taken to fulfill other requirements may be applied to this minor.

Requirements for the minor include completion of four courses (12 credits) with a minimum grade of "C" and a 2.5 GPA. At least 75 percent of all credits for the minor must be earned from FAU. In addition to the regular curriculum, other courses with significant attention to sport studies may be approved by the program director.

---

### **Required Courses (select four courses, 12 credits)**

American Sports History	AMH 4611	3
Sports Journalism	JOU 3313	3
Management Principles in Exercise Science and Health Promotion	PET 4404	3

Women, Gender and Sexuality Studies

The Dorothy F. Schmidt College of Arts and Letters offers certificates of study in interdisciplinary fields at the undergraduate and graduate levels. Courses taken for a certificate program may be used to fulfill other general and specific degree requirements, just as courses taken to fulfill other requirements may be applied to the certificate curriculum. Certificates are awarded upon completion of the certificate requirements. The certificates are described below. For more information, please visit [www.fau.edu/artsandletters/certificate-programs.php](http://www.fau.edu/artsandletters/certificate-programs.php).

## ARTS AND PERFORMANCE ENTREPRENEURSHIP UNDERGRADUATE MINOR OR CERTIFICATE

*(Minimum of 12 credits required)*

The Undergraduate Arts and Performance Entrepreneurship **minor** or **certificate** provides artists, writers and performers the entrepreneurial skills needed to forge their freelance careers. This program is meant for anyone whose career trajectory is likely to follow the freelance model. Students may earn this minor or certificate by completing 12 credits: two required entrepreneurship courses (6 credits) and two additional electives in their area of concentration (6 credits).

**Required**

**Description/ Information**

The **minor** is available to all undergraduate degree-seeking students and may be earned upon successful completion of the coursework above and the simultaneous completion of a bachelor's degree at FAU.

The **certificate** is available to degree-seeking students, non-degree students, and working professionals. Students pursuing the certificate may apply for it in the College of Arts and Letters Office of Student Academic Services upon successful completion of the coursework.

Students cannot obtain both a certificate and a minor. Each program requires 12 credits, with minimum grades of "C" required in all courses for the minor and certificate. For the minor, at least 9 of the 12

credits must be earned at FAU.

### Timely Graduation

Minors and certificates should be considered an optional direction for elective credits. Students may not add a minor or certificate without permission from an Arts and Letters advisor (and main college advisor if different). Students are generally not permitted to add a minor/certificate after earning 90 credits or if completing it will result in an Excess Hour Surcharge.

## ASIAN STUDIES UNDERGRADUATE CERTIFICATE

*(Minimum of 15 credits required)*

The certificate in Asian Studies introduces undergraduate students to continuity and change in the Asian world, encompassing East Asia, the Middle East and South Asia. A variety of careers in this era of globalization necessitate knowledge of international affairs. Students in the Asian Studies certificate will benefit from being exposed to diverse approaches to the study of Asia.

Students may earn this certificate by completing 15 credits in courses that focus on Asia. No more than 9 of these credits may be earned in a single discipline. Students may choose from the content courses below to meet the 15-credit requirement.

Cultures of South Asia	ANT 3361	3
Islamic History	ASH 3222	3
The Modern Middle East	ASH 3223	3

Beginning Japanese Language and Culture 1	JPN 1120	4
Beginning Japanese Language and Culture 2	JPN 1121	4

## **CARIBBEAN AND LATIN AMERICAN STUDIES UNDERGRADUATE CERTIFICATE**

*(Minimum of 15 credits required)*

The certificate in Caribbean and Latin American Studies is awarded to undergraduate students completing multidisciplinary studies of Latin America and the Caribbean in conjunction with an academic major, usually in one of the departments represented in the curriculum. It is approximately the equivalent of an interdisciplinary minor. The certificate program seeks to provide the student with both an overview of the region's heritage as well as an opportunity to pursue upper-division study in

several disciplines focused on current affairs. The successful completion of the program will prepare the student for a wide range of job opportunities and graduate programs in and dealing with Latin America and the Caribbean.

The curriculum consists of three parts:

1. A required overview course, **Introduction to Latin American Studies**, LAS 2000 (3 credits);
2. Four additional courses from the list of **core courses below**. No more than two can be taken from any one department (12 credits);
3. Students must demonstrate an **intermediate level of proficiency in a language** of the region other than English. This can be achieved by one of two means: passing the CLEP test through the 2220 level, or a passing grade in a 2220-level language course. Heritage or "native" learners of one of the region's languages should discuss their language skills with a certificate advisor in order to determine if they should CLEP or take a special language course for heritage learners.

Students are advised to enroll first in LAS 2000 and then continue their studies in any order. Students must earn a grade of "C" or better in each course applicable to the certificate. These courses may be counted toward other general and specific graduation requirements. **No more than two core courses may be in the student's major.** Students who already hold a baccalaureate degree may pursue the certificate as a non-degree-seeking student or in conjunction with a second bachelor's degree. Students are encouraged to study in a country of the region through FAU Study Abroad Programs.

### Core Courses

This is not an exhaustive list. Students may take any course with content focused on the region. The following are examples:

The Maya and Their Neighbors	ANT 3163	3
South America Before Columbus	ANT 3165	3
Latin American Politics	CPO 4303	3
Geography of Latin America and the Caribbean	GEA 4405	3
Colonial Latin American History	LAH 3100	3

Latin American Independence	LAH 3133	3
Modern Latin American History	LAH 3200	3
History of Mexico	LAH 4430	3
History of the Caribbean	LAH 4470	3
History of Cuba	LAH 4480	3
Special Topics in Latin American History	LAH 4930	3
Caribbean Literatures in English	LIT 4192	3
Latin American Culture and Civilization*	SPN 3501	3
Latin American Literature in Translation	SPT 4130	3
Introduction to Hispanic Literature*	SPW 3030	3
Special Topics*	SPW 4930	1-3

\* Courses taught in Spanish and may require prerequisites.

## CLASSICAL STUDIES UNDERGRADUATE CERTIFICATE

*(Minimum of 18 credits required)*

The certificate in Classical Studies, available to undergraduate students, is a multidisciplinary program in the ancient Greek and Roman foundations of Western culture. Program offerings include courses in history, philosophy, literature, languages, social and political theory, the arts, archaeology and rhetoric. In addition to courses that pertain directly to Greco-Roman antiquity, the curriculum includes select courses that treat the reception and influence of classical culture in later historical contexts, including

contemporary popular culture. The program will be especially valuable to students pursuing careers in law, medicine, the ministry, education or public service.

The Classical Studies Program welcomes students from any of FAU's colleges and those who have earned degrees elsewhere. Along with the certificate curriculum, the program also sponsors lectures by visiting scholars and other special events.

Complete one of the options below to earn the certificate:

**Option 1 (six courses):** Six lecture courses, at least three of which must be from the core list.

**Option 2 (six courses):** Two semesters of either Classical Greek or Latin and four lecture courses, at least two of which must be from the core list.

**Option 3 (six courses):** Two semesters of Classical Greek, two semesters of Latin and two courses from the core list.

## ENGLISH AS A SECOND LANGUAGE (ESL) STUDIES UNDERGRADUATE AND GRADUATE CERTIFICATE

*(Minimum of 15 credits required)*

The certificate in English as a Second Language (ESL) Studies is open to all undergraduate, graduate and nondegree students at FAU. The ESL Studies certificate aims to prepare those who wish to teach ESL in a variety of settings, in the United States or abroad.

ESL certificate courses taken to fulfill other degree requirements at FAU may be applied toward the certificate. For more information, visit this [website](#).

## **ETHICS, LAW AND SOCIETY**

### **UNDERGRADUATE CERTIFICATE**

*(Minimum of 15 credits required)*

The Ethics, Law and Society certificate program for undergraduate students encourages the study of normative and value issues in the humanities, social sciences and the arts. Ethical competence is becoming increasingly important in professional life. This certificate program is aimed at preprofessionals in law, health care and business as well as disciplinary majors. It may be advantageous for students who plan professional careers to be able to demonstrate formal training or interest in ethics. That aside, students are well served by examining the complex relationship between the normative enterprises of law, morality and politics.

Students are required to take five (3-credit) upper-division courses, earning a grade of "B" or better in each course, for a total of 15 credits with the following distribution.

#### **General Ethics (one course)**

## ETHNIC STUDIES UNDERGRADUATE CERTIFICATE

*(Minimum of 15 credits required)*

The Ethnic Studies certificate program is open to all degree-seeking undergraduate students and is designed to be taken concurrently with the student's major. Students who already hold a baccalaureate degree may pursue the certificate as a non-degree-seeking student or in conjunction with a second bachelor's degree. The program is especially appealing because courses may be counted toward other general and specific graduation requirements in the student's major. Likewise, courses taken to fulfill other requirements can be applied to the Ethnic Studies Program.

### Certificate Requirements

A student must earn a minimum of 15 credits in Ethnic Studies courses with a grade of "C" or better in each course in order to receive the certificate. Once satisfactorily completed, the certificate will be awarded and the student will receive a transcript notation designating completion of the program. Each student participating in the program must fulfill the following requirements:

1. Satisfactory completion of one of the Core Courses. See eligible Core Courses below.
2. Satisfactory completion of four Distribution Courses in at least three disciplines/departments. See eligible courses divided by discipline/department below.

### Curriculum

The curriculum of the Ethnic Studies certificate program offers students the outstanding benefits of an interdisciplinary education. Students have the option of choosing from a menu of courses that covers various aspects of ethnicity or various ethnicities. The curriculum is grounded in core courses devoted to the critical study of the main concepts and methodologies related to ethnicity. Besides focusing on these concepts, the courses examine different theories of ethnicity and race as well as other issues about the creation and legitimization of ethnicity emerging from its social and historical construction. Consistent with the viewpoint of the program, the core courses are taught from an interdisciplinary perspective.

## **FILM AND CULTURE**

### **GRADUATE CERTIFICATE**

*(Minimum of 12 credits required)*

This certificate program is available for master's and doctoral students. It provides a flexible curricular framework for an interdisciplinary focus on film and culture. The program is ideal for preparing graduate students in any department or college to write a thesis or dissertation in the area of film and culture studies or simply to demonstrate coherent knowledge for teaching or other purposes.

Admission to the Film and Culture Graduate Certificate is limited to students currently enrolled in a graduate program at Florida Atlantic University. Credits earned for graduate degree programs will also count for the certificate if approved by advisors in both programs. Requirements include the two core courses below and two graduate-level elective courses. Applications for the certificate should be submitted to the [certificate director](#) upon successful completion of the required courses with a minimum grade of "B" in each.

### **Required Core Courses**

Film Theory and Criticism	FIL 6807	3

Special Topics in Spanish-American Literature	SPW 6939	3

\* Substitutions may be made with the approval of the certificate director.

## LITERARY TRANSLATION GRADUATE CERTIFICATE

*(Minimum of 15 credits required)*

The graduate certificate in Literary Translation, offered jointly by the English Department and the Department of Languages, Linguistics and Comparative Literature, offers students an opportunity to study and practice literary translation in more depth during the course of their studies. Literary translation is an increasingly in-demand vocation in the rapidly globalizing world. This certificate gives students tangible training in the field and acknowledgment of that training. Through directed coursework in the history and practice of translation, as well as through a capstone translation project, students gain knowledge and competency beyond that of their cohort who simply take a class or two in the field. Students typically work from Spanish, French, Italian, German or Hebrew into English or the

reverse. However, students are welcome to work in a wide variety of other languages. This is not a certificate in simultaneous interpretation, technical translation or any other type of non-literary translation.

## Certificate Requirements

### Coursework

(15 credits, no more than one of the required courses may be transferred from another institution, to be approved on a case-by-case basis).

---

#### Required - Translation workshop

*(must be taken twice)*

---

----------------------	----------	---

---

#### Required

---

History and Theory of Translation	FOT 6807	3
-----------------------------------	----------	---

---

#### Required - Two of the following courses

---

Foundations of Languages, Linguistics and Comparative Literature	FOL 6731C	3
--	-----------	---

---

Topics in Translation Studies	FOT 6930C	3
-------------------------------	-----------	---

---

History of the English Language	LIN 6107	3
---------------------------------	----------	---

---

### Capstone Project (LIT 6914) 0-3 credits

The final translation project usually is a continuation/expansion of a translation project on which the student has begun work during one of the translation workshops. The parameters of the project (page count, paratextual material, etc.) are decided upon by the student and the advisor. These projects are longer than a seminar paper but shorter than a thesis: 15-20 poems or 25-30 pages of prose. The project is supervised by a primary advisor and a secondary advisor who is an expert in the project's source

language. (Students most typically translate into their native language.) The student should consult the director of the certificate program for guidance in selecting advisors.

## **NONPROFIT EXECUTIVE LEADERSHIP GRADUATE CERTIFICATE**

*(Minimum of 12 credits required)*

This 12-credit graduate certificate program is available to students who have completed an undergraduate degree. Students may enroll in this certificate program while pursuing a degree in another discipline at FAU or independent of other graduate work.

For admission to this certificate program, students should have a B average (3.0) at the graduate level or an overall undergraduate GPA of 3.0. Students not matriculating at FAU should complete a non-degree seeking student application through the Registrar's Office. Credits earned for graduate degree programs will also count for the certificate, if approved by advisors in both programs. Applications for the certificate should be submitted to the graduate (master's) programs coordinator in the School of Public Administration upon successful completion of the required courses with a minimum grade of "B" in each.

Requirements include the successful completion of four courses: two core courses and two electives chosen from the list below.

---

### **Required Core Courses**

Introduction to Nonprofit Management	PAD 6142	3
Public Policy and Nonprofit Organizations	PAD 6143	3

\* Substitutions may be made with the approval of the graduate programs coordinator.

## PEACE, JUSTICE AND HUMAN RIGHTS UNDERGRADUATE MINOR UNDERGRADUATE CERTIFICATE

*(Minimum of 12 credits required)*

The Peace, Justice and Human Rights (PJHR) minor and certificate are designed to provide an enriching educational experience for students interested in themes of peace, social justice and human rights. The minor and certificate have a tailored curriculum that allows students flexibility to design a program matching their personal interests and their academic and professional objectives. Graduates enter fields such as law, international relations, social and community work and education. The minor is available for degree-seeking students and the certificate is for non-degree-seeking students.

### **Requirements for the Certificate:**

Students who are non-degree-seeking may complete the PJHR certificate, which has the same requirements and offers the same tailored curriculum as the minor as noted below.

**Requirements for the Minor:**

1. 12 credits of coursework in the area of the minor.
2. 9 of the 12 credits must be upper-level credits.
3. At least 75 percent of all required credits must be completed at FAU.
4. Students completing the minor must have a minimum overall FAU GPA of 2.0 within the coursework required.

Students are required to complete 12 credits from the two categories of classes listed below. No more than 6 credits may be taken from any one department.

**Core Courses (6 credits required)**

Anthropology of Peace and Violence	ANT 4409	3
History of Human Rights	HIS 3204	3

## PROFESSIONAL AND TECHNICAL WRITING UNDERGRADUATE CERTIFICATE

*(Minimum of 15 credits required)*

Undergraduate students at FAU who wish to enhance their skills and experience in the field of professional writing should pursue the Professional and Technical Writing certificate (PTWC). This certificate offers an interdisciplinary approach to writing instruction and experience, with courses drawing from departments across the University, including English, Communications, Marketing, Management Information Systems, Business and Public Administration. Elective courses are designed to complement students' requirements within their majors, as well as provide students interested in writing and communication with additional, well-rounded training that they will need to succeed in today's digital workplace.

PTWC requirements include a final portfolio that demonstrates students' writing abilities, a required course in professional writing and an internship that includes real-world training in writing.

The certificate is awarded to students who complete 15 credits from the list of approved courses below and the portfolio requirement. The student will receive a transcript notation designating completion of the program. For more information, please visit the [PTWC webpage](#) or contact the [certificate director](#).

### Required Courses (6 credits)

Professional Writing	ENC 3213	3
----------------------	----------	---

**OR**

Communicating Business Information	GEB 3213	3
<b>AND</b>		
English Internship	ENG 4940	3
<b>OR</b>		
Outside internship approved by CPTW director		3
<b>Elective Courses (9 credits, select three from list below)</b>		
Creative Writing	CRW 3010	3
Writing for the Technical Professions	ENC 2248	3
Advanced Exposition	ENC 3310	3
Principles of Research Writing	ENC 4138	3
Writing for Nonprofits	ENC 4354	3
Studies in Writing and Rhetoric	ENG 4020	3
Public and Community Relations	PUR 4411	3
Social Media and Web Technologies	ISM 4054	3
Creative Advertising Strategy: Concepts and Design	MAR 4334	3
Communication Skills for Public Managers	PAD 3438	3

Funding for Nonprofit Organizations	PAD 4202	3
Public Speaking	SPC 2608	3
One special topics class focused on professional communication or writing from any department, approved by the CPTW director		3

### Portfolio Requirement

Students must submit a final portfolio, including a résumé, a formal report, a job letter or other example of professional correspondence and one other professional writing sample. For more details on portfolio requirements and assessment, contact the PTWC Director, Julia Mason, at [jmason32@fau.edu](mailto:jmason32@fau.edu).

## PUBLIC ETHICS AND LEADERSHIP GRADUATE CERTIFICATE

*(Minimum of 12 credits required)*

This 12-credit graduate certificate program is available to students who have completed an undergraduate degree. Students may enroll in this certificate program while pursuing a graduate degree at FAU or independent of other graduate work.

For admission to this certificate program, students should have a B average (3.0) at the graduate level or an overall undergraduate GPA of 3.0. Students not matriculating at FAU should complete a non-degree seeking student application through the FAU Registrar's Office. Credits earned for graduate degree programs also count for the certificate, if approved by advisors in both programs. Applications for the certificate should be submitted to the graduate (master's) program coordinator in the School of Public Administration upon successful completion of the required courses with a minimum grade of "B" in each.

Requirements include the successful completion of four courses: two core courses and two elective courses chosen from the list below.

**Required Core Courses (6 credits)**

Public Leadership	PAD 6063	3
-------------------	----------	---

Ethical and Legal Foundations in the Public Sector	PAD 6436	3

**PUBLIC POLICY**  
**GRADUATE CERTIFICATE**

*(Minimum of 12 credits required)*

This certificate program is available to master's and doctoral students. It provides a flexible curricular framework for a focus on public policy. The program is ideal for preparing graduate students in any department or college to demonstrate knowledge for future service in public policy implementation or analysis, or other purposes such as teaching.

Admission to the Public Policy Certificate program is limited to students currently enrolled in a graduate program at Florida Atlantic University. Credits earned for graduate degree programs will also count for the certificate, if approved by the advisors in both programs. Requirements include the successful completion of four courses (12 credits) with a minimum grade of "B" in each, chosen from the list below. Applications for the certificate program should be submitted to the graduate (master's) programs coordinator in the School of Public Administration upon successful completion of the required courses.

## RELIGIOUS STUDIES UNDERGRADUATE CERTIFICATE

*(Minimum of 15 credits required)*

The certificate in Religious Studies promotes the academic study of religion. Any degree-seeking undergraduate student in good standing may enroll. Recognizing the significance of religion within human culture, the program advocates constructive, critical analysis of religion, seeking to be as open-minded and pluralistic as possible. It does not sanction any specific religion, but strives to treat religion as similar to other social, political and cultural phenomena representative of the universal panorama of human culture. Because the program is interdisciplinary in orientation and scope, participating students are encouraged to take courses from several departments.

The certificate is awarded to students who complete 15 credits from a list of approved classes with a grade of "C" or higher. No more than two courses may be in the student's major. Two of these must be core courses, one course that focuses on methods for studying religion and one that focuses on the content of religion. The other courses may be selected from a list of approved electives that devote at least half of their content to religion.

The following classes meet the stated criteria:

---

### **Core Courses (two courses required)**

---

#### *Methods Courses (one course required)*

---

Anthropology of Religion	ANT 3241	3
Old Testament	REL 3213	3
Philosophy of Religion	PHI 4700	3

---

#### *Content Courses (one course required)*

History of Christianity to 1500	HIS 3432	3
History of Christianity since 1500	HIS 3434	3
History of Eastern Ideas	ASH 4600	3
History of Hasidism	JST 4464	3
Islamic History	ASH 3222	3
Reformation Europe	EUH 4144	3
Religion in America	AMH 4620	3
<b>Elective Courses (choose three from any of the above courses or from the list below)</b>		
History of East Asia	ASH 3300	3
The Holocaust	JST 4701	3
Jewish Wisdom	JST 3513	3
The Modern Middle East	ASH 3223	3
Religions and World Politics	CPO 3761	3

## UNDERGRADUATE RESEARCH UNDERGRADUATE CERTIFICATE

*(Minimum of 12 credits required)*

To recognize undergraduate students' excellence in undergraduate research, the Office of Undergraduate Research and Inquiry (OURI) has established the [Undergraduate Research Certificate](#). Requirements for the Research Certificate include completion of 12 credits of research exposure, skill-building and intensive courses as well as dissemination of the outcomes of students' research and inquiry through a research presentation or exhibition.

## WOMEN, GENDER AND SEXUALITY STUDIES

The Center for Women, Gender and Sexuality Studies offers a variety of opportunities for students:

1. **Undergraduate [Minor in Women, Gender and Sexuality Studies](#)**

2. **Women, Gender and Sexuality Studies Concentration**

This concentration is available as part of the [B.A. in Interdisciplinary Studies](#).

3. **Women, Gender and Sexuality Studies Certificate**

This option is available to students who have completed an undergraduate degree and either want a graduate certificate while working toward an M.A. in another area, or want a graduate certificate independent of other graduate work. Successful students will complete four graduate courses for 12 credits. (Listed below.)

4. **Sexuality and Gender Education [Certificate](#)**

This is a collaborative certificate program between the Sandler School of Social Work and the Center for Women, Gender and Sexuality Studies. Details below.

5. **Master of Arts in Women, Gender and Sexuality Studies**

This option is a core of the Center for Women, Gender and Sexuality Studies and is explained in greater detail under department descriptions found [here](#).

6. **Women, Gender and Sexuality Studies courses available as electives**

This option is open to students throughout the University.

Each of the options above employs an interdisciplinary approach to gender-related issues. Students receive credit for specific courses in a variety of fields, including anthropology, criminal justice, communication, English, history, languages and linguistics, literature, nursing, political science, sociology, and of course, women's studies. The underlying goal of the Women, Gender and Sexuality Studies Program is to understand the broad range of experiences that reflect class, race, ethnicity, disability, sexual orientation and age and the interconnections that shape these experiences. The Women, Gender and Sexuality Studies Program prepares students to think critically about the political, social, economic and historical forces that shape women's and men's lives, along with responses through activism and advocacy.

Undergraduate students whose programs allow electives are encouraged to enroll in the center's course, Introduction to Women's Studies. Program faculty includes professors from many departments who stress student participation in colloquia, conferences, workshops and other engagements across disciplines.

For more information, contact the Center for Women, Gender and Sexuality Studies at 561-297-3865 or email [wsc@fau.edu](mailto:wsc@fau.edu).

## **WOMEN, GENDER AND SEXUALITY STUDIES** **GRADUATE CERTIFICATE**

*(Minimum of 12 credits required)*

The graduate certificate in Women, Gender and Sexuality Studies is available to students who have completed an undergraduate degree. There are two options available for students interested in the graduate certificate.

1. Students may enroll in the certificate program while pursuing a degree in another discipline.
2. Students may enroll in the certificate program independent of other graduate work.
3. Students will complete 12 credits of graduate courses, 3 credits of which should be taken from one of the Women's Studies core graduate courses.
4. At least 6 credits should be earned outside of a student's major for those students working toward a graduate degree.
5. Students may choose courses from a wide selection offered by departments throughout FAU.
6. Students must receive a grade of "B" or better.
7. Approval of courses from the Center for Women, Gender and Sexuality Studies should be obtained prior to enrolling.

## **SEXUALITY AND GENDER EDUCATION** **GRADUATE CERTIFICATE**

*(Minimum of 12 credits required)*

This collaborative certificate program between the Sandler School of Social Work and the Center for Women, Gender, and Sexuality Studies is available for master's and doctoral students. It provides a

flexible curricular framework for a focus on Sexuality and Gender Studies within social work and related professions.

From a context that emphasizes the values of diversity, equity, inclusion and social justice, the Graduate Certificate in Sexuality and Gender Education (SAGE) is designed to prepare graduate students to acquire, integrate and apply knowledge of issues related to sex, sexuality and gender. For students pursuing clinical careers, the certificate is designed to provide credits toward certification as a sex therapist based on Florida Department of Health's current requirements as well as toward certification as a sex educator, counselor or therapist with the American Association of Sex Educators, Counselors, and Therapists (AASECT). For students pursuing other careers, the certificate offers the opportunity to demonstrate their knowledge of issues connected to service, facilitation, leadership and advocacy with vulnerable populations, especially marginalization related to sex, sexuality and gender.

Admission to the this certificate program is limited to students currently enrolled in any graduate program at Florida Atlantic University. Credits earned for graduate degree programs also count for the certificate if approved by advisors in both programs. Requirements include the two core courses below and two graduate-level elective courses, one from each program (SOW and WST). Applications for the Graduate Certificate should be submitted to the Director of the Center for Women, Gender, and Sexuality Studies upon successful completion of the required courses with a minimum grade of "B" in each. Advising for the SAGE Graduate Certificate is shared between the Director of Graduate Studies in the Center and the SAGE Coordinator at the School of Social Work.

## DEPARTMENTS IN THE DOROTHY F. SCHMIDT COLLEGE OF ARTS AND LETTERS

The College includes the schools/departments/programs of Anthropology, Architecture, Communication and Multimedia Studies, Comparative Studies, English, History, Jewish Studies, Interdisciplinary Studies, Philosophy, Political Science, Public Administration, Sociology, Women, Gender and Sexuality Studies, and Languages, Linguistics and Comparative Literature. Three departments associated with the arts — Music, Theatre and Dance, and Visual Arts and Art History — are grouped under the heading of "School of the Arts."

## ANTHROPOLOGY

### Faculty:

Harris, M. S., Chair.; Brown, C. T.; Ellis, A.; Garriga-Lopez, A.; Martinez, V.; Napora, K.; Rynkiewich, K.

[Link to Master's Programs](#)

## ANTHROPOLOGY BACHELOR OF ARTS (B.A.)

*(Minimum of 120 credits required)*

The Anthropology Department offers an undergraduate program that provides a framework for understanding human cultures and societies through culture, archaeology, adaptation and evolution. The department also offers an [Honors Program](#) for qualified students and a [minor](#).

Anthropology prepares students for understanding the past and the present of a rapidly globalizing world by developing knowledge of contemporary national, ethnic and cultural complexities. Graduates with a major in Anthropology have a knowledge and understanding of the cultures of Western and non-Western peoples and are qualified to work in local, national and international agencies and the corporate world. An undergraduate degree in Anthropology provides the foundation for a graduate degree in Anthropology and any of the other social sciences. Students who have graduated with a degree in Anthropology from FAU have also gone on to graduate work in law, medicine, journalism, education and other graduate programs.

### **Prerequisite Coursework for Transfer Students**

Students transferring to Florida Atlantic University must complete both lower-division requirements (including the requirements of the General Education Program) and requirements for the College and major. Lower-division requirements may be completed through the A.A. degree from any Florida public college, university or community college or through equivalent coursework at another regionally accredited institution. Before transferring and to ensure timely progress toward the baccalaureate degree, students must also complete the prerequisite courses for their major as outlined in the [Transition Guides](#).

All courses not approved by the Florida Statewide Course Numbering System that will be used to satisfy requirements will be evaluated individually on the basis of content and will require a catalog course description and a copy of the syllabus for assessment.

### **Outline of the Anthropology Major**

In addition to the College and University requirements, an Anthropology major must satisfy the following departmental requirements:

1. Three credits in an introductory course;
2. Six credits in biological anthropology courses (3000 level or above);
3. Six credits in archaeology courses (3000 level or above);
4. Six credits in sociocultural courses (3000 level or above);
5. Six credits in research methods courses;
6. Nine credits in electives (anthropology courses at the 3000 level or above from any of the subfields);

7. Thirty-six credits total in anthropology; a grade of "C" or better is required for a course in anthropology to count toward the major.

### Foreign Language Requirement

Anthropology majors are required to take 8 credits of appropriate college-level courses in one modern foreign language. College-level transfer credits or credits earned through CLEP or Advanced Placement Examination may satisfy or be applied toward the foreign language requirement for graduation.

### Free Electives

The remaining credits of upper-division work are defined as free electives. Students are advised to select courses relevant to their interests in anthropology. STA 2023 (Introductory Statistics) is recommended for students interested in a quantitative approach to anthropology, and LIN 3010 is recommended as an introduction to linguistics.

Three elective credits from departments outside Anthropology, but taught by anthropologists at FAU (e.g., courses in Comparative Studies, History, Art History, Women, Gender and Sexuality Studies), may be substituted for the free- electives part of the major with permission of the Anthropology Department chair.

Many anthropology courses fulfill some requirements for interdisciplinary certificate programs at FAU, such as the Ethnic Studies, Women, Gender and Sexuality Studies, and Caribbean and Latin American Studies certificates.

## HONORS PROGRAM IN ANTHROPOLOGY

The Honors Program in Anthropology encourages students to engage in the subject more intensely and engage in significant original research while undergraduates. Because Anthropology is a field and laboratory science, students should seek opportunities, in consultation with their faculty advisor(s), to conduct or participate in original research.

### Admission Requirements

1. FAU students must have completed between 60 and 90 credits with an overall GPA of at least 3.5 and a GPA in Anthropology courses of at least 3.5.
2. Transfer students must complete 9 upper-division Anthropology credits with a GPA of at least 3.5 in those classes at FAU before they are eligible to apply for the Honors Program. Transfer students must also earn an overall GPA of at least 3.5 to be eligible for admission to the program.
3. Students should complete an application provided by the department, including a personal statement addressed to the chair of the department explaining why they seek honors in the field. Students should also solicit a letter from one Anthropology Department faculty member supporting their application. Completed applications will be reviewed by faculty. Admission to the Honors Program is contingent on approval by the department faculty.

### Standards for Maintaining Active Status

1. Once accepted, students must maintain a GPA of 3.5 overall and in the Anthropology major. Students may request a temporary probationary status for a semester in the Honors Program if their GPA falls below the required level. However, subsequent failure to raise the GPA will result in dismissal from the Honors Program.
2. Continued enrollment in the program is contingent upon strict adherence to the Code of Academic Integrity. Any violation of the Code will be grounds for dismissal from the Honors Program.

### Honors-Level Enrichment

To receive the designation of Honors in the Major, students in the program shall enhance their education in Anthropology by completing 39 credits in Anthropology courses and performing **at least three** of the following:

1. Interdisciplinary research as part of the Honors Thesis (see below);

2. Original research as part of the Honors Thesis;
3. Successful completion of Honors Compacts in at least two upper-division Anthropology courses;
4. Leadership, including, for example:
  - a. Documented service on an official University committee;
  - b. Documented service as an officer of an anthropology club, society or other organization, whether affiliated with FAU or not;
  - c. Documented service to the Department of Anthropology as, for example, chair or organizer of a research symposium or speakers' colloquium;
5. Documented field and laboratory experience such as:  
Attendance at a field school or participation as a laboratory assistant;
6. Documented civic engagement on anthropological issues in the public arena.

## Thesis Requirement

1. Students in the Honors Program must consult with at least one faculty member of their choice about their honors research prior to embarking on the research;
2. Students shall complete with a grade of "B+" or higher a minimum of a two-semester sequence (6 credits) of Honors Thesis in Anthropology (ANT 4972) culminating in the presentation of an honors thesis approved by the faculty;
3. Students shall defend the thesis research orally before the faculty;
4. Students shall publicly disseminate the results of their research, for example:
  - a. Through a poster or presentation at a conference or symposium, such as the FAU Undergraduate Research Symposium or a departmental symposium; or
  - b. Through submission of the manuscript of research report or article to a research journal, such as FAU's Undergraduate Research Journal.

Students will receive the designation "Honors in Anthropology" at the time of graduation upon satisfactory completion of the foregoing requirements if they also fulfill all normal distribution requirements for the Anthropology major and provided they have earned a GPA of at least 3.5 overall and a GPA of at least 3.5 in all Anthropology courses at graduation. Students who fail to meet any of these requirements, will receive credit for all work successfully completed but will not be certified as having received honors.

Students interested in the Honors Program in Anthropology should contact the chair of the Department of Anthropology.

## **ANTHROPOLOGY**

### **UNDERGRADUATE MINOR**

*(Minimum of 15 credits required)*

1. For students majoring in another field, a minor in Anthropology shall consist of a minimum of 15 credits in upper-division anthropology courses, earned in any five courses at the 3000 level or above.
2. A minimum of 12 credits must be taken in residence at FAU.
3. A grade of "C" or better is required for a course in anthropology to count toward the minor.

### **Anthropology Study Abroad Programs**

The Department of Anthropology participates in Florida Atlantic University's Study Abroad Programs and offers ANT 2952 and ANT 4957. The department also operates a Field School in Ecuador with programs in archaeology and ethnographic methods in which students may participate during the summer terms. To participate, students enroll in ANT 4802 or ANT 4824.

## **MASTER'S PROGRAMS**

### **ANTHROPOLOGY**

#### **MASTER OF ARTS (M.A.)**

*(Minimum of 30 credits required)*

The M.A. degree in Anthropology focuses on the interplay of method, data and theory in anthropology and allows for specialization in the subfields of cultural anthropology, biological anthropology or archaeology. The graduate program's emphasis is on the linkage of "materials" analysis (e.g., bone, shell, ceramic, lithic, interview/observational and behavioral data) to major schools of anthropological thought. The department's program aims to contextualize and advance the understanding of being human in the past and the present. The degree prepares students for doctoral work in anthropology.

### **Admission Requirements**

The applicant must have earned a baccalaureate degree from an accredited institution with a GPA of 3.0 or higher in the last 60 credits taken for that degree. The GRE is recommended but not required. The application requires (1) a Statement of Purpose and (2) two letters of recommendation sent directly to the department. The application must have the approval of the department. Where there is a

deficiency in a requirement for admission or some other problem, the applicant may be admitted conditionally as decided by the department.

## Degree Requirements

The M.A. curriculum requires completing a minimum of 30 credits and maintaining a 3.0 GPA in all coursework. The minimum passing grade in each course is "B."

---

### Core Requirements - 19 credits minimum

Seminar in Anthropological Theory	ANG 6034	3
Proposal Development and Writing	ANG 6095	3
Seminar in Archaeology	ANG 6115	3
Seminar in Biological Anthropology	ANG 6587	3
Seminar in Cultural Anthropology	ANG 6490	3
Quantitative Reasoning in Anthropological Research	ANG 6486	3
Master's Thesis (may take multiple times)	ANG 6971	1-6

---

### *Methods Requirement: At least one course from this list*

Research Methods in Archaeology	ANG 6199	3
Research Methods in Sociocultural Anthropology	ANG 6492	3
Research Methods in Bioarchaeology	ANG 6535	3

---

### *At least 8 credits from this list*

Internship in Anthropology <i>(may take multiple times)</i>	ANG 5940	2-4
Advanced Anthropological Research 1	ANG 6090	3
Advanced Anthropological Research 2	ANG 6092	3
Directed Independent Study <i>(may take multiple times)</i>	ANG 6905	1-4
Special Topics	ANG 6930	1-3

Prior to registering for courses in the first semester of graduate study, the student must consult with the department's graduate advisor to determine the likely sequencing of coursework in the student's program.

The Admissions Committee may determine that the applicant must enroll in undergraduate anthropology courses as a condition for graduate work. These remedial courses are not applicable to graduate credit.

Students must demonstrate proficiency of a language appropriate to their field of specialization. Students can fulfill this requirement by completing a two-semester sequence in a language or a Reading for Research course (e.g., FRE/GER/SPN 5060). Alternatively, students may demonstrate proficiency in a language by examination as determined by the department.

A public thesis proposal defense is required. Work on the thesis is expected to begin upon successful defense of the proposed research. Students must be enrolled for a minimum of 1 or up to a maximum of 6 credits in ANG 6971 during the semesters they are working on the thesis and the semester in which they expect to graduate.

### **Admission to Candidacy**

After completion of the thesis proposal defense, a student is eligible for admission to candidacy. The student must file an approved Plan of Study form no later than the third semester of the student's program. In preparing the plan, the student should take professional objectives into consideration as well as all department and University requirements. A completed Research Compliance Verification

form must be attached to the Plan of Study form. After the plan has been filed, subsequent major changes must be approved by the chair of the department, the student's advisor and the dean of the Graduate College.

## **ANTHROPOLOGY**

### **MASTER OF ARTS IN TEACHING (M.A.T.)**

*(Minimum of 36 credits required)*

The Department of Anthropology also offers a Master of Arts in Teaching (M.A.T.) degree designed for any student wishing to prepare for teaching at the elementary, secondary or community college level. This program is particularly appropriate for current teachers who are looking to build anthropological knowledge into their curricula and advance their teaching credentials.

Admission requirements are the same as for the M.A. program. The M.A.T. total course requirements are 36 credits earned in core courses, pedagogy, DIS courses (6 credits), teaching internship (6 credits) and completion of a modified thesis (3 credits).

## **ART**

([Art](#) programs are listed following **Women, Gender and Sexuality Studies**, under **School of the Arts, Visual Arts and Art History**.)

## **ARTS AND HUMANITIES**

([Arts and Humanities](#) is listed under **Interdisciplinary Studies**.)

## **SCHOOL OF ARCHITECTURE**

### **Faculty:**

Choma, J., Director; Lyn, F. E., Associate Director; Abbate, A. J.; Bolojan, D.; Caldierón, J-M.; Camargo, D.; d'Anjou, P.; Granger, W.; Huber, J.; Ligler, H.; Rodgers, T.; Sandell, J.; Vermisso, E.; White, D.; Yousif, S.

The School of Architecture prepares students for the professional practice of architecture. Situated in

the broader context of the humanities and social sciences, the curriculum is composed of specialized courses in history, theory, technology and design communication built around a core of a progressive sequence of architectural design studios.

The School offers the Bachelor of Architecture (B.Arch.), an accredited first professional degree. It offers a preprofessional lower-division program and an upper-division professional degree program. Both are limited-access programs. The School also offers a minor in Architectural Studies.

For students interested in pursuing graduate-level studies in planning in addition to their professional degree in architecture, the School of Architecture and School of Urban and Regional Planning offer an Advanced Standing degree program. See the School of Urban and Regional Planning section for more information.

### **Program Accreditation**

In the United States, most registration boards require a degree from an accredited professional degree program as a prerequisite for licensure. The National Architectural Accrediting Board (NAAB), which is the sole agency authorized to accredit professional degree programs in architecture offered by institutions with U.S. regional accreditation, recognizes three types of degrees: the Bachelor of Architecture, the Master of Architecture and the Doctor of Architecture. A program may be granted an eight-year, three-year or two-year term of accreditation, depending on the extent of its conformance with established educational standards.

Doctor of Architecture and Master of Architecture degree programs may require a preprofessional undergraduate degree in architecture for admission. However, the preprofessional degree is not, by itself, recognized as an accredited degree.

The School of Architecture offers the following NAAB-accredited degree program: B.Arch. (159 credits, undergraduate and graduate, as required). Next accreditation visit for all programs: 2025.

[Link to Architectural Studies Minor](#)

[Link to Advanced Standing Bachelor of Architecture/Master of Urban and Regional Planning Program](#)

## **ARCHITECTURE**

### **BACHELOR OF ARCHITECTURE (B.ARCH.)**

*(Minimum of 159 credits required)*

Lower-division courses are offered at the Boca Raton campus

Upper-division courses are offered at the Fort Lauderdale campus

### **Prerequisite Coursework for Transfer Students**

Students transferring to Florida Atlantic University must complete both lower-division requirements (including the requirements of the General Education Program) and requirements for the college and major. Lower-division requirements may be completed through the A.A. degree from any Florida public college, university or state college or through equivalent coursework at another regionally accredited institution.

Before transferring and to ensure timely progress toward the baccalaureate degree, students must also complete the prerequisite courses for their major as outlined in the [Transition Guides](#) . All prerequisite courses must be completed by the School's designated date or within the first year after transferring to FAU and before reaching senior status (90 total credits).

All courses not approved by the Florida Statewide Course Numbering System that will be used to satisfy requirements will be evaluated individually on the basis of content and will require a catalog course description and a copy of the syllabus for assessment.

### **Application to Lower-Division Preprofessional Program**

Prior to applying to the School of Architecture, admission to the University is required. (Refer to the [Admissions section](#) of this catalog.)

### **Lower-Division Preprofessional Course Sequence**

In addition to the General Education requirements, the following courses are required.

*A minimum grade of "C" is required for each architecture (ARC-prefixed) course. A grade of "C-" or below does not meet this requirement. When a grade below a "C" is earned, the course will not count toward any portion of the 159-credit requirement.*

### Application to Upper-Division Professional Degree Program

The following students are eligible to apply to the professional degree program:

1. Students who have successfully completed the lower-division preprofessional program at Florida Atlantic University or equivalent coursework at any college or university;
2. Students with an approved Associate of Arts (A.A.) degree in Architecture from Broward College, Hillsborough Community College, Indian River State College, Miami Dade College, Palm Beach State College, St. Petersburg College or Valencia Community College;
3. Transfer students from an accredited degree program in architecture.
4. Transfer students from a preprofessional degree program in architecture.
5. Transfer students with international equivalency.

Students applying to the professional degree program with an approved A.A. preprofessional degree in Architecture or transfer students from an accredited program in architecture must submit evidence of having completed the necessary prerequisite courses or course equivalents. Course equivalents for in-

state colleges are determined by state guidelines. Course equivalence from other accredited programs is verified by faculty review of the corresponding published course descriptions and syllabi. Only grades of "C" or better are accepted for all required courses. Courses for which grades of "C-" or lower are indicated in official transcripts shall not be accepted for credit toward the 159-credit requirement.

Applicants with any portion of their education completed abroad must have their foreign credentials evaluated by an accredited independent evaluation service. This evaluation should reflect a course-by-course evaluation with a cumulative grade point average for each institution attended. The course descriptions and syllabi must be translated into English by such evaluation agency or by the institution from which the student is transferring. The National Association of Credential Evaluation Services ([www.NACES.org](http://www.NACES.org)) has a list of agencies. In addition, applicants with international academic backgrounds must demonstrate English proficiency by earning a minimum score of 550 on the Test of English as a Foreign Language (TOEFL). International applicants must also verify nation of citizenship with the appropriate documentation. Applicants who wish to transfer from out-of-state or international institutions must submit course descriptions from their institutions' catalog of each architecture, mathematics and physics course earned with a grade of "C" or better.

Transfer applicants seeking approval for equivalency or substitution of published courses in the curriculum at the 3000-4000 level, taken outside Florida's State University System, must submit copies of the original course syllabus and assignments. In addition, students must submit evidence of completed coursework (papers, exercises, drawings, examinations, etc.) demonstrating levels of accomplishment (understanding or ability) required for each course. The School of Architecture, at its sole discretion, may accept or deny equivalency or substitution of required courses based on reference to the Student Performance Criteria (SPC) for each course as determined by the faculty. In the event a course is denied, it may qualify for elective credits.

Applications to the School of Architecture are accepted only from students who have been accepted for admission to Florida Atlantic University. Applicants must demonstrate the potential to successfully complete the professional degree program. Admission and placement is determined by the faculty upon review of each application to ensure students have met all academic requirements through the demonstration of the following. The decision by the faculty to recommend admission and placement is final and may not be appealed.

1. Overall Grade Point Average (GPA);
2. TOEFL score of 550 or greater for students whose primary language is not English;
3. Official transcripts of academic records;
4. Copies of published course descriptions and syllabi for the purpose of determining conformance

of courses submitted as equivalent to the required courses in the curriculum;

5. Assigned sample of writing;
6. Portfolio of student work;
7. Completed application to the School of Architecture.

### **Automatic Admission into the Upper Division Bachelor of Architecture Program for Students from FAU Lower Division Foundations Pre-Architecture Program**

Any student currently or formerly registered in the FAU Lower Division Foundations Pre-Architecture program will be automatically accepted into the FAU Bachelor of Architecture Program if they meet the following qualifications:

- Successful completion of all courses listed below with a minimum grade of B:
  - ARC 1301 Architectural Design 1
  - ARC 1302 Architectural Design 2
  - ARC 2303 Architectural Design 3
  
- Successful completion of all courses listed below:
  - ARC 2208 Culture and Architecture: The Master Builder
  - ARC 2201 Architectural Theory 1
  - ARC 2461 Materials and Methods 1
  - MAC 2233 Methods of Calculus (or higher)
  - PHY 2053 College Physics (or higher)
  
- Cumulative GPA of 3.0 or higher.

In addition, the following courses must be successfully completed prior to enrollment in any Upper Division design studio:

- ARC 2304 Architectural Design 4
- ARC 2580 Architectural Structures 1

Successful completion is defined as a minimum grade of C or better for all ARC courses, MAC 2233 and

PHY 2053. Notifications of Automatic Admission will be sent in early February. Students who do not meet these qualifications must submit an application and portfolio for admission into the Upper Division Bachelor of Architecture Program.

## **Priority Consideration for Admission into the Upper Division Bachelor of Architecture Program For Applicants from the Florida State University System or Florida College System**

Any applicant who has completed coursework at an institution in the Florida State University System or the Florida College System, and who meets the requirements listed below may apply for Priority Consideration for Admission into the Bachelor of Architecture Program at FAU.

- Successful completion of the following courses with a minimum grade of B:
  - ARC 1301 Architectural Design 1
  - ARC 1302 Architectural Design 2
  - ARC 2303 Architectural Design 3
  - ARC 2208 Culture and Architecture: The Master Builder
  - ARC 2201 Architectural Theory 1
  - ARC 2461 Materials and Methods 1
  
- Successful completion of all courses listed below:
  - MAC 2233 Methods of Calculus (or higher)
  - PHY 2053 College Physics (or higher)
  
- Cumulative GPA of 3.2 or higher.

Successful completion is defined as a minimum grade of C or better for all ARC courses, MAC 2233 and

PHY 2053. Students who are offered Priority Consideration Admission will not be required to submit a portfolio. Students who do not meet these qualifications must submit an application and portfolio for admission into the Upper Division Bachelor of Architecture Program.

Students accepted under priority consideration must complete their AA degree prior to start of the Bachelor of Architecture program. In addition, the following courses must be successfully completed prior to enrollment in any Upper Division design studio:

- ARC 2304 Architectural Design 4
- ARC 2580 Architectural Structures 1

### **Deadlines for Priority Consideration Application**

The following Priority Consideration Application deadlines occur in early spring.

- Priority Consideration Application Submission – Mid January

- Decision Letters Sent – Early February
- Priority Deposit Submission to Reserve Position (non-refundable) – Early March

To view specific annual deadlines, see [Architecture Admissions](#).

### **Application Deadlines for Fall Enrollments**

School of Architecture applications, including portfolios, are due prior to the end of business on the last Friday of February.

### **Portfolio Submissions and Requirements**

Students applying for admission to the School of Architecture must submit a portfolio of work. Portfolios that are not submitted with the application shall not be accepted. Refer to the School of Architecture [Portfolio Submission Requirements](#).

### **Summer Admission Eligibility**

Students who have successfully completed all of the following prerequisites may be eligible for summer admission:

- ARC 1301 Architectural Design 1
- ARC 1302 Architectural Design 2
- ARC 2303 Architectural Design 3
- ARC 2304 Architectural Design 4
- ARC 2208 Culture and Architecture: The Master Builder
- ARC 2461 Materials and Methods 1
- ARC 2201 Architectural Theory 1
- ARC 2580 Architectural Structures 1
- PHY 2053 College Physics 1
- MAC 2233 Methods of Calculus
- ENC 1101 College Writing 1
- ENC 1102 College Writing 2
- All General Education requirements

Please contact an academic advisor for more information.

### **Upper-Division Professional Degree Course Sequence**

All students admitted to the B.Arch. program are expected to enter the professional course sequence with the ability to prepare graphic presentations utilizing normative, descriptive, architectural drawing techniques.

*A minimum grade of "C" is required for each architecture (ARC-prefixed) course, including electives. A grade of "C-" or below does not meet this requirement. When a grade below a "C" is earned, the course will not count toward any portion of the 159-credit requirement. The 159-credit requirement must be met by all students seeking the first professional B.Arch. degree.*

Topical Design Studio	ARC 5352	6
Introduction to Urban Design	ARC 6305	3
Electives (3000, 4000, 5000 level)		12

### School of Architecture Student Handbook

Policies and protocols regarding registration, ethical conduct, discipline and other matters are found in the current edition of the *School of Architecture Student Handbook*. The School of Architecture may publish amendments and modifications as needed on an ongoing basis.

### Intellectual Property

Student work submitted to the School of Architecture to satisfy course or degree requirements is the property of the School. Students, as authors of the original work, retain all rights to the intellectual property of such work, including papers, drawings, models and other materials. At the discretion of the faculty, all student submissions may be retained, returned or discarded.

### Enhanced Learning Opportunities

The School of Architecture may organize field trips and travel study programs (domestic and international) to provide an opportunity to enrich the educational experience. While students are encouraged to participate in these activities, additional fees may apply. Students interested in international study opportunities should register with the Office of International Programs.

### Scholarships and Grants

The School of Architecture offers a number of stipends, grants and other financial assistance on an annual basis. Students are encouraged to apply. (See the School of Architecture Student Handbook for more information.)

## ARCHITECTURAL STUDIES UNDERGRADUATE MINOR

*(Minimum of 15 credits required)*

The undergraduate minor in Architectural Studies offers students the possibility to gain insight into the discipline of Architecture, broadening students' global backgrounds on the relationship between the built environments and cultural meaning. The minor is available to all full-time, degree-seeking FAU students, except those enrolled in the Pre-Architecture or Bachelor of Architecture programs. However, students transferring out of the Pre-Architecture or Bachelor of Architecture programs may opt to receive recognition for their efforts spent in the major by completing the requirements for the minor.

Students must complete 15 credits from the lists of courses below, with 9 credits required in upper-level courses. A grade of "C" or better is required for all courses taken in the minor. A minimum of 75 percent of all minor courses must be completed at FAU. To apply for the minor, students must complete an application and submit it to the Dorothy F. Schmidt College of Arts and Letters. The application may be submitted once the final course is in progress. The minor will be noted on students' transcripts.

**For completion of the undergraduate minor, the School of Architecture offers the following courses annually:**

Architectural Design 1	ARC 1301*	4
Architectural Design 2	ARC 1302*	4
Architectural Theory 1 <i>(instructor permission required)</i>	ARC 2201	3
Culture and Architecture: The Master Builder	ARC 2208	3
Architectural Design 3	ARC 2303*	4
Architectural Design 4	ARC 2304*	4

Materials and Methods 1 <i>(instructor permission required)</i>	ARC 2461	3
Architectural Research Methods and Analysis	ARC 3091	3
Architectural Visualization Methods 1	ARC 3133*	3
Pre-Modern Architectural History and Theory	ARC 3710	3
Architectural Theory	ARC 4219	3
Designing Safer Communities with CPTED	ARC 4384	3
* These courses are available only to students enrolled in the Pre-Architecture or Bachelor of Architecture programs and may count toward the minor for those students transferring out of either of those two programs.		
<b>Additional courses available for the minor appear below. These are offered on a rotation basis:</b>		
Color Material Space	ARC 4134	3
Ethics and Architecture	ARC 4202	3
Architectural Detail Generation	ARC 4482	3
Modern Architectural History and Theory 2	ARC 4712	3
Architects and Engineers: Histories of a Relationship	ARC 4742	3
Historic Preservation	ARC 4801	3
Special Topics	ARC 4930	1-6

Architecture and Urbanism Study Abroad	ARC 4950	3
Architecture Study Abroad	ARC 4955	1-6
Literature and Criticism in Architecture	ARC 5221	3
Sustainability and Tropical Architecture	ARC 6598	3

## ARCHITECTURE TO URBAN AND REGIONAL PLANNING

### BACHELOR OF ARCHITECTURE (B.ARCH.) TO MASTER OF URBAN AND REGIONAL PLANNING (M.U.R.P.) ADVANCED STANDING PROGRAM

This combined program is jointly offered by the Dorothy F. Schmidt College of Arts and Letters and the Charles E. Schmidt College of Science. For a complete description and all requirements for the B.Arch./M.U.R.P. Advanced Standing Program, see the program listing in the College of Science's [Department of Urban and Regional Planning](#) section.

## SCHOOL OF COMMUNICATION AND MULTIMEDIA STUDIES

### Faculty:

Mills, C., Director; Bargsten, J.; Charbonneau, S.; Darlington, P.; Durnell-Uwechue, N.; Eason, S.; Fejes, F.; Guneratne, A.; Heidt, S.; Hofmann, M.; Lewter, B.; McAfee, F.; Mulvaney, B.; O'Hara, T.; Pendakur, M.; Petrich, K.; Poole, D.; Prusher, I.; Reilly, S.; Robé, C.; Santaniello, N.; Scodari, C.; Sim, G.; Sobnosky, M.; Trapani, W.; Von Spalding, R.; Williams, D.; Winn, L.

### Mission

The mission of the FAU School of Communication and Multimedia Studies (SCMS), carried out through its courses, research and services, is to help provide the knowledge and skills that will allow students to understand and contribute to the increasingly communication- and media-oriented environment. Communication courses are designed to help students become: 1) more ethical, effective communicators in all contexts, from interpersonal to large public gatherings, print, radio, television, film and emerging technologies, and 2) more critical and analytical consumers of communication in all

its many aspects.

In the undergraduate program, the School offers a variety of liberal arts and technically oriented courses that cover theoretical, historical, multicultural, analytical, critical and performance approaches to communication processes and media. At the same time, the program allows students to emphasize areas of particular interest: communication studies; film and media, and multimedia journalism.

The School's overarching goal for its graduates is to provide them with a broad liberal arts education. Students will be afforded the opportunity to gain a technical and/or professional orientation sufficient to qualify them for a first job in any business or institution that needs employees who are effective communicators. Students will also be afforded the background needed to pursue further education in communication or related fields.

The School offers a B.A. in Communication Studies and a B.A. in Multimedia Studies with a concentration in Film and Media or a concentration in Multimedia Journalism. It also offers advanced degrees in Communication and Multimedia Studies, with an M.A. in Communication and an M.F.A. in Media, Technology and Entertainment. (The M.F.A. is currently on suspension and not accepting students.)

[Link to Minors](#)

[Link to Master's Programs](#)

## COMMUNICATION STUDIES BACHELOR OF ARTS (B.A.)

*(Minimum of 120 credits required)*

[Link to Multimedia Studies](#)

Students who enroll for a Bachelor of Arts degree with a major in Communication Studies must meet all University and Dorothy F. Schmidt College of Arts and Letters requirements. These include satisfactory completion of a total of 120 credits, 60 of which must be earned at a four-year college or university, and 8 credits in sequence in a single foreign language. **A student whose GPA falls below 2.0 will be dropped from the major. A GPA of 2.0 or higher is required to transfer to the major.**

The B.A. in Communication Studies is a problem-focused program that emphasizes contemporary cultural concerns while situating these within the broader historical context of communication and cultural theory. The purpose of the degree is to provide students with the awareness, knowledge, motivation and skills to develop communication strategies to address the problems of a global society, and the emphasis is on all forms of civic engagement. The program examines the strategic role that symbol systems play in constructing meaning in a fast-changing, information-based, media-saturated and culturally diverse world. Courses examine how meaning informs and persuades individuals, and introduce students to the history and theories of how communication operates in societies. The goals are for students to develop both high level oral and written communication skills and critical thinking and analytical problem-solving skills, and to become active in civic life.

### **Prerequisite Coursework for Transfer Students**

Students transferring to Florida Atlantic University must complete both lower-division requirements (including the requirements of the General Education Program) and requirements for the College and major. Lower-division requirements may be completed through the A.A. degree from any Florida public college, university or community college or through equivalent coursework at another regionally accredited institution. Before transferring and to ensure timely progress toward the baccalaureate degree, students must also complete the prerequisite courses for their major as outlined in the [Transition Guides](#).

All courses not approved by the Florida Statewide Course Numbering System that will be used to satisfy requirements will be evaluated individually on the basis of content and will require a catalog course description and a copy of the syllabus for assessment.

## **HONORS PROGRAM IN COMMUNICATION**

The Honors Program in Communication allows highly motivated and well-prepared students to pursue a course of study organized around a specific topic, area of interest or creative project. Students take a special sequence of courses both within and outside the School. In their last semester they complete a senior honors thesis or a senior honors project under the direction of a School faculty advisor.

## **MINORS**

### **COMMUNICATION STUDIES UNDERGRADUATE MINOR**

*(Minimum of 18 credits required)*

A minor in Communication Studies requires that the student complete both MMC 1540 and COM 2053 plus 12 credits in courses with COM, SPC or MMC prefixes, no less than 9 credits of which must be at

the 3000 level or above. At least 15 of the 18 credits must be taken at FAU.

## **FILM AND VIDEO** **UNDERGRADUATE MINOR**

*(Minimum of 16 credits required)*

The undergraduate minor in [Film and Video](#) gives students in any major the opportunity to bring together courses from several departments and colleges into a multidisciplinary curriculum emphasizing all aspects of film and video.

## **POLITICAL COMMUNICATION** **UNDERGRADUATE MINOR**

*(Minimum of 12 credits required)*

The undergraduate minor in [Political Communication](#) gives students in any major the opportunity to bring together courses from Communication and Multimedia Studies and Political Science into a multidisciplinary curriculum. Students are offered scholarly study of political networks as well as hands-on courses in political advocacy and campaigning.

## **PUBLIC RELATIONS** **UNDERGRADUATE MINOR**

*(Minimum of 15 credits required)*

The undergraduate minor in Public Relations provides students with a solid foundation of the principles and practices in the field of public relations. The minor helps prepare students for careers in publicity, promotion, public affairs, government relations and media relations.

This minor is open to all degree-seeking students and will be awarded upon completion of a bachelor's degree. A student who already holds a baccalaureate degree may pursue the minor in conjunction with a second bachelor's degree. All courses taken in the program may be counted toward other general and specific graduation requirements, and courses taken to fulfill other requirements may be applied to this minor.

Requirements for the minor include completion of five courses (15 credits) with a minimum grade of "C" and a 2.5 GPA. Students are required to take 12 credits from the required list with one elective option. At least 12 credits for the minor must be earned from FAU. In addition to the regular curriculum, other courses with significant attention to public relations may be approved by the SCMS director.

### **UNDERGRADUATE MINOR**

*(Minimum of 12 credits required)*

The undergraduate minor in [Sport Studies](#) gives students in any major the opportunity to bring together courses from across Arts and Letters to explore various aspects of sports and society that will help strengthen their ability to see sports not just as game, but as a significant aspect of modern society.

## **MULTIMEDIA STUDIES**

### **BACHELOR OF ARTS (.B.A.)**

**Film and Media Concentration**

**Multimedia Journalism Concentration**

*(Minimum of 120 credits required)*

Students who enroll for a Bachelor of Arts degree with Major in Multimedia Studies must choose one of two concentrations: the Film and Media concentration or the Multimedia Journalism concentration. In addition, students must meet all University and Dorothy F. Schmidt College of Arts and Letters requirements. These include satisfactory completion of a total of 120 credits, 60 of which must be earned at a four-year college or university, and 8 credits in sequence in a single foreign language.

**Students in the Multimedia Journalism concentration whose GPA falls below 2.0 will be dropped from the major. Students in the Film and Media concentration whose GPA falls below 2.5 will be dropped from the major. A GPA of 2.0 or higher is required for transfer to this major.**

#### **Prerequisite Coursework for Transfer Students**

Students transferring to Florida Atlantic University must complete both lower-division requirements (including the requirements of the General Education Program) and requirements for the College and major. Lower-division requirements may be completed through the A.A. degree from any Florida public college, university or community college or through equivalent coursework at another regionally accredited institution. Before transferring and to ensure timely progress toward the baccalaureate degree, students must also complete the prerequisite courses for their major as outlined in the [Transition Guides](#).

All courses not approved by the Florida Statewide Course Numbering System that will be used to satisfy requirements will be evaluated individually on the basis of content and will require a catalog

course description and a copy of the syllabus for assessment.

### **Film and Media Concentration**

The Film and Media concentration is a comprehensive curriculum that includes courses in media studies, media production, and digital media, including computer animation. Courses analyze the power and responsibility of American and international media from formal, historical, economic and ideological perspectives. This concentration is committed to helping students understand media texts in relation to the worlds they represent. Its course of study emphasizes not only the meanings of these texts, but also the processes by which these meanings are constructed and disseminated. The goal is to help undergraduates understand the study and creation of visual media within the larger contexts of human audiovisual and verbal expression and to shape students into sophisticated readers and producers of visual culture. Courses consider both mainstream and alternative media and include industrial and artistic approaches, linking production techniques and aesthetics to industry, history and politics.

Gender and Television	RTV 4412	3

\* Courses listed in History, Theory and Criticism and Practice may be substituted in this category if

they are not used to fill other requirements.

### **Multimedia Journalism Concentration**

The Multimedia Journalism concentration prepares students to work in the new media convergence environment — where competition, deregulation and digital technology break down the barriers between print, radio, television and the Internet. Students are expected to develop strong basic writing and analytical skills. Then they are expected to become adept at writing and producing for multiple media platforms simultaneously, exhibiting the versatility necessary to succeed in a quickly evolving and growing media market, as well as to fully exercise the civic responsibilities of journalists for the lively functioning of democratic institutions.

Before enrolling in JOU 4181, Coverage of Public Affairs, students in the Multimedia Journalism concentration must take the Multimedia Journalism Skills Test (spelling, grammar and punctuation), which is offered at the University Testing and Certification Center every semester, or pass MMC 2121C with a minimum grade of "C." The test must be passed, may be taken a maximum of two times and may only be taken once in a given semester.

JOU 4181 thus serves as the gateway course to the next Multimedia Journalism Performance and Production courses in the curricular sequence: RTV 4301, Broadcast Journalism; JOU 4342, Multimedia Journalism; and the capstone course RTV 4304, Advanced Broadcast Journalism (or its “Disciplinary Core” alternative VIC 4943, Multimedia Practicum).

### **Required Credits for the B.A. in Multimedia Studies: Multimedia Journalism Concentration (120 credits):**

General Education Program (44 credits)

Multimedia Journalism Major (38 credits)

College of Arts and Letters Electives (12 credits)

Free Electives (26 credits)

### **Communication Study Abroad**

Students may receive from 1 to 4 credits for participating in one of the many University-approved Study Abroad Programs offering courses relevant to the major.

### **Communication Internship**

Students may receive 3 credits for practical experience working 12 to 16 hours per week in a communication-related business or industry. The course culminates in a research paper or project in which the student evaluates the experience by methodologies learned in other communication courses. Students must have a minimum GPA of 2.5 overall and a GPA of 3.0 in the School. Permission from the SCMS is required.

## MASTER'S PROGRAMS

[Link to M.F.A. in Media, Technology and Entertainment](#)

### COMMUNICATION

#### MASTER OF ARTS (M.A.)

*(Minimum of 30 credits required)*

The central objective of the Master of Arts program in the School of Communication and Multimedia Studies is to equip students with historical, theoretical and critical knowledge of oral, written, visual and aural symbol systems, the institutions and processes that produce them and the audiences/readers who engage them. Emphasis is placed on research skills, the cultivation of original scholarship in communication and cognate fields and the critical examination of primary and secondary source materials. The goal is to enhance and focus students' ongoing or future efforts in communication-related professions or activities or to prepare them for doctoral studies and/or academic careers. For information, refer to [www.fau.edu/scms](http://www.fau.edu/scms).

#### Admission Requirements

1. Applicants should have:
  - a. A baccalaureate degree from an accredited institution;
  - b. A minimum 3.0 grade point average in the last 60 undergraduate credits attempted;
  - c. Competitive Graduate Record Exam (GRE) demonstrating strength in verbal, analytic and writing scores.
2. Applicants must submit a 500-word typewritten statement of their goals, aspirations and reasons for seeking the M.A. in Communication. Care should be taken to align educational and career goals with the program and faculty specialization offered by the School of Communication and Multimedia Studies.
3. Applicants must submit two letters of recommendation detailing academic abilities and

performance.

4. Applicants should submit a sample of their academic writing (no fewer than 3,000 words). The writing sample should exhibit sufficient depth and sophistication of thought as well as quality and clarity of writing so as to justify admission into the master's program.
5. International applicants must also meet the additional requirements listed elsewhere in this catalog.
6. Students need not have an undergraduate specialization in communication to apply for the M.A. program.
7. Deadline for applications (online and postmarked): September 1 for spring admissions and March 1 for fall admission.

### **Admission Requirements for Degree Candidacy**

A student may be admitted to candidacy for the degree of Master of Arts with Major in Communication after having satisfied the following requirements.

1. The student must complete 9 or more credits of graduate coursework in Communication with a GPA of 3.0 or better.
2. The student must complete all other College and University requirements.
3. The student must be recommended by the department and thesis supervisory committee.
4. The student must be formally accepted into the Master of Arts program by the SCMS. Non-degree-seeking, master's-level students are not permitted to enroll for more than 6 credits in SCMS courses without being formally accepted into the program.
5. If a student is awarded a graduate teaching assistantship, that student is required to enroll in COM 6944, Theory and Practice of Teaching Communication, in their first year of study.

### **Requirements for Degree, Thesis Option**

*(Minimum of 30 credits required)*

1. Nine credits of required courses:
  - a. COM 6400 (3 credits), Introduction to Graduate Studies in Communication;
  - b. COM 6424 (3 credits), Communication Theory;
  - c. COM 6318 (3 credits), Communication Research and Design.
2. Fifteen credits of approved electives, of which a minimum of 9 must be in Communication. Any coursework in a department other than Communication must be approved in writing by a Communication faculty advisor prior to enrollment.
3. Six credits of thesis research.
4. Courses taken to satisfy the foreign language requirement cannot be applied to the degree.
5. Submission of an approved thesis.

6. A minimum 3.0 GPA on all work completed.
7. A grade of "B" or higher on all credit applied to the degree.

### **Requirements for Degree, Non-Thesis Option**

*(Minimum of 30 credits required)*

1. Nine credits of required courses:
  - a. COM 6400 (3 credits), Introduction to Graduate Studies in Communication;
  - b. COM 6424 (3 credits), Communication Theory;
  - c. COM 6318 (3 credits), Communication Research and Design.
2. Twenty-one credits of elective courses, of which 21 must be in Communication. Any coursework in a department other than Communication must be approved in writing by a Communication faculty advisor prior to enrollment.
3. Satisfactory completion of a written comprehensive examination or professional project.
4. Courses taken to satisfy the foreign language requirement do not count toward the 30-credit degree requirement.
5. A minimum of 3.0 GPA on all work completed.
6. A grade of "B" or higher on all credit applied to the degree.
7. Additional requirements that the student's advisory committee may prescribe.

## **MEDIA, TECHNOLOGY AND ENTERTAINMENT MASTER OF FINE ARTS (M.F.A.)**

*(Minimum of 60 credits required)*

**The M.F.A. is currently on suspension and not accepting students.**

The Master of Fine Arts program in the School of Communication and Multimedia Studies is an interdisciplinary degree offered in collaboration with the Department of Electrical Engineering and Computer Science. The degree combines film, video, interactive media and computer animation faculty with computer science and engineering faculty to provide graduate students innovative approaches to digital entertainment that stretch creative and scientific boundaries. Students are challenged to think in artistic, scientific and industrial terms about: 1) innovative forms of digital media practice within film and video production, video gaming, web-based interactive media and mobile media; 2) new pipeline models for media production, such as 3D processing for film and game development; 3) practical applications, such as interface design, hardware and software, enhanced content delivery and ubiquitous computing.

The program is intended to prepare students for creative careers in the emerging field of digital media. The related entertainment industries along with the evolving interdisciplinary nature of the arts require a combination of skills from the traditional media of film and television. They also require a deep understanding of the effects of interactivity upon the quality of experience as well as grounding in the computer sciences to understand hardware build, coding, interface design and data delivery within multimedia systems. Therefore, the program emphasizes collaboration across the faculty and programs of Multimedia Studies and Computer Science and Engineering while envisioning expanded cross-disciplinary activities throughout the University. The fundamental philosophy of the program stresses creativity of expression, experimentation and excellence in execution as well as innovation in the field of entertainment technologies and an earnest appreciation of the fine arts.

With these goals in mind, students are able to develop a number of technical proficiencies within 2D and 3D computer animation; interactive, web-based and mobile media; video production and post production; multimedia integration and content delivery. Following a collaborative work model, students are also able to develop specializations within the program while learning to map their technical skill sets onto a broad range of industry settings and using a broad range of visualization strategies.

## **Admission Requirements**

1. A baccalaureate degree (B.A., B.F.A. or B.S.) from an accredited institution. Applicants will be drawn from a range of fields and should have an undergraduate degree in computer animation, new media, information technology, media arts, computer science and engineering or a related discipline with a 3.0 GPA.
2. Competitive Graduate Record Exam (GRE) scores.
3. In addition to a completed online application form submitted to the Graduate College, the applicant must submit items 4 through 8 to the degree program office.
4. A 500-word personal statement. The personal statement should articulate the applicant's areas of interest and compatibility of those interests with the M.F.A. program. The personal statement is an opportunity for the student to express his or her background and interest in the degree program; the statement will be read by the faculty panel as a measure of creativity, self-awareness and vision.
5. Writing sample. The writing sample is used to demonstrate the candidate's imagination; the candidate must describe an interactive media experience that has inspired him or her to enter the field, outlining the specific qualities that made the experience meaningful.

6. Portfolio list. The portfolio list is a record of the applicant's creative material; it should include a concise description of each project, the month and year of completion, the applicant's creative role and the purpose of the project. The material should give an idea of the range and depth of the candidate's creative ability, and formal recognition such as awards, publication, jobs and exhibitions should be noted. When listing creative materials prepared for a class or publication, the name of the institution or the publication should be included.
7. Creative work sample. The creative work sample is the portfolio that represents the candidate's best or most relevant work.
8. Letters of recommendation. A minimum of three letters of recommendation from a variety of sources are required; these may be from teachers and industry supervisors.
9. International applicants must also meet the additional requirements listed on the Graduate College website.
10. Applicants must submit all materials listed above no later than March 1 to be considered for fall enrollment. Exceptionally qualified applicants may be considered after that date at the discretion of the graduate faculty.

## Degree Requirements

The Master of Fine Arts is an intensive, two-plus year program that requires 60 credits, of which 42 are requirements, 12 are electives and 6 are thesis. As part of the required coursework, students must complete an advanced portfolio or present a creative digital media project that they design and produce on their own or as part of a team.

An overall GPA of at least 3.0 must be maintained in all coursework toward the degree and a minimum grade of 3.0 must be earned in all required courses. There is project work required each semester, and the degree cannot be completed in less than two years of four full-time semesters.

## COMPARATIVE STUDIES

**Faculty:** E. Berlatsky, Director; Associated College Faculty

### **Definition of Comparative Studies**

Comparative Studies is the application of various approaches within the humanities, arts and social sciences to the study of significant issues. The Ph.D. in Comparative Studies also involves developing expertise in advanced interdisciplinary and multidisciplinary study: exploration of topics and materials from at least two traditional disciplines (e.g., political science and English literature; anthropology and history; art history, literature and communication). Students select a concentration from the following choices: [Culture, Society and Politics](#); [Cultures, Languages and Literatures](#); [Design, Aesthetics and the Arts](#); [Fine and Performing Arts](#); and [Public Intellectuals](#). The latter two concentrations are on hiatus and currently not accepting students.

## COMPARATIVE STUDIES DOCTOR OF PHILOSOPHY (PH.D.)

### **Concentrations:**

**Culture, Society and Politics**

**Cultures, Languages and Literatures**

**Design, Aesthetics and the Arts**

**Fine and Performing Arts**

**Public Intellectuals**

### **Admission Requirements (for all concentrations)**

1. A statement of intent that outlines the applicant's goals and objectives and how this interdisciplinary program can help the applicant achieve these.
2. A B.A., B.F.A., B.S., M.A., M.S., M.F.A., B.Arch, M.Arch, M.Des or M.M. degree. Students with other undergraduate or graduate degrees, such as M.B.A. or J.D., may also be considered. An applicant must submit a paper, approximately 20 pages in length and with scholarly

documentation, that will demonstrate the applicant's analytical and explanatory skills and command of the discipline in the area of the master's degree.

3. Three descriptive letters of recommendation, including at least two from professors whose course(s) the student has taken. These letters should be current and should attest to the applicant's intellectual qualifications for the Ph.D. in Comparative Studies.
4. Approval of Ph.D. executive committee.
5. It is recommended, but not required, that students submit competitive verbal, quantitative and analytic GRE scores from within the last five years.

## **Application Procedures**

1. Applications may be obtained from the Graduate College.
2. All application materials, including letter of intent, transcripts, three letters of reference and writing sample, should be sent to the Graduate College, Florida Atlantic University, Boca Raton, FL 33431.
3. Application deadline for Fall: January 15.

## **Culture, Society and Politics Concentration**

The Culture, Society and Politics concentration of the Ph.D. Program in Comparative Studies is designed to foster interdisciplinary and multidisciplinary study in the social sciences. It is structured to allow students the opportunity to develop deep expertise in one of three primary areas - sociology, anthropology or political science - and to bring their interests and scholarship related to these areas into conversation with other disciplines both within and outside of traditional social science fields. At the heart of the program is a commitment to the belief that comparative models of inquiry lead to unique advancements in the production *of* new knowledge and a greater awareness *of* the larger implications of such knowledge generally.

As an interdisciplinary and multidisciplinary program, the Comparative Studies: Culture, Society and Politics concentration draws on the strengths *of* the various departments in the Dorothy F. Schmidt College of Arts and Letters as well as the broader graduate programs of Florida Atlantic University. Areas of particular strength include: (Anthropology) sociocultural and medical anthropology; bioarchaeology, ethnoarchaeology, zooarchaeology and primatology; (Sociology) studies of gender, agriculture, adulthood, adolescence, childhood, race, social class and economics; (Political Science) comparative politics, American politics, international relations, public policy and law, post-conflict resolution, democracy and democratization, political behavior and quantitative methods.

The program is structured so that students follow a cohesive plan of study that includes both an

interdisciplinary social science core and, in close consultation with their advisory committees, the development of two specific areas of specialization that might themselves be multidisciplinary. The program encourages students to address issues in cultures, societies and/or politics from multiple perspectives and to seek the convergence of these perspectives through the insights of interdisciplinary approaches.

This program invites students to explore the interplay among cultures, societies and politics, as well as theories and methodologies, technologies and pedagogies. Toward this end, students are expected to attend Ph.D. Colloquia in addition to their formal coursework. While most graduates of the program will prepare for the challenge of the academy in an increasingly globalized society, others will prepare for a variety of non-academic opportunities, including positions in public and private organizations.

## Degree Requirements

### 1. Minimum Standards

Ph.D. students will take a minimum of 48 credits if matriculating with a master's degree or 78 credits if matriculating with a bachelor's degree, 24 of them at the 7000 level. The concentration requires a minimum 36 credits of coursework and 12 dissertation credits. No grade lower than "B" may apply to the degree. To continue in the program, students must maintain a "B" (3.0) grade point average on all work attempted toward the degree.

### 2. Distribution Requirements

For students entering with a bachelor's degree, completion of the following requirements along with all requirements for earning a Master's en Passant degree in their primary field of study (e.g., Anthropology, Communication and Multimedia Studies; Political Science, Sociology) are needed. Students entering with a bachelor's or master's degree are required to complete the following:

---

#### Core - 12 credits

Theory and Criticism	CST 7309	3 credits
Research Design in Social Science	CST 7912	3 credits
Interdisciplinary Perspectives	CST 7936	6 credits

---

#### Electives - 24 credits

*Select 24 credits at the 5000, 6000 or 7000 level, 15 of which must be concentrated in a program in the College of Arts and Letters. No more than 12 of the 24 credits may be at the 5000 level.*

---

### **Research and Dissertation - 12 credits (minimum)**

---

Advanced Research and Study <i>(as needed)</i>	CST 7910	1-9 credits
---	----------	-------------

---

Dissertation <i>(12 credits minimum, may be taken over multiple terms)</i>	CST 7980	12 credits
---	----------	------------

### **3. Qualifying Exams**

Students begin the program as a Doctoral Student. After completing 18 credits of coursework in the distribution requirements for the program, students will be required to submit an Application for Qualification, which, if approved, will advance them to the status of Doctoral Scholar.

Through the application, the Ph.D. Executive Committee will review the applicant's current progress to date through the program, their skills as a scholar/researcher and their progress in planning for the Comprehensive Examination. After its review, the committee will make one of two decisions: to advance the student to Doctoral Scholar or to deny advancement. If advancement is denied, the student may choose to reapply one more time the following semester. Failure to be advanced will result in dismissal from the program.

### **4. Comprehensive Exams**

Comprehensive Exams consist of a written and oral component. In the semester after completing 32 graduate credits in the program, typically fall of Year 3, the student will take the Written Comprehensive Examination in the eighth week of the semester and the Oral Comprehensive Examination in the tenth week of the semester. The Comprehensive Examinations are administered and evaluated by the student's dissertation committee (see dissertation section below). In consultation with the student, the committee will compile a reading list from which the exams will be constructed. This list will not be based solely on the student's coursework, but will include as well readings that the exam committee deems foundational for the student's program of study. The successful completion of this written component is followed by the oral exam within two weeks, which examines, beyond the limits of the written exam, the extent of the student's mastery of the material. Students who fail the written exam may retake it one time only. Students who fail the oral exam may retake it one time only. Failure to pass either exam on the second

attempt will initiate the dismissal process from the program, consistent with the Provost's policy.

## 5. Satisfactory Completion of a Dissertation

By the end of the second year of coursework, the student will ask a faculty member to serve as the major professor for the dissertation. In consultation with the major professor, the student will ask at least two to three other faculty members to serve on the committee. The student will defend his/her Dissertation Prospectus the semester after passing the comprehensive examinations, typically at the beginning of spring in Year 3. The dissertation will contain original research and will be defended before the student's committee and others.

## Cultures, Languages and Literatures Concentration

The Cultures, Languages and Literatures concentration is an interdisciplinary and multidisciplinary course of study that enables doctoral students to develop expertise within traditional disciplines and across disciplinary and cultural boundaries. At the heart of the program is the recognition that cultures, languages and literatures are most fruitfully understood through comparative modes of analysis that include an ever-changing landscape of theory and methodologies.

This concentration is both interdisciplinary (the integration of different fields) and multidisciplinary (the comparative analyses of different fields), consistent with the original approved design of the Ph.D. in Comparative Studies. Primary areas of strength for this broadly based program include studies of literature and migration, rhetoric and composition, U.S. multiethnic literatures, early modern literatures, gender, sexuality and embodiment, modernity and postmodernity in literature, space and place in literature, and postcolonial literature and culture. The curriculum also draws from such disciplines as Anthropology, Art History, Communication, History, Peace Studies, Philosophy and Religion, Political Science, Sociology, Women, Gender and Sexuality Studies, among others.

This program promotes interdisciplinary and multidisciplinary work through a cohesive course of study. All students follow an interdisciplinary core curriculum before developing, in consultation with their advisory committees, areas of specialization which might themselves be multidisciplinary. Students are encouraged to address issues in cultures, languages and literatures from multiple perspectives and to seek the convergence of these perspectives through the insights of interdisciplinary interests.

This program invites students to explore the interplay among cultures, languages and literatures, as well as theories and methodologies, technologies and pedagogies. Toward this end, students will be expected to attend Ph.D. Colloquia in addition to their formal coursework. While most graduates of the

program will prepare for the challenge of the academy in an increasingly globalized society, others will prepare for a variety of non-academic opportunities, including positions in public and private organizations.

## Degree Requirements

### 1. Minimum Standards

Ph.D. students will take a minimum of 48 credits if matriculating with a master's degree or 78 credits if matriculating with a bachelor's degree, 24 of them at the 7000 level. The concentration requires a minimum 36 credits of coursework and 12 dissertation credits. No grade lower than "B" may apply to the degree. To continue in the program, students must maintain a "B" (3.0) grade point average on all work attempted toward the degree.

### 2. Distribution Requirements

For students entering with a bachelor's degree, completion of the following requirements along with all requirements for earning a Master's en Passant degree in their primary field of study (e.g., Communication and Multimedia Studies; English; Languages, Linguistics and Comparative Literature; or Women, Gender and Sexuality Studies) are needed. Students entering with a bachelor's or master's degree are required to complete the following:

---

#### Core - 12 credits

---

Theory and Criticism	CST 7309	6 credits
----------------------	----------	-----------

---

Interdisciplinary Perspectives	CST 7936	6 credits
--------------------------------	----------	-----------

---

#### Electives - 24 credits

---

*Select 24 credits at the 5000, 6000 or 7000 level, 15 of which must be concentrated in a program in the College of Arts and Letters. No more than 12 of the 24 credits may be at the 5000 level.*

---

#### Research and Dissertation - 12 credits (minimum)

---

Advanced Research and Study (as needed)	CST 7910	1-9 credits
--	----------	-------------

---

Dissertation

CST 7980

12 credits

*(12 credits minimum may be taken over multiple terms)*

### 3. **Qualifying Exams**

Students begin the program as a Doctoral Student. After completing 18 credits of coursework in the distribution requirements for the program, students will be required to submit an Application for Qualification, which, if approved, will advance them to the status of Doctoral Scholar.

Through the application, the Ph.D. Executive Committee will review the applicant's current progress to date through the program, their skills as a scholar/researcher and their progress in planning for the Comprehensive Examination. After its review, the committee will make one of two decisions: to advance the student to Doctoral Scholar or to deny advancement. If advancement is denied, the student may choose to reapply one more time the following semester. Failure to be advanced will result in dismissal from the program.

### 4. **Comprehensive Exams**

Consist of a written and oral component. In the semester after completing 32 graduate credits in the program, typically fall of year three, the student will take the Written Qualifying Examination in the eighth week of the semester and the Oral Qualifying Examination in the tenth week of the semester. The Qualifying Examinations are administered and evaluated by the student's dissertation committee (see dissertation section below).

In consultation with the student, the committee will compile a reading list from which the exams will be constructed. This list will not be based solely on the student's coursework, but will include as well readings that the exam committee deems foundational for the student's program of study. The successful completion of this written component is followed by the oral exam within two weeks, which examines, beyond the limits of the written exam, the extent of the student's mastery of the material.

Students who fail the written exam may retake it one time only. Students who fail the oral exam may retake it one time only. Failure to pass either exam on the second attempt will initiate the dismissal process from the program, consistent with the Provost's policy.

### 5. **Language Requirement**

In a language other than English, the student must demonstrate working knowledge either by passing a written translation exam or by successfully completing (with a grade of "B" or better) a "reading for research" course at the graduate level, which does not count toward the required minimum credits for the Ph.D.

## 6. Satisfactory Completion of a Dissertation

By the end of the second year of course work, the student will ask a faculty member to serve as the major professor for the dissertation. In consultation with the major professor, the student will ask at least two to three other faculty members to serve on the committee. The student will defend his/her Dissertation Prospectus the semester after passing the comprehensive examinations, typically at the beginning of spring in year three. The dissertation will contain original research and will be defended before the student's committee and others.

## Design, Aesthetics and the Arts Concentration

The Design, Aesthetics and the Arts concentration of the Ph.D. Program in Comparative Studies is designed to foster interdisciplinary and multidisciplinary study in the philosophy/theory of aesthetics, design and the fine arts. It is structured to allow students the opportunity to develop deep expertise in these areas, through the disciplines of Philosophy, Design, Architecture, Visual Arts and Art History, Music, Film, Communication and Multimedia Studies, and Theatre, and to bring their interests and scholarship related to these areas into conversation with one another and with other disciplines. At the heart of the program is a commitment to the belief that comparative models of inquiry lead to unique advancements in the production of new knowledge and a greater awareness of the larger implications of such knowledge generally.

As an interdisciplinary and multidisciplinary program, the Design, Aesthetics and the Arts concentration draws on the strengths of the various departments and schools in the Dorothy F. Schmidt College of Arts and Letters, as well as the programs of the Shenkar College of Engineering and Design, with whom FAU has a Memo of Understanding (MOU), and the broader graduate programs of Florida Atlantic University.

The program is structured so that students follow a cohesive plan of study that includes both an interdisciplinary core in Design, Aesthetics and the Arts and, in close consultation with their advisory committees, the development of two specific areas of specialization that might themselves be multidisciplinary. The program encourages students to address issues in design, aesthetics and the arts from multiple perspectives and to seek the convergence of these perspectives through the insights of interdisciplinary approaches.

This program invites students to explore the interplay among and within design, aesthetics and fine arts cultures, as well as theories and methodologies and technologies and pedagogies. Toward this end, students are expected to attend Ph.D. Colloquia, when possible and available, in addition to their formal coursework. While many graduates of the program will prepare for the challenge of the academy in an

increasingly globalized society, others will prepare for a variety of non-academic opportunities, including positions in public and private organizations, companies or corporations.

## Degree Requirements

### 1. Minimum Standards

Ph.D. students will take a minimum of 48 credits if matriculating with a master's degree or 78 credits if matriculating with a bachelor's degree, 24 of them at the 7000 level. The concentration requires a minimum 36 credits of coursework and 12 dissertation credits. No grade lower than "B" may apply to the degree. To continue in the program, students must maintain a "B" (3.0) grade point average in all work attempted toward the degree.

### 2. Distribution Requirements

For students entering with a bachelor's degree, completion of the following requirements along with all requirements for earning a master's *en passant* degree in their primary field of study (e.g., Graphic Design, Music, Theatre), are needed. Students entering with a bachelor's or master's degree are required to complete the following courses.

---

#### Core - 12 credits

---

Theory and Criticism	CST 7309	6 credits
----------------------	----------	-----------

---

Interdisciplinary Perspectives	CST 7936	6 credits
--------------------------------	----------	-----------

---

#### Electives - 24 credits

---

*Select 24 credits at the 5000, 6000 or 7000 level. No more than 12 of the 24 credits may be at the 5000 level.*

---

#### Research and Dissertation - 12 credits (minimum)

---

Advanced Research and Study (as needed)	CST 7910	1-9 credits
--	----------	-------------

---

Dissertation (12 credits minimum may be taken over multiple terms)	CST 7980	12 credits
---	----------	------------

### **3. Qualifying Exams**

Students begin the program as a doctoral student. After completing 18 credits of coursework in the distribution requirements for the program, students will be required to submit an Application for Qualification, which, if approved, will advance them to the status of Doctoral Scholar. Through the application, the Ph.D. Executive Committee will review the applicant's current progress to date through the program, their skills as a scholar/researcher and their progress in planning for the Comprehensive Examination. After its review, the committee will make one of two decisions: to advance the student to Doctoral Scholar or to deny advancement. If advancement is denied, the student may choose to reapply one more time the following semester. Failure to be advanced will result in dismissal from the program.

### **4. Comprehensive Exams**

Comprehensive Exams consist of a written and oral component. In the semester after completing 32 graduate credits in the program, typically fall of Year 3, the student will typically take the Written Comprehensive Examination in the eighth week of the semester and the Oral Comprehensive Examination in the tenth week of the semester. The Comprehensive Examinations are usually administered and evaluated by the student's dissertation committee (see dissertation section below). In consultation with the student, the committee will compile a reading list from which the exams portfolio will be constructed. This list will not be based solely on the student's coursework, but also will include readings that the exam committee deems foundational for the student's program of study. The successful completion of this written component is followed by the oral exam within two weeks, which examines beyond the limits of the written exam, the extent of the student's mastery of the material. Students who fail the written exam may retake it one time only. Students who fail the oral exam may retake it one time only. Failure to pass either exam on the second attempt will initiate the dismissal process from the program, consistent with the Provost's policy.

### **5. Satisfactory Completion of a Dissertation**

By the end of the second year of coursework, the student will ask a faculty member to serve as the major professor for the exams and dissertation. In consultation with the major professor, the student will ask at least two to three other faculty members to serve on the committee. The student will defend his/her Dissertation Prospectus the semester after passing the comprehensive examinations, typically at the beginning of spring in Year 3. The dissertation will contain original research and will be defended before the student's committee and others. Because of the unique nature of this program, the dissertation may be traditional scholarship but will more likely be something more innovative. This will comprise theoretical or empirical research, as well as innovative/experimental research.

The proposed output for such a Ph.D. endeavor will feature:

1. Strong written element (either proto-monograph, three essays or combination), as well as
2. Audio-visual, interactive, spatial or performative elements.

Collaborative Ph.D. work will be allowed in special cases (with academic peers, unique professionals or high-profile experts, as deemed appropriate by Ph.D. committee).

## **Fine and Performing Arts Concentration**

**This program is on hiatus and currently not accepting students.**

The Fine and Performing Arts concentration in Comparative Studies provides a breadth of training and experience across the traditional divisions of the arts for those who already have developed professional skills in one or more areas, such as dance, music, theatre and/or the visual arts. The concentration offers a balance between a series of core courses and an individually prescribed curriculum. Analytical studies cover fundamental research resources and techniques as well as current theoretical trends in each discipline. Creative studies offer the opportunity to explore the ways in which each discipline expresses specific themes as well as the potential for creative communication through the integration of two or more of the arts. A course in the fundamental concepts and history of aesthetic theory is also a requirement for all students.

The goal of the program is to enable students to be conversant in the arts as a whole. To this end, all students are required to take traditional seminars in areas outside their chosen discipline. Over half the courses required for completion of the degree, however, are to be chosen by the student from among the offerings in Comparative Studies and other departmental listings with the guidance of an advisor and the approval of the Ph.D. committee. Comprehensive examinations are required for candidacy. Upon acceptance, a dissertation on a topic involving both analytical and creative aspects will allow students to develop a base of knowledge and a degree of flexibility useful both in the traditional and in the increasingly interdisciplinary academic world of the arts.

## **Curriculum**

The curriculum for the concentration in Fine and Performing Arts in Comparative Studies is organized as follows:

1. Five required core courses;
2. 24-27 credits of courses that address the primary, secondary and comparative areas of focus;

3. 12-15 credits of dissertation.

## Grading

The program's procedures for grading are as follows: "A," "A-": expected progress; "B+": improvement needed; "B": lowest passing grade.

## Admission Requirements

The following admission requirements are in addition to the admission requirements found at the beginning of this Comparative Studies section:

1. Four credits of or demonstration of an intermediate-level proficiency of one foreign language (may be met during Ph.D. study and must be met before admission to candidacy).
2. A portfolio, dossier or audition as specified by the School of the Arts, if appropriate.
3. A copy of the student's application to the Graduate College. Students should be aware that the Graduate College outlines its own set of admission requirements in addition to this program's admission requirements.
4. Résumé.

## Degree Requirements

### 1. Minimum Standards

Ph.D. students will take a minimum of 54 credits in courses in three areas: required core courses in comparative arts and aesthetics; seminars offered in music, theatre and the visual arts; and electives related to their area of focus. No grade lower than "B" may apply to the degree. To continue in the program, students must maintain a "B" (3.0) grade point average on all work attempted toward the degree.

### 2. Distribution Requirements

---

Analytical and Creative Studies in the Arts

---

Aesthetics and Philosophy of the Arts

6 credits

---

Music Core: Concepts, Culture and Creation

---

Theatre Core: Performance Theory and Practice

---

Art Core: A Thematic Study

9 credits

---

Studies in comparative, major or secondary areas (including at least 6 credits from the arts component of the Public Intellectuals program) 27 credits

---

Dissertation 12 credits

### 3. **Comprehensive Exams**

Upon completion of coursework, the student takes a sequence of comprehensive exams: a written exam followed by an oral exam. Upon successful completion, the student qualifies to advance to candidacy.

### 4. **Language/Research**

The student must demonstrate working knowledge of a language other than English by successfully completing (with a grade of "B" or better) 4 credits, at the intermediate level or its equivalent, of one foreign language at the university level.

### 5. **Satisfactory Completion of a Dissertation**

## **Public Intellectuals Concentration**

**This program is on hiatus and currently not accepting students.**

The Public Intellectuals concentration is an interdisciplinary program for students interested in advanced study and life as a public intellectual. While "public intellectual" often connotes a famous name, public intellectuals also include journalists, artists, architects, legislators, clergy, museum curators, environmental planners, community organizers, as well as teachers and scholars whose work defines, shapes and influences public issues.

The program explores historical, conceptual and practical relationships among such areas as public policy, mass media, literature, aesthetics, ethics, gender studies, culture and rhetoric. Its goal is to combine theoretical with concrete analysis and to strive for this integration in every core course, producing students who are theoretically confident and knowledgeable about the world they hope to understand and change.

## **Curriculum**

The curriculum for the Public Intellectuals concentration in Comparative Studies is organized as follows:

1. Two semester-long required core courses;

2. Two courses in public intellectual theory and method;
3. A minimum of three courses in the student's concentration;
4. 15 credits in electives. These can be chosen from Comparative Studies courses or from other graduate programs in the University. A practicum, if undertaken, will count as elective credit, and the student's advisory committee will determine the degree of credit. Students undertaking a practicum before the completion of the program core courses and/or before establishing an advisory committee must have the practicum approved and credits established by the Ph.D. executive committee.

### **Public Intellectuals Program Paths of Study**

In addition to paths of study listed below, students may petition to design their own focus with the approval of the Public Intellectuals executive committee.

1. Global and Local: Movements and Transformations
2. Art, Literature and Culture(s)
3. Feminism, Gender and Sexuality
4. Technology, Environment and Society
5. Media and Communication
6. Peace Studies

### **Degree Requirements**

#### **1. Minimum Standards**

A Ph.D. student will take a minimum of 51 credits in courses in three areas: required core courses in Comparative Studies; the three 7000-level Comparative Studies courses that are the student's path of study; and electives from 7000-level courses or 6000-level courses within other departments and programs. No grade lower than "B" may apply to the degree. To continue in the program, students must maintain a "B" (3.0) grade point average on all work attempted toward the degree.

#### **2. Distribution Requirements**

Required Core Courses	6 credits
Public Intellectual Theory and Method Courses	6 credits
Student's Major Concentration	9 credits
Electives	15 credits

---

Advanced Research and Study

3 credits

---

Dissertation

12 credits

### 3. **Public Matters Core Course Sequence**

Students admitted to the program may take no more than 6 credits before registering in the core course sequence. Students who do not complete each course with a passing grade must retake and pass the course at its next offering in order to remain in good standing.

### 4. **Qualifying Exams**

Students begin the program as a Doctoral Student. After completing 18 credits of coursework in the distribution requirements for the program, students will be required to submit an Application for Qualification, which, if approved, will advance them to the status of Doctoral Scholar.

Through the application, the Ph.D. Executive Committee will review the applicant's current progress to date through the program, their skills as a scholar/researcher and their progress in planning for the Comprehensive Examination. After its review, the committee will make one of two decisions: to advance the student to Doctoral Scholar or to deny advancement. If advancement is denied, the student may choose to reapply one more time the following semester. Failure to be advanced will result in dismissal from the program.

### 5. **Comprehensive Exams**

Upon completion of coursework, the student takes a sequence of comprehensive exams: a written exam followed by an oral exam. Upon successful completion, the student qualifies to advance to candidacy.

The second exam is taken upon completion of the student's other coursework and is administered and evaluated by the student's advisory committee. The second exam is based on a dissertation proposal and a bibliography developed by the student and approved by the student's advisory committee.

Students who fail an exam may retake it one time only.

### 6. **Language/Research Tools Requirement**

Proficiency is required in the use of two research tools. At least one of these tools must be a language other than English demonstrating an intermediate level of proficiency. The other tool, if not a language, should be the demonstration of a skill relevant to life as a public intellectual, e.g., planning and organizing a public issue conference, publishing a substantial critical essay or

journalistic work in a public venue, or developing a media production or live performance. This skill must be approved by the program director.

## 7. Satisfactory Completion of a Dissertation

## ENGLISH

### BACHELOR OF ARTS (B.A.)

#### Professional and Creative Writing Concentration

*(Minimum of 120 credits required)*

English majors develop advanced skills in writing and critical interpretation that are valued by employers in a number of fields. They have established careers in law, medicine, entertainment, communications, information technology, journalism, speech writing, government, publishing and teaching.

All English majors acquire a broad background in literature in English taking courses that stress literary history, literary genres and the achievements of individual authors. Depending upon their particular interests, majors may also pursue a concentration in Professional and Creative Writing. The

Professional and Creative Writing concentration includes courses in both creative writing and rhetoric/composition. Creative writing courses focus on the writing of poetry, fiction and non-fiction. Rhetoric and composition courses focus on the professional, analytical, academic and theoretical dimensions of writing.

Qualified undergraduate majors may apply to the [Honors Program in English](#) or [Honors Program in Creative Writing](#). An [English Internship Program](#) and Secondary Education Program are also available.

### **Prerequisite Coursework for Transfer Students**

Students transferring to Florida Atlantic University must complete both lower-division requirements (including the requirements of the General Education Program) and requirements for the College and major. Lower-division requirements may be completed through the A.A. degree from any Florida public college, university or community college or through equivalent coursework at another regionally accredited institution. Before transferring and to ensure timely progress toward the baccalaureate degree, students must also complete the prerequisite courses for their major as outlined in the [Transition Guides](#).

All courses not approved by the Florida Statewide Course Numbering System that will be used to satisfy requirements will be evaluated individually on the basis of content and will require a catalog course description and a copy of the syllabus for assessment.

### **Degree Requirements**

All courses listed below have as a prerequisite the successful completion of the English Composition sequence (ENC 1101 and ENC 1102, or their equivalents, with minimum grade of "C"). Grades in all courses taken in the major must average "C" or 2.0 or higher, and no course with a grade of "D+" or below will count toward the major. Students whose grades in major courses average below a "C" or 2.0 will not be able to graduate with an English major. Except where noted, courses cannot be counted twice. With these conditions being met, completion of the English major will require 39 credits drawn from the following:

### **English Undergraduate Curriculum (39 credits)**

(Courses cannot be counted twice.)

**Category 4: Courses that may be taken from another department in Arts and Letters. Please see advisor for these courses.**

#### **Electives at 3000 level and above (9 credits)**

Students must complete an additional 9 credits, choosing courses from Categories 1-4. All must be earned at the 3000 or 4000 level. With departmental approval, 3 credits may be taken from another

department in the College of Arts and Letters, provided the course has an English disciplinary focus (e.g., SPT 4130, Latin American Literature in Translation). The department offers an internship, ENG 4940, a 1-6 credit course that also counts toward electives.

### Optional Area of Concentration in Professional and Creative Writing

Students interested in pursuing more specialized study in writing may wish to complete the Professional and Creative Writing concentration. While all B.A. English students are required to take 39 credits of introductory courses, courses in categories 1, 2, and 3, and electives, the distribution of credits required for the Professional and Creative Writing concentration emphasizes additional study and practice of various forms of composition.

### English Undergraduate Curriculum with Professional and Creative Writing Concentration - 39 credits

### Electives at 3000 level and above (6 credits)

Students must complete an additional 6 credits, choosing courses from Categories 1-4. All must be earned at the 3000 or 4000 level. With departmental approval, 3 credits may be taken from another department in the College of Arts and Letters, provided the course has an English disciplinary focus (e.g., SPT 4130, Latin American Literature in Translation). The department offers an internship, ENG 4940, a 1-6 credit course that also counts toward electives.

## HONORS PROGRAM IN ENGLISH

The Honors Program in English provides the opportunity for qualified majors to undertake advanced literary research in a community of their undergraduate peers. This program is especially recommended for students who plan to pursue a graduate degree in literary studies.

### Eligibility Requirements

1. Minimum overall GPA of 3.0 and a GPA of 3.5 or above in English major courses;
2. Completion of 60 credits, including at least 15 upper-division English major credits;
3. Completion of ENG 3822, Introduction to Literary Studies, or LIT 3212, Literary Theory (or, may petition to take either concurrently with the Honors Seminar).

### Application Requirements

1. A copy of the student's (unofficial) current transcript highlighting all English major courses;
2. A one-to-two page statement of purpose detailing why the student is applying to the Honors Program and describing the possible focus of the student's honors thesis;
3. A copy of a critical essay the student wrote for an English class that exemplifies the student's best work (no more than 10 pages). Please include the course name and instructor.

### Program Requirements

The English Honors Program entails taking two related courses (3 credits each) in the fall and spring and completing an honors thesis between 20-40 pages.

1. *Honors Seminar, ENG 4932*: Required for honors students but open to those interested in more advanced literary study. Allows students to synthesize the literary knowledge and critical skills gained in the English major. More intensive and interactive than the department's other courses and organized in ways that anticipate graduate-level courses. Topics of the seminar change from year to year. Offered once a year in the fall.
2. *RI: Honors Research, ENG 4910*: Facilitates the writing of the honors thesis, the final aim of the

course. Exposes students to the standards and best practices of research-level literary scholarship while also preparing the ground for the students' intended research topics. May include library research visits, presentations on different research and analytical methodologies and peer editing workshops. At the end of spring semester, students will present their theses at an Honors Research course event or the Undergraduate Research Symposium. Offered once a year in the spring.

*Students will receive the designation “Honors in English” at the time of graduation upon satisfactory completion of the following requirements:*

1. Fulfillment of all normal field distribution requirements for the English major;
2. Completion, with a grade of "B" or higher, of Honors Seminar and Honors Research;
3. Achievement of an overall GPA of at least 3.0 and a GPA of at least 3.5 in all English courses at the time of graduation;
4. Completion of a thesis of substance and quality that meets with the approval of the course instructor and/or thesis chair.

Students in the Honors Program in English who complete all requirements, but do not meet the GPA requirements for honors at the time of graduation, will receive credit for all work completed, but will not be certified as having received honors. Students who engage in academic dishonesty will be dismissed from the Honors Program and face additional penalties from the University.

For more information, contact Dr. Julieann Ulin at [julin@fau.edu](mailto:julin@fau.edu).

## HONORS PROGRAM IN CREATIVE WRITING

### Eligibility Requirements

1. Completion of at least 60 credits toward degree;
2. Successful completion of CRW 3010 (Creative Writing) and at least two 4000-level creative writing workshops. At least one of these workshops must be in the genre (poetry, fiction or creative nonfiction) for which the student is applying;
3. Minimum overall GPA of 3.0 with a minimum GPA of 3.5 in English major courses.

**Note:** Students who do not meet the GPA requirements or who have not taken a second 4000-level workshop may apply for the course and may be admitted to the program if their applications are considered strong enough. However, in order to receive the honors designation upon graduation, students must meet the GPA requirements.

### Application Requirements

1. A writing sample in the genre in which the student is applying (student's thesis will be written in that genre). For prose (fiction or creative nonfiction), please submit a minimum of 10 pages. For poetry, a minimum of 6 poems (each poem must start on a new page);
2. A brief (200-250 words) statement of intent explaining the student's interest in the program and what the student hopes to achieve in the program, with a cover sheet attached;
3. A copy of the student's (unofficial) current transcript with all English major courses highlighted.

### **Program Requirements**

The Honors Program in Creative Writing entails completion of the Honors Creative Writing Seminar, *CRW 4932*: This course provides a structured framework for students in the Honors Creative Writing Program to complete their honors thesis (either a work of fiction, nonfiction or a collection of poetry). Provides information about post-graduate opportunities for creative writers. Examines works of fiction, poetry and creative nonfiction in more depth and with more of an eye toward craft than may have been possible in previous coursework.

**Note:** Students will receive the designation “Honors in Creative Writing” at the time of graduation upon satisfactory completion of the following requirements:

1. Fulfillment of all normal field distribution requirements for the English major;
2. Completion of the Honors Creative Writing Seminar with a grade of “B” or higher, which includes the completion of a thesis of substance and quality that meets with the approval of the course instructor and a second faculty reader (assigned by the Department of English);
3. Achievement of an overall GPA of at least 3.0 and a GPA of at least 3.5 in all English courses at the time of graduation.

Students in the Honors Program in Creative Writing who complete all requirements, but do not meet the GPA requirements for honors at the time of graduation, will receive credit for all work completed, but will not be certified as having received honors. Students who engage in academic dishonesty will be dismissed from the Honors Program and face additional penalties from the University.

For more information, contact Dr. Becka McKay at [rmckay3@fau.edu](mailto:rmckay3@fau.edu).

## **ENGLISH** **UNDERGRADUATE MINOR**

*(Minimum of 15 credits required)*

Students majoring in any discipline other than English are eligible to minor in English. The minor encourages breadth of knowledge in literary studies and offers experience in critical analysis. Fifteen credits in English courses must be completed. Four out of five of these classes must be taken at Florida Atlantic University, and at least four out of the five classes must be taken in the English Department. If a course is taken outside of the English Department, it must be approved by the department and have a literary studies focus. English Education majors should note that no more than one course can count toward both the major and the English minor.

---

### Course requirements (15 credits)

Introduction to Literary Studies (recommended)	ENG 3822	3 or
---	----------	------

Literary Theory	LIT 3213	3
-----------------	----------	---

*(See tables in [Bachelor of Arts with Major in English](#) above.)*

### English Internship Program

Internships are extremely important for students pursuing careers related to English studies. The Department of English has developed a diverse internship program that allows students to gain hands-

on experience in a wide variety of settings.

The internship program is highly selective, not just in terms of academics, but also in terms of drive, hunger, and innovation. Internship agencies capture FAU's best talent, and many of the internships have become full-time paid positions for FAU students.

### **Eligibility Requirements**

1. The student must be an English major at Florida Atlantic University.
2. The student must be of junior or senior standing.
3. The student must be residing in Florida and available for frequent on-campus meetings at the university.
4. The student must have no less than a 3.0 overall grade point average AND a 3.0 in the English major.
5. The student must obtain and submit one letter of recommendation from an FAU English Department faculty member from whom s/he has taken a course. The recommendation should be emailed from the faculty member directly to the internship director.

**Note:** Some of the internship agencies require a cover letter and writing samples.

### **Secondary Education Program**

A program leading to teacher certification in English is available through the Department of [Curriculum and Instruction](#) in the College of Education.

## **MASTER'S PROGRAMS**

A program of study toward each degree will be designed upon beginning work toward the degree, and all work counting toward the degree must receive departmental approval beforehand. Courses may be allowed from other disciplines or departments when determined to be purposeful in the student's curriculum. The credits that the University allows as transfer from other institutions will be considered by the same criteria if they are to count as part of the coursework for the degree. Unless such exceptions are made, all work will be chosen from Department of English, the Dorothy F. Schmidt College of Arts and Letters offerings. No course with a grade below "B-" (2.67) will count toward the degree. A minimum GPA of 3.0 must be maintained for graduation.

### **Assistantships**

Graduate assistantships are awarded yearly on a competitive basis, selection being made in early spring

for the following fall. Duties include teaching, tutoring and/or research assistance. The award is for one year (two semesters), with the possibility of being recommended for renewal in a second year. Assistantship awards require students to be registered for 9 credits and include a stipend and a full tuition waiver, though students remain responsible for fees. To view our full cost of attendance information page, visit <https://www.fau.edu/finaid/other/cost-of-attendance/>. Since the department awards assistantships as both an opportunity to gain teaching experience and a means to progress steadily toward completion of the degree, other job commitments while holding the assistantship are discouraged.

## ENGLISH

### MASTER OF ARTS (M.A.)

#### Rhetoric and Composition Concentration

#### Science Fiction and Fantasy Concentration

*(Minimum of 30 credits required)*

#### Admission Requirements

Admission to the program requires a minimum 3.0 grade point average in the last 60 credits of undergraduate work and a submitted copy of competitive GRE scores. In addition to coursework and test scores, the following are required: a writing sample (a scholarly paper for the literature program; creative work for the Creative Writing concentration), a statement of purpose (3-4 pages) outlining preparation for graduate study and two letters of recommendation.

The writing sample, statement of purpose, letters of recommendation and copies of the application form, official transcripts and GRE scores should be sent directly to the Graduate College. The deadline for M.A. applicants for summer and fall is January 15; for spring it is November 1. The deadline for Creative Writing M.F.A. applicants is January 15. The original application form as well as official transcripts and GRE scores should be sent to the Graduate College.

Applicants who do not have a bachelor's degree in English may be required to complete additional coursework in the field before beginning work that counts toward the master's degree.

#### Program Requirements

*Minimum of 30 credits:* The program requires 24 credits of graduate coursework and 6 credits of thesis

or comprehensive exam.

## **General Degree Requirements**

1. Research Methods for Advanced Literary Study (ENG 6009), required during the first term of graduate study or as soon thereafter as possible.
2. Literary Criticism 1 or 2 (ENG 5018 or 5019).
3. Thesis or comprehensive exam (6 credits).

## **Language Requirements**

Graduate students in the English M.A. program are required to demonstrate an ability to think about the workings of language through formal study, historical research or proficiency equivalent to a year of study. Students can fulfill this requirement in the following ways:

1. LIN 6107: History of the English Language. Students who opt to take LIN 6107 as their language requirement may also count this course toward their degree. -
2. Two semesters of college-level coursework of a language other than English.
3. Readings for Research (FRE/GER/SPN 5060) offered by FAU's Department of Languages, Linguistics and Comparative Literature or an approved equivalent outside course.
4. Passing a Foreign Language Achievement Test (FLATS) or College-Level Examination Program (CLEP) to demonstrate proficiency in a foreign language.

## **Historical Degree Requirements**

1. One Medieval and/or Early Modern (pre-1699) course.
2. One 18th and/or 19th century (1700-1899) course.
3. One 20th and/or 21st century (1900-present) course.

## **Areas of Concentration**

The department offers two concentrations for students who would like to specialize in Rhetoric and Composition or Science Fiction and Fantasy.

### **Rhetoric and Composition Concentration**

In addition to the two required courses and three historical coverage requirements identified under the headings of General and Historical Degree Requirements, the student will plan, under advisement, a program in Rhetoric and Composition including three courses in the area of specialization. The concentration culminates in a thesis or comprehensive exam within the area of specialization.

### **Science Fiction and Fantasy Concentration**

In addition to the two required courses and three historical coverage requirements identified under the headings of General and Historical Degree Requirements, the student will plan, under advisement, a program in Science Fiction and Fantasy including three courses in the area of specialization (one or more of these courses will also fulfill the period-specific requirements). The concentration culminates in a thesis or comprehensive exam within the area of specialization.

---

### Core - 6 credits

Literary Criticism 1	ENG 5018	3 or
Literary Criticism 2	ENG 5019	3
Research Methods for Advanced Literary Study	ENG 6009	3

---

### Electives - 18 credits

Select credits at the 5000 or 6000 level with the prefix of AML, ENC, ENG, ENL or LIT. Must include the 9 credits of required Historical courses (pre-1700, 1700-1900, 1900-present) noted above in Historical Degree Requirements.

Thesis or Exam		6
Master's Thesis <i>(may be taken over two terms)</i>	AML / ENC / ENG / ENL / LIT 6971	6 or
Reading for Comprehensive Exams <i>(may be taken over two terms)</i>	LIT 6900	1-6

---

### Rhetoric and Composition Concentration

Must complete 9 credits at the 5000 or 6000 level with course prefix of ENC. These 9 credits cannot include Master's Thesis (XXX 6971).

## Science Fiction and Fantasy Concentration

Must complete 9 credits of Science Fiction and Fantasy coursework at the 5000 or 6000 level from the Department of English. This coursework can meet historical requirements. Coursework cannot include Master's Thesis (XXX 6971) or Reading for Comprehensive Exams (LIT 6900).

## CREATIVE WRITING

### MASTER OF FINE ARTS (M.F.A.)

*(Minimum of 48 credits required)*

#### Program Requirements

The program requires 42 credits of graduate coursework and 6 credits of thesis.

The student selects, under advisement, seven courses in creative writing (typically workshops), six courses from the areas of literature, theory and rhetoric, and ENG 6009, Research Methods for Advanced Literary Study. Creative writing courses include the following, and can be repeated for credit: CRW 5025, Creative Writing Workshop; CRW 6024, Creative Writing: Genre and Form; CRW 6130, Workshop: Fiction Writing; CRW 6236, Creative Non-Fiction Workshop; CRW 6331, Workshop: Poetry Writing. This program does not have a language requirement.

#### Core - 3 credits

Research Methods for Advanced Literary Study	ENG 6009	3
--	----------	---

#### Select 21 credits from the following courses

Creative Writing Workshop <i>(may be repeated)</i>	CRW 5025	3
--	----------	---

Creative Writing: Genre and Form <i>(may be repeated)</i>	CRW 6024	3
---	----------	---

Workshop: Fiction Writing <i>(may be repeated)</i>	CRW 6130	3
--	----------	---

Creative Non-Fiction Writing <i>(may be repeated)</i>	CRW 6236	3
---	----------	---

Workshop: Poetry Writing ( <i>may be repeated</i> )	CRW 6331	3
---	----------	---

---

### Electives - 18 credits

Select 6 courses (18 credits) at the 5000 or 6000 level from the Department of English, excluding CRW 5025, 6024, 6130, 6236, 6331

---

### Thesis - 6 credits

Master's Thesis ( <i>may be completed over two terms</i> )	CRW 6971	1-6
--	----------	-----

## HISTORY

### Faculty:

Kanter, D., Chair; Bennett, E.; Cunningham, C.; Dalin, M.; Dunlea, C.; Engle, S.; Finucane, A.; Ganson, B.; Hanne, E.; Holloway, K.; Kollander, P.; Lowe, B., McGetchin, D.; Mitton, S.; Norman, S.; Rose, M.; Scott, J.; Shannon, K.; Sharples, J.; Weinberg, E.

History majors use the study of the past to make sense of a complicated world. Developing insights into past human experiences prepares students for a wide variety of fields, including law, teaching, public history, business, government, communication and even medicine. Professions and professional schools in today's world look for applicants who have broad interests and backgrounds and analytical and verbal skills rather than narrow field specialization. History is a flexible and broad discipline and majors learn how to think critically, evaluate evidence and write with clarity and strength. Students interested in the Bachelor of Arts degree may pursue the traditional major or the major and one concentration. [Concentrations](#) available include Africana History, British History, Legal History and Religious History as detailed below. An undergraduate [Honors Program in History](#) program and a [minor in History](#) are also available. Two combined programs are offered, which allow students to earn a bachelor's and master's degree in as little as five years. In the graduate area, the department offers a Master of Arts degree.

### Prerequisite Coursework for Transfer Students

Students transferring to Florida Atlantic University must complete both lower-division requirements (including the requirements of the General Education Program) and requirements for the College and

major. Lower-division requirements may be completed through the A.A. degree from any Florida public college, university or community college or through equivalent coursework at another regionally accredited institution. Before transferring and to ensure timely progress toward the baccalaureate degree, students must also complete the prerequisite courses for their major as outlined in the [Transition Guides](#).

All courses not approved by the Florida Statewide Course Numbering System that will be used to satisfy requirements will be evaluated individually on the basis of content and will require a catalog course description and a copy of the syllabus for assessment.

[Link to Master's Program](#)

## **HISTORY**

### **BACHELOR OF ARTS (B.A.)**

**Africana History Concentration**

**British History Concentration**

**Legal History Concentration**

**Religious History Concentration**

*(Minimum of 120 credits required)*

In addition to other requirements as stipulated by the University and the College, the student pursuing a Bachelor of Arts Degree in History will be required to complete a minimum of 42 credits, including two 3-credit survey courses in World history (WOH) and U.S. history (AMH) (e.g., either WOH 2012 or WOH 2022 and either AMH 2010 or AMH 2020), a course in historical methods (HIS 3150) and senior seminar (HIS 4935) selected from courses listed in the tables below.

---

#### **Basic Courses (12 credits)**

---

*One of the following WOH courses*

---

History of Civilization 1

WOH 2012

**3 or**

History of Civilization 2	WOH 2022	3
---------------------------	----------	---

*One of the following AMH courses*

U.S. History to 1877	AMH 2010	3 or
----------------------	----------	------

U.S. History since 1877	AMH 2020	3
-------------------------	----------	---

*Both of the following capstone courses*

RI: Historical Methods	HIS 3150*	3
------------------------	-----------	---

RI: Senior Seminar	HIS 4935	3
--------------------	----------	---

\* History majors are required to take HIS 3150 before completing 90 credits toward graduation. HIS 3150 is also a prerequisite for HIS 4935.

**The remaining coursework must include a minimum of 30 credits of 3000-level-or-above courses, including:**

**United States History (6 credits)**

American Capitalism since 1890	AMH 3371	3
--------------------------------	----------	---

History of American Technology	AMH 3372	3
--------------------------------	----------	---

The Holocaust	JST 4701	3

Transfer students planning on a History major are expected to have completed one course each of survey-level history courses in U.S. history and World history before entering FAU. Otherwise they will have to take AMH 2010/2020 and/or WOH 2012/2022 in addition to 30 credits of upper-division work. No grade below "C" in a history course will count as fulfilling requirements for the major, and no history course may be taken under a pass/fail option.

### **Concentrations within the History Major**

Students interested in pursuing more specialized study in the areas of Africana history, British history, legal history or religious history may wish to complete one of the concentrations below.

Students still fulfill all requirements for the History major as stipulated above, but to complete a concentration they need to include the following courses in their program.

## Africana History Concentration

Students must take both core courses and choose three courses from the list of elective courses.

---

### Core Courses

African-American History to 1877	AMH 3571	3
----------------------------------	----------	---

African-American History since 1877	AMH 3572	3
-------------------------------------	----------	---

---

### Elective Courses (choose three courses)

History of the African Diaspora	AFH 3512	3
---------------------------------	----------	---

Special Topics in African History	AFH 4930	3
-----------------------------------	----------	---

American Immigration and Ethnicity	AMH 3530	3
------------------------------------	----------	---

Slavery and Abolition in the Americas	AMH 4451	3
---------------------------------------	----------	---

History of African-American Women	AMH 4574	3
-----------------------------------	----------	---

The Civil Rights Movement	AMH 4575	3
---------------------------	----------	---

American Sports History	AMH 4611	3
-------------------------	----------	---

History of the Caribbean	LAH 4470	3
--------------------------	----------	---

*Any Senior Seminar, Special Topics or 5000-level graduate course that focuses on Africana history.*

## British History Concentration

Students must take the three core courses below and choose two from the list of elective courses.

---

**Core Courses**

---

Medieval England	EUH 4500	3
------------------	----------	---

---

Modern Britain	EUH 4502	3
----------------	----------	---

---

Tudor-Stuart England	EUH 4511	3
----------------------	----------	---

---

**Elective Courses (choose two courses)**

---

Colonial North America	AMH 4110	3
------------------------	----------	---

---

History of Modern India	ASH 4550	3
-------------------------	----------	---

---

British Empire	EUH 4530	3
----------------	----------	---

---

*Any Senior Seminar, Special Topics or 5000-level graduate course in British history.*

**Legal History Concentration**

Students must choose 15 credits from the core and elective courses in the following list.

---

**Core Courses (choose three courses)**

---

The American Revolution	AMH 4133	3
-------------------------	----------	---

---

The Age of Jefferson and Jackson	AMH 4150	3
----------------------------------	----------	---

---

Medieval England	EUH 4500	3
------------------	----------	---

---

Tudor-Stuart England	EUH 4511	3
----------------------	----------	---

---

**Elective Courses (choose two courses)**

History of Florida	AMH 3420	3
History of American Immigration and Ethnicity	AMH 3530	3
American Environmental History	AMH 3630	3
The Civil Rights Movement	AMH 4575	3
Special Topics (such as History of Law in America or History of Prisons in America)	AMH 4930	3
History of Human Rights	HIS 3204	3

**Religious History Concentration**

Choose at least 15 credits from the following list, with at least one course taken in all four areas: U.S., Asian, Judaic and European history.

Religion in America	AMH 4620	3
Islamic History	ASH 3222	3
Indian Civilization	ASH 4560	3

## HONORS PROGRAM IN HISTORY

To be eligible for the Honors Program in History, students must have completed between 60 and 90 credits with an overall GPA of at least 3.2 and a GPA in history courses of at least 3.5. Such students will receive the designation "Honors in History" at the time of graduation upon satisfactory completion of the following requirements:

1. Completion of all normal field distribution requirements for the History major with a 3.5 at the time of graduation.
2. An overall GPA of at least 3.2.
3. Receipt of a grade of "B" or higher in both RI: Historical Methods (HIS 3150) and RI: Senior Seminar (HIS 4935).
4. Completion of a 40-50-page Senior Thesis (HIS 4970, 3 credits) with a grade of "B" or higher, under the direction of a tenured or tenure-track faculty member.

Students in the Honors Program in History who complete all requirements but do not meet the GPA requirements for honors at the time of graduation will receive credit for all work completed but will not be certified as having received honors. Students interested in the Honors Program in History should contact the director of Undergraduate Studies of the Department of History, Dr. Patricia Kollander, [kollande@fau.edu](mailto:kollande@fau.edu).

## HISTORY UNDERGRADUATE MINOR

*(Minimum of 18 credits required)*

Students majoring in any discipline other than History are eligible to complete a minor in History. This minor allows students to tailor their courses to a particular area of history or select a broad assortment of courses in different areas. The minor requires completion of 18 credits in history courses, at least 15 of which must be at the upper division in at least two out of five geographical areas (U.S., Europe, Africa, Latin America, Non-Western). Of the 18 credits, at least 15 must be taken at FAU. Students

interested in the minor should contact the Department of History.

## Secondary Education Program

A program leading to teacher certification in Social Science is available through the Department of [Curriculum and Instruction](#) in the College of Education.

[Link to Combined Program with Wilkes Honors College](#)

## HISTORY

### BACHELOR OF ARTS (B.A.) TO MASTER OF ARTS (M.A.) COMBINED PROGRAM

*(Minimum of 150 or 156 credits required)*

The B.A./M.A. with major in History combined degree program enables outstanding students to graduate with both a Bachelor of Arts in History (B.A.) and a Master of Arts in History (M.A.) in as little as five years. The program is 150 credits (B.A./M.A. with thesis option) or 156 credits (B.A./M.A. without thesis option). Students complete 120 credits for the undergraduate degree and 30 credits (thesis option) or 36 credits (non-thesis option) for the graduate degree. Students complete the undergraduate degree first, taking no more than 12 credits of graduate coursework in their senior year, which are then used to satisfy requirements for both degrees. Prospective students must formally apply to this program and meet all admission requirements.

### Admission Requirements

1. Each applicant must be a declared History major at Florida Atlantic University, with 60-90 credits completed toward the B.A. degree, including HIS 3150: RI: Historical Methods, and HIS 4935: RI: Senior Seminar.
2. Applicants must have a minimum 3.25 GPA for the last 60 undergraduate credits attempted.
3. Applicants must submit two letters of recommendation, written by tenured or tenure-earning members of the Department of History.
4. Applicants must provide a writing sample as part of their application. This should be a term paper or lengthy essay.
5. Applicants must provide a two-to-three-page typed, double-spaced autobiographical statement indicating the nature of their preparation for graduate work and the reasons for seeking the combined B.A./M.A. degree in History.
6. Prospective applicants for the combined B.A./M.A. degree in History are encouraged to schedule

an interview with the department's Director of Graduate Studies.

7. The application deadline is October 15 for Spring admission, and June 1 for Fall admission.

### **Undergraduate Course Replacements**

In their senior year, students admitted to the combined degree program may take up to 12 credits of graduate coursework, which are then used to satisfy requirements for both degrees. This will be accomplished by substituting 12 credits of free elective credit at the upper division (3000- 4000- level) with HIS 5060: The Historical Experience, and 9 credits of additional graduate coursework with the course prefix AMH, EUH, HIS, LAH, or WOH at the 5000 or 6000 level.

### **Degree Requirements**

To be eligible for the combined B.A./M.A. degree in History, students must fulfill the following requirements:

1. Completion of all requirements for the B.A. in History major, in addition to other requirements as stipulated by the University and the College.
2. Completion of all requirements for the M.A. in History major, on either the thesis or non-thesis option.

## **MASTER'S PROGRAM**

### **HISTORY**

#### **MASTER OF ARTS (M.A.)**

*(Minimum of 30 or 36 credits required)*

### **Admission Requirements**

The Master of Arts degree in History is designed to prepare graduates for doctoral work in history; for museum, preservation and public history work; for employment in education, government or industry; for admission to law school; to qualify instructors in history for community college teaching; and to enhance historical skills and content for secondary school social studies teachers.

1. Each applicant should have a baccalaureate degree from an accredited institution, preferably with an undergraduate major in history. Applicants without an undergraduate history major may be admitted on condition that appropriate undergraduate coursework in history be completed in addition to all requirements for the M.A. degree.

2. Applicants must have a minimum 3.0 grade point average (GPA) for the last 60 undergraduate credits attempted.
3. Applicants must have two letters of recommendation sent directly to FAU via the online application portal.
4. Applicants must upload, as part of their online application, a writing sample. This should be a term paper or lengthy essay.
5. Applicants must upload, as part of their online application, a two-to-three-page typed, double-spaced autobiographical statement indicating the nature of their preparation for graduate work and the reasons for seeking the M.A. in history.
6. Prospective applicants for graduate work in history are encouraged to schedule an interview with the department's director of Graduate Studies.
7. Applicants who fail to meet the GPA requirements, and/or who lack a strong background in history, may be admitted on a conditional basis.

### **Degree Requirements**

The Master of Arts in History has two options: 1) the thesis option, requiring 30 credits with a minimum of 24 credits of graduate coursework and completion of the M.A. thesis, for which a minimum of 6 additional credits must be earned; and 2) the non-thesis option, requiring 36 credits of graduate coursework. Graduate courses in history are of two types: readings (5000 level) and research seminars (6000 level). These readings and research seminars are offered in the following fields: Asian, Comparative, European, Florida, Latin American, Middle Eastern, Public, U.S. and World History. Students must choose a major field from among the following: European, U.S., and World History. Those who select U.S. History as their major field may include in their total program up to two public history courses, including internships.

While students may take additional credits of directed independent studies (DIS), only 3 credits may be counted toward the degree requirements. Similarly, even though students may take more internship credits, only 3 credits may be applied to the total number required for the degree.

A grade of "B-" or below will not be accepted for credit toward the M.A. degree in History.

### **Qualifying Examination**

In addition to the other degree requirements, all students must take and pass a qualifying examination at the end of their course of study. To pass, all students must earn at least a "B" grade on each question. The exam may be taken twice, but those students who do not pass the second time will be dismissed from the program. Those students who achieve a superior performance on the entire exam will be designated as having passed "with distinction."

For thesis-option students, this will consist of an oral examination that includes a defense of the thesis along with questions related to the larger field in which the thesis is located. For non-thesis students, the examination will consist of three written questions, of which two will be in the primary field and one in a secondary field.

Students must be enrolled at FAU during any semester in which they take the exam. Students in the non-thesis option who need to take the exam are expected to notify the graduate director in writing at least two weeks before the date it is administered and to abide by all of the procedures set out in the program website: [www.fau.edu/history/graduate.php](http://www.fau.edu/history/graduate.php).

**For the M.A. with Major in History (Thesis Option), more specific degree requirements are:**

1. All M.A. students must take HIS 5060 (The Historical Experience), a basic course that deals with historiography and changing patterns of historical interpretation, as well as with research techniques and methodologies. Students should take this course as early in their program as possible.
2. To assure a proper distribution of courses by field, graduate students must take a minimum of 12 credits of graduate coursework in their major/thesis field (European, U.S., or World History) and a minimum of 9 credits in non-major/non-thesis fields.
3. All M.A. students must complete a minimum of 6 credits of thesis research (HIS 6971) and complete an acceptable master's thesis.
4. Graduate students may not take undergraduate courses for graduate credit.
5. Graduate students who also serve as graduate assistants in the Department must complete, in addition to all other requirements, the 3-credit course HIS 5944, Teaching Practicum. Credits for this course may not be counted as part of the requirements for the 36-credit, non-thesis M.A. degree.

---

**Core - 3 credits**

The Historical Experience	HIS 5060	3
---------------------------	----------	---

---

**Thesis Option - 27 credits**

---

**Electives - 21 credits**

---

*Select a minimum of 18 credits from the Department of History, including a minimum of 9 credits at*

*the 5000 level in reading seminars and a minimum of 9 credits at the 6000 level in research with prefixes of AMH, EUH, HIS, LAH or WOH. Students may substitute up to 3 credits from outside the Department for History credits, with permission of the Director of Graduate Studies.*

---

## **Thesis - 6 credits**

---

Master's Thesis <i>(may be taken over multiple terms)</i>	HIS 6971	6
--	----------	---

### **Application for the M.A. Thesis Option**

All students admitted to the M.A. program in History will be on a non-thesis trajectory. Students may switch to the M.A. thesis option under the following conditions:

1. Students must have achieved a minimum overall GPA of 3.75 in their graduate program by the end of the second semester of full-time study (or after completing 15 credits studying part time);
2. Students must submit the following to the director of Graduate Studies prior to the last day of class of the second semester of full-time study (or the last day of class of the semester when the student will have completed 15 credits studying part time):
  - a. A brief paragraph indicating which professor ideally would serve as thesis advisor and explaining why the student would like to work with that particular professor;
  - b. A 3-5 page overview of the thesis (explain what the thesis is about, how existing literature on the topic is deficient, and what the thesis is proposing that is new) and a preliminary bibliography.

After grades are in for the semester during which the student is applying for the thesis option, the director of Graduate Studies will verify the applicant's overall GPA; if this falls below 3.75, the student must pursue the non-thesis option.

If the student meets the GPA requirement, the director of Graduate Studies will forward the application to the graduate committee members. The committee will communicate its decision to the Graduate Studies director, who will inform the student whether the project is accepted and, if so, under what conditions the student may proceed to write the thesis. If the application is not approved, the student must pursue the non-thesis option.

If approved for a thesis, the student's thesis advisor will put together a three-member thesis committee to oversee the research and writing of the thesis. This proposal and determination of the thesis committee must be submitted and approved by the graduate director and department chair before the

student can register for thesis credits. The foreign language requirement must also be met before the student is permitted to enroll in thesis research.

**For an M.A. with Major in History (Non-Thesis Option), more specific degree requirements are:**

1. All M.A. students must take HIS 5060 (The Historical Experience).
2. To assure proper distribution of course by field, graduate students in the non-thesis option should take 18 credits in their major field (European, U.S., or World History) and the remaining 15 credits in other fields.
3. Graduate students in the non-thesis option may not take undergraduate courses for graduate credit.
4. Graduate students who also serve as graduate assistants in the department must complete, in addition to all other requirements, the 3-credit HIS 5944: Teaching Practicum. Credits for this course may not be counted as part of the requirements for the 36-credit non-thesis M.A. degree.

---

**Core - 3 credits**

---

The Historical Experience	HIS 5060	3
---------------------------	----------	---

---

**Non-Thesis Option - 33 credits**

---

*Select a minimum of 30 credits from the Department of History, including a minimum of 12 credits at the 5000 level in reading seminars and a minimum of 18 credits at the 6000 level in research with prefixes of AMH, EUH, HIS, LAH or WOH. Students may substitute up to 3 credits from outside the Department for History credits, with permission of the Director of Graduate Studies.*

**The Plan of Study**

All students in the M.A. program in history must file with the Graduate College a Plan of Study upon completion of 9 credits of qualified coursework. This form is completed by the student in consultation with the graduate director. Approval of this plan certifies that the student has demonstrated the ability to do acceptable graduate work. Those students who make changes to their Plan of Study after the original plan is submitted are required to file a Revision to an Existing Plan of Study form in the last semester before graduation. The forms for completion can be accessed through the [Graduate College website](#). Failure to file these forms as required will prevent the student from graduating.

**Foreign Language Requirement**

In addition to the other degree requirements, all students must fulfill the department language

requirement before conferral of the degree through one of the following three options.

1. Passing one semester of a foreign language at the intermediate level (2220) at FAU or the equivalent at another university, as determined by the History Department's graduate committee.
2. Passing an equivalency exam at the intermediate (2220) level.
3. Passing the graduate Reading for Research course (FRE/GER/SPN 5060).

It is strongly encouraged that students fulfill this requirement soon after beginning their graduate studies.

To qualify for the M.A. degree in history, all students must have the recommendation of the graduate director and the department chair, as well as the dean of the Dorothy F. Schmidt College of Arts and Letters.

## INTERDISCIPLINARY STUDIES

### INTERDISCIPLINARY STUDIES BACHELOR OF ARTS (B.A.)

#### **Concentrations:**

**Arts and Humanities**

**Community and Visual Design**

**Pre-Law**

**Social Science**

**Women, Gender and Sexuality**

*(Minimum of 120 credits required)*

The Interdisciplinary Studies program is for students who wish to concentrate generally in the arts, humanities and social science without a specific departmental major. The knowledge and intellectual training provided is good preparation for graduate study in the fields of the arts and humanities, the study of law, the ministry and careers in public service professions. Five concentrations are available within the Interdisciplinary Studies program: Arts and Humanities, Community and Visual Design, Pre-Law, Social Science, and Women, Gender and Sexuality. The program is also available fully online with three options: the general degree program, the general program with the Arts and Humanities concentration, and the general program with the Social Science concentration.

Students who wish to pursue the Interdisciplinary Studies major should contact [The Office of Student Academic Services](#) for advising and more information. Degree requirements for Interdisciplinary Studies and the five concentrations are shown below.

### **Prerequisite Coursework for Transfer Students**

Students transferring to Florida Atlantic University must complete both lower-division requirements (including the requirements of the General Education Program) and requirements for the College and major. Lower-division requirements may be completed through the A.A. degree from any Florida public college, university or community college or through equivalent coursework at another regionally accredited institution. Before transferring and to ensure timely progress toward the baccalaureate degree, students must also complete the prerequisite courses for their major as outlined in the [Transition Guides](#).

All courses not approved by the Florida Statewide Course Numbering System that will be used to satisfy requirements will be evaluated individually on the basis of content and will require a catalog course description and a copy of the syllabus for assessment.

### **Degree Requirements**

In addition to the University and College requirements for admission and graduation, including the University foreign language graduation requirement, the requirements for the major in Interdisciplinary Studies are as follows:

1. 39 credits; 30 must be upper division.
2. 15-18 credits must be in a single discipline, with a minimum of 12 upper-division credits. No more than 18 credits may be taken in any one area.
3. Up to 15 credits from another college may be applied to the major.
4. Students choose a primary area of concentration and develop a plan of study in consultation with the program director. Courses may be taken from across the college.
5. Earn a "C" or better in all courses applied toward the major. No course taken on a pass/fail basis may be counted for the major.
6. All students must take IDS 3949 or SLS 4342 for 3 credits (or an approved equivalent) and IDS 3890.
7. IDS 4930, when offered, may substitute for IDS 3890.

### **Areas of Concentration**

Five areas of concentration are available: Arts and Humanities; Community and Visual Design; Pre-

Law; Social Science; and Women, Gender and Sexuality. The program director must approve appropriate courses from other disciplines.

### **Arts and Humanities Concentration**

Students may choose from the following disciplines: Architecture, Communication and Multimedia Studies; English; History; Languages, Linguistics and Comparative Literature; Music; Philosophy; Theatre and Dance; Art and Art History; and Women, Gender and Sexuality Studies. The program director may approve courses from any of these disciplines or programs as well as appropriate courses from other disciplines across the University and/or other disciplines or programs within the College of Arts and Letters.

### **Community and Visual Design Concentration**

Students may choose from the following disciplines: Architecture, Art, Multimedia Studies: Film and Media, Political Science, Public Administration and Sociology. The program director may approve courses from any of these disciplines or programs as well as appropriate courses from other disciplines (Geography, Business, Urban Planning) across the University and other disciplines or programs within the College of Arts and Letters.

### **Pre-Law Concentration**

In addition to the Interdisciplinary Studies degree requirements, the following also apply to this concentration area.

1. All coursework for the major should come from the list below.
2. Students may select a primary discipline in Communication and Multimedia Studies, Criminology and Criminal Justice, English, History, Music, Philosophy, Political Science, Public Administration, Sociology or Theatre and Dance.
3. Secondary disciplines must be chosen from the list below.
4. The required internship should be law related.

### **Social Science Concentration**

Students may choose from the following disciplines: Anthropology, Communication and Multimedia Studies, History, Political Science, Public Administration, Sociology and Women, Gender and Sexuality Studies. The program director may approve courses from any of these disciplines or programs as well as appropriate courses from other social science disciplines (Economics, Geography and Psychology) across the University and/or other disciplines or programs within the College of Arts and Letters.

### **Women, Gender and Sexuality Concentration**

In addition to the Interdisciplinary Studies degree requirements, the following also apply to this area of

concentration:

1. Courses counted toward this major cannot also be counted toward the undergraduate certificate in Women, Gender and Sexuality Studies.
2. Students must take two core courses (WST 2010, WST 2608, WST 3930).
3. Students must take three additional courses in Women, Gender and Sexuality Studies, which may include other core courses.

## JEWISH STUDIES

### Faculty:

Lindbeck, K., Director; Berger, A., Raddock Eminent Scholar for Holocaust Studies; Sanua, M.

[Link to Jewish Studies Minor](#)

## JEWISH STUDIES

### BACHELOR OF ARTS (B.A.)

*(Minimum of 120 credits required)*

The Bachelor of Arts in Jewish Studies at Florida Atlantic University is open to all students wishing to study various forms of Jewish culture throughout the centuries. It may be especially useful for:

1. Those thinking about vocational opportunities in Jewish communal and educational organizations (community centers, family service bureaus, federations, camp administration; teaching in Hebrew or day schools).
2. Students contemplating careers as rabbis or cantors.
3. Students considering academic careers in Judaic Studies.
4. Those wishing to pursue graduate study in any aspect of Western civilization and/or culture.

### Prerequisite Coursework for Transfer Students

Students transferring to Florida Atlantic University must complete both lower-division requirements (including the requirements of the General Education Program) and requirements for the College and major. Lower-division requirements may be completed through the A.A. degree from any Florida public college, university or community college or through equivalent coursework at another regionally accredited institution. Before transferring and to ensure timely progress toward the baccalaureate

degree, students must also complete the prerequisite courses for their major as outlined in the *Transition Guides*.

All courses not approved by the Florida Statewide Course Numbering System that will be used to satisfy requirements will be evaluated individually on the basis of content and will require a catalog course description and a copy of the syllabus for assessment.

## Requirements

In addition to requirements of the Dorothy F. Schmidt College of Arts and Letters and the University, the student pursuing a Bachelor of Arts in Jewish Studies must take 14 credits in required core courses. The student must also take 21 credits of upper-division content courses. The total required credits for the major is 35.

## JEWISH STUDIES UNDERGRADUATE MINOR

*(Minimum of 18 credits required)*

Open to undergraduate students who wish to study the various forms of Jewish culture throughout the centuries, this minor focuses on the Jewish historical experience. Students are trained in critical thinking in response to the study of history, texts and culture. Those enrolled in the program come to understand that various Judaisms emerged over the course of time and in response to changing conditions.

The minor requires 18 credits, at least 75 percent of which must be completed at FAU. Two core courses are required and the remaining courses are selected from 2000-level or above, HBR-prefixed courses and courses in the table below.

**Core Courses (6 credits)**

Classical Jewish Civilization	JST 3403	3
-------------------------------	----------	---

Modern Jewish Civilization	JST 3404	3
----------------------------	----------	---

**Content Courses (12 credits)**

The content courses are chosen from at least two of the following four categories: history, the arts and culture, politics and social issues, and religion. Content courses may also be chosen from among HBR-prefixed, 2000-level or above courses. Close work with faculty and individual research are encouraged.

## LANGUAGES, LINGUISTICS AND COMPARATIVE LITERATURE

### Faculty:

Munson, M., Chair.; Augustyn, P.; Blattner, G.; Calargé, C.; Conrod, F.; Cooke, R.; Gamboa, Y.; Godon-Martinez, N.; Gosser-Esquilín, M. A.; Hamilton, M.; Horswell, M. J.; Kharlamov, V.; Lindbeck, K.; Mendoza, M.; Poulson, N.; Ruthenberg, M.; Serra, I.; Tille-Victorica, N.; White, J.

### Instructors:

Almonte, M.; Arboleda, L.; Henao, L.; Mansilla-Bjalme, J.; Pettener, E.; Rahill, R.; Rendón, R.; Trotter, E.; Uo, S.

The Department of Languages, Linguistics and Comparative Literature (LLCL) provides a broad liberal arts background with a bachelor's degree in Languages, Linguistics and Comparative Literature with

concentrations in French, Italian, Linguistics, and Spanish. A master's degree is offered in Languages, Linguistics and Comparative Literature with concentrations in French, Teaching of French, Spanish, Teaching of Spanish, Linguistics and Comparative Literature. The study of foreign languages, cultures, and literatures and the development of skills in language use and linguistic analysis prepares students for professional careers in such fields as international law and business, foreign service and other transnational government agencies, teaching and a wide variety of positions in a multicultural, technological, global world. The department also offers an [Honors Program](#) and minors in Arabic, French, German, Italian, Japanese, Spanish, Linguistics and Comparative Literature. Other languages taught include Chinese, Classical Greek, Modern Greek, Hebrew, Japanese and Latin.

### **Prerequisite Coursework for Transfer Students**

Students transferring to Florida Atlantic University must complete both lower-division requirements (including the requirements of the General Education Program) and requirements for the College and major. Lower-division requirements may be completed through the A.A. degree from any Florida public college, university or community college or through equivalent coursework at another regionally accredited institution. Before transferring and to ensure timely progress toward the baccalaureate degree, students must also complete the prerequisite courses for their major as outlined in the [Transition Guides](#) .

All courses not approved by the Florida Statewide Course Numbering System that will be used to satisfy requirements will be evaluated individually on the basis of content and will require a catalog course description and a copy of the syllabus for assessment.

### **Double Majors**

Students interested in information about a double major in Languages, Linguistics and Comparative Literature should consult the department advisor.

## **LANGUAGES, LINGUISTICS AND COMPARATIVE LITERATURE BACHELOR OF ARTS (B.A.)**

### **French Concentration**

**Italian Concentration****Linguistics Concentration****Spanish Concentration**

*(Minimum of 120 credits required)*

In addition to other College and University requirements, students will normally complete at least 36-37 upper-division credits in Languages, Linguistics and Comparative Literature in one of the department's concentrations (French, Italian, Linguistics, or Spanish). Grades below "C" in a required departmental course will not count toward the requirements of the major. Credits are generally distributed as follows. Native and heritage learners of the language should follow the heritage learners track and consult with the LLCL advisor or department chair concerning substitutions.

**Note:** The department enforces a non-audit policy in its language courses.

The department encourages participation in any of its Study Abroad Programs. Approved courses taken in Study Abroad Programs may substitute for some requirements and electives.

## HONORS PROGRAM IN LANGUAGES, LINGUISTICS AND COMPARATIVE LITERATURE

### Entry Requirements

Majors in Languages, Linguistics and Comparative Literature who meet the following criteria will be eligible to pursue honors in French, Italian, Linguistics, or Spanish :

1. Student has already completed at least 9 upper-division credits in the major, including FOL 3880, but fewer than 100 credits toward the degree;
2. Student has earned a minimum overall GPA of 3.2;
3. Student has earned a minimum overall GPA of 3.5 in the major.

To be considered for admission to the Honors Program in Languages, Linguistics and Comparative Literature, students meeting all of the above criteria may submit:

- a. A one-page abstract (250 words) outlining the proposed thesis topic;
- b. An annotated bibliography of the five most relevant sources related to the topic;
- c. A one-page statement detailing why the student seeks honors in the major;
- d. The revised final paper of FOL 3880;
- e. A letter of support from at least one member of the department faculty with a terminal degree who will serve as a mentor;
- f. A completed application form.

These documents must be submitted to the department chair, preferably no later than three semesters before the student expects to graduate.

### **Admission to the Program**

1. A committee will review the application and make a recommendation to admit and determine a Plan of Study.
2. The student will receive confirmation in writing from the department chair.
3. Admission to the Honors Program is limited to 20 percent of students in the particular major.

### **Standards for Maintaining Active Status**

1. Student must maintain an overall 3.2 GPA and a 3.5 GPA in the major.
2. Student must complete all the field distribution requirements of the respective major.
3. Student must abide by the Code of Academic Integrity.
4. Student may be placed on probation in the Honors Program for one semester if overall GPA and/or major GPA is not maintained; if required minimum GPA and/or major GPA is not re-established after the probationary semester, the student will be dismissed from the program.

### **Honors-Level Enrichment**

Honors-level enrichment is achieved through successful completion of any **two** of the following:

1. Completion of an upper-division course enhanced by Academic Service-Learning, linked to a community organization dealing, whenever possible, with the student's research interest.

2. Participation in a study abroad program in which the student is enrolled full-time and for the full duration of the academic term. A follow-up public presentation of the experience is also required.
3. Service to the faculty leader of FAU's Global Connections Living Learning Community for three common-hour activities.
4. Service as an active officer in one of the Honor Societies.
5. Service as a tutor in the Supplemental Instruction program (in one of the disciplines represented in the Languages, Linguistics and Comparative Literature Department.)
6. Participation in Florida Atlantic University's Undergraduate Research Journal (e.g., service on the board; paper submission.)

### **Capstone Requirements**

In addition to honors-level enrichment activities, successful completion of the following capstone elements is also required:

1. Complete with a grade of B+ or higher an advanced seminar in the area of research interest of the student. This course will fulfill one of the three electives required of the major.
2. Complete an honors thesis, supervised by the mentor and reviewed by a second reader (3 credits above the major's requirements).
3. Submit research findings to the Undergraduate Research Symposium.

### **Secondary Education Program**

A program leading to temporary teacher certification in foreign languages (French and Spanish) is available in cooperation with the Department of [Curriculum and Instruction](#) in the College of Education. French K-12 and Spanish K-12 are not accredited and do not meet the standards for permanent state certification as an educator, but graduates from the French and Spanish concentrations may qualify for a temporary teaching certificate in the State of Florida. To qualify for Florida state certification approval, additional education requirements must be met. For information about these additional requirements, students should see their academic advisor.

## **ACADEMIC MINORS**

Three types of minors are offered through the Department of Languages, Linguistics and Comparative Literature (LLCL):

1. Minor in a foreign language (Arabic, French, German, Italian, Japanese, Spanish)
2. Minor in Linguistics
3. Minor in Comparative Literature

All students seeking one of the minors offered by the department, whether in a foreign language, linguistics or comparative literature, should declare the minor and seek individual advising through the department as soon as possible, but ideally before beginning the last 8 credits of study.

Students who have earned 8 CLEP credits in Spanish or French, or who have taken three years of high school Italian or German, may start with FRE/ITA/SPN/GER 2220 (see the LLCL advisor for specific placement information). Heritage learners of Spanish may take the SPN 1340 and 2341 sequence or be placed directly into upper-division Spanish courses (see the departmental advisor for individual advising and information on language placement).

Students who plan to study abroad are encouraged to have all courses approved through the LLCL advisor before beginning the program.

Students must earn a grade of “C” or better in all courses to be counted toward the minor.

## LINGUISTICS UNDERGRADUATE MINOR

*(Minimum of 15 credits required)*

To complete a minor in Linguistics, students are required to pass (with a grade of “C” or better): Introduction to Linguistics (LIN 3010), two courses in theoretical linguistics (LIN 4326, LIN 4802 or LIN 4430) and two elective courses in linguistics (other LIN courses, in-lingua linguistics courses, TSL 4080, TSL 4251; only one elective can be lower division).

## COMPARATIVE LITERATURE UNDERGRADUATE MINOR

*(Minimum of 16 credits required)*

To complete a minor in Comparative Literature, with a focus on two or more national literatures or literary traditions, students are required to pass (with a grade of “C” or better): one introductory course, either Introduction to Comparative Literature (LIT 3060) or Introduction to World Literature (LIT 2100); one intermediate- or advanced-level language course (FRE/GER/ITA/SPN 2220 or higher, depending on proficiency); and three upper-division (3/4000-level) literature courses, either in lingua or in translation. (Students are always encouraged to do in-lingua coursework whenever possible, but this is by no means a requirement.) Regardless of the type of upper-division literature courses taken (in

lingua or in translation), the coursework must represent, at a minimum, two different national traditions/cultures. Literature courses taught in other departments may count toward the minor with permission of the advisor. At least 75 percent of all minor credits earned must be from FAU.

Students who plan to study abroad are encouraged to have all courses approved through the LLCL advisor before beginning the program.

## FOREIGN LANGUAGE MINORS (15-19 CREDITS)

Students may complete a foreign language minor in Arabic, French, German, Italian, Japanese or Spanish as described below. At least 75 percent of all minor credits earned must be from FAU. Courses taken on study abroad programs may be counted toward the minor, but all such courses should be approved by the LLCL advisor before the student begins the study abroad program.

### ARABIC UNDERGRADUATE MINOR

To complete a minor in Arabic, students are required to pass (with a grade of “C” or better) two beginning-level language courses (ARA 1120 and ARA 1121), two intermediate-level language courses (ARA 2220 and ARA 2221) and one upper-division (3/4000-level) course, chosen in consultation with the LLCL advisor, on a topic relating to the culture, literature, history and/or politics of the Arab World.

Students with advanced knowledge of spoken and/or written Arabic (beyond the intermediate level) must contact the LLCL advisor to establish a list of five courses for completing the minor.

Students who plan to study abroad are strongly encouraged to have all courses approved by the LLCL advisor before beginning the program.

### FRENCH UNDERGRADUATE MINOR

To complete a minor in French, students are required to pass (with a grade of “C” or better) five in lingua (FRE and FRW) prefixed courses at the intermediate level or higher.

Courses must be chosen in consultation with an LLCL advisor. A maximum of two courses can be at the intermediate level (FRE 2220/2221). Students with advanced knowledge of spoken and/or written

French (including heritage learners) must contact the LLCL advisor to establish a list of five courses to complete the minor.

Students must take at least one course from each of the following three categories: (1) at least one upper-division language or linguistics course (such as FRE 3440, FRE 3401, FRE 3340, FRE 3780 or FRE 4930); (2) at least one upper-division culture and civilization course (such as FRE 3393, FRE 3442 or FRE 4930); and (3) at least one upper-division literature course (such as FRW 3001, FRW 3102, FRW 3122, or FRW 4930).

Students who plan to study abroad are strongly encouraged to have all courses approved by the LLCL advisor before beginning the program.

The French minor is also available online.

## GERMAN UNDERGRADUATE MINOR

To complete a minor in German, students are required to pass (with a grade of “C” or better) two beginning-level language courses (GER 1120 and GER 1121), and three intermediate-level language courses (GER 2220, GER 2221 and GER 2225).

Students with advanced knowledge of spoken and/or written German (including heritage learners) must contact the LLCL advisor to establish a list of five courses for completing the minor.

Students who plan to study abroad are strongly encouraged to have all courses approved through the LLCL advisor before beginning the program.

The German minor is also available online.

## ITALIAN UNDERGRADUATE MINOR

To complete a minor in Italian, students are required to pass (with a grade of “C” or better) one beginning-level language course (ITA 1121), two intermediate-level language courses (ITA 2220 and ITA 2221) or equivalent, one advanced-level language course (ITA 3420 or ITA 3421) or equivalent and one upper-division (3/4000-level) courses in lingua, to be chosen in consultation with the LLCL advisor.

Students with advanced knowledge of spoken and/or written Italian (including heritage learners) must contact the LLCL advisor to establish a list of five courses for completing the minor.

Students who plan to study abroad are strongly encouraged to have all courses approved by the LLCL advisor before beginning the program.

## **JAPANESE** **UNDERGRADUATE MINOR**

To complete a minor in Japanese, students are required to pass (with a grade of “C” or better) two beginning-level language courses (JPN 1120 and JPN 1121), two intermediate-level language courses (JPN 2220 and JPN 2221) and one upper-division (3/4000-level) course, approved by the LLCL advisor, on a topic related to the culture, literature, history or politics of the Japanese world.

Students with advanced knowledge of spoken and/or written Japanese (including heritage learners) must contact the LLCL advisor to establish a list of five courses for completing the minor.

Students who plan to study abroad are strongly encouraged to have all courses approved by the LLCL advisor before beginning the program.

## **SPANISH** **UNDERGRADUATE MINOR FOR NON-HERITAGE/NON-NATIVE LEARNERS**

To complete a minor in Spanish for non-heritage learners, students are required to pass (with a grade of “C” or better) five in lingua (SPN and SPW) prefixed courses at the intermediate level or higher. These five courses should be chosen in consultation with an LLCL advisor.

A maximum of two courses can be at the intermediate level (SPN 2220 and SPN 2221). Students with advanced knowledge of Spanish (beyond the intermediate level) will not take any intermediate-level courses, and must meet with an LLCL advisor to determine which five upper-division courses to include in the minor.

Students must take at least one course in each of the following categories: (1) at least one advanced-level language course (SPN 3400); (2) at least one in lingua upper-division culture and civilization course (SPN 3500 or SPN 3501); and (3) at least one in lingua upper-division literature and civilization course (SPW 3030 is strongly recommended; other possibilities include SPW 3012, SPW 3021 or SPW 4930).

Students who plan to study abroad are strongly encouraged to have all courses approved by the LLCL advisor before beginning the program.

The Spanish Minor for Non-Heritage/Non-Native Learners is also available online.

## **SPANISH**

### **UNDERGRADUATE MINOR FOR HERITAGE/NATIVE LEARNERS**

To complete a minor in Spanish for heritage/native learners, students are required to pass (with a grade of “C” or better) one intermediate-level language course (SPN 2341), one advanced-level language course (SPN 3343), one culture course (SPN 3500 or SPN 3501), one course providing an introduction to Spanish literature (SPW 3012 or SPW 3021) and one upper-division (3/4000-level) course in lingua.

Students who plan to study abroad are strongly encouraged to have all courses approved by the LLCL advisor before beginning the program.

## **COMBINED PROGRAM**

### **LANGUAGES, LINGUISTICS AND COMPARATIVE LITERATURE**

#### **BACHELOR OF ARTS (B.A.) TO MASTER OF ARTS (M.A.)**

#### **COMBINED PROGRAM**

#### **Linguistics Concentration**

*(Minimum of 156 credits required)*

The B.A./M.A. in Languages, Linguistics and Comparative Literature (LLCL) with Linguistics Concentration is a combined degree program that enables outstanding students to graduate with both a Bachelor of Arts (B.A.) and a Master of Arts (M.A.) in LLCL: Linguistics Concentration. The program is 156 credits. Students complete 120 credits for the undergraduate degree and 36 credits for the non-thesis track of the graduate degree. Students complete the undergraduate degree first, taking no more than 12 credits of graduate

coursework in their senior year, which are then used to satisfy requirements for both degrees.

Prospective students must formally apply to this program and meet all admission requirements.

#### **Admission Requirements**

1. Each applicant must be a declared major in LLCL: Linguistics Concentration at Florida Atlantic University, with 60-90 credits earned toward the B.A. degree, including completion of (i) LIN 3010 introduction to Linguistics and (ii) two upper-division linguistics courses taught in English or in lingua. Applicants may apply in the semester in which they expect to complete the required coursework.
2. Applicants must have a minimum 3.00 GPA for the last 60 undergraduate credits attempted and a minimum grade of 'B' in the linguistics courses taken at the undergraduate level (taught in English or in lingua).
3. Applicants must submit two letters of recommendation, written by LLCL faculty.
4. Applicants must provide a writing sample (term paper or essay) as part of their application, preferably from a class taught by LLCL faculty.
5. Applicants must provide a two-page typed, double-spaced autobiographical statement indicating the nature of their preparation for graduate work and the reasons for seeking the combined B.A./M.A. degree in LLCL: Linguistics Concentration.
6. Prior to applying, prospective applicants for the combined B.A./M.A. degree are encouraged to schedule a meeting with the department's Director of Graduate Studies and the coordinator of the Linguistics Program.
7. The application deadline is October 1 for Spring admission, and April 1 for Fall admission.

### **Undergraduate Course Replacements**

In their senior year, students admitted to the combined degree program may take up to 12 credits of graduate coursework, which are then used to satisfy requirements for both degrees. This will be accomplished by substituting 12 credits of upper division non-core elective courses (3000 or 4000 level) with 12 credits of graduate coursework (5000 or 6000 level) with the course prefixes LIN and FOL or language-specific graduate linguistics courses taught in English or in lingua or TSL 6253 Applied Linguistics & TESOL.

### **Degree Requirements**

To be eligible for the combined B.A./M.A. degree, students must complete all requirements for the B.A. in LLCL: Linguistics Concentration and the M.A. in LLCL: Linguistics Concentration (the non-thesis track).

## **MASTER'S PROGRAM**

### **LANGUAGES, LINGUISTICS AND COMPARATIVE LITERATURE MASTER OF ARTS (M.A.)**

## **Concentrations:**

### **Comparative Literature**

### **French**

### **Teaching of French**

### **Linguistics**

### **Spanish**

### **Teaching of Spanish**

*(Minimum of 30 or 36 credits required)*

The department offers an M.A. in Languages, Linguistics and Comparative Literature with six areas of concentration: Comparative Literature, French, Teaching of French, Linguistics, Spanish and Teaching of Spanish.

## **Admission Requirements**

The Master of Arts degree in Languages, Linguistics and Comparative Literature is designed to prepare students for doctoral study in French, Spanish, Comparative Literature or Linguistics, and/or for employment in a variety of foreign-language applications in diverse fields, including business and government, as well as for qualification as teachers of the major language through its literature, culture and/or linguistics. All students should:

1. Hold a bachelor's degree from an accredited institution. Additional coursework may be required of applicants whose undergraduate major was not the same as the graduate specialization.
2. Have a minimum 3.0 grade point average in the last 60 undergraduate credits.
3. Submit with the application a two-to-four-page typed and double-spaced statement of purpose, written in English, outlining the student's qualifications for graduate study in the given field and reasons for pursuing the M.A. degree. Two academic letters of recommendation are also required, to be sent to the departmental director of Graduate Studies at time of application.
4. Submit a writing sample of the applicant's academic work, i.e., an essay written for a class in the proposed field of study. The language of the writing sample will vary depending on the primary concentration for which the application is being made and whether or not the applicant wishes to be considered for a teaching assistantship in a language program.
5. Submit a two-minute video clip responding to specific questions about the applicant's background and interest in the program to which the student is applying.
6. For international applicants, a TOEFL (paper-based) score of 500 or IBT score of 80, or an IELTS score of 6.0.

## **Graduate Teaching Assistantships**

A limited number of Graduate Assistantships are available each year. The deadline for application is normally February 1. Prospective students interested in applying for an Assistantship should be sure to submit their applications for admission to the graduate program as early as possible.

## **Degree Concentrations with a Thesis**

**For an M.A. degree in LLCL with a concentration in either French or Spanish (Latin American and Peninsular Literature),** the department requires a minimum of 30 credits: 24 credits of coursework and 6 credits of thesis work. The student's program will include a minimum of six courses (18 credits) in 6000-level or higher seminars in the literature of concentration. Students must pass a comprehensive, oral examination prior to submitting the thesis prospectus.

**The M.A. in LLCL degree with a concentration in Comparative Literature** is available with primary fields of study in British, French, Italian, Peninsular Spanish, Latin American or American literatures. Comparative literature broadens the context of single works of literature, provides a method of looking beyond the national frontiers of languages and cultures, and studies major authors, periods, genres, trends and movements in international contexts. Comparative literature is also, by tradition, the study of literature beyond the geo-cultural boundaries of one particular country or hemispheric region. In addition, it pays special attention to the study of relationships between literature and other areas of knowledge and intellectual inquiry. This includes areas such as linguistics, art history, film studies, philosophy, history, political science, anthropology, sociology, as well as other fields. Comparative literature is the comparison of the literary with other spheres of human epistemology, expression and intellectual investigation.

A cardinal feature of the graduate curriculum is the small core requirement in terms of specific courses and the correspondingly large number of electives taken in different fields. Each student develops his or her own program in consultation with the director of Graduate Studies and pursues individually supervised research interests, culminating in a comparative thesis.

### ***Admission to Comparative Literature Study***

Students who do not hold the bachelor's degree (or equivalent) in one of the proposed literatures or other areas of concentration may be asked to do a certain amount of preliminary coursework without credit toward the degree. These courses may be taken after admission to the master's program.

### ***Program Requirements***

The M.A. degree in LLCL with a concentration in Comparative Literature requires the student to pursue one of the two following programs: the study of two literatures in their original languages, one

of which may be British or American literature; or the study of one literature as the primary concentration and a non-literary field as the secondary concentration.

The literature studied may be chosen from among the following: American (i.e., United States, Canadian, Anglo/Caribbean), British, French, Francophone, Italian, Spanish Peninsular, Latin American. There is no additional language requirement beyond the Dorothy F. Schmidt College of Arts and Letters requirement for the master of arts degrees.

Coursework will consist of at least 30 graduate credits for the thesis option (all in courses with readings in the original languages).-

**The M.A. degree in LLCL with a concentration in Linguistics** requires specialization in English or one of the department's major languages (French or Spanish). A minimum of 24 credits of coursework and 6 credits of thesis are required. Nine credits are earned by taking linguistics seminars such as Morphology and Syntax, Second Language Acquisition and Sociolinguistics.

Prerequisites include an advanced level of the language of specialization, or, for students specializing in English, intermediate reading proficiency in a foreign language.

The non-thesis option is the standard option. Students interested in applying for the thesis option should submit the required application materials to the Director of Graduate Studies by the end of the second semester of full-time study, or after completing 15 credits of part-time study.

### **Other Degree Concentrations without a Thesis**

The department also offers the M.A. degree in LLCL with concentrations in Comparative Literature, French, the Teaching of French, Linguistics, Spanish and the Teaching of Spanish without a thesis. These programs require 36 credits of coursework and the successful completion of a written comprehensive examination during the last semester of graduate study. In all cases, the non-thesis option is the standard option for the M.A. degree in LLCL, regardless of the specific area of concentration.

The M.A. in LLCL with a concentration in the Teaching of French or the Teaching of Spanish (focus in Latin American or Spanish Literature) is for students who have the intention of becoming teachers at the secondary\* or postsecondary lower-division level. The program requires 36 credits in literature and linguistics.-

The program may be modified in accordance with the student's undergraduate preparation and professional teaching experience. Grades below "B" will not be counted as fulfilling the requirements of the degree.

\* Certification is required for secondary teaching in Florida public schools.

## MUSIC

(**Music** programs are listed following **Women, Gender and Sexuality Studies**, under **School of the Arts, Music.**)

## PHILOSOPHY

### **Faculty:**

Baima, N., Interm Chair; Banchetti, M. P.; Headley, C. R.; Mindt, G.; Schneider, S., Distinguished Professor; Shusterman, R., Eminent Scholar.

The Philosophy Department offers a bachelor of arts degree program with an emphasis in the liberal arts and at the same time prepares the student for various career opportunities. The intellectual training provided is an excellent preparation for the study of law, the ministry and public service professions, as well as graduate study in philosophy and related disciplines.

In addition to offering the more traditional Philosophy major, the department also offers a traditional [minor in Philosophy](#). Students seeking honors designation in philosophy may pursue the department's [Honors in Philosophy program](#). The programs mentioned in this paragraph are described below after the description of the general Philosophy major.

### Prerequisite Coursework for Transfer Students

Students transferring to Florida Atlantic University must complete both lower-division requirements (including the requirements of the General Education Program) and requirements for the College and major. Lower-division requirements may be completed through the A.A. degree from any Florida public college, university or community college or through equivalent coursework at another regionally accredited institution. Before transferring and to ensure timely progress toward the baccalaureate degree, students must also complete the prerequisite courses for their major as outlined in the [Transition Guides](#).

All courses not approved by the Florida Statewide Course Numbering System that will be used to satisfy requirements will be evaluated individually on the basis of content and will require a catalog course description and a copy of the syllabus for assessment.

## PHILOSOPHY BACHELOR OF ARTS (B.A.)

*(Minimum of 120 credits required)*

In addition to the University and College requirements for admission and graduation, students majoring in philosophy are required to earn 32 credits in philosophy courses as follow:

---

### Required Core Courses - 21 credits

Ancient Philosophy	PHH 3100	3
Early Modern Philosophy	PHH 3420	3

Logic	PHI 2102	3
Knowledge and Reality	PHI 4380	3
Ethical Theory	PHI 4661	3
Senior Seminar in Philosophy	PHI 4938	3
Social and Political Philosophy	PHM 3200	3
<b>Electives - 12 credits</b>		
Medieval and Renaissance Philosophy	PHH 3280	3
Philosophy of Mind	PHH 3320	3
Pragmatism	PHH 3700	3
Late Modern Philosophy	PHH 4440	3
Introduction to Philosophy	PHI 2020	3
Critical Thinking	PHI 2100	3
Artificial Intelligence and Ethics	PHI 2680	3
Philosophy of Psychiatry	PHI 3453	3
Philosophy of Medicine	PHI 3456	3

---

Moral Problems	PHI 3638	3
Environmental Ethics	PHI 3640	3
Asian Ethics and Art Theories	PHI 3870	3
Philosophy of Literature	PHI 3882	3
Philosophy of Performing Arts	PHI 3885	3
Symbolic Logic	PHI 4134	3
Philosophy of Science	PHI 4400	3
Philosophy of the Human and Social Sciences	PHI 4420	3
Biomedical Ethics	PHI 4633	3
Philosophy of Religion	PHI 4700	3
Aesthetics and Art Theory	PHI 4800	3
Directed Independent Study	PHI 4905	3
Special Topics	PHI 4930	3
Philosophy of Sexuality	PHM 3020	3

---

Feminist Philosophy	PHM 3123	3
Philosophy of Law	PHM 3400	3
Philosophy of Technology	PHM 4223	3
Africana Philosophy	PHP 3781	3
Phenomenology	PHP 4782	3
Analytical Philosophy	PHP 4784	3
Existentialism	PHP 4786	3

No grade below a "C" in the courses above will count toward the degree.

## HONORS PROGRAM IN PHILOSOPHY

### Requirements for Eligibility

To be eligible for the Honors in Philosophy program, students must:

1. Have completed 60-90 credits;
2. Have officially declared the major in Philosophy;
3. Complete all core Philosophy courses in a timely manner;
4. Avoid any academic irregularities (cheating, plagiarism);
5. Have an overall GPA of 3.5;
6. Have a GPA in Philosophy courses of 3.5;
7. Complete PHI 4938 (Senior Seminar) with a minimum grade of "B."

### Requirements for Admission

Students must:

1. Meet all of the eligibility requirements listed above;
2. **Officially** apply for the Honors in Philosophy program **no later than** the beginning of the fall semester of their graduating year;
3. Submit a sample philosophical essay that meets with the approval of the faculty of the philosophy department.

### **Requirements for the Honors in Philosophy Designation**

Students must:

1. Register for PHI 4972 (Honors Thesis in Philosophy);
2. Write a thesis proposal, accompanied by a tentative bibliography, to be used in researching the thesis;
3. Request a specific Philosophy faculty member to serve as faculty mentor;
4. Produce and defend a satisfactory honors thesis (see Honors Capstone Requirement below for more details).

### **Honors Capstone Requirement**

Students seeking an Honors in Philosophy designation are required to complete a writing project informed by the intent of the student to draw together his/her entire honors experience. The final requirement that a student must satisfy in order to receive honors in philosophy is as follows:

1. Take PHI 4972 (Honors Thesis in Philosophy);
2. Produce a senior thesis of significant originality and scholarship that focuses on a subject area of philosophy or a particular philosopher;
3. Appoint a thesis committee of **at least** two faculty members, including the thesis mentor;

The thesis committee will review the thesis prior to the oral defense. Students must defend the thesis in front of the thesis committee, a month prior to the graduation date. If revisions are required, these must be completed and turned in to the committee prior to the graduation date.

**Note:** The Honors Thesis is distinct from the senior seminar paper.

### **Notes to Consider:**

1. PHI 4972 is not required for the B.A. in Philosophy. It is a requirement that must be fulfilled only if students wish to receive an Honors in Philosophy designation on their transcripts.
2. Students who do not pass the thesis and who receive a grade of “unsatisfactory” in PHI 4972 will not receive credit for the course and will, therefore, not receive the Honors in Philosophy designation.

Since PHI 4972 is graded on a “satisfactory/unsatisfactory” basis, receiving a grade of “unsatisfactory” on PHI 4972 will not harm a student’s GPA, and the student will still be able to graduate with a B.A. in Philosophy, if that student has met all of the departmental, college, and University requirements for the B.A.

## PHILOSOPHY UNDERGRADUATE MINOR

*(Minimum of 15 credits required)*

The minor in Philosophy requires a minimum of 15 credits, a minimum of 12 of which should be earned at FAU. The courses must be taken according to the list below, and a grade of "C" or above must be earned in each course.

---

### Select one course in logic/critical thinking

### Graduate Courses in Philosophy

The Department of Philosophy is building a list of graduate-level courses intended to serve a diverse constituency of students in the College of Arts and Letters. These include students in the Ph.D. in Comparative Studies and various other master's programs in the College. Refer to the Arts and Letters Course Description section for a list of graduate Philosophy courses.

# POLITICAL SCIENCE

## Faculty:

Gurses, M.; Chair; Atkins, B.; Christley, O. R.; Garcia, L.; Kim, D.; Kirshner, O.; LaRocco, A.; LeMoine, R.; Morton, J.; Nichols, A. D.; Prier, E.; Rabil, R.; Roper, S.; Schwerin, E.; Shaykhutdinov, R.; Shockley, K.; Turbino Torres, L.; Wagner, K.

The B.A. program is designed to provide a broad overview of the discipline of political science. It offers a firm grounding in all aspects of the discipline while ensuring flexibility for students to design programs of study to fit their particular needs through the selection of electives. An [Honors Program](#) gives students the opportunity to gain research skills, improve their critical thinking and writing skills, increase interaction with faculty members and complete their degree with an honors distinction.

## Prerequisite Coursework for Transfer Students

Students transferring to Florida Atlantic University must complete both lower-division requirements (including the requirements of the General Education Program) and requirements for the College and major. Lower-division requirements may be completed through the A.A. degree from any Florida public college, university or community college or through equivalent coursework at another regionally accredited institution. Before transferring and to ensure timely progress toward the baccalaureate degree, students must also complete the prerequisite courses for their major as outlined in the [Transition Guides](#) .

All courses not approved by the Florida Statewide Course Numbering System that will be used to satisfy requirements will be evaluated individually on the basis of content and will require a catalog course description and a copy of the syllabus for assessment.

## POLITICAL SCIENCE BACHELOR OF ARTS (B.A.)

### Global Governance Concentration

## Pre-Law Concentration

*(Minimum of 120 credits required)*

### Degree Requirements

The Bachelor of Arts Degree in Political Science requires meeting the following requirements:

1. All bachelor's degree requirements (stipulated in the University Catalog, including foreign language).
2. A minimum of 36 political science credits with no grade less than "C."

3. The following two courses:

Government of the U.S.*	POS 2041	3
Exploring Political Science	POS 3330	3

\* POS 2041 fulfills the State of Florida's Civic Literacy Requirement.

4. Two of the following courses:

Comparative Politics	CPO 3003	3
Introduction to World Politics	INR 2002	3
RI: Research Methods in Political Science	POS 3703	3
Global Political Theory	POT 2000	3

5. A minimum of 24 upper-division credits, with at least one 3-credit course taken in three of the following five categories:

**American Politics:** Any 3000/4000 level course with a POS prefix (POS 4931 may be repeated for credit with a different topic).

**Comparative Politics:** Any 3000/4000 level course with a CPO prefix (CPO 4932 may be repeated for credit with a different topic).

**International Relations:** Any 3000/4000 level course with an INR prefix (INR 4932 may be repeated for credit with a different topic).

**Political Theory:** Any 3000/4000 level course with a POT prefix (POT 4932 may be repeated for credit with a different topic).

**Public Policy:** Any 3000/4000 level course with a PUP prefix.

### Global Governance Concentration

The primary purpose of the Department of Political Science's Global Governance concentration is to enable students to study and increase their understanding of the causes and consequences of globalization as well as the political, economic and ecological dimensions of globalization. The program is organized around various themes of "global significance," such as global governance and human rights, including issues of peace and conflict among peoples and states; global terrorism; and the interrelationships of global justice, rights and responsibilities with new models of international organization, administration and development.

In addition to the University and College requirements for admission and graduation and the Political Science requirements, students enrolled in the Political Science Global Governance concentration are required to complete five of the core courses below.

---

#### Core Courses (select five courses from below)

---

Political Science Study Abroad	CPO 4957	1-6
American Foreign Policy	INR 3102	3
International Law: Foundations and Institutions	INR 3403	3
International Organization	INR 3502	3
International Political Economy	INR 3702	3

---

War and Peace	INR 4006	3
The International System	INR 4081	3
Advanced Diplomacy	INR 4503	3

### **Pre-Law Concentration**

The Department of Political Science's Pre-Law Concentration prepares students for legal careers by developing knowledge and skills necessary to succeed in law school. The concentration includes courses from subfields in political science focusing on American constitutional law, judicial process and international law. Students in this program take courses that include topics and issues in law school coursework and develop the abilities to read for a clear understanding of content, think critically, solve problems and communicate with greater precision and clarity.

The concentration does not require additional credits in the Political Science major. In addition to the University and College requirements for admission and graduation and the Political Science requirements, students enrolled in the Pre-Law Concentration are required to complete four of the courses below as part of the B.A. in Political Science.

### **Required Courses (select four courses from below)**

International Law: Foundations and Institutions	INR 3403	3
International Law of Peace and Diplomacy	INR 3413	3
International Law of Armed Conflict	INR 3433	3
Law and American Society	POS 3691	3
Constitutional Law: Government Powers and Limits	POS 4603	3

Constitutional Law: Civil Rights and Liberties	POS 4604	3
The U.S. Supreme Court	POS 4606	3
The Judicial Process	POS 4609	3
U.S. Environmental Law and Policy	POS 4697	3
Special Topics (with departmental approval)	POS 4931	3
Government and the Economy	PUP 4710	3

## DATA SCIENCE AND ANALYTICS BACHELOR OF SCIENCE (B.S.)

### Data Science in the Natural Sciences Concentration

### Data Science and Engineering Concentration

### Data Science in Business Concentration

*(Minimum of 120 credits required)*

The Bachelor of Science with Major in Data Science and Analytics (BSDSA) program is a multi-college, interdisciplinary program administered jointly by the Department of Mathematics and Statistics in the Charles E. Schmidt College of Science, the Department of Electrical Engineering and Computer Science in the College of Engineering and Computer Science, the Department of Information Technology and Operations Management (ITOM) in the College of Business, the Department of Political Science in the Dorothy F. Schmidt College of Arts and Letters and the School of Criminology and Criminal Justice in the College of Social Work and Criminal Justice. For details about this program, see the [Interdisciplinary Programs](#) section of this catalog.

## HONORS PROGRAM IN POLITICAL SCIENCE

The Honors Program in Political Science encourages the highest achieving students to engage in the

subject more intensely and participate in significant original research while undergraduates. Honors Program participants learn how to identify a research puzzle and ask questions, gain the ability to critically analyze political science literature and write a literature review, use new skills to make objective theoretical arguments within their chosen subfield and select and apply an appropriate hypothesis, which may include collecting and analyzing empirical data. Throughout their research-intensive coursework, Honors Program students have a firsthand experience in the research process—working collaboratively with fellow students and faculty, writing and revising a journal article-length paper and presenting findings in a professional setting.

## Admission Requirements

1. Students may apply after completing a minimum of 9 credit hours in political science.
2. Minimum criteria for admission include 3.2 cumulative GPA; 3.6 GPA in political science courses; and students should have at least two academic semesters left in which to complete program requirements.
3. Students should complete an application provided by the department, including a personal statement addressed to the chair of the department explaining why they seek honors in the field. Students should also solicit a letter from one Political Science Department faculty member supporting their application. Completed applications will be reviewed by faculty. Admission to the Honors Program is contingent on approval by the department faculty.
4. Applications for admission should be submitted to [Dr. D. Kim](#) or [Dr. A. Nichols](#).

## Standards for Maintaining Active Status

1. Once accepted, students must maintain a GPA of 3.2 throughout the program to make progress. If less than a “B” is earned in any political science course or the student’s cumulative GPA falls below 3.2, the student will be reviewed for dismissal from the Honors Program.
2. Continued enrollment in the program is contingent upon strict adherence to the Code of Academic Integrity. Any violation of the Code will be grounds for dismissal from the Honors Program.
3. The minimum amount of time necessary to complete the Honors Program is one year.

## Criteria for Successful Completion

In addition to maintaining program standards, students must:

1. Complete the following course requirements.
  - a. An undergraduate methods course with an honors compact or a graduate-level methods course (must have already taken an undergraduate methods course to choose this option).
  - b. An upper-level undergraduate course or graduate-level course relevant to thesis project.

## 2. Complete the capstone project.

- a. Project will take the form of a senior thesis, i.e., an article-length (25 pages, double-spaced) investigation of a significant research question.
- b. Project must be overseen by a faculty member in the Political Science Department through Directed Independent Study (DIS) classes. Students should enroll in a minimum of 3 DIS credits and a maximum of 9 DIS credits.
- c. Students must present their project at a department workshop, the University's undergraduate research symposium or a major political science conference, such as the annual meeting of the Florida Political Science Association.
- d. Students must submit their project for review and approval by the Honors Program Committee. The thesis should be submitted at least one month prior to the desired graduation date.
- e. If a student does not maintain the necessary standards, credits earned during the Honors Program may be applied for credit in the major.

## MINORS

### POLITICAL COMMUNICATION UNDERGRADUATE MINOR

*(Minimum of 12 credits required)*

The undergraduate minor in Political Communication gives students in any major the opportunity to bring together courses from Communication and Multimedia Studies and Political Science into a multidisciplinary curriculum. Students are offered scholarly study of political networks as well as hands-on courses in political advocacy and campaigning.

This minor is open to all degree-seeking students and will be awarded upon completion of a bachelor's degree. A student who already holds a baccalaureate degree may pursue the minor in conjunction with a second bachelor's degree. All courses taken in the program may be counted toward other general and specific graduation requirements, and courses taken to fulfill other requirements may be applied to this minor.

Requirements for the minor include completion of four courses (12 credits) with a minimum grade of "C" and a 2.5 GPA. Students are required to choose two courses from the Communication and Multimedia Studies list and two courses from the Political Science list. At least 75 percent of all credits for the minor must be earned from FAU. In addition to the regular curriculum, other courses with

significant attention to political communication may be approved by the program director.

## POLITICAL SCIENCE UNDERGRADUATE MINOR

*(Minimum of 15 credits required)*

A minor in Political Science requires a minimum of 15 credits (12 of which must be taken at FAU) in political science courses, including:

1. The following two courses:

Government of the U.S.*	POS 2041	3
Exploring Political Science	POS 3330	3

\* POS 2041 fulfills the State of Florida's Civic Literacy Requirement.

2. One of the following four courses:

Comparative Politics	CPO 3003	3
Introduction to World Politics	INR 2002	3
RI: Research Methods in Political Science	POS 3703	3
Global Political Theory	POT 2000	3

Two upper-division Political Science courses (6 credits) with a minimum grade of "C."

## MASTER'S PROGRAMS

### POLITICAL SCIENCE MASTER OF ARTS (M.A.)

*(Minimum of 30 credits required)*

The Department of Political Science offers the Master of Arts degree, which requires 30 graduate credits. Students may choose from a non-thesis or thesis option to meet the requirements of the degree. The non-thesis option is designed for students who wish to specialize in an area of study by completing two seminars instead of a thesis. Those who prefer the thesis option may do so with the permission of the Director of Graduate Studies. The thesis option is designed to prepare graduates for doctoral or professional programs. All students are admitted as non-thesis students. After the completion of at least 9 but not more than 15 graduate credits, a student may apply for admission to the thesis option. The application is submitted to the graduate director. If the Graduate Committee grants thesis-option status, the student must work with the graduate director to create a thesis committee.

---

### Core - 9 credits

Research Design in Political Science*	POS 6736	3
Seminar in American National Government	POS 6045	3
Seminar in Comparative Political Processes	CPO 6007	3

---

### Non-Thesis Option - 21 credits\*\*

*Seminars - 21 credits*

Select seven courses at the 6000 level from the Department of Political Science

---

### Thesis Option - 21 credits\*\*

*Seminars - 15 credits*

Select five courses at the 6000 level from the Department of Political Science

*Thesis - 6 credits*

Master's Thesis	POS 6971	6
-----------------	----------	---

\* POS 6736 must be completed the first semester of enrollment or the first semester the course is offered after admission to the graduate program.

\*\* With the approval of the graduate director, a student may take a maximum of 6 credits outside the Department of Political Science.

## **DATA SCIENCE AND ANALYTICS MASTER OF SCIENCE (M.S.)**

**Data Science via Scientific Inquiry Concentration**

**Data Science and Engineering Concentration**

**Data Science in Business Concentration**

**Data Science in Society Concentration**

The [Master of Science with Major in Data Science and Analytics](#) (MSDSA) is a multi-college interdisciplinary program jointly administered by the Department of Mathematics and Statistics in the Charles E. Schmidt College of Science, the Department of Electrical Engineering and Computer Science in the College of Engineering and Computer Science, the Department of Information Technology and Operations Management (ITOM) in the College of Business and the Department of Political Science in the Dorothy F. Schmidt College of Arts and Letters. The program aims to prepare students with essential skill sets needed to analyze small, fast, big, massive and complex data. To allow for maximum flexibility in career aspirations, students may select from four concentrations:

- Data Science via Scientific Inquiry Concentration, Department of Mathematics and Statistics.
- Data Science and Engineering Concentration, Department of Electrical Engineering and Computer Science.
- Data Science in Business Concentration, Department of Information Technology and Operations Management.
- Data Science in Society Concentration, Department of Political Science.

For more information about the Master of Science with Major in Data Science and Analytics degree program, see the [Interdisciplinary Program](#) section of this catalog.

## **SCHOOL OF PUBLIC ADMINISTRATION**

**Faculty:**

Sapat, A., Director; Ben-Zadok, E.; Bourassa, S.; Farazmand, A.; Leip, L.; Liu, G.; McCue, C.; Miller, H.; Nyhan, R.; Patterson, P.; Prysmakova, P.; Sementelli, A.

The School of Public Administration offers a Bachelor of Public Management degree program, a Bachelor of Public Safety Administration and minors in Disaster Management, Nonprofit Management and Public Management.

For graduate students, the School offers a Doctor of Philosophy degree in Public Administration, a Master of Nonprofit Management and a Master of Public Administration.

[Link to Bachelor of Public Safety Administration](#)

[Link to Minors](#)

[Link to Combined Programs](#)

[Link to Master's Programs](#)

[Link to Nonprofit Executive Leadership Certificate](#)

[Link to Public Ethics and Leadership Certificate](#)

[Link to Public Policy Certificate](#)

[Link to Doctoral Program](#)

## **PUBLIC MANAGEMENT**

### **BACHELOR OF PUBLIC MANAGEMENT (B.P.M.)**

*(Minimum of 120 credits required)*

The Bachelor of Public Management (B.P.M.) degree is designed to provide a broad understanding of the administrative structures and functions found in public sector organizations. In addition to equipping students with foundation skills relevant to work in public sector organizations, the B.P.M. encourages study in related areas such as architecture, business, criminal justice, political science, psychology, social work, sociology and urban and regional planning. In this way, students have an

opportunity to adapt their programs of study to fit their own academic and career interests.

### Admission Requirements

For admission to this program, students must meet the general admission requirements of the University as described in the [Admissions section](#) of this catalog. In addition, the following courses or their equivalents must have been completed at the lower-division level:

Government of the U.S.	POS 1041	3
Macroeconomic Principles	ECO 2013	3
Information Systems Fundamentals	ISM 2000	3
Introductory Statistics	STA 2023	3

Students admitted without having completed the above prerequisites must complete them early in their junior years with a "C-" or better.

### Prerequisite Coursework for Transfer Students

Students transferring to Florida Atlantic University must complete both lower-division requirements (including the requirements of the General Education Program) and requirements for the college and major. Lower-division requirements may be completed through the A.A. degree from any Florida public college, university or state college or through equivalent coursework at another regionally accredited institution.

Before transferring and to ensure timely progress toward the baccalaureate degree, students must also complete the prerequisite courses for their major as outlined in the [Transition Guides](#). All prerequisite courses must be completed by the School's designated date or within the first year after transferring to FAU and before reaching senior status (90 total credits).

All courses not approved by the Florida Statewide Course Numbering System that will be used to satisfy requirements will be evaluated individually on the basis of content and will require a catalog course description and a copy of the syllabus for assessment.

### Degree Requirements

To earn the B.P.M. degree, students must complete all of the requirements of the University described

in the [Degree Requirements section](#) of this catalog.

### Transfer Credit

Transfer of 3000-4000-level PAD coursework is not allowed unless by exception. Exceptions are to be made via the petition process at the time of admission, and requested transfer credits are limited to 9 credits in which the student earned a minimum grade of "C." Under no circumstances will students be able transfer courses to replace Public Management and Administration (PAD 3003). Credits older than seven years may not be transferred to the graduate program.

A minimum grade of "C" is required for core courses and the 12 credits of public administration electives as outlined below:

---

#### Required Core Courses - 21 credits

---

Public Management and Administration	PAD 3003	3
--------------------------------------	----------	---

---

Organizational Behavior and Administrative Communication	PAD 3104	3
--	----------	---

---

Public Budgeting and Finance	PAD 4223	3
------------------------------	----------	---

---

Managing People in the Public Sector	PAD 4414	3
--------------------------------------	----------	---

---

Administrative Process and Ethics	PAD 4604	3
-----------------------------------	----------	---

---

Quantitative Inquiry for Public Managers	PAD 4702*	3
--	-----------	---

---

Research Methods for Public Management	PAD 4704	3
--	----------	---

\* Requires STA 2023 as prerequisites.

---

#### Public Administration Electives - 12 credits

*(Select four courses from those listed below.)*

---

Communication Skills for Public Managers	PAD 3438	3
--	----------	---

Information Technology in Public Administration	PAD 3712	3
Introduction to Nonprofit Sector	PAD 4144	3
Funding for Nonprofit Organizations	PAD 4202	3

\* With approval of instructor and Director of the School.

### **Approved Electives, Upper-Division (21 credits)**

Electives are selected and approved in consultation with the student's academic advisor in the Dorothy F. Schmidt College of Arts and Letters. Credits from this area may be used to satisfy deficiencies in

General Education requirements within limits imposed by College or University policies.

## **Free Electives (6 credits)**

## **PUBLIC SAFETY ADMINISTRATION**

### **BACHELOR OF PUBLIC SAFETY ADMINISTRATION (B.P.S.A.)**

#### **Disaster Management Concentration**

#### **Law Enforcement and Corrections Concentration**

*(Minimum of 120 credits required)*

The Bachelor of Public Safety Administration (B.P.S.A.) is an undergraduate degree program for South Florida professionals and preprofessionals interested in police and disaster response practice and administration. Its overall purpose is to provide: 1) a professional/preprofessional degree program for students entering the fields of law enforcement, homeland security and disaster response; 2) interested students a foundation for continuing in a professionally focused graduate program and 3) an “umbrella degree” that allows students to combine key areas from several disciplines to graduate with a preprofessional degree. Students graduating from the program will have improved opportunities in the police, homeland security (airports, seaports, etc.) and disaster management fields throughout South Florida and the United States.

#### **Admission Requirements**

For admission to this program, students must meet the general admission requirements of the University as described in the [Admissions section](#) of the catalog.

#### **Prerequisite Coursework for Transfer Students**

Students transferring to Florida Atlantic University must complete both lower-division requirements (including the requirements of the General Education Program) and requirements for the college and major. Lower-division requirements may be completed through the A.A. degree from any Florida public college, university or state college or through equivalent coursework at another regionally accredited institution.

All courses not approved by the Florida Statewide Course Numbering System that will be used to satisfy requirements will be evaluated individually on the basis of content and will require a catalog course description and a copy of the syllabus for assessment.

## Degree Requirements

The Bachelor of Public Safety Administration requires 60 credits, including 18 credits in core requirements, 12 credits in one of two concentrations and 30 credits in electives as follows:

---

### Required Core Courses - 18 credits

*(The six courses below must be completed with a "C" or better.)*

---

Introduction to Public Safety Administration	PAD 3820	3
--	----------	---

---

Public Safety Systems	PAD 3893	3
-----------------------	----------	---

---

Organizational Behavior and Administrative Communication	PAD 3104	3
--	----------	---

---

Administrative Process and Ethics	PAD 4604	3
-----------------------------------	----------	---

---

Diversity and Social Vulnerability in Public Safety Administration	PAD 4894	3
--	----------	---

---

Capstone in Public Safety Administration	PAD 4892*	3
--	-----------	---

\* Prerequisites for Capstone: Enrollment is restricted to B.P.S.A. majors who are in the final two semesters of their degree program and who have taken four of the following five courses: PAD 3104, PAD 3820, PAD 3893, PAD 4604 and PAD 4894.

---

### Concentrations - 12 credits

*(Students select one of the two concentrations below.)*

---

#### ***Law Enforcement and Corrections Concentration***

*(Select four courses from the list below. The courses must be completed with a "C" or better.)*

---

Corrections	CJC 4310	3
-------------	----------	---

---

Crime in the School	CCJ 3660	3
Organized Crime and the Business of Drugs	CCJ 4642	3
White Collar Crime	CCJ 4644	3
Policing in America	CJE 4352	3
Crime Analysis	CJE 4663	3
Criminal Justice Management	CCJ 4450	3
Fundamentals of Criminal Investigation	CJE 4610	3
Juvenile Justice Administration	CJJ 4010	3
Criminal Justice Field Experience 1	CCJ 4940	3
Terrorism	DSC 4012	3
Crime Prevention	CJE 4444	3
Studying Violence	CCJ 4623	3
Stand Your Ground	PAD 4814	3
<b><i>Disaster Management Concentration</i></b>		
<i>(Select four courses from the list below. The courses must be completed with a "C" or better.)</i>		
Planning for Hazards/Disasters	URP 4430	3
Introduction to Volunteer Management	PAD 4148	3

Multiagency Incident Command	FES 3803	3
Introduction to Visual Planning Technology	URP 4254	3
Government Internship	PAD 4941	3
Disaster and Emergency Management	PAD 4393	3
Sustainable Cities	URP 4403	3

### Free Electives - 30 credits

The remaining 30 required credits (or 10 courses) are free electives available for students to customize their educational experience. Students are strongly encouraged to select electives that will enhance their General Education coursework and that will support their intended baccalaureate degree program. Of the 30 elective credits, at least 15 credits must be upper-division courses (3000 or higher). The choice of free electives is a personal decision. However, the College of Arts and Letters encourages consultation with the student's academic advisor to ensure the process runs smoothly. Credits from this area may be used to satisfy deficiencies in General Education requirements within limits imposed by College or University policies.

For more information about the B.P.S.A. program, including program admission, scheduling and other general questions, visit its [website](#).

## MINORS

### DISASTER MANAGEMENT UNDERGRADUATE MINOR

*(Minimum of 12 credits required)*

The Disaster Management minor, available to students from all undergraduate majors at FAU, expands knowledge and skills about the concepts, issues and technologies involved in preparing for and managing the aftermath of a major disaster. Educational outcomes for the minor will integrate material from the unique perspectives of the departments involved into skills such as communication, use of

resources, visual planning technologies, cultural competence and preparedness as professionals and as individual, family and community members.

Students must complete 12 credits from the courses listed below. Of the 12 credits, at least 9 credits must be earned at FAU. All courses must be completed with a minimum grade of "C" or better.

---

### Required Courses (12 credits from below)

Introduction to Volunteer Management	PAD 4148	3
Planning for Hazards/Disasters	URP 4430	3
Introduction to Public Safety Administration	PAD 3820	3
Emergency and Disaster Management	PAD 4393	3
Multiagency Incident Command	FES 3803	3
Social Work and Emergency Relief	SOW 4679	3

## NONPROFIT MANAGEMENT UNDERGRADUATE MINOR

*(Minimum of 15 credits required)*

A minor in Nonprofit Management consists of 15 credits of upper-division coursework. Of the 15 credits, at least 12 must be earned from FAU. The minor is designed for nonprofit professionals and others who wish to take these undergraduate courses to enhance their skills. *A minimum grade of "C" is required for each course. Grades of "C-" and below are not acceptable.*

---

### Minor Requirements

Introduction to Nonprofit Sector	PAD 4144	3
----------------------------------	----------	---

Funding for Nonprofit Organizations	PAD 4202	3
Financial Management of Nonprofit Organizations	PAD 4203	3
Managing for Excellence in the Public and Nonprofit Sectors	PAD 4332 or	3
Special Topics (Legislative Advocacy)	SOW 4930	
Nonprofit Internship	PAD 4942	3

The internship (PAD 4942) is waived for students with demonstrated experience in the nonprofit sector or for students enrolled in SOW 4510.

## **PUBLIC MANAGEMENT UNDERGRADUATE MINOR**

*(Minimum of 15 credits required)*

A minor in Public Management consists of 15 credits of upper-division coursework. Of the 15 credits, at least 12 must be earned from FAU. The minor provides the student with a base of knowledge about management issues in government, the application of management principles, administrative and regulatory procedures, due process and administrative ethics. Additionally, the minor exposes the student to specific areas of public management, including public personnel, budgeting and finance and organizational behavior. A minimum grade of "C" is required for each PAD-prefixed course. Grades of "C-" and below cannot be applied to the minor.

### **Minor Requirements**

*Complete the following 12 credits:*

Public Management and Administration	PAD 3003	3
Organizational Behavior and Administrative	PAD 3104	3

## Communication

Public Budgeting and Finance	PAD 4223	3
Managing People in the Public Sector	PAD 4414	3
<i>Complete 3 credits from the following:</i>		
Public Budgeting Techniques and Processes	PAD 4228	3
Program Evaluation in Public Management	PAD 4320	3
Managing for Excellence in the Public and Nonprofit Sectors	PAD 4332	3
Public Sector Labor Relations	PAD 4426	3
Administrative Process and Ethics	PAD 4604	3
State and Local Government Administration	PAD 4806	3
Special Topics	PAD 4931	3

## COMBINED PROGRAMS

**PUBLIC MANAGEMENT TO NONPROFIT MANAGEMENT****BACHELOR OF PUBLIC MANAGEMENT (B.P.M.) TO MASTER OF NONPROFIT MANAGEMENT (M.N.M.)  
COMBINED PROGRAM***(Minimum of 153 credits required)*

The B.P.M./M.N.M. combined degree program enables outstanding students to graduate with both a

Bachelor of Public Management and a Master of Nonprofit Management in as little as five years. The program is 153 credits. Students complete 120 credits for the undergraduate degree and 33 credits for the graduate degree. Students complete the undergraduate degree first, taking no more than 12 credits of graduate coursework during their senior year, which are then used to satisfy requirements for both degrees. Prospective students must formally apply to this program and meet all admission requirements, including the minimum GPA of 3.25 on a 4.0 scale.

---

### Required Core Courses - 21 credits

Public Management and Administration	PAD 3003	3
--------------------------------------	----------	---

Organizational Behavior and Administrative Communication	PAD 3104	3
--	----------	---

---

### Approved Electives - Upper Division, 21 credits

---

#### Free Electives - 6 credits

---

#### Public Administration Electives - Choose up to 12 credits from the M.N.M. Program

---

#### Senior Year (Fall)

PAD 6142, Introduction to Nonprofit Management

---

**Senior Year (Spring)**

Options for 3 or 6 credits include:  
PAD 6166, Human Resource Management for Nonprofits;  
PAD 6206, Fundraising for Nonprofit Organizations;  
PAD 6233, Grant Writing and Project Management;  
PAD 6260, Financial Management for Nonprofit Managers; or  
other 5000- or 6000-level electives

---

**Summer**

Options for 3 or 6 credits include:  
PAD 6143, Public Policy and Nonprofit Organizations;  
PAD 6165, Legal and Ethical Issues in Nonprofit Organizations; or  
other 5000- or 6000-level electives

---

**M.N.M. (Fall)**

Choose up to 9 credits from Core or Elective courses

---

**M.N.M. (Spring)**

Choose up to 6 credits from Core or Elective courses;  
PAD 6943, Internship - Nonprofit Organizations

**PUBLIC MANAGEMENT TO PUBLIC ADMINISTRATION**  
**BACHELOR OF PUBLIC MANAGEMENT (B.P.M.) TO MASTER OF PUBLIC**  
**ADMINISTRATION (M.P.A.)**  
**COMBINED PROGRAM**

*(Minimum of 156 credits required)*

The B.P.M./M.P.A. combined degree program enables outstanding students to graduate with both a Bachelor of Public Management and a Master of Public Administration in as little as five years. The program is 156 credits. Students complete 120 credits for the undergraduate degree and 36 credits for the graduate degree. Students complete the undergraduate degree first, taking no more than 12 credits of graduate coursework during their senior year, which are then used to satisfy requirements for both degrees. Prospective students must formally apply to this program and meet all admission requirements, including the minimum GPA of 3.25 on a 4.0 scale.

---

**Required Core Courses - 21 credits**

**BACHELOR OF PUBLIC SAFETY ADMINISTRATION (B.P.S.A.) TO MASTER OF**  
**NONPROFIT MANAGEMENT (M.N.M.)**

## COMBINED PROGRAM

*(Minimum of 153 credits required)*

The B.P.S.A./M.N.M. combined degree program enables outstanding students to graduate with both a Bachelor of Public Safety Administration and a Master of Nonprofit Management in as little as five years. The program is 153 credits. Students complete 120 credits for the undergraduate degree and 33 credits for the graduate degree. Students complete the undergraduate degree first, taking no more than 12 credits of graduate coursework during their senior year, which are then used to satisfy requirements for both degrees. Prospective students must formally apply to this program and meet all admission requirements, including the minimum GPA of 3.25 on a 4.0 scale.

## PUBLIC SAFETY ADMINISTRATION TO PUBLIC ADMINISTRATION BACHELOR OF PUBLIC SAFETY ADMINISTRATION (B.P.S.A.) TO MASTER OF PUBLIC ADMINISTRATION (M.P.A.) COMBINED PROGRAM

*(Minimum of 156 credits required)*

The B.P.S.A./M.P.A. combined degree program enables outstanding students to graduate with both a Bachelor of Public Safety Administration and a Master of Public Administration in as little as five years. The program is 156 credits. Students complete 120 credits for the undergraduate degree and 36 credits for the graduate degree. Students complete the undergraduate degree first, taking no more than 12 credits of graduate coursework during their senior year, which are then used to satisfy requirements for both degrees. Prospective students must formally apply to this program and meet all admission requirements, including the minimum GPA of 3.25 on a 4.0 scale.

---

### Free Electives\* - 30 credits. Choose up to 12 credits from the M.P.A. Program

\* **Note.** STA 2023 is a prerequisite for admission to the M.P.A. program, so this course must be taken either as part of a student's B.P.S.A. elective courses or prior to full admission into the M.P.A. program.

## MASTER'S PROGRAMS

The School of Public Administration offers two master's degree programs: Master of Nonprofit Management (M.N.M.) and Master of Public Administration (M.P.A.). Three graduate certificates are also available: [Nonprofit Executive Leadership](#), [Public Ethics and Leadership](#), and [Public Policy](#).

[Link to Master of Public Administration](#)

[Link to Doctoral Program](#)

## **NONPROFIT MANAGEMENT**

### **MASTER OF NONPROFIT MANAGEMENT (M.N.M.)**

*(Minimum of 33 credits required)*

#### **Degree Goals**

The Master of Nonprofit Management (M.N.M.) degree program was designed as a professional degree to meet the unique needs of the nonprofit sector. It is open to preservice students as well as managers and leaders in human services, fine and performing arts, and cultural, educational, community development, religious, environmental and other nonprofit organizations. The curriculum recognizes the special concerns of nonprofit organizations in such areas as: management of volunteers and professionals; resource development and fundraising; governance by volunteer boards of trustees and directors; management of multiple sources and types of funding; unique legal and regulatory issues; special values of service, community and charity; and the unique demands of nonprofit leadership.

#### **Admission Requirements**

Applicants to the M.N.M. program must have a bachelor's degree from a regionally accredited institution and an overall grade point average (GPA) of 3.0 or higher in their undergraduate program. Applicants must utilize the online application system and follow all directions to submit:

1. A current professional résumé.
2. A 750- to 1000-word essay about their personal background, career aspirations in the nonprofit sector and the reason(s) for pursuing graduate study in nonprofit management. The essay, written by the applicant, should demonstrate graduate-level writing competency.
3. Two letters of recommendation, one of which should be from a professor at the college/university the student attended. The recommenders must address the applicant's ability to succeed at graduate-level academic coursework in nonprofit management. (Personal recommendations are not accepted.)
4. It is recommended that applicants who do not meet the 3.0 GPA requirement submit Graduate

Record Examination (GRE) scores that are no more than five years old directly to the FAU Graduate College. Unofficial records are not acceptable.

5. Applicants whose native language is not English must complete the Test of English as a Foreign Language (TOEFL) and earn a score of at least 550. Official scores must be sent directly to the FAU Graduate College.

Admission is competitive. Applicants meeting the minimum University and/or program application requirements are not guaranteed admission to the program. All requested materials must be submitted by the established deadline date (February 15 for summer admission, May 15 for fall admission and October 15 for spring admission). Materials received after the established deadline will not be considered.

### **Duplication and Recency of Credits**

No credit counted as part of another degree may be counted toward the M.N.M. All work toward the M.N.M. must be completed within seven years after initial registration in the program.

### **Transfer Credit**

Acceptance of transfer credits from approved institutions depends on the relevance of the work to the M.N.M. program. Request for transfer credits should be made at the time of admission and is limited to 6 credits in which the student earned a minimum grade of "B." Students may use the petition process to transfer more than 6 credits. Credits older than seven years may not be transferred to the graduate program.

### **Non-Degree Credit**

A maximum of 12 credits earned in non-degree status will be accepted toward the M.N.M. degree requirements, provided the grades earned are "B" or better.

### **Admission Requirements for International Students**

A graduate of a college or university outside of the United States who has completed an academic program equivalent to an American bachelor's degree may apply for admission to the M.N.M. program. All international applicants whose transcripts are from non-U.S. institutions must have their credentials evaluated course by course, including the GPA, by a professional evaluation service. A service may be found at [www.NACES.org](http://www.NACES.org).

An international applicant for whom English is a second language is required to submit a score of 550 or higher (IBT of 61 or higher) on the Test of English as a Foreign Language (TOEFL) before enrolling for courses. Applicants must write to Test of English as a Foreign Language, Educational Testing Service, Princeton, New Jersey, U.S.A., 08540, or visit [www.ets.org/toefl](http://www.ets.org/toefl) for assistance.

## Academic Standing

Continuation in the M.N.M. program requires satisfactory progress toward degree completion. Evidence of such progress includes maintenance of a "B" average each semester. No grade below "C" (including "C-") will be counted toward the degree. Students who fall below a "B" average will be placed on academic probation and will require an academic progression plan. Failure to regain an overall cumulative "B" average within two successive semesters following the one in which the deficiency first occurred will result in dismissal.

## Degree Requirements

The faculty of the College will recommend awarding the Master of Nonprofit Management degree when the following requirements have been met:

1. Completion of 33 credits of approved coursework with no grade below "C," (including "C-") with a minimum average grade of "B" (3.0 on a 4.0 scale).
2. Completion of the core courses below (24 credits). The required internship (PAD 6943) may be waived and replaced by an elective for students who have nonprofit work experience.\*
3. Completion of three elective courses (9 credits).

**PUBLIC ADMINISTRATION****MASTER OF PUBLIC ADMINISTRATION (M.P.A.)***(Minimum of 36 credits required)*

The Master of Public Administration (M.P.A.) program is fully accredited by the Network of Schools of Public Policy, Affairs and Administration (NASPAA). The mission of the M.P.A. program is to prepare pre-service and in-service students in southeast Florida to be leaders, managers and analysts for all levels of government by providing intellectual, analytical, technical and practical education via a curriculum that students can customize to meet their professional goals. We value the diversity of our students, faculty, staff, alumni and community, and we foster inclusiveness, participation and cultural competence in our M.P.A. courses and other educational activities. We strive to create inclusive environments in which M.P.A. students are respected and supported, while they improve their professional and ethical competence and become accountable public leaders, managers and analysts. We advance the state of knowledge in public administration through research activities and collaborations with internal and external partners who examine and address local, regional, state, national and international matters of public concern. We enhance ethical public service by encouraging ethical deliberation and decision making in our M.P.A. courses and through other educational activities.

**Admission Requirements**

Applicants to the Master of Public Administration program must have a bachelor's degree from an accredited institution with an overall grade point average (GPA) of 3.0 on a 4.0 scale. It is recommended that applicants who do not meet the 3.0 GPA requirement submit Graduate Record Examination (GRE) scores that are no more than five years old.

International applicants for whom English is a second language must score 550 (IBT 79-80) or higher on the Test of English as a Foreign Language (TOEFL). A graduate of a college or university outside of the United States who has completed an academic program equivalent to an American bachelor's degree may apply for admission to the M.P.A. program. All international applicants whose transcripts are from non-U.S. institutions must have their credentials evaluated course by course, including the GPA, by a professional evaluation service. A service may be found at [www.NACES.org](http://www.NACES.org).

Applicants must have successfully completed ("C" or better) an undergraduate statistics course before applying for the M.P.A. program.

Applicants must have three letters of recommendation submitted on their behalf and each recommendation must be submitted via the M.P.A. online application system. Letters from professors from the colleges/universities attended are preferred; where that is not feasible, letters from current or past work supervisors are accepted. The recommender must address the applicant's ability to succeed at graduate-level academic work in public administration. (Personal recommendations are not accepted.)

Applicants must submit an essay about their personal background, career aspirations in public service (including future career goals), and the reason(s) for pursuing graduate study in public administration. The essay should demonstrate graduate-level writing competency and should be written by the applicant. It should be at least three pages in length.

Admission is competitive. Applicants meeting the minimum university and/or program application requirements are not guaranteed admission to the program. All requested material must be submitted by the established deadline date (February 1 for summer admission, May 1 for fall admission and October 1 for spring admission). Materials received after the established deadline will not be considered; therefore, make sure that all application materials are in order before applying to the M.P.A. program.

### **Duplication, Transfer and Recency of Credits**

No credit counted as part of another degree may be counted toward the M.P.A. All work toward the M.P.A. must be completed within 10 years after initial registration in the program. Students with graduate-level credits from another institution must obtain a copy of the course syllabus and submit a petition to request the transfer of credits to FAU. Requests for transferring credits should be made at the time of admission and is limited to 6 credits, in which the student earned a minimum grade of "B." Decisions regarding credit transfers are made by the M.P.A. coordinator.

### **Academic Standing**

Continuation in the M.P.A. program requires maintenance of a "B" average each semester. Students who fall below the "B" average will be placed on academic probation with an academic progression plan. Failure to regain an overall cumulative GPA of 3.0 within two successive semesters following the one in which the deficiency first occurred will result in dismissal.

### **Degree Requirements**

All M.P.A. degree students must complete 36 credits of approved coursework earning no grade below "C" ("C-" is not acceptable) with a minimum GPA of 3.0. This work must include the following 27-credit core and 9 additional credits of approved study as detailed below the table.

---

#### **Core Courses - 27 credits**

Public Administration and Public Policy	PAD 6036	3
Introduction to Public Service and Administration	PAD 6053*	3
Public Leadership	PAD 6063	3
Organization and Administrative Behavior	PAD 6106	3
Public Service Capstone	PAD 6139**	3

#### **Other Requirements - 3 credits**

Government Internship	PAD 6941	3
-----------------------	----------	---

---

## Electives - 6 or 9 credits

---

Select 6 credits (9 credits if PAD 6941 is waived) of electives in consultation with advisor.

---

<b>Total</b>	<b>36</b>
--------------	-----------

\* This course must be taken within the first 12 credits of the student's program.

\*\* The capstone course must be taken in the last semester of the student's program.

\*\*\* Undergraduate statistics is a prerequisite for Statistical Analysis for Effective Decision Making.

The remaining 9 credits are electives. Students are advised to take their core classes before taking electives. As part of the 9 credits, students who do not have any public sector experience must complete a one-semester, 20-hour-per-week internship in a government or nonprofit organization, while registered for the accompanying Government Internship course, PAD 6941.

In order to be waived from PAD 6941, students must submit their résumé in which their public sector work experience is specified. The M.P.A. program coordinator will review these documents and determine whether or not the student has sufficient public sector experience.

## DOCTORAL PROGRAM

### **PUBLIC ADMINISTRATION** **DOCTOR OF PHILOSOPHY (PH.D.)**

*(Minimum of 63 credits required)*

The School of Public Administration at Florida Atlantic University offers a Doctor of Philosophy (Ph.D.) in Public Administration with paths of study in Administrative Theory and Inquiry, Public Policy Studies, Organizational Studies, Public Budgeting and Financial Administration, and Urban and Regional Planning. Also, students are allowed to assemble paths of study of their own devising. This doctoral program, while primarily designed to qualify students in research, university teaching and consultation, can accommodate a broad array of career goals and options.

### **Admission Requirements**

Admission into the Ph.D. program will be granted to students of superior ability who have demonstrated a record of previous academic success, good potential for continued success in doctoral studies and a desire to prepare for a career in which scholarship and research are major elements.

---

### Core Courses - 24 credits

---

Scope and Theory of Public Administration	PAD 7050	3
---	----------	---

---

Seminar in Organization Theory	PAD 7107	3
--------------------------------	----------	---

---

Norms of Inquiry in Public Administration and Public Policy	PAD 7138	3
---	----------	---

---

Public Expenditure Analysis	PAD 7240	3
-----------------------------	----------	---

---

Advanced Quantitative Analysis	PAD 7703	3
--------------------------------	----------	---

---

Advanced Research Seminar in Public Affairs	PAD 7707	3
---	----------	---

---

Advanced Public Policy	PAD 7932	3
------------------------	----------	---

---

Qualitative Methods in Public Affairs Research	PAF 7820	3
--	----------	---

---

### Electives - 21 credits

---

Organizational Behavior and Development	PAD 7155	3
---	----------	---

---

Advanced Public Budgeting and Fiscal Management Techniques	PAD 7229	3
--	----------	---

---

Quantitative Methods in Public Affairs Research	PAF 7800	3
---	----------	---

---

Students may also select 6000- or 7000-level courses from these course prefixes:	12
--	----

CCJ, CJC, CJE, CJJ, HSA, PAD, PAF, URP

**Dissertation - 18 credits**

Dissertation ( <i>taken over multiple semesters</i> )	PAD 7980	1-15
---	----------	------

<b>Total</b>		<b>63</b>
--------------	--	-----------

**Other (may be used to substitute an elective)**

Advanced Research and Study	PAD 7910	3-9
-----------------------------	----------	-----

Normally an applicant must have earned a master's degree and must also take the following courses if they have not already taken the equivalents elsewhere:

Introduction to Public Service and Administration	PAD 6053	3
---	----------	---

Public Administration and Public Policy	PAD 6036	3
---	----------	---

Organization and Administrative Behavior	PAD 6106	3
--	----------	---

Seminar in Public Financial Administration	PAD 6207	3 <b>or</b>
--	----------	-------------

Public Budgeting and Finance	PAD 6227	3
------------------------------	----------	---

In special situations, students with a bachelor's degree may be admitted into the doctoral program. In such cases, the applicant must complete the above four courses plus quantitative methods at the graduate level.

Applicants should have a minimum graduate grade point average (GPA) of 3.5 or higher and provide both percentile and numeric scores for the verbal, quantitative and analytical writing sections of the Graduate Record Examination (GRE). Official GRE scores must be submitted and an online application must be completed. Official transcripts and GRE scores should be sent directly to the FAU Graduate College.

In addition to transcripts and GRE scores, the Ph.D. Admissions Committee will need:

1. Three letters of recommendation (especially from academic sources);
2. Résumé;
3. Two samples of academic writing;
4. Statement of intent and interests.

These materials should be uploaded online with the electronic application. An incomplete application will not be reviewed. Meeting minimal requirements does not guarantee admissions.

### **Admission Requirements for International Students**

A graduate of a college or university outside of the United States who has completed academic programs equivalent to an American bachelor's degree and master's degree may apply for admission to the Ph.D. program. The application deadline for international students interested in the fall semester is February 15; for international students interested in the spring semester, the deadline is August 15. All international applicants whose transcripts are from non-U.S. institutions must have their credentials evaluated course by course, including the GPA, by a professional evaluation service. A service may be found at [www.NACES.org](http://www.NACES.org).

An international applicant for whom English is a second language is required to submit a minimum score of 580 (IBT of 92-93) on the Test of English as a Foreign Language (TOEFL) before enrolling for courses. Applicants must write to Test of English as a Foreign Language, Educational Testing Service, Princeton, New Jersey, U.S.A., 08540, or visit [www.ets.org/toefl](http://www.ets.org/toefl) for assistance.

### **Program Information**

1. Competitive stipends and tuition benefits are provided to qualified students with graduate assistantships upon admission.
2. Application deadlines are February 15th for the fall semester and August 15th for the spring semester.
3. Excellent placement record in faculty, research and executive positions upon graduation.
4. The program includes 45 instructional credits and 18 dissertation research credits.
5. Candidates must pass comprehensive exams in four of the five paths of study, including a mandatory exam in Epistemology and Methodology.
6. Candidates are expected to participate in professional practica and colloquia, attend dissertation defenses and conferences and participate in collegial activities.

### **Helpful links:**

## [Graduate School Application](#)

## [Course Descriptions](#)

## [Ph.D. Manual](#)

## [Policy on Appeal of Dismissal](#)

### **Transfer Credits**

Acceptance of transfer credits from approved institutions is dependent upon the pertinence of the work to the Ph.D. program. Transfer of credits must occur at the time of admission and is limited to 6 credits subject to the following restrictions:

1. Grades on all transfer credits must be a minimum of "B" (3.0 in a 4.0 grading system).
2. No graduate credit will be allowed for correspondence, extension work or life experience.

### **Credit Duplication**

No credit used for another degree or as a prerequisite may be counted toward the 63 credits in the Ph.D. program.

### **Time Limitations**

Candidates for the Ph.D. degree must complete all work within a seven-consecutive-year period after initial registration in the graduate program.

### **Dismissal**

Please refer to the Provost's memo on the [Academic Dismissal of Students from a Graduate Degree Program](#) for current dismissal policies and procedures.

### **Academic Standing**

Continuation in the graduate program requires satisfactory progress toward the graduate degree. Evidence of such progress includes maintenance of a 3.25 cumulative average throughout the course of academic study. In addition, only grades of "A," "A-," "B+" and "B" are acceptable in fulfilling graduate school requirements in the Ph.D. plan of study.

Students who do not maintain the required 3.25 cumulative GPA will be placed on academic probation in the semester immediately following the semester in which the cumulative GPA drops below 3.25.

Failure to regain a 3.25 cumulative average within two successive semesters following the semester in which the deficiency first occurred can result in dismissal. The faculty of the School of Public Administration reserves the right to dismiss any student at any time when in its judgment the student is not making satisfactory progress toward completion of the degree. The School of Public

Administration [Ph.D. Manual](#) describes this and other Ph.D. program policies in full.

## Financial Assistance

A number of assistantships and fee waivers are available for full-time students. Contact the Ph.D. coordinator for information on financial assistance as well as admissions, degree requirements and financial aid.

## SOCIAL SCIENCE

([Social Science](#) is listed under **Interdisciplinary Studies**.)

## SOCIOLOGY

### Faculty:

Branaman, A., Chair; Auguste, D.; Araghi, F.; Backstrom, L.; Harvey, M.; Hough, P.; Koppelman, C.; Lewin, P.; McConnell, W.; Ortiz, S.; Seeley, J. L.; Widener, P.

FAU's Sociology major is distinctive as a [flexible "skills based" major](#). The major lets students choose a plan of study that suits their career interests, focuses on topics that intrigue and challenge them, and helps them to build their own "sociological tool chest" for addressing personal and social problems. Every course includes coverage of core skills and basic knowledge of the discipline in addition to material that is distinctive to the topics. Because of how the major is designed, students who major in Sociology will have many opportunities to develop the skills necessary to ask and answer questions about social behavior, social structure and change, and social trends as well as to read skillfully, write and speak clearly and conduct effective presentations.

Sociology is growing in popularity as a major in the U.S. and across the world. This 21st century major gives students a firm foundation for a broad range of careers and, as importantly, for shaping a life in the face of the challenges and chaos of the current era. Sociology gives students the insights, knowledge and analytic tools to create an individual path and to contribute to shaping the direction of social and political change.

[Link to Master's Program](#)

## SOCIOLOGY

## BACHELOR OF ARTS (B.A.)

*(Minimum of 120 credits required)*

The program in Sociology leads to a B.A. degree. To earn a B.A. degree in Sociology, students must complete the following coursework with a minimum grade of "C" (33 total credits in the major):\*

1. SYG 1000 (Sociological Perspectives) or SYD 3792 (Race, Class, Gender and Sexuality), 3 credits;
2. SYA (Sociological Theory), 3 credits;
3. SYA (Sociological Analysis: Survey of Methods), 3 credits;
4. Six 3000-level electives in Sociology, 18 credits;\*\*
5. Two 4000-level electives in Sociology, 6 credits;
6. A minimum of 120 credits, 60 of which must be from a senior institution.

\* While the total number of credits for the major is 33 (including SYG 1000), the major will be granted with only 30 credits in Sociology if students opt to take SYD 3792 as a substitute for SYG 1000.

\*\* Students may substitute 4000-level courses for 3000-level courses.

Sociology majors are strongly encouraged to take more than 33 credits in Sociology and/or to pursue a second major, minor or certificate program in another field. As long as all University and College requirements are met, the Sociology major allows students to reach their required number of credits in any way they choose. Students often combine the study of Sociology with other liberal arts or professional fields to acquire double majors. The Sociology department also offers [Honors in the major](#), a distinction for high-performing students.

Students entering FAU as freshmen must meet the University's General Education/four-year degree program requirements as listed in the [Degree Requirements](#) section of this catalog and the College's requirements as set forth under [Undergraduate Programs](#) in the Dorothy F. Schmidt College of Arts and Letters.

FAU has a foreign language requirement that all students pursuing majors within the Dorothy F. Schmidt College of Arts and Letters must fulfill for the B.A. degree. Students have met this requirement if they have passed or received credit for two semesters of one foreign language at one of Florida's state colleges or at another college or university. Students who have not completed two semesters of foreign language at a college or university must use 8 of their out-of-discipline credits to meet FAU's foreign language requirement, or pass the CLEP exam prior to graduation. For additional

information, refer to the [foreign language requirement policy](#).

### Prerequisite Coursework for Transfer Students

Students transferring to Florida Atlantic University must complete both lower-division requirements (including the requirements of the General Education Program) and requirements for the College and major. Lower-division requirements may be completed through the A.A. degree from any Florida public college, university or community college or through equivalent coursework at another regionally accredited institution. Before transferring and to ensure timely progress toward the baccalaureate degree, students must also complete the prerequisite courses for their major as outlined in the [Transition Guides](#).

All courses not approved by the Florida Statewide Course Numbering System that will be used to satisfy requirements will be evaluated individually on the basis of content and will require a catalog course description and a copy of the syllabus for assessment.

### Degree Requirements

The following course sequence will lead to a Bachelor of Arts Degree with a Major in Sociology.

Sociology of Culture	SYP 4610	3
Sociology of Popular Culture	SYP 3630	3

\*The prerequisite for entrance into 4000-level courses in Sociology is the completion of SYA 3010 and SYA 3300.

## HONORS PROGRAM IN SOCIOLOGY

The mission of the Sociology Honors Program is to provide a highly performing group of sociology majors the opportunity to enhance their academic writing abilities and acquire research skills under the guidance of sociology faculty. Through writing and research intensive coursework and participation in an original research project, Sociology Honors students will have firsthand experience with all aspects

of the research process including working collaboratively with fellow students and faculty, writing and revising a journal article length piece and presenting findings in a professional setting.

### **Entry Requirements**

Students apply after completing a minimum of 12 credit hours in sociology. After grades are processed, applications are reviewed. Qualified students are invited for an informational interview with the Honors Program Director and a representative from the Research Team faculty.

### **Application Requirements**

1. Minimum overall GPA of 3.5 and a GPA of 3.7 or above in sociology courses (minimum of 12 credits completed);
2. No more than 10% of sociology majors are admitted to the Honors program.

### **Program Standards**

1. Students must maintain a cumulative 3.5 GPA throughout the program to progress.
2. If less than a B is earned in any sociology course or the student's cumulative GPA falls below 3.5, the student will be dismissed from the Honors in Sociology program.
3. Students admitted to the Honors Program must maintain high academic and ethical standards.

### **Honors Level Enrichment**

Students must complete at least three of the following 3-credit courses:

1. A graduate-level methods course (Research Methods, Qualitative Methods, or Quantitative Methods) or an undergraduate methods course with an Honors compact;
2. A graduate-level substantive course;
3. A Research-Intensive 4000-level sociology course; or
4. A 3-credit Directed Independent Study (DIS) or Directed Independent Research (DIR) with a faculty member.

### **Capstone Experience (students must complete one of the following)**

*Thesis Requirement:*

1. A senior-level thesis must be produced by honors students;
2. Length of senior thesis must be at least 30 double-spaced pages;
3. The capstone experience is overseen by two qualified research faculty members; and, Students present their thesis at a department workshop.

*Research Team:*

1. Honors students work on a research team directed by two or more qualified research faculty members;
2. The research team collectively gathers data, writes a literature review and analyzes results; and
3. Students will present their findings at a department workshop.

## **Graduation Eligibility**

1. Students maintain an overall GPA of 3.5 or higher;
2. Students maintain a GPA of 3.7 or higher in sociology courses;
3. Students have completed three of the following: a graduate-level methods courses (Research Methods, Qualitative Methods, or Quantitative Methods) or an undergraduate methods course with an Honors compact, a graduate-level substantive course, a Research-Intensive 4000-level sociology course, a 3-credit Directed Independent Study (DIS) or Directed Independent Research (DIR) with a faculty member; and
4. Students have completed the capstone project.

Benefits to students include gaining research skills required for graduate school and careers; improving writing skills; increasing interaction with faculty members in the sociology department, and completing the undergraduate degree with honors distinction. Students with honors distinction receive honors cords at commencement.

## **SOCIOLOGY UNDERGRADUATE MINOR**

*(Minimum of 12 credits required)*

Students seeking a minor in Sociology are required to take a minimum of four courses (12 credits) of upper-division (3000- and 4000-level) courses in sociology. Of the 12 credits, at least 9 must be earned from FAU. Students are required to earn a grade of "C" or better in each sociology course for it to count toward the minor.

## **MASTER'S PROGRAM**

### **SOCIOLOGY MASTER OF ARTS (M.A.)**

*(Minimum of 36 credits required)*

The Master of Arts degree in Sociology is designed to prepare students for doctoral study in sociology and related programs. The program also can prepare students for professional careers and teaching. There are two paths of study in the program, the generalist option and the specialist option. The generalist option offers students a broad graduate education in sociology that can serve as the basis for a wide array of professional careers in the public and private sector. The specialist option is designed for students who would pursue a doctoral degree in Sociology. This option offers students the opportunity to design and carry out a research project in a particular area of sociological research under the direct mentorship of a faculty member. Students may apply to be admitted to the specialist option after completing 9 credits in the program.

### **Admission Requirements**

1. Students must complete a bachelor's degree, preferably with a major in Sociology. Students without an undergraduate Sociology major may be admitted under the condition that they take additional coursework in sociology.
2. Students must have a minimum 3.0 grade point average for the last 60 credits of undergraduate work leading to the bachelor's degree.
3. Students must submit directly to the Department of Sociology a Statement of Purpose (500 to 1000 words in length, outlining their goals and interests in subject areas within sociology) and a sample of their writing (e.g., a paper from an undergraduate course).
4. Sociology majors at FAU should submit the names of two sociology faculty members as their referees. All other students must obtain two letters of recommendation and have them sent by the recommenders directly to the Department of Sociology.
5. Applicants who apply after March 1 may be admitted to the graduate program but may be too late to be considered for an assistantship award.

### **Options in the M.A. Program in Sociology**

The Department of Sociology offers two paths of study for the M.A. in Sociology, both of which require 36 credits of graduate coursework. Students in either the Generalist or Specialist option may select up to 6 credits of graduate coursework at the 5000, 6000 or 7000 level outside the Department of Sociology with permission from their academic advisor.

---

#### **Generalist Option**

---

*Theory - 3 credits - Select one of the following courses*

---

Seminar: Critical Perspectives in Social Theory	SYA 6117	3
---	----------	---

Seminar in Contemporary Social Theory	SYA 6126	3
---------------------------------------	----------	---

Special Topics	SYD 6934	1-3
----------------	----------	-----

*Methods - 3 credits - Select one of the following courses*

Seminar in Advanced Research Methods	SYA 6305	3
--------------------------------------	----------	---

Seminar in Advanced Qualitative Methods	SYA 6315	3
---	----------	---

Special Topics	SYD 6934	1-3
----------------	----------	-----

*Electives - 30 credits - Students may select ten courses at the 6000 level from the Department of Sociology. Additional theory and methods courses beyond the minimum required will count as electives.*

<b>Total</b>		<b>36</b>
--------------	--	-----------

### Specialist Option

*Theory - 3 credits - Select one of the following courses*

Seminar: Critical Perspectives in Social Theory	SYA 6117	3
---	----------	---

Seminar in Contemporary Social Theory	SYA 6126	3
---------------------------------------	----------	---

Special Topics	SYD 6934	1-3
----------------	----------	-----

*Methods - 3 credits - Select one of the following courses*

Seminar in Advanced Research Methods	SYA 6305	3
--------------------------------------	----------	---

Seminar in Advanced Qualitative Methods	SYA 6315	3
Special Topics	SYD 6934	1-3
<i>Thesis - 6 credits (minimum; 12 credits maximum)</i>		
Master's Thesis (may be completed over multiple terms)	SYA 6971	1-6
<i>Electives - 24 credits (may be fewer depending on number of thesis credits - Students may select any eight courses at the 6000 level from the Department of Sociology. Additional theory and methods courses beyond the minimum required will count as electives.</i>		
<b>Total</b>		<b>36</b>

## THEATRE AND DANCE

([Theatre and Dance](#) programs are listed following **Women, Gender and Sexuality Studies**, under **School of the Arts, Theatre and Dance**.)

## WOMEN, GENDER AND SEXUALITY STUDIES

### Faculty:

Morse, N., Director; Beoku-Betts, J.; Caputi, J.

The faculty represents a variety of departments in several colleges at the University. A list of [current faculty](#) may be obtained from the Center for Women, Gender and Sexuality Studies.

[Link to Master's Program](#)

## WOMEN, GENDER AND SEXUALITY STUDIES UNDERGRADUATE MINOR

*(Minimum of 15 credits required)*

The undergraduate minor in Women, Gender and Sexuality Studies (WGSS) is open to all undergraduate degree-seeking students in good standing. The WGSS minor is an interdisciplinary approach to gender-related issues. Students receive credit for specific courses in a variety of fields, including anthropology, criminal justice, communication, English, history, languages and linguistics, literature, nursing, political science, sociology and, of course, women's studies. The underlying goal of the WGSS minor is to understand the broad range of experiences that reflect, class, race, ethnicity, disability, sexual orientation and age and the interconnections that shape these experiences. The WGSS minor prepares students to think critically about the political, social, economic and historical forces that shape women's and men's lives, along with the responses through activism and advocacy.

1. The minor requires of five courses for 15 credits: One required course (more may be taken);
2. Four core courses focusing on issues related to WGSS from a selected list or by special approval from the director.

Other than the required course, the list of acceptable courses for the minor varies each semester according to the University's schedule of courses. Check with the [Center for Women, Gender and Sexuality Studies](#) for the semester's offerings.

Students must earn a minimum grade of "C" in all courses. Courses for the minor may count toward other general and specific graduation requirements. However, **no more than two courses from a student's major department may be included in the minor program coursework.**

For more information, contact the [Center for Women, Gender and Sexuality Studies](#).

---

### Required Course (choose 1)

Introduction to Women's Studies	WST 2010	3 or
Introduction to Sexuality and Gender	WST 2608	3 or
Introduction to Lesbian, Gay, Bisexual, Transgender and Queer Studies	WST 2643	3

---

### Core Courses (choose 4)

Students need to complete a minimum of four core courses. While the list of applicable courses may vary each semester and students may request approval for other courses toward the minor, the following are examples of core courses:

History of U.S. Women	AMH 3560	3
Florida Women Writers	AML 3264	3
Gender and Culture	ANT 4302	3
Anthropology of Sex and Gender	ANT 4413	3
Culture, Gender and Health	ANT 4469	3
Women and Criminal Justice	CCJ 4670	3
Communication, Gender and Language	COM 3014	3
Media and Sexual Identities	COM 4094	3
Women in European History	EUH 3619	3
History of European Sexuality	EUH 4684	3
Women and Film	FIL 4056	3
Love and Lovers in Italian Literature	ITT 3111	3
Women and Judaism	JST 4510	3
Women and Literature	LIT 4383	3

LGBTQ+ Literature	LIT 4523	3
Caring for Self	NUR 4175	3
Women, Witches and Healing	NUR 4176	3
Feminist Philosophy	PHM 3123	3
Women and Politics	PUP 3323	3
Gender and Television	RTV 4412	3
Psychology of Women	SOP 3742	3
Issues in Counseling Women	SOW 4357	3

Special Topics	WST 4930	1-3

## **WOMEN, GENDER AND SEXUALITY STUDIES MASTER OF ARTS (M.A.)**

*(Minimum of 30-36 credits required, depending on track)*

The Master of Arts degree in Women, Gender and Sexuality Studies (WGSS) offers students the opportunity to gain cross-disciplinary, advanced knowledge of the impact of gender in diverse areas of life. The degree helps prepare students to enter a variety of professions for which a sophisticated knowledge of gender issues is considered a desirable employment qualification.

Students who receive the Master of Arts in Women, Gender and Sexuality Studies are prepared for doctoral work in Women's Studies and related programs, such as the Florida Atlantic University doctorate in Comparative Studies.

### **Admission Requirements**

1. The student must have a baccalaureate degree from an accredited institution, preferably with a concentration (major, minor or certificate) in Women's Studies. Applicants without appropriate work in Women's Studies may be admitted on the condition that additional coursework in

Women's Studies is completed in addition to the requirements for the M.A. degree.

2. Applicants must have a minimum 3.0 GPA for the last 60 undergraduate credits attempted and competitive Graduate Record Exam (GRE) scores. Applications are accepted for the fall and spring terms only.
3. In addition to the University application, students must complete the application specific to Women, Gender and Sexuality Studies. This application includes the following requirements:
  - a. An essay addressing the student's interest in Women, Gender and Sexuality Studies graduate work, talent or experience that will contribute to this academic program and educational and professional goals;
  - b. Three letters of recommendation using the form that accompanies the application (at least two letters from professors);
  - c. A writing sample of 12-20 pages of researched writing representing the student's best academic work and critical thinking;
  - d. If interested, the application for a graduate assistantship.

### **Admission Requirements for Candidacy**

1. A student seeking the M.A. in Women, Gender and Sexuality Studies must file an application for candidacy with the director of the program after completion of 18 credits of graduate coursework.
2. Along with the candidacy application, a student in the thesis or internship option should submit a thesis or internship proposal.
3. The student should have an advisory committee of three faculty. A maximum of two faculty associates may be on the committee. The advisory committee will serve as the thesis committee.

### **Degree Options and Requirements**

**Requirements:** Students must receive a grade of "B" or better in all courses.

As the M.A. in Women, Gender and Sexuality Studies is an interdisciplinary degree, accepted courses for the M.A. will be posted prior to registration. All 6000-level courses with a WST prefix are acceptable, along with many other courses from other departments. Please check with the program office before registering to learn if a course has been approved. Refer to the [Center for Women, Gender and Sexuality Studies website](#).

**Options:** Four options are available for students interested in this M.A. program.

## SCHOOL OF THE ARTS

The School of the Arts unites Florida Atlantic University's Departments of Music, Theatre and Dance, and Visual Arts and Art History, and the University Galleries. It offers an enhanced disciplinary education to undergraduate and graduate students and provides a variety of collaborative events enriching the South Florida community with FAU's artistic offerings. Building on the existing departments and their faculty, the School of the Arts reinforces the Dorothy F. Schmidt College of Arts and Letters' commitment to the arts.

## MUSIC

### **Faculty:**

Wilt, K., Chair; Zager, M., Eminent Scholar; Baltrucki, M.; Chapman, D.; Cunningham, J.; Decker, M.; Dorchin, S.; Fleitas, P.; Hutchings, M.; Joella, L.; Jones, C.; Kofman, I.; Lautar, R.; Nichols, M.; Prescott, K.; Rossow, D.; Rossow, S.; Sánchez-Samper, A.

The mission of the Florida Atlantic University Department of Music is to inspire achievement in music through student engagement in scholarship, diverse modes of creative activity and community outreach.

Florida Atlantic University is an accredited institutional member of NASM (National Association of

Schools of Music). The Department of Music offers the following degrees: Bachelor of Music (B.M.) Commercial Music or Performance concentration; a Bachelor of Arts (B.A. in Music); a Bachelor of Music Education (B.M.E.); an Honors Program in Music and a minor in Commercial Music.

Three [combined degree programs](#) leading to the Master of Nonprofit Management (M.N.M.) offer pathways toward employment in nonprofit performing arts organizations: Bachelor of Arts with the M.N.M., Bachelor of Music in Commercial Music: Music Business Concentration with the M.N.M. and Bachelor of Music in Performance with the M.N.M.

At the graduate level, the department offers a [Master of Music degree](#), including concentrations in Choral Conducting, Commercial Music, Composition, Instrumental Performance, Piano Performance, Vocal Performance and Wind Conducting.

The Department of Music provides extensive performance and teacher education experiences through its comprehensive classroom curriculum in music theory, history and literature; culturally diverse perspectives provided by courses in American popular music, jazz and world music; applied studio instruction in piano, brass, woodwind, percussion, string and vocal areas; and collaborative performance experience in a wide variety of large and small ensemble settings. Furthermore, the department's Commercial Music Program offers practical music industry training through its Creative, Music Technology and Music Business concentrations. The program's affiliated Hoot/Wisdom Records L.L.C. label affords students hands-on experience in its state-of-the-art studios.

Scholarships are awarded annually by the Department of Music. These performance/academic awards vary in amounts and carry their own requirements, which must be satisfactorily completed prior to graduation. Audition details are available through the Department of Music office.

### **Performance Audition and Advising**

All students seeking admission to the department as Music majors must complete a performance audition prior to the first semester of study. Due to the complex nature of the music program, prospective students must contact the Department of Music at 561-297-3820 to arrange for academic advising prior to class registration.

### **Selective Program**

For reasons of accreditation standards, space or fiscal limitations, the undergraduate programs in music are designated selective admissions programs. Admission to FAU does not guarantee admission to a selective program. For specific information on these programs, applicants should review the

Department of Music requirements above and below.

[Link to Combined Programs](#)

[Link to Master's Program](#)

### Music Ensembles

FAU music ensembles are open to all FAU students by audition and are not limited to Music majors. Contact the department for audition information.

Brazilian Percussion Ensemble	MUN 2820	1
Commercial Music Ensemble	MUN 4015	1
University Marching Band	MUN 4113	1-3

Vocalis	MUN 4323	1
Chamber Singers	MUN 4343	1
University Wind Ensemble	MUN 4423	1
Jazz Orchestra	MUN 4713	1
Chamber Jazz	MUN 4174	1
Instrumental Chamber Music	MUN 4463	1

Chamber Winds	MUN 4144	1
Concert Percussion Ensemble	MUN 4443	1

### **Bachelor's Degree General Requirements**

Candidates for a bachelor's degree in Music must complete all University and College requirements for the specific degree. Each Music major will be assigned to an area advisor who will meet with the student every semester to determine the student's curriculum. In addition to departmental course requirements, all Music majors must complete the following to graduate:

***Piano Proficiency:*** All students must complete the department piano proficiency required in their degree by enrolling in class piano and earning a letter grade of "C" or higher. Transfer students must take a placement exam to demonstrate proficiency if they have not already completed the required level of class piano with a grade of "C" or higher at their previous institution. Students who study piano as their applied major instrument are exempt from class piano, except for Commercial Music Composition students, who must enroll in MVK 3173, Commercial Class Piano. Piano majors will be advised of suitable substitutions regarding the credit requirements in degree programs where they are exempt from class piano.

Music majors must complete the piano proficiency according to their degree requirement deadlines as follows:

Commercial Music: Prior to enrollment in MUS 4911, RI: Commercial Music Topic Research.

Music Education: Prior to enrollment in ESE 3940, Secondary School Effective Instruction.

Music: Performance concentration: Prior to MVO 3330, Junior Performance Recital pre-hearing.

***Mid-Degree Evaluation:*** Students will be assessed in performance, music theory and sight singing at the end of the sophomore year (or four semesters of study). Students who do not receive a satisfactory score on the evaluation will not be permitted to register for upper-division courses.

***Concert Attendance:*** Music majors must enroll in MUS 1011, Concert Attendance, every semester in residence until a satisfactory grade has been received for a total of six semesters. Transfer students must consult the Music Department to determine minimum requirements.

***Ensemble Performance:*** All Music majors are required to perform in the assigned ensemble every semester in residence according to the degree requirements. Commercial Music majors are required to

complete one semester of Commercial Music Ensemble.

***Applied Music Instruction:*** Music majors are required to study the same applied instrument during their tenure at FAU. Students presenting junior or senior recitals are required to register for applied music for the semester during which the recital is presented. All applied music lessons require permission of instructor.

***Jury Examinations*** in applied music are given at the end of the semester. Successful completion of the jury is required to receive a grade in applied music.

***Recital Performance:*** All candidates for the Music major: Performance concentration and major in Music Education perform a senior recital. Students in the Music major: Performance concentration also perform a junior recital.

***All music courses and their prerequisite courses must be completed with a grade of "C" or higher.***

These and other departmental policies are explained in detail in the Music Student Handbook, which is updated annually and available in the Department of Music.

Bachelor of Music Education and Bachelor of Music students are not required to complete the University's Foreign Language Graduation Requirement.

### **Prerequisite Coursework for Transfer Students**

Students transferring to Florida Atlantic University must complete both lower-division requirements (including the requirements of the General Education Program) and requirements for the College and major. Lower-division requirements may be completed through the A.A. degree from any Florida public college, university or community college or through equivalent coursework at another regionally accredited institution. Before transferring and to ensure timely progress toward the baccalaureate degree, students must also complete the prerequisite courses for their major as outlined in the [Transition Guides](#) .

Please note that transfer students who have not completed A.A. degrees in music will be required to complete all lower-division music requirements, which may add time to the degree.

All courses not approved by the Florida Statewide Course Numbering System that will be used to satisfy requirements will be evaluated individually on the basis of content and will require a catalog course description and a copy of the syllabus for assessment.

## Requirements for All Undergraduate Music Majors

All Music majors must complete the following core courses and the requirements of the following specific degrees.

## MUSIC

### BACHELOR OF ARTS (B.A.)

*(Minimum of 120 credits required)*

The Bachelor of Arts in Music is a degree that balances a general study of music with elective coursework in the liberal arts and humanities, providing a well-rounded liberal-arts-based educational experience for students wishing to pursue a variety of academic interests.

Students must complete the Dorothy F. Schmidt College of Arts and Letters B.A. language requirement. Students in the B.A. with major in Music are not eligible to enroll in the Commercial Music minor or to double major in degree programs from the College of Education.

Upper Division Music Electives		3
Six semesters of 1-credit applied music instruction	MV	6
Eight semesters of assigned ensembles <i>(4 credits at the upper division)</i>	MUN	8
Class Piano 1	MVK 1111	1
Class Piano 2	MVK 1112	1
Class Piano 3	MVK 2121	1

37 credits of electives, with at least 9 required in the Dorothy F. Schmidt College of Arts and Letters; 23 of the elective credits must be upper division.

## MUSIC EDUCATION

### BACHELOR OF MUSIC EDUCATION (B.M.E.)

*(Minimum of 134 credits required)*

The purpose of the Music Education program at Florida Atlantic University is to provide every student learner within the degree program the best possible instruction. Students follow a plan of instruction based on current music research, societal trends, and the modern American educational landscape. The goal of the degree is to prepare music teachers to enter the workplace prepared to teach learners of different cultures, ages and ability levels. FAU Music Education majors will be able to structure and manage a positive musical environment that encourages these varied populations to experience, achieve, and thus, come to value music-making as a life-time endeavor. Degree completion includes professional certification to teach music in Florida public schools, levels kindergarten through 12th grade.

Students will be assigned by area advisors to either vocal or instrumental programs of study. This program leads to teacher certification in music in conjunction with the Department of [Curriculum and Instruction](#) in the College of Education.

## COMMERCIAL MUSIC BACHELOR OF MUSIC (B.M.)

**Commercial Music Composition Concentration**

**Music Business Concentration**

**Music Technology Concentration**

*(Minimum of 121 or 122 credits required)*

The Commercial Music program offers a comprehensive undergraduate curriculum to help students develop specific skills for a professional career in the music industry. Hoot/Wisdom Records L.L.C. is

Florida Atlantic University's official record label. Administered by the Commercial Music program, the label provides students with practical experience in the production, marketing, and distribution of sound recordings.

Three concentrations comprise the Commercial Music degree program. The Commercial Music Composition and Music Technology concentrations share a common core with separate concentration requirements while the Music Business concentration presents a focus in the business aspects of the music industry.

### **Commercial Music Composition Concentration**

### **Music Technology Concentration**

*(Commercial Music Composition Concentration: Minimum of 122 credits required)*

*(Music Technology Concentration: Minimum of 121 credits required)*

The concentration in Commercial Music Composition provides majors with skills and experience in composing, arranging, producing and recording music for a variety of applications, including film, television and digital media. The concentration in Music Technology provides majors with skills and experience in audio recording, live sound reinforcement and music production.

Additional electives, which may include approved music coursework, are required to reach the program's 120 credits.

## HONORS PROGRAM IN MUSIC

The program for Honors in Music is designed to recognize outstanding academic and/or performance achievement of exceptionally talented and motivated students. The requirements for Honors in Music exceed the normal requirements for a baccalaureate degree, not simply in the quantity of work, but also in the nature and quality of it. Academic honors will be extended to those students who demonstrate a level of critical activity and thorough scholarship in those courses that are taken for honors credit. Performance honors will be given to those students who substantially exceed normal performance standards for an undergraduate recital in both quality of repertoire and interpretation, and in the length and difficulty of the literature presented in public performance. Additional details are available through the Department of Music.

## COMMERCIAL MUSIC UNDERGRADUATE MINOR

*(Minimum of 15 credits required)*

The minor in Commercial Music is open to all FAU students. Students must contact the Commercial Music Department to apply to the minor. All credits toward the minor must be earned at FAU, and all courses must be completed with a "C" or better.

---

### **Minor in Commercial Music (15 credits)**

---

Classes may have prerequisites, corequisites and/or audition requirements. Applicants must be approved by the Commercial Music program director.

## COMBINED PROGRAMS

### **MUSIC TO NONPROFIT MANAGEMENT**

### **BACHELOR OF ARTS (B.A.) TO MASTER OF NONPROFIT MANAGEMENT (M.N.M.)**

### **COMBINED PROGRAM**

*(Minimum of 153 credits required)*

The Dorothy F. Schmidt College of Arts and Letters offers a combined B.A. in Music to an M.N.M. degree program. The B.A. in Music is completed in the Department of Music. Students complete the M.N.M. in the School of Public Administration.

Students may count up to 9 credits of approved graduate coursework (5000 level or higher) toward both their bachelor's and master's degrees as long as the combined program totals a minimum of 153 credits and:

1. The student has met the minimum 120 credits for the bachelor's degree;
2. The student has taken a minimum of 33 credits in 5000 level or higher courses for the master's program.

Students complete the undergraduate program first. The combined program can be completed in approximately five years.

### **Admission Requirements**

The GRE requirement is waived for the combined program. To be eligible for the combined program, baccalaureate students in the Department of Music should:

1. Have a cumulative FAU GPA of 3.25 or better at the end of the junior year.
2. Formally apply to the combined program, completing the admissions process at least one semester prior to the beginning of the M.N.M. portion of their program.

Students in the combined program must maintain continuous enrollment to remain in good standing. Students must also meet all the degree requirements of the graduate program they have chosen, including prerequisite courses.

## BACHELOR OF ARTS

### Degree Requirements

To be eligible for the combined B.A. in Music to M.N.M. degree program, students must fulfill the following requirements:

1. Completion of the requirements for the B.A. in Music and other requirements stipulated by the University and College.
2. Completion of all requirements for the M.N.M.

### Requirements for All Undergraduate Music Majors

All Music majors must complete the following core courses and the requirements of the following specific degree.

---

#### Core Course Requirements

Music Theory 1	MUT 1111	3
Sight Singing and Ear Training 1	MUT 1241	1
Music Theory 2	MUT 1112	3
Sight Singing and Ear Training 2	MUT 1242	1
Music Theory 3	MUT 2116	3

Sight Singing and Ear Training 3	MUT 2246	1
Music Theory 4	MUT 2117	3
Music Theory: Orchestration <i>(not required for B.A. students)</i>	MUT 4311	2
Sight Singing and Ear Training 4	MUT 2247	1
Musicology 1	MUH 4211	3
Musicology 2	MUH 4212	3
Musicology 3	MUH 4213	2
Ethnomusicology	MUH 3514	3
Concert Attendance <i>(six semesters)</i>	MUS 1011	0

The Bachelor of Arts with Major in Music is a degree that balances a general study of music with elective coursework in the liberal arts and humanities, providing a well-rounded liberal-arts-based educational experience for students wishing to pursue a variety of academic interests.

Students must complete the Dorothy F. Schmidt College of Arts and Letters B.A. language requirement. Students in the B.A. with major in Music are not eligible to enroll in the Commercial Music minor or to double major in degree programs from the College of Education.

Upper Division Music Electives		3
Six semesters of 1-credit applied music instruction	MV	6
Eight semesters of assigned ensembles <i>(4 credits at the upper division)</i>	MUN	8

Class Piano 1	MVK 1111	1
Class Piano 2	MVK 1112	1
Class Piano 3	MVK 2121	1

37 credits of electives, with at least 9 required in the Dorothy F. Schmidt College of Arts and Letters; 23 of the elective credits must be upper division. Up to 9 credits of elective may be taken at the 5000 level or above as part of the combined B.A./M.N.M. program.

## MASTER OF NONPROFIT MANAGEMENT

### Degree Goals

The Master of Nonprofit Management (M.N.M.) degree program was designed as a professional degree to meet the unique needs of the nonprofit sector. It is open to preservice students as well as managers and leaders in human services, fine and performing arts, and cultural, educational, community development, religious, environmental and other nonprofit organizations. The curriculum recognizes the special concerns of nonprofit organizations in such areas as: management of volunteers and professionals; resource development and fundraising; governance by volunteer boards of trustees and directors; management of multiple sources and types of funding; unique legal and regulatory issues; special values of service, community and charity; and the unique demands of nonprofit leadership.

### Duplication and Recency of Credits

Except for students enrolled in the combined B.A./M.N.M. or the B.M./M.N.M. degree programs, no credit counted as part of another degree may be counted toward the M.N.M. All work toward the M.N.M. must be completed within seven years after initial registration in the program.

### Transfer Credit

Acceptance of transfer credits from approved institutions depends on the relevance of the work to the M.N.M. program. Request for transfer credits should be made at the time of admission and is limited to 6 credits in which the student earned a minimum grade of "B." Students may use the petition process to transfer more than 6 credits. Credits older than seven years may not be transferred to the graduate program.

## Degree Requirements

The faculty of the College will recommend awarding the Master of Nonprofit Management degree when the following requirements have been met:

1. Completion of 33 credits of approved coursework with no grade below "C," (including "C-") with a minimum average grade of "B" (3.0 on a 4.0 scale).
2. Completion of the core courses below (24 credits). The required internship (PAD 6943) may be waived and replaced by an elective for students who have nonprofit work experience.\*
3. Completion of three elective courses (9 credits).

---

### Core Courses - 21 credits

## MASTER OF NONPROFIT MANAGEMENT

Details in previous [section](#).

# MASTER'S PROGRAM

## MUSIC

### MASTER OF MUSIC (M.M.)

#### **Concentrations:**

**Choral Conducting**

**Commercial Music**

**Composition**

**Instrumental Performance**

**Piano Performance**

**Vocal Performance**

**Wind Conducting**

*(Minimum of 36 credits required)*

The Master of Music (M.M.) is designed to assist students in attaining an advanced level of competence and knowledge in choral or wind conducting, commercial music, composition, or instrumental, piano or vocal performance, as specified by their chosen concentration. The department offers performance and teacher training in standard class instruction, applied studio instruction (private lessons), performance ensembles and chamber music coaching. Florida Atlantic University is an accredited institutional member of the National Association of Schools of Music (NASM). The Music Department adheres to nationally accepted standards regarding the faculty's creative and scholarly research, including making music, studying music and its influences, advancing the pedagogy of music and facilitating music activities.

Seven concentrations are available for the Master of Music (M.M.) majors: Choral Conducting, Commercial Music, Composition, Instrumental Performance, Piano Performance, Vocal Performance and Wind Conducting.

February 20 is the priority application deadline for all Master of Music programs. Applications completed after the deadline will be considered for admission and/or funding based on remaining availability.

#### **Admission Requirements**

1. A baccalaureate degree in music with an overall GPA of 3.0 in undergraduate studies.
2. An initial interview with the departmental coordinator to discuss the program.

3. One of the following, depending upon desired degree concentration (audition requirement details available [here](#)):
- Concentrations in Choral Conducting, Instrumental Performance, Piano Performance, Vocal Performance and Wind Conducting: A satisfactory performance audition is required. In addition, Choral or Wind Conducting applicants must perform an audition segment consisting of conducting an appropriate ensemble for an extensive period and submitting conducting videos of live rehearsals and performances.
  - Concentrations in Commercial Music and Composition: Approved portfolio of composed or arranged musical works, as appropriate, with recordings of said works, if possible, is required.

**Note:** Students cannot register for any graduate courses in the Music program until they have successfully completed the entrance audition or provided the requested portfolio or writing sample.

**Note:** Students must take proficiency examinations in Music History and Music Theory. The Music History exam requires students to identify Western historical periods by date, place specific composers in their respective historical periods, identify them with major works and define important historical terms. The Music Theory exam requires harmonic analysis of tonal music, including modulation techniques, non-harmonic tones, borrowed chords and augmented sixth and Neapolitan sixth chords. Students who do not meet the required proficiencies will be required to enroll in review coursework that will not count toward the Master of Music degree.

### Comprehensive Examinations

In addition to the following coursework, the student must successfully complete comprehensive examinations. These are normally administered during the last semester of study.

### Degree Requirements

## THEATRE AND DANCE

### Faculty:

Shorrock, T., Chair; Atkins, T.; Brooks, C.; deChatelet, E.; Gallant, D.; Johnston, K.; Lucatero, R.; McNutt, L.; Shamburger, D.; Soroko, K. A.; Soroko, L.

The Department of Theatre and Dance offers undergraduate programs leading to the Bachelor of Arts and Bachelor of Fine Arts degrees, a [minor in Theatre](#) and a [minor in Dance](#). Graduate programs lead to the Master of Fine Arts degree. Alumni of the department are currently working in professional theatre, television and motion pictures, as well as community and academic theatre.

### Mission

The mission of the Department of Theatre and Dance is to produce innovative artists and scholars through a pursuit of academic and creative excellence.

## Values

The Department of Theatre and Dance values:

1. Engaging in the highest quality of professional training;
2. Providing an experiential approach to the collaborative nature of theatre and dance;
3. Integrating production experience with a scholarly understanding of theatre and dance as artistic forms;
4. Encouraging innovative exploration through classic and contemporary methodologies in theatre and dance;
5. Developing excellence in research and creative expression in the classroom and production process;
6. Encouraging and celebrating diversity in our community;
7. Providing active leadership in the contribution to South Florida culture;
8. Engaging with our various campus and regional communities.

## Prerequisite Coursework for Transfer Students

Students transferring to Florida Atlantic University must complete both lower-division requirements (including the requirements of the General Education Program) and requirements for the College and major. Lower-division requirements may be completed through the A.A. degree from any Florida public college, university or community college or through equivalent coursework at another regionally accredited institution. Before transferring and to ensure timely progress toward the baccalaureate degree, students must also complete the prerequisite courses for their major as outlined in the [Transition Guides](#) .

All courses not approved by the Florida Statewide Course Numbering System that will be used to satisfy requirements will be evaluated individually on the basis of content and will require a catalog course description and a copy of the syllabus for assessment.

## Requirements

All students majoring in Theatre must fulfill the University and College requirements for admission and graduation. All courses in the Department of Theatre and Dance must be passed with a "C" or better; pass/fail grades are not allowed. Theatre majors must maintain a 3.0 average in courses in the major.

[Link to B.F.A. Program](#)

[Link to Master's Program](#)

## **THEATRE**

### **BACHELOR OF ARTS (B.A.)**

#### **Theatre Studies Concentration**

*(Minimum of 120 credits required)*

The Bachelor of Arts with Major in Theatre is designed to train students in the art, craft and literature of theatre while providing the opportunity to develop creative, cognitive and communication skills through a broad liberal arts education. Undergraduate students are taught by faculty members who are active professionals in their fields and also work closely with candidates of the graduate conservatory program. Upon completion of the degree, the successful student is prepared for work at the graduate or professional level.

#### **Theatre Studies Concentration**

The Theatre Studies concentration at Florida Atlantic University is open to all students wishing to better understand theatre and the artistic processes used in production and performance.

#### **Advising**

All students are required to meet with an advisor each semester to ensure timely graduation. Entering students should call the department of Theatre and Dance at 561-297-3810 to arrange an advising appointment prior to the start of your term.

All students are assigned to an advisor who will meet with the student every semester to determine the student's curriculum. In addition to departmental course requirements, all majors must complete the following to graduate:

#### **Degree Requirements**

1. In addition to requirements of the Dorothy F. Schmidt College of Arts and Letters and the University, the student pursuing a Bachelor of Arts in Theatre with concentration in Theatre Studies must take 15 credits in required core courses. The student must also take 21 credits of content courses. The total required credits for the major is 36.
2. Students who change degree programs and select this major must adopt the most current catalog.
3. All courses and their prerequisite courses must be completed with a grade of "C" (2.0) or higher.

Grades below a “C” (2.0) will not satisfy the major requirements or count towards theatre credits. These and other departmental policies are explained in detail in the Student Handbook, which is updated annually and available in the Department of Theatre and Dance.

- Students must consult with departmental advisor every semester before registration.

### Prerequisite Coursework for Transfer Students

Students transferring to Florida Atlantic University must complete both lower-division requirements (including the requirements of the General Education Program) and requirements for the College and major. Lower-division requirements may be completed through the A.A. degree from any Florida public college, university or community college or through equivalent coursework at another regionally accredited institution. Before transferring and to ensure timely progress toward the baccalaureate degree, students must also complete the prerequisite courses for their major as outlined in the *Transition Guides*.

All courses not approved by the Florida Statewide Course Numbering System that will be used to satisfy requirements will be evaluated individually on the basis of content and will require a catalog course description and a copy of the syllabus for assessment.

#### Core Courses (15 credits)

*Choose three of the following courses in content creation (9 credits)*

Script Analysis	THE 2305	3
Visual Imagination	TPA 2000	3
Introduction to Production	TPA 2200	3
Acting 1	TPP 2110	3

## Theatre B.A.: General Education

### Prerequisite Coursework for Transfer Students

Students transferring to Florida Atlantic University must complete both lower-division requirements (including the requirements of the General Education Program) and requirements for the College and major. Lower-division requirements may be completed through the A.A. degree from any Florida public college, university or community college or through equivalent coursework at another regionally accredited institution. Before transferring and to ensure timely progress toward the baccalaureate degree, students must also complete the prerequisite courses for their major as outlined in the [Transition Guides](#).

Note that transfer students who have not completed A.A. degrees in Theatre and Dance will be required to complete all lower-division music requirements, which may add time to the degree.

All courses not approved by the Florida Statewide Course Numbering System that will be used to satisfy requirements will be evaluated individually on the basis of content and will require a catalog course description and a copy of the syllabus for assessment

### Degree Requirements

Students must meet all University and College requirements for graduation.

1. Students who change degree programs and select this major must adopt the most current catalog.
2. All courses and their prerequisite courses must be completed with a grade of "C" (2.0) or higher. Grades below a "C" (2.0) will not satisfy the major requirements or count towards theatre credits. These and other departmental policies are explained in detail in the Student Handbook, which is updated annually and available in the [Department of Theatre and Dance](#).
3. Students must consult with a departmental advisor each semester before registering.
4. All students must complete 2 credits of Production Capstone by their senior year demonstrating a proficiency in an area of theatre prior to graduation. Credits are earned by registering for THE 4954 and applying for a position of responsibility in the department. Visit the [department](#) for the

current production opportunities.

In addition to the University and College requirements for admission and graduation, candidates for a Bachelor of Arts Degree in Theatre—General Education must complete the following courses.

---

## **THEATRE**

### **BACHELOR OF FINE ARTS (B.F.A.)**

#### **Design and Technology Concentration**

#### **Music Theatre Concentration**

#### **Performance Concentration**

*(Minimum of 120 credits required)*

The Bachelor of Fine Arts with Major in Theatre is offered with a Design and Technology concentration, a Music Theatre concentration and a Performance concentration. This degree program provides in-depth training and fundamental knowledge necessary for the pursuit of a career as an actor or director through process-oriented instruction in performance skills. It is designed primarily for those students with an interest in a career in the professional theatre. In order to enter the program, students must audition with the performance faculty.

All B.F.A. students are expected to complete the following requirements.

#### **Bachelor of Fine Arts Core Courses**

##### *Literature, History, Theory and Criticism*

## Design and Technology Concentration

*(Minimum of 120 credits required)*

### Selective Programs

For reasons of accreditation standards, space or fiscal limitations, the B.F.A. programs in Theatre and Dance are designated selective admissions programs. Admission to FAU does not guarantee admission to a selective program. For specific information on these programs, applicants should review the [Department of Theatre and Dance](#) guidelines and review requirements above and below.

### Admission Requirements

All students seeking admission to the B.F.A. programs must complete a performance audition or portfolio presentation prior to the first semester of study. For more information on the audition process and dates, call the Department of Theatre and Dance at 561-297-3810.

Students may audition for entry to the BFA program until they have earned 72 credits toward their degree in theatre.

## Advising

All students are required to meet with an advisor each semester to ensure timely graduation. Entering students should call the Department of Theatre and Dance at 561-297-3810 to arrange an advising appointment prior to the start of their term.

All students are assigned to an advisor who will meet with the student every semester to determine the student's curriculum. In addition to departmental course requirements, all B.F.A. Performance majors must complete the following to graduate.

## Degree Requirements

1. Students must meet all University and College requirements for graduation.
2. Students who change degree programs and select this major must adopt the most current catalog.
3. All courses and their prerequisite courses must be completed with a grade of "C" (2.0) or higher. Grades below a "C" (2.0) will not satisfy the major requirements or count toward theatre credits. These and other departmental policies are explained in detail in the Student Handbook, which is updated annually and available in the [Department of Theatre and Dance](#).
4. Students are expected to participate and successfully pass semester juries. These and other departmental policies are explained in detail in the Student Handbook, which is updated annually and available in the Department of Theatre and Dance.
5. All B.F.A. students in the Design and Technology program are required to participate in academic year productions as assigned. These and other departmental policies are explained in detail in the Student Handbook, which is updated annually and available in the Department of Theatre and Dance.
6. Students must consult with departmental advisor every semester before registration.
7. All students must complete two credits of Production Capstone demonstrating a proficiency in an area of theatre prior to graduation. Credits are earned by registering for THE 4954 and applying for a position of responsibility in the department. See the [department](#) for current production opportunities.
8. Students must complete a senior project (THE 4950) demonstrating design and/or technology skills. This course should be carefully coordinated with the student's area faculty member prior to the senior year.

## Prerequisite Coursework for Transfer Students

Students transferring to Florida Atlantic University must complete both lower-division requirements (including the requirements of the General Education Program) and requirements for the college and major. Lower-division requirements may be completed through the A.A. degree from any Florida

public college, university or community college or through equivalent coursework at another regionally accredited institution. Before transferring and to ensure timely progress toward the baccalaureate degree, students must also complete the prerequisite courses for their major as outlined in the *Transition Guides*.

Note that transfer students who have not completed A.A. degrees in Theatre and Dance will be required to complete all lower-division music requirements, which may add time to the degree.

All courses not approved by the Florida Statewide Course Numbering System that will be used to satisfy requirements will be evaluated individually on the basis of content and will require a catalog course description and a copy of the syllabus for assessment.

## Music Theatre Concentration

*(Minimum of 120 credits required)*

### Selective Programs

For reasons of accreditation standards, space or fiscal limitations, the B.F.A. programs in Theatre and Dance are designated selective admissions programs. Admission to FAU does not guarantee admission to a selective program. For specific information on these programs, applicants should review the [Department of Theatre and Dance](#) guidelines and review requirements above and below.

### Admission Requirements

All students seeking admission to the BFA programs must complete a performance audition or portfolio presentation prior to the first semester of study. For more information on the audition process and dates, visit the [Department of Theatre and Dance](#) or call 561-297-3810.

Students may audition for entry to the BFA program until they have earned 30 credits toward their degree in theatre.

### Advising

All students are required to meet with an advisor each semester to ensure timely graduation. Entering students should call the Department of Theatre and Dance at 561-297-3810 to arrange an advising appointment prior to the start of your term.

All students are assigned to an advisor who will meet with the student every semester to determine the student's curriculum. In addition to departmental course requirements, all BFA Performance majors must complete the following to graduate.

## **Degree Requirements**

1. Students must meet all University and College requirements for graduation.
2. Students who change degree programs and select this major must adopt the most current catalog.
3. All courses and their prerequisite courses must be completed with a grade of "C" (2.0) or higher. Grades below a "C" (2.0) will not satisfy the major requirements or count toward theatre credits. These and other departmental policies are explained in detail in the Student Handbook, which is updated annually and available in the [Department of Theatre and Dance](#).
4. Students must consult with a departmental advisor each semester before registering.
5. All students must complete two credits of Production Capstone demonstrating a proficiency in an area of theatre prior to graduation. Credits are earned by registering for THE 4954 and applying for a position of responsibility in the department. See the [department](#) for current production opportunities. Students must fulfill 2.0 credits' worth of production capstone prior to graduation.
6. Jury reviews are given at the end of the semester. Successful completion of the jury is required to continue enrolling in course sequences.
7. Students are required to follow all audition requirements for their degree program.
8. Students may test out of MUT1111 and MVK 1111 through proficiency exam.
9. Students must enter this program in fall terms for proper course sequencing. A student cannot enter this major after 30 credits to ensure timely graduation.

## **Prerequisite Coursework for Transfer Students**

Students transferring to Florida Atlantic University must complete both lower-division requirements (including the requirements of the General Education Program) and requirements for the college and major. Lower-division requirements may be completed through the A.A. degree from any Florida public college, university or community college or through equivalent coursework at another regionally accredited institution. Before transferring and to ensure timely progress toward the baccalaureate degree, students must also complete the prerequisite courses for their major as outlined in the [Transition Guides](#).

Note that transfer students who have not completed A.A. degrees in Theatre and Dance will be required to complete all lower-division music requirements, which may add time to the degree.

All courses not approved by the Florida Statewide Course Numbering System that will be used to satisfy requirements will be evaluated individually on the basis of content and will require a catalog

course description and a copy of the syllabus for assessment.

## UNDERGRADUATE MINOR

*(Minimum of 17 credits required)*

The Department of Theatre and Dance offers a Theatre minor available to all undergraduate students except Theatre majors. The minor requires a minimum of 17 theatre credits, 9 of which must be in upper-level classes (3000 level and above). At least 75 percent of all credits must be earned from FAU.

### Minor Requirements

1. All courses used to fulfill the Theatre minor must be completed with a grade of "C" (2.0) or better.
2. All minors are required to meet with the departmental advisor each semester prior to registering for classes.

**DANCE****UNDERGRADUATE MINOR***(Minimum of 18 credits required)*

The Department of Theatre and Dance offers a minor in Dance, available to all undergraduate students with an audition demonstrating requisite dance experience. Auditions are scheduled once per semester

and, if passed, allow students to declare the minor and register for classes the following semester. The Dance minor requires a minimum of 18 credits, 9 of which must be upper-division courses. At least 75 percent of all credits must be earned from FAU.

### Minor Requirements

1. All courses used to fulfill the Dance minor must be completed with a grade of "C" or better.
2. All minors are required to meet with the departmental advisor each semester prior to registering for classes.
3. Dance courses must be taken in sequence (for example, DAA 2100, Modern Dance 1, must be completed before DAA 3112, Modern Dance 2).

## MASTER'S PROGRAM

### THEATRE

#### MASTER OF FINE ARTS (M.F.A.)

##### Design and Technology Concentration

##### Performance Concentration

*(Minimum of 60 credits required)*

The Master of Fine Arts degree is a terminal degree requiring a two-year residency on campus, a summer involvement in the professional Summer Festival Repertory Theatre and a one-semester internship.

The M.F.A. program is a professional training program designed to provide the candidate with the skills necessary to contribute to the World Theatre. Through text-centered research and exploration of varied approaches to the art, candidates will be empowered to develop their own comprehensive processes of creative practice. The M.F.A. is offered with concentrations in the following areas:

##### Design and Technology Concentration

This area of concentration will prepare the candidate for pursuit of a career as a professional designer or technologist for the theatre and its related fields. The program stresses artistic expression, excellence in personal work, the understanding and mastery of specialized skills, technology, organization and clear communication skills. Hands-on production work is conducted in the context of a laboratory atmosphere where students are encouraged to take part in the exploration of creative problem-solving and artistic expression. Classroom experience is reinforced by practical application as part of the Theatre and Dance Department's productions. The successful student will begin to develop a personal process of design and technology in the collaborative process of living theatre.

### **Performance Concentration**

This area of concentration prepares the candidate for pursuit of a career as a professional actor in theatre and related fields. The program is designed to help students discover and empower their own processes of creating characters through in-depth exploration and understanding of the dramatic text. In studio, in classes and in productions, the program addresses body, voice, intellect and imagination to help candidates surmount their personal obstacles to clear expression so that they may successfully collaborate in the creation of living theatre.

### **Admission Requirements**

1. Students must have completed a bachelor's degree, preferably with a major in Theatre and with extended coursework in a sub area of concentration such as performance, design or technology.
2. Applicants must pass an audition or portfolio review and interview. For dates and locations, contact the Theatre and Dance Department, 561-297-3810. **Admission to some paths of study may occur in alternating years; contact department for details.**
3. Applicants who do not meet the above criteria may be admitted on a conditional basis under special circumstances to be evaluated at the audition or interview for the program.

### **Admission to Supervised Internship Experience**

The internship provides the candidate with an experience that will enhance understanding of the professional world of the theatre and also provides a platform from which the candidate begins a process of professional networking. A graduate candidate must complete a 9-credit internship, which usually comprises all or part of the third year, before applying for graduation.

Special requirements for enrollment are:

1. Employment at a professional theatre, Lort Theatre or company under the Actors' Equity Association contract; university; or community college as a full-time employee under a contract, working in the student's area of degree specialization.

2. Approval of the student's advisor and department.
3. Coursework completed as required by the department.
4. Completion of an application for internship.

### **Admission Requirements for Degree Candidacy**

A student may be admitted to candidacy for the degree of Master of Fine Arts with Major in Theatre with a concentration in Design and Technology or Performance after having completed the following course and departmental requirements.

## VISUAL ARTS AND ART HISTORY

### Faculty:

McConnell, B. E., Chair; Afandador Llach, C. M.; Baghbani, M. S.; Broderick, A.; Cunningham, S.; DiCosola, M. A.; Fenichel, E.; Graham, J.; Graham, L.; Hart, S. L.; Johnson, L.; Lamb, C.; Landes, E.; Leader, K.; Prusa, C., Emeritus; Russo, K., Emeritus; Sclafani, M.; Velasquez, J.

The Department of Visual Arts and Art History is dedicated to the advancement, practice and theoretical understanding of the visual arts. A central mission of the department is to enable students to understand art in the context of its rich historical heritage, incorporating continuing changes, innovations and accomplishments made by creative artists and art historians.

The department seeks to prepare both undergraduate and graduate students for professional careers in the creation and interpretation of the visual arts. Deeply related to this focus is a commitment to elevate and sustain the study of the arts as both a necessary mode of understanding and a dynamic expression of human experience as it relates to an increasingly complex global society. To accomplish this goal, students must develop technical skills related to a variety of artistic media as well as develop a comprehension of the creative impulse and the spirit that motivates it.

The faculty of the Department of Visual Arts and Art History, through its own significant research and

creative activities, fosters the preservation of artistic legacies with an interest in originality and innovation within artistic and research practice. These educational goals are enhanced by visiting lecturers, workshops, internships, conferences and exhibitions held at two University galleries, the Dorothy F. Schmidt Center Gallery and the Ritter Gallery in Boca Raton, and activities at the other campus locations, including the Metrolab Studio in the Reubin Askew Tower in downtown Fort Lauderdale.

Art students graduating from Florida Atlantic University have established careers as photographers, ceramicists, performance artists, printmakers, painters, sculptors, graphic designers and computer animators. They teach the fine arts and art history in colleges and universities, after advanced studies, as well as in grammar and secondary schools. They are involved in Art in State Building projects and work as museum directors, curators and gallery personnel. They handle digital imaging for corporate clients, and many are involved in advertising and corporate design.

The undergraduate curriculum in Visual Arts and Art History offers programs leading to a Bachelor of Arts with Major in Art and concentration in Art History or concentration in Studio Art. Bachelor of Fine Arts programs are available with Major in Art and concentration in Graphic Design or concentration in Studio Art. Several Art minors are also offered.

Transfer students with A.A. degrees must have taken Art History Survey 1 and 2, Design, Drawing 1, Figure Drawing, Introduction to Digital Art, possibly Three Dimensional Design and some studio experience prior to entering the program. If not, these lower-division requirements may be satisfied at Florida Atlantic University. See more information in the Prerequisite Coursework for Transfer Students paragraph below.

Undergraduate Visual Arts and Art History majors may not take an art course under the pass/fail option, nor will a grade below "C" in an art course be counted toward fulfilling the requirements of the major.

The Master of Fine Arts degree with Major in Studio/Fine Arts is offered with a concentration in Graphic Design (Davie campus) or concentration in Studio Art.

The Visual Arts and Art History Department reserves the right to select student work for its collection. Students should consult and familiarize themselves with course prerequisites. The department endorses and will enforce these prerequisites. Declared majors should have in-person academic advising at least once per academic year with a designated College and/or department advisor. Fall and spring course

schedules can be used to project graduation timetables. Summer course schedules help facilitate these projections only.

[Link to Combined Bachelor of Arts to Master of Nonprofit Management](#)

[Link to Master of Fine Arts with concentration in Studio Art](#)

[Link to Master of Fine Arts with concentration in Graphic Design](#)

### **Prerequisite Coursework for Transfer Students**

Students transferring to Florida Atlantic University must complete both lower-division requirements (including the requirements of the General Education Program) and requirements for the College and major. Lower-division requirements may be completed through the A.A. degree from any Florida public college, university or community college or through equivalent coursework at another regionally accredited institution. Before transferring and to ensure timely progress toward the baccalaureate degree, students must also complete the prerequisite courses for their major as outlined in the *Transition Guides*.

All courses not approved by the Florida Statewide Course Numbering System that will be used to satisfy requirements will be evaluated individually on the basis of content and will require a catalog course description and a copy of the syllabus for assessment.

### **Portfolio Review**

All students pursuing the B.A., B.F.A. Studio Art concentration and B.F.A. Graphic Design concentration in the Department of Visual Arts and Art History are required to participate in a portfolio review process before entering their majors. This review will take place upon completion of foundation and 2000-level studio coursework but before students enter most 3000- and 4000-level studio coursework within their area of study. Upon completion of foundation and disciplinary 2000-level studio coursework, each student will submit a portfolio of work made in these courses for review by a panel of studio Visual Arts and Art History faculty. The portfolio review will occur twice per academic year and will be conducted by a committee of faculty members representing relevant studio areas.

Students whose portfolios demonstrate mastery of foundation studio concepts will be admitted to the B.F.A. program in their chosen studio option. Students whose portfolios do not demonstrate mastery of foundation concepts will be recommended to pursue the B.A. degree. These students may resubmit their portfolios for admittance to the B.F.A. program for a second time during a subsequent portfolio review.

Current portfolio review guidelines, including required portfolio components, portfolio evaluation criteria and relevant deadlines, are available [here](#) from the Department of Visual Arts and Art History.

## **ART** **BACHELOR OF ARTS (B.A.)**

**Art History Concentration**

**Studio Art Concentration**

*(Minimum of 120 credits required)*

### **Art History Concentration**

The candidate must complete all University and Dorothy F. Schmidt College of Arts and Letters requirements for the B.A. program, including the University's Foreign Language Requirement (four-year students only). See the [Degree Requirements section](#) in this catalog for complete information. Transfer students from institutions with 3-credit art courses are likely to need more art credits than the minimum described below. Transfer coursework to be credited toward the major must be evaluated by the department chair. Students should also note that at least 75 percent of all upper-division courses for the B.A. must be taken in the Department of Visual Arts and Art History at FAU. Please consult the Academic Flight Plan in Art History with an academic advisor.

Candidates for the Bachelor of Arts Degree with concentration in Art History in the four-year program are required to complete 49 credits of major requirements, including:

### Studio Art Concentration

The B.A. with concentration in Studio Art is designed for a general education in the visual arts with coursework offered in Ceramics, Drawing, Graphic Design, Painting, Photography, Printmaking and Sculpture. Students are given rigorous training in the foundations of art as well as in ways to explore new and innovative questions, theories and ideas that drive art today. Students are encouraged to create individualized programs of study anchored by intermediate-level study in multiple studio areas. Majors are expected to explore the variety and breadth of contemporary art practice in order to develop their

own understanding of directions in visual art and their own artistic practice.

### Program Requirements and Curriculum

Students are required to take 18 credits in Core Program Prerequisites, submit to a portfolio review and take 36 credits in upper-division studio art and art history coursework for a total of 54 credits. Transfer coursework to be credited toward the degree must be evaluated by the department chair. Students should also note that at least 75 percent of all upper-division credits for the B.A. must be taken in the Department of Visual Arts and Art History at FAU. Please consult the Academic Flight Plan for the B.A. in Studio Art with an academic advisor.

The B.A. program also requires that students fulfill the University's Foreign Language Requirement. See the [Degree Requirements section](#) in this catalog for complete information.

**BACHELOR OF ARTS (B.A.) TO MASTER OF NONPROFIT MANAGEMENT (M.N.M.)**  
**COMBINED PROGRAM**

**Art History Concentration**

**Studio Art Concentration**

*(Minimum of 153 credits required)*

The Dorothy F. Schmidt College of Arts and Letters offers a combined B.A. with an Art History Concentration or a Studio Art Concentration to an M.N.M. degree program. The B.A. degree is completed in the Department of Visual Arts and Art History. Students complete the M.N.M. in the School of Public Administration.

Students may count up to 9 credits of approved graduate coursework (5000 level or higher) toward both their bachelor's and master's degrees as long as the combined program totals a minimum of 153 credits and:

1. The student has met the minimum 120 credits for the bachelor's degree;
2. The student has taken a minimum of 33 credits in courses at the 5000 level or higher for the master's program.

Students complete the undergraduate program first. Students in the combined B.A. to M.N.M. degree program should consult with an advisor to ensure that program completion requirements are met for both the bachelor's degree and the master's degree.

**Admission Requirements**

The GRE requirement is waived for the combined program. To be eligible for the combined program, baccalaureate students in the Department of Visual Arts and Art History should:

1. Have a cumulative FAU GPA of 3.25 or better at the end of the junior year.
2. Formally apply to the combined program, completing the admissions process at least one semester

prior to the beginning of the M.N.M. portion of their program.

Students in the combined program must maintain continuous enrollment to remain in good standing. Students must also meet all the degree requirements of the graduate program they have chosen, including prerequisite courses.

### Art History Concentration

The candidate must complete all University and Dorothy F. Schmidt College of Arts and Letters requirements for the B.A. program, including the University's Foreign Language Requirement (four-year students only). See the [Degree Requirements section](#) in this catalog for complete information. Transfer students from institutions with 3-credit art courses are likely to need more art credits than the minimum described below. Transfer coursework to be credited toward the major must be evaluated by the department chair. Students should also note that at least 75 percent of all upper-division courses for the B.A. must be taken in the Department of Visual Arts and Art History at FAU. Consult the Academic Flight Plan in Art History with an academic advisor.

## **NONPROFIT MANAGEMENT**

### **MASTER OF NONPROFIT MANAGEMENT (M.N.M.)**

#### **Degree Goals**

The Master of Nonprofit Management (M.N.M.) degree program was designed as a professional degree to meet the unique needs of the nonprofit sector. It is open to preservice students as well as managers and leaders in human services, fine and performing arts, and cultural, educational, community development, religious, environmental and other nonprofit organizations. The curriculum recognizes the special concerns of nonprofit organizations in such areas as: management of volunteers and professionals; resource development and fundraising; governance by volunteer boards of trustees and directors; management of multiple sources and types of funding; unique legal and regulatory issues; special values of service, community and charity; and the unique demands of nonprofit leadership.

#### **Duplication and Recency of Credits**

Except for students enrolled in the combined B.A./M.N.M. degree program, no credit counted as part of another degree may be counted toward the M.N.M. All work toward the M.N.M. must be completed within seven years after initial registration in the program.

#### **Transfer Credit**

Acceptance of transfer credits from approved institutions depends on the relevance of the work to the

M.N.M. program. Request for transfer credits should be made at the time of admission and is limited to 6 credits in which the student earned a minimum grade of "B." Students may use the petition process to transfer more than 6 credits. Credits older than seven years may not be transferred to the graduate program.

### **Degree Requirements**

The faculty of the college will recommend awarding the Master of Nonprofit Management degree when the following requirements have been met:

1. Completion of 33 credits of approved coursework with no grade below "C," (including "C-") with a minimum average grade of "B" (3.0 on a 4.0 scale).
2. Completion of the core courses below (24 credits). The required internship (PAD 6943) may be waived and replaced by an elective for students who have nonprofit work.
3. Completion of three elective courses (or 9 credits of coursework).

---

**Total**
**33****ART****BACHELOR OF FINE ARTS (B.F.A.)****Graphic Design Concentration****Studio Art Concentration***(Minimum of 120 credits required)***Graphic Design Concentration**

The B.F.A. Graphic Design concentration provides students with the skills to pursue career opportunities in visual communication. The overall goal of the program is to sharpen students' abilities in visual problem solving and translating verbal concepts into visual images, image-making and graphic techniques that communicate intended messages, moods and concepts. Graphic design projects for both the digital environment and print include posters, brochures, corporate identity systems, trademarks, books, packaging, magazines, interactive media and website design.

Courses cover all facets of the visual communication process, from design brief to thumbnail sketches to finished pieces. Students are given assignments much like those they would encounter in professional settings. The program is planned to help students balance studies in art history and studio art with studies in graphic design. Through each course in the program, students are encouraged to develop an appreciation of the various philosophical and ideological positions that could affect their design perspectives.

All students are required to complete their studies with the senior seminar course, from which they develop their portfolio.

**Program Requirements and Curriculum**

The B.F.A. with concentration in Graphic Design program requires that all students complete 24 credits

of the Core Program Prerequisites, submit and pass a portfolio review and earn 45 credits in upper-division coursework for a total of 69 credits in art, art history and design coursework. Transfer course work to be credited toward the degree must be evaluated by the department chair. Students should also note that at least 75 percent of all upper-division courses for the B.F.A. must be taken in the Department of Visual Arts and Art History at FAU. Consult the Academic Flight Plan for the B.F.A. in Graphic Design with an academic advisor.

This B.F.A. program also requires that students fulfill the University's Foreign Language Requirement (four-year students only). See the [Degree Requirements section](#) in this catalog for complete information.

Lower-division courses are offered at the Boca Raton campus.

Most upper-division courses are offered at the Fort Lauderdale campus.

## Studio Art Concentration

The B.F.A. with concentration in Studio Art is designed for the student who aspires to a career as a professional artist. Students are given rigorous training in the foundations of art, as well as in ways to explore new and innovative questions, theories and ideas that drive art today. Students are encouraged to create individualized programs of study anchored by intermediate-level study in multiple studio areas. Majors are expected to explore the variety and breadth of contemporary art practice in order to develop their own understanding of directions in visual art and their own artistic practice.

Candidates must complete all University and Dorothy F. Schmidt College of Arts and Letters requirements for the B.F.A. degree program, including 8 credits in any one foreign language (four-year students only). All candidates must take 18 credits of the Art Core Program Prerequisites, submit and pass a portfolio review and take 51 credits in upper-division coursework for a total of 69 credits in major requirements. Transfer students should also note that at least 75 percent of all upper-division courses must be taken in the Department of Visual Arts and Art History at FAU. Transfer course work to be credited toward the degree must be evaluated by the department chair. Please consult the Academic Flight Plan in the relevant studio discipline with an academic advisor.

All students are required to complete their studies with the senior seminar course, from which they develop their portfolio.

### Foreign Language Requirement for Art Majors

Eight credits, two courses of college-level credit in the same foreign language.

FRE/GER/SPN/ITA/JPN or another language (8 credits in the same language, 8 credits for a B.A., 8 credits for a B.F.A. for native students only).

Students with more than one year of foreign language in high school should enroll in Beginning Language and Culture 2 (FRE/GER/SPN/ITA/JPN 1121) or a higher-level course. Students can demonstrate proficiency for a first-level and/or second-level course by successfully completing a higher-level course. CLEP exam credits meet this requirement. Note: Native learners of a foreign language must consult the Department of Languages, Linguistics, and Comparative Literature regarding this requirement.

## ART MINORS

The Department of Visual Arts and Art History offers a minor in Art History and one in Studio Art. All courses must be completed with a "C" or better. Satisfactory/unsatisfactory or pass/fail grades will not be accepted. Studio Arts and Graphic Design majors may minor in Art History, but are not eligible for other Studio or Graphic Design minors. Interested students should contact the department for advising in the appropriate minor.

## ART HISTORY UNDERGRADUATE MINOR

*(Minimum of 18 credits required)*

The minor in Art History includes a minimum of 18 credits. At least 15 of the 18 credits must be taken at Florida Atlantic University.

---

### *Required Courses*

---

Must be taken first: Art Appreciation and one Art History Survey course OR Art History Survey 1 and 2	ARH 2000 and (ARH 2050 or 2051) OR ARH 2050 and ARH 2051	6
--	---	---

Four upper-division (3000- and 4000-level) Art History courses		12
---	--	----

## STUDIO ART UNDERGRADUATE MINOR

*(Minimum of 18 credits required)*

The minor in Studio Art includes 18 credits, 15 of which must be taken at FAU. To receive a minor in Studio Art, a student is required to take three art foundation courses (9 credits) plus three courses at the 2000, 3000 or 4000 level (9 credits). Check course descriptions for course prerequisite requirements.

### Secondary Education Program

A program leading to teacher certification in Art is available in partnership with the Department of [Curriculum and Instruction](#) in the College of Education. See the Department of Visual Arts and Art History advisor and college advisors in the College of Arts and Letters and College of Education.

## MASTER'S PROGRAMS

### STUDIO/FINE ARTS

#### MASTER OF FINE ARTS (M.F.A.)

##### Graphic Design Concentration

##### Studio Art Concentration

*(Minimum of 60 credits required)*

The M.F.A. with Major in Studio/Fine Arts is designed to further the conceptual development, aesthetic presentation, technical skill and career goals of the M.F.A. candidates. The M.F.A. is offered with a concentration in Graphic Design (Davie campus) or a concentration in Studio Art in the following studio areas of study: Ceramics, Drawing, Painting, Photography, Printmaking and Sculpture (Boca Raton campus) and Book Arts (Boca Raton and Davie campuses). These paths of study are designed to incorporate courses from the range of studio areas should the student desire this type of cross-disciplinary approach and flexibility. Graduates of the programs will be prepared for careers as professional artists. The programs will provide opportunities for students to develop their interests and talents at the terminal degree level.

##### Studio Art Concentration

### Admission Requirements

1. Bachelor of Fine Arts, Bachelor of Arts or equivalent degree.
2. A "B" average or better in all coursework while registered as an upper-division student working for a bachelor's degree.
3. Graduate admission application submitted online to FAU's Graduate College. Application is available at [www.fau.edu/graduate](http://www.fau.edu/graduate).
4. Official college transcript(s) submitted to FAU's Graduate College.

Applicants must submit the following in PDF format by email ([art@fau.edu](mailto:art@fau.edu)) to the departmental graduate coordinator for the respective concentration (Fine Arts, Graphic Design):

1. A statement of intent (stating area of concentration) and brief résumé.
2. Three letters of recommendation (preferably from previous instructors and/or professionals familiar with applicant's academic and artistic background).
3. Portfolio of 20 digital images of recent work in the area of concentration. Applications for painting must include a minimum of two details. Each image should be identified with name, medium, size, date.
4. Copy of official transcript.
5. Completed applications received by February 1 are given preference (applications will be considered through April 30; applications completed after April 30 will roll over to the next academic year).

The Graduate College will be notified by the department of the evaluation results, and the Graduate College will notify candidates formally regarding admission. Only completed portfolios and application packets will be considered.

### **Program Requirements and Curriculum**

This M.F.A. program offered on the Boca Raton campus requires a minimum of 60 credits and includes the following distribution of credits.

Graduate Documentation	ART 6956C	4
------------------------	-----------	---

Graduate Thesis Exhibition	ART 6972C	4
----------------------------	-----------	---

All candidates accepted into the M.F.A. program will be assigned a three-member supervisory committee from the department faculty with at least one member from the student's stated area of study for the first year. The three-member composition of the supervisory committee will change for the second year. At the end of year two, the M.F.A. candidate will select a three-member committee (by April 30) that will direct them through their exhibition and thesis statement and documentation in year three. The committee will be composed of the candidate's major professor (usually from the area of study) and a member or members of the department faculty. An additional member may be from outside the department and is encouraged. Each committee will meet periodically during each semester to supervise the candidate's progress for the entire period of study. Candidates are required to meet with their committee for an end-of-semester review each term and individual members are to meet at least once with the student during the term. During the candidate's first semester, the candidate will be

required to give a presentation of works in an open-attendance forum.

Upon completion of a minimum of 18 credits, candidates will undergo a first-year oral review organized by their committee and voted on by participating department faculty to determine appropriate progress in their studio work. First-year reviews are scheduled at the end of each spring term. The department's graduate coordinator sets the review dates and times. Successful completion of this review is a prerequisite for continuing as a candidate for the degree.

In the last semester of residency, the candidate will present a graduate exhibition in one of the University galleries. The exhibition will be curated by the M.F.A. candidate and members of the candidate's committee. An oral examination focusing on the candidate's work will take place in the exhibition area prior to the opening. Successful completion of this examination is required for awarding of degree.

The Department of Visual Arts and Art History reserves the right to select work from thesis exhibitions for its permanent collection.

## **Graphic Design Concentration**

The Master of Fine Arts with a Graphic Design concentration engages students in an individual pursuit to expand their knowledge of visual communication design systems with a focus on furthering development toward a career in design education and/or professional practice. Students and faculty from diverse cultural, educational and professional experiences come together to engage in critical discourse that challenges and strengthens each student's understanding of communication theory, research methodology and design problem-solving approaches. Encouraged to identify and expand their own voices as designers, students take a combination of graduate design studios, seminars, art history courses and directed independent study projects, culminating in a graduate thesis project, exhibition and document. Graduate students are expected to take a leadership role in the department and in their interactions with undergraduate students.

## **Admission Requirements**

1. Bachelor of Fine Arts, Bachelor of Arts or equivalent degree from an accredited college or university or, for international students, an institution recognized in its own country as preparing students for further study at the graduate level. Degrees in graphic design or visual communication design are preferred. Candidates from other curricula will be considered based on

abilities demonstrated in portfolio, statement of intent and space available. Two years' experience in the graphic design practice is preferred.

2. The minimum University admission requirements are either a "B" average or better in all work attempted while registered as an upper-division student working for a bachelor's degree; or a graduate degree from an accredited institution.
3. Graduate admission application submitted online to FAU's Graduate College. Application is available at [www.fau.edu/graduate](http://www.fau.edu/graduate).
4. Official college transcript(s) submitted to FAU's Graduate College.

Applicants must submit the following to Graphic Design, Department of Visual Arts and Art History, Florida Atlantic University, 2912 College Avenue, DW 303, Davie, Florida 33314.

1. Three letters of recommendation.
2. Résumé.
3. Statement of intent. Candidates need to submit a two-page essay describing their creative aims and reasons for graduate study.
4. Portfolio that includes 20 examples of applicant's graphic design or electronic media work. Each item should be labeled with name, medium, size and date. Candidates must include a project description sheet with their portfolios. Website examples should list the URL on project description sheet.
5. Copy of official transcript.
6. Completed applications received by February 1 are given preference (applications will be considered through April 30; applications completed after April 30 will roll over to the next academic year).

Completed admission portfolios must be submitted directly to the Department of Visual Arts and Art History. The Graduate College will be notified by the department of the evaluation results and will notify candidates. Only completed portfolios and application packets will be considered.

### **Program Requirements and Curriculum**

The M.F.A. Graphic Design concentration is offered at the Davie campus. The program requires a total of 60 credits of study. It includes the following distribution of credits.

---

#### **Graphic Design Concentration (60 credits)**

---

##### *Studio and Seminar (24-32 credits)*

*Thesis Work (8 credits)*

Design Thesis	ART 6971C	4
Graduate Thesis Exhibition	ART 6972C	4

All candidates accepted into the M.F.A. Graphic Design concentration will be assigned a three-member supervisory committee from the department faculty with at least two members from the Graphic Design area of concentration the first year. Candidates are required to select their own graduate committee upon completion of candidacy review. The committee will be composed of the candidate's major professor (thesis advisor) and two members from the department faculty. An additional member may be from outside the department.

Upon completion of 30 credits, candidates will undergo a candidacy review by their committee to determine appropriate progress in the Graphic Design concentration. Successful completion of this review is a prerequisite for continuing as a candidate for the degree.

In the last semester of study, the candidate will present a thesis exhibition. The exhibition will be curated by the M.F.A. candidate and members of the candidate's committee. The M.F.A. candidate is required to produce written documentation of research, including a detailed explanation of the thesis exhibition. Copies of thesis documentation must be presented to the committee no less than three weeks prior to the thesis exhibition. An oral examination focusing on the candidate's work will take place directly following the presentation of thesis exhibition. Successful completion of this examination is required for awarding of degree.

The Department of Visual Arts and Art History reserves the right to select work from thesis exhibitions for its permanent collection.

**Accreditation:** The undergraduate and graduate programs in business are accredited by The Association to Advance Collegiate Schools of Business International (AACSB). Florida Atlantic University is accredited by the Southern Association of Colleges and Schools (SACS).

The vision of the College of Business is to powerfully impact the business community through nationally recognized academic excellence. In its mission, the College fosters a climate of intellectual achievement and diversity for its stakeholders through creation of and access to relevant business knowledge. The College's core values that support its vision and mission are: scholarship, creativity, academic service, leadership and ethics.

The College offers undergraduate programs in Accounting, Data Science and Analytics, Economics, Finance, Health Administration, Hospitality and Tourism Management, International Business, Management, Management Information Systems, and Marketing. Master's degree programs are available in Accounting, Business Administration, Business Analytics, Data Science and Analytics, Economics, Health Administration, Information Technology and Management, Supply Chain Management, and Taxation. A doctoral program is offered in Business Administration. In addition, the School of Accounting offers an Honors Program. **Note:** The traditional master's in Finance is on hiatus and not accepting students at this time.

All degree programs are offered in Boca Raton. Online undergraduate programs are offered in Accounting, Economics, Finance, Hospitality and Tourism Management, Management, and Marketing. The Davie campus offers undergraduate majors in Accounting, Finance, Management and Marketing and a graduate program in Business Management. Graduate programs are offered in Accounting, Accounting with concentration in Forensic Accounting and Taxation.

The College of Business's largest and most diverse constituency resides in its upper-division baccalaureate and professional programs. The College seeks to develop a spirit of inquiry in its graduates and impart relevant techniques for solving problems in a global business environment. In doing so, it instills skills and knowledge that serve as a basis for change in a world where change is the

norm.

Additionally, the College of Business provides lifelong learning experiences through professional weekend programs and centers that focus on services marketing, technology, entrepreneurship and international business. The College's research and services advance business knowledge by synthesizing ideas in creative ways, thus contributing to South Florida's economic vitality and making the community a better place to live and work.

## BACHELOR'S DEGREE PROGRAM INFORMATION

The College of Business awards the degrees of Bachelor of Business Administration (B.B.A.), Bachelor of Health Services (B.H.S.), Bachelor of Science (B.S.) and Bachelor of Arts (B.A.). All Business majors are eligible for either the B.B.A. or the B.S. degree, except for Health Administration, General Business and General Economics majors. Though both degrees are on an equivalent academic level, the B.S. degree requires additional mathematics. Health Administration majors earn the Bachelor of Health Services (B.H.S.) degree, General Business majors earn the Bachelor of Arts (B.A.) degree, and General Economics majors earn the Bachelor of Science (B.S.) degree.

### General Studies Degree Program

The University offers a Bachelor of General Studies (B.G.S.) degree program that allows students to design a plan of study to meet their personal interests and career goals. The 120-credit program includes 15 credits of upper-division coursework in one discipline, which students select in consultation with an advisor. For more B.G.S. details and degree requirements, please refer to the [Degree Programs](#) section of this catalog.

### Undergraduate Research Certificate

To recognize undergraduate students' excellence in undergraduate research, the Office of Undergraduate Research and Inquiry (OURI) has established the [Undergraduate Research Certificate](#). Requirements for the Research Certificate include completion of 12 credits of research exposure, skill-building and intensive courses as well as dissemination of the outcomes of students' research and inquiry through a research presentation or exhibition.

**Admission Policy** (*for B.B.A. and B.S. degrees, except General Economics majors*)

**Note:** For the Admission Policy for General Business majors (B.A. degree), [click here](#).

**Note:** For the Admission Policy for General Economics majors (B.S. degree), [click here](#).

**Note:** For the Admission Policy for Health Administration majors (B.H.S. degree), [click here](#).

All of the following are required for admission to upper-division specialized majors in the College of Business:

1. Attain a Pre-Business admissions GPA of 2.5 on the courses noted in parentheses below that are relative to success in business programs (ECO 2013, ECO 2023, ACG 2021, ACG 2071, MAC 2233, STA 2023, ENC 1101, ENC 1102 and ISM 2000) with grades of "C" or better within a maximum of two attempts. For Pre-Business admissions GPA calculation, only the highest grade of multiple attempts is used.

**Note:** Students who have attempted any of the Pre-Business admissions courses two or more times, including withdrawals ("W"), cannot be admitted to a specialized business major.

2. Complete the Florida Civic Literacy requirement (for students who initially entered a Florida college system, institution or state university in the fall 2018 semester and thereafter).
3. Complete the foreign language entry (FLENT) requirements.

### **Major Declaration and Upper-Division Status**

Students must be admitted to a major (other than Pre-Business) no later than the semester when they earn 60 credits. A registration hold will prohibit enrollment beyond this threshold. If the student has not declared a specialized major by 60 credits earned, the student will be invited to change their major to meet the university's timely graduation policy.

Students may petition denial of admission to a major through the academic petition process. If the petition is denied, the student may appeal that decision. For an appeal to have merit, students must explain new academic or personal information as well as extenuating circumstances. The evidence should show a student's case is stronger than the initial petition documentation provided.

### **Restricted Access to Upper-Division COB Courses**

Access to upper-division COB courses is restricted. Registration priority for COB upper-division courses will be in the following order:

1. Upper-division COB students (in specialized admissions majors);
2. Students in programs with COB courses as part of the required curriculum;
3. Students in other majors (officially declared and making progress in the program) who desire COB courses to supplement their curriculum;
4. Non-degree seeking students.

Students in categories 3 and 4 above may request permission to enroll in restricted business courses after advance registration via a business academic petition or by emailing [cobadvising@fau.edu](mailto:cobadvising@fau.edu).

### **Suspension and Dismissal**

For any students admitted to the College of Business, suspension and dismissal actions follow the standard University procedure. Students who are dismissed after being delared in a business major will have their reinstatement cases reviewed on an individual basis after remaining out of FAU for the required period.

**Note:** The policy for academic status of graduate students is outlined under the heading Academic Standing in the M.B.A. program description later in this section.

### **Double Majors, Dual Degrees and Second Baccalaureate Degrees**

Undergraduate students may pursue two majors, if approved through advising in the College of Business. If the two majors are in different degrees, such as a B.A. and a B.S., students will receive the degree in the major that they have designated as their primary major. A double major does not require a minimum number of credits beyond those necessary for completing degree requirements (120 or more credits). To graduate with double majors, students must first declare the primary college and major of their choice on the application for admission. Then, undergraduates must inform the second college and department of their intent by completing a Second Major form, available in the [Office of the Registrar](#). Undergraduates must consult with both departments to ensure that all courses needed for graduation are completed. The same catalog year must be used for both majors. A minimum of 21 credits must be applied exclusively toward requirements in the primary major. Students may not pursue multiple degrees in the same academic program, such as a B.B.A. and B.S. in Management.

**Note:** To ensure a timely graduation, students may pursue a double major only if the requirements can be completed without extending the anticipated graduation date. Please refer to the [Timely Graduation Policy](#) for credit requirement thresholds to declare a second major.

Students may earn a second bachelor's degree from FAU if they have a bachelor's degree from an accredited university. Students with earned bachelor's degrees have fulfilled General Education requirements but must complete remaining requirements (College, Pre-Business Foundation coursework, Business Core and major) and earn a minimum of 30 credits from FAU after the first degree. Students may reserve FAU courses from the first degree to apply toward a second degree, but such courses must not have met any requirements for the first degree (including credits as free electives) and be above the 120 minimum credits. Requests to reserve credits from the first degree must

be made in writing to the College of Business before the degree is granted. Grades from these reserved courses will not apply to the first degree GPA, honors classification, etc.

## ONLINE BACHELOR'S DEGREE PROGRAM

The Online Bachelor of Business Administration (B.B.A.) Program offers majors in Accounting, Economics, Finance, Hospitality and Tourism Management, Management, and Marketing. The Online B.B.A. Program can be completed in a part-time or full-time format. For information, visit the [website](#) or call 561-297-3688.

### **Office of Student Academic Services—Academic Advising**

Students are expected to have an advising appointment each semester to seek advice on their academic programs. To facilitate the graduation process and compile a graduation audit of a student's record, undergraduates should also meet with an advisor in the semester prior to graduation or when they are 11 courses short of completing their degree. Students must have a graduation pre-approval meeting prior to completing an application for degree. This meeting ensures the student has met all requirements necessary to graduate.

Located on the Boca Raton and Davie campuses, the Office of Student Academic Services provides the following:

1. Is a source of information on University and College policies, procedures and resources;
2. Helps students evaluate their choice of major;
3. Provides curriculum planning and monitors academic progress;
4. Helps students identify and solve academic-related problems;
5. Serves as an intermediary between students and the University community;
6. Supports students in academic difficulty.

For information on hours and locations, visit [www.business.fau.edu/advising](http://www.business.fau.edu/advising).

### **Residency Requirements**

Students are required to earn at least 75 percent of their major courses at FAU. In addition, 50 percent of all required upper-division classes taught by the College of Business must be taken at FAU (at least 30 credits). Students must earn a minimum of 30 credits at FAU to earn a degree, and the last 30 upper-division credits must be earned at FAU. College of Business certificates require that 100 percent of the courses for the certificate be taken at FAU. After matriculation into the College of Business, transient work is not permitted except in unusual circumstances. In these cases, an academic petition showing

justification is required.

### **Administrative Drops, Prerequisites and Student Responsibility**

Students are responsible for completing prerequisites for courses and meeting all requirements for the degree. Any student who does not meet course prerequisites may be administratively dropped from courses at any time during a semester. Exceptions may be made by petition to the College before registering.

Students who do not attend the first class meeting of a College of Business course may be administratively dropped by the instructor.

### **Incomplete Grade Policy**

A student who is passing a course but has not completed all work due to exceptional circumstances may, with consent of the instructor, temporarily receive a grade of incomplete ("I"). The assignment of the "I" grade is at the discretion of the instructor but only allowed if the student is passing the course. The specific time required to make up an incomplete grade is at the discretion of the instructor. However, the College of Business policy on the resolution of incomplete grades requires that all work required to satisfy an incomplete ("I") grade must be completed within a period not exceeding one calendar year from the semester the incomplete grade was issued. After one calendar year, the incomplete grade automatically becomes a failing ("F") grade. GEB 6215 is an exception to this rule as students may be granted more time with the instructor's recommendation.

### **Late/Add Process**

Students who wish to Late/Add into a course have only one additional week past Add/Drop week to make the request to late/add into any course that is a full-term semester course. Students are not able to Late/Add into half semester or intersession courses past the Add/Drop period.

### **Academic Petition Process**

The College of Business (COB) provides mechanisms for students to seek redress when a College of Business or University academic regulation or policy causes undue hardship. The College petition process does not address cases of grievances with instructors or tuition matters.

The College has established specific rules concerning petitions for late withdrawals from courses and the waiver or alteration of University-level academic requirements (beyond those of the College) as follows:

1. The student should petition in writing using a standardized petition form (available on the COB website: [www.business.fau.edu/advising](http://www.business.fau.edu/advising)) indicating what the student would like to happen.

Attach a letter of explanation and accompanying supporting documentation as needed. The form includes instructions and what documentation is required for each type of petition. The petition and supporting documentation should be submitted to the Office of Student Academic Services at [cobadvising@fau.edu](mailto:cobadvising@fau.edu) to be reviewed.

2. Petitions that deal with events in each semester must be submitted by the end of the subsequent semester. For example, petitions for events occurring in a fall semester are to be submitted by the end of the spring semester; petitions for events occurring in a spring semester are to be submitted by the end of the summer semester. Petitions for events occurring in a summer semester are to be submitted by the end of the fall semester. Petitions submitted after a term has ended will be denied if the student completed all work/final exam for the course. If a late withdrawal is approved, all courses for the semester will be withdrawn. Late withdrawals are not approved for poor performance.
3. Petitions will be approved or denied within 10 business days. For each decision, a memo of explanation will be written.
4. If a petition is denied and the student wishes to appeal, he/she must do so in writing within 10 days of receipt of the petition denial memo. The student should submit an appeal letter and provide reasons, along with additional documentation not provided with the initial petition, for the appeal. The student's documentation and the initial petition decision will be reviewed and either the decision will be upheld or overturned within 30 days of the submission of the appeal. The committee usually meets at least twice per semester.

The decision of the committee is final. There are no higher levels of appeal within FAU.

### **College of Business Career Center**

The College of Business Career Center provides career services to current College of Business undergraduate and graduate students, alumni and employers. For undergraduate and graduate students and alumni, the College of Business Career Center assists with part-time and full-time job placement, internships, personal branding, interview skills and résumé writing. For employers, the Center offers job posting, tabling opportunities, recruiting through corporate information sessions and on-site interviewing. Click [here](#) for more information.

### **Internship Program**

The College of Business Career Center provides students with an opportunity to acquire real-world work experiences through internships within their major disciplines. Internships may be full-time or part-time, may be paid or unpaid and may or may not be taken for credit. Students may not use a position in which they are currently employed unless the internship duties are beyond the normal work responsibilities. In such cases, permission must be granted from the College of Business Career Center.

Students will not be able to register for and get credit for internships retroactively. Eligible students may apply for an internship at any time; however, for-credit internships are tied to the semester academic calendar.

Click [here](#) for more information and application instructions.

### **Directed Independent Study**

Students are allowed to take the equivalent of one course (3 credits) of Directed Independent Study to satisfy specific degree requirements. Additional DIS credits can only be used as free electives.

Students wishing to enroll in a Directed Independent Study must write a proposal and present the proposal to a faculty member for approval. If the faculty member approves the DIS, the student will be provided a permit that will allow them to register for the appropriate course.

Students complete the form, write a proposal and present the form and proposal to a faculty member for approval. Upon receipt of the faculty signature, the student returns the signed form and proposal to the departmental office. After approval, the student must register for the course. Failure to adhere to the above procedure may result in an administrative withdrawal from the directed independent study course.

Students complete the form, write a proposal and present the form and proposal to a faculty member for approval. Upon receipt of the faculty signature, the student will return the signed form and proposal to the departmental office. After approval, students must register for the course. Failure to adhere to the above procedure may result in an administrative withdrawal from a Directed Independent Study.

### **International Experience Credit Policy**

Students may apply credit from one College of Business study abroad field experience course toward College-specific requirements (core, majors, business electives or minors). Field experience classes are usually brief study abroad programs that take place over spring break or in the summer months. Students should speak to their advisors regarding these credits.

### **College of Business International Programs**

The College of Business has developed a cooperative model with several international educational institutions. These programs involve various cooperative agreements wherein FAU's College of Business actively participates in the exchange of students, faculty, program ideas and scholarship with partner universities in various continents. The premise of these international relationships is to provide venues for students, communities, faculty and businesses to work together in the global environment.

Students who are interested in exchange or specific programs with the College's international partners should schedule an appointment with their academic advisor.

### **International Partner Institutions:**

**Aalto University School of Economics**, Helsinki, Finland [www.aalto.fi/en/](http://www.aalto.fi/en/)

**American Business School in Paris (ABS)**, Paris, France [www.absparis.org](http://www.absparis.org)

**Dublin Institute of Technology**, Dublin, Ireland [www.dit.ie](http://www.dit.ie)

**Essec Business School**, Cergy-Pontoise Cedex, France [www.essec.edu](http://www.essec.edu)

**Institute Superior de Ciencias do Trabalho E da Empress (ISCTE)**, Lisbon, Portugal  
<http://iepm.ibs.iscte.pt>

**Universidade Federal de Minas Gerais (UFMG)**, Belo Horizonte, Brazil [www.ufmg.br](http://www.ufmg.br)

Click [here](#) for additional options.

### **Business Undergraduate Degree Programs**

The College of Business grants four undergraduate degrees, the Bachelor of Business Administration (B.B.A.), the Bachelor of Science (B.S.), the Bachelor of Arts (B.A.), and the Bachelor of Health Services (B.H.S.). With the exceptions of Health Administration, General Business and General Economics, all majors in the College are eligible to receive the B.B.A. or B.S. degree. The B.S. degree requirements are the same as those of the B.B.A., except the B.S. requires a student to complete 6 additional credits of math or statistics courses beyond the calculus and statistics required in the Pre-Business Foundation courses (e.g., MAC 2311, MAC 2312, STA 3163, ECO 4421, ECO 4422, ECO 4401, ECO 4402, PHI 2102, etc.).

Health Administration majors earn the B.H.S. degree. General Business majors earn the B.A. degree. General Economics majors earn the B.S. degree. For specific requirements for the B.H.S. degree, [click here](#). For specific requirements for the General Business program, [click here](#). For specific requirements for the General Economics program, [click here](#).

Students seeking a B.B.A. or B.S. degree (except General Economics majors) must complete the following requirements.

## **DEGREE REQUIREMENTS (B.B.A. AND B.S.)**

**1. University's General Education Program**

Students who have earned a bachelor's degree from a four-year accredited institution of higher education or an A.A. degree from a Florida community or state college or a state university in Florida are deemed to have completed the General Education requirements.

**2. Pre-Business Foundation Coursework** with grades of "C" or higher.

Principles of Accounting 1	ACG 2021	3
Principles of Accounting 2	ACG 2071	3
Macroeconomic Principles	ECO 2013	3
Microeconomic Principles	ECO 2023	3
Information Systems Fundamentals	ISM 2000	3
Methods of Calculus	MAC 2233	3
Introductory Statistics	STA 2023	3

**3. College of Business Core (33 credits)** with grades of "C" or higher.

Business Law 1	BUL 4421	3
Introduction to Business Communication	GEB 3213	3
Principles of Financial Management	FIN 3403	3
Management Information Systems	ISM 3011	3
Introduction to Management and Organizational Behavior	MAN 3025	3
Operations Management	MAN 3506	3
Global Strategy and Policy	MAN 4720	3
Quantitative Methods in Administration	QMB 3600	3
Principles of Marketing	MAR 3023	3
<b>International Perspective</b>		<b>3</b>

*Select one course from list below:*

Intermediate Theory 1	ACG 3131*	3
International Economics	ECO 3703	3
International Trade	ECO 4704	3
International Monetary Economics	ECO 4713	3
International Economic Development	ECS 3013	3
International Finance	FIN 4604	3

International Marketing	MAR 4156	3
Enterprise Risk Management and Corporate Governance: Qualitative Analysis	RMI 4423	3
<i>*Required for Accounting majors</i>		

<b>Economics Requirement</b>		<b>3</b>
------------------------------	--	----------

*Select one course; must be completed with a grade of "C" or higher. Specific courses that may be used for this requirement vary by major as follows:*

Accounting	ECO 4223
Management Information Systems	ECO 3703, ECO 4704, 4713 or ECS 3013
International Business	ECO 3703, ECO 4704, 4713 or ECS 3013
Management	ECO 4223 or ECP 3703
Marketing (all options)	ECO 3101, 3203 or 4223
Finance	ECO 4223, 3101, 3203 or ECP 3703
Hospitality and Tourism Management	ECO 3703, ECO 4704, 4713 or ECS 3013

4. A College of Business major with grades of "C" or higher. **Major Requirements** are defined in

this College of Business section.

5. A minimum of **51 credits of upper-division College of Business courses**. In addition to the Business Core and major requirements, most majors will require successful completion of Business electives to obtain these 51 credits.

6. A **minimum of 120 credits** (excluding remedial and technical coursework).

7. A **minimum FAU GPA of 2.0**.

8. **Residency Requirements:**

a. After a student matriculates at FAU, the College of Business will not accept upper-level business transfer coursework taken after admission. Exceptions must be requested in writing by petition (Form #1) and courses must be from an AACSB-accredited institution.

b. After being admitted to the College and declaring a major (not Pre-Business), transient coursework is not permitted. Concerned students should consult with an academic advisor.

c. A minimum of 30 upper-level business credits are required from FAU to obtain a College of Business bachelor's degree. The last 30 credits must be from FAU.

d. At least 75 percent of a student's coursework in the major must be completed at FAU.

9. **Foreign Language Entry Requirement:** This must be fulfilled by two years of successful completion of high school foreign language, two successful semesters of a college-level foreign language, the successful completion of the CLEP exam for two semesters of the same foreign language or demonstrated proficiency in a foreign language through the Languages, Linguistics, and Comparative Literature Department.

## **GENERAL BUSINESS BACHELOR OF ARTS (B.A.)**

*(Minimum of 120 credits required)*

The Bachelor of Arts program is intended to provide maximum flexibility for students pursuing a business degree with a preference for a well-rounded understanding of business concepts that can be applied to various evolving industries. Graduates from this program possess a versatile skill set in business, making them appealing candidates for employers in diverse fields.

The University and College of Business degree requirements are listed in the [Degree Requirements](#) section of this catalog, including earning at least 75 percent of all upper-division credits from FAU. In addition to these requirements, General Business students must complete the requirements below.

## Prerequisite Coursework for Transfer Students

Lower-division requirements may be completed through the A.A. degree from any Florida public college, university, or community college or through equivalent coursework at another regional accredited institution. Before transferring and to ensure timely progress toward the baccalaureate degree, students must also complete the prerequisite courses for the B.A. in General Business.

All courses not approved by the Florida Statewide Course Numbering System that will be used to satisfy requirements will be evaluated individually based on content and will require a catalog course description and a copy of the syllabus for assessment.

## Admission Policy

Students must:

1. Attain a “C” or better in each of the pre-business foundation courses in two attempts or less.
2. Complete the Florida Civic Literacy requirement (for students who initially entered a Florida college system institution or state university in Fall 2018 semester and thereafter).
3. Complete the foreign language entry (FLENT) requirements.

## Degree Requirements

---

### Pre-Business Foundation Coursework with minimum grades of "C"

Principles of Accounting 1	ACG 2021	3
Principles of Accounting 2	ACG 2071	3
Macroeconomic Principles	ECO 2013	3
Microeconomic Principles	ECO 2023	3
Information Systems Fundamentals	ISM 2000	3

### In addition, two of the following three courses

College Algebra	MAC 1105	3
Methods of Calculus	MAC 2233	3
Introductory Statistics	STA 2023	3

---

### Business Core Requirements with minimum grades of "C"

---

Business Law 1	BUL 4421	3
Principles of Financial Management	FIN 3403	3
Introduction to Business Communication	GEB 3213	3

Law of International Trade	BUL 4451	3
International Economics	ECO 3703	3
Negotiating in a Globalized World	MAN 3442	3
International Business	MAN 3600	3
International Marketing	MAR 4156	3
Study Abroad	Any course offered by the College	

**Additional Requirements**

Twelve upper-level (3000/4000) credits from the College of Business.

Six upper-level (3000/4000) credits from outside the College of Business.

Additional electives as needed to reach the 120 credits required for graduation.

## **BUSINESS ADMINISTRATION AND MANAGEMENT BACHELOR OF BUSINESS ADMINISTRATION (B.B.A.)**

*(Minimum of 120 credits required)*

The Business Administration and Management major (BAMG) provides an interdisciplinary program leading to a Bachelor of Business Administration (B.B.A.). The curriculum furnishes skills and knowledge applicable in the global economy.

The Business Administration and Management major is only available to students who transfer to FAU from an articulated Associate of Science degree program in Business at a Florida community or state college. Currently, Broward College is the only school with an approved articulation agreement. Students in this articulated program are not eligible for other majors within the College of Business.

### **Prerequisite Coursework for Transfer Students**

Students transferring to Florida Atlantic University must complete both lower-division requirements (including the requirements of the General Education Program) and requirements for the college and major. Lower-division requirements may be completed through the A.A. degree from any Florida public college, university or community college or through equivalent coursework at another regionally accredited institution. Before transferring and to ensure timely progress toward the baccalaureate degree, students must also complete the prerequisite courses for their major as outlined in the [Transition Guides](#) .

All courses not approved by the Florida Statewide Course Numbering System that will be used to satisfy requirements will be evaluated individually on the basis of content and will require a catalog course description and a copy of the syllabus for assessment.

### **Degree Requirements**

Students must obtain an Associate of Science degree in Business from a Florida community or state college that has an articulated A.S.-to-B.B.A. agreement with FAU. In addition to the A.S. degree, students must complete the following curriculum requirements to obtain a Bachelor of Business Administration degree with a major in Business Administration and Management.

**General Education*****Science – 6 credits (two of the following courses)***

Human Evolution	ANT 3586	3
-----------------	----------	---

Chemistry in Modern Life	CHM 2020	3
--------------------------	----------	---

Food and Nutrition	CHS 3410	3
--------------------	----------	---

Earth Systems and Resources	GLY 4012C	3
-----------------------------	-----------	---

Issues in Human Ecology	PCB 3352	3
-------------------------	----------	---

***Humanities – 3 credits (choose one of the following)***

Interpretation of Fiction	LIT 2010	3
---------------------------	----------	---

Interpretation of Poetry	LIT 2030	3
--------------------------	----------	---

Interpretation of Drama	LIT 2040	3
-------------------------	----------	---

Introduction to Philosophy	PHI 2010	3
----------------------------	----------	---

**Business Program*****Business Core – 27 credits***

Business Law 1	BUL 4421	3

***Cognate Areas – 8 credits***

Introduction to Business Communication	GEB 3213	3
Energy Resources and Usage in Society	PSC 2515	2

***Choose one of the following courses***

American Environmental History	AMH 3630	3
Philosophy of Technology	PHM 4223	3
Race and Ethnic Relations	SYD 4700	3
Men, Women and Work	SYO 4370	3
Technology and Society	SYP 4421	3

## BUSINESS ADMINISTRATION UNDERGRADUATE MINOR

*(Minimum of 21 credits required)*

The Business Administration minor is designed for Health Administration and General Economics majors, as well as majors outside the College of Business. The minor requires the following seven courses with a grade of "C" or better.

### Required Courses

Principles of Accounting 1	ACG 2021	3
Principles of Accounting 2	ACG 2071	3
Macroeconomic Principles	ECO 2013	3
Microeconomic Principles	ECO 2023	3
Introduction to Management and Organizational Behavior	MAN 3025	3
Principles of Marketing	MAR 3023	3
Principles of Financial Management	FIN 3403	3

The three upper-division (3000-level) courses must be taken at FAU. A maximum of 3 credits used for the minor may count toward other Business major requirements. A minimum of two courses (6 credits) must be exclusive to the minor.

## HEALTH HUMANITIES UNDERGRADUATE MINOR

*(Minimum of 15 credits)*

The minor in Health Humanities is open to all undergraduate students at FAU. The minor is awarded upon graduation from an undergraduate program at FAU; it is not awarded independently of an undergraduate degree. For minor details click [here](#).

## MASTER'S AND DOCTORAL DEGREE PROGRAM

# INFORMATION

Graduate programs in the College of Business are offered to qualified persons who demonstrate business leadership potential. The following programs are offered:

1. Master of Accounting (M.AC.) and Executive Master of Accounting
2. Master of Taxation (M.TX.) and Executive Master of Taxation
3. Master of Business Administration (M.B.A.)
4. Master of Business Administration (M.B.A.) Executive M.B.A.
5. Master of Business Administration (M.B.A.) Professional M.B.A.
6. Master of Health Administration (M.H.A.) and Executive Master of Health Administration
7. Master of Science with Major in Business Analytics
8. Master of Science in with Major in Data Science and Analytics (M.S.)
9. Master of Science with Major in Economics (M.S.)
10. Master of Science with Major in Finance (M.S.) (currently not admitting students) and Finance (Executive)
11. Master of Science with Major in Information Technology and Management (M.S.)
12. Master of Science with Major in International Business (M.S.)
13. Master of Science with Major in Supply Chain Management
14. Doctor of Philosophy in with Major Business Administration (Ph.D.)

## Graduation

Undergraduate or graduate students who expect to graduate at the end of any semester must:

1. Have an Application for Degree form signed by an advisor in the College of Business;
2. File an Application for Degree form with the Office of the Registrar no later than the date specified in the Academic Calendar for the semester in which they expect to graduate;
3. Complete all degree requirements specified for the degree;
4. Have earned an "S" grade in GEB 6215, if required by the program, prior to applying for the degree.

# SCHOOL OF ACCOUNTING

## Faculty:

Young, II, G. R., Director; Cao, J.; DeRoche, R.; Desir, R.; DiCicco, J. M.; Dunn, K.; Fang, X.; Gauci, M.; Gaze, A.; Gendler, R. S.; Higgs, J. L.; Kohlbeck, M.; Pinsker, R.; Rakestraw, J.; Seavey, S; Smatrakalev, G.; Thevenot, M.; Wainberg, J. S.; Young, S. L.

## **Mission**

As a professional school, the College of Business' School of Accounting (SOA) emphasizes high-quality teaching balanced with basic and applied research and service to constituents. The school is committed to providing students, faculty and staff with opportunities to develop, grow and be productive in a supportive atmosphere characterized by respect, collegiality, openness and freedom of expression.

Its mission is to provide a high-quality accounting education to a diverse student group that consists of a geographically dispersed mix of traditional and non-traditional students. Its goal is to help these students become successful professionals in local, national and global organizations. The School of Accounting achieves this goal by providing innovative programs and by employing the best faculty to teach its students and develop their technical, analytical, communication, interpersonal and lifelong learning skills.

The School offers traditional and [online](#) programs in Accounting and [Business Law](#) at the undergraduate level. Students can also earn undergraduate Honors in Accounting. At the graduate level, traditional and executive master's programs in Accounting and in Taxation are available as well as traditional and executive certificates in [Professional Accounting](#).

## **ACCOUNTING**

**BACHELOR OF BUSINESS ADMINISTRATION (B.B.A.)**

**BACHELOR OF SCIENCE (B.S.)**

The mission of the undergraduate program in Accounting is to provide students with a solid educational foundation for entry into professional careers in accounting-related areas of business and government and to prepare students to pursue graduate or advanced professional education in accounting and related fields.

In addition to the University and College of Business degree requirements listed in the [Degree](#)

[Requirements](#) section of this catalog, Accounting students must complete the following major requirements.

### **Prerequisite Coursework for Transfer Students**

Students transferring to Florida Atlantic University must complete both lower-division requirements (including the requirements of the General Education Program) and requirements for the college and major. Lower-division requirements may be completed through the A.A. degree from any Florida public college, university or community college or through equivalent coursework at another regionally accredited institution. Before transferring and to ensure timely progress toward the baccalaureate degree, students must also complete the prerequisite courses for their major as outlined in the [Transition Guides](#) .

All courses not approved by the Florida Statewide Course Numbering System that will be used to satisfy requirements will be evaluated individually on the basis of content and will require a catalog course description and a copy of the syllabus for assessment.

### **Pre-Business Foundation Coursework**

These are previously listed under the heading [Degree Requirements \(B.B.A. and B.S.\)](#) and subheading Pre-Business Foundation Coursework in this College of Business section.

### **Business Core Requirements**

These are previously listed under the heading [Degree Requirements \(B.B.A. and B.S.\)](#) and subheading College of Business Core in this section.

### **Accounting Major**

The undergraduate Accounting student is required to take nine upper-level accounting/tax courses, including the core courses and accounting/tax electives below for a total of 27 credits.

---

#### **Accounting Core Courses (27 credits)**

Intermediate Theory 1	ACG 3131	3
Intermediate Theory 2	ACG 3141	3
Cost Accounting	ACG 3341	3
Accounting Applications of Data Analytics	ACG 3842	3
Accounting Information Systems 1	ACG 4401	3

---

Federal Taxation 1	TAX 4001	3
Auditing and Assurance Services 1	ACG 4651	3
ACG/TAX Upper-Division Course (3000 level or above)		3
ACG/TAX Upper-Division Course (3000 level or above)		3

## **ACCOUNTING**

### UNDERGRADUATE MINOR

*(Minimum of 9 credits required)*

The Accounting minor is designed for non-Accounting Business majors requiring the Business Core courses. Because part of the requirements include successful completion of the Business Core classes, the minor is usually not practical for General Economics or Health Administration majors.

The Accounting minor requires three upper-division accounting courses (3000 level or above) with a grade of "C" or better.

A maximum of 3 credits used for the Accounting minor may count toward other Business major requirements. A minimum of two courses (6 credits) must be exclusive to the minor. A minimum of 6 credits must be taken in residence at FAU. The acknowledgment of the minor is official upon successful completion of a College of Business degree program.

## **BUSINESS LAW**

### UNDERGRADUATE MINOR

*(Minimum of 12 credits required)*

The Business Law minor provides students with practical legal knowledge of substantive business law topics and current legal issues. Students learn the skill sets necessary to identify and manage legal issues encountered within personal and business contexts, including litigation, contract law, employment and human resources, real and personal property law, as well as applied critical thinking. The result is a student prepared for career opportunities in management, technology and politics. The minor is also excellent preparation for advanced degrees and for law school.

The minor requires 12 credits taken from the following courses. The courses must be completed with a grade of "C" or better. Students must earn at least 75 percent of all credits required for the minor from FAU. A maximum of 3 credits used for the Business Law minor may count toward other Business major requirements. A minimum of two courses (6 credits) must be exclusive to the minor.

For the Business Law courses, refer to [Course Descriptions](#).

### School of Accounting Policies

This document is to be considered an attachment to all syllabi for courses in the School of Accounting. In the event of a conflict between this document and a course syllabus, this document will prevail.

1. FAU email is the primary mechanism for corresponding with students outside of the classroom. Each student is responsible for checking his/her FAU email account often and for cleaning out the inbox to ensure all email is deliverable. Messages may include time-sensitive information, important announcements and class information. FAU email should never be auto-forwarded to another email account. For more information regarding MyFAU and email, visit [this website](#). For

issues with logging into MyFAU, contact the [Help Desk](#) or 561-297-3999.

2. Professors make every effort to honor the course syllabus as originally presented, however, circumstances may dictate a need to change the organization or content of the course. Students will be informed in writing of all changes made to the syllabus (e.g., hard copy or electronically). Students are responsible for checking the course website and their FAU email account to stay abreast of any changes.
3. A grade of “C” or higher is required in all major courses.
4. No student may register for the same upper-level accounting or tax course after receiving grades of “C-,” “D+,” “D,” “D-” or “F” in that course a total of two times.
5. No student may register for upper-level accounting or tax courses after receiving five grades of “C-,” “D+,” “D,” “D-” or “F” in upper-level accounting and/or tax courses.
6. Once students have been removed from the Accounting major, they will not be readmitted without approval from the School of Accounting through the College of Business petition process. Students may not take more than two 3000-level (or higher) accounting and/or tax courses unless they 1) are in an Accounting degree program, 2) are granted permission by the School of Accounting or 3) already hold a degree from an AACSB-accredited institution (such as FAU) and are taking additional courses for CPA eligibility.
7. Any student who has not met the prerequisites for a course may be administratively withdrawn from the course at any time during the semester that such deficiency is determined to exist.
8. Note that an “Incomplete” is not a substitute for a poor grade and is rarely granted. In accordance with the policies of FAU, the College of Business and the School of Accounting, an “Incomplete” will be granted only under the following circumstances:
  - a. The student is otherwise passing the course with at least a grade of "C."
  - b. The student has an excused absence that prevents the on-time completion of the course requirements.
9. Students are solely responsible for properly dropping or withdrawing from courses they no longer wish to continue. Professors are not permitted to assign grades of “W.”
10. Important dates: [Florida Atlantic University – Academic Calendar](#) .
11. School of Accounting policy does not permit overrides into closed classes. Students are advised to monitor the online schedule for space to become available. The add/drop period is the first week of classes, and there may be windows of opportunity during that time. Accounting and tax professors are not authorized to assist students with registration issues.
12. All students must purchase and use as a reference for written assignments in all accounting courses the book *Effective Writing* , 9th edition, by Claire B. May and Gordon S. May, published by Pearson Prentice Hall.
13. In order to provide appropriate guidance to students seeking a professional career in accounting,

the SOA faculty recommends the following courses as necessary for professional certification (such as CPA, CMA or CIA) or admission to the Master of Accounting program: ACG 3131, ACG 3141, ACG 3341, ACG 4401, ACG 4651, TAX 4001 and TAX 4011.

14. Writing is an important component of the skill sets required in the accounting profession. The College of Business GEB program and certification criteria set the minimum standard of acceptable performance on written assignments in School of Accounting graduate courses. Compliance with GEB guidelines is an important aspect of any written assignment in graduate accounting courses, and failure to comply with GEB guidelines may significantly impact a student's grade.
15. A fundamental principle of academic, business and community life is honesty. In the academic environment, the following are critical:
  - a. For most graded assignments, students are expected to work independently. However, team assignments typically require students to work together. For both individual and team assignments, students should be careful not to represent the work of others as their own.
  - b. Appropriate classroom behavior is expected at all times, including respect for the instructor and peers. Disruptive classroom behavior is unfair to other students who are in class to learn, as well as to the instructor, and will not be tolerated.
  - c. The Internet is a powerful tool providing access to a wealth of information. Students are reminded that plagiarism guidelines that apply to printed materials also apply to materials accessed via the Internet and that the School employs various plagiarism (cheating) detection methods.
  - d. See: [www.fau.edu/regulations](http://www.fau.edu/regulations).
16. All students are referred to the [Code of Academic Integrity](#) of the University Regulations, Chapter 4, Regulation 4.001. It is the policy of the School of Accounting at Florida Atlantic University to adhere to the provisions of this regulation. Faculty of the School of Accounting will take action to secure the maximum penalty in the event of any observation of a violation. Additional rules regarding student responsibility, discipline and a host of other regulations are set out in the Florida Atlantic University Regulations and are subject to change without notice. For the University Regulations in effect at any given time, visit [www.fau.edu/regulations](http://www.fau.edu/regulations).

## **HONORS PROGRAM IN ACCOUNTING BACHELOR OF BUSINESS ADMINISTRATION (B.B.A.)**

## **HONORS PROGRAM IN ACCOUNTING BACHELOR OF BUSINESS ADMINISTRATION (B.B.A.) TO MASTER OF**

## ACCOUNTING (M.AC. ) COMBINED DEGREE OPTION

The School of Accounting offers a program that gives students the options of earning undergraduate-degree honors and participating in a combined undergraduate and graduate program allowing a student to count 6 credits towards both degrees, saving both time and money. Students in the honors program are not required to participate in the graduate program but for those who choose to pursue the graduate degree, this option offers a significant benefit.

**The Honors Program:** Students are encouraged to apply for the honors program as early as possible before taking any upper-division accounting classes. For students who have not taken any upper-division accounting courses, a minimum overall GPA of 3.3 and a minimum score of 80 percent on the accounting competency exam are required. However, students who have completed between 3 and 9 upper-division accounting credits may participate in the honors program if they have achieved a minimum overall GPA of 3.3 and have earned a minimum of a "B" in all upper-division accounting coursework. Appeals to admission requirements can be made to the Director of the School of Accounting.

To be eligible to graduate with undergraduate honors, students must achieve an overall GPA of at least 3.0 and an accounting GPA (upper-division ACG and TAX courses) of at least 3.0, and successfully complete the capstone experience. All program requirements must be completed within four semesters (excluding summer semesters) after beginning the program. Students must also complete four honors compacts, a requirement of the university Honors in the Major program. These compacts and the capstone experience involve assignments that develop skills that will help students transition into leadership and professional skills as a Certified Public Accountant.

Students receive special mentoring through interaction with the Coordinator of the School of Accounting Honors Program. The coordinator offers significant career and educational guidance throughout the honors program. Students also receive training on soft skills; adequate soft skills are necessary to be successful as a financial services professional. Workshops, in which this training is conducted, are held exclusively for honors students. Students must attend professional networking events with professionals in the South Florida community to help them better understand the local job market.

Other benefits of the program include cohort classes that enable students to build relationships with other high achieving accounting students. Also, proceeds of some departmental fund-raising events are earmarked for accounting honors students.

Students complete a capstone experience when they are within 12 months of completing the undergraduate degree requirements. The capstone experience usually consists of a case analysis and presentation. To participate in the capstone experience, students must have successfully completed the honors sections of ACG 3141, ACG 4401, and TAX 4001. In addition, they must have either completed or be currently enrolled in the honors section of ACG 4651.

Students admitted to the honors program must maintain high academic and ethical standards. Students may be dismissed from the program for earning two grades lower than "B" in upper-level undergraduate accounting or tax courses, one grade lower than a "B" in graduate-level accounting or tax courses or earning any grade lower than "C" or violating the Code of Academic Integrity.

**Combined B.B.A./M.AC. Degree Option:** The combined program allows the student to count 6 credits of graduate accounting or tax courses towards both the undergraduate and graduate degrees. The student is eligible for a bachelor's degree upon completion of 120 credits. At this point, the student is then granted graduate standing and must complete a total of 30 graduate credits to meet the requirements for the master's program. Six of these accounting or tax credits (ACG 6475 and TAX 6025 or 5000- or 6000-level Accounting or Tax courses approved by the School of Accounting Director) for the graduate degree are taken as a part of the undergraduate program. The undergraduate electives credits that can be substituted with the above-mentioned graduate credits are ACG 4501, BUL 4422, and/or TAX 4011. In total, the student completes a total of 150 credits but 6 of these credits will be counted in both the undergraduate and graduate programs. Students in the honors program who wish to pursue a master's degree apply for the master's program in their junior year.

### **Prerequisite Coursework for Transfer Students**

Students transferring to Florida Atlantic University must complete both lower-division requirements (including the requirements of the General Education Program) and requirements for the college and major. Lower-division requirements may be completed through the A.A. degree from any Florida public college, university or community college or through equivalent coursework at another regionally accredited institution. Before transferring and to ensure timely progress toward the baccalaureate degree, students must also complete the prerequisite courses for their major as outlined in the [Transition Guides](#).

All courses not approved by the Florida Statewide Course Numbering System that will be used to satisfy requirements will be evaluated individually on the basis of content and will require a catalog course description and a copy of the syllabus for assessment.

# MASTER'S PROGRAMS

FAU offers both traditional and executive master's degree programs. These programs operate independently of one another.

## **Mission**

The Master of Accounting (M.AC.) and Master of Taxation (M.TX.) degree programs share the same goal: to provide accounting education to a diverse group of students in their paths to become successful professionals in local, national and global enterprises. Both degrees aid students in developing technical, analytical, communication, interpersonal and lifelong learning skills.

The programs are designed to meet the general educational goals established by the American Institute of Certified Public Accountants and may be used to meet the educational requirements for the public accounting license to practice as a Certified Public Accountant. In the traditional program, which includes a combination of live and online courses, a concentration is available in Accounting Information Systems and Taxation.

## **The Executive Master's Programs**

Additionally, degrees offered by the Executive programs (M.AC. and M.TX.) are designed to meet the demanding schedules of busy professionals. Students may complete either the M.AC. or M.TX. via some combination of the following: watch recorded lectures, watch live lectures remotely or attend class in person. Work is submitted through a web-based learning system. Students generally can complete these programs within 24-months of matriculation. Students may enter the programs in the fall, spring or summer semesters. The following concentrations are available in the executive M.AC. program:

- Professional Accounting
- Digital Accounting Forensics and Data Analytics
- Dual Forensic Accounting and Digital Accounting Forensics and Data Analytics
- Forensic Accounting
- Master of Accounting with a concentration in Taxation
- Internal Auditing

## **Admission Requirements**

The College of Business seeks a diverse and highly qualified group of graduate students. Admission is competitive and applications are evaluated on several factors indicating the potential for scholarly and professional success. In addition to other requirements for admission to the Graduate College at FAU,

to be considered for these master's programs in the College of Business, applicants must:

1. Have earned a bachelor's degree from a regionally accredited college or university or the international equivalent.
2. Have a good grade point average on all previous college work, though emphasis is placed on the last 60 credits earned.
3. If the applicant is a graduate of a foreign college or university who has completed an academic program equivalent to a bachelor's degree earned in the United States, they should submit an official certified transcript indicating the nature and scope of the their academic training.
4. If the applicant's native language is not English, they should submit a Test of English as a Foreign Language (TOEFL) score.
5. The following is required for Traditional M.AC. and M.TX. but is only recommended for the Executive Program: Submit an official, competitive score on a GMAT, GRE or LSAT exam taken within the past five years. When evaluating test scores, the admissions committee looks for a balance between verbal, quantitative and analytical writing All three components are required. Admission test waivers are considered for 1) students with an active CPA license, J.D. or Ph.D. or those with a master's degree from an AACSB-accredited business program; or 2) students who hold an undergraduate degree in accounting from a College of Business accredited by the Association to Advance Collegiate Schools of Business (AACSB) and have earned a minimum grade point average (GPA) of 3.30 (on a 4.00 scale) overall and in their accounting courses.\*

\* If the applicant's overall GPA and accounting GPA is below 3.30, the applicant may be requested to write an explanation as to why the applicant's GPA is not 3.30 or higher and, after considering the applicant's reasons for the lower-than-expected GPA, may have the GMAT/GRE waived.

***It is recommended that applicants provide the following supplemental information to support the application:***

1. Documentation of professional work experience;
2. Evidence of professional certifications relevant to the accounting profession;
3. Evidence of advanced degrees from a regionally accredited college or university or the international equivalent;
4. A one-page résumé;
5. Letter(s) of recommendation from employers, faculty members or others who can attest to the applicant's scholarly ability and/or agency;
6. A writing sample demonstrating analytical and explanatory skills; this writing sample may explain the student's motivation for applying to the program and career intent after graduation.

Admission into an Accounting Master's Program does not constitute admission into an Executive Accounting Master's Program. Non-Executive students cannot register for courses in the Executive Programs.

### **Admission Requirements – Executive Accounting Master's Programs**

The College of Business seeks a diverse and highly qualified group of graduate students. Admission to the Executive Accounting Master's Programs is competitive and applications are evaluated on several factors indicating the potential for scholarly and professional success. In addition to other requirements for admission to the Graduate College at FAU, to be considered for these master's programs in the College of Business, applicants must:

1. Have earned a bachelor's degree from a regionally accredited college or university or the international equivalent.
2. Have a competitive grade point average on all previous college work, though emphasis is placed on the last 60 credits earned.
3. If the applicant is a graduate of a foreign college or university who has completed an academic program equivalent to a bachelor's degree earned in the United States, submit an official certified transcript indicating the nature and scope of the applicant's academic training.
4. If the applicant's native language is not English, submit a Test of English as a Foreign Language (TOEFL).

***It is recommended that applicants provide the following supplemental information to support the application:***

1. An official, competitive score on a GMAT, GRE or LSAT exam taken within the past five years. When evaluating test scores, the admissions committee looks for a balance between verbal, quantitative and analytical writing strengths.
2. Documentation of professional work experience;
3. Evidence of professional certifications relevant to the accounting profession;
4. Evidence of advanced degrees from a regionally accredited college or university or the international equivalent;
5. A one-page résumé;
6. Letter(s) of recommendation from employers, faculty members or others who can attest to the applicant's scholarly ability and/or agency;
7. A writing sample demonstrating analytical and explanatory skills; this writing sample may explain the student's motivation for applying to the program and career intent after graduation.

Admission into an Executive Accounting Master's Program does not constitute admission into a non-

Executive Accounting Master's Program. Executive students can only register for courses in the Executive Programs.

## **Degree Requirements**

To qualify for the degree of Master of Accounting (M.AC.) or Master of Taxation (M.TX.), candidates must:

1. Meet all general requirements of the University for a master's degree, and complete the program within five years.
2. Complete or receive credit for a minimum of 15 credits of Business Foundation courses. No grade lower than "C" will be accepted. The number of foundation courses to be taken depends on the student's undergraduate background and performance in business and related subjects. Students will be notified of these and other requirements upon admission.
3. Complete 30 credits of required and elective credits with a minimum cumulative GPA of "B" (3.0). Any grade below "C" is considered a failure and the course must be retaken. A maximum of two 5000-level courses may be taken toward completion of the 30 credits in the Master of Accounting program with advance written permission of the College of Business Office of Graduate Student Programs. These approved courses count toward program electives. Students seeking a M.AC. degree may be required to complete Accounting Foundation courses. These courses are in addition to the 30 required credits as described in the Master of Accounting section below.
4. Complete all requirements of the Graduate Communication Program.

## **Academic Standing Policy**

Student continuation in a program requires satisfactory progress toward the graduate degree. Evidence of such progress includes maintenance of a cumulative 3.0 average. In addition, only grades of "A," "A-," "B+," "B," "B-," "C+" or "C" are acceptable in fulfilling graduate school requirements.

Failure to attain a 3.0 cumulative average within two successive semesters of active enrollment following the semester in which the deficiency first occurred will result in automatic dismissal.

Students who fail to attain a 3.0 FAU graduate GPA will be placed on academic warning. Students on warning are subject to academic dismissal from the College. In conjunction with the Graduate College's warning and dismissal procedures, the College of Business Student Academic Services Office requires many categories of students on warning to complete an academic progression plan (APP) to establish a path for success. The APP is a contractual agreement that outlines particular courses and grades to

reestablish good academic standing. APPs should generally outline a path (usually not more than two semesters) to reestablish a 3.0 GPA. Students who do not fulfill the obligations of their APPs are recommended for dismissal to the Dean of the Graduate College.

Graduate students with low GPAs (less than 2.5) after their first semester may be required to complete an APP. All students on academic warning for two continuous semesters are required by the College of Business to complete an APP during their third semester; the College may enact registration holds to prohibit a student's future enrollment until the APP is finalized. Students who do not fulfill the obligations established in the APP are recommended for dismissal to the Dean of the Graduate College.

The School of Accounting and the Director of Graduate Programs in Accounting reserve the right to dismiss any student at any time if the student is deemed to be making unsatisfactory progress toward degree completion within the stipulated time.

### **Business Foundation Component**

The foundation component introduces the broad field of business administration and the fundamental quantitative techniques used in business analysis. These courses should be completed before the student takes other graduate courses. The number of foundation credits required for each student depends on the student's previous academic background. Additional information may be obtained from the College of Business Office of Graduate Student Programs. In special cases, the student may take a foundation course concurrently with a graduate course with the permission of the Director of the School of Accounting. Courses in the Business Foundation Component are:

Financial Accounting Concepts*	ACG 6027	3
Seminar in Modern Economic Concepts and Theories	ECO 6008	3
Financial Management*	FIN 6406	3
Marketing Functions and Processes	MAR 6055	3
Data Analysis for Managers	QMB 6603	3

\* Business Foundation for the Executive Program.

## **ACCOUNTING** **MASTER OF ACCOUNTING (M.AC.)** **TRADITIONAL PROGRAM**

## Accounting Information Systems Concentration Tax Concentration

### ACCOUNTING MASTER OF ACCOUNTING (M.AC.) EXECUTIVE PROGRAM

#### Concentrations:

**Business Valuation**

**Digital Accounting Forensics and Data Analytics**

**Forensic Accounting**

**Forensic Accounting and Business Valuation**

**Forensic Accounting and Digital Accounting Forensics**

**Internal Auditing**

**Professional Accounting**

**Tax**

*(Minimum of 30 credits required)*

Students with an accounting background will likely receive a waiver for all Accounting Foundation courses. Students without an accounting background or those who did not perform at a satisfactory level in undergraduate courses may have to resolve deficiencies through the Accounting Foundation Component.

#### Accounting Foundation Component

Students with an accounting background will likely receive a waiver for all accounting foundation courses, but those without an accounting background or who did not perform at a satisfactory level in undergraduate courses may have to resolve deficiencies. The accounting foundation provides the student with the minimum accounting knowledge required to complete the Master of Accounting program. These courses, or the undergraduate equivalent, must be completed with a grade of "C" or better and should be taken as early in the program as possible because they serve as prerequisites for many other courses. Courses in the accounting foundation component are:

---

Financial Reporting and Accounting Concepts <i>(Undergraduate equivalent of Intermediate Theory 1 and 2 (ACG 3131 and ACG 3141.)</i>	ACG 6137	3
---	----------	---

---

Auditing Theory and Practice <i>(Undergraduate equivalent of Auditing and Assurance Services 1 (ACG 4651.)</i>	ACG 6635	3
Cost Accounting Theory and Practice <i>(Undergraduate equivalent of Cost Accounting (ACG 3341.)</i>	ACG 6347	3

The exact number of accounting foundation credits required for each student will depend on the student's previous academic record. These foundation credits are in addition to the 30 credits required in the Master of Accounting program.

Accounting foundation courses may not be used to satisfy the core or elective requirements for the Master of Accounting traditional program; however, students in the Executive Program without an undergraduate business degree may include required Accounting Foundation courses as program electives.

### **Communication Requirement**

The communication course requirement works in tandem with other accounting or tax courses where the student must demonstrate proficiency in written and verbal communication appropriate to both the academic and professional environments. Students may receive an incomplete in the communication strategies course until they also complete the writing requirements in the tandem course. Once the communication requirement is met, a grade of satisfactory replaces the incomplete grade. Students who do not meet the communication requirement receive an unsatisfactory grade and must register for the course again in the next active semester, or they will be administratively dropped from graduate courses. Students in the traditional Master of Accounting program must register for the communication requirement in their first semester in the program unless they are only taking Business Foundation courses.

Students take one of the following courses depending on their program:

- Communication Strategies for Business Professionals and Core-Course Follow-Up (GEB 6215) -- Traditional Master of Accounting and Master of Taxation
- Communication Strategies for Professional Accountants (ACG 6396) – Executive Master of Accounting
- Communication Strategies for Tax Accountants (TAX 6878) – Executive Master of Taxation

### **Master of Accounting (M.AC.) - 30 credits plus foundation courses, if needed**

The accounting profession offers many diverse career options. While the undergraduate degree provides the background for many jobs, the courses in the Master of Accounting program are needed to develop the skills for many of the more desirable jobs in the profession and to acquire the requisite knowledge for successful completion of the CPA exam. The master's program focuses on communications skills, complex problems and understanding the business environments facing today's professionals. Accordingly, we offer many different paths depending on the unique interests of students. We encourage students to begin thinking about career possibilities early in their college careers so that they have the ability to plan their education to meet their career goals. The School of Accounting has student organizations to help students learn about the profession, becoming a Certified Public Accountant, and career options that do not require becoming a CPA. We have faculty who have worked in the profession and who are eager to advise students. Please call the advising office for further information.

### **Traditional Master of Accounting (M.AC.) - 30 credits plus foundation courses, if needed**

#### **Traditional Master of Accounting Core**

Advanced Accounting Theory	ACG 6135	3

## PROFESSIONAL ACCOUNTING GRADUATE CERTIFICATE

*(Minimum of 12 credits required)*

The certificate in Professional Accounting is designed for students who need additional upper-division accounting or tax coursework to meet professional licensure requirements, but who do not wish to pursue a graduate degree. The certificate gives these students the opportunity to obtain the coursework they need. It is available for traditional as well as executive students.

Students must complete 12 credits of coursework and all courses must be completed with a grade of "C" or better. Students may select from the courses below or select up to 6 credits of preapproved 3000-4000-level ACG/TAX courses that were not taken as part of their undergraduate degree program. Prerequisite restrictions apply.

---

**Select from courses below**

*(or 6 credits of preapproved upper-division ACG/TAX courses)*

---

Advanced Accounting 1	ACG 5205	3
Auditing and Assurance Services 2	ACG 5647	3
Internal Auditing	ACG 5677	3
Financial Statement Analysis	ACG 6175	3
Accounting for E-Commerce	ACG 6465	3
IT Auditing	ACG 6625	3
Accounting Fraud Examination Concepts	ACG 6686	3

---

Credits counted toward an undergraduate or graduate degree program may not be used toward the certificate in Professional Accounting. The certificate is only open to non-degree-seeking students. However, with advisor approval, students may begin the certificate during their last semester of undergraduate coursework. Students earning more than one grade below a "C" in the approved certificate courses may not receive the certificate in Professional Accounting or register for additional graduate courses.

## **TAXATION**

## Accounting Graduate Policies

### ***Transfer Credit***

No transfer credit is allowed in the Master of Taxation, Master of Accounting or related Executive Master's Programs.

### ***Time Limit Policy Statement***

Candidates for either the M.AC. or M.TX. degree must complete all work within a consecutive five-year term after initial admission into the graduate program.

### ***Prerequisite Policy Statement***

Any student not meeting course prerequisites may be dropped at any time during a semester if such deficiency is determined to exist.

### ***Communication Strategies for Business Professionals and Core-Course Follow-Up (GEB 6215)***

Written and verbal communication skills are integrated components of both the M.AC. and M.TX. programs. Students must demonstrate their written and verbal communication proficiency, appropriate to both the academic and professional environments, in one or more of their accounting courses before they successfully complete GEB 6215\* and in their successful completion of GEB 6215. This course includes:

1. Weekly professional development sessions;
2. Written course assignments;
3. Classroom presentations.

M.AC. and M.TX. students must register for GEB 6215 in their first semester in the program unless they are only taking Business Foundation courses. Registration in GEB 6215 is required when the student enrolls in the first required or elective graduate-level course. In the Master of Accounting program this includes the 5000-level elective courses.

Once students satisfy the Graduate Communication Program requirements, a grade of satisfactory ("S") replaces the incomplete ("I") grade. Students who fail to advance through GEB 6215 receive an unsatisfactory grade ("U") in the course and must register for the course again.

Failure to complete GEB 6215 within the designated time frame will result in the student's ineligibility to take further graduate-level courses. Students who have received a grade of "U" and who do not re-register for GEB 6215 in the next active semester after issuance of the "U" grade will be administratively dropped from graduate courses.

Applications for the degree will not be accepted unless all certification requirements have been completed prior to the graduating term.

\*Communication courses for students in the Executive Accounting and Executive Taxation Programs are different from those required of traditional M.AC. and M.TX. students.

## ECONOMICS

### Faculty:

Escaleras, M., Chair; Banerjee, K.; Bosshardt, W., Director, Center for Economic Education; Boudreaux, C.; Caudill, S. B.; Faria, J. R.; Ghosh, S.; Gropper, D.; Levy, E.; Levy, T.; Liu, L.; Luther, W. J., Graduate Director; Manage, N.; Rhodd, R.; Van Tassel, E.

The Economics Department offers two undergraduate programs that prepare students for careers in business and government, as well as for graduate study. The General Economics program provides a broad liberal arts education with emphasis in social science and leads to a B.S. degree. The Economics program with a concentration in Business Economics has the same diverse foundation in core business principles as other majors in the College, but also integrates business and economics courses in such a way that students can analyze business problems with the insight that the economics discipline offers. This program leads to a B.B.A. or B.S. degree with the B.B.A. option available in person and online. Both undergraduate degree programs require a minimum of 120 credits. Students must complete a minimum of 45 credits at the upper-division (3000 and 4000) level. The department also offers several Economics minors.

The department also offers an [Honors Program in Economics](#) that provides undergraduate students the opportunity to achieve academic excellence beyond the level of standard coursework.

A [combined degree program](#) - Bachelor of Business Administration or Bachelor of Science with major

in Economics to Master of Science with major in Economics - is available for students interested in pursuing graduate work in Economics.

For students pursuing graduate study, the department offers a Master of Science in Teaching and a Master of Science with Major in Economics with three concentrations available: International Economics, Financial Economics and Econometrics and Data Analytics.

### **Economics Graduate Study Prerequisites**

Economics majors interested in a graduate degree in Economics should include the following courses as part of their undergraduate degree program.

Mathematical Modeling in a Connected World	ECO 4401	3
Introduction to Econometric Methods	ECO 4421	3
Calculus with Analytic Geometry 1	MAC 2311	4
Calculus with Analytic Geometry 2	MAC 2312	4
Matrix Theory	MAS 2103	3

## **ECONOMICS**

**BACHELOR OF BUSINESS ADMINISTRATION (B.B.A.)**

**BACHELOR OF SCIENCE (B.S.)**

### **Business Economics Concentration**

*(Minimum of 120 credits required)*

[Link to Master's Programs](#) / [Link to Minors](#)

### **Prerequisite Coursework for Transfer Students**

Students transferring to Florida Atlantic University must complete both lower-division requirements (including the requirements of the General Education Program) and requirements for the college and major. Lower-division requirements may be completed through the A.A. degree from any Florida public college, university or community college or through equivalent coursework at another regionally accredited institution. Before transferring and to ensure timely progress toward the baccalaureate degree, students must also complete the prerequisite courses for their major as outlined in the

## *Transition Guides .*

All courses not approved by the Florida Statewide Course Numbering System that will be used to satisfy requirements will be evaluated individually on the basis of content and will require a catalog course description and a copy of the syllabus for assessment.

### **General Economics**

(Liberal Arts Foundation)

General Economics combines the requirements of the Economics major with cognate work in the social sciences and electives. The following courses are required.

### **Admission Policy**

1. Pass the following pre-major courses, ECO 2013, ECO 2023 and MAC 2233, with grades of "C" or better. For pre-Economics admissions GPA calculation, only the highest grade of multiple attempts is used.

**Note:** Students who have attempted any of the pre-Economics admissions courses more than three times, including withdrawals ("W"), cannot be admitted.

2. Earn a minimum of 51 credits in addition to the 9 credits noted above for the pre-major courses.
3. Complete the foreign language entry (FLENT) requirements.

### **Pre-Business Foundation Coursework**

These are previously listed under the heading [Degree Requirements \(B.B.A. and B.S.\)](#) and subheading Pre-Business Foundation Coursework in this section.

### **Economics Course Requirements**

The program requires 27 credits of economics courses (beyond Microeconomic Principles and Macroeconomic Principles). All economics courses must be completed with a grade of "C" or better. The following are required.

---

#### **Four courses in Economic Foundations**

---

Intermediate Microeconomics	ECO 3101	3
Intermediate Macroeconomics	ECO 3203	3
Introduction to Econometric Methods	ECO 4421	3

---

Economic Policy Analysis	ECO 4933	3
--------------------------	----------	---

<b>Five additional economics courses</b> (3 credits each at the 3000 level or above)		15
---	--	----

### Social Science Cognates

Students must complete 12 credits of work in the social sciences. The departments that comprise the social sciences are Anthropology, Geosciences, History, Political Science, Psychology and Sociology. The following courses are suggested as two of the courses required; however, students may choose any course from the social sciences.

International Political Economy	INR 3702	3
---------------------------------	----------	---

Government and the Economy	PUP 4710	3
----------------------------	----------	---

### Free Electives or Foreign Language

Students are required to complete an additional 21 credits that may be taken in any department. Care should be exercised to meet the minimum requirement of 45 credits at the upper-division level (3000 and 4000). Additionally, elective credit may be utilized to meet the foreign language graduation requirement of two semesters of the same college-level language (8 credits) or equivalent competency.

### Business Economics Concentration

(College of Business Foundation)

In addition to the University and College of Business degree requirements listed in the [Degree Requirements](#) section of this catalog, Business Economics concentration students must complete the major requirements below.

#### *Business Economics Course Requirements*

The program requires 21 credits of economics courses (beyond Microeconomic Principles and Macroeconomic Principles). All economics courses must be completed with a grade of "C" or better. The following are required.

#### **Four courses in Economic Foundations**

Intermediate Microeconomics	ECO 3101	3
-----------------------------	----------	---

Intermediate Macroeconomics	ECO 3203	3
-----------------------------	----------	---

Introduction to Econometric Methods	ECO 4421	3
Economic Policy Analysis	ECO 4933	3
<b>Three additional economics courses</b> (3 credits each at the 3000 level or above)		9

## **ECONOMICS**

### UNDERGRADUATE MINOR FOR NON-BUSINESS MAJORS

*(Minimum of 15 credits required)*

A minor in Economics shall consist of a minimum of 15 credits in upper-division economics courses. The following courses are required, all with a grade of "C" or better.

#### **Core Courses**

Intermediate Microeconomics	ECO 3101	3
Intermediate Macroeconomics	ECO 3203	3

#### **Electives**

Three economics courses (3 credits each at the 3000 level or above)		9
--	--	---

A minimum of 12 of the 15 credits must be earned from FAU, including the core courses.

## **INTERNATIONAL ECONOMICS**

### UNDERGRADUATE MINOR FOR NON-BUSINESS MAJORS

*(Minimum of 15 credits required)*

A minor in International Economics shall consist of a minimum of 15 credits in upper-division economics courses. The following courses are required, all with a grade of "C" or better.

#### **Core Courses**

Intermediate Microeconomics	ECO 3101	3
-----------------------------	----------	---

Intermediate Macroeconomics	ECO 3203	3
<b>International Economics Courses</b>		
International Trade	ECO 4704	3
International Monetary Economics	ECO 4713	3
International Economic Development	ECS 3013	3

A minimum of 12 of the 15 credits must be earned from FAU, including the core courses.

## **ECONOMICS**

### **UNDERGRADUATE MINOR FOR BUSINESS MAJORS**

*(Minimum of 9 credits required)*

The Economics minor is designed for non-Economics Business majors requiring the Business Core courses. Because part of its requirements include successful completion of the Business Core classes, the minor is usually not practical for Health Administration majors.

The Economics minor requires three upper-division economics courses (3000 level or above with a grade of "C" or better.

A maximum of 3 credits used for the Economics minor may count toward other Business major requirements. A minimum of two courses (6 credits) must be exclusive to the minor. A minimum of 6 credits must be taken in residence at FAU. The acknowledgment of the minor is official upon successful completion of a College of Business degree program.

## **ECONOMICS**

### **UNDERGRADUATE MINOR FOR SECONDARY SOCIAL SCIENCE EDUCATION MAJORS**

*(Minimum of 12 credits required)*

This minor consists of 12 credits. The following courses are required, all with a grade of "C" or better.

**Core Course (choose one)**

Intermediate Microeconomics	ECO 3101	3
Intermediate Macroeconomics	ECO 3203	3

**Upper-Division Economics Courses (choose three)**

ECO, ECS, ECP upper-division courses at 3 credits each		9
--	--	---

A minimum of 9 of the 12 credits must be earned from FAU, including the core courses.

**HONORS PROGRAM IN ECONOMICS**

The Honors Program in Economics provides FAU undergraduate students the opportunity to achieve academic excellence beyond the level of standard coursework by completing honors level enrichment in Economics. Students interested in pursuing an Honors designation in Economics are required to meet the eligibility and admission requirements noted below. Each student's Honors program of study includes 12 credits in Honors coursework in upper level Economics courses.

Undergraduate students who successfully fulfill all requirements below and have a final cumulative GPA of 3.25 or greater at the time of degree conferral will receive a designation of Honors in the Major on their transcript. The transcript designations is **Honors in Economics: [Honors Capstone Research]**

**Eligibility Requirements**

Eligible students have:

1. Completed Microeconomics and Macroeconomics principles (ECO 2023 and ECO 2013), Methods of Calculus (MAC 2233), and Introductory Statistics (STA 2023) with a minimum cumulative GPA in those courses of 3.5;
2. Attained a cumulative undergraduate GPA of at least 3.25 overall;
3. Submitted a formal application after completion of 30 credits no later than three weeks prior to the beginning of the semester for which students seek to enroll in the Honors Program in Economics. Most students will apply for the program after completing their sophomore year.

**Admissions Requirements**

1. Application form;
2. Unofficial transcript;

3. Resume;
4. Personal statement;
5. A letter of support by a member of the Economics department faculty (a Principles instructor).  
The director will schedule a brief interview before enrolling students into the honors program.

### **Standards for Maintaining Active Status**

Students must:

1. Maintain good academic and ethical standing;
2. Maintain cumulative undergraduate GPA of at least 3.25 overall;
3. Maintain cumulative undergraduate GPA of 3.5 in all four honors courses.

If any of the above standards for maintaining eligibility in the program are not met, students will be advised accordingly on how to undertake remedial actions. Students will be required to bring their GPA up to the required 3.5 by the end of the program. If students are not able to bring their GPA in the four courses back up to a 3.5 or their cumulative GPA falls below 3.25, they will be removed from the honors program, but credits will still apply toward their undergraduate degree in economics.

Students will not be allowed to continue in the Honors Program in Economics for Violation of the Code of Academic Integrity or any grade of less than B in an Honors course.

### **Honors Program Curriculum**

The Honors Program in Economics consists of four courses (Students who have already taken any of the core courses in the honors program as a non-honors course [Intermediate micro, Intermediate macro or Econometrics] are ineligible for the program. The four courses are: an Honors section of Intermediate Microeconomics, an Honors section of Intermediate Macroeconomics, an Honors section of Introduction to Econometrics, and a senior capstone Honors research course called Honors Senior Seminar in Economics. Students will take Honors Intermediate Microeconomics in the fall semester of their junior year, followed by Honors Intermediate Macroeconomics and Honors Applied Econometrics in the spring semester of their junior year. In the fall of their senior year they will take the capstone undergraduate research course.

### **Honors Level Enrichment**

Honors level enrichment will be provided in the form of extensive mentoring in practical research by departmental faculty or approved departmental affiliated faculty culminating in production of a research project. Honors students will meet regularly with a faculty mentor and a mentor from our Advisory Board. Honors students will be invited to all faculty seminars and workshops. Students will have a total of two years to complete all requirements for the honors program, after which they will

have to meet with the director to discuss their progress.

## Honors Capstone Research Outcomes

The anticipated outcomes for students in this Honors program include:

1. Production of a high-quality report for an external agency or internal use, a research grant application, conference paper or a journal article;
2. Dissemination of research results via a presentation or a poster at a local, regional, national or international research conference/ symposium;
3. If the requirements are not met, the student will receive a grade for the course that will count toward her/his degree in Economics but will not receive the Honors Designation;
4. Students will be encouraged to seek opportunities for publication/ presentation such as participation in the *Undergraduate Research Symposium*, *Distinction through Discovery* competitions, *FAU Undergraduate Research Journal*, and National Collegiate Honors Society conference, among others;
5. All Honors students must complete the Honors Senior Seminar course, which will involve individual supervised research. Students complete a research paper on a topic of their choosing. At the end of the semester the Honors students will present their research to the class, members of the faculty and other guests and submit the paper to a journal for consideration for publication.

## COMBINED PROGRAM

### ECONOMICS

### BACHELOR OF BUSINESS ADMINISTRATION (B.B.A.) OR BACHELOR OF SCIENCE (B.S.) TO MASTER OF SCIENCE (M.S.) COMBINED PROGRAM

The department offers a combined Bachelor of Business Administration in Economics or Bachelor of Science in Economics to Master of Science in Economics degree program. Students in this combined program may count up to 9 credits of approved graduate coursework (5000 level or higher) toward both their bachelor's degree and master's degree.

1. The student has met the minimum 120 credits for the bachelor's degree; and
2. The student has taken a minimum of 30 credits in 5000 level or higher courses for the master's program.

With the approximate duration of five years, this combined program provides attractive ways for students to continue their graduate work. Students will complete and graduate from their bachelor

degree first, and then continue coursework to finish their master's degree program.

### **Prerequisite Coursework for Transfer Students**

Students transferring to Florida Atlantic University must complete both lower-division requirements and requirements for the college and major. Lower-division requirements may be completed through the A.A. degree from any Florida public college, university or community college or through equivalent coursework at another regionally accredited institution. Before transferring and to ensure timely progress toward the baccalaureate degree, students must also complete the pre-requisite courses for their major as outlined in the *Transition Guides*.

All courses not approved by the Florida Statewide Course Numbering System that will be used to satisfy requirements will be evaluated individually on the basis of content and will require a catalog course description and a copy of the syllabus for assessment.

### **Admission Requirements**

The GRE/GMAT requirement is waived for this program. To be eligible for the combined program, the baccalaureate student in Economics should:

1. Have a cumulative FAU GPA of 3.25 or better at the end of their junior year. Note that the cumulative FAU GPA of at least 3.25 must be maintained until the completion of the bachelor's degree in Economics.
2. Formally apply to the combined program, completing the admissions process at least one semester prior to the beginning of the master's degree portion of their program.

Once admitted to the program, students begin taking graduate courses (5000/6000 level courses) in their senior year that would apply to both the bachelor's and master's degree programs. Students in the combined program must maintain continuous enrollment, in full-time status, during their bachelor's degree to remain in the combined program. Once students are admitted to the master's degree program, they must maintain continuous enrollment to remain in good standing. Students must also meet all of the degree requirements of the graduate program.

### **Degree Requirements**

To be eligible for the combined B.B.A. or B.S. in Economics to M.S. in Economics Degree Program, students must fulfill the following requirements:

1. Completion of the requirements for the B.B.A. or B.S. in Economics, and other requirements stipulated by the University or College.
2. Completion of all requirements for the M.S. in Economics.

## Credits Counted toward Bachelor's and Master's Degrees

The following undergraduate course requirements may be replaced with the shown graduate-level courses (up to a total of 9 credits). These graduate credits count toward both the bachelor's degree and master's degree.

---

<b>Undergraduate Course Requirements</b>	<b>Graduate Course Substitution (Choose among the following courses)</b>
--	--

---

Upper Division Economics Elective (3 credits)	Advanced Microeconomics, ECO 6115 Advanced Macroeconomics, ECO 6206 Advanced Monetary Economics, ECO 6216 Advanced Mathematical Economics, ECO 6403
Upper Division Economics Elective (3 credits)	Advanced Game Theory and Applications, ECO 6409 Advanced Econometrics, ECO 6426 Advanced International Trade, ECO 6706
Upper Division Economics Elective (3 credits) or Upper Division Business Elective (3 credits)	Advanced International Development, ECO 6709 Advanced International Monetary Economics, ECO 6716

## MASTER'S PROGRAMS

### ECONOMICS

#### MASTER OF SCIENCE (M.S.)

##### Econometrics and Data Analytics Concentration

##### Financial Economics Concentration

##### International Economics Concentration

The Master of Science in Economics degree prepares students for careers in government and business and provides a basis for Ph.D. study. The program is designed to permit properly prepared full-time students to complete the requirements in one year. Many of the courses are offered in the late afternoon or evening.

### Admission Requirements

**Unconditional Acceptance:** Unconditional or full acceptance into the master's program is granted to applicants who have earned:

1. A bachelor's degree from an accredited institution.
2. A cumulative grade point average of 3.0 on a 4.0 scale in the last 60 (or equivalent) credits of college coursework leading toward a bachelor's degree. Post-baccalaureate coursework from an AACSB-accredited business school not included in an advanced degree may be included in the calculation.
3. Submit an official, competitive score on a GMAT or GRE taken within five years. A score of at least 1000 (combined quantitative and verbal) or 150 Verbal, 150 Quantitative and 4.0 Analytical Writing on the Graduate Record Examination (GRE) or a score of at least 500 on the Graduate Management Admission Test (GMAT). When evaluating GMAT/GRE scores, the admissions committee looks for a balance between verbal, quantitative and analytical writing strengths. All three components of the GMAT/GRE are required.

**Conditional Admission:** Conditional admission may be given to applicants who fall just short of the requirements. Persons who receive conditional admission have only one academic year in which to meet the specific conditions established by the Director of Master's Programs in Economics. By the end of that year, the director notifies the Graduate College of the final action to be taken, either unconditionally accepting or dropping the student from the master's program.

### **Degree Requirements**

The Master of Science in Economics Program (minimum of 30 credits) provides the General Economics program and three concentrations: International Economics, Financial Economics and Econometrics and Data Analytics. The General Economics major offers the tools for in-depth analysis of economics. The International Economics concentration gears the economics program to an international dimension of business in an environment of globalization. The Financial Economics concentration aims to blend the core of economics with the essence of finance in such a way that students take full advantage of the integration of the two disciplines. The Econometrics and Data Analytics concentration satisfies the growing demand by employers for working professionals with skills in economics and data analytics, including offering experience with time series and panel data, business analytics, Big Data Analytics and Blockchain. All economic fields lead to a Master of Science degree with major in Economics. The general program and three concentrations have a common core of economics courses, with the remaining requirements tailored to each area. M.B.A. Foundation courses (ACG 6027, ECO 6008, FIN 6406 and MAR 6055) may be required as prerequisites for desired graduate electives but cannot count for graduate credit.

**Core of Economics Courses (12 credits)**

Advanced Microeconomics	ECO 6115	3
Advanced Macroeconomics	ECO 6206	3
Advanced Mathematical Economics	ECO 6403	3
Advanced Econometrics	ECO 6426*	3

\* ECO 4422 cannot substitute for ECO 6426.

The core classes are taken by all Economics students. Additional requirements for the General Economics program and three concentrations are as follows:

**General Economics**

Completion of the core classes above and the following.

***Two Field Courses in Economics (6 credits)***

Advanced Monetary Economics	ECO 6216	3
Advanced Game Theory and Applications	ECO 6409	3
Topics in Econometrics	ECO 6424	3
Advanced International Trade	ECO 6706	3
Advanced International Development	ECO 6709	3
Advanced International Monetary Economics	ECO 6716	3
International Economics Field Experience	ECO 6958	3

***Two Graduate Courses in Business (6 credits):***

1. Students with no background in business must take FIN 6406 before taking any other finance course. Foundation courses such as FIN 6406 do not count as graduate credit.
2. Students with prior training in business may select two courses from the approved lists for Financial Economics or International Economics.

***Master's Thesis or Graduate Economic Electives (6 credits):***

Students may elect to write a master's thesis for 6 credits or take 6 additional credits of Economics courses. One course may be taken at the 5000 level.

### **International Economics Concentration**

Completion of the core classes above and the following.

---

#### ***Two Field Courses in Economics (6 credits)***

Advanced International Trade	ECO 6706	3
Advanced International Development	ECO 6709	3
Advanced International Monetary Economics	ECO 6716	3
International Economics Field Experience	ECO 6958	3

---

#### ***Two Graduate Courses in Business (6 credits)***

Multinational Finance	FIN 6605*	3
International Business Operations	MAN 6614	3
Global Business Strategy	MAN 6721	3
Emerging Market Economies	MAN 6728	3
Global Environment of Management	MAN 6937	3

\* Students selecting FIN 6605 must complete FIN 6406, or its equivalent, as a prerequisite that cannot count for graduate credit.

#### ***Master's Thesis or Graduate Electives in Economics or International Business (6 credits):***

Students may elect to write a master's thesis for 6 credits or take 6 additional credits in economics and/or international business. One course, if an economics course, may be taken at the 5000 level.

### **Financial Economics Concentration**

Completion of the core classes above and the following:

---

#### ***Two Field Courses in Economics (6 credits)***

Advanced Monetary Economics	ECO 6216	3
-----------------------------	----------	---

Advanced International Monetary Economics	ECO 6716	3
International Economics Field Experience	ECO 6958	3

***Two Graduate Courses in Finance (6 credits)***

Financial Management	FIN 6406*	3
----------------------	-----------	---

\* This course or its equivalent must be completed before any other finance course and cannot be counted for graduate credit. Students with prior training in finance may choose two courses from the following:

Seminar in Financial Markets	FIN 6246	3
Financial Management: Investment Decisions and Policy	FIN 6436	3
Investment Management	FIN 6515	3
Financial Risk Management and Derivatives	FIN 6537	3
Multinational Finance	FIN 6605	3
Theory of Financial Management	FIN 6804	3
Advanced Financial Management	FIN 6806	3

***Master's Thesis or Two Graduate Courses in Economics or Finance (6 credits):***

Students may elect to write a master's thesis for 6 credits or take 6 additional credits in economics and/or finance. One course, if an economics course, may be taken at the 5000 level.

***The Master's Thesis***

Students electing to write a master's thesis may select the thesis topic and thesis committee. The thesis is written under supervision of this committee, composed of a thesis director and at least two other faculty members. One member of the committee must be from outside the department.

**Econometrics and Data Analytics Concentration**

Completion of the core classes above and the following:

***Three Field Courses (9 credits)***

Topics in Econometrics	ECO 6424	3
------------------------	----------	---

Panel Data	ECO 6427	3
Introduction to Business Analytics and Big Data	ISM 6404	3
Advanced Business Analytics	ISM 6405	3
<b><i>One Graduate Course in Information Technology and Operations Management (ITOM) (3 credits)</i></b>		
Data Mining and Predictive Analysis	ISM 6136	3
Business Innovation and Artificial Intelligence	ISM 6427C	3
Blockchain and Crypto Assets: Digital Business Transformation	ISM 6455	3
Data Management and Analysis with Excel	QMB 6303	3
Additional course from Field Courses above	ECO/ISM	3

***Master's Thesis or Two Graduate Courses in Econometrics or ITOM (6 credits):***

Students may elect to write a master's thesis for 6 credits, take 6 additional credits in economics (ECO 6000 level or higher), or take 3 additional credits in economics (ECO 6000 level or higher) and 3 additional credits from the list of ITOM courses above.

***The Master's Thesis***

Students electing to write a master's thesis may select the thesis topic and thesis committee. The thesis is written under supervision of this committee, composed of a thesis director and at least two other faculty members. One member of the committee must be from outside the department.

**ECONOMICS****MASTER OF SCIENCE IN TEACHING (M.S.T.)**

Economics offers a Master of Science in Teaching. The following option is for students who hold State of Florida certification in secondary social studies teaching. A minimum of 30 credits is required as follows:

1. Eighteen credits of required courses in the Master of Science in Economics program;
2. Six credits in College of Education courses;
3. Six credits of directed research in economics (a final comprehensive paper with modified thesis

format is required).

## FINANCE

### Faculty:

Pennathur, A., Chair; Agapova, A.; Castater, N.; Cheng, P.; Cole, R.; Cumming, D., DeSantis Distinguished Professor of Finance and Entrepreneurship; Dubois, P.; Garcia-Feijoo, L.; Giannetti, A.; Gropper, D.; Javakhadze, D.; Johan, S.; Johnson, K.; Knight, R.; Pomeranets, A.; Yang, C.

The Department of Finance is committed to providing quality instruction. Its objective is to prepare students for careers in finance and other industries. The department considers as an integral part of its mission the production of scholarly research and involvement of its faculty in providing service to the College, the University and the community.

Undergraduate Finance programs include a Bachelor of Science (B.S.), a Bachelor of Business Administration (B.B.A.) and an [online B.B.A.](#) Minors in [Finance](#), [FinTech \(Financial Technology\)](#), [Investment Management](#) and [Real Estate](#) are offered as well as FinTech (Financial Technology) [undergraduate](#) and [graduate](#) certificates, an Investment Management [undergraduate](#) certificate and Risk Management [undergraduate](#) and [graduate](#) certificates. The department also offers an executive Master of Science (M.S.) in Finance while the traditional Master of Science in Finance is on hiatus and currently not accepting students.

[Link to Master's Programs](#)

## FINANCE

### BACHELOR OF BUSINESS ADMINISTRATION (B.B.A.)

### BACHELOR OF SCIENCE (B.S.)

The Finance Department provides high-quality instruction in the various areas of finance so that students understand the finance functions of a business enterprise. To this end, the department offers courses in corporate finance, investments, financial markets and institutions, international finance, banking, risk management/enterprise risk management and personal finance.

Along with the University and College of Business degree requirements listed in the [Degree Requirements](#) section of this catalog, Finance program students must complete the requirements below.

## Prerequisite Coursework for Transfer Students

Students transferring to Florida Atlantic University must complete both lower-division requirements (including the requirements of the General Education Program) and requirements for the college and major. Lower-division requirements may be completed through the A.A. degree from any Florida public college, university or community college or through equivalent coursework at another regionally accredited institution. Before transferring and to ensure timely progress toward the baccalaureate degree, students must also complete the prerequisite courses for their major as outlined in the [Transition Guides](#) .

All courses not approved by the Florida Statewide Course Numbering System that will be used to satisfy requirements will be evaluated individually on the basis of content and will require a catalog course description and a copy of the syllabus for assessment.

## Pre-Business Foundation Coursework

These are previously listed under the heading [Degree Requirements \(B.B.A. and B.S.\)](#) and subheading Pre-Business Foundation Coursework in this section.

## Business Core Requirements

These are previously listed under the heading [Degree Requirements \(B.B.A. and B.S.\)](#) and subheading College of Business Core in this section.

## Finance Major (18 credits)

The program requires 18 credits of upper-level finance courses, beyond FIN 3403, as outlined below. A grade of "C" or better is required in all major courses.

---

### Finance Major Required Courses

Financial Institutions	FIN 4303	3
Advanced Managerial Finance	FIN 4424	3
Investment Analysis	FIN 4504	3

***Choose four Finance major electives. The electives are to be selected to align with career paths of interest; for example, investment management, corporate finance, investment banking, commercial banking, Fintech, real estate or risk management and insurance.***

Crowdfunding	ENT 4512	3

## FINANCE

### UNDERGRADUATE MINOR

*(Minimum of 9 credits required)*

The Finance minor is designed for non-Finance Business majors requiring the Business Core courses. Since part of the requirements include successful completion of the Business Core classes, the minor is usually not practical for General Economics or Health Administration majors. The Finance minor requires the following courses with a grade of "C" or better:

#### Required Courses

Financial Institutions	FIN 4303	3
------------------------	----------	---

Investment Analysis	FIN 4504	3
---------------------	----------	---

---

***One of the following courses***

---

Advanced Managerial Finance	FIN 4424	3
-----------------------------	----------	---

Cases in Financial Management	FIN 4422	3
-------------------------------	----------	---

A maximum of 3 credits used for the Finance minor may count toward other Business major requirements. A minimum of two courses (6 credits) must be exclusive to the minor. A minimum of 6 credits must be taken in residence at FAU. The acknowledgment of the minor is official upon successful completion of a College of Business degree program.

## **FINTECH (FINANCIAL TECHNOLOGY) UNDERGRADUATE MINOR UNDERGRADUATE CERTIFICATE**

*(Minimum of 12 credits required)*

### [Link to FinTech Graduate Certificate](#)

The FinTech minor and certificate are offered jointly by the Department of Finance and the Department of Information Technology and Operations Management (ITOM). These programs enhance the qualifications of students pursuing careers in fields related to business, finance and information technologies. Students acquire knowledge and skills in online and digital business and digital finance, as well as in developing, analyzing and enhancing a company's ability to access capital through financial technologies. Also, students acquire knowledge and skills pertinent to the use of financial technology in trading. Professions and majors benefiting from the minor and certificate include finance, information technology, management information systems and others.

The minor is available to all undergraduate degree-seeking students and may be earned upon successful completion of the coursework below and the simultaneous completion of a bachelor's degree at FAU. For non-Business majors, waiver of prerequisites may be made on a case-by-case basis. For Business majors, a maximum of 3 credits used for the minor may count toward other Business major requirements. A minimum of two courses (6 credits) must be exclusive to the minor. For exceptions, a petition should be submitted to the Finance Department chair or the ITOM Department chair.

The certificate is available to degree-seeking students, non-degree students and working professionals.

Students pursuing the certificate may apply for it in the College of Business Office of Student Academic Services upon successful completion of the coursework below.

Students cannot obtain both a certificate and a minor. Both programs require 12 credits each, with minimum grades of "C" required in all courses for the minor and certificate. For the minor, at least 9 of the 12 credits must be earned from FAU.

---

### **Finance Course**

Crowdfunding	ENT 4512	3
--------------	----------	---

---

### ***Finance Courses - Select one of the following***

Financial Institutions	FIN 4303	3
------------------------	----------	---

Financial Derivatives	FIN 4533	3
-----------------------	----------	---

---

### ***Information Technology and Operations Management Courses***

Artificial Intelligence and Digital Transformation for Business	ISM 4421	3

Blockchain and Crypto Assets: Business Implications	ISM 4451	3
---	----------	---

## **INVESTMENT MANAGEMENT UNDERGRADUATE MINOR UNDERGRADUATE CERTIFICATE**

*(Minimum of 12 credits required)*

The Investment Management minor is available to all undergraduate degree-seeking students and may be earned upon successful completion of the coursework below and the simultaneous completion of a bachelor's degree at FAU. For non-Business majors, waiver of prerequisites will be made on a case-by-case basis. For Business majors, a maximum of 3 credits used for the minor may count toward other Business major requirements. A minimum of two courses (6 credits) must be exclusive to the minor. For exceptions, a petition should be submitted to the Finance Department chair.

The Investment Management certificate is available to degree-seeking and non-degree students. Students pursuing the certificate may apply for it in the College of Business Office of Student

Academic Services upon successful completion of the coursework below.

Students cannot obtain both a certificate and a minor. Both programs require 12 credits each, with minimum grades of "C" required in all courses for the minor and certificate. For the minor, at least 9 of the 12 credits must be earned from FAU. The certificate requires the following four FAU courses.

---

### Required Courses (12 credits)

Principles of Financial Management	FIN 3403	3
Investment Analysis	FIN 4504	3
Financial Derivatives	FIN 4533	3
Student-Managed Investment Fund (SMF)	FIN 4560	3

## **REAL ESTATE** UNDERGRADUATE MINOR

*(Minimum of 9 credits required)*

The Real Estate minor is designed for non-Real Estate Business majors requiring the Business Core courses. Because part of the requirements include successful completion of the Business Core classes, the minor is usually not practical for General Economics or Health Administration majors. The Real Estate minor requires the following three courses with a grade of "C" or better:

---

### Required Courses (9 credits)

Principles of Real Estate	REE 3043	3
Real Estate Finance	REE 4204	3
Real Estate Investment	REE 4303	3

A maximum of 3 credits used for the Real Estate minor may count toward other Business major requirements. A minimum of two courses (6 credits) must be exclusive to the minor. A minimum of 6 credits must be taken in residence at FAU. The acknowledgment of the minor is official upon successful completion of a College of Business degree program.

## RISK MANAGEMENT AND INSURANCE UNDERGRADUATE CERTIFICATE

*(Minimum of 9 credits required)*

[Link to Graduate Certificate](#)

The Risk Management and Insurance certificate provides students with an overall background in risk management and insurance. The certificate requires the following three courses with a grade of "C" or better .

### Required Courses (9 credits)

Risk Management and Insurance	RMI 3011	3
Insurance and Financial Planning	RMI 4116	3
Corporate Risk Management	RMI 4353	3

## MASTER'S PROGRAMS

### FINANCE

#### MASTER OF SCIENCE (M.S.) EXECUTIVE PROGRAM

This 16-month executive program is specially designed to allow participants to continue their professional responsibilities while earning an AACSB-accredited M.S. degree with major in Finance. Each class begins and progresses through the program as a group, sharing the same sequence of classes and educational experiences. The program requires 30 credits with courses offered on Monday and Wednesday evenings from 6:15 p.m. to 10 p.m. on the Boca Raton campus.

#### Admission Requirements

The College of Business seeks a diverse, highly qualified group of graduate students. Applications are evaluated on several factors emphasizing prior academic performance, GMAT or GRE scores, work experience and the potential for scholarly and professional success.

1. Bachelor's degree in any discipline; no business prerequisites are required;
2. GPA approximately 3.0 or higher over the last 60 undergraduate credits;

3. Four years of non-industry-specific professional work experience;
4. GMAT/GRE (see waiver information below)

### **GMAT/GRE Waiver Information**

The GMAT or GRE will be waived if the applicant meets one of the following conditions:

1. Undergraduate degree in any discipline with an upper division GPA of at least 3.0 AND an advanced degree (masters, doctoral, professional) with at least a 3.0 GPA;
2. Undergraduate degree in business with an upper division GPA of at least 3.0 AND at least four years in a finance affiliated industry such as banking, investment, accounting, insurance, etc.;
3. Undergraduate degree in Finance, Economics or Accounting from FAU AND upper division GPA is at least 3.0;
4. Undergraduate degree in Finance, Economics or Accounting from an AACSB-accredited School of Business with an upper division GPA of 3.5 or higher;
5. Undergraduate degree in mathematics from a SACS-accredited university with an upper division GPA of 3.5 or higher.

If it is determined by the Admissions Committee that the GMAT or GRE is required, the minimum score requirement is: GMAT: 500; GRE: (Verbal) 150; (Quantitative) 150; (Analytical Writing) 4.

International students who obtained a degree from a U.S. education institution prior to applying to the M.S. program will not need to take the English proficiency test.

Students making "B" grades or better in FAU's Executive Education's Financial Analyst Program (FAP) will receive credit for two courses upon admission to the program. The likely courses to be waived are FIN 6804, Theory of Financial Management, and FIN 6605, Multinational Finance.

Conditional admission may be available under extraordinary circumstances to applicants who have received a bachelor's degree from a regionally accredited institution, but who fall short of the GPA and/or the GMAT requirement or who show high promise. In these cases, the M.S. in Finance admissions committee will review all evidence of high promise, including but not limited to: grade trends, mature work experience, work accomplishment and promotion, type and rigor of undergraduate degree program, references and letters of recommendation and evidence of having attained some "A" grades in rigorous courses.

After the first year in the M.S. in Finance Executive program, the admissions committee will review each student receiving conditional admission and will recommend either full admission to or dismissal from the program.

## Executive Program Format

The program consists of 30 credits. Courses are every Monday and Wednesday evening on the Boca Raton campus from 6:15 p.m. to 10 p.m., with breaks between semesters. The pace and intensity of the program are balanced to provide students with optimal opportunities to assimilate knowledge.

A variety of learning methods are employed throughout the program. Case studies, computer simulations of challenging, competitive business situations, problem-solving discussions, team presentations, individual study, lectures, visual presentations, guest speakers and assigned readings are regularly used. Students also complete research and analytical studies to develop strategic thinking abilities. On-site M.S. in Finance Executive programs are available to local sponsoring organizations.

## Curriculum

Students start the M.S. in Finance Executive program with a boot camp. The boot camp is designed to give students a refresher in quantitative methods, finance, accounting, and economics and covers material from FIN 6406, ACG 6027 and ECP 6705. The boot camp is required and included in tuition fees at no additional cost. A passing grade is required for boot camp courses and is assessed toward the student's overall GPA. Students then take the courses below in order.

---

### Boot Camp with Final Exam

---

Financial Statement Analysis	ACG 6175	3
Communication Strategies for Business Professionals	GEB 6217	3
Theory of Financial Management	FIN 6804	3
Financial Markets	FIN 6246	3
Security Analysis	FIN 6517	3
Quantitative Methods in Finance	FIN 6456	3
Financial Modeling	FIN 6455	3
Financial Risk Management and Derivatives	FIN 6537	3
Multinational Finance	FIN 6605	3
Portfolio Management	FIN 6525	3

Content, coursework and fees may vary as determined by the administration. Florida Atlantic University reserves the right to change curriculum, sequence, program fees and other program requirements as necessary.

### **Academic Standing, Policies, Graduation**

The M.S. in Finance Executive program follows the same policies regarding academic standing and graduation used in the College of Business and the same grading standards of the University. Student continuation in the M.S. in Finance Executive program requires satisfactory progress toward the graduate degree. Evidence of such progress includes maintenance of a cumulative 3.0 grade point average (GPA). Graduation will be prohibited if the final cumulative GPA is less than 3.0 upon completion of the total program curriculum.

Graduate students with GPAs less than 3.0 will be required to complete an academic progression plan (APP). The APP is a contractual agreement that outlines particular courses and grades to reestablish good academic standing. APPs should generally outline a path (usually not more than two semesters) to reestablish a 3.0 GPA. Students that are placed on an academic progression plan and are not making progress towards their academic goals set forth by the APP may be recommended for dismissal from the program. The College may enact registration holds to prohibit a student's future enrollment until the APP is finalized. Students who do not fulfill the obligations established in the APP are recommended for dismissal to the Dean of the Graduate College.

### **Program Fees**

The M.S. in Finance Executive program is a full-service, all-inclusive program. The program fees cover all program costs, including tuition, textbooks, course materials, snacks and graduation activities. To view our full cost of attendance information page, visit <https://www.fau.edu/finaid/other/cost-of-attendance/>. See the Finance [website](#) for more information.

### **Application Process and More Information**

To apply to or receive more information about the M.S. in Finance Executive program, see the [website](#) or call 561-297-6000.

## **FINANCE**

### **MASTER OF SCIENCE (M.S.)**

**This program is on hiatus and currently not accepting students.**

The design focus of this master's degree is to extend the educational opportunities for business baccalaureate degree holders who wish to further their knowledge in the specialty of finance. The degree emphasizes finance and directly supportive fields rather than offering a broad view of business functional areas as offered in an M.B.A. degree.

### **Admission Requirements**

The College of Business seeks a diverse, highly qualified group of graduate students. Applications are evaluated on several factors emphasizing prior academic performance, GMAT or GRE scores and the potential for scholarly and professional success. In addition to other requirements for admission to the Graduate College at FAU, to be considered for these master's programs in the College of Business, applicants must:

1. Have earned a bachelor's degree from a regionally accredited college or university or the international equivalent.
2. Have a strong grade point average on all previous college work, though emphasis will be on the last 60 credits earned.
3. Submit a one-to-two page essay describing both the applicant's background and objectives for undertaking graduate study.
4. Submit an official, competitive score on a GMAT or GRE exam taken within five years. When evaluating test scores, the admissions committee looks for a balance between verbal, quantitative and analytical writing strengths. All three components are required.
5. International applicants whose native language is not English must have a TOEFL score of at least 600 (paper), 250 (computer) or 100 (Internet).
6. Have all materials for the application complete and filed with FAU prior to the deadlines.  
Deadlines for domestic admission: July 1 for fall, November 1 for spring and April 1 for summer.  
Deadlines for international admission: February 15 for fall, July 15 for spring and January 15 for summer.

Supplemental information that may be provided to highlight characteristics not evident in the required admissions materials includes:

1. A one-page résumé.
2. Letter(s) of recommendation from employers, faculty members or others who can attest to scholarly ability and/or agency.
3. A writing sample demonstrating analytical and explanatory skills.

### **Degree Requirements**

To qualify for this M.S. degree, each candidate must:

1. Meet all general requirements of the University for a master's degree and complete the program within five years of first enrollment in a finance course.
2. Complete or receive credit for a minimum of 9 credits of foundation courses. No grade lower than "C" will be accepted. Required foundation courses will be determined by the Office of Graduate Student Programs. Students will be notified of these and other requirements on admission.
3. Complete 30 credits of required and elective courses with a GPA of 3.0 or better. Any grade below "C" is considered a failure and the course must be retaken.
4. Complete all requirements of GEB 6215.
5. Transfer credits, credit duplication, academic standing, financial assistance, career placement assistance and graduation are subject to the policies, procedures, rules and guidelines as stated in the M.B.A. section of this catalog.

### Program Components

The degree program includes 30 graduate credits. Candidates who do not hold business baccalaureate degrees enroll in 9 additional credits of preparatory courses. All candidates must successfully complete three required finance courses, two required accounting courses, one required economics course and one required Graduate Communications course. Each candidate must successfully complete three elective courses in finance.

### Foundation Component and Courses

The Foundation Component introduces the broad field of business administration and the fundamental quantitative techniques used in business analysis.

---

#### Courses in the Foundation Component

---

Financial Accounting Concepts	ACG 6027	3
Seminar in Modern Economic Concepts and Theories	ECO 6008	3
Financial Management	FIN 6406	3

The exact number of credits required for each student will depend upon the previous academic record. More information may be obtained from the Office of Master's Programs in Business.

**Fundamental knowledge of college algebra, calculus, statistics and software is assumed.** It is recommended that all candidates evaluate their skills in those areas prior to application.

Successful performance in graduate-level coursework will require proficiency in the use of a personal

computer to employ word processing, spreadsheet and database software.

No foundation course may be used to satisfy core or elective requirements for any program.

### **Graduate Business Communication Program**

Written and verbal communication skills are integrated components of the Master of Science with Major in Finance. Students will demonstrate communication proficiency appropriate to both the academic and professional environments. Students will demonstrate their written and verbal communication skills as they complete the Communication Strategies for Business Professionals and Core-Course Follow-Up course (GEB 6215) that includes:

1. The class itself;
2. The evaluation of integrated course papers;
3. The evaluation of integrated course presentations.

Master's students in Finance must register for GEB 6215 in the first semester of taking core or elective courses. GEB 6215 must be taken prior to or concurrent with ACG 6137 and FIN 6806. Students who are exempt from either or both classes need to notify their GEB 6215 instructor so an alternative course or courses can be selected. Students must complete GEB 6215 within one active semester of taking ACG 6137 and FIN 6806 or the agreed upon alternative course(s).

Students will receive a grade of incomplete ("I") in GEB 6215 until they have completed all the communication requirements. Students who do not advance toward completing their communication requirements will receive an unsatisfactory ("U") grade and must re-register for the course. Students who receive a "U" and do not re-register for GEB 6215 in the next active semester will be administratively dropped from their classes.

Applications for degree will not be accepted unless the communication certification requirements have been completed.

---

### **Core Component**

Financial Reporting and Accounting Concepts	ACG 6137*	3
Financial Statement Analysis	ACG 6175	3
Advanced Mathematical Economics	ECO 6403	3
Financial Markets	FIN 6246	3

---

Investment Management	FIN 6515	3
Seminar in Advanced Financial Management	FIN 6806*	3
Communication Strategies for Business Professionals and Core-Course Follow-Up	GEB 6215*	3
<b>Core Total</b>		<b>21</b>
Electives		9
<b>Degree Total</b>		<b>30</b>

\* Students must take GEB 6215 before or at the same time as they take ACG 6137 and FIN 6806.

### Program Electives

*Students must select 9 credits from the following list*

Financial Management of Financial Institutions	FIN 6314	3
Financial Management: Investment Decisions and Policy	FIN 6436	3
Financial Risk Management and Derivatives	FIN 6537	3
Multinational Finance	FIN 6605	3
Theory of Financial Management	FIN 6804	3

Students who have successfully completed graduate or undergraduate courses that are equivalent to M.S. in Finance core courses will be required to complete substitute elective courses in the subject area. Example: If a student has completed Intermediate Accounting at the undergraduate or graduate level, then a substitute elective in accounting is required to replace ACG 6137.

### Time Limit

Candidates for the M.S. in Finance degree must complete all work within a consecutive five-year period after initial admission into the graduate program.

## FINTECH (FINANCIAL TECHNOLOGY) GRADUATE CERTIFICATE

*(Minimum of 12 credits required)*

The FinTech graduate certificate is offered jointly by the Department of Finance and the Department of Information Technology and Operations Management. This program enhances the qualifications of students pursuing careers in fields related to business, finance and information technologies. Students acquire knowledge and skills in online and digital business and digital finance, as well as in developing, analyzing and enhancing a company's ability to access capital through financial technologies. Also, students acquire knowledge and skills pertinent to the use of financial technology in trading. Professions and majors benefiting from the certificate include finance, information technology, management information systems and others.

The FinTech graduate certificate will be granted to a student who completes four courses as indicated in the list below.

### Admission

Open to students and professionals who have, at a minimum, a bachelor's degree in business or in a related field and a GPA of at least 3.0. Students must satisfy the prerequisites for each course in the program. The four courses (12 credits) must be completed with a GPA of 3.0 or better. All course materials are in English; international students must demonstrate proficiency in English to enter the program.

## INFORMATION TECHNOLOGY AND OPERATIONS MANAGEMENT

### **Faculty:**

Dinev, T., Chair; Basiratmand, M., Director of Innovation and Programs; Babbar, S.; Baghersad, M.; Behara, R.; Bishop, D.; Carnovale, J.; Carnovale, S., Program Director for Supply Chain Management Graduate Program; Cervený, R. P. Emeritus; Chin, P.; Dye, K. C.; Emadikhiav, M.; Feidelman, L.; Galup, S.; Goo, J.; Han, J.; Hart, P.; Huang, D.; Hur, I.; Mehrani, S.; Menachof, D.; Neshenko, N.; Pusztai, Z.; Queiroz, M.; Schindlbeck, M.; Sharma, B.; Sweet, J.; Yoo, C.

The Department of Information Technology and Operations Management's mission is to develop competence in information systems, operations management (including quality management) and related decision-sciences disciplines for traditional and non-traditional students across the College of Business; to produce skilled individuals proficient in information technology who are able to contribute effectively to their organizations and communities in an ever-evolving technological environment; to

engage in an active partnership with the business community; and to continually innovate and increase the quality of its educational and research activities in a manner that increases education effectiveness and global reach.

Undergraduate programs available in Management Information Systems include a Bachelor of Science (B.S.) and a Bachelor of Business Administration (B.B.A.). In addition, the following minors and certificates are available: [Management Information Systems minor](#), [Operations Management minor](#), [Business Analytics minor and certificate](#), [Cybersecurity minor and certificate](#), [Digital Marketing minor and certificate](#), [FinTech \(Financial Technology\) minor and certificate](#), and [Healthcare Information Systems minor and certificate](#).

Two of the department's graduate degree programs are multi-college and interdisciplinary in nature: the [Master of Science with Major in Data Science and Analytics](#) and the [Master of Science with Major in Information Technology and Management \(MSITM\)](#). Its [Big Data Analytics Graduate Certificate](#), [Professional Big Data Analytics Certificate](#) and the MSITM program are offered jointly with the Department of Electrical Engineering and Computer Science in the College of Engineering and Computer Science. Its Data Science and Analytics program is offered in conjunction with the colleges of Science, Engineering and Computer Science, and Arts and Letters.

Details of the [Master of Science with Major in Business Analytics](#) and the [Master of Science with Major in Supply Chain Management](#) are shown below in the Master's Programs section.

A graduate certificate in Transportation, Logistics and Supply Chain Management is offered jointly with the Department of Civil, Environmental and Geomatics Engineering in the College of Engineering and Computer Science. Details can be found [here](#). A graduate certificate in FinTech (Financial Technology) is offered jointly with the Finance Department. Details are found [here](#).

[Combined degree programs](#) culminating in the award of a Bachelor of Business Administration or Bachelor of Science with Major in Management Information Systems and a Master of Science with Major in [Business Analytics](#) or [Information Technology and Management](#) or [Supply Chain Management](#) are also available to qualified students.

## **MANAGEMENT INFORMATION SYSTEMS**

### **BACHELOR OF BUSINESS ADMINISTRATION (B.B.A.)**

### **BACHELOR OF SCIENCE (B.S.)**

#### **Business Analytics Concentration**

#### **Cybersecurity Concentration**

Management Information Systems develops specialized proficiencies in management information technology and leads to the B.B.A. or B.S. degree. It focuses on the concepts and tools necessary for analyzing, designing, planning and developing resources.

Along with the **University** and **College of Business** degree requirements listed in the [Degree Requirements](#) section of this catalog, Management Information Systems students must complete the requirements below.

#### **Prerequisite Coursework for Transfer Students**

Students transferring to Florida Atlantic University must complete both lower-division requirements (including the requirements of the General Education Program) and requirements for the college and major. Lower-division requirements may be completed through the A.A. degree from any Florida public college, university or community college or through equivalent coursework at another regionally accredited institution. Before transferring and to ensure timely progress toward the baccalaureate degree, students must also complete the prerequisite courses for their major as outlined in the [Transition Guides](#) .

All courses not approved by the Florida Statewide Course Numbering System that will be used to satisfy requirements will be evaluated individually on the basis of content and will require a catalog course description and a copy of the syllabus for assessment.

#### **Pre-Business Foundation Coursework**

These are previously listed under the heading [Degree Requirements \(B.B.A. and B.S.\)](#) and subheading Pre-Business Foundation Coursework in this section.

#### **Core Requirements**

These are previously listed under the heading [Degree Requirements \(B.B.A. and B.S.\)](#) and subheading College of Business Core in this section.

#### **Management Information Systems Major Courses**

Students who major in MIS are required to take Advanced Systems Analysis and Design (ISM 4133)

and five other MIS electives (18 total credits) beyond Management Information Systems (ISM 3011). A grade of "C" or better is required in all major courses. Students may choose to follow one of the two paths below or may choose courses from both paths in consultation with their advisor. The Information Technology path is the classical MIS path that provides core technical skills needed to manage and design information technology in organizations. Students acquire the basic four technical skills of application development and programming languages, databases, data communications and system analysis. The Information and Knowledge Management path provides students with general, broad knowledge in information and knowledge management in organizations, digital products and service development, social media analysis, as well as project management. Graduates will have the skills to analyze and lead technology-enabled products and services and consult organizations on digital products and services.

Additionally, students may choose to concentrate in Business Analytics or Cybersecurity, but are not required to. If a student pursues the Business Analytics concentration, the student must take Database Management Systems (ISM 4212) and any other three courses that constitute the chosen concentration. If a student pursues the Cybersecurity concentration, the student must take the four courses that constitute the chosen concentration. Concentration courses are noted below.

---

### **Information Technology Path**

Introduction to Computer Systems and Software Development	ISM 3230	3

## DATA SCIENCE AND ANALYTICS BACHELOR OF SCIENCE (B.S.)

**Data Science in Business Concentration****Data Science and Engineering Concentration****Data Science in the Natural Sciences Concentration**

The Bachelor of Science with Major in Data Science and Analytics (BSDSA) program is a multi-college, interdisciplinary program administered jointly by the Department of Mathematics and Statistics in the Charles E. Schmidt College of Science, the Department of Electrical Engineering and Computer Science (EECS) in the College of Engineering and Computer Science, the Department of Information Technology and Operations Management (ITOM) in the College of Business, the Department of Political Science in the Dorothy F. Schmidt College of Arts and Letters and the School of Criminology and Criminal Justice in the College of Social Work and Criminal Justice. For details about this program, see the [Interdisciplinary Programs](#) section of this catalog.

## MANAGEMENT INFORMATION SYSTEMS UNDERGRADUATE MINOR

*(Minimum of 12 credits required)*

The Management Information Systems (MIS) minor is designed for non-MIS majors in the College of Business and students outside the College of Business. The minor provides students with practical knowledge on managing information technology (IT) and on substantive and current IT topics and issues. Students learn the skill sets necessary to apply information and communications technologies and systems to solve real business issues. The result is a student prepared for careers that involve usage and decision-making regarding IT. The minor in Management Information Systems requires the following courses with a grade of "C" or better.

---

### **Business Core Requirement**

Management Information Systems	ISM 3011	3
Advanced Systems Analysis and Design	ISM 4133	3

---

### **Elective Requirement\***

Two ISM courses (3000 level or above)		6
---------------------------------------	--	---

\* While earning the MIS minor is not limited to specific MIS elective courses, the following suggested MIS minor paths of study could be chosen depending on the student's interest.

**Programming and Databases path of study:** For electives, choose ISM 3230 and ISM 4212.

**Cybersecurity path of study:** For electives, choose two of the following three courses: ISM 4320, ISM 4323 or ISM 4324.

**Business Analytics path of study:** For electives, choose two of the following three courses: ISM 3116, ISM 4117 or ISM 4403.

A maximum of 3 credits used for the MIS minor may count toward other Business major requirements. A minimum of two courses (6 credits) must be exclusive to the minor. For exceptions, a petition should be submitted to the ITOM Department chair. For non-Business majors, waiver of prerequisites will be made on a case-by-case basis. A minimum of 9 credits must be taken in residence at FAU. The acknowledgment of the minor is official upon successful completion of a degree program at FAU.

## **OPERATIONS MANAGEMENT UNDERGRADUATE MINOR**

*(Minimum of 9 credits required)*

The Operations Management minor is designed for all undergraduate Business majors. In addition to completion of the Business/Health Administration core courses, minor requirements include three courses from the Operations Management options, as indicated in the table below, or two courses from the Operations Management options and one course from Operations Cognate options. All required courses must be completed with a grade of “C” or better.

### **Operations Management Options**

Project Management	MAN 4583	3
Global Supply Chain Management	MAN 4597	3
Service Operations	MAN 4029	3
Operations Management Applications	MAN 4504	3

### **Operations Cognate Options**

International Business Operations	MAN 4602	3
Entrepreneurship	ENT 4024	3

Advanced Business Planning	ENT 4114	3
Health Care Quality Management	HSA 4383	3
Practice Management	HSA 4511	3
Technology in Health Care Organizations	HSA 3191	3
Corporate Risk Management	RMI 4353	3
Enterprise Risk Management and Corporate Governance: Qualitative Analysis	RMI 4423	3
Digital Marketing	MAR 4721	3
Marketing and Product/Service Innovation	MAR 4836	3
Events Management	HFT 3741	3
Hotel and Resort Management	HFT 4253	3
International Field Experience in Hospitality Management	HFT 4955	3
Introduction to Business Analytics and Big Data	ISM 3116	3

A maximum of 3 credits used for the minor may count toward other Business major requirements. A minimum of two courses (6 credits) must be exclusive to the minor. For exceptions, a petition should be submitted to the ITOM Department chair. At least two of the three courses (6 credits) for the minor must be taken in residence at FAU. The acknowledgment of the minor is official upon successful completion of a College of Business degree program.

## **BUSINESS ANALYTICS**

### **UNDERGRADUATE MINOR**

### **UNDERGRADUATE CERTIFICATE**

*(Minimum of 12 credits required)*

The Business Analytics minor and certificate enhance the qualifications of students pursuing careers in information technology areas related to the collection, integration, analysis and presentation of business

data.

The minor is available to all undergraduate degree-seeking students and may be earned upon successful completion of the coursework below and the simultaneous completion of a bachelor's degree at FAU. For non-Business majors, waiver of prerequisites will be made on a case-by-case basis. For Business majors, a maximum of 3 credits used for the minor may count toward other Business major requirements. A minimum of two courses (6 credits) must be exclusive to the minor. For exceptions, a petition should be submitted to the ITOM Department chair.

The certificate is available to degree-seeking students, non-degree students and working professionals. Students pursuing the certificate may apply for it in the College of Business Office of Student Academic Services upon successful completion of the coursework below.

Students cannot obtain both a certificate and a minor. Both programs require 12 credits each, with minimum grades of "C" required in all courses for the minor and certificate. For the minor, at least 9 of the 12 credits must be earned from FAU.

---

**Select four of the following courses (12 credits)**

Introduction to Business Analytics and Big Data	ISM 3116	3
Data Mining and Predictive Analytics	ISM 4117	3
Database Management Systems	ISM 4212	3
Advanced Business Analytics	ISM 4403	3
Social Media and Web Analytics	ISM 4420	3
Artificial Intelligence and Digital Transformation for Business	ISM 4421	3
Data Management and Analysis with Excel	QMB 3302	3

**CYBERSECURITY**  
**UNDERGRADUATE MINOR**  
**UNDERGRADUATE CERTIFICATE**

*(Minimum of 12 credits required)*

Cybersecurity is the study of methods to ensure information and system security. Industry and government need an educated workforce to serve as information and systems security analysts, security and network administrators and more. Due their extensive expertise and facilities, the departments of Information Technology and Operations Management (in the College of Business), Electrical Engineering and Computer Science (in the College of Engineering and Computer Science) and Mathematics and Statistics (in the College of Science) have jointly designed the Cybersecurity Minor and Certificate. Three tracks, each requiring 12 credits, constitute the minor and certificate: Information Technology (IT), Computer Science (CS) and Mathematical Sciences (MS). Details of this minor and certificate can be found in the [Interdisciplinary Programs section](#) of this catalog.

## **DIGITAL MARKETING**

### **UNDERGRADUATE MINOR**

### **UNDERGRADUATE CERTIFICATE**

*(Minimum of 12 credits required)*

The Digital Marketing minor and certificate are jointly offered by the Department of Information Technology and Operations Management and the Department of Marketing. These programs enhance the qualifications of students pursuing careers in fields related to business, marketing and information technologies. Students acquire knowledge and skills in online and digital business and digital product delivery, as well as in developing, analyzing and enhancing a company's presence on the web and in social networking. Professions and majors benefiting from the minor and certificate include marketing, business development, business strategy, information technology, management information systems and others.

The minor is available to all undergraduate degree-seeking students and may be earned upon successful completion of the coursework below and the simultaneous completion of a bachelor's degree at FAU. For non-Business majors, waiver of prerequisites will be made on a case-by-case basis. For Business majors, a maximum of 3 credits used for the minor may count toward other Business major requirements. A minimum of two courses (6 credits) must be exclusive to the minor. For exceptions, a petition should be submitted to the ITOM Department chair or the Department of Marketing chair.

The certificate is available to degree-seeking students, non-degree students and working professionals. Students pursuing the certificate may apply for it in the College of Business Office of Student Academic Services upon successful completion of the coursework below.

Students cannot obtain both a certificate and a minor. Both programs require 12 credits each, with minimum grades of "C" required in all courses for the minor and certificate. For the minor, at least 9 of the 12 credits must be earned from FAU.

---

### **Information Technology and Operations Management Courses**

*(Select two courses from the following four)*

Social Media Innovation	ISM 3007	3
Contemporary Issues of Digital Data Management	ISM 4041	3
Social Media and Web Technologies	ISM 4054	3
Social Media and Web Analytics	ISM 4420	3

---

### **Marketing Courses**

Marketing Research and Information Systems	MAR 4613	3
Digital Marketing	MAR 4721	3

## **FINTECH (FINANCIAL TECHNOLOGY)**

### **UNDERGRADUATE MINOR**

### **UNDERGRADUATE CERTIFICATE**

*(Minimum of 12 credits required)*

[Link to Graduate Certificate](#)

The FinTech minor and undergraduate certificate are offered jointly by the Department of Finance and the Department of Information Technology and Operations Management. These programs enhance the qualifications of students pursuing careers in fields related to business, finance and information technologies. Students acquire knowledge and skills in online and digital business and digital finance, as well as in developing, analyzing and enhancing a company's ability to access capital through financial technologies. Details are found [here](#).

## **HEALTHCARE INFORMATION SYSTEMS**

### **UNDERGRADUATE MINOR**

### **UNDERGRADUATE CERTIFICATE**

*(Minimum of 12 credits required)*

The Healthcare Information Systems minor and certificate enhance the qualifications of students pursuing careers in fields related to healthcare. Professions and majors benefiting from these programs include healthcare administration, nursing, medicine, biomedical sciences, actuaries, insurance, information technology and management information systems, among others. This minor and certificate are offered in conjunction with the Health Administration program of the College of Business Management Programs Department.

The minor is available to all undergraduate degree-seeking students and may be earned upon successful completion of the coursework below and the simultaneous completion of a bachelor's degree at FAU. For non-Business majors, waiver of prerequisites will be made on a case-by-case basis. For Business majors, a maximum of 3 credits used for the minor may count toward other Business major requirements. A minimum of two courses (6 credits) must be exclusive to the minor. For exceptions, a petition should be submitted to the ITOM Department chair or the Health Administration Program director.

The certificate is available to degree-seeking students, non-degree students and working professionals. Students pursuing the certificate may apply for it in the College of Business Office of Student Academic Services upon successful completion of the coursework below.

Students cannot obtain both a certificate and a minor. Both programs require 12 credits each, with minimum grades of "C" required in all courses for the minor and certificate. For the minor, at least 9 of the 12 credits must be earned from FAU.

---

### **Information Technology and Operations Management Courses**

*(Select two courses from the following three)*

Healthcare Information Systems	ISM 4381	3
Contemporary Issues of Digital Data Management	ISM 4041	3
Service Operations	MAN 4029	3

### **Health Administration Courses**

Health Delivery Systems	HSA 3111	3
Technology in Health Care Organizations	HSA 3191	3

The certificate is available to degree-seeking students, non-degree students and working professionals. Students pursuing the certificate may apply for it in the college where the track is located upon successful completion of the coursework.

## COMBINED PROGRAMS

### **MANAGEMENT INFORMATION SYSTEMS TO BUSINESS ANALYTICS BACHELOR OF BUSINESS ADMINISTRATION (B.B.A.) OR BACHELOR OF SCIENCE (B.S.) TO MASTER OF SCIENCE (M.S.) COMBINED PROGRAM**

The Information Technology and Operations Management department offers a combined Bachelor of Business Administration (B.B.A.) or Bachelor of Science (B.S.) in Management Information Systems to Master of Science (M.S.) in Business Analytics (MSBA) program. Students in this combined program may count up to 12 credits of approved graduate coursework (5000 level or higher) toward both their bachelor's degree and master's degree long as the combined program totals a minimum of 150 credits and:

1. The student has met the minimum 120 credits for the bachelor's degree; and
2. The student has taken a minimum of 30 credits in 5000 level or higher courses for the master's program.

With the approximate duration of five years, this combined program provides attractive ways for students to continue their graduate work. Students complete and graduate from their bachelor's degree first, and continue coursework to finish their master's degree program.

#### **Prerequisite Coursework for Transfer Students**

Students transferring to Florida Atlantic University must complete both lower-division requirements and requirements for the college and major. Lower-division requirements may be completed through the A.A. degree from any Florida public college, university or community college or through equivalent coursework at another regionally accredited institution. Before transferring and to ensure timely progress toward the baccalaureate degree, students must also complete the prerequisite courses for their major as outlined in the [Transition Guides](#).

All courses not approved by the Florida Statewide Course Numbering System that will be used to satisfy requirements will be evaluated individually on the basis of content and will require a catalog

course description and a copy of the syllabus for assessment.

### **Admission Requirements**

The GRE/GMAT requirement is waived for this program. To be eligible for the combined program, students in the Bachelor of Business Administration (B.B.A.) or Bachelor of Science (B.S.) in Management Information Systems should:

1. Have a cumulative undergraduate FAU GPA of 3.25 or better at the end of their junior year. Note that the cumulative FAU GPA of at least 3.25 must be maintained until the completion of the Bachelor of Business Administration (B.B.A.) or Bachelor of Science (B.S.) in the Management Information Systems degree program.
2. Formally apply to the combined program, completing the admissions process at least one semester prior to the beginning of the M.S. in Business Analytics portion of the program.

Once admitted to the program, students begin taking graduate courses (5000/6000 level courses) in their senior year that would apply to both the bachelor's and master's degree programs. Students in the combined program must maintain continuous enrollment, in full-time status, during their bachelor's degree to remain in the combined program. Once students are admitted to the M.S. in Business Analytics program, they must maintain continuous enrollment to remain in good standing. Students must also meet all of the degree requirements of the graduate program.

### **Degree Requirements**

To be eligible for the combined Bachelor of Business Administration (B.B.A.) or Bachelor of Science (B.S.) in Management Information Systems to Master of Science (M.S.) in Business Analytics (MSBA) degree program, students must fulfill the following requirements:

1. Completion of the requirements for the Bachelor of Business Administration (B.B.A.) or Bachelor of Science (B.S.) in Management Information Systems; and
2. Completion of all requirements for the Master of Science (M.S.) in Business Analytics (MSBA).

### **Credits counted Toward Bachelor's and Master's Degrees**

The following undergraduate course requirements may be replaced with the shown graduate-level courses (up to a total of 12 credits). These graduate credits count toward both the bachelor's degree and the master's degree programs.

---

## **MANAGEMENT INFORMATION SYSTEMS TO SUPPLY CHAIN MANAGEMENT**

### **BACHELOR OF BUSINESS ADMINISTRATION (B.B.A.) OR BACHELOR OF SCIENCE (B.S.) TO MASTER OF SCIENCE (M.S.) COMBINED PROGRAM**

The Information Technology and Operations Management department offers a combined Bachelor of Business Administration (B.B.A.) or Bachelor of Science (B.S.) in Management Information Systems to Master of Science (M.S.) in Supply Chain Management (MSSCM) program. Students in this combined program may count up to 12 credits of approved graduate coursework (5000 level or higher) toward both their bachelor's degree and master's degree long as the combined program totals a minimum of 150 credits and:

1. The student has met the minimum 120 credits for the bachelor's degree; and
2. The student has taken a minimum of 30 credits in 5000 level or higher courses for the master's program.

With the approximate duration of five years, this combined program provides attractive ways for students to continue their graduate work. Students complete and graduate from their bachelor's degree first, and continue coursework to finish their master's degree program.

### **Prerequisite Coursework for Transfer Students**

Students transferring to Florida Atlantic University must complete both lower-division requirements and requirements for the college and major. Lower-division requirements may be completed through the A.A. degree from any Florida public college, university or community college or through equivalent coursework at another regionally accredited institution. Before transferring and to ensure timely progress toward the baccalaureate degree, students must also complete the prerequisite courses for their major as outlined in the *Transition Guides*.

All courses not approved by the Florida Statewide Course Numbering System that will be used to satisfy requirements will be evaluated individually on the basis of content and will require a catalog course description and a copy of the syllabus for assessment.

### **Admission Requirements**

The GRE/GMAT requirement is waived for this program. To be eligible for the combined program, students in the Bachelor of Business Administration (B.B.A.) or Bachelor of Science (B.S.) in Management Information Systems should:

1. Have a cumulative undergraduate FAU GPA of 3.25 or better at the end of their junior year. Note that the cumulative FAU GPA of at least 3.25 must be maintained until the completion of the Bachelor of Business Administration (B.B.A.) or Bachelor of Science (B.S.) in the Management Information Systems degree program.
2. Formally apply to the combined program, completing the admissions process at least one semester prior to the beginning of the M.S. in Business Analytics portion of the program.

Once admitted to the program, students begin taking graduate courses (5000/6000 level courses) in their senior year that would apply to both the bachelor's and master's degree programs. Students in the combined program must maintain continuous enrollment, in full-time status, during their bachelor's degree to remain in the combined program. Once students are admitted to the M.S in Supply Chain Management (MSSCM) program, they must maintain continuous enrollment to remain in good standing. Students must also meet all of the degree requirements of the graduate program.

### **Degree Requirements**

To be eligible for the combined Bachelor of Business Administration (B.B.A.) or Bachelor of Science (B.S.) in Management Information Systems to Master of Science (M.S.) in Supply Chain Management (MSSCM) degree program, students must fulfill the following requirements:

1. Completion of the requirements for the Bachelor of Business Administration (B.B.A.) or Bachelor of Science (B.S.) in Management Information Systems; and

2. Completion of all requirements for the Master of Science (M.S.) in Supply Chain Management (MSSCM).

### Credits Counted Toward Bachelor's and Master's Degrees

The following undergraduate course requirements may be replaced with the shown graduate-level courses (up to a total of 12 credits). These graduate credits count toward both the bachelor's degree and the master's degree programs.

<b>Undergraduate Course Requirements</b>	<b>Graduate Course Substitutions.* Choose any three courses (9 credits) from the Technology Management group and any one course (3 credits) from the Business Analytics group</b>	
Upper Division ITOM Department Electives (12 credits)	<b><i>Technology Management Group</i></b>	
	Blockchain and Crypto Assets: Digital Business Transformation	ISM 6455
	Special Topics	ISM 6930
	Project Management	MAN 6581
	Supply Chain Management	MAN 6596
	Supply Chain Analytics	QMB 6616
	<b><i>Business Analytics Group</i></b>	
	Data Mining and Predictive Analytics	ISM 6136
	Database Management	ISM 6217
	Introduction to Business Analytics and Big Data	ISM 6404

	Business Innovation with Artificial Intelligence	ISM 6427C
	Social Media and Web Analytics	ISM 6555
	Special Topics	ISM 6930
	Data Management and Analysis with Excel	QMB 6303

\* Students who have taken an undergraduate elective course cannot use the corresponding graduate course for substitution or for credit towards the graduate program. The following are corresponding undergraduate-graduate courses: ISM 3116-ISM 6404; ISM 4117-ISM 6136; ISM 4212-ISM 6217; ISM 4403- ISM 6405; ISM 4420-ISM 6555; ISM 4421-ISM 6427C; ISM 4451-ISM 6455; MAN 4583-MAN 6581; MAN 4597-MAN 6596; QMB 3302-QMB 6303.

## MASTER'S PROGRAMS

### BUSINESS ANALYTICS

#### MASTER OF SCIENCE (M.S.)

The Master of Science in Business Analytics is a STEM program with emphasis on artificial intelligence that provides a strong curriculum. It teaches business graduate students methods and tools to extract, curate, preserve, analyze, mine, visualize and present structured and unstructured business data, helping them make well-informed managerial and executive decisions in various domain-specific business contexts. The program provides graduates with the key skills and hands-on experience demanded by employers locally, statewide, nationally and internationally. Students are required to complete 30 graduate-level credits with a 3.0 GPA or better to graduate. The program does not offer a thesis option. It is available in person or fully online.

#### Admissions

The College of Business seeks a diverse, highly qualified group of graduate students. Applications are evaluated on several factors emphasizing prior academic performance, GMAT or GRE scores, work experience and the potential for scholarly and professional success. Other aspects of admission include:

1. Bachelor's degree in any discipline; no business prerequisites are required;
2. GPA approximately 3.0 or higher over the last 60 undergraduate credits;
3. GRE/GMAT scores more than five years old are normally not acceptable. The GRE and the GMAT requirement is waived for any student who has a baccalaureate degree from FAU's Department of Information Technology and Operations Management (ITOM) with a GPA of at least 3.25 (out of a possible 4.0) in the last 60 credits attempted prior to graduation;
4. International students from non-English-speaking countries must be proficient in written and spoken English as evidenced by a score of at least 500 (paper-based test) or 213 (computer-based test) or 79 (Internet-based test) on the Test of English as a Foreign Language (TOEFL) or a score of at least 6.0 on the International English Language Testing System (IELTS); and
5. Applicants must meet other requirements of the FAU Graduate College.

## Degree Requirements

Students are required to complete 30 graduate-level credits, or ten 3-credit courses (5000 level or higher), with a 3.0 GPA or higher to graduate. The program does not offer a thesis option.

## **BUSINESS ANALYTICS**

### **MASTER OF SCIENCE (M.S.)**

### **PROFESSIONAL PROGRAM**

The Professional Master of Science with major in Business Analytics is a new self-supporting program administered by the Executive Education Department in the College of Business. This program is designed for working professional students. There are no concentrations, tracks or specializations. The program requires 30 credits and does not offer a thesis option. Each course duration is eight weeks, and students are expected to take two courses simultaneously. Required and elective courses are listed in the table above. The expected fast track completion time is 12 months.

## **DATA SCIENCE AND ANALYTICS**

### **MASTER OF SCIENCE (M.S.)**

#### **Concentrations:**

**Data Science in Business**

**Data Science via Scientific Inquiry**

**Data Science and Engineering**

**Data Science in Society**

The [Master of Science with Major in Data Science and Analytics](#) (MSDSA) is a multi-college interdisciplinary program jointly administered by the Department of Mathematics and Statistics in the Charles E. Schmidt College of Science, the Department of Electrical Engineering and Computer Science (EECS) in the College of Engineering and Computer Science (EECS), the Department of Information Technology and Operations Management (ITOM) in the College of Business and the Department of Political Science in the Dorothy F. Schmidt College of Arts and Letters. The program aims to prepare students with essential skill sets needed to analyze small, fast, big, massive and complex data. To allow for maximum flexibility in career aspirations, students may select from four concentrations:

- Data Science via Scientific Inquiry Concentration, Department of Mathematics and Statistics.
- Data Science and Engineering Concentration, Department of Electrical Engineering and Computer Science.

- Data Science in Business Concentration, Department of Information Technology and Operations Management.
- Data Science in Society Concentration, Department of Political Science.

For more information about the Master of Science with Major in Data Science and Analytics degree program, see the [Interdisciplinary Program](#) section of this catalog.

## **INFORMATION TECHNOLOGY AND MANAGEMENT** **MASTER OF SCIENCE (M.S.)**

**Advanced Information Technology Concentration**

**Business Analytics Concentration**

**Computer Science Data Analytics Concentration**

**Cybersecurity Concentration**

**Information Technology Management Concentration**

The [Master of Science with Major in Information Technology and Management \(MSITM\)](#) is offered jointly with the Department of Electrical Engineering and Computer Science in the College of Engineering and Computer Science. Details of this program can be found in the [Interdisciplinary Programs](#) section of this catalog. The program is offered in person with the Business Analytics and the Information Technology Management concentrations offered in person and fully online.

## **INFORMATION TECHNOLOGY AND MANAGEMENT** **MASTER OF SCIENCE (M.S.)** **PROFESSIONAL PROGRAM**

**Advanced Information Technology Concentration**

**Business Analytics Concentration**

**Computer Science Data Analytics Concentration**

**Information Technology Management Concentration**

Details for the [Professional Master of Science with Major in Information Technology and Management](#) are also described in the [Interdisciplinary Programs](#) section of the catalog. The program is offered in person with the Business Analytics and the Information Technology Management concentrations offered in person and fully online.

## SUPPLY CHAIN MANAGEMENT MASTER OF SCIENCE (M.S.)

The Master of Science with Major in Supply Chain Management offers a strong curriculum delivering the foundations and principles of Supply Chain Management, Operations Management, Procurement and Sourcing. This curriculum is integrated with concentrated study of Business Analytics, Shipping and Trade to provide students with the key skills and hands-on experience demanded by employers locally, statewide, nationally and internationally. Students are required to complete 30 graduate-level credits with a 3.0 GPA or better to graduate. The program does not offer a thesis option. It is available in person or fully online.

### Admission

The College of Business seeks a diverse, highly qualified group of graduate students. Applications are evaluated on several factors emphasizing prior academic performance, GMAT or GRE scores, work experience and the potential for scholarly and professional success. Important factors are:

1. A bachelor's degree in any discipline. No business prerequisites are required;
2. A GPA approximately 3.0 or higher over the last 60 undergraduate credits;
3. GRE/GMAT scores more than five years old are normally not acceptable. The GRE and the GMAT requirement is waived for any student who has a baccalaureate degree from FAU's Department of Information Technology and Operations Management (ITOM) with a GPA of at least 3.25 (out of a possible 4.0) in the last 60 credits attempted prior to graduation;
4. International students from non-English-speaking countries must be proficient in written and spoken English as evidenced by a score of at least 500 (paper-based test) or 213 (computer-based test) or 79 (internet-based test) on the Test of English as a Foreign Language (TOEFL) or a score of at least 6.0 on the International English Language Testing Systems (IELTS); and
5. Students must meet other requirements of the FAU Graduate College.

### Degree Requirements

Students are required to complete 30 graduate-level credits or ten 3-credit courses (5000 level or higher) with a GPA of 3.0 or higher to graduate. The program does not offer a thesis option.

## **SUPPLY CHAIN MANAGEMENT**

### **MASTER OF SCIENCE (M.S.)**

### **PROFESSIONAL PROGRAM**

The Professional Master of Science with major in Supply Chain Management is a self-supporting program administered by the Executive Education Department in the College of Business. Designed for working professional students, the program requires 30 credits and does not offer a thesis option. There are no concentrations, tracks or specializations. Each course duration is eight weeks, and students are expected to take two courses simultaneously. Required and elective courses are listed in the table above. The expected fast track completion time is 12 months. The program is available in person or fully online.

## **BIG DATA ANALYTICS**

### **GRADUATE CERTIFICATE**

*(Minimum of 12 credits required)*

The digital age is here to stay. Organizations now own and have access to unfathomable amounts of data. New technologies and efforts are needed to move on to the next phase of the digital revolution - the data revolution. To provide students with the knowledge necessary in this age of Big Data, the Department of Electrical Engineering and Computer Science (EECS) and the Department of Information Technology and Operations Management (ITOM) have jointly designed the [Big Data Analytics graduate certificate](#). This 12-credit certificate allows graduate students to expand their knowledge and skills in the concepts, technologies, and tools of business intelligence, data analytics and business analytics and be recognized for their achievement. The certificate program has two tracks: Computer Science (CS) and Business (BU). Details for both tracks can be found in the [Interdisciplinary Programs](#) section of this catalog.

## **BIG DATA ANALYTICS**

### **GRADUATE CERTIFICATE**

### **PROFESSIONAL PROGRAM**

*(Minimum of 12 credits required)*

Details for the [Professional Big Data Analytics Graduate Certificate](#) are also described in the [Interdisciplinary Programs](#) section of the catalog.

## **FINTECH (FINANCIAL TECHNOLOGY)**

### GRADUATE CERTIFICATE

*(Minimum of 12 credits required)*

The FinTech minor and undergraduate certificate are offered jointly by the Department of Finance and the Department of Information Technology and Operations Management. These programs enhance the qualifications of students pursuing careers in fields related to business, finance and information technologies. Students acquire knowledge and skills in online and digital business and digital finance, as well as in developing, analyzing and enhancing a company's ability to access capital through financial technologies. Details are found [here](#).

## MANAGEMENT PROGRAMS

### **Faculty:**

Williams, E., Chair; Alexandre, P.; Arikan, A.; Attonito, J.; Barbera, S.; Bernet, P.; Brant, K.; Castro, S.; Castrogiovanni, G.; Chandrashekar, L.; Cooke, D.; Cox, K.; Ellis, K.; Feyereisen, S.; Golden, P., Emeritus; Goodrick, E.; Gumus, G.; Harari, M.; Herst, D.; Kidwell, R.; Li, M.; Mishra, C.; Monestime, J.; Neubaum, D.; Newmann, L.; Paczkowski, P.; Palkon, D.; Patton, J.; Puro, N.; Sawant, R.; Schwartz, H.; Searcy, O.; Smith, S.; Terjesen, S.; Thams, V.; Trevino, L.; Whiteman, A.; Willis, L.

The Department of Management Programs develops future leaders who are skilled in the art of managing in a global business environment. The department recognizes the urban nature of the student population and designs programs to be delivered through non-traditional and technology-driven delivery systems. Through its programs in Health Administration, [International Business](#), and [Management](#), it provides skill bases that are useful in a world marketplace. The department's scholarly initiatives and service make it a valuable partner for the regional and international community.

In addition to the programs mentioned above, the department offers courses in Motion Picture Management and Sport Management. See [Course Descriptions](#).

## PROGRAMS IN HEALTH ADMINISTRATION

[Link to Health Administration Master's Programs](#)

[Link to Health Administration Graduate Certificates](#)

[Link to Health Administration Combined Program](#)

[Link to Health Administration Minors](#)

[Link to Health Administration Undergraduate Certificates](#)

## **HEALTH ADMINISTRATION**

### **BACHELOR OF HEALTH SERVICES (B.H.S.)**

The Bachelor of Health Services (B.H.S.) is concentrated at the upper division of the baccalaureate program. This curriculum provides students with a university education that promotes personal and professional growth as well as concentrated awareness of health systems and their effects on society. Flexibility in course selection allows students to strengthen their analytical skills and develop their awareness of leadership and responsibility as citizens and future health administrators. The graduate of this program is prepared to assume entry managerial positions in health; to continue the study of health administration or other relevant disciplines at the graduate level; and to advance to health administration positions with broader responsibility and leadership. Program requires a minimum of 120 credits.

#### **Prerequisite Coursework for Transfer Students**

Students transferring to Florida Atlantic University must complete both lower-division requirements (including the requirements of the General Education Program) and requirements for the college and major. Lower-division requirements may be completed through the A.A. degree from any Florida public college, university or community college or through equivalent coursework at another regionally accredited institution. Before transferring and to ensure timely progress toward the baccalaureate degree, students must also complete the prerequisite courses for their major as outlined in the [Transition Guides](#).

All courses not approved by the Florida Statewide Course Numbering System that will be used to satisfy requirements will be evaluated individually on the basis of content and will require a catalog course description and a copy of the syllabus for assessment.

#### **Admission Policy**

Students are classified as Pre-Business until the preprofessional courses below are completed with "C"

or better grades and 60 minimum credits are attained with a 2.25 minimum FAU GPA. Until admitted, students can only take three upper-level courses in the program: HSA 3104, HSA 3111 and HSA 3534.

### Preprofessional Requirements

Preprofessional requirements are lower-division courses (1000-2000 level) conveying information or skills necessary to be successful in a student's major course of study. The Health Administration major requires the five courses listed below. Four of the courses, excluding ECO 2023, must be taken before a student can be formally classified as a Health Administration major. A grade of "C" or better (or passing the competency exam in ISM 2000) is required in each course.

Principles of Accounting 1	ACG 2021	3
Principles of Accounting 2	ACG 2071	3
Microeconomic Principles	ECO 2023	3
Information Systems Fundamentals	ISM 2000	3
Introductory Statistics	STA 2023	3

Students interested in majoring in Health Administration who have not yet completed the four courses (again, ECO 2023 may be taken later) with a "C" or better will be placed in the Pre-Business major until the courses are successfully completed or waived. While in Pre-Business status, students may take these three Health Administration courses:

Health Delivery Systems	HSA 3111	3
Introduction to Health Professions	HSA 3104	3
Health Care Medical Terminology	HSA 3534	3

This preprofessional requirement also applies to students who are classified Pre-Business and are seeking a minor in Health Administration. Students from other colleges seeking a minor in Health Administration are not required to complete the four (again, excepting ECO 2023) preprofessional courses before taking the Health Administration courses leading to a minor.

### Residency Requirements

1. After a student matriculates at FAU, the College of Business will not accept upper-level business

- transfer coursework taken after admission, except from AACSB-accredited institutions.
2. After being admitted to the College and declaring a major (not Pre-Business), transient coursework is not permitted.
  3. A minimum of 30 upper-level business credits (including GEB 3213) are required from FAU to obtain a College of Business bachelor's degree. The last 30 credits must be from FAU.
  4. At least 75 percent of a student's coursework in the major must be completed at FAU.

## Degree Requirements

Students enrolled in Health Administration must complete 33 credits in the program (24 credits of Health Administration major courses, including RI: Health Practicum (HSA 4817), and 9 credits of Health Administration electives); 15 credits in additional business courses at the upper division (3000-level or above); and 12 credits of additional electives out-of-College. A minimum of 18 credits in Health Administration major courses must be earned at FAU.

Students must complete the RI: Health Practicum (HSA 4817) to graduate. The Practicum is a combination internship/classroom course. Registration in the Practicum requires an FAU GPA of 2.5 and successful completion (earning a "C" or better) of the six other Health Administration core courses and three other required courses in business and writing skills (see below).

---

### Health Administration Courses – 33 credits

---

#### *Health Administration Major Courses – 24 credits*

---

Health Delivery Systems	HSA 3111	3
Organizational Behavior in Health Care	HSA 4110	3
Strategic Management in Health Organizations	HSA 4140	3
Health Law	HSA 4423	3
Introduction to Health Research and Managerial Epidemiology	HSA 4700	3
Health Care Financial Management (see item 2 below)	HSA 4170	3 or
Principles of Financial Management	FIN 3403	3

---

RI: Health Practicum	HSA 4817	6
<b><i>Health Administration Elective Courses – 9 credits</i></b>		
Introduction to Health Professions	HSA 3104	3
Technology in Health Care Organizations	HSA 3191	3
Health Care Medical Terminology	HSA 3534	3
Managed Care	HSA 4109	3
Issues and Trends in Health Care	HSA 4113	3
International Healthcare Systems	HSA 4124	3
Long-Term Care Administration	HSA 4222	3
Management of Long-Term Care Facilities	HSA 4223	3
Health Care Quality Management	HSA 4383	3
Practice Management	HSA 4511	3
Directed Independent Study	HSA 4905	1-3
Special Topics	HSA 4930	1-3

### **Choice of Financial Management Course**

The option to take FIN 3403 rather than HSA 4170 is available only to students seeking a Business Administration minor. Students choosing this option must still complete 33 credits in Health Administration courses. They will do this by taking an additional Health Administration elective for a total of 12 elective credits rather than the standard 9 credits.

### **RI: Health Practicum, HSA 4817**

Successful completion of RI: Health Practicum is necessary for graduation. Students taking the Practicum must:

1. Have successfully completed, i.e., earned a "C" or better, the six core courses;
2. Have a GPA of 2.5 or better in all courses taken at FAU;
3. Have completed at least 33 upper-division (3000-level or above) credits;
4. Be a Health Administration program major; and

5. Not be on academic probation.

### **College of Business Courses – 15 credits**

ISM 3011, Management Information Systems; ECP 4530, Health Care Economics and Policy; GEB 3213, Introduction to Business Communication; and 6 additional upper-division credits of College of Business courses are required. Students must earn a grade of "C" or better in the three specified business courses: ISM 3011, ECP 4530 and GEB 3213. Students are encouraged to take courses in several Business departments.

### **Out-of-College Courses – 12 credits**

Courses in social sciences, communication, education, science, nursing or public administration are recommended. College of Business courses may not be used.

**Gordon Rule Math and Writing Requirements** are mandated by the State of Florida. The Writing Requirement states that students must complete four courses with significant writing content with grades of "C" or higher. The Math requirement states that students must earn 6 credits in mathematics (including statistics) at or above the level of college algebra with grades of "C" or higher.

**Foreign Language Entry Requirement** must be fulfilled by: two years of successful completion of high school foreign language, two successful semesters of a college-level foreign language, the successful completion of the CLEP exam for two semesters of the same foreign language or demonstrated proficiency in a foreign language through the Languages, Linguistics, and Comparative Literature Department.

Complete a **minimum of 120 credits** (excluding remedial and technical coursework).

An FAU **minimum GPA** of 2.5.

The University's General Education Program.

## **HEALTH ADMINISTRATION**

### **BACHELOR OF HEALTH SERVICES (B.H.S.) TO MASTER OF HEALTH ADMINISTRATION (M.H.A.) COMBINED PROGRAM**

The Management Programs Department offers a combined Bachelor of Health Services (B.H.S.) to Master of Health Administration (M.H.A.) program. Students in this combined program may count up to 9 credits of approved graduate coursework (5000 level or higher) toward both their bachelor's degree and master's degree as long as the combined program totals a minimum of 150 credits and:

1. The student has met the minimum 120 credits for the bachelor's degree; and
2. The student has taken a minimum of 30 credits in 5000 level or higher courses for the master's program.

With the approximate duration of five years, this combined program provides an attractive way for students to continue their graduate work. Students complete and graduate from their bachelor's degree program first, and then continue coursework to finish their master's degree program.

### **Prerequisite Coursework for Transfer Students**

Students transferring to Florida Atlantic University must complete both lower-division requirements and requirements for the college and major. Lower-division requirements may be completed through the A.A. degree from any Florida public college, university or community college or through equivalent coursework at another regionally accredited institution. Before transferring and to ensure timely progress toward the baccalaureate degree, students must also complete the prerequisite courses for their major as outlined in the *Transition Guides*.

All courses not approved by the Florida Statewide Course Numbering System that will be used to satisfy requirements will be evaluated individually on the basis of content and will require a catalog course description and a copy of the syllabus for assessment.

### **Admission Requirements**

The GRE/GMAT requirement is waived for this program. To be eligible for the combined program, the bachelor's students in the B.H.S. program should:

1. Have a cumulative FAU GPA of 3.25 or better at the end of their junior year. Note that the cumulative FAU GPA of at least 3.25 must be maintained until the completion of the bachelor's degree in Health Administration.
2. Formally apply to the combined program, completing the admissions process at least one semester prior to the beginning of the M.H.A. portion of their program.

Once admitted to the program, students begin taking graduate courses (5000/6000 level courses) in their senior year that would apply to both the bachelor's and master's degree programs. Students in the combined program must maintain continuous enrollment, in full-time status, during their bachelor's degree to remain in the combined program. Once students are admitted to the M.H.A. program, they must maintain continuous enrollment to remain in good standing. Students must also meet all of the degree requirements of the graduate program.

### **Degree Requirements**

To be eligible for the combined B.H.S. in Health Administration to M.H.A in Health Administration

Degree Program, students must fulfill the following requirements:

1. Completion of the requirements for the B.H.S. in Health Administration.
2. Completion of the requirements for the M.H.A in Health Administration.

### Credits Counted Toward Bachelor's and Master's Degrees

The following undergraduate course requirements may be replaced with the graduate level courses shown (up to a total of 9 credits). These graduate credits count toward both the bachelor's degree and the master's degree.

Undergraduate Course Requirements	Graduate Course Substitution				
Upper Division Health Administration Elective (6 credits)	<i>Choose among the following courses:</i>				
	Entrepreneurial Skills for Managers	ENT 6226	3		
	Special Topics (such as Global Health, Managed Care, Medical Practice Management, Disaster Management in Health Care, Introduction to Public Health)	HSA 6930	3		
	Current Topics in Health Care Management	HSA 6937	3		
	Human Resource Management	MAN 6156	3		
	Data Analysis form Managers	QMB 6603	3		
Health Law	HSA 4423	3	Health Law	HSA 6425	3

[Link to Master of Health Administration \(M.H.A.\)](#)

## HEALTHCARE INFORMATION SYSTEMS UNDERGRADUATE MINOR

*(Minimum of 12 credits required)*

The Healthcare Information Systems minor, available to all undergraduate degree-seeking students, enhances the qualifications of students pursuing careers in fields related to healthcare. Professions and majors benefiting from the minor include healthcare administration, nursing, medicine, biomedical sciences, actuaries, insurance, information technology and management information systems, among others. This minor is offered in conjunction with the Department of Information Technology and Operations Management (ITOM) in the College of Business. [Minor requirements](#) are listed in ITOM's catalog section above.

## **HEALTH ADMINISTRATION** UNDERGRADUATE MINOR FOR BUSINESS MAJORS

*(Minimum of 9 credits required)*

Students seeking a major in the College of Business other than Health Administration may concurrently earn a minor in Health Administration while pursuing a bachelor's degree. To earn the minor, students must complete 9 credits with a grade of "C" or better from the following courses.

### **Required Courses**

Health Delivery Systems	HSA 3111	3
-------------------------	----------	---

### ***Select two of the following***

Technology in Health Care Organizations	HSA 3191	3
---	----------	---

Health Care Medical Terminology	HSA 3534	3
---------------------------------	----------	---

Managed Care	HSA 4109	3
--------------	----------	---

Organizational Behavior in Health Care	HSA 4110	3
--	----------	---

Issues and Trends in Health Care	HSA 4113	3
----------------------------------	----------	---

International Healthcare Systems	HSA 4124	3
----------------------------------	----------	---

Strategic Management in Health Organizations	HSA 4140	3
--	----------	---

Health Care Financial Management	HSA 4170	3
----------------------------------	----------	---

Long-Term Care Administration	HSA 4222	3
Health Law	HSA 4423	3
Health Care Quality Management	HSA 4383	3
Practice Management	HSA 4511	3

At least two of the three courses (6 credits) must be completed at FAU. Successful completion of the minor requires the successful completion of the College of Business baccalaureate degree. A maximum of 3 credits used for the minor may count toward other Business major requirements. A minimum of two courses (6 credits) must be exclusive to the minor.

## **HEALTH ADMINISTRATION**

### **UNDERGRADUATE MINOR FOR NON-BUSINESS MAJORS**

*(Minimum of 15 credits required)*

Students seeking a major in a college other than the College of Business may concurrently earn a minor in Health Administration while pursuing a bachelor's degree. To earn the minor, students must complete 15 credits with a grade of "C" or better from the following courses.

#### **Required Courses**

Health Delivery Systems	HSA 3111	3
-------------------------	----------	---

#### ***Select four of the following***

Introduction to Health Professions	HSA 3104	3
------------------------------------	----------	---

Technology in Health Care Organizations	HSA 3191	3

## **INTERNATIONAL BUSINESS**

**BACHELOR OF BUSINESS ADMINISTRATION (B.B.A.)**

**BACHELOR OF SCIENCE (B.S.)**

The major in International Business attracts high-quality students and prepares them to contribute effectively to their organizations and community in a global business environment. This program's goals are accomplished through an active partnership with the business community while the program continuously enhances the quality and impact of international business education.

In addition to the University and College of Business degree requirements listed in the [Degree Requirements](#) section of this catalog, International Business students must complete the requirements below.

### **Prerequisite Coursework for Transfer Students**

Students transferring to Florida Atlantic University must complete both lower-division requirements (including the requirements of the General Education Program) and requirements for the college and major. Lower-division requirements may be completed through the A.A. degree from any Florida public college, university or community college or through equivalent coursework at another regionally accredited institution. Before transferring and to ensure timely progress toward the baccalaureate degree, students must also complete the prerequisite courses for their major as outlined in the [Transition Guides](#).

All courses not approved by the Florida Statewide Course Numbering System that will be used to satisfy requirements will be evaluated individually on the basis of content and will require a catalog course description and a copy of the syllabus for assessment.

### **Pre-Business Foundation Coursework**

These are previously listed under the heading [Degree Requirements \(B.B.A. and B.S.\)](#) and subheading Pre-Business Foundation Coursework in this section.

### **Business Core Requirements**

These are previously listed under the heading [Degree Requirements \(B.B.A. and B.S.\)](#) and subheading College of Business Core in this section.

### **Foreign Language Requirement**

Two semesters of the same college-level foreign language (6-8 credits) or equivalent competency.

### **International Business Major**

A grade of "C" required in all major courses.

An approved internship with significant international/cross-cultural content

## **HONORS PROGRAM IN INTERNATIONAL BUSINESS**

The Honors in International Business provides FAU undergraduate students the opportunity to achieve academic excellence beyond the level of standard coursework by completing honors-level enrichment within and outside of coursework in International Business. Students interested in pursuing the Honors designation in International Business are required to meet the eligibility and admission requirements noted below. Each student's Honors program of study includes 9 credits in Honors coursework in upper-level International Business courses, in addition to other enrichment requirements.

Undergraduate students who successfully fulfill all requirements below and have a final cumulative GPA of 3.25 or greater at the time of degree conferral receive a designation of Honors in the Major on their transcript. The transcript designation is Honors in International Business.

### **Eligibility Requirements**

Eligible students have:

1. Been accepted into the College of Business at FAU as a declared major in International Business;
2. A cumulative/overall GPA of at least 3.25;
3. Submitted a formal application after completion of 30 credits no later than three weeks prior to the beginning of the semester for which students seek to enroll in the Honors Program in International Business. Most students will apply for the program after completing their sophomore year.

### **Admissions Requirements**

1. Application form;
2. Unofficial transcript;
3. Résumé;
4. Personal statement;
5. A letter of support by a member of the International Business department faculty;
6. A brief interview, the result of which will be added by an interviewer after packet. The director or a designated faculty member will conduct interviews.

### **Standards for Maintaining Active Status**

1. Maintain good academic and ethical standing;
2. Maintain cumulative GPA of at least 2.5 overall;
3. Maintain cumulative GPA of 5 in all three Honors-in-the-Major courses;

#### 4. Participate in all enrichment

If any of the above standards for maintaining eligibility in the program are not met, students will be advised accordingly on how to undertake remedial actions.

Students will not be allowed to continue in the Honors in International Business for Violation of the Code of Academic Integrity or any grade of less than a B in an Honors-course.

### **Honors in International Business Enrichment Requirements**

Honors-level enrichment includes all designated ways in which a student in the International Business Honors program will experience an improved and enhanced quality education in the major of International Business at FAU.

If the enrichment requirements detailed below are not met, the student will not receive the Honors designation. However, work toward their degree and grades received for each course completed will be unaffected.

#### ***Requirement #1: General Enrichment***

In general, Honors students are required to:

1. Participate in a form of extensive mentoring in practical research by department faculty or approved departmental affiliated faculty, culminating in the completion of the Capstone Project as detailed
2. In addition to course instructors, Honors students will meet regularly with a designated faculty mentor from the International Business Program.
3. Join the undergraduate club for the International Business Program, currently named the Student Global Business Honors students are expected to participate in activities and, where possible, serve as officers.
4. Participate, after being invited, in all of the International Business Program's faculty seminars and
5. Complete within two years all requirements for the Honors program, after which they will meet with the director to discuss their situation and options.

**Note:** Prior to application, students who have already completed four or more of the approved Honors-level courses available in the program are not eligible for the Please see the next section for a list of approved courses.

#### ***Requirement #2: Coursework***

The Honors in International Business program requires the completion of three courses upon which additional enrichment requirements have been agreed. These requirements are determined between the student and the instructor of the course according to an Honors Compact.

### **Course Selection and Honors Compact Procedure**

1. Students must register for an approved course that may be designated as Honors level. Courses that may be designated as Honors-level include:
  - FIN 4604 International Finance
  - MAN3442 International Business Negotiations
  - MAN 3600 International Business
  - MAN 4602 International Business Operations
  - MAN 4610 Global Human Resource Management
  - MAR 4156 International Marketing
2. Students may approach the course instructor and request that the course be designated as Honors- This decision is entirely the instructor's. The instructor is not required to work with the student. However, a system will be developed so that all faculty will share the responsibility of supporting the Honors Program coursework requirements.
3. The student will present the Honors Compact to the Instructor with their portion of the form A form for the Honor's Compact will be provided by the International Business program.
4. The instructor determines the nature of the Honors-level enrichment of the
5. After the student and the instructor sign the Honors Compact, it will be sent to the Honors in International Business program faculty advisor, as well as to the University Honors Director, for final Honors Compacts must have final approval completed no later than three weeks after the beginning of a semester.

Students take Honors course #1 in their first semester of their first year of the Honors program, followed by Honors course #2 and #3 in subsequent semesters. Ideally, Honors courses should be completed no later than the end of the fall of their senior year at FAU.

### ***Requirement #3: Honors Capstone Project***

In addition to coursework and general enrichment, students in the Honors in International Business Program also need to complete a Capstone Project. A student's Capstone Project consists of two parts: An experiential component, followed by the creation of a portfolio exploring the connections between work completed in their Honor's Compacts and the experiential component. The final portfolio acts as their Honors Capstone Project.

## Part 1: Experiential Component

Completion of the equivalent of one semester of one of the following experiences after entering the International Business Honors program:

1. Study abroad as a full-time enrolled student at an International Business Program and/or FAU approved foreign university or college.
2. MAN 4956 International Business Study Abroad course enrollment, or approved equivalent, required for at least one semester.

An international internship with an organization that is doing, or dealing with, for-profit business, all while living in a foreign country. The International Business Program must grant approval of the internship before it begins.

1. MAN 4940 Management Internship course enrollment required for at least one semester.

Domestic internship with international requirements for at least 50 percent of required on-the-job duties. The International Business Program must grant approval of the internship before it begins. Again, the organization must be doing, or dealing with, for-profit business.

1. MAN 4940 Management Internship course enrollment required for at least one semester.

## Part 2: Honors Capstone Portfolio Project

Honors students create a portfolio consisting of the following:

1. Completed work from all three Honors Courses
2. A major analysis of the experiential component using prior Honors Compact
  - a. Analysis consists of applying Course Compact work to real-world situations experienced by the student during an internship or study abroad.
  - b. The goal of the portfolio project is for students to see connections among their honors experiences and to document for others their honors-level achievements.

The Capstone Portfolio Project is evaluated utilizing a set of criteria designed according to the type of experiential component chosen by the Honors student. In addition, the portfolio represents at least 25 percent of the student's grade in the associated internship/study abroad courses. Honors students are required to score at least a 75 percent on their final Capstone Portfolio Project to complete the requirement.

## INTERNATIONAL BUSINESS

## BACHELOR OF BUSINESS ADMINISTRATION (B.B.A.) OR BACHELOR OF SCIENCE (B.S.) TO MASTER OF SCIENCE (M.S) COMBINED PROGRAM

The International Business department offers a combined Bachelor of Business Administration in International Business or Bachelor of Science in International Business to Master of Science in International Business program. Students in this combined program may count up to 12 credits of approved graduate coursework (5000 level or higher) toward both their bachelor's degree and master's degree.

1. The student has met the minimum 120 credits for the bachelor's degree; and
2. The student has taken a minimum of 30 credits in 5000 level or higher courses for the master's program.

With the approximate duration of five years, this combined program provides attractive ways for students to continue their graduate work. Students will complete and graduate from their bachelor degree first, and then continue coursework to finish their master degree program.

### **Prerequisite Coursework for Transfer Students**

Students transferring to Florida Atlantic University must complete both lower-division requirements and requirements for the college and major. Lower-division requirements may be completed through the A.A. degree from any Florida public college, university or community college or through equivalent coursework at another regionally accredited institution. Before transferring and to ensure timely progress toward the baccalaureate degree, students must also complete the prerequisite courses for their major as outlined in the [Transfer Student Manual](#).

All courses not approved by the Florida Statewide Course Numbering System that will be used to satisfy requirements will be evaluated individually on the basis of content and will require a catalog course description and a copy of the syllabus for assessment.

### **Admission Requirements**

The GRE/GMAT requirement is waived for this program. To be eligible for the combined program, the bachelor student in International Business should:

1. Have a cumulative and FAU GPA of 3.25 or better at the end of their junior year. Note that the cumulative FAU and GPA of at least 3.25 must be maintained until the completion of the bachelor's degree in International Business.
2. Formally apply to the combined program, completing the admissions process at least one

semester prior to the beginning of the master's degree portion of their program.

Once admitted to the program, students begin taking graduate courses (5000/6000 level courses) in their senior year that would apply to both the bachelor's and master's degree programs. Students in the combined program must maintain continuous enrollment, in full-time status, during their bachelor's degree to remain in the combined program. Once students are admitted to the master's degree program, they must maintain continuous enrollment to remain in good standing. Students must also meet all of the degree requirements of the graduate program.

### **Degree Requirements**

To be eligible for the combined B.B.A. or B.S. in International Business to M.S. in International Business Degree Program, students must fulfill the following requirements:

1. Completion of the requirements for the B.B.A. or B.S. in International Business, and other requirements stipulated by the University or College; and
2. Completion of all requirements for the M.S. in International Business.

### **Credits Counted Toward Bachelor's and Master's Degrees**

The following undergraduate course requirements may be replaced with the shown graduate-level courses (a total of 12 credits). These graduate credits will count toward both the bachelor's degree and master's degree.

<b>Undergraduate Course Requirements</b>	<b>Graduate Course Requirements</b>

## **MANAGEMENT**

**BACHELOR OF BUSINESS ADMINISTRATION (B.B.A.)**

**BACHELOR OF SCIENCE (B.S.)**

**Entrepreneurship Concentration**

## Leadership and Applied Management Skills Concentration

The major in Management attracts high-quality students and prepares them to contribute effectively to organizations in the areas of general management skills and entrepreneurship. The department achieves this through an active partnership with the business community using traditional and alternate delivery systems to create managers and entrepreneurs with necessary skills to advance in a complex and changing world. The major in Management has two possible concentrations, one in Leadership and Applied Management Skills and the other in Entrepreneurship. To obtain a Management major, students must complete one of the concentrations. Since there is significant overlap in the coursework and the major granted is the same (Management), double majors are not permitted.

The department also offers an undergraduate [online Management program](#) (Leadership and Applied Management Skills concentration only); undergraduate minors in [Entrepreneurship](#), [Entrepreneurial Management](#), and [Leadership and Human Resource Development](#); and graduate certificates in [Crisis and Disaster Management](#) and [Innovation Entrepreneurship](#).

In addition to the University and College of Business degree requirements listed in the [Degree Requirements](#) section of this catalog, Management majors must complete the requirements below.

### Prerequisite Coursework for Transfer Students

Students transferring to Florida Atlantic University must complete both lower-division requirements (including the requirements of the General Education Program) and requirements for the college and major. Lower-division requirements may be completed through the A.A. degree from any Florida public college, university or community college or through equivalent coursework at another regionally accredited institution. Before transferring and to ensure timely progress toward the baccalaureate degree, students must also complete the prerequisite courses for their major as outlined in the [Transition Guides](#).

All courses not approved by the Florida Statewide Course Numbering System that will be used to satisfy requirements will be evaluated individually on the basis of content and will require a catalog course description and a copy of the syllabus for assessment.

### Pre-Business Foundation Coursework

## MASTER'S PROGRAMS

### PROGRAMS IN HEALTH ADMINISTRATION

[Link to Programs in International Business](#)

[Link to Programs in Business Administration](#)

## **HEALTH ADMINISTRATION**

### MASTER OF HEALTH ADMINISTRATION (M.H.A.)

[Link to Executive M.H.A.](#)

[Link to Health Administration Certificates](#)

The Master of Health Administration (M.H.A.) is a 30-37 credit program that builds skills reflecting the latest in management and health care theory and practice. The M.H.A. program develops leaders who possess the values, knowledge and skills to achieve optimal delivery of healthcare. The program is designed for:

1. Recent graduates of health administration programs or business programs who want to further prepare for a non-clinical career in a health care or related field.
2. Graduates of clinical programs—medicine, physical therapy, nursing, etc.—who want to pursue a management career or who want to develop management skills.
3. Clinical practitioners and aspiring administrators seeking to make a career change or wanting to move into an administrative position.
4. People working in non-health fields who want to make a career change.

M.H.A. students gain a mastery of knowledge in healthcare administration varying from hospitals to nursing homes, outpatient clinics and assisted living facilities. Students gain understanding of patient demographics, health law, health insurance, systems organization, research, finance, health care technology and leading topics in today's healthcare industry. For more information, visit [www.business.fau.edu/masters-phd/mha/index.aspx](http://www.business.fau.edu/masters-phd/mha/index.aspx).

#### **Admission Requirements**

Applicants must meet the following qualifications:

1. A bachelor's degree from an accredited institution or its equivalent; and
2. A cumulative grade point average of 3.0 on a 4.0 scale in the last 60 (or equivalent) credits of college coursework leading toward a bachelor's degree. Post-baccalaureate coursework from an AACSB-accredited business school not included in an advanced degree may be included in the calculation; and
3. Submit official, competitive scores on a GMAT or GRE taken within five years: GMAT scores of 500 and 4.0 (writing), or GRE scores of at least 153 (verbal), 144 (quantitative) and 4 (analytical writing).\* When evaluating GMAT/GRE scores, the admissions committee looks for a balance

between verbal, quantitative and analytical writing strengths. All three components of the GMAT are required.

\* The GMAT or GRE requirement is waived for licensed physicians (MDs, osteopathic physicians, dentists, chiropractic and pediatric physicians and others) who have completed a nationally recognized qualifying examination for admission to post-graduate training.

**Internship**

Students who do not have sufficient prior work experience in healthcare, as defined below, are required to take GEB 6901 for 1 credit, in which they will perform an internship activity for about 15 hours per week during the semester. The internship will be approved by the instructor prior to registration and will meet the goal and one or more of the objectives stated below. The internship must be shown to accomplish at least one of objectives 1 through 3 below before it will be approved.

***Internship Goal:*** To provide M.H.A. students with a practical learning experience within the

management structure of a healthcare organization.

**Internship Objectives:** For M.H.A. students to:

1. Experience the interaction of patients, providers and payments;
2. Learn the nature of the interactions between sectors in the healthcare industry;
3. Function in the work environment of the healthcare sector of their career interest;
4. Make contacts that can help the student locate a job when they finish their degree.

The internship requirement may be waived if the student has acceptable prior job experience, which includes two years of supervisory or managerial experience in an organization that diagnoses, produces products for, treats or cares for frail, sick or injured people, or makes grants to or pays for care in such organizations. "Supervisory or managerial experience" means that the person had at least two employees reporting to her/him and the person had budgetary responsibility for a functional area.

### **Graduate Business Communication Program**

Students must register for GEB 6215 their first term in the main program. Students enrolling in only foundation-level courses are not required to register for GEB 6215 at that point, but they must register for it during the next semester in which they register for M.H.A. core or elective credits.

### **Disallowed Course Combinations**

M.H.A. students may not take both HSA 6707 and SOW 6404 for credit toward the M.H.A. degree. However, SOW 6404 may be substituted for HSA 6707 in extraordinarily extenuating circumstances with approval of the program director and lead course instructor.

## **HEALTH ADMINISTRATION**

### **MASTER OF HEALTH ADMINISTRATION (M.H.A.)**

#### **EXECUTIVE PROGRAM**

### **Crisis and Disaster Management Concentration**

This 15-month executive program is specially designed to allow participants to continue their professional responsibilities or for those students who prefer the convenience of a full service, structured cohort program. The program requires 30 credits with courses offered every third weekend, Saturday and Sunday, 8 a.m. to 6:15 p.m., and it is fully accredited by the Association to Advance Collegiate Schools of Business (AACSB) and the Southern Association of Colleges and Schools (SACS). FAU offers the program in two formats: on-campus every third weekend and 100 percent online.

## **Online Master of Health Administration**

FAU's Executive Master of Health Administration Online Program (OMHA) is 100 percent asynchronous, allowing students to access courses at any time and from any location, with an internet connection. The instruction and content replicates the classroom experience, where students have recorded online lectures, presentations, discussion and chats.

### **Admission Requirements**

The EMHA/ OMHA curriculum is a cross section of business disciplines. From Health Law and Organization Behavior in Healthcare to Healthcare Finance and Research Methods, the EMHA/OMHA courses are packed with the latest health administration-specific content. Additionally, students earn the Lean Six-Sigma Green Belt certification.

To qualify for unconditional or full acceptance to the Executive Master of Health Administration or Online Master of Health Administration, applicants are required to have:

1. At least four years of professional work experience;
2. An undergraduate degree in any discipline from a regionally accredited institution with at least a cumulative grade point average of 3.0 on a 4.0 scale in the last 60 (or equivalent) credits of college coursework leading toward a bachelor's degree. Post-baccalaureate coursework from an AACSB-accredited business school not included in an advanced degree may be included in the calculation.
3. An official GMAT score of at least 500 or GRE scores of at least 153 (verbal), 144 (quantitative) and 4 (analytical writing) are required. The GMAT/GRE exam score may be waived for the program. GMAT/GRE waiver eligibility is based on evaluation of credentials listed under Admission Requirements.

Conditional admission may be available under extraordinary circumstances to applicants who have received a bachelor's degree from a regionally accredited institution, but who fall short of the GPA and/or the GMAT requirement or who show high promise. In these cases. The Executive Master of Health Administration or Online Master of Health Administration admissions committee will review all evidence of high promise, including but not limited to: grade trends, mature work experience, work accomplishment and promotion, type and rigor of undergraduate degree program, references and letters of recommendation and evidence of having attained some "A" grades in rigorous courses.

After the first year in the Executive Master of Health Administration or Online Master of Health Administration program, the admissions committee will review each student receiving conditional admission and will recommend either full admission to or dismissal from the program.

## Executive Master of Health Administration Format

Florida Atlantic University's Executive Master of Health Administration (EMHA) Program is an intensive 15-month program offering exceptional quality.

The Executive M.H.A. curriculum allows participants to continue their professional responsibilities while earning an AACSB accredited M.H.A. degree as full-time graduate students. Each class begins and progresses through the program as a group, sharing the same sequence of classes and educational experiences.

This program consists of 30 credits. Classes are held every third weekend (Saturday and Sunday) from 8 a.m. to 6:15 p.m., with breakfast and lunch served each weekend.

The Executive Master of Health Administration Program is offered at the FAU campus in Boca Raton. On-site Executive Master of Health Administration are available to local sponsoring organizations.

## Online Master of Health Administration Format

The online M.H.A. is 100 percent online and contains the same curriculum and is taught by the same professors as in the campus-based programs.

## Executive Master of Health Administration Curriculum

Class 1	Introduction to Health Care Systems	HSA 6103	3
Class 2	Communication Strategies for Business Professionals	GEB 6217	3
Class 3	Global Issues in Health Care Delivery	HSA 6125	3
Class 4	Healthcare Finance	HSA 6175	3
Class 5	Organizational Behavior in Healthcare	HSA 6118	3
Class 6	Research Methods for Healthcare Management	HSA 6707	3
Class 7	Planning and Marketing in Healthcare	HSA 6108	3
Class 8	Health Policy	HSA 6152	3
Class 9	Health Law	HSA 6425	3
Class 10	Current Topics in Healthcare Management	HSA 6937	3

Content, coursework and fees may vary as determined by the administration. Florida Atlantic University reserves the right to change curriculum, sequence, program fees and other program requirements as necessary.

### **Academic Standing, Policies, Graduation**

The Executive Master of Health Administration program and Online Master of Health Administration programs follow the same policies regarding academic standing and graduation used in the College of Business and the same grading standards of the University. Student continuation in the Executive Master of Health Administration program or Online Master of Health Administration program requires satisfactory progress toward the graduate degree. Evidence of such progress includes maintenance of a cumulative 3.0 grade point average (GPA). Graduation will be prohibited if the final cumulative GPA is less than 3.0 upon completion of the total program curriculum.

Graduate students with GPAs less than 3.0 will be required to complete an academic progression plan (APP). The APP is a contractual agreement that outlines particular courses and grades to reestablish good academic standing. APPs should generally outline a path (usually not more than two semesters) to reestablish a 3.0 GPA. Students who are placed on an academic progression plan and are not making progress toward their academic goals set forth by the APP may be recommended for dismissal from the program. The College may enact registration holds to prohibit a student's future enrollment until the APP is finalized. Students who do not fulfill the obligations established in the APP are recommended for dismissal to the Dean of the Graduate College.

### **Program Fees Executive M.H.A.**

The Executive Master of Health Administration program is a full-service, all-inclusive program. Executive Master of Health Administration Program fees cover all program costs, including tuition, textbooks, course materials, meals and graduation activities. To view our full cost of attendance information page, visit <https://www.fau.edu/finaid/other/cost-of-attendance/>. See the Executive M.H.A. [website](#) for more information.

### **Program Fees Online M.H.A.**

The Online Master of Health Administration program is a full-service, all-inclusive program. Online Master of Health Administration program fees cover all program costs, including tuition and graduation activities. To view our full cost of attendance information page, visit <https://www.fau.edu/finaid/other/cost-of-attendance/>. Books are not included for the Online Master of Health Administration. See the [website](#) for more information.

## Application Process and More Information

To apply or to receive more information about the Executive Master of Health Administration program or Online Master of Health Administration program, see [website](#) or call 561-297-6000.

## HEALTH ADMINISTRATION GRADUATE CERTIFICATE

*(Minimum of 12 credits required)*

Graduate students may earn a certificate in Health Administration with the successful completion of four courses from the choices below. If a student chooses this option, the courses used to earn the certificate cannot later be counted toward a Master of Health Administration degree.

---

### Certificate Requirements

## HEALTH ADMINISTRATION GRADUATE CERTIFICATE PROFESSIONAL PROGRAM

*(Minimum of 12 credits required)*

The Professional Health Administration certificate is designed for working professionals currently enrolled in self-supporting programs in the College of Business. This is a stand-alone certificate tailored for working professionals and alumni with graduate degrees who are looking for specialized knowledge in Health Administration. The certificate consists of 12 credits chosen from the table above.

## PROGRAMS IN INTERNATIONAL BUSINESS

[Link to International Business Executive Program](#)

### **INTERNATIONAL BUSINESS** **MASTER OF SCIENCE (M.S.)**

The Master of Science (M.S.) with major in International Business is a 33-credit program that provides specialized management education for students who want to pursue or enhance a career in businesses and organizations that are involved in global, cross-national production, services, trade or investment. Prior business coursework is not required for the program. The degree combines a broad-based curriculum in international business, classroom learning, a possible study abroad field experience as well as an applied project designed to develop managerial skills in various aspects of global business.

#### **Admission Requirements**

Applicants will:

1. Have earned a bachelor's degree from a regionally accredited college or university or the international equivalent;
2. Have a strong grade point average on all previous coursework (typically 3.0 minimum GPA), though emphasis will be on the last 60 credits earned;
3. Submit a one- to two-page essay describing both the applicant's background and objectives for undertaking graduate study;
4. Submit an official GMAT score of at least 500 or GRE scores of at least 153 (verbal), 144 (quantitative) and 4 (analytical writing);

Conditional admission may be available under certain circumstances to applicants who have received a bachelor's degree from a regionally accredited institution, but who fall short of the GPA and/or the GMAT requirement or who show high promise. In these cases, the admissions committee will review all evidence of high promise including, but not limited to, grade trends, mature work experience, work accomplishment and promotion, type and rigor of undergraduate degree program, references and letters

of recommendation and evidence of having attained some "A" grades in rigorous courses. After the first term, the admissions committee will review each student receiving conditional admission and will recommend either full admission to or dismissal from the program.

### Admission Requirements for International Students

A graduate of a college or university outside of the United States who has completed an academic program equivalent to an American bachelor's degree may apply for admission to the master's program. International students are required to submit the application forms and an official certified transcript indicating the nature and scope of their academic training. An international applicant whose native language is not English must submit a score of at least 600 (CBT-250) on the Test of English as a Foreign Language (TOEFL). For details, applicants should visit [www.ets.org](http://www.ets.org). The IELTS test may also be considered. Visit [www.ielts.org](http://www.ielts.org).

### Application Procedure and Deadlines

Applicants must follow application procedures outlined in the [Admissions](#) section of this catalog. The GMAT or GRE must be taken, and the required application material must be submitted to the Graduate College by the deadline established by the University each term. Early submission of admission documents facilitates the decision process.

### Curriculum

The coursework conveys the body of knowledge of international business management. Prior coursework in business is not required.

### **International Business Elective Coursework**

Graduate electives relevant to international business approved by the chair or program director. Typical coursework includes a short study abroad excursion and additional classes from departmental offerings. 6

**Total Required Credits** **33**

## **INTERNATIONAL BUSINESS** MASTER OF SCIENCE (M.S.) EXECUTIVE PROGRAM

The Executive Program in International Business is designed to prepare emerging leaders for work in national and global corporations in various business-centric roles, including business development, finance, economics, marketing, operations, communications and entrepreneurship. Classes are held on weeknights and are designed with the working professional in mind. This is a 33-credit, 15-month program and does not require prior business coursework. The curriculum is the same as for the traditional M.S. program noted above. The program is available in person or fully online.

## PROGRAMS IN BUSINESS ADMINISTRATION

### **BUSINESS ADMINISTRATION** MASTER OF BUSINESS ADMINISTRATION (M.B.A.)

#### **Concentrations:**

**Accounting**

**Business Analytics**

**Crisis and Disaster Management**

**Entrepreneurial Management**

**Finance**

**Health Administration**

**Hospitality and Tourism Management**

## **International Business**

## **Management Information Systems**

## **Marketing**

## **Operations Management**

## **Sport Management**

[Link to Executive M.B.A.](#)

[Link to Professional M.B.A.](#)

[Link to Crisis and Disaster Management Certificate](#)

[Link to Innovation Entrepreneurship Certificate](#)

The principal objective of the Master of Business Administration (M.B.A.) Program is to advance the quality of business management. The program provides advanced management education in an environment that encourages students to extend their leadership capabilities. It enables students to gain broad managerial skills and to develop specialized expertise in a business discipline that best suits their career aspirations. This program also available online.

### **Admission Requirements**

The College of Business seeks a diverse, highly qualified group of graduate students. Applications are evaluated on several factors emphasizing prior academic performance, GMAT or GRE scores and the potential for scholarly and professional success. In addition to other requirements for admission to the Graduate College at FAU, to be considered for this master's program in the College of Business, applicants must:

- Have earned a bachelor's degree from a regionally accredited college or university or the international equivalent.
- Have a strong grade point average on all previous college work, though emphasis will be on the last 60 credits earned.
- Submit a one-to-two page essay describing both the applicant's background and objectives for undertaking graduate study.
- Submit an official, competitive score on a GMAT or GRE taken within five years: a score of at least 1000 (combined quantitative and verbal) or 153 Verbal, 144 Quantitative and 4 Analytical Writing on the GRE or a score of at least 500 on the GMAT. When evaluating GMAT/GRE scores, the admissions committee looks for a balance between verbal, quantitative and analytical

writing strengths. All three components of the GMAT/GRE are required.

- International applicants whose native language is not English must have a TOEFL score of at least 600 (paper), 250 (computer) or 100 (Internet).
- Have all materials for the application complete and filed with FAU prior to the deadlines.

Deadlines for domestic admission: July 1 for fall, November 1 for spring and April 1 for summer.

Deadlines for international admission: February 15 for fall, July 15 for spring and January 15 for summer.

Supplemental information that may be provided to highlight characteristics not evident in the required admissions materials includes:

- A one-page résumé.
- Letter(s) of recommendation from employers, faculty members or others who can attest to scholarly ability and/or agency.
- A writing sample demonstrating analytical and explanatory skills.

Successful performance in other graduate work attempted will also be considered in the admission decision. Due to the uniqueness of The Executive M.B.A. Program, transfer between programs is not possible. Admission to one program does not constitute admission to all programs.

Transient students are students in good standing in a graduate program at another accredited institution. To enroll in graduate business courses at FAU and transfer that credit to another institution, transient students must present a letter certifying good standing and enumerating the exact courses to be taken from FAU. Transient students enroll for those courses on a space-available basis and as non-degree-seeking students.

Non-Business graduate students who are fully admitted, are making progress in an FAU graduate program and are in good standing may enroll in graduate business courses with permission of the assistant or associate dean. All course prerequisites must be met.

### **Admission Requirements for International Students**

A graduate of a foreign college or university who has completed an academic program equivalent to an American bachelor's degree may apply for admission to the master's program. International students are required to submit the application forms and an official certified transcript indicating the nature and scope of their academic training. An international applicant whose native language is not English must submit a score of at least 600 (CBT-250) on the Test of English as a Foreign Language (TOEFL). For details, applicants should write to: Test of English as a Foreign Language, Educational Testing Service, P.O. Box 6151, Princeton, New Jersey, 08540-6151, U.S.A., or visit [www.ets.org](http://www.ets.org). The IELTS test may

also be considered. See [www.ielts.org](http://www.ielts.org).

## Application Procedures and Deadlines

Applicants must follow application procedures outlined in the [Admissions](#) section of this catalog. The GMAT must be taken and the required application material must be submitted to the Graduate College by the deadline established by the University each term. Early submission of admission documents will facilitate the decision process.

## Enrollment Policy

Priority for enrollment in graduate (6000 and 7000 level) business courses is as follows:

1. Students who have been admitted to a graduate business program that requires a particular course;
2. Students in other FAU graduate programs that require a specific business course;
3. Students who have been admitted to a graduate business program not requiring a particular course but desire the course as an elective;
4. Degree-seeking students in other FAU graduate programs who desire a business class as an elective to supplement their program.

Students must have completed class prerequisites to enroll in graduate business courses. In most cases, non-degree students are not permitted to enroll in graduate business courses unless they have received permission from Student Academic Services and/or the faculty member teaching the course. Students in the M.B.A. or M.AC. programs who lack foundation coursework may be prohibited from registering for some courses until foundation requirements are met.

Students not falling into one of the above categories may not register for graduate business courses at the 6000 and 7000 levels without permission from the assistant or associate dean and the instructor. Persons doing so will be administratively withdrawn from those classes sometime after the drop/add period.

## Degree Requirements

To qualify for the M.B.A. degree, each candidate must:

1. Meet all general requirements of the University for a master's degree and complete the program within 10 years of first enrollment in an M.B.A. graduate course. If the thesis option is selected, the thesis must be completed within five years of its start and within the 10-year period.
2. Complete 43 credits of required and elective courses with a GPA of 3.0 or better. Any grade below a "C" is typically considered a failure and the course must be retaken. No more than two courses or 6 credits of M.B.A. graduate work can be transferred from other accredited institutions.

Any additional transfer credit may be accepted only by petition. (See Transfer Credits heading appearing later in this section.)

3. Successfully complete GEB 6215 requirements.
4. File a plan of study no later than one semester prior to graduation.

### **Location**

Courses in the M.B.A. curriculum are offered at the Fort Lauderdale campus in the evening and the Boca Raton campus during the day and in the evening. Nearly all M.B.A. courses are offered at all locations as affected by demand and resource constraints. A few M.B.A. courses are offered online, but the entire degree program likely cannot be completed without traditional courses.

### **Time Commitment**

Full-time graduate students having the required academic background in business can complete the M.B.A. Program in as little as 18 months. For full-time students lacking that background, completion requires at least 30 months. Part-time students can progress at their own pace, the only requirement being that all degree requirements must be completed within 10 years of first enrollment in a graduate M.B.A. course.

### **Academic Standing Policy Statement**

Continuation in the program requires satisfactory progress toward the graduate degree. Evidence of such progress includes maintenance of a cumulative 3.0 average throughout the course of academic study. In addition, only grades of "A," "A-," "B+," "B," "B-," "C+" or "C" are acceptable in fulfilling graduate school requirements in the M.B.A. plan of study.

Students who fall below a 3.0 GPA are placed on academic warning. Students on academic warning for two consecutive semesters may be academically dismissed. Failure to attain a 3.0 cumulative average within three successive semesters of active enrollment will result in automatic dismissal. The Assistant or Associate Dean of Business reserves the right to dismiss any student at any time when, in the dean's judgment, the student is not making satisfactory progress toward the degree.

### **Prerequisite Policy Statement**

Any student who does not meet course prerequisites will be dropped by the administration from such course(s) at any time during a semester when the deficiency is discovered. Tuition will be forfeited.

### **The M.B.A. Curriculum**

The M.B.A. Program consists of 43-55 credits of graduate business study. All new M.B.A. students must register for GEB 6215, Communication Strategies for Business Professionals and Core-Course Follow-Up, and GEB 6931, The Executive Forum, at their first registration in core or elective courses.

<b>First semester</b>		
Business Law and Applied Ethics	BUL 6455	1.5
Advanced Managerial Economics	ECP 6705	1.5
Communication Strategies for Business Professionals and Core-Course Follow-Up	GEB 6215	3
Contemporary Issues in Industry: The Executive Forum	GEB 6931	1
<b>Second semester</b>		
Financial Accounting Concepts	ACG 6027*	3
Leadership and Organizations	MAN 6296	3
<b>Subsequent semesters</b>		
Advanced Analysis and Application of Accounting Data (1)	ACG 6315	3
Financial Management	FIN 6406*	3
Advanced Financial Management (2)	FIN 6806	3
Management of Information Systems and Technology (1)	ISM 6026	3
Operations Management (3)	MAN 6501	3
Global Business Strategy	MAN 6721	3
Global Environment of Management	MAN 6937	3
Marketing Functions and Processes	MAR 6055*	3
Advanced Marketing Management (4)	MAR 6815	3
Data Analysis for Managers	QMB 6603*	3
<b>Core Total</b>		<b>31-43*</b>
Electives		12
<b>Degree Total</b>		<b>43-55*</b>

\* Course can be waived if student has taken undergraduate course equivalent.

## Notes:

1. Accounting concentration students must be approved by both the School of Accounting and the M.B.A. program. Admission to the M.B.A. program does not guarantee entry into the Accounting concentration. The Accounting concentration student will substitute ACG 6138 for ACG 6315 and ACG 6475 for ISM 6026. M.B.A. students who are undergraduate Accounting majors NOT in an Accounting concentration will substitute another 6000-level accounting elective course for ACG 6315. ACG 6027, ACG 6137, ACG 6347 and ACG 6635 may not be counted for graduate credit. The exact substitutions must be approved by the College of Business Office of Graduate Student Programs based on the prior academic record.
2. Students with 18 or more undergraduate credits in Finance may substitute another 6000-level FIN course for FIN 6806.
3. Students who have had an undergraduate operations management course may substitute MAN 6525, MAN 6581 or MAN 6596 for MAN 6501.
4. Students with 18 or more undergraduate credits in Marketing may substitute a 6000-level MAR elective offered by the Marketing Department for MAR 6815.

## CONCENTRATIONS

Concentrations are not required and may not be desirable for a student seeking a well-rounded, diverse skill set. For students who desire the depth of a concentration, all concentrations within the M.B.A. program consist of the basic core as listed above (31 credits) and concentration electives (12 credits). In order to receive certification in a concentration, all coursework must be completed with no grade less than a "B-" and an average of 3.0 for the 12 to 15 credits of the concentration. Students who do not elect a concentration will be granted a General M.B.A. Concentrations are not designated on a diploma, but they are noted on the transcript.

**The Accounting Concentration:** Students electing the Accounting concentration will take the basic core as listed above and make the appropriate substitutions as listed in Note #1 under the Core Component. In addition, students must complete four 6000-level ACG or TAX courses for which prerequisites have been met. ACG 6027, ACG 6137, ACG 6347, ACG 6635 and Accounting courses at the 5000-level are not acceptable for the Accounting concentration in the M.B.A. program.

**The Business Analytics Concentration:** Students electing the Business Analytics concentration take the basic core as listed above and four of the following elective courses:

ISM 6136, Data Mining and Predictive Analytics  
ISM 6217, Database Management Systems  
ISM 6404, Introduction to Business Analytics  
ISM 6405, Advanced Business Analytics  
ISM 6427C, Business Innovation with Artificial Intelligence  
ISM 6555, Social Media and Web Analytics  
QMB 6303, Data Management and Analysis with Excel  
QMB 6616, Supply Chain Analytics

Or other approved courses.

**The Crisis and Disaster Management Concentration:** Students take the basic core courses listed above and the following 3-credit course plus three additional courses in consultation with the advisor for a total of 12 credits for the concentration.

Three graduate MAN courses in consultation with an advisor  
MAN 6926, Field Project

**The Entrepreneurial Management Concentration:** Students in the Entrepreneurial Management concentration will take the basic core as listed above. The entrepreneurial component consists of four courses as follows:

***Required:*** ENT 6016, Venture Creation

***Two of the following:***

ENT 6116, Advanced Business Plan Development  
ENT 6186, Technology Commercialization Strategies  
ENT 6428, Entrepreneurship and Venture Capital  
MAN 6581, Project Management  
MAR 6837, Developing and Marketing Innovations

***One of the following:***

ENT 6226, Entrepreneurial Skills for Managers  
ENT 6946, Entrepreneurial Consulting Project  
HSA 6103, Introduction to Health Care Systems  
ISM 6508, Web-Based Business Development  
MAN 6156, Human Resources Management

MAN 6931, Special Topics

MAN 6943, Graduate Management Internship

SPB 6815, Managing the Sport Enterprise

or a relevant course from another graduate program (subject to department chair or advisor approval)

**The Finance Concentration:** Students electing the Finance concentration will take the basic core as listed above and any four of the following courses: FIN 6246, FIN 6436, FIN 6537, FIN 6605, FIN 6515, REE 6305, FIN 6936, RMI 6356, RMI 6426 or RMI 6727. Students with 18 undergraduate credits in Finance may replace FIN 6806 in the core with an alternative course from the elective list.

**The Health Administration Concentration:** Students electing the Health Administration concentration will take the basic core as listed above and four elective courses as follows:

***Required:*** HSA 6103, Introduction to Healthcare Systems

***One of the following:***

HSA 6108, Planning and Marketing in Healthcare

HSA 6118, Organizational Behavior in Healthcare

***One of the following:***

HSA 6152, Health Policy

HSA 6425, Health Law

***One of the following:***

HSA 6175, Healthcare Finance

HSA 6707, Research Methods for Healthcare Management

**The Hospitality and Tourism Management Concentration:** Permits students to combine interests in the hospitality and tourism industry in a complementary manner to the core courses of the MBA. Students gain an understanding of the core areas within this industry, including, but not limited to, guest service, operations, finance and marketing/revenue management.

Students electing the Hospitality and Tourism Management concentration will take the basic MBA core courses and four elective courses (12 credits) from the list below. Students interested in Directed Independent Study (DIS) must receive permission from both the chair/director and the instructor of record prior to using the DIS course toward the 12-credit concentration\*.

Students must be in good standing at FAU, must meet all requirements of their respective graduate

program and may use hospitality and tourism management courses as electives if permitted by their particular graduate program. Students must maintain an overall average grade of "B" (3.0 GPA) upon completion of all required courses in order to receive the Hospitality and Tourism Management concentration.

***Choose any four courses from the following list (12 credits):***

HMG 6299, Hospitality Operations: A Case Approach, 3 credits

HMG 6506, Contemporary Issues in Hospitality Marketing, 3 credits

HMG 6546, Strategies for Excellence in Guest Service Management, 3 credits

HMG 6756, Meetings and Events Management, 3 credits

HMG 6901, Directed Independent Study in Hospitality Management, 3 credits

Any Marketing (MAR) course at the 6000 level or higher, 3 credits

**The International Business Concentration:** Students in the International Business concentration will take the basic core as listed above. The international component consists of four elective courses within three blocks. Students must take one course from each block. The fourth course may be chosen from any block with a limit of 3 credits for GEB 6957, International Field Experience.

**Block 1:** ECO 6706, Advanced International Trade; ECO 6716, Advanced International Monetary Economics; or FIN 6605, Multinational Finance.

**Block 2:** MAN 6614, International Business Operations; MAN 6728, Managing Effectively in Emerging Market Economies; MAR 6158, Global Marketing; or MAN 6609, Cross-Cultural Management and Human Resources.

**Block 3:** ACG 6275, International Accounting; GEB 6957, International Field Experience (research on and travel to a foreign country); or an additional course from Block 1 or 2.

**The Management Information Systems Concentration:** Students electing the Management Information Systems concentration will take the basic core as listed above and four of the following: ISM 6508, ISM 6328, ISM 6368, ISM 6427C, ISM 6455, ISM 6509, MAN 6581.

**The Marketing Concentration:** Students electing the Marketing concentration will take the basic core as listed above with any four elective courses offered by the Marketing Department at the 6000 level.

**The Operations Management Concentration:** Students electing the Operations Management concentration will take the basic core as listed above and four elective courses as follows: MAN 6525,

Business Process Improvement Management; MAN 6581, Project Management; MAN 6596, Supply Chain Management; and one class from the following list: ISM 6508, ISM 6455, MAR 6837, QMB 6616 or other approved Special Topics courses.

**The Sport Management Concentration:** Students electing the Sport Management concentration will take the basic core as listed above and the following required courses: SPB 6406, Sport Law; SPB 6815, Managing the Sport Enterprise; SPB 5817, Financial Aspects of Sport Management; SPB 6940, Sport Management Internship; and SPB 6716, Sport Marketing. Students must also take either SPB 6106, Management of Intercollegiate Athletics; or SPB 6306, Management of Sport, Entertainment and Convention Facilities. Admission to the Sport Management concentration is dependent upon the recommendation of the director. A pre-admission interview is required.

### **Graduate Business Communication Program**

Written and verbal communication skills are integrated components of the M.B.A. program. As such, students must demonstrate communication proficiency appropriate to academic, professional and business environments. Students will demonstrate their written and verbal communication skills as they complete the following activities: weekly professional development sessions, written course assignments and classroom presentations. Students are not permitted to register for key integrated courses (ACG 6315, ACG 6138, ACG 6475, MAN 6937, ISM 6026, FIN 6806 or HSA 6103) unless they have enrolled in GEB 6215.

The Graduate Communications Program is offered in GEB 6215: Communication Strategies for Business Professionals and Core-Course Follow-Up. It is integrated with core and elective courses. Some assignments are evaluated by both the professor and by Graduate Communication Program instructors. Communication skills are also enhanced in the weekly sessions.

Students must register for GEB 6215 upon their first registration in core or elective courses. Students enrolling only for foundation-level courses are not required to register for GEB 6215 at that point. Grades in GEB 6215 are distributed on a satisfactory or unsatisfactory basis. Students who fail to advance through GEB 6215 will receive an unsatisfactory ("U") grade and must register for the course again. Failure to complete GEB 6215 in a reasonable timeframe will result in the student's dismissal from the M.B.A. program.

A student who does not register for GEB 6215 during the first semester of M.B.A. core or elective credit will have an academic hold placed on the student's record. The hold denies advance registration privileges until the student has conferred with the Director of Master's Programs in Business.

Students who have received a grade of "U" and who do not re-register for GEB 6215 in the next

semester of attendance following issuance of the "U" will be administratively dropped from graduate courses.

Applications for degree will not be accepted unless certification requirements have been met and a grade of "S" has been issued.

### **Contemporary Issues in Industry: The Executive Forum**

The forum provides exposure to and interaction with business executives from a variety of fields. Students will register for the forum in the first fall or spring semester of their program and must attend 10 sessions or presentations by executives to receive credit. There will be 14 presentations each fall and spring semester, and the student may complete the requirements in one semester or may divide attendance into two semesters. Presentations will not be made in summer semesters.

The executives invited to participate provide an invaluable bridge between the theory and practice of business and the consideration of current challenges facing business and industry, and provide an important linkage with the business community.

The forum will be graded on a satisfactory/unsatisfactory ("S"/"U") basis, with an incomplete ("I") grade issued until all requirements are completed.

### **Elective Component**

The elective component consisting of 12 advanced graduate credits in business at the 6000 level:

1. From one or more departments in the College of Business, or
2. From thesis options that provide 6 credits in an original area of research in lieu of coursework, or
3. Electives as specified in a concentration.

Electives are available in accounting, information technology, economics, finance, health administration, human resources, international business, management, marketing, operations management and real estate, as well as from interdisciplinary industry-specific programs. Out-of-College electives may be approved by the Assistant or Associate Dean of Business if they are pertinent to the individual plan. Directed study electives are limited to one course or 3 credits. No foundation course may be used as an elective in any program.

### **The Thesis Option**

The Thesis option consists of 6 graduate credits of thesis research in business. Thesis work involves the following steps and regulations:

1. Submit to the appropriate department chair a written proposal discussing the area in which the

study/research will be conducted. The scope of the study must involve a significant amount of originality.

2. If the proposal is satisfactory, the department chair will recommend to the Director of Master's Programs in Business a thesis committee. It will include a thesis committee chair and two faculty members, one of whom will be from outside the concerned department.
3. The original and three copies of the completed thesis must be submitted to the chair of the thesis committee at least 30 days before the end of the semester in which the student expects to receive the degree.
4. An examining committee will then conduct an oral examination during which the student defends the thesis.
5. Upon passing the oral defense, the student shall deliver to the Assistant or Associate Dean of Business copies of the thesis in final form in accordance with Graduate College policies. It must be properly signed by the chair of the thesis committee and the chair of the thesis director's department. The chair must be a graduate faculty member of the College of Business.
6. Refer to University thesis guidelines for earlier deadlines and requirements.
7. The student can be certified for the M.B.A. degree only after the thesis has been approved and accepted by the Assistant or Associate Dean of Business and the Graduate College.

Once the thesis is begun, the student will be expected to register for at least 3 credits of thesis study each succeeding term (excepting summer term) until the degree requirements are satisfied. Students who find it necessary to be excused from thesis registration for any term because they will, indeed, be inactive for the term, must obtain written approval from the Assistant or Associate Dean of Business prior to the beginning of the term.

### **Transfer Credits**

Acceptance of transfer credits from accredited institutions is dependent upon the pertinence of the work to the M.B.A. Program. A transfer student must confer with a graduate business advisor immediately upon entry to ensure that no misunderstanding occurs with regard to transfer credit in the degree plan. The transfer of two courses or 6 credits may be allowed subject to the following restrictions:

1. All transfer credits must be at least a "B" (3.0 on a 4.0 scale), and the student's overall grade point average in all previous graduate work must be at least a 3.0 on a 4.0 scale.
2. No graduate credit will be allowed for life experience.
3. Additional transfer credits may be accepted, by petition, from other institutions that are accredited by AACSB. A maximum of one-third of the credits leading to a degree is eligible for transfer consideration.
4. The use of transfer credit in concentrations is strictly limited and requires advance, written

approval.

5. Transfer credits are only considered if earned less than seven years prior to matriculating into the program.

### **Credit Duplication Policy Statement**

Neither credit used for another degree nor any foundation course credit may be counted toward the 40 credits of advanced courses. Students will not receive credit for core courses that duplicate their undergraduate education courses.

### **Time Limit**

Candidates for the M.B.A. degree must complete all work within a 10-consecutive-year period after initial registration in an M.B.A. course. Thesis credits must be earned within five years of first thesis registration and within 10 years of first registration in a graduate M.B.A. course.

### **Academic Standing**

Continuation in the M.B.A. Program requires satisfactory progress toward the degree. Evidence of such progress includes:

1. Maintenance of a 3.0 cumulative GPA throughout the program, including the Foundation Component;
2. Progress made toward completing GEB 6215 in a timely fashion;
3. Absence of academic irregularities, as defined in the FAU Student Handbook;
4. Progress made since first enrollment in a graduate course. Only grades of "A," "A-," "B+," "B," "B-," "C+" and "C" are acceptable in fulfilling graduate school and M.B.A. Program requirements.

Failure to attain a 3.0 cumulative average within two successive semesters may result in dismissal. The College reserves the right to dismiss any student at any time in their academic career when the student is not making satisfactory progress.

Students who fail to attain a 3.0 FAU graduate GPA will be placed on academic warning. Students on warning are subject to possible academic dismissal from the College. In conjunction with the Graduate College's warning and dismissal procedures, the College of Business Student Academic Services Office may require many categories of students on warning to complete an academic progression plan (APP) to establish a path for success. Graduate students with very poor GPAs (less than 2.5) after their first semester may be required to complete an APP. Students who do not fulfill the obligations established in the APP will be recommended for dismissal to the Dean of the Graduate College.

A student receiving conditional admission will be informed by the M.B.A. admissions committee about

the admission/dismissal decision at the end of the conditional admission period, which is within one year or less from the beginning of the semester specified in the letter of conditional acceptance. A student who fails to meet the criteria for unconditional/full admission will be dismissed at either the termination date specified under the conditional admission arrangement, or as soon as evidence of unsatisfactory progress becomes available.

### **Financial Assistance**

Limited financial assistance is available to graduate students in the College of Business through fellowships and assistantships, which may include both income and out-of-state tuition waivers. Interested students should contact a graduate business advisor or a department chair. Additional information may be obtained from the Student Financial Aid Office.

Cooperative education programs are available. Contact the [FAU Career Center](#). Full-time and part-time employment in the local community is available to graduate students as well.

### **Career Placement Assistance**

The FAU Career Center provides full-time staff to assist graduate students in finding employment opportunities that meet their various needs. The College of Business has established an Office of Career Placement and Internships to assist graduate students in the College.

## **BUSINESS ADMINISTRATION**

### **MASTER OF BUSINESS ADMINISTRATION (M.B.A.)**

#### **EXECUTIVE PROGRAM**

#### **Concentrations:**

**Accounting**

**Business Analytics**

**Crisis and Disaster Management**

**Entrepreneurial Management**

**Finance**

**Health Administration**

**Hospitality and Tourism Management**

**International Business**

**Management Information Systems**

**Marketing**

**Operations Management**

**Sport Management**

The Executive Master of Business Administration Program (Executive M.B.A.) was developed in response to a need for convenient, advanced executive education. The goal of the Executive M.B.A. Program is to prepare participating managers to assume leadership roles so that they and their companies can maximize investments in executive education. Many graduates will occupy senior management positions and provide leadership in an increasingly competitive business environment. The Executive M.B.A. is internationally accredited by The Association to Advance Collegiate Schools of Business International (AACSB).

### **Admission Requirements**

The Executive Master of Business Administration Program is designed to educate a broad range of people displaying management potential, including but not limited to, managers, salespersons, computer systems professionals, engineers, government administrators and workers, medical and legal professionals and scientists. Candidates should have significant business and professional experience and must demonstrate potential for continued career growth in management.

To qualify for unconditional or full acceptance to the Executive M.B.A. Program, applicants are required to have:

1. Five or more years of professional/managerial work experience.
2. An undergraduate degree in any discipline from a regionally accredited institution with at least a cumulative grade point average of 3.0 on a 4.0 scale in the last 60 (or equivalent) credits of college coursework leading toward a bachelor's degree. Post-baccalaureate coursework from an AACSB-accredited business school not included in an advanced degree may be included in the calculation.
3. An official GMAT score of at least 500 or GRE scores of at least 153 (verbal), 144 (quantitative) and 4 (analytical writing). The GMAT/GRE exam score may be waived for the program. GMAT/GRE waiver eligibility is based on evaluation of credentials listed under Admission Requirements.

Conditional admission may be available under extraordinary circumstances to applicants who have received a bachelor's degree from a regionally accredited institution, but who fall short of the GPA and/or the GMAT requirement or who show high promise. In these cases, the Executive M.B.A. admissions committee will review all evidence of high promise, including but not limited to: grade trends, mature work experience, work accomplishment and promotion, type and rigor of undergraduate degree program, references and letters of recommendation and evidence of having attained some "A" grades in rigorous courses.

After the first year in the Executive M.B.A. Program, the admissions committee will review each student receiving conditional admission and will recommend either full admission to or dismissal from the program.

### **Executive M.B.A. Format**

The Executive M.B.A. Program is an accelerated, 23-month program that allows participants to continue their managerial responsibilities while earning a nationally accredited M.B.A. degree. Each class of executives begins and progresses through the program together, taking the same sequence of courses and sharing the same educational experiences.

The program consists of 40-46 graduate credits in business. Classes are held every third weekend (Saturday and Sunday) from 8 a.m. to 6:15 p.m., with breakfast and lunch served each weekend.

The Executive M.B.A. Program is offered at the FAU campus in Boca Raton. On-site Executive M.B.A. programs are available to local sponsoring organizations.

### **Curriculum**

The foundation component of the M.B.A. Program is covered in FIN 6406 and ACG 6027. The required courses are:

Financial Accounting Concepts	ACG 6027*	3
Advanced Analysis and Application of Accounting Data	ACG 6315	3
Financial Management	FIN 6406*	3
Advanced Financial Management	FIN 6806	3
Communication Strategies for Business Professionals	GEB 6217	3
Contemporary Issues in Industry: The Executive Forum	GEB 6931	1
Management of Information Systems and Technology	ISM 6026	3
Operations Management	MAN 6501	3
Global Business Strategy	MAN 6721	3
Global Environment of Management	MAN 6937	3
Advanced Marketing Management	MAR 6815	3

International Field Experience	GEB 6957	3
Advanced International Monetary Economics	ECO 6716	3
International Business Operations	MAN 6614	3
Managing Effectively in Emerging Marketing Economics	MAN 6728	3
<b>Program Total</b>		<b>40-46</b>

\* ACG 6027 and FIN 6406 may be waived with a previously received grade of "B" or better within the last five years.

Depending on career trajectory and areas of interest, students can either choose to take elective courses across several areas for a more generalized business understanding or opt to take all elective courses from one single area for focused expertise in a specialized business function. Students who do not elect a specialization will be granted a General MBA. Elective options and specializations can be found [here](#).

Content, coursework and fees may vary as determined by the administration. Florida Atlantic University reserves the right to change curriculum, sequence, program fees and other program requirements as necessary.

### **Academic Standing, Policies, Graduation**

The Executive M.B.A. Program follows the same policies regarding academic standing and graduation used in the College of Business and the same grading standards of the University. *Student continuation in the Executive M.B.A. program requires satisfactory progress toward the graduate degree. Evidence of such progress includes maintenance of a cumulative 3.0 grade point average(GPA). Graduation will be prohibited if the final cumulative GPA is less than 3.0 upon completion of the total program curriculum.*

Graduate students with GPAs less than 2.5 may be required to complete an academic progression plan (APP). The APP is a contractual agreement that outlines particular courses and grades to reestablish good academic standing. APPs should generally outline a path (usually not more than two semesters) to reestablish a 3.0 GPA. Students who are placed on an academic progression plan and are not making progress toward their academic goals set forth by the APP may be recommended for dismissal from the program. The College may enact registration holds to prohibit a student's future enrollment until the APP is finalized. Students who do not fulfill the obligations established in the APP are recommended for dismissal to the Dean of the Graduate College.

## **Program Fees**

The Executive M.B.A. is a full-service, all-inclusive program. Executive M.B.A. Program fees cover all program costs, including tuition, text books, course materials, meals and graduation activities. To view our full cost of attendance information page, visit <https://www.fau.edu/finaid/other/cost-of-attendance/>. See the Executive M.B.A. [website](#) for more information.

## **Application Process and Additional Information**

To apply to or receive more information about the Executive M.B.A. Program, see the [website](#) or call 561-297-6000.

## **BUSINESS ADMINISTRATION**

### **MASTER OF BUSINESS ADMINISTRATION (M.B.A.) PROFESSIONAL PROGRAM**

#### **Concentrations:**

**Accounting**

**Business Analytics**

**Crisis and Disaster Management**

**Entrepreneurial Management**

**Finance**

**Health Administration**

**Hospitality and Tourism Management**

**International Business**

**Management Information Systems**

**Marketing**

**Operations Management**

**Sport Management**

The Professional Master of Business Administration Program (Professional M.B.A.) was developed in response to a need for convenient, advanced executive education. The goal of the Professional M.B.A. Program is to prepare participating managers to assume leadership roles so that they and their companies can maximize investments in executive education. Many graduates will occupy management positions and provide leadership in an increasingly competitive business environment. The Professional M.B.A. is internationally accredited by The Association to Advance Collegiate Schools of Business International (AACSB).

## **Online Master of Business Administration Program**

0968

The Executive Graduate Programs Office in the College of Business at Florida Atlantic University is host to the 23-month or Online M.B.A program. The Online M.B.A program is specially designed to allow participants to continue their professional responsibilities while earning an AACSB-accredited M.B.A degree as full-time graduate students, in a fully online environment.

FAU's Online M.B.A is 100 percent asynchronous, allowing students to access courses at any time and from any location, with an internet connection. The instruction and content replicates the classroom experience, where students have access to recorded online lectures, presentations, discussion and chats.

The Online M.B.A contains the same curriculum and is taught by the same professors as the campus-based programs. The Online MBA has the same Admission Requirements as the Professional M.B.A.

### **Admission Requirements**

The Professional Master of Business Administration Program and the Online Master of Business Administration Program are designed to educate a broad range of people displaying management potential, including but not limited to, managers, salespersons, computer systems professionals, engineers, government administrators and workers, medical and legal professionals and scientists. Candidates should have significant work experience and must demonstrate potential for continued career growth in management.

To qualify for unconditional or full acceptance to the Professional M.B.A. Program or Online M.B.A. Program, applicants are required to have:

1. At least four years of professional work experience.
2. An undergraduate degree in any discipline from a regionally accredited institution with at least a cumulative grade point average of 3.0 on a 4.0 scale in the last 60 (or equivalent) credits of college coursework leading toward a bachelor's degree. Post-baccalaureate coursework from an AACSB-accredited business school not included in an advanced degree may be included in the calculation.
3. An official GMAT score of at least 500 or GRE scores of at least 153 (verbal), 144 (quantitative) and 4 (analytical writing). The GMAT/GRE exam score may be waived for the program. GMAT/GRE waiver eligibility is based on evaluation of credentials listed under Admission Requirements.

Conditional admission may be available under extraordinary circumstances to applicants who have received a bachelor's degree from a regionally accredited institution, but who fall short of the GPA and/or the GMAT requirement or who show high promise. In these cases, the Professional M.B.A or Online M.B.A. admissions committee will review all evidence of high promise, including but not

limited to: grade trends, mature work experience, work accomplishment and promotion, type and rigor of undergraduate degree program, references and letters of recommendation and evidence of having attained some "A" grades in rigorous courses.

After the first year in the Professional M.B.A. or Online M.B.A. Program, the admissions committee will review each student receiving conditional admission and will recommend either full admission to or dismissal from the program.

### **Professional M.B.A. Format**

The Professional M.B.A. Program is an accelerated, 23-month program that allows participants to continue their managerial responsibilities while earning a nationally accredited M.B.A. degree. Each class of executives begins and progresses through the program together, taking the same sequence of courses and sharing the same educational experiences.

The program consists of 40-46 graduate credits in business. Classes are held on the Boca Raton campus on Tuesday and Thursday evenings from 6:15 p.m. to 10 p.m. Classes are held on the Davie campus on Monday and Wednesday evenings from 6:15 p.m. to 10 p.m. On-site Professional M.B.A. programs are available to local sponsoring organizations.

### **Online M.B.A Format**

The Online M.B.A. is 100 percent online.

### **The Professional M.B.A. and Online M.B.A. Curriculum**

The Foundation Component of the M.B.A. Program is covered in FIN 6406 and ACG 6027. The required courses are:

Financial Accounting Concepts	ACG 6027*	3

## **ENVIRONMENTAL**

### **MASTER OF BUSINESS ADMINISTRATION (M.B.A.)**

**This program is on hiatus and currently not accepting students.**

The Environmental Master of Business Administration (M.B.A.) is a 22-month weekend program that combines the traditional M.B.A. program with environmental business management courses. Students meet face-to-face with faculty approximately every third weekend. The program is designed for working professionals who have a bachelor's or higher degree (not necessarily in business) from an accredited university.

The high-tech, industry-based Environmental M.B.A. program is designed for:

1. Individuals currently working in environmental business.
2. Those who want to be in environmental business management.

The program covers current and future compliance needs while helping business managers establish a competitive edge. Its purpose is to provide a formal learning experience in the environmental business management field, to provide managers with the skills to meet stakeholder needs and to provide a forum for the exchange of ideas and research findings in the high-technology, industry-specific environmental business fields for the future. For information, call 561-297-1086.

### Admission Requirements

Admission into the Environmental M.B.A. Program requires a B.A. or B.S. degree (or higher degree in any field) from an accredited institution of higher learning, a minimum GPA of 3.0, a GMAT score of 500 and work experience or potential in a high-tech and/or environmental activity. The application, including two letters of recommendation from the work place, must be mailed directly to the College of Business Environmental M.B.A. Program Office. Exceptions are reviewed on a case-by-case basis.

### Program Components

The Environmental M.B.A. comprises 28-34 credits of required core graduate business courses and 12 credits of required environmental management courses.

---

#### Core Courses

Financial Accounting Concepts*	ACG 6027	3
Financial Management*	FIN 6406	3
Advanced Analysis and Application of Accounting Data	ACG 6315	3
Advanced Financial Management	FIN 6806	3
Communication Strategies for Business Professionals and Core-Course Follow-Up	GEB 6215	3
Contemporary Issues in Industry: The Executive Forum	GEB 6931	1
Management of Information Systems and Technology	ISM 6026	3

---

Operations Management	MAN 6501	3
Global Business Strategy	MAN 6721	3
Advanced Marketing Management	MAR 6815	3
Global Environment of Management	MAN 6937	3

\* Course may be waived contingent upon evaluation of transcripts.

### **Environmental Management Courses**

Special Topics	GEB 6930	3
Corporate Management (Green Pinstripes) and Environmental Policy	GEB 6944	2
Environmental Project Management	GEB 6945	2

## **LEGAL COMPLIANCE MANAGEMENT** MASTER OF BUSINESS ADMINISTRATION (M.B.A.)

**This program is on hiatus and currently not accepting students.**

The M.B.A. program in Legal Compliance Management is one of the first programs in the U.S. to offer this specialization. The program's objective is to develop managers whose primary or secondary responsibilities are to ensure legal and regulatory compliance within their companies or operating units.

This program is designed for regulatory affairs officers; managers in highly regulated departments (HR, FDA, etc.); legal counsel and attorneys with legal oversight responsibilities; risk and loss prevention managers and consultants; and federal, state and local regulatory personnel.

Experts in the legal compliance field will teach students how the legal/regulatory process functions, the impact of regulations (law) on the business environment, how to design and implement compliance policy, methodologies to measure and enforce compliance, the major regulatory schemes common to all organizations, regulation central to the larger organization (OSHA, HIPAA, Sarbanes-Oxley, etc.) and regulation that focuses on the student's specific career objectives (Directed Independent Study).

The M.B.A. program in Legal Compliance Management can be completed in less than two years.

Classes meet on the Boca Raton campus for five semesters with six weekend meetings each on Saturdays (8 a.m. to 6 p.m.) and Sundays (8 a.m. to 5 p.m.). Admission requirements are similar to those of the Environmental M.B.A. program, combining the traditional M.B.A. courses with the following four specialized courses:

Employment Practices, Risk Management and Legal Compliance	BUL 6843	3
Corporate Governance and Compliance	BUL 6872	3
Contractual Compliance	BUL 6876	3
Principles and Practices of Enterprise Risk Management and Legal Compliance	RMI 6346	3

## CERTIFICATE PROGRAMS

The Management Programs Department offers several graduate certificates as noted below in the requirements for the Crisis and Disaster Management certificate and the Innovation Entrepreneurship certificate. Two additional certificate programs, Environmental Management and Legal Compliance Management, are on hiatus and currently not accepting students.

### **CRISIS AND DISASTER MANAGEMENT** GRADUATE CERTIFICATE

*(Minimum of 12 credits required)*

The certificate in Crisis and Disaster Management enables graduate students and working professionals to obtain cutting-edge knowledge of the crisis and disaster management field and to develop their management leadership skills in that field. These areas form the primary objectives of the certificate program so that students will be able to apply their knowledge and skills to develop disaster resilient organizations.

The program is interdisciplinary in nature, linking the disciplines of business, health administration, medicine, nursing and public administration. The interdisciplinary threads carried through all four certificate courses include impacts on business/economy; health/medical issues; psychological, social,

behavioral issues; and communication.

This certificate is available to any graduate student in good standing at FAU and to any graduate-level non-degree seeking student accepted by FAU. Students must complete four courses for 12 credits, including the course noted below and three additional courses in consultation with an advisor. The courses must be completed with a grade of "B" or better. FAU graduate students or non-degree seeking students accepted by FAU must complete at least one of the additional three courses before taking the Field Project course. For information about the certificate program, call 561-297-6000.

---

### Required Courses (12 credits)

Three graduate courses in consultation with an advisor	MAN	9
Field Project	MAN 6926	3

## **INNOVATION ENTREPRENEURSHIP** GRADUATE CERTIFICATE

*(Minimum of 12 credits required)*

The certificate in Innovation Entrepreneurship allows graduate students to combine interests in innovation and entrepreneurship with the thrust of their particular master's program in a complementary manner. The certificate program facilitates innovation and entrepreneurship across the University's graduate programs.

Among the program's objectives, students will gain an understanding of the entrepreneurial process, from initial idea to business development, and about commercializing new technologies, assessing product-adoption likelihood, evaluating licensing opportunities and dealing with intellectual property issues. In addition, students will acquire an appreciation for new venture finance and become familiar with the key challenges encountered in developing an innovation.

The certificate in Innovation Entrepreneurship is available to any graduate student in good standing at FAU. Students may obtain this certificate by completing each of the following four courses with a grade of "B" or better and meeting all the requirements of their respective graduate program. The four courses below may be taken as electives that fulfill requirements of the student's graduate program if permitted by that graduate program. If not permitted, they must be taken as additional courses.

**Required Courses (12 credits)**

Venture Creation	ENT 6016	3
Technology Commercialization Strategies	ENT 6186	3
Entrepreneurship and Venture Capital	ENT 6428	3
Developing and Marketing Innovations	MAR 6837	3

**DOCTORAL PROGRAM****BUSINESS ADMINISTRATION****DOCTOR OF PHILOSOPHY (PH.D.)****Concentrations:****Accounting****Finance****Information Technology and Operations Management****Management****Marketing****Executive**

The College of Business offers a Doctor of Philosophy (Ph.D.) degree in Business Administration with concentrations in Accounting, Finance, Information Technology and Operations Management, Management and Marketing (collectively referred to as the specialized concentrations) as well as an [Executive](#) concentration. Required courses consist of a set of tool courses (such as statistics and econometrics), a set of courses tailored to the student's concentration and a dissertation. Students accepted into the program are required to enroll on a full-time basis.

The doctoral program's specialized concentrations prepare students for university teaching and research. Students entering the doctoral program and pursuing a specialized concentration typically have a master's in a Business Administration program and require about four to five years to complete the requirements for the Ph.D. in Business Administration. The Executive Doctorate concentration of the doctoral program enhances research and consulting capabilities. Students entering the doctoral program pursuing an Executive Doctorate have significant business experience and require three years to complete requirements for the Ph.D. in Business Administration.

## Admission Requirements

Admission to the program is restricted to students who show exceptionally high promise for mastering the conceptual and analytic tools required for doctoral study in business. Evidence of such promise is obtained by evaluation of previous graduate and undergraduate class standing, the score on the Graduate Management Admission Test (GMAT) or Graduate Record Examination (GRE), letters of recommendation and the applicant's statement of career goals. In addition, if feasible, applicants are interviewed either in person, by video or by telephone. The minimum criteria for admission include the following:

1. The student must satisfactorily meet the general University requirements for admission to graduate programs. International applicants must also satisfactorily meet any additional requirements of the Graduate College. Additional details are found [here](#).
2. The student must hold a master's in a related discipline or an M.B.A. degree, preferably from an AACSB-accredited, graduate-level institution.
3. Typically the student presents a minimum score of 600 on the GMAT or a comparable score on the GRE, taken within the last five years.
4. An applicant whose native language is not English must present a minimum score as set by the Graduate College on the Test of English as a Foreign Language (TOEFL) or the Test of Spoken English (TSE). Applicants who have completed a minimum of two years of postsecondary education in the United States are exempt from this requirement.

An entering student is expected to be proficient in computer and quantitative skills. An exceptionally qualified student with a master's degree in a non-business discipline may also enter the program, but must undertake additional work that is sufficient to establish knowledge of the material comprising the AACSB M.B.A. core requirements. The minimum criteria do not guarantee acceptance into the program, as enrollment in any year is limited.

## Application Process and More Information

For details about admission and degree requirements for the Ph.D. degree in Business Administration, contact [Program Admissions](#), 561-297-2179.

## Degree Requirements

1. Basic Tool Areas: Doctoral-level courses such as Statistics, Quantitative Methods and Economics.
2. Area of Concentration: Several courses are required in the student's area of concentration.
3. Comprehensive Examination: Students pursuing specialized concentrations must pass a comprehensive examination that will be administered in the area of the concentration after completion of all required coursework.

4. Dissertation: A minimum of 18 credits of dissertation must be taken, and the completed dissertation, reflecting an original contribution to knowledge, must be successfully defended at both the proposal stage as well as at the final completed stage.
5. A minimum of 80 credits is required (including dissertation credits).
6. To remain in good standing, Ph.D. students must maintain a minimum grade point average of 3.0 (based on a 4.0 scale) on all courses taken for the doctoral program (individual concentrations may have higher minimums). If a Ph.D. student receives a grade below "B" for any course or has a grade point average below the minimum permitted for the student's area of concentration, a Ph.D. committee of professors within the student's area of concentration will decide whether any action (such as remedial coursework requirements, dismissal, etc.) should be taken.

**MARKETING****Faculty:**

Yuan, H., Chair; Acello, E.; Bilgihan, A.; Bohan, G.; Gallan, A.; Jarvis, C. B.; Javadina, A.; Korgaonkar, P.; Koku, P. S., Emeritus; Lorenz, M.; Mangleburg, T.; McClure, T.; Nardini, G.; Ostinelli, M.; Park, S.; Quintero, S.; Rhorer, M.; Ricci, P.; Root, A.; Sashi, C. M.; Shaw, E. H., Emeritus; Ward, J. B.; Zhang, Y.

The Department of Marketing offers programs of study that prepare students for responsible positions and professional careers in the growing fields of marketing and hospitality and tourism management.

Programs in Marketing provide students with an enduring base of knowledge and the ability to adapt

new marketing practices as they continually evolve. The department offers a Bachelor of Business Administration (B.B.A.) or Bachelor of Science (B.S.) in Marketing, an [online B.B.A. in Marketing](#), a [B.B.A. or B.S. in Hospitality and Tourism Management](#), an [online B.B.A. in Hospitality and Tourism Management](#), minors in Marketing, Digital Marketing and Hospitality and Tourism Management, and certificates in [Casino and Gaming Industry Management](#), [Club Management](#), [Digital Marketing](#), [Hospitality and Tourism Management](#), [Professional Hospitality and Tourism Management](#) and [Events Management](#). A variety of courses, offered day and evening, weekdays and weekends across multiple campuses, allow traditional and non-traditional students to tailor programs of study to meet their individual needs. A concentration in Advertising is available for students interested in this discipline. For graduate students, the department offers a certificate in Hospitality and Tourism Management.

The Department of Marketing offers an array of professional development opportunities and support in producing scholarly research to faculty by providing an environment conducive to the growth and enrichment of a community of scholars. Marketing also provides consulting as well as a diversity of other professional services to the business and academic communities—locally, nationally and internationally.

## **MARKETING**

### **BACHELOR OF BUSINESS ADMINISTRATION (B.B.A.)**

### **BACHELOR OF SCIENCE (B.S.)**

#### **Advertising Concentration**

[Link to minors and certificate](#)

Along with the University and College of Business degree requirements listed in the [Degree Requirements](#) section of this catalog, Marketing students must complete the requirements below.

#### **Prerequisite Coursework for Transfer Students**

Students transferring to Florida Atlantic University must complete both lower-division requirements (including the requirements of the General Education Program) and requirements for the college and major. Lower-division requirements may be completed through the A.A. degree from any Florida public college, university or community college or through equivalent coursework at another regionally accredited institution. Before transferring and to ensure timely progress toward the baccalaureate degree, students must also complete the prerequisite courses for their major as outlined in the [Transition Guides](#) .

All courses not approved by the Florida Statewide Course Numbering System that will be used to

satisfy requirements will be evaluated individually on the basis of content and will require a catalog course description and a copy of the syllabus for assessment.

### **Pre-Business Foundation Coursework**

These are previously listed under the heading [Degree Requirements \(B.B.A. and B.S.\)](#) and subheading Pre-Business Foundation Coursework in this section.

### **Business Core Requirements**

These are previously listed under the heading [Degree Requirements \(B.B.A. and B.S.\)](#) and subheading College of Business Core in this section. Principles of Marketing (MAR 3023) is a Business Core requirement and a prerequisite for all 4000-level marketing courses.

### **Marketing Department Major Programs**

The Marketing program, including the Advertising concentration, consists of 18 credits of Marketing coursework (excluding MAR 3023), in addition to the college pre-business and core coursework. The General Marketing major requires three specific courses (Consumer Behavior, Marketing Research and Information Systems and Marketing Strategy) plus three (9 credits) of upper-division marketing electives. Students in the Advertising concentration are required to take Principles of Advertising (MAR 3326), Marketing Strategy (MAR 4803), any three of the four courses listed below for the Advertising concentration, and a Marketing elective to meet the minimum of 18 credits of Marketing coursework. A grade of "C" or better is required in all major courses.

---

### **General Marketing Major**

**Plus one upper-division Marketing elective - 3 credits**

One of the following Hospitality courses may be substituted for 3 elective credits:

HFT 3741 Events Management

HFT 4240 Excellence in Guest Service Management

HFT 4503 Hospitality Marketing and Revenue Management Practices

## **MARKETING**

### **UNDERGRADUATE MINOR**

*(Minimum of 9 credits required)*

The Marketing minor is designed for non-Marketing Business majors requiring the Business Core courses. Because part of the requirements include successful completion of the Business Core classes, the minor is usually not practical for majors in General Economics or Health Administration.

The Marketing minor requires MAR 4803 and two additional upper-division marketing or advertising courses (3000 level or above) with a grade of "C" or better. In cases where MAR 4803 is required for a major, an additional upper-division marketing course is required for the minor.

A maximum of 3 credits used for the Marketing minor may count toward other Business major requirements. A minimum of two courses (6 credits) must be exclusive to the minor. A minimum of 6 credits must be taken in residence at FAU. The acknowledgment of the minor is official upon successful completion of a College of Business degree program.

## **DIGITAL MARKETING**

## UNDERGRADUATE MINOR

*(Minimum of 12 credits required)*

The Digital Marketing minor is jointly offered by the Department of Information Technology and Operations Management and the Department of Marketing. Students acquire knowledge and skills in online and digital business and digital product delivery as well as in developing, analyzing and enhancing a company's presence on the web and in social networking. Professions and majors that benefit from the minor include marketing, business development, business strategy, information technology, management information systems and others. For complete details on this program, please click [here](#).

## **DIGITAL MARKETING** UNDERGRADUATE CERTIFICATE

*(Minimum of 12 credits required)*

The certificate in Digital Marketing is a 12-credit program offered jointly by the Department of Information Technology and Operations Management and the Department of Marketing. This certificate, available to FAU degree-seeking students, non-degree students and working professionals, enhances the qualifications of students pursuing careers in fields related to business, marketing and information technologies. For complete details on this program, please click [here](#).

## **HOSPITALITY AND TOURISM MANAGEMENT** BACHELOR OF BUSINESS ADMINISTRATION (B.B.A.) BACHELOR OF SCIENCE (B.S.)

The Bachelor of Business Administration (B.B.A.) or Bachelor of Science (B.S.) in Hospitality and Tourism Management program prepares students for management positions in multiple segments of the world's largest industry. Graduates assume managerial roles in varied hospitality disciplines including: resorts, hotels, restaurants, private clubs, meeting and event planning corporations, destination marketing organizations, convention centers, cruise lines, casinos, theme parks, car rental agencies, sports facilities, spas, entertainment venues and vacation ownership or fractional ownership operations. An [online B.B.A. in Hospitality and Tourism Management](#), minors in [Hospitality and Tourism Management](#) and certificates in [Casino and Gaming Industry Management](#), [Club Management](#), [Hospitality and Tourism Management](#) and [Events Management](#) are also available. In

addition, the program offers graduate certificates [in Hospitality and Tourism Management](#) and [Professional Hospitality and Tourism Management](#).

Potential careers within the hospitality industry include positions in a wide assortment of disciplines, including but not limited to: sales and marketing, revenue management, human resource management, business operations, planning and development, real estate and food and beverage management.

Students will gain a solid education in the various core disciplines of business administration combined with foundational knowledge specific to hospitality and tourism management.

### **Degree Requirements**

In addition to the **University** and **College of Business** degree requirements listed in the [Degree Requirements](#) section of this catalog, Hospitality and Tourism Management students must complete the following requirements for the major.

### **Prerequisite Coursework for Transfer Students**

Students transferring to Florida Atlantic University must complete both lower-division requirements (including the requirements of the General Education Program and requirements for the college and major. Lower-division requirements may be completed through the A.A. degree from any Florida public college, university or community college or through equivalent coursework at another regionally accredited institution. Before transferring and to ensure timely progress toward the baccalaureate degree, students must also complete the prerequisite courses for their major as outlined in the [Transition Guides](#) .

All courses not approved by the Florida Statewide Course Numbering System that will be used to satisfy requirements will be evaluated individually on the basis of content and will require a catalog course description and a copy of the syllabus for assessment.

Casinos and the Gaming Industry	HFT 3785	3
Revenue Management and Predictive Analytics in the Hospitality and Tourism Industry	HFT 4481	3

\* Special Topics, HFT 4930, also may be selected for this area.

Hospitality and Tourism Management majors must take ECS 3013, ECO 4713 or ECO 4704 as part of their Business Core to satisfy both the Economics and International Perspective requirements of the College.

## **HOSPITALITY AND TOURISM MANAGEMENT** **UNDERGRADUATE MINOR FOR BUSINESS MAJORS**

*(Minimum of 9 credits required)*

Students seeking a major in the College of Business other than Hospitality and Tourism Management (specifically majors that require the Business Core) may concurrently earn a minor in Hospitality and Tourism Management. To earn the minor, students must complete 9 credits with a grade of "C" or better from the following courses and must receive an "S" (satisfactory) in HFT 4941. A maximum of 3 credits used for the minor may count toward other Business major requirements. A minimum of two courses (6 credits) must be exclusive to the minor.

### **Required**

Introduction to Hospitality Management	HFT 3003	3
Internship in Hospitality and Tourism Management	HFT 4941	0
<i>Select two of the following*</i>		
Excellence in Guest Service Management	HFT 4240	3
Principles of Hospitality Law	HFT 3603	3
Hospitality Marketing and Revenue Management Practices	HFT 4503	3
Hotel and Resort Management	HFT 4253	3
Events Management	HFT 3741	3
Principles of Food and Beverage Management	HFT 3263	3
Human Resources Management for the Hospitality Industry	HFT 3221	3
Club Management	HFT 4277	3
International Field Experience in Hospitality Management	HFT 4955	3
Casinos and the Gaming Industry	HFT 3785	3
Revenue Management and Predictive Analytics in the Hospitality and Tourism Industry	HFT 4481	3

\* Special Topics, HFT 4930, also may be selected for this area.

Of the 9 credits, at least 6 must be earned from FAU. Successful completion of the minor also requires the successful completion of all coursework in the student's chosen major degree program.

## **HOSPITALITY AND TOURISM MANAGEMENT** **UNDERGRADUATE MINOR FOR NON-BUSINESS MAJORS**

*(Minimum of 15 credits required)*

Students seeking a major outside the College of Business (or a major in the College of Business that

does not require the Business Core) may concurrently earn a minor in Hospitality and Tourism Management. To earn the minor, students must complete 15 credits with a grade of "C" or better from the following courses and must receive an "S" (satisfactory) in HFT 4941.

---

### Required

Introduction to Hospitality Management	HFT 3003	3
Internship in Hospitality and Tourism Management	HFT 4941	0

### *Select four of the following\**

Excellence in Guest Service Management	HFT 4240	3
Principles of Hospitality Law	HFT 3603	3
Hospitality Marketing and Revenue Management Practices	HFT 4503	3
Hotel and Resort Management	HFT 4253	3
Events Management	HFT 3741	3
Principles of Food and Beverage Management	HFT 3263	3
Human Resources Management for the Hospitality Industry	HFT 3221	3

Casinos and the Gaming Industry	HFT 3785	3
Revenue Management and Predictive Analytics in the Hospitality and Tourism Industry	HFT 4481	3

\* Special Topics, HFT 4930, also may be selected for this area.

Of the 15 required credits, 12 must be earned from FAU. Successful completion of the minor also requires the successful completion of all coursework in the student's chosen major degree program.

## **CASINO AND GAMING INDUSTRY MANAGEMENT**

## UNDERGRADUATE CERTIFICATE

*(Minimum of 15 credits required)*

This undergraduate certificate provides a focused curriculum including key subject areas deemed relevant and vital to success in the casino and gaming industry. These competencies span food and beverage, marketing, casino operations and hotel/resort management. The casino and gaming industry employs hundreds of thousands in the United States including over 10,000 in south Florida.

Students must complete 15 credits from the courses below. The certificate in the Casino and Gaming Industry is open to both degree-seeking and non-degree-seeking students and is available in person or fully online. All courses must be completed with a minimum grade of "C." Courses may have prerequisites, corequisites or other requirements. Non-degree-seeking students need program director approval prior to enrollment in all courses.

The certificate is particularly valuable for FAU degree-seeking students outside the College of Business and to community members, hospitality industry professionals and seasonal residents. For further information, please reach out to the Hospitality and Tourism Management Program Director, Dr. Peter Ricci at [peter.ricci@fau.edu](mailto:peter.ricci@fau.edu) or 561-297-3666.

After completion of all courses with a grade of "C" or higher, students may then request their certificate from the Student Academic Services Office (academic advising) located in the FAU College of Business, Boca Raton campus, Fleming West Building, Room 102, 561-297-3688.

Casinos and the Gaming Industry	HFT 3785	3
Hotel and Resort Management	HFT 4253	3
Hospitality Marketing and Revenue Management Practices	HFT 4503	3

## **CLUB MANAGEMENT** UNDERGRADUATE CERTIFICATE

*(Minimum of 15 credits required)*

The undergraduate certificate in Club Management provides a focused curriculum on those managerial competencies deemed important to private club managers of the 21st Century. These managerial competencies include: golf, spa, tennis, aquatics, food and beverage, marketing, human resources and leadership. The private country club industry is one of the highest-paying hospitality niche professions in Florida offering great employment opportunities. The sheer number of private clubs (over 125 clubs in Palm Beach, Broward, and Miami-Dade) make the region very strong in club management.

Students must complete 15 credits from the courses below. The certificate in Club Management is open to both degree-seeking and non-degree-seeking students and is available in person or fully online. All courses must be completed with a minimum grade of "C." Courses may have prerequisites, corequisites or other requirements. Non-degree-seeking students need program director approval prior to enrollment in all courses.

The certificate is particularly valuable for FAU degree-seeking students outside the College of Business and to community members, hospitality industry professionals and seasonal residents. For further information, please reach out to the Hospitality and Tourism Management Program Director, Dr. Peter Ricci at [peter.ricci@fau.edu](mailto:peter.ricci@fau.edu) or 561-297-3666.

After completion of all courses with a grade of "C" or higher, students may then request their certificate from the Student Academic Services Office (academic advising) located in the FAU College of Business, Boca Raton campus, Fleming West Building, Room 102, 561-297-3688.

## **HOSPITALITY AND TOURISM MANAGEMENT** **UNDERGRADUATE CERTIFICATE**

*(Minimum of 15 credits required)*

The undergraduate certificate in Hospitality and Tourism Management provides an industry-focused curriculum to those who desire employment with the hospitality and tourism industry—Florida's number 1 private employer. Students must complete 15 credits from the courses below. The certificate in Hospitality and Tourism Management is open to both degree-seeking and non-degree-seeking students and is available in person or fully online. All courses must be completed with a minimum grade of "C." Courses may have prerequisites, corequisites or other requirements. Non-degree-seeking students need program director approval prior to enrollment in all courses.

## **HOSPITALITY AND TOURISM MANAGEMENT**

### **GRADUATE CERTIFICATE**

*(Minimum of 12 credits required)*

The graduate certificate in Hospitality and Tourism Management permits students to combine interests in the hospitality and tourism industry in a complementary manner to their overall graduate studies or as a non-degree-seeking student. Students gain an understanding of the core areas within hospitality and tourism management, including, but not limited to, guest service, operations, finance and marketing/revenue management.

Students electing the Hospitality and Tourism Management certificate will take the required courses for their master's or doctoral degree in addition to the Hospitality and Tourism Management certificate courses, unless they are non-degree seeking. In the event they are non-degree seeking, they will only take the hospitality-specific courses. All students pursuing the certificate will choose four courses (12 credits) from the list below. Students interested in Directed Independent Study (DIS) must receive permission from both the chair/director and the instructor of record prior to using the DIS course toward the 12-credit certificate\*.

Students must be in good standing at FAU, must meet all requirements of their respective graduate program (if enrolled in one) and may use hospitality and tourism management courses as electives if permitted by their particular graduate program. Or, as stated above, students may be non-degree seeking. Further, students must have an overall average grade of "B" (3.0 GPA) upon completion of all required courses in order to receive the Hospitality and Tourism Management certificate.

#### **Select four of the following courses (12 credits)**

Hospitality Operations: A Case Approach	HMG 6299	3
Contemporary Issues in Hospitality Marketing	HMG 6506	3
Strategies for Excellence in Guest Service Management	HMG 6546	3
Meetings and Events Management	HMG 6756	3

Directed Independent Study in Hospitality Management*	HMG 6901	3
Any 6000-level marketing course beyond the core	MAR 6***	3

## **HOSPITALITY AND TOURISM MANAGEMENT**

### GRADUATE CERTIFICATE

### PROFESSIONAL PROGRAM

*(Minimum of 12 credits required)*

The Professional Hospitality and Tourism Management certificate is designed for working professionals currently enrolled in self-supporting programs in the College of Business. This is a stand-alone certificate tailored for working professionals and alumni with graduate degrees who are looking for specialized knowledge in Hospitality and Tourism Management. The certificate consists of 12 credits chosen from the table above.

## **EVENTS MANAGEMENT**

### UNDERGRADUATE CERTIFICATE

*(Minimum of 15 credits required)*

The undergraduate certificate in Events Management provides an operations-focused curriculum to those who desire employment within the meetings, events, exhibitions or conventions industries. Students must complete 15 credits from the courses below. The certificate in Events Management is open to both degree-seeking and non-degree-seeking students and is available in person or fully online. All courses must be completed with a minimum grade of "C" or higher. Courses may have prerequisites, corequisites or other requirements. Non-degree-seeking students need program director approval prior to enrollment in all courses.

The certificate is particularly valuable for FAU degree-seeking students outside of the College of Business and to community members, hospitality and tourism industry professionals and seasonal residents. For further information, please reach out to Hospitality and Tourism Management Program Director, Dr. Peter Ricci, at [peter.ricci@fau.edu](mailto:peter.ricci@fau.edu) or 561-297-3666.

After completion of all courses with a grade of "C" or higher, students may then request their certificate from the Student Academic Services Office (academic advising) located in the FAU College of

Business, Boca Raton campus, Fleming West Building, Room 102, 561-297-3688.

**Accreditation:** The College of Education at Florida Atlantic University is accredited by the Council for the Accreditation of Educator Preparation (CAEP), 140 19th St. N.W., Suite 400, Washington, D.C. 20036, 202-223-0077. This accreditation covers initial teacher preparation programs and advanced educator preparation programs. Graduates of Florida Atlantic University who successfully complete approved teacher education programs are qualified for teaching certificates in all states recognizing this accreditation.

### **National Report Card**

Under Federal Title II requirements, institutions preparing individuals for initial teacher certification are required to make available information concerning the effectiveness of their teacher preparation programs. This information on Florida Atlantic University's professional education programs can be viewed on the College of Education's website at [www.coe.fau.edu](http://www.coe.fau.edu).

### **Mission Statement**

The mission of the College of Education is to serve the community of Florida Atlantic University by providing effective leadership in areas of research, service and teaching at the local, state, national and international levels through the initial and advanced preparation of informed, capable, ethical and reflective decision-making professionals. The College's faculty and students seek to promote and sustain authentic change, excellence and equity in their respective fields and in the organizations and systems with which they are associated. The College's programs reflect changing societal needs and incorporate web-supported delivery systems, current methodologies and research, bringing faculty and students together to improve the quality of education for all in an increasingly diverse, technological, inclusive and global society.

### **Live Text Resource Requirement**

The College of Education has adopted a student assessment resource (Live Text). Based on program requirements, students will purchase and utilize this resource from the beginning of their degree program through program completion. More information is provided on the College of

Education [website](#).

## LOWER-DIVISION GENERAL PREPARATION REQUIREMENTS

In addition to FAU general education lower-division preparation, Elementary, Secondary and Special Education majors must take the following education prerequisites:

Introduction to the Teaching Profession	EDF 2005
Introduction to Diversity for Educators	EDF 2085
Introduction to Technology for Educators	EME 2040

For prerequisite information for undergraduate transfer students, refer to each major's description below.

### Freshman Requirements

First-time-in-college students (freshmen) who entered fall 2001 and transfer students who entered fall 2003 who are majoring in Elementary Education, Secondary Education or Special Education must also take 45 credits in general knowledge within the current 51 credits required from the following areas:

1. **Communications** – minimum of 6 credits in English, including writing;
2. **Mathematics** – minimum of 6 credits, excluding intermediate algebra and including college algebra or higher and geometry;
3. **Sciences** – minimum of 6 credits, including earth science, life science and physical science, with a minimum of one associated lab;
4. **Humanities** – minimum of 9 credits, including philosophy and fine arts;
5. **Social Sciences** – minimum of 9 credits, including general psychology and American history.

### Previously Enrolled and Transfer Students

First-time-in-college students (freshmen) who entered fall 1999 and transfer students who entered fall 2001 who are majoring in Elementary Education or Special Education must take 51 credits from the following areas:

1. **Communications** – minimum of 6 credits, including a speech course;
2. **Mathematics** – minimum of 6 credits, excluding intermediate algebra and computer courses;

3. **Sciences** – minimum of 6 credits in the natural and/or physical sciences with a minimum of one associated lab;
4. **Humanities** – minimum of 6 credits;
5. **Social Sciences** – minimum of 6 credits, including a psychology or human growth and development course.

## Transfer Students

1. **Communications** – minimum of 6 credits in English composition;
2. **Mathematics** – minimum of 6 credits, to include college algebra and statistics;
3. **Sciences** – minimum of 6 credits (a physical science course and a biological science course recommended); individual degree programs may have specific science requirements; consult an academic advisor for further information;
4. **Humanities** – minimum of 6 credits;
5. **Social Sciences** – minimum of 6 credits; individual degree programs may have specific social science requirements; consult an academic advisor for further information;
6. **General Education Electives** – minimum of 6 additional credits required from Areas 1-5.

All general education requirements should be completed prior to admission to a teacher preparation program.

A student who enters FAU as a freshman or transfers with fewer than 30 credits should follow the four-year core requirements, using electives to meet any requirements listed above not included in the four-year curriculum.

# BACHELOR'S DEGREE PROGRAM INFORMATION

## General Studies Degree Program

The University offers a Bachelor of General Studies (B.G.S.) degree program that allows students to design a plan of study to meet their personal interests and career goals. The 120-credit program includes 15 credits of upper-division coursework in one discipline, which students select in consultation with an advisor. For more B.G.S. details and degree requirements, please refer to the [Degree Programs](#) section of this catalog.

## Undergraduate Research Certificate

To recognize undergraduate students' excellence in undergraduate research, the Office of Undergraduate Research and Inquiry (OURI) has established the [Undergraduate Research](#)

**Certificate.** Requirements for the Research Certificate include completion of 12 credits of research exposure, skill-building and intensive courses as well as dissemination of the outcomes of students' research and inquiry through a research presentation or exhibition.

### **Admission Requirements**

Admission to the University and/or to the College of Education does not constitute admission to a teacher preparation program. Students seeking admission to a particular program must also meet the admission requirements of the program of their choice.

In general, to be admitted to a teacher preparation program, the applicant must:

1. Have a minimum grade point average (GPA) of 2.5 on a 4.0 scale on the general education component of undergraduate studies or have completed requirements for a baccalaureate degree with a minimum GPA of 2.5 from any college or university accredited by a regional accrediting institution;
2. Meet the general University first-year student or transfer admission requirements. See the [Admissions section](#) of this catalog;
3. Meet minimum standards of physical and mental health;
4. Be interviewed and recommended for admission;
5. Be approved for admission by the department concerned and the College of Education Office for Academic and Student Services;
6. Be programmed by an assigned advisor.

### ***Background Check***

State of Florida teacher certification requires all applicants to be fingerprinted and screened by the FBI for felony convictions. School districts also require a fingerprint check and screening for school-based clinical assignments for education students. This includes both student teaching and pre-student teaching assignments. Students with felony records will NOT be permitted to be placed in internship settings and will NOT be able to successfully complete the program of studies for their degree and/or certification. Consequently, students with a record of a felony conviction(s) will NOT be eligible for admission to a teacher preparation program at Florida Atlantic University. Admission to the teacher preparation program does not ensure that the student will be able to complete the program and receive the degree in education if ethical violations occur.

### **Degree Requirements**

Students are awarded the Bachelor of Arts in Education (B.A.E.) degree by completing the required work in one of the following disciplines: Elementary Education (K-6), Exceptional Student Education

(K-12) and Secondary Education (6-12).

These degrees do not require a foreign language at the community or state college or university level. Instead, they require two years of the same foreign language at the high school level. However, students who meet the foreign language requirement at the community or state college or university level may apply for a B.A. or B.S. degree as in other colleges.

Students who complete the requirements for the bachelor's degree in Early Care and Education will be awarded the B.E.C.E. This program is offered jointly by the Department of Special Education and the Department of Curriculum and Instruction.

Students who complete the requirements for the bachelor's degree in Music Education will be awarded the B.M.E. This program is offered jointly by the Department of Curriculum and Instruction in the College of Education and by the Department of Music in the Dorothy F. Schmidt College of Arts and Letters.

### ***Eligibility for B.A.E. or B.S.E. Degree***

To be eligible for the Bachelor of Arts in Education (B.A.E.) or Bachelor of Science in Education (B.S.E.) degree, students must fulfill the following requirements:

1. Satisfy the University and College's degree requirements;
2. Satisfactorily complete the last 30 credits as a student in the College of Education with a minimum of 30 credits after final admission to a teacher preparation program;
3. Complete one of the approved teacher preparation programs with a "C" grade or better in all education courses and an "S" in Student Teaching;
4. Elementary, Secondary and Exceptional Student Education majors must complete the education course sequence with a minimum GPA of 2.5 as well as an overall GPA of 2.5;
5. Elementary and Secondary Education majors must pass the Florida Teacher Certification Examination (FTCE) prior to student teaching and satisfactorily complete a Preservice Teacher Composite Portfolio. Exceptional Student Education majors must pass the FTCE prior to completing their student teaching and graduation;
6. Be recommended for graduation by the faculty of the student's major field department and the faculty of the College of Education.

SINCE JULY 1, 1980, THE STATE OF FLORIDA HAS REQUIRED ALL APPLICANTS FOR INITIAL FLORIDA CERTIFICATION TO DEMONSTRATE, THROUGH A COMPREHENSIVE WRITTEN EXAMINATION, MASTERY OF THE MINIMUM FLORIDA SUBJECT AREA

## COMPETENCIES AND SKILLS AND OTHER CRITERIA ADOPTED BY THE STATE BOARD OF EDUCATION (Florida Teacher Certification Examination-FTCE).

### ***Security Clearance***

Students registering for courses requiring field experience **MUST** go through a security clearance process. This process requires students to be fingerprinted and, depending on the school district, to participate in a drug screening to be approved for security clearance. A processing fee payable to the appropriate school district is required. It is strongly recommended that students complete this process once they are admitted to the University.

For detailed information, visit the College of Education Student Services [website](#). Information will also be provided in courses with field placement requirements.

### **Admission to Supervised Teaching Experience**

Each candidate for student teaching and practicum and for graduate internships must file, in advance, an application in the Office for Academic and Student Services. Student teaching is offered in the fall and spring semesters (ESE in spring only). Deadlines for applications are:

***Fall Semester*** – Applications to student teach during the fall semester must be filed by January 31.

***Spring Semester*** – Applications to student teach during the spring semester must be filed by September 15.

Special requirements for enrollment in student teaching are:

1. Admission to a degree or certification program in the College of Education;
2. Completion of an application for student teaching;
3. Successful completion of all required coursework. Secondary subject majors must have completed all academic and professional requirements. All Education majors must have at least a "C" in each foundations course;
4. An overall GPA of 2.5 or higher;
5. Approval of student's advisor and department;
6. All Elementary Education and Secondary Education majors must have a minimum of a "C" in each Education major course and must have satisfactorily completed all screening examinations;
7. Exceptional Student Education majors must have completed all courses, earned at least a grade of "C" or better in all education courses and demonstrated competency on Florida's Educator Accomplished Practices;
8. All incompletes must be removed prior to being admitted to student teaching;
9. Any required departmental policies/exit examinations must have been completed;

10. Elementary Education and Secondary Education majors must present passing scores on the Florida Teacher Certification Examination (both subject matter and professional) prior to being approved to enroll in student teaching.

## MASTER'S DEGREE PROGRAM INFORMATION

Master's degree programs are offered by the College of Education to qualified persons who have sufficient and satisfactory undergraduate preparation. The following programs are offered:

### **Communication Sciences and Disorders - M.S.**

#### **Counselor Education - M.Ed. with concentrations in:**

Clinical Mental Health Counseling  
Clinical Rehabilitation Counseling  
School Counseling

#### **Curriculum and Instruction - M.Ed. with majors in:**

Curriculum and Instruction  
Educational Psychology  
Elementary Education  
Elementary Education with ESOL plus Certification  
Environmental Education  
Instructional Technology  
Reading Education (K-12)  
Secondary Education plus Certification

Curriculum and Instruction plus certification concentrations in: *(The program is being phased out.)*

Art (K-12)  
Elementary Education (K-6)  
English with ESOL (6-12)  
Environmental Education (not linked to certification)  
Foreign Language (French, Spanish: K-12)  
Mathematics (6-12)  
Science Education (Biology, Chemistry, Physics: 6-12)  
Social Science (6-12)

### **Educational Leadership and Research Methodology - M.Ed. with concentrations in:**

Adult and Community Educational Leaders

Higher Education Leaders

School Leaders (K-12)

### **Special Education - M.Ed. in Special Education with areas of study in:**

Applied Behavior Analysis

Autism Spectrum Disorders

Early Childhood

Gifted Education (endorsement courses available)

Instructional Practices in ESE

Professional Development

Reading

### **Admission Requirements**

1. Applicants must have a minimum grade point average of 3.0 or higher in the last 60 credits of undergraduate work attempted prior to receiving the bachelor's degree and a minimum combined score of 800 on the verbal and quantitative portions of the Graduate Record Examination, **OR**

A minimum combined score of 1000 on the verbal and quantitative portions of the Graduate Record Examination (GRE) and a minimum grade point average of 2.5 in the last 60 credits of undergraduate work attempted prior to receiving the bachelor's degree. Applicants for the Communication Sciences and Disorders Program must have a 3.0 GPA and a minimum 1000 on the verbal and quantitative sections of the GRE. Applicants for the Special Education Program must earn acceptable scores on either the GRE or the Miller Analogy Test (MAT). For applicants using the MAT, an acceptable score is in the 50th percentile for intended Education majors.

2. Applicants must be approved for admission by the appropriate department as well as by the College of Education. Contact the appropriate department for specific requirements and deadlines.

### **Admission to Candidacy**

Admission to the College of Education graduate program does not constitute admission to candidacy for a degree. Admission to candidacy for a degree has specific requirements which may include:

1. Acceptance by the department;
2. Appointment of an advisor;

3. Preparation by the advisor of a formal program of studies for the degree desired;
4. Passing an examination or other criteria that demonstrate understanding of the broad areas of education and/or field of study covered in the preparation for the master's degree (successful completion of Graduate Internship, Field Project or Master's Thesis in Special Education);
5. Passing M.Ed. Reading (subject area portion of FTCE);
6. Having an approved thesis/dissertation topic.

### **Degree Requirements**

The Master of Education degree, consisting of a minimum of 36 credits, is awarded to students who have:

1. Completed at least 18 credits in courses open only to graduate students;
2. Completed an approved program of study as certified by the department chair;
3. Achieved a grade point average of at least 3.0 on all graduate work attempted ("B" in all courses for Special Education);
4. Completed the research and statistics core satisfactorily;
5. Been recommended for the degree by the faculty of the College of Education.

### **Admission to Supervised Internship Experience**

Internship is offered in the fall, spring and summer semesters (fall and spring only in Curriculum and Instruction plus Certification, Exceptional Student Education, Elementary Education, Guidance and Counseling and Secondary Education [6-12 or K-12]). Special requirements for enrollment in internship are:

1. Admission to a graduate degree program in the University;
2. Contact the Office for Academic and Student Services for deadlines to apply for admission to student teaching;
3. Overall GPA as required by the department;
4. Approval of student's advisor and department;
5. Coursework completed as required by the department;

## **COMBINED DEGREE PROGRAM INFORMATION**

This combined program in Counselor Education pairs the 60-credit Master of Education program with the Specialist in Education program. Students enrolled in this program apply once and are eligible to graduate with their master's degree after they have completed 60 credits of coursework. After completing an additional 12 credits for a total of 72, students would receive their specialist in education

degree. [See relevant section below.](#)

## SPECIALIST'S DEGREE PROGRAM INFORMATION

The Specialist in Education (Ed.S.) degree is designed to provide an organized sequence of advanced preparation for various types of educational positions requiring more preparation than the master's degree, but for which the doctoral degree with its major research emphasis is not required.

The College of Education offers a program of study leading to the educational specialist's degree in:

1. Counselor Education—Concentrations in Mental Health Counseling or School Counseling;
2. Curriculum and Instruction;
3. Educational Leadership—Concentrations in Adult and Community Educational Leaders or in School Leaders (K-12).

### **Admission Requirements**

1. Applicants must meet College and University requirements.
2. Applicants must be approved for admission by the appropriate department.
3. Other requirements are listed by department.

### ***Counselor Education***

1. A master's degree in Counselor Education or related field;
2. An average GPA of 3.0 or higher on all graduate work attempted;
3. A 300-word writing sample that identifies the applicant's career goals and how the program will enable him/her to meet those goals;
4. Three professional and/or academic letters of recommendation regarding suitability for advanced graduate study in the counseling field;
5. The faculty reserves the right to interview any or all applicants prior to admission.

### ***Curriculum and Instruction***

1. A master's degree from a regionally accredited college or university;
2. An overall grade point average of 3.0 or better in the last 60 credits of undergraduate work prior to the granting of the bachelor's degree;
3. An overall grade point average of at least 3.25 or better on all graduate work attempted;

4. Specified scores on the Graduate Record Examination (GRE); for GRE scores and additional information, click [here](#);
5. Letters of recommendation from two professional supervisors/colleagues;

Additional admission requirements exist for International Students. Contact the FAU Office of International Students and Scholars and the Graduate College for these requirements.

### ***Educational Leadership***

1. Master's degree from an accredited college or university;
2. Achieve a minimum GPA of 3.0 in a master's program, **OR**
3. Complete the GRE (no minimum sub-score requirement); score may not be more than five years old;
4. A sponsor commitment form from a school principal who is willing to sponsor the student for three semesters of internship (only for School Leaders K-12 students pursuing certification).

### **Degree Requirements**

The minimum requirements for the Specialist in Education (Ed.S.) are as follows:

1. **For Counselor Education**
  - a. students must complete an approved program with a minimum of 72 graduate credits. Additional coursework and other requirements may be required for certification or licensure. Likewise, additional coursework may be required to remove deficiencies.
  - b. **For Curriculum and Instruction**, students must complete a minimum of 33 credits above the master's degree in an approved program.
  - c. **For Educational Leadership**, students must complete a minimum of 36 credits above the master's degree and a total of at least 72 graduate credits.
2. Take no more than one-third of the graduate credits above the degree prior to being programmed for the specialist's degree.
3. Complete at least one semester of full-time graduate study at Florida Atlantic University.
4. Achieve a grade point average of at least 3.0 on all graduate work attempted.
5. Complete all internship and/or teaching experience required.
6. Complete area of concentration (cognate) requirement of 15-18 credits of graduate-level courses.
7. Complete 6-15 credits of elective requirements in one or more fields outside of the concentration, except Counselor Education.
8. Complete the entire program of study, as certified by the student's advisor or chair.
9. Pass any required qualifying or comprehensive examination in the area of concentration.
10. Receive recommendation for the degree by the College of Education faculty.

## DOCTORAL DEGREE PROGRAM INFORMATION

The College of Education of Florida Atlantic University, with the approval of the Board of Trustees and the State of Florida, offers programs of study leading to doctoral degrees in:

1. [Counseling](#) (Ph.D.).
2. [Curriculum and Instruction](#) (Ph.D.).
3. [Educational Leadership](#)—Concentrations in Adult and Community Educational Leaders, Higher Education Leaders or School Leaders (K-12) (Ph.D.).
4. [Neuroscience](#) (Ph.D.).
5. [Special Education](#) (Ph.D.)

Requirements for the program are listed under individual departments.

## COMMUNICATION SCIENCES AND DISORDERS

### **Faculty:**

Williams, D., Interim Chair; Clark, C., Clinic Director; Danesh, A.; Imgrund, C.; Porcaro, C. K.; Steele, K.

### **Program Accreditation**

The Communication Sciences and Disorders Department is accredited by the Council on Academic Accreditation (CAA) of the American Speech-Language-Hearing Association (ASHA).

The CAA requires programs to provide information about the program that is current, accurate and readily available to the public with regard to the following: program completion, pass rates for the Praxis examination in Speech-Language Pathology and employment information. Students are encouraged to access the department's [webpage](#) to view current information on the department's performance in these areas.

### **Department Goals and Objectives**

1. Upon completion of the program, the student will have demonstrated the critical knowledge and skills necessary for entry-level independent practice in the field of speech-language pathology.
2. Upon completion of the program, the student will have met all of the academic and clinical requirements for the certificate of Clinical Competence in Speech-Language Pathology as well as

met the department's standards for academic and clinical excellence.

## Objectives

Upon completion of the program:

1. The student will have demonstrated knowledge of basic human communication and swallowing processes, including their biological, neurological, acoustic, psychological, developmental and linguistic and cultural bases.
2. The student will have demonstrated knowledge of the nature of speech, language, hearing, and communication disorders and differences and swallowing disorders, including the etiologies, characteristics, anatomical/physiological, acoustic, psychological, developmental, and linguistic and cultural correlates in the K-9.
3. The student will have demonstrated knowledge of the principles and methods of prevention, assessment and intervention for people with communication and swallowing disorders, including consideration of anatomical/physiological, psychological, developmental, and linguistic and cultural correlates of the disorders in the K-9.
4. The student will have demonstrated knowledge of the processes used in research and the integration of research principles into evidence-based clinical practice.
5. The student will have demonstrated knowledge of contemporary professional issues.
6. The student will have demonstrated knowledge about certification, specialty recognition, licensure and other relevant professional credentials.
7. The student will have demonstrated sufficient skill in oral and written communication for entry into professional practice.
8. The student will have demonstrated the interaction and personal qualities requisite for entry into professional practice:
  - a. Effectively communicate while recognizing the needs, values, preferred mode of communication and cultural/linguistic background of the client/patient, family, caregivers and relevant others;
  - b. Collaborate with other professionals in case management;
  - c. Provide counseling regarding communication and swallowing disorders to clients patients, family, caregivers and relevant others;
  - d. Adhere to the ASHA Code of Ethics and behave professionally.

## Mission Statement

The mission of the Department of Communication Sciences and Disorders is fourfold:

1. To prepare highly qualified, capable, ethical professionals who will engage in reflective decision making and promote and sustain authentic change, excellence and equity as well as exceed the

department's and ASHA's guidelines for clinical and academic preparation in speech-language pathology;

2. To engage in research of the normal and abnormal processes of speech, hearing and language toward the furthering of both clinical and academic knowledge, reflecting the diversity and needs of a global society while considering current methodologies and incorporating current technology;
3. To provide quality speech, language and hearing diagnostic and habilitation/rehabilitation services to all FAU students, staff and faculty and to any individual outside of the FAU community requiring such services;
4. To act as a resource for the University as well as for local, state, national and international communities by serving as consultants, liaisons, lecturers, facilitators, master clinicians and authorities in the various areas of communication disorders.

## **SPEECH – LANGUAGE PATHOLOGY/AUDIOLOGY** **MASTER OF SCIENCE (M.S.)**

### **Admission Requirements**

1. The student must meet College and University requirements.
2. Consideration for admission to the Communication Sciences and Disorders Department requires submission of official transcripts from all institutions attended.
3. Graduate Record Exam scores must be submitted.
4. The student must include three letters of recommendation with the application for admission.
5. All Department of Communication Sciences and Disorders prerequisite courses must be completed prior to enrollment.

Admission to the Department of Communication Sciences and Disorders is competitive. Students are accepted to begin the program for the fall term only. All admissions are subject to faculty approval.

The graduate school application must be submitted online via [CSDCAS](#). The graduate program is a limited-access program. All application materials must be received no later than January 15 prior to the fall semester for which admission is being sought. A full description of the application process is available on the department's [webpage](#).

### **Policy On Graduate Students With Limited English Proficiency (LEP)**

Competence in oral and written English is required for both the academic and clinical practicum aspects of the program. Applicants who were educated outside of the United States, whose primary language is not English and/or who graduated from a university where the language of instruction was

not English must demonstrate facility in the English language by the successful completion of the Test of English as a Foreign Language (TOEFL).

The criteria for the Test of English as a Foreign Language (TOEFL) is as follows:

1. Applicants taking the paper-based TOEFL exam must achieve a minimum score of 600 with 5 on the Test of Written English (TWE) and 50 on the Test of Spoken English (TSE).
2. Applicants taking the computer-based TOEFL exam must achieve a minimum score of 550 on the paper-based test (TOEFL PBT) or 80 on the internet-based version (TOEFL iBT). The CSD department also accepts IELTS test results with a minimum score of 6.5.

In addition to the proficiency test, applicants may be requested to attend a meeting with faculty and staff of the Department of Communication Sciences and Disorders. During this meeting, mastery of oral English for meeting clinical requirements will be assessed and the following questions considered:

1. Does the individual have the expected level of knowledge in normal and disordered communication?
2. Does the individual have the expected level of diagnostic and clinical case management skills?
3. If modeling is necessary, is the individual able to model the target phoneme, grammatical feature or other aspect of speech and language that characterizes the client's particular problem? (1)

If indicated, a plan for improvement will be developed. The student must meet the goals of this plan before beginning clinical practicum. If the student is not able to meet satisfactorily the improvement plan criteria, the program will counsel the student regarding strengths and weaknesses in standard English and how these might affect employers' perceptions or impact the student's ability to perform in various work settings. (2) The student will be given an opportunity to continue remediation or may choose to leave the program.

(1), (2) American Speech-Language-Hearing Association. (1998). Students and Professionals Who Speak English with Accents and Non-Standard Dialects: Issues and Recommendations [Technical Report].

## **Degree Requirements**

1. The student must meet College and University requirements.
2. The student must earn grades of "B" or higher in all courses in the program and will be required to repeat any course in which a grade of less than "B" ("B-" and below) is earned. Students are required to maintain an overall graduate course average of 3.0. (A course may be repeated only once.) Students failing to earn a "B" in two courses will be dismissed from the program.

3. The student must satisfactorily complete three semesters of on-campus practicum with a minimum grade of "B" or higher. Failure to earn a minimum practicum grade of "B" will require an additional semester of practicum experience. Also, the student must complete two semesters of off-campus practicum with a grade of "B+" or higher.
4. Prior to graduation, the student must complete all course critical assignments and all clinical skill requirements at the "exemplary" or "satisfactory" level.
5. Prior to graduation, the student must provide evidence of a passing score (currently 600) on the NESPA (National Examination in Speech Pathology and Audiology).
6. Prior to graduation, each Communication Sciences and Disorders student must complete all academic and clinical practicum requirements for the certificate of Clinical Competence in Speech/Language Pathology issued by the American Speech/Language/Hearing Association.
7. The student must successfully complete either the thesis (6 credits) or non-thesis option (two, 3-credit electives and comprehensive examination).
8. The student must complete a minimum 68-credit program of study.
9. Students must apply for and receive malpractice insurance coverage and security clearance prior to initiating any clinical practicum. This process requires students to be fingerprinted and complete the necessary paperwork. Students are responsible for any associated processing fees.

## **NEUROSCIENCE**

### **DOCTOR OF PHILOSOPHY (PH.D.)**

This doctoral program in Neuroscience is a multi-college, multi-institute interdisciplinary degree program organized in partnership with the FAU Brain Institute. Graduate-level instruction is provided by faculty in multiple departments located in the Charles E. Schmidt College of Science, the Charles

Schmidt College of Medicine, the College of Engineering and Computer Science, the College of Education and the Harriet L. Wilkes Honors College. Affiliated faculty from the Max Planck Florida Institute for Neuroscience and Scripps Research Florida also participate in the program. The program aims to equip students with the advanced conceptual and technical skills needed to forge productive, neuroscience-oriented careers in industry, academia and government. Specific details for this doctoral program appear in the [Interdisciplinary Programs](#) section of this catalog.

## COUNSELOR EDUCATION

### Faculty:

Gill, C., Chair; Bowers, P. H.; Canfield, B. S.; Emelianchik-Key, K.; Frain, M.; Mariani, M.; Peluso, P. R.; Torres, A.; Villares, E.

### Mission Statement

Counselor Education's mission is to educate a diverse community of students for professional counseling practice and leadership in local, national and international domains. Mindful that education extends beyond coursework, faculty and students collaborate with schools, communities, agencies and professionals to conduct research and provide services. The research and services are provided with the highest ethical and professional standards in response to the personal, educational and vocational needs of individuals and families living in diverse and multicultural environments. Faculty aspire to uncover new knowledge and relevant research, create dynamic atmospheres for learning and encourage students to actualize their potential, all with the goal of achieving just solutions to human concerns.

### Degree Programs Available

At the undergraduate level, the Department of Counselor Education offers developmental courses that give students considering the field a realistic and comprehensive view of counselors and what they do. The department also offers a certificate in [Applied Mental Health Services](#) in conjunction with the Department of Psychology in the Charles E. Schmidt College of Science. This certificate program provides a curricular experience for students who wish to pursue careers in clinical psychology, mental health counseling and allied human services that enhances the student's chosen major. Certificate details and program requirements are listed under the [Interdisciplinary Programs](#) catalog section.

At the graduate level, Counselor Education offers a Master of Education (M.Ed.) with major in Counselor Education and three concentrations, a combined [Master of Education \(M.Ed.\) to Specialist in Education \(Ed.S.\) with major in Counselor Education](#) and two concentrations, and a Specialist in Education (Ed.S.) with major in Counselor Education with two concentrations. A Doctor of Philosophy

(Ph.D.) with major in Counseling is also part of this department's offerings.

## **COUNSELOR EDUCATION**

### **MASTER OF EDUCATION (M.ED.)**

**Clinical Mental Health Counseling Concentration**

**Clinical Rehabilitation Counseling Concentration**

**School Counseling Concentration**

The Master of Education (M.Ed.) with major in Counselor Education may be structured with a Clinical Mental Health Counseling, Clinical Rehabilitation Counseling or School Counseling concentration.

Note that admission requirements differ for these concentrations. The concentrations in Clinical Mental Health Counseling and School Counseling require 60 credits; the concentration in Clinical Rehabilitation Counseling requires 63 credits.

### **Admission Requirements**

1. The student must meet College and University requirements.
2. The student must have a minimum grade point average of 2.5 in the last 60 credits of undergraduate study prior to receiving the bachelor's degree and must submit official Graduate Record Examination (GRE) scores.
3. The student must provide a professional goal statement (one-to-two pages) along with a separate page describing the student's work experience related to counseling and three letters of recommendation on each reference's letterhead attesting to the student's suitability for graduate study and entry into the field of professional counseling.
4. Admissions are made twice each year on a competitive basis, except for Clinical Mental Health Counseling, which accepts applicants for the fall semester only.
5. Students should contact the department for specific application procedures and deadlines.
6. All application materials must be received no later than January 15 for fall admission and September 15 for spring admission.

7. The student may take no more than 18 graduate credits from FAU toward the degree prior to admission to the master's degree program in Counselor Education.
8. Permission from a full-time faculty member is required for each course.

### **Admission to Candidacy**

See Admission to Candidacy heading listed under Master's Degree Program Information.

### **Degree Requirements**

1. The student must satisfy College and University requirements.
2. The student may use MHS 6710 to satisfy the College research core requirement.
3. The student must complete a minimum 60-credit program of study for the master's degree.

**Total****60****COUNSELOR EDUCATION****MASTER OF EDUCATION (M.ED.) TO SPECIALIST IN EDUCATION (ED.S.)  
COMBINED PROGRAM****Clinical Mental Health Counseling Concentration****School Counseling Concentration***(Minimum of 84 credits required)*

This Combined M.Ed. and Ed.S. with major in Counselor Education program may be structured with a Clinical Mental Health Counseling or School Counseling concentration. It requires at least 12 credits of coursework beyond the minimum of 60 credits needed for the M.Ed. program. Students receive their M.Ed. after completing a minimum of 60 credits of coursework; the Ed.S. is awarded after completion of a total of 72 credits (and no more than 84 credits for the combined program with departmental permission). Any courses in the Department of Counselor Education can be used to fulfill these requirements with advisor permission.

The Admission Requirements for the M.Ed./Ed.S. are the same as for the M.Ed. The Degree Requirements are also the same except for item 3:

3. The student must complete a minimum 60-credit program of study for the master's degree and complete a minimum of 72 credits for the combined M.Ed./Ed.S. program with no more than 84 credits.

**COUNSELOR EDUCATION****SPECIALIST IN EDUCATION (ED.S.)****Mental Health Counseling Concentration****School Counseling Concentration**

The Specialist in Education (Ed.S.) with major in Counselor Education is available with the following concentrations: Mental Health Counseling or School Counseling. For admission and degree requirements refer to the heading [Specialist's Degree Program Information](#). All application materials

must be received no later than January 15 for summer/fall admission and September 15 for spring admission. The Ed.S. degree requires 72 credits.

## COUNSELING DOCTOR OF PHILOSOPHY (PH.D.)

The Doctor of Philosophy (Ph.D.) with major in Counseling is a research-oriented program designed specifically to prepare graduates for local and national leadership as university professors, researchers, clinical supervisors, directors and program coordinators in mental health agencies, school settings and rehabilitation programs. Given that the doctoral program accepts students who are already licensed or certified counselors, it is not primarily a clinically focused degree, although it will enhance students' clinical and supervisory skills. The Ph.D. degree requires 60 credits.

Faculty members are committed to providing doctoral students with a broad base of intellectual and interpersonal experiences to understand, assess, formulate and plan interventions with children, adolescents, adults, couples and families, as well as in researching and evaluating such interventions. The doctoral program focuses on developmental and preventive processes in addition to therapeutic processes.

A unique feature of the Ph.D. program is student-faculty collaboration in research groups. The program was designed based on the standards of the Council for the Accreditation of Counseling and Related Educational Programs (CACREP). The program emphasizes scholarly and empirical research in addition to the enhancement of technical counseling skills and prepares doctoral students broadly to

become dedicated, knowledgeable, skillful, socially aware and ethically responsible leaders in the counseling profession for the 21st century.

## **Program Objectives**

The program has six interrelated objectives:

1. Prepare counselors who aspire to become leaders in the field as counselor educators, clinical supervisors or program coordinators/directors in mental health agencies and schools and rehabilitation programs;
2. Educate doctoral students in "best-of-practice" counseling methods linking research to practice in the delivery of counseling services;
3. Develop specific areas of research emphasis via faculty/student research groups within the department's doctoral program. Studies from the research groups will build upon one another to establish Florida Atlantic University as a national leader in distinct, clearly defined areas of inquiry;
4. Provide a stimulating and supportive environment for faculty and students who will collaboratively engage in teaching and research;
5. Enhance the quality of counseling services at the local and national levels;
6. Model the sensitivity and clinical skills consistent with the highest level of ethical and professional practice expected of counseling professionals in a multicultural world and environment.

## **Admission Requirements**

Admission applications are accepted for the fall term each year. November 1 is the deadline for priority admission (eligible for tuition support) and November 15 for all other admission consideration.

Students who wish to enter this degree program must have the following:

1. A master's degree in counseling from a regionally accredited CACREP program with a cumulative GPA of 3.5 (on a scale of 4.0) or higher. Students who possess master's degrees from other programs or with less than 60 semester credits will need to complete prerequisite courses;
2. Licensure as a Mental Health Counselor or have certification in School Counseling. Two years of experience as a professional counselor/therapist or school counselor is preferred;
3. A satisfactory score on the GRE (verbal and quantitative), and a high score on the analytic section of the revised GRE taken within five years of application;
4. A high level of professionalism and potential for leadership in the counseling profession, as demonstrated in the personal essay, interview and letters of reference;
5. Strong writing skills, as demonstrated in the personal essay and writing samples;

6. Clear objectives related to obtaining the Ph.D., as demonstrated in the personal essay and interview;
7. Effective and appropriate interpersonal and counseling skills as determined in personal interviews with program faculty.

**Note:** International students must submit official test scores on the Test of English as a Foreign Language (TOEFL) of at least 550 on the written tests or 220 on the computer-based test. Tests must have been taken within the past two years.

## **EARLY CARE AND EDUCATION**

### **BACHELOR OF EARLY CARE AND EDUCATION (B.E.C.E.)**

(This program description also appears in the Special Education Department.)

The Bachelor of Early Care and Education (B.E.C.E.) is a joint program offered by the Department of Curriculum and Instruction and the Department of Special Education. The B.E.C.E. is designed to prepare teachers and related personnel for employment in the fields of child care and children's services for young children from birth to age five. The program is offered at the Boca Raton campus.

## Admissions Requirements

Students enrolling in the B.E.C.E. may exhibit a range of prior levels of preparation. Generally, all students are required to have completed 60 credits of lower-division coursework. This could include the A.A. or A.S. degree in Early Childhood Education determined by articulation agreements with community or state colleges.

All students seeking admission to the B.E.C.E. must meet the University's admission requirements. In addition each applicant must:

1. Have a minimum GPA of 2.5 on a 4.0 scale on lower-division undergraduate coursework for a total of 60 credits;
2. Be programmed for admission to the B.E.C.E. by a faculty advisor from the Department of Special Education or the Department of Curriculum and Instruction.

## Prerequisite Coursework for Transfer Students

Students transferring to Florida Atlantic University must complete both lower-division requirements (including the requirements of the Intellectual Foundations Program) and requirements for the college and major. Lower-division requirements may be completed through the A.A. degree from any Florida public college, university or community college or through equivalent coursework at another regionally accredited institution. Before transferring and to ensure timely progress toward the baccalaureate degree, students must also complete the prerequisite courses for their major as outlined in the [Transition Guides](#) .

All courses not approved by the Florida Statewide Course Numbering System that will be used to satisfy requirements will be evaluated individually on the basis of content and will require a catalog course description and a copy of the syllabus for assessment.

## Course Requirements

As a joint program of two FAU departments, the B.E.C.E. is made up of coursework, field experiences and advisement from both departments. In addition, a careful review of student transcripts will guide advising decisions.

All students are required to take seven Early Childhood core courses (21 credits) and two Reading Courses (6 credits). All students must complete General Education requirements (36 credits), either from an associate's degree program or as non-restricted elective courses in the B.E.C.E. General Education courses include six credits in each of the following areas: Math, English Composition, Science, Social Studies, Humanities and General Education (electives). Gordon Rule/WAC courses,

Math and English composition, are included in the General Education Requirements. If foreign language courses have not been completed previously, they must be taken as part of the non-restricted electives.

Additionally, students enrolled in the B.E.C.E. will complete 18-21 or more credits of upper-division elective courses in education and related disciplines, which will be determined in consultation with an advisor. A list of recommended electives will be provided for all advisors and students.

### **Sequence of Course Requirements**

Required Early Childhood core courses are offered in a prescribed sequence with specific prerequisites beginning in each fall semester. The sequence of courses requires a minimum of four semesters, including a minimum of one summer term, to complete. Students should be programmed as soon as possible to receive appropriate advising.

A summary of the 120-credit program follows:

### **Transfer Credits – 60 credits**

Determined through Articulation Agreements with community or state colleges. Early Childhood and General Education Courses can transfer as a 60-credit block for students having completed A.A. or A.S. degrees in Early Childhood. Students transferring the A.S. degree may need additional coursework to satisfy the FAU lower-division General Education core.

---

### ***FAU Early Childhood Core Courses – 21 credits***

### ***B.E.C.E. Open Electives - 15 credits***

These courses should be selected in consultation with B.E.C.E. advisor.

### ***B.E.C.E. Program Electives - 12 credits***

These courses should be selected in consultation with B.E.C.E. advisor.

## Graduation Requirements

B.E.C.E. graduation requirements are consistent with FAU and College of Education standards. Each candidate for graduation must:

1. Earn a minimum of 120 credits in academic courses acceptable toward the degree;
2. Earn a minimum of 45 of these credits at the upper division;
3. Earn the last 30 upper-division credits in residence at FAU;
4. Earn at least 75 percent of all upper-division credits from FAU in the departments of Curriculum and Instruction-and/or Special Education, or other departments in the College of Education;
5. Satisfy Gordon Rule/Writing Across Curriculum requirements;
6. Fulfill all admissions, program and course requirements;
7. Earn a "C" or better in all Education courses and a "C-" or better in all non-Education courses, maintaining a 2.5 GPA upon graduation;
8. Fulfill the FAU foreign language requirement;
9. Submit a completed Application for Graduation form.

## Accreditation Standards for the B.E.C.E.

The B.E.C.E. represents the highest professional standards promulgated by the National Association for the Education of Young Children and the Council for Exceptional Children Division of Early Childhood. All course syllabi include standards delineated by the Florida Department of Education's

Educator Accomplished Practices and the FAU College of Education's corresponding Behavioral Indicators. Students must demonstrate competence on all critical assignments embedded in Early Childhood Core Courses and Reading Courses.

## **ELEMENTARY EDUCATION (K-6) WITH ESOL AND READING ENDORSEMENTS**

**BACHELOR OF ARTS (B.A.)**

**BACHELOR OF ARTS IN EDUCATION (B.A.E.)**

### **Admission Requirements**

All students seeking admission to the undergraduate program in Elementary Education must first meet the University's general upper-division admission requirements, as well as the lower-division general preparation requirements listed previously in this College of Education section. In addition, each applicant must:

1. Have attained an overall grade point average of 2.5 or higher;
2. Present passing scores on all sections of the General Knowledge Test and disposition screening;
3. Be recommended for admission to the program by the Department of Teaching and Learning and approved by the Office for Academic and Student Services;
4. Be assigned to and programmed by an academic advisor.

Students must be formally admitted into the College of Education prior to enrolling in RED 4308, RED 4552, RED 4750, EDG 3324 and TSL 4081. During the first week of these courses, students must show a photocopy of the official program signed by the student and faculty advisor.

### **Prerequisite Coursework for Transfer Students**

Students transferring to Florida Atlantic University must complete both lower-division requirements (including the requirements of the Intellectual Foundations Program) and requirements for the college and major. Lower-division requirements may be completed through the A.A. degree from any Florida public college, university or community college or through equivalent coursework at another regionally accredited institution. Before transferring and to ensure timely progress toward the baccalaureate degree, students must also complete the prerequisite courses for their major as outlined in the [Transition Guides](#) .

All courses not approved by the Florida Statewide Course Numbering System that will be used to satisfy requirements will be evaluated individually on the basis of content and will require a catalog course description and a copy of the syllabus for assessment.

## Course Requirements

All Elementary Education majors entering the program are required to enroll in courses in a prescribed sequence with specific prerequisites. Students should be programmed as soon as possible to receive appropriate advising. Students must be admitted and programmed prior to the second semester of enrollment. Students who complete all program requirements will be eligible for both ESOL and Reading Endorsements upon graduation.

### Scope and Sequence of Elementary Education Coursework - 63

(after lower-division general preparation requirements)

---

#### First Semester *(prerequisite courses)*

Language Arts and Literature: Birth through Grade 8	LAE 4353	3
---	----------	---

Introduction to Theories and Practices of TESOL	TSL 4080	3
---	----------	---

---

#### Early Program Courses

*(May be taken at any time during junior or senior years.)*

Art: Elementary School	ARE 4313	3
------------------------	----------	---

Educational Measurement and Evaluation	EDF 3430	3
--	----------	---

Applied Learning Theory	EDF 3210	3
-------------------------	----------	---

Equity Issues in Multicultural Education	EDF 3203	3
--	----------	---

Inclusive Education for General Educators	EEX 4070*	3
---	-----------	---

Educational Technology for 21st Century Teaching	EME 4312	3
--	----------	---

Mathematics Content and Standards for K-6 Teachers	MAE 4310	3
--	----------	---

Science Content and Standards for K-6 Teachers	SCE 4113	3
--	----------	---

---

**Mid-Program Courses** *(May not be taken during the first semester of enrollment but must be completed by the final semester prior to student teaching. LAE 4353, TSL 4080, MAE 4310, and SCE 4113 are prerequisites for the courses below.)*

Principles and Methods: K-9 School Math	MAE 4350	3
Reading Development 1: Birth through Grade 3	RED 4308 +	3
Principles and Methods: K-9 School Science	SCE 4350	3
K-9 Social Studies	SSE 4150	3
<b>Semester Prior to Student Teaching</b>		
Reading Development 2: Grades 3 through 8	RED 4750 +	3
Reading Diagnosis and Remediation: Pre-K through Grade 8	RED 4552 +	3
TESOL Issues and Practices	TSL 4081*+	3
Effective Teaching Practices	EDG 3324**+	3
Classroom Management for Inclusive Elementary Schools	EEX 4616	3
<b>Final Semester</b> <i>(All program courses must be completed prior to student teaching.)</i>		
Supervised Literacy Practicum	RED 4348*	3
Student Teaching - Elementary	EDE 4943 or	3-9
<b>One-Year Student Teaching Option (both semesters)</b>		
Student Teaching (fall semester)	EDE 4945	3-6
Student Teaching (spring semester)	EDE 4945	3-6

\* Denotes field experience credits.

\*\* Denotes 90 field experience hours.

+ Students must be admitted and programmed into the College of Education prior to enrolling in these courses.

Students who complete all program requirements will be eligible for both ESOL and Reading Endorsements upon graduation.

**Notes to read CAREFULLY:**

1. EDF 2005, Introduction to the Teaching Profession; EDF 2085, Introduction to Diversity for Educators; and EME 2040, Introduction to Technology for Educators; or community or state college equivalents are program requirements.
2. See the General Education lower-division requirements elsewhere in this catalog.
3. Grading policy: Students must pass ALL teacher preparation courses with a grade of "C" or better. A "C-" is not considered a passing grade, and the course must be retaken.
4. An active LiveText account is a requirement for all program coursework.
5. Out-of-state transfer students must take EDG 3324 at FAU.
6. EDG 3324 requires **one additional day per week** in a public school setting during the fall and spring semesters.
7. EDG 3324 (summer 2: Davie campus), TSL 4081 (summer 2) **may** be offered on a **limited basis** in the summer **by permission only**. Students should plan to enroll in these courses during the fall and spring semesters.
8. EDF 2005 is not offered in the summer term.
9. Students must pass RED 4308 and RED 4750 prior to taking RED 4552. No literacy courses (LAE 4353, RED 4308, RED 4750) may be taken after RED 4552.
10. RED 4750 may be taken concurrently with RED 4308. RED 4750 may not be taken before RED 4308.
11. Students must pass TSL 4080 prior to taking TSL 4081. TSL 4080 may not be taken concurrently in one semester with TSL 4081.
12. EDG 3324 grading policy: If a student earns a "D" or an "F" in the field evaluation component or a "D" or an "F" in the coursework component, then the highest grade the student can receive for the course is a "C-." A "C-" is not considered a passing grade, and the course must be retaken. Students cannot take the EDG 3324 course more than twice.
13. Field experiences in school settings are required in some teacher preparation methods courses.
14. The following must be completed and passed prior to receiving a placement for student teaching: all program courses and other requirements, the professional and subject sections of the FTCE and all appropriate sections of the General Knowledge Test.
15. EDE 4943, Student Teaching, requires that the student is in a public school setting **five full days** a week during the school day in fall or spring semester.
16. State of Florida teacher certification requires all applicants to be fingerprinted and screened by the FBI for felony convictions. School districts also require a fingerprint check and screening for school-based clinical teaching assignments. Students with felony records will NOT be permitted to be placed in internship settings and will NOT be permitted to successfully complete the

program of studies for their degree and/or certification. Consequently, students with a record of felony conviction(s) will NOT be eligible for admission to a teacher preparation program at Florida Atlantic University.

17. For assistance contact the Office for Academic and Student Services:

Boca campus, 561-297-3570

Davie campus, 954-236-1028

Jupiter campus, 561-799-8135

## HONORS IN ENVIRONMENTAL EDUCATION

Students in both B.A. and B.A.E. programs may be eligible for this honors program, designed for preservice teachers who are passionate about nature, animals and environmental issues. The program delineates ways in which environmental education could be integrated into elementary and middle school classrooms and includes the latest research on the benefits of getting young learners out of the classroom more often. There is a strong undergraduate research theme underlying the program that explicitly links teacher action research to the nature of science, as defined by state and national standards. Student teachers are introduced to inquiry tools that allow them to examine their own practice and contribute to an exciting new body of research in education, health and social science.

This Honors in Environmental Education program includes honors enrichment that highlights environmental science themes and environmental education pedagogies directly applicable to Grades K-8. Students will be certified in state and national environmental education curricula, including Project Wild. Coursework and experiences are centered on northern Palm Beach and Martin counties with their impressive range of high quality natural sites and community expertise. In addition to learning how to teach in their own schoolyards, students in the Honors in Environmental Education program learn how to integrate visits to and from community partners, such as local nature centers, gardens, wildlife rehabilitation clinics and parks (city, county, state and national). Whenever possible, student teaching placements will be in Palm Beach or Martin County green schools.

### Eligibility Criteria

1. Students must have been admitted to the College of Education as an Elementary Education major, with a minimum GPA of 3.0;
2. Students must have completed at least 60 credits with at least a 3.0 overall GPA (this eligibility requirement is higher than the 2.5 GPA required for admission to the Elementary Education major);

3. No more than 20 percent of the Elementary Education majors are eligible to be admitted.

### **Selection Criteria**

1. A 500+ word essay describing why the student is interested in integrating environmental education into their teaching career;
2. Must be willing to take the honors section on SCE 4350 on the Jupiter campus;
3. Must be willing and able to travel to potential school-based placements outside of the student's home radius.

### **Standards to Remain in the Program**

1. Maintain a 3.0 GPA in the major;
2. Meet the requirements of honors compacts in SCE 4113, EDG 3324 and student teaching;
3. Take the honors-enriched version of SCE 4350 (Jupiter campus);
4. Attend occasional workshops.

### **Honors Enrichment**

1. An honors compact in SCE 4113, Science Content and Standards for K-6 Teachers, that includes becoming familiar with the Palm Beach County school district Field Research Ranger Program;
2. An honors section of SCE 4350, Principles and Methods: K-9 School Science, typically taught by the environmental education coordinator, with an emphasis on better links to community partners, the use of outdoor classrooms within school grounds and other nature, place and outdoor-based pedagogies;
3. Placement in district green schools during EDG 3324, Effective Teaching Practices, and collaboration with cohort peers and faculty mentoring to take CITI Institutional Research Board training focusing on educational research;
4. A capstone during EDE 4943, Student Teaching-Elementary, or the Accelerated Introduction into Teaching (AIT), where students will work with their coordinating teacher and the honors faculty to develop, implement and communicate a research project related to their environmental education practice. This will include a paper and presentation based on their research.

## **UNDERGRADUATE RESEARCH HONORS PROGRAM: EFFECTIVE INTEGRATION OF EDUCATIONAL IMPACT AND OUTCOMES THROUGH HONORS ELEMENTARY EDUCATION (EIEIO - ELEM HONORS)**

Undergraduate Elementary Education majors who meet eligibility criteria may apply for admission into the Honors-in-the-Major Program in Elementary Education. Selected students will have the opportunity to engage in undergraduate research and inquiry, explore formal discipline-based research practices and

experience mentorship within coursework and in the field.

## **Eligibility Criteria**

1. Student must have been admitted to the College of Education as an Elementary Education major;
2. Student must have completed at least 60 credits with at least a 3.0 overall GPA (this eligibility requirement is higher than the 2.5 GPA required for admission to the Elementary Education major);
3. Student must have a passing score on all sections of the General Knowledge Test;
4. No more than 20 percent of the Elementary Education majors are eligible to be admitted.

## **Selection Criteria**

1. Application essay (statement of purpose), which is due with the application at the end of the sophomore year and must be submitted to the department's designee;
2. Recommendation letter from one College of Education faculty member;
3. Must be willing and able to travel to potential school-based placements in urban environments outside of student's home radius;
4. Must be able to take Honors-in-the-Major research-enhanced courses in the cohort track, which will be located on the Boca Raton campus.

## **Standards to Remain in the Program**

1. Maintain a GPA of 3.5 in upper-division major (after admission with an undergraduate lower-division GPA of 3.0);
2. Enroll in courses with the EIEIO cohort, sequential design;
3. Adhere to the FAU Honor Code and Department of Education Ethics for Teacher Candidates in Education;
4. Participate in peer-mentoring groups and the College of Education Summer Undergraduate Research Fellowship (SURF);

In the event of withdrawal or dismissal from the program, credits earned in courses will be applied to the traditional bachelor's degree in Elementary Education, with no penalty.

## **Honors Enrichment**

1. College of Education SURF participation. Faculty-guided mentorship program with the departments of Curriculum and Instruction and Educational Leadership and Research Methodology. Students attend summer workshops to design the capstone experience research

plan.

2. Three courses enhanced by Academic Service Learning (ASL) in a discipline-specific practicum and internship experience (three semesters). Students apply for ASL credit, track hours and earn service learning experience.
3. Collaboration with cohort peers in discipline-specific action research. Students engage in peer mentoring associated with the Office of Undergraduate Research and Inquiry (OURI) and with graduate students in the College of Education.
4. Interdisciplinary application of educational learning theory and educational research theory to a three semester action research project. Students implement a three semester research project including a small pilot study, full implementation, and analysis and presentation.
5. Mentorship with administration including principals of partnering elementary schools.

### Capstone Experience

Complete an action research project, reviewed by four faculty members and a council of peers, during the revised section of the EIEIO Honors Student Teaching capstone course **and** at least two of the following:

1. Present in the College of Education Undergraduate Research Symposium;
2. Submit to present at the FAU OURI Undergraduate Research Symposium;
3. Apply for publication in the *FAU Undergraduate Research Journal*;
4. Apply for publication in an educational research journal;
5. Participate as an FAU peer mentor with the Office of Undergraduate Research and Inquiry.

In addition to FAU general education lower-division preparation and Education prerequisites (see [College of Education Lower-Division General Preparation Requirements](#)), Elementary Education majors in the EIEIO - ELEM Honors program must take the following Honors-in-the-Major research-enhanced courses:

Introduction to the Teaching Profession	EDF 2005	3
Applied Learning Theory <i>(only offered in the spring semester and must be taken with EDF 3430)</i>	EDF 3210	3
Educational Measurement and Evaluation <i>(only offered in the spring semester and must be taken with EDF 3210)</i>	EDF 3430	3

Effective Teaching Practices 1 <i>(located in designated elementary school campus)</i>	EDG 3323	2
---	----------	---

Effective Teaching Practices <i>(located in designated elementary school campus)</i>	EDG 3324	3
---	----------	---

Student Teaching - Elementary <i>(Broward County zone schools)</i>	EDE 4943	3-9
---	----------	-----

(See B.A. or B.A.E. with major in Elementary Education (K-6) with ESOL Endorsement Curriculum Matrix for complete course assessments linked to student learning outcomes.)

## SECONDARY EDUCATION PROGRAMS

### Overview

Secondary Education degree programs are offered in partnership with the Dorothy F. Schmidt College of Arts and Letters and the Charles E. Schmidt College of Science. These programs are Florida Department of Education (DOE) and Council for the Accreditation of Educator Preparation (CAEP) approved. This state and CAEP approval represent the transferability of teaching credentials from state-to-state. Secondary programs currently approved include the following subject areas and grade levels:

English Education 6-12

Mathematics Education 6-12

Science Education (Biology 6-12, Chemistry 6-12, Physics 6-12)

Social Science Education 6-12

The following certification programs are also offered in partnership with the College of Arts and Letters:

Art K-12\*

Music Education K-12

\* To qualify for Florida state and CAEP certification approval for Art K-12, all education requirements must be met.

### Admission Requirements

1. Formal application to the program;
2. Enrollment in an approved baccalaureate or a degree in an approved area;
3. A minimum GPA of 2.5 on a 4.0 scale on the general education component of undergraduate studies, **OR** completion of requirements for a baccalaureate degree with a minimum GPA of 2.5 from any college or university accredited by a regional accrediting institution;
4. Passing scores on all sections of the General Knowledge Test.

## Course Sequence

All Secondary Education majors are required to meet with an academic advisor in the College of Education to review content and education course requirements as listed in the program guides. Upon admittance to the program, students are required to meet with their education and content area faculty advisors. Below is the suggested course sequence.

### Professional Education

Introduction to the Teaching Profession	EDF 2005	3
Applied Learning Theory	EDF 3210	3
Educational Measurement and Evaluation	EDF 3430	3
Introduction to Diversity for Educators	EDF 2085	3
Introduction to Technology for Educators	EME 2040	3
Secondary School Effective Instruction+ ( <i>Security clearance required.</i> )	ESE 3940	3
Content Reading: Middle and Secondary Schools	RED 4335	3
Supervised Literacy Practicum (to be taken with Student Teaching)*	RED 4348	3
Reading Diagnosis and Remediation: Pre-K through Grade 8*	RED 4552	3
Reading Development 2: Grades 3 through 8*	RED 4750	3
Introduction to TESOL*	TSL 4080	3
TESOL Issues and Practices*	TSL 4081	3

\* English majors only

+ Students must be admitted and programmed into the College of Education prior to enrolling in these courses.

### **Student Teaching**

In order to meet the student teaching deadline, a student must be admitted into the Secondary Education Program one full semester prior to student teaching.

The student teaching/internship component requires a separate application. Everyone must complete all courses (education and subject area), the General Knowledge Test and the FTCE (professional education and subject area) before beginning the student teaching/internship component.

### **UNDERGRADUATE RESEARCH HONORS PROGRAM: EFFECTIVE INTEGRATION OF EDUCATIONAL IMPACT AND OUTCOMES THROUGH HONORS SECONDARY EDUCATION (EIEIO - SECONDARY HONORS)**

Undergraduate Secondary Education majors who meet eligibility criteria may apply for admission into the Honors-in-the-Major Program. Selected students will have the opportunity to engage in undergraduate research and inquiry, explore formal discipline-based research practices and experience mentorship within coursework and in the field.

### **Eligibility Criteria**

1. Student must have been admitted to the College of Education as a Secondary Education major.
2. Student must have completed at least 60 credits with at least a 3.0 overall GPA on a 4.0 scale (this eligibility requirement is higher than the 2.5 GPA required for admission to other Secondary majors);
3. Student must have a passing score on all sections of the General Knowledge Test;
4. No more than 20 percent of the Secondary Education majors are eligible to be admitted.

### **Selection Criteria**

1. Application essay (statement of purpose), which is due with the application at the end of the sophomore year and must be submitted to the department's designee; a program coordinator and a committee of four faculty in the program will review applications and track student progression

through the program;

2. Recommendation letter from one College of Education faculty member;
3. Must be willing and able to travel to potential school-based placements in urban environments outside of student's home radius;
4. Must be able to take Honors-in-the-Major research-enhanced courses on the Boca Raton campus.

### **Standards to Remain in the Program**

1. Maintain a GPA of 3.5 in upper-division major (after admission with an undergraduate lower-division GPA of 3.0);
2. Enroll in courses with the EIEIO cohort, sequential design;
3. Adhere to the FAU Honor Code and Department of Education Ethics for Teacher Candidates in Education;

Participate in peer-mentoring groups and the College of Education Summer Undergraduate Research Fellowship (SURF);

In the event of withdrawal or dismissal from the program, credits earned in courses will be applied to the traditional bachelor's degree in Secondary Education, with no penalty.

### **Honors Enrichment**

1. College of Education SURF participation. Faculty-guided mentorship program with the departments of Curriculum and Instruction and Educational Leadership and Research Methodology. Students attend summer workshops to design the capstone experience research plan.
2. Three courses enhanced by Academic Service Learning (ASL) in a discipline-specific practicum and internship experience (three semesters). Students apply for ASL credit, track hours and earn service learning experience.
3. Collaboration with cohort peers in discipline-specific action research. Students engage in peer mentoring associated with the Office of Undergraduate Research and Inquiry (OURI) and with graduate students in the College of Education.

Interdisciplinary application of educational learning theory and educational research theory to a three semester action research project. Students implement a three semester research project including a small pilot study, full implementation, and analysis and presentation.

### **Capstone Experience**

Complete an action research project, reviewed by four faculty members and a council of peers, during the revised section of the EIEIO Honors Student Teaching capstone course, present in the College of Education Undergraduate Research Symposium **and** at least two of the following:

1. Submit to present at the FAU OURI Undergraduate Research Symposium;
2. Apply for publication in the *FAU Undergraduate Research Journal*;
3. Apply for publication in an educational research journal;
4. Participate as an FAU peer mentor with the Office of Undergraduate Research and Inquiry.

In addition to FAU general education lower-division preparation and content area courses offered by the Dorothy F. Schmidt College of Arts and Letters or the Charles E. Schmidt College of Science, Secondary Education majors in the EIEIO - Secondary Honors Program must take the following Honors-in-the-Major research-enhanced courses:

Introduction to the Teaching Profession	EDF 2005	3
Applied Learning Theory	EDF 3210	3
Educational Measurement and Evaluation	EDF 3430	3
Secondary School Effective Instruction	ESE 3940	3
Subject-Specific Student Teaching		6-12

(See Secondary Program, Course Sequence, Curriculum Matrix for complete course assessments linked to student learning outcomes.)

## **DIVERSITY AND GLOBAL STUDIES** **UNDERGRADUATE MINOR**

*(Minimum of 12 credits required)*

This minor is offered by the Department of Curriculum and Instruction in collaboration with the Office of Diversity and Multicultural Affairs in Student Affairs. The minor in Diversity and Global Studies comprises 12 credits and is available to all undergraduate degree-seeking students. It will be conferred upon completion of coursework related to the minor and the completion of a bachelor's degree.

---

### **Required Courses (6 credits)**

---

The Educated Citizen in a Global Context	EDF 2854	3
Community Engagement for Global Consciousness (Capstone course)	EDF 4802	3

### Elective Courses (6 credits)

Elective courses pertaining to diversity and global studies must be selected in consultation with an academic advisor.		6

## EARLY CHILDHOOD ENVIRONMENTAL EDUCATION UNDERGRADUATE CERTIFICATE

*(Minimum of 12 credits required)*

This certificate program complements a growing list of academic programs focused on preparing educators and their engagements in the development of environmental education programs in schools and communities. Complementing programs such as the [Bachelor of Arts or Bachelor of Arts in Education with Honors in Environmental Education](#), [Environmental Education Certificate](#) and the [Master's in Environmental Education](#), this certificate program focuses on the preparation of educators and leaders in guiding the development of young children's early environmental literacy skills as well as program development in both formal and non-formal educational settings serving young children and their families. The curriculum's specific focus is on emergent curriculum development and delivery in outdoor natural environments, experiential learning as a significant mode of teaching and learning, whole-child development and scaffolding, children's growth of environmental understanding and ecological identity, and sustainable practices in instruction and programming.

### Curriculum

The certificate program requires 12 credits of coursework, consisting of the following required courses:

Foundations of Early Childhood Environmental Education	EEC 4020	3
Exploring Natural Habitats as a Curriculum for Young Learners	EEC 4237	3
Community Engagement in Early Childhood Environmental Education	EEC 4404	3

*Select one of the following electives*

American Environmental History	AMH 3630	3
Introduction to Biological Anthropology	ANT 2511	3
Introduction to Astronomy	AST 2002	3
Life Science	BSC 1005	2
Life Science Lab	BSC 1005L	1
Biological Principles	BSC 1010	3
Biodiversity	BSC 1011	3
Anatomy and Physiology	BSC 2085	3
Contemporary Chemical Issues	CHM 1020C	3
Chemistry for Health Sciences	CHM 2032	3
General Chemistry 1	CHM 2045	3
Survey of Current Environmental Issues through Service Learning	EDG 4044	3
Civic Engagement through Environmental Service Learning	EDG 4045	3
Creative Arts for Young Children	EEC 4303	3
Effective Practices in Early Childhood Environmental Education	EEC 4322	3
The Blue Planet	ESC 2000	3
Nature: Intersections of Science, Engineering and the Humanities	ETG 2831	3
Environmental Science and Sustainability	EVR 1001	3
Environmental Science and Society	EVR 2017	3
Critical Thinking in Environmental Science	EVS 4021	3
RI: Human-Environment Interactions in South Florida	GEA 4275	3

Biogeography	GEO 4300	3
Water Resources	GEO 4280C	3
Physical Geology/Evolution of the Earth	GLY 2010C	4
The History of the Earth and Life	GLY 2100	3
Coastal and Marine Science	GLY 3730	3
Weather, Climate and Climate Change	MET 2010	3
Food, Nutrition and Health	NUR 3183	3
Marine Science	OCE 4006	3
Evolution	PCB 3674	3
General Physics 1 or General Physics for Engineers 1	PHY 2048	3
College Physics	PHY 2053	4
Physical Science	PSC 2121	3
Principles and Methods: K-9 School Science	SCE 4350	3
Designing the City	URP 2051	3
Sustainable Cities	URP 4403	3
Environmental Planning Methods	URP 4420	3

For other appropriate course electives, contact, [Yash Bhagwanji](#), ECEE Certificate Coordinator.

## **DIVERSITY AND GLOBAL STUDIES** **UNDERGRADUATE CERTIFICATE**

*(Minimum of 12 credits required)*

This innovative certificate program comprises 12 credits of coursework that support students' critical consciousness in their education about diversity within a global context. The certificate in Diversity and Global Studies is available to degree-seeking and non-degree-seeking students. It is conferred upon completion of required and elective courses. All courses must be taken at FAU.

---

### Required Courses (6 credits)

The Educated Citizen in a Global Context	EDF 2854	3
Community Engagement for Global Consciousness (Capstone course)	EDF 4802	3

---

### Elective Courses (6 credits)

Elective courses pertaining to diversity and global studies must be selected in consultation with an academic advisor.		6
--	--	---

## MASTER'S PROGRAMS

[Link to Specialist's Program/Link to Doctoral Program](#)

General Requirements for all graduate programs include:

1. Graduate application;
2. Official transcripts;
3. Undergraduate cumulative GPA of 3.0;
4. Personal statement;
5. Résumé;
6. Two letters of recommendation that highlight the candidate's academic potential from a previous professor, employer or colleague (optional, at the discretion of each program).

A maximum of one-third of the total graduate credits taken at FAU as a non-degree student may be applied to the degree program, if approved by the advisor. Up to 6 credits of non-degree program transfer courses may be accepted from other universities at the discretion of the advisor and/or committee.

### MASTER OF EDUCATION (M.ED.)

The Master of Education degree is offered with a major in the following areas: [Curriculum and Instruction](#), [Curriculum and Instruction plus K-12 or Secondary Certification \(6-12\)](#), [Educational Psychology](#), [Elementary Education](#), [Elementary Education with ESOL plus Certification](#), [Environmental Education](#), [Instructional Technology](#), [Reading Education](#) and [Secondary Education plus Certification](#). Certificates in [Environmental Education](#), [Instructional Design](#) and [K-12 Online](#)

[Teaching](#) are also available.

**Notes:**

1. The M.Ed. in Reading Education leads to state certification in reading.
2. The M.Ed. for uncertified students seeking initial certification is available in Elementary Education with ESOL plus Certification or Curriculum and Instruction plus Secondary 6-12 Certification.
3. Specific information concerning each M.Ed. K-12 degree program follows.

## **CURRICULUM AND INSTRUCTION**

### **MASTER OF EDUCATION (M.ED.)**

The M.Ed. in Curriculum and Instruction (for certified teachers with a professional or temporary certificate) may be obtained in person in the areas noted below. The program also is offered online with specialization in Multicultural Education, ESOL Education, and Teacher Leadership, and a classroom-based specialization in Early Childhood Education. Students may also earn a certificate in [Multicultural Education](#).

#### **Areas of Concentration**

Art (K-12)

Early Childhood Education

English/Language Arts (6-12)

ESOL Education (K-12) (online available)

Foreign Language (French and Spanish) (K-12)

Mathematics (6-12)

Multicultural Education (K-12) (online available)

Reading (K-12) (does not lead to certification as a reading teacher)

Science Education (Biology, Chemistry and Physics) (6-12)

Social Science (6-12)

Teacher Leadership (K-12) (**Enrollment is currently suspended for this concentration.**)

#### **Note:**

The M.Ed. for uncertified students seeking initial certification is available in Elementary Education plus Certification or Curriculum and Instruction plus Secondary K-12 Certification in the Department of Curriculum and Instruction.

## Admission Requirements

To be admitted to the M.Ed. in Curriculum and Instruction Program, students must complete the graduate application and provide the following documentation showing that they:

1. Have a bachelor's degree from an accredited college or university;
2. Have a professional Florida certificate, have a Letter of Eligibility for temporary certification, or are certifiable in one of the degree areas of specialization in Florida, where applicable;
3. Have an undergraduate GPA of 3.0 or better;-
4. Submit a personal statement specifying the selected area of concentration (if known), reason for applying to the program and professional goals;
5. Submit a professional résumé;
6. Submit two letters of recommendation that highlight the candidate's academic potential from a previous professor, employer or colleague.

Another course may be used with approval of the advisor.		3

## **CURRICULUM AND INSTRUCTION PLUS K-12 OR SECONDARY CERTIFICATION (6-12) MASTER OF EDUCATION (M.ED.)**

**(This program is on hiatus and currently not accepting students.)**

The master's degree in Curriculum and Instruction plus K-12 or Secondary Certification (6-12) program provides an opportunity for those persons considering a career change to prepare for a new career in teaching and earn a master's degree simultaneously. The program includes professional education and subject area courses leading to a Master in Education as well as initial certification in a specific K-12 or secondary subject area. This program is designed for students who have already completed a bachelor's degree with credits in one of the following subject areas: art, biology, chemistry, English, French, mathematics, physics, social sciences or Spanish. Many content requirements may have been taken as part of the undergraduate degree.

### **Admission Requirements**

To be admitted to the master's degree program in Curriculum and Instruction plus K-12 or Secondary Program

(6-12), students must complete the graduate application and provide documentation showing that they:

1. Have a bachelor's degree from an accredited college or university;
2. Have satisfactory GRE scores on file at FAU that are not more than five years old;
3. Have a 3.0 or better GPA in the last 60 credits of undergraduate work prior to the granting of the bachelor's degree or have minimum GRE scores of 154 (verbal) and 144 (quantitative);
4. Have passing scores on all four sections of the General Knowledge sections of the FTCE. There are no exceptions or waivers to this General Knowledge requirement. All University and departmental admission requirements apply.

Additional admissions requirements exist for international students. Contact the FAU Office of International Students and Scholars and the Graduate College for these requirements.

---

### ***Professional Education (24 credits)***

---

Introduction to the Teaching Profession	EDF 2005	3
Applied Learning Theory	EDF 3210	3
Educational Measurement and Evaluation	EDF 3430	3

---

Introduction to Diversity for Educators	EDF 2085	3
Introduction to Technology for Educators	EME 2040	3
Secondary School Effective Instruction	ESE 3940	3
Content Reading: Middle and Secondary School	RED 4335	3
ESOL Strategies for Content Area Teachers (Students in the English concentration, take TSL 4080 and TSL 4081 instead.)	TSL 4324	3

### *Areas of Concentration*

At least 30 semester hours of specific coursework as required by concentration (see undergraduate program description for detail). No more than half of these hours can be at the undergraduate level.

<b>Grades K-12</b>	<b>Grades 6 - 12</b>
Art	English/Language Arts
Foreign Language (French and Spanish)	Mathematics
	Science (Biology, Chemistry, Physics)
	Social Science

### *6000-Level Content (9 - 12 credits)*

1. All students take one to two methods courses in their concentration area.
2. All students also take two graduate courses in their area of concentration. See the program advisor for approved courses in each area.

### *Curriculum and Instruction Core Courses*

U.S. Curricular Trends and Issues	EDG 6224	3
Design Components of Curriculum	EDG 6253	3

---

***Research/Statistics (6 credits)***

---

Educational Research	EDF 6481	3
Educational Statistics	STA 6113	3

---

***Student Teaching Internship (6-10 credits)***

---

Internship*	EDG 6940	6-10
-------------	----------	------

\* The Internship is a full-time fall or spring semester experience and requires a separate application. Students must complete all courses (education and subject area) and all sections of the FTCE before internship.

## **EDUCATIONAL PSYCHOLOGY**

### **MASTER OF EDUCATION (M.ED.)**

The master's degree in Educational Psychology is a versatile program for all educators, including teachers, administrators, and educational researchers. It allows students to specialize in the application of psychology in educational settings by examining theoretical and applied aspects of learning and cognition, human development, motivation, human personality, and other psychological principles. This program is available in person or fully online.

**Admission Requirements**

To be admitted to the M.Ed. in Educational Psychology, students must meet the following admission standards:

1. Completion of the graduate application online through the Graduate College;
2. Receipt of official transcripts including all undergraduate coursework;
3. A bachelor's degree from a regionally accredited college or university;
4. Have an undergraduate cumulative GPA of 3.0;
5. Personal statement;
6. Résumé;
7. Two letters of recommendation that highlight the candidate's academic potential from a previous professor, employer or colleague (optional, at the discretion of each program).

Additional admissions requirements exist for international students. Contact the FAU Office of International Students and Scholars and the Graduate College for these requirements.

### Progress and Degree Requirements

1. The student must meet all College and University guidelines.
2. The student must maintain an overall grade point average of 3.0 or higher.
3. The student must complete a minimum of 36 credits.
4. The student must complete the following course requirements.

---

#### ***Core Courses (21 credits required)***

Educational Psychology	EDF 6229	3
Learning and Cognition in Education	EDF 6142	3
Human Development: Applications for Education	EDF 6113	3
Personality Theories in Education	EDF 6339	3
Motivational Theories in Educational Psychology	EDP 6218	3
Child Development in Educational Psychology	EDF 6126	3
Adolescence and Young Adulthood in Educational Psychology	EDF 6138	3

---

#### ***Electives (9 credits required)***

***Choose three of the following pre-approved 3-credit courses or other electives as approved by student's assigned faculty advisor:***

Seminar in Personality and Social Development	DEP 6098	3
Introduction to Qualitative Inquiry	EDA 6415	3
Curriculum: Elementary School	EDE 6205	3

Field Project in Educational Psychology	EDP 6944	3
Senior High School Curriculum	ESE 6215	3
Seminar in Cognition	EXP 6609	3

*Other electives approved by assigned faculty advisor.*

---

***Research/Statistics (6 credits required)***

Educational Research	EDF 6481	3
Educational Statistics	STA 6113	3

*(Should be taken prior to or concurrently with EDF 6481.)*

## **ELEMENTARY EDUCATION MASTER OF EDUCATION (M.ED.)**

The Department of Curriculum and Instruction offers a program of study leading to a master's degree in Elementary Education. This program is directed toward currently (K-6) certified and experienced teachers who are pursuing an advanced degree.

### **Admission Requirements**

To be admitted to the M.Ed. in Elementary Education Program, students must complete the graduate application and provide documentation showing that they:

1. Have a bachelor's degree from an accredited college or university;
2. Have an undergraduate cumulative GPA of 3.0;
3. Personal statement;
4. Résumé;
5. Two letters of recommendation that highlight the candidate's academic potential from a previous professor, employer or colleague (optional, at the discretion of each program)

---

***Educational Leadership (choose one for 3 credits)***

Law and Policy	EDA 6232	3
Instructional Leadership	EDS 6050	3

***Exceptional Student Education (choose one for 3 credits)***

Methods of TESOL and Bilingual Education	TSL 5345	3
--	----------	---

***Research/Statistics (6 credits)***

Educational Research	EDF 6481	3
Educational Statistics <i>(Should be taken prior to or concurrently with EDF 6481.)</i>	STA 6113	3

---

### ***Liberal Arts /Education Courses (9 credits at the 6000 level or above)***

---

All students must take three courses related to elementary education in the College of Education, the Dorothy F. Schmidt College of Arts and Letters or the Charles E. Schmidt College of Science. Students with temporary certification may choose to take an approved course to fulfill state requirements.

## **ELEMENTARY EDUCATION WITH ESOL PLUS CERTIFICATION MASTER OF EDUCATION (M.ED.)**

The master's degree (M.Ed.) in Elementary Education with ESOL plus Certification Program provides preparation for a new career in teaching. The program is designed for students who already have a bachelor's degree and intend to become elementary school teachers in grades K-6. Upon completion of the CAEP-approved program, which includes student teaching, the student should be eligible for both Florida certification and a master's degree in Elementary Education. Students should be aware that no more than one-third of the credits in this program can be taken as non-degree-seeking before official admission.

### **Admission Requirements**

To be admitted to the M.Ed. in Elementary Education with ESOL plus Certification Program, students must complete the graduate application and provide documentation showing that they:

1. Have a bachelor's degree from an accredited college or university;
2. Have an undergraduate cumulative GPA of 3.0;
3. Personal statement;
4. Résumé;
5. Two letters of recommendation that highlight the candidate's academic potential from a previous professor, employer or colleague (optional, at the discretion of each program).

Additional admissions requirements exist for international students. Contact the FAU Office of

International Students and Scholars and the Graduate College for these requirements.

**Capstone Experience - 6-9 credits\*\***

Internship	EDG 6940*	3-6
------------	-----------	-----

(Student teaching is in a public school setting five days a week during fall or spring semester.)

\* EDG 6940 is generally not available in the summer term.

\*\* All program courses must be completed prior to student teaching; both professional and subject sections of FTCE must be passed prior to applying to student teaching.

## **ENVIRONMENTAL EDUCATION** **MASTER OF EDUCATION (M.ED.)**

The master's degree in Environmental Education provides a comprehensive graduate program that prepares future professionals in the field of environmental education and enhances the environmental education knowledge and skills of practicing teachers. This university-wide, interdisciplinary curriculum requires a minimum of 36 credits and includes opportunities to apply academic theory to practical experiences in the classroom, as well as onsite at the Pine Jog Environmental Education Center. A graduate certificate in [Environmental Education](#) is also available to complement the master's degree. For information about the master's program or the certificate program, contact Dr. Bryan Nichols, [nicholsb@fau.edu](mailto:nicholsb@fau.edu).

---

### **Environmental Education Courses - 12 credits**

*(Department of Curriculum and Instruction)*

Perspectives of Environmental Education	SCE 6345	3
Advanced Methods of Environmental Education	SCE 6344	3
Trends and Issues in Environmental Education	SCE 6644	3
Capstone Study in Environmental Education	SCE 6196	3

---

### ***Electives - 12 credits***

*Select four courses (12 credits at the 5000, 6000 or 7000 level from the College of Education or another college in the University with approval of an advisor.*

**General Education Courses (6 credits)***(Department of Curriculum and Instruction)*

Program Evaluation in Curriculum and Instruction	EDG 6285	3
--	----------	---

**Take one of the following courses:**

Global Perspectives of Curricular Trends <b>or</b>	EDG 6625	
Foundations of Global Education	EDF 6800	3

**Statistics/Research Courses - 6 credits***(Department of Educational Leadership & Research Methodology)***Take both of the following courses:**

Educational Statistics (complete prior to or concurrent with EDF 6481)	STA 6113	3
Educational Research (prerequisite or corequisite: STA 6113)	EDF 6481	3

**Admission Requirements**

Admission to the master's degree in Environmental Education requires submission of the graduate application form. Information pertaining to the process is available at [www.fau.edu/graduate](http://www.fau.edu/graduate). Students may complete the actual graduate application [here](#). In addition, in order to be considered for the degree program, students must submit the following documentation:

1. Official transcripts of all undergraduate coursework;
2. Have an undergraduate cumulative GPA of 3.0;
3. Personal statement;
4. Résumé;
5. Two letters of recommendation that highlight the candidate's academic potential from a previous professor, employer or colleague (optional, at the discretion of each program).

**ENVIRONMENTAL EDUCATION**

## GRADUATE CERTIFICATE

*(Minimum of 12 credits required)*

This graduate certificate may appeal to education, science and communications professionals interested in teaching in, about, and for the environment. To accommodate working professionals, courses are held in the evening and online. Advanced Methods in Environmental Education (SCE 6344) meets on select spring Saturdays and takes students on visits to a range of sub-tropical environmental education sites in Palm Beach and Martin counties, including parks, beaches, nature centers and one or more wildlife rehabilitators. Each of the four courses, a total of 12 credits, may count toward a master's degree in Environmental Education; the rest of the master's degree requirements may be completed online or in person. For students building their networks, certificate classes provide an opportunity to meet and interact with a passionate and inspiring group of education professionals.

### Required Courses - 12 credits

<i>Course</i>	<i>Number</i>	<i>Cr.</i>	<i>Location</i>	<i>Offered</i>
Perspectives of Environmental Education	SCE 6345	3	FAU Jupiter	Fall evenings
Science: Elementary and Middle School	SCE 6151	3	FAU Jupiter	Spring evenings
Trends and Issues in Environmental Education	SCE 6644	3	Online	Fall evenings
Advanced Methods of Environmental Education	SCE 6344	3	Various	Eight spring Saturdays

## INSTRUCTIONAL TECHNOLOGY MASTER OF EDUCATION (M.ED.)

The master's degree in Instructional Technology provides students with the necessary background to enable them to utilize, implement and maintain modern technology in the field of education and training. The program requires a minimum of 36 credits and includes coursework in research and statistics, software programming, instructional design and distance learning. This program is available in person or fully online.

## Admission Requirements

To be admitted to the M.Ed. in Instructional technology, students must meet the following admission standards:

1. Completion of the graduate application online through the Graduate College;
2. Receipt of official transcripts including all undergraduate coursework;
3. A bachelor's degree from a regionally accredited college or university;
4. Have an undergraduate cumulative GPA of 3.0;
5. Personal statement;
6. Résumé;
7. Two letters of recommendation that highlight the candidate's academic potential from a previous professor, employer or colleague (optional, at the discretion of each program).

Additional admissions requirements exist for international students. Contact the FAU Office of International Students and Scholars and the Graduate College for these requirements.

## Progress and Degree Requirements

1. The student must meet all College and University guidelines.
2. Completion of all required coursework listed below (except EDE 6205 or ESE 6215 and an additional elective) prior to placement in EME 6945.
3. The student must maintain an overall grade point average of 3.0 or higher.
4. The student must complete a minimum of 36 credits.
5. The student must complete the following course requirements.

## **INSTRUCTIONAL DESIGN** **GRADUATE CERTIFICATE**

*(Minimum of 12 credits required)*

This online certificate program is designed to prepare professionals to design, develop and deliver instructional materials and programs while utilizing a variety of learning technologies. It provides students with the theoretical knowledge and practical skills needed to design instructional activities for a diversity of learners and learning environments. The online coursework emphasizes active learning and provides opportunities for practical experience with relevant instructional principles, tools and technologies.

### **Required Courses - 12 credits**

Models of Learning and Instruction (fall)	EME 6051	3
Instructional Design (spring)	EME 6601	3
Distance Education in Theory and Practice (spring)	EME 6458	3
Self-Regulated Learning Systems (summer)	EME 6209	3

*All courses are offered online in the terms noted.*

## **K-12 ONLINE TEACHING** **GRADUATE CERTIFICATE**

*(Minimum of 15 credits required)*

The K-12 Online Teaching Certificate is designed to prepare K-12 educators to design, manage and

deliver meaningful online learning experiences for their students. The certificate provides students with the theoretical knowledge and practical skills needed to successfully teach in online K-12 learning environments while utilizing a variety of learning technologies. The coursework in this fully online program emphasizes active learning and provides the opportunities for practical experience with relevant instructional principles, tools and technologies. The K-12 Online Teaching Certificate complements the Master of Education in Instructional Technology degree.

## READING EDUCATION

### MASTER OF EDUCATION (M.ED.)

The M.Ed. in Reading Education leads to state certification as a reading teacher. This program is directed toward currently certified and/or experienced teachers who are pursuing an advanced degree and seeking reading certification.

#### Admission Requirements

To be admitted to the M.Ed. in Reading Program, students must complete the graduate application and provide the same documentation as for the first M.Ed. program described in this section.

---

### Required Reading Courses (18 credits)

Developmental Reading	RED 6351	3
Reading Diagnosis (prerequisite RED 6351)	RED 6546	3
Remedial Reading (prerequisite RED 6546)	RED 6351	3
Reading Practicum (prerequisite RED 6548)	RED 6836	3

---

*The following two courses have no prerequisite requirements and may be taken during any semester of the student's master's degree course of study.*

Teaching Reading in Secondary and Middle School	RED 6361	3
---	----------	---

Trends and Issues in Reading Education	RED 6656	3
--	----------	---

### Education Electives

Choose one for 3 credits

Design Components of Curriculum	EDG 6253 <b>or</b>	3
---------------------------------	--------------------	---

Measurement	EDF 6432* <b>or</b>	3
-------------	---------------------	---

Instructional Strategies and Assessment Practices	EDG 6345	3
---	----------	---

### Research Core - 6 credits

Educational Research	EDF 6481	3
----------------------	----------	---

Educational Statistics	STA 6113**	3
------------------------	------------	---

### Electives - 9 credits

Electives may be taken in the College of Education, College of Arts and Letters and/or College of Science.

**Note:** Linguistics and Reading, LIN 5745 (3 credits), is recommended but not required.

\* Required if course in measurement has not been taken previously.

\*\* May be taken prior to or concurrently with EDF 6481.

### Degree Requirements

To be eligible for graduation, students must complete all program courses and pass the Florida Teachers Certification Exam for Reading Education (K-12).

## **SECONDARY EDUCATION PLUS CERTIFICATION**

### **MASTER OF EDUCATION (M.ED.)**

**Art Certification Concentration**

**Biology Certification Concentration**

**Chemistry Certification Concentration**

**English/ESOL Certification Concentration**

**Mathematics Certification Concentration**

**Physics Certification Concentration**

**Social Science Certification Concentration**

The M.Ed. in Secondary Education plus Certification is designed for students who want to be excellent school teachers and who already have a bachelor's degree with credits in one of the following areas: art, biology, chemistry, English, mathematics, physics or social sciences. Upon completion of this program, which includes student teaching, the student is eligible for Florida professional certification in their specific area. An advisor is assigned to each student accepted into the program.

#### **Admission Requirements**

To be admitted to the M.Ed. in Secondary Education plus Certification Program, students must complete the graduate application and provide documentation showing that they:

1. Have a bachelor's degree from an accredited college or university;
2. Have an undergraduate cumulative GPA of 3.0;
3. Personal statement;
4. Résumé;
5. Two letters of recommendation that highlight the candidate's academic potential from a previous professor, employer or colleague (optional, at the discretion of each program).

#### **Progress and Degree Requirements**

1. The student must meet all College and University guidelines.
2. Completion of all required coursework and all required professional examinations prior to placement in final internship.
3. The student must maintain an overall grade point average of 3.0 or higher.
4. The student must complete a minimum of 36 credits (39 credits for English concentration/specialization).

This program is approved by the Florida Department of Education and the Council for the

Accreditation of Teacher Education (CAEP). This state and CAEP approval represents the transferability of the student's teaching credentials from state to state.

<b>Total</b>		<b>36-39</b>

## CURRICULUM AND INSTRUCTION SPECIALIST IN EDUCATION (ED.S.)

The Education Specialist Degree (Ed.S.) in Curriculum and Instruction is designed for students who wish to continue graduate studies beyond the master's (M.Ed.) degree but do not desire the Doctor of Philosophy degree (Ph.D.), which requires additional courses and a research dissertation. The Education Specialist Degree requires a minimum of 33 credits above the M.Ed. degree. The degree must be completed within seven years from the date a student is admitted to the Ed.S. degree program. A student can take no more than one-third of the total credits in this program as a non-degree student before being officially admitted to the program. The Ed.S. degree requires 33 credits.

### Admission Requirements

To be considered for admission to the Ed.S. in Curriculum and Instruction Program, students must complete the graduate application and provide documentation that they have:

1. A master's degree from a regionally accredited college or university;
2. A personal statement that describes the applicant's research interests such as their professional trajectory and the anticipated benefit of a specialist degree in Curriculum and Instruction.
3. An overall grade point average of at least 3.25 or better on all graduate work attempted;
4. Two signed letters of recommendation on professional letterhead that address applicant's academic skills and scholarly potential from professors and/or supervisors.

Additional admission requirements exist for International Students. Contact the FAU Office of International Students and Scholars and the Graduate College for these requirements.

Applications are not reviewed until all documents are received.

### Program of Studies

**33 credits**

### *Core Courses - 12 credits*

*Select at least one course from each of the three areas listed below.*

***Curriculum***

Instructional Policies and the Teaching Profession	EDF 7917	3

Seminar in Early Childhood Education	EEC 6932	3
Theories of TESOL and Bilingual Education	TSL 6642	3

***Social Contexts***

Race, Class and Gender in Education	EDF 6637	3
Foundations of Global Education	EDF 6800	3
Seminar in Early Childhood Education	EEC 6932	3

Language Policy and Planning in Education	TSL 6700	3
---	----------	---

---

***Research and Evaluation - 6 credits***

Action Research in Schools and Communities	EDF 6918	3
--	----------	---

Select one of the following three courses

Introduction to Qualitative Inquiry	EDA 6415	3
-------------------------------------	----------	---

Critical Foundations of Educational Inquiry	EDF 7578	3
---	----------	---

Advanced Statistics	STA 7114	3
---------------------	----------	---

---

***Areas of Concentration - 12 credits***

Select 12 credits from the College of Education or another college in the University with approval of an advisor. All courses must be at the 6000 or 7000 level.

---

***Capstone - 3 credits***

Praxis in Curriculum and Instruction	EDG 7918	3
--------------------------------------	----------	---

<b>Total</b>		<b>33</b>
--------------	--	-----------

***Areas of Concentration (12 credits at the 6000 level or above)***

The area of concentration is developed in consultation with the advisor. Areas of concentration may be organized around students' FDOE letter of eligibility or professional certification, a specific program area (e.g., Early Childhood Education) or a certificate (e.g., Multicultural Certificate). Additionally, an individualized interest (e.g., Media Literacy: Curriculum Design), may be developed in consultation with the advisor; however, these individualized areas of interest will not be listed on the plan of study or transcript as a unique area of concentration.

**Areas of Concentration**

Art (K-12)

Early Childhood Education

English/Language Arts (6-12)

ESOL Education (K-12)

Foreign Language (French and Spanish) (K-12)

Mathematics (6-12)

Multicultural Education (K-12)

Reading (K-12) (does not lead to certification as a reading teacher

Science Education (Biology, Chemistry and Physics) (6-12)

Social Science (6-12)

### ***Capstone Experience (EDG 7918, Praxis in Curriculum and Instruction, 3 credits)***

The Capstone Experience, implemented at the end of the Ed.S. program, draws on a community or school-based independent study field experience designed by the Ed.S. student and advisor. The capstone culminates in a manuscript to submit for publication or a poster/paper presentation at a conference.

## **CURRICULUM AND INSTRUCTION DOCTOR OF PHILOSOPHY (PH.D.)**

The Doctor of Philosophy (Ph.D.) in Curriculum and Instruction degree provides a theoretical and practical course of study in curriculum and instruction. The program is designed for teachers, curriculum coordinators, university academics and other professional educators. It enables students to develop a theoretical and conceptual framework for studying teaching and learning and also encourages professional educators to develop knowledge and practice in their own fields of specialization. The Ph.D. degree requires 66 credits.

The Ph.D. culminates in a dissertation focused on a particular question and area of investigation that interests the doctoral candidate and benefits the profession. Doctoral candidates have opportunities to participate with faculty on research, in teaching and in professional activities, including publishing and conference presentations. A student can take no more than 17 credits in this program as a non-degree student before being officially admitted; those credits are subject to approval by a program advisor. Doctoral candidates are admitted during fall semesters only. Applications are due February 1 for program initiation in the fall term.

### **Admission Requirements**

To be considered for admission to the doctoral program in Curriculum and Instruction, students must complete the graduate application and provide the following documentation of their preparation for doctoral-level work:

1. Send in official transcripts of all undergraduate and graduate coursework to the Graduate College at FAU indicating the courses taken and noting completion of a bachelor's and a master's degree from a

regionally/nationally accredited college or university.

2. Have a grade point average (GPA) of 3.00 or better in the last 60 semester hours of undergraduate work and a GPA of 3.25 or better in a completed master's degree program. Students may apply to the program with a GPA of less than 3.00 (undergraduate) or 3.25 (graduate) but they must address the score in their professional statement.
3. Provide two letters of recommendation from supervisors and/or professors. Preference is given to recommendation letters which speak to a candidate's (a) academic research ability, (b) potential for doctoral studies, (c) ability to write, and (d) preparation for rigor of doctoral program.
4. A professional statement describing career goals, research interests, reasons for wanting to enter the C&I program, and identifying potential faculty members in the department with whom the student would like to work. Students with lower than stipulated GPA scores or areas of weakness in their undergraduate and/or graduate transcripts must also address this information in their professional statement.
5. A curriculum vitae (CV) or resume.
6. Upon successful submission and referral of the application to the department, the department will invite applicants to engage in a pre-interview writing task to support their deliberation of the application. Selected applicants will then be invited to an interview with department faculty. Applicants will be asked to complete a 45- minute writing task after the interview.
7. Additional requirements for international students may apply. Please refer to the FAU Graduate College for more information email: [graduatecollege@fau.edu](mailto:graduatecollege@fau.edu)

## TEACHING ENGLISH TO SPEAKERS OF OTHER LANGUAGES (TESOL) ENDORSEMENT PROGRAM

### ESOL Certification for Foreign Language Majors

Students completing Foreign Language Certification may add ESOL Endorsement by completing the department's state-approved, five-course Add-On ESOL Endorsement.

The Department of Curriculum and Instruction offers a program leading to TESOL (Teaching English to Speakers of Other Languages) endorsement. Teachers must hold a valid teaching certificate in the State of Florida in order to qualify for the TESOL endorsement.

The following courses are required in the TESOL endorsement program:

#### **For elementary, English and foreign language teachers**

Multicultural Education	EDG 5705	3
-------------------------	----------	---

Applied Linguistics and TESOL	TSL 4251	3
Curriculum Development in TESOL and Bilingual Education	TSL 5142	3
Methods of TESOL and Bilingual Education	TSL 5345	3
Assessment Issues for English for ESOL and Bilingual Populations	TSL 5440	3
<b>For other secondary teachers (not English)</b>		
ESOL Strategies for Content Area Teachers	TSL 4324	3

## **TEACHER LEADERSHIP GRADUATE CERTIFICATE**

*(Minimum of 15 credits required)*

This innovative certificate program, offered by the departments of Curriculum and Instruction and Educational Leadership and Research Methodology, is designed for teacher leaders, leaders of teachers and aspiring leaders seeking collaboration, expertise and skill as coordinators, coaches, team leaders, department chairs, professional development facilitators and more. Teacher leaders explore tools and approaches to mentoring, assessment and data analysis to meet the needs of all students, while working with people from diverse backgrounds in school and district settings. Teacher leaders gain valuable practice regarding how to build and support culturally responsive classrooms and schools and develop plans for ongoing authentic peer coaching and in-classroom support in their schools. Courses are designed to address specific national standards for teacher leadership.

This program is offered entirely online. The five courses are offered in a rotation during the fall, spring and summer semesters and can be completed in one year or three semesters. Of the five courses, three are from the Department of Educational Leadership and Research Methodology (EDLRM) and two are from the Department of Curriculum and Instruction (CAI).

### **Required Courses (15 credits)**

Leading Adult and Professional Learning in Schools (EDLRM)	ADE 6268	3
--	----------	---

Clinical Evaluation (EDLRM)	EDA 6507	3
Evaluation and Leadership Theory for Educational Leaders (EDLRM)	EDA 6508	3

Documentation and Assessment in Curriculum and Instruction (CAI)	EDG 6628	3

## EDUCATIONAL LEADERSHIP AND RESEARCH METHODOLOGY

### Faculty:

Shockley, R. E., Chair; Barakat, M.; Bogotch, I.; Bloom, J.; Bryan, V.; DeDonno, M.; Dennett, S.; Floyd, D.; Hardman, J.; Krzemienski, J.; Lieberman, M.; Maslin-Ostrowski, P.; Mays, T.; Morris, J. D.; Mountford, M. L.; Reyes-Guerra, D.; Salinas, C.; Shepherd, D.; Vasquez, M.; Warshaw, J.; Watlington, E.

Educational Leadership and Research Methodology offers three degree programs: the Master of Education, the Specialist in Education and the Doctor of Philosophy. Also offered are an [undergraduate minor in Leadership Studies](#) and a [graduate certificate in Teacher Leadership](#).

### Vision

We strive for a transparent, caring and ethical environment that cultivates educational leadership pioneers who through integrity, social justice and knowledge, shape a better world that promotes human dignity.

### Mission

The Department of Educational Leadership and Research Methodology at Florida Atlantic University is a community of scholars engaged in programs: Adult and Community Education, Higher Education Leadership, School Leaders, and Research Methodology. We focus on the preparation and support of practitioners, leaders and researchers in Florida, the nation and the international community through courses, undergraduate and graduate programs, professional learning and community service.

### Values

With values, we strive to align words and actions.

Integrity - We strive to act with honesty, transparency and respect.

Learning Community - We strive to be an evolving community of learners grounded in collegiality, collaboration and mentorship.

Social Justice, Diversity, Equity and Inclusion - We strive to promote a society where individuals and cultures are valued, where all have equitable opportunities and where all inhabit an inclusive environment that is safe physically, emotionally and socially.

Innovative Action - We strive, at both an individual and systemic level, to engage continuously in discovery, reflection and the creation and application of knowledge.

Excellence - We strive for quality in everything we do individually and collectively.

### **Program Concentrations**

***Adult and Community Educational Leaders*** —prepares individuals for leadership positions in educational programs for adults in a wide variety of settings: business and industry, health and social service agencies and public and private schools. The program of study is organized around four domains: professional attitudes; historical, social and philosophical context; adult learning and development; and organization and administration of adult programs. Additional areas of study are offered in adult education, college teaching, community education, human resource development and technology.

***Higher Education Leaders*** —prepares individuals in leadership positions in community colleges, state colleges, agencies, public and private organizations and all facets of post-secondary education. The program is appropriate for those aspiring to or currently holding leadership positions in public and private institutions of higher education. Areas of study are community college and state college leaders, student affairs leadership, instructional leadership and foundations of higher education. The program of study is organized around three domains: historical, philosophical and social context; institutional mission; and management.

***School Leaders (K-12)*** —prepares public and private elementary, middle school, secondary, community school and district-level administrators to meet the challenges of today's schools. The program of study is organized around three domains: teaching and learning, management and schools

in context. It encompasses all facets of educational leadership including management, law and school and instructional improvement. The requirements for Florida Level I Certification in Educational Leadership can be met through the master's degree program or the Florida Principal Certification Program.

### **Admission Requirements**

The following items should be submitted to the Graduate College for consideration for admission to a program in the Department of Educational Leadership and Research Methodology:

1. FAU graduate application;
2. Official transcripts from all institutions.

Submit the following information to the Department of Educational Leadership and Research Methodology:

1. An essay that identifies your career goals and how the program you are planning to pursue will enable you to meet these goals;
2. A professional résumé;
3. Letters of professional reference: Two for the master's and specialist's programs and three for the doctoral program;
4. A sponsor commitment form from a school principal who is willing to sponsor the student for three semesters of internship (only for School Leaders K-12 students pursuing certification).

## **LEADERSHIP STUDIES UNDERGRADUATE MINOR**

*(Minimum of 16 credits required)*

The minor in Leadership Studies enables students to complement any major with a focus in leadership obtained through foundational courses in the Higher Education Leadership Program and interdisciplinary courses. The minor is available to all FAU degree-seeking undergraduate students.

Offered through the Higher Education Leadership Program and the Leadership Education and Development (LEAD) Office within Student Affairs, the minor includes 16 credits. In consultation with an advisor, students map out a program of study that includes 7 credits of core coursework and 9 credits of electives. The minor is awarded upon successful completion of the coursework and completion of the bachelor's degree.

For more information about this minor, click [here](#).

## EDUCATIONAL LEADERSHIP MASTER OF EDUCATION (M.ED.)

### Adult and Community Educational Leaders Concentration

### Higher Education Leaders Concentration

### School Leaders (K-12) Concentration

### Admission Requirements

1. Bachelor's degree from a regionally accredited college or university;
2. Achieve a minimum undergraduate GPA of 2.5 in upper-division courses.

### Adult and Community Educational Leaders Concentration

The Adult and Community Leadership concentration focuses on sustainability and is available in person or fully online. The program is designed to provide learning, training and practical experience that foster personal development and action for change in the human and natural worlds. Students learn skills that leaders need to work in fields such as education, nonprofit agencies, corporations and community government.

<b>Degree Requirements</b>	<b>36 credits</b>

### **School Leaders (K-12) Concentration**

The K-12 School Leaders concentration prepares educators aspiring to be teacher leaders and assistant principals and meet the challenges of today's public and private educational institutions. This concentration is available in person or fully online. Developed in cooperation with Florida public school districts, the program of study is built on the four major domains that the ELRM requires for leadership learning: leadership foundations, research foundations, professional knowledge and experiential learning. To fulfill the requirements of the master's degree program, students take

coursework aligned to the knowledge, skills and dispositions needed to be a school leader; program-provided seminars; and task-specific internship courses with curricula built to practice assistant principal-level activities in school-based clinical experiences.

Admission requirements for this program include three years of successful teaching experience and a sponsor commitment form from a school principal who is willing to sponsor and coach the student for three semesters of internship.

In addition to the coursework found in the table below, students are required to attend weekly non-credit learning seminars in the first and last semesters of the program, as well as complete non-credit online modules centered on school law.

Completion of this program, which includes passing the Florida Educational Leadership Exam (FELE), leads to Florida Educational Leadership Certification (Level I), which qualifies an individual to serve as a public school assistant principal or principal in the State of Florida (depending on individual district requirements). In addition to engaging students in world-class learning, the program incorporates FELE competencies and Skills. The program is also aligned with the Professional Standards for Educational Leaders (PSELS) and National Educational Leadership Preparation (NELP) Program Standards - Building Level, which align with the Council for the Accreditation of Educator Preparation (CAEP) accreditation and program review. Students who complete this program are prepared to sit for the FELE examination and must pass the exam in order to graduate. Florida ESOL requirements must also be satisfied prior to graduation.

## **FLORIDA CERTIFICATION IN ADMINISTRATION OF ADULT EDUCATION PROGRAM**

The department offers all of the requirements for obtaining Florida Certification in Administration of Adult Education through any of the four plans approved by the state (Administrative Rule 6A-4.008).

### **Degree Requirements**

**Plan One** - 36-39 credits. Master's degree or higher in administration of adult education. See department listing for requirements.

### ***Plans Two and Four - 6 credits (add-on to master's or professional certificate in K-12 administration)***

Organization and Administration of Adult and Community Education	ADE 6265	3
Principles of adult education or adult		3

education curriculum, supervision or  
methods and materials

---

***Plan Three - 18 credits (add-on to any master's degree)***

---

School Administration		6
Organization and Administration of Adult and Community Education	ADE 6265	3
Basic school supervision or supervision of adult education		3
Curriculum		3
Program and Curriculum Development for Adults	ADE 6184	3

### **Florida Principal Certification Program**

The K-12 School Leadership Certification Program prepares educational leaders to meet the challenges of today's public and private educational institutions. The professional knowledge base for the K-12 School Leadership certification program is organized around three domains: leadership foundations, professional knowledge and the experiential component.

Admission requirements for this program include three years of successful teaching experience and a sponsor commitment form from a school principal who is willing to sponsor and coach the student for three semesters of internship. In addition to the coursework found in the table below, students are required to attend weekly non-credit learning seminars in the first and last semesters of the program, as well as complete non-credit online modules centered on school law.

Completion of this program includes passing the Florida Educational Leadership Exam (FELE) and leads to Florida Educational Leadership Certification (Level 1), which qualifies an individual to serve as a public school assistant principal or principal in the state of Florida (depending on individual district requirements). In addition to engaging students in world-class learning, the program incorporates FELE Competencies and Skills. The program is also aligned with the Professional Standards for Educational Leaders (PSEL) and the National Educational Leadership Preparation (NELP) Program Standards – Building Level, which align with the Council for the Accreditation of Educator Preparation (CAEP) accreditation and program review. Students who complete this program are prepared to sit for the FELE examination and must pass the exam in order to complete. Florida ESOL requirements must also be satisfied prior to completion.

## **EDUCATIONAL LEADERSHIP SPECIALIST IN EDUCATION (ED.S.)**

**Adult and Community Educational Leaders Concentration**  
**School Leaders (K-12) Concentration (with Certification)**  
**School Leaders (K-12) Advanced Concentration (no Certification)**

The specialist's degree is designed for individuals who want to further specialize in educational leadership beyond the master's degree. The master's level leadership core courses are prerequisites to

completion of the specialist's degree.

## Admission Requirements

1. Master's degree from an accredited college or university;
2. Meet the following admission criterion: Achieve a minimum GPA of 3.0 in a master's program.
3. A sponsor commitment form from a school principal who is willing to sponsor the student for three semesters of internship (only for School Leaders K-12 students pursuing certification);
4. Résumé;
5. Statement of personal goals;
6. Two letters of recommendation.

## Adult and Community Educational Leaders Concentration

The Adult/Community Educational Specialist concentration serves individuals preparing for leadership positions in education programs for adults in a wide variety of settings: universities and community/state colleges, business and industry, health and social service agencies and public and private schools. The foundational knowledge base includes the basic tenets and principles of leadership. Leaders must develop well-rounded leadership skills, a capacity to envision the future and be able to find opportunities within and outside of their organization for the benefit of those they lead. The professional knowledge base includes the technical knowledge, specialized skills and ethical standards used to function in the professional adult education workplace.

The program is designed for individuals who want to further specialize in adult and community education beyond a master's degree. The four major domains of this program of study include: professional attitudes; historical, philosophical and social context; adult learning and development; and organization and administration of adult programs. Completion of this program meets the requirements for State of Florida certification in adult education (not K-12) administration for those meeting the other requirements: three years of teaching and a professional certificate (State of FL Administrative Rule 6A-4.008).

### **School Leaders (K-12) Concentration (with certification)**

The K-12 School Leadership Specialist with Certification concentration is for educators aspiring to be teacher leaders and assistant principals and meet the challenges of today's public and private educational institutions. The program is designed for individuals who want to further specialize in education and school leadership beyond a master's degree and who do not have an M.Ed. in School Leadership. Developed in cooperation with Florida public school districts, the program of study is built on the four major domains that the ELRM requires for leadership learning: leadership foundations, research foundations, professional knowledge and experiential learning. To fulfill the requirements of the specialist degree program, students take coursework aligned to the knowledge, skills and

dispositions needed to be a school leader; program-provided seminars; and task-specific internship courses with curricula built to practice assistant principal-level activities in school-based clinical experiences.

Admission requirements for this program include three years of successful teaching experience and a sponsor commitment form from a school principal who is willing to sponsor and coach the student for three semesters of internship.

In addition to the coursework found in the table below, students are required to attend weekly non-credit learning seminars in the first and last semesters of the program, as well as complete non-credit online modules centered on school law.

Completion of this program, which includes passing the Florida Educational Leadership Exam (FELE), leads to Florida Educational Leadership Certification (Level I). This qualifies an individual to serve as a public school assistant principal or principal in the State of Florida (depending on individual district requirements). In addition to engaging students in world-class learning, the program incorporates FELE Competencies and Skills. The program is also aligned with the Professional Standards for Educational Leaders (PSELS) and National Educational Leadership Preparation (NELP) Program Standards - Building Level, which align with the Council for the Accreditation of Educator Preparation (CAEP) accreditation and program review. Students who complete this program are prepared to sit for the FELE examination and must pass the exam in order to graduate. Florida ESOL requirements must also be satisfied prior to graduation.

### **School Leaders (K-12) Advanced Concentration (no certification)**

The K-12 School Leadership Specialist Advanced program prepares school leaders to meet the leadership challenges of today's public and private educational institutions. The program is designed for those who want to further specialize in education and school leadership beyond a master's degree. It is built on the four major domains that the ELRM requires for learning: leadership foundations, research foundations, professional knowledge and experiential learning.

The leadership foundational knowledge base includes the basic tenets and principles of leadership. Leaders must develop leadership skills, a capacity to envision the future and be able to find opportunities within and outside of their organization for the benefit of those they lead. The Specialist Advanced program is centered on a school leadership professional knowledge base including technical knowledge, specialized skills and ethical standards. It includes advanced research methodology courses in both quantitative and qualitative methods so that these leaders can engage in and understand

research. It also includes experiential learning courses that bring theory to practice in real settings. It is designed for those who practice and intend to continuously engage in research, scholarship and leadership.

Unlike the School Leaders Specialist program with certification, this program does not contain the set of coursework leading to Florida Educational Leadership Level I certification. The Specialist Advanced program is seen as a terminal degree with a unique set of required courses. Students must pass a Comprehensive Exam for program completion that consists of a formal testing experience. All formal writing is to be completed in APA format, latest edition.

## **EDUCATIONAL LEADERSHIP DOCTOR OF PHILOSOPHY (PH.D.)**

### **Adult and Community Educational Leaders Concentration Higher Education Leaders Concentration School Leaders (K-12) Concentration**

The doctoral degree is designed for individuals who seek the highest credential their discipline offers for personal and/or career growth. The degree is seen as a terminal degree with a unique set of required courses and experiences. Doctoral programs are designed to provide a broad set of experiences that allow leaders to bring many different perspectives to bear on the organizational problems and opportunities that confront them in practice. The program assumes that educational leaders will be more effective when they are able to: 1) apply information and concepts into practice; 2) see the organization as a whole and understand how various parts of the organization relate to and affect each other; 3) discern meaning in, and establish relationships between, events and fragments of information that appear to be discrete and unrelated; and 4) learn through a community of practitioners model in which participants engage real problems and opportunities in a collegial learning team approach. Doctoral students must meet the leadership core prerequisites.

### **Admission Requirements**

Admission to the doctoral program is competitive. Enrollment is limited and the number of candidates

accepted is determined annually. Applicants who meet the following minimum criteria will be placed into a candidate selection pool:

1. Master's degree from an accredited college or university; and
2. Achieve a minimum GPA of 3.0 in a master's program from an accredited college or university.

### **Selection Process**

The department's doctoral admissions committee will review all evidence of high promise found in the applicant's admissions documents, including but not limited to: grade trends, work experience, accomplishments and promotions, letters of reference and attainment in rigorous courses. Following the document review, selected applicants will be interviewed by the doctoral admissions committee and provide a writing sample. The committee will then recommend candidates for acceptance and notify them of the decisions.

All required admissions documents must be submitted by March 1 for fall admittance. The applicant pool will be reviewed in May of each year. Depending on enrollment, the department may open the doctoral program for admittance at other times during the year. Students should consult the department for additional admission dates.

### **Acceptance to Candidacy**

Admission to the doctoral program does not constitute admission to candidacy for the degree. In order to be admitted to candidacy for the doctoral degree by the department, the student must:

1. Have an approved Program of Study on file with the Graduate College;
2. Pass the qualifying examinations and be recommended for candidacy by the faculty;
3. Have dissertation prospectus/concept paper approved by program faculty;
4. Have a chair and doctoral committee formed; and
5. Complete the required research, leadership and knowledge courses necessary to advance to the dissertation phase.

### **Adult and Community Educational Leaders Concentration**

The Adult/Community Educational Leadership concentration serves individuals preparing for leadership positions in education programs for adults in a wide variety of settings: universities and community/state colleges, business and industry, health and social service agencies and public and private schools.

The program assumes that educational leaders will be more effective when they are able to 1) apply

information and concepts to practice, 2) see the organization as a whole and understand how various parts of the organization relate to and affect each other, 3) discern meaning in, and establish relationships between, events and bits of information that appear to be discrete and unrelated, and 4) learn through a community of practitioners model where participants engage real problems and opportunities in a collegial learning team approach.

The program is designed for individuals who want to further specialize in education and school leadership beyond a master's or specialist degree. Completion of this program of study meets the requirements for State of Florida certification in adult education (not K-12) administration for those meeting the other requirements: three years of teaching and a professional certificate (State of FL Administrative Rule 6A-4.008).

### **School Leaders (K-12) Concentration**

The K-12 School Leadership concentration prepares aspiring school leaders to meet the challenges of today's public and private educational institutions. The program assumes that educational leaders will be more effective when they are able to 1) apply information and concepts to practice, 2) see the organization as a whole and understand how various parts of the organization relate to and affect each

other, 3) discern meaning in, and establish relationships between, events and fragments of information that appear to be discrete and unrelated, and 4) learn through a community of practitioners model where participants engage real problems and opportunities in a collegial learning team approach.

The program is designed for individuals who want to further specialize in education and school leadership beyond a master's or specialist degree. Students successfully completing this program of study will have mastered the subject matter needed for the profession and understand the need to engage in lifelong learning to maintain effectiveness in a changing environment. In cooperation with Florida public school districts, the program of study includes leadership theory, research, professional knowledge and school-based clinical experiences. Doctoral students must meet the leadership core prerequisites and engage in courses specifically designed for the doctoral level.

## SPECIAL EDUCATION

### Faculty:

Peluso, P., Interim Chair; Darling, S.; Dukes, C.; Finnegan, L.; Forgan, J. W.; Miller, K.; Ramasamy, R.; Scott, J.

### Mission Statement

The mission of the Department of Special Education is to provide leadership in our local, state, national and international communities in the areas of teaching, research and service. Faculty and department efforts promote research-based practices that reflect changing societal needs of people with disabilities, their families and the professionals and organizations who work with them. This is accomplished by bringing faculty, students and members of our various communities together to improve the quality of education for all members of an increasingly diverse, technological, inclusive and global society.

The department offers baccalaureate and master's degrees in this discipline, several teaching specializations and endorsements and the Doctor of Philosophy degree. Students enrolled in the bachelor's program in Exceptional Student Education may apply for the [Honoring Outstanding Owl Teachers \(HOOT\) Honors Program](#). The department also offers a [Bachelor of Early Care and Education](#) with the Department of Curriculum and Instruction. Program requirements support the CAEP conceptual framework of producing professionals who are informed, ethical and capable in their roles as teachers and reflective decision-makers. In addition the department offers certificate programs for students with intellectual and developmental disabilities through the [Academy for Community Inclusion](#).

### Security Clearance

Students registering for courses requiring field experience **MUST** go through a security clearance process. This process requires students to be fingerprinted and, depending on the school district, to participate in a drug screening to be approved for security clearance. A processing fee payable to the appropriate school district is required. It is strongly recommended that students complete this process once they are admitted to the University.

For detailed information visit the College of Education Student Services [website](#). Information will also be provided in courses with field placement requirements.

## **EXCEPTIONAL STUDENT EDUCATION (ESOL ENDORSEMENT AVAILABLE)**

### **BACHELOR OF ARTS (B.A.)**

### **BACHELOR OF ARTS IN EDUCATION (B.A.E.)**

The undergraduate program in Exceptional Student Education prepares students to teach individuals with mild learning and behavioral disabilities as well as individuals with moderate to severe disabilities.

#### **Admission Requirements**

All students seeking admission to the undergraduate program in Exceptional Student Education must first meet the University's general upper-division admission requirements. In addition, each applicant must:

1. Have a minimum GPA of 2.5 on a 4.0 scale on the general education component of undergraduate studies OR have completed requirements for a baccalaureate degree with a minimum GPA of 2.5 from any college or university accredited by a regional accrediting institution;
2. Present passing scores on all sections of the General Knowledge Test;
3. Have a recommendation for admission to the program by the Department of Special Education.

#### **Prerequisite Coursework for Transfer Students**

Students transferring to Florida Atlantic University must complete both lower-division requirements (including the requirements of the Intellectual Foundations Program) and requirements for the college and major. Lower-division requirements may be completed through the A.A. degree from any Florida public college, university or community college or through equivalent coursework at another regionally

accredited institution. Before transferring and to ensure timely progress toward the baccalaureate degree, students must also complete the prerequisite courses for their major as outlined in the [Transition Guides](#).

All courses not approved by the Florida Statewide Course Numbering System that will be used to satisfy requirements will be evaluated individually on the basis of content and will require a catalog course description and a copy of the syllabus for assessment.

### **Program of Studies**

All ESE courses are offered in a prescribed sequence with specific prerequisites. Students should be programmed as soon as possible to receive appropriate advising. **Students must be admitted and programmed prior to the spring semester of their junior year.**

**Note:** EDF 2005, Introduction to the Teaching Profession; EDF 2085, Introduction to Diversity for Educators; and EME 2040, Introduction to Technology for Educators, or community or state college equivalents, are program requirements.

\* Students must be officially programmed by an ESE faculty member prior to taking these courses in the ESE sequence.

+ *Requirements for admission to EEX 4842:*

1. Applications are distributed during the spring semester before Practicum 1.
2. Students must have an overall GPA of at least 2.5 to be placed in any field-based experience.
3. Students must be enrolled in EEX 4601 and EEX 4472.

++ *Requirements for admission to EEX 4843:*

1. Applications are distributed during EEX 4601, Behavior Change Strategies, the summer before practicum.
2. Students must have an overall GPA of at least 2.5 to be placed in any field-based experience.
3. Students must be enrolled in EEX 4066 and EEX 4604.

*In addition to coursework, students in the undergraduate ESE program also:*

1. Demonstrate competence in standards established by the Council for Exceptional Children;
2. Demonstrate competence in Florida Educator Accomplished Practices and the corresponding College of Education Behavioral Indicators;
3. Demonstrate competence in the Florida ESOL standards;
4. Pass the FTCE professional and subject-area tests prior to completing student teaching and graduation.

## **HONORING OUTSTANDING OWL TEACHERS (HOOT) HONORS PROGRAM**

The Department of Special Education offers the *HOOT Honors* Program for students enrolled in the bachelor's degree in ESE. HOOT provides undergraduate students of high ability and commitment the opportunity to explore the broad social contexts of their future profession and culminates in an honors designation on the students' transcripts. Undergraduates who participate in the HOOT program:

1. Obtain scholarly and practical experiences that expand traditional special education teaching roles;
2. Gain enhanced opportunities to learn outside of coursework;
3. Form mentoring relationships with experienced faculty and future educators; and
4. Expand their experience providing interventions to children, adolescents and adults with disabilities.

### **Admissions Requirements**

Admission to HOOT requires that students:

1. Enter no later than spring of the junior year;
2. Are fully admitted and programmed in the ESE program;
3. Maintain a 3.7 cumulative GPA; and
4. Submit an application form, personal statement, academic writing sample, completed/signed ESE program sheet and a letter of recommendation from their ESE faculty advisor.

## Program Requirements

Students in the program will:

1. Participate in at least one *Honors Enrichment Option* per semester for at least three semesters;
2. Enroll in 1-2 credits of the senior Honors Seminar in ESE; and
3. Complete an *Honors Compact* during their student-teaching semester.

For more information or to obtain an application, please contact program coordinator Dr. Sharon M. Darling, [sdarlin4@fau.edu](mailto:sdarlin4@fau.edu), or visit the [website](#) .

## EARLY CARE AND EDUCATION

### BACHELOR OF EARLY CARE AND EDUCATION (B.E.C.E.)

The Bachelor of Early Care and Education (B.E.C.E.) is a joint program offered by the Department of Curriculum and Instruction and the Department of Special Education. The B.E.C.E. is designed to prepare teachers and related personnel for employment in the fields of child care and children's services for young children from birth to age five. The program is offered at the Boca Raton campus.

### Admissions Requirements

Students enrolling in the B.E.C.E. may exhibit a range of prior levels of preparation. Generally, all students are required to have completed 60 credits of lower-division coursework. This could include the A.A. or A.S. degree in Early Childhood Education determined by articulation agreements with community or state colleges.

All students seeking admission to the B.E.C.E. must meet the University's admission requirements. In addition, each applicant must:

1. Have a minimum GPA of 2.5 on a 4.0 scale on lower-division undergraduate coursework for a total of 60 credits;
2. Be programmed for admission to the B.E.C.E. by a faculty advisor from the Department of Special Education or the Department of Curriculum and Instruction.

### Prerequisite Coursework for Transfer Students

Students transferring to Florida Atlantic University must complete both lower-division requirements (including the requirements of the Intellectual Foundations Program) and requirements for the college and major. Lower-division requirements may be completed through the A.A. degree from any Florida public college, university or community college or through equivalent coursework at another regionally

accredited institution. Before transferring and to ensure timely progress toward the baccalaureate degree, students must also complete the prerequisite courses for their major as outlined in the *Transition Guides*.

All courses not approved by the Florida Statewide Course Numbering System that will be used to satisfy requirements will be evaluated individually on the basis of content and will require a catalog course description and a copy of the syllabus for assessment.

### **Course Requirements**

As a joint program of two FAU departments, the B.E.C.E. is made up of coursework, field experiences and advisement from both departments. In addition, a careful review of student transcripts will guide advising decisions.

All students are required to take seven Early Childhood core courses (21 credits) and two Reading Courses (6 credits). All students must complete General Education requirements (36 credits), either from an associate's degree program or as non-restricted elective courses in the B.E.C.E. General Education courses include six credits in each of the following areas: Math, English Composition, Science, Social Studies, Humanities and General Education (electives). Gordon Rule/WAC courses, Math and English composition, are included in the General Education Requirements. If foreign language courses have not been completed previously, they must be taken as part of the non-restricted electives.

Additionally, students enrolled in the B.E.C.E. will complete 18-21 or more credits of upper-division elective courses in education and related disciplines, which will be determined in consultation with an advisor. A list of recommended electives will be provided for all advisors and students.

### **Sequence of Course Requirements**

Required Early Childhood core courses are offered in a prescribed sequence with specific prerequisites beginning in each fall semester. The sequence of courses requires a minimum of four semesters, including a minimum of one summer term, to complete. Students should be programmed as soon as possible to receive appropriate advising.

A summary of the 120-credit program follows:

### **Transfer Credits – 60 credits**

Determined through Articulation Agreements with community or state colleges. Early Childhood and General Education Courses can transfer as a 60-credit block for students having completed A.A. or

A.S. degrees in Early Childhood. Students transferring the A.S. degree may need additional coursework to satisfy the FAU lower-division General Education core.

---

### **FAU Early Childhood Core Courses – 21 credits**

Typical/Atypical Child Development, Birth – Age 8	EEX 3201	3
Assessment of All Young Children	EEX 3226	3
Designing and Implementing a Blended Curriculum: Birth to Age Eight	EEC 3214	3
Language Development and Intervention in Young Children	EEX 4112	3
Building Family, Community and School Partnerships	EEX 3754	2
Positive Behavior Supports in Inclusive Early Childhood Settings	EEX 3606	3
Blended Early Childhood Methods: Birth – 5	EEC 4313	4

---

### **FAU Reading and COE Courses – 12 credits**

Language Arts and Literature, Birth – Grade 8	LAE 4353	3
Reading Development I: Birth – Grade 3	RED 4308	3
Educational Measurement and Evaluation	EDF 3430	3
Introduction to Theories and Practices of TESOL	TSL 4080	3

---

### **B.E.C.E. Open Electives - 15 credits**

These courses should be selected in consultation with B.E.C.E. advisor.

---

### **B.E.C.E. Program Electives - 12 credits**

These courses should be selected in consultation with B.E.C.E. advisor.

### **Graduation Requirements**

B.E.C.E. graduation requirements are consistent with FAU and College of Education standards. Each candidate for graduation must:

1. Earn a minimum of 120 credits in academic courses acceptable toward the degree;
2. Earn a minimum of 45 of these credits at the upper division;
3. Earn the last 30 upper-division credits in residence at FAU;
4. Earn at least 75 percent of all upper-division credits from FAU in the departments of Curriculum and Instruction and/or Special Education, or other departments in the College of Education;
5. Satisfy Gordon Rule/Writing Across Curriculum requirements;
6. Fulfill all admissions, program and course requirements;
7. Earn a "C" or better in all Education courses and a "C-" or better in all other non-Education courses, maintaining a 2.5 GPA upon graduation;
8. Fulfill the FAU foreign language requirement;
9. Submit a completed Application for Graduation form.

### **Accreditation Standards for the B.E.C.E.**

The B.E.C.E. represents the highest professional standards promulgated by the National Association for the Education of Young Children and the Council for Exceptional Children Division of Early Childhood. All course syllabi include standards delineated by the Florida Department of Education's Educator Accomplished Practices and the FAU College of Education's corresponding Behavioral Indicators. Students must demonstrate competence on all critical assignments embedded in Early Childhood Core Courses and Reading Courses.

## **ACADEMY FOR COMMUNITY INCLUSION**

The FAU Academy for Community Inclusion is a college program for high school graduates who have been diagnosed with intellectual and developmental disabilities. The program allows students to earn certificates in Supported Employment, Supported Community Access and Supported Community Living. These certificates are offered in an inclusive college environment on the FAU Jupiter campus. The program allows students to participate in college activities, clubs and organizations that are available to all FAU students.

### **Admission Requirements**

Eligible students are high school graduates who have earned a standard diploma or a special diploma.

### **Certificate Requirements**

Each certificate program—Supported Employment, Supported Community Access and Supported Community Living — requires 20 credits of coursework including unique Academy courses, regular University courses and approved electives. All students, regardless of their certificate, take the three

prerequisite courses listed below in addition to the 20 credits. Specific certificate requirements follow the prerequisites:

---

### **Prerequisite Courses for the Three Certificates**

Increasing Personal Effectiveness	SLS 1200	2
Career Exploration	SLS 1304	2
Learning with Technology 1	SLS 1570	2

---

### **Supported Employment Certificate (20 credits)**

Getting Around the Community	SLS 1266	2
Professional Career Development	SLS 1305	2
Business Technology for Community Living	SLS 1392	2
Employability Skills	SLS 1350	2
Workplace Relationships	SLS 1354	2
Professional Portfolio	SLS 2340	2
Career Seminar	SLS 2930	2
Career Internship	SLS 2943	2
Electives <i>(Two classes, one must be outside the Academy. Choose electives from list below.)</i>		4

---

### **Supported Community Access Certificate (20 credits)**

Community Citizenship	ISS 1121	2
Personal Development	SLS 1201	2
Recreation and Leisure Skills	SLS 1224	2
Social Skills	SLS 1251	2
Diverse Communities	SLS 1281	2

---

Be Safe, Stay Safe	SLS 1601	2
Community Resources	SLS 1603	2
Life Planning	SLS 2225	2
Electives <i>(Two classes, one must be outside the Academy. Choose electives from list below.)</i>		4
<b>Supported Community Living Certificate (20 credits)</b>		
First Aid and CPR	HSC 2400	2
Reading for Life	REA 1105	2
Residential Experience	SLS 1250	2
Learning with Technology 2	SLS 1571	2
Living with Roommates	SLS 1602	2
Personal Finance for Community Living	SLS 1605	2
Personal Well-Being	SLS 2222	2
Effective Living	SLS 2604	2
Electives <i>(Two classes, one must be outside the Academy. Choose electives from list below.)</i>		4
<b>Electives</b>		
Emergency Preparation	FFP 1801	2
College Experience	SLS 1102	2
World of Work	SLS 1321	2

Service Learning	SLS 1940	2
Emotional and Behavioral Control	SLS 2202	2
Self-Monitoring of Performance and Attention	SLS 2212	2

## **SPECIAL EDUCATION**

### **MASTER OF EDUCATION (M.ED.)**

This fully online master's program, totaling 36-39-credits, provides students with the knowledge and skills for working with students with disabilities. Full-time students may complete this degree program within 16-24 months. The intensive, fast-track special education coursework is designed to allow teachers, administrators or related field personnel to concentrate their program in Applied Behavior Analysis (ABA), Autism Spectrum Disorders (ASD), Early Childhood Special Education (ECSE), or as a Special Education Intervention Specialist (SEIS). Students have the option of seeking teacher certification/endorsement in: ASD, ESE K-12, Pre-K Disabilities; Early Intervention Infant Toddler Developmental Specialist training (ITDS); or preparation for the Board-Certified Behavior Analyst (BCBA) exam.

#### **Admission Requirements**

1. The student must meet College and University requirements.
2. An undergraduate Grade Point Average (GPA) of at least 3.0 or one letter of recommendation from an employer in an education-related field or current/former university instructor.
3. Personal statement not exceeding three double-spaced pages, indicating applicant's reasons for pursuing a master's degree and career goals.

#### **Degree Requirements**

1. The student must meet College and University requirements.
2. The student must earn grades of "B" or higher in all Special Education courses in the program and will be required to repeat any course in which a grade of less than "B" is earned. (A course can be repeated only once.)
3. The student must complete a minimum of 36 credits in the program.

---

### **M.Ed. in Special Education with concentration in Applied Behavior Analysis (ABA) - 36-39 credits**

## SPECIAL EDUCATION

### DOCTOR OF PHILOSOPHY (PH.D.)

#### Admission Requirements

1. The student must have a master's degree from an approved college or university.
2. The student must have a grade point average and Graduate Record Examination scores as follows:
  - a. An average of 3.5 or higher in all graduate work taken;
  - b. Minimum GRE scores of 148 (verbal), 144 (quantitative) and 3 (analytical writing).
3. The student must have completed at least three years of full-time experience working with individuals with disabilities.
4. Each applicant for admission to the Doctor of Philosophy (Ph.D.) degree in Special Education must be approved for admission by the department. This recommendation will in part be based

upon an interview and a writing sample.

### **Admission to Candidacy**

Admission to the doctoral program does not constitute admission to candidacy for the degree.

Admission to candidacy for the doctoral degree has the following requirements:

1. The student must have selected a dissertation chair and doctoral dissertation committee.
2. The student must have had a formal program of studies prepared in cooperation with the principle professor (advisor) and maintained continuous annual enrollment.
3. The student must have completed all doctoral program coursework (excluding dissertation), internship and residency requirements.
4. The student must have passed the doctoral comprehensive examination. This examination will be given at or near completion of the coursework in the student's program.
5. The student must have completed **d** Form 8-Admission to Candidacy for the Doctoral Degree with the Graduate College.

### **Degree Requirements**

The minimum requirements for the degree are:

1. The student must have completed the following course requirements:
  - a. Area I Special Education Core (12 credits);
  - b. Area II Specialization (12 credits);
  - c. Area III Statistics and Research (18-21 credits);
  - d. Area IV Doctoral Seminar in Special Education (taken three times) (2-credit seminar taken three times, 6 credits total);
  - e. Area V Internship and Residency (6 credits); and
  - f. Area VI Dissertation (12 credits minium).
2. The student must have successfully completed the department's annual evaluation process each spring while in the program;
  - a. The student must have a successful defense of the dissertation;
  - b. The student must complete 72 credits beyond the bachelor's degree. This includes the **66-72**-credit minimum to satisfy doctoral degree requirements.
  - c. The student must be recommended by the faculty of the department and the College for the degree.

---

### **Degree Requirements - minimum of 69 credits**

---

***Area I Special Education Core Courses - 12 credits***

Contemporary Trends in Special Education	EEX 7025	3
Historical, Theoretical and Legal Foundations of Special Education	EEX 7026	3
Grant Writing	EEX 7526	3
Teaching and Learning for Individuals with Disabilities	EEX 7866	3

***Area II Specializations - 12 credits***

- -

*Students choose 12 credits at the 5000, 6000 or 7000 level, 9 of which must be within the Department of Special Education to create an area of specialization.*

***Area III Statistics and Research - 18-21 credits***

Advanced Educational Research**	EDF 7482	3
Advanced Educational Statistics	STA 7114	3
Electives in Quantitative or Qualitative Methods**		9

*Students select three courses; the department highly recommends EEX 7618, Advanced Applied Behavior Analysis as one of the three.*

***Area IV Doctoral Seminars in Special Education - 6 credits***

<i>Two-credit seminars taken three times. Topics such as Course Development and College Teaching; Triad of Professional Activities in Higher Education; and Professional Dissemination</i>		6
--	--	---

***Area V Internship and Residency - 6 credits***

Doctoral Internship in Special Education	EEX 7945	3
Doctoral Residency in Special Education	EEX 7982	3

***Area VI Dissertation - 12 credits (minimum)***

Dissertation ( <i>Dissertation must be completed across a minimum of two semesters, fall and spring only, a maximum</i>	EEX 7980	1-12
---	----------	------

*of 6 credits within a semester)*

---

**Total**

**66-72**

*(does not include additional credits from master's program)*

**Accreditation:** Baccalaureate degree programs in Civil, Computer, Electrical, Geomatics, Mechanical and Ocean Engineering are accredited by the Engineering Accreditation Commission (EAC) of ABET. The baccalaureate program in Computer Science is accredited by the Computing Accreditation Commission (CAC) of ABET.

The College of Engineering and Computer Science offers undergraduate degree programs in Civil Engineering, Computer Engineering, Computer Science, Electrical Engineering, Environmental Engineering, Geomatics Engineering, Mechanical Engineering and Ocean Engineering. Also available are minors in Computer Science and Geomatics Engineering, certificates in Data Science and Surveying and Mapping, and a minor and certificate in Cybersecurity. The College recently launched an [Honors in the Major program](#) focusing on leadership, innovation and entrepreneurship within the engineering and computer science curriculum.

Graduate programs are offered to qualified persons who have sufficient and satisfactory undergraduate preparation. Master's degrees (with or without thesis) and Ph.D. degrees are offered in Computer Engineering, Computer Science, Electrical Engineering, Mechanical Engineering, Ocean Engineering and Transportation and Environmental Engineering. Master's degrees are also offered in Artificial Intelligence, Biomedical Engineering, Civil Engineering, Data Science and Analytics, and Information Technology and Management. Certificates in Artificial Intelligence, [Big Data Analytics](#), Biomedical Engineering, Corrosion, [Cyber Security](#), [Energy Resilience](#), [Professional Energy Resilience](#), Offshore Engineering, Transportation Engineering, and [Transportation, Logistics and Supply Chain Management](#) are also available.

Combined Bachelor of Science to Master of Science degree programs are offered in all of the College's departments. Among the programs' advantages, students may count a maximum of 9 credits in approved graduate-level courses toward both the B.S. and M.S. degrees.

For highly motivated undergraduate students, the B.S. to Ph.D. program, an option in all of the

College's doctoral programs, may be desirable. See admission and degree requirements later in this section. Course offerings, admission and degree requirements are given in the individual program descriptions that follow. Additional information is available from the respective departments or from the College of Engineering and Computer Science website at [www.eng.fau.edu](http://www.eng.fau.edu).

## BACHELOR'S DEGREE PROGRAM INFORMATION

### **General Studies Degree Program**

The University offers a Bachelor of General Studies (B.G.S.) degree program that allows students to design a plan of study to meet their personal interests and career goals. The 120-credit program includes 15 credits of upper-division coursework in one discipline, which students select in consultation with an advisor. For more B.G.S. details and degree requirements, please refer to the [Degree Programs](#) section of this catalog.

### **Undergraduate Research Certificate**

To recognize undergraduate students' excellence in undergraduate research, the Office of Undergraduate Research and Inquiry (OURI) has established the [Undergraduate Research Certificate](#). Requirements for the Research Certificate include completion of 12 credits of research exposure, skill-building and intensive courses as well as dissemination of the outcomes of students' research and inquiry through a research presentation or exhibition.

### **Math Policies and Math Boot Camp Requirement**

If, during a student's first attempt at a math course, a failing grade is earned or withdrawal from the math course after the drop/add deadline occurs, enrollment in and satisfactory completion of FAU's Math Boot Camp is required before the student is permitted to enroll in a second and final attempt at the math course.

Engineering and computer science students are permitted a maximum of two attempts for a single math course, whether at FAU or another institution. If a student withdraws from and/or fails the math course on the second attempt, the student may be required to change their major and leave the College of Engineering and Computer Science.

### **Preprofessional Program**

Entering freshmen and all transfer students in the bachelor of science programs for engineering majors will be admitted directly to the College's preprofessional program as pre-engineering students. The following are required for students to be admitted to their major of choice in the College

of Engineering and Computer Science:

1. Students must meet University admission requirements.
2. In each core course listed below, students must obtain a minimum grade of "C." Advanced placement scores of 4 or above will be given credit for the appropriate course(s). A score of 5 is equivalent to an "A," and a score of "4" is equivalent to a "B."
3. A maximum of two attempts will be allowed for any of the listed courses. Failure to receive a passing grade in the second attempt (including withdrawals) is grounds for denial of admission to an engineering or computer science program.

---

### **B.S. in Geomatics Engineering**

Calculus with Analytic Geometry 1 (1)	MAC 2311	4
---------------------------------------	----------	---

---

### **B.S. in Civil, Computer, Electrical, Environmental, Mechanical and Ocean Engineering**

Calculus with Analytic Geometry 1 (1)	MAC 2311	4
---------------------------------------	----------	---

General Physics for Engineers 1 (2)	PHY 2048	3
-------------------------------------	----------	---

#### **Notes:**

(1) MAC 2311 and MAC 2253 are substitutes.

(2) PHY 2043 and PHY 2048 are substitutes.

The entry-level mathematics requirement for the engineering programs is Calculus with Analytic Geometry 1. Students who are placed in lower-level mathematics courses and who need to maintain full-time status, may have problems finding courses that are accepted in an engineering or computer science program in future semesters. This may delay their entry into a particular engineering or computer science program.

After successfully completing the core courses, students may apply to a particular engineering program. Admission will be based on the student's performance in the core courses. [The Division of Engineering Student Services and Advising](#) is available to assist students in selection of a major field of study and can be reached at 561-297-2780 or [engineering-services@fau.edu](mailto:engineering-services@fau.edu).

Students with engineering degrees from ABET-accredited institutions will be directly admitted to

engineering or computer science programs of their choice.

Students may appeal denial of admission to a major through the academic petition process. For an appeal to have merit, students must explain new academic or personal information as well as extenuating circumstances. The evidence should show a student's case is stronger than the GPA evidence suggests. The faculty coordinator for the preprofessional program will review the petition according to the established College guidelines and make a recommendation to the academic petition committee.

The College of Engineering and Computer Science fully complies with the State of Florida Common Prerequisites for Computer Science and for Engineering. Students transferring from Florida community or state colleges who meet the preprofessional program course requirements will be directly admitted to the particular engineering and computer science program of their choice.

The College of Engineering and Computer Science participates in the Southeast Florida Engineering Education Consortium, a collaborative effort among public colleges and universities in this region. Detailed advising sheets outlining the courses needed at the community or state college and at FAU are available for students transferring from Miami-Dade, Broward, Palm Beach and Indian River colleges. These sheets also provide a useful guide for students transferring from other institutions. Students should contact their community or state college advisor or the FAU department in which they intend to enroll.

### **General Curriculum Notes**

The College recognizes that students may transfer from other schools or programs or may have course numbering system changes. As a result, the College will accept the following as equivalent:

1. MAP 3305, Engineering Mathematics 1 and MAP 2302, Differential Equations.
2. PHY 2044, Physics for Engineers 2 and PHY 2049/2049L, General Physics 2 with Lab.

Students will follow the University catalog for the year in which they began classes. However, students remaining in the program for longer than eight (8) years will be automatically updated to the most recent catalog.

### **Advising/Student Responsibility**

A dedicated group of advisors is responsible for all advising of preprofessional students. As students are accepted into particular engineering programs, each department has experienced advisors who meet with students every term to help ensure they are taking courses in the proper sequence and at a rate consistent with their personal objectives, academic ability and other commitments. Final responsibility

for meeting degree requirements and for fulfillment of course prerequisites rests with the student. All students must meet with their advisor once per year.

### **Engineering Cooperative Education**

The College of Engineering and Computer Science's Cooperative Education program enables qualified students to gain paid, professional work experience in business and industry prior to graduation. Co-op students either alternate periods of full-time work and study or work half time while pursuing their degrees.

The College also sponsors one-semester internships available to students enrolled for a degree within the College. Internships provide an opportunity for students to gain career-related work experience while pursuing their degrees. Internships may be either full time (35-40 hours/week) or part time (20-25 hours/week) and are repeatable.

To learn more about the Cooperative Education and internship programs, students in the College of Engineering and Computer Science should contact the FAU Career Center at 561-297-3533 or refer to its [website](#). All students must be registered with the Center to participate in co-op or internship programs.

### **Engineering Student Services**

[The Division of Engineering Student Services and Advising](#) promotes student success and professional development, encourages excellence and works to make the University experience more meaningful. It provides a single place for students to go for assistance or for referral to others for help. Questions related to admissions, financial aid, advising, student organizations and activities and other student-related matters may be directed to the Division of Engineering Student Services at 561-297-2780 or [engineering-services@fau.edu](mailto:engineering-services@fau.edu).

### **Financial Aid/Student Employment**

Opportunities for financial aid are available to Engineering and Computer Science students. Work opportunities sometimes are available as student assistants in offices and laboratories and on externally sponsored research projects. For more information, contact the Division of Engineering Student Services and Advising at 561-297-2780 or [engineering-services@fau.edu](mailto:engineering-services@fau.edu).

### **Foreign Language Requirement**

All students must satisfy the foreign language requirement for admission to the University.

## HONORS PROGRAM IN ENGINEERING

The Honors Program provides FAU's students in the College of Engineering and Computer Science the opportunity to achieve academic excellence beyond the level of standard coursework. Students interested in pursuing the Honors designation should meet the following eligibility and admission requirements.

### Eligibility Requirements

Engineering and Computer Science students with strong academic records and interest in improving their leadership and innovation skills are encouraged to apply for the Honors Program in Engineering program. Students must meet the following program entry requirements:

1. Junior standing (must have completed 60 credits toward an engineering or computer science major);
2. At the time of application, must have a cumulative GPA of at least 3.25 in the last 60 credits taken at FAU and any other previous institution of higher education;
3. Must not have received a grade lower than a "C" in any college course; and
4. Apply through the Division of Engineering Student Services and [Advising Department](#)

### Program Requirements

1. Preferred to maintain full-time status (excluding summer semesters); however, a one-semester grace period may be given if the student decides to study abroad or has other considerations that preclude full-time status.
2. Must maintain cumulative GPA of 3.25 or better. If a student's overall GPA falls below 3.25, a one-semester grace period may be given for improvement. If the GPA does not recover, the student's honors status will be withdrawn.-
3. Must not receive any grade lower than a "C" in any college course.
4. Must not have any violation of the Code of Academic Integrity.
5. Must participate in at least one general enrichment activity (membership in a student professional organization, attend professional development seminar, other approved activity).
6. Must not receive a grade lower than a "B" in any Honors-in-the-Major course requirement (9 credits of honors-level coursework as approved in consultation with the advisor and the associate dean and capstone with honors compact).
7. Must complete Honors Directed Independent Study (EGN 5908, 3 credits), which will count as the thesis.

8. Must complete a formal Honors application.

### Sample Flight Plan

#### Junior Year Fall Term

----------------------------	----------	---

Engineering Capstone Design 2		1
-------------------------------	--	---

## COMBINED DEGREE PROGRAM INFORMATION

### B.S. to M.S. Programs

To encourage undergraduates to pursue a graduate education, the College of Engineering and Computer Science offers joint B.S. to M.S. degree programs in its three departments: Civil, Environmental and Geomatics Engineering, Electrical Engineering and Computer Science, and Ocean and Mechanical Engineering. These programs allow students to complete both a bachelor's and a master's degree within

five years. The undergraduate degree programs range from 120 to 127 credits, while the combined degree program includes a minimum of 150 credits. Students admitted after January 1, 2017, may count up to 12 credits of graduate coursework (5000 level or higher) taken as an undergraduate to satisfy both degrees. See academic program requirements.

Students with a cumulative GPA of at least 3.25 at the end of their junior year are eligible to apply to the graduate programs in the departments of Civil, Environmental and Geomatics Engineering and Electrical Engineering and Computer Science. For combined programs in the Department of Ocean and Mechanical Engineering, students with an overall GPA of above 3.0 and a GPA of above 3.25 in the last 60 credits of coursework completed at the time of admission may apply to the graduate programs. The GPA must be maintained until graduation from the B.S. degree.

The GRE is not required for these programs. All other degree requirements apply. See individual departments for the specific program descriptions appearing just before the master's degree programs. The College also offers a combined program leading to an M.S. in [Biomedical Engineering](#) that is available to all B.S. candidates in any major in the College.

### **B.S. to Ph.D. Programs**

The normal path from B.S. degree to Ph.D. degree in the College of Engineering and Computer Science is through the M.S. degree and its associated requirements. The B.S. to Ph.D. Program gives highly qualified students in the College the option of bypassing the M.S. degree and moving to their doctoral research activities more rapidly. B.S. to Ph.D. students will not be required to write an M.S. thesis. Students selecting the B.S. to Ph.D. option who fail to pass the Ph.D. Qualifying/Candidacy examination will be allowed to switch to an M.S. program, complete the degree requirements and receive the M.S. degree. Admission to the B.S. to Ph.D. Program may be granted to students entering or already in a graduate engineering program, including students selected for the joint B.S. to M.S. program. Admission and degree requirements are listed below.

### **Admission Requirements**

#### **Students in the B.S. Program:**

1. Satisfaction of the department's minimum GPA requirement, normally in the 3.2 – 3.3 range, in the last 60 credits of undergraduate coursework;
2. A combined score (verbal and quantitative) of at least 310 on the GRE;
3. A minimum of two letters of recommendation. Where possible these letters should address the student's qualifications for research.

## Students in the M.S. Program at FAU:

1. Satisfaction of the department's minimum GPA requirement, normally in the 3.2 – 3.3 range, in the last 60 credits of undergraduate coursework;
2. A combined score (verbal and quantitative) of at least 310 on the GRE;-
3. A minimum GPA of 3.5 in the graduate program at FAU;
4. Students must apply for the direct path Ph.D. program within the first year of graduate studies. Students who do not satisfy the GRE or GPA requirements stated above must obtain approval from the department and College graduate committees overseeing the graduate program and from the Graduate College before being admitted to the direct path program.

## Degree Requirements

1. Successful completion of the department's doctoral qualifying/candidacy exam. This exam will normally be taken after the student has completed 24 credits of graduate coursework in the department.
2. A minimum of 72 credits beyond the B.S. degree, distributed according to the following conditions:
  - a. A minimum of 42 credits of graduate coursework from which a minimum of 27 credits of coursework must be in the doctorate-granting department (excluding directed independent study credits) and a minimum of 18 credits of 6000-level courses must be completed;
  - b. Except under unusual circumstances, no more than 6 credits are allowed for directed independent study and/or advanced research graduate courses;
  - c. No 4000-level course is allowed toward the degree. Courses taken to make up for the deficiencies will not be counted toward the degree;
  - d. A minimum of 30 dissertation credits.
3. Successful completion and defense of the dissertation.

## MASTER'S DEGREE PROGRAM INFORMATION

(For master's degree programs, the GRE admission requirement is waived through and including fall 2023.)

### Distance Education

Engineering credit courses in support of degree programs and professional development are available

through the [Division of Engineering Student Services and Advising](#) (DESSA) in the following disciplines: Civil Engineering, Computer Engineering, Computer Science, Electrical Engineering, Mechanical Engineering and Ocean Engineering. Students can enroll in one or more courses encompassing the six different disciplines each semester. DESSA provides access to university courses at industry sites and government agencies. The goal of DESSA is to deliver engineering and computer science programs to students any place and any time. For information, contact the DESSA Director, 561-297-3578, or visit DESSA's [website](#).

### **Graduate Summer Internship Program**

The College of Engineering and Computer Science supports a Graduate Summer Internship (GSI) Program through the FAU Career Center. Available to all master's degree students enrolled in the College, this program provides an opportunity to gain career-related, paid work experience during the summer semester. GSI application and placement are handled through the CDC. Interested students should contact the CDC early in the spring semester to establish eligibility and to submit an application packet. For information, call 561-297-3533 or visit its [website](#).

### **Requirements for Students with Bachelor's Degrees in Non-Engineering Disciplines**

Students with bachelor's degrees in non-engineering disciplines may satisfy the undergraduate engineering requirements and earn an M.S. degree in Biomedical Engineering, Computer Science, Computer Engineering, Electrical Engineering, Mechanical Engineering, Ocean Engineering or Civil Engineering. Part-time or full-time study is possible. To receive the M.S. degree in engineering, these students must correct deficiencies in their programs of study by taking, in addition to regular graduate engineering courses, certain undergraduate engineering courses appropriate to the master's degree objective. Four or five such courses are typically required of students with B.S. degrees in science and 10-12 courses for non-science/engineering students. Students may opt for thesis or non-thesis options. The program of study will be individually tailored to each student's academic background, graduate engineering degree objective and relevant experience. It is expected that full-time students with appropriate preparation and background in math, science and engineering will complete the undergraduate courses phase of the program in one year.

Students must satisfy the following eligibility requirements:

1. A cumulative GPA of 3.00.
2. Completion of at least two semesters of college calculus with grades of "B" or better.
3. Satisfaction of departmental minimum GRE score requirements.
4. A letter of recommendation from their potential thesis advisor.

Specific course requirements for each program in the College of Engineering and Computer Science are listed as follows:

### **Electrical Engineering and Computer Science**

The Department of Electrical Engineering and Computer Science requires that each student and an academic advisor work out a customized plan of study based on the student's background and desired graduate area of study. The following remedial coursework represents a maximum plan. It can be shorter if the students have already taken some of the courses or equivalent courses. Students are expected to score a "C" or better in each of the courses and to maintain an average of 3.0 or better for all the remedial courses.

#### **Requirements for science majors:**

1. EEE 3300, Electronics 1;
2. EEL 2161, C for Engineers;
3. EEL 3111, Circuits 1;
4. EEL 3118L, Electronics Laboratory 1;
5. EEL 4656, Analysis of Linear Systems;
6. EEL 3470, Electromagnetic Fields and Waves; or EEL 4510, Introduction to Digital Signal Processing; or EEL 4512C, Principles of Communication Systems; or EEL 4652C, Control Systems 1.

#### **Requirements for non-science majors:**

1. The six requirements listed above;
2. MAC 2281, Calculus for Engineers 1;
3. MAC 2282, Calculus for Engineers 2;
4. PHY 2048, General Physics for Engineers 1;
5. PHY 2044, Physics for Engineers 2.

### **Civil, Environmental and Geomatics Engineering**

The Department of Civil, Environmental and Geomatics Engineering requires the following remedial coursework:

1. EGN 3311, Statics;
2. EGN 3331, Strength of Materials;
3. Two civil and/or environmental engineering courses in the relevant area as determined by the graduate supervisory committee;
4. Any other course dictated by the graduate supervisory committee.

## Ocean and Mechanical Engineering

The Department of Ocean and Mechanical Engineering requires the following remedial coursework. If students have not taken these classes during their undergraduate studies, their case needs to be reviewed by the department graduate committee, which may require them to take prerequisite classes for the graduate program and pass them with a grade of "B" or better:

1. EGN 3311, Statics;
2. EGN 3321, Dynamics;
3. EGN 3331, Strength of Materials;
4. EML 3701, Fluid Mechanics;
5. MAC 2281, Calculus for Engineers 1;
6. MAC 2282, Calculus for Engineers 2;
7. MAC 2313, Calculus with Analytic Geometry 3;
8. MAP 3305, Engineering Mathematics 1; or MAP 2302, Differential Equations 1.

## INTERDISCIPLINARY MINOR AND CERTIFICATES

### BUSINESS GRADUATE MINOR

*(Minimum of 15 credits required)*

A minor in Business is available to students pursuing a non-thesis master's degree who wish to combine technical coursework in engineering or computer science with a sequence of courses designed to provide a broad background in modern business concepts. Thesis students may participate with approval of their major department.

The Business minor is available to students admitted to master's studies in any program in the College of Engineering and Computer Science. It is not available to students with non-degree-seeking status. Requirements for the minor include completion of five graduate-level business courses (3 credits each) from the list below (course descriptions may be found in the [College of Business Course Descriptions section of this catalog](#)):

1. ACG 6027, Financial Accounting Concepts;
2. FIN 6406, Financial Management;
3. ISM 6026, Management of Information Systems and Technology, or QMB 6603, Data Analysis for Managers;

4. Select one of the following courses: MAN 6937, Global Environment of Management; ENT 6196, Biotechnology Business Development; ENT 6016, Venture Creation; or MAN 6296, Leadership and Organizations;
5. MAR 6055, Marketing Functions and Processes.

Some course substitution may be possible for students with prior academic background in one or more of these areas. Additional requirements for master's degrees with a minor in Business are given in the individual program descriptions that follow.

The minor in Business is awarded upon graduation as an integral part of a master's degree program in Engineering or Computer Science; it is not awarded independent of these degrees. Courses taken as part of the Business minor apply toward the prerequisites for many M.B.A. programs but generally cannot be used to satisfy M.B.A. degree requirements.

## **ENERGY RESILIENCE GRADUATE CERTIFICATE**

*(Minimum of 12 credits required)*

The availability of reliable electric power is foundational to the health and safety of citizens as well as the economy. Technology is rapidly providing solutions that increase the efficiency and resiliency of the electrical grid, while renewable energy technologies are providing cleaner sources of electric power. These technological advances are made possible by engineers and scientists with advanced knowledge of the power grid, data analysis techniques and renewable energy extraction. By specializing in these areas, graduate students will be well prepared to contribute to the efficiency and resiliency of the electrical grid as well as renewable power generation.

This 12-credit certificate provides graduate students with knowledge and skills in the concepts and technologies necessary to improve the efficiency and resiliency of energy generation, transmission and distribution.

### **Admission**

The certificate program is open to students with a bachelor's degree in engineering or science and a GPA of at least 3.0. Students must satisfy the prerequisites for each course in the program. The average GPA of all four courses counted in the program must be 3.0 or better.

### **Curriculum**

Select four courses from the list below. Additional graduate courses in energy and power systems may be counted in the certificate program with prior permission of the advisor.

Smart Grid	EEL 6297	3
Energy Engineering	EGN 5735	3
Power System Analysis and Control	EEL 5256	3
Advanced Photovoltaic Power Systems	EEL 6284	3
Solar Energy Engineering	EML 6417C	3
Advanced Energy Conversion Processes and Systems	EML 6451	3
Wind and Ocean Energy Turbines	EML 6455	3
Marine Renewable Energy	EOC 6145	3

## **ENERGY RESILIENCE GRADUATE CERTIFICATE PROFESSIONAL PROGRAM**

*(Minimum of 12 credits required)*

The Professional Energy Resilience certificate is designed specifically for working professionals, allowing professionals to advance their careers with an accelerated graduate program and obtain an advanced degree while continuing to work. This stand-alone certificate is tailored for professionals and alumni with graduate degrees who are looking for specialized knowledge in Energy Resilience. The course offering format includes evenings, weekends and online material. Admission details and degree requirements for this 12-credit certificate are noted above.

## **DOCTORAL DEGREE PROGRAM INFORMATION**

(For doctoral degree programs, the GRE admission requirement is waived through and including fall 2023.)

Doctoral programs through the College of Engineering and Computer Science are available in the following disciplines: Computer Engineering, Computer Science, Electrical Engineering, Mechanical Engineering, Ocean Engineering and [Transportation and Environmental Engineering](#). Details on each

program follow under the department in which each program is housed.

## ACADEMIC ENVIRONMENT

The College of Engineering and Computer Science provides outstanding educational opportunities for students and personnel. With over 75 faculty, almost all with Ph.D. degrees, it is large enough to have a good selection of course offerings and student activities, yet small enough to provide the personal attention of smaller schools.

Each department has unique features and facilities indicated in the individual program descriptions. Each is affiliated with one or more national professional societies, providing students opportunities to engage in industry tours, hear professional speakers, interact and network with engineering and computer science professionals, develop leadership skills and participate in various social activities arranged by these student groups. Each has active programs of research with opportunities for student participation.

Florida Atlantic University is located in a high-tech region of the United States. Close affiliations with business and industry provide students many benefits, including job opportunities before and after graduation.

### College Vision and Mission

The College of Engineering and Computer Science is committed to providing accessible and responsive programs of education and research recognized nationally for their high quality. The College aims to be the institution of choice for regional students, business and industry. As a community of scholars, the College leads by example with vision, inspiration, integrity and a shared sense of purpose. It promotes a stimulating and productive environment of work, study and scholarly inquiry for students, faculty and staff.

Through its programs in engineering and computer science, the College:

1. Educates those who will pioneer the advancement of knowledge and who will be the leaders of tomorrow;
2. Conducts basic and applied research in engineering, computer science and related interdisciplinary areas;
3. Provides service to the engineering and computer science professions, to the State of Florida, to the nation and to the community at large.

## College Goals

The College's goals are results-oriented. As a community of scholars, it will:

1. Encourage young people to consider careers in engineering and computer science by introducing them to these fields while in middle and high school;
2. Prepare graduates in ways that provide them a basis for lifelong personal and professional development and that enable them to exercise leadership and make lasting contributions in their disciplines;
3. Continue on new roads of research and discovery in its existing areas of expertise, in emerging disciplines and in related interdisciplinary areas;
4. Provide the educational resources that working professionals need to keep pace with developments in their field;
5. Magnify its positive impact in serving regional, state, national and global needs by building mutually beneficial linkages with business, industry, state colleges, K-12 programs and schools and other constituencies.

## Educational Objectives

The baccalaureate experience in the Florida Atlantic University College of Engineering and Computer Science provides students with:

1. Preparation for Practice. Graduates will be prepared for entry-level positions in their discipline and for graduate/professional studies.
2. Tools for Creativity. Graduates will experience the creative and design processes and their application to typical engineering situations.
3. Societal Awareness. Graduates will receive the breadth of education necessary to integrate practice in their disciplines with the needs and interests of a diverse modern society.
4. Leadership Skills. Graduates will be prepared for leadership in their disciplines.

## Expected Student Learning Outcomes

The baccalaureate educational objectives will be achieved by ensuring that graduates have:

1. An understanding of professional and ethical responsibility. Graduates will be familiar with the professional and ethical underpinnings of their discipline and with their professional obligation for continuing education and professional development.
2. A working knowledge of fundamentals, engineering tools and experimental methodologies. Graduates will have knowledge of math, science and engineering fundamentals. They will be able

to combine these basics with their knowledge of experimental methodologies and modern engineering tools to identify, formulate and solve engineering problems.

3. An understanding of the social, economic and political contexts in which engineers must function. Graduates will be able to combine their knowledge of the social sciences and humanities with their own personal and professional experiences to demonstrate an understanding of the impact of engineering solutions in an increasingly diverse and technological society.
4. An ability to plan and execute an engineering design to meet an identified need. Graduates will be able to use their knowledge of fundamentals, engineering techniques and tools and project planning and management to design a system, component or process that satisfies constraints and meets an identified need.
5. An ability to function on multidisciplinary teams. Graduates will be able to function effectively on teams using their knowledge of team dynamics, team communication, social norms and conflict management.
6. An ability to communicate effectively. Graduates will be able to communicate their ideas and results to diverse audiences using their knowledge of written, oral and graphic communication.

## CIVIL, ENVIRONMENTAL AND GEOMATICS ENGINEERING

### **Faculty:**

Kaisar, E., Chair; Nagarajan, S., Associate Chair; Abdellatef, M.; Arockiasamy, M.; Bloetscher, F.; Jahandar Lakshaki, M.; Jang, J.; Kan, D.; Liu, Y.; Meeroff, D. E.; Rosson, B.; Sarhang Zadeh, O.; Sobhan K.; Su, H.; Teegavarapu, R; Yong, Y.

### **Affiliated Faculty:**

Gammack-Clark, J.; Roberts, C.; Xie, Z.

### **Adjunct Faculty:**

Goly, A.; Lowiec, M.; Mitrovic, N.; Muniz, A.; Munuswamy, S.; Ortega, J.; Soltani Sobh, A.; Zheng, X.

The Department of Civil, Environmental and Geomatics Engineering offers the following programs of study:

[Link to Bachelor of Science in Civil Engineering \(B.S.C.V.\)](#)

[Link to Bachelor of Science in Environmental Engineering \(B.S.E.V.\)](#)

[Link to Bachelor of Science in Geomatics Engineering \(B.S.G.E.\)](#)

## **CIVIL ENGINEERING BACHELOR'S PROGRAM**

Civil engineers design the constructed environment that supports our society. From highways and buildings to bridges and water systems, the profession of civil engineering is responsible for much of the world in which we live.

The program of study leading to the Bachelor of Science in Civil Engineering (B.S.C.V.) reflects the breadth of the profession. Students complete coursework in basic science and mathematics, engineering sciences, civil engineering systems and materials, and the major disciplines in civil engineering. Because of the tremendous impact civil engineers have on society, the curriculum also requires students to pursue studies in the social sciences and the humanities.

The B.S.C.V. program is accredited by the Engineering Accreditation Commission of

ABET, <http://www.abet.org>.

## Civil Engineering Educational Objectives and Student Outcomes

The Civil Engineering program strongly supports the educational objectives and learning outcomes of the College of Engineering and Computer Science (see the [Educational Objectives](#) and [Expected Student Learning Outcomes](#) subsections previously listed in this section).

Program Educational Objectives are broad statements that describe the expected accomplishments and professional status of Civil Engineering graduates a few years beyond the baccalaureate degree.

The Civil Engineering program at Florida Atlantic University is dedicated to graduating civil engineers who, within a few years after graduation will:

- A. **Practice civil engineering** within the general areas of structural engineering, transportation engineering, geotechnical engineering and water resources/environmental engineering in the organizations that employ them;
- B. **Advance their knowledge of civil engineering**, both formally and informally, by engaging in lifelong learning experiences including attainment of professional licensure and/or graduate studies;
- C. **Serve as effective professionals** based on strong interpersonal and teamwork skills, an understanding of professional and ethical responsibility and a willingness to take the initiative and seek progressive responsibilities;
- D. **Participate as leaders** in activities that support service to, and/or economic development of, the community, the region, the state and the nation.

The educational objectives of the Bachelor of Science in Civil Engineering program are achieved by ensuring that graduates have the following characteristics or student outcomes:

1. An ability to identify, formulate and solve complex engineering problems by applying principles of engineering, science and mathematics;
2. An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety and welfare, as well as global, cultural, social, environmental and economic factors;
3. An ability to communicate effectively with a range of audiences;
4. An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global,

economic, environmental and societal contexts;

5. An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks and meet objectives;
6. An ability to develop and conduct appropriate experimentation, analyze and interpret data and use engineering judgment to draw conclusions;
7. An ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

## CIVIL ENGINEERING

### BACHELOR OF SCIENCE IN CIVIL ENGINEERING (B.S.C.V.)

*(Minimum of 128 credits required)*

#### Admission Requirements

All students must meet the minimum admission requirements of the University. Please refer to the [Admissions section](#) of this catalog.

All students must meet the preprofessional requirements listed [above](#) to be accepted in the Civil Engineering program.

#### Prerequisite Coursework for Transfer Students

Students transferring to Florida Atlantic University must complete both lower-division requirements (including the requirements of the General Education Program) and requirements for the college and major. Lower-division requirements may be completed through the A.A. degree from any Florida public college, university or community college or through equivalent coursework at another regionally accredited institution. Before transferring and to ensure timely progress toward the baccalaureate degree, students must also complete the prerequisite courses for their major as outlined in the [Transition Guides](#) and below.

All courses not approved by the Florida Statewide Course Numbering System that will be used to satisfy requirements will be evaluated individually on the basis of content and will require a catalog course description and a copy of the syllabus for assessment.

#### Degree Requirements

The Bachelor of Science in Civil Engineering degree will be awarded to students who:

1. Meet all general degree requirements of the University;
2. Complete the curriculum for the B.S. in Civil Engineering degree (see below);

3. Take the Fundamentals of Engineering examination (the first of two exams necessary for professional licensure; contact the department for details).

## Curriculum

The Bachelor of Science in Civil Engineering degree requires 128 credits. For credit toward the degree, a grade of "C" or better must be received in each course listed. In addition, all prerequisites for each mathematics, science or engineering course must be completed with a grade of "C" or better before enrollment is permitted. The degree components are listed below.

---

### General Education Program

College Writing 1 (1), (2)	ENC 1101	3

<b>Total</b>		<b>9</b>

**Notes:**

1. Contributes to University Core Curriculum requirements.
2. Contributes to Writing Across Curriculum (Gordon Rule) writing requirement.
3. General Education Program courses, totaling 6 credits, must be selected to satisfy Writing Across Curriculum (Gordon Rule) writing requirements.
4. Contributes to Gordon Rule mathematics requirement.
5. Includes a 1-credit laboratory .
6. All design professional core courses contain a communications component (writing or speaking)
7. Grading: S/U.
8. PHY 2048, General Physics 1 (4 credits) is an acceptable substitute, but only 3 credits will apply toward the degree.

**Sample Four-Year Program of Study**

For the sample four-year program of study for the Bachelor of Science in Civil Engineering, refer to the [Curriculum Sheets and Flight Plans](#) by major.

**Minors and Certificate Programs Appropriate for Civil Engineering**

Civil engineering is a uniquely wide-ranging profession. Various departments offer minors and

certificate programs that augment a student's civil engineering education. The faculty encourages students to pursue a minor or certificate, such as:

**Surveying and Mapping certificate program**, highly recommended (Department of Civil, Environmental and Geomatics Engineering)

**Geographic Information Systems certificate program**, highly recommended (Department of Geosciences)

Obtaining a minor or certificate will require the completion of credits beyond the 128 required for the B.S. in Civil Engineering. Contact the department offering the minor or certificate for more details.

### Internships

Civil Engineering students are strongly encouraged to gain practical experience through participation in internship opportunities. However, internships may only substitute for one technical elective with prior approval from the department chair and only if taken for a grade (IDS 3949, Professional Internship or EGN 3941, Engineering Professional Internship). For more information, contact the FAU Career Center at 561-297-3533 or visit its [website](#).

## COMBINED PROGRAMS

### CIVIL ENGINEERING

#### BACHELOR OF SCIENCE IN CIVIL ENGINEERING (B.S.C.V.) TO MASTER OF SCIENCE (M.S.)

#### COMBINED PROGRAM

With an approximate duration of five years, the combined Bachelor of Science in Civil Engineering to Master of Science program provides an attractive way for students to continue their graduate work. The undergraduate degree program is 128 credits, while the combined degree program includes a minimum of 150 credits. Students admitted after January 1, 2017, may count 12 credits of graduate coursework (5000 level or higher) taken as an undergraduate to satisfy both degrees. See specific program requirements.

1. The student has met the minimum 120 credits for the bachelor's degree; and
2. The student has taken a minimum of 30 credits in 5000 level or higher courses for the master's program.

The combined degree program is 150 credits, 120 for the undergraduate degree and 30 for the master's degree. Students complete the undergraduate degree first, taking no more than 12 credits of graduate coursework in their senior year, which will then be counted to satisfy both degrees.

### **Prerequisite Coursework for Transfer Students**

Students transferring to Florida Atlantic University must complete both lower-division requirements (including the requirements of the General Education Program) and requirements for the college and major. Lower-division requirements may be completed through the A.A. degree from any Florida public college, university or community college or through equivalent coursework at another regionally accredited institution. Before transferring and to ensure timely progress toward the baccalaureate degree, students must also complete the prerequisite courses for their major as outlined in the [Transition Guides](#).

All courses not approved by the Florida Statewide Course Numbering System that will be used to satisfy requirements will be evaluated individually on the basis of content and will require a catalog course description and a copy of the syllabus for assessment.

### **To be eligible for the joint B.S.C.V./M.S. program, students must:**

1. Have a cumulative GPA of 3.25 or higher (FAU and transfer courses);
2. Have a total institution GPA of 3.25 or higher (FAU courses); and
3. Formally apply to the joint program, completing the admissions process at least one semester prior to beginning the M.S. portion of the program.

## **BIOLOGICAL AND PHYSICAL SCIENCES TO CIVIL, ENVIRONMENTAL OR GEOMATICS ENGINEERING TO CIVIL ENGINEERING BACHELOR OF ARTS (B.A.) OR BACHELOR OF SCIENCE (B.S.) TO SECOND BACHELOR OF SCIENCE (B.S.) TO MASTER OF SCIENCE (M.S.) COMBINED PROGRAM**

This program is offered in partnership with the Wilkes Honors College. Details for this [combined degree program](#) are listed in the [Wilkes Honors College](#) section.

## **MASTER'S PROGRAM**

### **CIVIL ENGINEERING MASTER OF SCIENCE (M.S)**

The mission of the Master of Science with Major in Civil Engineering program is to meet the advanced civil engineering educational needs of graduates of undergraduate programs, practicing engineers and those non-engineering professionals wishing to redirect their career paths. Graduates of the program possess these attributes or educational outcomes:

1. Ability to apply knowledge in civil engineering and related subjects significantly beyond the baccalaureate level;
2. Ability to communicate ideas and results professionally in written, oral and graphical forms;
3. Ability to independently conduct research or solve a significant practice-oriented design in civil engineering.

These educational outcomes result from successful completion of a well-planned, rigorous set of courses and a major research or design experience.

Students wishing to continue their education but not pursue a formal academic degree are welcome to take graduate courses with the appropriate technical preparation.

### **Admission Requirements**

All students must comply with the College's admission requirements noted under the [Master's Degree Program Information](#) header. Once students meet all College requirements, applications are reviewed on a case-by-case basis. Students are normally admitted to the Master of Science in Civil Engineering program if they meet the following:

1. Possess a baccalaureate degree in Civil Engineering or a closely related engineering field. Students with non-engineering backgrounds are required to take remedial coursework as recommended by the departmental graduate committee. Click [here](#) for additional information.
2. Have achieved a 3.0 (on a 4.0 scale) grade point average in the last 60 credits of undergraduate work;
3. Have demonstrated proficiency in both written and spoken English. Students from non-English-speaking countries are required to take an English language proficiency test and are expected to achieve a minimum TOEFL score of 550 on PBT (paper-based test), 79 on IBT (internet-based test) or 213 on CBT (computer-based test); 6.0 on IELTS; or 100 on Duolingo.
4. Agree to abide by the graduate admission requirements of the University as published in the University Catalog.
5. Distance Learning students must comply with the College of Engineering and Computer Science Distance Education guidelines noted under the [Master's Degree Program Information](#) header above.

## Degree Requirements

The degree of Master of Science with major in Civil Engineering is awarded to the candidate who has:

1. Complied with University graduate policies and regulations;
2. Satisfied the University's graduate degree requirements; and
3. Completed the appropriate Plan of Study for the degree option selected.

## Plan of Study

A Plan of Study is a set of courses and a thesis or project activity chosen and completed in a sequence that meets the needs and interests of the individual student and the degree requirements and other stipulations of the University, College of Engineering and Computer Science and the department. There is no requirement for master's students to be full-time, nor is there an on-campus service requirement. The Plan of Study must be approved by the student's supervisory committee and the department no later than the end of the student's second semester in the program, regardless of the number of credits earned.

## Degree Options

There are two degree options: Master of Science with Major in Civil Engineering with thesis and Master of Science with Major in Civil Engineering, courses only.

### M.S. Civil Engineering with Thesis

*(A total of 30 credits required.)*

1. Requires 6 credits of Master's Thesis, and
2. Requires 24 credits of approved coursework (5000 level or higher) with the following constraints:
  - a. At least half of the total credits shall be designated as 6000-level courses or above;
  - b. At least half of the total credits must be from CEGE courses;
3. Must complete one semester of CGS 5937, Graduate Seminar (0 credits) with grade of Satisfactory ("S").

### M.S. Civil Engineering (courses only)

*(A total of 30 credits required.)*

1. Requires 30 credits of approved coursework (5000 level or higher) with the following constraints:
  - a. At least half of the credits included in any master's degree program shall be designated as 6000-level courses.
  - b. At least half of the total credits shall be from CEGE courses.
2. Must complete one semester of CGS 5937, Graduate Seminar (0 credits) with grade of Satisfactory ("S").

## Program Concentrations

Areas of concentration include:

- Structural/Geotechnical Engineering
- Transportation/Geomatics Engineering
- Water Resources/Environmental Engineering

Master of Science with Major in Civil Engineering students may complete one concentration, which includes a minimum of two core classes chosen from a list of courses for each concentration. Note: No more than 3 credits of Directed Independent Study may be applied toward the degree. All course selections must be part of an approved plan of study. All Master of Science with Major in Civil Engineering students must complete one semester of a 0-credit graduate seminar course.

---

### Structural/Geotechnical Engineering Core

Soil Stabilization and Geosynthetics	CEG 6124
Advanced Structural Analysis	CES 6106
Finite Element Methods in Civil Engineering*	CES 6119
Bridge Design	CES 6325
Structural Dynamics	CES 6585
Prestressed Concrete	CES 6715

\* Introduction to Finite Element Methods, (EGM 5351) is an acceptable substitute.

---

### Transportation/Geomatics Engineering Core

Thermal Infrared Remote Sensing	SUR 6387C
Advanced Unmanned Aerial System Mapping	SUR 6502
Intelligent Transportation Systems	TTE 6272
Maritime Freight Operations	TTE 6508
Sustainable Public Transportation	TTE 6651

Highway Engineering	TTE 6815
Transportation System Analysis	TTE 6501
Terrestrial Laser Scanning	CEG 6304C
<b>Water Resources/Environmental Engineering Core</b>	
Open Channel Hydraulics	CWR 6235
Dynamic Hydrology	CWR 6525
Water Resource System Engineering	CWR 6818
Air Pollution and Control	ENV 6115
Water Supply and Treatment	ENV 6418
Wastewater Engineering	ENV 6507
Sustainability and Pollution Prevention	ENV 6932

**Note:** Credits of Directed Independent Study may be applied toward the degree with the approval of the department. All course selections must be part of an approved plan of study. All Master of Science with Major in Civil Engineering students must complete one semester of a 0-credit graduate seminar course.

### **Business Minor**

Students electing to complete a Business minor must follow the College of Engineering and Computer Science guidelines for the [Business minor](#) noted above.

### **Thesis Supervision**

All M.S.C.V. students in the thesis option must select a supervisory committee. The supervisory committee must contain at least three members. The student's advisor will review and approve the student's plan of study. The chair of the committee and at least one of the other members must be chosen from the department faculty with expertise in the area of concentration chosen by the student. The third member may be chosen from the department faculty or from outside the department in accordance with the University guidelines established in the Graduate Governance document. The third

member may be a professional from the practicing engineering community. All members of the committee should have doctoral degrees.

### **The Thesis**

The master's thesis is a comprehensive original work that contributes to the understanding of an engineering problem.

The thesis is presented at an oral defense, the time and date of which must be approved by the supervisory committee. A minimum of two weeks prior to the anticipated defense, the written thesis must be delivered to the supervisory committee in the format described in a document titled, Requirements and Guidelines for Graduate Theses and Dissertations, that is available from the FAU Graduate College.

The supervisory committee determines the format of the defense and, in private consultation at the completion of the oral defense, whether or not the defense was successful and the thesis is acceptable in scope and quality.

Students are expected to provide updates on their progress each semester, both written and oral. A progress report is required to record a satisfactory progress grade for thesis credits. It is expected that, at a minimum, one peer-reviewed paper will be submitted as part of the thesis option. At a minimum, one presentation or poster at a conference is also expected.

### **Non-Thesis Supervision**

M.S.C.V. students in the courses-only option will select a department faculty member with expertise in their chosen area of concentration to be the program supervisor who reviews and approves the student's plan of study.

### **Transfer Credits**

A maximum of 9 credits of graduate-level work earned at FAU as an undergraduate or while in non-degree status at FAU and a maximum of 6 credits transferred from another regionally or nationally accredited institution may be used to satisfy M.S. with Major in Civil Engineering degree requirements subject to the following restrictions:

1. The student must present a transcript identifying the course in which the student earned a grade of "B" or better, along with a catalog/course description.
2. The course must not have been counted toward any other graduate degree awarded or to be awarded to the student.

3. The course is relevant to the student's approved Plan of Study.
4. No credit earned ten or more years before the degree is awarded may be counted toward the M.S. with Major in Civil Engineering degree program. Credits transferred into or applied to the program are considered as earned in the first semester of enrollment.

### **Professional Licensing**

Engineering is a regulated profession, and many civil engineers become licensed Professional Engineers (P.E.) through a process of examination and certification of engineering experience. Since undergraduate experience and training varies considerably among graduate students, students should contact the Florida Board of Professional Engineers for specific information about eligibility to sit for the licensing examinations. Note that completion of a master's degree in Engineering is not sufficient to qualify students from non-engineering backgrounds for licensure in Florida, and such students may not refer to themselves as "engineers" in Florida in accordance with CH 287.055 F.S. Where there are questions, students are asked to contact the Florida Board of Professional Engineers directly. The Florida Board of Professional Engineers' address is:

Florida Board of Professional Engineers

2507 Callaway Road, Suite 200

Tallahassee, Florida 32303-5268

850-521-0500 (Telephone)

850-521-0521 (Fax)

[www.fbpe.org/](http://www.fbpe.org/)

### **Financial Aid**

Full-time students may be considered for a graduate assistantship, which provides part-time employment in the department. Full or partial tuition waivers may also be awarded to graduate assistants. The number of assistantships is limited, and they are awarded on the basis of the technical area of interest, the student's experience and academic record. Interested students should contact the department.-Other financial aid opportunities also may be available through the University. Contact the FAU Financial Aid Office for more information.

### **Civil, Environmental and Geomatics Engineering**

The Department of Civil, Environmental and Geomatics Engineering requires the following remedial coursework for students with non-engineering backgrounds:

1. EGN, Statics;
2. EGN 3331, Strength of Materials;
3. Two civil and/or environmental engineering courses in the relevant area as determined by the

graduate supervisory committee;

4. Any other course dictated by the graduate supervisory committee.

## DOCTORAL PROGRAM

### TRANSPORTATION AND ENVIRONMENTAL ENGINEERING DOCTOR OF PHILOSOPHY (PH.D.)

*(Minimum of 72 credits required)*

(For this degree program, the GRE admission requirement is waived through and including fall 2023.)

The Department of Civil, Environmental and Geomatics Engineering offers a Doctor of Philosophy (Ph.D.) degree focused on urban mobility and environmental/water resources sustainability. This degree provides students with a fundamental and applied research-based education suitable for seeking employment in industry, government or academia.

#### Admission Requirements

Applicants should have a master's degree in Engineering, Science, Urban Planning, Transportation Logistics or Mathematics from an accredited college or university. A student with outstanding scholastic achievement who holds only a baccalaureate degree in Engineering, Science, Urban Planning, Transportation Logistics or Mathematics from an accredited college or university may be admitted directly to this Ph.D. program and be eligible to earn the *Master's en Passant*. Specific requirements for the B.S. to Ph.D. are found [here](#).

Requirements for students with previous degrees in non-engineering disciplines are found [here](#). Additional eligibility requirements are:

1. A cumulative GPA of 3.00;
2. Completion of at least two semesters of college calculus with grades of "B" or better;
3. Satisfaction of departmental minimum GRE score requirements; and
4. A letter of recommendation from their potential graduate advisor.

The Department of Civil, Environmental and Geomatics Engineering requires the following deficiency coursework for students without an engineering bachelor's degree from an accredited program: two fundamental engineering courses in the relevant area, as determined by the dissertation advisor or department graduate committee.

1. Applicants must have a 3.0 GPA (on a 4.0 scale) or better in the last 60 credits of work attempted coursework and must have an official transcript forwarded directly to the FAU Graduate College from each college-level institution attended;
2. Applicants must submit the Graduate Record Examination (GRE) score. The GRE requirement is waived with proof of passing the Fundamentals of Engineering (FE) or Principles and Practice of Engineering (PE) exam. The GRE requirement is waived for applicants who have a previous degree from FAU's College of Engineering and Computer Science;
3. A student from a non-English-speaking country is required to take the Test of English as a Foreign Language (TOEFL) and achieve a score of at least 550 (paper-based) or 213 (computer-based) or 79 (iBT). This requirement may be waived for students who have obtained a prior degree from a U.S. institution;
4. Applicants must submit to the Graduate College at least two letters of recommendation attesting to the student's ability to pursue with distinction a curriculum of advanced study and research in a chosen area;
5. Applicants must abide by the policies and regulations and the graduate admission requirements of the University as outlined in this University Catalog;
6. Conditional admission may be permitted if the above conditions are not met.

## Graduation Requirements

The degree will be conferred on candidates who have fulfilled the following requirements:

1. Completed the curriculum for the Ph.D. in Transportation and Environmental Engineering, which entails:
  - Successful completion of 72 credits of course and dissertation work beyond the baccalaureate degree with a minimum grade of "B" in each course. Up to 30 credits of coursework from an approved master's degree program may be applied;
  - Maintenance of a minimum 3.0 GPA in all coursework attempted for the degree. Failure to maintain a minimum GPA of 3.0 may result in creating an Academic Progression Plan (APP) for the student.

---

### Core Courses - two courses for 6 credits

Sustainability and Pollution Prevention	ENV 6932	3
Transportation System Analysis	TTE 6501	3

---

### Technical Electives - three courses for 9 credits

---

*Select three courses at the 5000 or 6000 level from the Department of Civil, Environmental and Geomatics Engineering. The courses must be approved by the dissertation advisor.*

---

### **Other Electives - two courses for 6 credits**

---

*Select two courses at the 5000, 6000 or 7000 level from the College of Engineering and Computer Science or other FAU colleges. No more than 3 credits of Directed Independent Study (DIS) or Advanced Research (CGN 7978). The courses must be approved by the dissertation advisor.*

---

### **Dissertation (CGN 7980) - 21 credits (minimum) for students entering with a master's degree**

---

*Up to 3 credits of graduate internship (EGN 5940) may be used to satisfy the 21-credit dissertation minimum requirement, with approval of the dissertation advisor.*

---

### **Graduate Seminar (CGN 5937) - two semesters**

2. Successful completion of a qualifying exam is required upon completion of 15 credits of core and technical elective courses;
3. Successful completion of a dissertation proposal defense is typically required within two semesters after passing the qualifying exam;
4. Prior to the dissertation defense, the student is required to have published or have accepted for publication a refereed research paper in a field of study deemed acceptable by the dissertation committee. A journal article is preferred, but a peer-reviewed conference paper is also acceptable;
5. Successful completion of an oral defense of the written doctoral dissertation based on original research in the student's area of specialization. The Dissertation/Supervisory Committee, the Department Chair and the Graduate College must have approved the dissertation and oral defense;
6. Complied with the University's Graduate Policies and Regulations and satisfied the University's Graduate Degree Requirements.

### **Dissertation/Supervisory Committee**

Upon acceptance into the Ph.D. Program, a student will select an advisor from the department faculty members to serve as chair of the Dissertation/Supervisory Committee. The student's Ph.D.

Dissertation/Supervisory Committee will have a minimum of four members with at least two of them having expertise in the research area. At least two committee members must be from the Department of Civil, Environmental and Geomatics Engineering. One member and/or co-chair of the committee can be from outside the department. Also the committee may include a member from another institution or

industry. The Dissertation/Supervisory Committee shall approve the dissertation proposal, monitor academic progress every semester, evaluate the dissertation defense and approve the final doctoral dissertation document.

### **Qualifying Exam**

Upon successful completion of core and technical elective courses, the student will be required to complete a qualifying examination. The examination is scheduled after the last day of the final examination period and before the end of the fall semester and the spring semester each year. The examination will be in two parts: One covering the core courses and one covering the technical elective subjects. An overall grade of 70 percent on each part of the written examination is passing. Students who score below 70 percent on certain parts of the written examination are given the option of retaking exams on areas in which they scored less than 70 percent. The student must score at least 70 percent in each subject that is retaken. Normally, two failures will result in the student's dismissal from the Ph.D. program. After passing the Qualifying Exam, the student advances to candidacy.

**Proposal Defense:** Within two semesters after successful completion of the Qualifying Exam, the candidate must orally defend the dissertation proposal to the Dissertation/Supervisory Committee for approval. The student should submit a written proposal report to the Dissertation/Supervisory Committee for review prior to the oral presentation.

**Dissertation Defense:** The doctoral dissertation shall be written in the format specified by the Graduate College. The dissertation must be defended orally and represent an original piece of research that advances the body of knowledge in the field. A written dissertation is submitted to the members of the committee who may approve, suggest additional work or reject the dissertation work after the defense.

## **TRANSPORTATION ENGINEERING GRADUATE CERTIFICATE**

*(Minimum of 12 credits required)*

Transportation engineering is an interdisciplinary field that integrates many aspects of engineering and computer science fundamentals, quantitative methods, and technology innovations associated with traffic operations, safety, intelligent transportation, supply chain and management. This is a practice-oriented program designed to assist engineers, planners, researchers and technical professionals in the launch or development of their careers in the transportation field.

### **Admission**

The graduate certificate in Transportation Engineering is open to all prospective students and industry professionals who hold a bachelor's degree in Engineering or a related field. Prospective students must have a 3.0 GPA to ensure equivalency to graduate standing. Students enrolled in this certificate program are classified as non-degree-seeking students. Credits earned by non-degree students in this program may be applied later to a master of science degree program, if students choose to pursue such a degree. Only up to one third of the non-degree credits with a grade of "B" or higher can be counted toward a graduate degree.

### Curriculum

Students must complete four courses from the following list or the equivalent with a minimum of a 3.0 GPA.

Intelligent Transportation Systems	TTE 6272	3
Transportation System Analysis	TTE 6501	3
Transportation and Supply Chain Systems	TTE 6507	3
Maritime Freight Operations	TTE 6508	3
Highway Engineering	TTE 6815	3

## TRANSPORTATION, LOGISTICS AND SUPPLY CHAIN MANAGEMENT GRADUATE CERTIFICATE

*(Minimum of 12 credits required)*

To provide students with the knowledge necessary in this age of connected supply chains, the Department of Information Technology and Operations Management (ITOM) in the College of Business and the Department of Civil, Environmental and Geomatics Engineering (CEGE) in the College of Engineering and Computer Science offer a jointly designed certificate in Transportation, Logistics and Supply Chain Management. This 12-credit certificate permits graduate students to expand their knowledge on the technical skills of transportation engineering and the analytical business decision-making skills of supply chain management. Details for this certificate program can be found in the [Interdisciplinary Programs](#) section of the catalog.

### Admission

This certificate program is open to students who have a bachelor's degree in business or engineering or

in a related field and a GPA of at least 3.0. Students must satisfy the prerequisites for each course in the program.

## Curriculum

All four required courses must be completed with a GPA of 3.0 or better. All course materials are in English; all international students must demonstrate proficiency in English to enter the program.

---

### Required Courses by Department

---

#### ITOM Department

*(select two from the list, one of which must be MAN 6596)*

## ENVIRONMENTAL ENGINEERING BACHELOR'S PROGRAM

Environmental engineers integrate principles of engineering, mathematics, earth science, soil science, life science and materials science with emphasis on the design and development of solutions to environmental challenges, such as improvement of water, air pollution control, safe disposal of wastes and the stewardship of our natural resources.

### Environmental Engineering Educational Objectives and Student Outcomes

The Environmental Engineering program strongly supports the educational objectives and learning outcomes of the College of Engineering and Computer Science (see the [Educational Objectives](#) and [Expected Student Learning Outcomes](#) subsections previously listed in this section).

Program Educational Objectives are broad statements that describe the expected accomplishments and professional status of Environmental Engineering graduates a few years beyond the baccalaureate degree.

The Environmental Engineering program at Florida Atlantic University is dedicated to graduating environmental engineers who, within a few years after graduation will:

- A. **Practice environmental engineering** within the general areas of water and wastewater, air quality, solid and hazardous waste, and groundwater and soils in the organizations that employ them;
- B. **Advance their knowledge of environmental engineering**, both formally and informally, by engaging in lifelong learning experiences including attainment of professional licensure and/or graduate studies;
- C. **Serve as effective professionals** based on strong interpersonal and teamwork skills, an understanding of professional and ethical responsibility and a willingness to take the initiative and seek progressive responsibilities;
- D. **Participate as leaders** in activities that support service to, and/or economic development of, the community, the region, the state and the nation.

The educational objectives of the Bachelor of Science in Environmental Engineering program are achieved by ensuring that graduates have the following characteristics or student outcomes:

1. An ability to identify, formulate and solve complex engineering problems by applying principles of engineering, science and mathematics;
2. An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety and welfare, as well as global, cultural, social, environmental and economic factors;
3. An ability to communicate effectively with a range of audiences;
4. An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental and societal contexts;
5. An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks and meet objectives;
6. An ability to develop and conduct appropriate experimentation, analyze and interpret data and use engineering judgment to draw conclusions;
7. An ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

[Link to Combined Programs](#)

## ENVIRONMENTAL ENGINEERING

### BACHELOR OF SCIENCE IN ENVIRONMENTAL ENGINEERING (B.S.E.V.)

*(Minimum of 120 credits required)*

#### Admission Requirements

All students must meet the minimum admission requirements of the University. Please refer to the [Admissions section](#) of this catalog.

All students must meet the preprofessional requirements listed [above](#) to be accepted in the Environmental Engineering program.

#### Prerequisite Coursework for Transfer Students

Students transferring to Florida Atlantic University must complete both lower-division requirements (including the requirements of the General Education Program) and requirements for the college and major. Lower-division requirements may be completed through the A.A. degree from any Florida public college, university or community college or through equivalent coursework at another regionally accredited institution. Before transferring and to ensure timely progress toward the baccalaureate degree, students must also complete the prerequisite courses for their major as outlined in the [Transition Guides](#) and below.

All courses not approved by the Florida Statewide Course Numbering System that will be used to satisfy requirements will be evaluated individually on the basis of content and will require a catalog course description and a copy of the syllabus for assessment.

#### Degree Requirements

The Bachelor of Science in Environmental Engineering degree will be awarded to students who:

1. Meet all general degree requirements of the University;
2. Complete the curriculum for the B.S. in Environmental Engineering degree (see below);
3. Take the Fundamentals of Engineering examination (the first of two exams necessary for professional licensure; contact the department for details).

#### Curriculum

The Bachelor of Science in Environmental Engineering degree requires 120 credits. For credit toward the degree, a grade of "C" or better must be received in each course listed. In addition, all prerequisites

for each mathematics, science or engineering course must be completed with a grade of "C" or better before enrollment is permitted. The degree components are listed below.

---

### General Education Program

College Writing 1 (1), (2)	ENC 1101	3
----------------------------	----------	---

College Writing 2 (1), (2)	ENC 1102	3

Professional Internship	IDS 3949	0-4
Directed Independent Research in Engineering and Computer Science (8)	EGN 4911	0-3
Directed Independent Research in Engineering and Computer Science	EGN 4915	1-3
<b>Total</b>		<b>9</b>

**Notes:**

1. Contributes to University Core Curriculum requirements.
2. Contributes to Writing Across Curriculum (Gordon Rule) writing requirement.

3. General Education Program courses, totaling 6 credits, must be selected to satisfy Writing Across Curriculum (Gordon Rule) writing requirements.
4. Contributes to Gordon Rule mathematics requirement.
5. Includes a 1-credit laboratory.
6. All design core courses contain a communications component (writing or speaking).
7. Grading: S/U.
8. PHY 2048, General Physics 1 (4 credits) is an acceptable substitute, but only 3 credits will apply toward the degree.
9. Prerequisites are ENV 4514 and SUR 4463.
10. Prerequisite is CGN 4803C.

### **Sample Four-Year Program of Study**

For the sample four-year program of study for the Bachelor of Science in Environmental Engineering, refer to the Curriculum Sheets and Flight Plans by major.

### **Internships**

Environmental Engineering students are strongly encouraged to gain practical experience through participation in internship opportunities. However, internships may only substitute for one environmental engineering technical elective with prior approval from the department chair and only if taken for a grade (IDS 3949, Professional Internship) for a total of three semesters. For more information, contact the FAU Career Center at 561-297-3533 or visit its [website](#).

## **COMBINED PROGRAMS**

### **ENVIRONMENTAL ENGINEERING TO CIVIL ENGINEERING BACHELOR OF SCIENCE IN ENVIRONMENTAL ENGINEERING (B.S.E.V.) TO MASTER OF SCIENCE (M.S.) COMBINED PROGRAM**

#### **Degree Program**

This program allows Bachelor of Science in Environmental Engineering (B.S.E.V.) students the opportunity to complete the Master of Science (M.S.) with Major in Civil Engineering in less time than the traditional M.S. program. This combined degree program is intended for academically talented students and high achievers. After application and admittance to the M.S. graduate program at the beginning of the senior year, up to 12 credits of approved graduate-level courses may be taken and

counted toward both the B.S.E.V. and the M.S. with Major in Civil Engineering degrees as long as the following criteria are met:

1. The student has met the minimum of 120 credits for the B.S.E.V. degree, and
2. The student has taken a minimum of 30 credits (5000 level or higher) for the M.S. with Major in Civil Engineering.

The combined degree program is 150 credits, 120 for the undergraduate degree and 30 for the master's degree.-Students complete the undergraduate degree first, taking no more than 12 credits of graduate coursework in their senior year, which will then be used to satisfy both degrees.

### **Prerequisite Coursework for Transfer Students**

Students transferring to Florida Atlantic University must complete both lower-division requirements (including the requirements of the General Education Program) and requirements for the college and major. Lower-division requirements may be completed through the A.A. degree from any Florida public college, university or community college or through equivalent coursework at another regionally accredited institution. Before transferring and to ensure timely progress toward the baccalaureate degree, students must also complete the prerequisite courses for their major as outlined in the *Transition Guides*.

All courses not approved by the Florida Statewide Course Numbering System that will be used to satisfy requirements will be evaluated individually on the basis of content and will require a catalog course description and a copy of the syllabus for assessment.

### **To be eligible for the joint B.S.E.V./M.S. program, students must:**

1. Have a cumulative GPA of 3.25 or higher (FAU and transfer courses);
2. Have a total institution GPA of 3.25 or higher (FAU courses); and
3. Formally apply to the joint program, completing the admissions process at least one semester prior to beginning the M.S. portion of the program.

## **BIOLOGICAL AND PHYSICAL SCIENCES TO CIVIL, ENVIRONMENTAL OR GEOMATICS ENGINEERING TO CIVIL ENGINEERING BACHELOR OF ARTS (B.A.) OR BACHELOR OF SCIENCE (B.S.) TO SECOND BACHELOR OF SCIENCE (B.S.) TO MASTER OF SCIENCE (M.S.) COMBINED PROGRAM**

Details for this [combined degree program](#) are listed in the [Wilkes Honors College](#) section.

## GEOMATICS ENGINEERING BACHELOR'S PROGRAM

The program of study leading to the Bachelor of Science in Geomatics Engineering (B.S.G.E.) deals with designing solutions to measure, map, model, analyze and graphically display the real world. Graduates will explore cutting edge technology in image processing, digital photogrammetry, remote sensing, satellite-based global positioning, geographic information systems, laser scanning and digital mapping.

The B.S.G.E. program is accredited by the Engineering Accreditation Commission of ABET, <http://www.abet.org>.

Students complete coursework in basic science and mathematics, engineering sciences and the main disciplines in geomatics engineering. Because of the major impact geomatics engineers have on society, the curriculum also requires students to complete the General Education [Program](#). This area of study also offers a minor in Geomatics Engineering and a certificate in Surveying and Mapping.

### Geomatics Engineering Educational Objectives

Program Educational Objectives are broad statements that describe the expected accomplishments and professional status of Geomatics Engineering graduates a few years beyond the baccalaureate degree.

The Geomatics Engineering Program at Florida Atlantic University is dedicated to graduating geomatics engineers who, within a few years after graduation will:

- A. **Practice geomatics engineering** within the general areas of boundary and land surveying, geographic information systems (GIS), photogrammetry, remote sensing, mapping, geodesy, and global navigation satellite systems in the organizations that employ them;
- B. **Advance their knowledge of geomatics engineering**, both formally and informally, by engaging in lifelong learning experiences, including attainment of professional licensure and/or graduate studies.
- C. **Serve as effective professionals**, based on strong interpersonal and teamwork skills, an understanding of professional and ethical responsibility, and a willingness to take the initiative and seek progressive responsibilities.
- D. **Participate as leaders** in activities that support service to, and/or economic development of, the community, the region, the state and the nation.

### Geomatics Engineering Student Outcomes

The educational objectives of the Bachelor of Science in Geomatics Engineering program are achieved by ensuring that graduates have the following characteristics or student outcomes:

1. An ability to identify, formulate and solve complex engineering problems by applying principles of engineering, science and mathematics;
2. An ability to apply engineering design to produce solutions that meet specific needs with consideration of public health, safety and welfare, as well as global, cultural, social, environmental and economic factors;
3. An ability to communicate effectively with a range of audiences;
4. An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental and societal contexts;
5. An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks and meet objectives;
6. An ability to develop and conduct appropriate experimentation, analyze and interpret data and use engineering judgment to draw conclusions;
7. An ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

## **GEOMATICS ENGINEERING**

### **BACHELOR OF SCIENCE IN GEOMATICS ENGINEERING (B.S.G.E.)**

*(Minimum of 120 credits required)*

#### **Admission Requirements**

All students must meet the minimum admission requirements of the University. Please refer to the [Admissions section](#) of this catalog.

All students must meet the preprofessional requirements listed [above](#) in order to be accepted into the Geomatics Engineering program.

## Prerequisite Coursework for Transfer Students

Students transferring to Florida Atlantic University must complete both lower-division requirements (including the requirements of the IGeneral Education Program) and requirements for the college and major. Lower-division requirements may be completed through the A.A. degree from any Florida public college, university or community college or through equivalent coursework at another regionally accredited institution. Before transferring and to ensure timely progress toward the baccalaureate degree, students must also complete the prerequisite courses for their major as outlined in the [Transition Guides](#).

All courses not approved by the Florida Statewide Course Numbering System that will be used to satisfy requirements will be evaluated individually on the basis of content and will require a catalog course description and a copy of the syllabus for assessment.

## Degree Requirements

The Bachelor of Science in Geomatics Engineering degree will be awarded to students who:

1. Meet all general degree requirements of the University;
2. Complete the curriculum for the B.S.G.E. in Geomatics Engineering degree (see below);
3. Take the National Council of Examiners for Engineering and Surveying (NCEES) Fundamentals of Surveying Examination (the first of two exams necessary for the professional surveyors and mappers license). Contact Geomatics Engineering for details.

## Curriculum

The Bachelor of Science in Geomatics Engineering degree requires 120 credits. For credit toward the degree, a grade of "C" or better must be received in each course listed, except for humanities and social science courses not applied toward Writing Across Curriculum (Gordon Rule) writing requirements. In addition, all prerequisites for each mathematics, science or engineering course must be completed with a grade of "C" or better before enrollment is permitted. The degree components are listed below.

### Notes:

1. Contributes to University Core Curriculum requirements.
2. Contributes to Writing Across Curriculum (Gordon Rule) writing requirement.
3. General Education Program courses, totaling 6 credits, must be selected to satisfy Writing Across Curriculum (Gordon Rule) writing requirements.
4. Contributes to Gordon Rule mathematics requirement.
5. Includes a 1-credit laboratory.
6. Students pursuing the [GIS certificate](#) should consider taking these courses.
7. Grading: S/U.
8. PHY 2048, General Physics 1 (4 credits) is an acceptable substitute, but only 3 credits will apply toward the degree.

### Sample Four-Year Program of Study

For the sample four-year program of study for the Bachelor of Science in Geomatics Engineering, refer to the [Curriculum Sheets and Flight Plans](#) by major.

### Minors and Certificate Programs Appropriate for Geomatics Engineering

Various departments offer minors and certificate programs that augment a student's geomatics engineering education. Students are encouraged to pursue a minor or certificate, such as:

***Computer Science Minor*** (Department Electrical Engineering and Computer Science)

***Entrepreneurial Management Minor*** (College of Business)

***Surveying and Mapping Certificate Program*** , highly recommended (Department of Civil, Environmental and Geomatics Engineering)

***Geographic Information Systems Certificate Program*** , highly recommended (Department of

Geosciences)

Obtaining a minor or certificate will require completing credits beyond the 120 required for the B.S.G.E. in Geomatics Engineering. Contact the department offering the minor or certificate for more details.

### Internships

Students are strongly encouraged to gain practical experience through participation in internship opportunities. However, internships may only substitute for one technical elective with prior approval from the department chair and only if taken for a grade.

## GEOMATICS ENGINEERING UNDERGRADUATE MINOR

*(Minimum of 18 credits required)*

Students minoring in Geomatics Engineering will complete a minimum of 18 credits with a grade of "C" or better in each course. Of the 18 credits, a minimum of 15 must be earned at FAU. Selected courses must be checked for the proper requirements. The minor is available to all full-time FAU students pursuing a declared major.

---

### Required Courses (3 credits)

Geomatics	SUR 3103	2
Geomatics Lab	SUR 3103L	1

---

### Select additional courses from below for a minimum of 15 credits.

Digital Photogrammetry Principles and Applications (2)	SUR 4331C	3
Measurement Theory and Data Adjustments (2)	SUR 3520	3
Automated Surveying and Mapping (2)	SUR 3141	2
Automated Surveying and Mapping Lab (2)	SUR 3141L	1
Subdivision Design	SUR 4463	2

---

Land Subdivision and Platting Lab (2)	SUR 3463L	1
Engineering and Construction Surveying (3)	SUR 3205	2
Engineering and Construction Surveying Lab (3)	SUR 3205L	1
Geodesy and Geodetic Positioning (3)	SUR 4530	2
Geodesy and Geodetic Positioning Lab (3)	SUR 4530L	1
Cadastral Principles and Legal Aspects (2)	SUR 4403	3
Principles of Geographic Information System	GIS 4043C	3
Introduction to Laser Mapping Technology	CCE 4514C	3
Any other Surveying or Mapping Technical Elective as determined by the department		3

**Notes:**

(1) Requires knowledge of geometry and trigonometry.

(2) Requires SUR 3103/SUR 3103L, Geomatics and Lab, as prerequisites.

(3) Requires SUR 3103/SUR 3103L, Geomatics and Lab and introductory statistics, as prerequisites.

(4) Requires SUR 3141/SUR 3141L, Automated Surveying and Mapping with Lab, as prerequisites.

## **SURVEYING AND MAPPING UNDERGRADUATE CERTIFICATE**

*(Minimum of 12 credits required)*

The Department of Civil, Environmental and Geomatics Engineering offers undergraduates a certificate in Surveying and Mapping. Students are entitled to the certificate by completing a minimum of 12 credits of coursework with a grade of "C" or better. Selected courses must be checked for the proper prerequisites. The certificate is open to both degree-seeking and non-degree-seeking students.

### **Required Courses (3 credits)**

Geomatics (1)	SUR 3103	2
---------------	----------	---

Geomatics Lab (1)	SUR 3103L	1
-------------------	-----------	---

---

**Select additional courses from below for a minimum of 9 credits.**

Digital Photogrammetry Principles and Applications (2)	SUR 4331C	3
--	-----------	---

Automated Surveying and Mapping (2)	SUR 3141	2
-------------------------------------	----------	---

Automated Surveying and Mapping Lab (2)	SUR 3141L	1

Geodesy and Geodetic Positioning (4)	SUR 4530	2
--------------------------------------	----------	---

Geodesy and Geodetic Positioning Lab (4)	SUR 4530L	1
--	-----------	---

Measurement Theory and Data Adjustments (3)	SUR 3520	3
---	----------	---

Engineering and Construction Surveying (4)	SUR 3205	2
--	----------	---

Engineering and Construction Surveying Lab (4)	SUR 3205L	1
--	-----------	---

Cadastral Principles and Legal Aspects	SUR 4403	3
--	----------	---

Thermal Infrared Remote Sensing and Applications	SUR 4384	3
--	----------	---

Principles of Geographic Information System	GIS 4043C	3
---	-----------	---

Introduction to Laser Mapping Technology	CCE 4514C	3
--	-----------	---

**Notes:**

(1) Requires knowledge of geometry and trigonometry.

(2) Requires SUR 3103/SUR 3103L, Geomatics and Lab, as prerequisites.

(3) Requires SUR 3103/SUR 3103L, Geomatics and Lab and introductory statistics, as prerequisites.

(4) Requires SUR 3141/SUR 3141L, Automated Surveying and Mapping with Lab, as prerequisites.

## COMBINED PROGRAMS

### GEOMATICS ENGINEERING TO CIVIL ENGINEERING

## BACHELOR OF SCIENCE IN GEOMATICS ENGINEERING (B.S.G.E.) TO MASTER OF SCIENCE (M.S.)

This program allows Bachelor of Science in Geomatics Engineering (B.S.G.E.) students the opportunity to complete the Master of Science (M.S.) with Major in Civil Engineering in less time than the traditional M.S. program. This combined degree program is intended for academically talented students and high achievers. After application and admittance to the M.S. graduate program at the beginning of the senior year, up to 12 credits of approved graduate-level courses may be taken and counted toward both the B.S.G.E. and the M.S. with Major in Civil Engineering degrees as long as the following criteria are met:

1. The student has met the minimum of 120 credits for the B.S.G.E. degree, and
2. The student has taken a minimum of 30 credits (5000 level or higher) for the M.S. with Major in Civil Engineering.

The combined degree program is 150 credits, 120 for the undergraduate degree and 30 for the master's degree. Students complete the undergraduate degree first, taking no more than 12 credits of graduate coursework in their senior year, which will then be used to satisfy both degrees.

### **To be eligible for the joint B.S.G.E./M.S. program, students must:**

1. Have a cumulative GPA of 3.25 or higher (FAU and transfer courses);
2. Have a total institution GPA of 3.25 or higher (FAU courses); and
3. Formally apply to the joint program, completing the admissions process at least one semester prior to beginning the M.S. portion of the program.

## **BIOLOGICAL AND PHYSICAL SCIENCES TO CIVIL, ENVIRONMENTAL OR GEOMATICS ENGINEERING TO CIVIL ENGINEERING BACHELOR OF ARTS (B.A.) OR BACHELOR OF SCIENCE (B.S.) TO SECOND BACHELOR OF SCIENCE (B.S.) TO MASTER OF SCIENCE (M.S.) COMBINED PROGRAM**

Details for this [combined degree program](#) are listed in the [Wilkes Honors College](#) section.

## ELECTRICAL ENGINEERING AND COMPUTER SCIENCE

### **Faculty:**

Zhuang, H., Chair; Kalva, H., Associate Chair; Aalo, V.; Agarwal, A.; Alhalabi, B. A.; Asghar, W.; Assis, R.; Azarderakhsh, R.; Bagby, J.; Batalama, S.; Bullard, L. A.; Cardei, I. E.; Cardei, M.; Cooper, R. B.; Emeritus; DeGiorgio, M.; Erdol, N.; Fernandez, E. B.; Furht, B.; Gazourian, M. G., Emeritus.; Ghoraani, B.; Groff, D.; Hallstrom, J.; Hsu, S. C., Emeritus; Huang, S.; Ilyas, M.; Khoshgoftaar, T. M.; Larrondo-Petrie, M.; Liu, F. H.; Mahgoub, I.; Marcovitz, A., Emeritus; Marques, O.; Messenger, R. A., Emeritus; Neelakanta, P.; Ni, Z.; Nojournian, M.; Pados, D.; Pandya, A. S.; Pavlovic, M.; Peterson, V.; Raviv, D.; Rhodes, W., Emeritus; Roth, Z.; Shankar, R.; Sklivanitis, G.; Solomon, M. K., Emeritus; Sorgente, T.; Taebi, S.; Tang, Y.; Ungvichian, V., Emeritus; Wang, D.; Yang, K.; Zhong, X.; Zhu, X.; Zilouchian, A.

The Department of Electrical Engineering and Computer Science offers programs in Biomedical Engineering, Computer Engineering, Computer Science, Data Science and Analytics, and Electrical Engineering. Specifically, the department offers undergraduate programs of study leading to the degrees of Bachelor of Arts in Computer Science (B.A.C.S.), Bachelor of Science with major in Data Science and Analytics, Bachelor of Science in Computer Science (B.S.C.S.), Bachelor of Science in Computer Engineering (B.S.C.E.), and Bachelor of Science in Electrical Engineering (B.S.E.E.). Minors in Artificial Intelligence and Computer Science are also available, as well as a certificate in Artificial Intelligence. A [Data Science certificate](#) program, designed jointly by the departments of Electrical Engineering and Computer Science and Mathematics and Statistics, provides an in-depth study of the methods to manage, analyze and extract knowledge from data. A [minor and certificate in Cybersecurity](#), designed jointly by the departments of Electrical Engineering and Computer Science, Information Technology and Operations Management in the College of Business and Mathematics and Statistics in the College of Science, offer three unique tracks, each focused on a particular area of cybersecurity.

In the graduate area, the department offers a Master of Science (M.S.) with major in Biomedical Engineering, Master of Science (M.S.) with major in [Artificial Intelligence](#) with thesis, Master of Science (M.S.) with major in Artificial Intelligence without thesis, Master of Science with major in Computer Engineering with thesis, Master of Science with major in Computer Engineering without thesis, Master of Science with major in Computer Science with thesis, Master of Science with major in Computer Science without thesis, [Master of Science with Major in Data Science and Analytics](#), and Master of Science with major in Electrical Engineering. A certificate in Biomedical Engineering is also available, as well as a minor and certificate in Artificial Intelligence.

Prospective doctoral students may choose from a Doctor of Philosophy (Ph.D.) with major in Computer Engineering, Doctor of Philosophy (Ph.D.) with major in Computer Science and Doctor of Philosophy

with major in Electrical Engineering (Ph.D.).

To encourage undergraduates to pursue a graduate education, the department offers a number of combined programs, including a B.S.C.E. to M.S. degree program in Computer Engineering, a B.S.C.S. to M.S. degree program in Computer Science, a B.S.E.E. to M.S. degree program, and a combined program leading to an M.S. in Biomedical Engineering that is offered to B.S. candidates in any College of Engineering and Computer Science major. These programs permit students to complete both a bachelor's and a master's degree within five years.

For students interested in combining the broad systems orientation provided in the Bachelor of Science in Electrical Engineering (B.S.E.E.) with focus in Computer Engineering, the department offers the five-year B.S.E.E./M.S.Cp.E. (Master of Science in Computer Engineering). Program details are listed in the Electrical Engineering section under Combined Programs.

Below, the Computer Science and Computer Engineering programs are described first, followed by the Electrical Engineering program and the Biomedical Engineering program.

[Link to Electrical Engineering Programs](#)

[Link to Information Technology and Management Program](#)

### **Cooperative Education Program**

Cooperative Education is a unique educational program in which students integrate classroom study with a period of paid, supervised work experience related to their academic major. At FAU, the Co-Op program is a structured learning situation in which students apply concepts learned in the classroom to "real world" work environments. The program is available on an optional basis to all students in accordance with the description shown in the [Student Services and Activities](#) section of this catalog. Students in the College of Engineering and Computer Science must meet the following requirements:

1. Students who wish to participate in the Co-Op program in the College of Engineering and Computer Science should contact the [Division of Engineering Student Services and Advising \(DESSA\)](#).
2. The College of Engineering and Computer Science Co-Op program operates on a part-time basis, 20 hours per week, no more, no less. In this program, the work is specifically tied to the student's field/major and must be secured through the [FAU Career Center](#).
3. The College of Engineering and Computer Science Co-Op program is geared primarily toward

students who enter as freshmen, as opposed to transfer students. As a result, incoming freshmen cohorts receive primacy with respect to assignments. Specific major requirements are found in the [College of Engineering and Computer Science Co-Op Program Manual](#).

4. The grade will be reported on the transcript as pass or fail.

To learn more about the Co-Op program students in the College of Engineering and Computer Science should contact the [Career Development Center](#).

## COMPUTER SCIENCE AND COMPUTER ENGINEERING

### **Mission Statement**

The common mission of the Computer Science and Computer Engineering Programs is:

1. To produce graduates with a strong grasp of fundamentals of computer science and computer engineering, knowledge in technical specialty areas and an appreciation of the power of collaborative effort applied to problem solving.
2. To offer courses and programs that stimulate innovation and enhance the ability of graduates to achieve high levels of professional development and to succeed in a competitive marketplace.
3. To conduct research in selected areas and to integrate research results with teaching activities.
4. To provide service to the profession and community and forge strategic alliances with other professions.

## BACHELOR'S PROGRAMS

### **Educational Objectives and Outcomes for the Bachelor's Programs**

#### ***Computer Science***

Graduates of the baccalaureate program in Computer Science are prepared for careers with software companies, developing applications or systems software, or with companies developing software in a scientific or engineering environment.

The degree focuses on the software aspects of computing by building on a set of core courses in areas such as algorithms, machine organization, programming language concepts, theory, computer systems and software engineering.

Based on the Educational Objectives of the College of Engineering and Computer Science, the department has established the following student learning outcomes for the baccalaureate program in Computer Science. Graduates of the program will have an ability to:

1. Analyze a complex computing problem and apply principles of computing and other relevant disciplines to identify solutions.
2. Design, implement and evaluate a computing-based solution to meet a given set of computing requirements in the context of the program's discipline.
3. Communicate effectively in a variety of professional contexts.
4. Recognize professional responsibilities and make informed judgments in computing practice based on legal and ethical principles.
5. Function effectively as a member of leader of a team engaged in activities appropriate to the program's discipline.

6. Apply computer science theory and software development fundamentals to produce computing-based solutions.

The Bachelor of Science degree program in Computer Science is accredited by the Computing Accreditation Commission of ABET.

### ***Computer Engineering***

Graduates of the baccalaureate program in Computer Engineering are prepared for careers in the computer industry as well as with companies that integrate computers into more complex products.

The degree focuses on the system and hardware aspects and the interaction of hardware with software by building on courses in microprocessors, computer design and design automation on the one hand, and on data structures and algorithms, operating systems and software engineering on the other.

Based on the Educational Objectives of the College of Engineering and Computer Science, the department has established the following student learning outcomes for the baccalaureate program in Computer Engineering. Graduates will have:

1. An ability to identify, formulate and solve complex engineering problems by applying principles of engineering, science and mathematics.
2. An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety and welfare, as well as global, cultural, social, environmental and economic factors.
3. An ability to communicate effectively with a range of audiences.
4. An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental and societal contexts.
5. An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks and meet objectives.
6. An ability to develop and conduct appropriate experimentation, analyze and interpret data and use engineering judgment to draw conclusions.
7. An ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

While undergraduate students make some use of University computing facilities, the department has its own facilities that are available for undergraduates and are used for assignments in many courses. A PC-based lab provides students with hands-on experience in logic design, peripheral interfacing and software design for microprocessors. Undergraduates use the department's network of UNIX and PC workstations for coursework in areas such as programming, software development using advanced

tools, artificial intelligence, simulation and graphics.

The Bachelor of Science in Computer Engineering program is accredited by the Engineering Accreditation Commission of ABET.

[Link to Professional Bachelor of Arts in Computer Science](#)

[Link to Bachelor of Science with Major in Data Science and Analytics](#)

## COMPUTER SCIENCE

### BACHELOR OF ARTS IN COMPUTER SCIENCE (B.A.C.S.)

*(Minimum of 120 credits required)*

#### **Admission Requirements**

All students must meet the minimum admission requirements of the University. Please refer to the [Admissions](#) section of this catalog.

The Bachelor of Arts in Computer Science (B.A.C.S.) with Major in Computer Science is intended for students interested in software development. The program prepares students for a career in the field of Computer Science with focus on software development. The B.A. in Computer Science is accredited by the Southern Association of Colleges and Schools Commission on Colleges, but unlike FAU's B.S. in Computer Science, it is not accredited by the Engineering Accreditation Commission of ABET.

#### **Prerequisite Coursework for Transfer Students**

Students transferring to Florida Atlantic University must complete both lower-division requirements (including the requirements of the General Education Program) and requirements for the college and major. Lower-division requirements may be completed through an Associate in Arts (A.A.) degree from any Florida public college, university or community college or through equivalent coursework at another regionally accredited institution. Before transferring and to ensure timely progress toward the baccalaureate degree, students must also complete the prerequisite courses for their major as outlined in the [Transition Guides](#) .

All courses not listed with the Florida Statewide Course Numbering System that will be used to satisfy requirements will be evaluated individually on the basis of content and will require a catalog course description and a copy of the syllabus for assessment.

## Degree Requirements

The minimum number of credits required for the Bachelor of Arts in Computer Science (B.A.C.S.) degree is 120 credits. This degree will be awarded to students who satisfy all admission and degree requirements for the department.

Students entering FAU with fewer than 30 credits must satisfy the course requirements specified in the catalog section, [Degree Requirements](#). Students entering FAU with more than 30 credits (transfer students) must see the undergraduate advisor for an evaluation of courses taken at another school. The general education requirements are satisfied normally if a student has an Associate in Arts (A.A.) degree from a Florida community or state college.

Students must complete 36 credits of *B.A.C.S.* courses and 21 credits of *Computer Science Electives* with a grade of "C" or better.

**Pass/Fail Grades:** Courses taken as pass/fail are not accepted for Computer Science students.

---

<b>Total</b>	<b>120</b>	

### Computer Science Electives

All students must take 21 credits of approved elective courses. Certain 3000- and 4000-level courses

offered by the Electrical Engineering and Computer Science Department may be used as Computer Science electives. Certain 5000- or 6000-level courses offered by the Electrical Engineering and Computer Science Department may be taken as Computer Science electives. Students must see an advisor for a current list of elective courses. Students seeking a specialty may consider taking electives in areas of study such as internet technology, software engineering, artificial intelligence and machine learning, and cybersecurity.

Topics in Computer Science and Engineering	COT 4930	1-3
Topics in Computer Science	COT 5930	1-3

Students are permitted to take no more than the equivalent of one course (3 credits) of the following three courses as a Computer Science elective.

Professional Internship	IDS 3949	0-4
Directed Independent Study	COT 4900	1-3
Directed Independent Research in Engineering and Computer Science	EGN 4915	1-3

### **Professional Internship**

Students must have completed COP 3410C, Data Structures and Algorithm Analysis with Python, with a minimum grade of "C" before becoming eligible to register for a professional internship. Approval through the Career Center is required prior to enrollment.

### **Directed Independent Study and Directed Independent Research**

Students must have completed COP 3410C, Data Structures and Algorithm Analysis with Python, with a minimum grade of "C" before becoming eligible to register for directed independent study or directed independent research.

## **SECOND BACHELOR'S B.A.C.S. DEGREE**

This program is for those individuals with a degree in another discipline who are seeking a Bachelor of Arts in Computer Science degree at FAU.

## Admission Requirements

Students seeking a bachelor's degree or graduate degree in another discipline must satisfy all admission requirements of the first B.A.C.S. at FAU.

## Degree Requirements

The minimum number of FAU credits needed to earn a second bachelor's degree (B.A.C.S.) is 30 credits at the 3000 level or higher.

1. Students must have completed 36 credits of core courses in the B.A.C.S. program. Each course must be completed with a minimum grade of "C."
2. Students must have completed 6 credits of Computer Science electives. Each course must be completed with a minimum grade of "C."
3. Students must have completed the math prerequisites necessary to take the core and elective courses in the program.

## COMPUTER SCIENCE

### BACHELOR OF SCIENCE IN COMPUTER SCIENCE (B.S.C.S.)

*(Minimum of 120 credits required)*

## Admission Requirements

All students must meet the minimum admission requirements of the University. Please refer to the [Admissions section](#) of this catalog.

All students must meet the preprofessional requirements listed [above](#) in order to be accepted into the Computer Science program.

## Prerequisite Coursework for Transfer Students

Students transferring to Florida Atlantic University must complete both lower-division requirements (including the requirements of the General Education Program) and requirements for the college and major. Lower-division requirements may be completed through the A.A. degree from any Florida public college, university or community college or through equivalent coursework at another regionally accredited institution. Before transferring and to ensure timely progress toward the baccalaureate degree, students must also complete the prerequisite courses for their major as outlined in the [Transition Guides](#).

All courses not listed with the Florida Statewide Course Numbering System that will be used to satisfy

requirements will be evaluated individually on the basis of content and will require a catalog course description and a copy of the syllabus for assessment.

## Degree Requirements

The minimum number of credits required for the Bachelor of Science in Computer Science (B.S.C.S.) degree is 120 credits. All courses that count toward the degree must be completed with a grade of "C" or better. This degree will be awarded to students who satisfy all admission and degree requirements for the department. Items below are referenced in the table following the list. This degree program is available in person and fully online.

1. Students entering FAU with fewer than 30 credits must satisfy the course requirements specified in the catalog section, [Degree Requirements](#). Students entering FAU with more than 30 credits (transfer students) must see the undergraduate advisor for an evaluation of courses taken at another school. The general education requirements are satisfied normally if a student has an Associate in Arts (A.A.) degree from a Florida community or state college.
2. At least one course must have a laboratory component.

**Pass/Fail Grades:** Courses taken as pass/fail are not accepted for Computer Science students.

Network and Data Security	CNT 4411	3
<b>Subtotal</b>		<b>3</b>

### Electives

All students must take 18 credits of approved elective courses. Certain 3000- and 4000-level courses offered by the Electrical Engineering and Computer Science Department may be taken as Computer Science electives. Certain 5000- or 6000-level courses offered by the Electrical Engineering and Computer Science Department may be taken as Computer Science electives. Students must see an advisor for a current list of approved elective courses.

---

### *Computer Science Electives* **18**

Students seeking a specialty may consider taking electives in areas of study, such as internet technology, software engineering, artificial intelligence and machine learning and cybersecurity.

*Students are permitted to take no more than the equivalent of one course (3 credits) of the following three courses as a Computer Science elective.*

Directed Independent Study	COT 4900	1-3
Professional Internship	IDS 3949	0-4
Directed Independent Research in Engineering and Computer Science	EGN 4915	1-3

### Professional Internship

Students must have completed COP 3530C, Data Structures and Algorithm Analysis, with a minimum grade of "C" before becoming eligible to register for a professional internship. Approval through the Career Center is required prior to enrollment.

### Directed Independent Study and Directed Independent Research in Engineering and Computer Science

Students must have completed COP 3530C, Data Structures and Algorithm Analysis, with a minimum

grade of "C" before becoming eligible to register for directed independent study or directed independent research.

Students must make sure that they have the necessary minimum of 120 credits for graduation.

### **Sample Four-Year Program of Study**

For the sample four-year program of study for the Bachelor of Science with Major in Computer Engineering, refer to the [Curriculum Sheets and Flight Plans](#) by major.

## **SECOND BACHELOR'S B.S.C.S. DEGREE**

This program is for those individuals with a degree in another discipline who are seeking a Bachelor of Science in Computer Science degree at FAU.

### **Admission Requirements**

Students seeking a bachelor's degree or graduate degree in another discipline must satisfy all admission requirements of the first bachelor's degree in Computer Science at FAU.

### **Degree Requirements**

1. Earn a minimum of 30 credits in residence at FAU, at the 3000 level or higher, beyond those required for the first degree. Students earning two degrees simultaneously (a dual degree) must earn at least 150 credits.
2. Earn at least 75 percent of all upper-division credits required for the major from FAU.
3. Students must have completed at least 15 credits in mathematics including discrete mathematics with mathematical rigor at least equivalent to introductory calculus. Each course must be completed with a minimum grade of "C."
4. Students must have completed at least 6 credits (or equivalent) in natural science coursework intended for science and engineering majors. At least one course must have a laboratory component. Each course must be completed with a minimum grade of "C."
5. Students must complete 54 credits of core courses listed in the Computer Science degree program. Each course must be completed with a minimum grade of "C."

## **COMPUTER SCIENCE UNDERGRADUATE MINOR**

*(Minimum of 15 credits required)*

The minor in Computer Science is available to all FAU undergraduates who are not majoring in Computer Science or Computer Engineering. This minor requires completion of five courses (15 credits) with a minimum grade of "C." Students must ensure that they have completed the prerequisites for the selected courses.

Introduction to Software Design*	CEN 3062C	3
Data Structures and Algorithm Analysis with Python	COP 3410C	3
Select three upper-division courses from the Electives table.		9
<b>Total**</b>		<b>15</b>

### Elective Courses\*\*\*

Applied Machine Learning and Data Mining	CAP 4612	3
Introduction to Deep Learning	CAP 4613	3
Introduction to Artificial Intelligence	CAP 4630	3
Introduction to Data Mining and Machine Learning	CAP 4770	3
Introduction to Data Science and Analytics	CAP 4773	3
Principles of Software Engineering	CEN 4010	3
Introduction to Database Structures	COP 3540	3
Introduction to Web Programming	COP 3834	3
Systems Programming with C++	COP 3275C	3
Python Programming	COP 4045	3
Object-Oriented Design and Programming	COP 4331	3
Computer Operating Systems	COP 4610	3
Advanced Database Systems	COP 4703	3
Design and Analysis of Algorithms	COT 4400	3

\* Requires prerequisite: COP 3035C with minimum grade of "C"

\*\* At least 75 percent of credits earned must be from FAU.

\*\*\* See program advisor for a complete list of elective courses.

Acknowledgment of a minor in Computer Science is official upon successful completion of an FAU degree program.

## COMPUTER ENGINEERING

### BACHELOR OF SCIENCE IN COMPUTER ENGINEERING (B.S.C.E.)

*(Minimum of 123 credits required)*

#### Admission Requirements

All students must meet the minimum admission requirements of the University. Please refer to the [Admissions section](#) of this catalog.

All students must meet the preprofessional requirements listed [above](#) in order to be accepted into the Computer Engineering program.

#### Prerequisite Coursework for Transfer Students

Students transferring to Florida Atlantic University must complete both lower-division requirements (including the requirements of the General Education Program) and requirements for the college and major. Lower-division requirements may be completed through the A.A. degree from any Florida public college, university or community college or through equivalent coursework at another regionally accredited institution. Before transferring and to ensure timely progress toward the baccalaureate degree, students must also complete the prerequisite courses for their major as outlined in the [Transition Guides](#) and below.

All courses not approved by the Florida Statewide Course Numbering System that will be used to satisfy requirements will be evaluated individually on the basis of content and will require a catalog course description and a copy of the syllabus for assessment.

#### General Degree Requirements

The minimum number of credits required for the Bachelor of Science in Computer Engineering (B.S.C.E.) degree is 123 credits. All courses that count toward the degree must be completed with a

grade of "C" or better. This degree will be awarded to students who meet all admission and degree requirements of the department and the University. Notes below are referred to in the tables following the list.

**Notes:**

Students entering FAU with fewer than 30 credits must satisfy the course requirements specified in the catalog section, [Degree Requirements](#). Students entering FAU with more than 30 credits (transfer students) must see the undergraduate advisor for an evaluation of courses taken at another school. The general education requirements are normally satisfied if a student has an Associate in Arts (A.A.) degree from a Florida community or state college. Once students earn beyond 30 credits, they must substitute EGN 1002, Fundamentals of Engineering, with a computer engineering elective.

Foundations of Global Citizenship	6
Foundations of Humanities	6
<b>Subtotal</b>	<b>24</b>

### *Mathematics*

Calculus with Analytic Geometry 1	MAC 2311	4
Calculus with Analytic Geometry 2	MAC 2312	4
Calculus with Analytic Geometry 3	MAC 2313	4
Engineering Math 1	MAP 3305	3
<b>Subtotal</b>		<b>15</b>

### *Science*

General Physics for Engineers 1	PHY 2048	4
General Physics Lab 1	PHY 2048L	1
Physics for Engineers 2	PHY 2044	3
General Physics Lab 2	PHY 2049L	1
<b>Subtotal</b>		<b>9</b>

### **Core Courses**

All students must take the following core courses, which total 60 credits.

#### *Common Core*

Introduction to Data Science and Analytics	CAP 4773	3
Computer Logic Design	CDA 3203	3
Computer Architecture	CDA 4102	3

Introduction to Programming in Python	COP 3035C	3
Systems Programming with C++	COP 3275C	3
Foundations of Computing*	COT 2000C	3
Stochastic Processes and Random Signals**	EEE 4541	3
RI: Engineering Design 1	EGN 4950C	3
RI: Engineering Design 2	EGN 4952C	3
<b>Subtotal</b>		<b>27</b>

\* MAD 2104 may be substituted for COT 2000C.

\*\* STA 4821 may be substituted for EEE 4541.

### *Computer Science - Computer Engineering Core*

Introduction to Software Design	CEN 3062C	3
Principles of Software Engineering	CEN 4010	3
Communication Networks	CNT 4007	3
Data Structures and Algorithm Analysis	COP 3530C	3
Computer Operating Systems	COP 4610	3
<b>Subtotal</b>		<b>15</b>

### *Computer Engineering - Electrical Engineering Core*

Design of Digital Systems and Lab	CDA 4240C	3
Electronics 1	EEE 3300	3
Circuits 1	EEL 3111	3

Electronics Laboratory 1	EEL 3118L	3
Signals and Digital Filter Design	EEL 3502	3
Fundamentals of Engineering	EGN 1002	3
<b>Subtotal</b>		<b>18</b>

---

### *Computer Engineering Core*

Introduction to Embedded System Design	CDA 4630	3
<b>Subtotal</b>		<b>3</b>

### **Semi-Core Courses**

All students must take 3 credits from the Semi-Core Group.

---

### *Computer Engineering Semi-Core Group (Select one course)*

Introduction to VLSI Design	CDA 4210	3
Hardware Security	CDA 4323	3
Electronics 2 and Lab	EEE 4361C	3
<b>Subtotal</b>		<b>3</b>

### **Electives**

All students must take 9 credits of approved elective courses. Certain 3000- and 4000-level courses offered by the Electrical Engineering and Computer Science Department may be taken as Computer Engineering electives. Certain 5000- or 6000-level courses offered by the Electrical Engineering and Computer Science Department may be taken as Computer Engineering electives. Students must see an advisor for a current list of approved elective courses.

---

### *Computer Engineering Electives* **9**

*Students are permitted to take no more than the equivalent of one course (3 credits) of the following three courses as a Computer Engineering elective.*

Professional Internship	IDS 3949	0-4
Directed Independent Study	COT 4900	1-3
Directed Independent Research in Engineering and Computer Science	EGN 4915	1-3

### Professional Internship

Students must have completed COP 3530C, Data Structures and Algorithm Analysis, with a minimum grade of "C" before becoming eligible to register for a professional internship. Approval through the Career Center is required prior to enrollment.

### Directed Independent Study and Directed Independent Research

Students must have completed COP 3530C, Data Structures and Algorithm Analysis, with a minimum grade of "C" before becoming eligible to register for directed independent study or directed independent research.

### Sample Four-Year Program of Study

For the sample four-year program of study for the Bachelor of Science in Computer Engineering, refer to the [Curriculum Sheets and Flight Plans](#) by major.

## SECOND BACHELOR'S B.S.C.E. DEGREE

This program is for those individuals with a degree in another discipline who are seeking a Bachelor of Science in Computer Engineering degree at FAU.

### Admission Requirements

Students seeking a bachelor's degree or graduate degree in another discipline must satisfy all admission requirements of the first bachelor's degree in Computer Engineering at FAU.

### Degree Requirements

1. Earn a minimum of 30 credits in residence at FAU, at the 3000 level or higher, beyond those required for the first degree. Students earning two degrees simultaneously (a dual degree) must earn at least 150 credits.
2. Earn at least 75 percent of all upper-division credits required for the major from FAU.

- Students must have completed at least 15 credits in mathematics, 9 credits in science and ~~63~~ 60 credits in core courses listed in the Computer Engineering degree program. Each course must be completed with a minimum grade of "C."

### **Undergraduate Transfer Students**

Prior to the academic advising session, course syllabi need to be submitted to the Undergraduate Academic Advisor for evaluation of possible transfer credits. Course descriptions can be provided by submitting an undergraduate catalog from the post-secondary institution attended, submitting course descriptions from an online catalog (requires that the post-secondary institution web address be at the bottom of each page), or providing course syllabi. The Academic Advisor evaluation needs to be performed even if a student has an evaluation by an approved agency.

## **DATA SCIENCE AND ANALYTICS BACHELOR OF SCIENCE (B.S.)**

### **Data Science in Business Concentration**

### **Data Science and Engineering Concentration**

### **Data Science in the Natural Sciences Concentration**

The Bachelor of Science with Major in Data Science and Analytics (BSDSA) program is a multi-college, interdisciplinary program administered jointly by the Department of Mathematics and Statistics in the Charles E. Schmidt College of Science, the Department of Electrical Engineering and Computer Science in the College of Engineering and Computer Science, the Department of Information Technology and Operations Management (ITOM) in the College of Business, the Department of Political Science in the Dorothy F. Schmidt College of Arts and Letters and the School of Criminology and Criminal Justice in the College of Social Work and Criminal Justice. For details about this program, see the [Interdisciplinary Programs](#) section of this catalog.

## **ARTIFICIAL INTELLIGENCE UNDERGRADUATE MINOR**

*(Minimum of 15 credits required)*

The minor in Artificial Intelligence (AI) is open to all undergraduate students at Florida Atlantic University. The minor is awarded upon graduation from an undergraduate program at FAU; it is not awarded independently of any degree program. Requirements for the minor include completion of five courses (15 credits) with a minimum grade of "C." This minor requires five courses that have not been

counted in any other minor or certificate program within the College of Engineering and Computer Science.

The minor has two tracks: an Applications track and a Development track. The Applications track is open to students with no prior programming experience, but who are interested in learning programming and how to use the tools and algorithms of AI. The Development track is intended for students proficient in programming who will develop new algorithms and mechanisms in AI. Students in both tracks are expected to have completed a statistics course.

Students must ensure that they have the prerequisites for the selected courses. Students cannot apply for both the Minor in AI and the Certificate in AI.

---

### **Applications Track - 15 credits**

(Not open to undergraduate students in the Department of Electrical Engineering and Computer Science.)

---

#### ***Core Courses - 9 credits***

Computer Programming and Data Literacy for Everyone	COP 1031C	3 <b>or</b>
Introduction to Programming in Python	COP 3035	3
Applications of Artificial Intelligence	CAP 2603	3
Applied Machine Learning and Data Mining	CAP 4612	3

---

#### ***Elective Courses - 6 credits - Select two courses from the Electives Table***

---

### **Development Track - 15 credits**

---

#### ***Core Courses - 9 credits***

Data Structures and Algorithm Analysis with Python	COP 3410	3 <b>or</b>
Data Structures and Algorithm Analysis	COP 3530	3
Introduction to Artificial Intelligence	CAP 4630	3

---

***One of the following three courses***

Introduction to Deep Learning	CAP 4613	3
Introduction to Data Mining and Machine Learning	CAP 4770	3
Introduction to Data Science and Analytics	CAP 4773	3

***Elective Courses - 6 credits - Select two courses from the Electives Table*****Electives Table - Additional courses may be used as electives with prior approval from advisor**

Tools for Data Science	CAP 2751	3
Introduction to Deep Learning	CAP 4613	3
Trustworthy Artificial Intelligence	CAP 4623	3
Introduction to Artificial Intelligence	CAP 4630	3
Introduction to Data Mining and Machine Learning	CAP 4770	3
Introduction to Data Science and Analytics	CAP 4773	3
Artificial Intelligence for Social Good	CCJ 3071	3
Special Topics (i.e., Robotic Applications)	EEL 4930	3

## ARTIFICIAL INTELLIGENCE UNDERGRADUATE CERTIFICATE

*(Minimum of 12 credits required)*

Over the past years, there has been dramatic progress in the rise of Artificial Intelligence (AI) and its use in the development of systems that can reason and respond to increasingly complex situations. AI is everywhere, and the changes enabled by this technology have just begun. AI is transforming every segment of American industry. It is making agriculture more precise and efficient, revealing new medical technologies, and bringing the prospect of autonomous transportation and advanced

manufacturing closer to reality. To become competitive, companies and corporations will have to embrace AI to some extent. These technological innovations are made possible by engineers and scientists with knowledge and expertise in the latest advancements in the field of AI. This 15-credit certificate provides students with knowledge and skills in the concepts, technologies and applications of artificial intelligence.

### Admissions

The program is open to students with any background. Students are expected to satisfy the prerequisite courses required for each course in the certificate curriculum. All five courses must be completed with a minimum grade of "C." This certificate requires five course that have not been counted in any other minor or certificate within the College of Engineering and Computer Science.

### Curriculum

The certificate has two tracks: an Applications track and a Development track. The Applications track is open to students with no prior programming experience, but who are interested in learning programming and how to use the tools and algorithms of AI. The Development track is intended for students proficient in programming who will develop new algorithms and mechanisms in AI. Students in both tracks are expected to have completed a statistics course.

---

#### Applications Track - 15 credits

**ARTIFICIAL INTELLIGENCE (AI) FOR CYBERSECURITY  
UNDERGRADUATE CERTIFICATE***(Minimum of 12 credits required)*

## Introduction

Cybersecurity involves studying methods, tools, mathematical principles and operational practices to safeguard the integrity of information, systems, and networks. Artificial Intelligence, leveraging its capacity to process extensive datasets, detect patterns, and dynamically respond to emerging threats in real-time, emerges as an indispensable tool for enhancing the security of information infrastructures, system functionalities, network architectures and cryptographic protocols.

This program aims to equip students with knowledge and tools that leverage AI technologies to develop more robust and efficient cybersecurity solutions, allowing for proactive identification and response to cyber threats.

The program has two tracks, one offered by the Department of Electrical Engineering & Computer Science in the College of Engineering and Computer Science. The other one is offered by the Department of Mathematics and Statistics in the College of Science.

## Computer Science Track

The Department of Electrical Engineering and Computer Science offers the AI for Cybersecurity Certificate with a track in Computer Science (CS). This 12-credit certificate program allows students to expand their knowledge and skills to meet the needs of the cybersecurity field in the AI era. The certificate is available to degree-seeking students, non-degree students and working professionals.

The CS track certificate will be granted to a student who completes four 3-credit courses as follows: two core courses, one 3-credit course from the cybersecurity elective list and one 3-credit course from the AI elective course list.

## Admission

Open to students who satisfy the prerequisites required for each course in the program with the grade C or better. All four courses in the certificate must be completed with the grade C or better. All course materials are in English.

---

### Required Core Courses

Artificial Intelligence for Cybersecurity	CAI 4802	3
Foundations of Cybersecurity	CNT 4403	3

**Cybersecurity Elective Courses. Select one from the approved course list. Additional courses may be used as substitutions with prior approval of the department.**

Trustworthy Artificial Intelligence	CAP 4623	3
Introduction to Cryptographic Engineering	CDA 4321	3
Applied Cryptography and Security	CIS 4634	3
Network and Data Security	CNT 4411	3

**Artificial Intelligence Elective Courses. Select one from the approved course list. Additional courses may be used as substitutions with prior approval of the department.**

Introduction to Deep Learning	CAP 4613	3
Introduction to Artificial Intelligence	CAP 4630	3
Introduction to Data Mining and Machine Learning	CAP 4770	3

### Mathematics Track

The Department of Mathematics and Statistics offers the AI for Cybersecurity Certificate with a track in Mathematics (Math). This 12-credit certificate program allows students to expand their knowledge and skills to meet the needs of the cybersecurity field in the AI era. The certificate is available to degree-seeking students, non-degree students and working professionals.

The Math track certificate will be granted to a student who completes four 3-credit courses as follows: one core course in AI, one core course in cryptography, and two 3-credit courses from the elective list.

### Admission

Open to students who satisfy the prerequisites required for each course in the program with the grade C or better. All four courses in the certificate must be completed with the grade C or better. All course materials are in English.

### Required Cryptography Course

Cryptography and Information Security	CIS 4362	3
---------------------------------------	----------	---

### Required Artificial Intelligence Course

Artificial Intelligence for Cybersecurity	CAI 4802	3
---	----------	---

### Choose two Elective Courses

Introduction to Data Science and Analytics	CAP 4773	3
Introduction to Data Science	CAP 5768	3
Post-Quantum Cryptography	MAD 4475	3
Cryptography of Blockchain	MAD 4776	3
Introduction to Coding Theory	MAD 4605	3
Mathematics for Cybersecurity	MAP 4190	3
Mathematics for Cryptography	MAS 4206	3
Computational Statistics	STA 3100	3
Probability and Statistics for Engineers	STA 4032	3 or
Probability and Statistics 1	STA 4442	3

## **CYBERSECURITY**

### **UNDERGRADUATE MINOR**

### **UNDERGRADUATE CERTIFICATE**

*(Minimum of 12 credits required)*

Cybersecurity is the study of methods to ensure information and system security. Industry and government need an educated workforce to serve as information and systems security analysts, security and network administrators and more. Due their extensive expertise and facilities, the departments of Information Technology and Operations Management (in the College of Business), Electrical Engineering and Computer Science (In the College of Engineering and Computer Science) and Mathematics and Statistics (in the College of Science) have jointly designed the Cybersecurity Minor and Certificate. Three tracks, each requiring 12 credits, constitute the minor and certificate: Information Technology (IT), Computer Science (CS) and Mathematical Sciences (MS). Details for this certificate program can be found in the [Interdisciplinary Programs](#) section of this catalog.

## **DATA SCIENCE**

### **UNDERGRADUATE CERTIFICATE**

*(Minimum of 15 credits required)*

Data Science is the study of methods to manage, analyze and extract knowledge from data. Industry and government need an educated workforce with the necessary expertise to make use of the enormous volumes of data available to them. Due to their extensive expertise and facilities, the departments of Mathematics and Statistics and Electrical Engineering and Computer Science have jointly designed the Data Science certificate. This 15-credit certificate program has two tracks: Mathematical Sciences (MathSci) and Computer Science and Analytics (CS). The Data Science certificate draws the 15 credits from Computer Science, Mathematics and Statistics. Details for this certificate program can be found in the [Interdisciplinary Programs](#) section of this catalog.

## COMBINED PROGRAMS

### COMPUTER ENGINEERING

BACHELOR OF SCIENCE IN COMPUTER ENGINEERING (B.S.C.E.) TO  
MASTER OF SCIENCE (M.S.)  
COMBINED PROGRAM

### COMPUTER SCIENCE

BACHELOR OF SCIENCE IN COMPUTER SCIENCE (B.S.C.S.) TO MASTER OF  
SCIENCE (M.S.)  
COMBINED PROGRAM

The department offers a combined Bachelor of Science in Computer Engineering (B.S.C.E.) to Master of Science (M.S.) program. In the computer science area, it offers a combined Bachelor of Science in Computer Science (B.S.C.S.) to Master of Science (M.S.) degree program. The bachelor's degrees and the master's degrees must be in the same area. Students in either combined program may count up to 12 credits of approved graduate coursework (5000 level or higher) toward both their bachelor's and master's degrees as long as the combined program totals a minimum of 150 credits:

1. The student has met the minimum 120 credits for the bachelor's degree; and
2. The student has taken a minimum of 30 credits in 5000 level or higher courses for the master's program.

With an approximate duration of five years, these combined programs provide attractive ways for students to continue their graduate work. Students complete the undergraduate program first.

## Prerequisite Coursework for Transfer Students

Students transferring to Florida Atlantic University must complete both lower-division requirements (including the requirements of the General Education Program) and requirements for the college and major. Lower-division requirements may be completed through the A.A. degree from any Florida public college, university or community college or through equivalent coursework at another regionally accredited institution. Before transferring and to ensure timely progress toward the baccalaureate degree, students must also complete the prerequisite courses for their major as outlined in the *Transition Guides*.

All courses not approved by the Florida Statewide Course Numbering System that will be used to satisfy requirements will be evaluated individually on the basis of content and will require a catalog course description and a copy of the syllabus for assessment.

## Admission Requirements

To be eligible for the joint programs, computer science and computer engineering students should:

1. Have a cumulative GPA of 3.25 or better at the end of their junior year; and
2. Formally apply to one of the joint programs, completing the admissions process at least one semester prior to the beginning of the M.S. portion of their program.

Once admitted to the program of their choice, students begin taking graduate courses (5000 level or higher) in their senior year that would apply to both the bachelor's and master's degree programs. Students in the joint programs must maintain continuous enrollment to remain in good standing. Students must also meet all the degree requirements of the graduate program they have chosen, including core courses and prerequisites. Those students who complete the M.S. degree program within one year after completing their B.S.C.E. or B.S.C.S. degree program will be presented with a certificate of recognition.

**COMPUTER ENGINEERING TO ARTIFICIAL INTELLIGENCE**  
**BACHELOR OF SCIENCE IN COMPUTER ENGINEERING (B.S.C.E.) TO**  
**MASTER OF SCIENCE (M.S.)**  
**COMBINED PROGRAM**

**COMPUTER SCIENCE TO ARTIFICIAL INTELLIGENCE**  
**BACHELOR OF SCIENCE IN COMPUTER SCIENCE (B.S.C.S.) TO MASTER OF**  
**SCIENCE (M.S.)**  
**COMBINED PROGRAM**

The department offers a combined Bachelor of Science in Computer Engineering (B.S.C.E.) or Bachelor of Science in Computer Science (B.S.C.S.) to Master of Science in Artificial Intelligence (M.S.A.I.) program. Students in either combined program may count up to 12 credits of approved graduate coursework (5000 level or higher) toward both their bachelor's and master's degrees as long as the combined program totals a minimum of 150 credits:
